NOTES

ABOUT THIS PUBLICATION

This publication presents information about the weekly earnings and employment benefits received by employees, and trade union membership. Distribution of employee weekly earnings is cross-classified by a range of personal characteristics such as age, sex and family type, and by characteristics of employment such as full-time and part-time status, permanent and casual status and size of employing establishment.

Other information includes details of standard benefits provided by employers including superannuation coverage and paid leave, and additional benefits such as transport, housing, shares and child care. This publication also contains detailed information about trade union membership in Australia, including the personal characteristics of employees with and without trade union membership and trade union coverage by industry.

ABOUT THIS SURVEY

Data contained in this publication was collected in August 1999 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Data was collected from persons within scope of this survey who were employees in their main job.

SYMBOLS AND OTHER USAGES

ABS	Australian Bureau of Statistics
ANZSIC	Australia and New Zealand Standard Industrial Classification
ASCO	Australian Standard Classification of Occupations
LFS	Labour Force Survey
. .	not applicable
RSE	relative standard error
SE	standard error
*	subject to sampling variability too high for most practical uses

As estimates have been rounded, discrepancies may occur between sums of the component items and totals.

STATE INQUIRIES

For State office contact numbers see the supplementary surveys list in the back of this publication.

W. McLennan
Australian Statistician

SUMMARY OF FINDINGS

MEAN WEEKLY EARNINGS OF EMPLOYEES IN ALL JOBS

In August 1999, there were 7,304,200 employees aged 15 years and over. These employees earned an average of \$624 per week in all jobs, with 50% of employees earning under \$552 per week. Mean earnings in main job were \$618 and \$178 in second job (for the 273,100 employees with a second job).

Mean weekly earnings of employees has steadily increased from \$423 in all jobs in August 1989 to \$624 in August 1999¹. Between August 1998 and 1999, mean weekly earnings increased for males by 5% to \$737 and for females by 4% to \$491. In August 1999, there were relatively more females in lower earnings ranges and more males in higher earnings ranges. Some 17% of females and 7% of males earned less than \$200 per week in August 1999, whereas 1% of females and 6% of males earned more than \$1,500 or more per week.

Nearly three-quarters (74%) of employees were full-time workers, the same proportion as 1998. Mean weekly earnings in all jobs increased by 6% to \$755 for full-time workers and by 4% to \$267 for part-time workers between August 1998 and August 1999. This translated to a \$40 increase for full-time workers and a \$10 increase for part-time workers.

MEAN WEEKLY EARNINGS OF WORKERS IN ALL JOBS 1989 TO 1999 (a)

(a) This information was not collected in 1996.

PERMANENT AND CASUAL EMPLOYEES IN MAIN JOB

Some 26% of employees were casually employed in their main job in August 1999. This is similar to the proportion recorded in 1996–1998 and slightly higher than the levels recorded in 1994 and 1995 (24%).

Other findings on casual employment in August 1999 include;

- a higher proportion of part-time employees were casual (65%) than full-time employees (11%);
- a higher proportion of females than males were casual employees (32% and 22% respectively); and
- casual employees had lower mean weekly earnings in their main job than permanent employees in both full-time work (\$691 compared to \$765) and part-time work (\$234 compared to \$375).

¹ It should be noted that these comparisons could be affected by compositional changes in the wage and salary segments of the labour market, such as changes in the mix of occupations and industries of jobs and in the average number of hours paid for, for both full-time and part-time workers.

Source: *Weekly Earnings of Employees, August 1994, 1995, 1997* (Cat. no. 6310.0); *Trade Union Members, August 1996* (Cat. no. 6325.0); *Employee Earnings, Benefits and Trade Union Members, August 1998, 1999* (Cat. no. 6310.0).

EMPLOYEE BENEFITS

In August 1999, the most commonly reported employee benefits were superannuation (89% of employees), holiday leave (72%), sick leave (72%) and long service leave (61%). Superannuation coverage has increased from 48% of employees in August 1989 to its current level. In contrast, the proportion of employees entitled to holiday leave and sick leave has declined from August 1989 (81% and 80% respectively).

