#### **NOTES**

**TERMINOLOGY** 

The term State government is used to refer to State or Territory government. The consolidated total of debt of general government, public trading enterprises and public financial enterprises is referred to as government throughout this publication (e.g. the term Commonwealth Government refers to the consolidated total of Commonwealth general government, public trading enterprises and public financial enterprises). This is also termed the public sector or consolidated government as it includes all government bodies. Universities are excluded from statistics for the Commonwealth government and individual State governments but included in the general government sector for Australia.

The term 'national level of government' has been used in this publication to describe the Commonwealth Government plus all universities.

All data are presented for financial years ending at 30 June.

CHANGES IN THIS ISSUE

Commencing with this issue, a revised treatment of public financial enterprises has been introduced in financial assets and liabilities statistics. Previously, public financial enterprises were excluded from the scope of these statistics. However State Central Borrowing Authorities (CBA) were classified as general government entities and included in that sector. In this publication CBAs have been reclassified as public financial enterprises and the scope of the statistics has been extended to include the public financial enterprises sector (see definition of public financial enterprises in paragraph 3 of the Explanatory Notes).

FORTHCOMING CHANGES

This will be the final issue of Public Sector Financial Assets and Liabilities (Cat. no. 5513.0). As part of the forthcoming shift in Government Finance Statistics (GFS) to accrual accounting, the statistics for financial assets and liabilities will be extended to full balance sheet statistics of the public sector in 1999. The release of these balance sheet statistics will be included in the publication Government Finance Statistics (Cat. no. 5512.0), commencing with the 1997–98 issue which is expected to be released in June 1999. Further information on changes to GFS is provided in the information paper Developments in Government Finance Statistics (Cat. no. 5516.0).

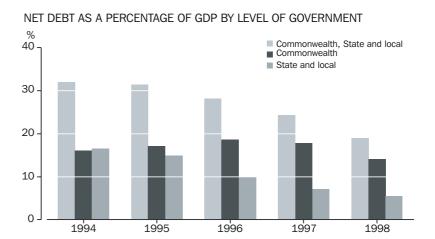

W. McLennan Australian Statistician

#### **SUMMARY OF FINDINGS**

**NET DEBT** 

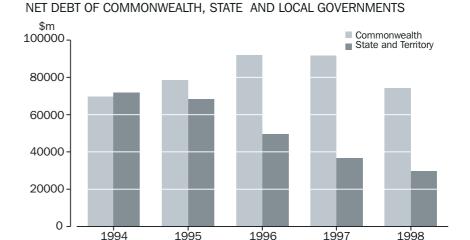

Net debt (liabilities less financial assets) of the consolidated Australian public sector was \$100,511 million at 30 June 1998, a decrease of \$25,034 million (19.9%) on the level of net debt at 30 June 1997 which stood at \$125,545 million. The ratio of the net debt to gross domestic product (GDP) fell from 24.3% at 30 June 1997 to 18.5% at 30 June 1998.

The following graph shows movements in net debt over recent years as a percentage of GDP for the Commonwealth Government and State and local governments.

The National Government (Commonwealth plus Universities) share of the total net debt decreased from 70.7% at 30 June 1997 to 70.5% at 30 June 1998.

The State, Territory and local governments' share of total net debt increased from 29.3% to 29.5%.

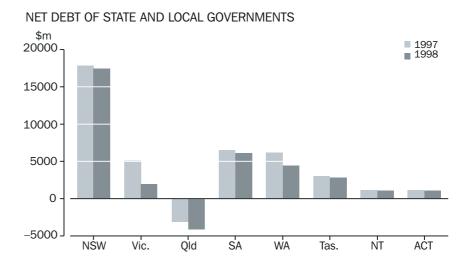

ABS • PUBLIC SECTOR FINANCIAL ASSETS AND LIABILITIES • 5513.0 • 30 JUNE 1998 3

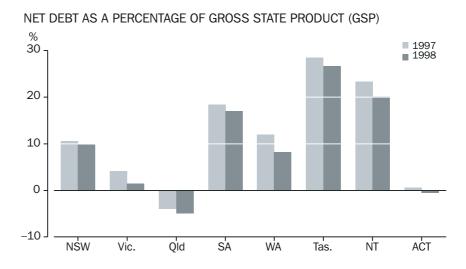

NET DEBT — continued

The net debt of the Commonwealth Government fell by \$17,597 million during the year ended 30 June 1998, comprising a reduction in net debt for the general government sector of \$13,346 million, an increase of \$111m in the public trading enterprise sector and an increase in the net asset position for the public financial enterprise sector of \$4,363 million.

