# KEY POINTS

## TREND ESTIMATES

- Total value of dwelling finance commitments decreased by 3.1% in March 2004.

  Decreases were recorded in both owner occupied housing (down 2.5%) and investment housing (down 4.3%).
- The number of housing finance commitments for owner occupation declined by 3.2% in March 2004, while the number excluding refinancing declined by 2.9%. The construction finance trend series recorded a decrease of 1.9% in March 2004, the seventh consecutive monthly decrease. There were also decreases in the trend series for purchase of new dwellings (down 3.6%), refinancing (down 3.8%) and the purchase of established dwellings, which fell for the sixth consecutive month (down 3.3%).

# SEASONALLY ADJUSTED ESTIMATES

- Total value of housing finance commitments increased by 0.6% in March 2004. The owner occupied housing series fell by 0.1%, while investment housing commitments rose by 1.9%.
- The number of housing finance commitments for owner occupied housing decreased by 1.2% in March 2004, driven primarily by the decrease in refinancing of established dwellings (down 1.9%).

# ORIGINAL ESTIMATES

- Owner occupied loans to first home buyers was 12.5% of all loans, a record low.
- The average loan value for owner-occupied housing was \$197,600 in March 2004, up from the February figure of \$190,600.

CHANGES IN THIS ISSUE

This publication has been renamed Housing Finance, Australia and includes two additional tables:

 a new table on the Value of Finance Commitments for Housing. This new table is similar in content and format to table 8 (Finance Commitments for Housing) published in Lending Finance, Australia (ABS cat. no. 5671.0).

a new table of home loan outstandings classified by lender. This new table contains monthly data from March 2002 for Authorised Deposit-taking Institutions (ADIs) classified by type of lender and split by owner occupation housing and investment housing. For other lending institutions, total housing loan outstandings is provided on a quarterly basis to provide a complete picture of all financial institutions providing finance for the purpose of housing.

The numbering of tables in this publication remains unchanged. However, some of the unpublished AusStats table numbers have been changed. All data currently available will continue to be available in the same format. Queries regarding the changes may be directed to Darren Page on 02 6252 6731 or email darren.page@abs.gov.au.

A feature article describing the changes in content and concepts in this issue starts on page 9.

# ADDITIONAL TABLES ON AUSSTATS

TABLES AVAILABLE ON AUSSTATS

Additional tables are available from the AusStats service on <www.abs.gov.au> by selecting *Time Series Spreadsheets* and then *Finance*.

# Tables available are:

- longer time series of tables in this publication
- the following tables
  - 13a Housing finance commitments (Owner Occupation), By Purpose and Lender: Australia, Original (Number)
  - 13b Housing finance commitments (Owner Occupation), By Purpose and Lender: Australia, Original (\$'000)
  - 13c Housing finance commitments, By Purpose and Lender: Australia, Original (Average Loan Size \$'000)
  - 14 Housing Finance Seasonal Factors, By Purpose and Lender: Australia, October 1975 to March 2005
  - 15 Housing Finance Seasonal Factors, By State, October 1975 to March 2005

DWELLINGS FINANCED

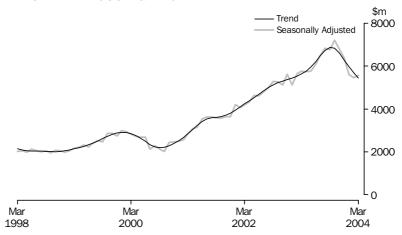

Value of Dwelling Finance

The total value of housing commitments excluding alterations and additions (seasonally adjusted) increased by 0.6% in March 2004, after a decrease of 0.9% in February 2004. The trend series decreased by 3.1%.

The total value of owner occupied commitments (seasonally adjusted) fell for the sixth consecutive month, falling by 0.1% in March 2004. The smaller decrease in the value of commitments compared to the decline in number of commitments reflects growth in the average loan size in March. Decreases in refinancing of established dwellings (-1.6%) and purchase of new dwellings (-3.7%) were offset partially by increases in purchase of established dwellings excluding refinancing (0.8%) and construction of dwellings (0.6%). The trend series decreased by 2.5% in March 2004.

The seasonally adjusted series for value of investment housing commitments (including finance for construction and finance for rent or resale) increased by 1.9% in March 2004, after the previous four consecutive monthly decreases. This increase was primarily due to increase in purchase of dwellings for rent or resale by individuals (0.5%). The trend series fell 4.3%.

#### INVESTMENT HOUSING - TOTAL

Number of Owner
Occupied Dwellings
Financed

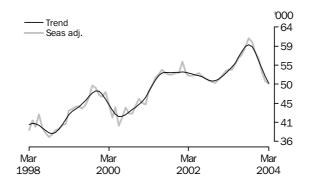

The seasonally adjusted housing finance series continued its recent decline, decreasing by 1.2% in March, the sixth successive monthly decrease. The decrease was mainly due to the refinancing of established dwellings (down 288, -1.9%). There were also decreases in construction of dwellings (down 108, -2.1%), purchase of established dwellings excluding refinancing (down 135, -0.5%), and purchase of new dwellings (down 72, -3.9%). The total housing finance trend fell by 3.2% in March 2004.

