## APPENDIX TO PART FINANCE.

## FINANCIAL RELATIONS OF THE COMMONWEALTH AND STATES.

The object aimed at in this Appendix to the Victorian Year Book is to bring together in one document, for convenient reference, the various proposals made by the Commonwealth Treasurer (Sir William Lyne) and the Premier and Treasurer of Victoria (the Honorable Thomas Bent) for solving the problem of the Financial Relations of the Commonwealth and States, and the numerous financial statements submitted therewith, which are at present distributed over several official papers.

Several Inter-State Conferences have been held, at whiçh the question has been discussed, the last being the Conference held in Melbourne in April and May, 1908, but no agreement was arrived at.

The Sections of the Constitution Act bearing upon the question are as follow:-

COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT. SECTION 85 .
85. When any department of the public service of a State is Transfer of transferred to the Commonwealth-
I. All property of the State, of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary.
II. The Commonwealth may acquire any property of the State, of any kind, used, but not exclusively used, in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth.
III. The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament.
IV. The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

## Section 87.

87. During the period of ten years after the establishment of the Commonwealth, and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise, not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

Payment to
States
before uniform duties.

Sectiun 89.
89. Until the imposition of uniform duties of customs-
. I. The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
II. The Commonwealth shall debit to each State-
(a) the expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth ;
(b) the proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
III. The Commonwealth shall pay to each State, month by month, the balance (if any) in favour of the State.

## Section 93.

Payment to States for five years after uniform Tariffs.
93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides:-
I. The duties of customs chargeable on goods imported into a State, and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State.
11. Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

## Section 94.

94. After five years from the imposition of uniform duties of Distribution customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

## Section 105.

105. The Parliament may take over from the States their public debts as existing at the establishment of the Commonwealth, or a proportion thereof according to the respective numbers of their people as

Trsling
over public debts of
States. shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof ; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

The scheme submitted to the last Conference by Sir William Lyne is comprised in the following proposals:-
I. All the debts of the States to be taken over.
2. A Council of Finance to be appointed to administer the debt, raise new loans, control sinking fund, \&c.
3. Each State to pay for a period of five years annually to the Commonwealth the difference between its share of $£ 6,000,000$, and the interest and expenses due on its transferred debt. At the end of the five-year period such annual payments to be continued, but to be reduced by a sliding scale operating annually for thirty years. At the end of that period the States to be absolutely free of indebtedness as regards the loans transferred.
4. The Commonwealth Parliament to make an appropriation of an amount sufficient to pay the present annual interest and expenses on the debts taken over-say $8 \frac{3}{4}$ millions-such amount to be payable to the Council of Finance.
5. Loans taken over by the Commonwealth to be replaced at . or near maturity by 3 per cent. Australian Consols, redeemable 20 years after date of inscription, or at option of Commonwealth at any time thereafter-on twelve months' notice.
6. A Commonwealth Sinking Fund to be established.
7. The States to transfer to the Commissioners the present Sinking Funds. .
8. After a loan has matured the difference between the present rate of interest and the rate payable on the new loan to be paid by the Commissioners into the Sinking Fund.
9. The Sinking Fund to be under the control of the Council, and to be used only for buying up State and Commonwealth Stock, and for redeeming loans at maturity.
10. Future loans required by the States to be made through the Council-the States to pay annually to the Council the interest on each loan raised, and one-half per cent. for Sinking Fund for an actuarial term-the liability of the States in respect of such loan to cease at the end of such term. The States to give an undertaking to pay the Council.
ir. The Council of Finance to decide the order in which loans shall be made. Loans for redemption of State debts taken over to have precedence over all other loans.
12. In the event of the total loan requirements for any year exceeding the sum, which, in the opinion of the Council, it is wise to borrow, the Council to be empowered to settle in consultation with the State Treasurers the proportion to be raised for each individual State.
13. In the event of non-payment of an amount due by a State to the Commonwealth, or the Council, the Commonwealth to have power, on a certificate from the Council, to impose a tax on that State; also the Council to have power to refuse to raise further loans for such State for a period not exceeding ten years.
r4. In consideration of the States being relieved of their indebtedness, the transferred properties to be handed by the States to the Commonwealth free of charge.
The following statements taken from a paper issued by the Federal Treasury in connexion with the public debts of Australia will assist in understanding the Commonwealth scheme as outlined in the above proposals.

