KEY POINTS

ACCOMMODATION TAKINGS

- In September quarter 2008, the trend estimate of total accommodation takings for hotels, motels and serviced apartments with 15 or more rooms increased by 0.5% to \$1,996.1 million compared with June quarter 2008.
- Over the same period, the seasonally adjusted estimate dropped by 2.7% to \$1964.8 million. This is the first decline in seasonally adjusted takings since March quarter 2004.

ROOM OCCUPANCY RATE

- The trend estimate of a 64.4% room occupancy rate for hotels, motels and serviced apartments with 15 or more rooms for September quarter 2008 was slightly lower than the trend estimate of 64.7% for the previous quarter.
- This is the fifth consecutive quarterly decline in the trend estimate of room occupancy rates for hotels, motels and serviced apartments with 15 or more rooms.
- At 63.9%, the seasonally adjusted room occupancy rate was 1.5 percentage points below the June quarter 2008 level.

NOTES

FORTHCOMING ISSUES	ISSUE (Quarter)	RELEASE DATE
	December 2008	26 March 2009
	March 2009	26 June 2009
ABOUT THIS ISSUE	This issue presents result	s from the September quarter 2008 Survey of Tourist
	Accommodation (STA) fo	r the following categories of establishments:
	 licensed hotels and r 	esorts with facilities and 5 or more rooms
	 motels, private hotel 	s and guest houses with facilities and 5 or more rooms
	 serviced apartments 	with 5 or more units
	■ caravan parks with 4) or more powered sites
	 holiday flats, units an 	d houses of letting entities with 15 or more rooms or units
	• visitor hostels with 2	5 or more bed spaces.
DATA NOTES	As advised in the Decemb	per quarter 2007 issue of this publication, Autoregressive
	Integrated Moving Averag	ges (ARIMA) modelling has been incorporated into the seasonal
	adjustment process for th	e majority of the tourist accommodation series and all series
		t of the trading day component. As a result of these changes the
	seasonally adjusted and, t	to a lesser extent, the trend series have been revised. For
	further information, see p	paragraphs 22 and 23 of the Seasonal Adjustment section of the
	Explanatory Notes.

SUMMARY OF FINDINGS

ORIGINAL

Hotels, motels and serviced apartments

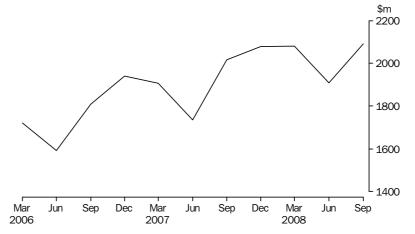

This summary contains key findings for original estimates. While trend and seasonally adjusted data are only available for hotels, motels and serviced apartments with 15 or more rooms, original estimates have two additional data series comprising hotels, motels and serviced apartments with 5 to 14 rooms and 5 or more rooms.

Original series are impacted by seasonal variations and irregular or non-seasonal influences and comparisons between quarters should be made with caution.

ACCOMMODATION TAKINGS

In September quarter 2008, accommodation takings were \$2,091.6 million for hotels, motels and serviced apartments with 5 or more rooms, comprising \$2,014.8 million for hotels, motels and serviced apartments with 15 or more rooms and \$76.9 million for hotels, motels and serviced apartments with 5 to 14 rooms.

TAKINGS FROM ACCOMMODATION, Hotels, motels and serviced apartments with 5 or more rooms—Australia

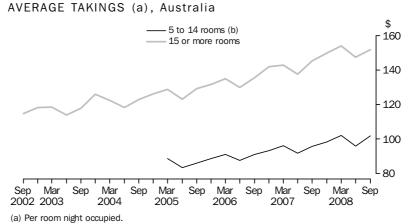

Accommodation takings in September quarter 2008 for hotels, motels and serviced apartments with 15 or more rooms were highest in New South Wales (\$626.1 million) and Queensland (\$565.6 million).

The September quarter 2008 average takings per room night occupied were \$149.10 for establishments with 5 or more rooms. This was heavily influenced by hotels, motels and serviced apartments with 15 or more rooms which contribute 96.3% to total takings, and had an average takings per room night occupied of \$151.79. The average for 5 to 14 room establishments was \$101.89.

Hotels, motels and serviced apartments continued

ACCOMMODATION TAKINGS continued

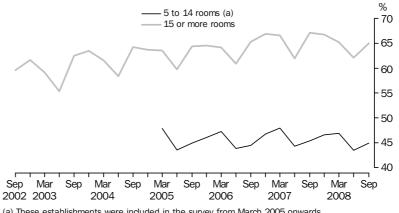

(b) These establishments were included in the survey from March 2005 onwards.

