(a) This column presents a statement of the average numbers attending at one service only on the Sunday, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connection with some religious bodies, there are several services held on the same Sunday, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.

WILLIAM HENRY ARCHER, Registrar-General.

NOTE.—As regards some of the denominations, the year 1859 shows an apparent falling off in the number of buildings used for public worship and in the amount of accommodation provided. This is in consequence of those denominations having for that year given returns only of the regular churches and chapels, and not of the other buildings in which services were held.

WILLIAM HENRY ARCHER, Registrar-General.
