OVERVIEW

ECONOMIC SUMMARY

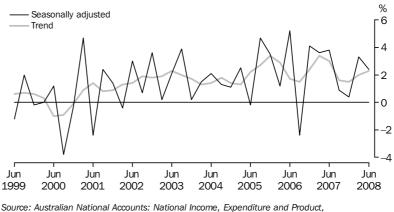

In trend chain volume terms, Western Australia's state final demand rose 2.3% (\$728 million) to \$32,738 million in the June quarter 2008. In seasonally adjusted chain volume terms, Western Australia's state final demand grew 2.4% (\$775 million) to \$32,871 million in the June quarter 2008, mainly driven by private investment in machinery and equipment (up 17.8% or \$630 million) and intangible fixed assets (up 8.5% or \$78 million). Dwellings investment (up 11.6% or \$254 million) and final consumption expenditure of general government (up 0.8% or \$32 million) and households (up 0.1% or \$19 million) also contributed to the growth in the June quarter 2008.

Western Australia's international trade surplus rose 26.3% (\$2,539 million) to \$12,189 million through the year ending June 2008, following a rise of 16.7% (\$1,462 million) through the year ending March 2008. Growth in the state's trade surplus was attributed to exports growth (24.1%) surpassing imports growth (20.4%) over the period. The major commodities driving the growth in exports were Iron ore and concentrates (up \$2,081 million or 52.0%), Crude petroleum oils (up \$1,005 million or 60.3%), Natural gas (up \$520 million or 58.4%) and Wheat (up \$376 million or 113.5%). The major commodities driving the growth in imports were Non-monetary gold (up \$348 million or 23.9%), Refined petroleum oils (up \$143 million or 117.9%).

Overall, employment (trend) in Western Australia grew 1.7% (up 19,000 persons) to 1,156,000 persons in the three months to August 2008. Full-time employment rose 2.1% (up 17,500 persons) to 844,000 persons while the estimated part-time employment rose 0.5% (up, 1,500 persons) to 312,100 persons over the same three month period. The unemployment rate (trend) in Western Australia decreased from 3.3% in May 2008 to 3.1% in August 2008.

STATE ACCOUNTS STATE FINAL DEMAND

Western Australia's state final demand (trend chain volume measures) rose 2.3% (\$728 million) to \$32,738 million in the June quarter 2008, following a growth of 2.0% (\$627 million) in the previous quarter. Growth in the current quarter was the highest amongst states and territories, with Queensland being the next highest at 1.5%, followed by Tasmania at 1.4%. Nationally, domestic final demand grew 1.1% in the June quarter 2008.

STATE FINAL DEMAND, Chain volume measures—Change from previous quarter

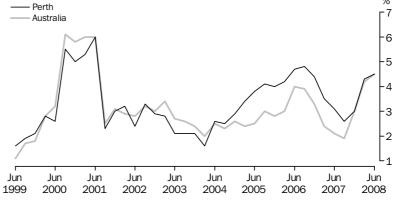

Source: Australian National Accounts: National Income, Expenditure and Product, cat. no. 5206.0.

In seasonally adjusted chain volume terms, Western Australia's state final demand grew

| STATE FINAL DEMAND continued | 2.4% (\$775 million) to \$32,871 million in the June quarter 2008. This growth was mainly driven by private investment in machinery and equipment (up 17.8% or \$630 million) and intangible fixed assets (up 8.5% or \$78 million). Dwellings investment (up 11.6% or \$254 million) and final consumption expenditure of general government (up 0.8% or \$32 million) and households (up 0.1% or \$19 million) also contributed to the growth in the June quarter 2008. Major detractors from growth in the state's final demand in the current quarter were falls in gross fixed capital formation by public corporations (down 12.4% or \$72 million) and general government (up 0.8% or \$22 million). Private business investment in |
|---------------------------------|---|
| | non-dwellings (down 2.5% or \$118 million) and private sector ownership transfer costs $(1 - \sqrt{2})^2 = (1 - 2$ |
| | (down 4.6% or \$24 million) also recorded declines in the June quarter 2008. |
| PRICES | Perth's Consumer Price Index (CPI) continued to rise, from a slow growth of 0.6% in the |
| CONSUMER PRICE INDEX | September quarter 2007 to a growth of 1.6% in the June quarter 2008. Perth's CPI rise of |
| | 1.6% in the current quarter was slightly higher than the national CPI growth of $1.5%$. |
| | The higher CPI growth in Perth was mainly driven by Automotive fuel (up 8.4%) – petrol |
| | prices continued to rise following the trend in global crude oil prices. Other notable |
| | contributors included Deposit and loan facilities (up 9.2%), Rents (up 3.3%) and Hospital |
| | and medical services (up 3.2%). Strong demand for rental accommodation in Perth saw |

and medical services (up 3.2%). Strong demand for rental accommodation in Perth saw the city record the largest increase in rent costs of all capital cities during the quarter, with Darwin and Brisbane showing the next largest increase (both 2.5%). In contrast, prices fell for Fruit (down 5.6%) and holiday travel and accommodation (Domestic down 1.9% and Overseas down 2.2%).

CONSUMER PRICE INDEX (ALL GROUPS), Change from same quarter previous year __________%

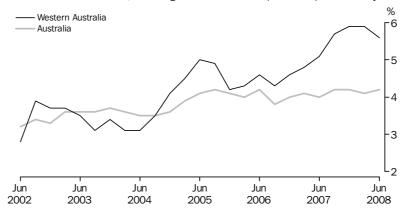

Source: Consumer Price Index, Australia, cat. no. 6401.0.

Perth's CPI rose 4.5% through the year to June quarter 2008, following increases of 3.0% for the year to December quarter 2007 and 4.3% for the year to March quarter 2008. Perth's annual CPI growth equalled the nation's CPI rise of 4.5% and was second highest among Australian capital cities, behind Brisbane (5.1%). The main drivers of Perth's CPI growth during the year were Automotive fuel (up 17.8%), Deposit and Ioan facilities (up 15.8%), Rents (up 12.5%) and House purchase (up 2.1%). Offsetting these rises were declining prices in Audio, visual and computing equipment (down 14.6%), Child care (down 27.0%) and Motor vehicles (down 2.3%).

