Brian Pink Australian Statistician

MAIN CONTRIBUTORS TO CHANGE

CPI GROUPS

The discussion of the CPI groups below is ordered in terms of their absolute significance to the change in All groups index points for the quarter (see tables 6 and 7).

WEIGHTED AVERAGE OF EIGHT CAPITAL CITIES, Percentage change from previous quarter

ALCOHOL AND TOBACCOThe rise in the alcohol and tobacco group in the June quarter 2010 was largely due to a
15.4% increase in tobacco prices following a 25% increase in excise tax on the 30th of
April 2010 and some price rises. This was the largest increase in the price of tobacco
since December quarter 1975 when prices increased 18.8%. There were also increases in
beer (+1.3%) and wine (+0.3%) due to the cessation of specialling and some price rises.
The only offset was spirits (-0.2%).

Over the twelve months to June quarter 2010, the alcohol and tobacco group rose 8.7% due to increases in tobacco (+17.1%), beer (+6.1%), spirits (+2.6%) and wine (+1.5%).

HOUSING (+0.6%)The housing group recorded an increase this quarter due mainly to rises for rents
(+1.1%) and house purchase (+0.6%). Rents increased in all cities ranging from Sydney
and Darwin (+1.2%) to Perth (+0.9%). House purchase increased in all cities ranging
from Perth (+1.1%) to Brisbane and Darwin (+0.2%). Electricity (-0.6%) recorded a
small decrease due to a seasonal switch to off-peak pricing in Melbourne and Adelaide.

Over the twelve months to June quarter 2010 the housing group rose 5.8% mainly due to rises in electricity (+18.2%), house purchase (+3.9%) and rents (+4.4%).

HEALTH (+2.2%)The major contributor to the increase in the health group this quarter was hospital and
medical services (+3.8%) which rose mainly as a result of increases in private health fund
premiums from 1 April 2010. The only offset was pharmaceuticals (-1.3%), mainly due to
the effect of the Pharmaceutical Benefits Scheme safety net.

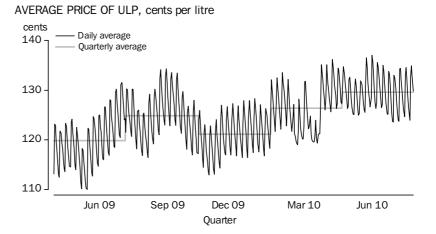

Over the twelve months to June quarter 2010, the health group rose 5.0% due to increases in hospital and medical services (+6.7%), dental services (+4.0%) and pharmaceuticals (+1.2%).

TRANSPORTATION (+0.7%)

There was an increase in the transportation group this quarter with the most significant rise for automotive fuel (+2.1%). Motor vehicle repair and servicing (+0.8%) and other motoring charges (+1.4%) also recorded increases. The major offsets were urban transport fares (-1.6%), motor vehicles (-0.2%) and motor vehicle parts and accessories (-0.1%).

Automotive fuel rose in January (+3.6%), fell in February (-2.5%), rose in March (+4.6%), fell in April (-0.5%), rose in May (+1.5%) and fell in June (-1.4%).

The following graph shows the pattern of the average daily prices for unleaded petrol for the eight capital cities over the last fifteen months.

Over the twelve months to June quarter 2010, the transportation group rose 3.2%. The main contributor was automotive fuel (+7.6%). There were also increases in other motoring charges (+7.7%), motor vehicle repair and servicing (+2.2%), urban transport fares (+2.6%), and motor vehicle parts and accessories (+0.4%) which was partially offset by motor vehicles (-0.7%). The general rate of customs duty on motor vehicle imports was cut from 10% to 5% on 1 January 2010.

HOUSEHOLD CONTENTSThe household contents and services group recorded a rise in the June quarter 2010AND SERVICES (+0.9%)with increases in furniture (+2.0%), glassware, tableware and household utensils
(+6.2%) and towels and linen (+2.8%). These increases were largely due to cessation of
specials offered in the March quarter 2010. Major household appliances (-0.7%) and
toiletries and personal care products (-0.3%) recorded decreases in the June quarter
2010.

Over the twelve months to June quarter 2010, the household contents and services group rose 0.2%. This increase was predominantly due to rises in other household services (+3.9%) and hairdressing and personal care services (+3.1%).

