SEPTEMBER QTR KEY POINTS

SUMMARY

- Total demand for credit by non-financial domestic sectors was \$26.5 billion during the September quarter 1999, up \$10.7 billion on June quarter 1999 and the strongest since the December quarter 1997.

NON-FINANCIAL CORPORATIONS

- Private non-financial corporations raised a net \$17.9 billion during the quarter, the strongest since the June quarter 1998. These raisings included \$11.6 billion in shares, \$5.0 billion in loans and \$1.4 billion in bonds offset by a \$0.2 billion reduction in the drawings of bills of exchange.

GENERAL GOVERNMENT

- National general government raised \$0.9 billion with a \$1.3 billion increase in the net issuance of one name paper being partly offset by a \$0.5 billion decrease in bonds. State and local general government repaid a net \$0.5 billion in the form of loans during the quarter.

HOUSEHOLDS

- Households raised a net \$9.3 billion during September quarter 1999 in the form of loans, bringing total household debt to \$419.1 billion at the end of the quarter. Household demand for credit was a little weaker than in the preceding three quarters.

CHANGES IN THIS ISSUE

During the September quarter 1999 the Barley Board, Wheat Board and Wool International were privatised by returning control to growers. Statistics published in this issue reflect these changes.

REVISIONS IN THIS ISSUE

There have been changes in data sources and compilation methods which have resulted in significant revisions to previously published statistics.

Data for listed shares on issue have been revised from December 1997 following further consultation with the ASX. Revisions to classification of issuers, amounts on issue and net transactions have been made, reconciling the data in this publication with ASX data.

Following consultation with providers there have been revisions to data provided by public unit trusts, life insurance companies and superannuation funds.

Data sourced from the survey of international investment incorporates revisions from the September 1997 quarter.

ANALYSIS AND COMMENTS: Sectoral Summary

INTERSECTORAL FINANCIAL FLOWS AND CLAIMS

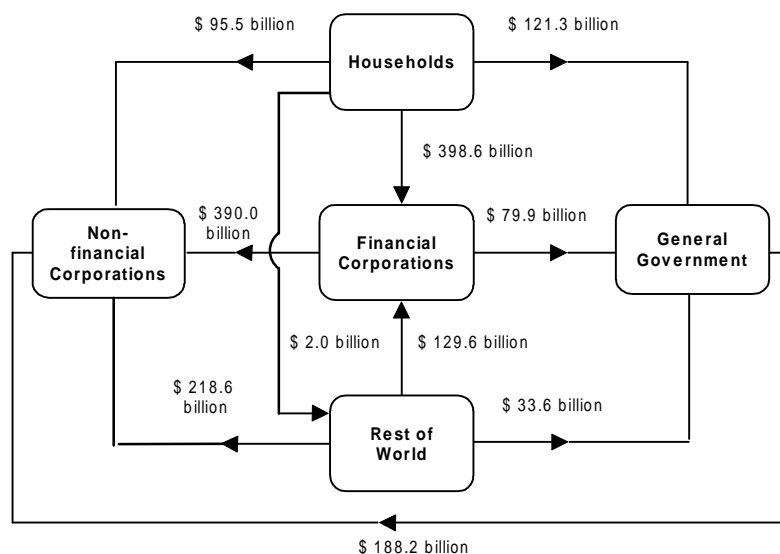

FLows DURING SEPTEMBER QUARTER 1999

The strength and direction of inter-sectoral flows during the September quarter 1999 are illustrated in the diagram below. The main feature of this diagram is the \$7.9 billion flow from rest of world to financial corporations. Other large net flows which occurred during the quarter are to non-financial corporations from rest of world (\$4.0 billion), from households (\$4.4 billion) and from financial corporations (\$4.2 billion).

CLAIMS AT END OF SEPTEMBER QUARTER 1999

The value and direction of inter-sectoral financial claims at the end of September quarter 1999 are illustrated in the accompanying diagram. The largest claim is that of households on financial corporations of \$398.6 billion. Households also had claims on general government of \$121.3 billion (mainly unfunded superannuation claims). All sectors had net claims on the non-financial corporations sector: financial corporations claims were \$390.0 billion; rest of the world \$218.6 billion; general government \$188.2 billion; and households \$95.5 billion.

