ACKNOWLEDGMENT.

The assistance of all Government Officers and others who have kindly supplied figures for the respective branches of business concerns under their supervision is gratefully acknowledged. I wish to express my appreciation of the valuable co-operation of the Commonwealth Statistician and his staff.

I am also indebted to Mr. W. L. Wilson, Deputy Government Statistician, for his able assistance in supervising the compilation of the various parts of the "Statistical Register," and to Mr. R. J. Little, Chief Compiler, and those officers who have had charge of sections of the tabulation.

No. 5.—Consolidated Revenue—Expenditure and Receipts CLASSIFIED ACCORDING TO FUNCTIONS, 1936-37 and 1937-38.

The general purport of this table is to show the net cost, including the relevant proportion of Public Debt service, of each function of Government, irrespective of the department or departments administering such functions. It should be noted that *Expenditure on Hospitals* is met mainly from the Hospital Trust Fund, into which is paid the proceeds of the Hospital Tax. This amounted to £231,599 in 1936-37 and £245,660 in 1937-38. *Expenditure on Unemployment Relief* includes sustenance and payments of a like nature amounting to £51,144 in 1936-37 and £51,966 in 1937-38. Receipts shown for the item *Roads and Bridges* comprise interest and sinking fund paid by the Main Roads Board on loan capital advanced by the Treasurer in respect to certain Metropolitan roads. *Agricultural Bank* expenditure from Consolidated Revenue is confined to meeting Public Debt charges, the salaries of the Commissioners and certain group settlement administration. The receipts shown represent the Bank's contribution towards interest and sinking fund on loan capital advanced by the Treasurer. Receipts shown for the item *Navigation, Harbour and Lights* represent, largely, contributions by the Fremantle Harbour Trust on account of interest and sinking fund on loan capital, together with surplus profits. Expenditure from consolidated revenue in respect to the *Metropolitan Market Trust*, the *Workers' Homes Board* and *Trading Concerns* covers only Public Debt Charges, and receipts shown represent amounts paid to revenue on account of such charges, current or accrued.

TOTAL TRADE.

The upward trend of recent years in the State's external trade was maintained during the year under review, the total—£44,033,136 (£40,433,883) in Australian currency—representing an increase of £3,599,253 on the corresponding total for 1936-37. Imports advanced by £1,489,849 and Exports by £2,109,404, the totals being as follows: Imports, Oversea, £7,992,928 (£7,071,953); Interstate, £12,939,671 (£12,370,797). Exports, Oversea, £20,014,725 (£17,766,822); Interstate £3,085,812 (£3,224,311).

Of the total trade, 88 per cent. passed through the port of Fremantle.

The trend of Western Australia's trade since 1930 is illustrated by the following index, which is based on the average annual value of trade for the three years 1927-28 to 1929-30 (exclusive of gold exported in excess of current production):—

	Imports.	Exports.	Total.
1927-28 } to 1929-30	100	100	100
1930-31 ...	60	80	69

The Trade Position.

Inclusive of Ships' Stores and exchange on Oversea imports, the following table shows the "visible balance of trade" for the last five years:—

	Favourable.
	£
1933-34 ...	3,564,269
1934-35 ...	1,464,563
1935-36 ...	1,511,297
1936-37 ...	1,548,383
1937-38 ...	2,167,938

IMPORTS.

The "recorded" value* of all imports was £19,334,013, £12,939,671 representing goods from the other States of the Commonwealth and £ (stg.) 6,394,342 goods from Oversea. All these values are greater than those of the previous year, £568,874 greater in the case of Eastern States commodities and £736,780 in the case of those from Oversea. It is interesting to note that while the value of imports from the other States of the Commonwealth is greater than ever before, the value of goods imported from Oversea is still substantially less than that of the pre-depression years.

A commodity comparison with the previous year discloses that major variations in imports were confined mainly to "producers' goods," semi-luxury goods and foodstuffs.

The more important increases were as follow:—Agricultural Machinery, £96,835; other Machinery, £397,571; Motor Cars, £164,215; Vessels, £293,461; Kerosene, £27,261; Residual Oil, £45,487; Petrol, Petroleum Spirit, etc., £48,239; Coal, £20,006; Rock Phosphates, £24,449; Sulphur, £44,037; Arms, Ammunition and Explosives, £25,417; Animal Substances not Foodstuffs, £20,641; Textiles, £138,277; Tobacco manufactured, £21,057, and Cigarettes, £36,684.