## PROPOSAL 1.

TABLE A.
Fublic Debts of Australia at 30 th June, igof.
(Note.-Sinking Funds have not been deducted from the Debt. In the cases in which, since the date of Federation, loans have been redeemed out of the proceeds of new loans, it has been assumed that the Commonwealth may take over such portion of the new loans as realized the amount of the redeemed loans. Treasury Bills covering Revenue Deficits are included. Revenue Deficits which are not covered by Treasury Bills and overdrafts on Loan Account are not included.)

* In addition the Commonwealth may apparently take over new loans to be raised by New South Wales for the redemption of certain loans, amounting to $£ 110,410$, which have been paid off since Federation, and charged to General Loan Account.
in lieu th addion there is a sum of 2294,002 , being further mount of certificate given by the Victorian Treasurer to the Trust Fund Trustees. Bonds may be issued in the certificate and sold, when interest would become payable. At present no interest is paid
$\ddagger$ In addition the Commonwealth may apparently take over $£ 1,088,401$ and $\mathfrak{f 2}, 098,326$. The former is an amount of stoek inscribed under the Victorian Municipalities Loans Extension Act (No. 1552) but not yet sold. When sold the stock will bear interest at 3 per cent. The latter amount represents certificates given by the Victorian Treasurer to the Trust Fund Trustees. Bonds may be issued in heu of the certificates and sold, when interest would be payable at rates not exceeding 31 and 4 per cent. At present interest at rates which vary, is paid only in respect of that portion of the certificates which covers moneys belonging to the Savings Bank. The interest on the portion referred to was, on 30 th June, 1907 , at the annual rate of $£ 60,000$ (approximate).
$\$$ An additional amount of $£ 6,386$, amount of Tasmanian loan paid of , and for which redemption loan has yet to be rased, can apparently be taken over.

TABLE D.

## PROPOSAL 7.

TABLE J.
The Public Debts Sinking Funds of Australia at 3oth June, 1907.

Held in cash in Banks unless otherwise stated.

| New South Wales | $\ldots$ | $\ldots$ | $£ 508,075(a)$ |
| :--- | :--- | :--- | :--- | ---: |
| Victoria $\quad \ldots$ | $\ldots$ | $\ldots$ | $820,5 \mathrm{I} 9(b)$ |
| Queensland $\ldots$ | $\ldots$ | $\ldots$ | $94(c)$ |
| South Australia | $\ldots$ | $\ldots$ | $520,015(d)$ |
| Western Australia | $\ldots$ | $\cdots$ | $1,658,710(e)$ |
| Tasmania $\quad \ldots$ | $\cdots$ | $\cdots$ | $261,430(f)$ |

$$
£ 3,768,843
$$

(a) $£ 298,295$ of this was on fxel deposit in banks at interest, $£ 5,986$ deposited with Colonial Treasurer.
(b) Includes moneys at credit of Mallee Land Account; also includes $£ 300,000$ loan money held for redemption of loans falling due in 1908. £ $£ 03,874$ invested in Government securities.
(c) There is no regular Sinking Fund. When a surplas of revenue occurs in any year the amount is paid over to the credit of the Public Debt Reduction Fund Trustees.
(d) After providing for $£ 27,500$, loans redeemable on 1st July, 1907 .
(e) At 31 st March, 1907 . With the exception of $£ 24,100$ cash, this was invested in Govermment Securities. Includes moneys and securities held on account of Agricultural Bank Act and Agricultural Lands Purchase Act.
( $f$ ) This is wholly invested in Government Securities.
A valuation of the Transferred Properties referred to in Proposal Transferred No. 14, is in progress, and is expected to be completed shortly.