There were decreases (seasonally adjusted) in NSW (down 359, -2.2%), Victoria (down 191, -1.7%), SA (down 110, -2.4%), NT (down 8, -1.7%), WA (down 77, -1.1%), and Queensland (down 74, -0.7%). The only increases were Tasmania (up 57, 5.5%) and ACT (up 3, 0.5%). The trend series decreased in March 2004 for all states and territories except the NT.

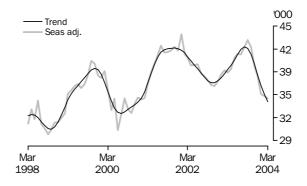

In original terms, the percentage of first home buyers declined to a record low of 12.5% in March 2004, continuing the general decline since the record high of 25.8% in July 2001.

# HOUSING FINANCE SUMMARY OF FINDINGS continued

Number of Owner
Occupied Dwellings
Financed continued

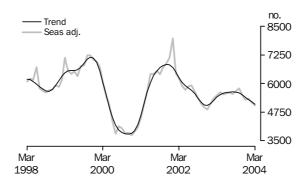

Number of Owner Occupied Dwellings Financed Excluding Refinancing The number of dwellings financed excluding refinancing (seasonally adjusted) decreased slightly in March 2004 (down 315, -0.9%). The trend series decreased by 2.9% in March.

PURPOSE OF FINANCE (OWNER OCCUPATION)

Construction of dwellings

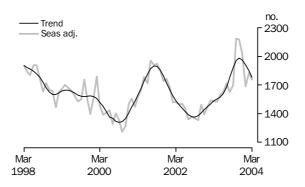

The seasonally adjusted number of construction commitments fell by 2.1% in March 2004, after an decrease of 3.5% in February. The trend fell 1.9% in March 2004.

# HOUSING FINANCE SUMMARY OF FINDINGS continued

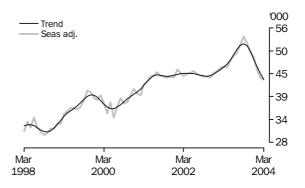

Purchase of new dwellings

The number of commitments for the purchase of new dwellings (seasonally adjusted) decreased by 3.9% in March 2004, after an increase of 8.4% in February. The trend series fell 3.6% in March 2004.

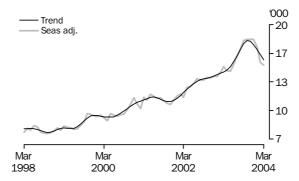

Purchase of established dwellings

The seasonally adjusted established dwelling series decreased by 1.0% (down 423) in March 2004, the sixth successive month of decreasing commitments. The decrease was primarily driven by a large decrease (down 288, -1.9%) in refinancing commitments. The trend series decreased by 3.3% in March.

Refinancing

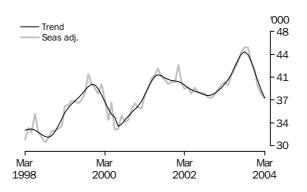

The number of refinancing commitments (seasonally adjusted) fell by 1.9% in March 2004, the third successive month of decreasing commitments. The trend series decreased by 3.8% in March.

TYPE OF LENDER (OWNER OCCUPATION)

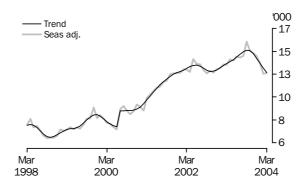

Banks

Bank finance (seasonally adjusted) decreased for the sixth consecutive month, falling by 1.8% (down 682) in March 2004 after a decrease of 2.8% in February. The trend series fell 3.1% in March.

Non-banks

Non-bank commitments (seasonally adjusted) increased by 0.6% in March 2004, after five successive monthly decreases. There were seasonally adjusted decreases for wholesale lenders (down 0.2%) and permanent building societies (down 1.9%). The non-bank trend series decreased by 3.4%.

HOUSING LOAN
OUTSTANDINGS

At the close of the month, housing loans outstanding of authorised deposit-taking institutions was \$449 314m, up \$2 818m (0.6%) from February's closing balance. Owner occupied housing loans increased by \$1 712m (0.6%) to close at \$300 525m, while investment housing loans outstanding increased by \$1 106m (0.7%) to reach a closing balance of \$148 789m.

Bank loans increased by \$2 352m (0.6%) during March to a closing stock of \$421 833m. Owner Occupied housing loans increased by \$1 255m (0.5%) to \$278 252m, while investment housing loans increased by \$1 097m (0.8%) to \$143 581m.

