# SOCIAL INDICATORS 

## NO2 1978

## PREFACE

Like Social Indicators No. 1, which appeared in September 1976, this issue brings together a selection of statistics relevant to social questions in Australia. In some cases the statistics are from sources outside the Australian Bureau of Statistics, in others they are from existing Bureau publications, in others they are from Bureau sources but are appearing for the first time. Wherever possible, the statistics are presented in a form - such as rates, percentages, averages or distributions - intended to make them readily useful in the assessment and analysis of social questions.

There are, however, several changes and modifications in this issue. While time series tables for Australia as a whole have been retained, some additional tables have been included for each State for the most recent year. Graphic presentation has been used to highlight the more important trends of some statistical series. Section 9 in Social Indicators No. 1 which dealt with Aboriginals, has been replaced in this issue by a section on Migrants. Some tables in other sections have been deleted because of a lack of more recent data and a list of these deletions appears in the Appendix.

Notes to the various tables provide any necessary definitions and explanations and indicate where further information on the subject can be obtained.

Readers' comments on the first issue have been of great assistance, and users are again invited to comment on the utility of the selection and to make suggestions on new tables for inclusion in future issues. Any such suggestions should be addressed to :

The Director<br>Social Survey and Indicators Section<br>Australian Bureau of Statistics<br>P.O. Box 10<br>BELCONNEN ACT 2616

In all tables, totals may differ slightly from the sum of the items because of rounding. Common abbreviations used are :
n.a. : not available
.. : nil or less than half the last digit
p : preliminary figures
n.e.c. : not elsewhere classified

- : break in continuity of series (where drawn across a column between two consecutive figures)

R. J. CAMERON<br>Australian Statistician

## Australian Bureau of Statistics

Belconnen ACT 2616
May 1978

NOTE. Inquiries concerning these statistics may be made in Canberra by telephoning Mr C. Y. Choi on 526427 or, in each State Capital, by telephoning the office of the Australian Bureau of Statistics.

## CONTENTS

Table Page

1. POPULATION
1.1 Components of population growth, 1901-10 to 1976 ..... 3
1.2 Age and sex distribution of the population, Censuses 1947 to 1976 ..... 4
1.3 Overseas-born as proportion of total population by age group, Censuses 1947 to 1976 ..... 4
1.4 Age distribution of the population and median age, Census 1976 ..... 5
1.5 Projected Australian population, 1981 to 2001 ..... 6
1.6 Dependent-age ratios, Censuses 1954 to 1976 and projected dependent-age ratios, 1981 to 2001 ..... 7
1.7 Age-specific and total fertility rates, 1921-25 to 1975 ..... 8
1.8 Gross and net reproduction rates, 1921 to 1975 ..... 9
1.9 Total fertility rates by States, 1961-65 to 1975 ..... 10
1.10 Generation fertility rates, women born 1895-96 to 1955-56 ..... 10
1.11 Distribution of total fertility, nuptial by previous issue of mother and ex-nuptial, with median duration of marriage at first confinement, 1921-30 to 1975 ..... 11
1.12 Ex-nuptial confinements and confinements within the first eight months of marriage as percentage of total confinements, by age of mother, 1921-30 to 1975 ..... 11
1.13 Overseas arrivals, departures and net arrivals, 1901-1910 to 1976 ..... 12
1.14 Geographic distribution of the population, Censuses 1971 and 1976 ..... 13
1.15 Geographic distribution of the population by States, Census 1976 ..... 13
1.16 Internal migration as proportion of civilian population aged 15 years and over, 1970 to 1977 ..... 14
1.17 Marital status, percentage distribution by age, Censuses 1947 and 1976 ..... 15
1.18 Marriages, marriage rates and median age at marriage, 1947 to 1976 ..... 16
1.19 Divorces, divorce rates and average number of children of the marriage, 1947 to 1971 ..... 17
1.20 Divorces by duration of marriage and proportion of divorces with children present, 1961 to 1975 ..... 18
1.21 Number of primary and secondary family units by type, Censuses 1966 and 1971 ..... 18
1.22 Number of family units by type and number of persons in family units, Censuses 1966 and 1971 ..... 19
1.23 Heads of households as proportion of the population of the same age, sex and marital status, Censuses 1966 and 1971 ..... 20
Chart
1.1 Annual rates of population growth, 1945 to 1976 ..... 21
1.2 Population 1946 to 1976 and projected population, 1977 to 2001 ..... 21
1.3 Population structure : age, sex and birthplace, Censuses 1947 to 1976 ..... 22
1.4 Age-specific fertility rates, 1921 to 1975 ..... 23
Table 2. HEALTH
2.1 Expectation of life at birth and at ages $1,20,40$ and 60 years, 1901-11 to 1975 ..... 27
2.2 Age-specific death rates, 1960-62 to 1975 ..... 27
2.3 Four leading causes of death for certain age groups by sex, 1962 to 1975 ..... 28
2.4 Selected causes of death, 1962 to 1975 ..... 30
2.5 Standardized death rates for selected causes, 1953-55 to 1975 ..... 31
2.6 Infant deaths and stillbirths, 1949 to 1975 ..... 32
2.7 Infant deaths and stillbirths, States and Territories, 1975 ..... 32
2.8 Infant mortality rates, Northern Territory Aboriginals and Australia, 1970 to 1976 ..... 33
2.9 Abortions notified, South Australia, by grounds for termination, marital status and age, 1971 to 1975 ..... 34
2.10 Height and weight of New South Wales children, 1913-15 to 1970 ..... 35
2.11 Road traffic accidents involving casualties, 1950-51 to 1976 ..... 36
2.12 Road traffic accidents involving casualties, States and Territories, 1976 ..... 36
2.13 Hospital morbidity rates by disease class, Queensland, 1969 to 1975 and Western Australia, 1973 to 1975 ..... 37
2.14 Hospital morbidity rates for selected disease classes by age, Queensland, 1975 ..... 38
2.15 Hospital morbidity rates for selected disease classes by age, Western Australia, 1975 ..... 38
2.16 Persons suffering from a chronic limiting illness, by age, May 1968 and May 1974 ..... 39
2.17 Psychiatric centres, New South Wales, first admission rates by diagnosis, 1969-70 to 1974-75 ..... 40
2.18 Psychiatric centres, New South Wales, first admission rates by diagnosis and by age, 1974-75 ..... 41
2.19 Estimated number of doctors and dentists, June 1961 to June 1976 ..... 42
2.20 Estimated supply of nutrients available for consumption, 197475 ..... 42
2.21 Percentage of total energy supply derived from various food types, 1948-49 to 1974-75 ..... 42
Table Page
2.22 Estimated apparent consumption of alcoholic drinks and tobacco per person 15 years and over, 1965-66 to 1975.76 ..... 43
2.23 Population 18 years and over by average daily consumption of alcohol by sex, February 1977 ..... 43
2.24 Population 18 years and over by number of packeted cigarettes smoked per day by sex, February 1977 ..... 44
2.25 Association of alcohol consumption with cigarette smoking, February 1977 ..... 44
2.26 Number of smokers of tested brands of cigarettes by daily intake of tar by sex of smoker, February 1977 ..... 44
2.27 Cash benefits to persons for health, Commonwealth Government, 1970.71 to 1976.77 ..... 45
2.28 Government and private expenditure on health, 1970-71 to 1976.77 ..... 46
Chart2.1 Expectation of life at birth, 1901-11 to 1970-7247
2.2 Age-specific death rates, 1975 ..... 47
2.3 Four leading causes of death for certain age groups by sex, 1975 ..... 48
2.4 Combined infant mortality and stillbirth rates, 1947 to 1975 ..... 49
2.5 Number of persons per doctor and per dentist, 1961 to 1976 ..... 50
Table 3. EDUCATION3.1 Population 20 years and over by highest level of schooling attended, Census 30 June 197153
3.2 Population 25 years and over by highest level of qualifications obtained, Census 30 June 1971 ..... 54
3.3 School students by age, government and non-government schools, 1976 ..... 55
3.4 School students by level of schooling, 1962 to 1976 ..... 56
3.5 School participation rates: school students aged 15 to 18,1962 to 1976 ..... 56
3.6 School participation rates : school students aged 15 to 18, States and Territories, 1976 ..... 56
3.7 Male/female ratio : school students aged 15 years and over, 1962 to 1976 ..... 57
3.8 Male/female ratio : school students aged 15 years and over, States and Territories, 1976 ..... 57
3.9 Secondary school apparent retention rates: government and non-government schools, 1967 to 1976 ..... 57
3.10 Student-teacher ratios in government and non-government schools, 1962 to 1976 ..... 58
3.11 Student-teacher ratios in government and non-government schools, States and Territories, 1976 ..... 58
Table
3.12 Persons aged 15 to 24 years: type of educational institution attended full-time in 1975 by age and birthplace ..... 59
3.13 Students at universities, colleges of advanced education and teachers colleges, and enrolments at technical and further education institutions, 1968 to 1976 ..... 60
3.14 Students aged 17 to 29 years commencing courses at universities, 1962, 1972 and 1976 and colleges of advanced education, 1976 : number and rates by age and sex ..... 61
3.15 University students, 1962, 1974 and 1976, and college of advanced education students, 1974 and 1976 : number and participation rates by age and sex ..... 62
3.16 Students completing courses at universities by field of study and level of course, 1962 to 1976 ..... 63
3.17 Students completing courses at colleges of advanced education by field of study and level of course, 1971 to 1975 ..... 64
3.18 University and college of advanced education students by age, sex and percentage full-time, 1976 ..... 65
3.19 University students by level of course and sex, 1962 to 1976 ..... 66
3.20 University bachelor degree students by field of study and sex, 1962 to 1976 ..... 67
3.21 College of advanced education students by field of study and sex, 1972 to 1976 ..... 68
3.22 University and college of advanced education students by State and home residence, 1976 ..... 69
3.23 Technical and further education : full-time, part-time and correspondence enrolments by academic stream, six States, 1976 ..... 70
3.24 Technical and further education : enrolments by academic stream and field of study, six States, 1976 ..... 70
3.25 Government and private expenditure on education, $1969-70$ to $1975-76$ ..... 71
Chart
3.1 Population 25 years and over by highest level of qualifications obtained, Census 1971 ..... 72
3.2 School participation rates: school students aged 15 to 18,1962 to 1976 ..... 73
3.3 University bachelor degree students by field of study and sex, 1976 ..... 74
3.4 College of advanced education students by field of study and sex, 1976 ..... 74
3.5 Technical and further education enrolments by field of study, 1976 ..... 75

## 4. WORKING LIFE

4.1 Civilian population aged 15 years and over by major activity, percentage distribution and number in labour force, 1964-65, 1973.74 and 1976-77 ..... 79
4.2 Labour force participation rates by age, 196465, 1973-74 and 1976-77 ..... 80
4.3 Labour force participation rates by age and sex, by States, May 1977 ..... 81
4.4 Labour force by occupation group, May 1964 and May 1977 ..... 82
4.5 Labour force by employment status, percentage distribution and number employed, 1964-65, 1973-74 and 1976-77 ..... 82
4.6 Apparent net gain to or loss from the labour force due to overseas migration, by occupation, 1966-67 to 1975-76 ..... 83
4.7 Employed population aged 25 years and over by educational qualifications and occupation, November 1974 ..... 84
4.8 Employed wage and salary earners by duration of current job and age, August 1976 ..... 85
4.9 Employed wage and salary earners by occupation and duration of current job, August 1976 ..... 86
4.10 Persons who left a job in 1975 by reason for leaving job and occupation in that job ..... 87
4.11 Unemployed persons by age and duration of unemployment, 1964-65, 1973-74 and 1976-77 ..... 88
4.12 Unemployed persons: number, unemployment rate and percentage of total unemployed by age group and sex, by States, May 1977 ..... 89
4.13 Persons looking for work by main difficulty in finding work, place of residence and birthplace, May 1977 ..... 90
4.14 Persons aged 15 to 64 years not in the labour force who had had a regular job, by time since last regular job and reason for leaving it, May 1977 ..... 91
4.15 Females not in the labour force, responsible for children under 12 years of age, by whether or not would like a job now and age of children, May 1977 ..... 92
4.16 All employees by weekly earnings from all jobs, age and full-time or part-time status, August 1976 ..... 93
4.17 Average weekly hours worked by employed persons by sex, May 1970 to May 1977 ..... 94
4.18 Distribution of hours worked by employed persons, May 1977 ..... 94
4.19 Average weekly overtime and ordinary time paid for, private employment, full-time adult non-managerial employees, October 1967 to October 1976 ..... 95
4.20 Trade union membership as proportion of employed wage and salary earners, December 1966 to December 1976 ..... 95
4.21 Working days lost per thousand employees per year due to industrial disputes, by industry, 1972 to 1976 ..... 96
4.22 Working days lost per thousand employees per year due to industrial disputes, by States, 1972 to 1976 ..... 96
Chart Page
4.1 Labour force participation rates by sex, 1969 to 1977 ..... 97
4.2 Employed wage and salary earners by duration of current job, August 1976 ..... 98
4.3 Unemployment rates by sex, 1969 to 1977 ..... 99
4.4 Unemployment rates by age groups, 1964-65, 1973-74 and 1976-77 ..... 100
4.5 Unemployed persons by duration of unemployment, 1964-65, 1973-74 and 1976-77 ..... 101
Table 5. INCOME AND EXPENDITURE
5.1 Average weekly earnings per employed male unit, States and Territories, 1966-67 to 1976-77 ..... 105
5.2 Distribution of aggregate family and individual income, 1968-69 and 1973-74 ..... 105
5.3 Household income by source, 1968-69 to 1976-77 ..... 106
5.4 Household income by source, States and Territories, 1975-76 ..... 106
5.5 Household disposable income, savings and private final consumption expenditure, 1968-69 to 1976-77 ..... 107
5.6 Private final consumption expenditure by major components, 1968-69 to 1976.77 ..... 107
5.7 Private final consumption expenditure by major components, States and Territories, 1975-76 ..... 108
5.8 Per capita private final consumption expenditure at current prices, States and Territories, and at average 1966-67 prices, Australia, 1968-69 to $1975-76$ ..... 108
5.9 Consumer price index, weighted average of the six State capital cities, 1966-67 to 1976-77 ..... 109
5.10 Household expenditure by household composition, all capital cities, 197475 ..... 109
5.11 Household expenditure on commodities and services by household income, 1975-76 ..... 110
5.12 Distribution of household expenditure, households with employee heads, by occupation of head of household, all capital cities, 1974-75 ..... 111
5.13 Distribution of household expenditure by birthplace and period of residence in Australia of head of household, all capital cities, 197475 ..... 111
5.14 Distribution of household expenditure, each capital city, 1974-75 and 1975-76 ..... 112
5.15 Average per capita weekly expenditure on selected commodities or services and distribution in relation to average, 1975-76 ..... 113
Chart
5.1 Distribution of household income by source, 1968-69 to 1976-77114
5.2 Per capita household income, disposable household income and private final consumption expenditure, 1968-69 to 1976-77 ..... 115
5.3 Distribution of household expenditure on commodities and services, 1975-76 ..... 116

