KEY POINTS

THE ALL GROUPS CPI

- rose 1.6% in the March quarter 2011, compared with a rise of 0.4% in the December quarter 2010.
- rose 3.3% through the year to the March quarter 2011, compared with a rise of 2.7% through the year to the December quarter 2010.

OVERVIEW OF CPI MOVEMENTS

- The most significant price rises this quarter were for automotive fuel (+8.8%), vegetables (+16.0%), deposit and loan facilities (+4.6%), fruit (+14.5%) and pharmaceuticals (+12.5%).
- The most significant offsetting price falls were for furniture (-6.2%), audio, visual and computing equipment (-7.2%), milk (-6.2%), overseas holiday travel and accommodation (-1.6%) and motor vehicles (-0.5%).

OUTCOME OF THE 16TH SERIES CPI REVIEW The ABS recently completed an extensive review of its CPI and has announced changes to ensure the CPI continues to meet the requirements of the Australian community. An Information Paper: *Introduction of the 16th Series Australian Consumer Price Index* (cat. no. 6467.0) will be published on 22 September 2011 outlining the changes to the CPI.

One outcome of the review is the discontinuation of Average Retail Prices of Selected Items, Eight Capital Cities (cat. no. 6403.0.55.001). The June quarter 2011 release will be the final issue.

The 16th series CPI will be introduced from the September quarter 2011. For more details about changes to the CPI, please refer to Information Paper: Outcome of the 16th Series Australian Consumer Price Index Review (cat. no. 6469.0), or www.abs.gov.au.

IMPACT OF THE FLOODS AND CYCLONE YASI ABS price index compilation methodologies and quality assurance processes have ensured that any impact of the floods and cyclone on consumer prices is reflected in the data included in this publication. See page 3 – Impact of the floods and Cyclone Yasi for details.

ROUNDING

Any discrepancies between totals and sums of components in this publication are due to rounding.

IMPACT OF THE FLOODS AND CYCLONE YASI

IMPACT OF THE FLOODS
AND CYCLONE YASI

Extensive flooding began in late December 2010 in Queensland, and intensified in both Queensland and other states in January 2011. In early February 2011, Severe Tropical Cyclone Yasi crossed the north Queensland coast. Gale force winds, flooding rain and storm surges caused significant damage to areas in the storm's path.

Despite some disruptions in Brisbane, all CPI collections for January 2011 were completed for the month and processing for the March quarter 2011 CPI was not affected.

On a quarter to quarter basis the prices of items can be impacted by a number of factors including exchange rates, supply constraints, specialling and seasonal patterns. The impact of events like the Queensland floods and Cyclone Yasi cannot be readily quantified.

ABS price index compilation methodologies and quality assurance processes have ensured that any impacts of the floods and cyclone on consumer prices have been reflected in the data included in this publication.

The floods and Cyclone Yasi caused price increases in some fruit and vegetables:

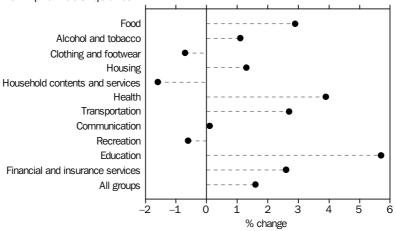

- Fruit prices increased by 14.5% in the March quarter 2011, compared with a fall of 5.7% in the March quarter 2010. The rise in fruit prices was mainly attributable to an increase of approximately 100% in the price of bananas during the March quarter 2011 due to the floods and Cyclone Yasi. Through the year to the March quarter 2011, fruit prices increased by 24.9%.
- Vegetable prices increased by 16.0% in the March quarter 2011, compared with a rise of 10.3% in the March quarter 2010. The increase in vegetable prices was driven by price rises in cauliflowers, broccoli, lettuce, pumpkin and potatoes due to damage to crops as well as the usual seasonal price rises. Through the year to the March quarter 2011, vegetable prices increased by 18.7%.

