ISSUE (Quarter) RELEASE DATE

 June 2005
 30 September 2005

 September 2005
 10 January 2006

ABOUT THIS PUBLICATION

This publication presents results from the March quarter 2005 Survey of Tourist Accommodation (STA) for the following categories of establishments. These establishments provide predominantly short-term non-residential accommodation to the general public:

- hotels and resorts with facilities and 15 or more rooms
- motels, private hotels and guest houses with facilities and 15 or more rooms
- serviced apartments with 15 or more units.

CHANGES IN SCOPE

The scope of the quarterly STA was expanded from March quarter 2005. This takes the form of a reduction in the size cut-off for hotels, motels and guest houses and serviced apartments from 15 rooms to 5 rooms. The scope also includes caravan parks with 40 or more powered sites, visitor hostels with 25 or more bed spaces, and holiday flats and units with 15 or more units (see paragraphs 2-6 of the Explanatory Notes).

First results from the expanded scope will be included in the June quarter 2005 issue. This issue will present results from the March and June quarters 2005, after which results will be published quarterly.

CHANGES IN THIS ISSUE

The March quarter 2005 results include an additional 174 establishments with 15 rooms or more which were identified as a part of the expansion of the survey. The inclusion of these establishments has added approximately 0.9% to the level of takings from accommodation. Full details are provided in paragraphs 7-10 of the Explanatory Notes.

Susan Linacre
Acting Australian Statistician

#### SUMMARY OF FINDINGS

SEASONALLY ADJUSTED AND TREND

SEASONALLY ADJUSTED AND TREND KEY FIGURES, Licensed hotels, motels and guest houses and serviced apartments—Australia

	Mar Qtr 2004	Dec Qtr 2004	Mar Qtr 2005
Seasonally Adjusted			
Room occupancy rate (%)	61.3	62.0	63.2
Takings from accommodation ('000)	1 370 389	1 441 162	1 496 568

Accommodation takings

In March quarter 2005, accommodation takings for licensed hotels with facilities, motels and guest houses and serviced apartments combined were \$1,525.3 million. This was an increase of 9.1% (\$126.8 million) from March quarter 2004. The average takings per room night occupied for licensed hotels with facilities, motels and guest houses and serviced apartments combined was \$128.80.

Licensed hotels with facilities were the highest contributor to accommodation takings with \$749.4 million (49.1%). Average takings per room night occupied in March quarter 2005 were highest for licensed hotels with facilities at \$152.70.

Accommodation takings continued

(a) Break in time series between the March and June quarters 2003. See Explanatory Notes.

The contributions of accommodation takings in March quarter 2005 for licensed hotels with facilities, motels and guest houses and serviced apartments combined were highest in New South Wales (34.9%) and Queensland (25.3%) and lowest in the Northern Territory (2.0%).

Room nights occupied

Total room nights occupied were 11.8 million in March quarter 2005 for licensed hotels with facilities, motels and guest houses and serviced apartments combined. Room nights occupied increased by 3.7% (0.4 million) from March quarter 2004 to March quarter 2005.

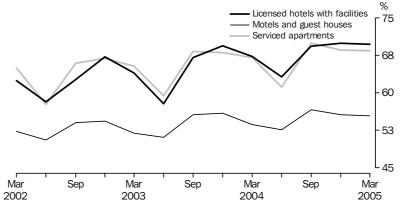

Licensed hotels with facilities represented 4.9 million (41.5%) of the total room nights occupied, while motels and guest houses represented 4.2 million (35.8%) and serviced apartments represented 2.7 million (22.7%).

Room occupancy rate

The room occupancy rate for licensed hotels with facilities, motels and guest houses and serviced apartments combined increased 2.0 percentage points to 63.6% in March quarter 2005 compared with March quarter 2004.

Tasmania recorded the highest room occupancy rate for licensed hotels with facilities, motels and guest houses and serviced apartments combined with 72.8%. This was followed by Victoria (66.3%) and Australian Capital Territory (66.2%).