With the exception of Cheese, £7,288; Milk Dried, £26,105; and Dried Fruits, £13,410, other increases were of minor importance.

Substantial decreases were recorded in respect of Iron and Steel—Plate and Sheet; Galvanised Plate and Sheet declined £66,475 and other Plate and Sheet £79,092. Other noteworthy decreases were as follow:—Butter, £48,295; Fish (in tins), £9,087; Milk, Condensed, £10,063; Live Animals, £22,764; Apparel (excluding Boots and Shoes), £63,864; Wire Netting, £20,536; and Stationery, £21,465.

* Imports from Abroad are recorded in British Currency, whilst all other values are recorded in terms of Australian Currency.

EXPORTS.

Gold.—Valued in terms of Australian currency at £9,313,060, Gold exports comprised 45 per cent. of the total exports, and at this level exceeded the figure for the previous year by £1,403,637.

Primary Produce.—As a result of improved seasonal conditions, the volume of most of the more important primary commodities—with wool an important exception—recorded increases on the previous year's exports, and returns, despite price recession, were on balance in advance of the previous year's values.

Wheat.—Although the average price F.O.B. declined from 5/3½d. per bushel to 4/4½d. per bushel during 1937-38, returns were the highest since 1931-32, and at £4,833,666 represented an increase of £1,206,314 on the figure for the previous year.

Owing to the abnormally heavy carry-over, shipments, which advanced by 8,257,807 bushels to 22,038,207 bushels, do not fully reflect the improvement in last season's wheat harvest.

Flour.—Decreased purchases by the United Kingdom more than offset small increases in exports to near Eastern Markets, shipments in the aggregate declining 99,101 centals on the previous year's total. However, as a result of a slight appreciation in prices, returns decreased by only £28,154.

Wool.—Compared with the previous year, exports of Greasy Wool declined 4,872,032 lbs. The decrease was mainly attributable to the reluctance of growers to meet the market at prices approximately 20 per cent. below the previous year's level. With prices averaging 13·2d. per lb. F.O.B., as against 16·2d. per lb. for the previous year, there was a decrease in the value of consignments of £988,361.

Increases were recorded in shipments to France, Germany and Poland, but purchases were heavily curtailed by Belgium, Italy and the United States of America. Despite an increase of 257,859 lbs. in exports of Wool, Scoured and Washed, returns decreased by £14,532.

Apples and other Fresh Fruit.—Apple exports declined £61,828, the reduction in the volume of shipments—68,219 centals—being a reflex of the partial failure of last season's crop. Exports of other Fresh Fruit increased £27,932, mainly on account of increased shipments of Tomatoes to the Eastern States.

Timber.—Substantial increases were recorded in shipments of Timber oversea, although there was a small decrease in consignments to the Eastern States. The net increase in exports to all destinations was £232,781.

Other Commodities.—Increases in quantity and value were recorded in respect of Butter, 1,998,950 lbs., £145,002; Beef, 217,734 lbs., £32,437; and Lamb and Mutton, 4,150,264 lbs., £111,269; the latter figures representing an advance of 90 per cent. on the previous year's exports.

Exports of Pearls and Pearlshell increased by £39,478; Sandalwood and Arsenic declined £52,786, and £50,673 respectively. Other important decreases were Eggs in Shell, 516,087 doz., £29,754, and Potatoes, 70,341 cwt., £31,897.

PART IV.—INTERCHANGE.

I.—TRADE AND CUSTOMS FOR THE YEAR 1937-38.

It should be noted in the tables dealing with Trade, which follow, that Imports from Abroad are recorded in terms of British Currency, whilst all other values are expressed in terms of Australian Currency, except in Table No. 2, wherein all values have been estimated in terms of Australian currency. On page 134 a Special Summary Table (No. 9) shows the Estimated Balance of Trade after all values have been reduced to approximate terms of Australian Currency, and allowance made for Gold in excess of current production shipped abroad.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1938.

NOTE A.—On all Imports 10 per cent. has been added to the F.O.B. value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

Owing to the grouping of the Import Items into Classes, in lieu of the alphabetical system followed prior to 1918-19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

No. 35.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

* Owing to the Re-organisation and Reconstruction of Victoria Quay and the North Wharf, 465 feet of Wharf Berth Accommodation was not available during the years 1931-32 to 1934-35, and 500 feet during 1935-36 and 1936-37.
 † In accordance with the Financial Agreement between the Federal and State Governments an adjustment of Capital and Sinking Fund Accounts of the Fremantle Harbour Trust took place in 1929-30, and 1936-37, and in those of the Bunbury Harbour Board during 1931-32.
 ‡ Effective berthing accommodation reduced owing to lower draught available.