WAGE PRICE INDEX

Western Australia's Wage Price Index (WPI) of total hourly rates of pay (excluding bonuses) for all sectors rose 1.4% in the June quarter 2008, following growth rates of 1.3% and 1.0% in the December quarter 2007 and March quarter 2008 respectively. In the current quarter, private sector wage prices increased 1.6%, double that of the public sector wage price rise (0.8%). Western Australia's all sector WPI growth of 1.4% in the June quarter 2008 was higher than the Australian WPI growth of 0.9% and was second highest among other states and territories, behind Northern Territory (1.7%).

WAGE PRICE INDEX, Change from same quarter previous year

Source: Labour Price Index, Australia, cat. no. 6345.0.

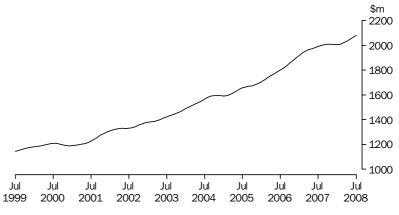

Western Australia's all sectors WPI grew 5.6% through the year to June quarter 2008, slightly lower than the rate of 5.9% recorded in the previous period. However, the rate was much higher than the Australian WPI growth (4.2%). Strong growth in wage prices in the state were in the industries of Mining (9.0%), Construction (7.8%) and Transport and storage (6.5%). From an occupation perspective, wage prices growth was strong for Tradespersons and related workers (8.0%), Labourers and related workers (6.2%) and Professionals and Intermediate production and transport workers (both 5.8%).

Western Australia's retail turnover (trend) grew 2.1% (\$129 million) to \$6,190 million in the three months to July 2008, triple the 0.7% (\$41 million) growth recorded in the previous three month period. Nationally, retail turnover (trend) rose 0.3% (\$163 million) to \$54,621 million in the three months to July 2008, following a growth of 0.2% (\$127 million) in the previous three month period.

CONSUMPTION RETAIL TRADE

RETAIL TRADE continued

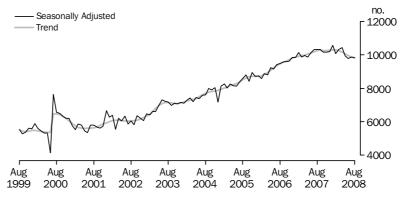

MONTHLY RETAIL TURNOVER, Current Prices-Trend

Source: Retail Trade, Australia, cat. no. 8501.0

NEW MOTOR VEHICLE SALES New motor vehicle sales (trend) in Western Australia declined 2.8% (848) to 29,647 vehicles in the three months to August 2008, compared with the previous three month period. There were declines in Sports utility vehicles sales (down 540 or 8.3%), Other vehicle sales — comprising utilities, panel vans, cab chassis, goods carry vans, rigid trucks, prime movers, non-freight carrying trucks and buses (down 216 or 2.8%) and Passenger vehicle sales (down 92 or 0.6%).

NEW MOTOR VEHICLE SALES

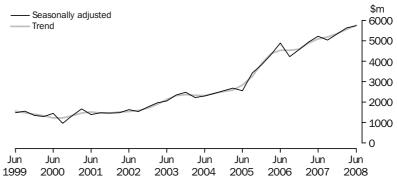

Note: Break in trend series between June and July 2000. Source: Sales of New Motor Vehicles, Australia, cat. no. 9314.0.

INVESTMENT AND FINANCE PRIVATE NEW CAPITAL EXPENDITURE In trend chain volume terms, private new capital expenditure in Western Australia rose by 3.5% (\$196 million) to \$5,761 million in the June quarter 2008, slightly lower than the growth of 3.9% (\$211 million) in the previous quarter. The rise in the current quarter, was driven by investment in both equipment, plant and machinery (up 8.3% or \$173 million) and buildings and structures (up 0.5% or \$18 million). Western Australia's private new capital expenditure growth (3.5%) over this period was lower than the national growth of 4.1%.

PRIVATE NEW CAPITAL EXPENDITURE continued

PRIVATE NEW CAPITAL EXPENDITURE, Chain volume measures

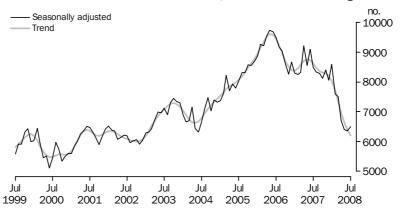

Note: Break in trend series between December 2006 and March 2007. Source: Private New Capital Expenditure and Expected Expenditure, Australia, cat. no. 5625.0.

In original current price terms, Western Australia's private new capital expenditure rose 13.7% (\$790 million) to \$6,569 million through the year to June 2008, lower than the previous year of 17.7% (\$840 million). The main driver of growth was the mining industry (up 30.0% or \$1,154 million), while manufacturing (down 4.3% or \$20 million) and other selected industries (down 23.4% or \$344 million) recorded declines over the same period.

HOUSING FINANCEThe number of dwellings financed for owner occupation (trend) in Western AustraliaCOMMITMENTScontinued to decline from 8,754 commitments in May 2007 to 6,200 commitments in July
2008. In the last four quarters, the number of dwellings financed have decreased, down
3.7% (960 commitments), 2.4% (600 commitments), 10.2% (2,496 commitments) and
12.7% (2,791 commitments) for the October 2007, January 2008, April 2008 and July 2008
quarters respectively.

HOUSING FINANCE COMMITMENTS, Number of dwellings financed

Source: Housing Finance, Australia, cat. no. 5609.0.

In the three months to July 2008, Western Australia's total value of finance for owner occupied housing (original) decreased by 3.1% (\$162 million) to \$5,000 million, compared with 8.5% (\$478 million) in the previous three month period. The decline was attributable to the decrease in finance by non-first home buyers (down 5.0% or \$212 million). In contrast, finance by first home buyers increased (up 5.6% or \$51 million) in the three months to July 2008. Over the same period, the average loan size for first home

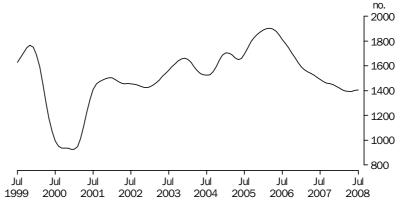

HOUSING FINANCE COMMITMENTS continued

buyers increased by 2.9% (\$7,027) and for non-first home buyers by 1.7% (\$4,017). The difference between the average loan size for first home buyers (\$245,426) and non-first home buyers (\$247,146) has narrowed, with first home buyers borrowing on average \$1,720 less than the non-first home buyers .

