POPULATION AND VITAL STATISTICS

PREFACE

This issue of the *Population and Vital Statistics* Part of the *Statistical Register of New South Wales* contains population statistics for 1957 and vital statistics for 1955 and 1956, as well as statistics for earlier years. The previous issue was Part IV *Population and Vital Statistics* of the *Statistical Register* for 1954-55.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the most recent statistics, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

K. Davison
Deputy Commonwealth Statistician.

Bureau of Census and Statistics,
Sydney.

Section III. STATISTICAL SUMMARY

1.	Estimated Population at 31st December, New South Wales, 1788 to 1957	188
2.	Masculinity and Elements of Increase in Population, New South Wales, 1881 to 1957	189
3.	Mean Population, Calendar and Financial Years, New South Wales, 1901 to 1957	190
4.	Live Births, Deaths and Marriages, Numbers and Rates, New South Wales, 1881 to 1957	191

EXPLANATORY NOTES

1. Boundaries of Metropolis. The boundaries of the Metropolis, as defined for statistical purposes, have been extended to include the following local government areas:—

- (a). From the date of the 1911 Census—
Shire of Ku-ring-gai (incorporated as a municipality in 1927).
- (b). From 1st January, 1929—
Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.
- (c). From 1st January, 1933—
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).
- (d). From 1st January, 1954—

The Guildford and Wentworth Wards of Holroyd Municipality, Fairfield Municipality, Sutherland and Warringah Shires, and the following parts of Liverpool Municipality and of Baulkham Hills, Blacktown and Hornsby Shires:—

- (i). That part of Liverpool Municipality north and east of a line commencing at the junction of Hume Highway and Campbelltown Road (Cross Roads), and following Hume Highway, Bringelly Road, and Old Cowpasture Road to the northern boundary of the Municipality.
- (ii). That part of Baulkham Hills Shire south and east of a line commencing at the junction of Old Windsor Road and Seven Hills Road, Seven Hills, and following Seven Hills Road, Chapel Lane, New Windsor Road, Gladstone Road, Victoria Road, Carrington Road, Showground Road, Castle Lane, Castle Street, and Old Northern Road to the shire boundary at Rogan's Hill.
- (iii). That part of Blacktown Shire east of a line commencing at the junction of Chandos Road and Eastern Creek on the southern boundary of the Shire, and following Eastern Creek, Breakfast Creek, and Sunny Holt Road to the north-eastern boundary of the Shire on Old Windsor Road, Parklea.
- (iv). That part of Hornsby Shire south and east of a line commencing at the junction of Castle Hill Road and New Line Road, West Pennant Hills, and following New Line Road, Gumnut Road, a line from Gumnut Road to Boundary Road, Boundary Road, Thornleigh Gully Creek, Fish Pond Creek, Berowra Creek, Berowra Ferry Road, the Great Northern Railway, a line drawn south-easterly from the 21 mile peg (between Berowra and Mount Ku-ring-gai) to the head of Apple Tree Bay, Apple Tree Bay, and Cowan Water to the eastern boundary of the Shire at Bobbin Head.

In *Section I. Population*, unless otherwise stated, the word "Metropolis" refers to the City of Sydney and suburbs as delimited for statistical purposes from 1st January, 1954. In *Section II. Vital Statistics*, "Metropolis" refers to the City of Sydney and suburbs as delimited at the time, unless otherwise stated.

2. Newcastle Urban Area. From 1st January, 1954, a "Newcastle Urban Area" was defined for statistical purposes. This area includes the City of Newcastle, and that part of Lake Macquarie Shire east and north of Lake Macquarie, bounded on the west by Cockle Creek, Cocked Hat Creek, West Wallsend Road, and Minmi-Young Wallsend Road.

3. Aborigines. Full-blood aborigines have been excluded from all population statistics, and have been excluded from statistics of births and deaths since 1st January, 1933.

4. Population and Migration Statistics.

(a). *Estimated Population of New South Wales.* The estimated population for periods since the Census of 30th June, 1954 represents the population ascertained at the Census plus the subsequent natural increase and recorded net migration into New South Wales. As complete records of interstate migration are not available, these estimates are subject to revision when the population is ascertained at the next Census. (The 1954 Census disclosed that the estimated population at 30th June, 1954 had been overstated by 51,112 persons or by 1.5 per cent.)

(b). *Migratory Population.* Shipping population and other migratory population are not included in any subdivisions of the State.