## 6. SOCIAL SECURITY

6.1 Age pensioners, number and percentage of relevant age group, 1957 to 1977
6.2 Number of age pensioners by age and sex, 30 June 1976
6.3 Age pensioners by marital status, means as assessed and home ownership, percentage distribution, 30 June 1976 ..... 120
6.4 Invalid pensioners, number and percentage of relevant age group, 1957 to 1977 ..... 120
6.5 Number of invalid pensioners by age and sex, 30 June 1976 ..... 121
6.6 Age and invalid pension rates, compared with consumer price index and average weekly earnings, June 1967 to June 1977 ..... 121
6.7 Widow pensioners, number and percentage of relevant age group, 1957 to 1977 ..... 122
6.8 Number of widow pensioners and supporting mother beneficiaries by age group, 30 June 1976 ..... 122
6.9 Widows' pensions and supporting mothers' benefits current at 30 June 1976 by type of pensioner or beneficiary ..... 123
6.10 Women granted Class A widow's pension for the first time, by category, 1966-67 to 1976-77 ..... 123
6.11 Widow pension rates compared with consumer price index and average weekly earnings, June 1967 to June 1977 ..... 124
6.12 Recipients of unemployment and sickness benefits, number and percentage of labour force, 1962 to 1977 ..... 124
6.13 Unemployment benefit recipients by sex, age and duration of benefit, percentage distribution, 30 June 1977 ..... 125
6.14 Unemployment and sickness benefit rates compared with consumer price index and average weekly earnings, June 1967 to June 1977 ..... 126
6.15 Families receiving family allowance (child endowment) by family size, June 1967 to June 1976 ..... 126
6.16 Family allowance (child endowment) rates, 1967 to 1976 ..... 127
6.17 Number of disability pensions, 1967 to 1977 ..... 127
6.18 Number of service pensions, 1967 to 1977 ..... 128
6.19 Number of adoptions, six States and the A.C.T., 1966-67 to 1975-76 ..... 128
6.20 Cash benefits to persons for social security and welfare, Commonwealth Government, 1962 to 1976 ..... 129
6.21 Government outlay on social security and welfare, 1969-70 to 1975-76 ..... 130
Chart
6.1 Women granted Class A widow's pension for the first time, by category, 1966-67 to 1976-77 ..... 131
6.2 Persons receiving unemployment benefits, $1969-70$ to 1976-77 ..... 132
Table

## 7. HOUSING

7.1 Population by type of dwelling occupied, percentage distribution, at Censuses 1947 to 1971 ..... 135
7.2 Population by type of dwelling occupied, percentage distribution, by States, Census 1971 ..... 135
7.3 Dwellings by type, materials of outer walls, and whether occupied, percentage distribution, at Censuses 1947 to 1971 ..... 136
7.4 Dwellings by type, materials of outer walls, and whether occupied, percentage distribution, by States, Census 1971 ..... 137
7.5 Occupied private dwellings by nature of occupancy, percentage distribution, by States, Census 1971 ..... 138
7.6 Nature of housing occupancy by age of head of household and by weekly household income, all capital cities, 1974-75 ..... 139
7.7 Nature of housing occupancy by employment status and occupation of head of household, all capital cities, 197475 ..... 140
7.8 Room occupancy rates : occupied private dwellings by number of persons per room and population in occupied private dwellings by number of persons per room, at Censuses 1947 to 1971 ..... 140
7.9 Standard of aged persons housing by nature of occupancy by pensioner status, November-December 1974 ..... 141
7.10 Standard of aged persons housing by State, November-December 1974 ..... 142
7.11 Loans approved to individuals for the construction or purchase of dwellings for owner occupation by type of lender, 1976 ..... 142
7.12 Number, average value, average size and average value per square metre of new private contract-built houses commenced, capital city statistical divisions, 1970-71 to 1976-77 ..... 143
7.13 Current housing costs in relation to average weekly household income, all capital cities, 1974-75 ..... 144
7.14 Rent and housing price indexes (housing group of the consumer price index), 1966-67 to 1976-77 ..... 144
7.15 Government and private expenditure on housing, 1969-70 to 1975-76 ..... 145
Chart
7.1 Nature of housing occupancy by age of head of household, all capital cities, 1974.75 ..... 146
7.2 Indexes of average commencement value of new private contract-built houses commenced in capital city statistical divisions, average value per square metre and average weekly earnings, 1970-71 to 1976-77 ..... 147
7.3 Nature of housing occupancy by employment status and occupation of head of household, all capital cities, 1974-75 ..... 147
Table
8. CRIMINAL JUSTICE
8.1 Selected crime reported or becoming known to the police, 1966-67 to 1975-76 ..... 151
8.2 Selected crime reported or becoming known to the police, States and Territories, 1975-76 ..... 152
8.3 Persons involved in selected crimes cleared by type of crime, 1973-74 to 1975.76 ..... 153
8.4 Police forces, States and Territories, 30 June 1966 to 30 June 1976 ..... 154
8.5 Convicted prisoners, States and Territories, 30 June 1966 to 30 June 1976 ..... 154
8.6 Convicted prisoners, sex and age distribution, New South Wales and Queensland, 30 June 1974 and 30 June 1975 ..... 155
8.7 Government outlay on law, order and public safety, 1969-70 to $1975-76$ ..... 155
Chart
8.1 Crime rate index for selected crimes, 1970-71 to 1975.76156
Table 9. MIGRANTS
9.1 Overseas-born population by birthplace as a percentage of total population, Censuses 1947 to 1971 ..... 159
9.2 Population by age groups by birthplace of parents, Census 1971 ..... 160
9.3 Nuptial confinements by birthplace of parents, 1946-50 to 1975 ..... 160
9.4 Overseas-born population as a percentage of total population, by States and Territories, Censuses 1947 to 1971 ..... 161
9.5 Settler arrivals, departures and net settler gain by birthplace, annual averages 1961-65 to 1974-76 ..... 162
9.6 Overseas-born heads of families : plans to leave Australia by reason for migrating to Australia, 1973 ..... 163
9.7 Recently arrived overseas-born heads of families : plans to leave Australia by major problem encountered, 1973 ..... 163
9.8 Family type by birthplace of head of family, percentage distribution, Censuses 1966 and 1971 ..... 164
9.9 Marriages between selected birthplace groups, annual averages, 1961-65 to 1971-75 ..... 165
9.10 Inter-birthplace marriage ratios for selected birthplace groups, 1961 to 1975 ..... 166
9.11 Labour force by educational attainment by birthplace, November 1974 ..... 166
9.12 Overseas-born heads of families with overseas qualifications by recognition of qualifications, 1973 ..... 167
9.13 Overseas-born heads of families : occupation overseas by occupation in first full-time job in Australia and occupation in current job, 1973 ..... 167
9.14 Australian and overseas-born population aged 15-24 studying for post-secondary qualifications, Census 1971 ..... 168
Table Page
9.15 Labour force by birthplace, 1973-74 and 1976-77 ..... 168
9.16 Labour force participation rates by birthplace, 1973-74 and 1976-77 ..... 169
9.17 Labour force participation rates and unemployment rates by birthplace and age, 1973-74 and 1976-77 ..... 169
9.18 Occupational distribution of the employed population by birthplace, 1973-74 and 1976.77 ..... 170
9.19 Multiple jobholders by birthplace, August 1973 and August 1975 ..... 171
9.20 All employees : mean weekly earnings in all jobs by birthplace and age, August 1977 ..... 171
9.21 Family income by birthplace of head of family, November 1974 ..... 172
9.22 Nature of dwelling occupancy by birthplace of head of household and period of residence in Australia, percentage distribution, Census 1971 ..... 172
Chart
9.1 Overseas-born population as a percentage of total population, Censuses 1947 to 1971 ..... 173
9.2 Inter-birthplace marriage ratios for selected birthplace groups, 1971 to 1975 ..... 174
9.3 Labour force participation rates by birthplace and sex, 1976-77 ..... 175
APPENDIX
List of tables included in Social Indicators No. 1 not included in this issue ..... 179

TABLE 1.1 COMPONENTS OF POPULATION GROWTH

| Increase |  |  | Rates of growth |  |  | Population of end of period (a) |

(a) Excludes full-blood Aboriginals prior to 1961. (b) Excludes troop movements from 1939 to 1947.

Natural increase refers to the excess of births over deaths. Net migration is the difference between overseas arrivals and departures. Movements of defence personnel were excluded for the period between September 1939 to June 1947, but included for all other periods. Calculations of net migration for periods after January 1971 are based on permanent and long-term movements only. (Long term includes visits to or absences from Australia for one year or longer.) From 30 June 1933 to 30 June 1971 net migration represents the excess of all arrivals over all departures. Prior to 30 June 1933, net migration includes discrepancies disclosed by various censuses. Population estimates and rates of growth after 1971 incorporate revisions resulting from an examination of evidence of under-enumeration in the 1976 and 1971 censuses. The estimated population at 31 December 1970 used to compute population increases and rates of growth thereafter was $12,799,600$. The average annual rates of growth due to natural increase and to net migration are computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. (These rates will therefore differ slightly from the corresponding rates of increase as conventionally calculated for demographic purposes, that is, as rates per 1,000 of mean population.) Discrepancies between the sum of the rates of growth due to natural increase and net migration and the rate of total increase are due to the intercensal adjustment. (Prior to the 1947 Census there were no such discrepancies, as the intercensal adjustment was incorporated in net immigration.)

|  | Years |  |  |  |  |
| Median age | 29.4 | 30.3 | 31.2 | 32.2 | 32.9 |

(a) At 30 June.

The projection has as its starting point provisional estimates of the population as at 30 June 1977. The estimates take into account results of the 1976 Census and of the post-enumeration survey adjustments to the 1976 Census. Apart from this, the procedures and assumptions of this projection are the same as those used in the projections published in Projections of the Population of Australia, 1977 to 2001, Base Year 1976, Preliminary Estimates (Catalogue No. 3204.0. Previously Ref. No. 4.13).
Mortality is based on the $1970-72$ experience, and age-specific rates derived from the Australian Life Tables $1970-72$ have been applied to the base year population and future population intake except that the survival rate at age 0 was assumed to improve slightly (at a decreasing rate) annually.
Fertility assumptions have been made separately for first births, second births and third and higher order births such that the total fertility rate is brought to 2,117 per thousand women by 1984 . This total fertility rate, which is equal to a net reproduction rate of one, is assumed to continue unchanged for the remainder of the projection period.

The level of net migration ( 50,000 per year) is selected for illustrative purposes only.

TABLE 1.6 DEPENDENT AGE RATIOS, 1954 TO 1976 (a), AND PROJECTED DEPENDENT AGE RATIOS, 1981 TO 2001 (b)

| Age group | 1954 | 1961 | 1966 | 1971 | $1976(p)$ |

| Dependent age ratio | 0.53 | 0.51 | 0.50 | 0.50 |  |

PROJECTED POPULATION 1981 TO 2001,
WITH NET MIGRATION OF 50,000 P.A. AFTER 30 JUNE 1977

| Age group | 1981 | 1986 | 1991 | 1996 | 2001 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $0-14$ | 0.39 | 0.36 | 0.36 | 0.36 |  |
| 65 and over | 0.14 | 0.14 | 0.15 | 0.15 | 0.35 |
| Dependent age ratio | 0.53 | 0.51 | 0.51 | 0.51 | 0.49 |

(a) Census dates. (b) At 30 June.