# FEATURE ARTICLE

## HOUSING FINANCE - CHANGES IN CONTENT AND CONCEPTS IN THIS ISSUE

INTRODUCTION AND SUMMARY OF CHANGES

- 1. The February 2004 issue of the Housing Finance for Owner Occupation publication (ABS cat. no. 5609.0) announced the inclusion of two additional tables from March 2004. The inclusion of the two additional tables has widened the scope of the original Housing Finance for Owner Occupation publication to include investment housing loans. As a result:
  - the publication has been renamed to Housing Finance, Australia (cat. no. 5609.0) to reflect the change in data coverage;
  - all tables have been renamed to make it clear that the data in the tables refers to owner occupied housing only or a mixture of owner occupied and investment housing;
  - apart from the name changes, tables 1 to 10 retain the same concepts and coverage as previously published.
- 2. Two new tables are included from this issue:
  - Table 11 containing information on the Value of Finance Commitments for Housing. This new table is the similar in content and format as table 8 (Finance Commitments for Housing) contained in Lending Finance, Australia (ABS cat. no. 5671.0). This ensures that information on lending commitments for owner occupation housing and investment housing are released on the same date;
  - Table 12, which displays home loan outstandings classified by lender. This new table contains monthly data from March 2002 for Authorised Deposit-taking Institutions (ADIs) classified by type of lender and split by owner-occupation housing and investment housing. For other lending institutions, total housing loan outstandings will be provided on a quarterly basis to provide an estimates for all institutions providing finance for the purpose of housing.
- 3. Unpublished tables released on the Ausstats electronic service have been renumbered. See page 4 for a list of these tables.
- 4. Consequent to the change in coverage, the main features and commentary have also changed, following a round of consultation with major data users.
- 5. This article provides and overview of the concepts and data sources underlying the statistics presented in these two additional tables included in this publication.

COMMITMENTS AND LOAN
OUTSTANDINGS

- 6. Tables 1-11 in this publication provides data on number, value and percentage change in loan commitments. A loan commitment is defined as a firm offer of housing finance which either has been, or is normally expected to be, accepted. Over time the balance of loan commitments in existence will change in accordance with the equation:
- (1) commitments  $_t$  = commitments  $_{t-1}$  + new commitments  $_t$  drawdowns  $_t$  cancellations  $_t$

where t refers to the current period, and t-1 is the previous period. Table 8 presents data relevant to this equation, and provides the value of commitments advanced for the purpose of owner occupied housing during the month as part of the measure of undrawn lending commitments at the end of a particular month. The value of commitments over time will be higher than commitments advanced, due to commitments cancelled by the lending institutions (generally after the commitment

# COMMITMENTS AND LOAN OUTSTANDINGS continued

lapses). There will also be a lag between the time of commitment and when the actual cash flows are advanced to the borrower.

- 7. Table 12 presents loan outstandings for Housing. Loan outstandings refer to the value of outstanding housing loans to Australian households as at a particular point in time (for statistics in this publication this refers to the end of the reference month). A loan is a defined as an asset of a lending institution, which is not evidenced by the issuing of a security by the borrower. The outstanding balance for housing loans will change over time in accordance with the equation:
- (2) outstandings  $_t$  = outstandings  $_{t-1}$  + drawdowns  $_t$  + interest accruals  $_t$  repayments  $_t$  revaluations  $_t$  net sales, etc  $_t$

where t refers to the current period, and t-1 is the previous period.

- 8. Drawdowns (advances of loan amounts over a time period) is the main component of additions to housing loan outstandings, and the only component which relates to housing finance commitments displayed in the other tables in this publication. For fixed term loans, this represents the gross increase in credit associated with the settlement of a finance commitment. For secured revolving credit home loans (commonly known as home equity loans), this relates to the gross increase in credit associated with drawdowns on the home equity product for the construction or purchase of dwellings.
- 9. Interest accruals increases the stock of housing loan outstandings. In these statistics interest accruals are included in loan outstandings when due for payment. Small and stable amounts of interest accrued but not due for payment are reported in sundry accounts receivable by lending institutions who find it difficult to allocate interest accruals not due to the relevant loan accounts. These statistics thus exclude such accruals. These practices are consistent with reporting instructions of APRA and data on housing loans published by RBA.
- 10. Principal and interest repayments is the main component that contributes to reductions in outstanding loan balances. Data on repayments are not available.
- 11. In principle, revaluations may arise from price changes (the market value of a fixed interest contract will increase if prevailing interest rates fall, for example). In practice these statistics do not take into account valuation changes through price effects.
- 12. Revaluations may also occur through loans written off either in their entirety or in part. The loans outstandings data for ADIs are net of specific provisions for bad and doubtful debts, but gross of general provisions for bad and doubtful debts. This treatment is consistent with the statistics on housing loan outstandings published in the RBA Bulletin tables, and in particular consistent with the treatment of loan outstandings contributing to the Housing Credit aggregate in the Bulletin tables. Specific provisions refer to provisions raised against specific impaired assets based on arrears data. General provisions are provisions raised portfolios of loans, and are not assigned against specific loans within the lender's portfolio, and are considered as contingent. The loans outstanding after assessing specific provisions for impairment is a measure of the 'fair value' of the loan portfolio of lending institutions, since it is based on the value of the expected future recoverable amount.

