

CHAPTER XX.

AGRICULTURAL PRODUCTION.

NOTE.—Except where otherwise stated, the "agricultural" years hereafter mentioned are taken as ending on 30th June.

§ 1. Introductory.

Preceding issues of the Official Year Book contain a brief reference to the attempts at cultivation by the first settlers in New South Wales, and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813, and west of the Blue Mountains thereafter. (See No. 22, p. 670.)

§ 2. Progress of Agriculture.

1. **Early Records.**—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797," Governor Hunter gives the acreage under crop as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

At a muster taken in 1808 the following was the return of crops:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

By the year 1850 the area under crop had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850 the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area under crop declining from 491,000 acres in 1850 to 458,000 acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres. The largest increase took place in Victoria, which returned an area of 299,000 acres. For the same year South Australia had 264,000 acres in cultivation, Tasmania 229,000 acres, and New South Wales 223,000 acres.

2. **Progress of Cultivation.**—The following table shows the area under crop in each of the States and Territories of Australia at decennial intervals since 1860 and during each of the last five seasons:—

AREA UNDER CROP.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	Fed. Cap. Ter.	Australia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1860-1	246,143	387,283	3,353	359,284	24,705	152,860	1,173,628
1870-1	385,151	692,840	52,210	801,571	54,527	157,410	2,143,709
1880-1	606,277	1,548,809	113,978	2,087,237	63,902	140,788	4,560,991
1890-1	852,704	2,031,955	224,993	2,093,515	69,678	157,376	5,430,221
1900-1	2,446,767	3,114,132	457,397	2,369,680	201,338	224,352	8,813,666
1910-11	3,386,017	3,952,070	667,113	2,746,334	855,024	286,920	360	..	11,893,838
1920-21	4,465,143	4,489,503	779,497	3,231,083	1,804,987	297,383	296	1,966	15,069,858
1930-31	6,811,247	6,715,660	1,144,216	5,426,075	4,792,017	267,632	1,550	5,419	25,163,816
1931-32	5,108,554	5,407,109	1,216,402	5,219,870	3,961,459	247,353	1,030	5,123	21,166,900
1932-33	6,332,716	5,115,745	1,245,638	5,166,656	4,261,047	279,117	1,045	6,525	22,408,489
1933-34	6,283,951	5,266,913	1,313,438	5,078,558	4,215,360	288,390	1,250	6,467	22,454,327
1934-35	5,687,088	4,677,683	1,296,619	4,629,303	3,836,618	292,000	1,132	5,456	20,428,700
1935-36	5,735,681	4,438,761	1,334,690	4,463,163	3,754,158	242,189	1,070	4,430	19,974,042

The progress of agriculture was practically uninterrupted from 1860 to 1915-16, when, as the result of a special effort to raise wheat for the Allied Cause, 18,528,234 acres were cultivated in Australia. Four years later the area under crop was down to 13,296,407 acres owing to the accumulation of wheat stocks consequent upon the

difficulty of securing freight space during the war years. After the termination of hostilities the area again began to expand and rose steadily to a new maximum of 25,163,816 acres in 1930-31. Thereafter the slump in wheat prices seriously depressed the agricultural industry and the area under crop receded to less than 20 million acres in 1935-36. Wheat is the most extensively grown crop in Australia and material changes in the total area under crop are largely a reflection of variations in the acreage sown to this cereal.

3. **Artificially-sown Grasses.**—In all the States there are considerable areas under artificially-grown grasses mainly sown on uncultivated land after burning off the scrub, and not included in "area under crops." These areas are, however, liable to revert to their natural state, and the information respecting them is too uncertain for formal record.

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Federal Minister for Commerce, the Federal Minister in charge of Development and the corresponding State Ministers, with power to co-opt the services of other Federal and State Ministers as required. The principal functions of the Council are (i) the promotion of the welfare and development of agricultural industries generally; (ii) the improvement of the quality of agricultural products and the maintenance of high grade standards; (iii) to ensure, as far as possible, balance between production and available markets; and (iv) organized marketing, etc.

In addition a permanent technical committee known as the Standing Committee on Agriculture was formed to act in an advisory capacity to the Council and to undertake the following duties:—(i) to secure co-operation and co-ordination in agricultural research throughout Australia; (ii) to advise the Commonwealth and State Governments, either directly or through the Council, on matters pertaining to the initiation and development of research on agricultural problems; and (iii) to secure co-operation between the Commonwealth and States and between the States themselves, with respect to quarantine measures relating to pests and diseases of plants and animals, and to advise the Commonwealth and State Governments with respect thereto. The personnel of this Committee consists of the permanent heads of the State Departments of Agriculture, members of the Executive Committee of the Council for Scientific and Industrial Research, the Secretary of the Department of Commerce, and the Director-General of Health.

§ 3. Distribution, Production and Value of Crops.

1. **Distribution of Crops.**—The following table gives the areas in the several States under each of the principal crops for the season 1935-36:—

DISTRIBUTION OF CROPS, 1935-36.

Crop.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Cap. Ter.	Aus-tralia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

(a) Malting only.

(b) Not including Sweet Potatoes.

(c) Per acre of productive crops.

6. Gross Value of Agricultural Production, Australia.—The following table shows the gross value of recorded agricultural production at the principal markets in each State for the years 1930-31 to 1935-36:—

GROSS VALUE OF AGRICULTURAL PRODUCTION.—AUSTRALIA.

Crops.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.
	£1,000	£1,000	£1,000	£1,000	£1,000	£1,000
Barley (a)	685	829	911	884	984	1,030
Maize	1,617	1,193	1,234	1,277	1,298	1,610
Oats	1,437	1,448	1,559	1,853	1,940	2,136
Rice	295	297	352	392	383	400
Wheat	25,047	33,728	33,316	27,897	24,732	29,708
Green Forage	2,385	2,642	3,016	2,540	2,435	2,703
Hay	14,397	8,145	9,520	10,265	10,587	10,061
Beans and Peas	199	220	302	234	104	165
Onions	139	253	218	239	311	297
Potatoes (b)	1,690	2,073	1,701	1,905	2,491	2,501
Sugar Beet	82	86	73	91	76	77
Grapes	3,496	3,495	3,918	3,674	3,562	3,754
Hops	157	144	128	142	151	172
Sugar Cane	7,340	7,649	7,098	7,601	7,310	7,493
Tobacco	187	1,115	961	340	257	484
Cotton, Unginned	355	308	125	283	297	376
Market Gardens (c)	2,259	2,152	1,962	2,020	2,136	2,240
Orchards	7,086	7,030	7,414	7,082	7,343	7,702
Other Crops	1,647	1,682	1,640	2,013	1,994	2,335
Total, Gross Value	70,500	74,489	75,562	70,732	68,587	75,388

(a) Malting only.

(b) Not including Sweet Potatoes.

(c) Including Pumpkins and Melons.

7. Value of Production—Gross and Net.—In earlier issues of the Official Year Book up to No. 27 the gross, local and net values of agricultural production were shown for each of the years 1926-27 to 1932-33, computed in accordance with resolutions of the several Conferences of Australian Statisticians. It was apparent, however, that the

methods used in the various States were not in complete harmony and at the Conference held in March, 1935, attention was directed to the elimination of any existing differences in computation. The success achieved at that Conference makes it possible to present the value of agricultural production for 1933-34 and subsequent years on a basis of uniformity not hitherto attained. Sufficient time has not elapsed to enable the State Statisticians to carry this revision back to 1925-26 as is intended and consequently it is possible to publish results for the last three years only. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXVIII, § 9.

In computing the net value of production no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm machinery; consequently the figure stated is inflated to this extent.

GROSS, FARM AND NET VALUE OF AGRICULTURAL PRODUCTION.—AUSTRALIA, 1935-36.

(AS ESTIMATED BY STATE STATISTICIANS IN ACCORDANCE WITH CONFERENCE RESOLUTIONS.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Farm Costs.		Net Value of Production. (a)	Depreciation.
				Seed used, and Fodder for Farm Stock.	Value of other Materials used in process of production.

(a) No deduction has been made for depreciation and maintenance.

§ 4. Wheat.

1. **Royal Commission on the Wheat Industry.**—A Royal Commission was appointed in January, 1934, to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat growing industry, the third, that of baking, the fourth, the flour milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

Reference to the financial assistance to the wheat industry will be found in § 18. Bounties hereafter.

2. **Progress of Wheat-growing.**—(i) *Area and Production.* (a) *Seasons 1931-32 to 1936-37.* Wheat is the principal crop raised in Australia, and its progress since 1860 has been almost continuous. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its

progress but its subsequent recovery was assisted by the invention of mechanical appliances, the recognition of superphosphate as an aid to production and the introduction of new and more suitable varieties for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion. The continued progress was interrupted by the Great War and the recent economic depression. As previously mentioned, any change in the area sown to this cereal dominates the changes in the total area under crop. The area and yield of wheat for grain are given below for each State for the five years ended 1935-36 and are shown from the year 1860 onwards in the graphs on pages 687, 688.

The figures in the table include an estimate for the 1936-37 crop, and the averages for the past decennium have also been inserted:—

WHEAT.—AREA AND PRODUCTION.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Fed. Cap. Ter.	Australia.

(a) Subject to revision.

The acreage under wheat for grain increased steadily until 1915-16, when, largely as the result of a special war effort, 12,484,512 acres were sown. After that year, however, there was a serious decline, brought about by war conditions and unfavourable seasons, and the area in 1919-20 fell to 6,419,160 acres, or only half that of 1915-16.

From 1920-21 onwards there was a rapid extension of the area under wheat until in response to the urge of Commonwealth and State Governments the maximum area of 18 million acres was sown in 1930-31. The acreage declined to 14½ million acres in the following year, and after expanding by more than one million acres in 1932-33 declined heavily in the next three years to slightly under 12 million acres.

The reduction in acreage was of course brought about by the unprofitable prices for the grain during the depression years.

Seasonal conditions under which the wheat crop of 1935-36 were grown were generally favourable in all States excepting Western Australia. In Victoria the average yield of 16.16 bushels per acre considerably exceeded the average for the decennium ending that year (12.15 bushels). In South Australia the average of 10.58 bushels exceeded the ten year average by 1.19 bushels whilst in New South Wales the yields for both periods were practically identical. Seasonal conditions in Western Australia were not good; the average yield was only 9.18 bushels per acre or 2.38 bushels below the decennial average. The average yield per acre for Australia in 1935-36 amounted to 12.06 bushels, compared with 10.63 bushels for the previous year and 11.55 bushels, the average for the decennium ending 1935-36. The total production

of grain for 1935-36 amounted to 144.2 million bushels compared with 133.4 million bushels, the production of the previous year, and with 213.9 million bushels, the record harvest of 1932-33.

The annual production of wheat over the sixteen seasons ending with 1935-36 has exceeded 100 million bushels. It is the opinion of agricultural experts that, notwithstanding the vagaries of the weather, the improved methods of agriculture—seed selection, bare fallowing, application of fertilizers, etc.—will assure the wheat crop of Australia against total failure in the future.

Final figures are not yet available in respect of the 1936-37 wheat harvest, but the area sown according to the latest estimate was 12,342,000 acres, an increase of approximately 385,000 acres or 3 per cent. on that of the previous year, whilst the production was 150.5 million bushels, or 12.19 bushels per acre, compared with 144 million bushels or 12.06 bushels per acre for the previous year. The increase in acreage during 1936-37 was the first recorded since 1932-33, and with the maintenance of improved prices it is expected that a further increase will be recorded in 1937-38.

(b) *Area, Production and Prices, 1861-70 to 1921-30.* The following table gives the average area, production and yield per acre for decennial periods since 1861, together with the average wholesale price since 1871. The price quoted represents the average at Melbourne (Williamstown), and may be accepted as fairly representative for Australia.

**WHEAT.—AVERAGE AREA, PRODUCTION AND WHOLESALE PRICE,
AUSTRALIA.**

Period.	Area.	Production.	Yield per Acre.		Average Wholesale Price.
			Bushels.	Bushels.	s. d. (a)
	Acres.	Bushels.

Average 10 seasons, 1927-36	12.68	12.15	15.52	9.39	11.56	21.55	18.16	11.55

(a) Subject to revision.

Variations in the average yields are chiefly due to the vagaries of the seasons. The best average yields for single seasons were obtained in 1924-25, 15.20 bushels; in 1920-21, 16.08 bushels; and in 1866, 16.35 bushels. In the last mentioned year less than 1,000,000 acres of relatively fertile land were sown. Annual averages for the past three decennia were 10.81, 12.41 and 11.55 bushels per acre.

(iii) *Relation to Population.* The main wheat producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production closely approaches local demands, but Tasmania imports from the mainland to satisfy its needs though partly in exchange it ships flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and from half to three-quarters of the crop is exported overseas. In the pre-war period 1909-1913 Australia ranked sixth on the list of exporting countries but the position has improved in recent years and its exports are now exceeded only by those of Canada and Argentine Republic. The quantity exported from Australia was approximately 20 per cent. of the total quantity shipped by exporting countries during the five years ended 1935.

3. *Wheat Farms.* Particulars of the number of farms growing wheat for grain on 20 acres and upwards during the past five years are shown in the following table. It should be remembered that a farm worked on the share system or as a partnership is included as one holding only.

NUMBER OF FARMS GROWING WHEAT FOR GRAIN ON 20 ACRES AND UPWARDS.—
AUSTRALIA.

NOTE.—The harvests reported above for 1936 relate to the year 1936 for the Northern, and 1935-37 for the Southern Hemisphere.

(a) Average 1933-34. (b) Year 1935. (c) Year 1931. (d) Year 1935-36.

A complete statement of the world's production of wheat is not possible owing to the failure of certain countries to supply the necessary information. The International Institute of Agriculture, Rome, has, however, compiled figures obtained from the countries reporting with the following results:—

WHEAT.—WORLD'S PRODUCTION.(a)

Year.		Area.	Production.	Yield per acre.
		Acres.	Bushels.	Bushels.
Average 1909-1913		270,266,000	3,779,479,000	13.98
,, 1926-1930		325,406,000	4,590,390,000	14.11
1931	347,546,150	4,630,441,000	13.32
1932	346,285,940	4,599,944,000	13.28
1933	333,288,480	4,840,615,000	14.52
1934	330,619,800	4,620,153,000	13.97
1935	338,601,130	4,695,845,000	13.87
Average 1931-1935		339,268,300	4,677,399,600	13.79

(a) From countries reporting including the Soviet Union.