CONSTRUCTION BUILDING APPROVALS

There were 4,199 houses (trend) approved for construction in Western Australia in the three months to July 2008, 7 approvals more than in the previous three month period. This small rise of 0.2% was the first increase since the 1.5% (84 approvals) growth recorded in the three months to April 2006. However, approvals for other residential dwellings (comprising semi-detached houses, townhouses and flats, units and apartments) fell 13.3% (209 approvals) to 1,367 in the three months to July 2008 . As a result, the total number of dwellings approved for construction declined, falling by 3.5% (202 approvals) to 5,566 approvals.

NUMBER OF DWELLINGS APPROVED, Houses: Trend

Source: Building Approvals, Australia, cat. no. 8731.0.

In the three months to July 2008, the number of new house approvals (original) in Western Australia rose by 15.8% (622 approvals), compared to the previous quarter. It is the first increase since the three months to July 2007 rise of 5.7% (254 approvals). The total number of building approvals also grew, a rise of 6.3% (360 approvals) over the same period.

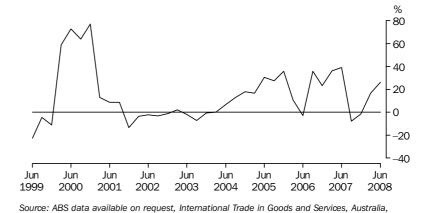

In terms of dollar value, new house approvals increased 11.9% (\$128 million) to \$1,205 million, following a decrease of 4.5% (\$51 million) in the previous three months period. The value of total building approvals rose by 33.6% (\$814 million) to \$3,236 million in the three months to July 2008, after a fall of 35.2% (\$1,316 million) in the previous three months period.

TRADEWestern Australia's international trade surplus rose 26.3% (\$2,539 million) to \$12,189BALANCE OF TRADEmillion through the year ending June 2008, following a rise of 16.7% (\$1,462 million)through the year ending March 2008. Growth in the state's trade surplus was attributed
to exports growth (24.1%) surpassing imports growth (20.4%) over the period.

BALANCE OF TRADE continued

Μ

VALUE OF WESTERN AUSTRALIA'S TRADE SURPLUS, Change from same quarter previous year

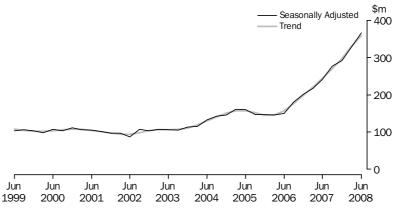

cat. no. 5368.0.

Growth in Western Australia's trade surplus through the year ending June 2008 was mainly driven by larger trade surpluses with China (up \$1,460 million), Japan (up \$778 million), Singapore (up \$452 million) and Republic of Korea (up \$368 million). However, a much lower trade surplus was recorded with India (down \$480 million), Switzerland (down \$457 million) and Russian Federation (down \$197 million).

| EXPORTS | The value of exports from Western Australia rose 24.1% (\$3,755 million) to \$19,361 million through the year to June quarter 2008. The major commodities driving the growth in exports were Iron ore and concentrates (up \$2,081 million or 52.0%), Crude petroleum oils (up \$1,005 million or 60.3%), Natural gas (up \$520 million or 58.4%) and Wheat (up \$376 million or 113.5%). The major detractors from exports growth over the |
|----------------------------|---|
| | period were Confidential items (down \$456 million or 16.2%), Nickel (down \$228 million or 54%), Refined petroleum oils (down \$59 million or 36.5%) and Non-monetary gold (down \$47 million or 1.5%). |
| IMPORTS | The value of imports into Western Australia increased by 20.4% (\$1,216 million) to \$7,172 million through the year to June quarter 2008. The major commodities driving the growth in imports were Non-monetary gold (up \$348 million or 23.9%), Refined petroleum oils (up \$225 million or 54.1%), Crude petroleum oils (up \$223 million or 38.9%) and Fertilisers (up \$143 million or 117.9%). The major commodities recording declines in imports over the period were Ships, boats and floating structures (down \$29 million or 42.8%) and Parts and accessories of office machines (down \$1 million or 12.7%) |
| INING | Expenditure on mineral exploration in Western Australia rose by 9.3% (\$31 million) to |
| MINERAL AND PETROLEUM | 360 million in the June quarter 2008 in trend terms. This rise followed growth of $10.7%$ |
| EXPLORATION EXPENDITURE | (\$29 million) in the December quarter 2007 and 10.3% (\$31 million) in the March quarter 2008. |
| | quarter 2000. |

MINERAL AND PETROLEUM EXPLORATION EXPENDITURE continued

MINERAL EXPLORATION EXPENDITURE, Total minerals

Source: Mineral and Petroleum Exploration, Australia, cat. no. 8412.0.

Mineral exploration expenditure in original terms rose by 51.4% (\$129 million) to \$381 million in Western Australia through the year to June 2008. Most of the major minerals showed growth over this period, with the highlights being Iron ore (up 63.5% or \$54 million), Gold (up 42.7% or \$30 million), Nickel and cobalt (up 54.3% or \$29 million) and Copper (up 17.0% or \$2 million). Petroleum exploration expenditure (original) in Western Australia rose 17.4% (\$92 million) to \$617 million through the year to June 2008.

MINERAL AND ENERGYThrough the year to June 2008, Western Australia's production of mineral commoditiesPRODUCTIONincreased in Iron ore (up 16.2%), Zinc (up 14.3%) and Nickel (8.7%). In contrast, mineral
commodities of Diamonds (down 30.5%), Ilmenite (down 21.6%) and Gold (down
12.8%) declined through the year. Energy production in the state decreased for Crude oil
(down 6.0%), Electricity (down 3.6%) and Natural gas (down 1.5%).

TOURISMIn the June quarter 2008, a total of 45,070 overseas visitors travelled to Western AustraliaSHORT-TERM OVERSEASon holiday, 10.5% (down 5,272) less than in the same period of 2007. The decline wasHOLIDAY ARRIVALSattributable to the fall in holiday makers from Asian countries of Singapore (down 3,592or 26.2%), Japan (down 1,712 or 37.9%), Malaysia (down 1,672 or 28.8%) and Hong Kong(down 564 or 43.4%). In comparison, there were holiday makers coming from Europe(up 694 or 15.0%)(excluding United Kingdom, Channel Islands, Isle of Man and Ireland);also from United States of America (up 619 or 73.8%) and Thailand (up 409 or 36.6%).

