(a) For the current account aggregates, a minus sign means an increase in a deficit, a decrease in a surplus, a decrease in exports or a decrease in imports; and a plus sign means a decrease in a deficit, an increase in a surplus, an increase in exports or an increase in imports. (b) Period averages.

September quarter 1992 —

Balance on current account (seasonally adjusted). The current account deficit rose by \$679 million (or 19 per cent) to \$4,213 million.

The rise in the deficit was caused by:

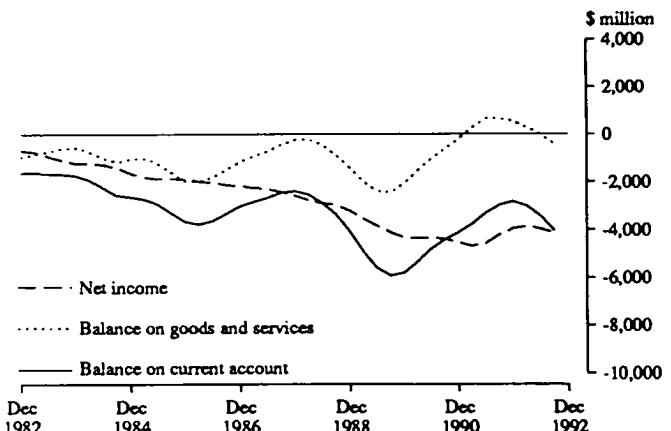

- a fall of \$726 million in the surplus on merchandise trade (merchandise exports rose 2 per cent and merchandise imports rose 8 per cent);
- an increase of \$164 million (32 per cent) in the net services deficit; and
- a decrease of \$129 million (23 per cent) in the net unrequited transfers surplus.

These results were partly offset by a fall of \$340 million (8 per cent) in the net income deficit.

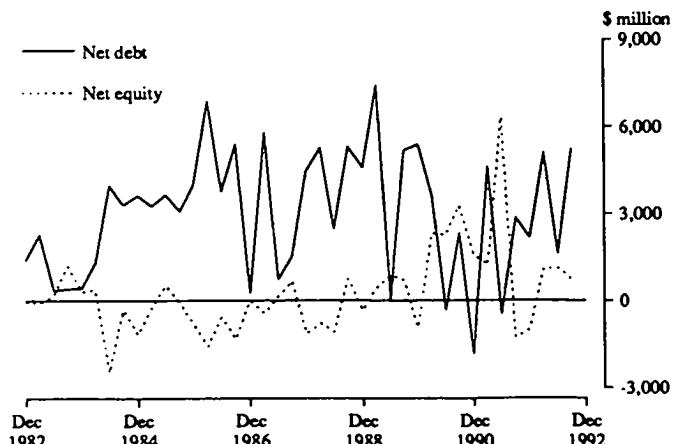

The trend estimate for the September quarter current account deficit was \$4,028 million, up 17 per cent on the June quarter.

Balance on capital account (not seasonally adjusted). The balance on capital account recorded a net inflow of \$6,254 million, up \$3,399 million on the net inflow in the June quarter. The change was largely a result of increases of \$3,589 million and \$202 million in the inflows due to net debt and net "other" capital transactions, respectively. Partly offsetting these movements was a fall of \$392 million on the inflow on account of net equity capital transactions.

GRAPH 2. CAPITAL ACCOUNT MAIN AGGREGATES

NOTES ON THE ESTIMATES

September quarter 1992 —

Current account (seasonally adjusted)

"Volume" refers to values at average 1984-85 prices and "price" refers to implicit price deflators.

Goods and services

The deficit on goods and services was \$664 million, a turnaround of \$890 million on the surplus recorded in June quarter. This was mainly due to a fall of \$726 million in the surplus on merchandise trade, and an increase of \$164 million in the net services deficit.

In volume terms, exports of goods and services fell \$171 million (1 per cent), while imports of goods and services rose \$352 million (2 per cent). The resulting turnaround of \$523 million in the balance on goods and services (from a surplus to a deficit) makes a negative contribution of 0.8 percentage points to the September quarter 1992 expenditure based estimates of GDP at average 1984-85 prices. The balance on merchandise trade surplus fell by \$510 million while the net services deficit increased by \$13 million.