Information on additional employment benefits (excluding those listed above) was also collected in August 1999. The least reported benefits were entertainment allowance (2%), club fees (2%) and child care/education expenses (0.3%). The more commonly received non-standard benefits were goods and services (18%), transport (15%) and telephone (10%). The main change since August 1989 has been an increase in the proportion of employees receiving shares (from 2% in 1989 to 6% in 1999).

TRADE UNION MEMBERSHIP

In August 1999, 26% of Australia's 7,304,200 employees aged 15 years and over were trade union members in their main job. This continues the steady decline in trade union membership from 46% in 1986.

EXPLANATORY NOTES

INTRODUCTION

1 Data contained in this publication was collected from a survey conducted in August 1999 as a supplement to the monthly Labour Force Survey (LFS). Respondents to the LFS, within the scope of the supplementary survey, were asked a series of extra questions.

2 For further information about the LFS, see *Labour Force, Australia* (Cat. no. 6203.0). This monthly publication contains information about survey design, sample redesign, scope, coverage and population benchmarks relevant to the monthly LFS, which also apply to supplementary surveys. It also contains definitions of demographic and labour force characteristics, and information about telephone interviewing which are relevant to both the monthly LFS and supplementary surveys.

SCOPE

3 In addition to persons excluded from the monthly LFS, there were 80,000 persons living in remote and sparsely settled parts of Australia who are considered out of scope of this survey. The exclusion of these persons has only a minor impact on any aggregate estimates produced for individual States and Territories, except for the Northern Territory. Further details can be obtained by contacting the person listed on the front cover of this publication.

4 Students at boarding schools, patients in hospitals, residents of homes (e.g. retirement homes, homes for persons with handicaps), and inmates of prisons are also excluded from all supplementary surveys. Also excluded from this survey are employees who worked solely for payment in kind in their main job, and employees who reported at interview that their business was an unincorporated enterprise but were later classified as employees as a result of an office check.

COVERAGE

5 The estimates in this publication relate to persons within scope of the survey in August 1999. In the LFS, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence, has only one chance of selection in the survey. See *Labour Force, Australia* (Cat. no. 6203.0).

RELIABILITY OF THE ESTIMATES

6 Estimates in this publication are subject to sampling and non-sampling errors.

- Sampling error is the difference between the published estimate and the value that would have been produced if all dwellings had been included in the survey. For further information on sampling error, refer to the Technical Notes.
- Non-sampling errors are inaccuracies that occur because of imperfections in reporting by respondents and interviewers, and errors made in coding and processing data. These inaccuracies may occur in any enumeration, whether a full count or a sample. Every effort is made to reduce the non-sampling error through careful design of questionnaires, intensive training and supervision of interviewers and efficient processing procedures.

SEASONAL FACTORS

7 The estimates are based on information collected in the survey month and, due to seasonal factors, may not be representative of other months of the year.

CHANGES IN CLASSIFICATION

8 From August 1996, occupation data are classified according to the second edition of the Australian Standard Classification of Occupations (ASCO). For more detailed information, see the *ASCO—Australian Standard Classification of Occupations, Second Edition* (Cat. no. 1220.0) and *Information Paper—Census of Population and Housing: Link Between First and Second Editions of Australian Standard Classification of Occupations (ASCO)* (Cat. no. 1232.0).

9 From August 1994, industry data are classified according to the Australian and New Zealand Standard Industrial Classification (ANZSIC), a detailed description of which appears in *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (Cat. no. 1292.0). Like the previous Australian Standard Industrial Classification ANZSIC classifies businesses according to their economic activities, in a structure consisting of four levels (Division, Subdivision, Group and Class). Supplementary survey data are coded at the Group level, as was the practice under the previous Australian Standard Industrial Classification.

NOTES ON ESTIMATES

10 In August 1999 there were 48,400 persons for whom sector of main job could not be determined. These persons were included in the private sector for the purpose of this publication.

11 In August 1999, persons refusing to answer questions about their weekly earnings and persons working in their own limited liability company who did not draw a wage or salary represented 499,200 in the population. These persons have been classified to the 'Could not be determined' category in this publication.