FINANCIAL MARKET ANALYSIS

Deposit liabilities increased to \$514.7 billion at 30 September 1999, with net transactions of \$1.7 billion. A \$9.0 billion increase in bank deposits was offset by decreases in deposits with central bank as well as non-resident deposits.

Short term debt security liabilities increased to \$246.1 billion at 30 September 1999 following net issues of \$7.9 billion of these securities during the September quarter. A net issuance of one name paper of \$8.7 billion was partly offset by redemption of bills of exchange during the quarter of \$0.8 billion.

Bond liabilities decreased to \$345.9 billion at 30 September 1999, due to net redemptions of \$0.7 billion during the quarter. A net redemption of bonds issued by central borrowing authorities of \$4.2 billion was the most significant contributor to the overall result.

The value of derivative contracts on issue at 30 September 1999 increased to \$44.5 billion due to marginal increases for most contributing sectors and a small valuation effect of \$0.3 billion.

Loan liabilities rose to \$1026.6 billion at 30 September 1999, with net transactions of \$12.9 billion during the quarter. Borrowings by households and private non-financial corporations of \$9.3 billion and \$5.2 billion respectively contributed significantly to the overall result.

The listed share market fell to \$628.7 billion at 30 September 1999. Net issues of \$12.0 billion were offset by valuation changes of \$18.0 billion. The most significant contribution to this increase was a net issue of \$10.9 billion by private non-financial corporations. Valuation effects were most pronounced for the national public non-financial corporations shares and bank shares.

The unlisted share market rose to \$506.6 billion at 30 September 1999, with net transactions of \$7.8 billion being partly offset by valuation changes of \$5.3 billion.

At 30 September 1999 the reserves of life offices and pension funds were \$425.2 billion following net transactions during the quarter of \$4.4 billion and valuation changes of

SECTORAL ANALYSIS

NON-FINANCIAL CORPORATIONS

SUMMARY

Private non-financial corporations borrowed a net \$6.4 billion in the September quarter 1999. They borrowed \$5.0 billion in the form of loans and issued \$1.5 billion in debt securities. New share issues raised a net \$11.5 billion during the quarter. These transactions raised total debt outstanding to \$323.6 billion and total equity on issue to \$466.5 billion.

During the September quarter 1999, total liabilities of national public non-financial corporations decreased by \$10.8 billion to \$127.7 billion. The decrease was mainly due to valuation effect of listed shares and other equity and marginally to privatisations. Liabilities of state and local public non-financial corporations decreased to \$144.8 billion at the end of the September 1999.

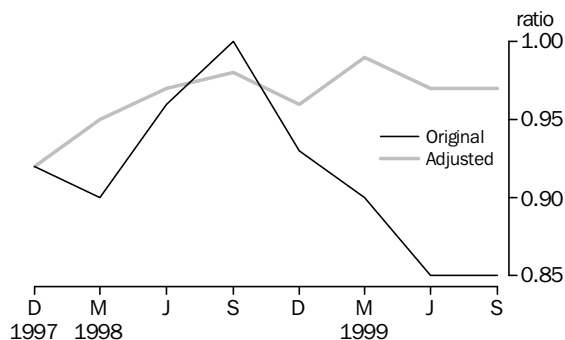

PRIVATE NON-FINANCIAL CORPORATIONS NET ISSUE OF LIABILITIES

During the September quarter 1999 private non-financial corporations raised \$11.5 billion in new capital through equity issues and \$6.4 billion in net borrowing.

PRIVATE NON-FINANCIAL CORPORATIONS DEBT TO EQUITY RATIO

Debt outstanding has remained steady during the period December 1997 to September 1999. The value of equity on issue has increased by \$87.0 billion. This has led to a decline in the debt to equity ratio in original terms for the September quarter 1998 to the June quarter 1999. After the adjustments for valuation effects using December 1997 as the start point, the ratio has remained relatively steady.

SECTORAL ANALYSIS

FINANCIAL CORPORATIONS

SUMMARY

Bank funding increased by \$5.9 billion in the September quarter 1999. The largest contributing increases were \$4.7 billion in currency and deposits and \$2.1 billion in loans and placements. These were partly offset by net redemptions of bonds of \$1.9 billion.

