CONSUMER PRICE INDEX

JUNE QUARTER, 1965

Variations in retail prices as measured by the Consumer Price Index for the six State capital cities and Canberra are shown herein.

2. Compared with the previous quarter, the All Groups Consumer Price Index for June Quarter, 1965, increased by 0.9% for the weighted average of the six State capital cities. Changes in individual cities were: Sydney +0.9%, Melbourne +1.1%, Brisbane +0.8%, Adelaide +0.8%, Perth +1.0%, Hobart +0.9%, Canberra +0.9%.

3.

Recent quarterly changes in the All Groups index have been as follows:-

Percentage Change from Preceding Quarter

A detailed description of the Consumer Price Index is contained in Labour 5. Report No. 50, 1962-63.

6. The Consumer Price Index measures quarterly variations in prices of commodities and services as affecting a high proportion of the expenditure of wageearner households in the aggregate. Changes in the pattern of this expenditure since 1950 have been such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals (rather than on the basis of a list of items and set of weights which remained unchanged throughout the period). Five series for short periods, viz.; September Quarter, 1948 to June Quarter, 1952; June Quarter, 1952 to June Quarter, 1956; June Quarter, 1956 to March Quarter, 1960; March Quarter, 1960 to December Quarter, 1963; and from December Quarter, 1963 have therefore been constructed and linked to form a continuous retail price index series published herein as the Consumer Price Index. At times of linking the weighting pattern was altered and, in addition, new items (mainly ones that had become significant in household expenditure) were introduced. In each period between links the items and weighting have remained unchanged.

The indexes measure price movements in each city individually. They do 7. not provide a comparison of the retail price level in any city with the retail price level of any other city.

8. Table 1 on page 4 of this Bulletin shows Consumer Price Index numbers for each fiscal year from 1948-49 to 1964-65 and for each quarter from March Quarter, 1962. Table 2 on page 5 shows Group Index numbers quarterly from March Quarter, 1964 to June Quarter, 1965.

The following table is provided to assist interpretation of movements shown 9. by the Consumer Price Index from March Quarter, 1965 to June Quarter, 1965.

	State Capital Cities - Separately and Combined

CONSUMER PRICE INDEX

Movement from March Quarter, 1965 to June Quarter, 1965

of MATI Cro dia mia

(a) For each city, the total change in index points since the preceding quarter is the arithmetical difference between the All Groups Index numbers for the last two quarters shown in Table 1, page 4 hereof (e.g. Sydney : March Quarter, 1965, 129.1; June Quarter, 1965, 130.3; difference of +1.2 index points). The dissection in this table shows the approximate amount each group has contributed to this total movement.

10. A summary of the movements of the various group indexes, together with the <u>main quarterly</u> price changes which affected the index between March Quarter, 1965 and June Quarter, 1965 is shown below :-

Food Group

Increases in the prices of meat and potatoes were responsible for virtually all the movement in the Food Group and for approximately two thirds of the increase in the All Groups index for the weighted average of the six State capital cities (see table on page 2).

The price of eggs increased in all State capital cities and the prices of milk and ice cream increased in Brisbane.

The food group of the index (weighted average of the six State capital cities) showed a quarterly increase of 2.1%.

Clothing and Drapery Group

The index for the weighted average of the six State capital cities showed a quarterly increase of 0.4%.

Housing Group

Local Government rates and charges increased in two cities. There were increases in the other sections of this group in most State capital cities. The index for the weighted average of the six State capital cities showed a quarterly increase of 1.1%.

Household Supplies and Equipment Group

The index for the weighted average of the six State capital cities showed a quarterly increase of 0.4%.

Miscellaneous Group

The price of newspapers increased in Hobart. Overall, the index for the weighted average of the six State capital cities did not change.