Exports of merchandise

Exports of merchandise at current prices increased by \$348 million, or 2 per cent, to \$14,524 million, as a result of a 4 per cent increase in prices partially offset by a 2 per cent fall in volumes.

Rural exports at current prices rose \$110 million, or 3 per cent, reflecting a 2 per cent increase in volumes and a 1 per cent increase in prices. The most significant rises were recorded in:

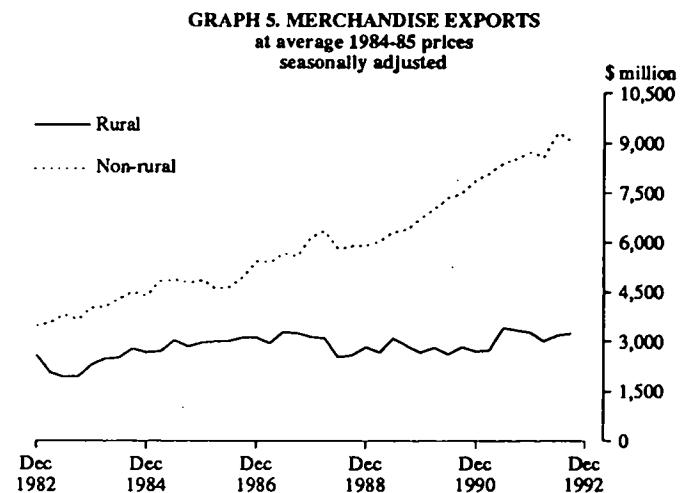

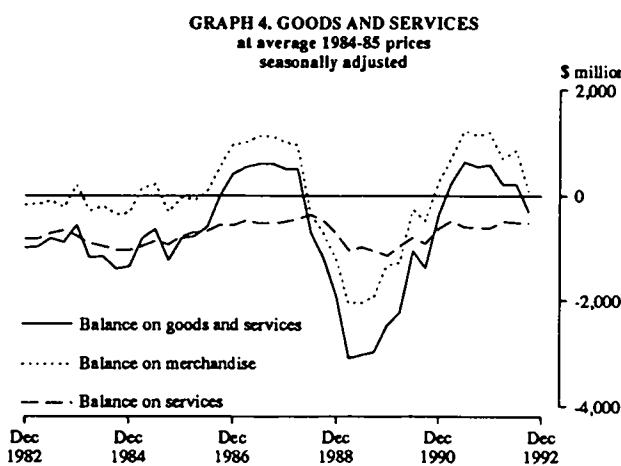

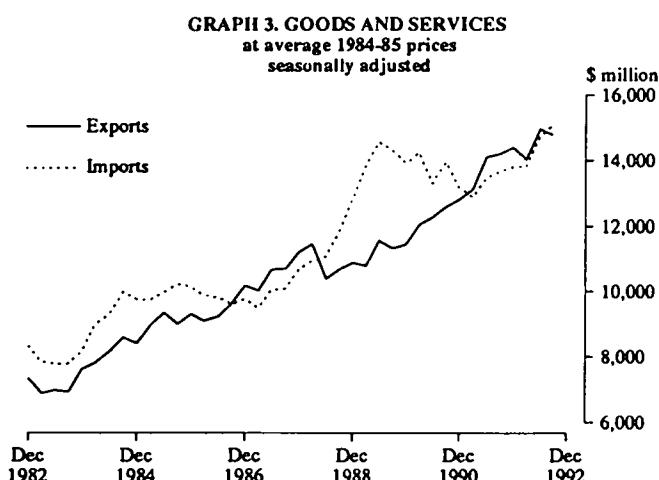

- Sugar, up \$148 million (164 per cent), due to a 157 per cent rise in volume and a 3 per cent rise in prices; and
- "other" rural, up \$38 million (3 per cent), due almost entirely to an increase in volume.

Falls were recorded in meat, down 55 million (6 per cent), due almost entirely to a decrease in volume, and cereals, down \$31 million (5 per cent), also due mainly to a fall in volumes.

Non-rural exports at current prices rose \$238 million, or 2 per cent. A 3 per cent fall in volumes was more than offset by a 5 per cent increase in prices. Rises occurred in five of the nine commodity groupings, the most significant being:

- transport equipment, up \$128 million (33 per cent), largely due to a 31 per cent increase in volumes;
- "other" manufactures, up \$85 million (6 per cent), due to a 4 per cent increase in volumes and a 2 per cent increase in prices; and
- machinery, up \$81 million (9 per cent), as a result of a 6 per cent increase in volumes and a 3 per cent increase in prices.