Financial assets of banks increased by \$10.4 billion during the quarter. This was primarily due to new loans and placements of \$9.2 billion during the quarter, of which \$5.5 billion were made to households and \$4.6 billion to private non-financial corporations. Purchases of one name paper of \$3.0 billion were made during the quarter.

Banks' currency and deposit assets fell by \$5.8 billion in the quarter. Of this total, \$5.3 billion was withdrawn from the central bank. This reflects the abolition in July of the legislative requirement for banks to hold non-callable deposits with the Reserve Bank of Australia. Falls in bank and other sector deposits with the central bank were partly offset by a \$1.5 billion increase in national general government deposits, bringing the total reduction in central bank liabilities to \$3.9 billion.

The funding of other depository corporations increased by \$3.6 billion during the September quarter. This was mainly due to increased funding from non-resident sources, with a \$2.5 billion increase in bonds issued offshore. Total financial assets of other depository corporations increased by \$4.7 billion, with \$2.0 billion contributed by deposits. Purchases of \$1.6 billion of domestically issued bonds and \$1.4 billion of one name paper were made during the quarter.

At the end of the September quarter 1999 the net equity in reserves of life offices was \$58.1 billion, following net withdrawals of \$0.8 billion during the quarter. The \$4.5 billion decrease in net funding of life offices was largely attributed to repayments in other accounts payable of \$2.3 billion and a decrease of \$1.2 billion in the net equity of pension funds in life office reserves. Total financial assets decreased by \$4.6 billion, due mainly to a \$2.3 billion decrease in other accounts receivable and a reduction in holdings of one name paper of \$2.0 billion. Net purchases of equities were \$2.0 billion.

The net equity in reserves of pension funds was \$367.1 billion at the end of the quarter, following net transactions of \$5.2 billion. Financial assets grew by \$5.1 billion over the quarter, mainly due to purchases of equities of \$8.1 billion. The main decrease in financial assets was \$1.8 billion in holdings of one name paper.

The funding of other insurance corporations increased by \$0.9 billion during the September quarter 1999. The increase was attributable to an increase of \$1.3 billion in prepayments of premiums and reserves.

Total liabilities of central borrowing authorities decreased by \$2.3 billion to \$93.3 billion at the end of the quarter. Redemptions of bonds contributed \$2.7 billion to this total. Net issues of one name paper of \$2.1 billion only partly offset these redemptions. Total financial assets decreased by \$2.3 billion, the largest decrease being a \$1.0 billion reduction in holdings of bills of exchange accepted by banks.

SECTORAL ANALYSIS

FINANCIAL CORPORATIONS continued

Financial intermediaries n.e.c. increased funding by \$3.6 billion in the September quarter. New issues of bonds in Australia contributed \$2.1 billion to this total, while unlisted shares and other equity contributed \$1.5 billion. The increased funding partly financed a net increase in new loans of \$4.5 billion, which consisted of increased loans to households of \$4.3 billion and a decrease of \$0.4 billion in loans to private non-financial corporations. Other increases in financial assets included new purchases of equity of \$1.4 billion and one name paper of \$1.2 billion. Overall, total financial assets of financial intermediaries increased by \$5.1 billion during the quarter.

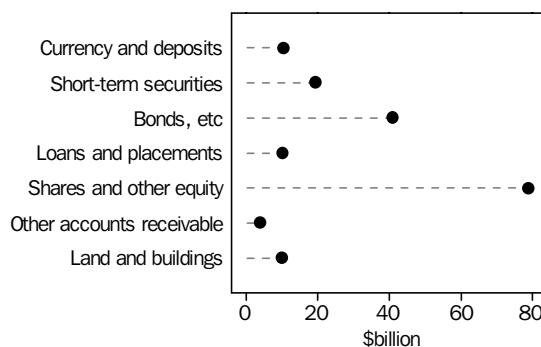

NET FLOW OF CURRENCY AND DEPOSITS TO BANKS

The net value of currency and deposits placed with banks during the September quarter 1999 was \$4.7 billion. This was mainly attributable to increased deposits by other depository corporations of \$2.9 billion, private non-financial corporations of \$2.6 billion and rest of the world \$1.0 billion. Most other sectors made withdrawals during the quarter.

ASSET PORTFOLIO OF LIFE INSURANCE CORPORATIONS AT END OF QUARTER

The graph below shows that at the end of September quarter 1999 life offices held \$78.8 billion in shares and other equity (48% of their financial assets), of which \$58.2 billion was in resident companies and \$20.6 billion in non-resident companies; \$40.9 billion in bonds (25% of their financial assets), of which \$34.2 billion was in Australian bonds and \$6.7 billion in non-resident bonds; and \$14.2 billion in one name paper (9% of their financial assets).

SECTORAL ANALYSIS

FINANCIAL CORPORATIONS continued

ASSET PORTFOLIO OF PENSION FUNDS AT END OF QUARTER

The graph below shows that at the end of September quarter 1999 pension funds held \$165.3 billion in shares and other equity (47% of their financial assets), of which \$121.0 billion was in resident companies and \$43.3 billion in non-resident companies. They held \$92.7 billion of net equity in pension funds and life office reserves (26% of their financial assets); and \$28.8 billion in bonds (8% of their financial assets), of which \$25.7 billion were Australian bonds and \$3.1 billion were non-resident bonds.

ASSET PORTFOLIO OF OTHER INSURANCE CORPORATIONS AT END OF QUARTER

The graph below shows that at the end of September quarter 1999 other insurance corporations held \$20.5 billion in shares and other equity (33% of total financial assets), of which \$17.9 billion was in resident companies and \$2.6 billion in non-resident companies; and \$14.6 billion in bonds (24% of total financial assets), of which \$12.6 billion were Australian bonds and \$2.0 billion were non-resident bonds.

SECTORAL ANALYSIS

FINANCIAL CORPORATIONS continued

CENTRAL BORROWING AUTHORITIES NET ISSUE OF DEBT SECURITIES

The graph below illustrates that during the September quarter 1999 central borrowing authorities made a net issue of one name paper of \$2.1 billion and a net redemption of bonds of \$3.7 billion.

FINANCIAL INTERMEDIARIES N.E.C. NET ISSUE OF DEBT SECURITIES

The graph below illustrates that during the September quarter 1999 financial intermediaries n.e.c. made net issues of bonds of \$1.7 billion and short term securities of \$1.2 billion.

SECTORAL ANALYSIS

GENERAL GOVERNMENT

SUMMARY

During the September quarter 1999, general government transactions resulted in a net change in financial position of \$1.6 billion, see Table 33H.

National general government increased its liabilities by \$1.5 billion in the September quarter 1999, and increased its financial assets by \$1.3 billion to record a net change in financial position of -\$0.2 billion, see Table 29 and the graph below. Assets increased mainly due to a \$1.5 billion increase in currency and deposits accepted by the central bank. Liabilities increased mainly due to an issue of \$1.3 billion of one name paper in Australia. At the end of September quarter 1999 national general government had total financial liabilities of \$206.6 billion and total financial assets of \$133.7 billion.

State and local general government financial assets fell by \$1.5 billion in the September quarter 1999. This was mostly due to a decrease of \$1.1 billion in loans and placements with financial intermediaries. Total financial liabilities decreased by \$0.1 billion, resulting in a net change in financial position of -\$1.5 billion. At the end of September quarter 1999, state and local general government had total liabilities of \$110.2 billion and total financial assets of \$126.8 billion.

CHANGE IN FINANCIAL POSITION

NATIONAL GOVERNMENT NET ISSUE OF DEBT SECURITIES

The accompanying graph reflects the national general government's continuing repayment of bonds, with net redemptions of \$0.5 billion in treasury bonds during the September 1999 quarter. Short term debt security liabilities increased over the quarter, with treasury notes on issue increasing by \$1.3 billion.

SECTORAL ANALYSIS

HOUSEHOLDS

SUMMARY

During September quarter 1999 households borrowed a net \$9.3 billion in loans and placements. Deposits with banks decreased by \$0.3 billion to \$181.2 billion. Net deposits with other depository corporations increased by \$2.0 billion to \$50.4 billion.

Households made net acquisitions of equities of \$2.9 billion in the quarter, primarily due to the purchases of shares issued by private non-financial corporations of \$5.0 billion following sales of shares in the majority of other sectors.

At the close of the September 1999 quarter households' stock of financial assets was \$1,072.0 billion. Net equity in reserves of life insurance corporations and pension funds accounted for 40% of this total. Currency and deposits accounted for 23% and equity issued by domestic companies accounted for 17%.

HOUSEHOLD NET BORROWING

During the September quarter 1999 households borrowed \$9.3 billion, of which \$5.5 billion was in the form of loans from banks. This borrowing raised the level of household loan liabilities to \$301.3 billion at the close of the quarter.

INSURANCE AND PENSION CLAIMS

During the September quarter 1999 households increased net equity in the reserves of pension funds by \$5.2 billion, as shown below. There was an increase of \$2.7 billion in net equity in reserves of pension funds due to valuation changes, bringing household net equity in pension funds to \$367.1 billion.

Net equity in reserves of life insurance corporations decreased by \$0.8 billion to \$58.1 billion at the close of the September quarter 1999. Households' unfunded superannuation claims increased by \$1.0 billion during the quarter. Prepayments of premiums and claims against reserves in general insurance corporations increased by \$0.7 billion.

SECTORAL ANALYSIS

REST OF THE WORLD

SUMMARY

Non-residents invested a net \$10.1 billion in Australian financial assets during the September quarter 1999. The largest net purchase was equities of \$3.6 billion, one name paper of \$3.0 billion and holdings of bills of exchange of \$2.2 billion. Overall, the value of Australian financial assets held by non-residents increased to \$632.4 billion at the end of the quarter.

Australian residents increased their holdings of foreign financial assets by \$0.4 billion during the September quarter 1999. The major transactions were a net purchase of equity of \$3.3 billion, and a net decrease in currency and deposits of \$3.6 billion. Overall, the total value of foreign assets held by Australian residents increased to \$274.0 billion.

NET PURCHASES OF EQUITIES

The accompanying graph shows that during the September quarter 1999 non-residents purchased a net \$3.6 billion in equities, a decrease of \$3.0 billion compared with the June quarter 1999.

NET PURCHASES OF BONDS

The accompanying graph shows that net transactions by non-residents holding Australian bonds were zero for the September quarter 1999. This is a significant change from the \$5.7 billion purchases recorded in the previous quarter.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains financial profiles of each subsector of the economy and the market for each conventional financial instrument. There are also tables showing inter-sectoral financial transactions and measures of sectoral financial surpluses and deficits.

2 Financial accounts of various types—which are also called flow of funds statistics—are published by many OECD countries, including the United States (from 1945), the United Kingdom (from 1952) and Canada (from 1962). In Australia, the Reserve Bank produced annual flow of funds accounts for the reference years 1953–54 to 1988–89. The final edition of these was published in the Reserve Bank's Bulletin for November 1989. The Australian Bureau of Statistics (ABS) has published quarterly estimates commencing with experimental estimates of inter-sectoral financial transactions for the March and June quarters 1989.

CONCEPTS, SOURCES AND METHODS

3 From the September quarter 1998 the ABS financial accounts have been produced according to a revised international standard, the *System of National Accounts*, released in 1993 (SNA93) under the auspices of five international organisations: Commission of the European Communities—Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and World Bank. There are significant conceptual differences between the SNA93-based ABS Financial Accounts and the previous Financial Accounts (see ABS Information Paper Cat. no. 5254.0).

4 The ABS is currently preparing an updated version of *Australian National Accounts: Concepts, Sources and Methods* (Cat. no. 5216.0), which will provide detailed descriptions of the concepts, data sources and methodologies used in compiling the Australian national accounts, including the financial accounts, on an SNA93 basis. The document is expected to be released in late 1999. Selected concepts, sources and methods are outlined below. More detailed explanations can be obtained from the contact on the front cover of this publication.

STOCK AND FLOW CONCEPTS

5 Tables 1 to 16 and 34 to 41 present balance sheet data at market prices at the end of each calendar quarter. Balance sheet data are also known as stock, level or position data. In contrast Tables 17 to 33 show net inter-sectoral financial transactions during the quarters. These are flow data. In this publication, the net transactions or flows, are defined as active dealing in a financial instrument.

THE CLASSIFICATION OF INSTITUTIONAL SECTORS AND SUBSECTORS

6 The institutional sectors are based on the *Standard Economic Sector Classifications of Australia 1998* (Cat. no. 1218.0) and are the same as the sectors used in national income and expenditure accounts.

7 The basic unit that is classified by sector is the institutional unit, which is defined as an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and transactions with other entities.