MAIN CONTRIBUTORS TO CHANGE

CPI GROUPS

The discussion of the CPI groups below is ordered in terms of their absolute significance to the change in All groups index points for the quarter (see tables 6 and 7).

WEIGHTED AVERAGE OF EIGHT CAPITAL CITIES, Percentage change from previous quarter

FOOD (+2.9%)

The food group recorded an increase in the March quarter 2011. The most significant contributors were vegetables (+16.0%) and fruit (+14.5%). The rise in vegetables was driven by ongoing unfavourable weather conditions in some growing areas, which resulted in lower yields and short supplies for some types of vegetables. The rise in fruit prices was mainly attributable to an increase of approximately 100% in the price of bananas during the March quarter 2011 due to shortages created by Cyclone Yasi in February 2011. Milk (-6.2%) provided the most significant offset, due to discounting across supermarkets.

Over the twelve months to the March quarter 2011, seventeen out of the twenty six food categories rose contributing to a 4.3% price rise across the food group. Increases were mainly driven by general price rises in fruit (+24.9%), and vegetables (+18.7%). Milk (-6.2%) recorded the most significant offsetting price movement.

TRANSPORTATION (+2.7%)

The main contributors to the increase in the transportation group in the March quarter 2011 were automotive fuel (+8.8%) and urban transport fares (+1.0%). Motor vehicles (-0.5%) recorded the only offsetting fall.

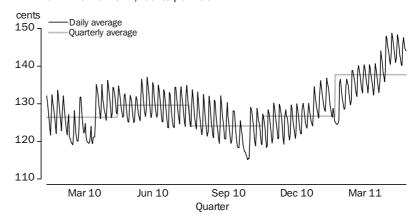

Automotive fuel rose in October (+2.5%), November (+0.8%), December (+4.2%), January (+2.4%), February (+2.2%) and March (+4.8%).

The following graph shows the pattern of the average daily prices for unleaded petrol for the eight capital cities over the last fifteen months.

TRANSPORTATION

(+2.7%) continued

AVERAGE PRICE OF ULP, cents per litre

Over the twelve months to the March quarter 2011, the transportation group rose 3.0% primarily due to increases in automotive fuel (+9.3%) and other motoring charges (+7.6%). Motor vehicles (-1.4%) recorded the only offsetting fall.

HOUSING (+1.3%)

The housing group recorded an increase in the March quarter 2011. The main contributors to the movement were electricity (+5.1%), rents (+1.3%) and house purchase (+0.8%).

Electricity prices rose in the March quarter 2011 mainly due to tariff increases in Adelaide (+19.2%), Melbourne (+12.6%) and Hobart (+9.3%).

Over the twelve months to the March quarter 2011, the housing group rose 4.8% with increases in all categories. The main contributors were rents (+4.5%), electricity (+11.7%), house purchase (+2.6%) and water and sewerage (+12.8%).

FINANCIAL AND
INSURANCE SERVICES
(+2.6%)

The main contributor to the increase in the financial and insurance services group this quarter was deposit and loan facilities (+4.6%), which include both direct fees and prices derived from interest rate margins. The price of services charged by financial institutions varied across the range of products covered in the CPI. There were increases in the prices of services charged on both deposit products and loan products in the March quarter 2011. For more details on calculating prices of financial services, please see the appendix in the June quarter 2008 CPI publication.

Insurance services recorded an increase of 1.2% in the March quarter 2011, driven mainly by higher premiums for house insurance and household contents insurance.

Over the twelve months to the March quarter 2011, the financial and insurance services group recorded an increase of 2.8%. This was due to increases in deposit and loan facilities (+3.3%), other financial services (+2.1%), and insurance services (+3.0%).

HEALTH (+3.9%)

The health group recorded an increase in the March quarter 2011 with all capital cities registering a rise. The main contributor was pharmaceuticals (+12.5%). Pharmaceuticals prices rose as a result of the cyclical reduction in the proportion of consumers who qualify for subsidised medications under the Pharmaceuticals Benefit Scheme at the start of each calendar year.

