TREND ESTIMATES

- The provisional trend estimate of the balance on goods and services was a deficit of \$1,713m in December 2005, an increase of \$21m on the revised deficit in November.
- Goods and services credits rose \$217m (1%) to \$15,590m. Goods and services debits rose
 \$238m (1%) to \$17,303m.

SEASONALLY ADJUSTED ESTIMATES

- In seasonally adjusted terms, the balance on goods and services was a deficit of \$1,168m in December, a decrease of \$1,305m on the revised deficit in November.
- Goods and services credits rose \$1,084m (7%) to \$16,268m. Non-rural and other goods rose \$976m (10%) and rural goods rose \$109m (5%). Services credits fell \$1m.
- Goods and services debits fell \$221m (1%) to \$17,436m. Capital goods fell \$154m (4%), intermediate and other goods fell \$125m (2%) while consumption goods rose \$2m. Services debits rose \$56m (2%).

ORIGINAL ESTIMATES

- In original terms, the December balance on goods and services was a deficit of \$237m, a decrease of \$2,908m on the deficit in November. Goods and services credits rose
 \$1,695m (11%) while goods and services debits fell \$1,213m (7%).
- The 2005 calendar year deficit on goods and services was \$19,397m, a decrease of \$6,177m on the deficit in 2004. The goods deficit was \$17,879m and the services deficit was \$1,518m.

REVISIONS

Revisions were made to incorporate the latest available data relating to merchandise trade and trade in services.

In original terms, these revisions have:

- decreased the deficit on goods and services for November 2005 by \$21m
- increased the deficit for the five months to November 2005 by \$25m.

MEDIA RELEASE

A media release 5368.0 Clarification re International Trade in Goods and Services, Australia was released on 11 January 2006 on the ABS web site. This release provided some further clarification and background material after the large November 2005 movement in imports estimates.

FEATURE ARTICLE

A feature article on *Australia's International Trade in Services by Partner Country*, 2005 will be released on the ABS web site http://www.abs.gov.au on 13 February 2006. The article provides preliminary calendar year data for 2005 for Australia's international trade in services with selected major trading partners. As the data is preliminary, care should be exercised in interpreting the data. More comprehensive and updated estimates for 2005 will be published with the March 2006 issue of *International Trade in Goods and Services, Australia* (cat. no. 5368.0).

To access this article on the web site select *Themes* then *Economy* then *International Trade* then *Topics of Interest*.

ANALYSIS AND COMMENTS

BALANCE ON GOODS AND SERVICES

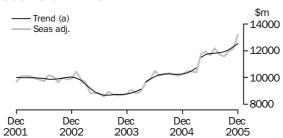

The trend estimate of the balance on goods and services in December 2005 was a deficit of \$1,713m, an increase of \$21m on the deficit in November.

In seasonally adjusted terms, the balance on goods and services in December 2005 was a deficit of \$1,168m, a decrease of \$1,305m on the deficit in November.

The sum of the seasonally adjusted balances for the three months to December 2005 was a deficit of \$5,012m, an increase of \$976m on the deficit of \$4,036m for the three months to September 2005. However, when applying the seasonal factors used in compiling the quarterly Balance of Payments, the December quarter 2005 deficit was \$4,371m, an increase of \$59m on the revised September quarter 2005 deficit of \$4,312m.

Exports of goods

GOODS CREDITS

(a) Trend breaks of \$600m have been applied to April 2005 and \$300m to April 2004.

RURAL GOODS

The trend estimate of rural goods exports rose \$7m to \$2,029m.

In seasonally adjusted terms, exports of rural goods rose \$109m (5%) to \$2,095m.

The main movements in the seasonally adjusted components contributing to this rise were:

- Cereal grains and cereal preparations, up \$68m (20%)
- meat and meat preparations, up \$29m (5%)
- other rural goods, up \$14m (2%).

In original terms, exports of rural goods rose \$243m (12%) to \$2,246m.

Cereal and cereal preparations, up \$136m (47%), largely on increased volumes for both barley and wheat exports, and other rural goods, up \$103m (12%), were the main contributors to this rise.

