§ 3. Average Weekly Earnings.

Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries, p. 433.—The following table shows for each State and Australia the average weekly total wages and salaries paid, and average weekly earnings per employed male unit, for the year ended June, 1961.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used in each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

,

Average Weekly Earnings Index Numbers, p. 433.—The average weekly wage earnings index numbers for Australia for All Industries and Manufacturing (Base of each series: 1953-54 = 100.0—seasonally adjusted series) for June quarter, 1961 and the year ended June, 1961, were respectively:—All Industries, 141.2, 140.6; Manufacturing, 140.1, 141.0. Revised figures for All Industries for 1958-59 and 1959-60, respectively, were 124.5 and 133.6. No changes were made to the quarterly figures shown.

§ 4. Survey of Wage Rates and Earnings, September, 1960, p. 434.

1. General.—A statistical survey of the wage structure of Australia was undertaken by this Bureau towards the end of 1960. The object of the survey was to obtain information as to marginal rates of wage and actual weekly earnings of adult male employees (excluding part-time and casual employees) for the last pay-period in September, 1960.

The survey was based on returns from a stratified sample of most of the private employers subject to Pay-roll Tax. It did not include governmental or semi-governmental employment. For various reasons (such as paucity of data, seasonal variations in employment, incidence of piece work, part-time and casual employment), it excluded the following:—rural industry; private domestic service; certain businesses such as accountants, trade associations, consultant engineers, etc.; the shipping and stevedoring industry; and the motion picture industry. Religious, benevolent and other similar bodies, exempt from Pay-roll Tax. were also excluded.

Appendix. 1215

Employers were asked to show separate particulars in respect of employees covered by Commonwealth awards and by State awards, and of those not covered by any award. Completed returns were received from more than 3,000 employers, representing a response rate of about 90 per cent. of those approached. The sample, being stratified, provided a representative basis upon which to estimate marginal rates of wage and earnings by industrial groups for the (approximately) 1,105,000 adult male employees within the selected field. (see above). These were cross-classified to show the number of employees in size groups by industry and jurisdiction in respect of marginal rates and in size groups by industry in respect of earnings.

Definitions relevant to the survey are as follows:-

- (a) Number of employees refers to adult male employees on the pay-roll on the last pay-day in September, 1960, and includes employees who, although under 21 years of age, were paid at the adult rate prescribed in the appropriate award. Part-time and casual employees and those absent in the defence forces were excluded.
- (b) The term awards, as used herein, denotes awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals. Employees whose rates of pay and working conditions were not regulated by awards, and employees covered by formal, though unregistered, agreements between employee organizations and employers, are shown as "not covered by awards".
- (c) Margins are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors. For the purposes of this survey the following were not included in margins:-special allowances prescribed in awards, such as shift, dirt, and height money, leading hand allowances, etc.; and other payments such as commission, payments above the minimum rate for contract and piece work, etc. (see paragraphs 1 (e) and 1 (g) below and also § 6. Wage Margins, p. 454). In the case of contract work, etc., the margin was determined by the minimum amount prescribed in the award for the class of work performed. Where the marginal rate of wage for an occupation was not specified in an award, the margin was assumed to be the difference between the total minimum prescribed rate of wage for the occupation and the appropriate Commonwealth or State basic wage. For employees not covered by awards, and whose margins were not specified in unregistered agreements, the margin was assumed to be the difference between the appropriate basic wage in the State jurisdiction and the agreed rate of pay for a standard working week (or the weekly equivalent of the agreed rate).
- (d) Total Weekly Earnings include ordinary time earnings at award rates (and, for employees not covered by awards, payments at agreed rates for a standard working week), overtime earnings and all other payments. Annual or other periodical bonuses were included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings for one week was included.
- (e) Ordinary Time Earnings at Award Rates represent the total weekly payment to adult male employees (excluding part-time and casual employees) for hours of work paid for up to the standard or award hours, calculated at award rates of pay. It includes payments for sick leave, proportion of annual leave, special allowances prescribed in awards, etc. (see sub. para. (c) above). For employees not covered by awards, it includes payments at agreed rates for a standard working week.
- (f) Overtime Earnings represent the total weekly payment to adult male employees (excluding part-time and casual employees) for time worked in excess of award or agreed hours.