The dependent age ratio is the ratio of "dependent" groups ( $0-14$ and 65 and over) to the population in the age group ( 15 to 64 ) from which the work force is usually drawn.

| 1975 |  |  |  |  |  |  |  |  |  |

(a) Excludes full-blood Aboriginals before 1966. (b) Includes births to mothers aged under 15 . (c) Includes births to mothers aged 50 and over.

The total fertility rate is equal to the sum of the age-specific rates for each five-year age group, multiplied by five, and divided by 1,000 . It represents the number of children that would be borne to a woman who experienced throughout her child-bearing life the age-specific rates for the year shown. The gross reproduction rate is the number of these children who would be females, given the current ratio of female to total births. It therefore relates the total fertility rate to the capacity of the population to reproduce itself. The net reproduction rate is the result of adjusting the gross reproduction rate for expected mortality among females up to the end of their child-bearing period.

For further information on Tables 1.7 to 1.12, see Births (Catalogue No. 3301.0. Previously Ref. No. 4.4) and Demography (Catalogue No. 3101.0. Previously Ref. No. 4.9).

| 1935-36 | 42 | 218 | 209 | 101 | 36 |  |  | (3.03) |
| 1940-41 | 46 | 203 | 188 | 88 |  |  |  | (2.63) |
| 1945-46 | 49 | 177 | 175 |  |  |  |  | (2.01) |
| 1950-51 | 50 | 159 |  |  |  |  |  | (1.05) |
| 1955-56 | 46 |  |  |  |  |  |  |  |

The figures in Table 1.10 are actual fertility rates experienced by women born in the year shown, and of the ages shown. The total generation fertility rate is the sum of the rates per 1,000 women in each five-year age group born in the given period, multiplied by five, and divided by 1,000 . It represents the cumulated number of children born per woman of the generation shown who survived to the exact age 50 . For recent generations whose child-bearing years are not complete the cumulated fertility rate to the end of 1975 is shown in brackets. No adjustment has been attempted for possible differential fertility of the women who dropped out through death or emigration or of those who were added as a result of immigration. Ex-nuptial as well as nuptial births are included. The last figure in each column includes all births recorded in 1975. The year of birth is shown as two years (1955-56, for example); this reflects the fact that, for example, mothers who reported their age as 19 in the birth document in 1975 could have been born in either 1955 or 1956.

TABLE 1.11 DISTRIBUTION OF TOTAL FERTILITY, AND MEDIAN DURATION OF MARRIAGE AT FIRST CONFINEMENT

Distribution of total fertility

| Year | Distribution of total fertility |  |  |  |  |  |  |  | Median duration of marriage of first confinement |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Fertility within marriages with: |  |  |  |  | Total nuptial | $\begin{gathered} \text { Ex. } \\ \text { nuptial } \end{gathered}$ | Total fertility |  |
|  | No previous children |  | $\stackrel{2}{\text { previous }}$ children | 3 previous children | 4 or more previous children |  |  |  |  |
|  | - Per cent - |  |  |  |  |  |  |  | Years |
| ANNUAL AVERAGES |  |  |  |  |  |  |  |  |  |
| 1921-30 | 27.9 | 21.6 | 14.8 | 10.2 | 21.1 | 95.5 | 4.5 | 100.0 | 0.96 |
| 1931-40 | 32.4 | 23.4 | 14.5 | 9.0 | 16.4 | 95.8 | 4.2 | 100.0 | 1.04 |
| 1941-50 | 35.5 | 27.3 | 15.4 | 7.8 | 9.9 | 95.9 | 4.1 | 100.0 | 1.34 |
| 1951-60 | 31.5 | 27.2 | 18.0 | 9.6 | 9.4 | 95.7 | 4.3 | 100.0 | 1.22 |
| 1961-70 | 30.4 | 25.9 | 17.6 | 9.8 | 10.1 | 93.7 | 6.3 | 100.0 | 1.26 |
| ANNUAL |  |  |  |  |  |  |  |  |  |
| 1971 | 32.7 | 27.0 | 16.3 | 8.0 | 7.3 | 91.3 | 8.7 | 100.0 | 1.59 |
| 1972 | 33.2 | 28.3 | 15.7 | 7.3 | 6.4 | 90.9 | 9.1 | 100.0 | 1.70 |
| 1973 | 33.3 | 29.8 | 15.3 | 6.6 | 5.7 | 90.7 | 9.3 | 100.0 | 1.85 |
| 1974 | 34.1 | 31.0 | 15.1 | 6.2 | 4.6 | 90.9 | 9.1 | 100.0 | 1.99 |
| 1975 | 34.1 | 31.6 | 14.9 | 5.6 | 4.0 | 90.2 | 9.8 | 100.0 | 2.10 |

The distribution in Table 1.11 relates to total fertility not in terms of births, but of confinements (resulting in live births). The total fertility rate for 1975 on this basis is 2.20, compared with 2.22 for births in Table 1.7. See Table 1.7 for definition of total fertility rate. The column heads relating to previous issue refer to the previous number of live births to the mother within her current marriage.

TABLE 1.12 EX-NUPTIAL CONFINEMENTS AND CONFINEMENTS WITHIN THE FIRST EIGHT MONTHS OF MARRIAGE

| Year | Ex-nuptial confinements as percentage of total for age group, mother aged: |  |  |  |  | Confinements within the first eight months of marriage (a) as percentage of total for age group, mother aged: |  |  |  |  |

| 1976 | 142 | 116 | 26 | 1,642 | 1,602 | 39 |

(a) Excludes troop movements from 1939 to 1947.

Permanent movement consists of settlers arriving and Australian residents departing permanently. Long-term movement comprises visitors arriving and Australian residents departing temporarily with the intention to stay in Australia or overseas, for twelve months or more, together with the departure of visitors and arrival of Australian residents who have stayed in Australia or abroad for twelve months or more. Total movement also includes short-term movements (i.e. those of less than twelve months duration).

For further information, see Demography (Catalogue No. 3101.0. Previously Ref. No. 4.9), Overseas Arrivals and Departures (Catalogue No. 3404.0. Previously Ref. No. 4.23) and Overseas Arrivals and Departures (Catalogue No. 3402.0. Previously Ref. No. 4.1).

| Average number of |  |  |  |  |  |
| children of the marriage (a) | 1.2 | 1.3 | 1.2 | 1.3 | 1.4 |

(a) The term "children of the marriage" refers to the children of the marriage living and under 21 at the time of petition as defined in the Matrimonial Causes Act, 19591966.

The table refers to the number of decrees of dissolution granted in the years shown. The rates per 1,000 existing marriages are based on the duration of marriages of currently married women, excluding those permanently separated for whom no details of duration of marriage are available. For further information, see Divorces (Catalogue No. 3307.0. Previously Ref. No. 13.1).

| Total, head and others (no spouse) | 313 | 332 | 9.5 | 8.7 |
| Total, primary family units | 3,152 | 3,671 | 95.8 | 96.8 |
| Secondary family units | 137 | 121 | 4.2 | 3.2 |
| All family units | 3,289 | 3,792 | 100.0 | 100.0 |

Family units are identified from the personal information in the Census schedule supplied for each household. A household is "a person or group of persons living as a domestic unit with common eating arrangements". Within each household, there may be more than one family unit. The primary family unit consists in general of the person described as the head of the household, together with his or her spouse, any ancestor of the head or the spouse, and any unmarried son, daughter, brother or sister of the head or spouse, unless they have a child in the household. ("Unmarried" includes divorced, separated and widowed, and "spouse" includes de facto spouse.) A secondary family unit exists if any person besides the head, spouse or ancestor has a spouse or child(ren) in the household. It consists of that person with his or her spouse or child(ren). Any child(ren) under 16 in the household unaccompanied by a parent is included in the primary family unit, whether related to another member of it or not. Although a primary family unit may be one person only, a secondary family unit must be two or more persons. Persons in the household include only those who were there on the night of the Census; and the same is therefore true of the composition of the family unit.

TABLE 1.22 NUMBER OF FAMILY UNITS (a) BY TYPE AND NUMBER OF PERSONS IN FAMILY UNITS

| Type of family units (a) | Number of family units |  | Persons in family units |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Cerebrovascular disease | 1,823 | 1,932 | 2,322 | 2,334 | 2,233 | 2,352 | 2,047 | 16 |
| Cancer | 1,599 | 1,710 | 1,896 | 1,904 | 1,998 | 2,035 | 2,098 | 16 |
| Heart disease (other than ischaemic, hypertensive and rheumatic) | (b) 1,791 | (b) 1,347 | 847 | 859 | 838 | 856 | 775 | 6 |

(a) Excludes particulars of full-blood Aboriginals. (b) The large drop in rates from 1967 to 1971 is due mainly to the difficulty in matching codes from the 8th Revision of the International Classification of Diseases with those from the 7th Revision. Also it is not possible to break down numbers of deaths beyond the 3 -digit classification for the earlier years.

See footnotes (a) and (b) on previous page.

Causes of death are classified according to the International Classification of Diseases (I.C.D.). In the periods shown in Tables 2.3 to 2.5, three Revisions of the I.C.D. were used; the 6th Revision up to 1957, the 7th Revision from 1958 to 1967 and the 8th from 1968 on. Terminology may differ between these Revisions and that used in these tables: "Cancer" is described as "malignant neoplasms" in I.C.D.; "ischaemic heart disease" is sometimes referred to as "arteriosclerotic heart disease"; "cerebrovascular disease" is more commonly known as "stroke". For further information on Tables 2.3 to 2.7, see Deaths (Catalogue No. 3302.0. Previously Ref. No. 4.8), Causes of Death (Catalogue No. 3303.0. Previously Ref. No. 4.7) and Perinatal Deaths (Catalogue No. 3304.0. Previously Ref. No. 4.29).

TABLE 2.5 STANDARDISED DEATH RATES FOR SELECTED CAUSES
(Deaths per 100,000 population standardised for age)

| Cause of death | $1953-55(a)$ | $196062(a)$ | $1965-67$ | $1970-72$ | 1973 | 1975 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  | MALES |  |  |  |

(a) Excludes particulars of full-blood Aboriginals prior to 1967.

Standardised death rates for a series of years are obtained by applying the age-specific death rates for those years to the age distribution of a particular year. In the case of Table 2.5 this year is 1954 . This provides an average death rate for all ages from which the effects of changes in age distribution during the period have been removed. Because the rates in Table 2.5 are standardised for age distribution they cannot be used to show the percentage of all deaths due to particular diseases. This information is in Table 2.4.

TABLE 2.6 INFANT DEATHS AND STILLBIRTHS (a)

| Year (b) | Stillbirths | Deaths under four weeks of age | Deaths under one year of age | Stillbirth rate | Perinatal death rate | Infant mortality rate | Combined infant mortality and stillbirth rate |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1949 | 3,554 | 3,266 | 4,587 | 19.2 | 36.9 | 25.3 | 44.1 |
| 1954 | 3,226 | 3,275 | 4,546 | 15.7 | 31.6 | 22.5 | 37.8 |

| Aust. | 2,414 | 2,330 | 3,325 | 10.3 | 20.2 | 14.3 | 24.4 |

A stillbirth is defined as a foetal death where the period of gestation is 20 weeks or longer (before 1972, 28 weeks or longer). The stillbirth rate is the number of stillbirths per 1,000 births, live and still.

In this publication, the perinatal death rate is the number of stillbirths (as defined above) plus deaths in the first four weeks of life, per 1,000 total births (live and still) in a year. This is a wider definition than is used internationally, and the details shown in Table 2.6 should not be compared with similar details for other countries. The World Health Organisation defines the perinatal death rate as the ratio of the number of stillbirths (after 28 weeks gestation), plus the number of deaths in the first week of life, to the number of live births in that year. If this definition were adopted for Australia, the perinatal death rate in 1973 would have been 19.3 deaths per 1,000 live births. The infant mortality rate is the number of deaths of children under one year of age per 1,000 live births in that year. The combined infant mortality and stillbirth rate is the number of deaths under one year and stillbirths per 1,000 births, live and still.

TABLE 2.8 INFANT MORTALITY RATES, NORTHERN TERRITORY ABORIGINALS AND AUSTRALIA

| Year | Number of deaths under one year of age |  | Infant mortality rate (deaths under one per 1,000 live births) |  |  |

A.B.S. : Australian Bureau of Statistics, Darwin Office. N.T.M.S. : Northern Territory Medical Service.