The Hon. Thomas Bent, Premier and Treasurer of Victoria, submitted a scheme as follows:-

In the matter of the financial relations of the Commonwealth and the States, I propose with regard to-

## a.--The Braddon Clause.

I. That in lieu of the present manner of payment the Commonwealth shall pay over annually a lump sum to the States.
2. That the lump sum shall be $£ 7,000,000$ per annum.
3. That this sum shall be apportioned-

The first year-In accordance with the ratio to be obtained from the average payments to each State during the last three years.
The second year-4 per cent. on a population basis, and the balance on the ratio established, and
For the following years the amount to be apportioned on a population basis to increase at the rate of 4 per cent. per annum.
I recognise that with the growth of population (naturally and by immigration) the Commonwealth revenue will undoubtedly increase fairly rapidly, and the Commonwealth will have at its disposal a sum larger than its requirements. Being fully convinced of this fact, I have given consideration to a proposal for placing additional financial responsibilities upon the Commonwealth, and, with that end in view, I submit to this Conference the following scheme for the gradual transfer to the Commonwealth of the States' liabilities in connexion with their present Outstanding Loans.

> B.-State Debts.

I propose -
r. That the control of the present outstanding Loans of the States be placed in the hands of the Commonwealth as from the first January, igog, and that the management be vested in Public Debt Commissioners.
2. That the Commonwealth shall issue Redemption Loans at 3 per cent. to take up the present State Loans as they mature.
3. That the States shall pay interest at the rate of 3 per cent. on so much of the Redemption Loans as would be equal to the amount of the matured Loans.
4. That the Commonwealth shall pay the interest (3 per cent.) on any increase of debt arising from the redemption operations.
5. That the Commonwealth shall pay towards a Sinking Fund an annual contribution of $\frac{1}{4}$ per cent. on the total of the Redemption Loans' liability.
6. That this Sinking Fund shall be invested in the Redemp. tion Loan issues.
7. That the Sinking Fund investments shall be considered as taking up that portion of the Redemption Loans upon which the States are required to pay interest (See 3 above).
8. That the interest accruing from the investments of the Sinking Fund shall be credited to the Sinking Fund.
9. That the Commonwealth shall recoup the States generally an amount equivalent to 3 per cent. per annum on the total securities (i.e., Redemption Stock) held by the Sinking Fund, and the amount so recouped be distributed among the States on a population basis.

In regard to this clause (9) I would point out that it has been inserted with the purpose of gradually relieving the States of their annual interest charge, instead of only receiving that benefit in a lump sum when the whole of the present loans are redeemed by the Sinking Fund. It will, of course, be understood that the payment by the State (for interest) and to the State (recoup) shall cease as soon as the State is entitled to receive as recoup a sum equal to its annual interest payment on Redemption Loans issued to take up present debts,

Further, in respect to payments made to the States and on behalf of the States as set out in the terms of "A" and " B" above, I would add that it is my opinion that-
c.-Final Adjustment Between the Commonwealth and the States.

The final adjustment between the Commonwealth and the States should be on a basis of a return of five-eighths of the net Customs and Excise revenue. In this revenue I do not include any revenue which may in future years be raised for specific purposes, the whole of which should be retained by the Commonwealth. I only refer to the ordinary revenue, which will increase with the increase of population. Recognising that for some years to come the obligations upon the Commonwealth in connexion with Old-age Pensions and the initiation of a Defence scheme will be very heavy, I have not provided for a return on the five-eighths basis at the outset, but, with a view to the ultimate introduction of this position, I have had prepared a table, which is set out on page xxir., showing the estimated net revenue to be derived each year for the next twenty-two years from Customs and Excise and its apportionment to States on the fiveeighths basis. The footnote on this table shows that, on a scale increasing by $2 \frac{1}{2}$ per cent. each year on the difference between the five-eighths payment and the lump sum, the financial position I advocate would gradually come into force from the year 1925-6.