FINANCIAL ANDThe major contributor to the increase in financial and insurance services this quarter wasINSURANCE SERVICESother financial services (+0.8%) driven by increases in real estate agent fees and taxes on(+0.2%)transfers. Insurance services (-0.5%) recorded a partial offsetting fall due to increasedcompetition in motor vehicle insurance premiums in some cities.

FINANCIAL AND INSURANCE SERVICES (+0.2%) continued	Deposit and loan facilities (-0.1%), which include both direct fees and prices derived from interest rate margins, recorded a small fall during the June quarter 2010. The prices of services charged by financial institutions varied across the range of products covered in the CPI. There was a decrease in the price of services charged on some loan products. This was partially offset by an increase in the price of services charged on many deposit products. This resulted in a small negative price change overall. For more details on calculating prices of financial services, please see the appendix in the June quarter 2008 publication.
	Over the twelve months to June quarter 2010, the financial and insurance services group recorded an increase of 3.9% . This was due to increases in deposit and loan facilities (+6.4%), insurance services (+5.2%), and other financial services (+0.4%).
RECREATION (-1.8%)	The recreation group fell 1.8% in the June quarter 2010, the largest quarterly fall since the series began in June quarter 1989. The fall this quarter was mainly due to domestic holiday travel and accommodation (-6.0%), audio, visual and computing equipment (-6.3%) and overseas holiday travel and accommodation (-1.9%). The most significant offset was pets, pet foods and supplies ($+4.5\%$).
	The drop for domestic holiday travel and accommodation was due to significant discounting on domestic airfares as well as low season pricing on holiday accommodation. Audio, visual and computing equipment recorded a large fall due to increased specialling on audio visual goods.
	Over the twelve months to June quarter 2010, the recreation group fell 0.6%. The main contributor was audio, visual and computing equipment (-19.9%). This was offset by increases in pets, pet food and supplies ($+13.0\%$) and other recreation activities ($+4.5\%$).
FOOD (-0.3%)	The food group fell in the June quarter 2010 with decreases for fruit (-4.8%) and vegetables (-3.0%) as a result of seasonal availability and generally favourable weather conditions which saw an increase in supply. The only exception was in Perth where damage from adverse weather conditions led to large increases in some vegetable prices. The most significant offset was soft drinks, waters and juices (+1.6%).
	Over the twelve months to June quarter 2010, fifteen of the twenty six food categories rose to create a 1.4% price rise across the food group. Increases were mainly driven by general price rises in take away and fast foods $(+2.2\%)$ and restaurant meals $(+2.4\%)$. The most significant offset was fruit (-1.7%) .
COMMUNICATION (-0.1%)	The major contributor to the decrease in the communications group was telecommunications, which had small price falls in part as a result of changes to the pricing structure of some internet plans.
	Over the twelve months to June quarter 2010, the communications group fell 0.2%.