The chief countries excluded from the above table are China and Manchuria. For the year 1935 the former produced 783 million bushels of wheat from an area of 51.4 million acres or an average yield of 15.23 bushels per acre, while Manchuria produced 34.3 million bushels from 2.4 million acres or an average of 14.29 bushels per acre. It is stated by the International Institute, however, that these figures for China are largely conjectural and can be accepted only as approximate estimates. In addition they do not include all of the Territories embraced in the Chinese Republic. By the addition of the production of these two countries the world's total production for the year 1935 would exceed 5,513 million bushels.

The total area harvested in 1935 increased by 8 million acres and was the first occasion since 1931 that an expansion has been recorded. The United States of America with 7.8 million acres and the Soviet Union with 4.4 million acres were chiefly responsible for this increase. With the exception of the Argentine Republic, where the area was reduced by 5.5 million acres, there was little change in the areas harvested in the other producing countries of the world. In comparison with the average for the period 1926-30, areas sown to wheat throughout the world have increased considerably, the Soviet Union and European countries being the chief contributors.

The world's acreage under wheat in 1931 was the highest ever recorded, but the production was somewhat lower than that for the record year of 1930 when the production amounted to 4,882 million bushels. A succession of bountiful years commencing in 1928 led to very heavy accumulations of stocks, particularly in North America. These stocks reached their maximum about the year 1932 but they have now been reduced to about normal dimensions owing to reductions in world production during the three years ending in 1936.

Australia's contribution to the world's wheat during the last five years was 4 per cent. as to area and 3.7 per cent. in regard to production.

5. Price of Wheat.—The collapse in the price of wheat which occurred between 1928 and 1931 was chiefly due to the accumulation of stocks in exporting countries. Additional factors were the reduced import demand in European countries consequent upon increased production and the raising of trade barriers. The weighted average price of wheat (shippers' limits Sydney, Melbourne and Adelaide) fell from 5s. 1½d. in 1928 to 2s. 4¾d. in 1931, a decline of 53 per cent. In 1932 the price increased to 3s. 0½d. but dropped to 2s. 9¾d. in 1933 and to 2s. 7¾d. in 1934. In September, 1935, prices increased to more than 3s. 4d. and fluctuated at about 3s. 6d. per bushel until August, 1936, when they again increased to more than 4s. 6d. In December, 1936, the average price was almost 5s. 3d. and from that month until August, 1937, the average has exceeded 5s.

AREA UNDER PRINCIPAL CROPS—AUSTRALIA, 1860 TO 1935-36.

EXPLANATION.—The base of each small square represents an interval of one year, while the vertical height represents a number of acres, varying with the nature of the crop in accordance with the scale given on the left of the graph. The height of each curve above its base line denotes, for the crop to which it relates, the total area under cultivation in Australia during the successive seasons.

PRODUCTION OF PRINCIPAL CROPS—AUSTRALIA, 1860 TO 1935-36.

EXPLANATION.—A separate base line is provided for each of the crops dealt with. In each instance the base of a small square represents an interval of one year, the vertical height of such square representing in the case of wheat, 10,000,000 bushels; oats, 2,000,000 bushels; barley, 1,000,000 bushels; maize, 2,000,000 bushels; and hay, 500,000 tons. The height of each curve above its base line denotes the aggregate yield in Australia of the particular crop during the successive seasons.

A succession of reduced yields in 1934, 1935 and 1936, which brought about the reduction of excess world stocks, was the chief factor in the hardening of prices. The table hereunder shows prices of Australian wheat during each of the last six years:—

PRICE OF WHEAT.—AUSTRALIA.

(WEIGHTED AVERAGE OF SHIPPERS' LIMITS FOR GROWERS' BAGGED LOTS, SYDNEY
MELBOURNE AND ADELAIDE.

Item.	1931.	1932.	1933.	1934.	1935.	1936.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Price per bushel	2 4½	3 0½	2 9½	2 7½	3 1½	4 1½

6. Exports of Wheat and Flour.—(i) *Quantities.* The table appended shows the exports and net exports of wheat and flour from 1932-33 to 1936-37. For the sake of convenience, flour has been expressed at its equivalent in wheat, 1 ton of flour being taken as equal to 48 bushels of grain. Wheat and flour have been imported on only two occasions since 1900 to tide over lean seasons; in 1902-3 the wheat harvest was as low as 12,378,000 bushels and wheat and flour representing 12,468,000 bushels of wheat were imported, whilst an equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season. During the last five years exports in terms of wheat ranged between 87,635,144 bushels in 1933-34 and 149,862,751 bushels in 1932-33, the net exports for the period averaging 110,700,000 bushels:—

WHEAT AND FLOUR.—EXPORTS, AUSTRALIA.

Year.	Exports.			Net Exports.
	Wheat.	Flour.	Total.	
	Bushels.	Eq. Bushels.(a)	Bushels.	Bushels.
1932-33 ..	119,555,938	30,310,032	149,865,970	149,862,751
1933-34 ..	61,598,528	26,039,616	87,638,144	87,635,144
1934-35 ..	75,959,690	33,502,608	109,462,298	109,457,913
1935-36 ..	76,993,133	29,619,888	106,613,021	106,610,518

Total	167,112	610,858	631,459	542,492	697,971	617,081

(a) Included with "Other Foreign Countries." (b) Including Kwantung Peninsula.
(c) Included with China.

7. Exports—Principal Countries.—The following table shows the net quantities of wheat exported from the chief exporting countries in recent years and during the pre-war period. In the years before the war the Soviet Union was the outstanding contributor to the world's supply of wheat followed by the United States of America but in recent years the net exports from both of these countries are relatively unimportant. Canada now occupies the foremost position with Argentine Republic and Australia coming next in order.

Although the local production of wheat is less than 4 per cent. of the world's total the exports from Australia represented more than 20 per cent. of the quantities shipped during 1931 to 1935, and as an exporting country Australia has made the greatest relative advance since 1913.

WHEAT.(a)—NET EXPORTS, PRINCIPAL COUNTRIES.

Percentage of Australian Production on World's Production	2.39		2.90	3.07	3.68	

(a) Including flour expressed in terms of wheat. (b) The average for 1909-13 is not strictly comparable with the later years, owing to changes of frontiers under the Peace Treaty.

8. Imports—Principal Countries.—The quantities of wheat and flour (expressed in terms of wheat) imported into the principal countries for the periods indicated are shown in the following table. The United Kingdom is easily the leading importing country. The quantities imported into certain European countries, particularly Germany, Netherlands, Belgium and Italy are both relatively and actually much smaller now than formerly owing to the encouragement given to the local wheat-growing industries in those countries. During recent years the imports of wheat into China and Japan have grown considerably, and a large share in this trade has been supplied by Australia :—

WHEAT.(a)—IMPORTS, PRINCIPAL COUNTRIES.(b)

Country Importing.	Average, 1909-13.		1934.	1935.	Average, 1931-35.	
	'000 Bushels.	Per cent.	'000 Bushels.	'000 Bushels.	'000 Bushels.	Per cent.

Egypt ..	7,915	1.10	835	1,612	3,164	0.43
Union of South Africa	6,519	0.90	934	80	1,160	0.16
China (c) ..	5,526	0.77	45,628	44,443	58,835	8.05
Japan ..	3,714	0.52	18,100	16,777	21,884	3.00
All Other ..	121,409	16.83	179,310	207,073	207,433	28.39
Total ..	721,095	100.00	634,212	628,752	730,560	100.00

(a) Including flour expressed in terms of wheat. (b) In some instances the average 1909-13 is not strictly comparable with the other years shown, owing to changes of frontiers. (c) Including Manchurian ports.

9. Consumption of Wheat.—(i) *Australia*. The estimated consumption of wheat for food and the quantity used for seed in Australia during the last five years are shown hereunder :—

AVERAGE HUMAN CONSUMPTION, 1931-32 TO 1935-36.

Flour milled	1,298,887 tons
Less net exports of flour	619,915 tons
Less net exports of flour in biscuits	970 "
	620,885 ..
	678,002 ..
Change in flour stocks	21,011 "
Net quantity consumed	656,991 ..
Equivalent in terms of wheat	31,535,600 bushels
Net quantity consumed per head of population—	
As flour	197 lb.
As wheat	4.800 bushels

AVERAGE USED FOR SEED, 1931-32 TO 1935-36.

Average area sown for grain, hay and green forage	14,935,817 acres
Average quantity of seed used	14,715,627 bushels
Average quantity of seed used per acre	59 lb.
Average quantity per head of population	2.212 bushels

In addition to the above, allowance must be made for wheat fed to poultry and other live stock. The quantity so used is estimated at 5,358,000 bushels or 0.82 bushels per head of population for the five years ended 1935-36. Almost the whole of this quantity is used in the form of grain as feed for poultry, principally fowls, which numbered about 15 million during the year 1933-34. The average quantity of flour consumed per annum for the five years under consideration was 197 lb. per head of population, which, expressed in terms of wheat, represents 4.800 bushels. The estimates of quantity of grain used for seed in Victoria, South Australia and Western Australia are based on data collected from growers. In the other States estimates supplied by the Agricultural Departments have been used. The average annual quantity used for the purposes indicated during the last five years was 2.212 bushels per head of population, or 59 lb. per acre sown. The consumption of wheat in Australia for all purposes during the period dealt with averaged, therefore, 51,610,000 bushels, or 7.75 bushels per head of population.

(ii) *Other Countries.* The following table gives the consumption of wheat in some of the principal countries of the world. The figures, which were obtained partly from the Food Research Institute of California, represent the *per capita* consumption of wheat exclusive of the quantity used for seed purposes:—

PER CAPITA CONSUMPTION OF WHEAT, EXCLUDING SEED, FOR PERIOD 1922-1929.

Country.	Used for human consumption.	Fed to Stock.	Total.
	Bushels.	Bushels.	Bushels.
Argentine Republic (a) ..	5.4	0.2	5.6
Australia (a) ..	4.8	0.8	5.6
Canada ..	4.5	3.3	7.8
New Zealand (b) ..	4.1	1.1	5.2
United Kingdom ..	4.8	1.0	5.8
United States ..	4.2	0.6	4.8

(a) Average for five years ended 1935-36.

(b) Average for five years ended 1935.

10. **Value of the Wheat Crop.**—The estimated value of the wheat crop in each State and in Australia during the season 1935-36 is shown below. The values shown are inclusive of financial assistance granted by the Commonwealth Government which amounted to £1,880,526 during the year. Particulars for this and previous years are shown in § 18 Bounties below.

WHEAT.—VALUE OF CROP(a), 1935-36.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
Aggregate value..	£ 9,408,410	£ 8,108,827	£ 597,059	£ 6,567,600	£ 5,033,176	£ 46,300	£ 6,921	£ 29,768,293
Value per acre ..	£2/8/10	£3/9/9	£2/9/10	£2/3/11	£1/19/7	£4/9/0	£4/5/6	£2/9/10

(a) Gross value of total crop, including seed used on farm, valued at metropolitan prices but exclusive of value of straw.

11. **Varieties of Wheat Sown.**—Particulars of the varieties of wheat sown and the areas thereunder are collected from time to time. The following table shows particulars of the nine principal varieties sown in the four main producing States and the percentage each bears to the total area sown for the year 1935-36.

PRINCIPAL VARIETIES OF WHEAT SOWN—STATES, 1935-36.

New South Wales.		Victoria.		South Australia.		Western Australia.	
Variety.	Per-centage.	Variety.	Per-centage.	Variety.	Per-centage.	Variety.	Per-centage.
Nabawa ..	24.7	Ghurka ..	34.9	Ranee ..	18.1	Bencubbin ..	30.7
Ford ..	18.9	Free Gallipoli ..	24.9	Nabawa ..	17.6	Glucub ..	11.0
Waratah ..	8.2	Ranee ..	22.1	Sword ..	11.2	Merredin ..	10.4
Dundee ..	6.9	Sepoy ..	4.3	Waratah ..	6.9	Gluyas Early ..	9.2
Bobin ..	5.4	Nabawa ..	2.3	Gluyas ..	6.0	Nabawa ..	8.4
Ranee ..	4.2	Rajah ..	1.6	Ford ..	5.5	Noongaar ..	4.8
Yandilla King ..	3.7	Major ..	1.2	Gallipoli ..	4.4	Totadgin ..	4.4
Baringa ..	3.5	Federation ..	1.0	Ghurka ..	3.8	Waratah ..	3.6
Free Gallipoli ..	2.7	Nizam ..	0.8	Late Gluyas ..	2.7	Ford ..	2.1
All Others ..	21.8	All Others ..	6.9	All Others ..	23.8	All Others ..	15.4
Total ..	100.0	Total ..	100.0	Total ..	100.0	Total ..	100.0

It is interesting to note the changes that have taken place in the leading varieties during recent years. In New South Wales and South Australia Nabawa occupied a very minor place on the list in 1929, but by 1933 it had risen to the leading position which it still retains in New South Wales. On the other hand this variety, while still prominently grown in Western Australia, declined from 47 per cent. of the total area in 1929 to 8 per cent. in 1935 in which year it receded to fifth place. Ranee was the leading variety sown in South Australia in 1935, supplanting Nabawa which now occupies second position. Free Gallipoli was the leading variety sown in Victoria between the years 1929 and 1934. In 1935, however, this variety was supplanted by Ghurka which occupied nearly 35 per cent. of the total area sown in that State. More than 1,000 different varieties of Australian wheat have been catalogued by the Council for Scientific and Industrial Research.

12. **Stocks of Wheat and Flour.**—Stocks of wheat and flour held by each State at 30th November, 1936, and the total held in Australia on the same date for the previous four years will be found in the following table. The figures have been compiled from information collected from millers, merchants, the Railway Departments and other sources, but are exclusive in certain instances of stocks held by farmers :—

STOCKS OF WHEAT AND FLOUR.—AUSTRALIA, 30TH NOVEMBER, 1936.

State.	Wheat.		Flour.		Total in terms of wheat.(a)
	Bushels.	Tons.	Bushels.	Tons.	Bushels.
New South Wales	1,070,439	34,351	2,719,287		
Victoria	1,060,427	38,031	2,885,915		
Queensland	305,961	5,655	577,401		
South Australia	502,093	10,166	990,061		
Western Australia	372,970	11,050	903,370		
Tasmania	106,503	1,810	193,383		
Total, 30th November, 1936 ..	3,418,393	101,063	8,269,417		
.. .. 1935 ..	12,371,270	89,637	16,673,867		
.. .. 1934 ..	34,708,963	112,385	40,103,463		
.. .. 1933 ..	14,375,614	86,638	18,534,212		
.. .. 1932 ..	6,647,325	85,658	10,758,925		

(a) One ton of flour treated as equivalent to 48 bushels of wheat.