SHORT-TERM OVERSEASIn the June quarter 2008, a total of 109,970 Western Australians went overseas on
holiday, 13.0% (12,690) more than in the previous year. The major destinations were
Indonesia (up 9,394 or 47.5%), Thailand (up 2,848 or 21.1%) and Europe (up 2,068 or
21.5%) (excluding United Kingdom, Channel Islands, Isle of Man and Ireland). However,
there were fewer Western Australians travelling to Singapore (down 1,812 or 19.4%),
United Kingdom, Channel Islands, Isle of Man and Ireland (down 1,775 or 15.6%) and
Malaysia (down 1,112 or 18.2%).

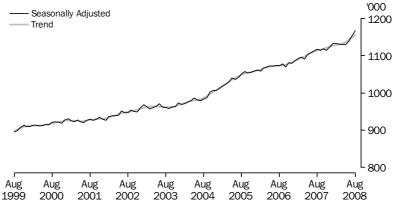

LABOUR MARKETIn the May quarter 2008, job vacancies in Western Australia declined to 27,200, from aJOB VACANCIESpeak of 32,600 in the November quarter 2007. However, through the year to May quarter2008, job vacancies in the state increased marginally by 0.8% (200 vacancies) . This wasdriven by the public sector increase of 21.7% (400 vacancies) to 2,300 as the privatesector recorded a decline of 0.8% (down 300 vacancies) to 24,800.

EMPLOYMENTWestern Australia's full-time employment (trend) rose 2.1% (up 17,500 persons) to
844,000 persons in the three months to August 2008, following a rise of 1.4% (up 11,700
persons) in the previous three month period. The recent quarterly rise was attributable
to increases in both male full-time employment (up 2.5% or 13,800 persons) and female
full-time employment (up 1.3% or 3,700 persons).

Estimated part-time employment in Western Australia rose 0.5% (up, 1,500 persons) to 312,100 persons in the three months to August 2008, mainly due to the growth of female part-time employment (up 0.8% or 1,800 persons). In comparison, male part-time employment fell (down 0.4% or 300 persons).

Overall, employment in Western Australia grew 1.7% (up 19,000 persons) to 1,156,000 persons in the three months to August 2008, compared to the previous three months period of 0.7% (up 8,000 persons).

Source: Labour Force Australia, Spreadsheets, cat. no. 6202.0.55.001.

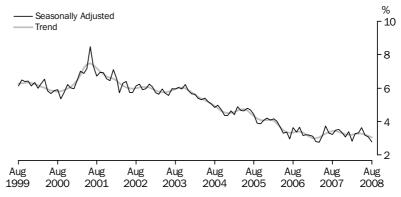

The major industries contributing to Western Australia's employment growth (original) through the year to August 2007 were Mining (up 18,000 or 34.6%), Construction (up 14,900 or 14.0%), Retail trade (up 11,400 or 7.3%) and Education (up 9,800 or 12.6%).

From an occupation perspective, employment growth was strong for Tradesperson and related workers (up 19,800 or 13.4%), Associate professionals (up 17,500 or 12.8%), Intermediate production and transport workers (up 16,000 or 15.5%) and Managers and administrators (11,400 or 12.9%).

UNEMPLOYMENT

The unemployment rate (trend) in Western Australia decreased from 3.3% in May 2008 to 3.1% in August 2008. Nationally, the unemployment rate remained unchanged at 4.2% over the same three month period. The number of unemployed persons in Western Australia decreased by 5.5% (2,100 persons) to 36,400 persons in the three months to August 2008. Male unemployment decreased 12.4% (2,500 persons), while female unemployment rose 2.2% (400 persons).

UNEMPLOYMENT RATE

Note: Break in trend series at April 2001. Source: Labour Force Australia, Spreadsheets, cat. no. 6202.0.55.001.

POPULATION ESTIMATED RESIDENT POPULATION Western Australia's Estimated Resident Population was 2,149,066 in the March quarter 2008, an increase of 18,269 persons (0.9%) from the previous quarter. The state's quarterly population growth rate was well above the Australian's rate of 0.5% and highest among states and territories, with Queensland (up 0.6%) as the next highest. In the March quarter 2008, Western Australia recorded a natural increase of 5,415 persons (8,344 births less 2,929 deaths) while net overseas migration (up 11,426 persons) and net interstate migration (up 1,428 persons) also added to the state's population.

PREPAREDNESS FOR EMERGENCIES AND HOUSEHOLD ASSISTANCE REQUIRED

EMERGENCIES IN WESTERN AUSTRALIA Emergencies can result from a variety of natural hazards, including bushfires, tropical cyclones, severe weather, floods, earthquakes, landslides and tsunamis, as well as man-made events such as chemical spills, oil spills, gas leaks, radiological contamination, explosions and acts of terrorism. Many of these events pose a serious threat to human life, property and community infrastructure and can require a range of interventions from government and volunteer agencies. Geoscience Australia estimates that natural hazards alone cost the nation an average of \$1.25 billion per year although the cost of individual hazard events can be much greater.

In Western Australia, most emergency incidents requiring agency intervention result from natural hazards, particularly bushfires, cyclones, storms and associated flooding. The Fire and Emergency Services Authority of Western Australia (FESA) reports that, in the three years to June 2007, career and volunteer firefighters responded to a total of 22,834 grass and bush fires, an average of more than 7,600 a year. Most recently, an emergency was declared during the 2006-07 bushfire season when hundreds of fires burned across the State, including 29 in the south-western region. These required the formation of incident management teams and the coordinated support of 25 local government authorities. In the same three-year period, another 441 hazard events were reported to FESA, some of which did not require an agency response.

Storms, which mostly affect the southern half of Western Australia, generally cause more damage each year than other natural hazards. In 2006-07, the Bureau of Meteorology reported 41 severe storms across the State. These included a tornado in the Australind area that resulted in power outages and damage to 50 homes and commercial properties, seven of which were totally destroyed.

Many parts of Western Australia are prone to flooding, arising either from torrential rain during the monsoonal wet season in the north of the State, or heavy storms during the southern winter. In 2006-07, three major floodings were reported to the emergency authorities, one of which caused significant damage in the town of Esperance and surrounding areas.