In the absence of any distinction between Aboriginals and others in the registration of births and deaths, there are no official statistics of Aboriginal infant mortality. The estimates for Aboriginal infant mortality in the Northern Territory in Table 2.8 are from two sources :
A.B.S. estimates - Aboriginal deaths determined in the Darwin Office of the Australian Bureau of Statistics, from details such as name, registering authority, and whether tribally married, shown on the information sheet accompanying the death registration certificate. Aboriginal births are identified in a similar way.
N.T.M.S. estimates - The Northern Territory Medical Service keeps records of births and deaths of Aboriginals according to date of occurrence. The identification of Aboriginals is made by staff of Northern Territory hospitals, from observation and local knowledge.

|  |  |  | Number |  |  |
| Total number of abortions notified | 2,519 | 2,672 | 2,833 | 2,852 | 2,916 |

Detailed statistics of abortions performed are available only for South Australia. South Australian law was amended in 1969 to allow an abortion to be performed where (1) an abortion is considered by a doctor immediately necessary to save the life of the pregnant woman, or prevent grave injury to her physical or mental health, or (2) in the opinion of two doctors the continuance of the pregnancy would endanger her life or physical and mental health more than the abortion would, or (3) that there is a substantial risk that without termination of the pregnancy the child would suffer such physical or mental abnormalities as to be seriously handicapped. Further information may be found in the South Australian Year Book (Catalogue No. 1301.4).

| Accidents involving casualties | 78.9 | 43.7 | 53.6 | 83.5 | 54.8 | 56.9 | 113.0 | 49.6 | 62.6 |
| Persons killed | 3.6 | 3.2 | 3.9 | 3.2 | 3.2 | 3.8 | 9.9 | 2.3 | 3.5 |
| Persons injured | 107.5 | 60.8 | 71.3 | 114.3 | 73.2 | 82.5 | 158.1 | 68.2 | 85.5 |

(a) See footnote (a) to Table 2.11. (b) Rates are calculated using number of motor vehicles on register at 30 June 1976. (c) Rates are calculated using total kilometres travelled in twelve months ended 30 September 1976, as reported in the Survey of Motor Vehicle Usage.

Investigations recently conducted by the ABS have revealed that, in spite of the requirement for accidents involving casualties to be reported to the police, some casualty accidents, for the most part involving less severe injuries, have not in fact been reported. In addition, procedural changes adopted in recent years have led to a decrease in the number of accidents being included in the reporting system. Precise measurement of the extent to which these factors have influenced the statistics has not been possible, but they are likely to have operated to a varying degree in all States and Territories. This should be noted when using these statistics for the analysis of trends.

For further information on Tables 2.11 and 2.12 see Road Traffic Accidents Involving Casualties (Catalogue No. 9403.0. Previously Ref. No. 14.9) and Survey of Motor Vehicle Usage (Catalogue No. 9202.0. Previously Ref. No. 14.4).

| treatment in |  |  |  |  |  |  |  |  |  |
| Disease class |  |  |  |  |  |  |  |  |  |

(a) Examinations, investigations, etc., without reported diagnosis, and special cases without current complaint or illness.

The statistics for Queensland cover all public hospitals (other than mental and repatriation) and private hospitals licensed by the State Health Department. The statistics for Western Australia refer to patients treated in all public and private hospitals which provide treatment for medical, surgical and obstetrical cases. They exclude patients treated in hospitals approved under the Mental Health Act for the treatment of mental illness. The classification of diseases used is the International Classification of Diseases 8th Revision. For further information see Patients Treated in Hospitals, Queensland published by the Queensland Office of the Bureau, and Hospital In-patient Statistics, published by the Western Australian Office of the Bureau.

(a) New South Wales, Queensland, South Australia, Western Australia and Tasmania.

In May 1968 and May 1974, the Bureau conducted sample surveys of the incidence of chronic illnesses, injuries and impairments. The results of the surveys were published in the bulletin Chronic Illnesses, Injuries and Impairments (Catalogue No. 4305.0. Previously Ref. No. 17.3). A condition (illness, injury or impairment) was considered "chronic" if the respondent claimed to have suffered from it at the time of the interview and had suffered from it for more than six months. Certain recurrent illnesses, which respondents may not have been suffering from at the time of the interview, were also classed as chronic illnesses. A chronic condition was classified as "limiting" if the respondent stated that his activities were limited by the condition. Each chronic limiting condition reported was classified according to the International Classification of Diseases, 8th Revision.

For further information on cause and nature of handicap, see Tables 2.13 and 2.14 in Social Indicators No. 1, 1976 (Catalogue No. 4101.0. Previously Ref. No. 13.16).

| Other non-psychotic mental disorders | $19.0$ | 15.4 | 14.9 | 14.6 | 14.6 |  |
| No psychiatric diagnosis | 4.0 | 4.3 | 4.7 | 7.4 | 5.5 | 15.2 5.9 |
| Total | 204.5 | 187.8 | 179.4 | 185.7 | 181.9 | 169.2 |

(a) Rates for $1971-72$ onwards have been adjusted in accordance with revised mean population figures. Thus a break in the series exists between 1970-71 and 1971-72.

Tables 2.17 and 2.18 relate to "first admissions", persons who received for the first time in New South Wales in-patient care in a psychiatric centre. The statistics cover patients in all State psychiatric institutions, authorised private psychiatric hospitals and psychiatric units of general hospitals. The diagnoses shown are groupings of the more specific diagnoses of the International Classification of Diseases, 8th Revision. Further information may be obtained from Statistics of In-patients in Psychiatric Centres, 1974-75 published by the New South Wales Office of the Bureau.

TABLE 2.19 ESTIMATED NUMBER OF DOCTORS AND DENTISTS

|  | June |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1961 (a) | 1966 (a) | 1971 (a) | 1972 | 1973 | 1974 | 1975 | 1976 |
| Number of doctors (b) | 12,320 | 14,440 | 17,243 | 17,972 | 18,700 | 19,500 | 20,500 | 21,600 |
| Number of dentists (b) | 3,672 | 3,683 | 4,064 | п.a. | 4,233 | п.a. | n.a. | 4,696 |
| Persons per doctor (c) | 856 | 803 | 750 | 733 | 716 | 697 | 672 | 644 |
| Persons per dentist (c) | 2,862 | 3,150 | 3,139 | n.a. | 3,102 | n.a. | n.a. | 2,964 |

(a) Census figures. (b) Includes those in universities, working for public authorities, in the defence forces, or estimated to be temporarily overseas. (c) Population divided by number of doctors or dentists.

TABLE 2.20 ESTIMATED SUPPLY OF NUTRIENTS AVAILABLE FOR CONSUMPTION, 1974-75 (Per head per day)

| (Per head per day) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Nutrient | Unit | Recommended dietary allowance (a) | Supply available (b) | Percentage of recommended allowance |
| Protein | grams | 58 | 102 | 178 |
| Calcium | milligrams | 450 | 976 | 217 |
| Iron | milligrams | 10 | 15 | 150 |
| Vitamin A (retinol activity) | micrograms | 669 | 1,557 | 223 |
| Vitamin C (ascorbic acid) | milligrams | 33 | 78 | 238 |
| Vitamin B1 (thiamine) | milligrams | 1 | 1 | 166 |
| Riboflavin | milligrams | 1 | 3 | 239 |
| Niacin | milligrams | 14 | 38 | 274 |
| Energy value | kilocalories | 2,126 | 3,264 | 154 |

(a) Recommended by the National Health and Medical Research Council. (b) Allowance is made for losses due to processing. No allowance is made for losses of nutrients due to storage and cooking.

TABLE 2.21 PERCENTAGE OF TOTAL ENERGY SUPPLY DERIVED FROM VARIOUS FOOD TYPES (Per cent)

| Year | Grain products | Milk and milk products | Meat | Oils and fats | Sugar and syrups | Vegetables | Fruit and fruit products | Other <br> foods and beverages | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1948-49 | 28 | 10 | 19 | 11 | 18 | 4 | 4 | 6 | 100 |
| 1953-54 | 28 | 10 | 20 | 13 | 17 | 4 | 3 | 5 | 100 |
| 1958-59 | 27 | 10 | 21 | 12 | 18 | 4 | 3 | 5 | 100 |
| 1963-64 | 26 | 11 | 21 | 11 | 18 | 4 | 3 | 6 | 100 |
| 1968-69 | 26 | 12 | 18 | 11 | 17 | 5 | 3 | 8 | 100 |
| 1972-73 | 26 | 13 | 17 | 10 | 17 | 5 | 3 | 9 | 100 |
| 1973-74 | 27 | 12 | 16 | 10 | 18 | 4 | 3 | 10 | 100 |
| 1974-75 | 26 | 10 | 20 | 8 | 18 | 4 | 4 | 8 | 100 |

Estimates of nutrient intake and energy supplies are based on estimates of quantities of foodstuffs consumed. The method of estimating is :

Apparent consumption $=$ (Production + Imports + Opening stocks) minus (Exports + Ships' stores + Usage of processed food + Non-food usage + Wastage + Closing stocks).

For further information on Tables 2.20 to 2.22 see Apparent Consumption of Foodstuffs and Nutrients (Catalogue No. 4306.0. Previously Ref. No. 10.10).

TABLE 2.22 ESTIMATED APPARENT CONSUMPTION OF ALCOHOLIC DRINKS AND TOBACCO PER PERSON 15 YEARS AND OVER

| Year | $\begin{gathered} \text { Beer } \\ \text { (litres) } \end{gathered}$ | Estimated Alcohol equivalent for beer (a) (litres) | Wines |  | Estimated alcohol equivalent for wines (a) (litres) | Spirits <br> (litres alcohol) | Estimated total alcohol (litres) | Tobacco (kilograms) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Unfortified (litres) | Fortified (litres) |  |  |  |  |
| $1965-66$ | 156.3 | 7.5 | 3.6 | 5.0 | 1.3 | 1.2 | 10.0 | 3.37 |
| 1966-67 | 160.1 | 7.7 | 4.4 | 5.2 | 1.5 | 1.2 | 10.4 | 3.21 |
| 1967-68 | 168.4 | 8.1 | 5.5 | 5.4 | 1.6 | 1.3 | 11.0 | 3.33 |
| 1968-69 | 169.6 | 8.1 | 6.1 | 5.5 | 1.7 | 1.3 | 11.1 | 3.38 |
| 1969-70 | 173.7 | 8.3 | 6.9 | 5.7 | 1.8 | 1.4 | 11.5 | 3.36 |
| 1970-71 | 177.6 | 8.5 | 6.9 | 5.4 | 1.8 | 1.5 | 11.8 | 3.36 |
| 1971.72 | 178.5 | 8.6 | 7.4 | 5.2 | 1.8 | 1.6 | 12.0 | 3.38 |
| 1972-73 | 183.9 | 8.8 | 8.7 | 5.2 | 2.0 | 1.8 | 12.6 | 3.35 |
| 1973-74 | 196.8 | 9.4 | 10.0 | 5.5 | 2.2 | 1.8 | 13.4 | 3.42 |
| 1974-75 | 198.4 | 9.5 | 11.6 | 5.7 | 2.4 | 1.7 | 13.6 | 3.42 |
| 1975.76 | 187.8 | 9.0 | 12.7 | 5.1 | 2.4 | 1.6 | 13.0 | 3.21 |

(a) The estimated alcohol equivalent for beer and wines has been calculated by applying factors of $\mathbf{4 . 8 \%}$ alcohol content for beer, $11.5 \%$ for unfortified wine and $18.5 \%$ for fortified wine.

Estimated consumption of alcoholic drinks and tobacco (Table 2.22) is derived in the same way as estimated consumption of foodstuffs per head (Table 2.21). However it is expressed per person 15 and over. Tobacco consumption is the sum of the estimated tobacco content of cigarettes and cigars consumed and all loose tobacco.

TABLE 2.23 POPULATION 18 YEARS AND OVER BY AVERAGE DAILY CONSUMPTION OF ALCOHOL BY SEX, FEBRUARY 1977

| Average daily consumption of alcohol during week before interview | Males | Females | Persons | Males | Females | Persons |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | - '000 - |  | - Per cent - |  |  |
| None | 1,121 | 2,360 | 3,481 | 24.9 | 51.0 | 38.2 |
| Light consumption | 2,559 | 2,193 | 4,752 | 56.9 | 47.4 | 52.1 |
| Medium consumption | 628 | 63 | 691 | 14.0 | 1.4 | 7.6 |
| Heavy consumption | 125 | $\dagger 10$ | 135 | 2.8 | $\dagger 0.2$ | 1.5 |
| Very heavy consumption | 61 | * | 65 | 1.4 | * | 0.7 |
| Total who drank | 3,373 | 2,269 | 5.642 | 75.1 | 49.0 | 61.8 |
| Total persons | 4,494 | 4,629 | 9,123 | 100.0 | 100.0 | 100.0 |

- Subject to sampling variability too high for most practical purposes.
$\dagger$ Estimates with standard error of between 20 and 30 per cent.

Tables 2.23 to 2.26 were derived from a survey of alcohol and tobacco consumption patterns of persons aged 18 years and over in February 1977. In surveys of this kind, consumption is usually under-reported, and comparison with statistics of the overall supply of tobacco and alcohol products in Australia indicates that there has in fact been some under-reporting in this survey, particularly of alcohol consumption.

In Tables 2.23 and 2.25 light consumption is defined as less than 40 grams of alcohol per day. Medium consumption is at least 40 but less than 80 grams; heavy consumption is at least 80 but less than 120 grams; and very heavy consumption is at least 120 grams of alcohol per day. 80 grams of alcohol is approximately equal to 8 to 9 nips of spirit or 10 two-ounce glasses of fortified wine or 1.1 bottles ( 750 mls size) of table wine, or 7 ten-ounce glasses of beer.

For further information on Tables 2.23 to 2.26 see Alcohol and Tobacco Consumption Pattems, February 1977 (Preliminary) (Catalogue No. 4308.0).