13. **Voluntary Wheat Pools.**—(i) *General.* Voluntary wheat pools operated in the States of Victoria, South Australia and Western Australia during the season 1936-37. In New South Wales the pool was inactive during the year. The system adopted in these States is somewhat similar, and is a co-operative one controlled by trustees, or committees appointed by the growers, the whole of the proceeds, less administrative

expenses, being distributed amongst contributors of wheat to the pool. The trading names of these organizations in the various States are as follows :—

New South Wales.—The Wheat Growers' Pooling and Marketing Co. Ltd.

Victoria.—Victorian Wheat-growers' Corporation Ltd.

South Australia.—South Australian Co-operative Wheat Pools Ltd.

Western Australia.—The Trustees of the Wheat Pool of Western Australia.

The marketing of wheat in Queensland is conducted on a compulsory basis by the State Wheat Board, consisting of four elected representatives and one member nominated by the Minister for Agriculture who represents the Queensland Government. The present Board was elected on 1st August, 1935, and holds office for three years from that date.

(ii) *Delivery of Wheat to Pools, Costs, etc.* The quantities of wheat received and the estimated average costs per bushel of rail freight and of administrative and other expenses are given hereunder. As the season's operations are not yet complete, the costs shown are subject to revision.

WHEAT RECEIVED BY VOLUNTARY POOLS, 1936-37.

Particulars.	Unit.	Victoria.	Queensland. (a)	South Australia.	Western Australia.
Wheat received	Bushel	(c)	2,037,945	375,227	2,732,000
Percentage on Total Market- able Wheat	%	(c)	87	1½	16
Estimated average cost of rail freight to seaboard, per bushel	d.	4½	4½	3½	4½
Estimated average cost per bushel of Administration and other expenses	d.	(c)	(b) 3½	5	3½

(a) Compulsory Pool.

(b) Approximate.

(c) Not available.

(iii) *Finance.* The requisite financial accommodation in Victoria and South Australia was furnished by the Commonwealth Bank. In Western Australia funds were made available by financial houses in London. Initial advances made available to growers on the delivery of their wheat at country stations are shown, together with subsequent payments, in the following table :—

WHEAT POOLS ADVANCES (a) PER BUSHEL MADE TO SEPTEMBER, 1937.

Particulars.	Victoria.	South Australia.	Western Australia.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
1st Payment	3 3	3 6	3 6
2nd Payment	} (c) }	0 4½	1 0
3rd Payment		1 0	0 5
4th Payment		0 1½	(b) 0 5½
Estimated Final Payment			

(a) Less Rail Freight.

(b) Bulk wheat, 5gd. for bagged wheat.

(c) Not available.

In Queensland the Commonwealth Bank provides the financial assistance necessary to make advances on wheat delivered, the State Government guaranteeing the Wheat Board's accounts with the bank. All wheat not required for consumption on the farm is delivered to the Board, which is the sole marketing agency. The crop in 1936-37 amounted to 2,340,980 bushels, of which 2,037,945 bushels, or 87 per cent., was delivered into the pool. Net advances made to growers on No. 1 quality wheat totalled 5s. od. per bushel; other grades bear the dockages ranging from ¼d. to 5d. per bushel assessed at the time of delivery according to quality. The dockages being a deduction from the first advance, subsequent advances are uniform on all grades.

14. **Special Tabulation of Wheat Holdings.**—(i) *General.* With the co-operation of the State Statisticians an extensive analysis was made of the returns collected at the annual agricultural census of 1935-36 in respect of all holdings growing wheat for grain in the principal producing States. The results are published in the following tables which should be read in conjunction with the seasonal conditions under which the crop was grown (see page 682).

(ii) *Wheat Holdings, Number, Area and Production.* The areas of the holdings growing wheat for grain are shown in the following table together with the production of wheat thereon:—

WHEAT HOLDINGS—NUMBER, AREA AND PRODUCTION 1935-36.

State.	Holdings.				Wheat.		
	Growing Wheat for Grain.	Total Area.	Average Area.	Area Sown.	Average Area Sown.	Production.	Average Production per Holding.
		No. Acres.	Acres.	Acres.	Acres.	Bushels.	Bushels.
New South Wales ..	15,923	24,379,178	1,531	3,851,373	242	48,822,000	3,966
Victoria ..	13,780	12,482,336	906	2,323,753	169	37,552,062	2,725
South Australia ..	12,787	17,896,496	1,400	2,089,490	234	31,615,744	2,472
Western Australia ..	9,039	19,339,951	2,140	2,540,696	261	23,315,417	2,579
Total (Four States)	51,529	74,097,961	1,438	11,705,312	227	141,305,223	2,742

(iii) *Wheat Holdings and Sheep.* One of the objects of the analysis was to ascertain the extent to which certain other forms of farm production were combined with the growing of wheat. It will be seen from the table below that 75 per cent. of the wheat holdings carried sheep, the numbers depastured forming a considerable proportion of the sheep populations of the individual States.

WHEAT HOLDINGS AND SHEEP, 1935-36.

State.	Holdings.				Number of Sheep.	Total Number of Sheep in State. (a)	Percentage on Wheat Farms.
	Without Sheep.		With Sheep.

(a) Including Sheep outside Wheat Areas.

(iv) *Wheat Holdings and Dairy Cows.* In addition to sheep, the great majority of holdings also carried dairy cows. As indicated in the footnote to the table the particulars available for New South Wales refer only to those holdings which are registered as dairies and therefore an effective comparison cannot be made for the four States.

WHEAT HOLDINGS AND DAIRY COWS, 1935-36.

(a) Including Pigs outside Wheat Areas.

(vi) *Wheat Holdings. Area sown and Yield per Acre.* The holdings growing wheat for grain were classified for each of the principal producing States according to areas sown and yields per acre. It is possible to show only the totals for the four States combined in the Year Book. Details for the States are published in Production Bulletin No. 30 issued by this Bureau. The classification according to areas sown is as follows:—

**WHEAT HOLDINGS CLASSIFIED ACCORDING TO AREAS SOWN.
(PRINCIPAL PRODUCING STATES.)**

Area under Wheat for Grain. Acres.	Holdings.		Area under Grain.		Production.	
	No.	%	'000 Acres.	%	'000 Bushels.	%

Total	51,529	100.0	11,705	100.0	141,305	100.0

Wheat is grown in the principal producing States on an extensive scale; more than 76 per cent. of the production in 1935-36 was sown on areas of 200 acres or more. Although 13,531 holdings grew wheat on small areas of under 100 acres the yield therefrom was only 6 per cent. of the total. At the other end of the scale less than 10 per cent. was reaped from the very large areas of 700 acres or over. The average area sown was 227 acres.

In the next table the classification according to average yields is shown :—

**WHEAT HOLDINGS CLASSIFIED ACCORDING TO AVERAGE YIELDS.

48 " " 54 ..	4	25	..
Total	51,529	100.0	11,705	100.0	141,305	100.0

The most significant feature of the above tabulation is the very low returns obtained from considerable areas sown; more than 3 million acres, or one-quarter of the total sowings, yielded less than 6 bushels to the acre and practically one-half of this acreage returned yields of under 3 bushels. On the other hand the productivity of vast tracts of wheat country is indicated by the yields of 15 bushels or more over an area of 3.9 million acres, whilst nearly 1 million acres returned 25 bushels or over to the acre.

§ 5. Oats.

1. Progress of Cultivation.—(i) *Area and Production.* Oats are usually next in importance to wheat amongst the grain crops cultivated in Australia, but while wheat grown for grain accounted for 59.86 per cent., oats represented only 7.83 per cent. of the area under crop in 1935-36. The acreage and production of oats for the last five years are shown in the table hereunder, and more fully in the graphs on pages 687 and 688.

Average 10 seasons, 1927-36 ..	2,931,090	5,832,824	54,242	1,943,424	3,644,971	964,636	3,766	15,374,953

The oat crop showed considerable variation during the past decennium, ranging from 12,084,265 bushels in 1927-28 to 18,720,774 bushels in 1935-36, with an average for the period of 15,374,953 bushels. The demand for the grain for oatmeal varies from 1½ million bushels to 2 million bushels annually. The cereal is mainly used as feed grain, and its value, particularly in good seasons, does not warrant an extension of area.

The principal oat-growing State is Victoria, which produces on the average about one-third of the total quantity grown in Australia. South Australia, Western Australia and Tasmania also produce considerable quantities in excess of local requirements. Western Australia disposes of its surplus to the East, principally to Malaya (British), whilst the other States export chiefly to New South Wales and Queensland. For Australia as a whole the record yield of oats was obtained during 1924-25, when 19,393,737 bushels were harvested.

(ii) *Average Yield.* The average yield per acre of oats varies considerably in the different States, being highest in Tasmania and lowest in South Australia. Averages for each of the last five seasons, and for the decennium 1927 to 1936 are given in the table below :—

OATS.—AVERAGE YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1931-32	16.67	14.67	14.92	11.08	13.25	19.38	26.59	14.00
1932-33	21.45	17.25	15.73	10.27	12.61	27.02	22.41	15.73
1933-34	15.60	12.89	13.35	7.88	11.53	27.38	25.82	12.32
1934-35	16.25	10.36	18.00	6.57	10.38	28.80	23.14	10.83
1935-36	16.94	12.59	17.50	7.94	10.17	23.27	20.41	11.97
Average for 10 seasons 1927-36	16.84	12.88	16.83	8.22	11.36	27.99	15.91	12.58

The smallest average yield per acre ever recorded for Australia was that experienced in the abnormally dry season 1914-15, viz., 5.60 bushels, while the largest in the last ten years was that of the season 1924-25, amounting to 16.65 bushels per acre.

2. *World's Production.*—The world's production of oats for the year 1935, as computed by the International Institute of Agriculture, amounted to 3,719 million bushels. This quantity was harvested from 146 million acres, and represents an average yield of 25.43 bushels per acre. In comparison with this average return per acre, that of Australia for the same period (11.97 bushels) appears very small. Yields in excess of 40 bushels per acre are not uncommon, whilst in Belgium and the Irish Free State the average exceeded 50 bushels per acre during 1935. The following table shows the world's production and average yield for the last five years, together with the average for the quinquennium 1926-1930 :—

OATS.—WORLD'S PRODUCTION.

Year.	Area.			Production.	Average Yield per Acre.
	Million Acres.	Million Bushels.	Bushels.	Bushels.	
Average 1926-30	147	3,728	25.43		
1931	146	3,260	22.30		
1932	142	3,556	25.20		
1933	139	3,365	24.09		
1934	136	3,210	23.64		
1935	146	3,719	25.43		

3. Prices of Oats.—The average wholesale prices in the Metropolitan markets for the year 1935-36 are given in the following table :—

OATS.—AVERAGE WHOLESALE PRICES, 1935-36.

Particulars.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Average price per bushel ..	2 4	2 2	3 7½	1 10½	2 5	2 4½

4. Imports and Exports.—The production of oats in Australia has not yet reached sufficient proportions to admit of a regular export trade. During the year 1927-28 there was a net import of 460,581 bushels. The quantities and values of oats imported into and exported from Australia during the years 1931-32 to 1935-36 are given hereunder :—

OATS.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1931-32(a) ..	5,470	1,435	245,700	30,394	240,230	28,959
1932-33(a) ..	4,443	981	245,178	26,311	240,735	25,330
1933-34(a) ..	3,542	772	87,275	12,789	83,733	12,017
1934-35(a) ..	7,302	1,728	576,062	61,581	568,760	59,853
1935-36(a) ..	3,790	1,065	244,698	28,783	240,908	27,718

(a) Australian currency values.

The quantity of oats imported into Australia is not very great and is obtained chiefly from New Zealand, while the principal countries to which oats were exported during the years quoted were New Zealand, Malaya (British), Ceylon, India and Mauritius. During 1934-35 and 1935-36 the United Kingdom has taken 457,000 and 107,000 bushels respectively.

5. Oatmeal, etc.—The production of oatmeal in Australia during 1935-36 amounted to 312,102 cwt., practically the whole of which is consumed locally, the quantity of oats used for oatmeal being 1,717,674 bushels, or about 9 per cent. of the total production. Oversea trade in this and similar products is small; the imports of oatmeal, wheatmeal and rolled oats during 1935-36 amounted to 881 cwt., and exports to 21,136 cwt.

6. Value of Oat Crop.—The estimated value of the oat crop for the season 1935-36 was as follows :—

OATS.—VALUE OF CROP,(a) 1935-36.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	£	£	£	£	£	£	£	£

Value per acre	£1/18/1	£1/7/10	£3/1/3	£0/16/10	£1/5/1	£2/14/3	£2/5/11	£1/7/4

(a) Exclusive of the value of straw.

§ 6. Maize.

1. States Growing Maize.—Maize is grown for grain chiefly in New South Wales and Queensland, the area so cropped in these States during the season 1935-36 being 277,219 acres, or 93 per cent. of the total for Australia. Of the balance, Victoria contributed 20,377 acres, South Australia 3 acres and the Federal Capital Territory 17 acres. The climate of Tasmania is unsuitable for the growing of maize for grain. In the States mentioned the crop is grown to a greater or less extent for green forage, particularly in connexion with the dairying industry.

2. *Progress of Cultivation.*—(i) *Area and Production.* Notwithstanding its pre-eminence as the world's most extensively grown cereal, the cultivation of maize has decreased in Australia during the past decennium. Compared with the previous year, the area in 1935-36 increased by 2,600 acres but it is about 1,000 acres below the average for the decennium 1927-36 which amounted to 299,000 acres. The greatest area grown was in 1910-11 when it amounted to 414,914 acres.

The area and production of maize for grain in each State for the last five years and the average for the decennium 1927-36 are given in the following table. The fluctuations from year to year are shown more fully on the graphs on pages 687 and 688 :—

MAIZE.—AREA AND PRODUCTION.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Nor. Ter.	Fed. Cap. Ter.	Australia.

PRODUCTION.								
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1931-32..	2,669,580	611,902	3,780,597	217	87	7,062,383
1932-33..	2,935,140	477,145	1,653,853	135	42	..	6	5,066,321
1933-34..	3,133,890	644,033	3,715,764	150	183	..	60	7,494,080
1934-35..	3,238,590	719,360	4,142,079	450	216	..	132	8,100,827
1935-36..	3,324,780	638,643	3,504,045	108	129	7,467,705
Average 10 seasons 1927-36	3,116,694	644,070	4,023,662	116	322	..	66	7,784,930

The greatest production of maize in Australia was recorded in 1910-11, when it amounted to over 13,000,000 bushels. This figure was considerably in excess of the yields for recent years, except in 1924, when a bountiful harvest in Queensland increased the Australian total to 12,400,000 bushels. The production in 1935-36 amounted to 7,467,705 bushels, and the average for the last decennium was 7,784,930 bushels.

(ii) *Average Yield.* The following table gives particulars of the average yield per acre of the maize crops of the States for the seasons 1931-32 to 1935-36 and for the decennium 1927-1936 :—

MAIZE.—AVERAGE YIELD PER ACRE.