12 Care should be taken when using estimates of mean weekly earnings. Employees refusing to answer questions about their earnings are excluded from estimates of mean weekly earnings. Where these employees have demographic and employment characteristics which differ on average from the rest of the employee population, it is likely that the exclusion of these persons has resulted in a slight downward bias on mean weekly estimates.

COMPARABILITY OF TIME SERIES

13 Revisions are made to population benchmarks for the LFS after each five-yearly Census of Population and Housing. The last such revision was made in February 1999 to take account of the results of the 1996 Census of Population and Housing. Estimates from supplementary surveys conducted from and including February 1999 are therefore based on revised population benchmarks.

COMPARABILITY OF TIME
SERIES *continued*

14 Supplementary surveys are not always conducted on the full LFS sample. Apart from scope exclusions, such as those listed in paragraphs 3 and 4, since August 1994, the sample available for supplementary surveys has been restricted to no more than seven-eighths of the LFS sample. Since it was introduced, this survey has been conducted on various proportional samples. Therefore, sampling errors associated with previous surveys may vary from the sampling errors for this survey.

15 In August 1990, persons aged 70 years and over were excluded from this survey, restricting the age of respondents to 15–69 years. The scope of surveys since 1991 and surveys run prior to August 1990, included all persons aged 70 and over.

16 Care should be taken when comparing the movements in mean weekly earnings and employment benefits estimates that include the July 1991 and August 1997 surveys. The usual period between surveys is 12 months, however in 1991 the elapsed time was 11 months (August 1990 to July 1991) and in 1992 it was 13 months (July 1991 to August 1992). In 1997, the elapsed time was 2 years (August 1995 to August 1997).

COMPARABILITY WITH
AVERAGE WEEKLY
EARNINGS

17 This survey was conducted to obtain statistics relating to employee benefits and trade union membership. It also collected statistics on the distribution of earnings of employees classified by characteristics such as marital status, sex, age and whether the earnings came from the main job or a second job. Caution should be exercised when comparing the means (averages) in these tables with estimates of average weekly earnings included in the quarterly publication *Average Weekly Earnings, States and Australia* (Cat. no. 6302.0), which are compiled from a survey of employers. There are important differences in the scope and methodology of the two surveys.

18 The quarterly Survey of Average Weekly Earnings excludes employees in the industries of Agriculture, forestry and fishing (Australian and New Zealand Standard Industrial Classification (ANZSIC) Division A) and Private households employing staff (ANZSIC Subdivision 97), both of which are included in this household survey. Data from the quarterly Survey of Average Weekly Earnings are collected from employers who complete a mailed questionnaire with details of their employees' weekly earnings. For this household survey, respondents are either interviewed personally at their dwelling, or another adult member of their household responds on their behalf.

19 The methodology used in this household survey may result in non-sampling error not evident in surveys of employers (and vice versa). This may account for some of the differences between the results of the two surveys.

PREVIOUS SURVEYS OF
WEEKLY EARNINGS

20 Similar surveys have been conducted annually since August 1975, except 1991 when the survey was conducted in July and in 1996 when the survey was not conducted.

21 Prior to 1998, this publication was titled, *Weekly Earnings of Employees (Distribution), Australia* (Cat. no. 6310.0). The change in title reflects the inclusion of employment benefits and trade union membership data previously released in other publications.

PREVIOUS SURVEYS OF
TRADE UNION MEMBERS

22 Information on trade union membership was first collected in 1976, then biennially in its current format, from 1986 to 1992. From this time it was conducted annually (with limited data available every second year). Results of previous surveys have been published in:

- *Labour Force, Australia, December 1994, December 1995* (Cat. no. 6203.0)
- *Trade Union Members, Australia, August 1986, August 1988, August 1990, August 1992, August 1996* (Cat. no. 6325.0)
- *Trade Union Members, Australia, August 1994* (Cat. no. 6325.0.40.001)

23 Limited data on trade union membership have also been published in:

- *Weekly Earnings of Employees (Distribution), August 1997* (Cat. no. 6310.0)
- *Weekly Earnings of Employees (Distribution), August 1995* (Cat. no. 6310.0.40.001)
- *Working Arrangements, Australia, August 1997* (Cat. no. 6342.0)
- *Working Arrangements, Australia, August 1995* (Cat. no. 6342.0.40.001)