# COMMITMENTS AND LOAN OUTSTANDINGS continued

- 13. For housing loan balances of securitisation vehicles, no adjustment is made for specific provisions. Securitisation vehicles are special purpose vehicles (generally trusts) that issue mortgage backed securities, which are debt securities secured by specific pools of mortgages and repaid from the cash flows (principal and interest payments) of the specific mortgage pool. The mortgages held by securitisation vehicles are generally covered for impairments by mortgage insurance or hedging products, so as to ensure the high rating of the issued security. As such, specific provisions relating to these mortgages tend to be zero or insignificant in value.
- 14. Housing loans sold, for example to a securitisation vehicle, during a particular period and removed from the balance sheet of the loan originator will result in a transfer of assets from the loan originator to purchaser. Other components may also contribute to a movement in the outstanding loan balance, such as fees associated with the loan that are not paid by the borrower and which are instead added to the loan balance during the current period. Data for sales of loans and capitalisation of fees are not available.

# PURPOSE CLASSIFICATION

- 15. The purpose definitions for loan outstandings are similar to the instructions provided by lending institutions for the definition of housing finance for owner occupation for reporting of commitments, except that the definition for housing loan outstandings excludes alterations and/or additions to dwellings. Housing loans outstanding for the purpose of owner-occupied housing consists of the value of secured and unsecured housing loans made to Australian households for the construction or purchase of dwellings for owner occupation. For revolving credit loans, this includes housing loans approved for a purpose of predominantly owner occupied housing.
- 16. Housing loans outstanding for the purpose of investment housing loans consist of the value of secured and unsecured housing loans made to Australian households for the construction or purchase of dwellings for non-owner occupation. This includes revolving credit facilities originally approved for a purpose of predominantly non-owner occupied housing. It should be noted, though, that investment housing commitments included in Table 11 of this publication do not include loan commitments issued with revolving credit facilities as the data are unavailable.

DATA SOURCES FOR LOAN
COMMITMENTS AND
OUTSTANDINGS
STATISTICS BY LENDER

- 17. Loan outstandings to households for the purpose of housing are available from March 2002 in this publication. Housing loan outstandings presented in Table 12 are classified to the following lender types: Banks; Permanent building societies; Credit unions/co-operative credit societies; Securitisation vehicles; and Other lenders n.e.c.. The first three of these types are components of the grouping Authorised Deposit-taking Institutions (ADIs). Loan outstanding for the ADI lender types are published monthly, and are classified by purpose (owner-occupied housing or investment housing). Building societies and credit co-operatives became authorised deposit-taking institutions (ADIs) under the Banking Act 1959 on 1 July 1999 when APRA took over the responsibility for their prudential regulation. APRA have undertaken responsibility for the supervision and regulation of banks from 1 July 1998.
- 18. For banks, credit co-operatives, building societies and corporations registered under the *Financial Sector (Collection of Data) Act 2001* (known as Registered Financial Corporations (RFCs)), the statistics in this publication are currently derived from returns submitted to the Australian Prudential Regulation Authority (APRA). The *Financial*

DATA SOURCES FOR LOAN
COMMITMENTS AND
OUTSTANDINGS
STATISTICS BY LENDER
continued

Sector (Collection of Data) Act 2001 facilitates the collection of statistical data from the financial sector, with APRA established as the central point for collection of both prudential and statistical data. In October 2001, APRA implemented new reporting forms for building societies and credit co-operatives. New reporting forms were implemented for banks in March 2002, and for RFCs in March 2003. APRA commenced collecting loan commitments data from banks, credit co-operatives, building societies in July 2002 and from RFCs in March 2003.

- 19. Housing finance commitments for owner-occupied housing from banks, building societies and credit co-operatives are derived from form *ARF 392.0 Housing Finance* collected by APRA. Housing finance commitments for investor housing from these lenders are sourced from the *ARF 394.0 Personal Finance*. Housing finance commitments for RFCs are collected on the *RRF 392.0 Housing Finance* and *RRF 394.0 Personal Finance* for owner occupied housing and investor housing respectively.
- 20. Statistics on loan outstandings in Table 12 are sourced from banks on form *ARF 320.0 Statement of Financial Position (Domestic Books)*, with lending by building societies and credit co-operatives derived from form *ARF 323.0: Statement of Financial Position (Licensed ADI)*. While building societies and credit co-operatives with total assets greater than or equal to \$50 million are required to report this APRA return on a monthly basis, those institutions with total assets less than this threshold are only required to submit this return on a quarterly basis. An undercoverage adjustment is made in deriving Table 12 in the intervening two months between each quarter ending month to derive estimates for the complete population on a monthly basis.
- 21. The quarterly data are used to adjust the particular monthly observation using the following formula:

$$AM_{t} = ((Q_{t} + Q_{t-1})/(QM_{t} + QM_{t-1})) * M_{t}$$

Where

AM<sub>t</sub> = Adjusted monthly observation at month t

 $Q_{t}$  = Quarterly observation at quarter t

 $QM_t = Monthly observation at quarter t$ 

 $M_t$  = Monthly observation at time t

For the latest two monthly observations, the growth rate of the monthly series is applied to the quarterly observation at time t-1 using this formula:

$$AM_{t} = (M_{t}/M_{t-1}) * Q_{t-1}$$

22. Excel version of the forms and instructions for ADIs are available on the APRA website at

<a href="http://www.apra.gov.au/Statistics/Revised-Authorised-Deposit-taking-Institution-ADI-reporting-requirements.cfm">http://www.apra.gov.au/Statistics/Revised-Authorised-Deposit-taking-Institution-ADI-reporting-requirements.cfm</a>. For RFCs, these are available at:

<a href="http://www.apra.gov.au/rfc/>">http://www.apra.gov.au/rfc/>">.

DATA SOURCES FOR LOAN
COMMITMENTS AND
OUTSTANDINGS
STATISTICS BY LENDER
continued

RELATED STATISTICS

- 23. All other institutions, including securitisation vehicles, are collected directly by the ABS. Data on loan outstandings to households for housing purposes for these lender types are only available on a quarterly basis. The data for securitisation vehicles is sourced from the ABS Survey of Financial Information. The data for Other lenders nec. is compiled from a range of other data sources collected by the ABS.
- 24. Users may also be interested in the following ABS publications:

Assets and Liabilities of Australian Securitisers (cat. no. 5232.0.40.001) - issued quarterly;

Australian National Accounts: Financial Accounts (cat. no. 5232.0) - issued quarterly; Buildings Approvals, Australia (cat. no. 8731.0)

*Building Activity, Australia: Dwelling Unit Commencement, Preliminary* (cat. no. 8750.0)

- 25. Quarterly data prior to the March 2002 for housing loan outstandings by type of lending institution is available as a priced special data report related to the *Australian National Accounts: Financial Accounts* (cat. no. 5232.0). Inquiries regarding this special data report should be made to the contact on the front cover of this publication.
- 26. In addition, the Reserve Bank of Australia produces the monthly *Reserve Bank of Australia Bulletin* as well as data on its web site. Bulletin tables D1 & D2 contain statistics on lending and credit aggregates (including the housing credit aggregate), which contain lending and credit to the private non-financial sector. Note though that the credit aggregates only includes lending provided by the following types of financial intermediaries: banks, credit co-operatives, building societies, RFCs and the RBA. Table D5 Bank Lending by Sector contains statistics on lending to persons for the purpose of housing, also classified by owner-occupiers and investors with statistics available from January 1990.
- 27. Residential lending by building societies and credit co-operatives is also published in Bulletin tables B7 and B8. These statistics are also sourced from APRA collected data, although this will differ to statistics in Table 12 of this publication since the Bulletin tables only include data for building societies and credit co-operatives with total assets greater than or equal to \$50 million. Bulletin table B.16 Securitisation Vehicles contains outstandings information for mortgage held, which includes both residential and non-residential mortgages.

## EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

## SENSITIVITY ANALYSIS

Readers should exercise care when interpreting the trend estimates of recent months because they will be revised when next month's seasonally adjusted estimates become available. For further information, see paragraphs 29 to 30 in the Explanatory Notes.

The graph below presents the effect of two possible scenarios on the previous trend estimates:

1 The April 2004 seasonally adjusted estimate of number of dwellings financed is higher than the March 2004 seasonally adjusted estimate by 4.0%.

2 The April 2004 seasonally adjusted estimate of number of dwellings financed is lower than the March 2004 seasonally adjusted estimate by 4.0%.

The percentage change of 4.0% was chosen because the average absolute percentage change of the seasonally adjusted series, based on the last 10 years of data, has been 4.0%.