The largest fall was in gold, down \$79 million (6 per cent), reflecting an 11 per cent increase in volume which was partly offset by a 6 per cent fall in price.

Services credits

Services credits at current prices rose \$49 million (1 per cent) to \$3,752 million due almost entirely to an increase in volumes. At current prices the rise was due to increases in travel and "other" transportation, while in volume terms, travel was the most significant contributor to the rise.

Exports implicit price deflator

The *implicit price deflator (IPD)* for total exports of goods and services rose 3 per cent. On a fixed-weighted basis export prices rose 2 per cent, indicating that compositional changes within exports had a marginal (upward) effect on the overall increase in the IPD.

Imports of merchandise

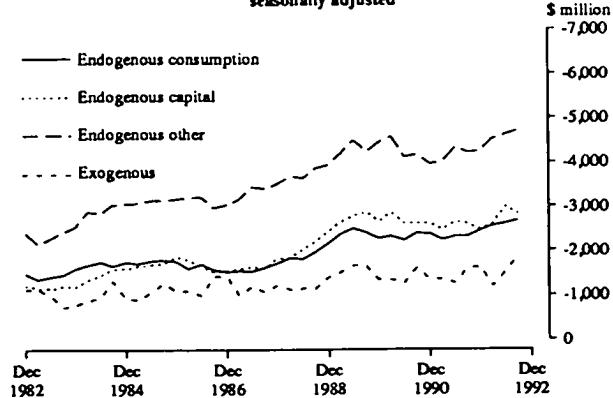

Imports of merchandise at current prices rose \$1,074 million (8 per cent) to \$14,511 million. Merchandise imports volumes rose 3 per cent and prices rose 5 per cent. Rises were recorded in eight of the nine commodity groupings, with the most significant being:

- machinery, up \$401 million (11 per cent), due mainly to a 12 per cent increase in prices;
- fuels, up \$352 million (52 per cent), due to a 33 per cent increase in volumes and a 14 per cent increase in prices; and
- "other" manufactures, up \$244 million (8 per cent), due to a 5 per cent increase in volumes and a 4 per cent increase in prices.

The only fall was in transport equipment, down \$307 million (14 per cent), due mainly to decreased volumes.

Exogenous imports rose \$425 million (32 per cent), mainly due to the increased fuel imports. *Endogenous imports* rose \$649 million or 5 per cent. There was almost no change in the overall volume of endogenous imports, while prices rose 6 per cent. In terms of volumes, consumption goods rose 3 per cent, capital goods fell 6 per cent, and "other" goods rose 2 per cent.

GRAPH 6. MERCHANTISE IMPORTS
at average 1984-85 prices
seasonally adjusted

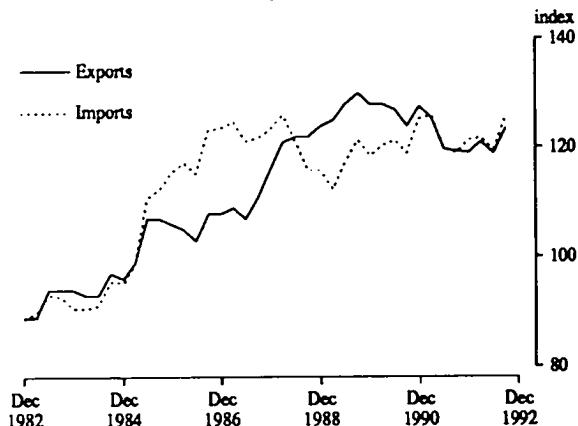

Services debits

Services debits at current prices rose \$213 million (5 per cent), to \$4,429 million, as a result of a 1 per cent rise in volume, and a 4 per cent rise in prices. All services components increased in both current price and volume terms apart from "other" services which fell 3 per cent in current prices and 9 per cent in volume terms.

Imports implicit price deflator

The *implicit price deflator (IPD)* for imports of goods and services rose 5 per cent. On a fixed-weighted basis, prices rose 5 per cent, indicating that compositional changes within imports had virtually no effect on the overall increase in the IPD.