ROOM OCCUPANCY RATE

The room occupancy rate for hotels, motels and serviced apartments with 5 or more rooms was 63.4% in September quarter 2008. For hotels, motels and serviced apartments with 15 or more rooms, the room occupancy rate was 65.0%, while demand for 5 to 14 room hotels, motels and serviced apartments was lower, as reflected by a room occupancy rate of 44.9%.

ROOM OCCUPANCY RATE, Australia

(a) These establishments were included in the survey from March 2005 onwards.

ROOM NIGHTS OCCUPIED

Room nights occupied were 14.0 million in September quarter 2008 for hotels, motels and serviced apartments with 5 or more rooms. For hotels, motels and serviced apartments with 15 or more rooms, room nights occupied were 13.3 million in September quarter 2008, while for establishments with 5 to 14 rooms, room nights occupied were 0.8 million.

SUMMARY OF FINDINGS continued

Hotels, motels and serviced apartments continued

ROOM NIGHTS OCCUPIED continued

New South Wales contributed the highest proportion (30.5%) of occupied rooms for hotels, motels and serviced apartments with 15 or more rooms, followed by Queensland at 29.2%.

AVERAGE LENGTH OF STAY

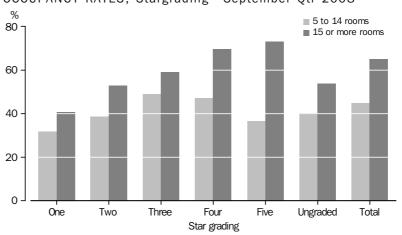

The average length of stay in September quarter 2008 for hotels, motels and serviced apartments with 5 or more rooms was 2.2 days. In establishments with 15 or more rooms, the average length of stay was 2.3 days. For establishments with 5 to 14 rooms, the average length of stay was 1.8 days.

Queensland (2.7 days) reported the longest average length of stay for hotels, motels and serviced apartments with 15 or more rooms, followed by Western Australia (2.4 days). The shortest average length of stay was in Tasmania (1.9 days).

STAR GRADING

In September quarter 2008, the room occupancy rate for five-star hotels, motels and serviced apartments with 5 or more rooms was 72.6% compared with 37.7% for one-star. For hotels, motels and serviced apartments with 15 or more rooms, the room occupancy rate was 72.9% for five-star establishments compared with 40.7% for one-star establishments.

In the 5-14 rooms category, three-star establishments had the highest room occupancy rates in September quarter 2008 (48.8%), compared with one-star establishments at 31.6%.

OCCUPANCY RATES, Stargrading—September Qtr 2008

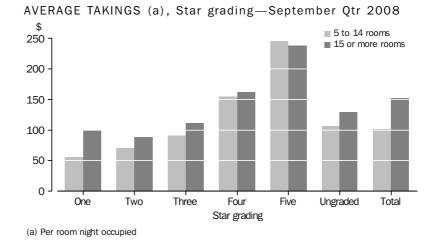

In September quarter 2008, the average takings per room night occupied for five-star hotels, motels and serviced apartments with 5 or more rooms was \$238.09 compared with \$84.71 for two-star. In the 15 or more rooms category, the average takings was \$238.06 for five-star establishments compared with \$88.08 for two-star establishments.

For establishments with 5 to 14 rooms, five-star establishments had the highest average takings per room nights occupied of \$245.39, compared with one-star establishments at \$55.84.

STAR GRADING continued

Hotels, motels and serviced apartments *continued*

Caravan parks, holiday flats, units and houses, and visitor hostels

ACCOMMODATION TAKINGS

In September quarter 2008, accommodation takings for caravan parks were \$254.9 million. New South Wales (\$74.3 million) had the highest accommodation takings for all caravan parks for September quarter 2008, contributing 29.1% of the total.

Short-term caravan park takings were \$212.0 million in September quarter 2008 which was 83.2% of total caravan park takings.

Accommodation takings for holiday flats, units and houses were \$151.2 million in September quarter 2008. Real estate takings accounted for 22.5% of total holiday flats, units and houses takings, the rest being for other letting entities.

For visitor hostels, accommodation takings were \$59.8 million in September quarter 2008.