NON-RURAL GOODS

The trend estimate of non-rural goods exports rose \$170m (2%) to \$9,714m.

In seasonally adjusted terms, exports of non-rural goods rose \$483m (5%) to \$10,083m.

The main movements in the seasonally adjusted components contributing to the rise were:

- metal ores and minerals, up \$346m (16%)
- metals (excluding non-monetary gold), up \$181m (22%)
- other manufactures, up \$79m (6%)
- other non-rural, up \$40m (4%).

Exports of goods continued

NON-RURAL GOODS continued

Partly offsetting these effects were:

- transport equipment, down \$58m (12%)
- other mineral fuels, down \$33m (3%).

In original terms, exports of non-rural goods rose \$978m (10%) to \$10,562m. The main components contributing to the rise in exports of non-rural goods were:

- Metal ores and minerals, up \$592m (27%), where the largest increases were in copper ores, up \$357m (304%), with volumes up substantially and prices up 23%, aluminium oxide, up \$78m (21%) and zinc, up \$42m (45%), both largely on increased volumes
- Metals (excluding gold), up \$188m (22%), where the large increase was in aluminium, up \$196m (55%), largely on increased volumes
- Other non-rural, up \$72m (8%), where the largest increase was in beverages, up \$55m (28%).

OTHER GOODS

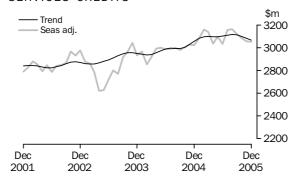

The trend estimate of other goods exports rose \$54m (7%) to \$780m.

In seasonally adjusted terms, exports of other goods rose \$493m (91%) to \$1,036m.

The main movement in the seasonally adjusted components contributing to the rise was non-monetary gold, up \$528m, partly offset by goods for processing, down \$31m.

Exports of services

SERVICES CREDITS

In trend terms, services credits fell \$14m to \$3,067m.

Seasonally adjusted, services credits fell \$1m to \$3,054m.

The main movement in the seasonally adjusted components contributing to this fall was passenger and other services, down \$8m (1%), offset by travel services, up \$6m.

In original terms, services credits fell \$43m (1%) to \$3,111m.

Seasonally adjusted, tourism related services credits rose \$3m to \$1,933m.

IMPORTS OF GOODS AND SERVICES

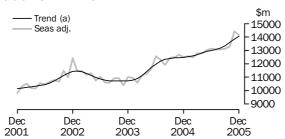

The trend estimate of goods and services debits rose \$238m (1%) between November and December to \$17,303m.

In seasonally adjusted terms, goods and services debits fell \$221m (1%) to \$17,436m. Intermediate and other merchandise goods fell \$218m (4%) and capital goods fell \$154m (4%) while other goods rose \$93m (20%) and consumption goods rose \$2m. Services debits rose \$56m (2%).

Preliminary analysis shows that goods imports volumes, in seasonally adjusted terms, increased about 3.8% during the December quarter 2005. The Chain Laspeyres price index rose about 0.8% and the implicit price deflator rose about 1.0%. The final volume and price outcomes will be published in the December quarter 2005 issue of *Balance of Payments and International Investment Position, Australia* (cat.no. 5302.0).

Imports of goods

GOODS DEBITS

(a) Trend estimates exclude abnormal imports of aircraft in December 2002.

CONSUMPTION GOODS

The trend estimate of imports of consumption goods rose \$62m (1%) to \$4,246m.

In seasonally adjusted terms, imports of consumption goods rose \$2m to \$4,339m.

The most significant increases were in:

- consumption goods n.e.s., up \$22m (2%)
- textiles, clothing and footwear, up \$13m (2%).

The most significant fall was in food and beverages for consumption, down \$32m (6%).

In original terms, imports of consumption goods fell \$689m (14%) to \$4,132m.

CAPITAL GOODS

The trend estimate of imports of capital goods rose \$93m (3%) to \$3,409m.

In seasonally adjusted terms, imports of capital goods fell \$154m (4%) to \$3,402m.