PREVIOUS SURVEYS OF
EMPLOYMENT BENEFITS

24 Results of previous surveys on employment benefits have been published in:

- *Employment Benefits, Australia, August 1983 to August 1992* (Cat. no. 6334.0)
- *Employment Benefits, Australia, August 1994* (Cat. no. 6334.0.40.001)
- *Weekly Earnings of Employees (Distribution), Australia, August 1995* (Cat. no. 6310.0.40.001)
- *Weekly Earnings of Employees (Distribution), Australia, August 1997* (Cat. no. 6310.0)

NEXT SURVEY

25 The ABS plans to conduct these surveys again in August 2000, except for information on non-standard employment benefits (e.g. transport, shares and child care).

GENERAL
ACKNOWLEDGMENT

26 ABS surveys draw extensively on information provided by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED PUBLICATIONS

27 Other publications which may be of interest include:

- *Average Weekly Earnings, States and Australia* (Cat. no. 6302.0)
- *Career Experience, Australia* (Cat. no. 6254.0)
- *Working Arrangements, Australia* (Cat. no. 6342.0)
- *Industrial Disputes, Australia* (Cat. no. 6332.0)
- *Labour Force, Australia* (Cat. no. 6203.0)

28 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office or from the ABS Information Service on the Internet, <http://www.abs.gov.au>.

APPENDIX: POPULATIONS AND DATA ITEMS LIST

The Australian Bureau of Statistics has available a range of unpublished data from the Employee Earnings, Benefits and Trade Union Membership Survey. This section lists the data items and populations which relate to the survey. More detailed breakdowns of some data items are available on request.

The population(s) for a particular data item refers to the persons in the survey to whom data items relate. Where alternative output categories are available for the same data item, these are shown and the data item name is followed by a bracketed numeral (e.g. BIRTHPLACE (2)).

To obtain unpublished data or more information about our customised data service contact Sue Barker on Canberra 02 6252 6503, or by facsimile on 02 6252 7784.

POPULATIONS

- POPULATION 1: Employees.
- POPULATION 2: Employees who worked full-time in their main job.
- POPULATION 3: Employees who were full-time workers.
- POPULATION 4: Employees who worked full-time in their main job and were born overseas.
- POPULATION 5: Employees who worked as an employee in the reference week in their second job.
- POPULATION 6: Employees in main job who were members of a trade union.

TECHNICAL NOTES

INTRODUCTION

1 Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings, they are subject to sampling variability, that is, they may differ from those that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of dwellings was included. There are about two chances in three that a sample estimate will differ by less than one SE from the number that would have been obtained if all dwellings had been included, and about 19 chances in 20 that the difference will be less than two SEs. Another measure of the likely difference is the relative standard error (RSE), which is obtained by expressing the SE as a percentage of the estimate.

2 Space does not allow for the separate indication of the SEs of all estimates in this publication. Since they are averages based on calculations for a limited number of past surveys over a wide range of labour force characteristics these numbers will not give a precise measure of the SE of a particular estimate but they will provide an indication of its magnitude.

CALCULATION OF STANDARD ERROR

3 An example of the calculation and the use of SEs in relation to estimates of persons is as follows. Table 5 shows the estimated number of female part-time employees in main job in Australia was 1,528,800. Since this estimate is between 1,000,000 and 2,000,000 table T1 shows that the SE for Australia will lie between 11,550 and 15,250 and can be approximated by interpolation as 13,500 (rounded to the nearest 100). Therefore, there are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will fall in the range 1,515,300 to 1,542,300 and about 19 chances in 20 that the value will fall within the range 1,501,800 to 1,555,800. This example is illustrated in the diagram below:

CALCULATION OF
STANDARD ERROR
continued

4 As can be seen from the SE table, the smaller the estimate, the higher is the RSE. Very small estimates are thus subject to such high SEs (relative to the size of the estimate) as to detract seriously from their value for most reasonable uses. In these tables, only estimates with RSEs less than 25% are considered sufficiently reliable for most purposes. However, estimates with larger RSEs have been included and are preceded by an asterisk (e.g. *3.4) to indicate they are subject to high SEs and should be used with caution.