OCCUPANCY RATE

The site occupancy rate for all caravan parks in September quarter 2008 was 53.0%. Short-term caravan park occupancy was 49.7% and long-term caravan park occupancy was 75.8%.

For holiday flats, units and houses, the unit occupancy rate was 46.3% in September quarter 2008.

The bed occupancy rate for visitor hostels in September quarter 2008 was 52.2%. Northern Territory, Queensland and Australian Capital Territory had the highest bed occupancy rates for visitor hostels in September quarter 2008 with 69.0%, 60.8% and 60.0% respectively.

EXPLANATORY NOTES

INTRODUCTION	1 This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
SCOPE	 2 From March quarter 2005, the scope of the STA comprises the following categories of establishments: licensed hotels and resorts with facilities and 5 or more rooms motels, private hotels and guest houses with facilities and 5 or more rooms serviced apartments with 5 or more units caravan parks with 40 or more powered sites holiday flats, units and houses of letting entities with 15 or more rooms or units visitor hostels with 25 or more bed spaces.
	3 With the exception of caravan parks, these establishments provide predominantly short-term non-residential accommodation, i.e. accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months. Some of these establishments also provide long-term residential accommodation. The amount of such activity is considered to be insignificant and is included in the data presented in this publication.
	4 Caravan parks provide either short-term or long-term accommodation. If a caravan park has the majority of sites occupied by paying guests who have stayed continuously for two months or more during the survey period, the caravan park is classified as long-term. Data for caravan parks are presented by short-term and long-term in this publication.
	 5 Previous to March quarter 2005, the scope of the STA comprised: licensed hotels and resorts with facilities and 15 or more rooms motels, private hotels and guest houses with facilities and 15 or more rooms serviced apartments with 15 or more units.
	 6 For the four quarters of 2000 and 2003, the scope of the STA was expanded to include: a caravan parks with 40 or more powered sites boliday flats, units and houses of letting entities with 15 or more rooms or units visitor hostels with 25 or more bed spaces.
COVERAGE	7 The main source of coverage is from the Australian Automobile Association through AAA Tourism Pty Ltd. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism organisations and industry associations is also undertaken.
TAKINGS FROM ACCOMMODATION	8 From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.
STAR GRADING	9 Star grade classifications of establishments are continuously revised by AAA Tourism Pty Ltd. This should be taken into account when making comparisons over time. Any queries regarding the star grading process should be directed to AAA Tourism Pty Ltd on (03) 8601 2200 or email <enquiries@aaatourism.com.au>.</enquiries@aaatourism.com.au>
	10 Data by star grade for states and territories are included in the data cubes that accompany this publication: Tourist Accommodation, Small Area Data (cat. no. 8635.0.55.002 for national data and cat. no. 8635.1.55.001 – 8635.8.55.001 for state/territory data).

STATISTICAL GEOGRAPHY	11 Small area statistics for 2008 are classified to the Australian Standard Geographical Classification (ASGC), 2007 Edition (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
	12 These SLA data are aggregated to tourism regions as defined by relevant state and territory tourism organisations. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level.
	13 Data by tourism regions are no longer presented in this publication. Small area data are provided in the data cubes that accompany this publication: Tourist Accommodation, Small Area Data (cat. no. 8635.0.55.002 for national data and cat. no. 8635.1.55.001 – 8635.8.55.001 for state/territory data).
	14 Details of SLAs, the composition of tourism regions and maps of tourism regions are provided in the ABS publication Tourism Region Maps and Concordance Files, Australia (cat. no. 9503.0.55.001) available from the ABS web site <www.abs.gov.au>.</www.abs.gov.au>
DATA QUALITY	 15 The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including: errors in the reporting of data by providers errors in the process of capturing data imputation for missing data definition and classification errors incomplete coverage.

16 Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.

.

18 Missing data items are replaced by imputed values based on reported data. Average quarterly movements are applied to previously reported data for each non-responding unit to estimate values for missing data items. Only if previously reported data are not available, then data from a similar unit is used as a 'donor' for the missing data items.

Imputation rates continued

19 The imputation rates for Australia for the most recent quarters are shown below:

.

IMPUTATION RATES, NIGHTS OCCUPIED(a)

	Sep	Dec	Mar	Jun	Sep
	Qtr	Qtr	Qtr	Qtr	Qtr
	2007	2007	2008	2008	2008
Activity	%	%	%	%	%

SEASONAL ADJUSTMENT

20 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any

particular quarter. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.