1935-36 ..	27.74	31.34	22.27	36.00	7.59	25.09
Average for 10 seasons 1927-36	26.65	36.10	24.56	17.83	12.60	..	9.00	26.06

The average for Victoria is generally amongst the highest in the world. The area, however, is comparatively small and is situated in specially favourable districts. The average for New South Wales is generally higher than for Queensland.

(iii) *Production per Acre—Various Countries.* The average for Australia for the past 10 years was 26.1 bushels per acre. During the period 1926-30 the United States of America averaged 25.0 bushels, Argentine Republic 32.6 bushels, Rumania 16.7 bushels, and the Soviet Union 14.2 bushels per acre.

3. *World's Production.*—The following table furnishes particulars of the world's acreage, production and average yield per acre of maize according to the data compiled by the International Institute of Agriculture:—

MAIZE.—WORLD'S PRODUCTION.

Year.	Area.	Production.	Average Yield per Acre.
			Bushels.
	Million Acres.	Million Bushels.	
Average 1926-30	197	4,331	21.99
1931	211	4,590	21.83
1932	217	4,925	22.78
1933	213	4,334	20.39
1934	203	3,697	18.16
1935	203	4,283	21.03

The United States is the most important maize-producing country in the world. Approximately 100,000,000 acres are planted there annually, and in normal seasons more than 2,000 million bushels are reaped, representing about 50 per cent. of the world's production. About 85 per cent. of the total is fed to live stock on farms, 10 per cent. is used for human food, and only a very small fraction—less than one per cent.—is exported.

4. *Price of Maize.*—The average wholesale price of maize in the Sydney market for each of the last five years is given in the following table:—

MAIZE.—AVERAGE PRICE, SYDNEY.

Particulars.	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.
	s. d.	s. d.	s. d.	s. d.	s. d.
Average price per bushel ..	3 9	4 11	3 6½	3 5	4 10½

5. *Overseas Imports and Exports.*—The imports of maize into Australia during the five years ended 1934-35 were negligible, averaging less than 2,000 bushels compared with nearly 600,000 bushels during the five years ended 1929-30. In 1935-36 there was a comparatively large import into New South Wales from South Africa. Details of imports and exports for the years 1931-32 to 1935-36 are as follows:—

MAIZE.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Imports.			
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.		
	Bushels.	£	Bushels.	£	Bushels.	£		
1931-32(a) ..	229	307	2,586	554	—	2,357	—	247
1932-33(a) ..	5,064	878	1,370	377	—	3,694	—	501
1933-34(a) ..	23	26	3,120	731	—	3,097	—	705
1934-35(a) ..	7	16	3,430	851	—	3,423	—	835
1935-36(a) ..	47,609	12,233	527	129	—	47,082	—	12,104

NOTE.—The minus sign (—) denotes net exports.

(a) Australian currency values.

6. **Maize Products.**—A small quantity of corn-flour is imported annually into Australia, the principal countries of supply being the United Kingdom, Union of South Africa and the United States of America. During the year 1929-30 the imports amounted to 702,062 lb., and represented a value of £7,956, but since then they have been unimportant. Exports from Australia are small, and in 1935-36 were only 3,820 lb., valued at £94.

7. **Value of Crop.**—The value of the crop for the season 1935-36 was as follows:—

MAIZE.—VALUE OF CROP, 1935-36.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	F.C.T.	Australia.
	£	£	£	£	£	£
Aggregate value ..	782,720	162,322	674,117	39	30	1,619,228
Value per acre ..	£6/10/7	£7/19/4	£4/5/8	£13/0/0	£1/15/4	£5/8/10

§ 7. Barley.

1. **Progress of Cultivation.**—(i) *Area and Production.* Despite wide annual fluctuations the area sown to barley has expanded considerably during the past ten years; the average annual area sown for the decennium 1927-36 amounted to 415,311 acres, compared with an average of 282,705 acres for the previous ten years. Victoria was originally the principal barley-growing State, but since 1913-14 South Australia has been the chief producing State, accounting for 70 per cent. of the Australian acreage in 1935-36. Victoria was next in importance with 21 per cent., leaving a small balance of about 9 per cent. distributed among the other States. The figures here given relate to the areas harvested for grain; small areas only are sown for hay, but more considerable quantities are cut for green forage. These, however, are not included in this section. The area and production of barley for grain in the several States for the last five years and the average for the decennium 1927-36 are shown in the following table, while the progress since 1860 is illustrated in the graphs on pages 687 and 688:—

BARLEY.—AREA AND PRODUCTION.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.

1934-35..	168,990	1,609,518	156,604	5,682,923	237,765	175,503	(d) 8,032,455
1935-36..	214,860	2,314,427	91,366	6,493,983	417,627	92,714	9,624,977
Average 10 seasons 1927-36	139,037	1,826,046	109,899	4,890,665	217,176	149,768	(e) 7,333,528

(a) Including Federal Capital Territory, 194 acres, 2,921 bushels.
 (b) " " " " " " 99 acres, 2,094 bushels.
 (c) " " " " " " 52 acres, 1,044 bushels.
 (d) " " " " " " 63 acres, 1,152 bushels.
 (e) " " " " " " 52 acres, 937 bushels.

South Australia and Victoria were the only States producing more than 1,000,000 bushels on the average during the past decade, the yields being respectively 4,890,665 and 1,826,045 bushels, the higher return per acre in the latter State tending to diminish the advantage held by South Australia in regard to acreage.

(ii) *Malting and Other Barley.* (a) Year 1935-36. Particulars for the season 1935-36 are as follows:—

BARLEY, MALTING AND OTHER.—AREA AND PRODUCTION, 1935-36.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Malting Barley ..	7,066	98,799	4,285	348,512	22,287	4,921	485,870
Other Barley ..	4,517	17,572	2,095	45,229	9,281	306	79,000
Total ..	11,583	116,371	6,380	393,741	31,568	5,227	564,870
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
Malting barley ..	138,180	1,944,237	64,891	5,869,648	310,737	85,019	8,412,712
Other barley ..	76,680	370,190	26,475	624,335	106,890	7,695	1,212,265
Total ..	214,860	2,314,427	91,366	6,493,983	417,627	92,714	9,624,977

Taking Australia as a whole, about 86 per cent. of the area under barley in 1935-36 was sown with malting or English barley while the remainder consisted of Cape and other varieties. The proportion, however, varied largely in the several States. The disposal of barley during the season 1935-36 was as follows: malt works, 2,713,902 bushels; distilleries, 82,479 bushels; exports, 3,472,084 bushels; leaving a balance of approximately 3,356,512 bushels for feed, pearling and seed.

(b) *Progress of Cultivation.* The following table sets out the acreage and production of malting and other barley in Australia during the last five seasons:—

BARLEY, MALTING AND OTHER.—AREA AND PRODUCTION, AUSTRALIA.

Season.	Acres.			Bushels.			Average Yield per Acre.		
	Malting.	Other.	Total.	Malting.	Other.	Total.	Malting.	Other.	Total.
1931-32 ..	299,074	43,322	342,396	5,547,141	743,531	6,290,672	18.55	17.16	18.37
1932-33 ..	399,731	43,102	442,833	7,837,111	832,966	8,670,077	19.60	19.33	19.58
1933-34 ..	410,478	54,481	464,959	7,013,769	945,249	7,959,018	17.09	17.35	17.12
1934-35 ..	395,243	60,678	455,921	6,090,756	1,041,699	8,032,455	17.69	17.17	17.62
1935-36 ..	485,870	79,000	564,870	8,412,712	1,212,265	9,624,977	17.31	15.35	17.04
Average 10 seasons									
1927-36 ..	361,179	54,122	415,301	6,351,908	981,620	7,333,528	17.59	18.14	17.66

During the past ten seasons the area and production of malting barley have represented about six times the corresponding figures for other barley. The average yield per acre differs very little in respect of the two classes, the results for the last ten-yearly period being slightly in favour of the Cape variety.

(iii) *Average Yield.* The average yield of barley per acre varies considerably in the different States, being as a rule highest in Tasmania and Victoria, and lowest in Western Australia. Details for each State during the last five seasons, and for the decennium 1927-36, are given in the following table:—

BARLEY.—YIELD PER ACRE.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1931-32	16.46	18.93	16.37	18.87	11.32	14.29	18.37
1932-33	19.98	21.33	21.09	19.31	9.82	24.62	19.58
1933-34	16.50	17.76	17.40	17.09	13.34	21.97	17.12
1934-35	17.83	18.37	16.31	17.94	8.94	30.37	17.62
1935-36	18.55	19.89	14.32	16.49	13.23	17.74	17.04
Average for 10 seasons 1927-36	16.78	20.37	17.95	17.13	11.30	23.28	17.66

2. *Comparison with Other Countries.*—In comparison with the barley production of other countries, that of Australia appears extremely small. Particulars for some of the leading countries during 1935 are as follows:—Soviet Union, 360 million bushels; China, 348 million bushels; United States, 274 million bushels; Germany, 149 million bushels; India, 112 million bushels; and Canada, 81 million bushels.

3. *World's Production.*—The following table shows the world's acreage under barley, the production and average yield per acre, according to the results compiled by the International Institute of Agriculture:—

BARLEY.—WORLD'S PRODUCTION.

Period.				Area.	Production.	Average Yield per Acre.
				Million Acres.	Million Bushels.	Bushels.
Average 1926-30	89.6	1,779	19.81
1931	88.9	1,616	18.20
1932	90.4	1,797	19.81
1933	87.3	1,774	20.34
1934	88.2	1,678	19.09
1935	95.1	1,861	19.63

4. *Prices.*—The average prices in the Melbourne market during each of the last five years are given in the following table:—

BARLEY.—AVERAGE MELBOURNE PRICES PER BUSHEL.

Particulars.	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
Malting barley	2 11½	2 9	2 8	2 11	2 10½
Cape barley	2 3	2 4	2 3½	2 5	2 5

5. Imports and Exports.—Australian exports of barley during the last five years averaged 3,088,400 bushels. The grain was consigned mainly to the United Kingdom, New Zealand and Belgium, South Australia being the principal exporting State. Particulars of the Australian overseas imports and exports for the last five years are contained in the following table :—

BARLEY.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1931-32(a)	44	16	3,315,110	450,477	3,315,066	450,461
1932-33(a)	1,396	470	3,051,138	352,152	3,049,742	351,682
1933-34(a)	134	59	2,701,908	305,359	2,701,774	305,300
1934-35(a)	12	5	2,901,708	394,466	2,901,696	394,461
1935-36(a)	2	3	3,472,084	369,391	3,472,082	369,388

(a) Australian currency values.

In some years there is an export of Australian pearl and Scotch barley, the total for 1935-36 reaching 79,820 lb., valued at £410, consigned mainly to the Pacific Islands.

6. Imports and Exports of Malt.—In pre-war times the imports of malt into Australia were fairly extensive, the supply being obtained principally from the United Kingdom. Since 1914, however, imports have practically ceased. The production of malt in Australia is sufficient to meet local requirements and to provide a small surplus for export, which is shipped chiefly to the East and New Zealand. Details of imports and exports for the five years ended 1935-36 are given in the next table :—

MALT.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1931-32(a)	5	2	3,805	1,392	3,800	1,390
1932-33(a)	9,950	3,358	9,950	3,358
1933-34(a)	178	197	24,472	8,259	24,294	8,062
1934-35(a)	152	74	55,990	17,209	55,838	17,135
1935-36(a)	300	195	62,518	19,457	62,218	19,262

(a) Australian currency values.

7. Value of Barley Crop.—The estimated value of the barley crop for the season 1935-36 and the value per acre are shown in the following table :—

BARLEY.—VALUE OF CROP(a), 1935-36.

Value.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
	£	£	£	£	£	£	£
Total ..	33,510	315,343	16,590	728,724	65,010	16,050	1,175,227
Per acre ..	£2/17/10	£2/14/2	£2/12/0	£1/17/0	£2/1/2	£3/1/5	£2/1/7

(a) Exclusive of the value of straw.

§ 8. Rice.

Experimental rice cultivation was carried on at the Yanco Experimental Farm for a number of years, but it was not until 1924-25 that an attempt was made to grow the crop on a commercial basis. In that year production amounted to 16,240 bushels from 153 acres, or an average of 106 bushels per acre. Favoured by tariff protection and high average yields the development of rice culture in the Murrumbidgee Irrigation Area made rapid progress, and the production now exceeds the annual requirements of Australia. During the past five years an annual average of 447,000 bushels of cleaned and uncleaned rice has been exported from Australia, mainly to the United Kingdom, New Zealand, Canada and the Pacific Islands.

Figures relating to area, production, etc., since 1931-32 will be found in the following table:—

RICE.—AREA, PRODUCTION, ETC., AUSTRALIA.

Year.	Area.	Production Paddy Rice.	Average Yield.	Imports.	Exports.	Retail Price.
	Acres.	Bushels.	Bushels.	Bushels.	Bushels.	Pence per lb.
1931-32	19,589	1,349,869	68.91	96,101	292,453	3.48
1932-33	22,034	1,901,476	86.30	104,846	260,245	3.24
1933-34	20,226	2,171,544	107.36	98,495	516,437	3.24
1934-35	21,746	1,888,445	88.84	89,981	629,738	3.22
1935-36	21,715	2,163,580	99.64	101,571	537,174	3.27

The production from several small experimental plots in States other than New South Wales is included in the above figures, but the quantity is negligible.

§ 9. Other Grain and Pulse Crops.

In addition to the grain crops already specified, the principal other grain and pulse crops grown in Australia are beans, peas and rye. The total area under the first two mentioned crops for the season 1935-36 was 51,519 acres, giving a yield of 615,651 bushels, or an average of 11.95 bushels per acre, which was less than the average yield for the decennium ended 1935-36, viz., 14.83 bushels per acre. Beans and peas are grown chiefly in Tasmania, South Australia and Victoria. Peas are exported in considerable quantities to the United Kingdom, the chief exporting State being Tasmania. The total area under rye in Australia during the season 1935-36 was 8,475 acres, yielding 117,980 bushels, or an average of 13.92 bushels per acre, as compared with the average of 15.98 bushels for the last ten seasons. Nearly 84 per cent. of the rye grown during the season was produced in New South Wales, 8 per cent. in Victoria, and 2 per cent. in South Australia.

§ 10. Potatoes.

1. *Progress of Cultivation.*—(i) *Area and Production.* Victoria possesses peculiar advantages for the growth of potatoes, as the rainfall is generally satisfactory, and the climate is unfavourable to the spread of Irish blight; consequently the crop is grown in nearly every district except in the wheat belt. Tasmania comes next in order of importance, followed by New South Wales.