TABLE 2.24 POPULATION 18 YEARS AND OVER BY NUMBER OF PACKETED CIGARETTES SMOKED PER DAY BY SEX, FEBRUARY 1977 (a)

| Number of packeted <br> cigarettes smoked <br> per day | Males | Females | Persons | Males | Females | Persons |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $-000-$ |  |  | - Per cent - |  |
| None | 2,891 | 3,299 | 6,190 |  |  |  |
| $1-10$ | 352 | 510 | 862 | 7.3 | 7.3 | 67.9 |
| $11-20$ | 714 | 636 | 1,350 | 15.9 | 11.0 | 9.4 |
| $21-40$ | 476 | 171 | 647 | 10.6 | 3.7 | 14.8 |
| 41 or more | 61 | $\dagger 13$ | 74 | 1.4 | $\dagger 0.3$ | 7.1 |
| Total who smoked | 1,603 | 1,330 | 2,933 | 35.7 | 29.7 | 0.8 |
| Total persons | 4,494 | 4,629 | 9,123 | 100.0 | 100.0 | 10.1 |

(a) Excludes "roll your own" cigarettes.
$\dagger$ Estimates with standard error of between 20 and 30 per cent.

TABLE 2.25 ASSOCIATION OF ALCOHOL CONSUMPTION WITH CIGARETTE SMOKING, FEBRUARY 1977

| A verage daily consumption of alcohol during week before interview | Number of cigarettes smoked per day (a) |  |  | Total |
| :---: | :---: | :---: | :---: | :---: |
|  | None | 1.20 | 21 or more |  |
|  | Per cent |  |  |  |
| None | 30.2 | 6.5 | 1.4 | 38.2 |
| Light to medium consumption | 36.7 | 17.2 | 5.8 | 59.7 |
| Heavy to very heavy consumption | 0.9 | 0.5 | 0.8 | 2.2 |
| Total | 67.9 | 24.2 | 7.9 | 100.0 |
| Average daily consumption of alcohol in grams (b) | 17.7 | 21.3 | 39.3 | 21.0 |

(a) Excludes "roll your own" cigarettes. (b) Relates only to those persons who drank during the week before the interview.

TABLE 2.26 NUMBER OF SMOKERS OF TESTED BRANDS OF CIGARETTES
BY DAILY INTAKE OF TAR BY SEX OF SMOKER,

(a) Grants for private capital purposes, and subsidies. (b) Mainly expenditure on existing assets.

Table 2.28 is derived from data in two Public Authority Finance bulletins (Federal Authorities (Catalogue No. 5502.0. Previously Ref. No. 5.12), and State and Local Authorities (Catalogue No. 5504.0. Previously Ref. No. 5.43)), together with estimates of private expenditure on health from the Australian National Accounts, National Income and Expenditure (Catalogue No. 5204.0. Previously Ref. No. 7.1). The estimates are presented according to the "economic type" and "purpose" classifications of the Australian national accounts. All levels of government - Commonwealth, State and local - are included, in consolidated form. Final consumption expenditure is expenditure on new goods and services, including wages and salaries of employees. Total expenditure is free of duplication between government and private sectors as it excludes transfers between sectors. It is divided according to sector of spending, not of financing. Sector of financing cannot be derived precisely from the table, as some of the transfers to the private sector are not spent by that sector on goods and services classified to health - for example, milk for school children.

At the 1971 Census, persons not attending school were asked to mark the grade in the current local system corresponding to the highest grade which they had attended. The question on schooling was varied appropriately in schedules used in the different States. Grades (or forms) in each State or Territory were assigned to an approximately comparable level by means of the following table:

| State or Territory | Grade or form reported |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Primary school |  |  |  |  | Secondary school |  |  |  |  |
| N.S.W., Vic., A.C.T., Tas. | 1,2 | 3 | 4 | 5 | 6 | 1 | 2 | 3 | 4 | 5,6 |
| Qld | 1,2,3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| S.A., N.T. | 1,2,3 | 4 | 5 | 6 | 7 | 1 | 2 | 3 | 4 | 5 |
| W.A. | 1,2,3 | 4 | 5 | 6 | 7 | 1 | 2 | 3 | 4 | 5,6 |
| Level assigned | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

Table 3.1 includes 3,580 persons aged 20 years and over still attending school, classified according to the level currently attended. The table excludes overseas visitors to Australia.

For the 1971 Census, qualifications were classified to five major levels, determined as follows: Trade : Formal recognition of competence in a skilled manual occupation which is usually obtained through an apprenticeship and satisfactory progress in part-time studies concurrent with practical training (e.g. plumber, fitter, compositor, carpenter, hairdresser). Technician : A level which requires theoretical knowledge, as well as practical skills, e.g. wool-classing or nursing. Certificates issued by technical colleges following periods of 4 or 5 years part-time study after passing intermediate or final secondary school examinations are classified as 'technician' level. Non-degree tertiary : A level relating to qualifications obtained following substantial advanced study beyond matriculation conferred by colleges of advanced education (including teachers colleges), other institutions and professional associations, e.g. Associate of Australian Society of Accountants, Diploma in Business Studies, Teaching Certificate, Diploma of Engineering. Bachelor degree : Usually conferred by a university following a period of at least 3 years full-time study or equivalent part-time study and includes post-graduate diplomas. Higher degree : Conferred by a university in recognition of substantial studies beyond the Bachelor level. Some qualifications could not be classified to any of the above levels. Most of these relate to short specialised courses in such fields as typewriting and shorthand, farm book-keeping, dressmaking, automotive maintenance.

(a) Ratio of the number of students in the final year of secondary school in year ( $Y$ ) to the number of students entering secondary school in year ( $Y-5$ ) for New South Wales, Victoria, Tasmania and the Australian Capital Territory or year (Y-4) for Queensland, South Australia, Western Australia and the Northern Territory. (b) Because of students transferring between systems and repeating grades and because of migration overseas, final year enrolments are not strictly comparable with entry year enrolments. In Tasmania students may attempt the Higher School Certificate in Year 11 or 12 but only Year 12 figures have been used.

The student-teacher ratio is the total number of students divided by the total number of teachers. For this reason it does not measure average class size. Teachers for this purpose includes teaching staff, principals and head teachers, whether permanent or temporary, but excludes teachers-in-training, teachers on leave without pay, and other teachers engaged wholly in advisory, administrative or other non-teaching duties. Variations occur from State to State in the treatment of special-purpose and casual teachers, and the classification of teachers who, in addition to primary or secondary teaching, are also engaged in other duties. The total number of teachers is derived by adding the number of full-time teachers and the equivalent full-time units of part-time teachers. The methods used for calculating equivalent full-time units of part-time teaching vary from State to State and even between schools within States. Most schools base their calculations on hours worked, number of class periods, or proportion of full-time salary.

(a) Trainee teachers enrolled at teachers colleges and not also attending universities or colleges of advanced education. (b) By 1 July, 1973 all former government teachers colleges and kindergarten teachers colleges were colleges of advanced education. Statistics of teachers colleges relate only to a small number of private teachers colleges. (c) Statistics for T.A.F.E. relate to major T.A.F.E. authorities in the six States and to enrolments in courses rather than students; no adjustment has been made for students enrolled in more than one course. As a result it is not possible to add the columns of this table to obtain a total for all institutions. (d) Estimated.

(a) The definitions used are as follows: (i) Universities, 1962 - Students who have enrolled at a particular university for the first time. 1972 and 1976 - Students commencing their first bachelor degree course. (ii) Colleges of advanced education, 1976 - Students who have not previously commenced a tertiary level course at a university, college of advanced education or teachers college. (b) Students commencing courses as a percentage of the population of the same age and sex. (c) As at 31 December in previous year.

For further information on Tables 3.14 to 3.22 see University Statistics, Part 1 Students (Catalogue No. 4208.0. Previously Ref. No. 13.7) and Colleges of Advanced Education (Catalogue No. 4206.0. Previously Ref. No. 13.10).

The large increase in the teacher education field of study statistics for the year 1973, 1974 in the case of table 3.21 , is due to the fact that from 1 July 1973 all remaining government teachers colleges and kindergarten teachers colleges obtained college of advanced education status.

In 1973 the Australian Committee on Technical and Further Education was appointed to advise the Government on this area of post-school education. The committee, in its Second Report, stated that for its purposes "technical and further education is defined as post-school education (other than that conducted by institutions supported through the Universities Commission and the Commission on Advanced Education) conducted by institutions administered or maintained by a government education authority." Because of the wide variety of courses offered under such terms of reference, the courses are classified into six main academic types as follows:
Academic Stream 1 (Professional) - Courses which lead to professional status or which enable professionals to update or specialise.
Academic Stream 2 (Para-professional) - Courses which lead to middle level or technician occupations.
Academic Stream 3 (Trades) - All apprenticeship courses, and post-apprenticeship courses not included in Stream 2.

Academic Stream 4 (Other Skilled) - All other skilled trade and vocational courses not included in Stream 3.
Academic Stream 5 (Preparatory) - All courses which prepare the way for further study, including matriculation and diploma entrance courses, remedial courses and vocational courses not included elsewhere.
Academic Stream 6 (Adult Education) - All courses in home handicrafts, hobbies, self-expression and cultural appreciation.
One of the most notable features of enrolments in technical and further education (TAFE) when compared with other post-secondary institutions is the very large percentage of part-time students. About 95 per cent of students were studying part-time (including correspondence students) in 1976 compared with 34.7 per cent in universities and 38.6 per cent in colleges of advanced education. The statistics relate to total enrolments registered between 1 January and 31 October 1976 and only to the technical and further education activities of the major government departments/divisions of TAFE in each of the six States. For further information on the organisation of TAFE and associated statistical details, see the report, Tertiary Education Commission Recommendations For 1978, August 1977, the First Report of the Technical and Further Education Commission, July 1976 and previous reports of the Australian Committee on Technical and Further Education.

(a) Grants for private capital purposes. (b) Expenditure on existing assets, increase in stocks, and advances to private sector.

Table 3.25 is derived from data in Expenditure on Education, (Catalogue No. 5510.0. Previously Ref. No. 5.44), presented according to the "economic type" and "purpose" classifications of the Australian national accounts, and includes estimates of private expenditure on education as well. All levels of government - Commonwealth, State and local - are included, in consolidated form. Final consumption expenditure is expenditure on new goods and services, including wages and salaries of employees. Total expenditure is free of duplication between government and private sectors, as it excludes transfers between sectors. It is divided according to sector of spending, not of financing. Sector of financing cannot be derived from the table, as much of the amount transferred to the private sector is not spent by that sector on goods and services classified to education for example, tertiary living allowances.

[^2]Tables 4.1 to 4.5 and 4.11 and 4.12 are derived from quarterly labour force surveys. The definitions of the labour force categories conform closely to those recommended by the Eighth International Conference of Statisticians held in Geneva in 1954. They are based on the activity of the interviewed persons in the week prior to the interview, the "survey week". Employed persons are those who during the survey week did any work for pay, profit, commission or payment in kind, in a job or business or on a farm; or worked fifteen hours or more without pay in a family business (or farm); or had a job, business or farm but were not at work because of illness, accident, leave, holiday, production hold-up due to bad weather, plant breakdown, etc. or because they were on strike. Prior to 1976-77, unemployed persons comprised all those who, during survey week, did no work at all and who either did not have a job or business and were actively looking for work, or were laid off from their jobs without pay for the whole week. From 1976-77, unemployed persons comprise all those who, during survey week, did no work at all and who either did not have a job or business and were actively looking for work in the past four weeks and were available to start work in survey week, or were laid off from their jobs for the whole week. The labour force is the sum of the employed persons and the unemployed persons. Persons not in the labour force are therefore those without a job, business or farm who were not actively looking for work in the survey week, including those who worked less than fifteen hours without pay in a family business. Kept house means without pay. Went to school etc. includes all attending an educational institution. For further information, description of the sample, standard errors etc., see the quarterly publication The Labour Force (Catalogue No. 6203.0. Previously Ref. No. 6.20).

TABLE 4.2 LABOUR FORCE PARTICIPATION RATES (a), BY AGE
(Annual Averages)
(Per cent)

(a) The figures exclude members of the armed services and all those who stated 'no occupation' or whose occupation indicated that they were not usually in the labour force, or whose occupation was inadequately described. (b) Figures are comprised of 1) permanent movement, which consists of settlers arriving and residents departing permanently and 2) long-term movement, which comprises visitors arriving and Australian residents departing temporarily with the intention to stay, in Australia or abroad respectively, for twelve months or more, together with the departure of visitors and the return of Australian residents who had stayed in Australia or abroad for twelve months or more. (c) 'Occupation' is as stated by the traveller at the time of arrival or departure and is not confirmed by reference to industry or educational qualifications. It is not known whether the persons included above would have entered the labour force or whether the persons departing had previously been in the labour force.

(a) Non-institutional civilians aged 15 years and over. (b) A job is defined as (i) employment as a wage or salary earner (or unpaid helper) by particular employer, in a particular locality; or (ii) selfemployment (with or without employees) in a particular locality. Thus, a change of job may have involved a change of employer without a change of job locality; a change of locality without a change of employer; or a change in both employer and locality. (c) Includes persons whose change of job consisted of a change of employer without a change in locality or a change in locality without a change in employer. (d) Includes miners and quarrymen.
practical purposes.

