## PREFACE.

J. O. YOUNG

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following, the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the twenty-seventh Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. ix to xxii immediately following shows the general arrangement of the work. The special index (following the usual general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues matter which, owing to limitations of space, has been omitted or is not printed fully in the present volume.

Economic and financial conditions during recent years have caused a demand for new information, or information expressed in new terms, concerning many matters of finance, trade, production and industry. The need for economy hampers the collection of this material, and the need for abbreviation precludes adequate presentation of some that is available. The editing of the Year Book has, therefore, become particularly difficult, involving as it does the continual balancing of the claims of old material and new. Some progress has been made in the later volumes towards bringing closer to present day requirements the Chapters dealing with production, trade, finance, population and vital statistics, etc., while the Appendix furnishes a summary, brought up to the latest available date, of the chief events in connexion with the financial crisis. It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter, incorporated in the present volume, but attention may be drawn to the following :—

- Chapter VII. Trade—Balance of Payments (Appendix).
- Chapter XIII. Repatriation—Previously shown under Chapter on Defence (p. 340).
- Chapter XV. Public Finance—Financial provisions of the Constitution in regard to the distribution of revenues received by the Commonwealth (p. 396).
- Chapter XXV. Labour, Wages, etc.—Basic Wage Inquiry, 1934 (p. 719).
- Chapter XXVI. Population—Incorporation of available details of Census of the 30th June, 1933.

Later information which has come to hand since the various Chapters were sent to press has been incorporated in the Appendix (pp. 871 to 905).

The material contained in each issue is always carefully examined, but it would be idle to hope that all error has been avoided. I shall be grateful to those who will be kind enough to point out defects or make suggestions.

My best thanks are due to the State Statisticians, who have collected and compiled the data on which the greater part of the information given in the Year Book is based. Thanks are also due to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied information.

All rates, etc., based on the mean population in the various chapters of this volume have been revised in accordance with the results of the Census of the 30th June 1933.

I wish to express my keen appreciation of the valuable work performed by Mr. J. Stonham, M.A., who has edited this Year Book since its inception and I also would place on record his departure from the Bureau on the 31st August, 1934, on the eve of his retirement from the Commonwealth Public Service. I have to thank the officers of the Bureau whose duty it has been to prepare or revise the chapters of the Year Book and especially Mr. H. J. Petrie and Mr. J. P. Dwyer for their work in editing the latter part of the present volume and seeing it through the press.

E. T. MCPHEE,  
Commonwealth Statistician.