It will also be seen, from the table on page xxi., that the Commonwealth will only be required to meet the charges as set out under "A" and "B" until the year 1925-6 (that being the first year in which the ascending scale of $2 \frac{1}{2}$ per cent. per annum on the difference will reach more than the total of the obligations imposed upon the Commonwealth under "A" and "B "), when, as I have aiready stated, the five-eighths scale should gradually become operative.

## D.-New State Loans.

With regard to New Loans I propose-
r. That the States shall not be restricted in any way in the matter of new issues.
2. That all new issues on behalf of the States shall be made through the Commonwealth.
3. That for the future the issue of these Loans be confined to the Australian market.
4. That each State shall pay into a Sinking Fund, to be held by the Commonwealth, an annual contribution of $\frac{1}{4}$ per cent. per annum on total amount of New Loan issues.
E.-- Present State Redemption Funds.

To remain in hands of States.
Any present Loan securities held on account of the Redemption Funds to be cancelled prior to the taking over of control of present Loans by the Commonwealth.

## LOANS

## Interpretation of Terms.

" Old Loans" means outstanding Loans of each State at date Commonwealth takes over management of Loans.
"Original Loan" means an "Old Loan"" which has been redeemed by the issue of Commonwealth securities.
" Redemption Loan " means Loan issued by the Commonwealth to take up an "Old Loan" which has matured or is about to mature.
" Renewal Loan Account" means an account in which each State is charged (for the purpose of determining interest) with a proportion of the "Redemption Loans" equal to the amount of its "Original Loans" (i.e., of its loans redeemed).
"Common Debt Account" means an account in which the Commonwealth is charged (for the purpose of determining interest) with so much of the Redemption Loans as is in excess of the "Original Loans" redeemed (i.e., with the increase of debt owing to discount, \&c.).
"New State Loans'" means issues by States following transfer of " Old Loans" to Commonwealth.
"Sinking Fund (Redemption Loans)" means a fund to be established by the Commonwealth for the eventual paying off of " Redemption Loans."
"Sinking Fund (New Loans) " means a fund to be established for the eventual paying off of "New Loans." States to contribute and Commonwealth to hold.
"State to pay Commonwealth" means that Commonwealth shall deduct from any moneys payable to State amounts required to meet demands for "Old Loans," interest, and management, and for " New Loans," Interest, and Sinking Fund; when the moneys payable by Commonwealth to State are insufficient to meet such charges the State shall make good the difference.
" Interest Recoup to the States" means that the Commonwealth shall recoup the States an amount equivalent to 3 ner cent. per annum on the total securities (i.c., Redemption I can Stock) held by the Sinking Fund.

## Proposals.

1. Commonwealth to take over the management of the whole of Loans from rst January, 1909.
2. Each State to pay Commonwealth all moneys disbursed on State's account for-

Interest on Old Loans,
Interest on Redemption Loans (Renewal Account proportion), Commission (if any) paid on redemption of "Original Loans," Interest and Sinking Fund on "New Loans."
3. Public Debt Commissioners to be appointed by Commonwealth.
4. Loan Management to be in hands of Public Debt Commissioners, and in the event of any difficulty arising between them and a State or States the matter to be referred to High Court.
5. Redemption Loans to be issued at 3 per cent.-to be redeemed in 40 years or thereafter on 6 months' notice.
6. " Old Loans" "Maturing from time to time to be redeemed by "Redemption Loans."

