No. 9.—Consolidated Revenue Fund Classified According to Function.

The general purport of this table is to show, in respect to Consolidated Revenue only, the gross and net cost of each function of Government irrespective of the Department or Departments administering such functions. In cases where an activity could be classified to more than one function it has been shown under the heading which is deemed to be the major function, e.g., the education of natives is shown under "Education" and hospitals for natives have been shown under "Public Health," only the balance of "Care of Aborigines" being shown under "Welfare".

Certain functions are performed by Semi-Government Authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, e.g., Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits, e.g., Trading Concerns, Fremantle Harbour Trust. (These examples do not necessarily exhaust the two categories.) Public Debt Charges are shown as a separate function.

(a) Amount payable by the Commonwealth Government under the States Grants (Tax Reimbursement) Acts.

(b) Received by State Treasury and paid to Consolidated Revenue.

(c) In 1947-48 and in 1949-50 amounts of £1,000,000 and £661,677 respectively were received as Supplementary Grants (see table No 7, page 7), but are not shown here as they were not treated as Tax Reimbursement by the State Treasury.

(d) Prior to December, 1942, Refunds of Arrears of Tax collected were made by State Treasury, since then the Refunds have been made by the Taxation Department, the State Treasury paying the Gross Collections of Arrears to Consolidated Revenue Fund.

No. 13.—Summary of Commonwealth Government Taxation Collections in Western Australia.

Notes.—The figures in this table represent the amounts collected in Western Australia but do not necessarily indicate the amount contributed by the people of the State, as moneys are collected in one State in respect of goods consumed in, or assessments made on account of, other States.

I—TRADE AND CUSTOMS

EXTERNAL TRADE OF WESTERN AUSTRALIA

Report for the Year ended 30th June, 1957

In this Report all values are expressed in Australian Currency and figures in parenthesis relate to the previous year.

1.—SUMMARY

The total value of trade for 1956-57—Imports £134.6 million and Exports £155.5 million—resulted in a favourable balance of £20.9 million, a reversal of the results for 1955-56 when there was an unfavourable balance of £19.8 million from Imports totalling £135.5 million and Exports £115.7 million.

Details of the trade balances for the last two years are as follows:—

	1955-56	1956-57
Oversea Trade—	£	£
Imports	46,481,702	40,211,566
Exports	81,035,350	114,327,916
Excess of Exports	34,553,648	74,116,350
Interstate Trade—		
Imports	88,975,963	94,339,914
Exports	34,636,448	41,194,941
Excess of Imports	54,339,515	53,144,973
Total Trade—		
Imports	135,457,665	134,551,480
Exports	115,671,798	155,522,857
Excess of Imports (—) or Exports (+)	—19,785,867	+20,971,377

The value of Imports from Oversea Countries at £40.2 million for 1956-57 shows a decrease from the previous year of £6.3 million whereas the value of Interstate Imports at £94.3 million shows an increase of £5.4 million, resulting in a net decrease for total Imports of £0.9 million.

Oversea and Interstate Exports each show an increase on the 1955-56 figures—Oversea at £114.3 million, an addition of £33.3 million; and Interstate at £41.2 million, an addition of £6.6 million, resulting in an aggregate increase of £39.9 million.

2.—PRINCIPAL IMPORTS—Oversea and Interstate

Principal Imports from Oversea Countries were Crude Petroleum £14,541,895 (£13,197,840); Machines and Machinery (except Dynamo Electrical) £4,814,393 (£7,362,932) and Metals and Metal Manufactures (except electrical equipment and machinery) £3,850,416 (£6,255,907).

The chief sources of goods were—the United Kingdom £12,198,895 (£17,608,993); Arabian States £7,401,985; Iran £7,928,437; United States of America £2,003,018 (£2,399,454); Republic of India £1,987,792 (£1,462,316) and Indonesia £1,151,982 (£1,392,823). In terms of percentage of total Imports (Oversea and Interstate), the United Kingdom accounted for nine per cent. and the Arabian States and Iran each for six per cent.

Imports from other Australian States came mainly from Victoria—£40,293,117 (£38,975,662); New South Wales—£37,680,218 (£34,458,032) and South Australia—£11,290,271 (£10,831,280). Of the total interstate imports, Victoria supplied 43 per cent., New South Wales 40 per cent. and South Australia 12 per cent. Some of the main commodities bought from Victoria and New South Wales were as follows:—

Commodity Group	Victoria	New South Wales
	£	£
Agricultural Machinery	1,162,642	222,482
Apparel (except Headwear and Footwear)	5,882,483	2,695,218
Confectionery	620,935	647,866
Cigarettes and Tobacco	2,004,544	1,065,050
Explosives	1,004,730	14,330
Footwear	1,400,869	636,912
Iron and Steel	203,427	6,811,764
Medicinal Preparations	430,848	964,408
Motor Vehicles and Components	4,552,243	1,496,123
Tyres and Tubes	1,407,887	1,084,900
Piece-goods (Apparel and Furnishing Fabrics)	1,021,503	489,568

3.—PRINCIPAL EXPORTS—Oversea and Interstate

The rise of £39·9 million in the total value of Exports is largely accounted for by increased returns from the following principal exports—Wheat £30,645,638 (£14,429,864) an increase of £16·2 million; Wool (Greasy and Scoured) £43,754,987 (£35,156,930) an increase of £8·6 million; Gold Bullion £12,059,597 (£6,420,786) an increase of £5·6 million and Petroleum Oils and Spirits £18,691,677 (£16,700,717) an increase of £2·0 million.

The most important oversea customers were—the United Kingdom £34,069,810 (£28,007,183) Republic of India £11,310,885 (£2,116,804); France £8,543,220 (£5,561,659); Federal Republic of Germany £6,558,738 (£6,887,537); Japan £6,284,676 (£1,769,232) and the United States of America £5,288,769 (£5,136,191). In terms of percentage of total Exports (Oversea and Interstate), the United Kingdom accounted for 22 per cent., Republic of India for seven per cent., France for five per cent., Federal Republic of Germany and Japan each for four per cent. and the United States of America for three per cent.

Exports to other Australian States went mainly to New South Wales £17,340,833 (£14,030,414); Victoria £9,889,152 (£8,624,887) and South Australia £11,367,091 (£9,174,227). Of the total Interstate value, 42 per cent. went to New South Wales, 28 per cent. to South Australia and 24 per cent. to Victoria. These figures indicate that New South Wales is the greatest interstate market for our primary and secondary industry products. However, if the values of Gold Bullion exported for sale on oversea premium markets, viz., £12,059,597 and Petroleum Oils and Spirits, the other largest value component, viz., £13,353,829 are subtracted from the totals, Victoria takes precedence with £5,232,315 (33 per cent.) followed by New South Wales, £4,071,520 (26 per cent.) and South Australia £3,911,491 (25 per cent.).