- Subject to sampling variability too high for most practical purposes.

For further information, see Labour Mobility, February 1976 (Catalogue No. 6209.0. Previously Ref. No. 6.43).

(a) Persons looking for work were defined as all civilians aged 15 years and over who during the survey week did not work and did not have a job, but could have taken one had it been available, and had been actively looking for full-time or part-time work in the four weeks up to and including the survey week (including persons who would have been prevented from taking a job in the survey week by their own temporary illness or injury, or by their having made arrangements to start after the survey week in a new job in which they would have preferred to start in the survey week). (b) Includes about 5,800 persons whose main difficulty was language problems or discrimination against migrant or racial groups.

For further information, see Persons Looking for Work, May 1977 (Catalogue No. 6222.0. Previously Ref. No. 6.60).

(a) A regular job was defined as one which had lasted for two months or more and in which the person had worked at least an average of five hours a week. (b) Includes 7,000 males who left because of unsatisfactory work arrangements and a further 7,000 who left to travel, because they moved house or because their spouse transferred. (c) Includes transport difficulties.

[^7]Tables 4.14 and 4.15 are derived from a survey based on the quarterly population survey. For further information, see Persons not in the Labour Force, May 1977 (Catalogue No. 6220.0. Previously Ref. No. 6.59).

TABLE 4.15 FEMALES NOT IN THE LABOUR FORCE (a) RESPONSIBLE FOR CHILDREN UNDER 12 YEARS OF AGE, BY WHETHER OR NOT WOULD LIKE A JOB NOW AND AGE OF CHILDREN, MAY 1977

| Whether or not would like a job now | Number of females responsible for |  |  | Total |
| :---: | :---: | :---: | :---: | :---: |
|  | Children aged 0.4 only | Children aged 5.11 only | Children aged <br> $0-4$ and 5-11 |  |
|  | , 000 |  |  |  |
| Would like a job now (b) | 73.0 | 98.2 | 63.3 | 234.5 |
| Would like a job now (b) but not looking for one only because unable to find child care | 5.4 | * | * | 10.5 |
| Would not like a job now (c) but would like a job if child care was available | 46.6 | 27.6 | 37.9 | 112.2 |
| Would not like a job now (c) even if child care was available | 198.2 | 197.7 | 173.6 | 569.5 |
| Total | 323.3 | 326.0 | 277.4 | 926.6 |
|  | Per cent |  |  |  |
| Would like a job now (b) | 22.6 | 30.1 | 22.8 | 25.3 |
| Would like a job now (b) but not looking for one only because unable to find child care | 1.7 | * | * | 1.1 |
| Would not like a job now (c) but would like a job if child care was available | 14.4 | 8.5 | 13.7 | 12.1 |
| Would not like a job now (c) even if child care was available | 61.3 | 60.6 | 62.6 | 61.5 |
| Total | 100.0 | 100.0 | 100.0 | 100.0 |

(a) Excludes those females who were looking for work in the four weeks before the survey but either took no active steps to find work or could not start work in the survey week. Also excludes visitors in private dwellings and all females who were institutionalised. (b) Includes females who stated that they might like a job now. (c) Includes females who stated that they did not know whether they would have liked a job at the time of the survey.

* Subject to sampling variability too high for most practical purposes.

(a) For definition see Table 4.1. (b) Employers, self-employed and unpaid family workers.

TABLE 4.18 DISTRIBUTION OF HOURS WORKED BY EMPLOYED PERSONS MAY 1977
(Per cent)

| (Per cent) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Hours worked | Males | $\begin{array}{c}\text { Married } \\ \text { females }\end{array}$ | $\begin{array}{c}\text { Other } \\ \text { females }\end{array}$ | All |
| females |  |  |  |  |$]$

The figures in Tables 4.17 and 4.18 relate to hours actually worked during the survey week, in the quarterly population survey. Full-time employed persons are those who usually work 35 hours a week or more and others who, although usually part-time workers, worked 35 hours or more during the survey week. Part-time employed persons are those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded. Persons with jobs who did not work during the survey week are shown against " 0 hours worked" in Table 4.18, and have been included in the calculation of average hours worked in Table 4.17.

(a) Average overtime and ordinary time hours paid for are averages for all employees represented in the survey. (b) Excludes managerial, executive, professional and higher supervisory staff. (c) Excludes N.T. and A.C.T. (d) Excludes rural industry and private domestic service.

For further information, see Earnings and Hours of Employees (Catalogue No. 6304.0. Previously Ref. No. 6.40).

TABLE 4.20 TRADE UNION MEMBERSHIP AS PROPORTION OF EMPLOYED WAGE AND SALARY EARNERS
(Per cent)

| December | Males | Females | Persons |
| :---: | :---: | :---: | :---: |
| 1966 | 60 | 37 | 53 |
| 1969 | 58 | 36 | 51 |
| 1973 | 61 | 44 | 55 |
| 1974 | 62 | 46 | 56 |
| 1975 | 63 | 48 | 58 |
| 1976 | 63 | 47 | 57 |

Trade union membership in the above table is as reported annually by the trade unions to the ABS. Persons who are members of more than one union are counted more than once in the totals. The number of employees to which the trade union membership has been related in the table is the estimated number of wage and salary earners in employment. The percentages shown should be regarded as giving only a broad indication of the extent of union membership among employees. The extent of unemployment of reported union members would affect the percentages for a particular year and comparisons over time. For further information see Trade Union Statistics, Australia (Catalogue No. 6323.0. Previously Ref. No. 6.24).

TABLE 4.21 WORKING DAYS LOST PER THOUSAND EMPLOYEES PER YEAR DUE TO INDUSTRIAL DISPUTES BY INDUSTRY (a)

(a) Selected divisions, sub-divisions, groups and classes of ASIC. (b) Includes agriculture, forestry, fishing and hunting; electricity, gas and water; entertainment, restaurants, hotels; finance, insurance, real estate and business services, public administration and defence, and community services.

TABLE 4.22 WORKING DAYS LOST PER THOUSAND EMPLOYEES PER YEAR DUE TO INDUSTRIAL DISPUTES, BY STATES

| Year | N.S.W. | Vic. | Qld | S.A. | W.A. | Tas. | Australia (a) |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 1972 | 518 | 506 | 516 | 152 | 273 | 151 | 449 |
| 1973 | 641 | 600 | 541 | 313 | 327 | 1,079 | 570 |
| 1974 | 1,520 | 1,787 | 859 | 727 | 687 | 663 | 1,320 |
| 1975 | 860 | 926 | 766 | 293 | 265 | 298 | 742 |
| 1976 | 858 | 1,073 | 683 | 342 | 653 | 458 | 803 |

(a) Includes the N.T. and A.C.T.

Working days lost relate to those lost by workers directly or indirectly involved in disputes involving stoppages of work of ten man-days or more at the establishments where the stoppages occurred. The number of employees to which these figures have been related are the ABS estimates of wage and salary earners in civilian employment excluding those in agriculture and in private domestic service. For further information see the December quarter issues of Industrial Disputes (Catalogue No. 6322.0. Previously Ref. No. 6.6).

Average weekly earnings are calculated in terms of "male units", i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings. Different ratios of female to male average earnings are used for individual States and for different years, based on information from regular surveys of weekly earnings and hours and other sources. Details of the method of calculation are described in Average Weekly Earnings (Catalogue No. 6302.0. Previously Ref. No. 6.18) which also contains seasonally adjusted figures and quarterly figures.

TABLE 5.2 DISTRIBUTION OF AGGREGATE FAMILY AND INDIVIDUAL INCOME
1968-69 AND 1973-74

| Percentage of total number of families (a) | Percentage of aggregate income of families |  | Percentage of total number of individual income recipients (a)(b) | Percentage of aggregate income of individuals |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1968-69 | 1973.74 |  |
|  | 1968.69 | 1973-74 |  | Males | Females | Males (c) | Females |
| - cumulative percentages - |  |  |  | - cumulative percentages - |  |  |  |
| 10 | 2.2 | 2.2 |  | 10 | 1.4 | 0.3 | 1.4 | 0.5 |
| 20 | 6.8 | 6.7 | 20 | 5.0 | 1.2 | 4.6 | 0.9 |
| 30 | 12.8 | 12.7 | 30 | 11.0 | 2.9 | 10.4 | 2.6 |
| 40 | 19.7 | 20.0 | 40 | 18.4 | 6.8 | 18.1 | 7.1 |
| 50 | 28.2 | 28.4 | 50 | 26.9 | 12.7 | 27.0 | 13.0 |
| 60 | 37.5 | 38.0 | 60 | 36.4 | 20.6 | 37.0 | 20.5 |
| 70 | 48.1 | 49.1 | 70 | 47.2 | 31.2 | 48.2 | 31.6 |
| 80 | 60.3 | 61.7 | 80 | 59.6 | 46.0 | 61.0 | 47.7 |
| 90 | 75.2 | 77.1 | 90 | 74.6 | 65.1 | 76.3 | 68.1 |
| 100 | 100.0 | 100.0 | 100 | 100.0 | 100.0 | 100.0 | 100.0 |
| Gini index | 0.321 | 0.312 | Gini index | 0.347 | 0.536 | 0.339 | 0.526 |

[^8]The above table shows, for example, that 28.4 per cent of aggregate family income in 1973-74 was received by one half of all families, the remaining 71.6 per cent being received by the other half. The Gini index is an index of concentration or inequality the lower its value the more equal its distribution. The $1968-69$ survey results are comparable with those for 1973-74, being based on common definitions and methods. For further information, see Income Distribution, 1968-69 and 1973-74 (Catalogue Nos 6502.0, 6503.0, 6505.0. Previously Ref. Nos 17.6, 17.8, 17.17).

Tables 5.3 to 5.8 have been prepared from Australian National Accounts (Catalogue No. 5204.0. Previously Ref. No. 7.1). Household income is the total income, whether in cash or kind, received by persons normally resident in Australia. Included also is property income received by non-profit organisations such as private schools, churches and charitable organisations. Transfers from general government includes all cash social service benefits. Interest includes an imputed amount for the benefit accruing to life policy holders and members of superannuation funds from the investment income of the funds. Income from dwellings includes an imputed amount for the net "rent" of owner-occupied dwellings. No imputation is made to dividends, however, for undistributed company income.

(a) Not available separately; included with "all other services".

Private final consumption expenditure is annual expenditure on goods and services by persons and current expenditure by non-profit organisations serving households. The value of food produced and consumed on farms is included. Imputed rent is the estimated annual rental value of owner-occupied dwellings. Travel and communication consists of public transport fares, purchase and operation of motor vehicles and postal and telephone services. For further information, see Australian National Accounts : National Income and Expenditure (Catalogue No. 5204.0. Previously Ref. No. 7.1).

| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |

(a) Children are household members aged less than 18 years. (b) Current housing costs include both the principal and interest components of any housing loan repayments. They exclude outright purchase of, or deposit on, dwellings or land and other payments of a capital nature which are included in "other payments".(c) The main components of "other payments'are income tax, superannuation contributions, life insurance premiums, purchase of and deposits on dwellings and land and gambling payments. Receipts from sales of dwellings and land, and gambling winnings are offset against payments.

See Table 5.15 for explanatory notes.

(a) See footnote (b) of Table 5.10.

The statistics contained in Tables 5.10 to 5.15 are derived from a sample of private dwellings and were collected over a period of twelve months. In the 1974-75 survey, only Capital Cities were included, but in 1975.76 coverage was extended to the whole of Australia. (No estimates for Darwin are included in the $1974-75$ survey as operations in that city were suspended following cyclone Tracy in December 1974. Operations were resumed for the $1975-76$ survey.) The unit used in the survey is a household which was defined as a group of people who live together as a single unit in the sense that they have common housekeeping arrangements (i.e. common provision for food and other essentials of living). Expenditure was defined as all payments for goods and services for private use, made by all members of the household aged 15 years and over. In general, expenditure was collected on the basis of payments made during the reference period rather than on the basis of goods and services 'acquired' or 'consumed' during the period and was net of any refunds or expected refunds. Income was defined as gross income from all sources before taxation and other deductions were made and was collected from all members of the selected household aged 15 years and over. Further information about the survey is contained in Household Expenditure Survey 1974-75, Bulletin 1, An Outline of Concepts, Methodology and Procedures (Catalogue No. 6507.0. Previously Ref. No. 17.19), and Bulletin 3, Standard Errors (Catalogue No. 6509.0. Previously Ref. No. 17.21). More detailed survey results are contained in the series of Bulletins published for each survey (Catalogue Nos 6507.0 to 6519.0 inclusive).

| 1976 | 1,158.7 | 75.4 |
| 1977 | 1,205.3 | n.a. |

(a) Age pensioners as a percentage of all females 60 years and over, and all males aged 65 years and over.