The coastal stretch of Western Australia from Exmouth to Broome has the highest incidence of tropical cyclones anywhere in Australia. This region experiences cyclonic winds and associated flooding, high seas and storm surge. During 2006-07, the Western Australian government proclaimed two cyclone events as natural disasters. One of these was Tropical Cyclone George, a category five cyclone which resulted in three fatalities and numerous injuries, as well as extensive property and infrastructure damage in the north of the State. The other, which affected communities in the Great Southern Region, resulted from a deep weather front combining with Tropical Low Isobel. Communities affected by such natural disasters may be eligible for State government funding to assist with their recovery.

Preparedness for emergencies and household assistance required continued

| INFORMATION NEEDS | There is a growing demand for information on the preparedness of householders for emergency situations and the types of assistance they would require. This article draws on data from the 2007 State Supplementary Survey, <i>Community Preparedness for Emergencies</i> (ABS cat. no. 4818.5), which collected a broad range of information from Western Australian households on these issues. The article examines household access to relevant communication systems as well as |
|---|---|
| | aspects of their emergency preparedness and requirements for assistance. The relationship of these factors to other household characteristics, including geographic location, household composition, age and dwelling tenure type, is also explored. |
| WESTERN AUSTRALIAN HOUSEHOLDS: OVERVIEW Geographic Location | Of the estimated 818,900 households in Western Australia in 2007, 75.1% were located in the Perth Metropolitan Region. Of the remaining households, 14.9% were in the Lower Western Region. (For further details of these statistical regions, refer to the Australian Standard Geographical Classification, July 2007, ABS cat. no. 1216.0.) Only 10.0% of households were outside these two most populous regions of the State. Due to the relatively small sample size, particularly outside Perth, most of the regional analysis in this article relates to households in Perth and the remainder of the State (Non-metropolitan region). However, where statistical reliability permits, some smaller area data are presented. |
| Household Composition | In 2007, persons living alone accounted for one-quarter (26.2%) of all Western Australian households. A similar number of households (25.7%) were couple-only households while 29.7% were couples with children (of all ages). About one in ten households (9.5%) were lone parents with children (of all ages). |
| Age of household members | In 2007, an estimated 223,900 (27.3%) households in Western Australia had at least one child under 15 years of age while 238,700 (29.1%) households had at least one person aged 60 years or over. (Note: there is some overlap between these categories as a small proportion of households contained persons in both age groups.) |
| Dwelling Tenure Type | Almost three-quarters (72.2%) of households in the State, in 2007, lived in dwellings that they owned or were purchasing (owner-occupiers). Most of the remaining households (26.6%) lived in rental dwellings while little more than 1% lived in other tenure types. |
| Communication Systems | Effective modes of communication are invaluable in emergency situations. In particular, they can be used to provide information and advice to households threatened by a bushfire, cyclone, severe storm or other impending local hazard. Household preparedness for emergencies was therefore measured in the survey in terms of access to working portable radios, mobile phones, landline phones and the internet. |

Preparedness for emergencies and household assistance required continued

| Preparedness for Emergency Evacuation continued | reported that they would prefer to stay to fight bushfires and two in five (39.9%) wanted to prevent looting and vandalism of their property. | | | | | | |
|---|---|--|--|--|--|--|--|
| commuea | The majority of households (92.1%) had access to alternative accommodation; however among households with members whose mobility was impaired due to disability, the level of access to alternative accommodation fell to 88.1%. | | | | | | |
| | Almost half of households (46.5%) reported having an exit plan for their dwelling but only one in ten (10.5%) had an agreed meeting place. | | | | | | |
| Evacuation Assistance Required | Data are presented below on the different types of assistance required by households ir the event of an emergency evacuation. These include the need for assistance to exit the dwelling, assistance with transport and with evacuating household pets. | | | | | | |
| | Assistance to exit the dwelling may be needed by households with young children, | | | | | | |
| | elderly household members, or persons with disabilities while lack of access to a motor | | | | | | |
| | vehicle can be of crucial importance in enabling a household to evacuate. In addition, | | | | | | |
| | the recent experience of New Orleans residents, many of whom saw their family pets | | | | | | |
| | perish in Hurricane Katrina, indicates that emergency authorities are likely to pay more | | | | | | |
| | attention to the requirements of households with pets in future large-scale evacuations. | | | | | | |
| | EVACUATION ASSISTANCE REQUIRED, WESTERN AUSTRALIA, 2007 | | | | | | |
| | HOUSEHOLDS PROPORTION | | | | | | |
| | Selected Characteristics('000)(%)Require assistance to exit dwelling155.319.0 | | | | | | |
| | Require transport assistance201.724.6Pets needing evacuation436.253.3Total households818.9100.0 | | | | | | |
| | | | | | | | |
| | In 2007, almost one quarter (24.6%) of households in Western Australia required | | | | | | |
| | transport assistance following an evacuation while more than half (53.3%) required pets | | | | | | |
| | to be evacuated. | | | | | | |
| | Assistance to exit the dwelling was required by a smaller, but still substantial, proportion | | | | | | |
| | of households (19.0%). The main reason reported for needing this type of assistance was | | | | | | |
| | the presence of young children. Of the 155,300 households that needed exit assistance, | | | | | | |
| | three-quarters (75%) gave this as their main reason. Mobility impairment was the next | | | | | | |
| | most common reason, accounting for 20.5% of these households. | | | | | | |
| COMMUNICATION | Around 48% of households, both in Perth and elsewhere in the State, had no working | | | | | | |
| Geographic Location | portable radios although households in the non-metropolitan regions had lower levels | | | | | | |
| | access to the internet. In this case, the proportion with no access to the internet was | | | | | | |
| | 37.6% compared with 30.6% for Perth households. | | | | | | |
| | In terms of telephone connections, those living outside Perth were also more | | | | | | |
| | disadvantaged, with 13.4% having no landline connection and 12.3% having no mobile | | | | | | |
| | phone (compared with 9.8% and 9.2% respectively for Perth residents). | | | | | | |
| | While access to mobile phones may be expected to vary with physical distance from | | | | | | |
| | transmitters, it is interesting to note that the level of access was lowest in the Lower | | | | | | |

Preparedness for emergencies and household assistance required continued

| Geographic Location | Western Region, where 15.0% of households had no mobile phones. This compares with |
|---------------------|---|
| continued | 9.2% for Perth residents and 8.5% for residents in the remainder of the State. This may |
| | well reflect the greater proportion of older people living in the Lower Western Region. |

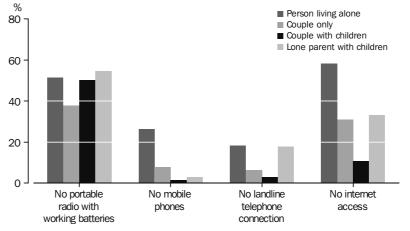

Household CompositionCouple-only households were most likely to have access to a working portable radio.Only 37.8% of these households had no such access in comparison with 47.7% of
households overall.