Details of Principal Exports

Greasy Wool

During the year, 108,581,711 lb. was exported at an average f.o.b. value of 78·7 pence per lb., resulting in the total value of £35,625,655. This was an improvement of £6·7 million on the return for 1955-56 when 113,289,040 lb. realized £28,947,217 at an average f.o.b. value of 61·3 pence.

Principal countries of destination were—United Kingdom 37,960,372 lb.—£12,279,985 (47,726,219 lb.—£12,145,386); France 19,489,320 lb.—£6,163,404 (18,142,938 lb.—£4,390,357); Japan 10,834,450 lb.—£3,844,958 (4,840,105 lb.—£1,359,157) and Italy 9,861,561 lb.—£3,048,071 (7,231,629 lb.—£1,772,946).

Scoured Wool

Exports totalling 18,746,141 lb. (16,744,513 lb.) realized £8,129,332 (£6,209,713), an average f.o.b. value per lb. of 104·1 pence (89·0 pence).

Principal countries of destination were—United Kingdom 4,889,670 lb.—£1,920,043 (5,182,015 lb.—£1,781,595); China 3,231,831 lb.—£1,683,020 (1,797,294 lb.—£794,270); Federal Republic of Germany 2,147,184 lb.—£883,160 (2,415,939 lb.—£898,430) and United States of America 2,065,044 lb.—£849,877 (2,063,533 lb.—£787,843).

Wheat

Shipments of wheat totalled 46,796,467 bushels (22,773,235 bushels) valued at £30,645,638 (£14,429,864) an average f.o.b. value per bushel of 13s. 1·17 pence (12s. 8·07 pence).

Principal countries of destination were—United Kingdom 22,537,909 bushels—£14,502,802 (12,183,920 bushels—£7,577,374); Republic of India 14,328,795 bushels—£9,573,966 (2,053,595 bushels—£1,271,235); Pakistan 3,707,760 bushels—£2,493,041 (Nil) and Federal Republic of Germany 2,075,621 bushels—£1,329,970 (3,881,995 bushels—£2,467,715).

Wheaten Flour

Flour exports at 2,549,825 centals (2,588,415 centals) for £3,736,776 (£3,883,012) decreased slightly on 1955-56 figures.

Principal countries of destination were—Republic of Indonesia 565,100 centals—£888,966 (972,107 centals—£1,507,948); Singapore 322,387 centals—£502,257 (446,436 centals—£703,652); Ceylon 304,745 centals—£419,634 (35,301 centals—£54,114) and Federation of Malaya 252,626 centals—£395,739 (353,686 centals—£546,734).

Barley

Barley exports totalled 2,129,855 bushels (2,234,429 bushels) valued at £1,007,871 (£962,945) and were exported principally to Japan 830,950 bushels—£420,784 (Nil); United Kingdom 885,472 bushels—£400,224 (1,665,619 bushels—£726,568) and Federal Republic of Germany 409,651 bushels—£184,692 (Nil).

Oats

Oats exported totalled 4,188,097 bushels (4,410,314 bushels), valued at £1,654,283 (£1,696,372). The Federal Republic of Germany 3,109,792 bushels—£1,190,708 (3,428,544 bushels—£1,334,019) and the Netherlands 500,080 bushels—£225,165 (531,160 bushels—£189,240) were the principal countries of destination.

Apples

Total exports amounted to 1,284,067 bushels (906,775 bushels) valued at £1,955,106 (£1,427,980) and the principal countries of destination were the United Kingdom 710,790 bushels—£1,073,321 (399,447 bushels—£629,309); Singapore 205,335 bushels—£336,205 (166,187 bushels—£275,959) and Sweden 224,772 bushels—£317,644 (267,370 bushels—£399,205).

Timber

Exports of timber totalled 56,146,744 super feet (54,590,927 super feet) and was valued at £3,107,513 (£2,799,170). "Other Australian States" was the principal destination with 33,670,569 super feet—£1,693,886 (36,432,023 super feet—£1,714,691), followed by New Zealand 10,629,638 super feet—£669,156 (9,831,698 super feet—£581,779); Union of South Africa 3,752,133 super feet—£227,879 (1,468,488 super feet—£87,253) and United Kingdom 3,331,095 super feet—£201,172 (4,332,914 super feet—£252,465).

Included in the above figures are exports of sleepers totalling 24,736,729 super feet (22,570,461 super feet) valued at £1,410,667 (£1,147,134). Of this total 13,398,715 super feet—£849,455 was exported overseas.

Whale Oil

Exports of whale oil totalled 2,392,519 gallons (2,322,309 gallons) and were valued at £992,145 (£967,447). The United Kingdom was the principal country of destination with 1,045,170 gallons—£463,230 (975,085 gallons—£421,153) followed by Italy 490,994 gallons—£204,283 (56,418 gallons—£24,075) and Federal Republic of Germany 531,460 gallons—£192,331 (913,122 gallons—£372,034).

Crayfish Tails

Exports totalled 3,565,789 lb. (3,529,076 lb.) and were valued at £1,757,138 (£1,510,756). Of this total 3,517,300 lb.—£1,740,183 (3,469,966 lb.—£1,493,122) was taken by the United States of America, with small consignments going to Canada, Singapore, Hawaii and "Other Australian States."

Petroleum Oils and Spirits

Total exports amounted to 335,032,510 gallons (332,098,020 gallons) valued at £18,691,677 (£16,700,717). "Other Australian States" received 243,508,240 gallons—£13,353,829 (273,554,962 gallons—£13,624,344), while of other destinations New Zealand with 53,561,846 gallons—£3,245,914 (25,703,500 gallons—£1,375,049) was the most important. Other countries of destination included Aden and Dependencies, Republic of India and Ceylon.

Gold Bullion

Exports of Gold Bullion to New South Wales for sale on Oversea premium markets totalled 770,061 fine ounces (410,278 fine ounces) valued at £12,059,597 (£6,420,786). The realization was £15 13s. 2d. (£15 13s.) per fine ounce.

Into the State during the year ended 30th June, 1957

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, from documents supplied by importers and their agents.

Note A.—Prior to an amendment to the Customs Act, 1901-1936, effective from the 15th November, 1947, imports direct from oversea were recorded in "British currency values." These British currency values were equivalent to the value of the imports for Customs duty purposes and consisted of the f.o.b. value of the goods in sterling, plus an addition of 10 per cent. From the 15th November, 1947, however, when the method of valuation was changed, import values have been stated in Australian currency f.o.b. port of shipment, without the 10 per cent. addition.