MEANS AND MEDIANS

5 The RSEs of estimates of mean and median weekly earnings are obtained by first finding the RSE of the estimate of the total number of persons contributing to the estimate (see table T1) and then multiplying the number so obtained by the following relevant factors:

Mean weekly earnings: 0.9

Median weekly earnings: 1.0

6 The following is an example of the calculation of SEs where the use of a factor is required. Table 7 shows an estimate of 1,457,500 female part-time employees with median weekly earnings of \$252¹. The SE of 1,457,800 can be approximated by interpolation as 13,200 which is 0.9% as a RSE. The factor of 1.0 (see paragraph 5) is applied to the RSE of 0.9% to obtain 0.9%. Therefore the SE for median weekly earnings of female part-time employees in main job is 0.9% of \$252, i.e. about \$2.30. So there are two chances in three that the median weekly earnings is between \$249.70 and \$254.30, and about 19 chances in 20 that it is between \$247.40 and \$256.60.

7 Average and median estimates produced from population estimates smaller than the values provided in table T2 have RSEs larger than 25% and should be used with caution.

8 An example of an estimate with a RSE greater than 25% is in table 12. The mean weekly earnings in second job for males who earned \$1,000 and under \$1,200 in their main job is \$382 and the number of persons contributing to this estimate is 3,300. Table T2 shows that the level at which estimates of mean weekly earnings have a RSE of 25% is 4,030. Therefore, the estimate of mean weekly earnings has a high RSE and is shown in table 12 preceded by an asterisk (i.e. *382).

PROPORTIONS AND
PERCENTAGES

9 Proportions and percentages formed from the ratio of two estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. A formula to approximate the RSE of a proportion is given below:

$$RSE(x/y) = \sqrt{[RSE(x)]^2 - [RSE(y)]^2}$$

1: Table 7 shows that, of the 1,528,800 female part-time employees, 71,300 had earnings that could not be determined. Therefore, 1,457,500 persons contributed to the median estimate.

PROPORTIONS AND
PERCENTAGES
(Continued)

10 Considering the example from paragraph 3 above, the 1,528,800 female part-time employees in the main job represent 46.1% of the 3,313,500 female employees. The SE of 3,313,500 is approximately 18,800 so the RSE is 0.6%. The RSE for 1,528,800 is 0.9%. Applying the above formula, the RSE of the proportion is $\sqrt{(0.9)^2 - (0.6)^2}$ or 0.7%, giving a SE for the proportion (46.1%) of 0.3 percentage points. Therefore, there are about two chances in three that the proportion of female part-time employees was between 45.8% and 46.4% and 19 chances in 20 that the proportion is within the range 45.5% to 46.7%.

DIFFERENCES

11 Published estimates may also be used to calculate the difference between two survey estimates (of numbers or percentages). Such an estimate is subject to sampling error. The sampling error of the difference between two estimates depends on their SEs and the relationship (correlation) between them. An approximate SE of the difference between two estimates ($x - y$) may be calculated by the following formula:

$$SE(x - y) = \sqrt{[SE(x)]^2 + [SE(y)]^2}$$

12 While this formula will only be exact for differences between separate and uncorrelated characteristics or subpopulations, it is expected to provide a good approximation for all differences likely to be of interest in this publication.

13 Standard errors contained in table T1 are applicable to all estimates from this survey. The levels at which averages and medians have a RSE of 25% are shown in table T2.

T2 LEVELS(a) AT WHICH ESTIMATES HAVE A RELATIVE STANDARD ERROR OF 25%

	NSW no.	Vic. no.	Qld no.	SA no.	WA no.	Tas. no.	NT no.	ACT no.	Aust. no.
Median weekly earnings	6 250	4 690	4 100	2 470	2 940	1 210	1 290	1 150	4 570
Mean weekly earnings	5 460	4 210	3 790	2 210	2 620	1 060	1 180	1 030	4 030

(a) Refers to the number of persons contributing to the estimates.