MAIN CONTRIBUTORS TO CHANGE continued

HEALTH (+3.9%) continued

Hospital and medical services (+2.1%) recorded an increase in the March quarter 2011 mainly due to the cyclical reduction in the proportion of consumers who qualify for subsidies for out-of-hospital medical expenses under the Medicare Plus safety net at the start of each calendar year.

Over the twelve months to the March quarter 2011, the health group rose 4.1% mainly due to increases in hospital and medical services (+6.0%) and dental services (+2.8%).

EDUCATION (+5.7%)

The education group recorded a rise in the March quarter 2011, with the commencement of the new school year. Increases in secondary education (+6.8), tertiary education (+4.9%), and preschool and primary education (+5.4%) drove this movement.

Over the twelve months to the March quarter 2011, the education group rose 5.9%.

HOUSEHOLD CONTENTS
AND SERVICES (-1.6%)

The household contents and services group fell in the March quarter 2011, with decreases in furniture (-6.2%) and towels and linen (-5.2%) mainly due to post Christmas sales.

Over the twelve months to the March quarter 2011, the household contents and services group fell 0.5%. This decrease was predominantly due to falls in furniture (-2.8%) and major household appliances (-5.0%).

ALCOHOL AND TOBACCO (+1.1%)

The alcohol and tobacco group recorded an increase in the March quarter 2011. The main contributor to the rise was tobacco (+2.1%) partially due to the effects of the federal excise tax increase from 1 February 2011.

Over the twelve months to the March quarter 2011, the alcohol and tobacco group rose 11.2% driven by increases in tobacco (+27.5%) which was mainly due to the effect of the 25% increase in federal excise on tobacco implemented on 30 April 2010.

RECREATION (-0.6%)

The fall in the recreation group in the March quarter 2011 was mainly due to decreases in audio, visual and computing equipment (-7.2%) and overseas holiday travel and accommodation (-1.6%). The most significant offset was recorded in other recreational activities (+2.5%).

Over the twelve months to the March quarter 2011, the recreation group fell 1.5%. The main contributors to the movement were audio, visual and computing equipment (–19.5%) and overseas holiday travel and accommodation (–2.5%). This was partially offset by a rise in other recreational activities (+3.8%).

In the CPI, airfares are collected in advance (at the time of payment), but only used in the CPI in the quarter in which the trip is undertaken. Overseas airfares are collected two months in advance (January for travel in March) and domestic airfares are collected one month in advance (January for February).

CLOTHING AND FOOTWEAR (-0.7%)

The clothing and footwear group recorded a decrease in the March quarter 2011. The main contributors to the movement were children's and infants' clothing (-3.9%) and men's outerwear (-2.7%).

MAIN CONTRIBUTORS TO CHANGE continued

CLOTHING AND
FOOTWEAR (-0.7%)
continued

Over the twelve months to the March quarter 2011, the clothing and footwear group fell 1.3%. The main contributor to the movement was women's outerwear (-2.7%). Accessories (+3.0%) recorded the largest offsetting annual movement.

COMMUNICATION (+0.1%)

The communication group recorded a rise in the March quarter 2011 mainly due to a rise in telecommunication (+0.2%).

TRADABLES AND NON-TRADABLES

In the twelve months to the March quarter 2011, the communication group recorded a fall of 0.2% due to a decrease in telecommunication (-0.4%).

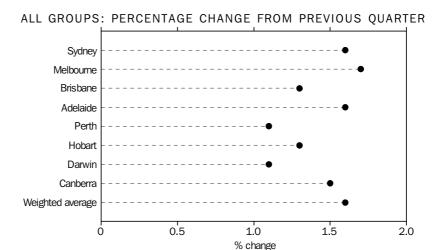

The tradables component (see table 8) of the All groups CPI rose 1.8% in the March quarter 2011. Prices for the goods and services in this component are largely determined on the world market. The tradables component represents approximately 42% of the weight of the CPI. The most significant contributors to the 2.0% rise in the tradable goods component were automotive fuel, vegetables, fruit, pharmaceuticals and tobacco. The most significant offsetting falls were in furniture, audio, visual and computing equipment and motor vehicles. The decrease in the tradable services component of 1.6% was driven by overseas holiday travel and accommodation.