Imports from other Australian States are recorded in terms of landed cost.

Note B.—The "quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognized size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Imports has been compiled according to a Statistical Classification divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages immediately prior to this page.

Overseas Direct	40,211,566
GRAND TOTAL	134,551,480

From the State during the Year ended 30th June, 1957.

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, Canberra, from documents supplied by exporters and their agents.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is F.O.B., or its equivalent, at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles exported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Exports has been compiled according to a Statistical Classification divided into 21 classes which came into operation on 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages immediately prior to Table No. 5 (Imports).

SIZE CLASSIFICATION OF RURAL HOLDINGS, SEASON 1955-56.

Special tabulations relating to the classification of rural holdings, areas under crops and pasture, and livestock are published in Part V. of the Statistical Register for 1955-56.

STATISTICAL DIVISIONS.

- NOTES.—1. This table shows the Municipalities and Road Districts comprising the Statistical Divisions of the State at the 1st January, 1957.
2. Since 1928-29 the names and boundaries of Road Districts have been adopted as Statistical Districts. Previously district boundaries were defined from the Sheet Lines of the Standard Plans of the Lands Department.
3. For the purpose of statistics of agriculture and livestock, shown in this Part, each Municipality is combined with the surrounding Road District, except in the case of Bunbury Municipality, which alone comprises the Bunbury Statistical District.
4. A map showing the boundaries of Statistical Districts and Divisions is published facing page 6.

VIII.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

- (a) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."
- (b) *Marketing Costs*, comprise Freight, Cost of Containers, Commission, and other handling charges.
- (c) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."
- (d) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, and similar costs.
- (e) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) and is obtained by deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income.

II. MANUFACTURING.

- (a) *Value of Output* is the selling value "at the factory door" (i.e., the value at the point of sale less all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.
- (b) *The Value of Goods Consumed in the Process of Production* covers materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings.
- (c) *Net Value of Production* is the value added in course of manufacture. It is derived from the value of output by deducting the value of goods consumed in the process of production and represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

III. GENERAL.

To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations :—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes cost of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, net values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents an accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."*

No. 56.—Monthly Average Prices of Fruit—Metropolitan Markets, 1957

Note.—The average prices shown in this table have been computed from a systematic sample of fruit sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognized season does not reach a significant proportion of sales for the year, a price has not been shown. However, in computing the annual averages all sales have been included.

Part VI.—FACTORY STATISTICS

EXPLANATORY NOTES AND DEFINITIONS

Definition of Factory.—For statistical purposes a factory is defined as any establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year or power (other than manual) is used.

Classification.—In the case of a factory which engages in more than one industry on the same site, a separate return is obtained, where possible, for each industry. Each of these components is then classified as if it were a separate factory. However, where it is not practicable for the manufacturer to submit separate returns, the factory is classified to the predominant activity, *e.g.*, a factory *principally* engaged in manufacturing Ice but also producing Aerated Waters and Cordials would be classified to Ice and Refrigeration.

Confidential Information.—The Acts under which these statistics have been collected require that information supplied on any individual return must be treated as confidential. For this reason it has not been possible to publish some items and in other cases it has been necessary to combine details for publication. The tables affected carry appropriate footnotes.

Employment.—Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (*e.g.*, persons employed by Sawmills in felling and hauling logs) or persons engaged in selling or distribution. Working Proprietors are included unless otherwise stated.

Average employment figures may be expressed as an average "over the period worked" or as an average "over the whole year." Thus a factory which operates for six months of the year only and employs 20 persons throughout that period has an average employment of 20 "over the period worked," but an average of only 10 "over the whole year." The type of average is indicated in each table.

Value of Output.—The value of output is the selling value "at the factory" (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

Net Production.—"Net Production" is the value added in the course of manufacture. It is derived from the value of output by deducting the value of goods consumed in the process of production. The values deducted are those of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings. "Net Production" represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

Statistical Divisions.—A map showing Statistical Divisions, and their component Statistical Districts (Local Government Areas), appears in Part V. of the Statistical Register of Western Australia.

(a) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

PART VI.—FACTORY STATISTICS

Table with columns for commodity names (e.g., Leather, For sale by weight, etc.), units, and values. The table is organized into several vertical sections, each containing a list of commodities and their corresponding data points.

(a) Some major items of production are not available for publication. (b) Quantity only available. (c) Includes plywood veneers in terms of super feet.

(d) Total Generated—for quantity and value of Electricity Distributed, see Table No. 58. (e) Total Made—for quantity and value of Gas Distributed, see Table No. 59.

* Revised.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers

RETAIL PRICES

Prices of a limited range of commodities are recorded in the Blue Books of Western Australia from the early years of settlement. It was not until 1911, however, that a systematic collection of retail prices statistics, undertaken by the Commonwealth Statistician, was begun. The results of this enquiry were published in 1912 and thus, for the first time, particulars of retail prices in a selection of Western Australian towns became available. As well as providing data for each of five principal towns for the year 1911, the published information contained particulars for the capital city for each year from 1901 to 1910, the scope of the investigation having been specially extended for this purpose. The 45 commodities included in the collection, in addition to house rent, comprised a representative range of groceries, dairy produce and meat. The field of collection was later expanded to cover other groups of household expenditure.

Retail prices of selected groups of commodities and services continue to be collected regularly from representative informants in the more important towns. From six of these, prices are obtained for food and groceries, rents of 4- and 5-roomed houses, men's, women's and children's clothing and footwear, household drapery and utensils and other items of miscellaneous expenditure, such as fuel, light and fares. A collection restricted to the prices of food and groceries only is made for a more extensive list of towns. Informants are required to furnish prices monthly, as at the 15th of the month, for food and groceries and quarterly, as at the 15th of the middle month of each quarter, for house rents, clothing and miscellaneous items.

In order to ensure that only pure price movements are measured, specific grades and qualities have been established for the several items under investigation and all informants throughout the State are required to quote consistently for articles conforming to these standards. The collection of data is made under the authority of the Commonwealth Census and Statistics Act, and is carried out by specially qualified field officers who, where necessary, check prices and standards in the shops of informants and inspect houses listed on the rent returns.

