CHAPTER XII.--LABOUR, WAGES AND PRICES.

A. RETAIL PRICES AND PRICE INDEXES.

§ 4. Tabular Statements of Retail Price Index Numbers.

The Consumer Price Index.—A new retail price index, entitled the Consumer Price Index, was published for the first time in Statistical Bulletin No. 837 of 12th August, 1960. The bulletin contains a brief description of the index together with index numbers for periods from June Quarter, 1949, to June Quarter, 1960. For current statistical purposes the new index replaces both the "C" Series Retail Price Index and the Interim Retail Price Index. The Interim Index was discontinued after the issue for March Quarter, 1960. A summary of Consumer Price Index Numbers is given in the two following tables.

§ 4. Basic Wages in Australia.

Basic Wage Inquiry, 1960.—On 16th February, 1960, the Commonwealth Conciliation and Arbitration Commission, constituted in Presidential Session by Kirby, C.J. (President), Ashburner and Moore J.J. (Deputy Presidents), commenced hearing an application by respondent unions for variation of the Metal Trades Award, firstly, by increasing the amounts of basic wage prescribed therein to the figure each would have reached had the quarterly adjustment system based on the "C" Series retail price index numbers been retained, plus a further amount of 17s., representing the unions' minimum estimate of the increase in productivity which had occurred since the automatic adjustment system was abolished, and secondly, by restoring the system of automatic quarterly adjustments.

In the judgment delivered on 12th April, 1960, the Commission unanimously refused the unions' application. Some very brief extracts from the reasons for judgment are given in the following paragraphs:—

Application for Restoration of Quarterly Adjustments.—The Commission stated "We must decide the question of automatic quarterly adjustments in the light of existing situations and practices The Commission is considering a situation in which in practice the basic wage is each year re-assessed. The alternatives which emerge from the submissions in these proceedings are either the fixation of a basic wage for an undefined period, the money amounts of the wage being automatically adjustable by movements in a price index, or the fixation of a basic wage each year. In our view, bearing in mind the interest of employees, employers and the public generally, the second alternative is preferable, and the Commission should continue to fix that basic wage which it considers to be just and reasonable knowing that the amount which it fixes will be the basic wage for the ensuing twelve months and will then be reviewed".

APPENDIX. 1221

Application to Increase the Basic Wage.—The Commission referred to the somewhat unusual circumstances in which an increase in the basic wage was being considered and said "Thus when the Commission as now constituted faces its present task of deciding whether the basic wage should be again increased it has to do so in the setting that less than a year ago the basic wage was increased by 15s. and margins generally were increased by an amount making them 28 per cent. greater than 1954 margins. That has been the general result of the application of the 1959 Metal Trades decision and it is that result with which this Commission is now concerned."

"We accept the submission made by the private employers and by the Commonwealth Government that we should not award an increase in the basic wage, bearing in mind that employees under federal awards have in the past twelve months received substantial increases in both basic and secondary wages. It is our view that at the present time, before the effects of these previous wage increases have been reflected in the economy, we cannot find that its capacity is such that a further basic wage increase can be awarded.

We consider that it would be unsafe and perhaps dangerous to increase the basic wage at this point of time. We have formed this opinion with a full sense of the obligation which this Commission has to fix the basic wage from time to time at the highest amount that the economy can sustain so that the wage and salary earner may obtain his proper share of goods and services. On the other hand we are mindful of the danger to the whole community, including the wage and salary earner, of the basic wage being fixed at an amount which might increase inflation and upset the stability of the economy ".

As a result, there was no change in the basic wage rates of the Commonwealth Conciliation and Arbitration Commission which had been payable from the beginning of the first pay period commencing on or after 11th June, 1959. The rates payable for adult males in the capital city of each State are as follows:—Sydney, £14 3s.; Melbourne, £13 15s.; Brisbane, £12 18s.; Adelaide, £13 11s.; Perth, £13 16s.; Hobart, £14 2s.; Six Capital Cities (weighted average), £13 16s.

E. EMPLOYMENT AND UNEMPLOYMENT.

§ 1. Employment.

Wage and Salary Earners in Civilian Employment, pp. 452-5.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, female private domestics and defence forces, for the month of June, 1960.

⁽a) Where dates are not quoted wage rates operate from the beginning of the first pay-period commencing in the month shown.

(b) No basic wage declared. Rates shown are those adopted by most Wages Boards.

(c) During June and July, 1959, Wages Boards varied determinations by adopting the Commonwealth basic wage rate.

(d) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla.where a loading of 5s. a week is generally payable.

(e) Most Wages Boards adopted the Commonwealth basic wage rate from July, 1959.

Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated. (c) Excludes expenditure of £11,987,000 on Defence Services—General Services, Works, Armaments, etc.

LIST OF SPECIAL ARTICLES AND MISCELLANEOUS MATTER CONTAINED IN PREVIOUS ISSUES.

This list refers to special articles and other more or less important miscellaneous matter which have appeared in previous issues of the Official Year Book, but which are not included, or are included in abbreviated form only, in the present issue. The list is, in the main, restricted to articles, etc., to which references are not given in the various chapters of this issue.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.