The area and production of potatoes in each State during the last five years and the average for the decennium 1927-36 are given hereunder:—

POTATOES.—AREA AND PRODUCTION.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.

Average 10 seasons 1927-36..	41,171	162,305	16,777	18,798	21,634	94,530	33	355,248

(a) Includes Northern Territory, 15 acres.
 (b) " " " " 4 acres.

The acreages grown during the last ten years were fairly uniform, except in 1927-28, when the area was increased to 163,231, chiefly owing to larger plantings in Victoria and Tasmania. The production in 1935-36 amounted to 323,240 tons, as compared with an average of 355,248 tons for the last ten years and 344,162 tons for the previous decennial period. The record production of 507,153 tons was obtained in 1906-7.

(ii) *Average Production.* Particulars for each State for the five seasons ended 1935-36 and for the last decennium are given hereunder:—

POTATOES.—PRODUCTION YIELD PER ACRE.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1931-32 ..	1.92	2.95	1.66	4.01	4.14	2.62	1.37	2.74
1932-33 ..	2.04	2.61	1.44	3.84	4.49	2.77	2.27	2.61
1933-34 ..	2.17	2.34	1.69	3.35	4.75	2.23	1.29	2.35
1934-35 ..	2.34	2.02	1.82	4.15	4.73	1.92	1.13	2.19
1935-36 ..	2.70	2.35	1.82	4.18	5.31	2.47	2.05	2.59
Average for 10 seasons 1927-36..	2.20	2.55	1.64	3.80	4.25	2.58	1.68	2.55

Compared with the average yield per acre obtained in other countries, that returned for Australia is very low; the production in New Zealand, for example, in 1935-36 averaged 5.27 tons per acre from an area of 23,000 acres, as compared with 2.59 tons per acre from 125,000 acres in Australia.

(iii) *Relation to Population.* The average annual production of potatoes per head of the population of Australia for the last five seasons was approximately 116 lb. In Tasmania, where this crop is of far greater importance in relation to population than is the case in any other State, the production per head in 1906-7 was nearly a ton, while for the last five seasons it has averaged $7\frac{1}{2}$ cwt. Details for each State for the five seasons ended 1935-36 are as follows:—

POTATOES.—PRODUCTION PER 1,000 OF POPULATION.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1931-32 ..	13	115	18	41	48	427	1	61

1933-34 ..	17	78	21	34	48	355	1	49
1934-35 ..	17	59	23	33	43	306	2	43
1935-36 ..	24	56	25	33	59	373	13	48

(iv) *Consumption.* The consumption in Australia during the last five years averaged about 44 tons per 1,000 of population, or about 99 lb. per head. From the figures shown above, therefore, it is apparent that New South Wales, Queensland and South Australia do not produce the quantities necessary for their requirements and must import from Tasmania and Victoria which have a surplus.

2. *Imports and Exports.*—Under normal conditions small quantities of potatoes are exported, principally to the Pacific Islands and Papua. In case of a shortage in Australia, supplies are usually obtained from New Zealand. Figures showing the trade for the last five years are given in the following table:—

POTATOES.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£	Tons.	£

(a) Australian currency values.

3. *Value of Potato Crop.*—The estimated value of the potato crop of each State for the season 1935-36 is given in the following table:—

POTATOES.—VALUE OF CROP, 1935-36.

Value.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	£	£	£	£	£	£	£	£
Total ..	499,650	826,492	229,076	162,870	187,140	654,300	1,009	2,560,537
Per acre ..	£21/19/5	£18/13/3	£16/16/5	£35/6/3	£37/16/9	£18/16/11	£16/5/6	£20/9/9

§ 11. Other Root and Tuber Crops.

1. *General.*—Root crops, other than potatoes, are not extensively grown in Australia, the total area under such crops for the season 1935-36 being only 24,034 acres. The most important were onions, mangolds, sugar beet, turnips and sweet potatoes. Of these, onions, sugar beet and mangolds are most largely grown in Victoria, turnips in Tasmania, and sweet potatoes in Queensland. The total area under onions in Australia during the season 1935-36 was 7,100 acres, giving a yield of 35,139 tons, and averaging

4.95 tons per acre. The area in 1935-36 under root crops other than potatoes and onions was 16,934 acres, from which a production of 120,048 tons was obtained, or an average of 7.09 tons per acre. The areas and yields here given are exclusive of the production of "market gardens," reference to which is made in § 17 par. 2.

2. Imports and Exports.—The only root crop, other than potatoes, in which any considerable oversea trade is carried on by Australia is that of onions. During the last five years 4,923 tons, valued at £29,131, were imported, principally from Japan, the United States of America and New Zealand, while during the same period the exports, which amounted to 13,279 tons, valued at £87,497, were shipped mainly to New Zealand, the Pacific Islands, the Philippine Islands and Canada.

§ 12. Hay.

1. General.—(i) *Area and Production.* As already stated, the chief crop in Australia is wheat grown for grain. Next in importance is hay, which for the season 1935-36 averaged 15 per cent. of the total area cropped. In most European countries the hay consists almost entirely of meadow and other grasses, but in Australia a very large proportion consists of wheat, oats and lucerne. The area under hay of all kinds in the several States during the last five years is given hereunder. The progress from 1860 onwards may be traced from the graph on page 687.

Average 10 seasons								
1927-36 ..	908,408	1,284,596	98,959	554,787	460,065	123,441	2,352	3,432,609

Owing to various causes, the principal being the variation in the relative prices of grain and hay and the favourableness or otherwise of the season for a grain crop, the area under hay is liable to fluctuate considerably. The area under hay in Australia during the season 1915-16, 3,597,771 acres, was the largest on record, whilst the average during the last decennium amounted to 2,868,106 acres.

(ii) *Average Production.* During the last ten years Tasmania and Queensland show the highest average production per acre, although the area sown in these States is the smallest. For the same period the lowest yield for Australia as a whole was that

of 21 cwt. per acre in 1929-30, while the highest was that of 26 cwt. in 1932-33. The average for the decennium was nearly 24 cwt. Particulars for the several States for the seasons 1931-32 to 1935-36 and the average for the last ten years are given hereunder :—

HAY.—PRODUCTION PER ACRE.

Total	381,447	417,435	479,768	413,138	494,495

Wheat is most largely used for hay in New South Wales and South Australia, oats in Victoria, Western Australia and Tasmania, and lucerne in Queensland. For all States the proportions of the principal kinds of hay produced average about 60.0 per cent. for oats, 23.7 per cent. for wheat, 10.0 per cent. for lucerne, and 6.3 per cent. for other hay.

2. **Comparison with Other Countries.**—As already noted, the hay crops of most European countries consist of grasses of various kinds, amongst which clover, lucerne, sainfoin and rye grass occupy prominent places. The statistics of hay production in these countries are not prepared on a uniform basis, consequently any attempt to furnish extensive comparisons would be misleading. It may be noted, however, that in Great Britain the production of hay from clover, sainfoin, etc., for the year 1935 amounted to 2,482,000 tons from 1,782,000 acres, while from permanent grasses a yield of 5,104,000 tons of hay was obtained from 4,821,000 acres, giving a total of 7,586,000 tons from 6,603,000 acres, or an average of about 23 cwt. per acre.

3. **Imports and Exports.**—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not in such circumstances figure largely amongst the imports and exports of Australia. During 1935-36, 1,663 tons were imported, while the exports amounted to 2,482 tons, valued at £13,430, the principal purchases being made by Malaya (British), India, Ceylon and Hong Kong.

4. **Value of Hay Crop.**—The following table shows the value, and the value per acre, of the hay crop of the several States for the season 1935-36 :—

HAY.—VALUE OF CROP, 1935-36.

§ 13. Green Forage.

1 **Nature and Extent.**—A considerable area is devoted to the production of green forage, mainly in connexion with the dairying industry. The total area so cropped is considerably swollen in adverse seasons by the inclusion of wheat or other cereal crops deemed unsuitable for the production of either grain or hay. Under normal conditions, the principal crops cut for green forage are maize, wheat, sorghum, oats, barley, rye, rape and lucerne, while small quantities of sugar-cane also are so used. Particulars concerning the area under green forage in the several States during each of the last five years are given in the following table :—

GREEN FORAGE.—AREA.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1931-32	367,346	119,006	309,957	58,604	101,370	23,024	724	980,031
1932-33	405,206	107,732	392,762	46,232	115,785	18,522	953	1,087,192
1933-34	444,946	121,737	311,462	70,147	146,402	25,689	699	1,121,082
1934-35	477,060	115,037	338,312	91,783	186,233	24,941	548	1,233,914
1935-36	610,401	111,056	379,651	98,121	197,931	25,500	548	1,423,208

2. Value of Green Forage Crops.—The value of these crops is variously estimated in the several States, and the Australian total for the season 1935-36 may be taken approximately as £2,703,268, or about £1 18s. od. per acre.

§ 14. Sugar-cane and Sugar-beet.

1. Sugar-cane.—(i) *Area.* Sugar-cane for sugar-making purposes is grown only in Queensland and New South Wales, and much more extensively in the former than in the latter State. Thus, of a total area of 334,910 acres under sugar-cane in Australia for the season 1935-36, there were 314,700 acres, or about 94 per cent., in Queensland. Sugar-cane growing appears to have been started in Australia in or about 1862, as the earliest statistical record of sugar-cane as a crop is that which credits Queensland with an area of 20 acres for the season 1862-63. In the following season the New South Wales returns show an area of 2 acres under this crop. The area under cane in New South Wales reached its maximum in 1895-96 with a total of 32,927 acres. Thenceforward, with slight variations, it gradually fell to 10,490 acres in 1918-19, but from that year it expanded until 1924-25, when about 20,000 acres were planted. Since 1924-25, the area has fluctuated between 15,000 acres and 20,000 acres, the average for the decennium ended 1935-36 amounting to 16,939 acres. In Queensland, although fluctuations in area are manifest, the general trend has been upwards, the acreage under cane for the season 1935-36 being the highest on record, viz., 314,700 acres. The area under sugar-cane in Australia from 1931-32 and the average for the past decennium are given in the following table, and particulars for earlier years may be seen from the graph on page 687:—

SUGAR-CANE.—AREA.

Season.	New South Wales.		Queensland.		Australia.		Total.
	Pro- ductive.	Unpro- ductive.	Pro- ductive.	Unpro- ductive.	Pro- ductive.	Unpro- ductive.	
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	
1931-32	8,272	7,647	233,304	76,514	241,576	84,161	325,737
1932-33	7,796	8,349	205,046	86,090	212,842	94,439	307,281
1933-34	10,015	6,914	228,154	83,756	238,169	90,670	328,839
1934-35	7,572	10,959	218,426	85,500	225,998	96,459	322,457
1935-36	10,416	9,794	228,515	86,185	238,931	95,979	334,910
Average 10 seasons 1927-36	8,512	8,427	215,911	78,495	224,423	86,922	311,345

(ii) *Productive and Unproductive Cane.* The areas given in the preceding table do not include the small acreage cut for green forage which in 1935-36 amounted to 4,619 acres in Queensland. The whole area was not necessarily cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane, as well as a small quantity required for plants. The season in which the highest acreage is recorded may not show the greatest area of productive cane cut for crushing, as was evidenced in 1935-36, when, although the total acreage was greater, the area cut was less than in the year 1931-32.

(iii) *Production of Cane and Sugar.* For Queensland, statistics of the production of sugar-cane are not available prior to the season 1897-98. In that season the total for Australia was 1,073,883 tons, as against the maximum production of 4,898,040 tons in 1933-34. The average production of cane during the decennium ended 1935-36 was 4,121,874 tons. With the exception of 1932-33, the yield of sugar during each of

the five years ended 1935-36 has exceeded 600,000 tons. The average for the decennium amounted to 561,737 tons. Particulars relative to the total production of cane and sugar for the last five years are as follows. The averages for the past ten seasons are also included for comparison :—

SUGAR-CANE.—PRODUCTION OF CANE AND SUGAR.

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.	Cane.	Sugar.	Cane.	Sugar.

1933-34	230,918	27,586	4,667,122	638,559	4,898,040	666,145
1934-35	227,424	29,428	4,271,380	611,161	4,498,804	640,589
1935-36	289,472	36,461	4,220,435	610,080	4,500,907	646,541
Average 10 seasons 1927-36	202,671	23,982	3,919,203	537,755	4,121,874	561,737

The production of raw sugar in Australia in 1935-36 amounted to 646,541 tons manufactured from 4,500,907 tons of cane, and was only slightly below the record production of 1933-34 which amounted to 666,145 tons. Official data are not available regarding the total number engaged in the sugar industry in Queensland, other than the number of growers and employees in sugar mills which in 1935-36 totalled 7,538 and 4,432 respectively. In the report of the Sugar Inquiry Committee, 1931, however, it was stated that the number of persons employed in all branches of the industry was 28,737. In addition, there is the employment afforded in New South Wales, particulars of which are not available, but the number is probably in the vicinity of 2,000.

Final figures for the 1936-37 season are not yet complete, but it is estimated that the production of raw sugar amounted to 773,674 tons from 5,420,511 tons of cane crushed. These quantities represent the greatest production ever recorded in Australia and are far in excess of the previous record figures of 1933-34. Early indications point to a slight reduction to 740,000 tons in 1937-38.

(iv) *Average Production of Cane and Sugar.* Owing to climatic variation, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be accurately made except on an annual basis. In New South Wales the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. Allowing for the disparity in maturity periods, the average annual yields of cane per productive acre during the decennium ending 1935-36 were 12.99 tons for New South Wales, and 16.75 tons for Queensland. Similarly, the yields of sugar per acre crushed for the same period were estimated at 1.54 tons and 2.29 tons respectively. Leaving aside the consideration mentioned above, the yields of cane and sugar per acre crushed for Australia for the ten years ended 1935-36 were 18.37 tons and 2.50 tons respectively, as compared with 18.21 tons and 2.26 tons for the decennium ended 1925-26.

(v) *Quality of Cane.* The quantity of cane required to produce a ton of sugar varies with the variety planted, the district and the season. For the decennium ended 1935-36, it took 7.34 tons of cane to produce 1 ton of sugar or 13.62 per cent. of its total weight. As the result of the systematic study of cane culture in Queensland and improvements in field and mill methods the sugar content of the cane has been considerably increased in recent years, and in 1930-31 only 6.83 tons of cane were required to produce one ton of sugar. It is believed that this is the highest sugar content obtained anywhere in the world. During the ten years ended 1925-26 it required on the average 8.06 tons of cane to produce one ton of sugar in Australia, whereas the average figure for the last decennium was reduced to 7.34 tons.