## **EXPLANATORY NOTES**

INTRODUCTION

SCOPE

- **1** This publication presents statistics of housing finance commitments made by significant lenders. This includes secured finance commitments for the construction or purchase of owner occupied dwellings and finance commitments for the construction or purchase of dwellings for rent or resale (investment housing). Also included are the outstanding values of housing loan assets to individuals held by lenders at the end of each reference month.
- **2** Finance commitments made by the following types of lenders are included:
  - Banks
  - Permanent building societies
  - Credit unions/co-operative credit societies
  - Life or general insurance companies
  - General government enterprises
  - Superannuation funds
  - Securitisers of mortgage assets (wholesale lenders) which provide funds to borrowers through a retail intermediary (e.g. mortgage originators)
  - Other Registered Financial Corporations (RFCs).
- **3** All lending commitments are classified to the lender type which is (or will be) the legal lender on the corresponding loan contract. Commitments are published for two broad groupings of lender type: Banks and Non-Banks; the Non-Bank grouping also has the components Permanent Building Societies and Wholesale Lenders n.e.c. published.
- **4** Housing loan outstandings are classified to the following lender types: Banks; Permanent Building societies; Credit unions/co-operative credit societies; Securitisation vehicles; and Other lenders n.e.c.. The first three of these types are components of the grouping Authorised Deposit-taking Institutions (ADIs). Loan outstanding for the ADI lender types are published monthly, and are classified by purpose (owner-occupied housing or investment housing). All other institutions, including securitisation vehicles, are only available on a quarterly basis. The release of loan outstandings data for those lenders reporting on a quarterly basis will be lagged by one month for example March outstandings for securitisation vehicles and other lenders n.e.c. will be released from the April publication onwards.
- **5** Housing loan outstandings are classified to the following lender types: Banks; Permanent Building societies; Credit unions/co-operative credit societies; Securitisation vehicles; and Other lenders n.e.c.. The first three of these types are components of the grouping Authorised Deposit-taking Institutions (ADIs). Loan outstanding for the ADI lender types are published monthly, and are classified by purpose (owner-occupied housing or investment housing). All other institutions, including securitisation vehicles, are only available on a quarterly basis.
- **6** The statistics of housing finance commitments cover all banks and permanent building societies. The largest of the remaining lenders of secured housing finance for owner occupation are included so that, together with banks and building societies, at least 95% of the Australian total of finance commitments is covered, and at least 90% of each state total is covered. While many smaller contributors to the Non-Banks series are excluded under these coverage criteria, at least 70% of finance commitments by wholesale contributors are covered.
- **7** An annual collection is conducted to maintain and update the survey coverage of housing finance commitments. New lenders are included as their lending for housing becomes sufficiently large.

COVERAGE

COVERAGE continued

SOURCES

- **8** From June 2001, the collection of housing finance commitments covers all commitments by banks and permanent building societies, all other lenders providing funds of more than \$50m in 2000, and some additional smaller other lenders where necessary to maintain collection coverage (as specified in paragraph 5).
- **9** The statistics of housing loan outstandings cover all lenders included in the scope of paragraph 2 that have been identified as holding residential loan assets on their balance sheet as at the end of a particular reference month.
- **10** For banks, credit co-operatives, building societies and RFCs, the statistics in this publication are currently derived from returns submitted to the Australian Prudential Regulation Authority (APRA). The *Financial Sector (Collection of Data) Act 2001* facilitates the collection of statistical data from the financial sector, with APRA established as the central point for collection of both prudential and statistical data. In October 2001, APRA implemented new reporting forms for building societies and credit co-operatives. New reporting forms were implemented for banks in March 2002, and for RFCs in March 2003. APRA commenced collecting loan commitments data from banks, credit co-operatives, building societies in July 2002 and from RFCs in March 2003.
- **11** Housing finance commitments for owner-occupied housing from banks, building societies and credit co-operatives are derived from form *ARF 392.0 Housing Finance* collected by APRA. Housing finance commitments for investor housing from these lenders are sourced from the *ARF 394.0 Personal Finance*. Housing finance commitments for RFCs are collected on the *RRF 392.0 Housing Finance* and *RRF 394.0 Personal Finance* for owner occupied housing and investor housing respectively.
- **12** Statistics on loan outstandings in Table 12 are sourced from banks on form *ARF 320.0 Statement of Financial Position (Domestic Books)*, with lending by building societies and credit co-operatives derived from form *ARF 323.0: Statement of Financial Position (Licensed ADI)*. While building societies and credit co-operatives with total assets greater than or equal to \$50 million are required to report this APRA return on a monthly basis, those institutions with total assets less than this threshold are only required to submit this return on a quarterly basis. An undercoverage adjustment is made in deriving table 12 in the intervening two months between each quarter ending month to derive estimates for the complete population on a monthly basis.
- **13** Electronic versions of the forms and instructions for ADIs are available on the APRA website at
- < http://www.apra.gov.au/Statistics/Revised-Authorised-Deposit-taking-Institution-ADI-reporting-requirements.cfm>. For RFCs, these are available at:
- $<\!http:/\!/www.apra.gov.au/rfc/\!>\!.$
- **14** All other institutions, including securitisation vehicles, are collected directly by the ABS. Data on loan outstandings to households for housing purposes for these lender types are only available on a quarterly basis. The data for Other lenders nec. is compiled from a range of other data sources collected by the ABS.
- **15** Revisions to previously published statistics are included in the publication as they occur.
- **16** Changes in the classification of lenders (e.g. the conversion of a permanent building society to a bank) are reflected in the Lender series from the month of such change. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly *Bulletin* in the section on Technical Notes to Tables.
- **17** A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the on-going relationship with the borrower.

