## P R E F A C E

---

This publication contains data from the 1996 Census of Population and Housing, and describes the characteristics of people in Queensland and their housing arrangements. Similar publications are available for each State and Territory, and nationally.

The data presented in this publication relate to where people were counted on census night, and therefore data for each geographical area includes visitors to that area but exclude those people who were away on census night. The publication uses both the Urban Centre/Locality (UC/L) and the Section of State (SOS) geographic classifications which classify areas according to size of the population. Whilst the UC/L classification covers only part of the State or Territory, the SOS classification covers the State or Territory in its entirety.

This publication presents only a selection of data from the full range of census variables. For further information about other census or Australian Bureau of Statistics (ABS) data refer to the Appendix or *Directory of Census Statistics, 1996* (Cat. no. 2910.0). Concepts and definitions used in this publication, including UC/L and SOS, are explained in the Glossary and more detailed information is available in the *Census Dictionary, 1996* (Cat. no. 2901.0).

ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

## SUMMARY OF FINDINGS

---

### POPULATION AND HOUSEHOLD CHARACTERISTICS

#### POPULATION DISTRIBUTION

Since 1991, there had been a 13.1% increase in the number of people counted in the Census (3,368,850) in Queensland. Almost half (49.7%) were counted in the Major Urban area and a further 31.0% were in the Other Urban area. The remainder were in rural areas (3.1% in the Bounded Locality and 16.1% in the Rural Balance).

Of the 348 UC/Ls, the largest were Brisbane (1,291,117), Gold Coast-Tweed Heads (Gold Coast Part) (hereafter Gold Coast) (274,157) and Townsville-Thuringowa (109,914).

#### SEX

In 1996, there were more females (50.3%) counted than males (49.7%). While the proportion of females was highest in the Major Urban area (51.1%), the proportion of males was highest in the Rural Balance (52.3%). These levels were similar to those of 1991.

Males outnumbered females in the majority (54%) of UC/Ls, particularly in Mungindi (Qld Part) (L) (hereafter Mungindi (L)) (61.9%) on the NSW border, and Bluff (L) (59.4%) and Duaringa (L) (59.1%) near Blackwater. Localities which recorded the highest proportions of females were Herberton (58.9%) on the Atherton Tableland, Arcadia Bay (54.7%) on Magnetic Island and Mount Larcom (54.5%) near Gladstone.

#### AGE

The population in the State is aging. In 1996, the median age for Queensland was 33 years, compared with 32 years in 1991. The proportion of people aged 65 years or more also increased from 11.6% in 1991 to 12.0% in 1996.

In 1996, the proportion of people in the Rural Balance aged 65 years or more (8.1%) was considerably lower than in the rest of the State (13.6% in Bounded Locality, 13.5% in Other Urban and 12.3% in Major Urban). On the other hand, the Rural Balance recorded the highest proportion of children (aged 0–14 years), with 25.0%.

At the UC/L level, the highest percentages of people aged 65 years or more were recorded in the coastal areas of Burnum Heads (L) (43.5%), Trebonne (L) (36.3%) and Seaford (L) (35.1%) and Willows Gemfields (L) (36.7%) west of Emerald. The highest proportions of children were recorded in the Indigenous communities of New Mapoon (L) (43.1%) and Umagico (L) (42.4%) both at the tip of Cape York Peninsula, Dajarra (L) (46.3%) south of Mount Isa and Woorabinda (41.0%).

#### BIRTHPLACE

##### Australian-born

Over three-quarters (78.4%) of those counted in the Census in Queensland were Australian-born, a slight decrease since 1991 (80.6%). The Major Urban area recorded a lower percentage than that for the State in both 1996 and 1991 (74.4% and 76.6% respectively).

Indigenous communities recorded the highest percentages of Australian-born people, shown by the far north communities of Wujal Wujal (L) (100%), Hope Vale (L) (99.7%), Injinoo (Cowal Creek) (L) (99.7%), Umagico (L) (99.6%), and Napranum (Weipa South) (L) (99.1%).