Persons living alone and households with children (of all ages) were least likely to have access to a working portable radio. Approximately half of all persons living alone (51.5%) and couples with children (50.3%) did not have such a radio while the figure for lone parent households was even higher at 54.6%.

More than one-quarter (26.4%) of persons living alone had no mobile phone and almost one in five (18.3%) had no landline connection. The majority (70.2%) of the 3,800 (0.5%) households in the State with no telephone of any sort were persons living alone. Of the estimated 3,300 households that had neither a telephone connection nor working radio, two-thirds (66.2%) were persons living alone.

A considerable proportion of lone parent households (17.8%) lacked a landline telephone whereas this was much less common among couples with children (3.1%) and couple-only households (6.4%).

Internet access varied considerably according to household type. Whereas only 10.8% of couples with children had no internet connection at home, the figure was considerably higher for lone parent households (33.1%) and persons living alone (58.3%), perhaps reflecting their generally lower disposable income and older age profile.

ACCESS TO COMMUNICATION, By Household Type

Households with older and younger members

While access to a working portable radio was quite low (47.7%) among all Western Australian households, those with children under 15 years were least likely to have such access. Of these 'younger' households, 55.0% reported that they had no portable radio with working batteries. The comparable figure for households containing older members (60 years and over) was much lower at 37.1%.

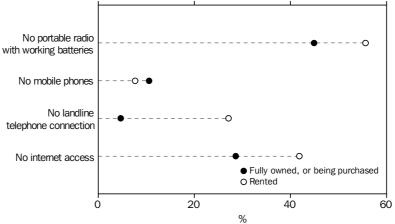

Not unexpectedly, the pattern was reversed in respect of access to mobile phones and the internet. Less than 2% of households with children under 15 years had no mobile

Households with older and
younger members continuedphones and 17.7% had no internet connection at home. The comparable figures for
households with persons aged 60 years and over were much higher, at 28.2% and 54.7%
respectively.

Tenure typeIn 2007, access to most methods of communication was lower for rental dwellings than
for those that were owner-occupied. Of the 217,700 Western Australian households in
rental accommodation, 55.6% had no working portable radio whereas the comparable
figure for households in owner-occupied dwellings was 44.9%.

Those in rental dwellings were also more likely to have no internet access (41.8% compared with 28.6% for owner-occupiers) and were least likely to have a landline telephone connection. More than one-quarter (27.1%) of renters had no landline connection whereas the comparable figure for owner-occupiers was only 4.7%. However, the lack of a landline telephone among renters was partially offset by better access to mobile phones, with only 7.7% having no mobile phone compared with 10.6% of owner-occupiers.

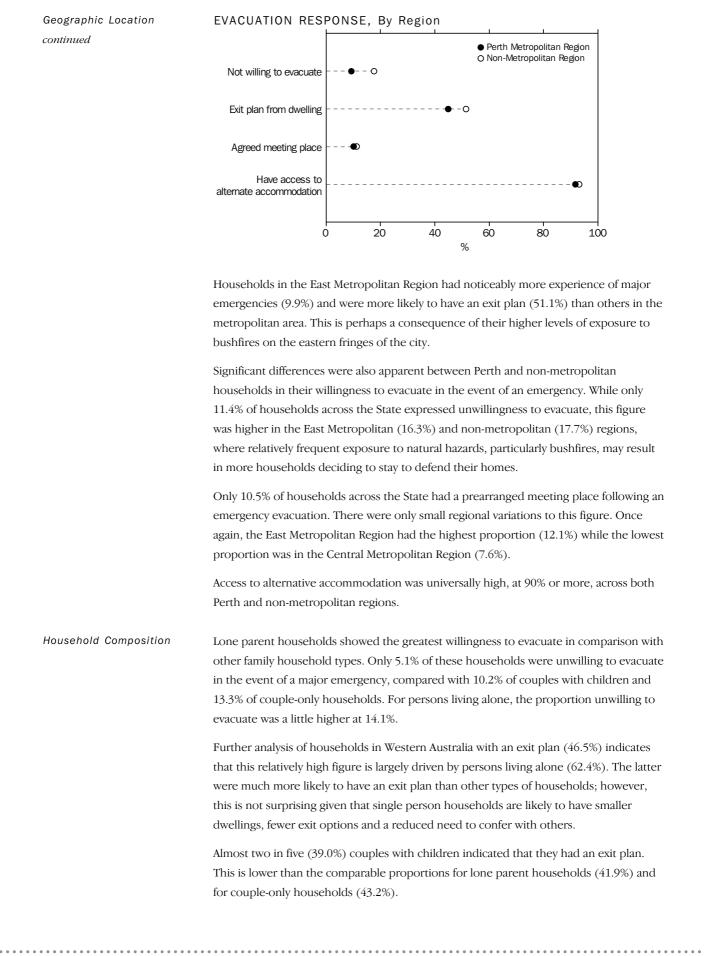

Those in owner-occupied dwellings were more likely to have access to both mobile and landline services (85.1%) than those in rental dwellings (65.7%).

EVACUATION READINESS Geographic Location

Households outside Perth reported slightly higher levels of readiness for an emergency evacuation than their urban counterparts in terms of having an exit plan (51.5% versus 44.9%). This may reflect the more frequent exposure of residents in rural areas to natural hazards, particularly bushfires and tropical cyclones. In fact, 16.3% of respondents in the non-metropolitan regions of the State indicated that they had previously experienced a major emergency compared with only 5.2% of those in Perth. The proportion with previous experience was considerably lower in the Lower Western Region (12.9%) than in the remaining, generally more remote, portion of the State (21.3%).