During the war years unusual difficulty was experienced in obtaining prices data, due mainly to the scarcity and the uncertain supply of some types of goods and to changes in grade and quality, especially in the clothing and the household drapery and utensils sections. In these circumstances, it became necessary in some cases to substitute new grades, qualities or types of articles in place of those normally included or, alternatively, to adopt appropriate statistical devices to overcome the effects of the lack of quotations for goods temporarily unobtainable. In some measure the problem remained under early post-war conditions, when some commodities were still in short supply and stocks were extremely variable. Because of these and other difficulties inherent in a retail prices collection, special precautions are necessary to maintain the reliability of these statistics.

Food and Groceries

Table No. 1 shows the average of prices quoted by retailers in the Metropolitan Area for items of food and groceries during each month of 1957. In some cases, the averages shown are price relatives.

CONSUMPTION OF FOODSTUFFS, ETC

No. 2.—Estimated Annual Consumption of Foodstuffs, Beverages and Tobacco

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors and tobacco preparations are also given.

The figures have been derived from records of production, imports and exports, for the years 1952-53 to 1956-57, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc.; sugar in jam, and so on.

Where the necessary data were available, adjustment has been made for movement in stocks, and for exports as ships' stores.

RETAIL PRICE INDEX NUMBERS

The collected information relating to prices of goods and services may be summarized in the form of index-numbers. The basic principle of a retail price index is relatively simple. Commodities representative of the field to be covered are selected and their prices combined at regular intervals in accordance with their relative importance in that field. The aim is to express as a single number the degree of change in prices for the selected field as a whole during each of these intervals and thus to establish a series for individual towns or groups of towns.

The group of selected items is called a "regimen," and the quantities consumed annually of each item used in the index are called "weights." In compiling the index, the price of each item is multiplied by its quantity "weight," and then by its appropriate population or household "weight." The sum of these products for all items gives an "aggregate expenditure." The "aggregate expenditures" are converted into a series of indexes by equating the aggregate for a selected or "base" period to 1,000, and calculating all index-numbers to this base according to the ratio which the several aggregates bear to that of the base period.

The regimen must be a selected one, because it is impossible in practice to ascertain at regular intervals prices of every item of goods and services. In order to ensure the reliability of a retail price index, the selected items comprising the regimen must conform to certain criteria. They must be such that they can be clearly and definitely described, and must be capable of standardization so that they shall be consistently uniform. They must not be subject to violent or extreme seasonal fluctuations. They must be in common use and their consumption must remain relatively constant and comprise an appreciable proportion of the total for the commodity group which they purport to represent. Above all, they must constitute a fair sample of the goods or services of which they are representative.

The regimen is simply a selected list of items combined in certain proportions for the purpose of measuring price variations on a defined basis. The items are representative of the field covered, and the proportions approximate to those in average consumption so far as can be ascertained. In order to avoid breaks in continuity of the index, it is desirable to keep the regimen and weights as stable as possible.

THE "C" SERIES INDEX

Probably the most widely known of the retail price index-numbers compiled in Australia is that described as the "C" Series. It was constructed as a result of the recommendations made in 1920 and 1921 by the Royal Commission on the Basic Wage, to which reference is made on pages 19 and 20.

The official definition of the purpose of the index is of particular importance.

"The 'C' Series Retail Price Index is designed to measure the extent of changes in price levels only. While it may be used as indicating proportionate variations in the cost of a constant standard, it does not measure the absolute cost of any standard of living, nor the cost of changes in the standard of living. In other words, it measures as nearly as may be the proportionate change in the aggregate cost of specified quantities and qualities of the selected regimen of items included in the index. The regimen is representative of a high proportion of the expenditure of wage-earner households."

The regimen of the index is not, as is sometimes erroneously supposed, a basic wage regimen nor yet is it a full list of component items in a standard of living. It does not imply that any particular goods or any selected grades or quantities of these goods should enter into determination of a basic or living wage.

The Statistician describes the index as a price index, *not* as a "cost of living" index. Colloquially it is often referred to as a "cost of living" index, and industrial tribunals sometimes use this phrase and the phrase "cost of living variations." While use of such a misnomer may be conveniently descriptive in some ways, it frequently leads to confusion of thought and to irrelevant discussions on the index. Prices are an important element in the cost of living, but they are not the only element causing changes in cost of living.

No single index could simultaneously measure the extent of all changes in cost of living. The "C" Series Index is solely a price index and can therefore measure only the price component of changes in cost of living. Changes caused by factors other than price variations are subjects for consideration quite independently of the "C" Series Index.

The "C" Series Index is derived by combining separate indexes based upon the collected retail prices of 40 items of food and groceries; 77 items of men's, women's and children's clothing and footwear; 38 items of miscellaneous household expenditure, including household drapery and utensils, fuel, light, fares, newspapers and smoking; and rents of 4- and 5-roomed houses, in relation to which house agents are required to quote the rentals of "ordinary unfurnished dwellings, in a good state of repair and with ordinary conveniences, occupying fair situations."

The index-numbers shown in Tables Nos. 3-8 are based upon the relationship existing between the aggregate cost in each town at different times, of the items in each of the groups Food and Groceries, House Rents, Clothing and Miscellaneous and the weighted average annual aggregate cost of the same regimen in the six capital cities taken as a whole during the five years 1923 to 1927.

Tables Nos. 9-18 show the effect of combining the several group indexes to derive the corresponding "C" Series index.

RETAIL PRICE INDEX NUMBERS—continued

No. 7.—Clothing—Five Principal Towns

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

RETAIL PRICE INDEX NUMBERS—continued

Note.—In Tables Nos. 11–18 each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally, in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

The "C" Series index figures combine in one series the index numbers relating to food and groceries, house rents, clothing, household drapery and utensils, fuel and light and other miscellaneous items of household expenditure. They may be used directly to show the relative levels in different places and at different times.

II.—WAGES

THE BASIC WAGE

The concept of a "basic" or "living" wage occurs commonly in the determinations of wage fixing authorities in Australia, although it may vary in definition. Originally the term was understood to mean the minimum or "basic" wage necessary to provide a reasonable standard of comfort for the average worker and his family. In later years, however, economic factors have been taken into account and, in determining specified minimum rates of wage, consideration has been given to the capacity of industry to pay those rates.

There are two tribunals, the Commonwealth Conciliation and Arbitration Commission and the State Court of Arbitration, which have authority to declare basic wage rates applicable in Western Australia.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined as "that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The Act contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a "minimum rate of wage" but it neither defined, nor provided for the determination of, a specific "basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage, including "loadings," payable to an adult unskilled labourer. A "loading" may be defined as an addition to the "basic" wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of "margin for skill."

