## NOTES

ABOUT THIS PUBLICATION	This publication contains preliminary estimates of the resident population by age and sex in Statistical Local Areas and Local Government Areas in the Northern Territory at June 2000.																				
FINAL ISSUE	This is the final issue of <i>Population by Age and Sex, Northern Territory</i> (Cat. no. 3235.7). In future years the age-sex data will be made available electronically in a SuperTABLE dataset or as companion data in AusStats. Data at all levels within the Australian Standard Geographical Classification main structure will be included, as well as Local Government Areas. The new companion data will also effectively replace <i>Estimated Resident Population by Age and Sex in Statistical Local Areas, Northern Territory: Data on Floppy Disk</i> (Cat. no. 3227.7) which has already been discontinued.

## SUMMARY OF FINDINGS

---

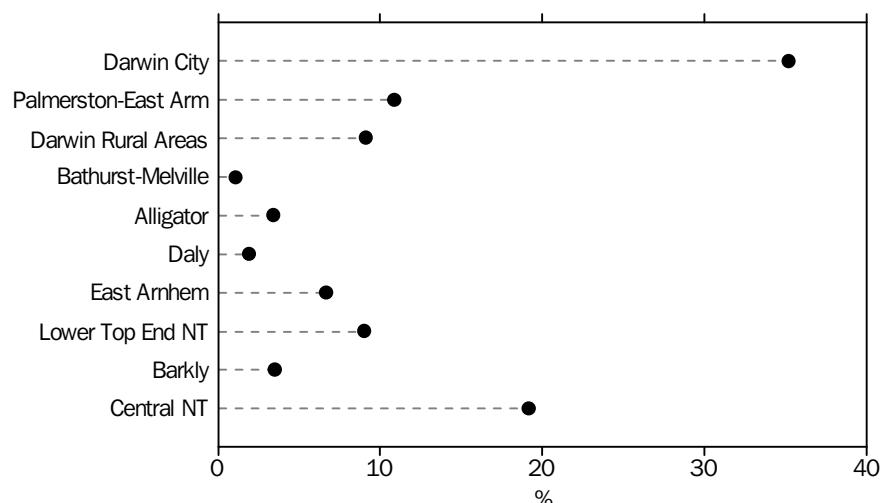

### POPULATION

At the end of June 2000 the estimated resident population of the Northern Territory was 195,500 (1.0% of the Australian population), comprising 103,300 males and 92,100 females. Between June 1999 and June 2000 the Northern Territory population increased by 1.4% (2,700 people).

The majority of people in the Northern Territory (115,600 or 59.1%) lived in the three major urban centres of Darwin City SSD, Palmerston–East Arm SSD and Alice Springs (T). A further 7.1% (13,900) lived in the smaller urban areas of Katherine (T) and Tennant Creek (T), and 9.1% (17,800) lived in Darwin Rural Areas SSD.

By SSD, the greatest proportion of people lived in Darwin City SSD (35.2%), followed by Central NT SSD (19.2%) which includes Alice Springs.

### POPULATION DISTRIBUTION BY STATISTICAL SUBDIVISION

The proportion of the Northern Territory's population living in each SSD was relatively stable between June 1999 and June 2000 with the exception of Palmerston–East Arm SSD which increased from 10.2% to 10.9%. This reflects the continued movement of the population away from Darwin City SSD to this area. The proportion of the Northern Territory's population living in Darwin City SSD declined from 35.5% to 35.2% over the same period.

## SUMMARY OF FINDINGS *continued*

---

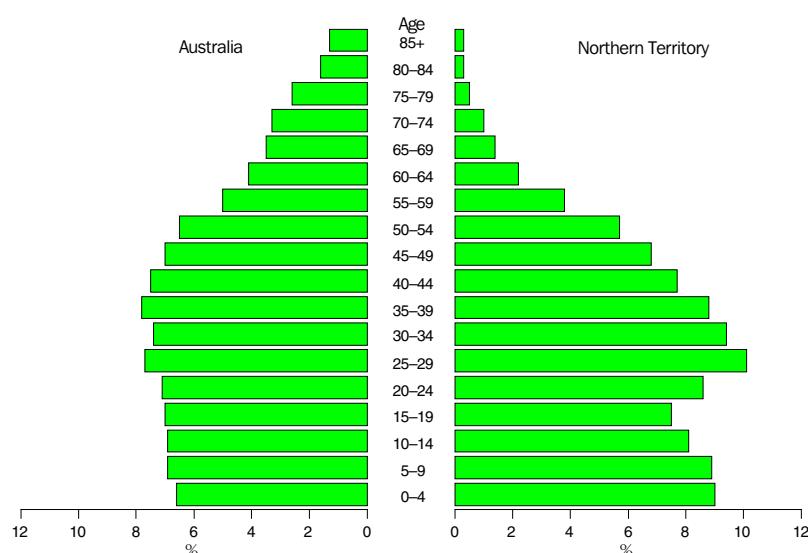

### SEX DISTRIBUTION

The sex ratio for the Northern Territory at June 2000 was 112 males for every 100 females, the same as the sex ratio reported at June 1999. At the end of June 2000, males outnumbered females in all but 5 out of 62 NT SLAs: The Gardens, Wanguri, Moulden, Woodroffe and Sandover — Balance. The highest ratio of males to females occurred in the SLAs of East Arm (which includes a prison) with 467 males per 100 females, Litchfield (S) — Part A (which includes the Robertson Army Barracks) with 307 males per 100 females, and Winnellie (a light industrial area) with 179 males per 100 females.