MAIN CONTRIBUTORS TO CHANGE continued

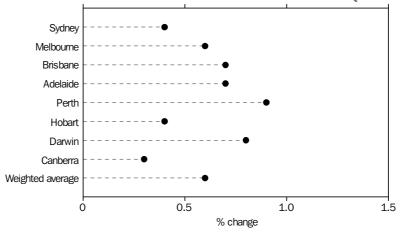

CLOTHING AND FOOTWEAR (0.0%)	The clothing and footwear group recorded no movement this quarter. This was due to decreases in women's footwear (-3.8%) and women's underwear (-1.5%) offset by increases in accessories ($+1.7\%$) and children's and infants' clothing ($+1.5\%$). Continued specialling by retailers was observed after large price falls in the March quarter 2010.
	Over the twelve months to June quarter 2010, the clothing and footwear group fell 3.8%. The decrease was mainly due to falls in men's outerwear (-6.2%), women's outerwear (-3.8%) and children's and infants' clothing (-6.4%). The general rate of customs duty on textile, clothing and footwear imports was cut from 17.5% to 10.0% on 1 January 2010. The main offset was in clothing services and shoe repair ($+3.2\%$).
EDUCATION GROUP (0.0%)	The education group recorded no movement in the June quarter 2010. Preschool primary education rose 0.1% due to a small increase in some preschool fees.
	Over the twelve months to June quarter 2010, the education group rose 5.7%.
TRADABLES AND NON-TRADABLES	The tradables component (see table 8) of the All groups CPI rose 1.0% in the June quarter 2010. Prices for the goods and services in this component are largely determined on the world market. The tradables component represents approximately 42% of the weight of the CPI. The rise in the tradable goods component was driven by increases in tobacco, automotive fuel, furniture, pets, pet food and supplies. The most significant offsetting falls were in fruit, audio, visual, and computing equipment and vegetables. The decrease in the tradable services component of 1.9% was driven by overseas holiday travel and accommodation.
	The non-tradables component of the All groups CPI rose 0.3% in the June quarter 2010. Prices for the goods and services in this component are largely determined by domestic price pressures. The non-tradables component represents approximately 58% of the CPI. The non-tradables goods component rose 0.4% mainly due to price increases for house purchase, beer and gas and other household fuels. The most significant offsetting movement was cakes and biscuits and electricity. The non-tradable services component rose 0.3%, due to increases in hospital and medical services, rents, other financial services, other recreation activities and motor vehicle repair and servicing. The most significant offset was domestic holiday travel and accommodation. Over the twelve months to June quarter 2010, tradables rose 1.4% and non-tradables rose 4.2%. This compares to tradables rising 1.1% and non-tradables rising 4.2% through the year to March quarter 2010. The main increases in tradables were for tobacco, automotive fuel, pets, pet foods and supplies, soft drinks, waters and juices and vegetables. Decreases in tradables were in audio, visual and computing services, men's outerwear, women's outerwear, motor vehicles and children's and infants' clothing. The main contributors to non-tradables were electricity, house purchase, water and sewerage, beer, gas and other household fuels and takeaway and fast foods. The largest offsetting movements were in eggs, jams, honey and sandwich spreads and bacon and ham.

CAPITAL CITIES COMPARISON

CAPITAL CITIES COMPARISON

ALL GROUPS

ALL GROUPS: PERCENTAGE CHANGE FROM PREVIOUS QUARTER

At the all groups level, the CPI rose in all capital cities this quarter. The highest positive movement was in Perth (+0.9%), followed by Darwin (+0.8%). All other cities increased between 0.3% and 0.7%.

The alcohol and tobacco group recorded the largest positive contribution in all cities, with Melbourne (+6.9%) the highest increase followed by Brisbane (+6.5%). All other cities increased between 4.7% and 5.9%. The major contributor to the increase was tobacco prices as a result of the 25% increase in excise tax and some general price rises.

The housing group was the second highest positive contributor to the quarterly movement. The highest increase was in Perth (+1.6%) followed by Canberra (+0.7%). Most of the other cities increased between 0.4% and 0.5% except Adelaide (-0.1%). The increases in most cities were due to rises across all cities in rents and house purchase. The drop in Adelaide was due to a seasonal switch to off–peak pricing for electricity.

The health group was also a major contributor to the quarterly movement. There were increases across all cities with the highest in Adelaide (+3.5%) and the lowest in Perth (+1.2%). The rise was mainly due to the increases in private health fund premiums.

The recreation group was the largest negative contributor to the quarterly movement. The largest decrease was in Hobart (-3.2%) followed by Melbourne (-2.1%) and Sydney (-2.0%). Most of the other cities decreased between 0.6% and 1.8%. Darwin (+0.5%) was the only city to record an increase. Most of the cities saw decreases to domestic holiday travel and accommodation ranging from 13.0% in Hobart to 2.2% in Canberra, the exception being Darwin (+2.4%). Another significant fall was audio, visual and computing equipment (-6.3%) with drops in all cities ranging from 8.2% in Brisbane to 2.0% in Canberra.

Over the twelve months to June quarter 2010, the all groups CPI rose in all capital cities from Perth (+3.5%) to Canberra (+2.3%). The result in Perth is due to relatively higher increases in housing, financial and insurance services and transportation.

EXPLANATORY NOTES

BRIEF DESCRIPTION OF THE CPI

1 The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). This 'basket' covers a wide range of goods and services, arranged in the following eleven groups:

- Food
- Alcohol and tobacco
- Clothing and footwear
- Housing
- Household contents and services
- Health
- Transportation
- Communication
- Recreation
- Education
- Financial and insurance services.