The main components contributing to the fall in the seasonally adjusted estimates were:

- civil aircraft, down \$198m
- ADP equipment, down \$24m (4%)
- capital goods n.e.s., down \$17m (4%).

Partly offsetting these effects were:

- machinery and industrial equipment, up \$59m (5%)
- industrial transport equipment n.e.s., up \$21m (4%).

In original terms, imports of capital goods fell \$398m (10%) to \$3,425m.

Imports of goods continued

INTERMEDIATE GOODS

The trend estimate of imports of intermediate goods rose \$70m (1%) to \$5,934m.

In seasonally adjusted terms, intermediate goods imports fell \$218m (4%) to \$5,861m.

The main movements contributing to the fall in the seasonally adjusted estimates were:

- organic and inorganic chemicals, down \$165m (34%)
- iron and steel, down \$72m (22%)
- paper and paperboard, down \$16m (8%)
- other merchandise goods, down \$16m (19%).

Partly offsetting these effects were:

- processed industrial supplies n.e.s., up \$36m (3%)
- other parts for capital goods, up \$24m (3%).

In original terms, intermediate goods imports fell \$520m (8%) to \$5,703m.

OTHER GOODS

The trend estimate of imports of other goods rose \$1m to \$471m.

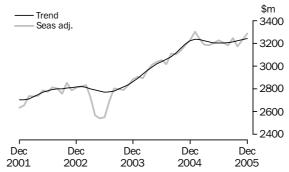

In seasonally adjusted terms, other goods imports rose \$93m (20%) to \$548m.

The main movement contributing to the rise in the seasonally adjusted estimates was goods for processing, up \$95m (34%).

In original terms, other goods imports rose \$94m (21%) to \$547m.

Imports of services

SERVICES DEBITS

In trend terms, services debits rose \$12m to \$3,243m.

Seasonally adjusted, services debits rose \$56m (2%) to \$3,286m.

The movements in the seasonally adjusted components contributing to this rise were:

- travel services, up \$35m (3%)
- transportation services, up \$14m (1%)
- other services, up \$7m (1%).

Seasonally adjusted, tourism related services debits rose \$53m (3%) to \$1,749m.

⁽a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

⁽b) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

⁽c) This component is not seasonally adjusted.

⁽d) From October 1995, this component is not seasonally adjusted.

⁽a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day.

⁽b) May 1970=100. The trade-weighted index is reweighted annually on 1 October and on special occasions if required.

EXPLANATORY NOTES

INTRODUCTION

- **1** This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis and merchandise import and export statistics on a recorded trade basis.
- **2** Merchandise trade statistics on a recorded trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs Service (ACS). Adjustments for coverage, timing and valuation are made to recorded trade data to convert them to a balance of payments basis. The main source for services data is the quarterly Survey of International Trade in Services.
- **3** More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available on AusStats or by subscription to tailored services.

CONCEPTS, SOURCES AND METHODS

- **4** The conceptual framework used in compiling Australia's merchandise trade statistics can be found in *International Merchandise Trade*, *Australia: Concepts*, *Sources and Methods*, *2001* (cat. no. 5489.0).
- 5 The conceptual framework used in compiling Australia's balance of payments statistics is based on the Fifth Edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5,1993). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling the estimates are presented in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0). To bring merchandise trade statistics on a recorded trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by ACS. Adjustments are also made to imports to take account of distortions which arise when significant changes occur in the volume of import entries lodged but not yet processed by ACS in a given month. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on international merchandise trade on a recorded trade basis and on a balance of payments basis.
- **6** Both of the Concepts, Sources and Methods publications are available for free from the ABS web site, see http://www.abs.gov.au select *About Statistics* then *Concepts & Classifications*.

SEASONAL ADJUSTMENT

7 Monthly original estimates are volatile, being subject to calendar-related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing systematic calendar related effects, such as seasonal and trading day influences, from the original series. Trading day effects are removed from the original estimates prior to the seasonal adjustment process. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording. The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted. The merchandise exports and imports statistics on a recorded trade basis are not.