The Bureau of Sugar Experiment Stations in Queensland is rendering useful service to the sugar industry by advocating and demonstrating better methods of cultivation, the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

(vi) *Relation to Population.* The yield of raw sugar in Australia during the last five years was more than sufficient to supply local requirements, the average production during the period amounting to 197 lb. per head of population. Details for the period 1931-32 to 1935-36 are as follows :—

RAW SUGAR.—PRODUCTION PER HEAD OF POPULATION.

State.	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.
New South Wales	lb. 20	lb. 16	lb. 24	lb. 25	lb. 31
Queensland	1,351	1,221	1,505	1,425	1,406
Australia	207	181	224	214	215

(vii) *Consumption.* The average annual consumption of raw sugar during the five years ended 1935-36 was estimated at 338,500 tons, equal to 114 lb. of raw sugar or 109 lb. of refined sugar per head of population. Sugar contained in jam, preserved fruit, milk, etc., exported during the period has been excluded in arriving at the figures quoted. The quantity of sugar used during the last five years in factories is shown in the following table, the figures including, where necessary, estimates of consumption based on the sugar contents of the finished product. Particulars of sugar used in establishments not classified as factories are not available, and consequently the quantities shown below are deficient to that extent.

SUGAR.—CONSUMPTION IN FACTORIES, AUSTRALIA.

Total	74,951	79,858	80,744	89,713	96,687

2. *Sugar-beet.*—(i) *Area and Production.* Victoria is the only State at present growing beets for sugar, and particulars in regard to acreage and production for the last four years and for the decennium 1917-26 are incorporated in the table below :—

SUGAR-BEET.—AREA AND PRODUCTION, VICTORIA.

Particulars.		Average 10 seasons 1917-26.	1932-33.	1933-34.	1934-35.	1935-36.
Area harvested ..	acres	1,516	3,155	3,234	3,062	3,165
Production ..	tons	17,450	36,740	50,625	40,788	37,634
Average per acre ..	"	11.51	11.65	15.65	13.32	11.89
Sugar produced ..	"	2,073	5,701	5,303	4,998	5,115

Seasonal conditions were not so favourable during 1935-36 and consequently reduced yields were recorded: the production from 3,165 acres amounted to 37,634 tons of beet which yielded 5,115 tons of sugar. The quantity of beet required to produce one ton of sugar was 7.35 tons as compared with 8.16 tons for the previous year. The average production of beets per acre was 11.89 tons, and the average for the ten years ended 1935-36 was 11.65 tons.

(ii) *Encouragement of Beet-growing.* The irrigation scheme on the Macallister River has provided an assured water supply for the district and has enabled the industry to expand. A fine grade of white sugar is manufactured at Maffra, and considerable quantities of beet pulp and molasses are distributed for stock feed.

3. *Sugar Bounties.*—Reference is made to the various Acts in connexion with sugar bounties and sugar excise tariffs in previous issues of the Year Book. (See No. 6, pp. 394 to 396).

4. *Sugar Purchase by Commonwealth Government.*—The steps taken by the Commonwealth Government in connexion with this matter were alluded to in previous issues of the Official Year Book. (See No. 18, p. 720.)

5. *Sugar Agreement in Australia—Embargo on Imports, etc.*—By agreement between the Commonwealth and Queensland Governments in 1925, the embargo on the importation of foreign sugar, which was first introduced in September, 1915, was extended for three years from 1st September, 1925. The price of raw sugar needed for home consumption was fixed at £27 per ton, £1 of which was to defray administrative and general expenses of the Sugar Board and to provide special concessions to certain consumers of sugar. The embargo was later extended for a further period of three years until 1st August, 1931, on practically the same terms as previously. In response to representations, the Commonwealth Government appointed a Committee of Inquiry on the 23rd August, 1930, to report on the industry. The Committee consisted of eight members, representing the various interests concerned. The reports of the Committee were made available in March, 1931, and the renewal of the sugar agreement with certain modifications was recommended. The terms of the new agreement followed largely on those previously in force, particularly as regards the embargo on imports and fixation of prices. The assistance to the fruit industry was increased from an average of £180,000 per annum to £315,000 by way of grant from the sugar industry. The agreement was signed on 1st June, 1931, and was to remain in force for a period of five years from 1st September, 1931. In 1932, however, conferences arranged between the Commonwealth Government and representatives of the industry agreed to a reduction of $\frac{1}{4}$ d. per lb. in the retail price of sugar from 1st January, 1933, until the end of the period of the agreement (31st August, 1936). It was also decided to reduce the amount of the assistance to the fruit industry to £200,000. A renewal of the agreement for a period of five years commencing 1st September, 1936, was negotiated between the Commonwealth and Queensland Governments in July, 1935. No alteration was made in the wholesale or retail price of sugar, but an increase of £16,000 per annum was granted to the fruit industry.

6. **International Sugar Agreement.**—Delegates of 21 Nations representing 90 per cent. of producers met in London and entered into an agreement on 6th May, 1937, providing for the regulation of the production and marketing of sugar in the world during a period of five years from 1st September, 1937. The object of the agreement is to assure an adequate supply of sugar at a price not exceeding the cost of production, including a reasonable profit, of efficient producers. For this purpose, each country was given a basic annual export quota—Australia was allotted 400,000 long tons—which will be increased in proportion to any expansion in sugar consumption. By this means, and by limitations on stocks and measures to encourage more production, it is expected that the International Sugar Council, which has been established to administer the agreement, will be able to hold in proper balance the supplies and requirements of sugar.

7. **Net Return for Sugar Crop.**—Calculations by the Sugar Board regarding the disposal of the crop, net value of exports and the average price realized during each of the last five years will be found in the following table :—

SUGAR.—NET RETURN, ETC., FOR CROP, AUSTRALIA.

Year.	Percentage Exported.	Net Value of Exports per Ton.	Average Price per Ton for Whole Crop.	Estimated Value of Crop.
	(a) Per cent.	(a) £ s. d.	(a) £ s. d.	£
1932-33	36.80	8 5 9	18 17 9	10,394,925
1933-34	47.89	8 0 6	16 6 3	10,640,318
1934-35	50.56	7 11 3	15 13 9	10,791,092
1935-36	47.97	7 18 9	16 5 11	11,010,892
1936-37	54.07	7 19 0	15 7 4	(b)

(a) As supplied by the Queensland Sugar Board. (b) Not yet available.

The estimated value of the raw sugar produced has been taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas less refining costs, freight, administrative charges, etc., and export charges, but not deducting concessions to the fruit industry and other rebates which in 1935-36 amounted to £265,387. The value thus obtained represents the net market value of all raw sugar sold, and since 1933 is divided between the growers and millers in the following approximate proportions, viz., 70 per cent. and 30 per cent. respectively. Prior to that year the distribution was about two-thirds to the grower and one-third to the miller.

8. **Imports and Exports of Sugar.**—Owing to the embargo and the increased production of sugar in Australia the imports have practically ceased. Particulars concerning the imports and exports of cane sugar for the last five years are as follows :—

SUGAR.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£	Tons.	£
1931-32(a)	6	287,920	2,514,724	287,920	2,514,718
1932-33(a)	13	265	187,061	1,490,036	187,048	1,489,771
1933-34(a)	3	48	307,980	2,295,203	307,977	2,295,155
1934-35(a)	1	38	306,497	2,195,893	306,496	2,195,855
1935-36(a)	22	415	299,902	2,175,504	299,880	2,175,089

(a) Australian currency values.

The export value quoted in the above table represents the value f.o.b. at which the sugar is sold overseas.

9. **Sugar By-products.**—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantity produced and the proportions used for distilling, fuel, manure and other purposes will be found in Chapter XXIV.—**Manufacturing.** A distillation plant erected at the Plane Creek Central Sugar Mill, Mackay, was opened during 1927 and produces power alcohol of excellent quality.

A material known as "megass board" can be made from the residuum of crushed fibre after the removal of the sugar content from the sugar cane, and the possibility of the manufacture of artificial silk from the same material has also been considered. Up to the present, however, there is no record of commercial production of artificial silk, but a fibre board suitable for insulation and lining is now being produced.

10. **Sugar Prices.**—The prices of sugar in Australia from 1915 to 1941 are shown in the following table. During recent years the prices were fixed in accordance with the agreements referred to on page 715.

SUGAR.—PRICES FOR CONSUMPTION IN AUSTRALIA.

Date of Determination.	Raw Sugar.		Refined Sugar.		
	Price to Grower and Miller per Ton.		Wholesale Price per Ton.	Retail Price per lb.	
	£	s. d.	£	s. d.	d.
19.7.15 to 15.1.16	18	0 0	25	10 0	3
16.1.16 to 30.6.17	18	0 0	29	5 0	3½
1.7.17 to 24.3.20	21	0 0	29	5 0	3½
25.3.20 to 30.6.20	21	0 0	49	0 0	6
1.7.20 to 31.10.22	30	6 8	49	0 0	6
1.11.22 to 30.6.23	30	6 8	42	0 0	5
1.7.23 to 21.10.23	27	0 0	42	0 0	5
22.10.23 to 31.8.25	26	0 0	37	11 4	4½
1.9.25 to 31.8.31	(a)26	10 0	37	6 8	4½
1.9.31 to 4.1.33	26	0 0	37	6 8	4½
5.1.33 to 31.8.36	24	0 0	33	4 0	4
1.9.36 to 31.8.41	24	0 0	33	4 0	4

(a) The price of raw sugar for the years 1925 to 1937 was estimated at from £24 to £26 10s. per ton, but as the result of the values received for the surpluses exported, the actual price obtained in 1925-26 was £19 10s. 7d.; in 1926-27, £24 10s. 10d.; in 1927-28, £22 0s. 4d.; in 1928-29, £20 17s. 11d.; in 1929-30, £20 8s. 2d.; in 1930-31, £19 12s. 11d.; in 1931-32, £18 2s. 11d.; in 1932-33, £18 17s. 9d.; in 1933-34, £16 6s. 3d.; in 1934-35, £15 13s. 9d.; in 1935-36, £16 5s. 11d. and in 1936-37, £15 7s. 4d.

§ 15. Vineyards.

1. **Progress of Cultivation.**—(i) *Area of Vineyards.* The date of introduction of the vine into Australia has been variously set down by different investigators, the years 1815 and 1828 being principally favoured. It would seem, however, that plants were brought out with the first fleet in 1788, consequently the Australian vine is as old as Australian settlement. As already mentioned, a report by Governor Hunter gives the area under vines in 1797 as 8 acres. From New South Wales the cultivation spread to Victoria and South Australia, and these States have now far outstripped the mother State in the area under this crop. In Queensland and Western Australia also, vine growing has been carried on for many years, but little progress has been made. In Tasmania the climate is not favourable to the growth of grapes. The purposes for which grapes are grown in Australia are three in number, viz. :—(a) for wine-making, (b) for table use, and (c) for drying. The total area under vines in the several States

during each of the last five years and the average for the past decennium are given in the following table, while particulars from 1860 onwards may be gathered from the graph on page 687.

VINEYARDS.—AREA.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1931-32..	15,360	38,215	1,749	52,498	5,139		112,961
1932-33..	15,444	39,144	1,868	52,479	5,511		114,446

1934-35..	15,143	41,180	1,926	53,361	5,737		117,347
1935-36..	15,158	41,081	2,470	54,219	6,051		118,979
Average 10 seasons 1927-36	15,166	40,259	1,864	52,274	5,324	There are no vineyards in Tasmania.	114,887

The total area under vines in Australia has shown a substantial expansion since 1860. This development has been interrupted from time to time, decreases occurring in 1896, the years between 1904 and 1910, and in 1914. Since the last named year the area increased without interruption from about 61,000 acres to more than 114,000 acres in 1924-25, due largely to the planting of varieties suitable for drying. Subsequently the area fluctuated somewhat but increased again to the record area of 118,979 acres in 1935-36.

(ii) *Report on the Wine Industry.* An investigation into conditions in the wine industry was undertaken by the Commonwealth Director of Development and the Senior Inspector of Excise, Department of Trade and Customs, and a comprehensive report was presented to Parliament on the 17th July, 1931.

(iii) *Wine Production, Bounties, etc.* The production of wine has not increased as rapidly as the suitability of soil and climate would appear to warrant, owing chiefly to two causes. In the first place Australians are not a wine-drinking people; it is estimated that they consume approximately 5 million gallons or 0.8 gallons per head per annum and consequently the local market is restricted. Secondly, the comparatively new and unknown wines of Australia must compete in the markets of the old world with the well-known and long-established brands from other countries. Continued efforts are being made to bring the Australian wines under notice, and with the assistance of a Commonwealth bounty on the export of fortified wine of specified strength, the industry has been greatly stimulated. Particulars of the Wine Export Bounty are shown in § 18 hereafter. The Wine Export Bounty Act 1930 which provided for payment at the rate of 1s. 9d. per gallon was replaced by a new Act in 1934 which fixed the rate at 1s. 3d. per gallon for the two years ending 28th February, 1937, and thereafter at a reduction of 1d. per gallon for each succeeding year until 1940 when it will be 1s. per gallon.

At the Imperial Economic Conference at Ottawa in 1932, the margin of preference granted by the Government of the United Kingdom was 2s. per gallon on Australian wines not exceeding 27 degrees of proof spirit. Hitherto the duties imposed were as follows:—Empire wines not exceeding 27 degrees, 2s. per gallon, foreign wines not exceeding 25 degrees, 3s. per gallon, a margin of preference of 1s. per gallon. The margin of 2 degrees in the strength of Empire wines is also considered a measure of preference. The bulk of the wine exported from Australia contains more than 27 degrees of proof spirit, and, under the duties in force in the United Kingdom in 1932, Australian wines of a strength exceeding 27 but under 42 degrees enjoy a preference of 4s. per gallon. New or additional preferences are also hoped for from certain Crown Colonies and Protectorates.

The quantity of wine produced in the several States during the last five seasons together with the average for the past decennium is given in the table hereunder :—

WINE.—PRODUCTION.

Season.	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tasmania.	Australia.
	Gallons.	Gallons.	Gallons.	Gallons.	Gallons.	No production of wine in Tasmania.	Gallons.
1931-32 ..	1,589,707	1,530,061	41,456	10,664,546	364,752		14,190,522

(a) Australian currency values.

(ii) *Exports.* Practically all of the wine exported from Australia is sent to the United Kingdom ; less than 200,000 gallons are sent to other countries. New Zealand absorbs the major portion of this quantity although exports to Canada have increased under the Canadian-Australian Trade Treaty ; the former took 108,497 gallons valued at £44,897 while the latter imported 31,637 gallons valued at £13,308 during 1935-36. The amendment to the liquor laws of the United States enabled Australia to export 61,917 gallons valued at £18,529 to that country in 1933-34, 31,032 gallons valued at £7,684 in 1934-35 and 709 gallons valued at £1,167 in 1935-36. Exports for the last five years are given in the following table :—

WINE.—EXPORTS, AUSTRALIA.