[^4]7. Interest on Redemption Loans.-
(a) Each State to pay Commonwealth interest (3 per cent.) on amount standing at its debit from time to time in "Renewal Loan Account" (i.e., to pay 3 per cent. on its "Original Loan" amount).
(b) Commonwealth to pay interest (3 per cent.) due from time to time on the Common Debt Account.
(When an "Original Loan" has been redeemed by a "Redemption Loan " the State concerned will thus gain any difference between rate of "Original Loan" and 3 per cent.)
8. Sinking Fund (Redemption Loans) Contributions.-Commonwealth to pay $\frac{1}{4}$ per cent. per annum on total issues for redemption purposes (i.e., on total of "Renewal Loan Account" and "Common Debt Account'' Debits).
9. Sinking Fund (Redemption Loans).-
(a) Sinking Fund to be invested (at earliest possible moment) in "Redemption Loan" Securities at par.
(b) Interest arising from above investment to be credited to Sinking Fund.
(c) The investments to be considered as made in the Renewal Loan Account portion of Redemption Loans (i.e., the portion on which States pay the interest).
ro. Interest Recoup to States.-The Commonwealth shall recoup to States generally an amount equivalent to 3 per cent. per annum on the total securities (i.e. Redemption Loans Stock) held by the Sinking Fund; and the amount so recouped shall be distributed amongst the States on a population basis.

The purpose of this clause is that the States may be gradually relieved (as the Sinking Fund increases) of their annual interest charge, instead of only receiving that benefit when the whole of the present loans are redeemed by the Sinking Fund. It is, of course, understood that the payment by the State (interest) and to the State (Recoup) shall cease as soon as the State is entitled to receive as Recoup a sum equal to its annual interest payment on Redemption Loans issued to take up "Old Loans."
ir. New Loans.-States not to be restricted in any way in the matter of new issues. All new issues to be made by the Commonwealth on behalf of the States. New issues to be confined to the Australian market.
12. Sinking Fund (New Loans).--Each State to pay into a Sinking Fund to be held by the Commonwealth a contribution at the rate of $\frac{1}{4}$ per cent. per annum on total amount of New Loan issues.
13. Present Redemption Funds.-To remain in hands of States. States may apply-

To purchase their own "New Loan" securities.
To payment of contribution to "New Loan" Sinking Fund.
To Capital Works purposes (moneys which may be available, such as Victorian Mallee Fund, from sources other than the specific provision under special appropriation each year).
Annual appropriation by State on account of an "Old Loan" to cease as soon as Commonwealth shall have issued a Redemption Loan therefor.
Any "Old Loan" securities held on account of Redemption Funds to be cancelled prior to the taking over of control of "Old Loans" by the Commonwealth.

Statement showing the Operations with regard to Redemption of Loans (exclusive of 3 per cent. securities which may be deferred) falling due between ist January, 1909, and 3Ist December, ${ }^{1} 928$ (assuming that Redemption Loan Issues are at Prices in Third Column) ; also the Allocation of Interest on the Redemption Loans between the States and the Commonwealth.

Statement showing Estimated Net Revenue from Customs and Excise, 1907-8 to 1928-9, on the per capita basis of the year 1907-8; also the provision for return to the States in subsequent years of the difference between the "Lump Sum" (£7,000,000) and the five-eighths of Revenue on an ascending scale increasing by $2 \frac{1}{2}$ per cent. per annum.

This table does not provide that the States shall participate in any duties imposed by the Commonwealth for special purposes. It is only proposed that the present net per capita charge shall be maintained with increase of population.

* On basis of increase during period 1901-1906.

Norw. - The gradual adjustment of the five-eighths' charger as provided does not become operative till the percentage as shown in last column exceeds the amount payable by the Commonwealth on account of Interest charge on increase of Debt by Redemption, Sinking Fund contributions on Redemption Loans, and Recoup of Interest. When these charges, together with the "Lump Sum" ( $£ 7,000,000$ ) do not exceed the "Lump Sum" plus the annual percentage of the difference as shown in last column, the States will commence to participate in the adjustment. On the inorease of population as above, the adjustment payment will not become operative till 1925-6. The States will not become entitled to the full five-eighths till 1946-47.

Statement showing (a) Annual Saving in Interest following issue of Redemption; Loans by Commonwealth; (b) Annual Amount of Interest recouped to States by Commonwealth. (This amount to be distributed on a population basis.)