## SUMMARY OF FINDINGS *continued*

---

### Overseas-born

Of the people counted in Queensland, 8.6% stated that they had been born in the United Kingdom (UK), Ireland or New Zealand (NZ), a decrease since 1991 (8.9%). The Major Urban area recorded a higher proportion of people born in these countries than the State as a whole (10.1% in 1996 and 10.6% in 1991). High proportions were also recorded in several UC/Ls of south-eastern Queensland, ranging from 15.3% in Hope Island (L) to 17.2% in Helensvale.

People born overseas in countries other than UK, Ireland or NZ accounted for 7.9% of the Queensland population, which was similar to the 1991 figure of 7.4%. The Major Urban area recorded the highest proportion of people born in these countries with 10.6% (9.7% in 1991). Likewise at the UC/L level, high proportions were noted in the Localities of Trebonne (28.3%) near Ingham, Dimbulah (21.4%) near Mareeba and Kooralbyn (19.2%) south-west of Beaudesert.

### INDIGENOUS ORIGIN

The number of people who reported being of Indigenous origin increased by 36.3% between 1991 and 1996, from 70,102 to 95,518. As a proportion of the Queensland population, this represented an increase, from 2.4% to 2.8%. The proportion of Indigenous people was lowest in the Major Urban area (1.6% in 1996 and 1.1% in 1991).

Apart from Cherbourg (96.7%), UC/Ls in the north of the State recorded the highest proportions of Indigenous people: Wujal Wujal (L) (95.6%), Yarrabah, Injinoo (Cowal Creek) (L) and Hope Vale (L) (each 95.0%). However, in the majority of UC/Ls (211 out of 348) the proportion was less than that of Queensland overall (2.8%).

### LONE PERSON HOUSEHOLDS

In 1996 there were 248,336 lone person households in Queensland, an increase of 36.2% over 1991 (182,389). Most of this change occurred in the Major Urban and Other Urban areas (increases of 35,745 and 23,535 households respectively). Lone person households, as a proportion of all households in private dwellings, ranged from 14.1% in the Rural Balance to 22.0% in the Major Urban area.

At the UC/L level, the highest percentages were recorded in the Localities of Picnic Bay (37.6%) on Magnetic Island, Pentland (34.7%), Malanda and Springsure (both 33.3%).

### FAMILY HOUSEHOLDS WITH DEPENDENT CHILDREN

About half (50.6%) of all family households had dependent children (53.2% in 1991). Family households with dependent children had increased by 9.0% since 1991, from 390,871 to 426,025. The majority of this increase occurred in the urban areas, while the Bounded Locality recorded a decrease. The percentages of family households with dependent children ranged from 49.3% in the Bounded Locality to 52.6% in the Rural Balance.

Very high percentages of family households with dependent children were recorded in the Localities of New Mapoon (89.5%), Lockhart River (86.7%), Doomadgee (86.2%) and Mungindi (Qld Part) (82.4%).

## SUMMARY OF FINDINGS *continued*

---

### LABOUR FORCE CHARACTERISTICS (For People Aged 15 Years and Over)

#### EMPLOYMENT

In 1996 there were 1,420,668 employed people in Queensland compared with 1,222,133 in 1991, representing an increase of 16.2%. Just over half of these were enumerated in the Major Urban area (51.9% in 1996 and 51.4% in 1991).

Urban Centres with the largest numbers of employed people were Brisbane (582,171), Gold Coast (106,433), Townsville-Thuringowa (48,796), Cairns (41,113) and Toowoomba (33,395).

#### Full-time employment

Of the 1,420,668 employed people in Queensland, 962,011 (67.7%) worked full-time. This was an increase of 13.4% over 1991 (848,257). About two-thirds (66.4%) of the full-time workers were male, which was similar to the situation in 1991 (67.8%). The percentage of male full-time workers was highest in the Bounded Locality (70.5%).