Age pensions are payable, free of income test, to residentially qualified men and women aged 70 years or more. They are payable, subject to an income test, to residentially qualified women aged 60 to 69 years, and to residentially qualified men aged 65 to 69 years. The large increase in the number of pensioners over the last seven years, both in absolute terms and as a percentage of the relevant population, is due mainly to the liberalizations of the now superseded means test in September 1969 and October 1972. It has also been influenced by the abolition of the means test for people aged 75 years or more in October 1973 and for people aged $70-74$ years in May 1975. Tables 6.1 and 6.2 exclude a number of persons who for various reasons remained on their invalid or widow pensions when they reached the age of 60 years (females) or 65 (males). At June 1976 the number of such invalid pensioners was 10,350 males and 4,920 females. Of women in receipt of Class A widow pensions, 600 were over 60 years of age as were 12,400 Class $B$ widow pensioners. The number of these invalid pensioners is included in Tables 6.4 and 6.5 and widow pensioners in Tables 6.7 to 6.9. Basic details in Tables 6.1 to 6.16 have been obtained from Annual Reports of the Department of Social Security.

TABLE 6.2 NUMBER OF AGE PENSIONERS BY AGE AND SEX 30 JUNE 1976

| $\begin{gathered} \text { Age } \\ \text { (years) } \end{gathered}$ | Males | Females | Persons | Age Pensioners as percentage of the population in the same age group |
| :---: | :---: | :---: | :---: | :---: |
| 60-64 | -• | 151,520 | $\cdots$ | (a)50.4 |
| 65-69 | 115,928 | 178,381 | 294,309 | 64.0 |
| 70-74 | 131,330 | 174,966 | 306,296 | 91.2 |
| 75-79 | 73,719 | 132,259 | 205,978 | 91.3 |
| 80-84 | 33,377 | 87,394 | 120,771 | 92.1 |
| 85 and over | 20,760 | 59,152 | 79,912 | 95.8 |
| Total | 375,114 | 783,672 | 1,158,786 | (b)75.4 |

(a) As a percentage of all females aged 60-64. (b) As a percentage of all females aged 60 and over, and all males aged 65 and over.

TABLE 6.3 AGE PENSIONERS BY MARITAL STATUS, MEANS AS ASSESSED AND HOME OWNERSHIP, PERCENTAGE DISTRIBUTION, 30 JUNE 1976

| Means as assessed | Single pensioners (a) |  | Married pensioners |  | All age pensioners |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | With home | Without home | With home | Without home | With home | Without home |  |
| Nil | 4.8 | 9.0 | 2.7 | 1.7 | 7.4 | 10.7 | (b) 18.1 |
| Permitting maximum pension with fringe benefits | 14.1 | 10.8 | 21.0 | 4.2 | 35.3 | 15.0 | (b)50.4 |
| Permitting reduced pension, possibly with fringe benefits | 2.2 | 1.3 | 3.8 | 0.4 | 6.0 | 1.7 | (b) 7.7 |
| Permitting reduced pension, no fringe benefits | 4.1 | 2.1 | 6.6 | 0.9 | 10.7 | 3.0 | (b) 13.6 |
| Total | (b)25.2 | (b) 23.2 | (b) 34.1 | (b) 7.2 | (b) 59.4 | (b) 30.4 | (c) 100.0 |

(a) "Single pensioners" are those never married, widowed, divorced and permanently separated. (b) Excludes pensioners aged 70 years and over who do not apply for supplementary benefits and therefore are not required to state their means, home ownership, etc. (c) Includes pensioners described in (b), comprising $\mathbf{1 0 . 2 \%}$ of all age pensioners.

A pensioner is regarded as a home owner if he or his spouse owned or partly owned or had an interest in the home in which he or she lived. Where a married couple, both pensioners, lived in a home owned by one or both of them each was regarded as a home owner.

TABLE 6.4 INVALID PENSIONERS, NUMBER AND PERCENTAGE OF RELEVANT AGE GROUP

| At <br> 30 June | Number of <br> pensions current | Pensioners as a <br> percentage of the <br> relevant age group (a) |
| :---: | :---: | :---: |
| 1957 | 800 | Per cent |
|  | 1962 | 97.2 |
|  | 1967 | 112.3 |
|  | 1972 | 1.6 |

(a) Invalid pensioners as a percentage of all females $16-59$ years and all males aged $16-64$ years. The table includes a number of fermales who were over 60 and males who were over 65 who had not sought to transfer to the age pension. In 1976 the numbers were 4,920 females and $10, \mathbf{3 5 0}$ males.

Invalid pensions are payable, subject to an income test, to residentially qualified persons not less than 16 years of age who are permanently incapacitated for work to the extent of at least 85 per cent, or permanently blind. The large increase in the number of invalid pensioners over the last seven years is partly a result of the liberalization of the means test referred to in the section on age pensioners.

TABLE 6.5 NUMBER OF INVALID PENSIONERS BY AGE AND SEX 30 JUNE 1976

| $\begin{gathered} \text { Age } \\ \text { (years) } \end{gathered}$ | Males | Females | Persons | Invalid pensioners as percentage of the population in the same age group |

| 1977 | 76.1 | 63.3 | 139.5 | n.a. |

[^12]Widow pensioners are classified into three categories : Class A - widows with one or more qualifying children under the age of 16 or older dependent full-time student children in their care; Class B - widows of at least 50 years of age without a qualifying child, or widows who were at least 45 years of age when their Class A pensions ceased because they no longer had qualifying children under their care; Class $C$ - widows, other than Class A or B , in necessitous circumstances within the 26 weeks following the death of their husbands. For Classes A and B, the term "widow" includes a wife who has been deserted by her husband for a period of at least six months; a divorcee; a woman whose husband has been imprisoned for at least six months; and a woman whose husband is in a mental hospital. For Classes A, B and C the term also includes a de facto widow or 'dependent female' - a woman who has lived with a man as his wife for three years immediately prior to his death. In addition, in July 1973, a Supporting Mother's Benefit was made payable to unmarried mothers and mothers who are deserted de facto wives, de facto wives of prisoners and separated wives. The benefit becomes payable six months after the date of the event which gave rise to eligibility and is payable at the same rate as the Class A widow's pension.

| 1974 | 35.00 | 26.00 | 154.1 | 127.30 | 27.5 | 20.4 |
| 1975 | 47.00 | 36.00 | 180.2 | 154.70 | 30.4 | 23.3 |
| 1976 | 52.75 | 41.25 | 202.4 | 178.80 | 29.5 | 23.1 |
| 1977 | 58.60 | 47.10 | 229.6 | 198.10 | 29.6 | 23.8 |

(a) Consists of standard rate pension, mother's allowance for child aged six years or more and pension for first child (subject to means test). In June 1977 these amounted to $\$ 47.10, \$ 4.00$ and $\$ 7.50$ respectively, total $\$ 58.60$. (b) Average weekly earnings per employed male unit; estimated by dividing total wage and salary earnings by the sum of the numbers of male and female wage and salary earners, the females being weighted by the estimated ratio of average female to average male wage and salary earnings.

| 1976 | 191.7 | 28.1 | 3.2 | 0.5 |
| 1977 | 215.9 | 32.4 | 3.5 | 0.5 |

Unemployment and sickness benefits are available, subject to a means test on income, to people who are unemployed or to people who are temporarily incapacitated for work and have thereby lost income. For unemployment benefit a claimant must be able and willing to undertake suitable work, and have taken reasonable steps to obtain work. To be eligible for unemployment or sickness benefit, a person must be at least 16 years of age and under 60 (females) or under 65 (males). Married persons can have their benefit reduced or be excluaed from the benefit by the operation of the income test on the eamings of their spouse. Since March 1973 the basic rates of benefit have been the same as for age and invalid pensions. Beneficiaries with dependent children are eligible for an additional benefit for each dependent child.

TABLE 6.13 UNEMPLOYMENT BENEPIT RECIPIENTS BY SEX, AGE AND DURATION OF BENEFIT, PERCENTAGE DISTRIBUTION, 30 JUNE 1977

(a) Includes wives' pensions, guardian's allowance, supplementary assistance and additional pensions for children. (b) Includes mother's allowance, supplementary assistance and additional pension for children. (c) Includes additional benefit for children. (d) Includes additional benefit for children and supplementary allowance. (e) For 1967 and subsequent years includes payments for student children over 16 years of age. (f) Includes rehabilitation services, sheltered employment allowances, funeral benefits, maternity allowances, delivered meals, personal care allowance for the aged, telephone rental concessions, handicapped children's benefits, etc.. In 1975-76 it included $\$ 8 \mathrm{~m}$ for Structural Adjustment Assistance.

For more details see Public Authority Finance : Federal Authorities (Catalogue No. 5502.0. Previously Ref. No. 5.12).

TABLE 6.21 GOVERNMENT OUTLAY ON
SOCIAL SECURITY AND WELFARE

(a) Mainly grants for private capital purposes.

Table 6.21 is based on the standard "economic type" and "purpose" classifications used in the Australian National Accounts. All levels of government are included Commonwealth, State and local - in consolidated form. Final consumption expenditure is expenditure on new goods and services, including wages and salaries of employees. For further information see Public Authority Finance : Federal Authorities (Catalogue No. 5502.0. Previously Ref. No. 5.12) and Public Authority Finance, State and Local Authorities, (Catalogue No. 5504.0. Previously Ref. No. 5.43).

TABLE 7.1 POPULATION BY TYPE OF DWELLING OCCUPIED, PERCENTAGE DISTRIBUTION, AT CENSUSES

| Type of dwelling occupied | 1947 | 1954 | 1961 | 1966 |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  | Percentage of total population |  |  |

(a) For 1947, 1954 and 1961 the part of a private house occupied by a household group which completed a separate householder's schedule in the Census; if a shared private house was occupied by two or more household groups which completed one schedule only it was included in "private house". (b) Dwellines providing group accommodation such as hotels, motels, hostels, staff quarters and institutions such as hospitals, nursing homes, prisons, and boarding schools which were occupied on Census night. (c) Persons travelling on ships or long distance trains or aircraft on Census night. (d) "Private house" includes "shed, hut, tent, etc.". (e) In 1961 and later years includes self-contained flats above or attached to shops, offices, etc., previously included in "private house". (f) Principal share of private house included in "private house", others in "other private dwelling". (g) Includes villa units 0.6 per cent. (h) Not separately identified. Non-selfcontained part of a house included in "other private dwelling".

(a) Comprises villa units and 'other private' dwellings. The term 'villa unit', as used in the 1971 Census, covers dwellings described variously as villa unit, town house, cottage unit, villa development, cottage flats. 'Other private' dwellings include non-selfcontained flats, improvised houses, and caravans, houseboats, etc.

TABLE 7.6 NATURE OF HOUSING OCCUPANCY BY AGE OF HEAD OF HOUSEHOLD AND BY WEEKLY HOUSEHOLD INCOME, ALL CAPITAL CITIES (a), 1974-75

| Weekly household income and age of household head | Nature of housing occupancy |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rented (incl. rent-free) | In process of purchase | Owned outright | Total | Rented (incl. rent-free) | In process of purchase | Owned outright | Total |
|  | '000 |  |  |  | Per cent |  |  |  |
| Weekly household income - |  |  |  |  |  |  |  |  |
| under \$140 | 315.0 | 181.0 | 358.2 | 854.1 | 36.9 | 21.2 | 41.9 | 100.0 |
| \$140 and under \$200 | 180.0 | 265.8 | 127.1 | 572.9 | 31.4 | 46.4 | 22.2 | 100.0 |
| \$200 and under \$260 | 152.9 | 253.8 | 103.4 | 510.0 | 30.0 | 49.8 | 20.3 | 100.0 |
| \$260 and under \$340 | 105.3 | 192.3 | 80.7 | 378.3 | 27.8 | 50.8 | 21.3 | 100.0 |
| \$340 and over | 56.8 | 180.2 | 82.3 | 319.4 | 17.8 | 56.4 | 25.8 | 100.0 |
| All households | 809.9 | 1,073.1 | 751.7 | 2,634.7 | 30.7 | 40.7 | 28.5 | 100.0 |
| Age of household head (years) - |  |  |  |  |  |  |  |  |
| 15 and under 30 | 341.3 | 221.1 | 14.4 | 576.8 | 59.2 | 38.3 | 2.5 | 100.0 |
| 30 and under 45 | 217.3 | 476.8 | 108.9 | 803.0 | 27.1 | 59.4 | 13.6 | 100.0 |
| 45 and under 65 | 170.1 | 347.7 | 354.8 | 872.6 | 19.5 | 39.8 | 40.7 | 100.0 |
| 65 and over | 81.3 | 27.4 | 273.6 | 382.3 | 21.3 | 7.2 | 71.6 | 100.0 |
| All households | 810.0 | 1,073.1 | 751.7 | 2,634.7 | 30.7 | 40.7 | 28.5 | 100.0 |

(a) Excludes Darwin, includes Canberra.