#### ROOM OCCUPANCY RATES(a), Original—Australia

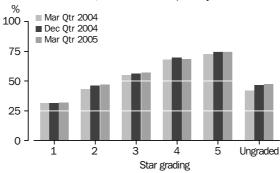

(a) Room occupancy rates are not subject to a break in series.

Star grading

The room occupancy rate increases with star grading, with five-star establishments recording the highest rate and one-star recording the lowest. In March quarter 2005, the room occupancy rate for five-star establishments was 74.5% compared with 32.0% for one-star.

STAR GRADING, Room occupancy rate—Australia

While the national room occupancy rate for five-star establishments remained stable compared with December quarter 2004, the rate showed increases in New South Wales (from 78.5% to 81.9%) and Victoria (from 78.5% to 82.4%), and decreases in Queensland (from 69.7% to 64.3%) and Western Australia (from 71.8% to 69.2%) over this period.

### **EXPLANATORY NOTES**

INTRODUCTION

SCOPE

- **1** This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
- **2** From March quarter 2005, the scope of the quarterly STA has been expanded. This takes the form of a reduction in the size cut-off for hotels, motels and guest houses, and serviced apartments from 15 rooms to 5 rooms. The scope also includes those additional establishments included in the triennial collection, conducted in 2000 and 2003. In summary, the scope of the STA now includes the following categories of establishments:
  - hotels and resorts with facilities and 5 or more rooms
  - motels, private hotels and guest houses with facilities and 5 or more rooms
  - serviced apartments with 5 or more units
  - holiday flats, units and houses of letting entities with 15 or more rooms or units
  - caravan parks with 40 or more powered sites
  - visitor hostels with 25 or more bed spaces.
- **3** Short-term non-residential accommodation, which is in scope of the STA, is accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months.
- **4** Some establishments also provide long-term residential accommodation. For licensed hotels with facilities, motels, guest houses and serviced apartments, the amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **5** Note that this publication presents results from the March quarter 2005 STA for the following categories of establishments only:
  - hotels and resorts with facilities and 15 or more rooms
  - motels, private hotels and guest houses with facilities and 15 or more rooms
  - serviced apartments with 15 or more units.
- **6** First results from the expanded scope will be included in the June quarter 2005 issue. This issue will present results from the March and June quarters 2005, after which results will be published quarterly.

Additional establishments

- **7** As a result of the expansion of the survey, those establishments on the STA population frame listed as having 5 to 14 rooms were sent survey forms for March quarter 2005. These establishments were previously listed as 'out-of-scope' of the STA collection and had not been contacted by the ABS for inclusion in the survey prior to March quarter 2005.
- **8** This contact resulted in the identification of an additional 174 establishments with 15 or more rooms. These establishments have been added to the ongoing, 15 or more room STA series from March quarter 2005 and their data have been included in this publication.
- **9** The majority of these establishments have less than 20 rooms and have minimal contribution to accommodation takings at the state/territory level. For this reason, the inclusion of these additional establishments in the collection has not resulted in a break in series.
- **10** The table below shows the number of establishments, the average and median number of rooms and the contribution to takings from accommodation at the state/territory level for the additional 174 establishments.

Additional establishments continued

## CONTRIBUTION OF ADDITIONAL ESTABLISHMENTS, STATE/TERRITORY

	Establishments	Average rooms	Median rooms	Contribution to total takings
State/territory	no.	no.	no.	%
New South Wales	52	19	16	0.9
Victoria	32	21	18	0.8
Queensland	47	21	20	1.0
South Australia	16	20	18	2.1
Western Australia	11	25	18	0.5
Tasmania	10	18	16	1.6
Northern Territory	4	21	17	0.6
Australian Capital Territory	2	20	20	0.6
Australia	174	20	18	0.9

DEFINITIONS OF ACCOMMODATION ESTABLISHMENTS

- **11** For the purposes of this publication the STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:
  - licensed hotels and resorts with facilities establishments with 15 or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms.
  - motels, private hotels and guest houses with facilities establishments with 15 or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms.
  - serviced apartments establishments with 15 or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.