The movements in net debt levels for individual state jurisdictions are illustrated in the graph below.

Net debt as a percentage of gross state product (GSP) fell for all States between June 1997 and June 1998 except for Queensland where there was an increase in that state's net asset position.

NET DEBT — continued

The Commonwealth Government net debt as a percentage of revenue decreased from 69.3% at June 1997 to 52.6% at June 1998. The net debt to revenue ratios fell for each consolidated State and local government except for Queensland where the net asset position increased from 19.4% to 23.4%.

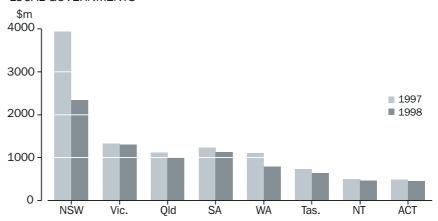

**COMMONWEALTH ADVANCES** 

Commonwealth Government liabilities at 30 June 1998 included \$8,015 million borrowed on behalf of the State, Territory and local governments. This comprised 6.1% of Commonwealth liabilities, compared to 7.0% at 30 June 1997.

Repayments of Commonwealth Government advances were made by all States and Territories during the year ended 30 June 1998. Amounts outstanding on advances received by State, Territory and local governments from the Commonwealth as a percentage of total State, Territory and local government liabilities, decreased from 9.7% at 30 June 1997 to 8.0% at 30 June 1998.

<sup>(</sup>c) Includes loan and debt securities and derivatives in a net asset position. Excludes accounts receivable, prepayments and equities.

<sup>(</sup>d) Gross debt less Total cash, deposits and lending.

<sup>(</sup>f) Financial asset liability data are not available for the Public Financial Enterprises sector for NSW as at 30 June 1993 on a comparable basis to later years due to changes in recording systems that occurred after that date.

Unfunded employee entitlements	n.a	n.a.	n.a.	n.a.	n.a.	n.a.

<sup>(</sup>a) Totals down and across do not always add because holdings of assets and liabilities between categories/sectors cancel out (see paragraphs 22-24 of the Explanatory Notes).

<sup>(</sup>b) Includes finance leases, loans and debt securities and derivatives in a net liability position. Excludes accounts payable and prepayments.

<sup>(</sup>c) Includes loan and debt securities and derivatives in a net asset position. Excludes accounts receivable, prepayments and equities.

<sup>(</sup>d) Gross debt less Total cash, deposits and lending.

The movement in net debt for the State Public Financial Enterprises during the time series is mainly the result of the State Bank of NSW privatisation and the market activity of New South Wales Treasury Corporation in its role of issuing and rollover of debt interacting with the market to foster liquidity and viable benchmark issues.

<sup>(</sup>f) Financial asset liability data are not available for the Public Financial Enterprises sector for NSW as at 30 June 1993 on a comparable basis to later years due to changes in recording systems that occurred after that date.

n.a.

<sup>(</sup>a) Totals down and across do not always add because holdings of assets and liabilities between categories/sectors cancel out (see paragraphs 22-24 of the Explanatory Notes).

<sup>(</sup>b) Includes finance leases, loans and debt securities and derivatives in a net liability position. Excludes accounts payable and prepayments.

<sup>(</sup>c) Includes loan and debt securities and derivatives in a net asset position. Excludes accounts receivable, prepayments and equities.

<sup>(</sup>d) Gross debt less Total cash, deposits and lending.

<sup>(</sup>a) Totals down and across do not always add because holdings of assets and liabilities between categories/sectors cancel out (see paragraphs 22-24 of the Explanatory Notes).

<sup>(</sup>b) Includes finance leases, loans and debt securities and derivatives in a net liability position. Excludes accounts payable and prepayments.

<sup>(</sup>c) Includes loan and debt securities and derivatives in a net asset position. Excludes accounts receivable, prepayments and equities.

<sup>(</sup>d) Gross debt less Total cash, deposits and lending.

<sup>(</sup>a) Totals down and across do not always add because holdings of assets and liabilities between categories/sectors cancel out (see paragraphs 22-24 of the Explanatory Notes).

<sup>(</sup>b) Includes finance leases, loans and debt securities and derivatives in a net liability position. Excludes accounts payable and prepayments.