2 The capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.

3 Further information about the CPI is contained in *Australian Consumer Price Index: Concepts, Sources and Methods, 2009* (cat. no. 6461.0) which is available on the ABS website http://www.abs.gov.au.

PRICES **4** The frequency of price collection by item varies as necessary to obtain reliable price measures. Prices of some items are volatile (i.e. their prices may vary many times each quarter) and for these items frequent price observations are necessary to obtain a reliable measure of the average price for the quarter. Each month prices are collected at regular intervals for goods such as milk, bread, fresh meat and seafood, fresh fruit and vegetables, alcohol, tobacco, women's outerwear, project homes, motor vehicles, petrol and holiday travel and accommodation. For most other items, price volatility is not a problem and prices are collected once a quarter. There are a few items where prices are changed at infrequent intervals, for example education fees where prices are set once a year. In these cases, the frequency of price collection is modified accordingly. 5 In order to facilitate a more even spread of field collection workload, the number of items for which prices are collected quarterly is distributed roughly equally across each month of each quarter. In all cases, however, individual items are priced in the same month of each quarter. For example, items for which prices are collected in the first month of the September quarter, July, are also priced in the first month of subsequent quarters, namely October, January and April. WEIGHTING PATTERN 6 There are 90 expenditure classes (that is, groupings of like items) in the fifteenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights. 7 Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises fifteen series of price indexes which have been linked to form a continuous series. The current and historical weighting patterns for the CPI for the weighted average of the eight capital cities is published in Consumer Price Index: Historical Weighting Patterns (1948 to 2005) (cat. no. 6431). The 15th series weighting pattern for the weighted average of eight capital cities and for each of the eight capital cities, as well as each city's percentage contribution to the weighted average, are also published in the Consumer Price Index: 15th Series Weighting Pattern (Reissue) (cat. no. 6430.0)

EXPLANATORY NOTES continued

WEIGHTING PATTERN continued (electronic publication). Both publications are available on the ABS website <http://www.abs.gov.au>. ANALYSIS OF CPI CHANGES **8** Movements in indexes from one period to another can be expressed either as changes in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods: All groups CPI: Weighted average of eight capital cities. Index numbers: June Quarter 2010 172.1 (see table 1) less June Quarter 2009 167.0 (see table 1) Change in index points 5.1 $5.1/167.0 \ge 100 = 3.1\%$ (see table 2) Percentage change 9 Percentage changes are calculated to illustrate three different kinds of movements in index numbers: movements between consecutive financial years (where the index numbers for financial years are simple averages of the quarterly index numbers) movements between corresponding quarters of consecutive years movements between consecutive quarters. **10** Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for groups, sub-groups and expenditure classes. It also shows the contribution which each makes to the total CPI. For instance, the dairy and related products sub-group contributed 2.17 index points to the total All groups index number of 172.1 for June Quarter 2010. The final column shows contributions to the change in All Groups index points by each group, sub-group and expenditure class. SPECIAL SERIES **11** Various series are presented in tables 8, 9 and 10 in this publication which are helpful for analytical purposes. These series are compiled by taking subsets of the CPI basket. (A complete list of CPI groups, sub-groups and expenditure classes is contained in tables 6 and 7.) **12** Some of the compiled series are self explanatory, such as 'All groups excluding Food'. Other series and their composition are described below: All groups excluding Financial and insurance services: Reflecting the changing composition of the CPI, from September quarter 1989 to June quarter 1998, comprises the All groups CPI excluding house insurance, house contents insurance, vehicle insurance and mortgage interest charges and consumer credit charges; from September quarter 1998 to June quarter 2000 comprises the All groups CPI excluding house insurance, house contents insurance and vehicle insurance; from September quarter 2000 to June quarter 2005 comprises the All groups CPI excluding insurance services; from September quarter 2005 comprises the All groups CPI excluding Financial and insurance services. All groups excluding Housing and Financial and insurance services: Reflecting the changing composition of the CPI, from September quarter 1989 to June quarter 1998, comprises the All groups CPI excluding Housing, house contents insurance, vehicle insurance and consumer credit charges; from September quarter 1998 to June quarter 2000 comprises the All groups CPI excluding Housing, house insurance, house contents insurance and vehicle insurance; from September quarter 2000 to June quarter 2005 comprises the All groups CPI excluding Housing and

insurance services; from September quarter 2005 comprises the All groups CPI

excluding Housing and Financial and insurance services.