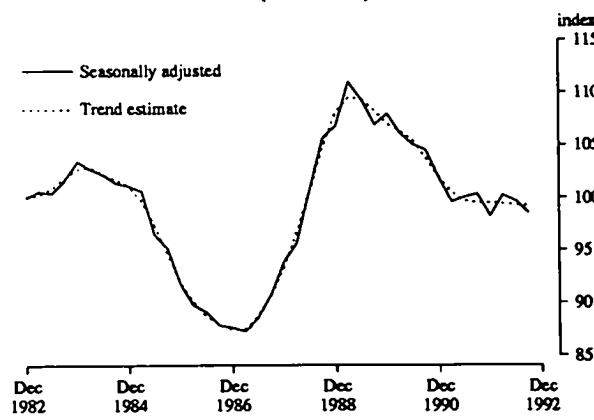

GRAPH 7. IMPLICIT PRICE DEFLATOR FOR GOODS AND SERVICES
based on seasonally adjusted data (1984-85=100)

Terms of trade

Australia's *terms of trade* fell 1 per cent, resulting from the combination of the 3 per cent rise in the IPD for exports of goods and services and the rise of 5 per cent in the IPD for imports of goods and services.

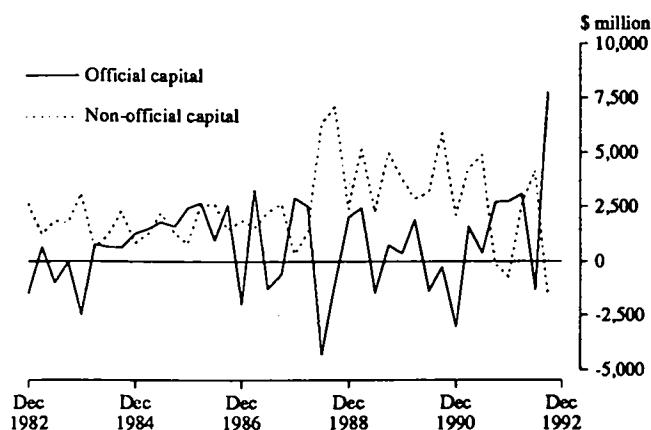

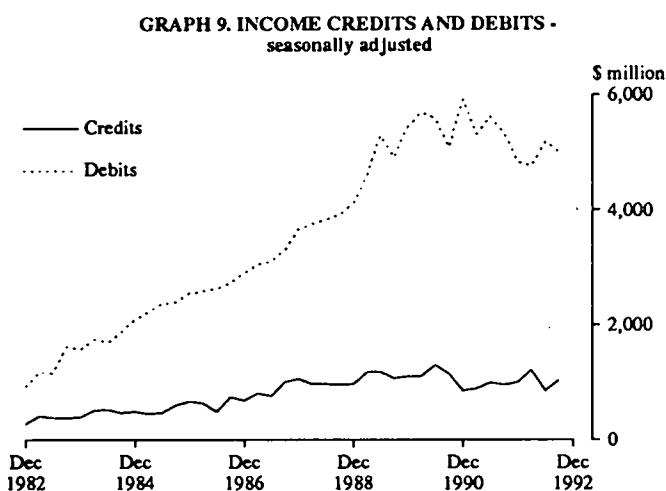

GRAPH 8. TERMS OF TRADE FOR GOODS AND SERVICES
(1984-85=100)

Income

The *net income* deficit fell \$340 million (8 per cent) to \$3,980 million. Income credits rose \$178 million (21 per cent) to \$1,034 million, due mainly to an increase in investment income. Income debits fell \$162 million (3 per cent) to \$5,014 million, due to decreases in interest payable abroad by the official sector, remitted profits payable abroad on direct investment by the non-official sector, and interest payable abroad on portfolio investment by the non-official sector. The most significant increase occurred in dividends payable abroad on direct investment by the non-official sector.

GRAPH 10. NET CAPITAL TRANSACTIONS

The change in official sector transactions resulted from:

- a turnaround of \$7,221 million, to a net inflow of \$5,431 million, in general government transactions; and
- an increase of \$1,903 million, to \$2,380 million, in the net inflow from Reserve Bank transactions.

The turnaround in general government transactions was mainly accounted for by the turnaround of \$7,245 million, to a net inflow of \$5,363 million, in foreign investment in Australia. This was the result of:

- a turnaround of \$4,805 million to a net inflow of \$1,343 million in general government borrowing domiciled in Australia; and
- a net inflow of \$4,064 million from general government borrowing domiciled abroad, up \$2,436 million on the net inflow in the June quarter.