<sup>(</sup>c) Includes loan and debt securities and derivatives in a net asset position. Excludes accounts receivable, prepayments and equities.

<sup>(</sup>d) Gross debt less Total cash, deposits and lending.

<sup>(</sup>e) Tasmania local government net debt was significantly affected by the transfer of the regional water boards from the State to the local government sector, and the drawing down of cash reserves by Hobart City Council for the construction of the Hobart Aquatic Centre.

#### **EXPLANATORY NOTES**

INTRODUCTION

- 1 This publication provides statistics on selected financial assets and liabilities of the Australian public sector. The sector comprises all bodies owned or controlled by the Commonwealth, State, Territory and local governments. The statistics encompass all lending and borrowing undertaken by Australian governments, as well as all deposits they have made or held. The statistics exclude accounts payable/receivable, assets representing equity in other organisations and the equity of public trading enterprises. Statistics on unfunded employee entitlements are published as separate items and are not included in the calculation of gross or net debt.
- Statistics are listed for deposits held, advances received, other borrowings, Reserve Bank notes on issue, cash and deposits, advances paid, and other lending, Reserve bank holdings of international reserves and for the net debt of governments in relation to these categories, as at 30 June 1993 through to 30 June 1998. All tables also contain an institutional sector dissection (general government, public trading enterprises and public financial enterprises), except for the universities table as all universities are classified to the general government sector. Statistics are presented for each Commonwealth, State or Territory jurisdiction. Statistics for local governments are presented in the jurisdiction under which they have been established. Universities are excluded from tables for individual State, Territory and Commonwealth jurisdictions, but are shown in a separate university table and included in the consolidated statistics for general government at the national level.

**SCOPE** 

The statistics in this publication cover general government bodies, public trading enterprises and public financial enterprises. Public trading enterprises are undertakings which aim to recover a substantial proportion of their expenses by revenue from the sale of goods and services. Public financial enterprises are government owned or controlled bodies primarily engaged in financial transactions in the market involving both the incurring of liabilities and the acquisition of financial assets. Included are Reserve Bank of Australia, the central borrowing authorities (CBAs) of State governments, banks, finance corporations, insurance offices, industry development corporations, work-cover schemes and housing finance schemes. Superannuation schemes for public sector employees are excluded. General government bodies are all the agencies of government not classified as either public trading enterprises or financial enterprises, that is, all government departments, offices and other bodies engaged in providing services free of charge or at prices significantly below their cost of production.

INTERSTATE COMPARISONS

Comparisons of financial asset and liability statistics for State and Territory Governments may be significantly affected by differences between jurisdictions in the mix of operations undertaken by State Governments and local governments, with consequent differences in the distribution of debt between these two sectors. Statistics are provided for

## INTERSTATE COMPARISONS - continued

the combined State, Territory and local government sectors for each jurisdiction to eliminate this factor from interstate comparisons.

Some financial assets such as accounts receivable and equity are not included in the calculation of net debt (which is derived by subtracting financial assets from liabilities) also unfunded employee liabilities are excluded from the net debt calculation. As a consequence, differences between the net debt of State and Territory Governments may reflect differences in the extent to which governments have chosen to hold in-scope financial assets rather than other financial assets, such as equity in public trading enterprises, or the degree to which they fund employee liabilities such as superannuation.

**REVISIONS** 

Public sector financial asset and liability statistics are revised progressively as new or improved data become available. For this reason differences can occur between equivalent aggregates at different times.

DATA SOURCES

- The statistics on Commonwealth Government and State and Territory Governments' financial assets and liabilities shown in this publication are based mostly on data supplied by Commonwealth Government and State and Territory Governments and used by them in compiling financial asset and liability statistics for inclusion in their budget documentation.
- Estimates of local government debt were derived from data supplied by local government authorities.
- Estimates of debt for the university sector were derived from data supplied by universities or sourced from their financial statements.
- 10 The statistics are compiled on the basis of market values where available. Where market values are not available historical capital value (or present value) is used. This is defined as: '...the present value of the cash flows associated with the service and eventual payment of monetary assets and liabilities, such present value being determined by discounting the cash flows at the rate of interest implicit in the original contract or
- 11 Note that where financial assets or liabilities were held in foreign currencies they have been converted to Australian currency using the published Reserve Bank exchange rate at 30 June for the relevant year.
- 12 Statistics for public sector debt for 1987 and 1988 were compiled on the basis of face value for liabilities and acquisition cost for financial assets. Face value is the value to be repaid or, in the case of securities, the nominal value shown on the security. Acquisition cost is the cost actually incurred in acquiring a financial asset. A link tabulation showing the relationship between financial assets and liabilities, and net debt compiled on a face value/acquisition cost versus a present value basis at 30 June 1989 and 30 June 1990 was published in the 30 June 1990 issue of Public Sector Debt, Australia (Cat. no. 5513.0).