COVERAGE

12 The main source of coverage is from the Australian Automobile Association through AAA Tourism Pty Ltd. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism commissions and industry associations is also undertaken.

DATA QUALITY

- 13 The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
  - errors in the reporting of data by providers
  - errors in the process of capturing data
  - estimation for missing data
  - definition and classification errors
  - incomplete coverage.

### **EXPLANATORY NOTES** continued

DATA QUALITY continued

**14** Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.

Response rates

- **15** The March quarter 2005 response rates were:
  - 94.9% licensed hotels with facilities
  - 93.7% motels and guest houses
  - 94.2% serviced apartments.

Imputation rates

- **16** Imputation is the process whereby a value is generated for missing data items by averaging the responses for similar establishments which were operating during the reference period.
- **17** The March quarter 2005 imputation rates were:
  - 3.6% of room nights
  - 3.1% of takings.

BREAK IN TIME SERIES

- **18** In the June quarter 2003 the ABS identified 132 licensed hotels with facilities, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.
- **19** The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1, *Tourist Accommodation, Australia* (cat. no. 8635.0), December quarter 2003. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.
- TAKINGS FROM ACCOMMODATION
- **20** From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.

STAR GRADING

**21** Star grade classifications of establishments were revised by AAA Tourism Pty Ltd. These changes were implemented for the STA in the March quarter 2004 and should be taken into account when making comparisons with previous quarters.

STATISTICAL GEOGRAPHY

- **22** Small area statistics for 2005 are classified to the *Australian Standard Geographical Classification (ASGC)*, 2004 Edition (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
- 23 These SIA data are aggregated to tourism regions as defined by relevant state and territory tourist commissions. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level.
- **24** Details of SLAs, the composition of tourism regions, major changes to tourism regions and outline maps of tourism regions are provided in the ABS publication *Tourism Region Maps and Concordance Files, Australia* (cat. no. 9503.0.55.001) available from the ABS web site <www.abs.gov.au>.

SEASONAL ADJUSTMENT

**25** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular quarter. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.

### **EXPLANATORY NOTES** continued

SEASONAL ADJUSTMENT continued

26 The way in which seasonally adjusted and trend estimates were calculated changed from a Forward Factor methodology to a Concurrent methodology in March quarter 2003. The Forward Factor method relied on an annual analysis of the original time series to estimate seasonal factors that were to be applied in the forthcoming four quarters. Under this method the projected seasonal factors, or forward factors, were not updated until the next annual analysis. The Concurrent methodology uses the most up to date original time series available at each reference period to estimate seasonal factors thus eliminating the need to use projected seasonal factors.

TREND ESTIMATES

- 27 Smoothing the seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates the trend estimates. The trend estimates are derived by applying a 7-term Henderson moving average to the quarterly seasonally adjusted series. The Henderson moving average used in the middle of the time series is symmetric but, as the end of a time series is approached, asymmetric forms of the symmetric moving average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights used with the quarterly data have been tailored to suit the particular characteristics of individual series.
- **28** While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent quarters, particularly as additional original estimates become available. For further information refer to *Information Paper: A Guide to Interpreting Time Series Monitoring Trends, 2003* (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

EFFECTS OF ROUNDING

**29** Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

RELATED PUBLICATIONS

**30** Other ABS publications and products which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au>.

*Tourist Accommodation, Small Area Data* cat. no. 8635.1.55.001–8635.8.55.001 (data cubes for each state/territory – issued quarterly)

*Tourism Region Maps and Concordance Files, Australia* cat. no. 9503.0.55.001 (annual)

*Tourist Accommodation, Australia, Expanded Scope Collection* cat. no. 8635.0.55.001 (irregular)

Short-term Visitor Arrivals Estimates, Australia cat. no. 3401.0.55.001 (issued monthly)

Overseas Arrivals and Departures, Australia cat. no. 3401.0 (issued monthly)

Australian National Accounts, Tourism Satellite Account cat. no. 5249.0 (annual)

Directory of Tourism Statistics, 2001 cat. no. 1130.0 (irregular)

**31** Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The catalogue is available from any ABS office or the ABS web site <www.abs.gov.au>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

ABS DATA AVAILABLE ON REQUEST

**32** As well as the statistics included in this publication, the ABS has other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300 135 070.