The State Industrial Arbitration Act defines the basic wage as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies." The Court must have regard for the needs of the worker to enable him to live in reasonable comfort. An amendment of 1950 requires that the Court shall take into consideration the economic capacity of industry but, in so doing, shall not reduce the basic wage below an amount which it deems necessary to maintain this reasonable standard of comfort.

The *Commonwealth Conciliation and Arbitration Commission* was established in 1956 by an amendment to the Conciliation and Arbitration Act which had the effect of allocating to the Commission the arbitral functions and to a Commonwealth Industrial Court the judicial functions formerly carried out by the Commonwealth Court of Conciliation and Arbitration. The Commission consists of a President, not less than two Deputy Presidents, a Senior Commissioner and not less than five Commissioners. The *Commonwealth Industrial Court* comprises a Chief Judge and not more than two other Judges.

The *State Court of Arbitration* consists of a President, who must be a person qualified to be appointed a Judge of the Supreme Court, a representative of the employers' organizations registered with the Court, and a representative of the employees' unions.

Commonwealth Basic Wage

The first determination of a wage standard by a Court in Australia was made in 1907, when Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, fixed an amount of £2 2s. per week for Melbourne as reasonable to meet the needs of "a family of about five." This determination is commonly referred to as the "Harvester Judgment" from the fact that it related to an application by the proprietors of the Sunshine Harvester Works that the wage paid to their employees was "fair and reasonable."

The "Harvester" standard was adopted by the Court for incorporation in its awards and the rates remained virtually unchanged until 1913. In that year the Court began to have regard to retail price index numbers the first of which, the "A" series, covering food and groceries and rent of all houses, had recently been published by the Commonwealth Statistician. In general, the practice was to revise basic wage rates in direct proportion to variations in the retail price index. Until 1918 the Court, in computing "Harvester" equivalents, used the index numbers for the previous calendar year and, from 1918 to 1921, the figures for the next preceding four quarters.

During the period of application of this system, it was frequently contended that it failed to maintain the "Harvester" standard. Criticism became more general with the rise in prices towards the end of the first World War and led to the appointment in 1919 of a Royal Commission on the Basic Wage under the chairmanship of A. B. Piddington, K.C. The "Piddington Commission," as it came to be called, was required by its terms of reference to enquire into the actual cost of maintaining in a reasonable state of comfort a household comprising a man and his wife and three children under fourteen years of age, and also the means to be adopted for the automatic

adjustment of the basic wage in order to maintain its purchasing power. The Commission presented its findings in two reports, the first of which was made in November, 1920, and the second in April, 1921. The recommendations in relation to a living wage were rejected by the Court as being so much in excess of existing wages as to cause doubt about the capacity of industry to pay such rates. The Commission's finding in regard to the automatic adjustment of the basic wage led to the creation of the "C" Series Index of Retail Prices, an index much more comprehensive in scope than the original "A" Series, in that it includes the additional groups Clothing and Miscellaneous Expenditure.

In 1921, the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the "A" Series index, and a loading of 3s. was added to the "Harvester" equivalent by Mr. Justice Powers to ensure that during a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until the depression of the 1930's, when the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by ten per cent. as from the 1st February, 1931.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages to a level below the prescribed percentage. To correct this decline, it adopted the use of the "D" Series index, derived by combining the "A" and the "C" Series indexes.

In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The "Harvester" standard supplemented by the Powers loading of 3s. was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of £4 4s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The "C" Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus the 1933 equivalent in purchasing power of an amount of £4 4s. in 1926 was £3 7s., to the nearest shilling ($84s. \times 829 \div 1,033$), which became the rate applicable in Sydney from the 1st May, 1934. The equating of this wage to the index number 829 established the relationship '1,000 in the "C" Series index = £4 1s. in the wage' ($67s. \times 1,000 \div 829$, to the nearest shilling) and by applying the multiplier 0.081 to the "C" Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the beginning of the first pay period in the months of June, September, December or March, and adjustments were continued on this basis until 1939. Thereafter they took effect from the beginning of the first pay period commencing in the months of February, May, August or November, until their abolition by the Court in its judgment of the 12th September, 1953.

The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the "C" Series to a special "Court" Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, simply a table expressing in shillings the wage rates derived by the use of the conversion factor 0.081. The Court's judgment further provided for the addition of "prosperity loadings" to the rates so derived, which came to be designated the "needs portion" of the wage. The amount of the loading applied to the "needs" wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

In general, the method of the 1937 judgment was retained by the Court until its "interim" decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the "needs" portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this new series, the "C" Series index number (1146) for the Six Capital Cities as a whole in the September quarter, 1946 was equated to the "needs" portion (£5) of the new Six Capitals wage. This established the base, 1000 in the "C" Series index = £4 7s. in the wage. The immediate monetary effect was to increase by 7s. per week the "needs" wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of £1 per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series), derived by equating 1572 (the "C" Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to £8 2s., the increased weighted average wage for the Six Capitals (made up of the "needs" portion £6 17s., plus a uniform prosperity loading of 5s., plus the additional £1 awarded by the Court). In this way, 1000 in the "C" Series index became equal to £5 3s. in the wage. In determining the new rate of payment, a uniform amount

Commonwealth Basic Wage—continued

of £1 5s. was added to the existing "needs" basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by £1 1s., and for the Six Capital Cities as a whole by £1. From, and including, the first pay period in February, 1951, the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components "needs portion" and "prosperity loading" ceased to exist as separate and distinguishable parts of the wage.

Following applications by employers' organizations requesting, among other things, "that the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned" and counter claims by employees' organizations for increases in the basic wage for adult males, the Court on the 16th September, 1952 commenced hearing evidence in what has come to be known as the "Basic Wage and Standard Hours Inquiry, 1952-53." Submission of evidence continued intermittently until the 11th September, 1953, and on the following day the Court announced its decision. The application for discontinuance of the system of adjusting the basic wages in accordance with variations in the retail price index numbers was granted but all of the other applications were refused. On the 27th October, in stating the reasons for its decisions, the Court made it clear that, as in its opinion there should be no departure from "its now well established principle that the basic wage should be the highest that the capacity of the community as a whole can sustain" and as it had "withdrawn from relating the basic wage to the fulfilment of any particular standard of needs," the Court "finds it impossible to justify the continuance of an 'automatic' adjustment system whose purpose is to maintain the purchasing power of a particular wage (assessed with regard to the capacity of industry to pay such wage in 1950)." In consequence, the wage rates which had applied from the beginning of the first pay period commencing in August, 1953, continued to operate.