The rise in the net inflow from Reserve Bank transactions was due to increased sales of official reserve assets.

The change in non-official sector transactions was comprised of:

- a net outflow (withdrawal) of foreign investment in Australia of \$537 million, representing a turnaround of \$5,967 million on the June quarter inflow; and
- a net outflow of Australian investment abroad of \$1,020 million, down \$243 million on the previous quarters net outflow.

The changes due to transactions in foreign investment in Australia in respect of the non-official sector were mainly the result of:

- borrowing from unrelated enterprises, which turned around \$3,077 million to a net outflow (withdrawal) of \$483 million;

Unrequited transfers

The *net unrequited transfers* surplus fell \$129 million (23 per cent) to \$431 million. Unrequited transfer credits fell 11 per cent, mainly reflecting a fall in the numbers of business migrants. Unrequited debits rose 1 per cent.

Capital account (not seasonally adjusted)

In original terms, the *balance on capital account* recorded a net inflow of \$6,254 million, up \$3,399 million on the net inflow in the June quarter. The increase in this net inflow was largely due to rises of \$3,589 million (to \$5,231 million) and \$202 million (to \$294 million) in net debt and net "other" inflows, respectively. Partly offsetting these movements was a fall of \$392 million, to \$729 million, in the net inflow attributable to net equity transactions.

By sector, the balance on capital account was comprised of:

- a net inflow of \$7,811 million in official sector transactions, a turnaround of \$9,124 million on the outflow for the previous quarter; and
- a net outflow of \$1,557 million in non-official sector transactions, a turnaround of \$5,724 million on the net inflow for the June quarter.

- borrowing from direct investors, which turned around \$1,611 million to a net outflow (withdrawal) of \$187 million;
- direct investment in corporate equities, which turned around \$1,073 million to a net outflow (withdrawal) of \$66 million; and
- portfolio investment in corporate equities, which turned around \$719 million to a net outflow (withdrawal) of \$304 million.

Partly offsetting these net outflows was a net inflow of \$334 million on "other" direct investment transactions, a turnaround of \$607 million on the outflow in the June quarter.

The chief factors responsible for the fall in Australian investment abroad were:

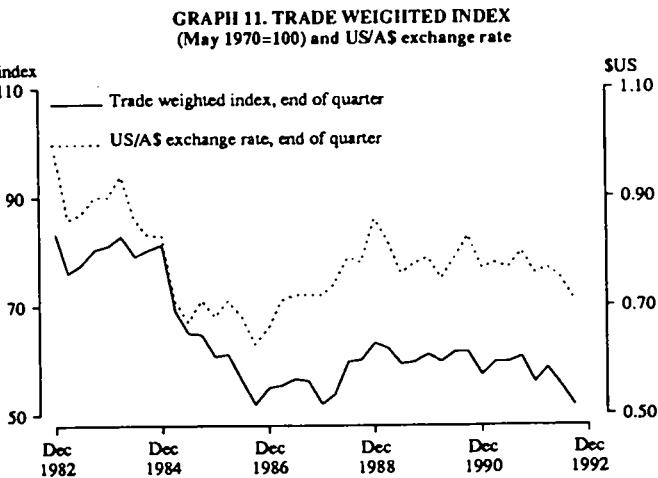

- portfolio investment in foreign corporate equities, which turned around \$1,222 million to a net inflow (withdrawal) of \$839 million; and
- direct investment in foreign corporate equities, which turned around \$381 million to a net inflow (withdrawal) of \$190 million.

These were partly offset by:

- non-bank lending to unrelated enterprises, which turned around \$1,045 million to a net outflow of \$546 million; and
- direct investment lending, which recorded a net inflow (withdrawal) of \$394 million, up \$175 million on the June inflow.

Trade weighted index and US/A\$ exchange rates

The trade weighted index at the end of September quarter 1992 was 51.7, down 6.3 per cent on the previous quarter. The Australian dollar fell 4.6 per cent against the US dollar to 0.7140 at the end of the quarter.

Revisions

Current price (not seasonally adjusted) estimates in this publication revise some of those published in the September issue of 5301.0, which was released on 30 October 1992.