Year.	Quantity.			Value.(a)		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
	Gallons.	Gallons.	Gallons.	£	£	£

1935-36 ..	4,070	3,705,557	3,709,627	5,649	928,955	934,604

(a) Australian currency values.

3. Other Viticultural Products.—(i) *Table Grapes*. Grapes for table use are grown in all the States except Tasmania, but the greatest development in the industry has taken place in the drying of raisins and currants, particularly in Victoria and South Australia. The quantities of table grapes grown during the last five seasons are as follows :—

TABLE GRAPES.—PRODUCTION.

Season.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Australia.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1931-32	3,542	3,807	1,961	670	3,053	13,033

(a) Quantity negligible.

(b) Australian currency values.

(c) Re-Imports.

Since 1912 Australia has not only produced sufficient raisins and currants for home consumption, but has been able to maintain a large export trade. The average annual production for the decennium ended 1935-36 exceeded 62,200 tons, of which 46,200 tons were exported and 16,000 tons were available for local requirements. The chief countries importing Australian raisins and currants are the United Kingdom, Canada and New Zealand, the quantities exported thereto in 1935-36 being 57. 30 and 11 per cent. respectively. Exports to Canada have increased from 4,600 tons in 1928-29 to 14,586 tons in 1935-36. Under the terms of the agreement reached at the Imperial Economic Conference at Ottawa in 1932, the tariff in the United Kingdom on dried fruits imported from foreign countries was increased from 7s. per cwt. to 10s. 6d. per cwt. As already stated, the United Kingdom absorbs 57 per cent. of Australia's exports, and the preference given should prove of considerable benefit to the Australian grower. The existence of the Anglo-Grecian Trade Treaty, however, precludes any immediate prospect of an advance in the present rate of preference—2s. per cwt.—being secured on Australian currants imported into Great Britain.

§ 16. Orchards and Fruit Gardens.

1. **Progress of Cultivation.**—The greatest area under orchards and fruit gardens was attained in 1933-34 when 281,989 acres were planted, but owing to reductions in the areas under citrus and bananas the total area had declined to 271,271 acres in 1935-36. The total area under orchards and fruit gardens in the several States during the last five years is given in the following table:—

ORCHARDS AND FRUIT GARDENS.—AREA.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Australia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

1935-36 ..	82,702	75,788	28,544	29,122	21,667	33,372	76	271,271

2. **Varieties of Crops.**—(i) *General.* The varieties grown differ in various parts of the States, ranging from such fruits as the pineapple, paw-paw, mango and guava of the tropics to the strawberry, the raspberry and the currant of the colder parts of the temperate zone. The principal varieties grown in Victoria are the apple, peach, pear, orange, plum and apricot. In New South Wales citrus fruits (oranges, lemons, etc.) occupy the leading position, although apples, peaches, plums, pears, cherries and bananas are extensively grown. In Queensland, the banana, the pineapple, the apple, the orange, the peach, the plum and the coco-nut are the varieties most largely cultivated. In South Australia, in addition to the apple, orange, apricot, plum, peach and pear, the almond and the olive are extensively grown. In Western Australia, the apple, orange, pear, plum, peach, apricot and fig are the chief varieties. In Tasmania, the apple occupies nearly four-fifths of the fruit-growing area, but small fruits, such as the currant, raspberry and gooseberry are extensively grown, while the balance of the area is taken up with the pear, apricot, plum and cherry. The following tables give the acreage—bearing and non-bearing—under the principal kinds of fruit, and the quantity and value of fruit produced.

(ii) Area. The table hereunder shows the total acreage for 1935-36:—

1935-36	2,500,361	915,409	1,575,662	554,094	639,429	268,669

4. **Imports and Exports of Fruit.**—(i) *General.* A considerable export trade in both fresh and dried fruits is carried on by Australia with overseas countries. The import trade in fresh fruits declined heavily during recent years owing to the imposition of a Customs duty of 1d. per lb. on imported bananas, which had previously been the chief variety of fresh fruit imported into Australia. Under the terms of the agreement reached at Ottawa in 1932, however, 40,000 centals of bananas may be admitted annually from Fiji at the rate of duty of 2s. 6d. per cental. The imports of dried fruits at present consist mainly of dates. The export trade in fresh and dried fruits has expanded greatly during recent years, the value of the shipments in 1935-36 amounting to £1,969,580 and £1,987,492 respectively. Apples constitute the bulk of the fresh fruit exported, although the exports

of citrus fruits and pears are fairly considerable, and experiments are being conducted in regard to the dispatch of other fruits. Shipments of raisins and currants have increased greatly since 1914-15, and are mainly responsible for the growth in the dried fruits exports. Dried apricots also figure amongst the exports.

(ii) *Fresh Fruits.* Information with regard to the Australian oversea trade in fresh fruits is given hereunder :—

FRESH FRUITS.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.

1934-35	1,745,337	1,307,791	254,978	240,836	242,891	212,135
1935-36	2,008,656	1,494,524	275,860	270,262	190,061	188,170

(iv) *Dried Fruits.* The quantity and value of oversea imports and exports of dried fruits, other than raisins and currants, for the last five years are shown below : about 95 per cent. of the total imports consisted of dates obtained almost entirely from Iraq :—

DRIED FRUITS(a).—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Imports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	lb.	£	lb.	£	lb.	£
1931-32(b)	9,988,817	74,002	727,186	14,220	9,261,631	59,782
1932-33(b)	9,415,551	62,281	2,093,159	51,764	7,322,392	10,517
1933-34(b)	8,302,384	71,594	5,674,846	151,573	2,627,538	- 79,979

(a) Excluding raisins and currants referred to separately under Vineyards, § 15 par. 4. (b) Australian currency values.

NOTE.—The minus sign (-) signifies net exports.

(v) *Jams and Jellies.* Jams and jellies were exported in large quantities during the war years, and in 1918-19 the record shipment of 79,277,560 lb., valued at £1,847,970, was dispatched from Australia. Since that year, however, the trade has dwindled, the value of the exports in 1935-36 amounting to only £132,886. Particulars relative to imports and exports during each of the last five years are as follows :—

JAMS AND JELLIES.—IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	lb.	£	lb.	£	lb.	£
1931-32(a)	2,099	182	1,674,862	44,630	1,672,763	44,448
1932-33(a)	24,492	1,180	1,886,344	47,682	1,861,852	46,502
1933-34(a)	16,159	909	2,245,262	55,958	2,229,103	55,049
1934-35(a)	30,322	1,265	2,949,105	63,425	2,918,783	62,160
1935-36(a)	50,010	1,910	7,019,191	134,796	6,969,181	132,886

(a) Australian currency values.

(vi) *Preserved Fruit.* Details concerning the quantities and values of preserved fruit imported into Australia cannot readily be obtained, owing to the fact that in the Customs returns particulars concerning fruit and vegetables are in certain cases combined. The total value of fruit and vegetables preserved or partly preserved in liquid, or pulped, imported into Australia during 1935-36 was £32,110, or £40,218 in Australian currency. Overseas exports in 1935-36 were as follows—Apricots, 7,773,122 lb., £132,245; peaches, 24,036,382 lb., £362,629; pears, 13,953,638 lb., £232,338; pineapples, 1,754,950 lb., £32,056; and other, 2,053,560 lb., £46,619; or a total shipment valued at £805,887.

§ 17. Minor Crops.

1. *General.*—In addition to the crops previously dealt with, there are many others which, owing either to their nature, or to the fact that their cultivation has advanced but little beyond the experimental stage, do not occupy so prominent a position. Some of the more important of these are included under the headings—Market Gardens, Pumpkins and Melons, Nurseries, Grass Seed, Tobacco and Millet. Cotton growing has received considerable attention in the tropical portions of Queensland, and the prospects of establishing this industry are hopeful. The total area in Australia during the season 1935-36 devoted to crops not dealt with in previous sections was 203,258 acres, the major portion of which consisted of cotton, market gardens, grass seed, pumpkins and melons, and tobacco.

2. *Market Gardens.*—Under this head are included all areas on which mixed vegetables are grown. Where considerable areas are devoted to the production of one vegetable, such for instance as the potato, the onion, the melon, the tomato, etc., the figures are usually not included with market gardens, but are shown either under some specific head, or under some general head as “Other Root Crops,” or “All Other Crops.” The area under market gardens during each of the last five seasons is given hereunder :—

MARKET GARDENS.—AREA.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Cap. Ter.	Aus-tralia.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1931-32 ..	6,655	19,786	778	1,726	3,123	660	33	32,761
1932-33 ..	6,047	18,249	992	1,896	3,807	804	55	31,850
1933-34 ..	5,664	20,010	833	2,105	3,281	779	61	32,733
1934-35 ..	6,696	20,728	801	1,994	3,024	869	13	34,125
1935-36 ..	7,026	20,633	950	1,555	3,074	812	52	34,102

3. **Grass Seed.**—The area under this crop during 1935-36, exclusive of New South Wales and Western Australia, for which States complete figures as to area are not available, was 24,130 acres, of which 8,222 acres were in Victoria, 1,668 acres in Tasmania, 7,720 acres in Queensland, and 6,520 acres in South Australia. The production for 1935-36 for these States was 270,931 bushels. In addition to the areas planted above, there were 9,438 acres sown to canary seed in Queensland, 1,030 acres in Victoria and 156 acres in New South Wales, returning a yield of 61,335 bushels, valued at £44,133.

4. **Tobacco.**—Tobacco growing some years ago promised to occupy an important place amongst the agricultural industries of Australia. Thus, as early as the season 1888-89, the area under this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria, and 123 in Queensland. This promise was, however, not fulfilled, and after numerous fluctuations, in the course of which the Victorian area rose in 1895 to over 2,000 acres, and that in Queensland to over 1,000 acres, the total area declined considerably.

In all the States in which its cultivation has been tried, the soil and climate appear to be suitable for the growth of the plant, and the large import of tobacco in its various forms is an index of the market for a satisfactory product. The net imports of tobacco into Australia during the year 1935-36 were valued at £A.1,792,544, while the net quantity of unmanufactured tobacco imported was 19,532,586 lb. valued at £A.1,931,281. The area under this crop in 1935-36 amounted to 10,538 acres which produced 5.6 million lb. Victoria with 5,840 acres and Queensland with 3,117 acres were the chief producing States.

It has been proved that suitable leaf can be grown, and efforts are now being directed to the elimination of disease, and to improvement in the quality and aroma of the finished product. As the result of an agreement with the Commonwealth Government, the Australian Tobacco Manufacturers agreed to purchase in 1931-32, 7.2 million lb. of suitable leaf at an average price of 2s. 3d. per lb.: actually more than 10.5 million lb. was purchased at an average of 2s. 1½d. per lb. The agreement was not renewed and the area declined from 26,272 acres in 1932-33 to 10,538 acres in 1935-36.

The following table furnishes details of the average area, production, etc., in quinquennial periods from 1901 to 1935, and annually from 1931-32 to 1935-36:—

TOBACCO.—AREA, PRODUCTION, ETC., AUSTRALIA.

Period.	Area.	Production.	Value.	Number of Producers Registered.
	Acres.	lb.	£	No.
1901-05	1,412	1,172,976	(a)	387
1906-10	1,678	1,419,040	41,581	518
1911-15	2,496	2,106,160	65,615	479
1916-20	1,648	1,449,616	104,978	487
1921-25	2,677	1,962,576	158,748	925
1926-30	2,478	1,632,243	121,589	666
1931-35	15,856	6,580,560	631,038	..
1931-32	17,738	10,160,192	1,114,737	2,774
1932-33	26,272	9,723,056	960,565	5,527
1933-34	16,304	4,348,964	339,663	5,081
1934-35	8,429	3,113,315	256,655	4,205
1935-36	10,538	5,557,304	483,571	3,501

(a) Not available.

In 1929 a Select Committee was appointed by the House of Representatives to report on the tobacco industry in Australia. The report of the Committee was submitted on 1st July, 1930, and among the recommendations made was one for the formation of a Tobacco Investigation Committee. This Committee was formed, and was financed jointly by the Commonwealth Government and the British Australian Tobacco Company, the Company undertaking to contribute up to £3,000 on the £ for £ basis. In 1933 another Committee was appointed. The recommendation of this Committee, which

reported on 16th November, 1933 that the sum of £20,000 should be provided annually for five years to assist the States to continue economic and scientific investigations, was adopted and this amount has been included in the Budget for each year since 1933-34. £5,000 was allotted to the Council for Scientific and Industrial Research, and the balance was distributed among the States to provide additional services, £3,750 being allocated to each of the States of New South Wales, Victoria and Queensland, and £1,250 each to South Australia, Western Australia and Tasmania. The Council for Scientific and Industrial Research is investigating diseases affecting the tobacco plant, including work on disease resisting varieties, and is making tests of smoking quality. The Council has been successful in discovering effective means of preventing blue mould, and consequently the development of the industry should proceed on much sounder lines than hitherto. The States are carrying out field investigations on disease resistance, selection, yield and quality improvement, and are conducting instructional, demonstrational and field experimental work.

5. **Pumpkins and Melons.**—The total area under this crop in Australia during 1935-36 was 20,421 acres, of which 4,611 acres were in New South Wales, 1,246 acres in Victoria, 13,517 acres in Queensland, 322 acres in South Australia, and 698 acres in Western Australia. The production for Australia amounted to 61,656 tons.

6. **Hops.**—Hop growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for the season 1935-36 being 1,017 acres, of which 882 acres were in Tasmania, 123 acres in Victoria and a small area of 12 acres in Western Australia. The Tasmanian area, though still small, has increased during the past 33 years, the total for the season 1901-2 being 599 acres. In Victoria the area, which in 1901-2 was 307 acres, dwindled to 71 acres in 1918-19, then rose to 312 acres in 1925-26 and dropped to 123 in 1935-36. The cultivation of hops was much more extensive in Victoria some 50 years ago than at present, the area in 1883-84 being 1,758 acres. During the year 1935-36 the imports of hops exceeded the exports by 85,720 lb., valued at £A.6,577, of which New Zealand supplied 82,534 lb. The value of the production in Australia in 1935-36 amounted to £151,112.

7. **Flax.**—For many years flax was grown intermittently in the Gippsland district of Victoria, and attempts were made to introduce its cultivation into Tasmania and New South Wales, but without success. About the end of the year 1917 the shortage of flax fibre was acute, and endeavours were made by the Commonwealth Government to encourage local cultivation. The acreage in Victoria increased from 419 acres in 1917-18 to 1,611 acres in 1919-20, but fell to 179 acres in 1928-29. As the result of a bounty introduced in 1930 the area increased to 1,216 acres in 1930-31, but this expansion was not maintained during the following years. In 1935-36, however, 1,068 acres were planted in this State compared with 584 acres in the previous year.

