

POPULATION.

ON the 26th January, 1788, Captain Phillip arrived in Sydney Harbour, bringing with him an establishment of about 1,030 people all told. Settlement soon spread from the parent colony, first to Tasmania in 1803, and afterwards to other parts of the continent and to New Zealand. At the end of 1895 the population of Australasia had grown to 4,238,369 persons, thus distributed :—

Colony.	Males.	Females.	Total.
New South Wales	685,160	592,710	1,277,870
Victoria	605,176	576,593	1,181,769
Queensland	259,160	201,390	460,550
South Australia	185,531	171,874	357,405
Western Australia	69,727	31,508	101,235
Tasmania	85,054	75,780	160,834
New Zealand	369,725	328,981	698,706
Australasia	2,259,533	1,978,836	4,238,369

If to these numbers, which principally comprise the people of European descent, there be added an estimated population of 200,000 Australian aborigines in an uncivilised state in Western Australia, South Australia, and Queensland, and of 41,993 Maoris in New Zealand, the total population of Australasia at the end of 1895 would be nearly 4,500,000.

The growth of the population of Australasia from the date of the first settlement is shown in the following table. An official enumeration of the people was made in most of the years quoted :—

Year.	Population of Australasia.	Annual Increase per cent.	Year.	Population of Australasia.	Annual Increase per cent.
1788	1,030	1871*	1,924,770	4·39
1801	6,508	15·13	1881*	2,742,550	3·60
1811	11,525	11·94	1891*	3,809,895	3·34
1821	35,610	5·88	1892	3,985,273	2·60
1831	79,306	8·34	1893	4,068,318	2·08
1841	211,095	10·28	1894	4,153,766	2·10
1851	430,596	7·36	1895	4,238,369	2·04
1861*	1,252,994	11·30			

* Census population.

It is reasonable to expect that the rate of growth would decline as the population increased, and such has been the case since 1851. The high rate of increase of 11·3 per cent. from 1851 to 1861 is of course due to the gold discovery, which proved a strong incentive to emigration to these colonies. The high annual increase between 1831 and 1841 is owing to the policy of State-aided immigration which was then in vogue. Prior to this period the high average arose from the small number of people operated on.

The following table shows the annual rate of increase of population in countries which are undergoing extensive settlement :—

Country.	Period.	Annual rate of Increase.
Argentine Republic	1869-87	4·62
Cape Colony (European or white races)...	1875-91	2·23
Brazil	1872-88	2·17
Canada.....	1881-91	1·12
Chili	1885-91	1·83

The population of Australasia, as shown by the census of 1891, had increased threefold since 1861, and nearly twofold since 1871, while the annual rate of increase for the whole thirty years was 3·78 per cent. Taking the colonies individually, the rate of increase for Queensland was the highest—a circumstance partly to be attributed to the large numbers introduced under the system of State-aided immigration which has prevailed in that colony for many years ; but the largest numerical increase was that of New South Wales. The population of each colony (exclusive of aborigines, a few in New South Wales and Victoria excepted) at the last four census periods, is shown below :—

Colony.	1861.	1871.	1881.	1891.	Annual Increase per cent., 1861-1891.
New South Wales	350,860	503,981	751,468	1,132,234	3·98
Victoria	540,322	731,528	862,346	1,140,405	2·52
Queensland	30,059	120,104	213,525	393,718	8·95
South Australia...	126,830	185,626	279,865	320,431	3·12
West'n Australia	15,691	25,353	29,708	49,782	3·92
Tasmania	90,211	101,785	115,705	146,667	1·63
New Zealand.....	99,021	256,393	489,933	626,658	6·34
Australasia...	1,252,994	1,924,770	2,742,550	3,809,895	3·78

The following table gives the total increase of each colony for the thirty-five years, 1861-95, distinguishing the natural increase arising

from the excess of births over deaths from the increase caused by the excess of arrivals over departures :—

Colony.	Excess of—		Total Increase.
	Births over Deaths.	Immigration over Emigration.	
New South Wales.....	574,994	354,330	929,324
Victoria	555,845	88,077	643,922
Queensland	167,621	264,873	432,494
South Australia	192,342	40,951	233,293
Western Australia.....	20,452	65,283	85,735
Tasmania.....	71,269	1,790	73,059
New Zealand	343,158	275,837	618,995
Australasia	1,925,681	1,091,141	3,016,822

The information conveyed by the above figures is important, as illustrating not only the movement of population but also the effect upon immigration of local influences, such as the attraction of liberal land laws, the fertility of the soil, the permanence of employment, and the policy of assisted immigration. But a bare statement of the gross increase to each colony from immigration is apt to be misleading, since the original density of population must be deemed a factor affecting the current of immigration. The following figures show the density of population in each colony at various dates corresponding with those given in a preceding table :—

Colony.	1861.	1871.	1881.	1891.
New South Wales	1.13	1.62	2.42	3.65
Victoria	6.15	8.32	9.81	12.98
Queensland.....	0.04	0.18	0.32	0.59
South Australia.....	0.14	0.20	0.31	0.35
Western Australia	0.02	0.03	0.03	0.05
Tasmania	3.44	3.88	4.41	5.59
New Zealand	0.95	2.45	4.69	6.00
Australasia.....	0.41	0.63	0.89	1.24

At the close of the year 1895 the population of Australasia, including the native races, only reached a density of 1.46 persons per square mile—a rate which is far below that of any other civilised country; and excluding Australian aborigines and Maoris, the density was not more than 1.38 per square mile.