Nort.-These amounts are exclusive of New Loans which might be carried by the Interest Recoup

SINKING FUND (REDEMPTION LOANS).

## COMMONWEALTH.

$$
\text { YEAR I go } 7.8 .
$$

Estimate at wist May, Igor-

Lump Sum Proposed is £7,000,000

Which would leave for Commonwealth Purposes $£ 8,356,000$

| The Commonwealth Expenditure for Year will be- |  |
| :---: | :---: |
| Estimates and Additional Estimates | £6,405,000 |
| Less Savings, say ... | 205,000 |
| Less Special Defence (see below) | $\begin{array}{r} 6,200,000 \\ 260,000 \end{array}$ |
| Ordinary Services, (including New Works) | 5,940,000 |
| So that from Total available as above ( $£ 8,356,000$ ) provision could be made for- |  |
| Old-Age Pensions and | 1,500,000 |
| Special Defence | 916,000 |
|  | $\mathcal{L}^{8,356,000}$ |

The above table is supplied for the purpose of showing that the Commonwealth Government, after paying the $£ 7,000,000$, would still have sufficient money for Old-age Pensions, and a substantial sum for Defence purposes.

The following is a summary of the resolutions agreed to by the Conference held in Melbourne in April and May, 1908:-

That this Conference views with apprehension the proposals of the Commonwealth Government embodied in the Memorandum of Sir William Lyne, and is of opinion that they will, if adopted, seriously affect the financial independence and solvency of the States, and further resolves-
r. That, in view of the fact that upon the State Parliaments devolves the duty of developing the resources of their respective States by means of land settlement, railway construction, irrigation, and other public works, and that they are charged with the responsibility of maintaining adequate education and charity systems, and providing for the administration of justice and other services, the financial obligations connected with which will inevitably increase with the growth of population, no financial scheme can be assented to by the States which does not provide for their receiving-
(a) a fixed annual sum; and
(b) a proportionate part of all increases in revenue from Customs and Excise.
2. That, for the purpose of enabling the Federal Government to initiate a general scheme of old-age pensions, the States Governments will be agreeable to accept a smaller proportion of the Customs and Excise
revenue than three-fourths, and thus supplement, if necessary, the amount which can be provided under the Commonwealth. Surplus Revenue Bill.
3. That, no restriction having been placed by the Constitution upon the borrowing powers of the States, and, further, for the reasons set out in Resolution No. I, the States should be the sole judges as to the raising of loans, within or without the Commonwealth, for the purposes of carrying on the work of internal development without interference by the Council of Finance, as proposed in the scheme of the Commonwealth Treasurer, or by any external authority.
4. That the gradual assumption by the Commonwealth of the State Debts may eventually lead to economies, but it would be advisable to allow the settlement of details to stand over until the question of the distribution of the net revenue from duties of Customs and Excise has been determined.
5. That, in the distribution of the amount returnable by the Commonwealth to the States, the per capita contribution of each State to the Customs and Excise Revenue shall be considered and allowed for.
6. That the proposal of the Commonwealth Treasurer to take over the Sinking Funds of the several States without making equitable provision for compensation is objectionable.
7. (a) That, in the event of the Commonwealth taking over the Debts, the total indebtedness of the respective States should be reduced by the sum of the value of the transferred properties (unless settlement for such properties be previously made), and that when the lighthouses, \&c., are taken over by the Commonwealth, the States should be credited for them.
(b) The States urge an early settlement of this longstanding question.
8. That the foregoing Resolutions be submitted to the respective State Parliaments as early as possible.

A paper prepared by Mr. Thos. Greenlees Watson, C.M.G., Clerk of the Legislative Assembly of Victoria, was presented to the Conference:--"Notes on the Financial Problems of the Commonwealth and the States of Australia"-which contains a review of the difficulties which presented themselves to the framers of the Constitution, and the earnest efforts since put forth by the responsible statesmen of Australia to solve them; also extracts from public documents and debates bearing upon the principal points of the problem.