REVISIONS

WHOLESALE LENDERS

WHOLESALE LENDERS continued

- **18** The Wholesale Lenders n.e.c. series almost exclusively comprises securitisation vehicles (typically special purpose trusts), established to issue mortgage backed securities. It excludes commitments where a bank or permanent building society, acting as a wholesale provider of funds, is the lender on the loan contract. Those commitments are published as bank or permanent building society commitments.
- **19** From July 1995 to July 2000, mortgage managers reported housing finance commitments on behalf of wholesale lenders. The introduction of wholesale lenders as the reporting unit does not change the scope of the collection, but has increased its coverage. This, along with the reclassification of some lending activity, increased the level of the Wholesale Lenders n.e.c. series for owner occupied housing by \$249m in July 2000.
- **20** Wholesale lenders contribute to the Non-Banks series for owner occupied housing, which is seasonally adjusted in table 3. A trend break was added to the Non-Banks series, shifting the trend up by 1,579 commitments and \$178m in July 2000. Revisions related to the introduction of wholesale lenders also resulted in a downward shift in the Banks' trend for owner occupied housing of 1,256 commitments and \$167m. Consequential breaks in the finance purpose trend series for owner occupied housing at July 2000 were:
  - construction finance trend shifted down 16 commitments (\$3m)
  - new dwelling finance trend shifted up 26 commitments (\$1m)
  - established dwelling finance trend shifted up 313 commitments (\$13m)
  - refinancing trend shifted up 177 commitments (\$17m)
- total finance trend shifted up 323 commitments (\$11m).
- 21 Because of difficulties experienced by Wholesale Lenders n.e.c. in accurately identifying first home buyers in their commitments, these data are not used in estimating first home buyer commitments (table 9). Instead, from July 2000, the percentage of first home buyer commitments made by all banks and permanent building societies is applied to total Wholesale Lenders n.e.c. commitments to calculate their contribution to the First Home Buyers series. As a result, first home buyer commitments were revised upwards by 0.8 percentage points in July 2000.
- **22** An article on the introduction of the Wholesale Lenders n.e.c. series (including implications for the First Home Buyers series) featured in the October 2000 issue of this publication. A copy of the article is available from the contact person listed on the front of the publication.
- of the publication.

  23 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects'. A 'trading day effect' reflects the varying amounts of activity on different days of the week and the different number of days of the
- week in any month (i.e. the number of Sundays, Mondays, etc.). This effect may be partly caused by the reporting practices of the lenders. Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (e.g. a change in interest rates) from the series.
- **24** Over the period from early 1990 to April 1995, four of the major banks changed from reporting for the 4 or 5 weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data take account of this change in pattern.
- **25** Rapid change in the financial sector, and particularly developments in the provision of housing finance, may cause changes in the seasonal and trading day patterns of the housing finance data. Examples include changes in the classification of financial institutions (particularly the reclassification of non-bank financial institutions to banks) and the increased use of mortgage securitisation.

SEASONAL ADJUSTMENT

SEASONAL ADJUSTMENT continued

- **26** Estimation of seasonal adjustment and trading day factors that reflect the full effect of recent developments is not possible until a sufficient number of years of data have been collected. When changes are occurring in the seasonal patterns, larger revisions to the seasonally adjusted series can be expected at the time of the annual seasonal re-analysis. Accordingly, the trend estimate data provide a more reliable indicator of underlying movement in housing finance commitments. (See paragraphs 29 and 30 for further information on trend estimates).
- **27** State component series have been seasonally adjusted independently of the Australian series. The sum of the state components is therefore unlikely to equal the corresponding Australian total. State component series are also affected by the changes mentioned in paragraphs 23 to 26.
- 28 The housing finance series uses a concurrent seasonal adjustment methodology to derive the seasonal adjustment factors. This means that original estimates available at the current reference month are used to estimate seasonal factors for the current and previous months. As a result of this methodology, the seasonally adjusted and trend estimates for earlier periods can be revised each month. However, in most instances, the only noticeable revisions will be to the previous month and the same month a year ago.
- 29 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13 term Henderson-weighted moving average to all but the last six months of the respective seasonally adjusted series. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *Information Paper: A Guide to Interpreting Time Series—Monitoring Trends: An Overview* (cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 02 6252 6345 or by email at <timeseries@abs.gov.au>.
- **30** While the smoothing technique described in paragraph 29 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.
- **31** Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage changes in this publication have been derived from unrounded data.
- **32** Estimates for months prior to those shown in this publication and more detailed series can be purchased in spreadsheet format from the ABS web site see listing on page 3. For more information, contact the ABS National Information and Referral Service on 1300 135 070.
- **33** Users may also wish to refer to the following ABS releases:
  - Lending Finance, Australia (cat. no. 5671.0) issued monthly
  - Assets and Liabilities of Australian Securitisers (cat. no. 5232.0.40.001) issued quarterly
  - Buildings Approvals, Australia (cat. no. 8731.0) issued monthly
  - Building Activity, Australia: Dwelling Unit Commencement, Preliminary (cat. no. 8750.0) issued monthly
- **34** Quarterly data prior to the March 2002 for housing loan outstandings by type of lending institution is available as a priced special data report related to the *Australian National Accounts: Financial Accounts* (cat. no. 5232.0). Inquiries regarding this special data report should be made to the contact on the front cover of this publication.

