## PREFACE.

---

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, "to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . . . Census and statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the forty-eighth Official Year Book issued under the authority of the Commonwealth Government.

The Synopsis on pp. xi to xxxii following shows the general arrangement of the work. The special index (preceding the General Index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, owing to limitations of space, have been omitted or abbreviated in the present volume. Where, in the General Index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Among the new matter included and existing matter revised or rearranged in this volume, the following items may be especially mentioned.

Chapter VI.—Manufacturing Industry. Transfer of sections from Chapter XXX.—Miscellaneous—The Standards Association of Australia (pp. 156–7); Industrial Design Council of Australia (p. 157).

Chapter XII.—Labour, Wages and Prices. New section relating to Annual Leave and Long Service Leave (p. 445).

Chapter XIV.—Transport and Communication. Transfer of sections from Chapter XXX.—Miscellaneous—Australian Shipbuilding Board (p. 514); Road Safety Organizations (pp. 553–4). New sections on the Australian Stevedoring Industry Authority (p. 514); International Air Agreements between Australia and other countries (pp. 555–6).

Chapter XV.—Education and Research. The scope of the former Chapter on Education has been widened to include research, and certain sections were transferred from Chapter XXX.—Miscellaneous—Film Censorship Board (p. 626); Australian National Film Board and the Film Division (pp. 627–8); Commonwealth Scientific and Industrial Research Organization (pp. 628–30); Mount Stromlo Observatory (pp. 630–1); Australian Atomic Energy Commission (pp. 631–3).

Chapter XVII.—Public Health. New section giving particulars of Private Hospitals (pp. 694–5).

Chapter XX.—Private Finance. Revised and enlarged section dealing with Instalment Credit for Retail Sales (pp. 809–11); new section relating to Unit Trusts, Land Trusts and Mutual Funds (p. 814).

Chapter XXVII.—Mineral Industry. Special article contributed by the Bureau of Mineral Resources, Geology and Geophysics, dealing with Oil Exploration in Australia (pp. 1094–8).

Chapter XXXI.—Statistical Organization and Sources of Information. Detailed list of publications issued by the Deputy Commonwealth Statistician in each State (pp. 1163–65).

Appendix.—Summarized results of the 1961 Census of Population dealing with the Characteristics of the Population and of Dwellings at 30th June, 1961.

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

The statistics contained in the majority of the chapters of this volume relate to the years ended June or December, 1961, and the Appendix contains a selection of the more significant data which have become available since the chapters were prepared. As with previous Year Books, the contents of this issue have already been published in separate Parts as the successive chapters or groups of chapters were printed. More detailed statistics on the subjects dealt with in the Year Book are available in the various annual printed reports issued by this Bureau. (For particulars of Year Book Parts and Annual Statistical Reports see Price List of Publications at the end of this volume.) Official Year Books published by the Deputy Commonwealth Statisticians in New South Wales, Victoria, Queensland and Western Australia provide detailed information for their respective States.

The most recent statistics published by this Bureau are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in the other publications issued monthly, quarterly, half-yearly, or yearly, which are listed in § 2, Statistical Publications of Australia, Chapter XXXI.—Statistical Organization and Sources of Information, which contains also a complete list of the publications issued by the Bureau of Census and Statistics in each State.

This Preface is the first since Year Book No. 38, 1951, which has not borne the signature of my immediate predecessor, Mr. S. R. Carver. Except for two periods between 1946 and 1951, Mr. (now Sir Stanley) Carver occupied the position of Commonwealth Statistician, initially in an acting capacity, since 2nd December, 1940. He held office during a period which included years of war and years of post-war readjustment. It was a period of great development in Australian official statistics, and constituted a phase which culminated in the integration of the Commonwealth and State statistical services. This achievement stands as a monument to Sir Stanley Carver, since it was largely through his ceaseless and untiring efforts that what was first thought of only as an ideal was finally realized. Much of the work involved in this development had to be performed with insufficient resources. In consequence, severe strain was imposed on the staff of the Bureau, and on none more than its chief. Throughout this period of strain, in face of continued and urgent demands for more and better statistics, Sir Stanley Carver never compromised with his statistical principles; his insistence that the results of any new statistic should always be in keeping with his own rigorous standards did much to keep those standards alive at a time when any relaxing of them would have had the most adverse effects for years to come. To Sir Stanley the integrity of statistics was his lode-star, and although he has now gone from the Bureau, his presence will remain in the precepts he inculcated.

My thanks are tendered to the Statisticians in each State, who have collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information.

I also desire to express my keen appreciation of the valuable work performed by Mr. J. M. Jones, B.A., Editor of Publications, Mr. E. H. Harry, B.A., B.Com., Mr. W. H. D. Morris, B.Com. and Mr. J. L. Melhuish, B.A., Assistant Editors, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several Branches of the Commonwealth Bureau of Census and Statistics upon whom has devolved the duty of revising the chapters relative to their respective Branches, and by the Government Printer and his staff in printing this Year Book and in assisting and advising throughout its preparation.

K. M. ARCHER,  
Commonwealth Statistician.

# SYNOPSIS.

## CHAPTER I.—DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

	PAGE		PAGE
§ 1. Early Knowledge and Discovery of Australia—		§ 5. The Establishment of the Commonwealth of Australia—	
1. Introduction .. .. .	1	1. General .. .. .	5
2. Terra Australis .. .. .	1	2. Transfer of the Northern Territory to the Commonwealth .. .. .	5
3. Discovery of Australia .. .. .	1	3. Transfer of the Australian Capital Territory to the Commonwealth .. .. .	5
4. Discoveries by the English .. .. .	2	4. Present Composition of the Commonwealth .. .. .	5
§ 2. The Annexation of Australia—		§ 6. The Constitutions of the States and of the Commonwealth—	
1. Annexation of the Eastern Part of Australia, 1770 .. .. .	2	1. General .. .. .	6
2. Original Extent of New South Wales .. .. .	2	2. Commonwealth Constitution Act .. .. .	6
3. Extension of New South Wales Westward, 1825 .. .. .	3	§ 7. The External Territories of Australia—	
4. Annexation of Western Australia, 1827 .. .. .	3	1. Transfer of Norfolk Island .. .. .	23
§ 3. The Exploration of Australia .. .. .	3	2. Transfer of British New Guinea or Papua .. .. .	23
§ 4. The Creation of the Several Colonies—		3. Territory of New Guinea .. .. .	23
1. New South Wales .. .. .	3	4. Nauru .. .. .	24
2. Tasmania .. .. .	4	5. Australian Antarctic Territory .. .. .	24
3. Western Australia .. .. .	4	6. Territory of Heard and McDonald Islands .. .. .	24
4. South Australia .. .. .	4	7. Territory of Cocos (Keeling) Islands .. .. .	24
5. New Zealand .. .. .	4	8. Territory of Christmas Island .. .. .	24
6. Victoria .. .. .	4		
7. Queensland .. .. .	4		

## CHAPTER II.—PHYSIOGRAPHY.

§ 1. General Description of Australia—		§ 2. Climate and Meteorology of Australia—	
1. Geographical Position .. .. .	25	<i>continued.</i>	
2. Area of Australia compared with Areas of other Countries .. .. .	25	4. Evaporation .. .. .	45
3. Areas of States and Territories, Coastal Configuration and Standard Times .. .. .	27	5. Rainfall .. .. .	45
4. Geographical Features of Australia .. .. .	27	6. Remarkable Falls of Rain .. .. .	49
5. Fauna, Flora, Geology and Seismology of Australia .. .. .	29	7. Snowfall .. .. .	50
§ 2. Climate and Meteorology of Australia—		8. Hail .. .. .	50
1. Introductory .. .. .	29	9. Droughts .. .. .	51
2. Temperature .. .. .	29	10. Barometric Pressures .. .. .	51
3. Humidity .. .. .	32	11. Wind .. .. .	51
		12. Influences affecting Australian Climate .. .. .	52
		13. Rainfall and Temperatures, Various Cities .. .. .	52
		14. Climatological Tables .. .. .	52

## CHAPTER III.—GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government—		§ 2. Parliaments and Elections—	
1. General .. .. .	61	<i>continued.</i>	
2. The Sovereign .. .. .	61	9. Superannuation Funds of the Parliaments of the Commonwealth and of the Australian States .. .. .	72
3. Powers and Functions of the Governor-General and of the State Governors .. .. .	62	§ 3. Administration and Legislation—	
4. The Cabinet and Executive Government .. .. .	63	1. The Commonwealth Parliaments .. .. .	72
5. Number and Salary of Members of the Legislatures, Australian Parliaments .. .. .	64	2. Governors-General and Commonwealth Ministries .. .. .	73
6. Enactments of the Parliaments .. .. .	65	3. Governors and State Ministers .. .. .	76
§ 2. Parliaments and Elections—		4. Leaders of the Opposition, Commonwealth and State Parliaments .. .. .	78
1. Commonwealth .. .. .	65	5. The Course of Legislation .. .. .	78
2. State Elections .. .. .	68	6. Legislation during 1960 and 1961 .. .. .	78
3. The Parliament of New South Wales .. .. .	69	§ 4. Commonwealth Government Departments .. .. .	86
4. " " " Victoria .. .. .	70	§ 5. Cost of Parliamentary Government .. .. .	86
5. " " " Queensland .. .. .	70	§ 6. Government Employees .. .. .	88
6. " " " South Australia .. .. .	71		
7. " " " Western Australia .. .. .	71		
8. The Parliament of Tasmania .. .. .	72		

## CHAPTER IV.—LAND TENURE AND SETTLEMENT.

	PAGE		PAGE
§ 1. Introduction .. ..	89	§ 7. Closer Settlement—	
1.2. Free Grants and Reservations—		1. General .. ..	96
1-7. States and Northern Territory	89-90	2-7. States .. ..	96
8. Summary .. ..	91	§ 8. Settlement of Returned Service Personnel—	
§ 3. Unconditional Purchases of Freehold—		1. War Service Land Settlement

1-6. States and Territories .. ..	93-4	sion—Total Expenditure .. ..	99
9. Summary .. ..	94	§ 9. Advances to Settlers—	
§ 6. Leases and Licences under Mining Acts—		1. General .. ..	99
1-7. States and Northern Territory	94-5	2-8. States and Northern Territory	100-2
8. Summary .. ..	95	9. Summary of Advances .. ..	102
		§ 10. Alienation and Occupation of Crown Lands—	
		1. General .. ..	103
		2-9. States and Territories .. ..	103-6
		10. Summary .. ..	106

## CHAPTER V.—THE TERRITORIES OF AUSTRALIA.

## THE NORTHERN TERRITORY.

§ 1. Area and Population—	
1. Area .. ..	107
2. Population .. ..	107
§ 2. Legislation and Administration .. ..	107
§ 3. Physiography—	
1. Tropical Nature of the Country .. ..	108
2. Contour and Physical Characteristics	108
§ 4. Climate, Fauna and Flora—	
1. The Seasons .. ..	108
2. Fauna .. ..	108
3. Flora .. ..	108
§ 5. Production—	
1. Agriculture .. ..	108
2. Pastoral Industry .. ..	109
3. Hides and Skins .. ..	110
4. Mining .. ..	110
5. Forestry .. ..	110
6. Pearl Fisheries .. ..	111
7. Secondary Industries .. ..	111
§ 6. Land Tenure—	
1. General .. ..	111
2. Pastoral, Agricultural, etc., Leases ..	111
3. Mining Leases, etc. .. ..	112
§ 7. Trade, Transport and Communication—	
1. Trade .. ..	113
2. Shipping .. ..	113
3. Air Services .. ..	113
4. Railways .. ..	113
5. Roads .. ..	113
6. Posts, Telegraphs, Telephones and	
Wireless .. ..	114
§ 8. Education—	
1. European .. ..	114
2. Special Aboriginal Schools .. ..	114
3. Theoretical Training of Appren-	
tices .. ..	115

THE NORTHERN TERRITORY—*continued.*

§ 5. Oats—		11. Net Return for Sugar Crop .. ..	936
1. Area, Production and Yield per Acre .. ..	920	12. Exports of Sugar .. ..	937
2. Price of Oats .. ..	921	13. Sugar By-products .. ..	937
3. Value of Oat Crop .. ..	921	14. Sugar Prices .. ..	937
4. Exports .. ..	921	15. Marketing Arrangements .. ..	937
5. Oatmeal, etc. .. ..	921	16. Fruit Industry Sugar Concession Committee and Sugar Rebates .. ..	938
6. World Production .. ..	921	17. Bulk Handling of Sugar .. ..	938
§ 6. Maize—		§ 15. Vineyards—	
1. States Growing Maize .. ..	921	1. Progress of Cultivation .. ..	938
2. Area, Production and Yield per Acre .. ..	921	2. Imports and Exports of Wine .. ..	939
3. Price of Maize .. ..	922	3. Oversea Marketing of Wine .. ..	940
4. Value of Crop .. ..	922	4. Other Viticultural Products .. ..	940
5. Exports of Maize and Maize Products .. ..	923	5. Production and Disposal of Dried Vine Fruit .. ..	940
6. World Production .. ..	923	6. Oversea Marketing of Dried Fruits .. ..	941
§ 7. Barley—		§ 16. Orchards and Fruit-Gardens—	
1. Area, Production and Yield per Acre .. ..	923	1. Area .. ..	941
2. Australian Barley Board .. ..	925	2. Varieties of Crops .. ..	942
3. Prices .. ..	925	3. Principal Fruit Crops .. ..	942
4. Value of Barley Crop .. ..	925	4. Production of Jams and Jellies and Preserved Fruit .. ..	943
5. Exports .. ..	925	5. Consumption of Fruit and Fruit Products .. ..	943
6. Malt .. ..	926	6. Imports and Exports of Fruit .. ..	943
7. World Production .. ..	926	7. Marketing of Apples and Pears .. ..	944
§ 8. Rice .. ..	926	8. Marketing of Canned Fruit .. ..	944
§ 9. Sorghum for Grain .. ..	927	§ 17. Vegetables for Human Consumption—	
§ 10. Potatoes—		1. Area and Production of Fresh Vegetables .. ..	945
1. Area, Production and Yield per Acre .. ..	928	2. Production of Processed Vegetables .. ..	945
2. Gross Value of Potato Crop .. ..	929	3. Imports and Exports of Vegetables .. ..	945
3. Consumption .. ..	929	4. Consumption of Vegetables .. ..	945
4. Marketing .. ..	929	§ 18. Tobacco—	
5. Exports .. ..	929	1. States, Area and Production .. ..	946
§ 11. Onions—		2. The Tobacco Industry .. ..	946
1. Area, Production and Yield per Acre .. ..	929	3. Oversea Trade .. ..	947
2. Gross Value of Onion Crop .. ..	930	§ 19. Hops .. ..	947
3. Consumption .. ..	930		
4. Exports .. ..	930		

CHAPTER XXII.—AGRICULTURAL PRODUCTION—*continued.*

	PAGE		PAGE
§ 20. Flax—		§ 26. Ensilage—	
1. Flax for Fibre .. ..	948	1. Government Assistance .. ..	953
2. Flax for Linseed .. ..	948	2. Quantity Made and Stocks held on Farms .. ..	953
§ 21. Peanuts .. ..	949	§ 27. Agricultural Colleges and Experimental Farms .. ..	954
§ 22. Cotton—		§ 28. Tractors on Rural Holdings .. ..	954
1. General .. ..	949	§ 29. Number and Area of Rural Holdings and Employment Thereon—	
2. Area and Production .. ..	950	1. Number and Area .. ..	955
3. Consumption of Raw Cotton .. ..	950	2. Special Tabulation Relating to Rural Holdings—Classification by Size and Type of Activity .. ..	956
§ 23. Financial Assistance to Primary Producers .. ..	951	3. Employment on Rural Holdings .. ..	956
§ 24. Fertilizers—		4. Salaries and Wages Paid to Employees on Rural Holdings .. ..	957
1. General .. ..	951	5. Persons (of all ages) Residing Permanently on Holdings .. ..	958
2. Imports and Exports .. ..	951		
3. Quantities Used Locally .. ..	952		
4. Local Production .. ..	953		
§ 25. Aerial Agriculture .. ..	953		

## CHAPTER XXIII.—PASTORAL PRODUCTION.

§ 1. Initiation and Growth of the Pastoral Industry—		§ 5. Consumption and Marketing of Meat—	
1. Livestock Numbers .. ..	959	1. Consumption of Meat .. ..	972
2. Carrying Capacity of Pastoral Holdings .. ..	960	2. Marketing of Meat .. ..	972
3. Size Classification of Cattle Herds and Sheep Flocks .. ..	960	§ 6. Wool—	
4. Value of Pastoral Production .. ..	960	1. General .. ..	974
5. Indexes of Quantum and Price of Pastoral Production .. ..	961	2. Clean Yield .. ..	974
§ 2. Horses—		3. Production .. ..	974
1. Distribution throughout Australia .. ..	962	4. Average Weights of Fleeces Shorn .. ..	975
2. Oversea Trade in Horses .. ..	962	5. Wool classified according to Quality .. ..	975
§ 3. Cattle—		6. World Sheep Numbers and Wool Production .. ..	976
1. Objects of Cattle-raising .. ..	962	7. Marketing of Wool .. ..	977
2. Distribution throughout Australia .. ..	962	8. Australian Wool Bureau .. ..	977
3. Classification of Cattle According to Purpose .. ..	963	9. Wool Levy .. ..	978
4. Size Classifications of Cattle Herds .. ..	964	10. Wool Research .. ..	978
5. Comparison with other Countries .. ..	964	11. The Australian Wool Testing Authority .. ..	981
6. Imports and Exports of Cattle .. ..	964	12. Consumption of Wool .. ..	981
7. Cattle Slaughtered .. ..	965	13. Exports of Wool .. ..	982
8. Production of Beef and Veal .. ..	965	14. Stocks of Wool .. ..	984
9. Consumption of Beef and Veal .. ..	965	15. Price .. ..	984
10. Exports of Frozen Beef and Veal .. ..	966	16. Value .. ..	984
11. Research .. ..	967	17. United Kingdom Importation of Wool .. ..	985
§ 4. Sheep—		18. Principal Importing Countries and Sources of Supply .. ..	985
1. Movement in Sheep Numbers in Australia .. ..	967	§ 7. Oversea Trade in Hides and Skins—	
2. Distribution throughout Australia .. ..	968	1. Extent of Trade .. ..	986
3. Classification of Sheep According to Age, Sex and Breed .. ..	968	2. Export of Sheepskins .. ..	986
4. Numbers of Sheep on Rural Holdings .. ..	969	3. Hides .. ..	986
5. Comparison with other Countries .. ..	969	4. Furred Skins .. ..	987
6. Imports and Exports of Sheep .. ..	969	5. Marketing of Hides and Skins .. ..	987
7. Sheep Slaughtered .. ..	970	§ 8. Tallow—	
8. Production of Mutton and Lamb .. ..	970	1. Consumption of Tallow in Factories .. ..	987
9. Consumption of Mutton and Lamb .. ..	970	2. Exports of Tallow .. ..	987
10. Exports of Frozen Mutton and Lamb .. ..	971	3. Marketing of Tallow .. ..	987
		§ 9. Exports of Principal Pastoral Products .. ..	988

## CHAPTER XXIV.—FARMYARD, DAIRY AND BEE PRODUCTS.

	PAGE		PAGE
§ 1. Introduction—		§ 3. Dairy Cattle and Dairy Products—	
1. General .. .. .	989	<i>continued.</i>	
2. Mixed Farming .. .. .	989	15. Average Returns from Butter and	
3. Employment .. .. .	989	Cheese Sold and Assessed Farm	
4. Growth of the Dairying Industry ..	989	Production Costs .. .. .	1001
5. Official Supervision of Dairying		16. Dairy Industry Extension Grant ..	1002
Industry .. .. .	990	17. Dairy Industry Research and Sales	
6. Australian Agricultural Council ..	990	Promotion .. .. .	1003
§ 2. Value of Farmyard, Dairy and Bee Pro-		18. Oversea Trade in Butter, Cheese and	
duction and Indexes of Price and		Milk .. .. .	1003
Quantum of Production—		§ 4. Pigs and Pig Products—	
1. Gross Value of Farmyard, Dairy and		1. Pigs .. .. .	1004
Bee Production .. .. .	990	2. Size of Pig Herds .. .. .	1004
2. Gross, Local and Net Values ..	991	3. Pigs Slaughtered .. .. .	1005
3. Net Value of Production .. .. .	991	4. Pigmeat .. .. .	1005
4. Indexes of Quantum and Price of		5. Bacon and Ham .. .. .	1006
Farmyard, Dairy and Bee Pro-		6. Oversea Trade in Pigs and Pig	
duction .. .. .	991	Products .. .. .	1007
§ 3. Dairy Cattle and Dairy Products—		§ 5. Poultry-Farming—	
1. Dairy Herds .. .. .	992	1. General .. .. .	1007
2. Size of Dairy Herds .. .. .	993	2. Recorded Production and Disposal	
3. Total Milk, Butter and Cheese Pro-		of Eggs .. .. .	1007
duction .. .. .	993	3. Production and Consumption of	
4. Whole Milk .. .. .	994	Eggs .. .. .	1008
5. Factory System .. .. .	995	4. Marketing of Eggs .. .. .	1009
6. Butter Production .. .. .	995	5. Oversea Trade in Poultry Products	1009
7. Cheese Production .. .. .	996	§ 6. Bee-farming—	
8. Production of Preserved Milk Pro-		1. Production of Honey and Bees-wax	1009
ducts .. .. .	997	2. Oversea Trade in Bee Products ..	1010
9. Local Consumption of Butter and		§ 7. Exports of Australian Farmyard, Dairy	
Cheese .. .. .	997	and Bee Products .. .. .	1011
10. Butter and Cheese Equalization		§ 8. Imports of Dairy and Farmyard Products	
Schemes .. .. .	998	into the United Kingdom—	
11. Casein Equalization Scheme ..	999	1. Butter .. .. .	1011
12. Wholesale Price of Butter and		2. Cheese .. .. .	1012
Cheese in Australia .. .. .	999	3. Bacon .. .. .	1012
13. Marketing of Dairy Products ..	999	4. Pork .. .. .	1012
14. Commonwealth Subsidies and Sta-		5. Eggs .. .. .	1012
bilization Plans .. .. .	1000	6. Milk Products .. .. .	1012

## CHAPTER XXV.—FORESTRY.

§ 1. Introduction—		§ 5. Employment in Forestry—	
1. Source of Statistics .. .. .	1013	1. Persons Engaged in Forestry Ac-	
2. Objects of Forestry .. .. .	1013	tivities .. .. .	1022
§ 2. Forestry in Australia—		2. Employment by Forestry Depart-	
1. General Account of Forests and		ments .. .. .	1022
Timbers .. .. .	1014	3. Employment in Milling Operations	1022
2. Extent of Forests .. .. .	1014	§ 6. Forest Administration, and Research—	
3. Persons Engaged .. .. .	1015	1. Forestry Activities of the Common-	
4. Value of Production .. .. .	1016	wealth .. .. .	1022
§ 3. Forested Areas—		2. Forestry Activities of the States ..	1023
1. Forest Reservations .. .. .	1017	3. Private Forestry .. .. .	1024
2. Plantations .. .. .	1017	§ 7. Fire Protection .. .. .	1024
§ 4. Forestry Production—		§ 8. Oversea Trade in Forest Products, Timber	
1. Timber .. .. .	1018	and Timber Products—	
2. Veneers, Plywood, etc. .. .. .	1019	1. Imports .. .. .	1025
3. Hardboard .. .. .	1020	2. Exports .. .. .	1026
4. Wood Pulp and Paper .. .. .	1020		
5. Other .. .. .	1021		

## CHAPTER XXVI.—FISHERIES.

	PAGE		PAGE
§ 1. Introduction—		§ 8. Whaling .. .. .	1040
1. Source of Statistics .. .	1027	§ 9. Inquiries and Research—	
2. Presentation of Fisheries Statistics ..	1027	1. General .. .	1041
§ 2. The Fishing and Whaling Industries—		2. Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography .. .	1042
1. Resources and Fishing Areas .. .	1028	3. Fisheries Division, Department of Primary Industry .. .	1042
2. Persons Engaged .. .	1029	4. Fisheries Development Trust Account .. .	1042
3. Value of Production .. .	1029	5. North Australia Development Committee .. .	1042
§ 3. Fisheries Production—		§ 10. Oversea Trade in Products of Fishing and Whaling—	
1. Summary of Production of Fisheries	1030	1. Imports of Fish .. .	1042
2. Fish .. .	1031	2. Exports of Fish .. .	1043
3. Crustaceans .. .	1033	3. Imports and Exports of Unmanufactured Shell .. .	1044
4. Molluscs (Edible) .. .	1034	4. Imports and Exports of Marine Animal Oils .. .	1044
5. Pearl-shell and Trochus-shell .. .	1035		
§ 4. Marketing and Distribution of Fish ..	1036		
§ 5. Freezing, Processing and By-products—			
1. Freezing .. .	1037		
2. Processing .. .	1037		
3. By-products .. .	1038		
§ 6. Consumption of Fish .. .	1038		
§ 7. Boats and Equipment .. .	1038		

## CHAPTER XXVII.—MINERAL INDUSTRY.

§ 1. Introduction—		§ 6. Copper—	
1. Sources of Statistics .. .	1045	1. Historical .. .	1070
2. Presentation of Mineral Statistics ..	1045	2. Methods of Mining and Treatment ..	1070
3. Occurrences of Minerals .. .	1046	3. Mine Production .. .	1070
4. Mineral Concentrates .. .	1047	4. Smelter and Refinery Production of Copper .. .	1072
§ 2. The Mineral Industry—		5. Production in Principal Countries	1072
1. Persons Engaged .. .	1048	6. Prices .. .	1073
2. Size Classification of Mines and Quarries .. .	1048	7. Employment in Copper-mining Industry .. .	1073
3. Value of Production .. .	1048	§ 7. Tin—	
4. Statistics of the Principal Mining and Quarrying Industries .. .	1050	1. Historical .. .	1073
§ 3. Mineral Production—		2. Present Methods of Mining and Treatment .. .	1073
1. Quantity of Principal Minerals Produced in 1960 .. .	1054	3. Mine Production .. .	1074
2. Quantities of Principal Minerals Produced, Australia .. .	1056	4. Smelter and Refinery Production ..	1074
3. Contents of Metallic Minerals Produced in 1960 .. .	1057	5. Production in Principal Countries	1075
4. Contents of Metallic Minerals Produced in Australia, 1956 to 1960 ..	1058	6. Prices .. .	1075
5. Local Value of Minerals Produced ..	1058	7. Employment in Tin Mining .. .	1075
§ 4. Gold—		§ 8. Iron—	
1. Historical .. .	1059	1. Historical .. .	1075
2. Present Methods of Mining and Treatment .. .	1060	2. Methods of Mining and Treatment ..	1076
3. Mine Production .. .	1061	3. Mine Production of Iron Ore .. .	1076
4. Refinery Production .. .	1062	4. Mine Production of Iron Oxide .. .	1076
5. Changes in Stocks of Gold held in Australia .. .	1063	5. Iron and Steel Production .. .	1081
6. Production in Principal Countries ..	1063	6. Production of Iron and Steel in Principal Countries .. .	1082
7. Prices of Gold .. .	1064	§ 9. Mineral Sands—	
8. Sales of Gold on Oversea Premium Markets .. .	1064	1. Historical .. .	1082
9. Assistance to Gold-Mining Industry	1064	2. Present Methods of Mining and Treatment .. .	1083
10. Employment in Gold Mining .. .	1065	3. Mine Production .. .	1083
§ 5. Lead, Silver and Zinc—		4. Employment in Mineral Sands Mining .. .	1084
1. Historical .. .	1065	§ 10. Aluminium—	
2. Present Methods of Mining and Treatment .. .	1065	1. Mine Production .. .	1084
3. Mine Production .. .	1066	2. Refinery Production .. .	1084
4. Smelter and Refinery Production ..	1068	§ 11. Uranium .. .	1085
5. Production in Principal Countries	1069	§ 12. Other Metallic Minerals—	
6. Prices of Lead, Silver and Zinc ..	1069	1. Tungsten .. .	1085
7. Employment in Lead, Silver and Zinc Mining .. .	1070	2. Manganese .. .	1086
		3. Other .. .	1086

CHAPTER XXVII.—MINERAL INDUSTRY—*continued.*

	PAGE		PAGE
§ 13. Coal—		§ 15. Oil Exploration in Australia—	
1. Historical .. .. .	1086	1. Introduction .. .. .	1094
2. Mine Production of Black Coal ..	1087	2. General .. .. .	1094
3. Mine Production of Brown Coal ..	1089	3. Government Assistance .. .. .	1095
4. Australia's Coal Reserves ..	1089	4. Status of Exploration .. .. .	1096
5. Production in Principal Countries ..	1089	5. Basins .. .. .	1097
6. Consumption of Coal in Australia ..	1090	6. Results .. .. .	1098
7. Exports .. .. .	1091	7. Footage Drilled in Search for Oil ..	1098
8. Value at the Mine in New South Wales .. .. .	1092	§ 16. Sulphur—	
9. Values in New South Wales, United Kingdom and the United States of America .. .. .	1092	1. Mine Production of Sulphur ..	1099
10. Employment in Coal-mines ..	1092	2. Production of Sulphuric Acid ..	1100
11. Production of Black Coal per Man- shift .. .. .	1093	§ 17. Non-metallic Minerals—	
12. Joint Coal Board .. .. .	1094	1. Asbestos .. .. .	1101
§ 14. Coke and Other By-products from Coal—		2. Clays .. .. .	1101
1. Coke .. .. .	1094	3. Gypsum .. .. .	1101
2. Other By-products from Coal ..	1094	4. Limestone .. .. .	1102
		5. Magnesite .. .. .	1102
		6. Mica .. .. .	1102
		7. Salt .. .. .	1103
		8. Other Non-metallic Minerals ..	1103
		§ 18. Oversea Trade in Minerals and Mineral Products .. .. .	1104
		§ 19. Government Aid to Mining, and Mineral Control—	
		1. Aid to Mining .. .. .	1106
		2. Controls of Minerals and Metals ..	1108

## CHAPTER XXVIII.—DEFENCE.

§ 1. Department of Defence—		§ 3. Military Defence—	
1. Functions and Organization ..	1109	1. State Systems .. .. .	1114
2. Basis of Current Defence Policy ..	1110	2. Commonwealth Systems .. .. .	1115
3. The Defence Programme .. .. .	1110	§ 4. Air Defence—	
4. Australian Forces Serving in Malaya	1111	1. General .. .. .	1118
§ 2. Naval Defence—		2. Administration and Organization ..	1118
1. Administration .. .. .	1112	3. Aircraft .. .. .	1118
2. Historical .. .. .	1112	4. Establishment .. .. .	1119
3. Link with the Royal Navy .. .. .	1112	5. Strength of Royal Australian Air Force .. .. .	1119
4. The Australia Naval Station ..	1112	6. Women's Royal Australian Air Force .. .. .	1119
5. Strength of H.M.A. Fleet .. .. .	1112	7. Operations in Korea and Malaya ..	1119
6. Ship's Service Outside Australian Waters .. .. .	1112	§ 5. War Gratuities .. .. .	1119
7. Personnel .. .. .	1112	§ 6. Department of Supply—	
8. Women's Royal Australian Naval Service .. .. .	1113	1. General .. .. .	1119
9. Reserve Training .. .. .	1113	2. Functions of the Department ..	1119
10. Papua and New Guinea Division of the Royal Australian Navy .. .. .	1113	3. Act Administered .. .. .	1120
11. Fleet Air Arm .. .. .	1113	4. Research and Development Branch ..	1120
12. Ship Construction and Repair ..	1113	5. Production .. .. .	1121
13. Naval College .. .. .	1113	6. Contract Board .. .. .	1123
14. Training Establishments .. .. .	1113	7. Defence Supply Planning .. .. .	1123
15. Ships of the Royal Australian Navy	1114	8. Stores and Transport Branch ..	1124
		9. Finance Branch .. .. .	1124

## CHAPTER XXIX.—REPATRIATION.

§ 1. General .. .. .	1125	§ 4. Medical Treatment of Ex-Servicemen Suffering from War Service Dis- abilities .. .. .	1133
§ 2. War Pensions—		§ 5. General Benefits and Miscellaneous—	
1. General .. .. .	1125	1. Other Departmental Activities ..	1134
2. Appeals Tribunals .. .. .	1127	2. Expenditure by the Repatriation Department .. .. .	1134
3. Summary of War Pensions, 1960–61	1127	3. Settlement of Returned Service Personnel on the Land .. .. .	1135
4. Classes of War Pensions, Australia	1128	4. The Services Canteens Trust Fund	1135
5. Number of War Pensioners and Annual Liability, States, etc. ..	1128	§ 6. Seamen's War Pensions and Allowances ..	1136
6. Summary of War Pensions .. .. .	1130		
§ 3. Service Pensions—			
1. General .. .. .	1131		
2. Rate of Pension .. .. .	1131		
3. Operations .. .. .	1132		
4. Number of Service Pensioners and Amount Paid .. .. .	1132		

## CHAPTER XXX.—MISCELLANEOUS.

PAGE	PAGE
§ 1. Valuation of Australian Production—	§ 5. Copyright—
1. General .. .. .1137	1. Legislation .. .. .1148
2. Value of Production, Australia ..1138	2. Applications and Registrations ..1148
3. Net Value of Production, States ..1138	§ 6. The United Nations—
4. Net Value of Production, Australia1139	1. General .. .. .1149
§ 2. Indexes of Production—	2. General Assembly .. ..1149
1. Farm Production Price Indexes ..1140	3. The Security Council .. ..1149
2. Indexes of Quantum of Farm Production .. ..1141	4. The Economic and Social Council ..1150
3. Farm Products for Food Use: Indexes of Quantum of Production, Exports and Consumption ..1141	5. The Trusteeship Council .. ..1150
§ 3. Consumption of Foodstuffs and Beverages—	6. The International Court of Justice ..1150
1. Quantities Consumed .. ..1142	7. The Secretariat .. .. .1150
2. Level of Nutrient Intake .. ..1146	8. Specialized Agencies .. ..1151
§ 4. Patents, Trade Marks and Designs—	§ 7. Australian Representation Abroad: Oversea Representation in Australia—
1. Patents .. .. .1147	1. General .. .. .1151
2. Trade Marks and Designs .. ..1147	2. Australian Representation Overseas1151
3. Revenue .. .. .1148	3. Oversea Representation in Australia1153
	§ 8. Retail Trade—
	1. General .. .. .1155
	2. Value of Retail Sales in Each Commodity Group, Australia ..1155
	3. Census of Retail Establishments ..1156

## CHAPTER XXXI.—STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

§ 1. Statistical Organization in Australia—	§ 2. Statistical Publications of Australia—
1. Early Development of Australian Statistics .. .. .1157	1. General .. .. .1160
2. Creation of the Commonwealth Bureau of Census and Statistics ..1157	2. Commonwealth Publications ..1160
3. Integration of Statistical Services ..1157	3. State Publications .. ..1163
4. Scope of the Commonwealth Bureau of Census and Statistics ..1158	§ 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951 ..1165
5. Relation of the Bureau to other Commonwealth Departments ..1160	§ 4. Select List of Australian Books .. ..1166

## DIARY OF PRINCIPAL ECONOMIC EVENTS, 1958-59 TO 1961-62 (p. 1188).

## CHRONOLOGICAL TABLE OF CHIEF EVENTS, 1788 TO 1962 (p. 1201).

## STATISTICAL SUMMARY, 1891-92 TO 1961-62 (p. 1212).

## APPENDIX.

Chapter II.—Physiography—	Chapter IX.—Population—
§ 2. Climate and Meteorology of Australia— Rainfall: Australian Capital Cities ..1216	§ 2. The Census— Population Recorded at Censuses ..1218
Chapter III.—General Government—	§ 3. Growth and Distribution of Population—
§ 2. Parliaments and Elections— Commonwealth Parliaments and Elections .. .. .1216 State Elections .. .. .1216	1. Growth of Population .. ..1218
§ 3. Administration and Legislation— Administrators .. .. .1216 Commonwealth Ministers ..1216 Governors and State Ministers ..1216	4. Urban and Rural Distribution ..1219
§ 5. Cost of Parliamentary Government ..1217	7. Urban Areas Outside Metropolitan Areas .. .. .1220
Chapter VI.—Manufacturing Industry—	§ 4. Mean Population—
Summary .. .. .1217	3. Mean Population .. .. .1218
Value of Production in Classes of Industry .. .. .1217	§ 7. General Characteristics—
	2. Age Distribution .. .. .1221
	3. Other General Characteristics ..1221
	§ 14. The Aboriginal Population of Australia .. .. .1226
	Chapter XI.—Housing and Building—
	§ 1. Census Dwellings—
	2. Number of Dwellings .. ..1226
	3. Class of Dwellings .. ..1226
	5. Occupied Private Dwellings ..1227

**OFFICIAL YEAR BOOK**  
OF THE  
**COMMONWEALTH OF AUSTRALIA.**

**CHAPTER I.**

**DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.**

**§ 1. Early Knowledge and Discovery of Australia.**

1. **Introduction.**—The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Official Year Book No. 39 (see p. 1) and earlier issues.