A comparison of the density of population in Australasia with that in older countries of the world is of little practical use, beyond affording

some indication of the future of these colonies when their population shall have reached the proportions to be found in the old world. The latest authoritative statements give the density of the populations of the great divisions of the world as follows:—

Continent.	Area in square Miles.	Population.	Persons per square mile.
Europe	3,555,000	362,590,000	101·99
Asia	14,710,000	873,850,000	59·41
Africa	11,514,000	129,160,000	11·22
America	13,283,000	122,620,000	9·23
Australasia and Pacific.....	3,300,000	4,940,000	1·50
Polar Regions.....	4,889,000	300,000	0·06
The World	51,251,000	1,493,460,000	29·14

From the earliest years of settlement there was a steady if not a powerful stream of immigration into these colonies, but in 1851, memorable for the finding of gold, the current was swollen by thousands of men in the prime of life who were attracted to the shores of Australia by the hope of speedily acquiring wealth. By far the greater number of these new arrivals settled in the new colony of Victoria, which had just been separated from New South Wales, and for some years afterwards Victoria had an unprecedented increase to its population. The vast changes which took place will be evident when it is stated that in 1850, just prior to the gold rush, the population of the northern and southern portions of New South Wales was:—

Port Phillip (afterwards Victoria)	76,162
Remaining portion of the Colony.....	189,341

While five years afterwards the population of the two colonies was:—

Victoria	364,324
New South Wales	277,579

Victoria enjoyed the advantage in population and increased its lead yearly until 1871, when its inhabitants exceeded in number those of New South Wales by no less than 228,230. But from that time almost every year showed a nearer approach in the numbers of inhabitants of the two colonies, until at the census of 1891 Victoria had only a lead of 8,171, while at the end of that year New South Wales had the greater population by about 7,500. By the end of 1895 the parent colony, it is estimated, had increased its lead to nearly 100,000.

Queensland and New Zealand also owe much of their remarkable progress to the discovery of gold. In New Zealand the gold fever broke out in 1861, when the population numbered only 99,021, and the period of its activity extended over many years. At the census taken in 1891 the population had reached 626,658 souls, exclusive of Maoris, or fully six times that of 1861. In Queensland the attractive force of the gold-fields was exerted at a later date, and it may still be considered a powerful factor in stimulating the growth of population in that colony.

Much of the increase of population, especially in the colonies of New South Wales, Queensland, and New Zealand, was due to the State policy of assisted immigration. The following table shows the number of all immigrants introduced into the colonies either wholly or partly at the expense of the State to the end of 1894 :—

Colony.	Prior to 1881.	1881 to 1894.	Total.
New South Wales	177,234	34,635	211,869
Victoria	140,102	140,102
Queensland	52,399	109,537	161,936
South Australia	88,050	7,298	95,348
Western Australia.....	889	5,388	6,277
Tasmania.....	18,965	2,734	21,699
New Zealand	*100,920	14,658	*115,578
Australasia	578,559	174,250	752,809

* Exclusive of number prior to 1870, of which no record can be found.

The following table shows the increase of population by excess of immigration over emigration for the four decennial periods ended 1890, and for the period of five years 1891 to 1895 :—

Colony.	1851-60.	1861-70.	1871-80.	1881-90.	1891-95.
New South Wales.....	123,097	45,539	109,341	164,205	35,245
Victoria	398,753	38,935	*12,672	112,093	*50,279
Queensland	†	68,191	73,849	101,530	21,303
South Australia	33,024	17,949	34,569	*17,000	5,433
Western Australia.....	6,870	5,319	*339	10,170	50,133
Tasmania	6,767	*3,228	*1,427	5,572	873
New Zealand.....	44,742	118,637	132,976	9,451	14,773
Australasia	613,253	291,342	336,297	386,021	77,481

* Denotes excess of emigrants.

† Included in New South Wales figures.

Taking the last fifteen years, it will be seen from the next table that no colony exhibits uniformity in the immigration returns,

in several years some of the provinces even showing an excess of departures:—

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.	Australasia.
1881	16,673	4,976	4,009*	12,055	401	1,166	1,970	33,232
1882	16,034	6,563	17,043	3,679*	94	587	2,375	39,017

* Denotes excess of departures.

AGES OF THE PEOPLE.

At the census of 1891 the average age of the population of Australasia was 24·4 years; the average age of the males was 25·5 years, and that of the females 23·3 years. Taking the colonies separately, it will be seen from the following table that the oldest population was that of Victoria, with an average of 25·6 years; and the youngest that of Queensland, with an average of 23·7 years. The male population of Western Australia had the highest age average, namely, 27·6 years, owing to the large influx of adult males some few years before, attracted thither by the discoveries of gold at Kimberley and elsewhere. The youngest male populations were in New South Wales and South Australia, which averaged 25·1 and 24·7 years respectively. The youngest female population was found in Queensland, where the average was 21·5 years; while the oldest was in Victoria, averaging 24·6 years:—

Colony.	Males.	Females.	Persons.
New South Wales	25·1	22·5	23·9
Victoria	26·5	24·6	25·6
Queensland	25·2	21·5	23·7
South Australia	24·7	23·8	24·3
Western Australia.....	27·6	22·0	25·3
Tasmania	25·6	23·7	24·7
New Zealand	25·2	23·4	24·1
Australasia	25·5	23·3	24·4

In considering these figures it must be remembered that the same average may be due to opposite causes ; for instance, a large middle-age population with a small proportion of children and old people, as in Queensland, gives much the same result as a large population at the dependent ages and a small proportion of those at the supporting ages, as in Tasmania. The following table shows the number of males at the dependent ages from infancy to 15 years ; at the supporting ages from 15 to 65 ; and in the old age group, from 65 years upwards :—

Colony.	Dependent Ages up to 15 years.		Supporting Ages, 15 and under 65.		Old Ages, 65 and over.	
	Number.	Percentage of Male Population.	Number.	Percentage of Male Population.	Number.	Percentage of Male Population.
New South Wales...	217,991	35·85	373,346	61·41	16,666	2·74
Victoria.....	199,599	33·37	374,871	62·68	23,619	3·95
Queensland	74,180	33·15	145,960	65·22	3,639	1·63
South Australia ...	64,004	38·37	97,293	58·33	5,504	3·30
Western Australia..	8,565	28·73	20,148	67·60	1,094	3·67
Tasmania	29,003	37·39	44,256	57·06	4,301	5·55
New Zealand... ..	126,531	38·01	197,979	59·48	8,367	2·51
Australasia ...	719,873	35·34	1,253,853	61·56	63,190	3·10

It will have been noticed in the table on the preceding page that during certain years, notably 1885 to 1891, there was an exodus of population from New Zealand, South Australia, and Tasmania, the persons who left being mainly able-bodied men in search of employment. It is only reasonable, therefore, that the number of males of the supporting ages in those colonies should be below the average. The reverse is the case in Western Australia, where the proportion of dependent males is smaller than in any other colony, while the proportion of men of the supporting ages is greater. These facts are to be accounted for by the immigration into Western Australia of large numbers of adult males, many of whom probably came from one of the three colonies first mentioned. The high birth-rate of New South Wales accounts for the larger proportion of persons of dependent ages as compared with Victoria, but at the supporting ages there is very little difference between the two colonies. With regard to the old age group, the proportion in Queensland, 1·63 per cent., is undoubtedly low. Tasmania, with 5·55 per cent., has the largest proportion of aged inhabitants ; Victoria comes next with 3·95 per

cent. ; while the proportion of inhabitants of 65 years and over in New South Wales is only 2·74 per cent., or one-half of the proportion shown by Tasmania.