Preparedness for emergencies and household assistance required continued

| Household Composition continued | While only one in ten households across the State had an agreed emergency evacuation meeting place, this proportion would obviously be a little higher if persons living alone were excluded from the total (as they have no other household members to meet). The proportion with an agreed meeting place was higher for couple-only households (15.6%) and lone parent households (15.1%) than for couples with children (13.1%). Access to alternative accommodation was uniformly high across all household types, exceeding 92% for persons living alone, couple-only households and all families with |
|--|---|
| Households with older and younger members | children. For households with children under 15 years, the proportion with an exit plan (41.7%) was a little lower than for all households in the State (46.5%). For households with persons aged 60 years and over, the figure was substantially higher, at 56.8%, perhaps reflecting the large proportion who were living alone. |
| | Households with children under 15 years also had low levels of preparedness for evacuation in terms of having no agreed meeting place (10.5%). These findings suggest that families with school-age children could perhaps be targeted for emergency evacuation training through programs offered in the primary and secondary education system. |
| | For households with persons aged 60 years and over, the proportion with an agreed meeting place was a little higher, at 14.1%. (Once again, this proportion would, almost certainly, be higher if persons living alone were excluded.) However, these households with older members were more likely to be unwilling to evacuate their homes in the event of an emergency (14.0%) in comparison with households containing children under 15 years (7.4%). |
| | There was a uniformly high level of access to alternative accommodation, with the figure for both household types being within one percentage point of the figure for all households in the State (92.1%). |
| Tenure type | The differences between owner-occupiers and renters were negligible in regard to having an exit plan and an agreed meeting place. The proportions for both types of household were, again, within one percentage point of the overall figures for the State (46.5% with an exit plan and 10.5% with an agreed meeting place). However, access to alternative accommodation was lower for rental households (88.9%) than for households who owned or were purchasing their dwelling (93.2%). |
| NEED FOR EVACUATION ASSISTANCE Geographic Location | The need for assistance to exit the dwelling varied little between Perth (19.3%) and the remainder of the State (17.9%). Within Perth, the need was highest in the South Western Metropolitan Region (22.9%). |
| | The need for transport assistance was similar across the State, with approximately 25% of households in both the metropolitan and non-metropolitan regions reporting this requirement. |
| | Assistance with evacuating pets was a significant need across Western Australia, although somewhat higher among households in non-metropolitan regions (61.3%) than in Perth |

.

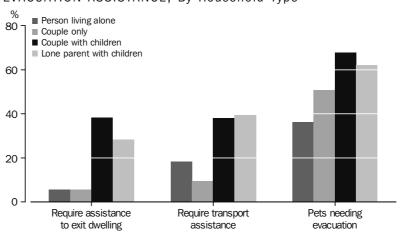

Geographic Location(50.6%). The inner city areas in the Central Metropolitan Region of Perth had the lowestcontinuedneed for assistance with evacuating family pets (32.6%).

Household Composition While almost one in five households in Western Australia (19.0%) reported a need for assistance to exit the dwelling in the event of an emergency, the figure was comparatively low for persons living alone (5.6%) and couple-only households (5.7%). It is likely that many of these households would have contained older persons. Where exit assistance was required, mobility restriction was the main reason cited, by 80.8% of those living alone and 88.2% of couple-only households.

The proportion needing exit assistance was considerably higher among couples with children (38.3%). Interestingly, lone parent households reported less need for assistance of this kind (28.3%).

Approximately one-quarter (24.6%) of households in Western Australia required transport assistance and households with children reported a much higher need. In this case, the need for assistance was similar for couples with children (38.0%) and lone parents with children (39.6%). The need for transport assistance was lowest among couple-only households (9.5%), followed by persons living alone (18.5%).

While 53.3% of households across the State required pets to be evacuated, the comparable figure was higher for households with children, with around two-thirds reporting this type of need. (The figure was 67.8% for couples with children and 62.3% for lone parents with children). However, only 36.3% of people living alone reported this need, perhaps reflecting a lower level of pet ownership or their lower requirement for other types of evacuation assistance.

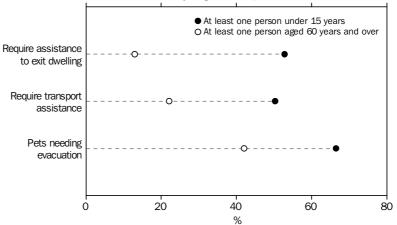

EVACUATION ASSISTANCE, By Household Type

Households with older and younger members

Although less than one-fifth (19.0%) of households in the State required assistance to exit their dwelling, more than half (52.8%) of those with children under 15 years required such assistance. In contrast, only 13.0% of households with persons aged 60 years or over reported a need for this type of assistance. The findings relating to transport assistance were similar, with more than twice as many households with children (50.3%) reporting this need as households with persons aged 60 years and over (22.1%).

Households with older and younger members continued

The differences between households with these different age profiles, though less pronounced, were also apparent with regard to pets needing evacuation. Although the overall State figure was high at 53.3%, the comparable figure for households with children was even higher at 66.5% while, for households with members in the older age group, it was only 42.0%.

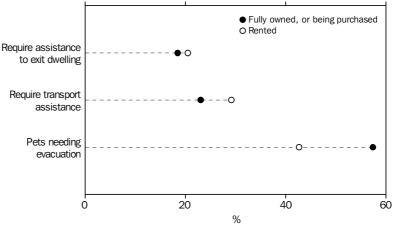

EVACUATION ASSISTANCE, By Age Group

Tenure type

The need for assistance in the case of an evacuation varied according to tenure type. Those in rental accommodation were likely to have a greater need for assistance to exit the dwelling (20.5%) and for assistance with transport (29.2%) in comparison with owner-occupiers (18.5% and 23.1% respectively).

The greatest difference between the two tenure types was in respect of pets needing evacuation. In this case, the need for assistance was reversed, with 57.4% of owner-occupiers and only 42.7% of rental households reporting this need.