### AGE STRUCTURE

Over the last 10 years the age structure of the Northern Territory's population has remained quite different from that of the total Australian population. At the end of June 2000 the Northern Territory had the highest proportion of people aged 14 years and under of any State or Territory (26.0% compared with 20.4% nationally). The Northern Territory also had the highest proportion of people aged 20–34 years compared with any State or Territory (28.1% compared with 22.2% nationally). In contrast it had the lowest proportion of people aged 65 years and over (3.5% compared with 12.3% nationally).

### AGE STRUCTURE

The SLA of Sandover — Balance had the highest proportion of people aged 14 years and under (38.8%), followed by the Gulf (36.3%), West Arnhem (35.5%) and East Arnhem — Balance (35.3%). These SLAs have large proportions of Indigenous people.

## SUMMARY OF FINDINGS *continued*

---

### AGE STRUCTURE *continued*

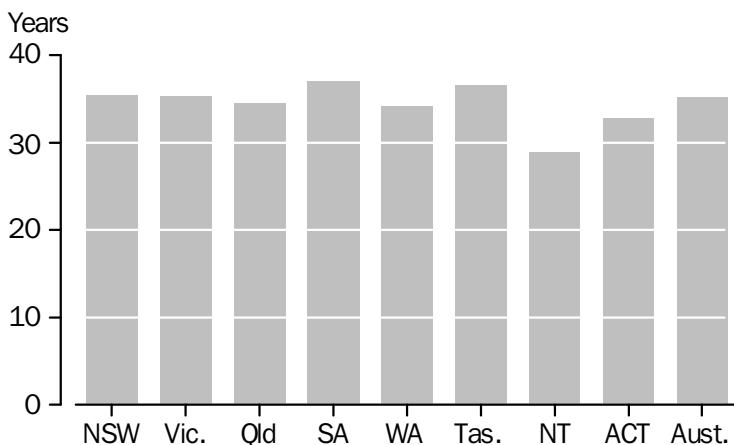

The highest proportion of people aged between 20–34 years (55.6%) was in the SLA of East Arm which includes a prison. Litchfield (S) — Part A had the second highest proportion of people aged between 20–34 years (52.8%) (due largely to the presence of the Robertson Army Barracks), followed by Larrakeyah (40.3%) (which includes the Larrakeyah Army Barracks), Petermann (38.6%), Alice Springs (T) — Stuart (38.2%) and Brinkin (38.1%) (due largely to the presence of Northern Territory University students residing in the area, both on and off campus).

The SLAs with the highest proportion of people aged 65 years and over were all located in Darwin SD: The Gardens (12.7%) (which includes a nursing home), Lee Point—Leanyer Swamp (11.0%) (which comprises mainly caravan park residents), and Narrows (10.6%). In Northern Territory — Bal SD, the SLAs of Cox-Finniss and East Arm recorded high proportions of people aged 65 and over (8.4% and 8.0% respectively).

### MEDIAN AGE

At the end of June 2000 the Northern Territory population had a median age of 29.0 years which was considerably younger than the national median age of 35.2 years.

### MEDIAN AGE

Median age by SLA ranged from a low of 19.7 years in The Gardens (due largely to the presence of St John's College which includes boarders) to a high of 41.9 years in Narrows. Other SLAs with low median ages included East Arnhem—Balance (22.3 years), West Arnhem (22.9 years), Sandover —Balance (23.2 years), Gulf (23.5 years) and Victoria (23.9 years), all areas with large proportions of Indigenous people. SLAs with high median ages included Lee Point—Leanyer Swamp (41.3 years), Parap (38.0 years) and Fannie Bay (36.9 years).

The median age for males and females in the Northern Territory was 29.2 years and 28.7 years respectively, compared with the national median age for males and females of 34.4 years and 35.9 years respectively.

## **EXPLANATORY NOTES .....**

### INTRODUCTION

**1** This publication contains preliminary estimates of the resident population by age and sex in Statistical Local Areas (SLAs) in the Northern Territory at 30 June 2000.

**2** The estimated resident population (ERP) is the official ABS estimate of the Australian population.

### METHODOLOGY FOR DERIVING

#### POPULATION ESTIMATES

**3** The total population of each SLA is based on results of the 1996 Census of Population and Housing and calculated for post-census dates by a linear regression model which uses independent indicators of population change such as dwelling approvals, licensed drivers and Medicare enrolments. These intercensal estimates of the resident population are revised each time a population census is taken.

**4** The age and sex estimates were prepared using the cohort component method. Post-censal age distributions were obtained by advancing the age and sex estimates for 30 June 1996 to the next age, subtracting deaths and adding births and net estimated inter-regional and overseas migration. Inter-regional and overseas migration was estimated from analysis of arrivals and departures data and individual SLA profiles derived from the 1996 Census.

**5** After each census final estimates for the preceding intercensal period are calculated by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase at each age agrees with the difference between the estimated resident population at the two respective census dates.

**6** A detailed explanation of the concept of estimated resident population, as adopted by the ABS for official population estimates, is contained in the publication *Demographic Estimates and Projections: Concepts, Sources and Methods*, Statistical Concepts Library, ABS website <URL: <http://www.abs.gov.au>>.

### GEOGRAPHIC BOUNDARIES

**7** This publication contains data presented according to the geographic boundaries defined in *Australian Standard Geographical Classification (ASGC) 2000* (Cat. no. 1216.0).

## FOR MORE INFORMATION . . .

*INTERNET*

**www.abs.gov.au** the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.

*LIBRARY*

A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.

*CPI INFOLINE*

For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).

*DIAL-A-STATISTIC* For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

### **INFORMATION SERVICE**

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