The following table shows, in quinquennial periods, the ages of the people in each of the Australasian colonies :—

Ages.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.

60 to 65	7,677	12,915	1,991	3,251	281	1,488	4,475
65 to 70	4,865	7,181	1,145	2,169	161	969	2,508
70 to 75	3,658	4,803	727	1,534	129	766	1,878
75 to 80	1,903	2,267	301	830	52	401	936
80 and upwards	1,273	1,501	196	591	40	293	629
Total Females	515,951	541,751	169,939	153,630	19,975	69,107	293,781

The period from 20 to 40 years is considered the "soldier's age," as men of such ages would be the first to be called upon for the defence of the country in case of war. At the census of 1891 Australasia had a force of nearly 700,000 men to draw upon for this purpose, of whom New South Wales would have contributed 209,589, Victoria 206,181, Queensland 86,766, South Australia 53,964, Western Australia 12,109, Tasmania 25,155, and New Zealand, 94,942.

The female population of Australasia may be conveniently grouped into three divisions, namely, dependent ages, from infancy to 15 years ;

reproductive ages, from 15 to 45 ; and those over 45 years of age. The numbers of each class in the several provinces are shown below:—

Colony.	Dependent ages, up to 15 years.		Reproductive ages, 15 and under 45.		Ages of 45 years and over.	
	Number.	Percentage of Female Population.	Number.	Percentage of Female Population.	Number.	Percentage of Female Population.
New South Wales.....	213,198	41·32	239,503	46·42	63,250	12·26
Victoria.....	195,315	36·05	262,512	48·46	83,924	15·49
Queensland	72,407	42·61	79,391	46·72	18,141	10·67
South Australia	62,174	40·47	68,796	44·78	22,660	14·75
Western Australia.....	8,354	41·82	9,313	46·62	2,308	11·56
Tasmania	28,327	40·99	30,598	44·28	10,182	14·73
New Zealand.....	123,889	42·17	131,451	44·74	38,441	13·09
Australasia.....	703,664	39·89	821,564	46·57	238,906	13·54

The female population, it will be seen, is distributed among the various colonies in much more even proportions than the male population. Victoria has the smallest ratio of dependent females, the greatest proportion of those of reproductive ages, and the highest relative number of females over the reproductive age. The rates for the other provinces are remarkably even, New South Wales, Queensland, and Western Australia having almost an identical proportion of reproductive females, while South Australia, Tasmania, and New Zealand are nearly equal at a slightly lower rate.

BIRTHS.

The total number of births in each colony and the rate per thousand of mean population during the year 1895 are shown in the following table:—

Colony.	Births.			Birth-rate.
	Males.	Females.	Total.	
New South Wales.....	19,878	18,897	38,775	30·66
Victoria	17,361	16,344	33,705	28·55
Queensland	7,604	7,270	14,874	32·85
South Australia.....	5,423	5,144	10,567	29·72
Western Australia	1,192	1,181	2,373	25·89
Tasmania	2,432	2,358	4,790	30·10
New Zealand	9,493	9,053	18,546	26·78
Australasia	63,383	60,247	123,630	29·44

The number of births in each colony and in the whole of Australasia, in quinquennial periods from 1861 to 1895, was as follows :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	79,958	92,643	106,543	127,572	158,965	188,300	197,567
Victoria	123,353	131,052	136,363	132,347	140,258	172,307	180,851
Queensland	11,761	22,622	29,270	37,535	48,979	70,150	72,863
South Australia	30,472	35,067	36,398	46,310	56,618	53,200	53,093
Western Australia	3,352	3,724	4,033	4,611	5,446	7,696	10,242
Tasmania	15,454	14,679	15,313	17,165	21,425	23,710	24,794
New Zealand	26,611	46,770	59,891	88,205	96,482	94,071	91,410
Australasia	290,961	346,557	397,820	453,745	523,173	609,434	630,820

The average birth-rates of each colony for the same periods were as follow :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	42·54	40·57	38·75	37·53	37·73	36·40	32·77
Victoria	43·22	38·97	35·72	32·21	30·76	32·69	31·00
Queensland	43·24	43·98	40·96	36·73	34·47	37·66	34·13
South Australia	44·18	40·84	37·66	38·24	37·97	34·69	31·48
Western Australia	39·33	35·30	31·32	32·98	34·56	36·90	31·24
Tasmania	33·82	29·66	29·72	31·51	34·96	34·62	32·19
New Zealand	37·92	42·29	39·88	41·21	36·36	31·20	27·63
Australasia	41·91	39·88	37·28	35·67	35·20	34·40	31·34

DEATHS.

The following table shows the total number of deaths and the rate per thousand of mean population during the year 1895 :—

Colony.	Deaths.			Death-rate.
	Males.	Females.	Total.	
New South Wales.....	8,671	6,243	14,914	11·79
Victoria	8,891	6,758	15,649	13·26
Queensland	3,237	1,915	5,152	11·38
South Australia.....	2,203	1,760	3,963	11·17
Western Australia	1,201	403	1,604	17·50
Tasmania	1,047	764	1,811	11·38
New Zealand	3,966	2,897	6,863	9·91
Australasia.....	29,216	20,740	49,956	11·90

The number of deaths in each colony and in the whole of Australasia, in quinquennial periods from 1861 to 1895, is shown in the following table :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	31,561	36,466	40,909	53,256	66,103	71,457	76,802
Victoria	49,452	55,136	59,759	62,811	66,811	84,648	82,069
Queensland	5,751	9,312	12,869	17,284	25,731	28,040	26,581
South Australia	10,840	12,963	15,475	18,026	21,616	19,361	20,535
Western Australia	1,399	1,711	2,068	2,003	2,709	3,332	5,430
Tasmania	6,953	6,962	8,060	8,994	9,790	10,339	10,123
New Zealand	10,001	13,323	19,354	25,254	29,074	29,746	33,525
Australasia	115,957	135,878	153,494	187,623	221,834	246,973	255,065