UC/Ls, which recorded the highest percentages of male full-time employees, were Bluff (L) (90.7%), Middlemount (86.1%) and Tieri (85.9%), all inland from Yeppoon, and Pentland (L) (89.1%), south-west of Charters Towers. High percentages of female full-time employees were recorded in Hamilton Island (43.3%), Thursday Island and Craigie (both 43.2%).

#### Part-time employment

In 1996, 427,793 people were employed part-time. This was an increase of 37.1% since 1991 (312,043). Unlike their full-time counterparts, the majority (66.9%) of part-time workers were female (68.2% in 1991). The highest proportion of female part-time workers was recorded in the Other Urban area (67.6%).

Localities which recorded the highest percentages of female part-time employees were mainly in the south of the State: Bell (100%) and Cecil Plains (88.0%), near Dalby, and Thargomindah (84.2%), in Bulloo Shire. Johnstone South (L) (84.9%), near Innisfail, also recorded a high percentage of female part-time employees. The highest rates for males were recorded in Doomadgee (L) (75.5%), in the far north-west, and the island Locality of St Pauls (73.7%), in Torres Local Government Area.

#### Occupation

In 1996, almost a quarter (23.9%) of employed people were Managers and administrators or Professionals, compared with 22.5% in 1991. In both 1996 and 1991 the Rural Balance recorded the highest percentages in these occupations (31.0% and 31.9% respectively), although it should be noted that Managers and administrators included farm managers.

UC/Ls with the highest percentages were Blue Mountain Heights (L) (49.2%) near Toowoomba and Mount Nebo (L) (46.7%) north-west of Brisbane.

Labourers and related workers accounted for a further 9.8% of employed people, down from 10.6% in 1991. The Bounded Locality recorded the highest percentages in this occupation group (16.8% in 1996 and 15.8% in 1991). High percentages were also recorded in the northern Indigenous communities of Wujal Wujal (L), (66.4%), Kowanyama (L) (64.4%), Aurukun (L) (58.8%) and Palm Islands (57.5%).

## SUMMARY OF FINDINGS *continued*

---

### Industry

Just over one-third of employed people (34.0%) worked in the industries of Manufacturing, Retail trade or Health and community services, the top three employing industries for the State (32.5% in 1991). In both censuses, the percentages for these industries in the Major Urban area were higher than for the other area types (35.5% in 1996 and 34.8% in 1991).

UC/Ls with the highest levels in these industries were the Indigenous communities of Wujal Wujal (L) (97.7%), Umagico (L) (94.0%), Injinoo (Cowal Creek) (L) (87.6%), Cherbourg (84.2%) and Lockhart River (L) (83.4%). The overwhelming majority of these were employed in Health and community services.

### Private sector

The proportion of people employed in the Queensland private sector increased between 1991 (73.3%) and 1996 (79.0%). The Rural Balance percentage was higher than for the other regional groupings (82.2% in 1996 and 78.3% in 1991).

In all except 30 UC/Ls, the majority of employed people worked in private enterprise. Tieri (92.2%) and Kooralbyn (L) (90.3%), along with the coastal areas of Hamilton Island (95.9%), Hope Island (L) (94.4%), Craigie (92.9%) and Santa Barbara (90.8%) recorded the highest percentages.

### UNEMPLOYMENT

In 1996, there were 151,717 unemployed people in Queensland compared with 156,334 in 1991 — a decrease of 3.0%. The overall unemployment rate was 9.6% (11.3% in 1991), while the rate for people aged 15–24 years was 16.4% (18.7% in 1991). Both rates were highest in the Other Urban area (10.7% and 18.0% respectively).

UC/Ls which recorded comparatively high unemployment rates and numbers of people were the Indigenous community of Woorabinda (46.7% and 161) and Mudjimba (23.2% and 419). Those which recorded high rates and numbers for people aged 15–24 years, were Coolum Beach (32.0% and 159) and Bongaree (31.3% and 156), both on the coast north of Brisbane.