The non-tradables component of the All groups CPI rose 1.4% in the March quarter 2011. Prices for the goods and services in this component are largely determined by domestic price pressures. The non-tradables component represents approximately 58% of the CPI. The non-tradable goods component rose 0.9% mainly due to price increases for electricity, house purchase and take away and fast foods. The most significant offsetting movement was in milk. The non-tradable services component rose 1.6%, due to increases in deposit and loan facilities, rents, secondary education, tertiary education and hospital and medical services.

Over the twelve months to the March quarter 2011, the tradables and non-tradables components both rose 3.3%. This compared to tradables rising 1.6% and non-tradables rising 3.4% through the year to December quarter 2010. The main increases in tradables were for tobacco, automotive fuel, fruit and vegetables. The main decreases in tradables were in audio, visual and computer equipment, motor vehicles, furniture and overseas holiday travel and accommodation. The main contributors to non-tradables were rises in rents, electricity, house purchase, hospital and medical services, deposit and loans facilities and water and sewerage. The largest offsetting movements were in milk, domestic holiday travel and accommodation and telecommunication.

CAPITAL CITIES COMPARISON

ALL GROUPS

At the All groups level, the CPI rose in all capital cities in the March quarter 2011. The highest positive movement was recorded in Melbourne (+1.7%) followed by Sydney (+1.6%) and Adelaide (+1.6%). The remaining four cities increased between 1.1% and 1.5%.

The food group was the most significant positive contributor in all cities with the exception of Melbourne, Adelaide, and Hobart, where the most significant positive contributor was the housing group mainly due to electricity price increases in those cities. The largest increases for the food group were recorded in Canberra (+3.5%), Brisbane (+3.4%), and Sydney (+3.0%) driven by increases in vegetable and fruit prices.

At the eight capital cities level, the transportation group was the second largest positive contributor to the quarterly movement showing increases in all cities. The most significant contributor was the increase in automotive fuel in all capital cities, most notably in Perth (+9.8%) and Sydney (+8.9%).

The household contents and services group was the largest negative contributor to the quarterly movement at the eight capital cities level. The largest decreases for the household contents and services group were recorded in Perth (-1.9%), Sydney (-1.6%) and Melbourne (-1.6%). Darwin (+0.6%) was the only city to record an increase in the March quarter 2011.

Over the twelve months to the March quarter 2011, the All groups CPI rose in all capital cities. The largest positive movement was recorded in Brisbane (+3.6%) and Adelaide (+3.6%) due to relatively higher increases in alcohol and tobacco and housing respectively. Perth (+2.6%) recorded the smallest positive movement mainly due to relatively smaller rises in food, alcohol and tobacco and housing.