In November, 1955, application was made to the Court by certain employees' organizations seeking an alteration of the basic wage. Among matters included in the application were requests that the wage be increased to the amount which it would have reached if automatic quarterly adjustments, discontinued since September, 1953, had continued to apply, that the wage be raised by a further £1, and that automatic quarterly adjustments be restored. After a protracted hearing, in the course of which the Commonwealth Government intervened in the public interest under Section 26 of the Act and each of the State Governments was represented as a respondent, judgment was delivered on the 26th May, 1956. The Court refused the first of the unions' claims and rejected the request for the restoration of the quarterly adjustments, but granted an increase of 10s. per week in the adult male basic wage to apply from the beginning of the first pay period commencing in June, 1956.

The next basic wage hearing commenced before the newly-constituted Commonwealth Conciliation and Arbitration Commission in Presidential Session on the 13th November, 1956. The unions' claims were substantially the same as for the previous case except that the clause relating to an increase of a further £1 in the basic wage was deleted. Again the Commonwealth Government intervened in the public interest and the South Australian and Victorian State Governments were represented. In the judgment delivered on the 29th April, 1957, the Commission rejected the claims made by the unions and granted a uniform increase of 10s. per week in the adult male basic wage to apply from the beginning of the first pay period commencing on, or after, the 15th May, 1957.

WAGES—*continued*

State Basic Wage

Under the provisions of an amendment of 1925 to the Industrial Arbitration Act, 1912, the State Court of Arbitration was required to declare a basic wage annually, to operate from the 1st July in each year.

In 1930, the Court was empowered by another amendment to the Act to adjust the annual declaration each quarter in consonance with "the variation (if any) in the cost of living." A further amendment in 1950 removed this obligation and gives the Court discretion to make basic wage determinations at any time, provided that such reviews are at intervals of not less than twelve months. The provision for quarterly adjustments was retained. Basic wage determinations of the Court are automatically applicable, and thus become the minimum wage permissible by law, in respect to all male and female workers who are covered by industrial awards made by the State Court or by agreements registered with the Court and those who come within the provisions of the Factories and Shops Act.

The first decision of the Court took effect on the first July, 1926, and prescribed a rate of £4 5s. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements and allowed such amounts for each as to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was the equivalent of the Piddington Commission's standard but reduced to provide for a family unit of four; for Rent, the average rental of four- and five-roomed houses; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous Expenditure, an amount based on the Piddington Commission's findings.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. and £2 7s. respectively, with the exception of certain specified goldfields areas for which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage for the Metropolitan Area of £4 6s. for males and £2 6s. 5d. for females. In this connection, the Metropolitan Area is the area comprised within a radius of 15 miles from the General Post Office, Perth. Rates for all other parts of the State were fixed at £4 5s. and £2 5s. 11d. respectively.

Additional power was given to the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the rates fixed by the annual declaration and, on the 3rd March, 1931, rates of £3 18s. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, and of £3 17s. and £2 1s. 8d. for all other parts of the State. The Court is empowered to make such quarterly adjustments only when a rise of one shilling or more per week is indicated in the "cost of living."

The annual declaration operative from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a separate wage for agricultural areas, which are taken to be those areas, other than the Court's Metropolitan Area, contained within the official South West Land Division as described in the Land Act.

In 1938 an inquiry, which was the most comprehensive since the original declaration, gave special consideration to the factors of national income and standards of nutrition and as a result wage levels throughout the State were considerably increased from the 1st July in that year. The Rent and Miscellaneous Expenditure elements of the wage were based on the existing standards but Clothing was based on the Piddington standard, reduced to provide for a family unit of four, and Food and Groceries on the Piddington standard plus an amount of 1s.

Subsequent annual declarations until 1942 maintained in purchasing power the standard of the 1938 judgment.

State Basic Wage—continued

At a sitting of the Court held on the 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, under the existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the standards of the relevant annual declaration. It was followed by a similar decision given on the 29th April, 1942, when the Court reaffirmed that no adjustment should be made to existing rates, despite further increases in retail prices.

On the 11th June, 1942, the Court, in its annual declaration, adopted as its new base the rates which had operated since the 28th July, 1941, and these remained in force until the 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier under the authority of National Security (Economic Organization) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations from 1938 to 1941.

On the 30th October, 1942, these standards were readopted by the Court for the purposes of the quarterly adjustments and continued to apply until the Interim Basic Wage Declaration of the 26th February, 1947. In this declaration, made under powers conferred by an amendment in December, 1946, to National Security (Economic Organization) Regulations, the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

An amendment of 1950 to the Industrial Arbitration Act removed the Court's obligation to make annual declarations, empowers it to make basic wage determinations at any time during the year at intervals of not less than twelve months, subject only to quarterly adjustments, and requires that in such determinations the Court must give due consideration to the economic capacity of industry to pay any proposed increase in the basic wage.

Consequent on the judgment of the Commonwealth Court on the 12th October, 1950, the State Court declared a new wage, incorporating an increase of £1 for males and 15s. for females and consolidating the four elements and the loading previously mentioned, to have effect from the 18th December, 1950. This meant that the concept of a composite wage, which had applied since the initial declaration in 1926, was now abandoned. It also decided in January, 1951, that any quarterly adjustments should be based on variations in the "C" Series Retail Prices Index Numbers. On the 28th November, 1951, the Court raised the basic wage for females from 54 per cent. of the male rate to 65 per cent., the new rates to operate from the 1st December, 1951.

On the 13th November, 1953, the Court again exercised its discretionary powers, conferred by Section 127 of the Act, and determined that no change should be made in the basic wage, although there had been an appreciable increase in the "C" Series Retail Prices Index. This decision governed subsequent determinations until the 9th August, 1955, when the Court reverted to the practice of making quarterly adjustments.

DWELLINGS SUMMARY, WESTERN AUSTRALIA—CENSUSES OF 1947 AND 1954

In Tables Nos. 43, 44, 45, 48, 50, 51, and 52 figures are shown separately for "Metropolitan Urban," "Other Urban," and "Rural."

"Metropolitan Urban" comprises the Metropolitan Statistical Division.

"Other Urban" comprises—

(1) all country municipalities; and

(2) towns outside the Metropolitan Statistical Division not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes, and which had a population of 1,000 or more at the Census.

"Rural" comprises all that part of the State not included in "Metropolitan" and "Other Urban."

For the purpose of the Census a "dwelling" is any habitation occupied by a household group living together as a domestic unit whether comprising the whole or only part of a building.

No. 43.—Number of Occupied Dwellings, according to Class

(a) In previous Censuses dwellings returned on the Schedules as Sheds, Huts, Garages, etc., were included with Private Houses. In the Census of 1954 these dwellings are shown in tabulations as a separate group whenever practicable, but are linked with Private Houses to preserve continuity with past Census results.