The average death-rate of each colony for the periods shown in the above table is given below ; but the statement does not afford a just comparison between the colonies, as no account is taken of the ages of the people :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	16.79	16.07	14.77	15.74	15.66	13.82	12.75
Victoria	17.36	16.46	15.60	15.30	14.65	16.05	14.07
Queensland	20.52	18.33	17.53	17.02	18.88	15.11	12.47
South Australia	15.70	15.11	15.86	14.93	14.51	12.62	12.16
Western Australia	16.36	16.25	16.02	14.33	17.10	16.13	16.11
Tasmania	15.22	14.14	15.62	16.56	15.98	15.17	13.16
New Zealand	13.89	12.09	12.67	11.80	10.95	9.87	10.15
Australasia	16.77	15.71	15.02	14.79	14.77	13.95	12.72

Compared with European countries the Australasian colonies occupy a very favourable position in respect to both birth and death rates. The Australasian birth-rate is high, and in European countries where it is higher it will be seen on reference to the subjoined table that the death-rate is so considerably in excess that the difference between the two, representing the gain to each country by natural increase, is largely in favour of Australasia. In the case of France, Austria, Hungary, and Sweden the figures given cover the period of nine years

from 1885 to 1894 ; for all other countries they refer to the ten years 1885-94 :—

Country.	Birth Rate.	Death Rate.	Excess of Births per 1,000 inhabitants.
New South Wales	35·13	13·66	21·47
Victoria.....	32·13	15·23	16·90
Queensland	36·27	14·61	21·66
South Australia	34·02	12·57	21·45
Western Australia.....	35·00	16·13	18·87
Tasmania.....	34·01	14·62	19·39
New Zealand.....	30·20	10·08	20·12
Australasia	33·46	13·64	19·82
England and Wales	31·24	18·86	12·38
Scotland	31·30	18·93	12·37
Ireland.....	22·91	17·38	5·53
United Kingdom.....	30·18	18·78	11·40
France	23·01	22·14	0·87
Germany	36·48	24·23	12·25
Belgium	29·32	20·20	9·12
Netherlands	33·47	20·29	13·18
Austria	37·61	28·68	8·93
Hungary	43·06	32·30	10·76
Switzerland	27·84	20·45	7·39
Italy	37·24	26·62	10·62
Denmark	31·21	18·75	12·46
Norway	30·47	16·93	13·54
Sweden	28·46	16·79	11·67

No better testimony to the salubrity of the climate of Australasia could be obtained than is afforded by these figures. There are, of course, various circumstances other than climatic which would tend to make the mortality lighter in these than in older-settled countries, but when all possible allowances are made for such circumstances a comparison between these colonies and the countries of Europe is still significantly favourable to Australasia.

INDEX OF MORTALITY.

So far consideration has only been given to the actual death-rates as they are obtained by taking the proportion which the number of deaths bears to the number of inhabitants. It is well known, however, that the death-rate of a country is affected by more than the salubrity of its climate, the degree of perfection to which the sanitary condition of its cities and towns and villages has been brought, and the nature of the industrial pursuits of its people. Actuarial science has demonstrated

the fact that when a male child is born in the colony of New South Wales it may expect to live until it is 49·60 years old ; if it survives until it is 2 years of age, it may expect to live 56·37 years ; while as it grows older the expectation of life gradually diminishes until at 90 years of age the man may count upon but 2·54 years of life. It is plain, therefore, that a country which has a large proportion of young people will, other things being equal, have a lower death-rate than another which has a comparatively large proportion of old persons. It is this fact that statistical science now seeks to take into account in establishing the rates of mortality of the various countries of the world. It is not practicable to base a rate on any table showing the expectation of life at successive ages ; but it is practicable to select a country, divide its population into certain age-groups, and ascertain the mortality of all countries on the assumption that the ages of the population of each hold the same proportions to the total inhabitants as do those of the selected country. This is the course which has been suggested by the International Statistical Institute, in its 1895 session, held at Berne. It has adopted the population of Sweden, as ascertained at the census of 1890, as the standard, and divided it into the five age-groups of under 1 year, 1 year and under 20 years, 20 years and under 40 years, 40 years and under 60, and 60 years and upwards, obtaining the percentages of 2·55, 39·80, 26·96, 19·23, and 11·46 respectively. Applying these age proportions to the population of each of the Australasian colonies as ascertained at the census of 1891, the "index of mortality," as distinguished from the actual "death-rate," is found as given below for each of the last five years. How greatly the ages of the people of a country affect its mortality will be evident from the fact that whereas in 1894 the death-rates of the colonies ranged from 9·91 in New Zealand to 17·50 in Western Australia, or 7·59 per thousand, the range of the indexes of mortality was only 2·21 per thousand, namely, from 14·44 in New Zealand to 16·65 in Western Australia. In comparing the indexes of various years it must not be forgotten that the composition of the population of some of the colonies, notably of Western Australia, has changed since the last census was taken :—

Colony.	1890.	1891.	1892.	1893.	1894.
New South Wales ...	16·51	18·68	15·65	16·71	16·32
Victoria	18·71	19·48	16·24	16·73	15·96
Queensland	17·29	15·52	15·82	16·66	16·29
South Australia	15·33	16·75	14·07	16·10	14·61
Western Australia ...	15·11	21·54	18·94	18·08	16·65
Tasmania	17·25	18·01	15·64	15·43	14·74
New Zealand.....	12·87	13·95	13·59	13·56	14·44
Australasia	16·68	17·83	15·47	16·16	15·68

MARRIAGES.