EVACUATION ASSISTANCE, By Tenure Type

| SUMMARY OF FINDINGS | The results of the 2007 survey, <i>Community Preparedness for Emergencies</i> , indicate some household types that may be vulnerable in major emergencies. The information is relevant to government and volunteer agencies in alerting communities to, and providing advice on, emergency situations; in targeting education campaigns to appropriate age and community groups; and in providing appropriate assistance to households in an emergency evacuation. |
|-----------------------------------|--|
| | Some of the more significant findings are summarised below. |
| Communication | Persons living alone and households with persons aged 60 years or over were the most vulnerable in terms of their reduced access to telephone and internet services. |
| | Of the 3,800 households in Western Australia that had no telephone service of any kind, 70.2% were persons living alone. |
| | Households with persons aged 60 years and over were more likely than younger households to have a working portable radio. |
| | Households in rental dwellings had generally less ability to obtain information about an emergency via a portable radio, landline telephone or the internet but had better access to mobile phones. |
| | Households in the Lower Western Region suffered some disadvantage in relation to mobile telephone connections. These households were more likely than households in Perth and elsewhere in the State to have no mobile telephones, perhaps reflecting the greater proportion of older persons living in that region as well as (in some cases) distance from transmitters. |
| Evacuation readiness | Households on the eastern fringes of Perth and in the non-metropolitan regions were generally less willing to evacuate in the event of an emergency. However, these are the households most often threatened by bushfires and most likely to be prepared for an evacuation in terms of having an exit plan and an agreed meeting place. |
| | Those living in inner city areas were least likely to have an agreed meeting place but this element of preparedness was consistently low across all households in the State. |
| | Among family households, couples with children were least likely to have an exit plan or an agreed meeting place, indicating the potential value of emergency evacuation training for children in the primary and secondary education system. |
| Need for evacuation assistance | The need for evacuation assistance was highest among households with children; with more than half of these households requiring transport assistance and assistance to exit their dwelling, and two-thirds requiring family pets to be evacuated. |
| | The need for assistance with pets was high across the State, particularly in outer metropolitan and rural areas. |
| | Households in owner-occupied dwellings were more likely than renters to need assistance with evacuating pets. |
| | Persons living alone and couple-only households, many of which would have contained older persons, had the lowest reported need for assistance with exiting their dwelling. |

Preparedness for emergencies and household assistance required continued

| Need for evacuation assistance continued | Households with persons aged 60 years and over had a much lower need for assistance with transport, exiting the dwelling and evacuating pets than households with children under 15 years. |

— nil or rounded to zero (including null cells)

(a) From July 2008 reference month, data in the SITC series are presented on a SITCR3 basis for all data up to June 2005. Data from July 2005 onwards are presented on a SITC R4 basis. Please note that SITC R4 free standing descriptors are used to present data for all periods and care should be taken when interpreting free standing descriptors on data prior to July 2005. For full details about international trade statistics moving from SITC R3 to SITC R4, users should refer to the *Information Paper: Impact of introducing Revision 4 of the Standard International Trade Classification*, 2008 (cat.no. 5368.0.55.10).

(b) Free on board (f.o.b.) value.

(c) Customs value.

.

(d) Discrepancies may occur between sums of component items and totals due to rounding.

(a) From July 2008 reference month, data in the SITC series are presented on a SITCR3 basis for all data up to June 2005. Data from July 2005 onwards are presented on a SITC R4 basis. Please note that SITC R4 free standing descriptors are used to present data for all periods and care should be taken when interpreting free standing descriptors on data prior to July 2005. For full details about international trade statistics moving from SITC R3 to SITC R4, users should refer to the *Information Paper: Impact of introducing Revision 4 of the Standard International Trade Classification*, 2008 (cat.no. 5368.0.55.10).

(b) Includes spelt and meslin, unmilled.

Homicide(c) 17 17 20 26 19 8 6 240 Assault(d) 7 061 6 366 7 032 5 805 7 121 Robbery(e) 552 486 476 469 426 473 10 266 8 503 Burglary(f) 9 098 10 036 10 523 9 806 Steal Motor Vehicle(g) 2 058 1 666 1 823 1 916 2 288 1 985 Theft 20 561 19 938 19 424 20 633 20 718 22 040 10 765 Property Damage 11 647 10 528 12 057 12 224 10 901 3 856 4 442 Drugs 5 068 4 555 3 630 3 726 Other(h) 6 307 5 893 5 578 5 821 6 304 6 170 Total reported offences 62 325 58 339 58 105 61 709 63 260 61 630

(a) Reported offences are selected offences reported to, or becoming known to, police and resulting in the submission of a report. The number of reported offences in a period may include offences that occurred during earlier periods. The data are subject to revisions as further data become available. Offence classifications may alter between periods due to changes in legislation, administrative recording practices or system coding, and locality boundaries may change. Therefore, time series may be broken.

(b) Definitional, coding and processing changes associated with the introduction of the Frontline Incident Management System have had an impact on some data. Variations in data may have resulted from reporting and recording changes, and may not reflect an actual increase or decrease in the incidence of an offence type or in total offence numbers. Therefore, caution should be exercised when interpreting and using offence statistics from late 2002, and when comparing those statistics with earlier periods.

(c) Includes driving causing death.

(d) Includes sexual assault.

(e) Includes armed and unarmed offences.

(f) Includes burglary to dwellings and buildings other than dwellings.

(g) Includes motorised and other vehicles.

(h) Includes offences such as fraud, arson and threatening behaviour.

Note: Graffiti offences no longer appear in the table.

- nya not yet available
- r revised

(a) Reference period: Schools data are at August. Data on participation rates, educational attainment and unemployment rates are at May. VET students and apprentices and trainees data are at 30 June. Data for Higher education students are at 31 August for years 2003-06 and 31 March for 1995-96.

- (b) From 2003 the majority of students attending Canning and Tuart colleges are no longer in scope of the National Schools Statistics Collection. In 2003 1,205 full-time students and 2,099 part-time students (788.5 full-time equivalent) have been reclassified to the VET sector. The removal of these students in 2003 has contributed to the fall in apparent retention rates.
- (c) Data refer to full-time students only.
- (d) Private providers were introduced from 1996 and VET in schools was included from 1997 to 2001.
- (e) There have been two major breaks in series between 1995 and 2005 which have impacted on the comparability of data. In 1997 computer assisted coding methodology was adopted and in 2001 the Australian Bureau of Statistics Classification of Qualifications (ABSCQ) was replaced by the Australian Standard Classification of Education (ASCED) (Cat. n. 1272.0).
- (f) Data refer to recognised qualifications only.
- (g) Includes persons who have completed a course where the level could not be determined.
- (h) Includes persons still at school.
- (i) FTE student/teaching staff ratios are calculated by dividing the number of FTE students by the number of FTE teaching staff. Student/teaching staff ratios should not be used as a measure of class size. They do not take account of teacher aides and other non-teaching staff who may also assist in the delivery of school education.