## SUMMARY OF FINDINGS *continued*

---

### OCCUPIED PRIVATE DWELLINGS

#### TENURE TYPE

In 1996, there were 611,460 occupied private dwellings in the Major Urban area, accounting for 50.8% of the occupied private dwellings in the State. A further 375,387 were located in the Other Urban area (31.2%), with 37,439 in the Bounded Locality (3.1%) and 179,786 in the Rural Balance (14.9%).

##### Fully owned

About two-fifths of the occupied private dwellings counted in Queensland were fully owned by their occupants (38.7% in 1996 and 40.7% in 1991). In both 1996 (46.8%) and 1991 (47.9%) the Rural Balance recorded the highest ownership levels.

In 23.0% of the UC/Ls, the majority of the occupied private dwellings were fully owned. Two Localities near Emerald recorded the highest rates of home ownership: Willows Gemfields (71.5%) and Rubyvale (69.3%).

##### Being purchased

In 1996, almost one-quarter (24.8%) of the occupied private dwellings in Queensland were being purchased by their occupants, a slight increase over 1991 (23.9%). The Rural Balance (28.3%) and the Major Urban area (25.8%) recorded higher percentages than the State as a whole.

High levels of homes being purchased were recorded in the UC/Ls of Bohle Plains (L) (61.0%) and Alice River (59.5%), in the Townsville hinterland, and Wyreema (L) (60.0%) and Kingsthorpe (58.4%), near Toowoomba.

##### Rented

In 1996, 31.8% of the occupied private dwellings in the State were being rented, compared with 28.5% in 1991. The Other Urban area recorded the highest percentage of homes being rented in both 1996 (35.8%) and 1991 (33.0%).

Extremely high percentages were recorded in the coal mining centres of Middlemount (96.9%), Glenden (95.9%) and Tieri (93.0%), the Indigenous community of Cherbourg (96.2%) and Weipa (94.9%) which is associated with bauxite mining.

#### HOUSEHOLD INCOME

The median household income in 1996 of \$618 per week showed an increase of 17.3% over 1991 (\$527). In 1996, the State median was exceeded by that of the Major Urban area (\$658), which was also the case in 1991 (\$565).

Urban Centres in the coal mining belt of the Bowen Basin recorded the highest median household incomes: Moranbah (\$2,000), Dysart (\$1,708), Tieri (\$1,348), Middlemount (\$1,231) and Glenden (\$1,203). The lowest were recorded in the Localities of Pentland (\$235) and Willows Gemfields (\$250).

#### HOUSING LOAN REPAYMENTS

Between 1991 and 1996, there was a substantial increase (47.3%) in the median housing loan repayment for the State, from \$543 to \$800 per month. Across the State, the highest median housing loan repayment was recorded for the Major Urban area (\$850).

## **SUMMARY OF FINDINGS** *continued*

---

### **HOUSING LOAN REPAYMENTS** *continued*

Comparatively high median housing loan repayments were recorded in the island or coastal UC/Ls of Hamilton Island (\$1,137), Craiglie, Eimeo (both \$1,083), Hope Island (L) (\$1,042), Santa Barbara and Smithfield Heights (both \$1,029).

### **RENT PAYMENTS**

The median weekly rent payment for Queensland of \$125 in 1996 represented an increase of 17.9% on the 1991 figure of \$106. The 1996 median rent recorded for the Major Urban area (\$140) was higher than that for the State as a whole, which was also the case in 1991 (\$124).

Hamilton Island (\$270) and the coastal UC/Ls of Arcadia Bay (L), Hope Island (L), Craiglie, Port Douglas and Santa Barbara (each \$200) recorded the highest median weekly rent payments.