The number of marriages and the marriage-rate per thousand of mean population for each colony during the year 1895 are shown below :—

Colony.	Marriages.	Marriage Rate.
New South Wales	8,030	6·35
Victoria	7,076	5·99
Queensland	2,821	6·23
South Australia	2,053	5·78
Western Australia	633	6·91
Tasmania	847	5·32
New Zealand	4,110	5·94
Australasia	25,570	6·09

The number of marriages in each colony and in the whole of Australasia, in quinquennial periods from 1861 to 1895, was as follows :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	16,920	18,271	21,210	25,904	35,737	38,671	39,024
Victoria	22,237	22,902	24,368	25,416	33,589	42,832	37,612
Queensland	3,689	4,648	6,276	7,406	11,632	15,271	13,526
South Australia	6,226	6,435	7,472	10,682	12,379	10,334	10,691
Western Australia	765	828	835	978	1,112	1,495	2,332
Tasmania	3,340	3,143	3,290	4,087	5,005	4,796	4,525
New Zealand	7,240	9,955	12,050	16,220	18,102	18,097	20,210
Australasia	60,417	66,182	75,501	90,753	117,556	131,496	128,820

The average marriage-rates for each colony during the same periods are given below. The table shows the ratio of marriages to population ; to ascertain the ratio of persons married it is necessary to double the figures :—

Colony.	1861-65.	1866-70.	1871-75.	1876-80.	1881-85.	1886-90.	1891-95.
New South Wales	9·01	8·00	7·71	7·63	8·49	7·48	6·63
Victoria	7·80	6·81	6·38	6·18	7·36	8·12	6·45
Queensland	13·23	9·11	8·73	7·32	8·61	8·22	6·33
South Australia	9·02	7·39	7·61	8·82	8·31	6·73	6·36
Western Australia	9·02	7·84	6·48	6·99	7·06	7·18	7·02
Tasmania	7·31	6·35	6·38	7·51	8·16	7·01	5·83
New Zealand	10·27	9·06	7·93	7·61	6·81	6·00	6·11
Australasia	8·73	7·63	7·20	7·14	7·83	7·42	6·41

During the last five years the marriage-rate has fallen considerably in all the colonies. With the exception of New Zealand it was lower

in every colony during 1891-95 than during the preceding quinquennial period, and lower everywhere than during the five years 1881-85. This is another proof of the truth of the oft-repeated statement that commercial depression always exerts an adverse influence on the marriage-rate.

A comparison of the marriage-rate of Australasia with that of other countries, where the social conditions are essentially different, is not of much value, and therefore is not given here.

Particulars relative to divorce in the Australasian colonies will be found in the chapter headed "Social Condition."

NATIVE RACES.

At the census of 1891 only 38,879 aborigines were enumerated, of whom 8,280 were in New South Wales, 565 in Victoria, 23,789 in South Australia, and 6,245 in Western Australia. The figures relating to New South Wales and Victoria included all aborigines living in those provinces, but the returns from the other colonies were very imperfect. The aborigines of Tasmania are extinct, but the Tasmanian census of 1891 enumerated 139 half-castes, who were included in the general population. It has been asserted that there are some 70,000 aborigines in Queensland, but this is a very crude estimate, and may be far wide of the truth. In the case of South Australia, a large number of the aborigines in the Northern Territory are entirely outside the bounds of settlement, and it seems probable that they are as numerous in that colony as in Queensland. The census of Western Australia included only those aboriginals in the employment of the colonists, and as large portions of this, the greatest in area of all the Australasian colonies, are as yet unexplored, it may be presumed that the number of aborigines enumerated was very far short of the total in the colony. Altogether, the aboriginal population of the continent may be set down at something like 200,000.

The original inhabitants of New Zealand, or Maoris, as they are called, are quite a different race from the aborigines of Australia. They are gifted with a considerable amount of intelligence, are quick at imitation, and brave even to rashness. According to the census of 1881 they numbered 44,097, but like the Australian aborigines they appear to be decreasing in number, for the census of 1886 enumerated only 41,432, and that of 1891, 41,993 (22,861 males and 19,132 females). In the 1891 figures are included 2,681 half-castes (1,469 males and 1,212 females), and 40 Maoris at Chatham Islands (26 males and 14 females). It is said that when the colonists first landed in New Zealand the number of Maoris was fully 120,000, but this, like all other estimates of aboriginal population, is founded on very imperfect information. At the census of 1896 the Maori population of New Zealand numbered 39,854, viz., 21,673 males and 18,181 females.

ALIEN RACES.

At the census of 1891 the Chinese and half-caste Chinese in the whole group of colonies numbered 42,521, distributed as follows :—

New South Wales	14,156
Victoria	9,377
Queensland	8,574
South Australia.....	3,997
Western Australia	917
Tasmania	1,056
New Zealand.....	4,444
Australasia.....	42,521

Since 1880 it has been deemed expedient by the Governments of the colonies to enact prohibitive laws against the immigration of Chinese, and their migration from one colony to another. For several years a poll-tax of £10 was imposed, but now, in accordance with the most recent legislation on the subject, masters of vessels are forbidden under a heavy penalty to bring more than one Chinese to every 300 tons, and a poll-tax of £100 is charged on landing, except in Western Australia, where the tax is £10, and in South Australia, where no poll-tax is imposed, but masters of vessels may only bring one Chinese to every 500 tons burden. These stringent regulations have had the effect of bringing about the almost entire cessation of this class of immigration.

The only other alien race present in large numbers in any of the colonies are the Polynesians in Queensland, where they numbered 9,428 at the census of 1891.

NATURALISATION.

The number of persons naturalised in Australasia during 1894 was 1,121; of these, over one-fourth took out papers of naturalisation in Queensland and Victoria respectively, and over one-fifth in New Zealand and New South Wales. The figures for South Australia, Western Australia, and Tasmania are small. The following are the returns for each colony :—

Colony.	Germans and other German-speaking nations.	Scandinavians.	Chinese.	Others.	Total
New South Wales ...	98	79	57	234
Victoria	139	20	122	281
Queensland	188	61	9	28	286
South Australia	17	4	4	25
Western Australia ...	5	3	3	11
Tasmania	4	3	17	3	27
New Zealand.....	57	54	96	50	257
Australasia ...	508	224	122	267	1,121

CITIES AND TOWNS.

The progress of the chief cities of Australasia has been no less remarkable than that of the colonies themselves, and has no parallel among the cities of the old world. Even in America the rise of the great cities has been accompanied by a corresponding increase in the rural population, but in these colonies, perhaps for the first time in history, is presented the spectacle of magnificent cities growing with marvellous rapidity, and embracing within their limits one-third of the population of the colonies of which they are the seat of government. The abnormal aggregation of the population into their capital cities is a most unfortunate element in the progress of the colonies, and one which seems to become every year more marked.

