(a) The collector for South Bourke failed to perform his contract, and therefore the figures of the previous year have been taken to make up the totals for the County of Bourke. The uncompleted portion of that county is unimportant in an agricultural point of view; the holdings consist chiefly of market gardens, and the returns differ but little from year to year.

(a) See foot note to Return of "Land Occupied and Cultivated" ante.

NOTE.—The number of vines in this table, and the acreage under that crop in the table of "Land Occupied and Cultivated" ante, are for the year ending 31st March, 1868; but the quantity of grapes gathered, and of wine and brandy made, as shown in this table, are for the previous season. The vintage comes in too late to admit of its being returned when the Agricultural Statistics are collected.

NOTE.—This return contains a statement of all the live stock kept upon stations, without distinction as to the numbers running upon Crown or those upon alienated land. It has been compiled for the most part from statements voluntarily furnished by the squatters in reply to enquiries from the Registrar-General's department. In cases where the enquiries were not responded to, the figures have been supplied from other sources.

WILLIAM HENRY ARCHER, Registrar-General.

NOTE.—The returns of milch cows for the three years marked with asterisks refer only to those on alienated land. The milch cows kept on stations were not returned separately from the other stock until 1862; consequently, until then, the total quantity of milch cows could not be ascertained. The pigs kept on stations, except those with purchased land attached, were not returned until 1862.

WILLIAM HENRY ARCHER, Registrar-General.

NOTE.—This table gives an account of all the stock slaughtered in the colony, so far as returns thereof are furnished to the Chief Commissioner of Police and the Registrar-General. Notwithstanding that pains are taken to make the statement as complete as possible, there is reason to fear that, in some localities, stock is slaughtered for private use without any official record being kept of the numbers.

NOTE.—The actual number of patents applied for and granted during the foregoing period is 1,097. A discrepancy between this number and that of the classified list above has proved unavoidable, since many of the inventions for which patents have been granted are available for more than one purpose, and consequently had to be placed under more than one heading.

QUARTZ REEFS AND EXTENT OF GOLD WORKINGS.

RETURN of the Number of distinct Quartz Reefs actually proved to be Auriferous, and the Total Extent in Square Miles of Auriferous Alluvial and Quartz Ground actually worked upon, in the several Mining Districts, during the Year 1867.

Mining Districts.	Number of distinct Quartz Reefs proved to be Auriferous.	Extent in Square Miles of Auriferous Alluvial and Quartz Ground worked upon.

Ararat District ...	51	64½
Gippsland District	414	99
Total	2,381	868½

NOTE.—The number of distinct quartz reefs cannot be strictly correct, as parts of the same reef, in some localities, are held to be distinct reefs, and named accordingly. As the reefs are further explored it is found, too, that what were supposed to be separate reefs are not really distinct.

AVERAGE YIELD OF AURIFEROUS QUARTZ.

Total	948,850½	498,677	12	0	10	12·2

NOTE.—The above table does not show the total quantity of quartz crushed in the several localities, but only the yield of certain "crushings" respecting which the Mining Surveyors and Registrars have been able to obtain information. Owing to the circumstance that many of the machine-owners are unable to give or are precluded from giving information, it is impossible to get complete returns from every district, and in considering the relative importance of each district, as regards quartz mining, the tables relating to machinery should be examined and compared.

Since the first publication of the statistics, information has been obtained concerning 4,925,440½ tons which have been crushed, which yielded an average of 11 dwts. 16¼ grs. per ton.

PRODUCE OF GOLD FROM QUARTZ VEINS AND ALLUVIAL WORKINGS.

RETURN showing approximately the Gold obtained from Quartz Veins and Alluvial Workings during the Year 1867.

From Quartz Veins	560,527
From Alluvial Workings	873,160 ⁸ / ₂₀
Total Gold Exported	1,433,687⁶/₂₀

NOTE.—The above results are but rough approximations. The Mining Surveyors and Registrars can furnish only estimates based on information afforded by the banks and gold-buyers, and on their own knowledge of the character of the workings in their districts. The check on the returns—and not a sufficient one—is that afforded by the returns of quartz and quartz tailings crushed, which, however, cannot, and do not, comprise information respecting all the vein-stuff put through the mills.

NOTE.—The quantity of gunpowder on hand in the Ballarat District at the commencement of the year was as above stated, and not 13 tons 2 cwt. 1 qr. 20 lbs., as shown in the *Mineral Statistics* for 1866. The difference arises from the Keeper of the Magazine at Creswick having included ammunition in his returns of gunpowder received during the year 1866.

R. BROUGH SMYTH, Secretary for Mines.

By Authority: JOHN FERRIS, Government Printer, Melbourne.