The following statement, which has been taken from the paper, gives the "Basis of the Estimate of Cost of Federation," and a "Comparison of Estimated and Actual Expenditure," particulars which are valuable in a consideration of this important question.

## BASIS OF THE ESTIMATE OF COST OF FEDERATION.

Details of the estimated cost of Federation.
See Leg. Assy. Vict. Papers Presented, Vol. II., Sess. $1897, p$. 1475.

The probable cost of Federation accepted by the Convention was. based on an estimate prepared by the then Treasurer of South Australia (The Hon. Sir F. W. Holder, M.P.), the details of which are as follow:-
i. Probable New Federal Expenditure.

| Governor-General and Establishment | £15,000 |
| :---: | :---: |
| Legislature | 109,700 |
| Executive | 14,000 |
| Civil Establishment (including an Agent-General) | 18,370 |
| Treasury | 12,500 |
| Justice (High Court, \&c.) | 23,715 |
| Public Buildings to be constructed (interest and maintenance) | 52,540 |

| - | Total | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |
| ---: | :--- | ---: | :--- | :--- | ---: |
|  |  | Margin | $\ldots$ | $\ldots$ | $54,8,825$ |

Total Estimated New Expenditure ... £300,000
II.-Probable Expenditure on Services taken over.

Civil Establishment (Census and Statistics) ... £ 15,000
Defence ... ... ... ... ... 750,000
Mint ... ... ... ... ... 45,000

Patents and Bankruptcy ... ... ... 14,950
Post and Telegraph (including possible loss on a
uniform service, $£ 109,000$ ) ... $1,727,000$
Customs ... ... ... ... ... 209,100.
Navigation and Maritime ... ... ... 81,050

Total (including interest on buildings
taken over) ... ... ..
2,842,100
Less revenue expected ... ... I,755,400.
ェ,086,700
Margin ... ... 163,300
Total Estimated Cost of Transferred Services $£ \mathrm{I}, 250,000$
It will be observed that this estimate allowed big margins both on "new" and "transferred" expenditure, and also included interest on cost of new buildings and buildings taken over, and allowed for a large possible loss ( $£, 109, \infty 0$ ) on the uniform postal service.

The actual net expenditure under State control for the year 1899 1900 of the Departments since transferred to the Commonwealth was E.790,019. The gross expenditure of these Departments for $1899-$ I900 was $£ 3,329,888$. For 1900-1901 it was $£ 3,297,694$.

## COMPARISON OF ESTIMATED AND ACTUAL EXPENDITURE.

A comparison between the Convention estimate and the actual Estimated expenditure of the Commonwealth can be made from the following and andentual figures : -compared.
(a) Convention Estimate of Gross Expenditure on-

Transferred Services ... ... $£ 3,005,400$
New or "other" Expenditure ... 300,000
(b) Expenditure of the Commonwealth :- $£ 3,305,400$

[^0]:    a In addition the Commonwealth can apparently take over new loans to be raised by New South Wales for the redemption of certain loans, amounting to $£ 110,410$, which have been paid off since Federation, and charged to General Loan Account.
    $b$ Amount which may apparently be taken over by the Commonwealth being-
    Stock inseribed under the Victorian Municipalities Loans Extension Act
    .. $\quad$ 1,088,402 exchanged for Government Bonds, which could be sold) (These may be

    2,098,326
    £3,186,727

[^1]:    * The additional amount of $£ 110,410$ which can apparently be taken over (see Note to Table A) is equal to $£^{\cdot} 072$ per head.
    $\dagger$ The additional amount of $£ 6,386$ which can apparently be taken over (see Note to Table A) is equal to $£ \cdot 035$ per head.

[^2]:    * Excluding Special Tariff in Western Australia.

[^3]:    * Excluding Special Tariff in Western Australia.

[^4]:    "Old Loans" bearing 3 per cent. to be redeemed at latest date.
    " Old Loans" bearing more than 3 per cent. to be redeemed at earliest date.

[^5]:    * Including cost of Flotation.