SOURCES OF DATA

8 Most of the financial data in this publication are derived from statistical surveys conducted by the ABS. Some other data sources are used, particularly for valuation adjustments.

9 The quarterly sectoral capital accounts in the flow of funds matrices are prepared using a variety of indicators to dissect annual estimates based on survey data. Some of the indicators used are known to be of poor quality, these are footnoted in tables to note the quality concerns and should be used with caution.

COMPILATION METHODS

10 The levels (stock) tables are prepared by gathering together balance sheet information from various sources and selecting the better estimates. A choice is often possible because different data sources provide alternative or *counterpart* measures of the same item. For example, borrowing by State owned non-financial corporations will be reported by the State central borrowing authorities or Treasuries as assets and by the non-financial corporations as liabilities. The sub-sector aggregates derived from these data do not agree because the ABS does not survey all State owned non-financial corporations. In this case, the data from the central borrowing authorities and Treasuries are therefore used to estimate both the asset and liability aspects of these borrowings.

11 In some cases, transactions data are directly-collected. In other cases transactions must be derived from the difference in consecutive levels. These net financial transactions are derived by taking the difference between closing and opening levels of balance sheet items and, where possible, eliminating changes on the balance sheet caused by valuation effects such as exchange rate movements.

ACCOUNTING BASIS

12 SNA93 states explicitly that the national accounts should record transactions on an accrual basis (as opposed to a cash or 'due for payment' basis), to reflect the time when economic value is transferred rather than when cash relating to the transaction is paid or falls due for payment. For practical reasons complete implementation of accrual accounting throughout the national accounts is not yet possible. Some areas where accrual accounting has not been adopted include:

- accrual of household income tax; and
- accrual of certain employee entitlements, including recreation and long service leave.

13 In these statistics tradeable securities, which include shares listed on ASX and debt securities traded on organised markets, are valued at market prices.

14 Other securities are assigned estimated market values. For example, equity not listed on ASX is valued on the basis of value of total assets of the enterprise in question less the value of any repayable liabilities.

15 Deposits, loans and other accounts payable/receivable are recorded at their face value.

16 Net equity of pension funds in life office reserves are valued on the basis of market value of total assets (including non financial assets) of the funds less any repayable liabilities.

EXPLANATORY NOTES *continued*

RELATED STATISTICS

17 Related ABS publications which may also be of interest include:

- *Australian National Accounts: National Income, Expenditure and Product* (Cat. no. 5204.0)—issued annually;
- *Australian National Accounts: National Income, Expenditure and Product* (Cat. no. 5206.0)—issued quarterly;
- *Australian National Accounts: Concepts, Sources and Methods* (Cat. no. 5216.0)—latest issue, 1990;
- *Balance of Payments and International Investment Position, Australia* (Cat. no. 5302.0)—issued quarterly;
- *Balance of Payments and International Investment Position, Australia* (Cat. no. 5363.0)—issued annually;
- *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (Cat. no. 5331.0)—latest issue, 1998;
- *Government Financial Estimates, Australia* (Cat. no. 5501.0)—issued annually
- *Public Sector Financial Assets and Liabilities, Australia* (Cat. no. 5513.0)—issued annually;
- *Managed Funds, Australia* (Cat. no. 5655.0)—issued quarterly;
- *Information Paper: Upgraded Australian National Accounts: Financial Accounts* (Cat. no. 5254.0);
- *Information paper: Upgraded Australian National Accounts* (Cat. no. 5253.0);
- *Standard Economic Sector Classifications of Australia (SESCA) 1998* (Cat. no. 1218.0)—latest issue, 1998.

UNPUBLISHED INFORMATION

18 The ABS has available on request unpublished stock data back to the December quarter 1988 and transactions flow data back to the March Quarter 1989. Also, different views of the data are available.

19 In addition to catalogued products, some priced special data reports are available covering bank lending to households and unincorporated businesses, public sector debt and net financing requirement, detailed sectoral capital account data, housing loans outstandings by type of lending institution, and details of households' deposits with banks.

20 A more extensive set of explanatory notes and a glossary relevant to the financial accounts are available from the contact on the front of this publication.

21 Inquiries should be made to the contact on the front cover of this publication.

EFFECTS OF ROUNDING

22 Any discrepancies between totals and sums of components in the tables are caused by rounding.