Tables 7.6 and 7.7 are derived from the results of the Household Expenditure Survey conducted in Capital Cities during 1974-75. The estimates are based on a sample of private dwellings which included houses, home units, flats, caravans and any other structures being used as private places of residence. Hotels, boarding houses, institutions, and other special dwellings were outside the scope of the survey. The basic survey unit was the household. A household was defined as a group of people who live together as a single unit in the sense that they have common provision for food and other essentials of living. A person, or persons, living in the same dwelling but having separate catering arrangements, constituted a separate household. The head of a household was taken to be that person nominated by the member(s) of the household as the 'head'. This person was usually the male 'breadwinner'. Income was defined as gross income from all sources before taxation and other deductions were made, and was collected from all members of the selected household aged 15 years and over. For further information see Household Expenditure Survey, 1974-75, Bulletin No. 8, (Catalogue No. 6514.0)

TABLE 7.7 NATURE OF HOUSING OCCUPANCY BY EMPLOYMENT STATUS (a) AND OCCUPATION OF HEAD OF HOUSEHOLD,

ALL CAPITAL CITIES (b), 1974-75

| Employment status and occupation <br> of head of household | Narure of housing occupancy |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rented (incl. rent-free) | In process of purchase | Owned outright | Total | Rented (incl. rent-free) | In process of purchase | Owned outright | Total |
|  | '000 |  |  |  | Per cent |  |  |  |
| Employees - |  |  |  |  |  | 57.7 | 17.8 | 100.0 |
| Clerical and sales (d) | 116.3 | 170.3 | 50.5 | 337.1 | 34.5 | 50.5 | 15.0 | 100.0 |
| Tradesmen and labourers (e) | 234.6 | 347.1 | 165.8 | 747.5 | 31.4 | 46.4 | 22.2 | 100.0 |
| Other employees (f) | 128.9 | 103.7 | 61.2 | 293.9 | 43.9 | 35.3 | 20.8 | 100.0 |
| Total employees | 589.5 | 879.2 | 357.0 | 1,825.7 | 32.3 | 48.2 | 19.6 | 100.0 |
| Selfemployed | 59.1 | 128.3 | 77.2 | 264.7 | 22.3 | 48.5 | 29.2 | 100.0 |
| Nonemployed | 161.4 | 65.5 | 317.5 | 544.4 | 29.6 | 12.0 | 58.3 | 100.0 |
| All households | 809.9 | 1,073.1 | 751.7 | 2,634.7 | 30.7 | 40.7 | 28.5 | 100.0 |

(a) All persons aged 15 years and over were classified either as workers or as non-employed persons (e.g. housewife, retired, unemployed, full-time student) on the basis of whether or not they reported 'earned' income. (b) Excludes Darwin; includes Canberra. (c) Professional, technical and related workers; administrative, executive and managerial workers. (d) Includes book-keepers, typists and shop assistants.
(e) Includes production-process workers.(f) Employees engaged in farming, fishing, hunting and timber-getting; miners, quarrymen and related workers; workers in transport and communication; service, sport and recreation workers, and members of the armed services.

* Subject to sampling variability too high for most practical purposes.

Tables 7.9 and 7.10 are derived from the Aged Persons Housing Survey. This survey was conducted in a sample of towns with populations of 500 or more at the 1971 Census, but excluding the whole of the Northern Territory. Dwellings in the survey were those where the household included a male aged 65 or over, or a woman aged 60 or over (not one of a married couple). The assessment of housing standard was done by qualified building assessors, with a classification based on a penalty points score compiled on the basis of 36 relevant characteristics of the dwelling and its immediate surroundings. The categories are defined as: Satisfactory - dwelling in good condition or in need of a little attention. Unsatisfactory - dwelling in need of a great deal of attention. Beyond repair - dwelling beyond repair, or in a condition where repairs and maintenance required to bring it up to adequate standard would be uneconomic. For further information see Aged Persons Housing Survey, Volumes 1 \& 2, Department of Environment, Housing and Community Development.

(a) Mainly grants for private capital purposes. (b) Mainly advances to the private sector and to public financial enterprises. (c) Dwelling rent, and imputed rent of owner-occupied dwellings.

Table 7.15 is derived from data in two Public Authority Finance bulletins: Federal Authorities, (Catalogue No. 5502.0. Previously Ref. No. 5.12) and State and Local Authorities, (Catalogue No. 5504.0. Previously Ref. No. 5.43), together with estimates of private expenditure on housing from the Australian National Accounts, National Income and Expenditure, (Catalogue No. 5204.0. Previously Ref. No. 7.1). The estimates are presented according to the "economic type" and "purpose" classifications of the Australian national accounts. All levels of government - Commonwealth, State and local - are included, in consolidated form. Final consumption expenditure is expenditure on new goods and services, including wages and salaries of employees. Total expenditure is free of duplication between government and private sectors, as it excludes transfers between sectors. It is divided according to sector of spending, not of financing. Sector of financing cannot be derived from the table, as some of the transfers to the private sector may not have been spent by that sector on goods and services classified to housing.

CHART 7.2 INDEXES OF AVERAGE COMMENCEMENT VALUE OF NEW PRIVATE CONTRACT-BUILT HOUSES COMMENCED IN CAPITAL CITY STATISTICAL DIVISIONS, AVERAGE VALUE PER SOUARE METRE AND AVERAGE WEEKLY EARNINGS 1970-71 TO 1976-77 (1970-71 = 100)

CHART 7.3 NATURE OF HOUSING OCCUPANCY BY EMPLOYMENT STATUS AND OCCUPATION OF HEAD OF HOUSEHOLD, ALL CAPITAL CITIES 1974-75

| 1974 -75 | 5.12 | 25.31 | 6.02 | 929 | 376 | 258 |
| 1975-76 | 5.16 | 21.47 | 6.64 | 891 | 362 | 317 |

(a) Statistics prior to 1971 are not necessarily comparable with those for later years, owing to changes in reporting procedures. (b) Includes murder, attempted murder, manslaughter (including, since $1973-74$, manslaughter arising from motor traffic accidents). (c) Mean populations since the year $1970-71$ are revised estimates subsequent to the 1976 Census.

Crime statistics published in this section relate only to a section of total criminal activity and describe changes in recent years within the narrow limits of certain selected crimes. In interpreting these figures it should be borne in mind that because of changes in the extent to which offences are being reported, or becoming known to the police, movements in the level of reported crime do not necessarily involve corresponding changes in the total amount of crime in the community. This consideration applies not only to movements within States and Australia but also between States. For further information on tables in this section, see Official Year Book of Australia (Catalogue No. 1301.0. Previously Ref. No. 1.1).

| State | Homicide <br> (a) | Robbery | Rape | Breaking and entering | Motor vehicle theft | Fraud, forgery false pretences |

Table 8.7 is based on the standard "economic type" and "purpose" classifications used for the Australian National Accounts. All levels of government - Commonwealth, State and local - are included in consolidated form. Besides police services, law courts and legal services and correctional and custodial services, the purpose "law, order and public safety" includes fire protection services, road safety, and other community protection and emergency life-saving services. Final consumption expenditure is expenditure on new goods and services, including wages and salaries of employees. For further information see Public Authority Finance : Federal Authorities (Catalogue No. 5502.0. Previously Ref. No. 5.12) and Public Authority Finance - State and Local Authorities (Catalogue No. 5504.0. Previously Ref. No. 5.43).

(a) Includes migratory persons.

In the 1947 Census, Metropolitan referred to State capital cities, their suburbs and surrounding urban areas. From 1954 to 1966, the city of Canberra was included. Major urban areas in 1971 consisted of urban centres with a population of over 100,000 . These centres included all State capital cities, Canberra in the A.C.T., Queanbeyan, Newcastle and Wollongong in New South Wales, and Geelong in Victoria. Population and dwellings in all other urban centres below 100,000 were included in Other urban areas.

The criteria for classifying areas as "urban" have changed from time to time. In 1947, "urban" included those cities and towns which were separately incorporated. In 1954, all other population clusters of 1,000 and over ( 750 and over in Tasmania) were also included in addition to incorporated cities and towns. There was no change in 1961. In 1966 and 1971, basically similar criteria were used except that the lower limit of 1,000 persons was not used for centres which were known holiday resorts. In such areas, a minimum of 250 dwellings was used.

For further information on definitions of urban areas see the Statistician's Report in Volume 3 of the 1947 Census, explanatory notes to Vol. 2, Part 1 of the 1966 Census and Bulletin number 6, Part 9 of the 1971 Census.

Settlers are persons who, on arrival in Australia, indicated that they came intending to settle. Former settlers are persons who, on departure from Australia, stated that they had come to Australia intending to settle and were now departing permanently. Before 1974, this category excluded those who had stayed for less than twelve months. Since 1974, such persons were included. For further information, see Demography (Catalogue No. 3101.0. Previously Ref. No. 4.9) and Overseas Arrivals and Departures (Catalogue No. 3404.0. Previously Ref. No. 4.23).

(a) Heads of families who arrived in Australia in the ten year period January 1963 to January 1973. (b) In the five years following the survey.

Tables 9.6 and 9.7 are derived from a survey of migrants conducted in 1973 by the Bureau on behalf of the (then) Department of Immigration. The survey covered 7,700 families in Sydney, Melbourne, Brisbane, Adelaide, Perth and Wollongong.

For further information, see A Decade of Migrant Settlement, Australian Population and Immigration Council, 1976 and Immigration Survey, April-June 1973, Statistical Digest, issued by the Department of Labour and Immigration (now Immigration and Ethnic Affairs), 1974.

| 65 and over | 22.2 | 20.2 | 16.4 | 12.6 | 3.7 |  | 3.6 | 3.6 |
| Total | 81.9 | 85.7 | 80.5 | 83.6 | 40.5 | 46.1 | 42.3 | 46.9 |
| UNEMPLOYMENT RATES |  |  |  |  |  |  |  |  |
| 15-19 | 4.5 | * | 12.9 | 14.9 | 6.2 | * | 15.6 | 18.7 |
| 20-24 | 2.0 | * | 6.4 | 7.8 | 2.9 | * | 6.7 | 6 |
| 25-34 | * | * | 2.3 | 3.7 | 2.1 | * | 4.1 | 6.6 |
| 35 and over | 0.6 | 1.0 | 1.9 | 3.0 | 1.1 | * | 2.5 | 4.5 |
| Total 20 and over | 0.8 | 1.2 | 2.8 | 3.7 | 1.8 | 2.3 | 3.9 | 5.6 |
| Total | 1.2 | 1.4 | 3.9 | 4.2 | 2.6 | 2.7 | 6.0 | 6.6 |

[^17]Labour force participation rate is the number of persons in the labour force in each group as a percentage of total civilian population in the same group. Unemployment rate is the number of unemployed in each group as a percentage of the labour force in the same group. For definition of "unemployment", see notes to Table 4.1.

For further information, see The Labour Force (Catalogue Nos 6203.0 and 6204.0. Previously Ref. Nos 6.20 and 6.22).

TABLE 9.18 OCCUPATIONAL DISTRIBUTION OF THE EMPLOYED POPULATION BY BIRTHPLACE

| Occupation group | 1973.74 |  |  | 1976-77 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

$$

## APPENDIX

The following tables were included in Social Indicators No. 1, but have been dropped from this issue. (Table numbers and headings refer to Social Indicators No. 1.)

## Population

1.15 Overseas-born, percentage distribution by country of birth, Censuses 1947 to 1971
1.16 Overseas-born, by country of birth and age, percentage distribution, Census June 1971

## Health

2.13 Persons with a chronic limiting illness, by cause of most limiting illness, May 1968 and May 1974
2.14 Persons (excluding those in institutions) with a chronic limiting illness, by nature of handicap, May 1968 and May 1974

## Education

3.8 Post-school students, by level of qualification for which studying, Census 30 June 1971
3.9 Population aged 15 and over studying for post-school qualifications, by level, age and sex, Census 30 June 1971
3.11 Students enrolled at universities, colleges of advanced education, and in technical and further education, by age, with participation rates, 1975
3.19 Technical and further education, student enrolments by age and sex, with participation rates, six States, 1975

## Working Life

4.6(A) Family status of labour force and unemployed, May 1976
4.7 Multiple jobholders : proportion of labour force who held a second job, 1966 to 1975
4.8 Multiple jobholders : age and marital status, proportion of labour force, August 1975
4.13 Annual leave : employed wage and salary earners, by amount of paid annual leave taken, percentage distribution, August 1974
4.14 Frequency of pay : employed wage and salary earners, by frequency of pay, percentage distribution, August 1974
4.15 Duration of journey to work : all persons who worked, by duration of journey, proportion of total, May 1970 and August 1974
4.16 Superannuation : employed persons by superannuation cover, occupational status and sex, February 1974
4.17 Child care : persons responsible for children aged 0-11 years, May 1973
4.18 Child care arrangements for children aged 0-11 years for whom persons in the labour force were responsible, May 1973
4.19 Arbitration coverage : proportion of employees affected by awards, determinations and collective agreements, 1954 to 1974

## Income and Expenditure

5.1 All income recipients and full-year, full-time workers, percentage distribution by income size, 1973.74
5.2 All income recipients by principal source of income, distribution by income size, 1973-74
5.3 All families by number in family, percentage distribution by income size, 1973-74
5.4 All families, with and without earned income, and with and without a married couple, percentage distribution by income size, 1973-74

## Social Security

6.14 Sickness benefit recipients by sex, age and duration of benefit, percentage distribution, November 1973

## Housing

7.5 Housing facilities : percentage of occupied private dwellings lacking certain facilities, at Censuses 1947 to 1971

## Aboriginals

Section 9 on Aboriginals has been deleted and replaced by a section on Migrants

[^0]:    $\dagger$ Estimates with standard error of between 20 and 30 per cent.