Revisions have been made to merchandise imports for June and September quarters 1992. Of particular note, an upward adjustment of \$100 million has been made to fuel imports in the June quarter 1992 and a corresponding downward adjustment has been made to fuel imports in the September quarter 1992. These adjustments reflect increased delays between the actual deliveries of fuel imports in the June quarter and the corresponding lodgement of entries for these imports.

Revisions have also been made to investment income credits and debits, and capital account estimates for the September quarter 1992, as a result of the incorporation of preliminary data from the September quarter 1992 Survey of Foreign Investment.

Table 30 shows revisions on an annual and quarterly basis since the June quarter 1992 issue of this publication.

Special note on seasonal adjustment

Original data for the income credits series for March quarter 1992 includes a large irregular component; this was taken into account in compiling the seasonally adjusted series for income credits. Tables 3, 4, 5, 23 and 32 include this series.

Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular month, such as the effect of introducing new models, processing delays, or industrial disputes. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation.

(a) A minus sign means a decrease in credit entries (including exports fob), a decrease in debit entries (including imports fob), a decrease in a surplus or an increase in a deficit; and the absence of a sign means an increase in credit entries, an increase in debit entries or an increase in a surplus or a decrease in a deficit. (b) Balance of payments basis. (c) Annual reinvested earnings figures are allocated equally across the quarters resulting in the annual movement being reflected in the September quarter.

(a) Quarterly figures are derived from seasonally adjusted data. (b) The fixed-weighted indexes are derived by combining individual component prices (base year 1984-85=100) with a weighting to reflect the relative importance of the components in the base year. (c) Derived by dividing the implicit price deflator (IPD) for merchandise exports fob by the IPD for merchandise imports fob. (d) Derived by dividing the IPD for services, credits by the IPD for services, debits. (e) Derived by dividing the IPD for total exports of goods and services by the IPD for total exports of goods and services by the IPD for total imports of goods and services. (f) Derived by smoothing the terms of trade series using a tailored seven term Henderson moving average.

(a) Entries for periods after June quarter 1981 are not strictly comparable with entries for earlier periods. See the special article 'Changed methodology for measuring merchandise exports' on page 7 of the March quarter 1992 issue of this publication. NOTE: For annual data see the original series.

EXPLANATORY NOTES

Introduction

This publication provides detailed estimates of Australia's balance of payments for the September quarter 1992 together with revised estimates for previous quarters and financial years. Longer term estimates, from September quarter 1959, consistent with those shown in this issue, will shortly be made available for a charge on request.

2. Tables 1 to 6 in this publication provide summary statistics; they show the main aggregates and the more important components of these aggregates and include, in addition, trend estimates and percentage changes in the seasonally adjusted estimates of the current account. The remaining tables, Tables 7 to 32, provide additional breakdowns, related series (e.g. exchange rates and the trade-weighted index), reconciliations of selected balance of payments series with other series (i.e. with foreign trade statistics and levels of official reserve assets), historical data on selected balance of payments aggregates and other analytical information.

Concepts, sources and methods

3. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0). The publication also provides item definitions, explanations of seasonal adjustment, constant price estimates, implicit price deflators and the terms of trade; and an analysis of the quality of the estimates.

Commodity breakdowns of merchandise

4. Commodity breakdowns of merchandise exports and imports are provided in Table 11 (at current prices), 12 (at average 1984-85 prices), 13 (at current prices, seasonally adjusted) and 14 (at average 1984-85 prices, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard International Trade Classification (SITC rev 3) as follows:

	<i>SITC rev 3</i>	
	<i>Section or Division</i>	
Exports		
Rural -		
Meat & meat preparations	01	
Cereal grains and cereal preparations	04	
Sugar, sugar preparations & honey	06	
Wool and sheepskins	21(part),26(part)	
Other rural	00,02,03,05,07 to 09, 12,21(part),22 to 25, 26(part),29,4	
Non-rural -		
Metal ores & minerals	27,28	
Mineral fuels -		
Coal, coke and briquettes	32	
Other mineral fuels	33 to 35	
Metals -		
Gold	95,97	

	<i>SITC rev 3</i>
	<i>Section or Division</i>
Exports (cont.)	
Other metals	67,68
Machinery	71 to 77
Transport equipment	78,79
Other manufactures	5,61 to 66,69,8
Other non-rural	11,93,96,98

Imports

Food, beverages & tobacco	0,1
Fuels	3
Chemicals (incl. plastics)	5
Textiles, fabrics etc	65
Metals and metal manufactures	67 to 69
Machinery	71 to 77
Transport equipment	78,79
Other manufactures	61 to 64,66,8
Other imports	2,4,9

Note: Division 98 is not part of the SITC. In the balance of payments it comprises confidential items, which are removed from their actual division and combined in Division 98 to prevent disclosure of their values.