(b) "Share of Private House" is a portion of a shared Private House which is occupied separately and for which portion a separate Householder's Schedule was furnished.

(c) "Flat" is part of a House or other building which can be completely closed off and which includes both cooking and bathing facilities.

(d) "Other" Private Dwelling is part of a building which is not a self-contained unit. It may be an apartment, rooms, etc.

(e) "Dwellings Other than Private" include Hotels, Boarding Houses, Lodging Houses, Hostels, Hospitals, Educational, Religious and Charitable Institutions, Defence and Penal Establishments, etc.

RETAIL SALES STATISTICS

1. *Introduction.*

The figures in the following tables relate to the activities of retail establishments in Western Australia.

Table No. 54 is an extract from a quarterly statistical statement "Retail Sales of Goods," which contains similar information for each of the other States and for the Commonwealth as a whole. Tables Nos. 55-58 have been extracted from Bulletins Nos. 6 and 13 of the Census of Retail Establishments for the year ended 30th June, 1953.

Throughout the tables, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) made to the public by establishments selling retail goods from fixed premises such as shops, rooms, kiosks and yards. Data for the years 1948-49 and 1952-53 were obtained from Censuses taken in respect of those years. Particulars for other periods, shown in Table No. 54, are estimates derived from a quarterly sample survey.

In addition to the two Censuses of Retail Establishments already mentioned, information is available from the first such Census, which related to the year ended 30th June, 1948. However, these statistics are not as detailed as those shown in the following tables and comparisons, where they occur, have been confined to the results of the Censuses of 1948-49 and 1952-53.

2. *Scope of Census.*

The Censuses have been designed principally to cover sales to the final consumer of goods generally used for household and personal use. For this reason, sales of farm and industrial machinery and equipment, earth-moving equipment, etc., have been excluded. In the first two Censuses sales of building materials (except timber) were included, but in the 1952-53 Census all building materials have been excluded. All retail sales of motor vehicles, parts, etc., are included whether for industrial, commercial, farm or private use. Business machines such as typewriters are also included when sold from a retail establishment.

Wholesalers and manufacturers are included if they sell *regularly* by retail, but not if they make retail sales only occasionally. Itinerant vendors and casual stalls or booths are excluded as are such organizations as clubs and societies making sales to their own members. Both new and second hand goods are included in sales recorded by relevant retail establishments.

Because of the above-mentioned restrictions to the scope of the Census, the aggregates shown for some commodity groups may be less than the *total* value of goods sold to consumers by all establishments regardless of definition. In particular, this applies to tobacco, and beer, wine and spirits which are also sold by establishments not included in the Census. However, some additional details of sales of these items were obtained from a supplementary collection of licensed clubs, etc.

In addition to ordinary retail shops, as generally understood, the Census *includes* the following :—

- Hotels, wine saloons, and refreshment rooms.
- Bakers, whether selling from retail premises or from a vehicle.
- Produce Merchants.
- Tailors.
- Garages and service stations, motor vehicle distributors.
- Gas and Electricity suppliers, in respect only of their retail sales of appliances.
- Fuel and Ice Merchants, with retail premises but not all those selling only from a vehicle.

The following types of activities are *excluded* :—

- Opticians and optometrists.
- Clubs, guest houses, theatres and cinemas.
- Agents (except in respect of goods sold on own behalf).
- Dry Cleaners and Laundries.
- Direct selling (either on site or from delivery vehicles) from market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, except where a shop or regular roadside stall is conducted.
- Hawkers, street barrows, casual stalls and street sellers.
- Timber yards and joinery works.
- Brick works.
- Roofing tile works.
- Trade services such as monumental masonry, carpentry, electrical contracting, plumbing, upholstery, etc.
- Real estate agents, stock and station agents.
- Newspaper publishers and printers (except in respect of goods sold by retail from a shop).
- Photographers and picture framers.
- Dressmakers.
- Caterers for special occasions (races, sports meetings, etc.).
- Chiropodists.
- Herbalists.
- Lending libraries.

RETAIL SALES STATISTICS—continued

3. *Lists of Establishments and Collection of Returns.*

The work of listing of retail establishments to be included in the 1952-53 Retail Census was carried out by postal officers throughout Australia. The lists were checked against the 1948-49 Retail Census lists and, where necessary, against other available sources of information, such as trade directories, lists of liquor licenses, etc., and minor deficiencies were rectified.

Census forms were distributed and collected by post and, where necessary, for elucidation of facts, additional enquiries were addressed to retailers.

4. *Census and Statistics Act, 1905-49.*

The Census was conducted under the authority of the Census and Statistics Act, 1905-49, under the terms of which all returns supplied by traders must be treated as strictly confidential and disclosure of information shown on individual returns is prohibited. Consequently, in the tables set out in this Bulletin some aggregates which refer to a small number of establishments have either been grouped with others or withheld from publication in order to avoid risk of disclosure of confidential information.

5. *The Census Form.*

On the Census form, clear distinction was drawn between :—

(1) Retail Sales of goods ;

and (2) " Other Takings," including payment for services often associated with retailing. These are hairdressing, repairs, meals, accommodation, laundry and dry cleaning, etc.

The form provided a separate heading for " Wholesale Sales of Goods " in order to avoid their being incorrectly included under any other heading.

Two of the commodity groups shown in the retail section of the form, namely Basic Building Materials and Farm Machinery and Implements were listed separately to ensure that details of these sales were not included under any of the other retail groupings. Sales of these commodities are not included in the aggregates shown in this Bulletin.

Two general qualifications are needed to explain the figures of sales recorded :—

(1) Where actual figures were not available traders were asked to supply careful estimates of total retail sales and of sales by commodity groups.

(2) As it was impossible to define or list in detail the types of goods to be included under each commodity group, traders were asked to show figures for each group in accordance with ordinary trade groupings as understood by them. The commodity group totals are therefore subject to this qualification. In particular, despite numerous queries made when returns were being examined, it is possible that traders did not always show separately sales of Tobacco, Cigars and Cigarettes in the item provided on the form.

6. *Explanation of Terms used in the Tables.*

Commodity Group—the thirty-two broad groups (reduced for tabulation purposes to thirty) into which traders were asked to dissect their total retail sales of goods.

Other Food—includes retail sales of fish, poultry, cooked meat, wrapped lunches, etc., but excludes takings from meals sold in cafes, restaurants, etc., for which a separate dissection was obtained under " Other Takings."

Other Goods—comprises goods which are not covered by the thirty-one specified groups and includes bicycles, flowers, plants, garden supplies, toys, sewing machines, baby carriages, medical and surgical supplies, photographic equipment, etc.