The increase in the population of the chief cities of Australasia and the estimated numbers of their inhabitants at the various census periods are shown in the following table, which illustrates the remarkable progress referred to :—

City.	1841.	1851.	1861.	1871.	1881	1891.
Sydney	29,973	53,924	95,789	137,776	224,939	383,283
Melbourne	4,479	23,143	139,916	206,780	282,947	490,896
Brisbane	*829	2,543	6,051	15,029	31,109	93,657
Adelaide	†8,480	‡14,577	18,303	42,744	103,864	133,252
Perth	5,244	5,822	8,447
Hobart	19,449	19,092	21,118	33,450
Wellington	7,908	20,563	33,224

* In 1846. † In 1840. ‡ In 1850.

The aggregation of population is most marked in the case of Melbourne, but Adelaide and Sydney are also conspicuous. The proportion of population in each capital compared with that of the whole colony is shown below for the three years 1871, 1881 and 1891 :—

City.	1871.	1881.	1891.
	per cent.	per cent.	per cent.
Sydney	27·34	29·93	33·86
Melbourne	28·27	32·81	43·05
Brisbane	12·51	14·57	23·79
Adelaide	23·03	37·11	41·59
Perth	20·68	19·60	16·97
Hobart	18·76	18·25	22·81
Wellington	3·08	4·20	5·30

The percentage of New Zealand population resident in Wellington is small, but though it is the capital of the colony that city is exceeded

in population by Auckland, as well as by Dunedin and Christchurch. Still, even in the largest of these cities—Auckland—the population is not more than 8·18 per cent. of that of the whole colony.

The following is a list of the cities and towns of Australasia with a population exceeding 5,000 at the census of 1891; in all cases the suburbs are included :—

City or Town.	Population.	City or Town.	Population.
New South Wales—		Queensland— <i>continued</i> —	
Sydney	383,283	Gympie	8,449
Newcastle	50,705	Ipswich	7,625
Broken Hill	19,789	Toowoomba	7,007
Parramatta	11,677	South Australia—	
Goulburn	10,916	Adelaide	133,252
Maitland	10,214	Port Adelaide.....	20,644
Bathurst	9,162	Western Australia—	
Albury	5,447	Perth	8,447
Orange	5,064	Fremantle	5,607
Victoria—		Tasmania—	
Melbourne	490,896	Hobart	33,450
Ballarat	46,033	Launceston	17,208
Bendigo	37,238	New Zealand—	
Geelong	24,283	Auckland	51,287
Warrnambool	6,582	Christchurch	47,846
Castlemaine	5,982	Dunedin	45,869
Stawell	5,183	Wellington	33,224
Queensland—		Invercargill	7,962
Brisbane	93,657	Napier	8,341
Rockhampton	13,350	Nelson	6,626
Maryborough	9,700	Oamaru	5,621
Townsville	8,564	Wanganui	5,011

The estimated population of the capitals of the Australasian colonies on the 31st December, 1895, was as follows :—

Sydney	408,500
Melbourne	447,565
Brisbane	95,000
Adelaide	144,352
Perth	19,533
Hobart	36,690
Wellington	39,364

BIRTHPLACES.

One of the subjects of inquiry at the census of 1891, as at previous enumerations, was the birthplaces of the population. The result of the tabulation shows that while there are differences in the component parts of the population in the several colonies, these differences are slight, and the great majority of the people—to the extent, indeed, of fully 95 per

cent.—are of British origin. Probably the population of Australasia is more homogeneous than that of most European countries, for even in Queensland, where people of foreign descent are proportionately more numerous than in any of the other colonies, they do not amount to more than 10 per cent. of the total population. The subjoined table shows in a condensed form the results of the tabulation of the birthplaces of the population of each colony, the figures being exclusive of aborigines, and inclusive, in the case of European countries, of their colonies and possessions :—

Birthplaces.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.	Australasia.
New South Wales	725,015	10,775	17,023	2,154	555	1,180	2,833	768,585
Victoria	40,763	713,074	7,462	6,600	1,036	4,205	8,941	782,00
Queensland	10,173	2,736	176,971	405	203	203	481	191,17
South Australia	17,716	25,309	1,449	217,730	1,161	674	983	265,022
Western Australia	464	753	63	588	27,325	60	76	29,838
Tasmania	5,831	16,397	1,004	722	108	107,901	2,629	134,612

Total	1,123,954	1,139,840	393,718	320,431	49,782	146,607	626,658	3,861,050

A glance at this table will show that natives of the Australasian colonies formed fully two-thirds of the population, and that the great

majority of the Australasian-born population were natives of the particular colony in which they were enumerated. The percentage of the people born in the colony in which they were resident at the time of the census, of those born in the other six Australasian colonies, and of the total Australasian-born population to the total population of each colony, are shown below :—

Colony.	Percentage to Total Population of—		
	Natives of Colony of Enumeration.	Natives of other Colonies.	Australasian-born Population.
New South Wales	64·51	7·47	71·98
Victoria	62·56	6·75	69·31
Queensland	44·95	7·14	52·09
South Australia	67·95	3·45	71·40
Western Australia	55·89	6·53	62·42
Tasmania	73·57	4·97	78·54
New Zealand	58·52	2·54	61·06
Australasia	61·44	5·96	67·40

These figures show that proportionately the largest Australasian-born population is to be found in Tasmania, where more than 73 out of every 100 of the inhabitants were born in the colony, and over 78 per cent. were Australasians. In Queensland, on the contrary, very nearly half the population were natives of countries outside Australasia, and only 45 per cent. were Queenslanders by birth. The low proportion of native-born in the colony in question is no doubt accounted for by the comparatively recent settlement of much of its territory, and the encouragement given to immigrants from the United Kingdom and the Continent of Europe. It will be noticed that New South Wales has proved the most attractive of all the provinces to those born in other parts of Australasia, while New Zealand, from its isolated position and greater distance, has drawn to itself the smallest proportion of Australasian natives. The following figures set forth still more clearly the extent to which each colony is indebted for population to its neighbours :—

Colony.	Number of Natives of other six Colonies enumerated.	Number of Natives enumerated in other six Colonies.	Gain to Colony.	Loss to Colony.
New South Wales.....	83,987	43,520	40,467
Victoria	76,996	69,021	7,975
Queensland	28,118	14,206	13,912
South Australia.....	11,045	47,292	36,247
Western Australia.....	3,250	2,013	1,237
Tasmania	7,294	26,711	19,417
New Zealand	15,943	23,870	7,927

In New South Wales, it will be seen, there were 83,987 natives of the other colonies, while only 43,520 natives of New South Wales had made their homes in other parts of Australasia, the result being a net gain of 40,467 persons—a very considerable proportion, seeing that several of the other provinces were originally colonised from New South Wales. On the other hand, South Australia showed a loss of 36,247 from intercolonial movements of population; Tasmania had lost 19,417; and New Zealand, 7,927. The natives of other parts of Australasia resident in Victoria very nearly balanced the number of Victorians resident in other provinces, the excess in favour of the colony in question being under 8,000. Queensland gained 13,912 from the other colonies; and Western Australia, 1,237 persons.