Seasonal adjustment

5. Most of the current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation. However, seasonally adjusted statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.

6. The factors to be used in compiling seasonally adjusted estimates for certain series (principally components of merchandise trade and investment income) up to and including December quarter 1992 can be obtained, for a charge, from Mr Trevor Jolly on Canberra (06) 252 6820.

Trend estimates

7. The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights employed here have been tailored to suit the particular characteristics of individual series. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. Details of trend-cycle weighting patterns are available on request from the Supervisor, Time Series Analysis, on (06) 252 6345.

Accuracy and reliability of estimates

8. Because the transactions recorded in the balance of payments are of many different kinds, compilation of balance of payments estimates entails the use of a very

wide range of statistical data of varying degrees of accuracy and timeliness.

9. Therefore care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are *preliminary and subject to revision* as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

Investment income and capital transactions

10. Additional information about capital account and investment income transactions is available in the quarterly publication *International Investment Position, Australia* (5306.0) and in the annual publication *International Investment Position, Australia* (5305.0). Statistics in international investment publications are consistent with those in balance of payments publications. International investment publications also provide comprehensive statistics on the level of foreign investment in Australia, the level of Australian investment abroad and Australia's external debt.

Transportation transactions

11. Additional information on freight and other transportation transactions is available on request for a charge from Mr. John Rattur on (06) 252 5738.

Comparability with capital expenditure statistics

Tables 11 and 13 in this publication contain current price estimates of *imports of endogenous capital goods*. Shorter-term movements in this series can differ quite significantly from the corresponding movements in the *new private capital expenditure on equipment, plant and machinery* series published in *Private New Capital Expenditure, Australia* (5625.0 and 5626.0). The main reasons for the differences are:

- The imports series includes all goods defined as endogenous capital goods, whereas the capital expenditure series relates only to goods classified as equipment, plant and machinery that are acquired by private enterprises in selected industries.
- The capital expenditure series includes all plant, machinery and equipment, irrespective of whether it has been imported or manufactured in Australia.
- Imports are valued f.o.b. at the point of export whereas estimates of capital expenditure are measured at domestic market prices, including international transport margins, government duties and domestic trade and transport margins.

12. Accordingly, while movements in imports of endogenous capital goods can provide a broad indication of movements in the *import component* of new private capital expenditure on equipment, plant and machinery, they do not necessarily provide an accurate indication of movements in total new private capital expenditure on these goods.

Series available on request

13. Detailed quarterly export and import series at constant (average 1984-85) prices can be obtained by contacting Mr Stephen Waugh on Canberra (06) 252 6716. These series are based on foreign trade statistics (ie they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC rev 3. Quarterly tables showing components of services can also be obtained from Mr Waugh. These tables provide original and seasonally adjusted current and constant price estimates, corresponding to the series shown (in original current price terms) in Tables 17 and 18 of this publication. Both sets of estimates are working estimates only and may not always be completely consistent with published estimates.

Related publications

14. Other ABS publications which may be of interest include:

Balance of Payments, Australia (5301.0) - issued monthly

Balance of Payments, Australia (5303.0) - issued annually

Balance of Payments, Australia: Concepts, Sources and Methods (5331.0)

Information paper - Seasonal Adjustment of Australia's Monthly Balance of Payments Statistics (5359.0).

Foreign Trade, Australia: Merchandise Exports (5432.0) - issued monthly

Foreign Trade, Australia: Merchandise Imports (5433.0) - issued monthly

Export Price Index, Australia (6405.0) - issued monthly

Import Price Index, Australia (6414.0) - issued quarterly

International Investment Position, Australia (5305.0) - issued annually

International Investment Position, Australia (5306.0) - issued quarterly

Foreign Investment, Australia: Summary of Concepts, Sources and Methods (5355.0).

15. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