21 The seasonally adjusted estimates in this publication have been produced using a concurrent methodology whereby the seasonal factors are revised each month to take into account the seasonality exhibited by the latest observation. A more detailed review is conducted annually.

22 Recently, the ABS has implemented improved methods of producing seasonally adjusted estimates, focused on the application of Autoregressive Integrated Moving Average (ARIMA) modelling techniques. The revision properties of the seasonally adjusted and trend estimates can be improved by the use of ARIMA modelling. ARIMA modelling relies on the characteristics of the series being analysed to project future period data. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process.

23 From the March quarter 2008, the Survey of Tourist Accommodation collection has implemented ARIMA modelling for the majority of applicable time series. For more information on the details of ARIMA modelling see the feature article 'Use of ARIMA modelling to reduce revisions' in the October 2004 issue of Australian Economic Indicators (cat. no. 1350.0). Any queries regarding the ARIMA modelling should be directed to Time Series Analysis on (02) 6252 6345 or email <time.series.analysis@abs.gov.au>.

TREND ESTIMATES24Smoothing the seasonally adjusted series reduces the impact of the irregular
component of the seasonally adjusted series and creates the trend estimates. The trend
estimates are derived by applying a 7-term Henderson moving average to the quarterly
seasonally adjusted series. The Henderson moving average used in the middle of the
time series is symmetric but, as the end of a time series is approached, asymmetric forms
of the symmetric moving average are applied. Unlike the weights of the standard 7-term
Henderson moving average, the weights used with the quarterly data have been tailored
to suit the particular characteristics of individual series.

25 While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent quarters, particularly as additional original estimates become available. For further information refer to Information Paper: A Guide to Interpreting Time Series - Monitoring Trends, 2003 (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

CONFIDENTIALISATION OF26Under the Census and Statistics Act, when releasing statistics the ABS is required to
do this in a manner that is "not likely" (in a legal sense) to enable the identification of a
particular person or organisation. A number of techniques are used to do this, including
suppression of information. To ensure provider confidentiality in the Survey of Tourist
Accommodation, the ABS uses a computerised process known as Disclosure Avoidance
Analysis System (DAAS) to confidentialise the entire tourist accommodation dataset each
quarter. This process not only ensures that data are suppressed to ensure individual
establishments cannot be identified, but also suppresses data in other (consequential)
cells to ensure data cannot be derived through deduction from the information available.

27 While the scope and coverage of the Survey of Tourist Accommodation has been expanded, priority has been given to maintaining the integrity and continuity of the core collection (hotels, motels and guest houses, and serviced apartments with 15 or more rooms). In order to maximise data released from the core collection series and the new components of the expanded scope collection (hotels, motels and guest houses, and

CONFIDENTIALISATION OF DATA continued	serviced apartments with 5-14 rooms), the 'total' series (5 or more rooms) has been used for any consequential confidentiality required where possible.
	28 The DAAS process begins by confidentialising at the Statistical Local Area (SLA) level, then across Tourism regions, then at the state level and finally the national level. If there is an SLA that has been made confidential then another SLA will have to be made confidential within that Tourism region to protect the confidentiality of the providers in the SLA that was originally made confidential. Depending on the number of SLAs in the Tourism region the whole Tourism region may need to be made confidential. As a consequence of this, at least one more Tourism region within a state or territory will also be confidentialised. This may also occur at the state/territory level.
USER AGGREGATION OF DATA	29 The aggregation of data by users across time periods should be undertaken with caution, due to the possibility of non-inclusion of confidentialised data (see the above section for more information about confidentialisation). Where one or more cells contributing to a total have been confidentialised (ie, contains the value of n.p.), the resulting aggregated total will be incorrect. However, some broader levels of data may not be affected by confidentialised cells.
	30 Where data can be aggregated (ie, no confidentialised cells are included) for calendar and financial year/s purposes, the data items Establishments, Rooms, Persons employed and Bed spaces should not be aggregated. For these items it is recommended that for calendar years, the value of the December quarter is used, and for financial years, the value of the June quarter is used.
	31 Any data items that have been derived from other items collected in the survey cannot be aggregated (ie, all those with labels ending in 'rate' or commencing with 'average'). These items must be re-derived based on the aggregation of each of the quarterly items collected in the survey used in the derivation of the rate or average (see Glossary for formulas).
	32 Users are cautioned against deriving any non-standard aggregations (eg, aggregation of selected star gradings such as 4-star and 5-star; aggregation of selected geographical areas such as capital city areas and balance of state; aggregation of selected activities such as hotels and motels combined). This is because data are confidentialised based on the standard data item structure.
EFFECTS OF ROUNDING	33 Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.
RELATED PUBLICATIONS	 34 Other ABS publications and products which may be of interest are outlined below. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au>.</www.abs.gov.au> Tourist Accommodation, Small Area Data (cat. no. 8635.0.55.002) (data cube for Australia – issued quarterly) Tourist Accommodation, Small Area Data (cat. no. 8635.1.55.001–8635.8.55.001) (data cubes for each state/territory – issued quarterly) Tourism Region Maps and Concordance Files, Australia (cat. no. 9503.0.55.001) (annual) Tourist Accommodation, Australia, Expanded Scope Collection (cat. no. 8635.0.55.001) (irregular) Short-term Visitor Arrivals Estimates, Australia (cat. no. 3401.0.55.001) (issued monthly) Overseas Arrivals and Departures, Australia (cat. no. 3401.0) (issued monthly)
	Australian National Accounts, Tourism Satellite Account (cat. no. 5249.0) (annual)

