(a) Break-in/attempted break-in includes households that were victims of either a break-in or an attempted break-in, or both. Therefore the figures for break-in/attempted break-in are less than the sum of break-in and attempted break-in figures. (b) Victimisation rate is the number of victim households in a particular category expressed as a percentage of the total victims in that category. (c) Includes 'not stated'. (d) Refers to mainly urban areas only.

(a) Break-in/attempted break-in includes households that were victims of either a break-in or an attempted break-in, or both. Therefore the figures for break-in/attempted break-in are less than the sum of break-in and attempted break-in figures. (b) Components sum to more than the total as respondents could indicate more than one item.

(c) Refers to mainly urban areas only.

(a) Break-in/attempted break-in includes households that were victims of either a break-in or an attempted break-in, or both. Therefore the figures for break-in/attempted break-in are less than the sum of break-in and attempted break-in figures. (b) Households living in flats/units were not asked this question. (c) Components sum to more than the total as respondents could indicate more than one response. (d) Refers to mainly urban areas only.

(a) Victimization rate is the number of victim households in a particular category expressed as a percentage of the total victims in that category. (b) Households living in flats/units were not asked this question. (c) Components sum to more than the total as respondents could indicate more than one response. (d) Break-in/attempted break-in includes households that were victims of either a break-in or an attempted break-in, or both. Therefore the figures for break-in/attempted break-in are less than the sum of break-in and attempted break-in figures.

1 Note: MSR is the Major Statistical Region. SR is the Statistical Region. (a) Break-in/attempted break-in includes households that were victims of either a break-in or an attempted break-in, or both. Therefore the figures for break-in/attempted break-in are less than the sum of break-in and attempted break-in figures. (b) Previously Manly-Warringah (SR). (c) Victimization rate is the number of household victims in a particular category expressed as a percentage of the total victims in that category.