## GLOSSARY

**Average length of stay** Average number of days each guest stayed during the reference period. It is a derived

item calculated by dividing the number of guest nights by the number of guest arrivals

with the result expressed as a number of days.

Average takings per available

room night

The takings from accommodation divided by the total number of room nights for the  $\,$ 

survey period,

 $Average \ takings \ per \ available \ room \ nigbt(\$) = \frac{Takings \ from \ accommodation}{Room \ nigbts \ available}$ 

Average takings per room night

occupied

The takings from accommodation divided by the total number of room nights occupied

for the survey period,

Average takings per room night occupied(\$) =  $\frac{Takings\ from\ accommodation}{Room\ nights\ occupied}$ 

Bed occupancy rate The bed occupancy rate represents bed occupancy expressed as a percentage of total

capacity available during the survey period,

Bed occupancy rate (%) =  $\frac{Guest\ nights\ occupied}{Guest\ nights\ available}*100$ 

Bed spaces The maximum number of bed spaces normally in place available to accommodate paying

guests during the survey period. Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots and divans not normally used as beds are excluded.

Capacity Capacity in terms of guest rooms/units is the maximum number available to

accommodate paying guests during the survey period. Capacity closed temporarily for

seasonal reasons is included.

**Establishments** The number of hotels, motels and guest houses and serviced apartments within the

scope of the survey which operated for any part of the survey period, or which closed

temporarily for the quarter for seasonal reasons.

**Guest arrivals** The total number of paying guests counted only on the first night they stayed at the

accommodation establishment during the survey period.

**Guest nights available** The total number of nights available to all paying guests during the survey period.

This is derived from the number of bed spaces multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are

included.

Guest nights occupied 
The total number of paying guests counted on each night they stayed at the

accommodation establishment during the survey period.

Occupancy Occupancy in terms of room nights occupied refers to the total number of nights each

guest room was occupied during the survey period.

Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey

period.

Persons employed The total number of persons working at each accommodation establishment at the end

of the survey period (including working proprietors and those working on other than

accommodation activities).

Room nights available The number of guest rooms/units available multiplied by the number of days for which

they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Room nights occupied The number of nights each guest room/unit was occupied by a paying guest during the

survey period.

**Room occupancy rate** The room occupancy rate represents room occupancy expressed as a percentage of total

capacity available during the survey period,

Room occupancy rate (%) =  $\frac{Room\ nights\ occupied}{Room\ nights\ available} * 100$ 

## **GLOSSARY** continued

Room occupancy rate

continued

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.

Rooms

The maximum number of rooms available for accommodating short-term paying guests at each hotel, motel and guest house and serviced apartment during the survey period. Units, apartments and suites are treated as rooms for these types of establishments in these survey results.

Star grading

The grading of hotels, motels and guest houses with facilities and serviced apartments is based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication *Accommodation Guide* published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

While coverage has significantly improved, some establishments (including some competing in the 4 and 5 star markets and having significant takings) still remain outside the star grading scheme. These establishments have been given a star grading of 'ungraded'.

Takings from accommodation

Since 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the amount of GST payable is estimated and the data revised accordingly.

Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month.

## FOR MORE INFORMATION

INTERNET www.abs.gov.au the ABS web site is the best place to

start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a

statistical profile.

LIBRARY A range of ABS publications is available from public and

tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require,

or visit our web site for a list of libraries.

CPI INFOLINE For current and historical Consumer Price Index data, call

1902 981 074 (call cost 77c per minute).

DIAL-A-STATISTIC This service now provides only current Consumer Price

Index statistics call 1900 986 400 (call cost 77c per

minute).

### INFORMATION SERVICE

Data already published that can be provided within five minutes will be free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