RELATED PUBLICATIONS continued	35 The catalogue of current publications and other products is available from the ABS web site <www.abs.gov.au>. The ABS also issues release advices on the web site which detail products to be released both in the coming week and the next six months.</www.abs.gov.au>
ABS DATA AVAILABLE ON REQUEST	36 As well as the statistics included in this publication, the ABS has other relevant data available on request. Inquiries should be made to the National Information and Referral

available on request. Inquiries should be made to the National Information and Referral Service on 1300 135 070.

GLOSSARY

Average length of stay	Average number of days each guest stayed during the reference period. It is a derived item calculated by dividing the number of guest nights occupied by the number of guest arrivals with the result expressed as a number of days, $Average \ length \ of \ stay(days) = \frac{Guest \ nights \ occupied}{Guest \ arrivals}$
Average takings per available room night	The takings from accommodation divided by the total number of room nights available for the survey period,
	Average takings per available room $night(\$) = \frac{Takings from accommodation}{Room nights available}$
Average takings per room night occupied	The takings from accommodation divided by the total number of room nights occupied for the survey period,
	Average takings per room night occupied($\$$) = $\frac{Takings from accommodation}{Room nights occupied}$
Bed occupancy rate	The bed occupancy rate represents bed occupancy expressed as a percentage of total capacity available during the survey period, Bed occupancy rate (%) = $\frac{Guest \ nights \ occupied}{Guest \ nights \ available} * 100$
Bed spaces	The maximum number of bed spaces normally in place available to accommodate paying guests during the survey period. Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots and divans not normally used as beds are excluded.
Cabins, flats, units and villas	The maximum number of cabins, flats, units and villas available at caravan parks for accommodating paying guests during the survey period.
Capacity	Capacity in terms of rooms/units/apartments/suites, visitor hostel bed spaces, holiday flats/units/houses or caravan park sites is the maximum number available to accommodate paying guests on the last day of the survey period. Capacity closed temporarily for seasonal reasons is included.
Caravan park sites	The measure of total caravan park capacity available for accommodating paying guests during the survey period. Includes on-site vans, other powered sites, unpowered sites and cabins, flats, units and villas.
Caravan parks	Establishments with 40 or more powered sites and cabins, flats, units and villas which provide either short-term or long-term accommodation to the general public and which provide powered sites for caravans and toilet, shower and laundry facilities for guests.
Caravan parks, long-term	Caravan parks where the majority of paying guests occupied sites for periods of two months or more.
Caravan parks, short-term	Caravan parks where the majority of paying guests occupied sites for periods of less than two months.
Establishments	The number of licensed hotels and resorts, motels and guest houses, serviced apartments, caravan parks and visitor hostels within the scope of the survey which operated for any part of the survey period, or which closed temporarily for the quarter for seasonal reasons.
Guest arrivals	The total number of paying guests counted only on the first night they stayed at the accommodation establishment during the survey period.
	For holiday flats, units and houses this is the same as unit lettings.
	This data item is not collected for caravan parks.
Guest nights available	The total number of nights available to all paying guests during the survey period.
	This is derived from the number of bed spaces multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

