#### CONSUMER PRICE INDEX - JUNE QUARTER 1970

Variations in retail prices as measured by the Consumer Price Index for the six State capital cities and Canberra are shown herein.

- Compared with the previous quarter, the All Groups Consumer Price Index for June Quarter 1970 increased by 1.3% for the weighted average of the six State capital cities. Changes in individual cities were: Sydney +1.4%, Melbourne +1.1%, Brisbane +0.7%, Adelaide +1.5%, Perth +1.4%, Hobart +0.6%, Canberra +0.9%.
- 3. Recent quarterly changes in the All Groups index have been as follows:

  Percentage Change from Preceding Quarter

·	[s	State Capital Cities - Combined and Separately

Reference No. 9.1

- 5. A detailed description of the Consumer Price Index is contained in Labour Report No. 53, 1967.
- 6. The Consumer Frice Index measures quarterly variations in prices of commodities and services as affecting a high proportion of the expenditure of wage-earner households in the aggregate. Changes in the pattern of this expenditure since 1950 have been such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals (rather than on the basis of a list of items and set of weights which remained unchanged throughout the period). Six series for short periods, viz., September Quarter 1948 to June Quarter 1952; June Quarter 1952 to June Quarter 1956; June Quarter 1956 to Narch Quarter 1960; March Quarter 1960 to December Quarter 1963; December Quarter 1963 to December Quarter 1968; and from December Quarter 1968 have therefore been constructed and linked to form a continuous retail price index series published herein as the Consumer Price Index. At times of linking the weighting pattern was altered and, in addition, new items (mainly ones that had become significant in household expenditure) were introduced. In each period between links the items and weighting have remained unchanged.
- 7. The indexes measure price movements in each city individually. They do not provide a comparison of the retail price level in any city with the retail price level of any other city.
- 8. Table 1 on page 4 of this Bulletin shows Consumer Price Index numbers for each fiscal year from 1960-61 to 1969-70 and for each quarter from March Quarter 1967. Table 2 on pages 5 and 6 shows Group Index numbers quarterly from March Quarter 1968 to June Quarter 1970.
- 9. The following table is provided to assist interpretation of movements shown by the Consumer Price Index from March Quarter 1970 to June Quarter 1970. A supplement (Reference No. 9.7) containing more detailed information for the weighted average of the six State capital cities is available on request.

(a) For each city, th	e total o	hange i	in index po	ints sinc	e the pre	ceding	quarter	is the		

(a) For each city, the total change in index points since the preceding quarter is the arithmetical difference between the All Groups Index numbers for the last two quarters shown in Table 1, page 4 hereof (e.g. Weighted Average of Six State Capital Cities: March Quarter 1970, 109.8, June Quarter 1970, 111.2; difference of +1.4 index points). The dissection in this table shows the approximate amount each group has contributed to this total movement. (b) In terms of 1966-67 base. (c) Weighted average of six State capital cities.

10. A summary of the revenents of the various group indexes, together with the main quarterly price changes which affected the index between March Quarter 1970 and June Quarter 1970, is shown below:

Food Group. Changes in meat and potato prices are frequently the major cause of movements in the total index and of disparate movements between cities. The effects of changes in the price of these items in each city for this quarter are shown in the table in paragraph 9 on page 2 of this bulletin.

The price of bread increased in Sydney and Canberra and egg prices rose in Melbourne. Increases of less significance occured in most other sections of the group.

The Food Group of the index (weighted average of the six State capital cities) showed an overall quarterly increase of 1.3%.

Clothing and Drapery Group. The index for the weighted average of the six State capital cities showed a quarterly increase of 0.9% due to increases in the prices of winter seasonal items and of footwear.

Housing Group. Local government rates and charges increased in Sydney and Melbournc. Rents of privately owned houses and flats increased in Sydney and to a lesser degree in the other State capital cities. Increases also occurred in all cities in the items, house price and repairs and maintenance.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 1.8%.

Household Supplies and Equipment Group. The group index for the weighted average of the six State capital cities showed a quarterly increase of 0.7%.

Miscellaneous Group. Newspaper prices increased in Sydney, Adelaide and Canberra. Prices of magazines and of tobacco and digarettes increased in all cities.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 1.3%.
