NOTE.

In the preparation of the tables in this Part comprehensive cross-classifications of the varying issues of husbands and wives by age in conjunction with duration of marriage in single years were tabulated for the metropolitan and extra-metropolitan areas of each State, but owing to limitations of space such particulars cannot be published in full detail.

DEFINITIONS.

Husbands and Wives.—Except in Table 1 which includes only those husbands and wives enumerated together at the Census, Husbands and Wives relate to all males and females married at the time of the Census except those permanently separated either legally or otherwise.

Issue relates to the number of children both living and dead (except stillborn) born to the existing marriage and does not include children born to any previous marriage.

Metropolitan Areas relate to the Capital Cities of the States and adjoining urban municipal areas within boundaries used for Census purposes.

Extra-Metropolitan Areas relate to those portions of the States both urban and rural which are not included in the metropolitan areas.