EXPLANATORY NOTES

BRIEF DESCRIPTION OF THE

- **1** The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). This 'basket' covers a wide range of goods and services, arranged in the following eleven groups:
 - Food
 - Alcohol and tobacco
 - Clothing and footwear
 - Housing
 - Household contents and services
 - Health
 - Transportation
 - Communication
 - Recreation
 - Education
 - Financial and insurance services.
- **2** Capital city indexes used by the CPI are based on the 2006 Australian Standard Geographical Classification (ASGC) statistical divisions. The capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.
- **3** Further information about the CPI is contained in *Australian Consumer Price Index: Concepts, Sources and Methods, 2009* (cat. no. 6461.0) which is available on the ABS website http://www.abs.gov.au.
- **4** The frequency of price collection by item varies as necessary to obtain reliable price measures. Prices of some items are volatile (i.e. their prices may vary many times each quarter) and for these items frequent price observations are necessary to obtain a reliable measure of the average price for the quarter. Each month prices are collected at regular intervals for goods such as milk, bread, fresh meat and seafood, fresh fruit and vegetables, alcohol, tobacco, women's outerwear, project homes, motor vehicles, petrol and holiday travel and accommodation. For most other items, price volatility is not a problem and prices are collected once a quarter. There are a few items where prices are changed at infrequent intervals, for example education fees where prices are set once a year. In these cases, the frequency of price collection is modified accordingly.
- **5** In order to facilitate a more even spread of field collection workload, the number of items for which prices are collected quarterly is distributed roughly equally across each month of each quarter. In all cases, however, individual items are priced in the same month of each quarter. For example, items for which prices are collected in the first month of the September quarter, July, are also priced in the first month of subsequent quarters, namely October, January and April.
- **6** There are 90 expenditure classes (that is, groupings of like items) in the fifteenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.
- 7 Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises fifteen series of price indexes which have been linked to form a continuous series. The current and historical weighting patterns for the CPI for the weighted average of the eight capital cities is published in *Consumer Price Index: Historical Weighting Patterns (1948 to 2005)* (cat. no. 6431). The 15th series weighting pattern for the weighted average of eight capital cities and for each of the eight capital cities, as well as each city's percentage contribution to the weighted average, are also published in the

WEIGHTING PATTERN continued

Consumer Price Index: 15th Series Weighting Pattern (Reissue) (cat. no. 6430.0) (electronic publication). Both publications are available on the ABS website http://www.abs.gov.au.

ANALYSIS OF CPI CHANGES

8 Movements in indexes from one period to another can be expressed either as changes in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods:

All groups CPI: Weighted average of eight capital cities.

Index numbers:

June Quarter 2010 172.1 (see table 1) less June Quarter 2009 167.0 (see table 1)

Change in index points 5.1

Percentage change $5.1/167.0 \times 100 = 3.1\%$ (see table 2)

- **9** Percentage changes are calculated to illustrate three different kinds of movements in index numbers:
 - movements between consecutive financial years (where the index numbers for financial years are simple averages of the quarterly index numbers)
 - movements between corresponding quarters of consecutive years
 - movements between consecutive quarters.
- **10** Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for groups, sub–groups and expenditure classes. It also shows the contribution which each makes to the total CPI. For instance, the dairy and related products sub–group contributed 2.17 index points to the total All groups index number of 172.1 for June Quarter 2010. The final column shows contributions to the change in All Groups index points by each group, sub–group and expenditure class.
- **11** Various series are presented in tables 8, 9 and 10 in this publication which are helpful for analytical purposes. These series are compiled by taking subsets of the CPI basket. (A complete list of CPI groups, sub-groups and expenditure classes is contained in tables 6 and 7.)
- **12** Some of the compiled series are self explanatory, such as 'All groups excluding Food'. Other series and their composition are described below:
 - All groups excluding Financial and insurance services: Reflecting the changing composition of the CPI, from September quarter 1989 to June quarter 1998, comprises the All groups CPI excluding house insurance, house contents insurance, vehicle insurance and mortgage interest charges and consumer credit charges; from September quarter 1998 to June quarter 2000 comprises the All groups CPI excluding house insurance, house contents insurance and vehicle insurance; from September quarter 2000 to June quarter 2005 comprises the All groups CPI excluding insurance services; from September quarter 2005 comprises the All groups CPI excluding Financial and insurance services.
 - All groups excluding Housing and Financial and insurance services: Reflecting the changing composition of the CPI, from September quarter 1989 to June quarter 1998, comprises the All groups CPI excluding Housing, house contents insurance, vehicle insurance and consumer credit charges; from September quarter 1998 to June quarter 2000 comprises the All groups CPI excluding Housing, house insurance, house contents insurance and vehicle insurance; from September quarter 2000 to June quarter 2005 comprises the All groups CPI excluding Housing and insurance services; from September quarter 2005 comprises the All groups CPI excluding Housing and Financial and insurance services.