**VALUATION** 

other arrangement'.

# CONCEPTS AND DEFINITIONS

- 13 Liabilities included in this publication include all liabilities of the public sector except contingent liabilities, liabilities related to trade credit and other accounts payable. Liabilities include lease liabilities under finance leases or similar arrangements and repayable amounts held as security deposits. Moneys held on trust (excluding employee superannuation contributions) are included both as assets and liabilities of government. Coin on issue is not included as a liability of government but Reserve Bank notes on issue are included. Liabilities due to unfunded employee entitlements are shown as separate items and not included in gross or net debt.
- 14 Financial assets cover the financial claims of the non-financial public sector on other organisations (including other government authorities and overseas organisations) and households, excluding shares and other equity, and financial assets related to trade credit and accounts receivable. Financial assets are shown gross of provisions for doubtful debts.

#### **CLASSIFICATIONS**

15 Two types of classifications are used in this publication — unit classifications and classifications of financial assets and liabilities.

#### Unit classifications

- 16 Unit classifications apply to the organisations and enterprises reporting financial assets and liabilities. The classified units make up the various sub-sectors of the non-financial public sector for which statistics are presented. The unit classifications are:
- Level of government National, State, Territory, or local;
- Jurisdiction Commonwealth Government or State and Territory Governments owning and controlling the unit, and State or Territory in which the local government authorities are located (Universities are not included in the Commonwealth or State and Territory jurisdictions but are shown separately because they are jointly controlled by Commonwealth and State or Territory governments); and
- Institutional sector distinguishes between general government bodies, public trading enterprises and public financial enterprises (see definitions in paragraph 3).
- 17 The unit classifications used in public sector financial asset and liability statistics are identical with the equivalent classifications used in government finance statistics.

# Classifications of assets and liabilities

- 18 Financial assets and liabilities are classified into eight categories (four each) according to the type of financial asset or liability. The types of financial assets and liabilities recognised in the statistics are:
- Liabilities
  - Deposits held Liability resulting from the holding of deposits from other public sector or private bodies. Superannuation and other employee-related trust fund balances are excluded (from

# Classifications of assets and liabilities — continued

- both financial assets and liabilities) but other trust fund balances and security deposits are included.
- Advances received Loans that have been motivated by policy rather than liquidity management considerations; as a general rule, all loans received from general government bodies are deemed to be for policy purposes.
- Other borrowings Loans and placements received, debt securities issued and finance lease liabilities; included are lease arrangements in which most of the risks and benefits of ownership rest with the lessee, bank overdrafts, credit foncier loans, long and short term loans in both Australian currency and foreign currency, re-purchase agreements, promissory notes, bills of exchange, certificates of deposit, fixed term deposits, Treasury notes and bonds, debentures, long-term notes and the net value of derivatives that are in a net liability position; excluded are accounts payable and advances received.
- Reserve Bank notes on issue Notes in circulation issued by the Reserve Bank of Australia.

#### Financial assets

- Cash and Deposits Notes and coin on hand and funds held in the form of accounts with financial institutions, other government authorities, etc. which are recoverable or transferable on demand or at relatively short notice.
- Advances paid Loans made that have been motivated by policy rather than liquidity management considerations; as a general rule, all loans made by general government to other government bodies are deemed to be for policy purposes.
- Other lending Loans and placements made and debt securities held; included are non-negotiable and non-transferable lending, credit foncier loans, repurchase agreements, promissory notes, bills of exchange, certificates of deposit, fixed term deposits, Treasury notes and bonds, redeemable preference shares, debentures, long term notes and the net value of derivatives that are in a net asset position; excluded are accounts receivable, advances received and equity and share investments other than redeemable preference shares.
- Reserve Bank international reserves Gold and foreign exchange assets which include foreign exchange holdings invested in government securities and bank deposits, as well as IMF Special Drawing Rights. From 1 July 1996 securities sold but contracted for purchase under repurchase agreements are retained on the balance sheet in this category.