GLOSSARY continued

Guest nights occupied	The total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.	
Holiday flats, units and houses	The total number of holiday flats, units and houses (excluding establishments predominantly operated on a time-share basis) operated by letting entities (i.e. owners, managers or real estate agents) who have sole letting rights to at least 15 flats, units or houses for short-term letting. These flats, units or houses should be mainly self-contained in terms of cooking, bath (or shower) and toilet facilities and should not have breakfast available for guests. Data for holiday flats, units or houses include short-term owner operators as well as paying guest accommodation.	
Hotels	See licensed hotels and resorts with facilities.	
Letting entities	For holiday flats, units and houses, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period.	
Licensed hotels and resorts with facilities	Establishments with five or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms.	
Motels, private hotels and guest houses with facilities	Establishments with five or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms.	
Multiple bedroom holiday flats, units and houses	The total number of holiday flats, units and houses available with multiple bedrooms.	
Occupancy	Occupancy in terms of room nights, unit nights or site nights occupied refers to the total number of nights each room, unit or caravan park was occupied during the survey period.	
	Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.	
On-site vans	The maximum number of vans owned or leased by the establishment for the purpose of providing accommodation to the general public.	
Other powered sites	The maximum number of sites with provision for connection to electric power supply, available at caravan parks for accommodating paying guests during the survey period, excluding powered sites occupied by on-site vans, and cabins, flats, units and villas.	
Other sites permanently reserved	The total number of powered and unpowered sites, on-site vans and cabins, flats, units and villas continuously let for two months or more on the last day of the survey period to tenants who occupy the sites only on a casual or sporadic basis.	
Persons employed	The total number of persons working at each accommodation establishment at the end of the survey period (including working proprietors and those working on other than accommodation activities). This data item is not applicable to holiday flats, units and houses let by real estate agents.	
Room nights available	The number of rooms/units available multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.	
Room nights occupied	The number of nights each guest room/unit was occupied by a paying guest during the survey period.	
Room occupancy rate	The room occupancy rate represents room occupancy expressed as a percentage of total capacity available during the survey period, <i>Room occupancy rate</i> (%) = $\frac{Room nights occupied}{Room nights available} * 100$	

GLOSSARY continued

Room occupancy rate continued	providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.		
Rooms	The maximum number of rooms available for accommodating short-term paying guests at each licensed hotel and resort, motel and guest house and serviced apartment during the survey period. Units, apartments and suites are treated as rooms for these types of establishments in these survey results.		
Serviced apartments	Establishments with five or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.		
Single bedroom holiday flats, units and houses	The total number of holiday flats, units and houses available with a single bedroom.		
Site nights available	The number of caravan park sites available multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.		
Site nights occupied	The total number of nights each caravan park site was occupied during the survey period.		
Site occupancy rate	The site occupancy rate for caravan parks represents site occupancy expressed as a percentage of total capacity available during the survey period, Site occupancy rate (%) = $\frac{Site \ nights \ occupied}{Site \ nights \ available} * 100$		
	providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.		
Sites occupied by long-term guests	The total number of caravan park sites occupied on the last day at the end of the survey period by guests who have stayed continuously for two months or more.		
Star grading	The grading of hotels, motels and guest houses with facilities and serviced apartments is based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication <i>Accommodation</i> <i>Guide</i> published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).		
	While coverage has significantly improved, some establishments (including some competing in the four and five star markets and having significant takings) still remain outside the star grading scheme. These establishments have been given a star grading of 'ungraded'.		
Takings from accommodation	Since 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the amount of GST payable is estimated and the data revised accordingly.		
	Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month.		

GLOSSARY continued

Unit lettings	The total number of times a holiday flat, unit or house was occupied by a new tenant, counted only on the first night it was occupied by the new tenant. This is the equivalent of guest arrivals.
Unit nights available	The number of holiday flats, units and houses available multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.
Unit nights occupied	The total number of nights each holiday flat, unit or house was occupied during the survey period.
Unit occupancy rate	The unit occupancy rate for holiday flats, units and houses represents unit occupancy expressed as a percentage of total capacity available during the survey period, <i>Unit occupancy rate</i> (%) = $\frac{Unit nights occupied}{Unit nights available} * 100$
	providing that, for letting entities closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.
Unpowered sites	The maximum number of sites with no provision for connection to electric power supply, available at caravan parks for accommodating paying guests during the survey period.
Visitor hostels	Establishments with 25 or more bed spaces which provide accommodation to visitors on a bed basis (rather than by room). This category does not include establishments providing charity type accommodation (e.g. Salvation Army hostels) nor hotels, motels and guest houses without in-room facilities which provide accommodation on a per room basis.