The linseed-flax industry has been the subject of two investigations during recent years. In 1933, the Development Branch of the Prime Minister's Department examined the industry and recommended in its report that any aggressive policy of expansion should be avoided. A second investigation was made under the direction of the Council for Scientific and Industrial Research in 1936. The report issued in that year indicated the possibility of developing the flax industry in Australia and that further investigation and experiment appeared to be justified. A special vegetable fibre section of the Council was established to carry out further studies of the problem. Largely as a result of the efforts of the Council, private enterprise is again attempting the development of the industry in Victoria.

Bounty was paid on flax and linseed grown in Australia between the years 1907 and 1918 and again for a period of five years ending 28th February, 1935. During these periods the total amounts disbursed as bounty were £2,376 and £2,839 respectively.

8. **Millet.**—Millet figures in the statistical returns of three of the States. The total area devoted thereto in 1935-36 was 2,416 acres, of which 1,652 acres were in New South Wales, 635 in Victoria, and 129 in Queensland. The particulars here given relate to millet grown for grain and fibre, the quantity for green forage being dealt with in the section relating thereto.

9. Nurseries.—In all the States fairly large areas are occupied as nurseries, but figures in regard to acreages under flowers, fruit trees, etc., are available only for New South Wales, Victoria, South Australia and Western Australia. During 1935-36 the areas in those States were 858, 1,036, 158 and 160 acres respectively.

10. Cotton.—The cultivation of cotton was begun in Queensland in 1860, and ten years later the area cropped had increased from 14 acres to over 14,000 acres. The reappearance of American cotton in the European market on the conclusion of the Civil War gave a severe setback to the new industry, and the area declined continuously till 1888, when only 37 acres were planted. Later on the industry was resuscitated, and manufacturing on a small scale was undertaken on two separate occasions at Ipswich, but low prices over a term of years checked development. In 1913 the Queensland Government made an advance of 1½d. per lb. on seed cotton, and ginned it on owner's account, the final return being equal to about 1½d. per lb. The rise in price enabled the Government to offer a guarantee of 5½d. per lb. for seeded cotton of good quality for the three years ended 31st July, 1923, and the area picked increased from 166 acres in 1920 to 50,186 acres in 1924. Guarantees were continued until 1926, when the Commonwealth Government granted a bounty of 1½d. per lb. on the better grades and ¾d. on the lower grades of seed cotton grown in Australia. In addition to this direct assistance to the growers the Government subsidized the cotton-manufacturing industry by granting a graduated bounty, varying from ¼d. to 1s. per lb., on all cotton yarn manufactured in Australia which contained 50 per cent. of home-grown cotton. This bounty, however, ceased to operate after 30th June, 1932. The Raw Cotton Bounty Act of 1934, which repealed the previous Acts, provided, *inter alia*, that a bounty of 5½d. per lb., fluctuating according to variations in the Liverpool price, shall be payable on raw cotton produced in Australia from Australian grown seed. The amount of raw cotton for the purpose of the bounty was limited to the requirements of Australia plus 20 per cent. With the change over to the bounty system, a cotton pool was formed in Queensland under the Primary Products Pools Act, and a Cotton Board was elected to control the handling, financing and marketing of all cotton grown in the State.

The area under cultivation and the production in Queensland since the year 1926 are shown hereunder :—

COTTON.—AREA AND PRODUCTION, QUEENSLAND.

Year.						Area.	Yield of Unginned Cotton.
						Acres.	lb.
1926	18,743	9,059,907
1927	14,975	7,060,756
1928	20,316	12,290,910
1929	15,003	8,024,502
1930	22,652	17,022,897
1931	22,452	15,244,644
1932	29,995	6,270,116
1933	68,203	17,718,306
1934	43,397	26,924,179
1935	54,947	20,785,418

11. Coffee.—Queensland is the only State in which coffee has been grown to any extent, and the results have not been satisfactory. The area under crop reached its highest point in the season 1901-2 with 547 acres. Thereafter the acreage fluctuated, but on the whole with a downward tendency, and in 1935-36 only 14 acres were recorded with a production of 6,210 lb.

12. Other Crops.—Miscellaneous small crops grown in Australia include tomatoes, rhubarb, artichokes, arrowroot, chicory and flowers.

§ 18. Bounties.

1. **Bounties.**—The bounties paid by the Commonwealth Government during the year ended 30th June, 1937, amounted to £477,471. This amount refers only to bounties paid under the Bounties Acts and does not include financial assistance given to wheat-growers and other primary producers under other Acts. Particulars of the assistance so rendered by the Commonwealth Government are furnished hereafter. Details of the amounts paid as bounty during the years 1932-33 to 1936-37 are as follows:—

BOUNTIES.—AUSTRALIA.

(a) Other goods are scheduled in the Act, see Note (b). (b) Including 17s. 2d., being amount of bounty paid on 172 lb. of spices in 1932-33; and £13 on 2,007 lb. of kapok in 1933-34. (c) All Bounties are subject to 20 per cent. reduction from 20th July, 1931, excepting those paid on gold, wine, wheat, and fruit exported. (d) Rate of Bounty on gold produced for the nine months ending September, 1932, was 4.056s. per fine ounce. (e) Date Bounty ceased. (f) For details of other financial assistance see next table. (g) Includes Administrative expenses amounting to £14,087. (h) Acts passed in respect of each year.

2. **Other Financial Assistance.**—In addition to the payment of bounties mentioned in the preceding paragraph financial assistance has been granted by the Commonwealth Government for the relief of wheat-growers, fruit-growers and other primary producers. The amounts shown, however, do not include such items as the expenditure on cattle tick control, banana industry, tobacco investigation and apple and pear research, which indirectly benefits the industries concerned. The distribution as bounty, relief or subsidy has been made in the following manner :—

AMOUNTS PAID BY THE COMMONWEALTH GOVERNMENT TO ASSIST PRIMARY PRODUCERS.—AUSTRALIA.

(a) Rate of Bounty 4½d. per bushel in 1931-32 and 3d. per bushel in 1934-35.

(b) Subject to revision.

(c) Growers of apples, pears and mandarins.

(d) Includes special grant to Tasmania.

The moneys granted for the assistance of wheat-growers in 1932-33 and 1933-34 were paid through the Governments of the States on an acreage basis. In 1934-35, in accordance with the recommendations of the Royal Commission on the wheat industry, assistance took the form of a bounty of 3d. per bushel, supplemented by a further relief payment of 3s. per acre. Further special relief was given to those farmers who were adversely affected by the weather conditions of the season 1934-35. Altogether, the amount paid during 1934-35 for the benefit of wheat-growers exceeded £4 million. For the year 1935-36 the amount paid by the Commonwealth Government as relief was £1,915,869. This also was paid through the State Governments. The relief granted to fruit-growers was paid to growers of apples, pears and mandarins. Assistance has been given to primary producers, other than wheat-growers, in the form of a manure subsidy; the rate was 15s. for each ton of artificial manure used in the production of primary produce, reduced in 1936-37 to 10s. per ton. Since 1932-33 more than £1,355,000 has been distributed in this manner. In addition to the assistance outlined above the Loan (Farmers' Debt Adjustment) Act 1935 made provision for grants totalling £12 million to be made available to the States for the adjustment of farmers' debts. Of this amount

£10 million was allocated as follows:—New South Wales, £3,450,000; Victoria, £2,500,000; Queensland, £1,150,000; South Australia, £1,300,000; Western Australia, £1,300,000; and Tasmania, £300,000. The remaining £2 million is to be allocated in the same proportion, but is subject to review at a later date.

§ 19. Fertilizers.

1. *General.*—In the early days of settlement in Australia scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. The divergent character of the soils presented a difficulty in the proper use of fertilizers for different crops and the outstanding development of wheat-growing made a system of crop rotation impracticable. The importance of fallowing and the application of suitable fertilizers in adequate quantities is, however, now widely appreciated by farmers. The introduction of the modern seed-drill acting also as a fertilizer-distributor has greatly facilitated the use of artificial manures, and much land formerly regarded as useless for cultivation has now been made productive.

2. *Fertilizers Acts.*—In order to protect the users of artificial manures, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features will be found in *Official Year Book No. 12* (page 378).

3. *Imports.*—The Australian production of prepared fertilizers is sufficient for local requirements. Imports consist chiefly of rock phosphate, which is used in making superphosphate, a valuable fertilizer for cereals. During 1935-36 the value of rock phosphate imported represented more than 67 per cent. of the total imports of fertilizers. Nauru and Gilbert and Ellice Islands Colony supplied the whole of the shipments. Sodium nitrate is obtained chiefly from Chile.

The imports of manures during the last five years are given in the following table. Although considerable quantities of manufactured superphosphate were imported up to the year 1914-15, imports during recent years were very small:—

FERTILIZERS.—IMPORTS, AUSTRALIA.

Fertilizer.		1931-32. (a)	1932-33. (a)	1933-34. (a)	1934-35. (a)	1935-36. (a)

5. Quantities Locally Used.—Information regarding the area manured and the quantity used in each State during the year 1935-36 is given in the following table. Hitherto the area of pasture lands top-dressed and the quantity of manure used thereon were not available separately for Victoria and Western Australia, the particulars being included with the area of crops manured. The particulars are now available and the table has been extended to include these additional data for the year 1935-36. Details of the area manured with natural manure (stableyard, etc.) have been omitted: in 1935-36 the area and quantity involved amounted to 104,558 acres and 511,580 loads :—

AREA MANURED AND QUANTITY OF MANURE USED, 1935-36.

State or Territory.	Artificial Manure (Superphosphates, Bonedust, Nitrates, etc.).				Total Area Manured.	Total Artificial Manure Used.
	Area under Crop Manured.		Pasture Lands Top-dressed.			
	Acres.	Tons.	Acres.	Tons.		
New South Wales	3,557,512	106,736	351,209	16,736	3,908,721	123,472
Victoria	3,545,249	146,740	2,048,389	105,157	5,593,638	251,897

(a) Not available.

(b) Excluding Pasture Lands. Quantity considered to be negligible.

Particulars of the quantity of artificial manure used in each of the States and Territories during the past ten years are included in the next table. These details include the quantity used in the top-dressing of pasture lands except where indicated by the

footnote. The omission of Queensland, however, does not detract from the value of the table as the area involved is considered to be negligible :—

QUANTITY OF ARTIFICIAL MANURE USED—AUSTRALIA.

(a) Exclusive of quantity used in top-dressing pasture lands.

(b) Incomplete. See Note (a).

As mentioned in § 18 the Commonwealth Government has encouraged the use of artificial manure by subsidizing primary producers, other than wheat-growers, at the rate of 15s. per ton up to 1936-37 when it was reduced to 10s. per ton. The expansion in the use of artificial manure since 1932-33, when the subsidy was introduced, is indicated in the table above.

6. Local Production.—Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1935-36 was 33, made up as follows :—New South Wales, 4; Victoria, 5; Queensland, 5; South Australia, 7; Western Australia, 5; and Tasmania, 7. The production of superphosphates in Australia during 1935-36 amounted to 784,823 tons, the largest producing States being Victoria, Western Australia and South Australia.

§ 20. Ensilage.

1. Government Assistance in Production.—The various State Governments devote a considerable amount of attention to the education of the farming community in regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the silage.

2. Quantity Made.—Information regarding the number of holdings on which ensilage was made and the quantity made during the seasons 1931-32 to 1935-36 is given in the following table.

ENSILAGE MADE.

State.	1931-32.		1932-33.		1933-34.		1934-35.		1935-36.

(a) No. of holdings on which ensilage was made.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage and during the four seasons ended 1909-10 there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The following five seasons, however, showed a falling off, but the reduction was due to the fact that stocks had not been drawn upon to any great extent during the previous seasons. The

accumulated stocks proved of great value during the 1914 drought, though far below what would have been the case if more attention had been paid to production during the previous years, when there was a surplus of green forage. The quantities made since that date have fluctuated considerably, but the output has increased during recent years, the production of 163,118 tons in 1935-36 being the greatest yet recorded in any year.

§ 21. Agricultural Colleges and Experimental Farms.

1. *General.*—In most of the States agricultural colleges and experimental farms have been established with a view to the promotion of more scientific methods in agriculture, stock-breeding and dairying. In the colleges, and on some of the farms, provision is made for the accommodation of pupils to whom both practical and theoretical instruction is given by experts in various branches of agriculture. Analyses of soils and fertilizers are made, manures are tested, and elementary veterinary science, etc., are taught, while general experimental work is carried on with cereal and other crops, not merely for the purpose of showing that it is practicable to produce certain crops in a given place, but to show also how it is possible to make farming pay in the locality. Opportunities are afforded for practice in general agricultural work, and instruction is given in the conservation of fodder; in cheese and butter making; in the management, breeding and preparation for the market of live stock; in the eradication of pests and weeds; and in carpentering, blacksmithing and other trades.

Expert lecturers visit the various agricultural and dairying centres, and there is a wide distribution of periodical agricultural gazettes and bulletins.

2. *Agricultural Colleges and Experimental Farms.*—In previous issues of this volume detailed information was given regarding agricultural colleges, experimental farms and agricultural education generally. See Year Book No. 11, pages 393-5, and a summary in respect of the year 1935-36 will be found in the Production Bulletin No. 30 issued by this Bureau.

3. *Agricultural and Stock Departments.*—A synopsis of the activities and operations of the Agricultural and Stock Departments of the several States on 30th June, 1920, will be found in Official Year Book No. 14, pages 1180 to 1191.

§ 22. Employment in Agriculture.

Information relating to the number of persons employed is furnished annually by landholders of one acre and upwards. The particulars furnished refer to the owner, occupier or manager, those members of his family and other employees who are permanently engaged throughout the year in the work of the farm. Casual labour, such as harvesters and fruitpickers, is excluded. In the collection of statistics of this nature difficulty is experienced in correctly determining whether the duties of female employees are more domestic than rural and on that account it is considered advisable to leave females out of the table.

MALES EMPLOYED IN AGRICULTURE.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
1913-14 ..	61,525	51,932	33,362	34,111	18,210	11,789	210,929
1923-24 ..	48,176	49,740	38,186	31,532	22,153	12,905	202,692

1935-36 ..	42,204	35,926	45,878	30,096	22,585	12,731	189,420

Although the area under crop has expanded considerably during the past two decades there has been a decrease in the numbers employed in the agricultural branch of the rural industry owing to the increasing use of machinery in the cultivation of the soil and the harvesting of the crops. For a number of years prior to the depression the value of machinery employed in agricultural pursuits increased on the average by approximately £2 million per annum. After 1929-30 machinery values declined each year until 1935-36, when an increase of £1½ million was recorded.