TREND ESTIMATES

8 The month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour because they include irregular or non-seasonal movements. Trend estimates are derived by applying a 13-term Henderson moving average to the seasonally adjusted series. The use of a 13-term Henderson average can result in revisions to the estimates for the most recent six months as additional observations become available. Revisions can also occur because of changes in the original data and as a result of the annual re-estimation of the seasonal factors.

EXPLANATORY NOTES continued

SIGN CONVENTION

9 In keeping with balance of payments conventions, where statistics are on a balance of payments basis, credit entries (exports) are shown without sign and debit items (imports) are shown as negative entries. For statistics on a recorded trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.

COMMODITY BREAKDOWNS
OF GOODS

- **10** For details of the classification used for goods exports on a balance of payments basis (credits), see table 6.6 in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0).
- **11** Details of the classification of goods imports on a balance of payments basis (debits) are provided in table 6.7 in cat. no. 5331.0. Most of the commodity groups shown in table 4 for goods debits are available for more detailed subgroups from AusStats.
- **12** The recorded trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification 2 (SITC). The first section of tables 12 and 13 show the most significant commodities (by value) at the SITC 3 digit level.

COMMODITY BREAKDOWNS
OF SERVICES

- **13** The quarterly detailed services data published in table 11 are consistent with the monthly aggregates shown in table 9.
- **14** Monthly indicators for many of the services components that are only surveyed quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. The estimates for these items shown in table 9 are therefore derived by dividing the quarterly estimate by three. Where quarterly survey data are not available, freight debits are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIFE) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last month's data by an average of movements for the same month over the three previous years.

TOURISM RELATED SERVICES

- **15** The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. These series are not complied on a balance of payments conceptual basis. However, they do provide a reasonable approximation of world tourism related activities.
- 16 The memorandum items have been derived by re-aggregating relevant components of the international trade in services series of the balance of payments accounts. The tourism related indicator has been derived by combining total travel services (business, education-related and other personal travel), passenger fares, and the air transport component of other transportation services which relates to agency fees and commission receipts.

SERVICES BY STATE AND BY PARTNER COUNTRY

- **17** Annual services data by state and by partner country are released twice yearly. Calendar year data are released with the March issue of this publication and financial year data are released with the September issue. The data are available from AusStats.
- 18 Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel and communication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Education, Science and Training. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of

EXPLANATORY NOTES continued

SERVICES BY STATE AND BY PARTNER COUNTRY continued

provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.

19 A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of *Balance of Payments and International Investment Position, Australia - Concepts, Sources and Methods* (cat. no. 5331.0). Approximately 8% of total services credits and 6% of total services debits for 2004–05 are either confidential, or unable to be allocated to individual countries.

RELATED PRODUCTS OR SERVICES

- **20** More detailed balance of payments and recorded merchandise trade data, including forward seasonal factors, are available from AusStats. Very detailed merchandise trade data by commodity, country and state are available by contacting the National Information and Referral Service, as shown on the back of this publication.
- **21** Users may also wish to refer to the following publications which can be downloaded free of charge from the ABS web site:
 - Balance of Payments and International Investment Position, Australia (cat. no. 5302.0) issued quarterly
 - International Merchandise Imports, Australia (cat. no. 5439.0) issued monthly
 - International Trade Price Indexes, Australia (cat. no. 6457.0) issued quarterly
 - Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (cat. no. 5331.0)
 - Information Paper: Quality of Australian Balance of Payments Statistics (cat. no. 5342.0)
 - International Merchandise Trade, Australia: Concepts, Sources and Methods (cat. no. 5489.0)
 - A Guide to Australian Balance of Payments and International Investment Position Statistics (cat. no. 5362.0.55.001).

CAUTIONARY NOTE

22 The tables in this publication are presented on two bases. Tables 1–11 contain estimates of Australia's international trade in goods and services which have been adjusted for coverage, valuation and timing to a balance of payments basis. Tables 12–15 contain estimates of merchandise exports and imports based on Australian Customs Service records. Paragraph 5 of the Explanatory Notes provides an explanation of the difference between these bases.