EXPLANATORY NOTES continued

SPECIAL SERIES continued

- All groups, goods component: comprises the Food group (except Restaurant meals expenditure class), Alcohol and tobacco group, Clothing and footwear group (except Clothing services and shoe repair expenditure class) and Household contents and services group (except Household services sub-group); the Utilities, Audio, visual and computing and Books, newspapers and magazines sub-groups; and the House purchase, Pharmaceuticals, Motor vehicles, Automotive fuel, Motor vehicle parts and accessories, Sports and recreational equipment, Toys, games and hobbies and Pets, pet foods and supplies expenditure classes.
- All groups, services component: comprises all items not included in the 'All groups, goods component'.
- All groups, tradables component: comprises all items whose prices are largely determined on the world market.
- All groups, non-tradables component: comprises all items not included in the 'All groups, tradables component'.
- All groups excluding 'volatile items': comprises the All groups CPI excluding Fruit and vegetables and Automotive fuel.
- *RBA measures* 'Weighted median' and 'Trimmed mean': These measures are calculated following the methodology adopted by the Reserve Bank of Australia. The 'Trimmed mean' is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The 'Weighted median' is the price change of the component in the middle of this ordering. For calculating the 'Weighted median' and 'Trimmed mean' series, where CPI components are identified as having a seasonal pattern, quarterly price changes are estimated on a seasonally adjusted basis. Seasonal adjustment factors are calculated using the history of price changes up to the current quarter CPI and are revised each quarter. These revisions to the seasonal adjustment factors lead to revisions in the 'Weighted median' and 'Trimmed mean' series. Movements in the series from one period to another are expressed as percentage changes (see paragraph 9).

13 Market goods and services excluding 'volatile items': in addition to the items excluded from the series 'All groups excluding 'volatile items", also excludes: Utilities, Property rates and charges, Child care, Health, Other motoring charges, Urban transport fares, Postal, and Education. A detailed description of the special and analytical series was published in Appendix 1 to the September quarter 2005 issue of *Consumer Price Index, Australia* (cat. no. 6401.0).

14 The ABS is grateful for the assistance of the Reserve Bank of Australia for specifying the items included in the 'All groups excluding 'volatile items" and 'Market goods and services excluding 'volatile items". The Reserve Bank of Australia does not accord any special policy status to these series.

15 The CPI uses a hierarchy of rounding procedures to ensure consistency between published index numbers and percentage changes. However, rounding differences can arise in the 'points contributions' published in tables 6, 7 and 8 because of the different levels of precision required in those data.

16 In analysing price movements in Australia, an important consideration is Australia's performance relative to other countries. However, a simple comparison of All groups (or headline) CPIs is often inappropriate because of the different measurement approaches used by countries for certain products, particularly housing and financial and insurance services. To provide a better basis for international comparisons, the Seventeenth International Conference of Labour Statisticians adopted a resolution which called for countries to 'if possible, compile and provide for dissemination to the international

ROUNDING

INTERNATIONAL COMPARISONS

EXPLANATORY NOTES continued

INTERNATIONAL COMPARISONS continued	community an index that excludes housing and financial services' in addition to the all-items index.		
	17 Table 11 aims to present indexes for selected countries on a basis consistent with the above resolution and comparable to the Australian series 'All groups excluding Housing and Financial services' (see paragraph 12). However, other than Australia and New Zealand, the countries represented in this table are yet to develop indexes on this basis, so the indexes presented here are consistent with the series previously published for All groups excluding Housing. To facilitate comparisons all indexes in this table have been converted, where necessary, to a quarterly basis and re-referenced to a base of $1989-90 = 100.0$.		
	18 In producing table 11, the ABS is grateful for the assistance of the relevant national statistical agencies which have either directly supplied indexes for all items excluding housing and financial services or data to enable their derivation.		
RELATED PUBLICATIONS	19 Current publications and other products released by the ABS are listed on the ABS website <http: www.abs.gov.au="">. The ABS also issues a daily <i>Release Advice</i> on the website which details products to be released in the week ahead.</http:>