GLOSSARY

Casual employees in main job	Employees who were entitled to neither paid holiday leave nor sick leave.
Child care/education expenses	Payment in full or in part by the employer of any expenses incurred in providing child care or education to an employee's child(ren) (e.g. tuition fees, books).
Club fees	Payment or subsidisation of the employee's membership fee for a club or society (not being a union or professional association) of which he/she was a member. Deduction from the employee's wages or salary, where the employee paid the full amount, was not considered to be a benefit.
Electricity	Payment or subsidisation by a person's employer of household fuel and/or power expenses, including electricity, gas, oil and firewood.
Employees	Employed persons aged 15 years and over who worked in their main job for an employer for wages or salary or in their own incorporated enterprise with or without hiring employees.
Employment benefits	Concessions, allowances or other privileges received by or provided to employees in their main job in addition to wages or salary while the employees were working for their current employer. Some benefits which were not included in the survey are: certain allowances received in accordance with award provisions (e.g. safety clothing); maternity and paternity leave; and cash payments, bonuses or payments in lieu of leave. Not all benefits came directly from the current employer but were received by or provided to employees from other sources as a result of their employment in a particular occupation or industry (e.g. a concession air fare granted by an airline to a travel agency employee; long-service leave granted by an industry to an employee in that industry).
Entertainment allowance	Regular provision of an amount for entertainment or hospitality expenses, or the reimbursement of expenses regularly incurred for entertainment or hospitality purposes.
Full-time employees in main job	All employees for whom 'full-time' was the response to the question 'Is your main job full-time or part-time?'
Full-time workers	Employees who usually worked a total of 35 hours or more a week in all jobs and others who usually work less than 35 hours a week but worked 35 hours or more during the reference week.
Goods and services	Goods and services (not included under other headings) provided free or at a discounted price to an employee, e.g. an employee discount on goods sold in the retail outlet where they work.
Holiday expenses	Any free or discounted holiday or holiday travel expenses paid for or subsidised as a result of a person's employment.

Holiday leave	Provision by an employer of paid holiday, vacation or recreation leave.
Hours paid for in main job	The number of hours for which employees were paid, not necessarily the number of hours actually worked during the reference week (e.g. an employee on paid leave for the week was asked to report the number of hours for which they were paid).
Hours worked	The number of hours actually worked during the reference week.
Housing	Assistance in the provision of, or subsidisation of the costs of, accommodation used as a residence by a person or his/her family. It included: the provision (as an employee entitlement) of a residence owned by the employer; payment or subsidisation of rent or board; provision of a housing allowance; and payment or subsidisation of water, sewerage or general rates payable to local government authorities.
Industry	Classified using the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993</i> (Cat. no. 1292.0). In this publication, industry relates to the main job and is shown at the ANZSIC Division level.
Long service leave	Provision by employers or industry body of long service leave to an employee.
Low-interest finance	Finance provided by the employer, or as a result of working for the employer, at a low-interest rate.
Main English-speaking countries	Comprises the United Kingdom, Ireland, Canada, South Africa, the United States of America and New Zealand.
Main job	The job in which most hours were usually worked.
Mean weekly earnings	The amount obtained by dividing the total earnings of a group by the number of employees in that group.
Median weekly earnings	The amount which divides the distribution of employees into two equal groups, one having earnings above and the other below that amount.
Medical or hospital	Payment or subsidisation by the employer of an employee's medical and/or hospital expenses, or private health insurance. Deduction from the employee's wages or salary, where the employee paid the full contribution, was not considered to be a benefit.
Member of a trade union	Employees with membership in a trade union in conjunction with their current job.
Occupation	Classified according to <i>ASCO—Australian Standard Classification of Occupations, Second Edition</i> (Cat. no. 1220.0). In this publication, occupation relates to the main job and is shown at the Major Group level.
Part-time employees in main job	All employees for whom 'part-time' was the response to the question 'Is your main job full-time or part-time?'

Part-time workers	Employees who usually worked a total of less than 35 hours a week in all jobs and who did so during the reference week.
Permanent employees in main job	Employees who were entitled to paid holiday leave or sick leave in their main job.
Second job	A job, other than the main job, in which some hours were worked during the reference week.
Sector of main job	Is used to classify a respondent's employer as a public or private enterprise. Public sector includes local government authorities, government departments, agencies and authorities created by, or reporting to, the Commonwealth Parliament and State Parliaments.
Shares	Receipt of provision of shares, rights or options in the employer's business as an employee entitlement.
Sick leave	Provision by employers of paid sick leave in the main job.
Size of location	The number of persons employed at the location of the respondent's main job.
Standard benefit	Provision by employer of holiday leave, sick leave, long service leave or superannuation benefit.
Study leave	Time off granted by the employer for attendance at classes during working hours, provided that the course being studied was not undertaken as a condition of employment. People studying as a condition of employment (e.g. apprentices) were not considered to be receiving a benefit. However, other students who were given time off to attend courses were considered to receive study leave, even if they lost pay while on study leave or had to make up all of the time they were absent during working hours.
Superannuation benefit	Membership of a superannuation or retirement benefits scheme, arranged or provided by the person's current employer even if the employer did not contribute to the fund.
Superannuation coverage	Membership of a superannuation or retirement benefits scheme regardless of whether the scheme was arranged or provided by the person's current employer.
Telephone	Payment or subsidisation by the employer of home telephone rental, home telephone calls or mobile phone calls.
Trade union	An organisation (or employee or professional association), consisting predominantly of employees, the principal activities of which include the negotiation of rates of pay and conditions of employment for its members.

Transport	Assistance with day-to-day traveling for private purposes by the provision of a vehicle or by other means, (e.g. traveling allowance). Transport benefits provider for less frequent purposes were classified as another type of benefit (e.g. holiday-related travel was classified as holiday expenses).
Union dues/professional association	Payment or subsidisation by the employer of the employee's union membership dues or professional association membership fees. Deduction from the employee's wages or salary, where the employee paid the full amount, was not considered to be a benefit.
Weekly earnings	Amount of 'last total pay' from wage and salary jobs prior to the interview (i.e. before taxation and other deductions had been made). For persons paid other than weekly, earnings were converted to a weekly equivalent. No adjustment was made for any back payment of wage increases or prepayment of leave, etc.

SUPPLEMENTARY SURVEYS

The supplementary and special surveys collect data on particular aspects of the labour force. The following is an historical list of supplementary and special labour force surveys. The data is available in publication form, by subscription or on request. It may be possible to order unpublished data on the following supplementary and special surveys by contacting the ABS.

TITLE	CATALOGUE NUMBER
■ Career Experience. Irregular. Latest issue November 1998	6254.0

WE HAVE THE ANSWERS ... WE JUST CAN'T FIT THEM ALL INTO THIS PUBLICATION!

Is there more information you would like about this topic or other supplementary survey topics?

The good news is that the information is available. In fact, we have volumes of detailed information that cannot be placed into the publications but can be provided to you.

MEETING YOUR NEEDS WITH A CUSTOMIZED APPROACH

Detailed information from every supplementary survey is available—that's where we can help. Contact one of our consultants to discuss your needs. They will provide you with the best possible option to solve your data requests in a written quote, clearly setting out all the costs and time frames.

We can supply you with your requested information in a variety of formats to best suit your needs:

- printed tables
- spreadsheets in a range of formats compatible with your software package
- via E-mail
- floppy disk

TAILORED TO YOUR SPECIFICATIONS

We can mix and match from our extensive data holdings to give a complete statistical picture for your policy, planning, research and commercial analysis needs.

Take a look at the list of populations and data items on the previous pages. They contain a comprehensive list of the variables available from the Weekly Earnings of Employees (Distribution), Employment Benefits and Trade Union Members Surveys that you may be interested in exploring. These data items can be cross-classified to your exact requirements, offering you the best cost effective solution. The cost will depend on what you select and their degree of detail. Payment for this information may be made by credit card or by invoice.

MORE INFORMATION IS AVAILABLE

Contact Sue Barker on Canberra 02 6252 6503 to talk about any inquiries you may have about the information from this survey or to order your special data requirements.

For information about wider range of ABS data, see contact details on the back of the cover.