## EXPLANATORY NOTES

---

### SCOPE AND COVERAGE

- 1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.
- 2** The Census aims to count every person who spent census night in Australia. This includes Australian residents in Antarctica and people in the Territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people who spend census night in Australia but are excluded from the Census are foreign diplomats and their families.
- 3** The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The Census includes people camping out and the homeless.
- 4** All private dwellings, except diplomatic dwellings, are included in the Census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, and hotels are also included.
- 5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census — Nature and Content* (Cat. no. 2008.0).

### ABS POPULATION ESTIMATES

- 6** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. However, the Census can provide person counts based on place of usual residence.
- 7** Official ABS population estimates (estimated resident population (ERP)) are also separately available from the ABS. The estimates are based on census counts which have been adjusted to:
  - include people who were in Australia on census night but were missed in the Census;
  - include Australian residents who were temporarily overseas on census night (these people were not within scope of the Census); and
  - exclude overseas visitors counted in the Census who were not usual residents of Australia.
- 8** The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.
- 9** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (Cat. no. 3201.0) produced annually.

## EXPLANATORY NOTES *continued*

\*\*\*\*\*

### ABS POPULATION ESTIMATES *continued*

**10** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Population Projections* (Cat. no. 3222.0).

### DATA LIMITATIONS

**11** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated.
- *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant.
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- *Undercount*: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.

**12** Further information on data quality is provided progressively in *Census Update* (Cat. no. 2902.0) and in *1996 Census Data Quality Working Papers*.

### OVERSEAS VISITORS

**13** Data for overseas visitors (who intend to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors contribute only to the age, sex and total person counts.

### CALCULATION OF PROPORTIONS

**14** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the proportion who are of indigenous origin has been calculated by dividing the number of persons who stated that they were of indigenous origin by the total population (including those who did not respond to the relevant question) and expressing the result as a percentage.

### CALCULATION OF MEDIANS

**15** A median is a measure of central tendency. It is a mid-value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means), medians are not usually skewed by extreme observations.

## EXPLANATORY NOTES *continued*

\*\*\*\*\*

### CALCULATION OF MEDIAN *continued*

**16** There are several issues to be aware of:

- The categories 'Not stated', 'Overseas visitor', and 'Not applicable' are not included in the population distribution when calculating medians.
- If a median falls into a category that has a text only label then the median is set to zero. For this publication this is only relevant to the calculation of median household income, as the income classification includes the categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing ranges and a range is open-ended and the median falls within that category, the median is set to the number in the label. For example, in the calculation of the median household income, if the median falls in the last range '\$2,000 or more', \$2,000 is allocated as the median.

### UNADJUSTED DOLLARS

**17** The 1991 Census dollar values for Median Household Income, Median Housing Loan Repayments and Median Rent paid have not been adjusted into 1996 dollars.

### SYMBOLS AND OTHER USAGES

**18** The following abbreviations and symbols are used in this publication:

#### General abbreviations and symbols

ABS	Australian Bureau of Statistics
CD	Collection Districts
ERP	Estimated Resident Population
NZ	New Zealand
UK	United Kingdom
n.a.	not available
—	nil or rounded to zero

#### Spatial units

I.	Locality
SLA	Statistical Local Area
SOS	Section of State
S/T	State/Territory
UC/L	Urban Centre/Locality

## APPENDIX CENSUS PRODUCTS AND SERVICES

---

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *Directory of Census Statistics, 1996* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication).

### CENSUS REFERENCE PRODUCTS

#### Census Dictionary

The *Census Dictionary, 1996* (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

#### How Australia Takes a Census

*How Australia Takes a Census, 1996* (Cat. no. 2903.0) provides information about the history of the Census, the planning process and the way in which the Census is conducted.

#### Geographic classifications and codes

*Statistical Geography: Volume 1 — Australian Standard Geographical Classification (ASGC), July 1996* (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

#### 1996 Census Statistical Local Area maps

These reference maps show the Statistical Local Areas (SLA) from the 1996 Census. Each map shows the boundary of an SLA and the Collection District (CD) boundaries contained within.