Next to the Australasian-born population, natives of the United Kingdom were by far the most numerous class in each colony. The following table shows the percentages of natives of England and Wales, Scotland, and Ireland to the total population of each colony:—

Colony.	Natives of—			
	England and Wales.	Scotland.	Ireland.	United Kingdom.
New South Wales.....	13·71	3·28	6·68	23·67
Victoria	14·29	4·45	7·48	26·22
Queensland.....	19·60	5·69	10·93	36·22
South Australia.....	15·24	2·77	4·48	22·49
Western Australia ...	19·71	2·43	7·03	29·17
Tasmania	11·89	2·62	3·88	18·39
New Zealand	19·04	8·28	7·60	34·92
Australasia	15·51	4·62	7·23	27·36

It was to be expected that the percentage of natives of the United Kingdom would be highest in those colonies which have introduced a large number of assisted immigrants during the last twenty years, namely, in Queensland and New Zealand, in which colonies the percentage of the native-born population is comparatively low. If the composition of the population of the United Kingdom be taken into consideration, it will be seen that Scotch and Irish colonists are proportionately much more numerous than those of English birth. The distribution of natives of the three kingdoms is very unequal in the different colonies. While natives of England are proportionately more numerous than natives of Scotland and Ireland in South Australia, Western Australia, and Tasmania; Scotsmen are most numerous in New Zealand, and Irishmen in Queensland.

The number of natives of parts of the British Empire other than the United Kingdom and Australasia enumerated in these colonies was very small, amounting only to the following percentages of the total population :—In New South Wales, 0·44 per cent. ; in Victoria, 0·44 per cent. ; in Queensland, 0·53 per cent. ; in South Australia, 0·48 per cent. ; in Western Australia, 1·53 per cent. ; in Tasmania, 0·45 per cent. ; and in New Zealand, 0·54 per cent. ; average for Australasia, 0·48 per cent. Natives of Canada and of the West and East Indies make up the majority of this class, which numbered only 18,354 altogether. It is not possible to give a complete tabulation of natives of foreign countries, as in some of the colonies no countries are mentioned other than those shown in the table given, the rest of the foreign-born population being bracketed together as natives of “other foreign countries.” Immigrants from Germany appear to be most numerous ; then follow natives of China, Sweden and Norway, the United States, Denmark, France, Italy, Russia, Switzerland, Austria-Hungary, the Netherlands, Portugal, Spain, and Belgium. Of countries not shown in the table, Greece and Asiatic Turkey would appear to have contributed most largely to the population of Australasia, though Polynesians are numerous in Queensland. The percentages to the total population of each colony of natives of Germany, of the Scandinavian Kingdoms (Sweden and Norway and Denmark), and of the total foreign-born population, are shown in the subjoined table :—

Colony.	Percentage of—		
	Germans.	Scandinavians.	Total Foreign-born Population.
New South Wales	0·85	0·43	3·38
Victoria	0·95	0·40	2·98
Queensland	3·79	1·28	8·02
South Australia	2·67	0·45	4·88
Western Australia	0·58	0·49	3·91
Tasmania	0·63	0·23	1·82
New Zealand	0·74	0·76	2·97
Australasia	1·31	0·56	3·74

It will be seen that both Germans and Scandinavians are proportionately most numerous in Queensland, where together they amount to more than 5 per cent. of the population. Germans are also very numerous in South Australia, and Scandinavians in New Zealand.

The remainder of the population is made up of those born at sea and those unspecified. The proportion of each of these classes to the total population of each colony is shown below :—

Colony.	Percentage of—	
	Persons born at Sea.	Unspecified.
New South Wales	0·17	0·36
Victoria	0·17	0·88
Queensland	0·21	2·93
South Australia	0·19	0·56
Western Australia.....	0·23	2·74
Tasmania	0·12	0·68
New Zealand	0·21	0·30
Australasia	0·18	0·84

From the returns of those colonies where the people born at sea have been classified into those born of British and of foreign parentage, it appears that the great majority are of British parentage.

The column headed "unspecified" comprises, in addition to those given as unspecified in the tabulations of the different colonies, the natives of such foreign countries as were not shown in the table previously given. The proportions given for Queensland and Western Australia are considerably larger than those for the other colonies, owing to the fact that in Queensland the large number of Polynesians mentioned in a previous paragraph is included, while in Western Australia people engaged in the pearl fisheries, who were returned as natives of Malaysia, have been reckoned. Persons returned as natives of "Australasia" (colony unspecified), of whom there were a small number, are also enumerated under this head.

CONJUGAL CONDITION.

At the Hobart Census Conference it had been decided to tabulate the conjugal condition of the people under the heads of "Never married," "Married," "Widowed," and "Divorced"; but this decision was not adhered to by South Australia and New Zealand, where the divorced were probably included under the heading of unmarried. For the sake of comparison a similar classification has therefore been made in the tabulation of the other colonies. The people who returned themselves as "divorced" on the census schedules of New South Wales numbered 178 males and 126 females—total, 304; in Victoria, 110 males and 86 females—total, 196; in Queensland, 16 males and 7 females—total, 23; in Western Australia, 3 males and 3 females—total, 6; and in Tasmania, 25 males and 6 females—total, 31. Considering that during the five years preceding the taking of the census 210 decrees for the dissolution

of marriage had been granted in New South Wales, it is reasonable to assume that the figures quoted for that colony understate the truth, no doubt owing to the reluctance on the part of many people whose marriage bonds had been severed to return themselves as "divorced" in the census schedules, and the same remark applies to the other colonies.