(c). *Oversea Migration.*

(i). Certain of the descriptive headings used in tables relating to oversea migration in previous issues of the *Statistical Register* have been changed to ensure more accurate definition and to assist interpretation of the figures. The data are, however, strictly comparable. The new headings adopted are as follows:—

Short Term Movement (formerly described as "Temporary Movement") refers to persons who state they intend to reside for a period of less than one year, in Australia in the case of arrivals and abroad in the case of departures;

Long Term and Permanent Movement (formerly described as "Permanent Movement") refers to persons who state they intend to reside for a period of one year or more, in Australia in the case of arrivals and abroad in the case of departures.

(ii). Since June, 1947, Australian troops have been included in the figures for Short Term Movement, irrespective of length of stay oversea.

(iii). Crew members of planes and ships are excluded.

(iv). Oversea migrants are classified on two bases:—

(1). Movement through the Ports of New South Wales. The figures represent the movement by sea and air through the Ports of New South Wales, irrespective of the State of residence or intended residence.

(2). Movement of Residents or Intending Residents of New South Wales. The figures represent the movement of residents or intending residents of New South Wales, irrespective of the Australian port of arrival or departure.

EXPLANATORY NOTES (*continued*)

5. Vital Statistics by Subdivisions of State.

- (a). Since the beginning of 1927, births for any subdivision of the State have been tabulated according to the usual residence of the mother, and deaths for any subdivision according to the usual residence of the deceased; in cases where the usual residence is outside the State, the birth or death is included in the subdivision in which it occurred. Figures on this basis for any municipality, shire or division cannot be compared with those for years prior to 1927, particulars of which were tabulated according to place of occurrence.
- (b). Marriages for any subdivision of the State were tabulated according to the place of celebration of the marriage up to 1954. From 1st January, 1955, tabulation of marriages for subdivisions of the State was discontinued.

6. **Still-births.** For purposes of record, still-births are registered as deaths as well as births, but in these tables still-births are not included in the statistics of deaths. Compulsory registration of still-births became effective in 1935. A still-born child is defined as "any child of seven months gestation or over, not born alive, and includes any child not born alive which measures at least fourteen inches, but does not include any child which has actually breathed".

7. Death Statistics, 1939 to 1947.

- (a). The death statistics (as recorded in Section II) for the years 1939 to 1947 were compiled on the following basis:—

1939 to 1941: Australian defence personnel (irrespective of State of enlistment) who died in New South Wales, viz., 256 males, were included.

New South Wales defence personnel who died outside the State were excluded.

1942 to 30th June, 1947: All defence personnel and other non-civilians were excluded.

- (b). Deaths of New South Wales personnel in defence forces in or out of Australia, so far as recorded, were as follows:—

Year	Males	Females	Year	Males	Females
1939	8	...	1944	2,047	12
1940	137	1	1945	2,482	6
1941	1,355	1	1946	207	5
1942	3,963	3	1947 (Jan.-June)	35	1
1943	3,045	7			

8. **Classification of Causes of Death.** Commencing with the year 1950, causes of death have been classified according to the Statistical Classification of Diseases, Injuries, and Causes of Death (Sixth Revision, 1948, of the International List of Diseases and Causes of Death) and the international rules for selecting the underlying cause of death. The full 3-digit classification (with some 4-digit categories) has been used in tabulation but certain categories have been grouped together for publication purposes. Accidents, poisonings, and violence (Class XVII) have been classified according to the external cause of injury.

9. Statistical Summary (Pages 188 to 191).

- (a). For the sake of uniformity, the population estimates published by the Commonwealth Statistician have been adopted for all years. On this account, estimates of population shown for years prior to 1921 differ slightly from the estimates (which included full-blood aboriginals) published in the 1949-50 and earlier issues of *Population and Vital Statistics*. All estimates have been adjusted in accordance with the results of the various censuses. Birth, death, and marriage rates shown on page 191 have been based on these population estimates.
- (b). The figures of natural increase shown for 1932 and earlier years in Table 2 were compiled by the Government Statistician of New South Wales, and are the same as in previous issues of *Population and Vital Statistics*. They include births and deaths of full-blood aboriginals, and consequently differ from the figures published by the Commonwealth Statistician.
- (c). In Table 2, the difference between (i) the sum of the natural increase and increase by migration, and (ii) the total increase in population, represents:—
- (i). for the period 1907 to 1932, the difference between the natural increase as shown and the natural increase as compiled by the Commonwealth Statistician and used in the population estimates; and
- (ii). for the period 1933 to 1954, the adjustment of population on the basis of the results of the censuses of 30th June, 1947 and 1954, and also deaths of defence personnel from September, 1939 to June, 1947. (*See note 7.*)

Particulars of total increase have been adjusted for these differences, but the individual elements of increase have not been adjusted separately.