#### Digital Boundaries

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

### CENSUS DATA PRODUCTS

#### Estimated Resident Population

The ERP is the official population figure and is based on adjusting the results of the Census to provide more accurately the numbers of people usually living in an area.

Two publications containing ERP data, based on 1996 Census figures are:

- *Australian Demographic Statistics, December Quarter 1996* (Cat. no. 3101.0); and
- *Regional Population Growth, Australia, 1996* (Cat. no. 3218.0).

#### Selected characteristics

This series of publications contains data and commentary on various person, family and dwelling characteristics from the 1996 Census at selected geographic levels. There are three publications in the series:

- *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos 2015.0–7) (released 15 July 1997)
- *Census of Population and Housing: Selected Characteristics for Urban Centres and Localities* (Cat. nos 2016.0–7); and
- *Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas* (Cat. nos 2017.0–8), (indicative release date: March 1998).

## APPENDIX CENSUS PRODUCTS AND SERVICES *continued*

---

### Community Profile series

The series *Census of Population and Housing: Community Profiles* (Cat. nos 2020.0–8) provide detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- *Basic Community Profile* contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the States/Territories and Australia.
- *Time Series Community Profile* contains 21 tables of variables from the Basic Community Profile comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- *Usual Residents Profile* contains 25 tables based on the usual residents of SLAs. This is the only community profile based on place of usual residence.
- *Expanded Community Profile* contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- *Working Population Profile* contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work study areas — usually capital cities.
- *Summary Indigenous Profile* contains selected characteristics of Indigenous people in two tables which are available at the Indigenous Location level.
- *Detailed Indigenous Profile* contains selected characteristics of Indigenous people in 26 tables which are available for Indigenous Areas, Aboriginal and Torres Strait Island Regions, States and Territories.

### CDATA96

*Census of Population and Housing: CDATA96* (Cat. nos 2019.0–8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

### KEYDATA

*Census of Population and Housing: CENSUS KEYDATA* (Cat. no. 2023.0.30.001) is a CD-ROM product which provides access to 1996 Census Community Profiles, Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

### Classification Counts

*Census of Population and Housing: Classification Counts* (Cat. nos 2022.0–8) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State, Territory and capital city.

### Census Household Sample File

*Census of Population and Housing: 1996 Census Household Sample File* (Cat. no. 2913.0) provides a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

### Social Atlas Series

The *Social Atlas* (Cat. nos 2030.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

## APPENDIX CENSUS PRODUCTS AND SERVICES *continued*

---

### Australia in Profile — A Regional Analysis

*Census of Population and Housing: Australia in Profile — A Regional Analysis* (Cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

### CONSULTANCY SERVICES

The following census specific services are available:

#### Thematic Profiles Service

The *Thematic Profiles Service* provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

#### Customised Profiles Service

The *Customised Profiles Service* provides community profile data tailored to your needs on a variety of media.

#### Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs on a variety of media.

#### Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).

#### Customised Mapping Service

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

## GLOSSARY

---

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *Census Dictionary, 1996* (Cat. no. 2901.0).

<b>Dependent child</b>	A dependent child is an individual who is either a child under 15 or a dependent student, which is any child in a family under 15 years of age or aged 15–24 years who is a full-time student. To be regarded as a child the individual can have no partner or child of his/her own usually resident in the same household.
<b>Dwelling</b>	A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages, are not counted in the Census.  There are private and non-private dwellings.  <i>A private dwelling</i> is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.
	<i>Non-private dwellings</i> are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.
<b>Employed</b>	Employed people are those aged 15 years or more who, during the week prior to census night, worked for payment or profit; who had a job from which they were on leave or otherwise temporarily absent; were on strike or stood down temporarily; or worked as unpaid helpers in a family business.
<b>Family household</b>	A family household is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.  The basis of a family is formed by identifying the presence of either a couple relationship, lone parent-child relationship or other blood relationship. Some households, therefore, contain more than one family. Due to processing limitations a maximum of three families can be coded to a household.
<b>Full-time/Part-time employment</b>	This variable is based on the number of hours worked in all jobs held by employed people during the week before census night. It excludes any time off but includes any overtime or extra time worked:  <i>Part-time workers</i> : employed people who worked up to 34 hours; and <i>Full-time workers</i> : employed people who worked 35 hours or more.