The following table shows the number of unmarried, married, and widowed people in each colony, those whose conjugal condition was unspecified on the schedules having been proportionately distributed :—

Conjugal Condition.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.	Australasia.
MALES—								
Unmarried	424,464	408,566	161,308	114,066	21,648	52,630	234,315	1,416,997
Married	166,634	170,954	57,963	48,932	7,266	22,488	90,754	564,991
Widowed	16,905	18,569	4,508	3,803	893	2,442	7,808	54,928
Total	608,003	598,089	223,779	166,801	29,807	77,560	332,877	2,036,916
FEMALES—								
Unmarried	324,504	335,098	105,632	96,891	12,706	43,755	190,758	1,109,344
Married	165,648	173,749	57,610	48,295	6,383	21,406	90,919	564,010
Widowed	25,799	32,904	6,697	8,444	886	3,946	12,104	90,780
Total	515,951	541,751	169,939	153,630	19,975	69,107	293,781	1,764,134
MALES AND FEMALES—								
Unmarried	748,968	743,664	266,940	210,957	34,354	96,385	425,073	2,526,341
Married	332,282	344,703	115,573	97,227	13,649	43,894	181,673	1,129,001
Widowed	42,704	51,473	11,205	12,247	1,779	6,388	19,912	145,708
Total	1,123,954	1,139,840	393,718	320,431	49,782	146,667	626,658	3,801,050

From the foregoing figures it will be seen that unmarried males are largely in excess of unmarried females in each colony. The number for each colony and the percentage of unmarried females to unmarried males are shown in the following table :—

Colony.	Excess of Unmarried Males over Unmarried Females.	Percentage of Unmarried Females to Unmarried Males.
New South Wales	99,960	76·45
Victoria	73,468	82·02
Queensland	55,676	65·48
South Australia	17,175	84·94
Western Australia	8,942	58·69
Tasmania	8,875	83·14
New Zealand	43,557	81·41
Australasia	307,653	78·29

The percentage is particularly low in those colonies which have attracted much population from the other provinces, as New South

Wales, Queensland, and Western Australia; while it is near the average in Victoria and New Zealand, which have neither gained nor lost population to any great extent; and it is considerably above the average in South Australia and Tasmania, whence a great amount of emigration to the other colonies has taken place. This fact favours the supposition that the movement of population chiefly consisted of young unmarried males attracted to the other colonies by the hope of bettering their condition.

The numbers of married males and females are fairly equal in all the colonies, the males preponderating everywhere except in Victoria and New Zealand; there must, therefore, have been an emigration of married males from these two provinces.

Amongst the widowed, females largely outnumber males, as was to be expected from the higher death-rate and the proportionately larger number of males re-married. Western Australia, however, shows a slight excess of widowers over widows. The following table shows for each colony the proportion of unmarried, married, and widowed males to total males; of unmarried, married, and widowed females to total females; and of unmarried, married, and widowed persons to total population:—

Percentage of—	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.	Australasia.
MALES—								
Unmarried	60·81	68·31	72·08	68·38	72·63	67·86	70·39	69·57

PERSONS—								
Unmarried	66·64	65·24	67·80	65·84	69·01	65·72	67·83	66·46
Married	20·56	30·24	20·35	30·34	27·42	29·93	28·99	29·70
Widowed	3·80	4·52	2·85	3·82	3·57	4·35	3·18	3·84

SICKNESS AND INFIRMITY.

Inquiries were made in the census schedules respecting the number of persons suffering from sickness and infirmity, but there is reason to believe that in some of the colonies at least the way in which the column was filled in was unsatisfactory. The figures for New South Wales, Victoria, and South Australia may be compared throughout, as the classification adopted was practically the same, and to a certain extent this also holds good of the Western Australian and Tasmanian figures. The returns for Queensland are made in a somewhat indefinite way; and in New Zealand half the number of persons returned as sick and infirm

includes all ages, while the other half only includes the population of 15 years and over. The following table shows the results of the tabulation for each of the colonies :—

Sickness and Infirmary.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand
Sickness—							
Paralysis	851	1,097	*	300	*	*	468

* Included under more general heading. † Of this number, 4,130 persons refer to the population over 15 years only, while 274 persons refer to the whole population. ‡ Population over 15 years only.

HABITATIONS.

At the census of 1891 inquiry was made on the householders' schedules respecting the dwellings of the population. The information sought was in respect to whether a building was occupied, unoccupied, or in course of construction; the material of which it was built, and the number of rooms which it contained. The tabulation was not made with the same degree of completeness in all the colonies; but as far as comparative figures can be given they are shown below :—

Class of Dwelling.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand.
Occupied	197,408	217,895	73,429	59,834	10,221	26,585	119,766

Total	241,991	241,560	80,697	63,837	10,530	29,801	133,834

* Included under more general heading.

The materials of which the dwellings in each colony were constructed are shown in the following table, as far as the particulars are available:—

Material.	New South Wales.	Victoria	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand
Brick or stone	90,456	69,545	50,723	6,087	8,452	5,697
Wood, iron, or lath and plaster	130,363	154,843	11,519	2,388	19,231	116,801
Slabs, bark, mud, &c.....	*	4,841	*	306	505	4,286
Canvas, linen, calico, &c.....	13,794	5,858	880	1,552	1,214	4,085
Other materials	*	3	1,551
Unspecified materials	2,378	6,473	756	194	300	1,414
Total	241,991	241,560	80,697	63,887	10,530	29,801	133,834

* Included in previous line.

The number of rooms is given below for all houses, whether occupied or unoccupied, except in the case of New South Wales and New Zealand, where the figures given refer only to occupied dwellings:—

Dwellings, with—	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	New Zealand
One room	24,876	} 28,497	1,948	2,075	2,460	11,528
Two rooms.....	16,137		7,397	1,612	4,092	11,030
Three and four rooms	65,920	} 156,976	28,256	2,855	11,627	41,934
Five and six rooms.....	64,342		15,911	1,440	5,880	32,868
Seven to ten rooms.....	32,275	36,944	} 9,614	1,856	} 5,413	24,968
Eleven to fifteen rooms.....	7,371	7,061		318		
Sixteen to twenty rooms.....	1,912	1,673		92		
More than twenty rooms.....	1,160	1,226		47		
Number of rooms unspecified	1,947	9,183	761	235	320	1,523
Total	215,940	241,560	80,697	63,887	10,530	29,801	123,851

In Queensland the habitations were enumerated under the Quinquennial Census Act, which does not provide for a statement either of the materials of which houses are constructed or of the number of rooms which they contain. From the foregoing figures it will be seen that in Australasia there are nearly $5\frac{1}{4}$ persons to every occupied house.