VI.—VALUE OF PRODUCTION.

No. 51.—Value of Production, 1937–38.

- (I.) *Gross Value* is the value placed on recorded production at the wholesale price realised at the principal market, which in respect to the greater portion of primary products is the F.O.B. export price. In cases where primary products are absorbed as raw material for secondary industries, the point of disposal to factories is considered the principal market.
- (II.) *Marketing Costs* include freight, cost of containers, commission and other handling charges incidental thereto.
- (III.) *Local Value.*—The deduction of Marketing Costs from the gross price realised gives Local Value.
- (IV.) *The value of goods consumed in the process of production* covers seed and fertilisers used, picking, sprays, dips, fodder consumed, fuel and oil, depreciation and repairs, and similar costs.
- (V.) *Net Value* represents the return to the producer.
- (VI.) To secure a proper appreciation of the value of production as presented below, it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total price realised for a season's wheat, for instance, includes costs of transport, commission and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes the value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be reflected in the value of dairy production. When, however, the net values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form the raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Since 1933–34, however, marketing costs and cost of goods consumed in the process of production have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.
- (VII.) *Manufacturing.*—The value of Manufacturing is on a somewhat different basis. Factory output is valued as at the factory door and roughly corresponds to the Gross Value used in respect to primary industry. The contribution of the manufacturer to production, however, is the value added in the process of manufacture. To arrive at this value it is necessary to deduct from the value of total output the value of raw materials used as well as power and light consumed. The resultant value then corresponds with the net values as used in respect of primary production.

VIII.—MIXED FARMING—SEASON 1935-36.

Wheat in relation to Sheep, Dairy Cows and Pigs.

The following tables, Nos. 60, 61 and 62, prepared in collaboration with the Commonwealth Bureau of Statistics, are intended to show the extent to which Sheep and Pig-Raising and Dairying are carried on in this State in conjunction with Wheat Growing. The special divisions used for these tables have been determined principally on Rainfall and Soil characteristics and comprise the following Statistical districts:—

- Division I.*—Harvey, Plantagenet, Albany, Marradong, Williams, West Arthur, Upper Blackwood, Kojoonup, Cranbrook, Broomehill, Tambellup, Wandering, Brookton, Pingelly, Wickiepin, Narrogin, Wagin, Woodanilling, Katanning, Broomehill, Tambellup, Gnowangerup.
- Division II.*—Quairading, Bruce Rock, Naremben, Corrigin, Kondinin, Kulin, Dumbleyung, Lake Grace, Kent.
- Division III.*—Yilgarn, Dundas, Esperance, Phillips River.
- Division IV.*—Northampton, Upper Chapman, Geraldton, Greenough, Irwin, Victoria Plains, Dandarragan, Chittering.
- Division V.*—Mingenew, Three Springs, Carnamah, Moora, Wongan-Ballidu, Dalwallinu.
- Division VI.*—Toodyay, Northam, Goomalling, Dowerin, Meckering, Wyalkatchem, Kellerberrin.
- Division VII.*—Mullewa, Morawa, Perenjori.
- Division VIII.*—Mt. Marshall, Koorda, Kununoppin-Trayning, Mukinbudin, Nungarin, Merredin, Westonia.
- Division IX.*—Mt. Marshall, Koorda, Kununoppin-Trayning, Mukinbudin, Nungarin, Merredin, Westonia.

No. 9.—Mid-Monthly Employment in Western Australian Factories. (a)

Figures in this table have been computed to a new base and supersede those published in previous issues.

The Annual Mean Employment for the year 1928-29 (19,799) has been taken as a base = 100. The index number fell to 94 for the year 1929-30, and to 69 for 1930-31. The lowest point (60) was reached during the month of August, 1931.

* It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories not previously included. This tends to exaggerate the degree of recovery.

(a) Excluding Working Proprietors.

(b) Indexes after June, 1938, are based on sample returns and are subject to revision.

STATISTICAL VIEW OF THE PROGRESS OF WESTERN AUSTRALIA, 1829 TO 1937-38.

Note.—Prior to the year 1837 no Blue Books were issued, and figures relative to arrivals and departures, shipping, imports and exports have been taken either from the reports of the Harbour Master at Fremantle or from Perth newspapers of the period. From 1838 to 1859, inclusive, migration figures show only the excess of arrivals over departures or *vice versa*.