## GLOSSARY *continued*

---

<b>Household</b>	A household is a group of people who usually reside in the same private dwelling.
<b>Income</b>	People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest, business or farm income (less operation expenses) and worker's compensation.
	Household income is the sum of the personal incomes of each resident present in the dwelling.
<b>Indigenous</b>	A person is defined to be of Indigenous origin if he or she identifies himself or herself as Aboriginal and/or Torres Strait Islander origin.
<b>Industry (of employment)</b>	This variable describes the industries in which employed people (aged 15 years and over) work, and is coded to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993</i> (Cat. no. 1262.0).
<b>Labour force</b>	The labour force comprises employed and unemployed people.
<b>Locality</b>	See definition under Urban Centre/Locality.
<b>Lone person household</b>	A person who usually lives alone in a private dwelling.
<b>Occupation (of main job)</b>	This variable describes the main job held by employed people (aged 15 years and over) during the week prior to census night, and is coded using the <i>ASCO — Australian Standard Classification of Occupations, Second Edition</i> (Cat. no. 1220.0)
<b>Overseas-born</b>	Overseas-born people are those who state that they were born in a country other than Australia, including those born at sea.
<b>Section of State</b>	The SOS category classification uses population counts from the Census to define CDs as either urban or rural. Unlike the UC/L Structure, the SOS Structure relates to all CDs and therefore, in aggregate, the SOS Structure covers all of Australia.  Within S/Ts, each SOS represents an aggregation of non-contiguous geographical areas of a particular urban/rural type. The five categories are: <ul style="list-style-type: none"><li>▪ Major Urban: urban areas (Urban Centres in the UC/L Structure) with populations of 100,000 or more;</li><li>▪ Other Urban: urban areas (Urban Centres in the UC/L Structure) with populations of 1,000 to 99,999;</li><li>▪ Bounded Locality: rural areas (Localities in the UC/L Structure) with populations of 200 to 999;</li><li>▪ Rural Balance: the remainder of the S/T; and</li><li>▪ Migratory: areas composed of off-shore, shipping and migratory CDs.</li></ul>
<b>Student</b>	A student is an individual who attends a secondary or tertiary educational institution on a full-time/part-time basis.
<b>Unemployed</b>	Unemployed people are those who, during the week prior to census night, did not have a job but were actively looking for work (either full-time or part-time) and were available to start work.

## GLOSSARY *continued*

---

<b>Unemployment rate</b>	The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force.
<b>Urban Centre/Locality</b>	<p>This geographical structure is defined by the 1996 Census edition of the Australian Standard Geographical Classification. Population counts (place of enumeration) from the latest census are used to define the Urban Centre/Locality Structure, which means this classification structure is only current at the time of the Census.</p> <p>The UC/L classification groups census CDs to form defined areas according to population size criteria. In broad terms an Urban Centre is a population cluster of 1,000 or more people, while a Locality is a population cluster of between 200 and 999 people. The delimitation criteria for UC/Ls are based on those developed in 1965 by Dr G. J. R. Linge.</p> <p>For statistical purposes, people living in Urban Centres are classified as urban, while those in Localities are classified as rural. As the UC/L Structure relates to CDs within defined areas only, the Structure, in aggregate, does not cover all of Australia.</p> <p>When Urban Centres cross State or Territory boundaries, the separate portions are uniquely identified and reported in their relevant S/Ts.</p> <p>More information about definitions, a full description of the method of delimitation of UC/Ls as well as a listing of UC/L Codes and Labels may be found in <i>Statistical Geography: Volume 3 — Australian Standard Geographical Classification (ASGC) Urban Centres/Localities, 1996</i> (Cat. no. 2909.0).</p>