### UNFUNDED EMPLOYEE **ENTITLEMENTS**

19 The May 1991 Premiers' Conference resolution on uniform presentation of government financial information requires each jurisdiction to include information on unfunded employee entitlements in their budget documents. The information available is reproduced

UNFUNDED EMPLOYEE ENTITLEMENTS continued

without amendment in this publication. Information is also provided where available on unfunded employee entitlements for local governments. Liabilities for employee entitlements are the accrued liability of employers to pay future benefits to employees including superannuation, sick leave paid on resignation or retirement, recreation leave, long service leave, workers compensation (where the benefits are paid by the employer and not by a separate insurer) and accrued wages and salaries. Liabilities are 'unfunded' if money has not been paid into a separately constituted fund to provide for their future payment (provisions made, or funds otherwise set aside, that are nevertheless available for other uses by the employers do not constitute 'funding' of the liability).

- 20 Unfunded employee entitlements are generally valued at the present value of actuarially determined future benefit payments attributable to the employees' service to the reference date and discounted at a market interest rate.
- 21 The information reproduced in this publication on unfunded employee entitlements may not conform precisely with this definition due to insufficient information being available. The reader should refer to the budget documents of individual jurisdictions to determine the definitions applied.
- 22 To compile statistics about the financial assets and liabilities for a particular level of government, or any other grouping of public sector units, financial assets and liabilities held with other units within the chosen grouping have to be matched and eliminated to avoid double counting. The process of matching and eliminating the financial assets and liabilities within the chosen group is known as consolidation.
- 23 The consolidation process would ideally match an organisation's liabilities to the corresponding assets of other organisations in the same sector. In practice, organisations incurring liabilities do not always know the current holder of the claim against them (e.g. if the liabilities are marketed securities).
- 24 Therefore, only asset holders can reliably identify the other party to the financial transactions. They supply the names of other public sector organisations against which they hold claims so that the sector of the organisation against which the claims are held can be identified. The value of the assets concerned is omitted from consolidated totals of assets for each sector concerned. The same amount is then deducted in arriving at consolidated totals of liabilities for the sectors (i.e. without attempting to match the individual assets to individual liabilities). In this process, a correspondence is assumed between each of the three different types of financial asset and liability categories for which consolidation is applicable follows:
- deposits held/cash and deposits;
- advances received/advances paid; and
- other lending/other borrowings.

CONSOLIDATION

# **RELATIONSHIP TO GOVERNMENT FINANCE** STATISTICS (GFS)

25 Public sector financial asset and liability statistics show the stock of financial assets and liabilities of the public sector at the end of the fiscal year, whereas government finance statistics show the transactions (flows) undertaken by the public sector during the year. The relationship between public sector debt categories and the GFS economic type framework (ETF) classification is as follows:

#### Assets

- Cash and deposits ETF 46 Increase in currency and deposits
- Advances paid ETF 25 (part) Advances paid excluding purchases/sales of equity
- Other lending ETF 45 (part) Increase in investments excluding investments of employee superannuation funds and other employee related trust funds.

#### Liabilities

- Deposits held ETF 44 (part) Deposits received (net), excluding employee related trust funds.
- Advances received ETF 41 (part) Advances received excluding increases/decreases in equity capital.
- Other borrowings ETF 42 Domestic borrowing (net) and ETF 43 borrowing from abroad (net).
- 26 However, changes in the levels of financial assets and liabilities can also be affected by revaluations and debt transfers which do not appear in the transaction (flow) data. The valuation bases used for financial asset and liability statistics (market value or historical capital value) are also different from the accounting basis of flow statistics for general government, namely cash accounting. For these reasons, full reconciliation between changes in financial asset and liability levels and corresponding flow statistics cannot be carried out.

# RELATIONSHIP TO FOREIGN **DEBT STATISTICS**

- 27 Public sector financial asset and liability statistics shown in this publication are not strictly comparable with foreign debt statistics shown in ABS international investment publications.
- 28 While separate information on public financial enterprises is available for many international investment series, such information is not available for Australian lending abroad and net foreign debt.
- 29 Statistics presented in this publication for the general government and public trading enterprise sectors are broadly comparable to statistics published for the financial asset and liabilities of the corresponding sector in Australian National Accounts: Financial Accounts (Cat. no. 5232.0). In practice, comparison will produce different results due to different valuation practices, timing differences, and classification differences.