- (g) Other Earnings include all payments other than those in paragraphs (e) and (f) above, such as commission, payments above the minimum rate for contract work, incentive scheme, piece-work and profit-sharing scheme payments, proportion of annual or other periodical bonuses, points system payments, attendance or good time-keeping bonuses, etc. (see sub. para. (c) above).
- 2. Marginal Rates of Wage.—(i) Industrial Groups. In the following table, adult male employees in each of the main industrial groups are classified according to weekly margin above the basic wage.

§ 5. Basic Wages in Australia.

Basic Wage Inquiry, 1961, p. 447.—In this case, two applications to vary the Metal Trades Award were before the Commission. In the first, the employers sought to increase the number of ordinary working hours per week from 40 to 42, with a concomitant increase in weekly wages by an amount equivalent to two hours pay at ordinary rates, and to effect certain other consequential variations. In the second, the unions applied for an increase in the basic wage on a six capital cities basis by the amount of 49s. (which was amended during the hearing to 52s.) and for the re-introduction of automatic quarterly adjustments based on the "C" Series Retail Price Index. The amount claimed represented 27s. (30s.) for cost of living increases since 1953 and 22s. to reflect increases in productivity since that time.

The inquiry opened on 14th February, 1961, before Kirby C.J., Ashburner and Moore JJ., and the judgment was delivered on 4th July, 1961.

The following is an extract from a statement made by Kirby C.J. on 4th July, 1961:-

"The members of the bench have reached unanimous decisions which, with the reasons for the decisions, are published in the judgment which is now handed down.

Decisions—

- The employers' claim for an increase in the standard hours of work from forty to forty-two with a concomitant increase in the weekly wage equivalent to two hour's pay at ordinary rates is refused.
- The unions' claim for restoration of automatic quarterly adjustments is refused.
- 3. The basic wages of adult male employees covered by federal awards will be increased by a uniform amount of 12s, per week.
- 4. The new rates will come into effect from the beginning of the first pay-period commencing on or after 7th July instant subject to special cases.
- 5. For the specific reasons set out in the judgment we consider that in February next the only issue in regard to the basic wage should be why the money wages fixed as a result of our decision should not be adjusted in accordance with any change in the Consumer Price Index, and for the purpose of deciding that issue the Order giving effect to the decisions hereby announced will also provide for the adjournment of the application of the unions for increase of the basic wages under the Metal Trades Award to Tuesday, 19th February, 1962, in Melbourne, when such submissions thereon as are desired to be made will be heard.
- 6. The decision regarding increases in basic wages is applicable to all the applications which have been ordered by the Commission to be joined for hearing and decision with the original application and those joined applications are stood over to a date after 19th February, 1962, to be fixed by the Commission."

In the Metal Trades Award and in federal awards generally, the basic wage for adult females was increased by 9s. a week. Proportionate increases for juniors and apprentices were also granted.

5

The effect of the decision in para. 5 above was set out in more detail in the reasons for judgment. After giving reasons why it was not prepared to restore the system of automatic quarterly adjustments and for its preference for the Consumer Price Index over the "C" Series Index, the Commission made the following statement:—

"We consider it desirable that the application of the Consumer Price Index should always be subject to control by the Commission and that the Commission should be able to decide whether a particular increase or decrease in the figures as disclosed in the Consumer Price Index should be applied to the basic wage. Our present opinion is

1220 Appendix.

that this consideration of prices should take place annually. We will each year make the assumption that the effect of movements in the Consumer Price Index should be reflected in the basic wage unless we are persuaded to the contrary by those seeking to oppose the change. As the basis of our decision is the desirability of maintaining the value of the real wage based on the concept of national capacity, the appropriate matter for consideration would appear to be what should be the effect on the six capital cities basic wage of movements in the six capital cities index. The resulting figure will be applied to all federal basic wages.

Since such a consideration of price movements is to take place annually the question remains whether the Commission should at the annual hearing continue to review all factors in the economy to decide whether or not to change the level of the real basic wage. It seems to us that once the question of prices is dealt with otherwise a review of the economy generally and in particular of productivity increases could more properly take place at longer periods of time, say, every three or four years."

⁽a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications, (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

LIST OF SPECIAL ARTICLES AND MISCELLANEOUS MATTER CONTAINED IN PREVIOUS ISSUES.

This list refers to special articles and other more or less important miscellaneous matter which have appeared in previous issues of the Official Year Book, but which are not included, or are included in abbreviated form only, in the present issue. The list is, in the main, restricted to articles, etc., to which references are not given in the various chapters of this issue.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.