RELATED RELEASES

RELATED RELEASES continued

- **35** In addition, the Reserve Bank of Australia produces the monthly *Reserve Bank of Australia Bulletin* as well as data on its web site. *Bulletin* tables D1 & D2 contain statistics on lending and credit aggregates (including the housing credit aggregate), which contain lending and credit to the private non-financial sector. Note though that the credit aggregates only includes lending provided by the following types of financial intermediaries: banks, credit co-operatives, building societies, RFCs and the RBA. Table D5 Bank Lending by Sector contains statistics on lending to persons for the purpose of housing, also classified by owner-occupiers and investors with statistics available from January 1990.
- **36** Residential lending by building societies and credit co-operatives is also published in *Bulletin* tables B7 and B8. These statistics are also sourced from APRA collected data, although this will differ to statistics in Table 12 of this publication since the *Bulletin* tables only include data for building societies and credit co-operatives with total assets greater than or equal to \$50 million. *Bulletin* table B.16 Securitisation Vehicles contains outstandings information for mortgage held, which includes both residential and non-residential mortgages.
- **37** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (cat. no. 1101.0). The *Catalogue* and information on forthcoming releases (Release Advices) are available from any ABS office or from the ABS web site .

## GLOSSARY

Alterations and additions

Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.

Average loan

The Average Loan series is calculated as follows:

Total value of lending commitments per month

Total number of dwellings financed per month

The Average Loan series does not necessarily represent the average loan size per dwelling. For instance, the average separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.

Commitment

A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.

Commitments not advanced

Commitments not advanced at the end of the month are calculated as follows:

Balance of unadvanced commitments at the end of the previous month

- + Total new housing commitments (including refinancing)
- + Alterations and additions
- = Total commitments
- Cancellations of commitments
- Commitments advanced during the month
- = Commitments not advanced at the end of the month

Commitment value

The commitment value for a contract of sale is the dwelling's sale value less any deposit.

Construction of dwellings

Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner occupied dwellings.

Dwelling

A dwelling is a single self-contained place of residence such as a detached or semi-detached house, a terrace house, a flat, home unit, town house, etc.

**Dwellings** units

Dwelling units refer to the number of single self-contained residences for which commitments have been made, either on the security of first mortgage or on contract of sale.

Established dwelling

An established dwelling is one which has been completed for 12 months or more prior to the lodgement of a loan application, or which has been previously occupied.

First home buyers

First home buyers are persons entering the home ownership market for the first time.

Fixed loans

Generally involve:

- a commitment for a fixed amount for a fixed period for a specific purpose;
- a schedule of repayments over a fixed period; and
- repayments which reduce the liability of the borrower but do not act to make further finance available.

Fixed rate loan

Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.

**Housing Loan Outstandings** 

The value of outstanding housing loans to Australian households as at a particular point in time (for statistics in this publication this refers to the end of the reference month). A loan is a defined as an asset of a lending institution, which is not evidenced by the issuing of a security by the borrower.

## **GLOSSARY** continued

New dwelling

A new dwelling is one that has been completed within 12 months of the lodgement of a loan application, and the borrower will be the first occupant.

Other lenders n.e.c.

Comprises all lenders that are not banks, permanent building societies, credit co-operatives or securitisation vehicles. Includes life or general insurance companies, superannuation funds, government housing schemes, housing co-operatives, registered financial corporations and other financial institutions.

Refinancing

For investment housing finance, it represents a commitment to refinance an existing loan. For secured housing finance for owner occupation, only those loans where the refinancing lender is not the original lender and the security is unchanged are included. The refinancing of a loan to fund a change of residence is treated as a new lending commitment.

Revolving credit

Generally has the following characteristics:

- a commitment for a credit or borrowing limit is given for a specific period after which the commitment is reviewed;
- the extent of the borrowing used at any time during the period may be for any amount up to the authorised limit; and
- repayments (other than of charges and interest) made during the period reduce the extent of the borrowing used and thereby increase the amount of unused credit available up to the authorised limit. Examples include credit cards, lines of credit and approved overdrafts.

Secured housing finance

This is all secured commitments to individuals for the construction or purchase of dwellings for owner occupation, regardless of type of security. Commitments for dwellings that will be occupied by persons other than the owner(s) are excluded.

Securitisation vehicle

Special purpose vehicles (generally trusts) that issue mortgage backed securities, which are debt securities secured by specific pools of mortgages and repaid from the cash flows (principal and interest payments) of the specific mortgage pool.

Self-contained

The dwelling includes bathing and cooking facilities.

Wholesale lenders

A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the ongoing relationship with the borrower. The Wholesale Lenders n.e.c. (not elsewhere classified) series almost exclusively comprises securitisation vehicles (typically special purpose trusts) established to issue mortgage backed securities. It excludes funds provided where a bank or permanent building society, acting as a wholesale provider of funds, remains the lender on the contract. Those commitments are published as bank or permanent building society commitments.