Main Type of Business—is a classification of each establishment according to the predominant type of goods sold or service rendered. The classification was based mainly on the dissection of commodity sales recorded on the Census form but, in some cases, namely, Other Food and Other Goods, the description given by the proprietor was used as a guide. For the purpose of determining the predominant type of goods sold some combinations of commodity items were considered as " main lines," e.g., Clothing and Drapery (Men's and Boys' wear ; Women's, Girls' and Infants' wear ; and Drapery Piecegoods, Manchester, etc.). Accordingly, establishments were classified to type of business on the basis of the predominant " main line " of goods sold or service rendered and where the " main line " consisted of a combination of items, the classification was made to the major item within the " main line."

RETAIL SALES STATISTICS—*continued*

Stocks of Goods on Hand and Method of Valuation.—Figures shown for stocks of goods on hand at 30th June, 1953, represent the total value of goods held for retail sale by establishments with stocks of more than £500 at that date. Retail stocks of less than £500 held by individual establishments are excluded from the figures. Details of stocks shown are aggregates of the figures supplied on individual returns without any adjustment for different methods of valuation (cost price, market price, replacement cost, etc.).

Metropolitan Area.—As defined for statistical purposes includes the city proper and adjoining urban areas. The names of Local Government Areas included in the metropolitan area of Perth are shown in Table No. 53 and on the map of Western Australia in Part V. of the Statistical Register.

Statistical Retail Areas.—These areas have been designed for Retail Census purposes and are groups of contiguous Local Government Areas within Statistical Divisions. In Western Australia the Metropolitan Statistical Division has been divided into seven Statistical Retail Areas but each of the remaining Statistical Divisions has been regarded as a Statistical Retail Area, with the exception of Central, North-West, Pilbara, and Kimberley Statistical Divisions which, combined, form one Statistical Retail Area. Names of Local Government Areas included in each Statistical Retail Area, and Statistical Division are shown in Table No. 58.

7. *Comparison of 1948-49 and 1952-53 Census results.*

In some tables comparisons are shown of the 1948-49 and 1952-53 Retail Census results. In general, the scope of the 1952-53 Census follows the same general principles adopted for the earlier Census and as a result the same types of establishments are included in both Censuses. However, establishments with total retail sales of less than £500 were excluded in 1952-53, whereas only those with less than £50 in 1948-49 were excluded from the tabulations. In 1952-53 there were an additional 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. These establishments, which were excluded from the tabulations, represent approximately 3.7 per cent. of the total number of establishments in Western Australia but the amount of their sales was not significant (less than 0.1 per cent. of the total).

A more detailed dissection of total retail turnover was obtained in 1952-53 (32 groups in 1952-53 and 17 in 1948-49) but comparability of commodity groups has been maintained as the additional dissections relate mainly to further break-downs of the 1948-49 groups. However, sales of building materials (except timber) where sold by retailers are included in the 1948-49 Census figures, whereas all building materials are excluded from the 1952-53 Census. Sales of farm machinery and implements, obtained separately on the 1952-53 Census forms, are excluded from the tabulations. These sales were also excluded as far as possible in the 1948-49 Census.

The method of classification to type of business used in 1952-53 has been explained in Section 6. In 1948-49 the description of business given by the proprietor formed the basis of the classification to type of business, although in cases where the description given did not indicate the nature of goods sold (*e.g.*, general store, variety store, etc.), type of business was determined by the commodity group in which the largest sales were recorded. Differences in coding procedure between the two Censuses would affect only those establishments with sales of approximately equal value in two or more commodity groups. Some such composite establishments may have been coded to one type of business in 1948-49 when classified in accordance with the description of business given, but to another type of business in 1952-53 when classified in accordance with the "main line" with the largest sales.

No. 54.—Value of Retail Sales Classified According to Commodity Groups, Western Australia

The figures in the table below relate to goods (as distinct from services, accommodation, entertainments, meals, etc.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards). The table contains particulars for the years 1948-49 to 1960-61 on a comparable basis throughout. The figures for the years 1948-49, 1952-53 and 1955-57 were obtained from Censuses taken in respect of those years, whereas particulars for the other periods shown are estimates based on sample surveys and are subject to revision when final results of the 1950-57 Census of Retail Establishments are available.

(a) Establishments with total retail sales of £50 or more in 1948-49.

(b) Establishments with total retail sales of £500 or more in 1952-53. In this year there were 294 establishments in Western Australia with retail sales of less than £500, but more than £100, with total retail sales of £85,000.

(c) Excludes meals in Cafes, Restaurants and other eating houses.

(d) In 1948-49 separate details for each of the commodity groups bracketed were not collected.

(e) Excludes Basic Building Materials (e.g., Timber, Roofing Tiles, Bricks, etc.).

(f) Includes Sales of Basic Building Materials (other than Timber) with an estimated value of £1,020,000.

(g) Not available.

(h) Excludes Farm Machinery and Implements, Earth-moving Equipment, etc.

(j) Total number of individual establishments. Because many establishments showed sales in more than one commodity group, the number of establishments selling goods in each commodity group does not add to the total number of individual establishments.

(a) Total value of all commodities sold by retail by the types of business shown. (b) Establishments with total retail sales of £50 or more in 1948-49. (c) Establishments with total retail sales of £500 or more in 1952-53. In this year there were 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. (d) Total value of stocks held for retail sale by all establishments with retail stocks of more than £500 at 30th June, 1953. Stocks were not included where values for individual establishments were less than £500. Therefore in some types of business (particularly in the Food, Hotels, Tobacconists, etc., groups) where a large proportion of establishments had stocks of less than £500 at 30th June, 1953, the values shown may be substantially less than the total value of stocks held by all establishments classified to that type of business. (e) Cafes, restaurants, etc., selling goods. Excludes those selling meals only. (f) Includes establishments whose main type of business is Basic Building Materials. (g) Includes sales by establishments whose main type of business is Basic Building Materials. (h) This figure differs from its counterpart in Table 55 because it includes retail sales of motor vehicles, etc., made by establishments whose main type of business is other than motor vehicles and excludes retail sales of goods other than motor vehicles, etc., made by establishments whose main type of business is motor vehicles.

(a) The index numbers appearing in these four columns cannot be compared horizontally to show the relative levels of the groups since the prices aggregate in each group in the base period is made equal to 1,000. (b) Not available. (c) The "C" Series index figures combine together in one series the index numbers relating to food and groceries, rent, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure. They may be used directly to show the relative levels in different places and at different times.