SPECIAL SERIES

EXPLANATORY NOTES continued

SPECIAL SERIES continued

- All groups, goods component: comprises the Food group (except Restaurant meals expenditure class), Alcohol and tobacco group, Clothing and footwear group (except Clothing services and shoe repair expenditure class) and Household contents and services group (except Household services sub-group); the Utilities, Audio, visual and computing and Books, newspapers and magazines sub-groups; and the House purchase, Pharmaceuticals, Motor vehicles, Automotive fuel, Motor vehicle parts and accessories, Sports and recreational equipment, Toys, games and hobbies and Pets, pet foods and supplies expenditure classes.
- All groups, services component: comprises all items not included in the 'All groups, goods component'.
- All groups, tradables component: comprises all items whose prices are largely determined on the world market.
- All groups, non-tradables component: comprises all items not included in the 'All groups, tradables component'.
- All groups excluding 'volatile items': comprises the All groups CPI excluding Fruit and vegetables and Automotive fuel.
- RBA measures 'Weighted median' and 'Trimmed mean': These measures are calculated following the methodology adopted by the Reserve Bank of Australia. The 'Trimmed mean' is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The 'Weighted median' is the price change of the component in the middle of this ordering. For calculating the 'Weighted median' and 'Trimmed mean' series, where CPI components are identified as having a seasonal pattern, quarterly price changes are estimated on a seasonally adjusted basis. Seasonal adjustment factors are calculated using the history of price changes up to the current quarter CPI and are revised each quarter. These revisions to the seasonal adjustment factors lead to revisions in the 'Weighted median' and 'Trimmed mean' series. Movements in the series from one period to another are expressed as percentage changes (see paragraph 9).
- **13** Market goods and services excluding 'volatile items': in addition to the items excluded from the series 'All groups excluding 'volatile items", also excludes: Utilities, Property rates and charges, Child care, Health, Other motoring charges, Urban transport fares, Postal, and Education. A detailed description of the special and analytical series was published in Appendix 1 to the September quarter 2005 issue of *Consumer Price Index*, *Australia* (cat. no. 6401.0).
- **14** The ABS is grateful for the assistance of the Reserve Bank of Australia for specifying the items included in the 'All groups excluding 'volatile items" and 'Market goods and services excluding 'volatile items". The Reserve Bank of Australia does not accord any special policy status to these series.
- **15** The CPI uses a hierarchy of rounding procedures to ensure consistency between published index numbers and percentage changes. However, rounding differences can arise in the 'points contributions' published in tables 6, 7 and 8 because of the different levels of precision required in those data.
- 16 In analysing price movements in Australia, an important consideration is Australia's performance relative to other countries. However, a simple comparison of All groups (or headline) CPIs is often inappropriate because of the different measurement approaches used by countries for certain products, particularly housing and financial and insurance services. To provide a better basis for international comparisons, the Seventeenth International Conference of Labour Statisticians adopted a resolution which called for countries to 'if possible, compile and provide for dissemination to the international

ROUNDING

INTERNATIONAL COMPARISONS

EXPLANATORY NOTES continued

INTERNATIONAL
COMPARISONS continued

community an index that excludes housing and financial services' in addition to the all-items index.

- 17 Table 11 aims to present indexes for selected countries on a basis consistent with the above resolution and comparable to the Australian series 'All groups excluding Housing and Financial services' (see paragraph 12). However, other than Australia and New Zealand, the countries represented in this table are yet to develop indexes on this basis, so the indexes presented here are consistent with the series previously published for All groups excluding Housing. To facilitate comparisons all indexes in this table have been converted, where necessary, to a quarterly basis and re-referenced to a base of 1989–90 = 100.0.
- **18** In producing table 11, the ABS is grateful for the assistance of the relevant national statistical agencies which have either directly supplied indexes for all items excluding housing and financial services or data to enable their derivation.

RELATED PUBLICATIONS

- **19** Current publications and other products released by the ABS are listed on the ABS website http://www.abs.gov.au. The ABS also issues a daily *Release Advice* on the website which details products to be released in the week ahead.
- **20** Users may also wish to refer to the following publications and other data products that are available free of charge from the ABS website:
