NOTES

FORTHCOMING ISSUES

March 2005

RELEASE DATE

30 June 2005

June 2005 30 September 2005

ABOUT THIS PUBLICATION

This publication presents results from the quarterly Survey of Tourist Accommodation (STA). For 2004 the STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:

- hotels and resorts with facilities and 15 or more rooms
- motels, private hotels and guest houses with facilities and 15 or more rooms
- serviced apartments with 15 or more units.

DATA QUALITY INDICATORS

National imputation rates will now be reported in the Explanatory Notes of this publication and imputation rates for each state and territory will be reported in the data cubes, *Tourist Accommodation, Small Area Data* (cat. no. 8635.1.55.001 - 8635.8.55.001), available at the ABS web site <www.abs.gov.au>.

REVISIONS TO DATA CUBES

The column labels and units of quantity of some data items included in previously released data cubes were inconsistent. This has been corrected and the affected data cubes have been re-released on the ABS web site <www.abs.gov.au>. Further details about these revisions are included in the notes accompanying the re-released data cubes.

The following data cube has been re-released for the December quarter 2003: *Tourist Accommodation, Small Area Data, New South Wales* (cat.no.8635.1.55.001)

The following data cubes have been re-released for the March quarter 2004:

Tourist Accommodation, Small Area Data, New South Wales (cat.no.8635.1.55.001)
Tourist Accommodation, Small Area Data, Victoria (cat.no.8635.2.55.001)
Tourist Accommodation, Small Area Data, Queensland (cat.no.8635.3.55.001)
Tourist Accommodation, Small Area Data, South Australia (cat.no.8635.4.55.001)
Tourist Accommodation, Small Area Data, Western Australia (cat.no.8635.5.55.001)

Tourist Accommodation, Small Area Data, Tasmania (cat.no.8635.6.55.001)

CHANGES IN FUTURE ISSUES

An expansion to the scope of the STA will occur from March quarter 2005. This will take the form of a reduction in the size cut-off for hotels, motels and guest houses and serviced apartments from 15 rooms to 5 rooms. The scope will also be expanded to include caravan parks with 40 or more powered sites, visitor hostels with 25 or more bed spaces, and holiday flats and units with 15 or more units.

First results from the expanded scope will be included in the June quarter 2005 issue. This issue will present results from the March and June quarters 2005, after which results will be published quarterly. Note that the March quarter 2005 issue will remain unchanged and will present data within the current scope only.

Dennis Trewin Australian Statistician

SUMMARY OF FINDINGS

SEASONALLY ADJUSTED AND TREND

SEASONALLY ADJUSTED AND TREND KEY FIGURES, Licensed hotels, motels and guest houses and serviced apartments—Australia

	Dec Qtr	Sep Qtr	Dec Qtr

Accommodation takings

In December quarter 2004, accommodation takings for licensed hotels with facilities, motels and guest houses and serviced apartments combined were \$1,513.0 million. This was an increase of 0.9% (\$13.7 million) from December quarter 2003. The average takings per room night occupied for licensed hotels with facilities, motels and guest houses and serviced apartments combined was \$126.10.

Licensed hotels with facilities were the highest contributor to accommodation takings with \$749.9 million (49.6%). Average takings per room night occupied in December quarter 2004 were highest for licensed hotels with facilities at \$148.90.

Accommodation takings continued

(a) Break in time series between the March and June quarters 2003. See Explanatory Notes.

The contributions of accommodation takings in December quarter 2004 for licensed hotels with facilities, motels and guest houses and serviced apartments combined were highest in New South Wales (33.5%) and Queensland (28.2%) and lowest in Australian Capital Territory (2.3%).

Room nights occupied

Total room nights occupied were 12.0 million in December quarter 2004 for licensed hotels with facilities, motels and guest houses and serviced apartments combined. Room nights occupied increased by 0.8% (0.1 million) from December quarter 2003 to December quarter 2004.

Licensed hotels with facilities represented 5.0 million (42.0%) of the total room nights occupied, while motels and guest houses represented 4.3 million (36.1%) and serviced apartments represented 2.6 million (21.9%).

Room occupancy rate

The room occupancy rate for licensed hotels with facilities, motels and guest houses and serviced apartments combined increased 0.2 percentage points to 63.7% in December quarter 2004 compared with December quarter 2003.

Queensland recorded the highest room occupancy rate for licensed hotels with facilities, motels and guest houses and serviced apartments combined with 67.3%. This was followed by Australian Capital Territory (66.4%) and New South Wales (63.8%).

ROOM OCCUPANCY RATES(a), Original—Australia

(a) Room occupancy rates are not subject to a break in series.

Star grading

Almost half (48.9%) of all licensed hotels with facilities, motels and guest houses and serviced apartments were graded as 3 star in December quarter 2004 with a further 34.4% graded as 4 star. The proportion of establishments graded as 3 and 4 star has increased since the December quarter 2003, while lower and ungraded establishment numbers have decreased. The proportion graded as 5 star establishments has remained relatively stable over this time, comprising 2.8% of all establishments in December quarter 2004.

this table as there are no ostablishments in seaso of the this table as there are no establishments in-scope of the collection in these regions.

EXPLANATORY NOTES

INTRODUCTION

SCOPE

ESTABLISHMENT OUT OF SCOPE

DEFINITIONS OF
ACCOMMODATION
ESTABLISHMENTS

COVERAGE

STAR GRADING

DATA QUALITY

- **1** This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
- **2** On a quarterly basis the STA includes licensed hotels with facilities, motels, guest houses and serviced apartments with 15 or more rooms or units.
- **3** Short-term non-residential accommodation, which is in scope of the STA, is accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months.
- **4** Some establishments also provide long-term residential accommodation. For licensed hotels with facilities, motels, guest houses and serviced apartments, the amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **5** An accommodation establishment in the Outback South Australia Tourism Region was made out of scope for the December quarter 2004. As a result, data for this region have been significantly affected, in particular, occupancy rates, room rates and total number of rooms. This establishment will remain out of scope for future quarters.
- **6** For 2004 the STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:
 - licensed hotels and resorts with facilities establishments with 15 or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
 - motels, private hotels and guest houses with facilities establishments with 15 or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
 - serviced apartments establishments with 15 or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.
- **7** The main source of coverage is from the Australian Automobile Association through AAA Tourism Pty Ltd. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism commissions and industry associations is also undertaken.
- **8** Star grade classifications of establishments were revised by AAA Tourism Pty Ltd. These changes were implemented for the STA in the March quarter 2004 and should be taken into account when making comparisons with previous quarters.
- **9** The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
- errors in the reporting of data by providers

EXPLANATORY NOTES continued

DATA QUALITY continued

- errors in the process of capturing data
- estimation for missing data
- definition and classification errors
- incomplete coverage.
- **10** Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.

RESPONSE RATES

- **11** The December quarter 2004 response rates were:
- 92.9% licensed hotels with facilities
- 92.2% motels and guest houses
- 91.3% serviced apartments.

IMPUTATION RATES

- **12** Imputation is the process whereby a value is generated for missing data items by averaging the responses for similar establishments which were operating during the reference period.
- **13** The December quarter 2004 imputation rates were:
 - 6.1% of room nights
 - 5.1% of takings.

BREAK IN TIME SERIES

- **14** In the June quarter 2003 the ABS identified 132 licensed hotels with facilities, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.
- **15** The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1, *Tourist Accommodation, Australia* (cat. no. 8635.0), December quarter 2003. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.

TAKINGS FROM
ACCOMMODATION

16 From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.

STATISTICAL GEOGRAPHY

- **17** Small area statistics for 2004 are classified to the *Australian Standard Geographical Classification (ASGC)*, 2003 Edition (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
- 18 These SIA data are aggregated to tourism regions as defined by relevant state and territory tourist commissions. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level. This publication no longer presents comparative tourism region data for the same quarter of the previous year.
- **19** Details of SLAs, the composition of tourism regions, major changes to tourism regions and outline maps of tourism regions are provided on the Tourism Theme Page of the ABS web site <www.abs.gov.au>.

SEASONAL ADJUSTMENT

20 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular quarter. Irregular influences that are highly volatile can make it difficult to

EXPLANATORY NOTES continued

SEASONAL ADJUSTMENT continued

interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.

21 The way in which seasonally adjusted and trend estimates were calculated changed from a Forward Factor methodology to a Concurrent methodology in March quarter 2003. The Forward Factor method relied on an annual analysis of the original time series to estimate seasonal factors that were to be applied in the forthcoming four quarters. Under this method the projected seasonal factors, or forward factors, were not updated until the next annual analysis. The Concurrent methodology uses the most up to date original time series available at each reference period to estimate seasonal factors thus eliminating the need to use projected seasonal factors.

TREND ESTIMATES

- 22 Smoothing the seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates the trend estimates. The trend estimates are derived by applying a 7-term Henderson moving average to the quarterly seasonally adjusted series. The Henderson moving average used in the middle of the time series is symmetric but, as the end of a time series is approached, asymmetric forms of the symmetric moving average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights used with the quarterly data have been tailored to suit the particular characteristics of individual series.
- **23** While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent quarters, particularly as additional original estimates become available. For further information refer to *Information Paper: A Guide to Interpreting Time Series Monitoring Trends, 2003* (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

EFFECTS OF ROUNDING

24 Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

RELATED PUBLICATIONS

25 Other ABS publications and products which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au> (charges apply).

Tourist Accommodation, Small Area Data cat. no. 8635.1.55.001–8635.8.55.001 (data cubes for each state/territory – issued quarterly)

Tourist Accommodation, Australia, Expanded Scope Collection cat. no. 8635.0.55.001 (irregular)

WA Western Australia

GLOSSARY

Average length of stay Average number of days each guest stayed during the reference period. It is a derived

item calculated by dividing the number of guest nights by the number of guest arrivals $% \left(1\right) =\left(1\right) \left(1\right) \left$

with the result expressed as a number of days.

Average takings per available

room night

The takings from accommodation divided by the total number of room nights for the

survey period,

 $Average \ takings \ per \ available \ room \ night(\$) = \frac{Takings \ from \ accommodation}{Room \ nights \ available}$

Average takings per room night

occupied

The takings from accommodation divided by the total number of room nights occupied

for the survey period,

Average takings per room night occupied(\$) = $\frac{Takings\ from\ accommodation}{Room\ nights\ occupied}$

Bed occupancy rate The bed occupancy rate represents bed occupancy expressed as a percentage of total

capacity available during the survey period,

Bed occupancy rate (%) = $\frac{Guest\ nights\ occupied}{Guest\ nights\ available} * 100$

Bed spaces The maximum number of bed spaces normally in place available to accommodate paying

guests during the survey period. Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots and divans not normally used as beds are excluded.

Capacity Capacity in terms of guest rooms/units is the maximum number available to

accommodate paying guests during the survey period. Capacity closed temporarily for

seasonal reasons is included.

Establishments The number of hotels, motels and guest houses and serviced apartments within the

scope of the survey which operated for any part of the survey period, or which closed

temporarily for the quarter for seasonal reasons.

Guest arrivals The total number of paying guests counted only on the first night they stayed at the

accommodation establishment during the survey period.

Guest nights available The total number of nights available to all paying guests during the survey period.

This is derived from the number of bed spaces multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are

included.

Guest nights occupied The total number of paying guests counted on each night they stayed at the

accommodation establishment during the survey period.

Occupancy Occupancy in terms of room nights occupied refers to the total number of nights each

guest room was occupied during the survey period.

Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey

period.

Persons employed The total number of persons working at each accommodation establishment at the end

of the survey period (including working proprietors and those working on other than

accommodation activities).

Room nights available The number of guest rooms/units available multiplied by the number of days for which

they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Room nights occupied The number of nights each guest room/unit was occupied by a paying guest during the

survey period.

Room occupancy rate The room occupancy rate represents room occupancy expressed as a percentage of total

capacity available during the survey period,

Room occupancy rate (%) = $\frac{Room\ nights\ occupied}{Room\ nights\ available} * 100$

GLOSSARY continued

Room occupancy rate

continued

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.

Rooms

The maximum number of rooms available for accommodating short-term paying guests at each hotel, motel and guest house and serviced apartment during the survey period. Units, apartments and suites are treated as rooms for these types of establishments in these survey results.

Star grading

The grading of hotels, motels and guest houses with facilities and serviced apartments is based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication *Accommodation Guide* published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

While coverage has significantly improved, some establishments (including some competing in the 4 and 5 star markets and having significant takings) still remain outside the star grading scheme. These establishments have been given a star grading of 'ungraded'.

Takings from accommodation

Since 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the amount of GST payable is estimated and the data revised accordingly.

Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month.