2. **Terra Australis.**—There was, apparently, an early Chaldean tradition as to the existence of an Austral land to the south of India and rumours to that effect found their way in the course of time to Europe. References to this *Terra Australis* are found in the works of Ælianus (A.D. 205–234), Manilius (probably a contemporary of Augustus or Tiberius Caesar), and Ptolemy (A.D. 107–161). Evidence pointing to knowledge of such a land appeared in maps and manuscripts of the Middle Ages and the fourteenth and fifteenth centuries but there is no definite evidence connecting this so-called *Terra Australis* with Australia.

Reference by Marco Polo (1254–1324) to a land called Locac and several indications on maps and globes in the fifteenth and sixteenth centuries have been assumed to relate to Australia, but little weight can now be attached to these suppositions. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria, although the oft-quoted passage in his *Descriptionis Ptolemaicae Augmentum* describing the *Australis Terra* has been considered to have had its origin in the voyages through the Straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

3. **Discovery of Australia.**—(i) *The Spaniards.* Disregarding the suggestion, for which there is no evidence, that the Arabs had come to Australia long before the Portuguese, the Spaniards, or the Dutch, and apart from the possibility that the Portuguese may have discovered part of the Australian coast before 1542, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606, the Spaniard Quiros, on reaching the island that has retained the name of *Espiritu Santo* (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability, he sighted the Australian continent, but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(ii) *The Dutch.* The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the islands of New Guinea. During March, 1606, the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years, there were nine visits of Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642, Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage, in 1644, Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

4. Discoveries by the English.—In the meantime, the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnets*, a trading vessel whose crew had turned buccaneers. In 1699, he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

At the end of the seventeenth century, it was uncertain whether Tasmania and New Zealand were parts of Australia or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Tahiti, had also the objective of ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden carrying about 85 persons, and accompanied by Sir Joseph Banks the botanist, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Tahiti, turned toward New Zealand, sighting that land on 7th October, 1769, in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772, Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Bass and Flinders in 1798.

## § 2. The Annexation of Australia.

1. Annexation of the Eastern Part of Australia, 1770.—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770, that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession "of the whole eastern coast, from latitude 38° S. to this place, latitude 10½° S., in right of His Majesty King George the Third". Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip's commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the "First Fleet".

A full historical account of the period referred to may be found in the *Historical Records of New South Wales*, Vol. I., parts 1 and 2.

2. Original Extent of New South Wales.—The commission appointed Phillip "Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south, and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south".

Although Captain Cook had taken possession of the North Island of New Zealand in November, 1769, and of the South Island in January, 1770, it is doubtful whether, at the time when Captain Phillip's commission was drawn up, New Zealand was considered as one of the "islands adjacent in the Pacific Ocean". The fact that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the

jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have become British territory unequivocally until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day, he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February, the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. *Extension of New South Wales Westward, 1825.*—On 17th February, 1824, Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824, of the coast from the 135th to the 129th degree of east longitude. On 16th July, 1825, the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. *Annexation of Western Australia, 1827.*—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9th November, 1826, landed at the Sound on 26th December following, and on 21st January, 1827, hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country", urging its occupation for the purpose of settlement. He left for England in July, 1827, continuing his advocacy— notwithstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being mainly due to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month, Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of "all that part of New Holland which is not included within the territory of New South Wales". Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

### § 3. The Exploration of Australia.

A summary of the more important facts relating to the exploration of Australia was embodied in this Chapter in issues of the Official Year Book up to and including No. 22.

### § 4. The Creation of the Several Colonies.

1. *New South Wales.*—In Governor Phillip's commission of 1786, the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year, Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

Lord Howe Island, which is a dependency of New South Wales and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 436 miles north-east of Sydney, and has an area of

3,220 acres. The climate is mild and the rainfall abundant, but on account of the rocky formation of its surface only about 300 acres are suitable for cultivation, most of which are devoted to the production of *Kentia* palm seed. The land belongs to the Crown and is occupied rent-free on sufferance. Discovered in 1788, the Island was first settled by a small party of Maoris in 1853; afterwards a colony was settled from Sydney. A Board of Control at Sydney manages the affairs of the Island and supervises the palm seed industry. The population was 249 at the Census of 30th June, 1961.

2. **Tasmania.**—In 1825, Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a dependency of Tasmania since the nineteenth century. In December, 1911, five members of the Australian National Antarctic Expedition landed on the island and remained there until 1915. On 3rd March, 1948, another party was landed to man a new station and this has since been maintained as a scientific base. The island is about 21 miles long and two miles wide.

3. **Western Australia.**—The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (*see* p. 3), which remained under the jurisdiction of New South Wales until 1831.

4. **South Australia.**—On 15th August, 1834, the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province", and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by authority of the Imperial Act 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales, by letters patent of 16th November of that year was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851, what was known as the "Port Phillip District" of New South Wales was constituted the colony of Victoria, "bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia". The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6th June, 1859, although separation from New South Wales was not completed until 10th December of the same year, upon the assumption of office of the first Governor. The territory comprised in the new colony was "so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean". The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel

of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition, the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each Local Government Area of Queensland, based on the most recent maps available, the Surveyor-General, in 1958, determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

### § 5. The Establishment of the Commonwealth of Australia.

1. **General.**—On 1st January, 1901, the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed to that of "States".

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907, the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under The Northern Territory Surrender Act 1907 (assented to on 14th May, 1908) and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

By Imperial Order in Council, dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth in the Ashmore and Cartier Islands Acceptance Act 1933, under the name of the Territory of Ashmore and Cartier Islands, on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July, 1938, annexed the islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December, 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the Jervis Bay Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Present Composition of the Commonwealth.**—Following the revision of the area of Queensland, as mentioned in § 4 above, the total area of the Commonwealth of Australia has been determined as 2,971,081 square miles. The dates of creation and the areas of its component States and Territories are shown below.

#### THE COMMONWEALTH OF AUSTRALIA: AREA, ETC., OF COMPONENT STATES AND TERRITORIES.

State or Territory.	Year of Formation into Separate Colony or Territory.	Present Area in Square Miles.	State or Territory.	Year of Formation into Separate Colony or Territory.	Present Area in Square Miles.

### § 6. The Constitutions of the States and of the Commonwealth.

1. **General.**—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to and including No. 22.

2. **Commonwealth Constitution Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: "An Act to constitute the Commonwealth of Australia", as amended by the Constitution Alteration (Senate Elections) 1906, the Constitution Alteration (State Debts) 1909, the Constitution Alteration (State Debts) 1928, and the Constitution Alteration (Social Services) 1946, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31st December, 1961.

#### THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT, 63 & 64 VICT., CHAPTER 12.

*An Act to constitute the Commonwealth of Australia. (9th July, 1900.)*

**W**HEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australian Colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.  
 "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."  
 "Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

### THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
    - Part I.—General:
    - Part II.—The Senate:
    - Part III.—The House of Representatives:
    - Part IV.—Both Houses of the Parliament:
    - Part V.—Powers of the Parliament:
  - Chapter II.—The Executive Government:
  - Chapter III.—The Judicature:
  - Chapter IV.—Finance and Trade:
  - Chapter V.—The States:
  - Chapter VI.—New States:
  - Chapter VII.—Miscellaneous:
  - Chapter VIII.—Alteration of the Constitution.
- The Schedule.

### CHAPTER I.—THE PARLIAMENT.

#### PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “ The Parliament ”, or “ The Parliament of the Commonwealth ”.

2. A Governor-General appointed by the Queen shall be Her Majesty’s representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen’s pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

## PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.\* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*† following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*† preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it seems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified,

\* The Parliament has otherwise provided, by means of the Representation Act 1948, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18th May, 1948).

† As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

### PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales ..	23	South Australia .. ..	6
Victoria .. ..	20	Tasmania .. ..	5
Queensland .. ..	8		

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales ..	26	South Australia .. ..	7
Victoria .. ..	23	Western Australia .. ..	5
Queensland .. ..	9	Tasmania .. ..	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.\*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

(i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:

(ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.†

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

\* The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918-1953, Sections 39 and 39A (repealing an earlier provision made by the Commonwealth Franchise Act 1902). For present qualifications see Chapter III.—General Government.

† The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918-1953, Section 69. For present qualifications see Chapter III.—General Government.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.\*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

#### PART V.—POWERS OF THE PARLIAMENT.†

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i) Trade and commerce with other countries, and among the States:
- (ii) Taxation; but so as not to discriminate between States or parts of States:
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:
- (iv) Borrowing money on the public credit of the Commonwealth:
- (v) Postal, telegraphic, telephonic, and other like services:
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii) Lighthouses, lightships, beacons and buoys:
- (viii) Astronomical and meteorological observations:
- (ix) Quarantine:
- (x) Fisheries in Australian waters beyond territorial limits:
- (xi) Census and statistics:
- (xii) Currency, coinage, and legal tender:
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned:
- (xv) Weights and measures:
- (xvi) Bills of exchange and promissory notes:
- (xvii) Bankruptcy and insolvency:
- (xviii) Copyrights, patents of inventions and designs, and trade marks:
- (xix) Naturalization and aliens:
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth:
- (xxi) Marriage:

\* The Parliamentary allowance has been varied from time to time (see pp. 69 and 70 of Official Year Book No. 42). In 1959, it was increased to £2,750, while additional allowances of £1,500 and £3 250, respectively, were granted to the Leaders of the Opposition in the Senate and the House of Representatives, and an additional allowance of £750 to the Leader in the House of Representatives (other than the Leader of the Opposition) of a recognized political party which has not less than ten members in the House of Representatives and of which no member is a Minister.

† Particulars of proposed laws which were submitted to referendums are referred to in Chapter III.—General Government.

- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants;
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) \**The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific:
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:
- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

---

\* Under Section 2 of the Constitution Alteration (Social Services) 1946, the Constitution was amended by the insertion of this paragraph.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.\*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.\*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:	Lighthouses, lightships, beacons, and buoys:
Naval and military defence:	

But the Departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

---

\* The number of Ministers of State has been increased from time to time (see Chapter III. para. 4 (vi.), p. 64, for details) and has been 22 since 1956. The annual appropriation for Ministers' salaries has been correspondingly increased and has been £66,600 since 1959.

## CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.\*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council;
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.\*

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court;
  - (ii) Of any other federal court, or court exercising federal jurisdiction: or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council;
  - (iii) Of the Inter-State Commission, but as to questions of law only:
- and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i) Arising under any treaty;
- (ii) Affecting consuls or other representatives of other countries;
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party;
- (iv) Between States, or between residents of different States, or between a State and a resident of another State;
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

\* The Judiciary Act 1903 provided for a Chief Justice and two other Justices, increased by subsequent amendments to six. The Judiciary Act 1903 also provided for the payment of a salary of £3,500 a year to the Chief Justice and of £3,000 a year to each other Justice, later increased to £8,000 and £6,500 a year, respectively.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court:
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

---

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary: The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
  - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
  - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two

years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; *due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways.* But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

## 103. The members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council;
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],\* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way to the provisions of section one hundred and five of this Constitution.*

## CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

\* Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets were omitted.

† Under Section 2 of the Constitution Alteration (State Debts) 1928, the Constitution was amended by the insertion of this section.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State: and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

---

#### CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

---

#### CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

---

#### CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

## SCHEDULE.

## OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

## AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

3. The Royal Proclamation.—The preceding Act received the Royal assent on 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17th September, 1900, constituted the Commonwealth as from 1st January, 1901; it read as follows:—

## BY THE QUEEN.

## A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales, Victoria, South Australia, Queensland, and Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

## § 7. The External Territories of Australia.

1. *Transfer of Norfolk Island*.—In 1856, Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony and finally by the passage of the Norfolk Island Act 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area of 8,528 acres.

2. *Transfer of British New Guinea or Papua*.—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles.

3. *Territory of New Guinea*.—In 1919, it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued

by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the New Guinea Act 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13th December, 1946.

4. **Nauru.**—In 1919, the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude  $0^{\circ} 32'$  S., and longitude  $166^{\circ} 55'$  E. and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and a supplementary agreement of 30th May, 1923, which gave the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. So far, the administrators have been appointed by the Commonwealth Government. The administration under the mandate operated from 17th December, 1920, to 1st November, 1947, since when Nauru has been administered under a Trusteeship Agreement with the United Nations.

5. **Australian Antarctic Territory.**—An Imperial Order in Council of 7th February, 1933, placed under Australian authority "all the islands and territories other than Adélie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude."

The Order came into force with a proclamation issued by the Governor-General on 24th August, 1936, after the Commonwealth Parliament had passed the Australian Antarctic Territory Acceptance Act on 13th June, 1933. The boundaries of Adélie Land were definitely fixed by a decree of 1st April, 1938, as latitude  $60^{\circ}$  S., longitude  $136^{\circ}$  E. and longitude  $142^{\circ}$  E.

6. **Territory of Heard and McDonald Islands.**—Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26th December, 1947.

7. **Territory of Cocos (Keeling) Islands.**—The Cocos (Keeling) Islands Act 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23rd November, 1955, as the date of transfer. From that date, the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands.

8. **Territory of Christmas Island.**—The Christmas Island Act 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1st October, 1958, and an Official Representative was appointed to administer the Territory.

## CHAPTER II.

### PHYSIOGRAPHY.

#### § 1. General Description of Australia.

1. *Geographical Position.*—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,971,081 square miles, the mainland alone containing 2,944,866 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean. The extreme points are Steep Point on the west, Cape Byron on the East, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south.

(ii) *Tropical and Temperate Regions.* Of the total area of Australia, nearly 39 per cent. lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows:—

#### AUSTRALIA: AREAS OF TROPICAL AND TEMPERATE REGIONS.

(Square miles.)

Area.	N.S.W. ( <i>u</i> )	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total.
Within Tropical Zone ..			360,642		364,000		426,320	1,150,962
„ Temperate Zone	310,372	87,884	306,358	380,070	611,920	26,215	97,300	1,820,119
Total Area ..	310,372	87,884	667,000	380,070	975,920	26,215	523,620	2,971,081

(*u*) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent. of Queensland lies within the tropical zone and 46 per cent. in the temperate zone; 37 per cent. of Western Australia is tropical and 63 per cent. temperate; while 81 per cent. of the Northern Territory is tropical and 19 per cent. temperate. All of the remaining States lie within the temperate zone. The tropical part of Australia thus comprises about 39 per cent. of the whole of the continent.

2. *Area of Australia compared with Areas of other Countries.*—The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about 25 times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page.

CHAPTER II.—PHYSIOGRAPHY.

AREA OF AUSTRALIA AND OF OTHER COUNTRIES, *circa* 1959.

(a) Excludes U.S.S.R., shown below. (b) Egypt and Syria. (c) Includes British Cameroons.  
 (d) Excludes State of Hawaii, which is included in Other Oceania. (e) Australian Trust Territory.  
 Netherlands New Guinea is included in Other Asia.

The areas shown in the table are obtained from the *Demographic Yearbook*, 1960, published by the Statistical Office of the United Nations and the countries have been arranged in accordance with the continental groups used therein.

3. Areas of States and Territories, Coastal Configuration and Standard Times.—As already stated, Australia consists of six States and the Northern and Australian Capital Territories. Particulars of areas, coastline and standard times are shown in the following table.

AUSTRALIA: AREAS OF STATES AND TERRITORIES, COASTLINE AND STANDARD TIMES.

State or Territory.	Area.	Percentage of Total Area.	Coastline.	Area per Mile of Coastline.	Standard Times.

(a) Includes Australian Capital Territory.

There are few striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1, an enumeration was given of the features of the coastline of Australia.

Prior to 1895, the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each. In 1894 and 1895, after several conferences had been held, legislation was enacted by each of the colonies whereby the mean solar times of the meridians of east longitude 120° (Western Australia), 135° (South Australia and Northern Territory) and 150° (Queensland, New South Wales, Victoria and Tasmania) were adopted. In 1898, however, the South Australian legislature amended its earlier provision and adopted the mean solar time of the meridian 142° 30' E. longitude as the standard time for that colony (and the Northern Territory). For further information on this subject, see Official Year Book No. 39, page 65.

4. Geographical Features of Australia.—(i) *General*. The following description is only a broad summary of the main physical characteristics of the Australian continent. For greater detail concerning particular geographical elements, earlier issues of the Official Year Book should be consulted. The list of special articles, etc., at the end of this volume indicates the nature of the information available and its position in the various issues.

(ii) *Orography of Australia*. (a) *General Description of the Surface*. Owing to the absence of any very high mountain chains, and to the great depression in the centre of Australia, the average elevation of the Australian continent above the level of the surrounding oceans is less than that of any of the other continents. Three-quarters of the land-mass lies between the 600 and 1,500 feet contours in the form of a huge plateau.

A section through the continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole eastern coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range which extends from the north of Queensland to the south of New South Wales and thence sweeps westward through Victoria. This range which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain.

The great central plain or plateau is the most distinctive feature of the Australian continent and the peculiarities of Australia's climate can probably be largely ascribed thereto.

(b) *Mountain Systems.* The main mountain feature of Australia is the Great Dividing Range, which runs along the whole eastern coast of the continent and can be traced over the islands of Torres Strait to New Guinea, while in the south one branch sweeps westwards towards the boundary of Victoria and South Australia and the other, the main branch, terminates in Tasmania.

This mountain system is at no place more than 250 miles from the eastern coastline and it approaches to less than 30 miles. On the whole, it is much closer to the coast in both New South Wales and Victoria than it is in Queensland, the corresponding average distances being about 70, 65 and 130 miles respectively. There is no connexion between the mountains of the eastern and other States of Australia.

The mountains of Australia are relatively low. Thus, in Queensland, the Great Dividing Range reaches a height above sea-level of less than 5,500 feet, the highest peak being Mount Bartle Frere. Mount Kosciusko, in New South Wales, is only about 7,300 feet, and Mount Bogong, in Victoria, about 6,500 feet high. In South Australia and Western Australia, heights of three to five thousand feet are attained. In Tasmania, the greatest height is only a little more than 5,000 feet. The fact that there are no high mountains in Australia is also of considerable importance in considering the climate of Australia.

It is probable that at one time Tasmania was connected with the mainland. As the Great Dividing Range can, in the north, be traced from Cape York across Torres Strait to New Guinea, so its main axis can be followed across the shallow waters of Bass Strait and its islands from Wilson's Promontory to Tasmania, which may be said to be completely occupied by ramifications of the chain. The central part of the island is occupied by an elevated plateau, roughly triangular in shape, and presenting bold fronts to the east, west and north. This does not extend in any direction more than about 60 miles. The plateau rests upon a more extensive tableland, the contour of which closely follows the coastline, and occasionally broadens out into low-lying tracts not much above sea-level. The extreme south of the island is rugged in character.

(iii) *Hydrology of Australia.* (a) *Rainfall.* On the whole, Australia is a country with a limited rainfall. This is immediately evident on studying its river systems, its lakes, and its artesian areas. Its one large river system is that of the Murray and Darling Rivers, of which the former stream is the larger and more important. Many of the rivers of the interior run only after heavy rains. Depending almost entirely on rainfall, a consequence of the absence of high mountains, they drain large areas with widely varying relation between rainfall and flow. Thus it has been estimated that not more than 10 per cent. of the rainfall on the catchment area of the Darling River above Bourke (New South Wales) discharges itself past that town. The rate of fall is often very slight.

(b) *Rivers.* The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall; and those of the central plains with very slight fall. Of the former, not many are navigable for any distance from their mouths and bars make many of them difficult of access or inaccessible from the sea.

The two longest rivers of the northern part of the eastern coast are the Burdekin, discharging into Upstart Bay, with a catchment area of 53,500 square miles, and the Fitzroy, which reaches the sea at Keppel Bay and drains about 55,600 square miles.

The Hunter is the largest coastal river of New South Wales, draining about 11,000 square miles before it reaches the sea at Newcastle. The Murray River, with its great tributary the Darling, drains a considerable part of Queensland, the major part of New South Wales and a large part of Victoria. It debouches into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. In good seasons, the river is navigable for a considerable proportion of its length.

The rivers of the north-west coast of Australia (Western Australia) are of considerable size, e.g., the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale and Ord. So also are those in the Northern Territory, e.g., the Victoria and Daly. The former of these, estimated to drain 90,000 square miles, is said to be navigable for 50 miles.

The rivers on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert and Mitchell, are also of considerable size.

Owing to the small amount of fall of many of the interior rivers, they may flood hundreds of miles of country in wet seasons, while in dry seasons they form a mere succession of waterholes or are entirely dry. It is this fact that explains the apparently conflicting reports of the early explorers, one regarding the interior as an inland sea, and another as a desert.

The rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

(c) *Lakes.* The "lakes" of Australia may be divided into three classes, true permanent lakes; lakes which, being very shallow, become mere morasses in dry seasons or even dry up and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse.

The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre and Frome, are of considerable extent.

(d) *Artesian Areas.* A considerable tract of the plain country of New South Wales and Queensland carries a water-bearing stratum, usually at a great depth. A large number of artesian bores have been put down, from which there is a considerable flow. These are of great value and render usable large areas which otherwise would be difficult to occupy even for pastoral purposes.

For further information on this subject, see Chapter VIII.—Water Conservation and Irrigation.

5. *Fauna, Flora, Geology and Seismology of Australia.*—Special articles dealing with these features have appeared in previous issues of the Official Year Book, and their nature and location can be readily ascertained from the list of special articles preceding the general index at the end of this volume.

## § 2 Climate and Meteorology of Australia.

NOTE.—This Section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau.

1. *Introductory.*—Previous issues of the Official Year Book, notably No. 3, pages 79–83. and No. 4, pages 84 and 87, contained outlines of the history of Australian meteorology and the creation and organization of the Commonwealth Bureau of Meteorology. Official Year Book No. 38, pages 30–32, contained paragraphs devoted to (i) Organization of the Meteorological Service; (ii) Meteorological Publications; (iii) Equipment; and (iv) Meteorological Divisions.

By reason of its insular geographical position and the absence of striking physical features, whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is generally more temperate.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little more than 7,300 feet, hence the Australian climate displays a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, more particularly the tropical sections, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior it is very limited, and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are also large areas which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character.

2. *Temperature.*—(i) *Effective Temperature.* When a meteorologist speaks of temperature, he means the temperature of the air indicated by a thermometer sheltered from precipitation, from direct rays of the sun and from radiation of heat from the ground and neighbouring objects, yet freely exposed to the circulation of the air. In other words, he means temperature measured under conditions standardized as nearly as possible in a Stevenson Screen, which is the standard housing for meteorological thermometers.

This shade temperature as measured by a "dry bulb" thermometer shows only the actual temperature experienced by dry inorganic substances, not the *sensible* temperatures felt by organic bodies. In the case of human beings, *sensible* temperature is affected by the rate of conduction of heat to or from the body by moving air and also by the rate of cooling due to evaporation from the skin and respiratory passages. The wind and humidity therefore determine the *sensible* temperature.

The humidity (relative humidity) is determined from the readings of the dry and wet bulb thermometers. More recently, however, with increasing interest in human comfort in tropical climates, another term, *effective* temperature, has come into use. It may be defined as "the temperature of a still, saturated atmosphere which would on the average produce the same feeling of warmth or cold as the atmosphere in question".\*

The 80° F. isotherm is confined to a very narrow tract of country extending from the north-west coast of Western Australia through the Northern Rivers section of the Northern Territory to the seaboard area around the Gulf of Carpentaria. The 75° F. isotherm extends, broadly, from Onslow on the north-west coast of Western Australia to Tennant Creek, to Boulia, to the southern part of Cape York Peninsula, thence southward along the Queensland coast to Townsville, following in a general way the coastline of Northern Australia but from 100 to 300 miles inland.

Later investigations have established "comfort zones"† bounded by limits of effective temperature within which people will feel comfortable. American research workers have determined the following figures‡:—

#### COMFORT ZONES: EFFECTIVE TEMPERATURES.

Season.	No subjects feel comfortable below—	Fifty per cent. of subjects feel comfortable between—	No subjects feel comfortable above—
Winter.. .. .	60° F.	63° and 71° F.	74° F.
Summer .. .. .	64° F.	66° and 75° F.	79° F.

Queensland investigators§ have divided some towns of Queensland into three classes on the basis of deviation from comfort:—

Class 1 (Sub-tropics).—Quite suitable for Caucasian habitation—Rockhampton, Bundaberg, Brisbane, Longreach, Charleville.

Class 2 (Marginal tropics).—Suitable for Caucasian habitation, but requires adaptation in summer—Mackay, Townsville.

Class 3 (Tropics).—(a) Permissible for Caucasian habitation but requires selection and marked adaptation—Cardwell, Cairns, Cloncurry. (b) Not suitable for continuous Caucasian habitation—Cape York, Burketown.

These results bear out investigations made previously in Australia|| in which the atmospheric vapour pressure was used as a measure of comfort, its value for this purpose being that it has equal effect in both indoor and outdoor climates. The limits of comfort range from 0.2 to 0.5 inch of vapour pressure. After drawing isopleths for effective temperature (not corrected for altitude), mean vapour pressure reduced to a logarithmic scale, and mean wet bulb temperature, it is found that there is close agreement in defining zones of relative discomfort.

(ii) *Seasons*. The Australian seasons are:—Summer, December to February; autumn, March to May; winter, June to August; spring, September to November. In most parts of Australia, January is the hottest month, but in Tasmania and southern Victoria, February is the hottest; in the tropical north, probably because the cooling "monsoon" rains occur in late summer, December is the hottest month, and at Darwin, November.

On a rainfall basis, in the tropical north, the year is divisible into "wet" and "dry" seasons, but on the basis of temperatures and physical comfort the "dry" season can be further sub-divided into two parts—"cool dry" and "warm dusty".¶

(a) "*Cool dry*" Season. From May to August. The average maximum temperature ranges from 80° to 85° F., the relative humidity is low and in inland areas cold nights are experienced when the temperature drops to 40° F. The skies generally are cloudless, but in about one year in three during June or July one to two inches of rain fall.

\* Houghton, F. C., Teague, W. W. and Miller, W. E. (1926) Amer. Soc. Heat. Vent. Engrs.  
 † Yaglou, C. P. (1926) J. Industr. Hyg. ‡ Yaglou, C. P. (1927) Ibid. § Lee, D. H. K.  
 Trans. Roy. Soc. Trop. Med. and Hyg. (1940) Vol. XXXII. || Barkley, H. Zones of Relative  
 Physical Comfort in Australia, Met. Bull. 20, 1934. ¶ Maze, W. H. Austr. Geog., June, 1945.  
 Settlement in E. Kimberleys.

(b) "*Warm dusty*" Season. From the end of August, temperatures rise and reach a maximum in October or the beginning of November. Temperatures of over 120°F. have been recorded.

(c) "*Wet*" Season. After the first of the heavy storms, the maximum temperatures fall but still remain high with high relative humidity. At Wyndham during January, 1944, the minimum temperature did not drop below 75°F. for fourteen consecutive days. A maximum of over 100°F. was recorded on each rainless day.

In Central and Northern Australia, during the hottest months, the average temperatures range from 80° to 85° F., whereas in Southern Australia they vary from 65° to 70° F. (see maps pp. 33, 34).

Throughout Australia, the coldest month is July, when only a very narrow strip of the northern sea-board has an average temperature as high as 75° F. Over the southern half of the continent, July temperatures range from 55° to 45° F. at elevations below 1,500 feet and fall as low as 35° on the Australian Alps (see maps pp. 35, 36). Here the temperature seldom, if ever, reaches 100° F. even in the hottest of seasons. Hotham Heights (6,100 feet above Mean Sea Level) recorded the highest maximum of 82.0° F. on 20th January, 1935. In winter, readings slightly below zero are occasionally recorded on the extreme heights.

Tasmania, as a whole, enjoys a moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° F. in the eastern part of the State.

(iii) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° F. extends in South America and South Africa as far south as latitude 33° S., while in Australia it reaches only as far south as latitude 28° S., thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° F. isotherm extends in several of the western States as far north as latitude 41° N. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a mean annual temperature higher than 70° F.

The extreme range of temperature is less than 100° F. over practically the whole of Australia, that figure being only slightly exceeded at a very few places; it is mostly 70° to 90° F. over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° F. in some localities.

Along the northern shores of Australia, the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8.5° F., and the extreme readings, or the highest maximum on record and the lowest minimum, show a difference of about 50° F.

The highest temperature recorded in Australia was 127.5° F. at Cloncurry on 16th January, 1889. The world's highest (136° F.) was recorded at Azizia (Tripoli) on 13th August, 1922. The lowest temperature ever recorded in Australia was -8° F. at Charlotte Pass on 14th July, 1945, and again on 22nd August, 1947, as contrasted with the lowest recorded temperature in other temperate zones. Readings of -50° F. and lower have been registered at places in Northern Europe, with an extreme of -67° F. at Ust' Shchugor (Russia), while in Siberian Asia, readings have been lower than -60° F. at a number of stations, the lowest being -90° F. at Oimyekon and Verkhoyansk, and in North America -76° F. has been recorded at Tanana (Alaska) and -74° F. at Watson Lake (Canada). In the polar regions, minimum readings of lower than -100° F. have been registered in Antarctica, the lowest being -125.3° F. on 25th August, 1958, and -126.9° F. on 24th August, 1960, both at Vostok.

The mean temperatures and the range from the extreme maximum to the extreme minimum temperatures (in whole degrees) of the capital cities of Australia, and a comparison with those of the main cities of some other countries are presented in tabular form in Official Year Book No. 38, page 42.

(iv) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that in Australia, as in other continents, the range increases, within certain limits, with increasing distance from the coast.

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° F. in the shade. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine goldfields, where the maximum shade temperature during the summer sometimes exceeds 100° F. continuously for days and weeks. The longest recorded period was 160 days from 31st October, 1923, to 7th April, 1924.

The area affected and the period of duration of the longest heat waves in Australia are shown in the map and diagram on page 37.

(v) *Tabulated Data for Selected Climatological Stations in Australia.* Tables showing normal mean temperature, extreme temperatures and normal rainfall for each month for selected climatological stations in each State and the Northern Territory appear in Official Year Book No. 40, pages 16–23, and similar data for other selected stations in the Commonwealth in Official Year Book No. 39, pages 41–48. Pages 53–50 of this issue contain this information in respect of Canberra, Darwin and the six State capitals.

(vi) *Frosts.*\* The Observer's Handbook of the Meteorological Office, London, gives the following definition:—"Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.) and a 'ground frost' is regarded as having occurred when the thermometer on the grass has fallen to 30.4° F. or below".

In Australia, this definition is adopted for stations equipped with terrestrial minimum thermometers. However, these are few in number, so although many rainfall observers record "hoar frost" when seen, for statistical purposes a screen temperature of 36° F. is taken as indicating light frosts at ground level. For heavy frosts, a screen temperature of 32° F. is taken.

In America, a "killing" frost is defined as a frost "that is generally destructive of vegetation". A "black frost" is the phenomenon arising out of a combination of low temperature and low humidity causing rupturing of plant cells by expansion when freezing of the water which they contain takes place, though frost crystals are not formed on the ground.

The parts of Australia most subject to low temperature are the eastern highlands from about Omeo in Victoria northward to Cambooya and Bybera in Queensland. Most stations in this region experience more than ten nights a month with readings of 32° F. or under for three to five months of the year. In Tasmania, districts on the Central Plateau are subject to such conditions for three to six months of the year. Minimum temperatures of 32° F. are comparatively infrequent in Western Australia except in parts of the south and south-west. In South Australia, the Yongala district is much more subject to such temperatures than other parts of the State. Much of the south-east of Queensland has a higher frequency of such readings than South Australia. Generally speaking, the frequency is controlled by altitude, latitude and, to a lesser degree, by proximity to the sea.

Frosts may occur within a few miles of the coastline over the whole continent, except in the Northern Territory and a considerable part of Northern Queensland. Regions subject to frost in all months of the year comprise portions of the tablelands of New South Wales, the Eastern Highlands and parts of the Central Divide and Western district in Victoria, practically the whole of Tasmania and a small area in the south-west of Western Australia.

A map showing the average annual number of frost-free days (i.e., days on which the temperature does not fall below 36° F.) appears on page 39.

Over most of the interior of the continent, and on the Highlands in Queensland as far north as the Atherton Plateau, frosts appear in April and end in September, but they are infrequent in these months. Minimum temperatures of 32° F. are experienced in most of the sub-tropical interior in June and July.

3. **Humidity.**—After temperature, humidity is the most important element of climate as regards its effects on human comfort, rainfall supply and conservation and related problems.

"Vapour pressure" is the pressure exerted by the water vapour in the atmosphere. At any given temperature there is a definite upper limit to the amount of water that can exist as vapour in the atmosphere. When this limit is reached, the air is said to be saturated and the pressure of the water vapour is equal to the "saturation vapour pressure".

In this publication, the humidity of the air has been expressed by the relative humidity, which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., are shown in the tables of climatological data for the capital cities (see pp. 53–60). The mean monthly vapour pressure has also been added to these tables.

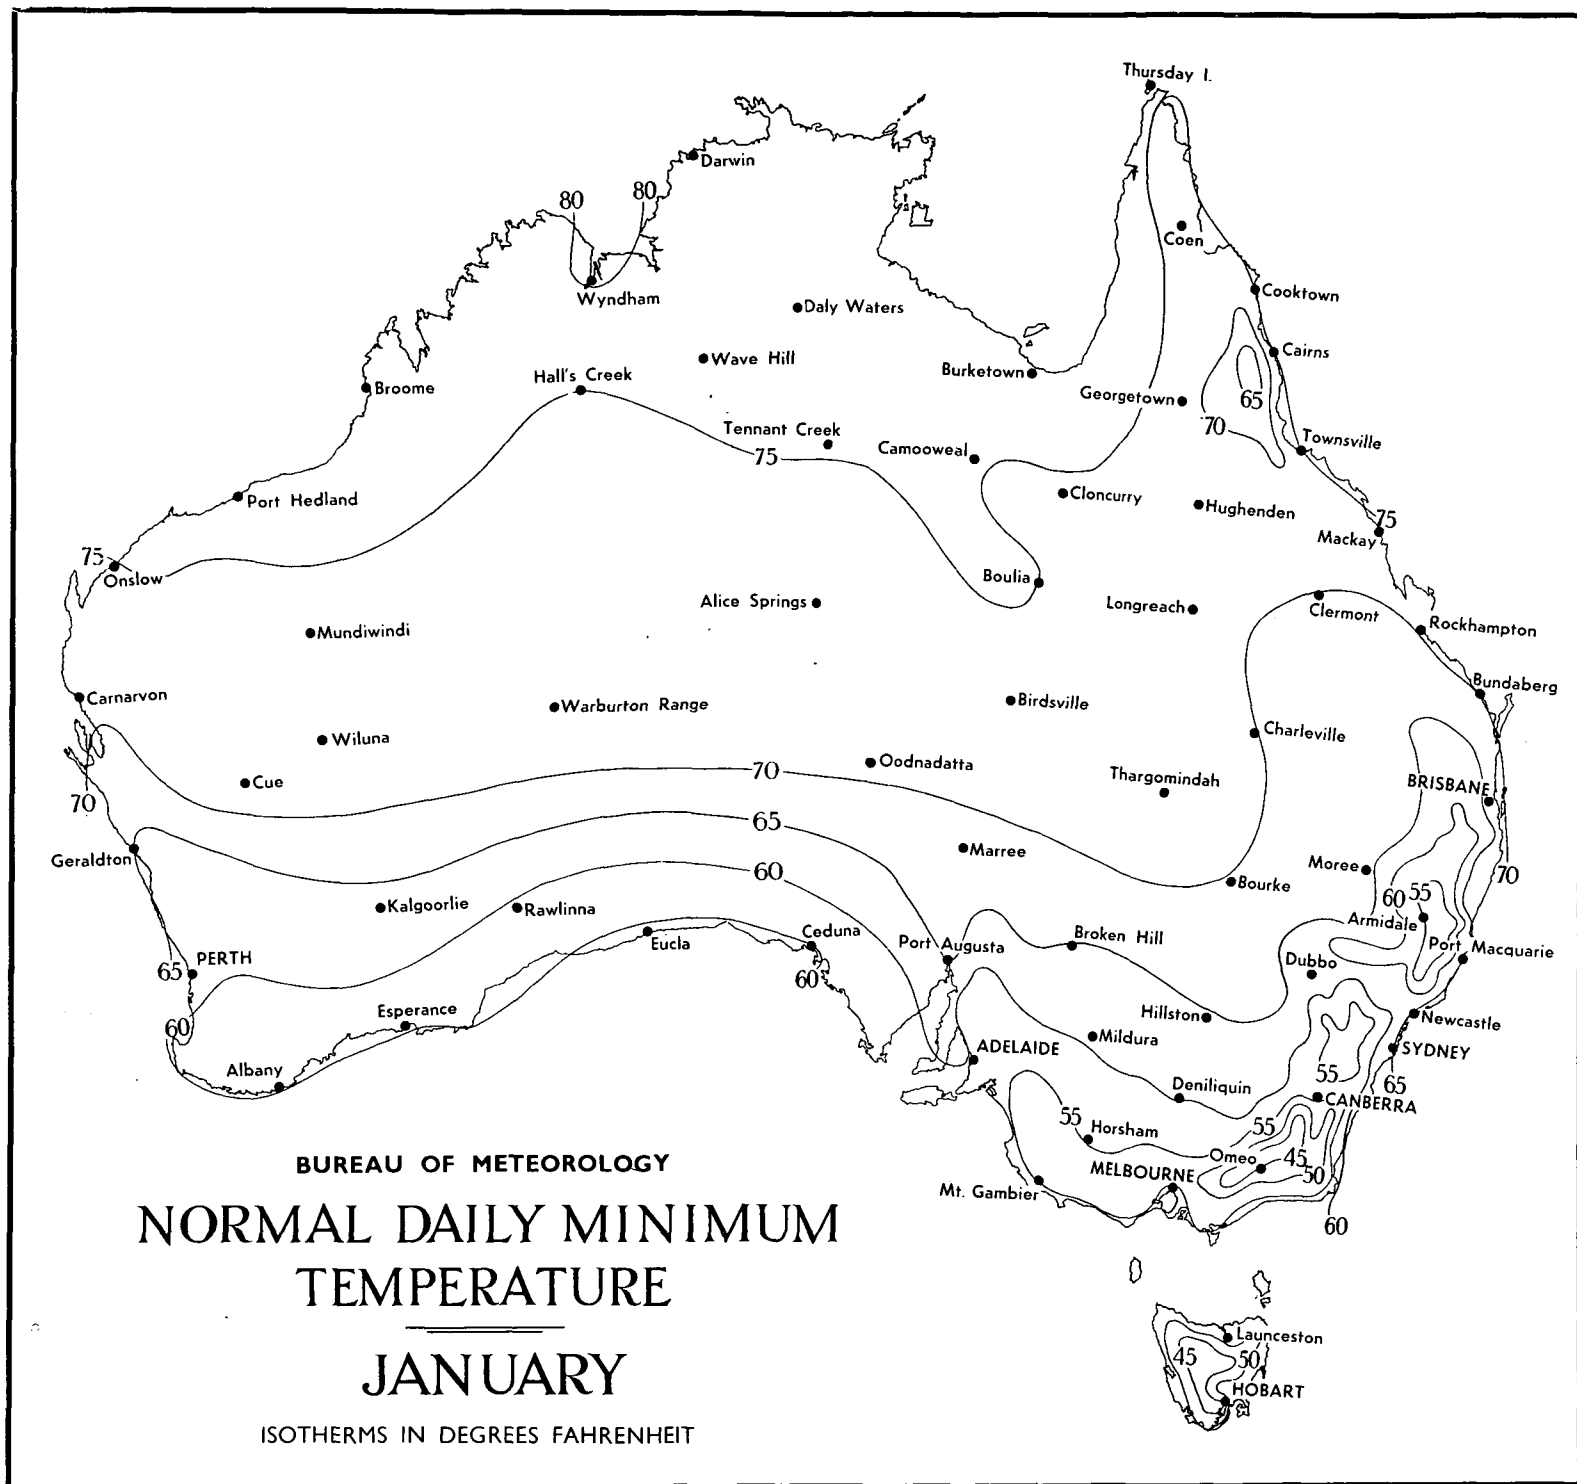

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities, consisting as they do of the extremes for each month, do not show the normal annual fluctuation which would be approximately midway between the extremes.

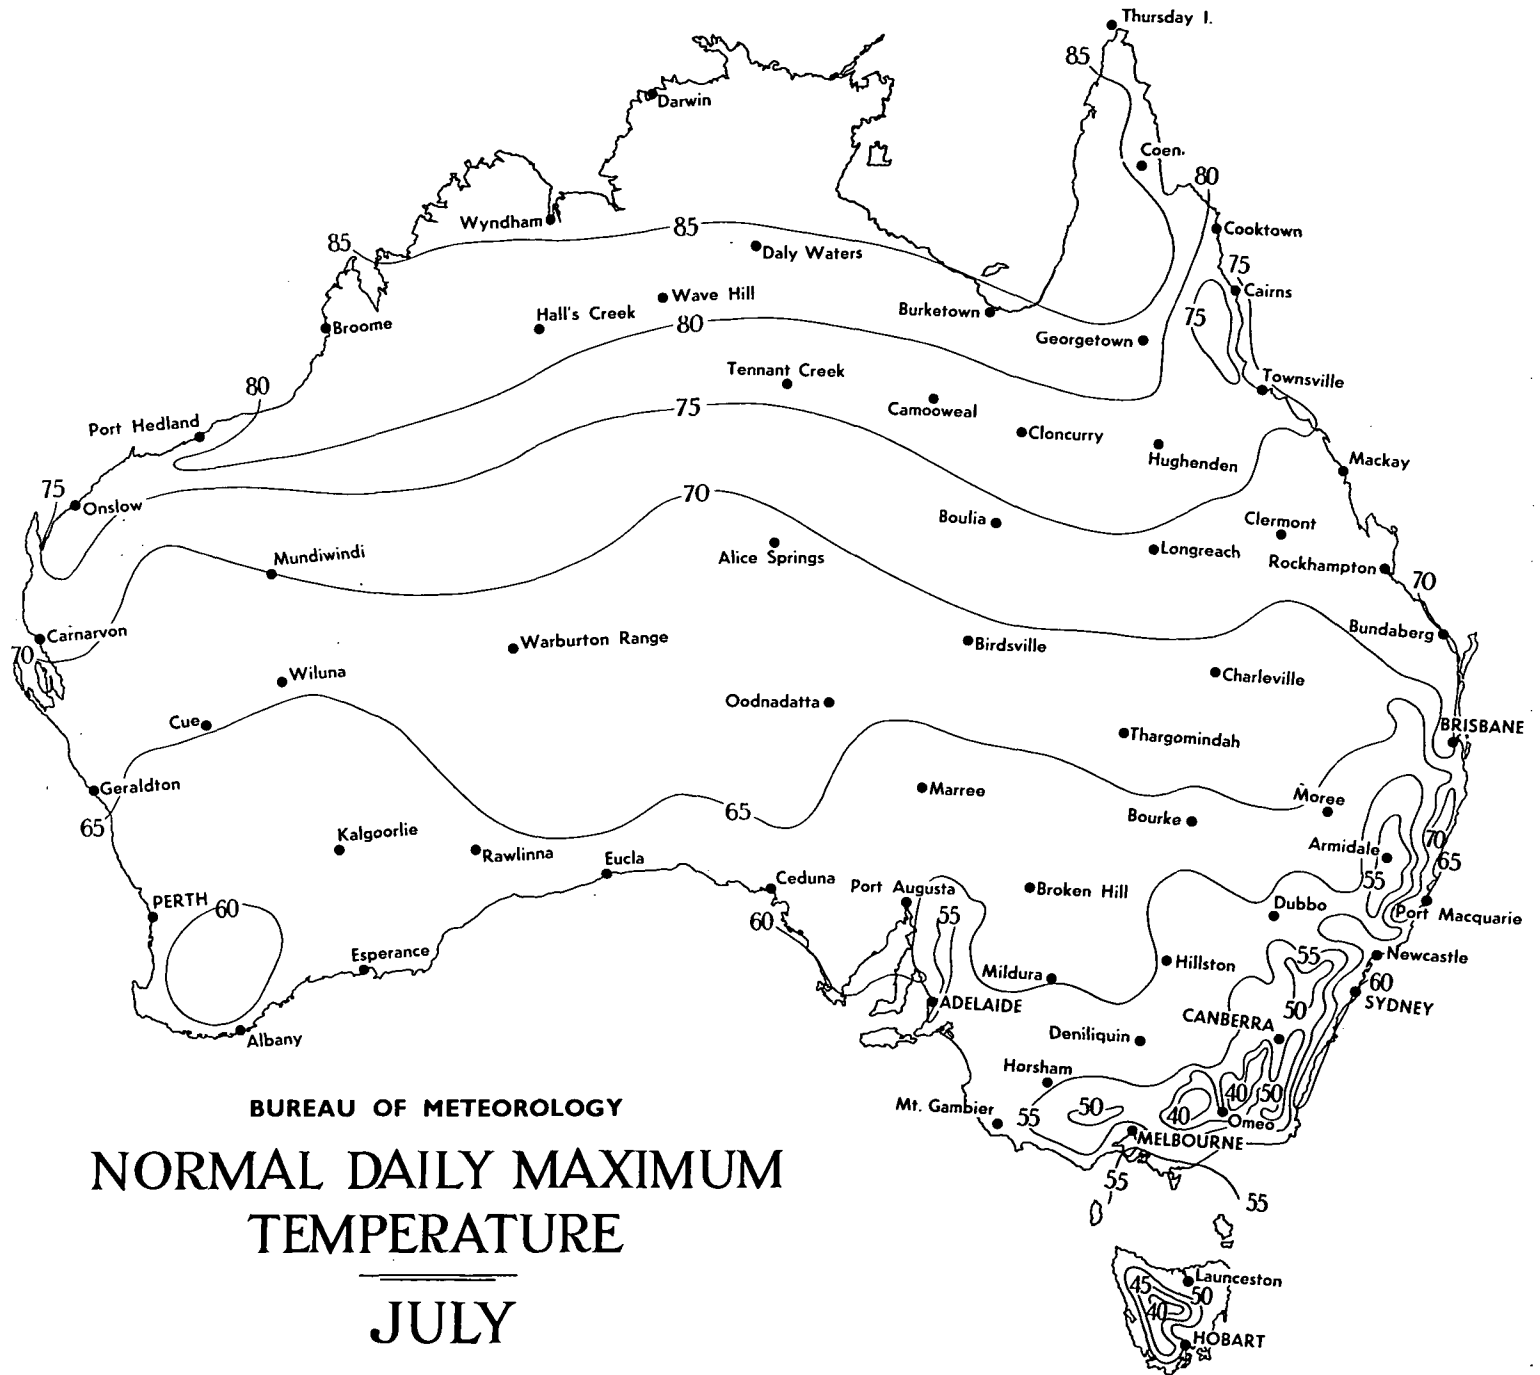

The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity at 9 a.m. diminishes in the order, Melbourne, Sydney, Darwin, Brisbane, Canberra, Hobart, Perth, Adelaide and Alice Springs.

BUREAU OF METEOROLOGY.

MONTHLY DISTRIBUTION OF RAINFALL  
OVER AUSTRALIA.

ALL YEARS OF RECORD TO 1957.

EXPLANATION-- THE GRAPHS SHOW THE AVERAGE RAINFALL IN EACH MONTH OF THE YEAR IN THE VARIOUS RAINFALL DISTRICTS. THE BOUNDARIES OF WHICH ARE SHOWN BY THE BROKEN LINES ON THE MAP. THE NUMBERS ON THE MAP REFER TO THE DISTRICTS. THE CORRESPONDING DISTRICT NAMES ARE GIVEN IN THE INSERT ON PAGE 89. THE COLUMNS FOR THE SUCCESSIVE MONTHS, JANUARY TO DECEMBER, RUN FROM LEFT TO RIGHT. THE LENGTH OF A VERTICAL COLUMN REPRESENTS THE AVERAGE MONTHLY RAINFALL ACCORDING TO THE SCALE GIVEN BELOW.

BUREAU OF METEOROLOGY

WIND ROSES

9 A.M.

SHOWING MONTHLY PERCENTAGE  
FREQUENCY DISTRIBUTION OF  
WIND DIRECTIONS TO EIGHT  
POINTS OF THE COMPASS

EXPLANATION.

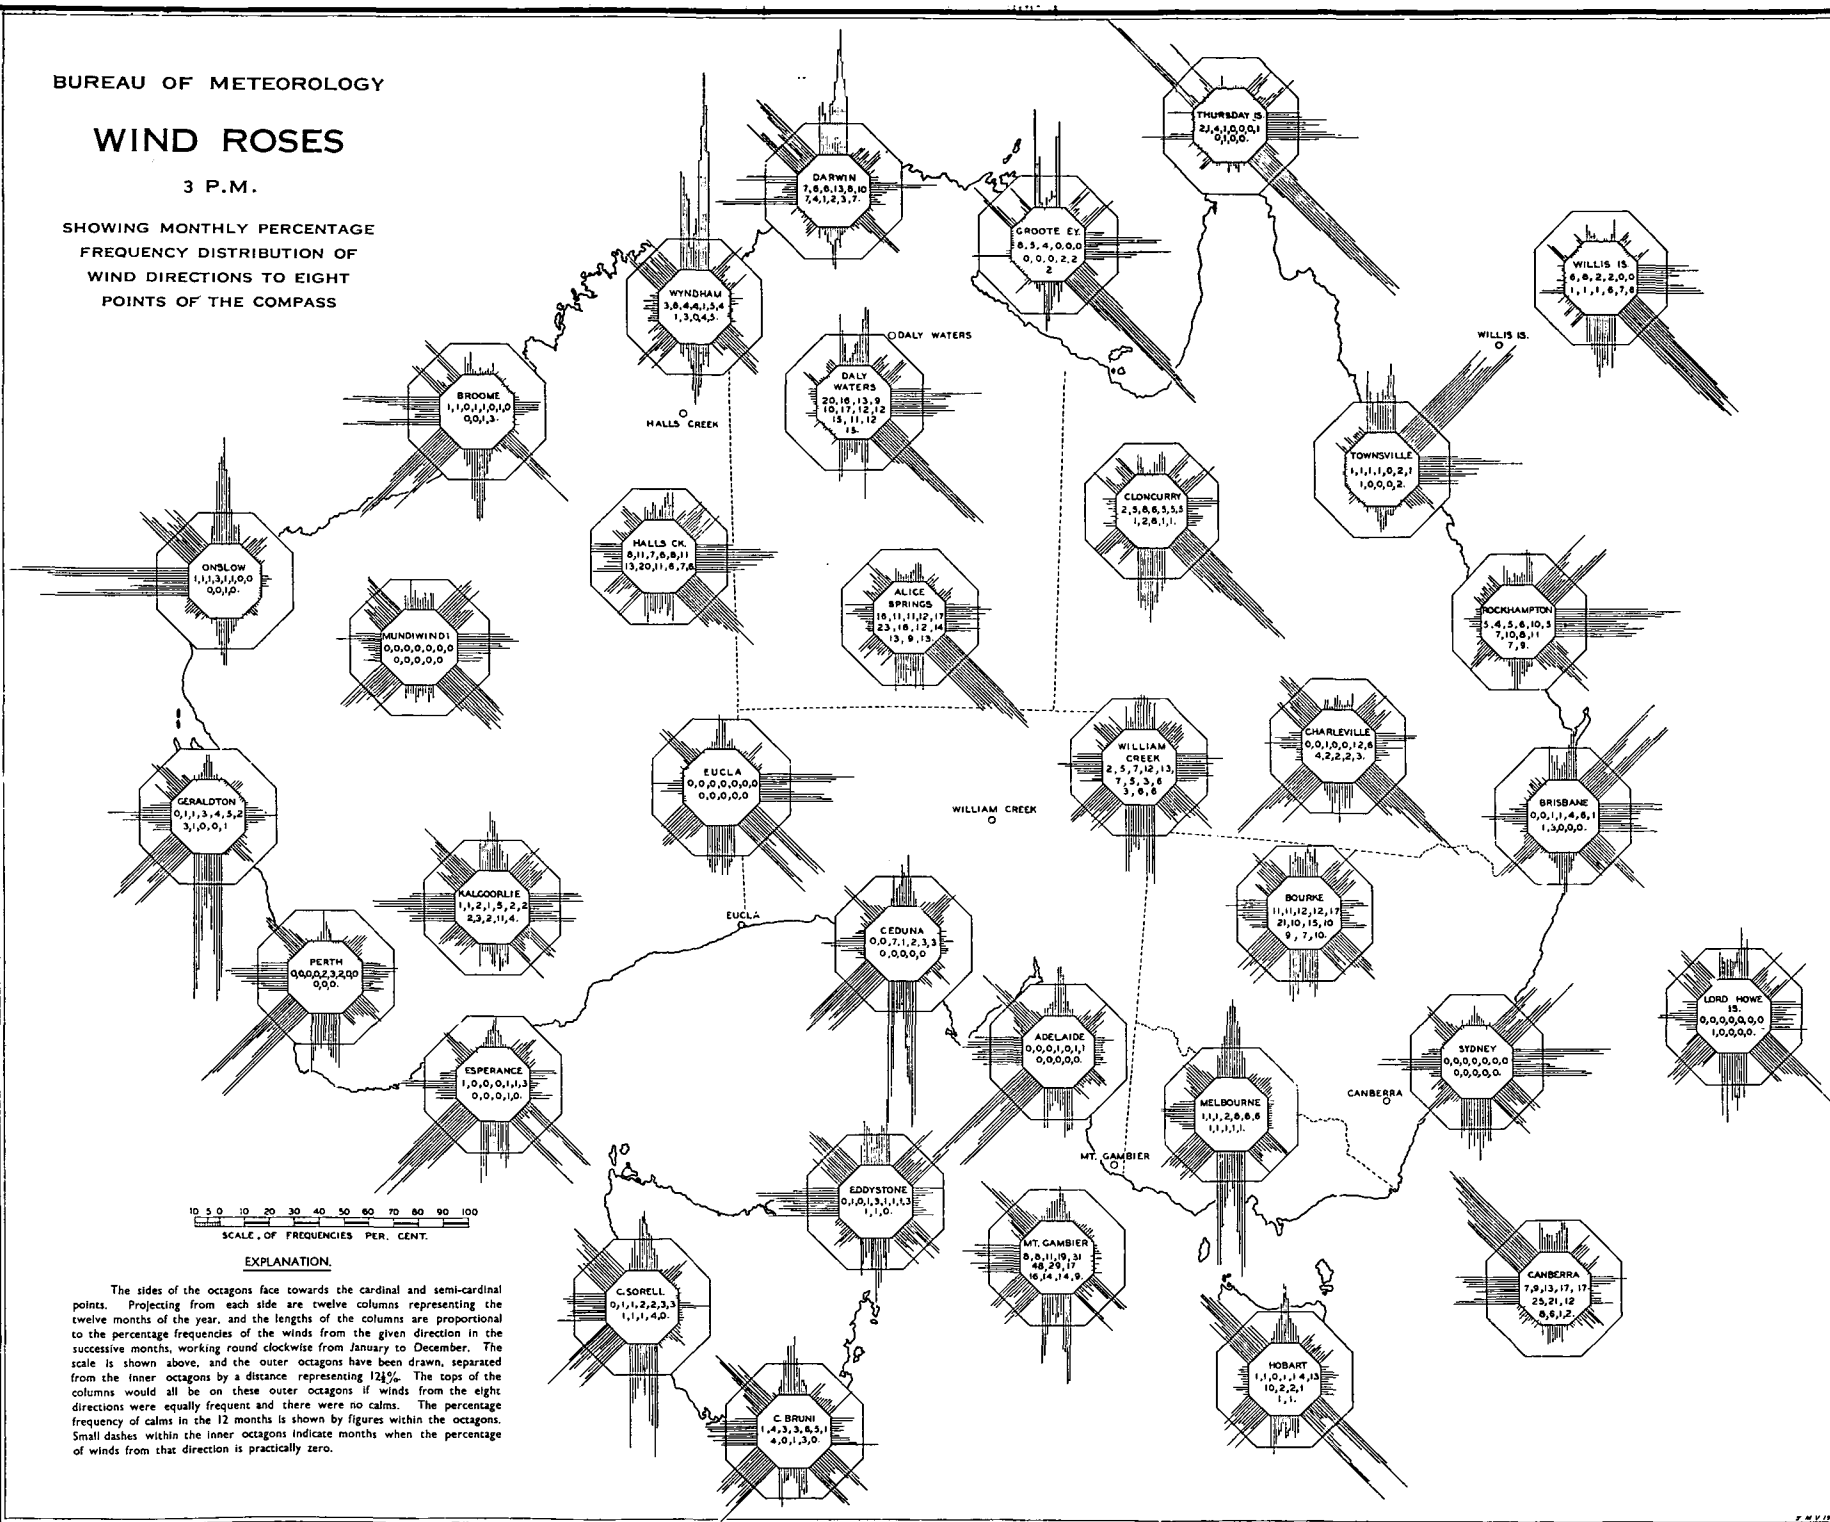

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

SHOWING MONTHLY PERCENTAGE  
FREQUENCY DISTRIBUTION OF  
WIND DIRECTIONS TO EIGHT  
POINTS OF THE COMPASS

EXPLANATION.

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12 1/2%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

Further reference to humidity will be found in the section on effective temperature (see p. 29).

4. *Evaporation.*—(i) *General.* The rate and quantity of evaporation in any territory are influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia, the question is of great importance, since in its drier regions water has often to be conserved in tanks and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (see p. 40) which shows that the yearly amount varies from about 20 inches over western Tasmania to more than 100 inches over the central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and the Eucla divisions of Western Australia, the rainfall does not exceed the evaporation during any month of the year. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation far in excess of their rainfall; it is noteworthy that the vegetation over most of this region is characterized by acacia, semi-desert, shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more they are protected from the direct rays of the sun and from winds by means of suitable tree planting the less will be the loss by evaporation. The Mansfield Process for treatment of tanks, dams and ponds by hexadecanol film, materially reducing effective evaporation, is a recent development which is already having beneficial results. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* The map of average annual evaporation in Australia (see p. 40) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263.\* Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings, and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula,  $e=263$  s.d., is not an exact relationship, but it takes account of one of the major factors in evaporation, namely, the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have been applied accordingly. Only short-term evaporation records are available north of latitude 20°, and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (Northern Territory) and Winton (Queensland), and to a lesser degree Blackall (Queensland) and Marble Bar (Western Australia).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

For graphs and tables of mean monthly evaporation and rainfall at certain selected stations, see Official Year Book No. 37, pages 34–35.

5. *Rainfall.*—(i) *General.* The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its geographical features.

Australia lies within the zones of the south-east trades and "prevailing" westerly winds. The southern limit of the south-east trades strikes the eastern shores at about 30° south latitude and the heaviest rains of the Australian continent, with very few exceptions, are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island,

\* Prescott, J. A. "Atmospheric Saturation Deficit in Australia" (Trans. Royal Society, S.A., Vol. LV., 1931).

upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall.* The average annual rainfall map of Australia (see p. 41) shows that the heaviest yearly falls occur on the north coast of Queensland (up to more than 160 inches) and in western Tasmania (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay to the northern part of Cape York Peninsula, also around Darwin, on the West Kimberley coast, near Cape Leeuwin, about the Australian Alps in eastern Victoria and south-eastern New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall.* Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior.

The map showing mean monthly distribution of rainfall over Australia (see p. 42) gives in graphic form information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Tully on the Tully River has an average annual rainfall of about 175 inches, and Harvey Creek on the northern coast-line about 167 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 139 and 163 inches. The maximum and minimum annual amounts there, in inches, are: Tully, 310.92 in 1950 and 104.98 in 1943, a range of 205.94 inches; Deeral, 287.18 in 1945 and 94.65 in 1951, a range of 192.53 inches; Harvey Creek, 254.77 in 1921 and 80.47 in 1902, a range of 174.30 inches; Goondi, 241.53 in 1894 and 67.88 in 1915, a range of 173.65 inches; Innisfail, 232.06 in 1950 and 69.87 in 1902, a range of 162.19 inches.

On five occasions, more than 200 inches have been recorded in a year at Goondi, the last of these being in 1950, when 204.97 inches were registered.

In 34 years of record to 1960, Tully has exceeded 200 inches on eleven occasions, and in 29 complete years of record, Harvey Creek has exceeded this figure four times.

In Tasmania, the wettest part is in the West Coast mountain region, the average annual rainfall at Lake Margaret being about 145 inches, with a maximum of 177.30 inches in 1948.

The driest known part of the continent is an area of approximately 180,000 square miles surrounding Lake Eyre in South Australia, where the annual average rainfall is between 4 and 6 inches and where the aggregates rarely exceed 10 inches in twelve months. Records at stations have at times been interrupted, but of the places in this region, the area with the lowest means is immediately to the east of the Lake, where a number of stations with long records have averages of less than 5 inches, the lowest being 4.13 inches at Troudaninna over 42 years, followed by 4.28 inches at Mulka (39 years).

Troudaninna in the period 1893 to 1936 had only one year in which the total exceeded 9 inches (11.07 inches in 1894). There have been protracted periods when the average has been even less than 3 inches. From 1895 to 1903, Troudaninna received the following annual totals:—2.78, 0.99, 5.71, 3.04, 3.18, 2.83, 1.80, 1.11, 4.87, an average of 2.92 inches. From 1918 to 1929, the average was only 2.65 inches, and in this period, from December, 1924, to November, 1929, the average was only 1.70 inches.

Mulka since 1918 has only twice exceeded 10 inches for the annual total (11.72 inches in 1920 and 13.56 in 1955) and on 17 occasions in 39 years the annual total has been less than 3 inches. In one particular period from October, 1926, to September, 1930, the average was only 1.26 inches (505 points in 48 months). However, at Kanowana, an even lower four-year average of 1.12 inches was recorded between 1896 and 1899 with yearly totals of 43, 225, 87 and 94 points, while the smallest yearly total was recorded at Mungeranie in 1888 when only 39 points were recorded on five days.

The average number of days of rain a month in this region is only 1 or 2. Cordillo Downs has an average of 6.36 inches on 13 days a year while Murnpeowie (4.71 inches) and Edwards Creek (5.56 inches) average 14 days.

No part of the earth, so far as is known, is absolutely rainless, and although at Arica, in northern Chile, the rainfall over a period of 15 years was nil, a further two years in which there were three measurable showers made the "average" for 17 years 0.02 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map on page 41, which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table.

#### AVERAGE ANNUAL RAINFALL: AREA DISTRIBUTION.

(Per Cent.)

Average Annual Rainfall.	W. Aust.	N. Terr.	S. Aust.	Q'land.	N.S.W. (a)	Vic.	Tas. (b)	Total.
Under 10 inches ..	58.0	24.7	82.8	13.0	19.7	Nil	Nil	37.6
10 and under 15 ins.	22.4	32.4	9.4	14.4	23.5	22.4	Nil	19.9

30 and under 40 ..	3.3	4.7	0.3	11.1	9.9	16.1	20.4	6.6
40 inches and over ..	2.1	12.6	Nil	11.4	6.1	10.4	56.5	8.6
Total ..	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

(a) Includes Australian Capital Territory.

(b) Over an area of 2,777 square miles no records are available.

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with a normal rainfall of 44.80 inches, is the wettest, Brisbane, Perth, Melbourne, Hobart and Canberra follow in that order, Adelaide with 21.09 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.63 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected (see map on p. 42). The figures for Northern Rivers (District 14), show that nearly

all the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse, for while the summer months are dry, the winter months are very wet. In the districts containing Melbourne and Hobart, the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally, it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Tables of Rainfall.* The following table of rainfall for a fairly long period of years for each of the Australian capitals affords information as to the variability of the fall in successive years, and the list which follows in the next paragraph of the more remarkable falls furnishes information as to what may be expected on particular occasions.

7. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciusko and similar localities, the snow does not entirely disappear after a severe winter.

8. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen egg and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

9. **Droughts.**—A special article dealing with droughts was included in Year Book No. 45, pages 51–56. Fuller information is available in a Bureau of Meteorology publication *Droughts in Australia* by J. C. Foley (Bulletin 43, 1957).

10. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have ranged as high, under anticyclonic conditions, as 30.935 inches (at Hobart on 13th July, 1846) and have fallen as low as 27.55 inches. This record low was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. For graphs of Mean Barometric Pressure at Capital Cities, see Official Year Book No. 37, page 35.

11. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the “prevailing” westerly winds. As the belt of the earth’s atmosphere in which they blow apparently follows the sun’s ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months, the anticyclonic belt travels in high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The “prevailing” westerly winds retreat a considerable distance to the south of Australia, and are less in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and for the greater part of the winter operate only to the north of the tropics. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from Cape Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, occasionally penetrating to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence or regularity of the Indian south-west monsoon but is sufficiently characteristic for the summer in the north of Australia to be called the “North-west Season”. In central and eastern Queensland, the north-west monsoon in the summer has comparatively little effect, and the trade winds, though weakened, are still dominant winds. With the movement of the sun northward in the autumn, the north-west monsoon is replaced first by light variable winds and then by the trade winds.

Further particulars of Australian wind conditions and meteorology will be found in Official Year Book No. 38, pages 58–61. Reference should also be made to the wind rose diagrams on pages 43 and 44.

(iii) *Cyclones and Storms.* The “elements” in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to deep depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, along the coastline of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these disturbances are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east.

Very severe cyclones, locally known as “willy willies”, are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appeared in early issues of the Official Year Book (see No. 6, pp. 84-86), and a special article dealing with "Australian Hurricanes and Related Storms" appeared in Official Year Book No. 16, pages 80-84.

Depressions vary considerably in their isobaric forms, intensity and other characteristics. Some bring rain in variable quantities, some heat and others mainly wind. A common type in southern Australia is the "Λ" shaped trough with an abrupt "backing" of the wind or "line squall" as it passes. The cold front is most frequently found through the centre of the "trough" because it is along this line, and extending into the upper levels of the atmosphere, that the demarcation of different air masses is so well defined. The best rains in inland Australia occur when extensive masses of warm moist tropical air move into the interior and are forced to rise by convergence of flow or by impact with a cold air stream.

The speed of low pressure systems is very variable, but in general in southern latitudes the movement is of the order of 500 to 700 miles a day.

12. Influences affecting Australian Climate.—(i) *General.* Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom subject to frosts, have, with the deforestation of the surrounding hills, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forests on Climate.* Since forests doubtless exercise a great influence on local climate, it follows that, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they reduce considerably the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and, without this and the sheltering influence of ravines and gullies, watercourses supplied mainly by melting snow would be subject to alternate periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall is not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

13. Rainfall and Temperatures, Various Cities.—Official Year Book No. 34, page 28, shows rainfall and temperature and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

14. Climatological Tables.—The averages and extremes for a number of climatological elements, which have been determined from long series of observations at the Australian capitals up to and including the year 1960, are given on the following eight pages.

NOTE.—The following points apply throughout:—

- (i) Where records are available, mean or average values have been calculated on a standard period of 30 years from 1911 to 1940.
- (ii) Extreme values have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

## CHAPTER III.

### GENERAL GOVERNMENT.

#### § 1. Scheme of Parliamentary Government.

1. **General.**—The legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State, there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which inform him in detail of the manner in which his duties are to be fulfilled. The Legislature in each State was bi-cameral until 1922, in which year the Queensland Upper House was abolished and the Parliament became uni-cameral. In the bi-cameral Parliaments, the Upper House is known as the Senate in the Commonwealth Parliament, and as the Legislative Council in the State Parliaments, while the Lower House is known as the House of Representatives in the Commonwealth Parliament, as the Legislative Assembly in the State Parliaments of New South Wales, Victoria and Western Australia, and as the House of Assembly in the State Parliaments of South Australia and Tasmania. In Queensland, the Legislative Assembly constitutes the legislature. The legislative powers of the Parliaments are delimited by the Commonwealth and State Constitutions. The Assembly, which is the larger House, is, in all cases, elective, the franchise extending to adult British subjects with certain residential qualifications. The Council in each of the States other than New South Wales is elected by the people of the State concerned, the constituencies being differently arranged and, in general, some property or special qualification for the electorate being required. In Victoria, however, under the Legislative Council Reform Act passed in October, 1950, adult suffrage was adopted for Legislative Council elections. In the case of New South Wales, the Council is elected by the members of both Houses of Parliament at a simultaneous sitting. In the Federal Parliament, the qualifications for the franchise are identical for both Houses, extending to adult British subjects who have lived in Australia for six months continuously.

2. **The Sovereign.**—(i) *Accession of Queen Elizabeth II.* On 7th February, 1952, the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2nd June, 1953.

(ii) *Royal Style and Titles Act 1953.* At a conference of Prime Ministers and other representatives of the British Commonwealth in London in December, 1952, it was agreed that the Royal Style and Titles then in use were not in accord with current relationships within the British Commonwealth and that there was need of a new form which would, in particular, “reflect the special position of the Sovereign as Head of the Commonwealth”.

It was therefore decided that each member of the British Commonwealth should use a form of the Royal Style and Titles suited for its own circumstances, while retaining as a common element the description “Queen of Her other Realms and Territories and Head of the Commonwealth”; and that consultation between all countries of the Commonwealth should take place on any future proposal to change the form of the Royal Style and Titles used in any country.

To give effect to these decisions in Australia, the Royal Style and Titles Act was passed on 3rd April, 1953, giving Parliament's assent to the adoption by the Queen, for use in relation to the Commonwealth of Australia and its Territories, of the following Royal Style and Titles:—“Elizabeth the Second, by the Grace of God of the United Kingdom,

Australia and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith." The Act also approves the adoption by the Queen of a Royal Style and Titles for use in relation to other countries of the British Commonwealth in accordance with the principles formulated at the London conference.

(iii) *Authorization of a Royal Great Seal.* By warrant published in the Commonwealth Gazette of 17th November, 1955, Her Majesty authorized the Great Seal of the Commonwealth to be used as a Royal Great Seal in sealing all things whatsoever (other than things that pass the said Great Seal) that bear Her Majesty's Sign Manual and the counter-signature of one of Her Ministers of State for the Commonwealth.

### 3. Powers and Functions of the Governor-General and of the State Governors.—

(i) *Governor-General of the Commonwealth.* Section 2 of the Commonwealth Constitution provides as follows:—

"A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him."

As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen—either by Letters Patent (see Letters Patent dated 29th October, 1900, and 30th October, 1958), by Instructions under the Royal Sign Manual and Signet, by Commission issued to him under the Royal Sign Manual and Signet, or by any instrument of delegation under section 2 of the Constitution. Powers which have been so assigned include, among others, the power to appoint a Deputy or Deputies of the Governor-General, to administer or authorize any other person to administer the Oath of Allegiance, to grant pardons and to remit fines for offences against the laws of the Commonwealth, and to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth.

Other powers and functions are conferred on the Governor-General by the Constitution. For example, under section 5 of the Constitution he may appoint times for holding the sessions of the Parliament, prorogue Parliament and dissolve the House of Representatives. Under section 32, the Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives. Under section 58, he assents in the Queen's name to a proposed law passed by both Houses of the Parliament or withholds assent, or reserves the law for the Queen's pleasure; or he may return the proposed law to the House in which it originated and may transmit therewith any amendments which he may recommend. Under section 61, he exercises the executive power of the Commonwealth; under section 62, he chooses and summons Executive Councillors, who hold office during his pleasure; and under section 64, he may appoint Ministers of State for the Commonwealth. By section 68, the command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General, as the Queen's representative. Under the conventions of responsible government obtaining in Commonwealth countries, the Governor-General's executive functions generally are exercised on the advice of Ministers of State. In this regard, the Governor-General's position has become assimilated to that of the Queen in relation to her Ministers of State for the United Kingdom.

In addition, many powers and functions are exercised by the Governor-General under Acts of the Commonwealth Parliament. Most Acts, for example, provide that the Governor-General may make regulations, not inconsistent with the Act, either generally to give effect to the Act or to cover certain matters specified in the power. The Governor-General may be authorized by statute to issue proclamations—for example, to declare an Act in force or a state of things to exist, e.g. the existence of an epidemic. The Governor-General has been given power by statute to legislate for certain Territories of the Commonwealth. Other statutory powers include the power to appoint and dismiss certain office holders. A reference to the Governor-General, in Acts of the Commonwealth Parliament, means, unless the contrary intention appears, the Governor-General acting with the advice of the Executive Council (Acts Interpretation Act 1901–1957, section 16A).

(ii) *Governors of the States.* The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates.

The Governors of the States exercise prerogative powers conferred on them by these Letters Patent, their Commissions of appointment, and the "Governor's Instructions" given them under the Royal Sign Manual and Signet or other instrument as specified in the Letters Patent. In addition, they have been invested with various statutory functions, either under the State Constitutions, conferred by Imperial Act, or by Act of the Parliament of the State.

A Governor of a State assents in the Queen's name to Bills passed by the Parliament of the State, except those reserved for the Royal assent. The latter include certain classes of Bills which are regulated by the Constitution Acts and by the Governor's Instructions. He administers the prerogative of mercy by the reprieve or pardon of criminal offenders within his jurisdiction, and may remit fines and penalties due to the Crown.

In the performance of his functions generally, particularly those conferred by Statute, the Governor of a State acts on the advice of Ministers of State for the State.

(iii) *Holders of Office.* For the names of the Governors-General since the inception of the Commonwealth and the present State Governors, see § 3, page 73.

4. **The Cabinet and Executive Government.**—(i) *General.* Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform Governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case, he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, until January, 1956, all Ministers were members of the Cabinet. Since then, however, although in the States all Ministers are members of the Cabinet, the Commonwealth ministry is made up of twelve senior Ministers, who constitute the Cabinet, and ten Ministers of non-Cabinet rank who attend meetings of the Cabinet only when required, as, for example, when the business of the Cabinet concerns their departments. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is usually presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The

meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. Australian practice follows, broadly, that of the United Kingdom. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Official Year Book (*see* No. 6, p. 942). It may be added, however, that legislation now exists in all States, the effect of which is to obviate the necessity of responsible Ministers vacating their seats in Parliament on appointment to office.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in March, 1962.

AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER HOUSES, MARCH, 1962.

Ministers with Seats in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
The Upper House ..	5	2	4	(a)	3	2	1	17
The Lower House ..	17	14	10	11	5	8	8	73
<b>Total ..</b>	<b>22</b>	<b>16</b>	<b>14</b>	<b>11</b>	<b>8</b>	<b>10</b>	<b>9</b>	<b>90</b>

(a) Abolished in 1922.

For the names of the occupants of ministerial office in each of the Parliaments of Australia in March, 1962, *see* § 3 of this chapter, page 75. Subsequent changes will be found in the Appendix to this volume.

(vi) *Numbers and Salaries of Commonwealth Ministers.* Under sections 65 and 66, respectively, of the Constitution of the Commonwealth, the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000, each provision to operate, however, "until the Parliament otherwise provides".

Subsequently, the number and salaries were increased to 8—£13,650 (1915) and to 9—£15,300 (1917). During the period of financial emergency in the early thirties, the ministerial salary appropriation was reduced to as low as £10,710 a year, and was not restored to its former level until 1938, when the appropriation was £16,950. During the period of restoration of salary, the number of Ministers was increased to 10 (1935). Later increases were as follows:—to 11—£18,600 (1938); 19—£21,250 (1941) (these increases were war-time provisions, extended into peacetime in 1946); £27,650 (1947—number unaltered); 20—£29,000 (1951); £41,000 (1952—number unaltered); 22—£46,500 (1956); £66,600 (1959—number unaltered). In 1938, an additional ministerial allowance of £1,500 a year was granted to the Prime Minister; this was increased to £3,500 a year (exempt from income tax) in 1952, and at the same time an additional ministerial allowance of £1,000 a year (exempt from income tax) was granted to each other Minister. This latter figure was increased, in 1959, to £1,500 a year, and the income tax exemption was removed.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (*see* paras. 5 and 6 following).

5. *Number and Salary of Members of the Legislatures, Australian Parliaments, December, 1961.*—The following table shows the number and annual salary of members in each of the legislative chambers in December, 1961.

**AUSTRALIAN PARLIAMENTS: MEMBERS AND ANNUAL SALARIES,  
31st DECEMBER, 1961.**

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.

(a) Abolished in 1922. (b) Plus expense allowances—Senators, £800; Members of the House of Representatives, city electorates, £850, country electorates, £1,050. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) Plus allowance of £550 for metropolitan, £750 for urban, £850 for inner country and £950 for outer country electorates. (d) Plus allowance of £550 where electorate is less than 50 miles from Adelaide; £700 if more than 50 miles, £600 if more than 200 miles. (e) Plus £50 where any part of electorate is more than 50 miles from Perth and expense reimbursement ranging from £450 for a Metropolitan member to £700 for a North Province member. (f) Plus allowance according to area of electorate and distance from the capital varying from £250 to £575 in the case of the Legislative Council, and from £750 to £875 in the case of the House of Assembly. (g) Plus allowance varying from £650 to £950 according to remoteness of electorate and other allowances. (h) Plus individual electoral allowances varying between £325 and £1,175.

6. **Enactments of the Parliaments.**—In the Commonwealth, all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania, laws are expressed to be enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. The Governor-General or the State Governor acts on behalf of, and in the name of, the Sovereign in assenting to Bills passed by the Legislatures, but he may reserve them for the special consideration of the Sovereign. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth, the latter prevails, and the former is, to the extent of the inconsistency, invalid.

**§ 2. Parliaments and Elections.**

1. **Commonwealth.**—(i) *Qualifications for Membership and for Franchise—Commonwealth Parliament.* Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disqualified on other grounds, who has lived in Australia for six months continuously. Residence in a sub-division for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory. A member

of the Defence Forces on service outside Australia who is a British subject not less than 21 years of age and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections, whether enrolled or not.

The principal reasons for disqualification of persons otherwise eligible as members of either Commonwealth House are:—Membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than 25 persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the Migration Act, or are prohibited immigrants under that Act, are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise.

(ii) *Commonwealth Parliaments and Elections.* From the establishment of the Commonwealth until 1949, the Senate consisted of 36 members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament enacted legislation in 1948 enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation. Thus, the Representation Act 1948 provided that there shall be ten Senators from each State instead of six, increasing the total to 60 Senators. To effect this transition in the Senate, seven Senators were elected from each State at the elections of 1949, four taking office immediately the Senate sat after the election, the remaining three commencing their term on the usual date—1st July, 1950. Members of this Chamber are normally elected for a term of six years, but half the members retire at the end of every third year, and they are eligible for re-election. Accordingly, at each normal election of Senators, five Senators are now elected in each State, making 30 to be elected at each such election.

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Consequently, in terms of the Constitution and the Representation Act 1905–1938, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows:—New South Wales—from 28 to 47; Victoria—from 20 to 33; Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 and the total was increased from 74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by Distribution Commissioners in each State on a quota basis, but taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and sub-divisions, and State electoral boundaries.

The population as disclosed by the Census taken on 30th June, 1954, necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10th December, 1955, was New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 121 to 122. A redistribution of electoral boundaries was effected by Distribution Commissioners appointed in each State.

The population as disclosed by the Census taken on 30th June, 1961, necessitated further representational changes, New South Wales representation becoming 45, Queensland 19, and Western Australia 8. The necessary redistribution of boundaries to bring these into effect has not yet been made.

Since the general elections of 1922, the Northern Territory has been represented by one member in the House of Representatives. The Australian Capital Territory Representation Act 1948 gave similar representation to the Australian Capital Territory as from the elections of 1949. The members for the Territories may join in the debates but are not entitled to vote, except on any proposed law which relates solely to the respective

Territories, on a motion for the disallowance of any ordinance of the Territory or on any amendment to such motion, or on a motion for the disallowance of a regulation under an ordinance. The Commonwealth Parliament, however, when providing for a Legislative Council for the Northern Territory in 1947, relinquished the power to disallow ordinances for that Territory. As from the date of establishment of the Legislative Council, power to disallow ordinances was vested in the Governor-General in Council. In certain cases, ordinances passed must be reserved for the pleasure of the Governor-General.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators, the whole State constitutes the electorate. For the purpose of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book.

There have been twenty-three complete Parliaments since Federation. Until 1927, the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the late King George VI., then Duke of York, on 9th May, 1927.

The fifth Parliament, which was opened on 9th July, 1913, was dissolved on 30th July, 1914, by means of a double dissolution, when, for the first time in the history of the Commonwealth, a deadlock occurred between the Senate and the House of Representatives, and, in accordance with section 57 of the Constitution which provides for such an eventuality, both Houses were dissolved by the Governor-General. The nineteenth Parliament was similarly dissolved. It opened on 22nd February, 1950, but on 19th March, 1951, in its first session, a double dissolution was proclaimed for the second time since the inception of the Commonwealth.

The system of voting for the House of Representatives is preferential. Until 1948, voting for the Senate was also preferential, but the Commonwealth Electoral Act 1948, introduced with the Representation Act 1948 to enlarge the Commonwealth Parliament (*see p. 66*), changed the system of scrutiny and counting of votes in Senate elections from preferential to that of proportional representation. For a description of the system, *see Official Year Book No. 38, pages 82-3.*

For particulars of electors enrolled and of electors who voted at the various Commonwealth elections, *see earlier Year Books.* Elections for the Senate have usually been held at the same time as those for the House of Representatives. The double dissolution of the nineteenth Parliament, however, referred to above, led to the holding of Senate elections on separate dates. An election for the Senate was held on 9th May, 1953, and a further election was due within one year of 30th June, 1956, i.e. the date of the completion of the term of office of half the elected Senators. The twenty-first Parliament opened on 4th August, 1954, and was dissolved on 4th November, 1955, enabling the election for the Senate and the House of Representatives again to be held simultaneously.

The twenty-third Parliament opened on 17th February, 1959, and was dissolved on 26th October, 1961. Elections for both Houses were held on 9th December, 1961, and particulars of electors and voting in the several States were as follows.

SENATE ELECTION, 9th DECEMBER, 1961.

State.	Electors Enrolled.			Electors who Voted.			Percentage of Electors who Voted.

The twenty-fourth Parliament opened on 20th February, 1962.

(iii) *Commonwealth Referendums.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved also by a majority of the States and of the electors who voted, before it can be presented for Royal Assent. So far, 24 proposals have been submitted to referendums and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referendums and the voting thereon were given in previous issues of the Official Year Book (see List of Special Articles preceding General Index to this volume), and a brief summary was given in Official Year Book No. 41 (see p. 67).

2. *State Elections.*—(i) *Latest in each State.* (a) *Upper Houses.* The following table shows particulars of the voting at the most recent elections for the Upper Houses or Legislative Councils in the States of Victoria, South Australia, Western Australia and Tasmania. In New South Wales, members of the Legislative Council are elected at simultaneous sittings of the members of both Houses, in Queensland there has been no Legislative Council since 1922, and in Tasmania three members of the Council are elected annually (but four in each sixth year) and the Council cannot be dissolved as a whole.

## STATE UPPER HOUSE ELECTIONS.

(a) Not available. (b) Total electors in contested districts.

(ii) *Elections in Earlier Years.* Official Year Book No. 47 and earlier issues contain particulars of the voting at elections for both Upper and Lower State Houses in years prior to those shown above, and some general information is given in the following paragraphs.

3. The Parliament of New South Wales.—The two Houses of Parliament are the Legislative Council (or Upper House) and the Legislative Assembly (or Lower House).

The Legislative Council consists of 60 members. At elections held every third year a group of 15 members is elected for 12 years. The electoral body comprises the members, for the time being, of the two Houses of Parliament, who record their votes by secret ballot at simultaneous sittings of both Houses. Casual vacancies are filled by a like election. Any man or woman who is entitled to vote at the election of members of the Legislative Assembly, and has been resident for at least three years in the Commonwealth of Australia, is eligible for election as a member of the Legislative Council. A referendum was held on 29th April, 1961, on a proposal to abolish the Legislative Council. Of the 2,104,811 electors enrolled, 1,941,199 recorded their votes, 49,364 of which were informal. Of the 1,891,835 formal votes, 802,530 were in favour of abolition and 1,089,305 against.

The Legislative Assembly, which is the more important House, consists of 94 members elected on a system of universal adult suffrage, by secret ballot, for a maximum period of three years. Adult British subjects, men and women, are qualified for enrolment as electors when they have resided in the Commonwealth for a period of six months, in the State for three months, and in any sub-division of an electoral district for one month preceding the date of claim for enrolment. Any person qualified to vote at any State election is eligible to be elected to the Legislative Assembly. Casual vacancies may be filled at by-elections.

Persons are disqualified either as parliamentary members or voters for reasons generally the same as those outlined on page 66.

Since the introduction of responsible government in New South Wales, there have been 38 complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-eighth was dissolved on 16th February, 1959. The thirty-ninth Parliament opened on 21st April, 1959.

The Legislative Assembly elections of 1920, 1922, and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at all later appeals to the people. The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election. The franchise was extended to women (Women's Franchise Act) in 1902, and was exercised by them for the first time in 1904.

**4. The Parliament of Victoria.**—Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, and there was also, until the Legislative Council Reform Act 1950, a difference in the qualifications necessary for members and electors. The number of members in the Upper House is 34, two members being returned for each of the 17 provinces, and in the Lower House, 66, one member being returned for each electorate. In the Legislative Council, the tenure of the seat is for six years, except that one-half of the members who are elected for provinces at any general election for the Council are entitled to hold their seats for a period of only three years, one member for each of the 17 provinces retiring every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years.

Qualifications for membership of the Legislative Council are possessed by any adult natural-born subject of the Queen, or by any adult alien naturalized for five years and resident in Victoria for two years. Entitlement for enrolment as an elector is extended to every adult natural-born or naturalized subject who has resided in Australia for at least six months continuously and in Victoria for at least three months and in any subdivision for at least one month immediately preceding the date of claim for enrolment. These qualifications for membership and electors apply also in respect of the Legislative Assembly. Reasons for disqualification follow the general pattern for Australia (*see* p. 66). Prior to 1951, property or certain professional or academic qualifications were required for membership of, and franchise for, the Legislative Council.

Since the introduction of responsible government in Victoria, there have been forty-one complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the forty-first was dissolved on 1st June, 1961. The forty-second Parliament was opened on 1st August, 1961.

Single voting is observed in elections held for either House, plural voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937. A preferential system of voting (*see* Official Year Book No. 6, p. 1182) was adopted for the first time in Victoria at the Assembly election held in November, 1911. The franchise was extended to women by the Adult Suffrage Act 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

**5. The Parliament of Queensland.**—As stated previously, the Legislative Council in Queensland was abolished in 1922, the date of Royal Assent to the Act being 23rd March, 1922. The Legislative Assembly is composed of 78 members, each elected for a period of three years and each representing an electoral district. The State is divided into three zones—metropolitan, provincial cities and country, having 28, 12 and 38 electoral districts respectively. Prior to 1960 there were 75 members and electorates.

Any person qualified to be enrolled for any electoral district is qualified for election to the Legislative Assembly. Any person not under the age of twenty-one years, who is a natural-born or naturalized British subject with continuous residence within Australia for six months, in Queensland for three months, and in an electoral district for one month prior to making a claim for enrolment, is qualified to enrol as an elector. The classes of persons not qualified to be elected are similar to those for other Australian Parliaments (*see* p. 66).

Since the establishment of responsible government in Queensland, there have been 35 complete Parliaments, the last of which was dissolved on 13th April, 1960. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly, the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date, but he duly attended on 29th May, 1860, and delivered the Opening Address. The thirty-sixth Parliament was opened on 23rd August, 1960.

The election of 1907 was the first State election in Queensland at which women voted, the right being conferred under the Elections Acts Amendment Act 1905. At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. A system of optional preferential voting operated for many years but, in 1942, this was abolished and that of election of the candidate obtaining the highest number of votes in the electorate now operates.

6. **The Parliament of South Australia.**—In this State, there is a Legislative Council composed of twenty members and a House of Assembly with 39 members, both Chambers being elective. For the Legislative Council, the State is divided into five districts each returning four members. The term of office is six years, two members for each district retiring at the end of every three years. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were 46 members representing nineteen districts. The term of office for the House of Assembly is three years.

Any person who is at least thirty years of age, is a British subject or legally made a denizen of the State and who has resided in the State for at least three years is qualified for membership of the Legislative Council. Qualifications for the Council franchise are that a person is at least twenty-one years of age, a British subject, an inhabitant of the State with residence for at least six months prior to the registration of the electoral claim, and that he or she has had certain war service, or possesses property qualifications relating to ownership, leaseholding, or inhabitant occupancy. Any person qualified and entitled to be registered as an elector for the House of Assembly is qualified and entitled for election as a member of that House. Qualifications for enrolment as an elector for the House of Assembly are that a person is at least twenty-one years of age, is a British subject, and has lived continuously in Australia for at least six months, in the State for three months and in an Assembly subdivision for one month immediately preceding the date of claim for enrolment. Provisions in the Constitution for disqualification from membership or from the franchise in respect of either House follow the usual pattern for Australia (*see* p. 66).

Since the inauguration of responsible government in South Australia, there have been 35 complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-fifth Parliament closed on 3rd March, 1959, and the thirty-sixth was opened on 9th June, 1959. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the Constitution (Quinquennial Parliament) Act 1933, but this Act was repealed by the Constitution Act Amendment Act (No. 2) 1939, and the three-year term was reverted to.

South Australia was the first of the States to grant women's suffrage (under the Constitution Amendment Act 1894), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly was first adopted at the 1944 election. A system of preferential voting is in operation.

7. **The Parliament of Western Australia.**—In this State, both Chambers are elective. For the Legislative Council, there are 30 members, each of the ten provinces returning three members. One member for each province retires at the end of every two years. At each biennial election, the member elected holds office for a term of six years, and automatically retires at the end of that period. The Legislative Assembly is composed of 50 members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

Qualifications required for membership of the Legislative Council are the age of at least 30 years, residence in Western Australia for two years and being a natural-born British subject or naturalized for five years prior to election and resident in the State for that period. Qualifications required for Council franchise are the age of at least 21 years, residence in Western Australia for six months, being a natural-born British subject or naturalized for twelve months, and certain property qualifications relating to freehold, leasehold, or householder occupancy. Qualifications required for membership of the Legislative Assembly are the age of at least 21 years, residence in Western Australia for twelve months and being a natural-born British subject or naturalized for five years and resident in the State for two years prior to election. Qualifications required for the franchise are the age of at least 21 years, residence in Western Australia for six months and in an electoral district continuously for three months, and being a natural-born or naturalized British subject. Persons may be disqualified as members or voters for reasons similar to those for other Australian Parliaments (*see* p. 66).

Since the establishment of responsible government in Western Australia, there have been twenty-two complete Parliaments, the first of which was opened on 30th December, 1890. The twenty-second Parliament dissolved on 31st January, 1959, and the twenty-third was opened on 30th June, 1959. A preferential system of voting is in use in Western Australia.

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939.

**8. The Parliament of Tasmania.**—In Tasmania, there are two legislative Chambers, the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the Constitution Act 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning seven members elected under a system of proportional representation which first came into force at the 1909 elections. By the Constitution Act 1936, the life of the Assembly was extended from three to five years.

Persons qualified for election to the Legislative Council must be at least 25 years of age and qualified to vote as Council electors, have been resident in Tasmania for a period of five years at any one time or at least two years immediately preceding the election, and be natural-born subjects of the Queen or naturalized for at least five years. An elector for the Council must be at least twenty-one years of age, a natural-born or naturalized subject and resident in Tasmania for a period of twelve months, with certain freehold or occupancy property qualifications, or the spouse of a person qualified to vote as the owner or occupier of property, or with certain academic, professional, defence force, or war service qualifications. For the House of Assembly, members must be at least twenty-one years of age, have been resident in Tasmania for a period of five years at any one time or for a period of two years immediately preceding the election, and be natural-born subjects of the Queen or naturalized for a period of five years. Electors must be at least twenty-one years of age, natural-born or naturalized subjects and resident in Tasmania for a period of six months continuously. Reasons for disqualification of members or voters are similar to those for other Australian Parliaments (*see* p. 66).

The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been 32 complete Parliaments since the inauguration of responsible government, the thirty-second having been dissolved on 9th April, 1959. The thirty-third Parliament was opened on 2nd June, 1959.

The suffrage was granted to women under the Constitution Amendment Act 1903 and compulsory voting for both Houses came into force on the passing of the Electoral Act in 1928. The system of voting is proportional representation by single transferable vote.

**9. Superannuation Funds of the Parliament of the Commonwealth and of the Australian States.**—Particulars of the main features of the superannuation or retiring allowances funds of the Parliaments of the Commonwealth and the States are contained in earlier issues of the Year Book (*see* List of Special Articles preceding General Index to this volume). For particulars of the financial operations of these schemes *see* Chapter XX.—Private Finance.

### § 3. Administration and Legislation.

**1. The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since Federation.

## COMMONWEALTH PARLIAMENTS.

Number of Parliament.	Date of Opening.	Date of Dissolution.
First .. .. .	9th May, 1901 .. ..	23rd November, 1903
Second .. .. .	2nd March, 1904 .. ..	5th November, 1906
Third .. .. .	20th February, 1907 .. ..	19th February, 1910
Fourth .. .. .	1st July, 1910 .. ..	23rd April, 1913
Fifth .. .. .	9th July, 1913 .. ..	30th July, 1914(a)
Sixth .. .. .	8th October, 1914 .. ..	26th March, 1917
Seventh .. .. .	14th June, 1917 .. ..	3rd November, 1919
Eighth .. .. .	26th February, 1920 .. ..	6th November, 1922
Ninth .. .. .	28th February, 1923 .. ..	3rd October, 1925
Tenth .. .. .	13th January, 1926 .. ..	9th October, 1928
Eleventh .. .. .	9th February, 1929 .. ..	16th September, 1929
Twelfth .. .. .	20th November, 1929 .. ..	27th November, 1931
Thirteenth .. .. .	17th February, 1932 .. ..	7th August, 1934
Fourteenth .. .. .	23rd October, 1934 .. ..	21st September, 1937
Fifteenth .. .. .	30th November, 1937 .. ..	27th August, 1940
Sixteenth .. .. .	20th November, 1940 .. ..	7th July, 1943
Seventeenth .. .. .	23rd September, 1943 .. ..	16th August, 1946
Eighteenth .. .. .	6th November, 1946 .. ..	31st October, 1949
Nineteenth .. .. .	22nd February, 1950 .. ..	19th March, 1951(a)
Twentieth .. .. .	12th June, 1951 .. ..	21st April, 1954
Twenty-first .. .. .	4th August, 1954 .. ..	4th November, 1955
Twenty-second .. .. .	15th February, 1956 .. ..	14th October, 1958
Twenty-third .. .. .	17th February, 1959 .. ..	26th October, 1961
Twenty-fourth .. .. .	20th February, 1962 .. ..	

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

2. **Governors-General and Commonwealth Ministries.**—(i) *Governors-General.* The following statement shows the names of the Governors-General since the inception of the Commonwealth:—

## GOVERNORS-GENERAL.

- Rt. Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW) P.C., K.T., G.C.M.G., G.C.V.O. From 1st January, 1901, to 9th January, 1903.
- Rt. Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17th July, 1902, to 9th January, 1903, (Acting).
- Rt. Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9th January, 1903, to 21st January, 1904.
- Rt. Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21st January, 1904, to 9th September, 1908.
- Rt. Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9th September, 1908, to 31st July, 1911.
- Rt. Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31st July, 1911, to 18th May, 1914.
- Rt. Hon. SIR RONALD CRAUFURD MUNRO FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18th May, 1914, to 6th October, 1920.

- (xxv) CURTIN MINISTRY, 21st September, 1943, to 6th July, 1945.
- (xxvi) FORDE MINISTRY, 6th July, 1945, to 13th July, 1945.
- (xxvii) CHIFLEY MINISTRY, 13th July, 1945, to 1st November, 1946.

---

\* Lieutenant-General Sir John Northcott was granted honorary rank of General while administering the Government of the Commonwealth.

† K.C.V.O., 1954.

COMMONWEALTH MINISTRIES—*continued.*

- (xxviii) CHIFLEY MINISTRY, 1st November, 1946, to 19th December, 1949.  
 (xxix) MENZIES MINISTRY, 19th December, 1949, to 11th May, 1951.  
 (xxx) MENZIES MINISTRY, 11th May, 1951, to 11th January, 1956.  
 (xxxj) MENZIES MINISTRY, 11th January, 1956, to 10th December, 1958.  
 (xxxii) MENZIES MINISTRY, 10th December, 1958.

(b) *Names of Holders of Ministerial Office, to 31st December, 1960.* In Official Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9th February, 1923, to 22nd October, 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9th February, 1923, and 31st July, 1951, showing the names of all persons who held office in each Ministry during that period.

This issue shows only particulars of the latest Menzies Ministry, as constituted on 31st March, 1962. For any subsequent changes see the Appendix to this volume.

## MENZIES MINISTRY—from 10th December, 1958.

(Portfolios from 22nd December, 1961.)

(The State in which each Minister's electorate is situated is shown in parentheses.)

THE HON. W. A. NEILSON, M.H.A.	

4. **Leaders of the Opposition, Commonwealth and State Parliaments.**—The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in March, 1962.

**Leader of the Opposition, Commonwealth and State Parliaments—**

*Commonwealth*—The Hon. A. A. Calwell, M.P.

*New South Wales*—R. W. Askin, M.L.A.

*Victoria*—The Hon. C. P. Stoneham, M.P.

*Queensland*—The Hon. J. E. Duggan, M.L.A.

*South Australia*—F. H. Walsh, M.P.

*Western Australia*—The Hon. A. R. G. Hawke, M.L.A.

*Tasmania*—The Hon. W. A. Bethune, M.H.A.

5. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament during 1960 and 1961 is indicated in alphabetical order in “The Acts of the Parliament of the Commonwealth of Australia passed during the year 1960, in the Second Session of the Twenty-third Parliament of the Commonwealth, with Appendix, Tables and Index”, and in “The Acts of the Parliament of the Commonwealth of Australia passed during the year 1961, in the Third Session of the Twenty-third Parliament of the Commonwealth, with Appendix, Tables and Index”.

A chronological table of Acts passed from 1901 to 1961 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1961 in relation to the several provisions of the Constitution, is furnished in the latter volume. Reference should be made to these for complete information.

6. **Legislation during 1960 and 1961.**—The Acts passed by the Commonwealth Parliament during the years 1960 and 1961 are listed hereunder. In most cases the title of the Act indicates the general scope of the Act, but in some instances brief explanatory notes have been added and/or references given to other parts of this or the previous Year Book. The presence or absence of such references, however, should not be taken as indicative of the relative importance of the Acts concerned, and appropriate chapters of this Year Book should in any case be referred to for further information which may be available there.

The total enactments of the Commonwealth Parliament for a number of years at fairly even intervals since 1901 show a general increase. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939 and 98 in 1961.

*Commonwealth Legislation passed during 1960.*

*Air Navigation Act 1960* (No. 39) amended the *Air Navigation Act 1920–1950* to provide *inter alia* for the establishment of an Aeronautical Information Service, designation of certain aerodromes as international airports, international air licences to fly over Australian territory, penalties for interference with navigational aids, and the making of regulations.

*Air Navigation (Charges) Act 1960* (No. 49).

*Airports (Surface Traffic) Act 1960* (No. 40) provided for regulations for parking, etc., of vehicles at airports.

*Aluminium Industry Act 1960* (No. 81) approved an agreement for the sale of the Aluminium Commission's Works at Bell Bay to the State of Tasmania.

*Antarctic Treaty Act 1960* (No. 48) gave effect to the Antarctic Treaty (*see p. 156 of Year Book No. 47*).

*Apple and Pear Export Charges Act 1960* (No. 80).

*Apple and Pear Organization Act 1960* (No. 79).

*Appropriation Act (No. 2) 1959–60* (No. 33).

*Appropriation Act 1960–61* (No. 50).

*Appropriation (Works and Services) Act (No. 2) 1959–60* (No. 34).

*Appropriation (Works and Services) Act 1960–61* (No. 51).

*Audit Act 1960* (No. 77).

*Australian National University Act 1960* (No. 3) provided for the inclusion of the Canberra University College as the School of General Studies of the University.

*Broadcasting and Television Act 1960* (No. 36) amended the *Broadcasting and Television Act 1942–1956* by re-stating the reasons for vacation of office by Commissioners and employees of the Commission, the insertion of revised provisions for the limitation of ownership or control of television stations, giving power to the Commission to order television films to be made available to a licensee under certain conditions, requiring records to be made of political matter broadcast, and making special provisions for licences for television or broadcast receivers hired or installed in lodging houses.

*Cattle and Beef Research Act 1960* (No. 6) and *Cattle and Beef Research Act (No. 2) 1960* (No. 71) established a Cattle and Beef Research Trust Account and set out purposes for which the fund may be applied.

*Cattle Slaughter Levy Act 1960* (No. 7) imposed on owners of cattle slaughtered a levy not to exceed 2s. per head of cattle.

*Cattle Slaughter Levy Collection Act 1960* (No. 8) made the proprietors of abattoirs agents for collection of the Cattle Slaughter Levy on behalf of the Commonwealth.

*Colonial Light Dues Registration Repeal Act 1960* (No. 12).

*Conciliation and Arbitration Act 1960* (No. 15) increased the number of judges who may be appointed to the Commonwealth Industrial Court from two to three.

*Copper Bounty Act 1960* (No. 31).

*Copper Bounty Act (No. 2) 1960* (No. 100) amended the *Copper Bounty Act 1958* as amended by the *Copper Bounty Act 1960* by providing for reduction or suspension of bounty in certain cases.

*Crimes Act 1960* (No. 84) amended the *Crimes Act 1914–1959* by providing for licences for offenders to be at large and the conditional release of offenders without proceeding to conviction; giving the Courts power to discharge or vary conditions of recognizance; providing for the custody of offenders found to be insane; expanding definitions and penalties for treason, treachery and sabotage, the intimidation of witnesses, coining and counterfeiting, espionage and similar activities; providing for the issue of search warrants, arrest without warrant and search of suspects in cases of espionage; and other miscellaneous provisions.

*Customs Act 1960 (No. 42), Customs Act (No. 2) 1960 (No. 111), Customs Tariff 1960 (No. 22), Customs Tariff (No. 2) 1960 (No. 43), Customs Tariff (No. 3) 1960 (No. 52), Customs Tariff (No. 4) 1960 (No. 98).*

*Customs Tariff (Canada Preference) 1960 (No. 54), Customs Tariff (Canadian Preference) 1960 (No. 23), Customs Tariff (Canadian Preference) (No. 2) 1960 (No. 53).*

*Customs Tariff (Federation of Rhodesia and Nyasaland Preference) 1960 (No. 25), Customs Tariff (Federation of Rhodesia and Nyasaland Preference) (No. 2) 1960 (No. 56).*

*Customs Tariff (New Zealand Preference) 1960 (No. 24), Customs Tariff (New Zealand Preference) (No. 2) 1960 (No. 55), Customs Tariff (New Zealand Preference) (No. 3) 1960 (No. 99).*

*Defence Forces Special Retirement Benefits Act 1960 (No. 68) provided for special retirement benefits for certain members of the Australian Regular Army discharged, or to be discharged, on account of a reduction of establishment.*

*Excise Tariff 1960 (No. 26), Excise Tariff (No. 2) 1960 (No. 57).*

*Explosives Act 1960 (No. 66) amended the Explosives Act 1952–1957 to extend its application to explosives owned or controlled by allied governments or defence forces.*

*Flax Industry Repeal Act 1960 (No. 5).*

*Income Tax and Social Services Contribution Act 1960 (No. 20), Income Tax and Social Services Contribution Act (No. 2) 1960 (No. 59).*

*Income Tax and Social Services Contribution Assessment Act 1960 (No. 18), Income Tax and Social Services Contribution Assessment Act (No. 2) 1960 (No. 58), Income Tax and Social Services Contribution Assessment Act (No. 3) 1960 (No. 108).*

*Income Tax (International Agreements) Act 1960 (No. 19).*

*Income Tax (International Agreements) Act (No. 2) 1960 (No. 29) amended the Income Tax (International Agreements) Act 1953–1959 as amended by the Income Tax (International Agreements) Act 1960, to implement the Agreement between the Australian and New Zealand Governments for the avoidance of double taxation.*

*Indus Basin Development Fund Agreement Act 1960 (No. 87) provided for payment from Consolidated Revenue of Australia's contribution under the Indus Basin Development Fund Agreement (India and Pakistan).*

*Insurance Act 1960 (No. 76) amended the Insurance Act 1932–1937 to provide new conditions for lodging of deposits by persons carrying on insurance business, to require information and returns to be furnished, and relevant matters.*

*International Development Association Act 1960 (No. 21) approved acceptance by Australia of membership in the International Development Association (see p. 1187 of Year Book No. 47).*

*International Monetary Agreements Act 1960 (No. 14) approved a change in Australia's quota in the International Monetary Fund.*

*International Organizations (Privileges and Immunities) Act 1960 (No. 103).*

*Judges' Remuneration Act 1960 (No. 110).*

*Judiciary Act 1960 (No. 32), Judiciary Act (No. 2) 1960 (No. 109).*

*Loan (Australian National Airlines Commission) Act 1960 (No. 86) approved the raising of a loan in the United States for purchase of aircraft for the Australian National Airlines Commission.*

*Loan (Housing) Act 1960 (No. 62) approved the raising of £37,200,000 for housing purposes.*

*Loan (Qantas Empire Airways Limited) Act 1960 (No. 78) approved the raising of a loan in the United States for the purchase of Boeing aircraft for Qantas Empire Airways Limited.*

*Meat Export Control Act 1960 (No. 9) amended the Meat Export Control Act 1935–1953 by establishing a Meat Industry Advancement Fund for improving the quality of exported meat or stimulating the meat export trade.*

*Meat Export Control Act (No. 2) 1960 (No. 72).*

*National Capital Development Commission Act 1960 (No. 83).*

*National Library Act 1960 (No. 69)* established the National Library of Australia (*see* p. 619 of Year Book No. 47).

*National Service (Discharge of Trainees) Act 1960 (No. 28)* provided for the discharge of National Service Trainees still undergoing training (*see* p. 1097 of Year Book No. 47).

*Nationality and Citizenship Act 1960 (No. 82)* amended the Nationality and Citizenship Act 1948-1959 in respect of the statement required in support of an application for registration or naturalization.

*Papua and New Guinea Act 1960 (No. 4)* provided for a guarantee by the Commonwealth in respect of public loans in the Territory of Papua and New Guinea.

*Papua and New Guinea Act (No. 2) 1960 (No. 47)* amended the Papua and New Guinea Act 1949-1957 as amended by the Papua and New Guinea Act 1960, to provide for a greater degree of self government in the Territory (*see* p. 131 of Year Book No. 47).

*Parliamentary Proceedings Broadcasting Act 1960 (No. 35)* provided for the making of sound recordings of parliamentary proceedings (c.f. Broadcasting and Television Act 1960).

*Patents Act 1960 (No. 107)* amended the Patents Act 1952-1955 by making changed provisions for the acceptance of applications and specifications, the time of acceptance, amendments allowable, applications under international conventions, fees, and associated matters.

*Pollution of the Sea by Oil Act 1960 (No. 11)* provided for giving effect to the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, by prohibiting the discharge of oils, etc., into certain sea areas and providing for powers of inspection, jurisdiction of courts and regulations to enforce this prohibition.

*Post and Telegraph Act 1960 (No. 85)* repealed Section 21 of the Post and Telegraph Act 1901-1950 which provided for special postage rates on letters for members of the defence forces.

*Public Service Act 1960 (No. 105)* amended the Public Service Act 1922-1958, principally in respect of provisions relating to the appointment and recruitment of officers. In addition to educational tests for appointment, provision was made for selection tests to be applied in some cases, and returned soldiers have to pass normal entrance examinations, though preference in appointment still applies.

*Public Works Committee Act 1960 (No. 13)* amended the Public Works Committee Act 1913-1953 and provided for the Committee to review its reports and make further reports to the House of Representatives.

*Pyrites Bounty Act 1960 (No. 102)* provided for payment of a bounty on the production of pyrites for use in the manufacture of sulphuric acid.

*Repatriation Act 1960 (No. 44)* amended the Repatriation Act 1920-1959 by raising the rates of pension payable under the Act.

*Salaries (Statutory Offices) Adjustment Act 1960 (No. 17)* provided for the payment of increased salaries to the holders of certain statutory offices.

*Sales Tax Act (No. 1) 1960 (No. 89), Sales Tax Act (No. 2) 1960 (No. 90), Sales Tax Act (No. 3) 1960 (No. 91), Sales Tax Act (No. 4) 1960 (No. 92), Sales Tax Act (No. 5) 1960 (No. 93), Sales Tax Act (No. 6) 1960 (No. 94), Sales Tax Act (No. 7) 1960 (No. 95), Sales Tax Act (No. 8) 1960 (No. 96), Sales Tax Act (No. 9) 1960 (No. 97).*

*Sales Tax (Exemptions and Classifications) Act 1960 (No. 65), Sales Tax (Exemptions and Classifications) Act (No. 2) 1960 (No. 88).*

*Seamen's Compensation Act 1960 (No. 67)* amended The Seamen's Compensation Act 1911-1959 to include seamen employed for the delivery voyage of a ship in those waters covered by the Act.

*Seamen's War Pensions and Allowances Act 1960 (No. 46).*

*Snowy Mountains Hydro-electric Authority Act 1960 (No. 104)* extended the term of office of the Commissioner until 26th April, 1964.

*Social Services Act* 1960 (No. 45) amended the Social Services Act 1947–1959 by substituting a new means test for pensioners (see pp. 691 and 703 of Year Book No. 47) and in other related provisions.

*State Grant (Special Assistance to South Australia) Act* 1960 (No. 16) (see Chapter XXI).

*States Grants (Special Assistance) Act* 1960 (No. 60) (see Chapter XXI).

*States Grants (Universities) Act* 1960 (No. 106) (see Chapter XXI).

*Stevedoring Industry Charge Assessment Act* 1960 (No. 61) amended the Stevedoring Industry Charges Assessment Act 1947–1958 by providing for exemption from the charge in respect of permanent employees.

*Sugar Agreement Act* 1960 (No. 63) approved an agreement made between the Commonwealth and the State of Queensland fixing the price of sugar in Australia.

*Sulphuric Acid Bounty Act* 1960 (No. 30), *Sulphuric Acid Bounty Act (No. 2)* 1960 (No. 101).

*Supply Act* 1960–61 (No. 37).

*Supply (Works and Services) Act* 1960–61 (No. 38).

*Tariff Board Act* 1960 (No. 41) amended the Tariff Board Act 1921–1958 by inserting new provisions relating to the appointment of Deputy Chairman and Acting Chairman, the delegation of powers by the Chairman and the appointment of persons to act in the place of ill, absent, etc., members in relation to an inquiry and report, and by providing for action pending receipt and consideration of a report by the Board.

*Taxation Administration Act* 1960 (No. 1).

*Telephonic Communications (Interception) Act* 1960 (No. 27) prohibited the interception of telephonic communications except when specially authorized in the interests of the security of the Commonwealth.

*Weights and Measures (National Standards) Act* 1960 (No. 64) provided for the establishment and use throughout Australia of uniform units of measurement and uniform standards of measurement of physical quantities.

*Whaling Act* 1960 (No. 10) repealed the Whaling Act 1935 and the Whaling Act 1948 and made provisions for regulation of the whaling industry by restricting the number and types of whales which may be killed, licensing of catchers, appointment of inspectors, etc. (see Chapter XXVI).

*Wheat Industry Stabilization Act* 1960 (No. 2) (see Chapter XXII).

*Wool Research Act* 1960 (No. 73) (see Chapter XXIII).

*Wool Tax Act (No. 1)* 1960 (No. 74) (see Chapters XXI and XXIII).

*Wool Tax Act (No. 2)* 1960 (No. 75) (see Chapters XXI and XXIII).

*Wool Use Promotion Act* 1960 (No. 70) (see Chapter XXIII).

#### *Commonwealth Legislation passed during 1961.*

*Air Navigation Act* 1961 (No. 72) amended the Air Navigation Act 1920–1960 by approving the ratification of a protocol amending the Chicago Convention of the International Civil Aviation Organization.

*Airlines Agreement Act* 1961 (No. 70) amending the Civil Aviation Agreement Act 1952–1957 by approving an agreement between the Commonwealth, the Australian National Airlines Commission, Ansett Transport Industries Limited and Australian National Airways Proprietary Limited.

*Appropriation Act (No. 2)* 1960–61 (No. 30).

*Appropriation Act* 1961–62 (No. 58).

*Appropriation (Works and Services) Act (No. 2)* 1960–61 (No. 35).

*Appropriation (Works and Services) Act* 1961–62 (No. 59).

*Audit Act 1961* (No. 89) amended the *Audit Act 1901-1960* by inserting a new section delimiting the application of the Act; and amending sections relating to moneys outside Australia and the jurisdiction of courts in respect of offences committed outside Australia and various other sections.

*Australian National Airlines Act 1961* (No. 71) amended the Australian National Airlines Act 1945-1959 in respect of the financial policy of the Australian National Airlines Commission and added a section setting out provisions for insurance procedure to be adopted by the Commission.

*Beaches, Fishing Grounds and Sea Routes Protection Act 1961* (No. 62).

*Broadcasting and Television Act 1961* (No. 32) amended the section of the Broadcasting and Television Act 1960 relating to hirer's licences.

*Cattle and Beef Research Act 1961* (No. 50) amended the Cattle and Beef Research Act 1960 by inserting amended provisions for the expenditure of moneys standing to the credit of the Research Account.

*Cattle Slaughter Levy Collection Act 1961* (No. 48) amended the Cattle Slaughter Levy Collection Act 1960 by providing for deduction of the levy from the purchase price payable by slaughterers and for the listing of recognized slaughterers.

*Cattle Slaughter Levy (Suspension) Act 1961* (No. 49) provided for the suspension of the Cattle Slaughter Levy from 14th October, 1960, to 13th October, 1961.

*Cellulose Acetate Flake Bounty Act 1961* (No. 33).

*Cellulose Acetate Flake Bounty Act (No. 2) 1961* (No. 57).

*Coal Excise Act 1961* (No. 19).

*Coal Loading Works Agreement (New South Wales) Act 1961* (No. 93) approved an agreement between the Commonwealth and the State of New South Wales with respect to certain coal loading works.

*Commonwealth Banks Act 1961* (No. 75) increased the capital of the Commonwealth Development Bank to £5 million.

*Commonwealth Electoral Act 1961* (No. 26) made a number of minor amendments to the Commonwealth Electoral Act 1918-1953.

*Commonwealth Serum Laboratories Act 1961* (No. 38) provided for the establishment of the Commonwealth Serum Laboratories Commission and transferred direction and control of the Commonwealth Serum Laboratories from the Department of Health to the Commission.

*Conciliation and Arbitration Act 1961* (No. 40).

*Customs Tariff* (1961) (No. 22).

*Customs Tariff (No. 2) 1961* (No. 51).

*Customs Tariff (Canada Preference) 1961* (No. 23).

*Customs Tariff (Canada Preference) (No. 2) 1961* (No. 52).

*Customs Tariff (Dumping and Subsidies) Act 1961* (No. 18) repealed the Customs Tariff (Industries Preservation) Act 1921-1957 and provided for the imposition of special customs duties where goods produced outside Australia are being sold at a price less than normal where the importation of such goods threatens an Australian industry ("dumping duty"), or where goods manufactured outside Australia and exported to Australia have been subsidized and where their importation threatens an Australian industry ("countervailing duty"). The Act also provided for "emergency duty" where goods manufactured or produced in a particular country are being imported into Australia under such conditions as to threaten Australian producers or manufacturers of similar goods.

*Customs Tariff (Federation of Rhodesia and Nyasaland Preference) 1961* (No. 53).

*Customs Tariff (New Zealand) Preference (No. 1) 1961* (No. 24), *Customs Tariff (New Zealand) Preference (No. 2) 1961* (No. 54), *Customs Tariff (New Zealand) Preference (No. 3) 1961* (No. 56).

*Customs Tariff Validation Act* 1961 (No. 97) validated collections under certain Customs Tariff proposals.

*Defence Forces Retirement Benefits Act* 1961 (No. 15) amended the Defence Forces Retirement Benefits Act 1948–1959 to provide for reduced pensions in certain cases and for gratuities in certain cases of retirement or invalidity.

*Defence Forces Retirement Benefits (Pension Increases) Act* 1961 (No. 87).

*Defence Pay Act* 1961 (No. 34) validated certain payments made to or in respect of members of the Defence Forces and to persons employed in a civil capacity under the Naval Defence Act 1910–1952.

*Excise Tariff* 1961 (No. 21), *Excise Tariff (No. 2)* 1961 (No. 55).

*Explosives Act* 1961 (No. 65) repealed the Explosives Act 1952–1960 and provided for the making of regulations for the handling of explosives for defence purposes and safety measures to be observed in relation thereto, for orders relating to the berthing of vessels, the control of Commonwealth explosives areas and miscellaneous general provisions.

*Exports Payments Insurance Corporation Act* 1961 (No. 14) amended the Export Payments Insurance Corporation Act 1956–1959 to allow the undertaking of contracts where the contingent liability was greater than the Corporation would normally undertake, provided the Minister approved the contract in writing after satisfying himself that the contract was in the national interest.

*Foot and Mouth Disease Act* 1961 (No. 44) established a Foot and Mouth Disease Eradication Trust Account in respect of the Australian Capital Territory and the Northern Territory for payment of compensation in respect of stock in infected areas destroyed or dying from Foot and Mouth Disease.

*Gold Mining Industry Assistance Act* 1961 (No. 66).

*Housing Agreement Act* 1961 (No. 31) authorized the making of agreements between the Commonwealth and any State or States for the grant of financial assistance by the Commonwealth for the purpose of housing and authorized the Treasurer to make advances in accordance with or in advance of such agreement.

*Income Tax and Social Services Contribution Act* 1961 (No. 95).

*Income Tax and Social Services Contribution Assessment Act* 1961 (No. 17) amended the Income Tax and Social Services Contribution Assessment Act 1936–1960 to exempt the superannuation business of life assurance companies from assessable income under certain conditions and to allow certain deductions from the assessable income of life assurance companies in respect of the cost of public securities included in their assets, and other related concessions.

*Income Tax and Social Services Contribution Assessment Act (No. 2)* 1961 (No. 27) provided that export market development expenditure should be an allowable deduction for the purpose of income tax.

*Income Tax and Social Services Contribution Assessment Act (No. 3)* 1961 (No. 94) provided that compensation for death or destruction of live-stock shall not form part of assessable income and added provision for deductions in respect of calls paid by certain holding companies.

*International Finance Corporation Act* 1961 (No. 69).

*Judges' Pensions Act* 1961 (No. 13).

*Life Insurance Act* 1961 (No. 29) amended the Life Insurance Act 1945–1959 to provide for the setting up of statutory funds in respect of the superannuation business of life insurance companies.

*Lighthouse Act* 1961 (No. 63).

*Loan (Housing) Act* 1961 (No. 60).

*Marriage Act* 1961 (No. 12) provided for the operation of uniform marriage law throughout the Commonwealth.

*National Health Act 1961 (No. 16).*

*Navigation Act 1961 (No. 96)* amended the Navigation Act 1912–1958 in respect of deserting seamen, the reporting of accidents, the cancellation or suspension of certificates and appeals against such cancellation, and other matters mostly of a routine nature.

*Northern Territory (Administration) Act 1961 (No. 68).*

*Northern Territory Supreme Court Act 1961 (No. 11)* abolished the former Supreme Court of the Northern Territory and created a new Supreme Court in its stead, provided for continuity of proceedings, the appointment of judges' sittings, jurisdiction, the concurrent administration of law in equity, registries, general matters of procedure and miscellaneous matters.

*Pay-roll Tax Assessment Act 1961 (No. 28)* amended the Pay-roll Tax Assessment Act 1941–1957 by making provision for rebate of tax where an employer has an increase in export sales after allowing for purchases from suppliers of component parts.

*Petroleum Search Subsidy Act 1961 (No. 74)* extended the scope of the Petroleum Search Subsidy Act 1959.

*Post and Telegraph Act 1961 (No. 64).*

*Quarantine Act 1961 (No. 61)* amended the Quarantine Act 1908–1950 in respect of powers of inspection by Quarantine Officers, medical inspections and examinations.

*Queensland Grant (Beef Cattle Roads) Act 1961 (No. 90)* provided for the grant of financial assistance to the State of Queensland for works in connexion with certain roads to be used for the transport of beef cattle.

*Railway Agreement (Queensland) Act 1961 (No. 92)* approved an agreement between the Commonwealth and the State of Queensland for financial assistance to that State for the reconstruction of the Collinsville-Townsville-Mount Isa Railway.

*Railway Agreement (Western Australia) Act 1961 (No. 67)* approved an agreement between the Commonwealth and the State of Western Australia for financial assistance to that State for the construction of a standard gauge railway between Kalgoorlie and Perth and Koolyanobbing and Kwinana.

*Railway Equipment Agreement (South Australia) Act 1961 (No. 98)* approved an agreement between the Commonwealth and the State of South Australia for financial assistance to that State for the purchase of diesel-electric locomotives and ore wagons for use between Port Pirie and Broken Hill.

*Repatriation Act 1961 (No. 46).*

*Sales Tax Act (No. 1) 1961 (No. 2), Sales Tax Act (No. 1a) 1961 (No. 77), Sales Tax Act (No. 2) 1961 (No. 3), Sales Tax Act (No. 2a) 1961 (No. 78), Sales Tax Act (No. 3) 1961 (No. 4), Sales Tax Act (No. 3a) 1961 (No. 79), Sales Tax Act (No. 4) 1961 (No. 5), Sales Tax Act (No. 4a) 1961 (No. 80), Sales Tax Act (No. 5) 1961 (No. 6), Sales Tax Act (No. 5a) 1961 (No. 81), Sales Tax Act (No. 6) 1961 (No. 7), Sales Tax Act (No. 6a) 1961 (No. 82), Sales Tax Act (No. 7) 1961 (No. 8), Sales Tax Act (No. 7a) 1961 (No. 83), Sales Tax Act (No. 8) 1961 (No. 9), Sales Tax Act (No. 8a) 1961 (No. 84), Sales Tax Act (No. 9) 1961 (No. 10), Sales Tax Act (No. 9a) 1961 (No. 85).*

*Sales Tax (Exemptions and Classifications) Act 1961 (No. 1), Sales Tax (Exemptions and Classifications) Act (No. 2) 1961 (No. 76).*

*Seamen's War Pensions and Allowances Act 1961 (No. 47).*

*Social Services Act 1961 (No. 45).*

*States Grants (Coal Mining Industry Long Service Leave) Act 1961 (No. 20).*

*States Grants (Special Assistance) Act 1961 (No. 88) (see Chapter XXI).*

*Stevedoring Industry Act 1961 (No. 39)* amended the Stevedoring Industry Act 1956–1957 by specifying ports as continuous or seasonal, by registering certain waterside workers as irregular workers, by providing for long service leave for waterside workers and other related matters,

*Superannuation (Pension Increases) Act 1961 (No. 86).*

*Supply Act 1961–62 (No. 36).*

*Supply (Works and Services) Act 1961–62 (No. 37).*

*War Service Homes Act 1961 (No. 73)* amended the War Service Homes Act 1918–1956 to provide for discharge of liabilities for rates, etc., or improvements to the property from money held by the Director surplus to instalments due, and by amending provisions relating to the resumption and transfer of properties.

*Western Australian Grant (Beef Cattle Roads) Act 1961 (No. 91)* provided for the grant of financial assistance to the State of Western Australia for works in connexion with certain roads to be used for the transport of beef cattle.

*Wine Overseas Marketing Act 1961 (No. 25).*

*Wool Tax Act (No. 1) 1961 (No. 41), Wool Tax Act (No. 2) 1961 (No. 42)* (see Chapters XXI and XXIII.).

*Wool Tax Assessment Act 1961 (No. 43)* (see Chapters XXI. and XXIII.).

#### § 4. Commonwealth Government Departments.

Official Year Book No. 37 contains, on pages 76–86, a list of the Commonwealth Government Departments as at 31st March, 1947, showing details of the matters dealt with by each Department, and the Acts administered by the Minister of each Department, and Year Book No. 39 contains, on pages 100–1, a description of major changes in Departmental structure from 1947 to 1951. Apart from the structural changes and transfers of functions described therein, there are several Departments which, in the interval between 1947 and 1956, were developed to cope with changing circumstances affecting the particular Department. The Prime Minister's Department, the Department of Immigration, and the Department of Social Services were among those whose organizations were thus altered. On page 81 of Official Year Book No. 43 details were shown of a major re-organization, in January, 1956, of the functions of the Departments of Commerce and Agriculture and Trade and Customs, resulting in the creation of the Departments of Trade, Customs and Excise, and Primary Industry. The reference to the Department of Trade's control of statutory marketing boards appearing in that issue should have been omitted, as this function was assumed by the Department of Primary Industry at the re-organization. In April, 1958, the Departments of Supply and Defence Production were amalgamated under the name of Department of Supply, consequent on the report of the Morshead Committee on the organization of the Defence group of Departments.

#### § 5. Cost of Parliamentary Government.

The tables in this section are intended to represent the expenditure incurred in the operation of the Parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; they do not attempt to cover the expenditure on Commonwealth and State administration generally.

Comparison between individual items should be made with caution because of differences in accounting and presentation which prevent the uniform classification of all items of expenditure.

In order to avoid incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, and carried out at the request of the Government.

The following statement shows this expenditure for the Commonwealth and for each State, as well as the cost per head of population, for the year ended 30th June, 1960.

COST OF PARLIAMENTARY GOVERNMENT, 1959-60.

**§ 6. Government Employees.**

Information concerning the number of employees of Australian Government Authorities may be found in Chapter XII.—Labour, Wages and Prices.

## CHAPTER IV.

## LAND TENURE AND SETTLEMENT.

## § 1. Introduction.

Descriptions of the land tenure systems of the several States and the internal Territories, and conspectuses of land legislation in force and of the systems of land tenure, have appeared in earlier issues of the Year Book (*see* List of Special Articles, etc., preceding General Index to this volume).

The land legislation in force in the several States may be classified broadly under five major types of land enactments, namely, Crown Lands Acts, Closer Settlement Acts, Mining Acts, Returned Service Personnel Settlement Acts, and Advances to Settlers Acts, but within the groupings there is, of course, a wide variety of individual Acts. In the two internal Territories, the legislation relating to lands is embodied in various Ordinances.

In each of the States, there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown Lands. In the Northern Territory, the Administrator, under the control of the Minister for Territories, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory, the administration of the Leases Ordinances is in the hands of the Minister for the Interior.

In each of the States, there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory, there are several ordinances relative to mining.

As with land legislation, land tenures may be classified under broad headings; these indicate the nature of the tenure and comprise:—Free Grants and Reservations, Unconditional Purchases of Freehold, Conditional Purchases of Freehold, Leases and Licences under Land Acts, Closer Settlement, Leases and Licences under Mining Acts, and Settlement of Returned Service Personnel.

The following sections contain figures showing the extent of the different tenures in the several States and Territories, together with some general descriptive matter.

## § 2. Free Grants and Reservations.

1. New South Wales.—(i) *Free Grants.* Crown lands may, by notification in the *Gazette*, be dedicated for public purposes and be granted therefor in fee-simple. Such lands may be placed under the care and management of trustees, not less than three nor more than seven in number, appointed by the Minister.

(ii) *Reservations.* Temporary reservations of Crown lands from sale or lease may be made by the Minister.

(iii) *Areas Granted and Reserved.* During 1959–60, 174,813 acres were permanently reserved or dedicated for miscellaneous recreation reserves and similar purposes. The areas reserved at 30th June, 1960, were as follows:—For travelling stock, 5,087,685 acres; forest reserves, 1,561,126 acres; water and camping reserves, 796,594 acres; mining reserves, 1,042,976 acres; for recreation and parks, 683,596 acres; other reserves, 6,784,010 acres; total, 15,955,987 acres.

2. Victoria.—(i) *Free Grants.* The Governor may grant, convey or otherwise dispose of Crown lands for public purposes, if such lands were permanently reserved for public purposes prior to 18th October, 1929.

(ii) *Reservations.* The Governor may temporarily or permanently reserve from sale, lease or licence any Crown lands required for public purposes.

(iii) *Areas Granted and Reserved.* During 1960, 957 acres were granted without purchase. The areas both temporarily and permanently reserved at the end of 1960 were as follows:—For roads, 1,643,284 acres; water reserves, 316,261 acres; agricultural colleges, etc., 8,434 acres; forest and timber reserves, 5,721,332 acres; reserves in the mallee, 410,000 acres; other reserves, 542,954 acres; total, 8,642,265 acres.

3. **Queensland.**—(i) *Free Grants.* The Governor may grant in trust any Crown land which is or may be required for public purposes. Under the Irrigation Acts, land to be used for the purpose of any undertaking under the Acts may be vested in fee-simple in the Commissioner of Irrigation and Water Supply.

(ii) *Reservations.* The Governor may reserve from sale or lease, either temporarily or permanently, any Crown land which is or may be required for public purposes. Reserved lands may be placed under the control of trustees who are empowered to lease them, with the approval of the Minister, for not more than 21 years.

Under the Forestry Act of 1959, which repealed the State Forests and National Parks Acts, the Governor may permanently reserve any Crown lands and declare them to be a State Forest, a National Park, or a Scenic Area.

(iii) *Areas Granted and Reserved.* During 1960, the area granted in fee-simple without payment was 275 acres, 2,227,243 acres were set apart as reserves, and the area in reserves cancelled was 2,187,913 acres. The total area reserved, including roads, at the end of 1960 was as follows:—Timber reserves, 3,055,740 acres; for State forests and national parks, 5,964,753 acres; aboriginal reserves, 6,540,717 acres; for streets, surveyed roads and stock routes, 3,812,035 acres; general reserves, 5,628,923 acres; total, 25,002,168 acres.

4. **South Australia.**—(i) *Free Grants.* The Governor may dedicate Crown lands for any public purpose and grant the fee-simple of such lands, with the exception of foreshores and lands for quays, wharves or landing-places, which are inalienable in fee-simple from the Crown.

(ii) *Reservations.* The Governor may reserve Crown lands for the use and benefit of aboriginals, military defence, forest reserves, railway stations, park lands or any other purpose that he may think fit.

(iii) *Areas Granted and Reserves.* During 1959–60, free grants were issued for an area of 1,268 acres, and reserves comprising 3,051 acres were proclaimed. At 30th June, 1960, the total area of surveyed roads, railways and other reserves was 22,746,680 acres, including 18,210,654 acres set apart as aboriginal reserves.

5. **Western Australia.**—(i) *Free Grants.* The Governor may dispose of, in such manner as for the public interest may seem best, any lands vested in the Crown for public purposes, and may grant the fee-simple of any reserve to secure the use thereof for the purpose for which such reserve was made.

(ii) *Reservations.* The Governor may reserve any lands vested in the Crown for public purposes. Areas not immediately required may be leased by the Governor for periods up to 10 years. Reserves may be placed under the control of a local authority or trustees, with power to lease them for a period not exceeding 21 years, or may be leased for 99 years. Temporary reserves may also be proclaimed.

(iii) *Areas Granted or Reserved.* During the year ended 30th June, 1960, approximately 43,584 acres were reserved for various purposes. At 30th June, 1960, the total area reserved was 59,860,445 acres, comprising State forests, 4,329,514 acres, timber reserves, 1,768,303 acres and other reserves 53,762,628 acres.

6. **Tasmania.**—(i) *Free Grants.* No mention is made in the Crown Lands Act respecting free grants of land, and it is expressly stated that no lands may be disposed of as sites for religious purposes except by way of sale under the Act. Under the Returned Soldiers' Settlement Act 1916, returned soldiers who applied prior to 31st March, 1922, were eligible to receive free grants of Crown land not exceeding £100 each in value, but these grants were conditional on the land being adequately improved.

(ii) *Reservations.* The Governor in Council may except from sale or lease, and reserve to Her Majesty any Crown land for public purposes, and vest for such term as he thinks fit any land so reserved in any person or corporate body. Any breach or non-fulfilment of the conditions upon which such land is reserved renders it liable to forfeiture. A school allotment may also be reserved.

7. **Northern Territory.**—(i) *Reservations.* The Governor-General may resume for public purposes any Crown lands not subject to any right of, or contract for, purchase, and may reserve, for the purpose for which they are resumed, the whole or any portion of the lands so resumed.

(ii) *Areas Reserved.* The total area of reserves at 30th June, 1960, was 59,591,280 acres.

8. Summary.—The following table shows the total areas reserved in each State, and the grand totals, for the years 1956 to 1960.

**AREAS RESERVED.**  
(’000 Acres.)

(a) At 30th June.

(b) At 31st December.

(c) Not available.

(d) Excludes Tasmania.

### § 3. Unconditional Purchases of Freehold.

1. New South Wales.—(i) *Auction Purchases.* Crown lands, not exceeding in the aggregate 200,000 acres in any one year, may be sold by public auction in areas not exceeding half an acre for town lands, 20 acres for suburban lands, and 640 acres for country lands, at the minimum upset price of £8, £2 10s., and 15s. an acre respectively. At least 10 per cent. of the purchase money must be paid at the time of sale, and the balance within three months, or the Minister may allow the payment of such balance to be deferred for a period not exceeding ten years, 4 per cent. interest being charged. Town blocks in irrigation areas may also be sold by auction.

(ii) *After-auction Purchases.* In certain cases, land offered at auction and not sold may be purchased at the upset price. A deposit in accordance with the terms and conditions under which the land was previously offered must be lodged, and, if the application be approved by the Minister, the balance of purchase money is payable as required by the specified terms and conditions.

(iii) *Special Purchases.* In certain circumstances, land may be sold in fee-simple, the purchaser paying the cost of survey and of reports thereon, in addition to the purchase money as determined by the local Land Board.

(iv) *Improvement Purchases.* The owner of improvements in land in authorized occupation by residence under any Mining Act or the Western Lands Act of land within a gold-field or mineral field may purchase such land without competition at a price determined by the local Land Board, but at not less than £8 an acre for town lands or £2 10s. an acre for other lands. The area must not exceed one-quarter of an acre within a town or village, or two acres elsewhere, and no person may purchase more than one such area within three miles of a similar prior purchase by him.

(v) *Road Purchases.* Land from roads that are closed may, with certain exceptions be sold to the owners of adjoining lands at a value determined by the local Land Board.

(vi) *Areas Sold.* During the year ended 30th June, 1960, the total area sold was 537 acres, of which 42 acres were sold by auction and five acres as after auction purchases, while 11 acres were sold as improvement purchases, 352 acres as road purchases and 127 acres as special purchases.

2. Victoria.—(i) *General.* Lands, not exceeding 100,000 acres in any one year, specially classed for sale by auction, may be sold by auction in fee-simple at an upset price of not less than £1 an acre. The purchaser must pay the survey fee at the time of the sale, together with a deposit of 12½ per cent. of the whole price; the residue is payable in equal half-yearly instalments with interest. Any unsold land in a city, town or borough area, areas specially classed for sale, isolated pieces of land not exceeding 150 acres in area, and sites for churches or charitable purposes, if not more than three acres in extent, may be sold by auction on the same terms. Swamp or reclaimed lands may also be sold by auction, subject to the condition that the owner keeps open all drains, etc., thereon.

(ii) *Areas Sold at Auction and by Special Sales.* During 1960, a total of 1,527 acres was disposed of under this tenure, 1,337 acres being country lands and 190 acres town and suburban lands.

3. **Queensland.**—From 1917 to 1929, the law precluded land being made available for any class of selection which gave the selector the right to acquire the freehold title. Amending legislation giving power to make land available under freehold tenures was passed in 1929. This provision was repealed in 1932, but restored in 1957.

4. **South Australia.**—(i) *Sales by Auction.* The following lands may be sold by auction for cash:—(a) special blocks; (b) Crown lands which have been offered for lease and not taken up within two years; (c) town lands; and (d) suburban lands which the Governor excepts from the operations of the Land Board. A purchaser must pay 20 per cent. of the purchase money in cash, and the balance within one month or within such extended time as the Commissioner of Crown Lands may allow. Town lands may be sold subject to the condition that they cannot be transferred or mortgaged within six years without the consent of the Commissioner. If the Commissioner of Crown Lands so determines, town lands may also be offered at auction on terms and the buyer may, at his option, purchase the lands for cash or on agreement for sale and purchase.

(ii) *Areas Sold, etc.* During the year ended 30th June, 1960, the area of town lands and special blocks sold by auction was 15 acres. In addition, 75,236 acres were sold at fixed prices, and purchases on credit of 23,976 acres were completed, making a total of 99,227 acres.

5. **Western Australia.**—(i) *Sales by Auction.* Town, suburban and village lands may be sold by auction after being surveyed into lots and notified in the *Gazette*. They may also be disposed of after being exempted from auction or after being passed in at auction. Ten per cent. of the purchase-money must be paid in cash, together with the value of any improvements, and the balance in four equal quarterly instalments. Suburban land must be fenced within two years, and no Crown grant may be issued until the land is fenced.

(ii) *Areas Sold.* During the year ended 30th June, 1960, the area of town and suburban allotments sold by auction was 259 acres in 244 allotments.

6. **Tasmania.**—(i) *Sales by Auction.* Lands may be sold by auction.

(ii) *After-Auction Sales.* Lands, which, after having been offered at auction, have not been sold, may be sold at the upset price by private contract.

(iii) *Sales of Land in Mining Towns.* Any person being the holder of a residence licence or a business licence who shall be in lawful occupation of any residence area or business area, and who shall be the owner of buildings and permanent improvements upon such land of a value equal to or greater than the upset price of such area, shall be entitled to purchase such area at the upset price at any time prior to the day on which such area is to be offered for sale as advertised. The upset price for such area shall be determined by valuation, excluding the value of improvements, cost of survey, and of grant deed. The area which may be so purchased must not exceed one-quarter of an acre.

#### § 4. Conditional Purchases of Freehold.

1. **New South Wales.**—At 30th June, 1960, the total number of conditional purchases of various types in existence was 26,930, covering an area of 9,358,969 acres. During the year, deeds were issued for 701,104 acres, bringing the total acreage for which deeds had been issued to 37,652,932 at 30th June, 1960.

2. **Victoria.**—The area purchased conditionally in 1960, excluding selections in the Mallee country, was 14,421 acres, all with residence. The number of selectors was 64. In the Mallee, 24,111 acres were purchased conditionally in 1960. The number of selectors was 23.

3. **Queensland.**—The following selections were made freehold during 1960:—agricultural farms, 177,589 acres, prickly pear selections, 27,601 acres, and prickly pear development selections, 17,930 acres. During 1960, an area of 7,369 acres was taken up as agricultural farms.

4. **South Australia.**—During 1959–60, 1,072 acres were allotted under agreements to purchase, comprising Eyre Peninsula Railway Lands, 11 acres, Murray Railway Lands, 45 acres, Town Lands, two acres, and other Crown Lands 1,014 acres.

5. Western Australia.—During the year ended 30th June, 1960, the number of holdings conditionally alienated was 518, all of which were conditional purchases by deferred payments, involving an area of 706,367 acres. Under the heading "deferred payments" are included conditional purchases of grazing lands.

In addition, Crown grants were issued during 1959–60 for the following selections, the prescribed conditions having been complied with:—free homestead farms, 7,175 acres, and conditional purchases, 506,532 acres.

6. Tasmania.—During 1959–60, Crown grants were issued for 23,242 acres. The total area sold conditionally was 2,601 acres, comprising selections for purchase, 2,477 acres, and town and suburban allotments, 124 acres. The number of applications confirmed was 133.

§ 5. Leases and Licences under Land Acts.

1. New South Wales.—At 30th June, 1960, the total area of leases and licences under the control of the Department of Lands, the Water Conservation and Irrigation Commission and the Western Lands Commission was 113,358,849 acres, of which 78,007,226 acres were held under the Western Lands Act, 27,812,710 acres under perpetual lease, and 7,538,913 acres under other forms of lease, licence and permissive occupancy. The following table shows the areas held under various descriptions of leases and licences at 30th June, 1960.

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 30th JUNE, 1960: NEW SOUTH WALES.(a)  
(Acres.)

Closer settlement leases .. .. .	3,037,116		
Settlement purchase leases .. .. .	1,044,549	<b>Total .. .. .</b>	<b>113,358,849</b>

(a) Excludes mining leases and permits, forest leases, and occupation permits. (b) Includes leases outside irrigation areas, controlled by the Water Conservation and Irrigation Commission—241,595 acres.

2. Victoria.—The area of Crown lands occupied under leases and licences at 31st December, 1960, was as follows:—grazing licences—other than Mallee, 3,923,502 acres; Mallee, 2,138,798 acres; auriferous lands licences, 1,873 acres; perpetual leases—other than Mallee, 21,658 acres; Mallee, 1,071,691 acres; swamp lands leases, 62 acres; agricultural college lands, 30,244 acres; total, 7,187,828 acres.

3. Queensland.—During 1960, the areas taken up consisted of 9,543,680 acres as pastoral leases, 2,323,324 acres as grazing selections and 11,326 acres as perpetual lease selections. The area occupied under lease or licence, excluding mining leases, at 31st December, 1960, was as follows:—pastoral leases, 245,557,120 acres; occupation licences, 16,646,400 acres; grazing selections and settlement farm leases, 93,879,756 acres; special purposes leases—Crown land, 472,065 acres; reserves, 2,461,272 acres; perpetual lease (including prickly pear) selections, 6,712,876 acres; auction perpetual leases, 40,410 acres; forest grazing leases (reserves), 507,520 acres; total, 366,277,419 acres.

4. South Australia.—The total area, including repurchased lands held under lease or licence except mining lease and licence, at 30th June, 1960, was 145,376,831 acres, of which pastoral leases, 121,771,597 acres, constituted the major portion.

5. Western Australia.—At 30th June, 1960, the total area held under lease or licence issued by the Lands Department amounted to 223,532,143 acres, of which 216,908,871 acres were under pastoral lease.

6. **Tasmania.**—Crown lands leased at 30th June, 1960, for other than mining purposes amounted to 1,481,513 acres of which 1,022,117 acres were leased for pastoral purposes.

7. **Northern Territory.**—At 30th June, 1960, the total area under lease, etc., was 179,021,426 acres, of which pastoral leases accounted for 143,874,723 acres and other leases, licences and mission stations, 35,146,703 acres.

8. **Australian Capital Territory.**—Under the terms of the City Area Leases Ordinance 1936–61, each block is leased for a period of 99 years at a rental of five per cent. per annum of the unimproved capital value as assessed by the Commonwealth. The number of leases granted under this Ordinance to 30th June, 1960 (excluding leases surrendered and determined), was 5,242, representing an unimproved value of £2,262,270. Auction sales of city leaseholds are described in Official Year Book No. 22, page 599. During the year ended 30th June, 1960, 689 leases were granted for residential purposes and 69 for business purposes.

Seventeen leases under the Church Lands Leases Ordinance, which requires the lessees to submit a definite building programme within a specified period, and one lease under the Church of England Lands Ordinance, have been granted for church purposes. A further 35 leases have been granted for either church or scholastic purposes under the various Ordinances.

The total area held under lease and licence for grazing, agricultural, dairying or other purposes (including the Jervis Bay area) amounted to 292,824 acres at 30th June, 1960. These figures exclude city area leases.

9. **Summary.**—The following table shows particulars of the land held in each State under lease or licence for purposes other than mining and forestry, the total under lease or licence in the Territories, and the grand totals, for the years 1956 to 1960.

**AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING  
AND FORESTRY.**

(a) At 30th June. (b) At 31st December. (c) Leases and licences for all purposes.  
(d) Includes Jervis Bay area.

### § 6. Leases and Licences under Mining Acts.

1. **New South Wales.**—At 30th June, 1960, total areas occupied under Mining Acts were as follows:—gold-mining, 3,007 acres; mining for other minerals, 187,632 acres; authorities to prospect, 110,745 acres; other purposes, 8,295 acres; total, 309,679 acres. In addition, 121,636,480 acres were occupied under petroleum prospecting and exploration licences.

2. **Victoria.**—Areas occupied at the end of 1960 were as follows:—gold-mining, 13,893 acres; coal, 11,227 acres; mineral search licences, 16,455 acres; other purposes, 5,445 acres; total, 47,020 acres. In addition, 34,703,020 acres were occupied under petroleum prospecting licences and petroleum exploration permits.

3. **Queensland.**—During 1960, there were 3,390 miners' rights and one business licence issued. Areas taken up during 1960 totalled 50,243 acres, of which 17,335 acres were for mining for minerals other than gold and 32,485 acres were occupied under coal prospecting permits. In addition, an area estimated at 2,500 acres was held under Miners' Rights and Dredging Claims. Total areas occupied at the end of 1960 were as follows:—gold-mining, 2,489 acres; mining for other minerals, 148,876 acres; miners' homesteads, 428,634 acres; coal prospecting, 93,400 acres; total 673,399 acres. In addition 517,649,920 acres were occupied under petroleum prospecting permits and authorities to prospect. The area of land held under lease only was 579,999 acres.

4. South Australia.—Areas taken up under Mining Acts during 1959–60 totalled 32,203,099 acres, including claims, 4,770 acres, mineral and miscellaneous leases, 1,766,269 acres, gold leases, 60 acres, and oil licences, 30,432,000 acres. Total areas occupied at 30th June, 1960, were as follows:—gold-mining, 668 acres; other mineral and miscellaneous leases, 1,837,203 acres; claims, 14,479 acres; oil licences, 207,216,640 acres; other purposes, 23 acres; total, 209,069,013 acres.

5. Western Australia.—Areas taken up during 1960 under Mining Acts totalled 20,558 acres, including gold-mining, 10,034 acres, and mining for other minerals, 10,312 acres. Total areas occupied at the end of 1960 were as follows:—gold-mining, 27,515 acres; mining for other minerals, 102,014 acres; other purposes, 38,128 acres; total, 167,657 acres. Of the total, 2,917 acres were held under lease, the balance being taken up under licences. In addition, 366,000 acres were occupied under licences to prospect for oil, and 402,464,000 acres under permits to explore, total 402,830,000 acres.

6. Tasmania.—During 1960, the number of leases issued was 145, covering 6,809 acres. Of these, 57, covering 932 acres, were for tin mining. Total areas occupied at the end of 1960 were as follows:—gold-mining, 810 acres; coal-mining, 11,549 acres; mining for other minerals, 28,976 acres; other purposes, 11,024 acres; total, 52,359 acres.

7. Northern Territory.—At 30th June, 1960, the number and acreage of holdings under mining leases and tenements were as follows:—gold-mining leases, 212 (4,251 acres); other mineral leases, 352 (23,181 acres); dredging areas, 11 (2,393 acres); gold and other mineral prospecting areas, 17 (181 acres); business and residence areas, 34 (134 acres); other purposes, 129 (6,194 acres); total, 755 (36,334 acres).

8. Summary.—(i) *Mining Leases, etc. (other than Oil Prospecting or Exploring Licences).* The following table shows the total areas occupied under Mining Acts in each State at the end of the years 1956 to 1960.

AREAS OCCUPIED UNDER MINING ACTS.  
(Acres.)

Year.	N.S.W. (a) (e)	Victoria.	Q'land. (b)	S. Aust. (a) (b)	W. Aust. (c)	Tasmania. (b)	Total. (d)
1956 ..	13,924,407	37,723	570,384	770,618	151,916	33,178	15,488,226

1959 ..	37,251	31,653	527,954	170,385	319,598	..	36,938	1,123,779
1960 ..	121,636	34,703	517,650	207,217	402,830	..	49,008	1,333,044

(a) Year ended 30th June, (b) Not available. (c) Excludes Northern Territory.

Revisions have been made to the foregoing table since the previous issue in order to incorporate particulars of authorities or permits granted for exploration purposes, which were previously not included in all cases.

## § 7. Closer Settlement.

1. **General.**—Particulars regarding the methods of acquisition and disposal of land for closer settlement in the several States are given in issues of the Official Year Book up to No. 22 (*see* No. 22, pp. 163–9) and the results of the operations of the several schemes have appeared in subsequent issues in considerable detail. Subsequently, however, the amalgamation, in some States, of closer settlement records with those of other authorities made it impossible to obtain up-to-date figures for those States and for Australia as a whole, although aggregations of State totals as at the latest dates available have been published as rough approximations intended to convey some idea of the extent of the schemes throughout Australia.

2. **New South Wales.**—From the inception of closer settlement in 1905 to 30th June, 1960, 2,659 estates totalling 7,112,723 acres had been purchased by the Crown at a cost of £34,925,107 for purposes of closer settlement of civilians and returned service personnel.

Closer settlement is now being effected entirely under perpetual leasehold tenure (closer settlement leases).

3. **Victoria.**—The Closer Settlement Commission was abolished as from 31st December, 1938, and land settlement was placed under the control of the Department of Lands and Survey. On 31st March, 1939, all Closer Settlement and Discharged Soldiers' accounts were amalgamated, the settlers' accounts adjusted and the new debt made payable over an extended period. Particulars of the operations under the provisions of the Closer Settlement Acts to 30th June, 1938, the latest date for which separate details are available, were given in earlier issues of the Official Year Book (*see* No. 42, p. 98).

4. **Queensland.**—Separate records relating to the closer settlement of re-purchased land are no longer kept by the Land Administration Board, and the operations under this heading are now included with "Leases and Licences under Land Acts". Details of the position at 31st December, 1934, the latest date for which the information is available, were given in earlier issues of the Official Year Book (*see* No. 42, p. 98).

5. **South Australia.**—The total area re-purchased for closer settlement at 30th June, 1960 was 948,885 acres, at a cost of £2,865,200. Included in these figures are 51,872 acres purchased for £185,285, and afterwards set apart for returned service personnel, 3,214 acres reserved for forest and waterworks purposes the purchase-money being £16,185, and also 26,563 acres of swamp and other lands, which were purchased for £111,850, in connexion with reclamation of swamp-lands on the River Murray. Of the total area, 823,105 acres have been allotted to 2,825 persons.

6. **Western Australia.**—The total area acquired for closer settlement up to 30th June, 1960 was 3,087,808 acres, costing £4,480,519. Particulars of operations under the Act for the year ended 30th June, 1960, are as follows:—Area selected during the year, 193,084 acres; number of farms, etc., allotted to date, 2,656; total area occupied to date, 2,440,844 acres; area set aside for roads, reserves, etc., and balance available for selection, 646,964 acres.

7. **Tasmania.**—Up to 30th June, 1960, 38 areas had been opened up for closer settlement, the total purchase-money paid by the Government being £371,548 and the total area acquired amounting to 104,554 acres, including 12,149 acres of Crown lands. The number of farms occupied at 30th June, 1960, was 55.

## § 8. Settlement of Returned Service Personnel.

1. **War Service Land Settlement Scheme.**—(i) *General.* The War Service Land Settlement Scheme provides for the settlement on the land of eligible ex-servicemen from the 1939–45 War and the Korea-Malaya operations. Finance for capital expenditure under the scheme in South Australia, Western Australia and Tasmania and for special loans to New South Wales and Victoria is provided through Loan (War Service Land Settlement) Acts. Finance for other aspects of the Scheme in all States is provided by annual parliamentary appropriation. The States Grants (War Service Land Settlement) Act 1952 provides that the responsible Commonwealth Minister may make grants of financial assistance to the States under such terms as he may from time to time determine.

New South Wales, Victoria and Queensland agreed, at the inception of the Scheme, to find their own finance for the acquisition and development of properties. In 1954, Queensland abandoned the Scheme and made available for general settlement all unallotted lands held under it.

In an effort to hasten the settlement of qualified applicants in New South Wales and Victoria, the Commonwealth, between 1st July, 1955, and 30th June, 1959, agreed to make available to New South Wales and Victoria repayable loans with a maximum of £2 million

to each State in any one year. The Commonwealth subsequently agreed to a request from the States that any surplus of the total finance the Commonwealth was prepared to make available for the year 1958-59 could be spent by the States in subsequent years. The extent of these loans was dependent on the amounts expended by the States from their own funds and can be briefly summarized as follows:—total advances made by the Commonwealth—New South Wales, £6,770,833; Victoria, £7,198,703.

Detailed information about the agreements and the methods of operation and administration of the Scheme are contained in earlier Year Books (see List of Special Articles, etc., preceding General Index to this volume).

(ii) *Summary of Operations to 30th June, 1961.* The following table shows the operations of the War Service Land Settlement Scheme in each State up to 30th June, 1961.

### WAR SERVICE LAND SETTLEMENT.

(a) In New South Wales, properties are regarded by the State as being allotted at the date of acquisition. Figures adjusted following review. (b) Figures adjusted following survey. Other land originally approved, but no longer required, has been disposed of outside the Scheme. (c) War Service Land Settlement was discontinued in 1954, and unallotted lands were made available for general settlement. (d) Will be surveyed on completion of projects under development.

(iii) *Expenditure.* The following table shows a dissection of the Commonwealth expenditure on War Service Land Settlement to 30th June, 1961.

### WAR SERVICE LAND SETTLEMENT (1939-45 WAR AND KOREA/MALAYA OPERATIONS): COMMONWEALTH EXPENDITURE TO 30th JUNE, 1961.

Cost of administration of credit facilities ..	..	..	..	279,997	603,783	118,452	1,002,232
<b>Total ..</b>	<b>8,631,014</b>	<b>13,095,823</b>	<b>648,988</b>	<b>27,531,167</b>	<b>40,898,821</b>	<b>20,831,368</b>	<b>111,637,181</b>

Repayments of expenditure to 30th June, 1961, on the acquisition, development and improvement of land amounted to £11,234,780, and on the provision of credit facilities to settlers to £13,557,106, so that the total expenditure was reduced by £24,791,886 to £86,845,295. In addition, miscellaneous receipts in South Australia, Western Australia and Tasmania to 30th June, 1961, amounted to £5,253,886.

2. Loans and Allowances (Agricultural Occupations) Scheme.—(i) *General*. Full details of the measures taken to provide for the re-establishment of ex-servicemen in rural occupations were given in an earlier Year Book (*see* List of Special Articles, etc., preceding General Index to this volume).

(ii) *Loans (Agricultural Occupations)*. The following table shows particulars for each State and certain Territories to 30th June, 1961.

(a) After deduction of loans declined after approval—£1,268,336.

(b) Includes advances from principal repaid by borrowers.

These loans are made to eligible ex-servicemen for the purchase of land, effecting improvements on land, the acquisition of tools of trade, livestock, plant or equipment, the establishment of a co-operative business with other persons, reduction or discharge of a mortgage, bill of sale, etc.

(iii) *Allowances (Agricultural Occupations)*. The following table shows details for each State and New Guinea to 30th June, 1961.

**ALLOWANCES (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 30th JUNE, 1961.**

(a) Includes allowances paid to four ex-servicemen in the Northern Territory. £6,120 returned by the States to the Commonwealth. New South Wales is holding £1,944 which, if not required, will also be returned.

(b) Includes.

These allowances are payable only in respect of the period during which the income derived from the occupation by the ex-serviceman concerned is considered inadequate.

3. War Service Land Settlement Division—Total Expenditure.—The following table shows details of the total expenditure on various projects by the War Service Land Settlement Division from the commencement of operations to 30th June, 1961.

**COMMONWEALTH WAR SERVICE LAND SETTLEMENT DIVISION:

<b>Net Expenditure to 30th June, 1961 .. ..</b>	<b>90,402,652</b>

**§ 9. Advances to Settlers.**

1. General.—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory may be found in earlier issues of the Official Year Book (see List of Special Articles, etc., preceding General Index to this volume).

The summaries of loans and advances in the following paragraphs are compiled from returns supplied by the various State government lending agencies in the several States. They include transactions in lands acquired under closer and soldier settlement schemes, but exclude balances owing on former Crown lands sold on the conditional purchase, etc., system.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of re-appraisements of land values and the writing down of debts. In general, they include both principal and interest outstanding.

A summary for Western Australia is not included, as practically the only governmental funds being made available are Commonwealth (see § 8 above).

In New South Wales and Victoria, expenditure on the acquisition, development and improvement of land for war service land settlement is provided for by the States, and particulars thereof are included in the respective summaries. In Queensland, no money is paid for the value of the land acquired, most land being occupied on lease from the Government, but advances in respect of improvements are included. In the other States, this expenditure is provided for by the Commonwealth and particulars are included in § 8 above.

Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945 and certain advances for the purchase of wire-netting and for other purposes made from finance provided by the Commonwealth are included in the summaries following.

2. New South Wales.—The following table shows particulars respecting advances, etc., under State authorities to 30th June, 1960.

ADVANCES TO SETTLERS, ETC.: NEW SOUTH WALES.

Total	2,182,352	28,182,567	2,685	8,296,148

6. Western Australia.—The operations prior to 1945 covered in this section related to moneys made available through, or by, the old Agricultural Bank and other Government Departments for the purpose of agricultural development. On 1st October, 1945, however, the Agricultural Bank was reconstituted as the Rural and Industries Bank of Western Australia, and was given authority to operate in similar manner to the associated banks. Certain securities in the books of the old bank were taken over by the general banking division of the new bank, and the clients concerned then operated with privileges and obligations similar to those provided by other banking institutions. The majority of the remaining securities, also, were eventually transferred.

At present, very limited funds are being made available by the State Government for advances for agricultural development, the bulk of the moneys for this purpose being provided by the Commonwealth Government under the War Service Land Settlement and Commonwealth Re-establishment and Employment Acts. Particulars of this expenditure are shown in § 8 above.

7. *Tasmania.*—The following table shows particulars of advances under State Authorities to 30th June, 1960. Although advances made for the purchase of land for closer and soldier land settlement are not regarded as outstanding advances by the Department of Agriculture, the figures have been included in the table for comparative purposes; the areas so purchased have been leased on 99-year terms with an option of purchase which the leaseholder may exercise at any time.

## ADVANCES TO SETTLERS, ETC.: TASMANIA.

Advances, etc.	Advances, etc., made during 1959-60.	Total Advances, etc., to 30th June, 1960.	Balance outstanding at 30th June, 1960.

(a) Excludes £204,813 advances capitalized, £79,166 advances written off to bad debts, and £40,789 written off to revaluation. (b) Not regarded by the Department as outstanding advances.

8. *Northern Territory.*—During the year 1959-60, seven advances totalling £8,377 were approved and advances made totalled £11,509. At 30th June, 1960, the balance outstanding from 97 settlers, including interest, was £179,525.

9. *Summary of Advances.*—The following table is a summary for each State (except Western Australia) and the Northern Territory to 30th June, 1960. The particulars, so far as they are available, represent the total sums advanced to settlers, including amounts spent by the various Governments in the purchase and improvement of estates disposed of by closer and soldier land settlement, while the amounts outstanding reveal the present indebtedness of settlers to the Governments, including arrears of principal and interest but excluding amounts written off debts and adjustments for land revaluations. Particulars of Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945 and of certain advances for wire-netting and other purposes provided from Commonwealth funds are included.

## ADVANCES TO SETTLERS, ETC.: SUMMARY.

Northern Territory .. ..	11,509	241,594	97	179,525

(a) Includes expenditure on acquisition, development and improvement of land for war service land settlement (see p. 99). (b) Incomplete. (c) Number of accounts.

## § 10. Alienation and Occupation of Crown Lands.

1. **General.**—The figures shown in the previous parts of this chapter show separately the areas alienated, in process of alienation, or occupied under various tenures. The following tables set out the position with regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during 1960. A summary for each State and Territory and for Australia as a whole is also included. Particulars for each year from 1950 to 1960 appear in *Primary Industries Bulletin* No. 54, Part I.—*Rural Industries*, page 1. The area occupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases or licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of New South Wales is 198,037,120 acres, of which 27.8 per cent. had been alienated at 30th June, 1960; 5.5 per cent. was in process of alienation; 58.3 per cent. was held under leases and licences; and the remaining 8.4 per cent. was unoccupied, or held by the Crown.

The following table shows particulars as at 30th June, 1960.

**ALIENATION AND OCCUPATION OF CROWN LANDS: NEW SOUTH WALES**  
30th JUNE, 1960.  
(Acres.)

Particulars.	Area.	Particulars.	Area.
1. <i>Alienated</i> .. .. .	55,057,352	3. <i>Held under Leases and Licences.</i>

(a) Mining leases and licences have also been issued over an area comprising 209,069,013 acres.

(b) Includes surveyed roads, railways and other reserves, salt water lakes, lagoons, and fresh water lakes.

6. Western Australia.—The total area of Western Australia is 624,588,800 acres, of which, at 30th June, 1960, 4.4 per cent. was alienated; 2.0 per cent. was in process of alienation; and 36.5 per cent. was occupied under leases and licences issued either by the Lands, Mines or Forests Departments. The balance of 57.1 per cent. was unoccupied.

The following table shows the distribution.

		5. <i>Total Area of State</i> .. .. .	16,778,000

8. **Northern Territory.**—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1960, only 0.1 per cent. was alienated; 53.4 per cent. was held under leases and licences; 17.8 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 28.7 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1960:—alienated, 375,922 acres; leased—pastoral leases, 143,874,723 acres, other leases, licences and mission stations, 35,146,703 acres, total leased, 179,021,426 acres; reserved for aboriginal, defence and public requirements, 59,591,280 acres; unoccupied and unreserved, 96,128,172 acres; total, 335,116,800 acres.

9. **Australian Capital Territory.**—Alienated land of the Territory (excluding the Jervis Bay area) at the end of 1959 comprised 11.3 per cent. of the total area; land in process of alienation 7.1 per cent; land held under lease and licence 49.2 per cent; land otherwise occupied, including city tenures, 8.3 per cent.; and unoccupied 24.1 per cent.

The following are the particulars of land areas in the Australian Capital Territory at the end of 1960:—alienated 65,857 acres; in process of alienation 41,224 acres; leased—grazing, agricultural, etc., leases, 275,458 acres; grazing licences, 11,100 acres; otherwise occupied, including city area leases, 48,604 acres; total leased, 335,162 acres; unoccupied, 140,686 acres; total, 582,929 acres. Including the Jervis Bay area of 18,000 acres—6,266 acres leased and 11,734 acres otherwise occupied—the grand total for the whole Territory is 600,929 acres.

10. **Summary.**—The following table provides a summary for each State and Territory, and for Australia as a whole, of the alienation and occupation of Crown lands in 1960.

**ALIENATION AND OCCUPATION OF CROWN LANDS, 1960.**

(a) Occupied by Crown; reserved; unoccupied; unreserved.  
(d) Includes Jervis Bay area.

(b) At 30th June.

(c) At 31st December.

## CHAPTER V.

## THE TERRITORIES OF AUSTRALIA.

NOTE.—The internal Territories of Australia are the Northern Territory and the Australian Capital Territory. External Territories under the control of Australia are:—Norfolk Island; Papua (formerly British New Guinea); the Territory of New Guinea (under Trusteeship Agreement with the United Nations); Nauru (under Trusteeship Agreement with the United Nations); the Territory of Heard and McDonald Islands; the Australian Antarctic Territory; the Territory of Cocos (Keeling) Islands; and the Territory of Christmas Island. There is also the Territory of Ashmore and Cartier Islands, to which the laws, ordinances and regulations of the Northern Territory, of which it is deemed to form part, apply wherever applicable. Information on all except Ashmore and Cartier Islands is contained in the following pages, and details of the acquisition of all the Territories will be found on pages 5, 23 and 24 of Chapter I. (See map on page 141 for location of Territories.)

## THE NORTHERN TERRITORY.

## § 1. Area and Population.

1. Area.—Upon the extension of New South Wales westward to the 129th east meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 it was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles.

2. Population.—(i) *Population, excluding Full-blood Aboriginals.* At the Census of 30th June, 1961, the population of the Territory, excluding full-blood aboriginals, was 16,206 males, 10,889 females, 27,095 persons. Corresponding figures at the Census of 30th June, 1954, were 10,288, 6,181 and 16,469 respectively.

The European population of the Territory increased slowly from 670 at the Census of 1881 to 3,767 in 1918. By 1921, it had decreased to 2,458, and in 1933 was still only 3,306. At the Census of 1947, it had risen to 9,116, while at the Census of 1954 it had risen to 14,028. Comparable figures from the Census of 1961 are not yet available.

(ii) *The Aboriginals.* For particulars relating to the aboriginal population see Chapter IX.—Population. All aboriginals, by virtue of the Nationality and Citizenship Act 1948–1960, are Australian citizens. The Welfare Ordinance 1953–1960 recognizes this, and provides that only those deemed to be in need of special care and assistance may be declared wards under the control of the Director of Welfare. Declaration as a ward is subject to the right of individual appeal. This is the same basic idea that is expressed in social legislation applying to those members of the white community who are not able to look after themselves or who have to be protected (e.g., neglected children). Reserves for wards comprise an area of 94,509 square miles.

## § 2. Legislation and Administration.

On 1st January, 1911, the Territory was transferred from South Australia to the Commonwealth. The terms were outlined in Official Year Book No. 15, page 940. For particulars of the administration up to the Northern Territory (Administration) Act 1931, by which it was, for the second time, placed in the hands of an Administrator, see Official Year Book No. 38 and earlier issues.

The Northern Territory (Administration) Act 1910–1959 provides for the constitution of a Legislative Council consisting of the Administrator as President, six official members, three nominated non-official members and eight elected members. The Council makes

ordinances for the Territory, which must be submitted to the Administrator for assent. The Administrator may, or may not, assent to them, or he may reserve them for the Governor-General. The Governor-General may disallow any ordinance assented to by the Administrator within six months from the date of assent, and the operation of ordinances relating to certain matters, including Crown lands and aboriginal affairs, is dependent on his approval. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who has the right to take part in debates but may vote only on matters that relate solely to the Northern Territory.

### § 3. Physiography.

1. **Tropical Nature of the Country.**—The Territory is within the torrid zone, with the exception of a strip about 180 miles wide which lies south of the Tropic of Capricorn.

2. **Contour and Physical Characteristics.**—The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and laterite form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries. The only practicable deep-water port, however, is Darwin.

Inland, the country generally is destitute of conspicuous landmarks. From the coast, there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply for the interior systems. Towards the centre of the continent, the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

### § 4. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions, the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Further particulars appear in Official Year Book No. 6, page 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous) and frogs abound. There are many varieties of fresh-water fish and littoral mollusca. Butterflies and beetles are strongly represented. The termite is a pest which is capable of serious damage to wooden buildings unless special preventative measures are taken. A species of the ant builds anthills which sometimes attain great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Some types of native fauna are protected. Buffalo formerly existed in large herds, but their number has been greatly reduced by indiscriminate shooting. Buffalo shooting is now controlled by Ordinance.

3. **Flora.**—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. In the coastal regions, tropical vegetation grows luxuriantly to the water's edge. In the north, cypress pine, bloodwood and paper-bark timbers are now cut and milled for local building purposes. These three timbers are resistant to termites. On the wide expanses of plain country in the interior, there is little vegetation, the principal orders represented being:—*Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Goodeniaceae*, *Leguminosae*, *Utricaceae*.

### § 5. Production.

1. **Agriculture.**—Up to the present, agriculture has made little progress in the Territory, although rice, peanuts, tobacco, grain sorghum, bananas, pineapples, citrus fruits, mangoes, papaws, vegetables, fodder plants and improved pastures can be grown in certain areas. At the present time, commercial agricultural production is practically confined to peanuts, which have been an export crop for some time, and to vegetables and small-scale fruit production (mainly pineapple and citrus) for local consumption.

In 1946, the Commonwealth Scientific and Industrial Research Organization commenced scientific surveys to determine more accurately the potentialities of the Territory. Surveys have been completed of the Katherine-Darwin, Barkly Tableland and Victoria River Regions. The survey of the Katherine-Darwin Region indicated that further investigations into agricultural possibilities were warranted. As a result, the C.S.I.R.O. established an agricultural research station at Katherine to investigate the possibilities of dry farming in a land system covering an area of about 7,000 square miles in the Katherine-Daly River basin. The research work at this station was sufficiently encouraging in respect of the production of peanuts, grain sorghum, and pastures to warrant investigations into the application of the findings on a commercial scale. To further the investigations, the Commonwealth Government approved of the establishment by the Northern Territory Administration, in 1952, of an experimental farm at Katherine for the purpose of carrying out trials with these crops to determine the requirements for farming them on a commercial scale. The trials are in progress, but it is too early to make any definite pronouncements. In 1956, the Administration established an experimental farm at Berrimah, near Darwin. Investigations into fruit and vegetable growing and pasture production are being carried out under both dry land and irrigated conditions.

The survey of the Katherine-Darwin Region also indicated various soil types in other parts of the Region on which agricultural production tests would be worthwhile. Trials on soil types are carried out by agricultural field officers of the Administration in various areas of the Territory considered potentially suitable for agriculture.

Prospects for rice growing were indicated by the survey, and in 1952 the Administration established rice research stations at Humpty Doo and at a location known as Sixty Mile, on the Stuart Highway, 60 miles from Darwin. Since the 1959-60 season, rice research work on the sub-coastal plains has been carried out in the Territory by the C.S.I.R.O. at its Coastal Plains Research Station at Middle Point, near Humpty Doo. The Administration carries out rice investigational work outside the coastal plains at the Upper Adelaide River Agricultural Experiment Station. At the rice research stations, it has been demonstrated that rice can be grown in the Territory, but that the main problems are adequate water control and drainage, determination of cultivation techniques in the soil conditions, and the production of suitable rice varieties. Territory Rice Limited, a firm with Australian and American capital, carried out commercial scale operations near Humpty Doo from the 1954-55 season until the 1959-60 season. Under arrangements with the company, four former employees grew a crop of rice in the 1960-61 season.

On 25th July, 1959, the Minister for Territories appointed an expert committee, under the chairmanship of Dr. H. C. Forster, Professor of Agriculture at the Melbourne University, to investigate the prospects of promoting agricultural settlement in the Northern Territory on an economic basis and the major factors to be considered in shaping an agricultural policy for the Territory, including the areas best suited to agricultural settlement; the crops most likely to prove economic; the relationship of agriculture to the expansion of the pastoral industry; the availability of land and the distribution and tenure of land; credit and other forms of assistance to primary producers; marketing opportunities; research and agricultural extension work; and water use and conservation. The full Committee and its individual members have made a number of visits to the Territory, but its report had not been completed at the time of writing.

**2. Pastoral Industry.**—The pastoral possibilities of certain parts of the Territory were recognized at an early date, and in 1866 stock were brought into the Macdonnell Range country from South Australia. Six years later, cattle were moved from Queensland to the northern parts of the Territory, and in 1879 Giles reached the Katherine River with 2,000 head of cattle and 12,000 sheep from South Australia. For various reasons, sheep-raising was not very successful. The cattle industry, however, progressed steadily and is continuing to expand.

Cattle exported during 1960-61 numbered 169,103—96,521 to Queensland, 65,773 to South Australia, 4,444 to Western Australia and 2,365 to Hong Kong. Other livestock exports included 578 horses, 23 pigs and 90 buffaloes. Imports of livestock were—Bulls, 1,314, other cattle, 10,541; horses, 672; sheep, 3,620; pigs, 132; and poultry, 29,588.

The estimated numbers of livestock in the Territory at 30th June, 1957 to 1961, are given in the following table.

11772/61.—4

## NORTHERN TERRITORY: LIVESTOCK.

At 30th June—	Horses.	Cattle.	Sheep.	Pigs.	Goats.	Mules.
1957 .. ..	38,180	1,175,997	30,466	755	11,189	286
1958 .. ..	38,668	1,243,588	26,795	3,071	9,938	324
1959 .. ..	39,131	1,138,156	22,141	3,191	9,126	300
1960 .. ..	37,171	1,088,982	16,611	2,272	9,440	318
1961 .. ..	40,054	1,154,656	16,089	2,845	6,692	359

3. **Hides and Skins.**—The numbers of hides and skins exported from the Territory during 1960–61 were as follows: sheep, 2,207; crocodile, 5,270; cattle, 7,398; and buffalo, 451.

4. **Mining.**—During 1960, the value of output of the mining industry in the Territory, excluding uranium mining, was £2,621,000.

The mining of copper ores and concentrates is the most important in terms of value of output, and accounts for more than half of the Territory's total recorded production. Prior to 1956, gold minerals, first mined in 1869, accounted for most of the value of output, but from 1956 onwards gold production has remained relatively constant while copper production has increased considerably. The bulk of the copper and gold is won at Tennant Creek where, in 1958, the government battery was re-opened to encourage gold mining by smaller operators.

Uranium minerals were first discovered at Rum Jungle in 1949, and other deposits have been found since. Production of uranium concentrate at the Government's Rum Jungle treatment plant commenced in 1954. During 1959, additional plants for the processing of ores mined from the South Alligator River area were established by private companies at Moline and South Alligator. The uranium concentrate produced at the latter two plants is sold under contract to the United Kingdom Atomic Energy Commission. The production of manganese and salt, two minerals used in these uranium treatment plants, commenced in 1955 and 1957 respectively.

The Harts Range field in Central Australia continues to produce the bulk of Australian high grade mica, but production is declining because of the ready availability of lower priced mica from overseas. Production of tin and wolfram concentrates, important in the past, is now negligible. Increasing interest is being shown in tin mining, and production is expanding.

The following table shows the value of output of the mining industry in the Territory for the years 1956 to 1960. Particulars of the value of output from quarries are not included.

**NORTHERN TERRITORY: VALUE OF OUTPUT<sup>(a)</sup> OF THE MINING INDUSTRY.**  
(EXCLUDING URANIUM.)  
(£'000.)

Year.	Copper Ore and Concentrate.	Gold. (b)	Manganese Ore.	Mica.	Other.	Total All Minerals.
1956 .. ..	1,360	1,032	29	42	131	2,594
1957 .. ..	1,024	973	20	50	59	2,126
1958 .. ..	1,286	895	70	47	16	2,314
1959 .. ..	1,455	901	37	45	33	2,471
1960(c) .. ..	1,600	938	41	17	25	2,621

(a) Selling value at point of sale of mine products less transport costs from mine to point of sale.  
(b) Ore, concentrate, bullion, alluvial gold, etc. (c) Subject to revision.

5. **Forestry.**—In August, 1958, the Commonwealth Government approved a six-year programme of forestry improvement and development to preserve existing forest areas and increase possible timber resources. The programme is being carried out by the Forestry and Timber Bureau, and it is intended that it will be handed over to the Administration at the end of the six-year period. Fundamental forestry research work, however, will still be carried on by the Bureau. Experimental work in reforestation is being carried out in small plantation areas. Cypress pine appears the most promising species for large-scale commercial plantings. Local production of sawn timber, mainly cypress pine, amounted to 465,000 super. feet in 1959–60, but to meet local requirements about 1,800,000 super. feet of timber was imported from the States and overseas.

6. Pearl Fisheries.—In 1884, mother-of-pearl-shell was discovered in the harbour of Port Darwin. Since that time, the areas fished have extended to the various banks to seaward and coastwise along the Northern Territory coast. Figures for production and value of shell for the seasons ended January, 1957 to 1961, are shown in the following table.

## NORTHERN TERRITORY: PEARL FISHING.(a)

Season Ended January—	Boats Engaged.	Pearl-shell Taken.	
		Quantity. (‘000 lb.)	Value. (£’000.)
1957.. .. .	10	585	146
1958.. .. .	11	753	135
1959.. .. .	5	314	57
1960.. .. .	5	188	36
1961.. .. .	5	222	45

(a) Excludes operations of Queensland and Japanese pearlers operating in Northern Territory waters.

7. Secondary Industries.—The secondary industries that have so far been established in the Territory have been largely the service industries normally associated with a developing area, for example, home building, electrical repairs, printing, motor and marine engineering, plumbing, welding, joinery, sheet metal work and blue metal crushing. Major industrial investments by private interests in recent years include two breweries and a factory for the manufacture of milk, ice cream and aerated waters.

## NORTHERN TERRITORY: INDUSTRIAL PRODUCTION.

## § 6. Land Tenure.

1. General.—A description of the system of land tenure in force in the Territory in 1928 is given in Official Year Book No. 22, Chapter V.—Land Tenure and Settlement. It was revised in Official Year Book No. 39, pages 329-30, and Chapter IV.—Land Tenure and Settlement of this issue contains up-to-date statistical information on the subject.

Almost half the land in the Territory is reserved, or unoccupied and unreserved, the remainder, apart from a very small proportion alienated, being held under various forms of lease or licence, which are described briefly below and in more detail in Official Year Book No. 39, pages 329-30.

2. Pastoral, Agricultural, etc., Leases.—*Pastoral Leases*—granted for periods not exceeding 50 years.

*Pastoral Homestead Leases*—granted in perpetuity but available only to persons who intend to reside *bona fide* on the leased land. Companies are not eligible to hold this type of lease.

*Agricultural Leases*—granted in perpetuity, with the area for any one lease limited according to the type of farm (Cultivation farms, Class 1, 1,280 acres, Class 2, 2,560 acres; Mixed farming and grazing, Class 1, 12,800 acres, Class 2, 38,400 acres).

*Leases of Town Lands*—granted in perpetuity.

*Special Purpose Leases*—granted for periods up to 99 years, for purposes other than pastoral, agricultural or mining, or private residential purposes within a town.

*Agricultural Development Leases*—granted for periods up to 30 years for the purpose of large-scale agricultural development.

*Church Lands Leases*—granted for church purposes at a nominal rental in perpetuity.

*Leases to Aboriginals*—granted for areas not exceeding 160 acres each for any period of years upon such terms and conditions as thought fit.

*Leases to Mission Organizations*—granted for periods up to 21 years.

*Miscellaneous Leases*—granted for any prescribed or approved purpose, for periods not exceeding 21 years.

*Grazing Licences*—granted to graze stock on Crown lands for periods not exceeding one year.

*Occupation Licences*—granted for manufacturing, industrial or any prescribed purposes, for periods not exceeding five years.

*Miscellaneous Licences*—granted for periods not exceeding one year.

The foregoing leases and licences are granted at specified rentals or rentals fixed by the Administrator and subject to re-appraisal, and under various prescribed or specified conditions.

3. **Mining Leases, etc.**—*Holdings under Miners' Rights*—entitling the holder, for a fee of 5s. for 12 months from the date of issue, to take possession of and occupy Crown lands for mining purposes.

*Gold-mining Leases*—granted for a period of 21 years, renewable for further periods of 21 years, for areas not exceeding 20 acres each, at an annual rental of 5s. an acre for the first year and £1 an acre thereafter and with payment of a royalty of 3d. in the £1 on the value of gold won, or 6d. in the £1 if on Aboriginal Reserves.

*Mineral Leases*—granted in blocks not exceeding 40 acres each, at an annual rental of 5s. an acre, with term, renewal, and royalty conditions as for gold-mining leases.

*Dredging Claims*—granted for gold or minerals claims, the area not exceeding 300 acres each, at an annual rental of 2s. an acre and with payment of a royalty of 6d. in the £1 on the value of minerals won if on Aboriginal Reserves.

*Petroleum Prospecting Permits*—granted to search for oil over one, two or three areas not exceeding in the aggregate 10,000 square miles for an initial term not exceeding 12 months with provision for extensions in three-year periods up to a maximum of 10 years. The permittee must lodge a fee of £100 and enter into a bond for at least £1,000 to comply with the conditions of the permit and the provisions of the Petroleum (Prospecting and Mining) Ordinance 1954-1961 and the regulations thereunder.

*Petroleum Licences*—confer an exclusive right to carry out the detailed surveys and other operations necessary to test the land for petroleum. For a fee of £20 a licence is granted to a permittee only over an area not exceeding 2,500 square miles upon the permittee entering into a bond of at least £5,000 to comply with the provisions of the licence and the Ordinance and Regulations. The total term of a licence may not be greater than eight years.

*Petroleum Leases*—granted, to a licensee, only for a period of 21 years, and renewable for further periods of 21 years, in respect of an area not exceeding 500 square miles. The lessee is required to pay a royalty of 10 per cent. on the gross value of all crude oil produced.

*Coal Licences*—granted to search for coal over an area not exceeding 1,000 square miles for a period of five years, at an annual fee of £10.

*Coal Leases*—granted for a period of 21 years, renewable for 21 years at an annual rental of 1s. an acre and a royalty fixed by regulation.

*Business and Residence Areas*—granted at the prescribed fee, authorizing the holder to occupy on a gold or mineral field an area not exceeding 1 acre for residence and carrying on business (one-quarter of an acre if for residence only).

*Garden Areas*—granted under prescribed conditions, on a gold or mineral field for growing fruit or other garden produce, the area of each garden not exceeding 5 acres.

There are various conditions regarding working, employment and value of machinery used, which apply to the foregoing leases and licences.

## § 7. Trade, Transport and Communication.

1. **Trade.**—No record is kept of the trade between the States and the Territory. In the years 1945–46 to 1948–49, direct oversea imports averaged about £200,000 a year, but in the four years 1950–51 to 1953–54 the average was about £625,000 a year. Imports totalled £1,484,791 in 1959–60 and £1,206,246 in 1960–61, while direct oversea exports amounted to £551,199 in 1959–60 and £435,069 in 1960–61.

2. **Shipping.**—Shipping services to Darwin are provided from the eastern States at intervals of about four weeks by ships of the Australian National Line, and from Western Australia by four to five ships a month of the Western Australian State Shipping Service. Oversea tankers visit Darwin approximately ten times annually with supplies of aircraft fuel and other petroleum products. Other oversea vessels call at irregular intervals. During 1960–61, approximately 144,000 tons of merchandise were landed at Darwin. Petroleum products were the principal commodities imported. A vessel operated by John Burke and Company from Thursday Island serves settlements on the Gulf of Carpentaria, and some mission-owned boats carry cargo from Darwin to mission stations and government settlements along the coast.

3. **Air Services.**—At 30th June, 1960, there were 24 government aerodromes and 91 licensed aerodromes in the Territory. The oversea passenger services using the Darwin international airport are Qantas (Sydney to Tokyo through Hong Kong); Qantas/B.O.A.C. (Sydney to London); Transports Aériens Intercontinentaux (Paris to Noumea and Auckland); Air-India International (Sydney to London); and Cathay Pacific Airways Ltd. (Sydney to Tokyo). Qantas also conducts a freight service from Sydney to London. Regular inland services to Darwin, with, in some cases, intermediate stops at Territory centres, are operated by Trans-Australia Airlines (from Adelaide, Melbourne, Sydney and Brisbane), and MacRobertson-Miller Airways Ltd. (from Perth and Wyndham). A service from Melbourne to Alice Springs through Broken Hill is operated by Ansett-A.N.A. MacRobertson-Miller Airways Ltd. and Connellan Airways Ltd. operate a network of air services throughout the Territory, the latter company's base being at Alice Springs. The Royal Flying Doctor Service also operates aircraft, while charter services can be secured at Darwin and Alice Springs.

4. **Railways.**—The Commonwealth Railways Commissioner, under the Commonwealth Railways Act 1917–1957, operates the Central Australia Railway from Port Augusta to Alice Springs over a distance of more than 750 miles, of which about 200 are in the Northern Territory. The line from Port Augusta to Maree, a distance of 217 miles, has been converted to standard gauge (4 ft. 8½ in.). Proposals are now being examined to convert the remaining 3 ft. 6 in. line to standard gauge, firstly to Oodnadatta and later through to Alice Springs. The Commissioner also operates the North Australia Railway between Darwin and Birdum on a 3 ft. 6 in. gauge over a distance of 317 miles. The two inland terminals, Alice Springs and Birdum, are about 630 miles apart and are connected by road transport along the Stuart Highway. Larrimah, on the highway and 6 miles north of Birdum, is the point of trans-shipment for passengers and goods and is, at present, the effective terminal. A road-rail freight service operates between Adelaide and Darwin via Alice Springs.

5. **Roads.**—During the 1939–45 War, roads were built connecting Alice Springs with Darwin, and Mount Isa (Queensland) with Tennant Creek. The first of these roads, known as the Stuart Highway, is 954 miles long, and runs via Larrimah and Tennant Creek. The Mount Isa–Tennant Creek Road (Barkly Highway) is 403 miles long and joins the Stuart Highway some 16 miles north of Tennant Creek. Both were used extensively during the war, and the Stuart Highway, in particular, experienced very heavy and continuous traffic. The highways are now used for carrying various freights including cattle, particularly to and from the railheads at Alice Springs, Larrimah and Mount Isa. The routes are used also for overland tourists and travellers from the southern States to Darwin. With the further development of the pastoral and mining industries in the Territory, road trains are now being used on both highways for the export of cattle and ore. Both roads have good water bores and communications. There are now approximately 13,000 miles of road in the Territory of which 1,370 miles are sealed.

**6. Posts, Telegraphs, Telephones and Wireless.**—Postal communication is maintained by road, rail and air transport between Darwin and the capital cities of Australia. In addition, vessels belonging to the Western Australian State Shipping Service provide a regular service between Fremantle and Darwin. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

The overland telegraph line, covering a length of 2,230 miles, runs from Adelaide to Darwin, and links Darwin in telegraphic communication with other parts of the world.

Long-distance telephone communication is established between Darwin and the capital cities of Australia, and oversea telephone communication through Sydney or Perth is also available.

Regional national broadcasting stations are situated at Darwin, Alice Springs, Tennant Creek and Katherine, and there is a commercial station at Darwin. The majority of homesteads on pastoral leases are equipped with pedal wireless sets operated under licence from the Postmaster-General's Department. These stations are in daily communication with Flying Doctor Bases situated at Alice Springs (Northern Territory), Wyndham (Western Australia), Broken Hill (New South Wales) and Cloncurry (Queensland), and are used for transmission of radio-telegrams and other communications.

## § 8. Education.

**1. European.**—Schools for European and part-European children in the Territory are conducted for the Commonwealth, on an agreed basis of reimbursement, by the South Australian Department of Education, which is represented in Darwin by an Assistant Supervisor of Education, Northern Territory Schools.

At 30th June, 1961, there were 20 Government schools in the Territory with 3,507 pupils, and three private schools with 848 pupils, providing instruction according to the South Australian curriculum. High Schools with classes up to the Leaving Certificate level have been established at both Alice Springs and Darwin.

All children who live more than 10 miles from an established school receive an allowance of £80 per annum plus fare concessions if they board away from home in order to attend school. Twelve exhibitions on the results of the Intermediate Certificate and twelve Leaving Honours scholarships on the results of the Leaving Certificate are available annually. Benefits are £40 and £50 respectively, subject to a means test.

Approximately 148 children receive correspondence education under the South Australian Correspondence School system. The radio session "School of the Air" supplements normal correspondence instruction for certain children in isolated areas.

Eleven pre-school centres have been established in the Territory, the staff of all except one being officers of the Northern Territory Administration. A number of scholarships are offered each year for Territory girls to qualify as pre-school teachers.

**2. Special Aboriginal Schools.**—The social, cultural, and educational background of the aboriginals has made necessary the establishment of special schools for them. It is envisaged that this necessity will ultimately pass. As from the beginning of the 1956 school year, control of these schools passed from the Commonwealth Office of Education to the Welfare Branch of the Administration. Fourteen schools have so far been established. A special syllabus and series of readers have been prepared for use in these schools. Free mid-day meals, milk, and school clothes are supplied to the pupils. In addition to the fourteen Administration schools, sixteen schools for aboriginal children are conducted by Missions with the aid of Government subsidies. Also, four schools aided by Government subsidies have been established on pastoral properties, and the establishment of others along similar lines is planned. Three pre-school centres are operated by the Administration for aboriginal children.

3. **Theoretical Training of Apprentices.**—The recognition that technical school training is an extension of workshop training has led to the introduction of day-time classes which apprentices attend without loss of pay. Apprentices are directed by the Apprentices Board to undertake correspondence courses conducted by the Technical Correspondence School of the South Australian Education Department and the Sydney Technical College, these courses covering the work prescribed for the various trades in South Australia and New South Wales.

### § 9. Aboriginal Welfare.

The Welfare Ordinance, which came into operation on 13th May, 1957, established the principle that aboriginals would be committed to the care of the State only on the grounds of their need for special care and assistance and not on the grounds of race or colour, and it laid on the Director of Welfare a positive responsibility for the advancement of wards in his care. The Wards' Employment Ordinance provides for the training of wards and assistance in establishing them in occupations, either on their own account or as employees. The Ordinance envisages, among other forms of training, apprenticeships for the better-educated wards and training on the job for those wards not yet capable of entering into apprenticeships. It also envisages financial aid to wards or groups of wards who, under the guidance of the Director, may be able to engage in activities (for example in agriculture, cattle raising, hunting or fishing) on their own behalf. The Director of Welfare is responsible for supervising employment for the wards in his care, and protective legislation for those in employment is retained. The legislation does not, of course, apply to any persons who are not wards, and aboriginals who have ceased to be wards will come within the normal industrial customs of the country.

### § 10. Finance.

Details of revenue and expenditure of the Territory for the years 1956–57 to 1960–61 are shown below. The information given covers the transactions of the Commonwealth Consolidated Revenue Fund relating to the Northern Territory and the transactions of the North Australia Railway. Public debt charges allocated to Northern Territory operations, formerly included in the table on expenditure, have now been excluded therefrom, as this allocation is no longer made.

(b) Includes expenditure on Stuart

## THE AUSTRALIAN CAPITAL TERRITORY.

1. *Introductory.*—The City of Canberra, in the Australian Capital Territory, is the National Capital. Section 125 of the Commonwealth Constitution (*see* p. 22 of this Year Book) provided for the establishment of a "Seat of Government", and on 5th December, 1910, a proclamation was issued vesting in the Commonwealth on and from 1st January, 1911, the former part of New South Wales chosen for this purpose. A further area at Jervis Bay in New South Wales was transferred as from 4th September, 1915. For further particulars of the transfer of the Territory *see* page 5 of this Year Book.

On 12th March, 1913, the official ceremony to mark the start of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony, the selection of "Canberra" as the name of the capital city was announced.

On 9th May, 1927, Parliament House at Canberra was officially opened by His Royal Highness Albert, Duke of York, afterwards His Majesty King George VI., the occasion being the 26th anniversary of the opening of the first Parliament of the Commonwealth at Melbourne by His Royal Highness George, Duke of Cornwall and York, afterwards His Majesty King George V., on 9th May, 1901. (For particulars of the opening ceremony *see* Official Year Book No. 21, p. 604.)

The development of the Territory administration prior to the taking over of control by the Federal Capital Commission on 1st January, 1925, is described in summarized form in Official Year Book No. 18, and in Official Year Book No. 22 a summary is given of the administrative activities of the Federal Capital Commission. The administration of the Territory by this authority was continued until 30th April, 1930, when the Seat of Government (Administration) Act 1924–1929 was repealed, and the powers and functions of the Commission reverted to the Government.

Since April, 1932, the general control of the Territory has been exercised by the Minister for the Interior, certain specific services, however, being undertaken by the Department of Health, the Department of Works, the Attorney-General's Department, and the National Capital Development Commission.

An amendment to the Seat of Government Acceptance Act in 1938 provides that the Territory shall be known as the Australian Capital Territory.

Information regarding the selection and establishment of Canberra as the Australian capital city, the physiography of the Territory, and its early history, will be found in earlier issues of the Official Year Book—*See* List of Special Articles, etc., at the end of this volume under "Canberra" and "Federal Capital City".

2. *Progress of Works.*—(i) *National Capital Development Commission.* (a) *General.* The National Capital Development Commission Act 1957–1960 provides for a Commission to undertake and carry out the planning, development and construction of the City of Canberra as the National Capital of the Commonwealth. The year 1960–61 was the third year of the Commission's operations. Construction work was carried out by means of agency arrangements with the Department of Works and private consultants.

Details of the expenditure by the Commission during each of the three years of its operations are as follows.

## NATIONAL CAPITAL DEVELOPMENT COMMISSION: EXPENDITURE.

(£'000.)

Item.	1958–59.	1959–60.	1960–61.
Housing and Flats .. .. .	5,836	4,617	3,427
Education .. .. .	635	1,036	1,501
Commonwealth Administration .. .. .	528	738	1,391

Engineering Services .. .. .	1,952	3,050	3,312
Minor Works .. .. .	170	197	255
Fees and Charges .. .. .	645	731	635
<b>Total .. .. .</b>	<b>9,982</b>	<b>11,046</b>	<b>10,987</b>

(b) *Housing.* During the year 1960–61 contracts were let for the construction of 714 houses and 172 flats including bachelor flats. Housing units completed included 724 houses, 87 two-bedroom flats and 42 bachelor and one-bedroom flats. Units under construction at the 30th June, 1961, were 641 houses and 172 flats. Principal construction areas were Narrabundah, Red Hill, Dickson, Downer, Ainslie and Watson.

(c) *Architectural—Education.* School buildings completed in the year were the Narrabundah High School, assembly halls at Ainslie Primary School and Telopea Park High School, additional classrooms at Lyneham and North Ainslie Primary Schools, and pre-school centres in Campbell, Dickson and Lyneham. Schools under construction at the 30th June, 1961, were the Downer and Campbell Primary Schools, Dickson High School, and an assembly hall for the Canberra High School.

During the year 1960–61 the Commission completed the first Hall of Residence and the Physics Building for the Australian National University. The latter is the first of a group of buildings for the Faculty of Science. The second unit of the group, the Chemistry Building, is under construction.

Establishment of the Canberra Technical College at Reid was commenced by construction of the School of Commerce which was occupied at the beginning of 1962. The second stage, for which tenders were called in 1961–62, will be lecture rooms, drawing rooms and laboratories for the School of Engineering and Science.

*Commonwealth Offices.* Work continued on the first four buildings of the proposed group of seven office buildings for the defence departments at Russell Hill near Duntroon. Two buildings were completed in 1960–61. The remaining two are expected to be completed in 1962. Preliminary sketch plans of the remaining three buildings in the group have been approved and documentation is proceeding with a view to tenders being called in 1961–62.

A contract was let during 1960–61 for the construction of an office block in Barton for the Tariff Board. This building was completed early in 1962.

Work on the Civic Offices, the Upper Plaza and terminating feature in Ainslie Avenue, was completed in 1961. The offices accommodate the Department of the Interior and the Civic branch of the Canberra Public Library. Design studies are being undertaken for buildings planned for the head of City Square comprising the Civic Auditorium, an exhibition building, and an intimate theatre.

(d) *Engineering—Lake and Bridges.* At 30th June, 1961, King's Avenue Bridge, commenced in 1959–60, was nearing completion and was completed early in 1962. A contract was let during 1960–61 for the construction of Commonwealth Avenue Bridge and construction of Parkes Way commenced. Construction of the Lake Dam began during the year and landscaping of the lake foreshore continued.

*Other Engineering Works.* Some 1,700 residential blocks were serviced with water supply, sewerage, stormwater drainage, kerbs and gutters, roads and footpaths in 1960–61, compared with 1,570 in the previous year. At the end of the period, servicing of a further 760 blocks had started.

Work on the main water supply continued, and the end of the period saw the completion of the Upper Cotter Dam in which storage of water had commenced. A 36-in. water main between Winslade and Mt. Stromlo was completed, and a contract was let for a 42-in. main between the Cotter Pumping Station and Winslade.

Several major city roads were completed, also major parking areas at Civic Centre and Kingston.

Major engineering projects under construction at 30th June, 1961, included the sub-arterial road between Watson and Hackett, Narrabundah reservoir and mains, services for the Campbell shopping centre and extensions to the sewerage treatment works.

(e) *Private Enterprise.* The increasing role of private enterprise in participating in the development of the National Capital is reflected by its activities in 1960–61.

During the year, 544 private houses were completed. At 30th June, 1961, 589 were under construction. The completions during 1959–60 were 443. About 1,000 residential

blocks were taken up at auctions in 1960-61 compared with 578 in the previous year. The main areas of housing development were in Narrabundah, Red Hill, Dickson, Downer, Ainslie and Watson.

Leases for the construction of eight commercial office blocks in Hobart Place on London Circuit were auctioned in September, 1960. These buildings were commenced during 1961-62. Sites at Civic Centre for retail activity were auctioned at the same time. These groups, together with the Hobart Offices, will double existing retail and private office accommodation at Civic Centre.

Twenty-five industrial sites at Fyshwick and blocks for four wholesale showrooms at Kingston and Griffith were also released during the year.

(ii) *Department of Works.* Apart from the work it carries out for the National Capital Development Commission, the Department of Works acts as design and supervision agent for other Commonwealth departments and instrumentalities. The following particulars relate to works of this nature.

During the year 1960-61, the Department of Works completed eight houses on behalf of civil (other than National Capital Development Commission) and defence departments in the Australian Capital Territory. Of the other building operations undertaken, the major projects were as follows.

*Government Printing Office.* Work commenced on construction of the new Government Printing Office, Kingston, which is required to meet the increasing printing requirements of the Commonwealth Parliament and government departments located in Canberra. The general layout of the new building provides for an extensive single-storey production area divided into a number of specific process locations, connected to a two-storey administrative block. The building will cover an area of approximately 10 acres with a total floor area of 360,000 square feet. The total estimated cost of the work is £3.4 million and the project is scheduled for completion during the first half of 1963.

*Canberra Community Hospital.* At the close of 1960-61, work was almost completed on construction of the new boiler house and laundry at the Canberra Community Hospital, which is the first step in the conversion of the hospital from 250 to 600 beds. This first section of the work will cost approximately £295,000.

A further stage in the development of the Canberra Community Hospital was reached during 1960-61 with the letting of a tender for construction of a new Nurses' Home. The new home, which will provide accommodation for 290 nurses, will consist of two units. The project is due for completion in June, 1963, and will cost approximately £850,000.

*Biochemistry Laboratory.* Work continued during the year on construction of this three-storey brick building for the C.S.I.R.O. which is designed to provide the necessary facilities for experiments in biochemistry by C.S.I.R.O. scientists. The final cost of this building is expected to be approximately £210,000.

*Royal Military College, Duntroon.* During 1960-61 four major projects, costing in total more than £230,000, were completed for the Department of the Army at Duntroon. These projects were: a two-storey barracks block; a new physics laboratory; a central "Q" Store providing further storage space for Army stores and equipment; and a new two-storey quarters to accommodate Army nursing staff.

*Harman and Belconnen Naval Stations.* To meet the demand for increased accommodation for Navy personnel, two barracks buildings, one at Harman to accommodate 214 personnel, the other at Belconnen to accommodate 30 personnel, were constructed for the Department of the Navy during 1960-61. The total cost of the two projects was £265,000.

In addition to its building activities in the Australian Capital Territory, the Department of Works carried out a programme of new works and maintenance on roads and footpaths, water supply, sewerage and drainage.

Total expenditure during 1960-61 on all operations amounted to £3,077,699, compared with £1,842,333 in 1959-60. Major items in 1960-61 were:—Building Works—Housing, £19,434, Other Building, £1,394,802; Engineering Works, £186,877; Repairs and Maintenance—Building, £736,993, Engineering, £733,227; Purchase of Plant, £6,366.

3. **Forestry.**—A considerable amount of reforestation work has been undertaken, and plantations (mainly *Pinus radiata*) have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have been established in the Brindabella mountains and soil conservation areas at various locations throughout the Territory.

The total area of softwood plantations at 30th June, 1961, was 24,418 acres, of which 22,218 acres were *Pinus radiata*, the balance consisting of other softwood species, chiefly *Pinus ponderosa* and *Pinus nigra*, and 221 acres of experimental planting at Jervis Bay, mainly *Pinus radiata* and *Pinus elliotii*.

Forestry operations in the Territory were begun on Mount Stromlo in 1915. Plantings up to 1925 were chiefly on decorative lines, but since then a much wider programme has been undertaken. Sawmill timber is now being obtained, mainly from thinning operations. The yearly output of pine logs has increased from 2,500 cubic feet in 1930–31 to about one million cubic feet at the present time, the total amount cut to date being about 14.5 million cubic feet. The present output consists of approximately 50 per cent. logs yielding building material, and 50 per cent. case-making material.

In 1926, a comprehensive review was undertaken of the Territory's potentialities for forest development. The existing forest area has been placed under management and a considerable amount of survey and assessment work has been completed, resulting in the extension of operations, including fire protection, to 100,000 acres of hardwood forests in the Cotter catchment area. Hardwood log production during 1960 and 1961 was 195,000 cubic feet per annum, all of which was used in building operations in Canberra. The total amount of hardwood cut from Australian Capital Territory forests to date is about 3,700,000 cubic feet.

4. **Lands.**—(i) *General.* Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Territory and to the area of alienated and leased land, and Chapter IV.—Land Tenure and Settlement of this issue contains statistical information on the subject.

Under the Seat of Government (Administration) Act 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act. Leases of land in the city area are granted under the City Area Leases Ordinance 1936–1961, and leases of other lands under the Leases Ordinance 1918–1958. Land is also leased for various purposes in the city area under the Church Lands Leases Ordinance 1924–1932 and the Leases (Special Purposes) Ordinance 1925–1943, while one lease under the Church of England Lands Ordinance 1926 has been granted for church purposes.

Under the City Area Leases Ordinance 1936–1961, the Commonwealth may grant leases of Crown land in the city area for business or residential purposes. Such leases may be issued for a period not exceeding 99 years at a rental equal to five per cent. per annum of the unimproved value of the land, which value is subject to re-appraisal at the expiration of 20 years, and thereafter every 20 years. A suitable building must be commenced within six months and completed within 12 months unless an extension of time is allowed.

As considerable portions of the Territory lands are not immediately required in connexion with the establishment of the city, large areas have been leased for agricultural or grazing purposes. Leases may be granted for grazing, dairying, fruitgrowing, horticulture, agriculture or other purposes for periods not exceeding 50 years. The annual rental is 5 per cent. of the assessed value of the land inclusive of rates, the rental being subject to re-appraisal every 10 years.

(ii) *Jervis Bay Territory.* The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital Territory. The Royal Australian Naval College was established in this area on a site known as Captain's Point, but was removed in 1930 to Flinders Naval Base, Victoria. It was, however, re-established at the original site as from the beginning of 1958. Some 5,000 acres of land in the Jervis Bay area, mostly of little value agriculturally, are used for grazing purposes. The natural forest is being utilized for the production of hardwood building material and the area treated is being reforested with softwoods on an experimental basis.

5. **Transport and Communication.**—Canberra is connected with the railway system of New South Wales at Queanbeyan by a line  $4\frac{1}{2}$  miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. The railway terminus is situated in the suburb of Kingston. Direct or linking services operate between Canberra and Sydney and Canberra and Melbourne.

Two airlines provide several services daily each way on the Sydney—Canberra—Melbourne route.

Regular motor-coach services link Canberra with towns in New South Wales, Victoria and South Australia.

There are three radio broadcasting stations in the Territory, 2CY and 2CN of the national broadcasting system and 2CA, a commercial station, and work is in progress on the construction of a commercial television station. The station is expected to be in full operation by June, 1962.

6. **Population.**—From 1911 until 1921, the population of the Territory remained at about 2,000 persons. In 1922, it commenced to rise, and by 1927 was nearing 6,000. The following year, with the transfer of departments from Melbourne, it passed 8,000.

Little growth was made thereafter until the later 'thirties, and at the outbreak of the 1939–45 War the population had reached just under 13,000 persons. During the war, growth was again slow, and at the Census of 30th June, 1947, the population was 16,905 persons. Subsequently, the population showed steady increases and at the Census of 30th June, 1954, it was 30,315 persons. At the Census of 30th June, 1961, the population had reached 58,828 persons (30,858 males and 27,970 females), made up of 56,449 in the Canberra city area and 2,379 in the rural districts (including 527 in Jervis Bay).

7. **Production.**—During 1960–61, the production of the more important items of the agricultural and pastoral industry was—Wheat, 30,219 bushels; wool, 2,472,000 lb.; whole milk, 994,000 gallons; meat (carcass weight, fresh), 2,749 tons. The numbers of livestock depastured at 31st March, 1961, were—Horses, 699; cattle, 12,520; sheep, 278,200; and pigs, 109.

8. **Education.**—The Australian Capital Territory Education Ordinance provides for the compulsory attendance at school of children between the ages of six and fifteen years. The Commonwealth Department of the Interior is primarily responsible for the education of children in the Australian Capital Territory. By agreement, however, the New South Wales Department of Education arranges the teaching programme in accordance with its own curriculum and provides the teaching staff. It is reimbursed for expenses incurred.

At 31st October, 1961, there were four public secondary schools in Canberra providing courses to the Leaving Certificate standard—Canberra High School, Acton, Telopea Park High School, Barton, Lyneham High School, Lyneham, and Narrabundah High School, Narrabundah. Seventeen schools provided courses for children in infants and primary classes, including two in the Jervis Bay area and three in rural districts. There is also a school for mentally handicapped children.

At the same date, there were thirteen private schools in Canberra. Of these, St. Edmund's Christian Brothers' College, the Catholic Girls' High School, the Canberra Grammar School (Boys), and the Canberra Church of England Girls' Grammar School provide courses leading to the Leaving Certificate Examination.

Twenty-one pre-school centres, including an occasional care centre and a mobile unit which visits outlying areas, provide pre-school facilities for approximately 1,700 children between the ages of three and five years.

The Canberra Technical College, which follows the curriculum set by the New South Wales Technical Education Department, provides trades courses for apprentices, vocational (non-trades) courses including accountancy, women's handicrafts, and sheep and wool courses, hobbies courses including ceramics, dressmaking, art, woodwork and motor maintenance, and courses for Commonwealth authorities, including workshop practice for Royal Military College cadets, motor maintenance for Australian Forestry School cadets, and shorthand and typing courses for the Public Service Board. In addition, the Technical College undertakes the trade testing of migrants seeking to enter skilled trades.

An area of about 250 acres has been set aside at Acton for the Australian National University. Provision has been made for the University to establish such research schools as may be thought desirable, including a School of Medical Research, and Research Schools

of Physical Sciences, Social Sciences and Pacific Studies. Provision for undergraduate studies and some post-graduate study is made by the School of General Studies. Further reference to this University appears in Chapter XV.—Education.

9. Finance.—Details of revenue and expenditure for the years 1956–57 to 1960–61 as recorded in the Commonwealth Consolidated Revenue Fund are given in the following table.

(a) Excludes Electricity transactions in Australian Capital Territory Electricity Supply Trust Account. Revenue excludes particulars of Water Supply and Sewerage, which are not available separately and are included in Rates and Other. (b) Other than Capital Works and Services. (c) Payment to Australian Capital Territory Transport Trust Account (loss on omnibus service). (d) Includes loss on operations, 1956-57, £15,000; and 1957-58, £30,000. Since 1958-59, Commonwealth-owned hostels in the A.C.T. have been operated by Commonwealth Hostels Ltd. (e) Excludes repairs and maintenance. (f) For details see para. 2 (i), p. 117. (g) Not available.

## NORFOLK ISLAND.

1. **Area, Location, etc.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° 3' 30" S., longitude 167° 57' 5" E. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney, it is distant 930 miles, and from Auckland, 660 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side and the landing place at Cascade on the northern side, almost inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 49° and 85° F. with a mean of 68° F. The average annual rainfall is 53 inches. It has been said that the healthy climate together with the beauty of its landscapes and seascapes, should make Norfolk Island "the Madeira of the Pacific".

2. **Settlement and Population.**—The first colonization, in 1788, was by Lieutenant King of H.M.S. *Supply*, who established a small penal station on the island as a branch settlement of that at Port Jackson. The settlement was abandoned in 1813 and for 13 years thereafter the island was used chiefly as a whaling station and place of call for British warships.

From 1826 to 1855, it was again a penal station. In 1844, it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed to Norfolk Island in 1856. The new community, numbering 94 males and 100 females, were the descendants of British sailors and Tahitian women. The last of those transferred died at Norfolk Island on 1st March, 1943. The population of the island as disclosed by the Census of 30th June, 1961, was 844, consisting of 421 males and 423 females.

3. **Administration.**—In 1856, the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896, it was made a dependency under the Governor of that Colony, and finally, by the passage of the Norfolk Island Act 1913, it was accepted by the Commonwealth Parliament as a territory of Australia. From July, 1914, until 1st January, 1929, Norfolk Island was administered by the Department of Home and Territories, and then, until 25th June, 1941, by the Territories Branch of the Prime Minister's Department, but it is now controlled by the Minister for Territories through an Administrator. An amending measure, the Norfolk Island Act 1935, provided for the establishment of an Advisory Council of eight elected members which may advise the Administrator on matters affecting Norfolk Island.

The Norfolk Island Act 1957, which came into operation on 7th April, 1960, provides for variations in the administrative and judicial arrangements of the island. It also provides for a local government body, the Norfolk Island Council, which replaced the former advisory council, retaining its advisory functions, but in addition having a certain autonomy in local government matters on the island.

4. **Economic Activity.**—The major economic activities of the island are primary production, whaling, the tourist trade and Government instrumentalities.

(i) **Primary Industries.** The soil on the island is particularly fertile, the climate equable, and the rainfall fairly evenly distributed except for a pronounced dry period in November. This enables a wide range of temperate and semi-tropical products to be cultivated. However, the island's comparative isolation and trading difficulties with New Zealand hamper production, although a relaxation of some restrictions enabled a limited quantity of out-of-season fruit and vegetables to be sent by air freight to Auckland.

Prior to 1939, the principal primary product was passion fruit pulp. However, the introduction of disease, together with the high cost of trellising and land reclamation, has led to the curtailment of this industry. Apart from whaling, bean seed is now the main export industry. The island's isolation from many plant diseases, plus the fairly reliable dry period, has ensured satisfactory production. Export figures for the five years to 1959–60 were 1,084, 2,680, 1,713, 3,922, and 2,568 bushels. However, wide fluctuations in prices, as in recent years, react unfavourably against the industry. The conditions on Norfolk Island also favour the production of other types of seed.

The Plant and Fruit Disease Ordinance 1959 aims at preventing the entry of fruit fly and other insect pests, and controlling the spread of plant diseases.

Island conditions are also conducive to good pasture growth, and as a joint product of pastoral pursuits quantities of hides and wool are exported.

Fish and, in certain months, whales abound off the island. In the past, a number of ventures have been formed to exploit these resources. They have been short-lived owing, for the most part, to the lack of a sheltered harbour. However, a modern whaling station was started on the island in 1955, and production commenced during the second half of 1956. The quota of 150 humpback whales in 1956, 120 in 1957 and in 1958, 150 in 1959, and 170 in 1960 and 1961, was caught and processed at the station.

An active forestry programme is being carried out to increase the resources of Norfolk Island pine and to introduce suitable types of eucalypts.

(ii) *Tourists.* The unique history and unusual beauty of the island have always attracted a number of tourists. Before the 1939–45 War, the only means of transport to the island was by ship, but the building of the aerodrome in 1943 made the island far more accessible and a tourist industry has developed which is at present limited only by the accommodation available, there being at present one licensed residential hotel and five guest houses.

(iii) *Government Instrumentalities.* A large proportion of the population is employed by Commonwealth Government instrumentalities, namely:—Department of Civil Aviation, Norfolk Island Administration, Overseas Telecommunications Commission, and Department of the Interior (Meteorological Branch). The bulk of the finance for the operation of these instrumentalities is supplied by the Commonwealth Government and this greatly increases the income of the island.

5. *Trade, Transport and Communication.*—Imports to Norfolk Island since the 1939–45 War have risen from £32,402 in 1945–46 to £288,788 in 1959–60. In 1959–60, the major proportion (£244,634 or 85 per cent.) came from Australia, while New Zealand supplied £10,286 or 4 per cent. Exports have risen from £9,024 in 1945–46 to £187,479 in 1959–60. The big increase is due mainly to the commencement of operations by the whaling station in the 1956–57 season. Australia was the principal market, exports thereto amounting to £179,673 in 1959–60, while exports to New Zealand amounted to £2,705 and those to Pacific Islands to £3,943.

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are (a) the produce or manufacture of Norfolk Island; (b) shipped direct to Australia; and (c) not goods which if manufactured or produced in Australia would be subject to excise duty.

A shipping service to the island is maintained at approximately seven-week intervals by Burns Philp & Co. Ltd., Sydney. The route is from Sydney via Norfolk Island to the New Hebrides, Solomon Islands and other island groups and thence back to Sydney. Shipping between the island and New Zealand is infrequent.

The construction of the aerodrome on the island was completed during 1943. A fortnightly passenger and air freight service between Sydney and Norfolk Island, maintained by Qantas Empire Airways Ltd., extends to New Zealand under charter to Tasman Empire Airways Ltd.

There are approximately 50 miles of usable road on the island. As a substantial section of the population possesses private motor cars, and taxi-cab services are available, transport is almost exclusively by motor vehicle.

The cable from Great Britain via Vancouver, Fanning Island, and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane. Until 10th June, 1947, the post office at the island was part of the Commonwealth postal system, but as from that date Norfolk Island was established as a separate postal administration with its own issue of stamps.

6. *Education.*—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry and hat-making. The teachers are provided by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30th June, 1960, was 140. Free dental service is provided for school children.

7. *Judiciary.*—The judicial system of the Territory was reconstituted by the Norfolk Island Act 1957 which was proclaimed in the Territory on 7th April, 1960. There is now a Supreme Court of Norfolk Island and a Court of Petty Sessions which replaced the Court of Norfolk Island in its full and limited jurisdictions. The Supreme Court is the highest judicial authority in the Territory with original criminal and civil jurisdiction. The jurisdiction of this Court is exercised by a judge sitting in Court or to the extent provided by the

Supreme Court Ordinance 1960 or any other Ordinance or by rules of Court, and in all matters of practice and procedure by a judge sitting in Chambers. The jurisdiction of the Court of Petty Sessions is exercised by a Chief Magistrate or any three Magistrates other than the Chief Magistrate. This Court has jurisdiction to hear and determine in a summary manner under the provisions of the Court of Petty Sessions Ordinance 1960. There is right of appeal to the Supreme Court from the Court of Petty Sessions, and, in certain circumstances, a right of appeal to the High Court of Australia from judgments of the Supreme Court.

8. Finance.—The revenue of the Territory, together with an annual grant from the Commonwealth Government for administrative expenses, is paid to the credit of the Norfolk Island Trust Fund, and advances for administrative and developmental expenses are drawn from the account. The principal items of revenue and expenditure for the five years 1956–57 to 1960–61 were as follows.

**PAPUA AND NEW GUINEA.**

NOTE.—The information under this heading is applicable to both the Territory of Papua and the Trust Territory of New Guinea. For details of the respective Territories *see* pages 134 (Papua) and 139 (New Guinea) and following pages.

**§ 1. Administration.**

Following the outbreak of war, civil administration in Papua and in New Guinea was suspended on 11th February, 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied Forces when the Japanese surrendered in August, 1945. Information relating to the transfer back from military to civil control under the Papua-New Guinea Provisional Administration Act 1945–1946 may be found in Official Year Book No. 39 and earlier issues.

The Papua-New Guinea Provisional Administration Act 1945-1946 was repealed by the Papua and New Guinea Act 1949 which came into force on 1st July, 1949. The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provided for an Administrative Union of the Territory of Papua and the Territory of New Guinea with one Administrator, one Supreme Court and one Public Service.

Provision was made for an Executive Council of not less than nine officers of the Territory, who shall be appointed by the Governor-General, and a Legislative Council consisting of twenty-nine members, namely:—(a) the Administrator; (b) sixteen officers of the Territory (who shall be known as official members); (c) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory; (d) three non-official members representing the interests of the Christian missions in the Territory; (e) three non-official native members; and (f) three other non-official members.

The Legislative Council was inaugurated on 26th November, 1951, by His Excellency Sir John Northcott, while Administrator of Australia.

In October, 1960, the Commonwealth Parliament passed amendments to the Papua and New Guinea Act to change the composition of the Legislative Council, the new Council consisting of 37 members, namely:—(a) the Administrator; (b) 14 official members (who may be either native or non-native); (c) 12 elected members (six elected by natives and six by non-natives); and (d) 10 nominated members of whom at least five will be natives. Eventually, elected members will be chosen by voters of all races registered on a common roll.

## § 2. Finance.

1. General.—The following table shows particulars of the financial operations of the Papua and New Guinea Administration for the years 1956-57 to 1960-61. Further information on each Territory will be found on pages 139 and 147.

2. **Taxation.**—The main forms of taxation are income tax, personal tax and import duties.

*Income Tax* was imposed on 1st August, 1959, to operate from 1st July, 1959. The scale of taxation is about 50 per cent. of the tax payable on the same taxable income in Australia. Deductions for dependants the taxpayer is maintaining, and maximum deductions for medical, dental and educational expenses are considerably higher than those allowed in Australia. The tax on public companies is at a flat rate of 4s. in the £1, which is a little over half the predominant rate of company tax in Australia. While on private companies the rate is 2s. 6d. in the £1 for the first £5,000 and 3s. 6d. for the remainder, and generally comparable deductions are allowed. On 1st January, 1958, a *Personal Tax* was introduced for all males (including non-indigenous) of 18 years of age and over, in Papua and New Guinea. The maximum tax is £2 per annum; the tax assessed is subject to the taxpayers' ability to pay, and consequently large areas have been exempted. Native Local Government Councils (which are formed voluntarily by the natives) are, however, empowered to levy taxes on villagers for the purpose of providing for local services carried out by the Councils. These taxes are set off against the native's Personal Taxation.

The present *Customs Tariff* provides high revenue rates on imports of ale, spirits, tobacco and cigarettes, timepieces, cigarette papers, fancy goods and jewellery, but allows entry of most necessities affecting living and building costs duty free, or at a low rate of duty. There is a by-law provision under the Customs Tariff to enable duty-free admission to be granted for plant, machinery and chemicals to be used mainly for industrial and development purposes and for goods imported by passengers. No preferential rates are specified in the schedule. Export duties imposed on copra, cocoa, rubber, mother-of-pearl, trochus and burgos shell and gold were repealed in July, 1959.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced in and imported direct from the Territory (see Chapter XIII.—Trade), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

### § 3. Agriculture and Animal Industry.

1. **Soils.**—Although a large proportion of Papua and New Guinea is covered by skeletal soils unsuitable for agriculture, there are extensive areas in all parts where fertile soils occur, suitable for growing a wide range of crops. Most of the agriculture of the Territory up to the present has been on soils on the coastal plains, which, apart from the swamp soils, consist mainly of alluvium and podsolized alluvium. So far, these have been

mostly under coconut plantations, although other crops such as rubber and cocoa have also been grown. The swamp soils, of which there are extensive areas in the delta plains and other parts of the Gulf of Papua, and in smaller areas, are found intermittently around the coasts and along the lower reaches of the rivers, and are in general quite unsuited to any form of agricultural development.

Volcanic soils probably offer the greatest prospects for development. They are found mostly on the Central Plateau and southern foothills of the main island, but there are also areas in New Britain (particularly in the Gazelle and Willaumez Peninsulas), Bougainville and New Ireland, as well as in numbers of smaller islands. Other rich soils are the alluvials of the river valleys. The largest single area of this type is in the trough occupied by the Ramu and Markham Rivers.

2. *Climate.*—The climate, particularly the rainfall, over so wide an area as Papua and New Guinea, with its numerous islands and varying elevations, naturally presents many variations. Generally speaking, the climate is moist and tropical, except at high altitudes. There are only small differences in both daily and seasonal extremes. The Territory has no winter and summer, and thus no great variation in day-length over the year. The two seasons which are experienced are generally described as the "south-east" and the "north-west", corresponding with the periods of the year when the south-east trade winds and the north-west monsoons direct the main Territory air-flow. The south-east season prevails approximately from May to October, the trade winds attaining maximum velocities during July and August. The north-west monsoon operates over a considerably shorter period, from the end of December to about March. During the periods between these seasons, November and early December, and about March to April, there are two short spells of calm weather.

Rainfall varies considerably, from an average annual rainfall of 245 in. at Gasmata in New Britain and 231 in. at Kikori in Papua, to about 88 in. at Wewak in New Guinea and 40 in. at Port Moresby.

Although the Territory has no summer and winter, it has a wide temperature range, due to differences in altitude, varying from an absolute highest temperature of about 100° F. along the coast, to freezing point on its highest peak, Mt. Wilhelm (15,400 ft.).

Humidity in the Territory is very high throughout the year. Some coastal stations register an average relative humidity of more than 90 per cent. Humidities below 60 per cent. are rare at coastal stations, average figures varying from 80 per cent. at 9 a.m. to 65 per cent. at noon and 75 per cent. at 3 p.m. Humidity in mid-mountain forests appears to be higher than in the lowlands, while in the mossy forests there are periods when the whole belt is saturated.

3. *Land Tenure.*—There is considerable variation throughout the Territory in the nature of customary ownership of land. In most areas, some rights remain in the landholding group and individuals within the group have limited rights of use, either for life or for a shorter period. Thus the normal system by which the rights of ownership in land use are acquired is by birth to a landholding group. Transfer of rights between individuals by sale and purchase appears to have been unusual in the past, but this practice is now an established custom in some localities and appears to be increasing. Inheritance may be based on either patrilineal or matrilineal descent, or both. In parts of the Territory, however, there is a tendency for the whole inheritance system to change, particularly in communities where it is based on matrilineal descent. Following a close study of the problems in relation to land holdings by natives, the Government has laid down the following broad principles of policy.

- (i) The ultimate and long-term objective in Papua and New Guinea is to introduce throughout the Territory a single system of land holding regulated by the central Government by statute, administered by the Department of Lands of the central Government, and providing for secure individual registered titles after the pattern of the Australian system.
- (ii) Only the central Government (i.e. the Administration working through the Department of Lands and the Registrar of Titles) may issue and register land titles.

- (iii) Land subject to native custom remains subject to native custom only until it is taken out of custom either by acquisition by the Administration or by a process, to be provided for by Ordinance of the Territory, of conversion of title to an individual registered title.
- (iv) Upon either acquisition or conversion of title, compensation is to be provided in respect of extinction of rights under native custom.
- (v) Land held under native custom may not be acquired outside of native custom by other than the Administration.
- (vi) For the time being, land may not be acquired by the Administration unless the native owners are willing to sell and in the opinion of the Administration: the land is not required by them; and conversion of title from native custom to individual registered title may take place only if the majority of those interested in the land under native custom consent to conversion and the method of conversion.
- (vii) The services of Native Land Commissioners are to be used, as a first priority, on investigations into claims by the Administration that land is ownerless and may therefore be declared administration land, on investigation into the ownership under native custom of land proposed to be acquired by the Administration, on settlement of disputes about the ownership of land held under native custom, and, when legislative provision has been made, on investigations into the rights held under native custom in land proposed to be converted to individual registered title. The aim is that all the time of the Commissioners should be taken up with this work. To the extent that at any time it is not, the Commissioners should continue investigations into the holding of land under native custom; the results of such investigations are to be recorded for use in connexion with future acquisitions or conversions of title, but are no longer to be registered.

Consideration is being given to the legislation and administrative steps necessary to put this policy into effect.

**4. Suitable Crops.**—The crops which can be grown in Papua and New Guinea include coconuts, rubber, tea, coffee, cocoa, jute, kenaf, manila hemp, sisal, rice, pepper, tobacco, peanuts, kapok, cassava, ginger, cinchona, nutmeg, vanilla, tropical fruits and vegetables, sago and tung oil, but of these, the only crops of any commercial importance are coconuts, cocoa, rubber, coffee and peanuts.

**5. Plantation Agriculture.**—*Coconuts.* Territory coconut plantations suffered severely from damage and neglect during the 1939–45 War. Rehabilitation was rapid, however, and in 1959–60 about 550 plantations, together with native coconut stands, produced 65,396 tons of copra, valued at £6,126,443, for export. In addition, 25,526 tons of coconut oil, valued at £3,813,649, and about 12,269 tons of copra oilcake and meal, valued at £346,423, were exported in 1959–60. A copra crushing mill was established at Rabaul in 1952. Native stands produce about 25 per cent. of the copra exported.

*Rubber.* Exports of rubber, almost exclusively to Australia, have increased from 1,952 tons, valued at £802,177, in 1950–51 to 4,399 tons, valued at £1,500,197, in 1959–60. The latter figure represents about 10 per cent. of Australia's annual requirement for natural rubber.

*Cocoa.* Exports of cocoa beans increased from 317 tons, valued at £92,181, in 1950–51 to 5,870 tons, valued at £1,671,427, in 1959–60. Nearly 50 per cent. of the exports go to Australia. At present native growers produce about 25 per cent. of the cocoa production in the Territory.

*Coffee.* Exports of coffee rose from 33 tons, valued at £8,359, in 1950–51 to 1,487 tons, valued at £717,141, in 1959–60. Of the 17,600 acres planted to coffee in the Territory, about 60 per cent. is in native-owned groves and the rest grown by Europeans in plantations. The bulk of the Territory coffee production is marketed in Australia.

6. **Native Agriculture.**—Most of the native inhabitants of Papua and New Guinea are agriculturalists producing fruit and vegetables for their own consumption. The crops grown vary according to environment and altitude, and include yams, taro and sweet potatoes, coconuts, bananas, papaws, maize, sugar-cane, cassava, beans, peanuts, rice, cucurbits and tobacco. Sago is the staple food in the extensive semi-inundated areas which occur along the lower valleys of the major rivers. In these areas, it is cut largely from naturally occurring stands. In other parts of the country, small areas of sago are grown along stream banks and in swampy patches and are regarded as a reserve in times of poor harvest. In recent years, the natives have taken up the production of introduced crops such as peanuts, rice, cucurbits and maize for their own consumption and cocoa and coffee for export. In coconut areas, large quantities of copra are produced. In 1959-60, native copra production was estimated at about 24,800 tons.

In many localities, the natives follow a farming system known as "Bush Fallowing Rotation". The inhabitants of each village have, at any one time, a number of distinct and separate cleared garden areas in the land surrounding the village. The garden clearings may be located some miles from the village and are not usually contiguous. Each garden area may be made up of a number of distinct plots owned by individual natives or families. Communal ownership of gardens is rare. The number of garden clearings (and their area) attached to each village depends on the size of the village and the fertility of the land.

The method of cultivation followed is for the jungle trees to be felled and undergrowth cleared with axes and knives, the larger trees usually being left standing. The timber and foliage is allowed to dry out and then burnt. In some localities, there is little cultivation before the crops are planted, and root vegetables are placed in holes dug with a stick. In other places, however, there is careful preparation of the soil. Some weeding is done while the crops are growing. After harvesting, a second crop is rarely planted immediately in that garden area, but a new area of land is selected, cleared, burnt and planted. The natives return to the first area to harvest fruit from trees, such as papaw and banana, that may have been planted in the garden, but these are soon submerged in the new jungle growth which quickly appears. The plot is allowed to lie fallow for a number of years, the period varying from 7 to 10 years or even longer, depending upon the local population pressure. During this time, high secondary jungle has probably grown. Ultimately the natives return to the original plot, and clear, burn and plant again. The cycle continues year by year throughout the agricultural land belonging to the village. The foregoing is a broad generalization of the method followed. There are, however, many variations.

The growing of food is done by both the men and women. The division of work is usually clearly defined within the village itself but this division is not necessarily the same in all areas. Generally it is found that felling the forests is always done by the men, and carrying the harvested food home to the village is nearly always done by the women. Other work, however, such as cultivating, planting and weeding may be done by either men or women according to the customs of the particular village or area.

The advancement of native agriculture for local food supply and improved land use in village gardens, as well as for economic production of crops for sale, has a high priority in Government policy for the Territory.

7. **Animal Industry.**—Livestock in the Territory as at 31st March, 1960, included cattle, sheep, goats and pigs, approximate figures for each species being:—cattle, 16,320; sheep, 621; goats, 3,050; and pigs, 4,232. Other livestock includes horses, mules and poultry. These figures represent European-owned livestock only; native-owned livestock consists almost entirely of pigs and poultry.

A number of British breeds of cattle are represented in Territory herds. For dairying, Jersey and Australian Illawarra Shorthorns are most popular; Black Polled, Polled and Horned Shorthorns, and Red Polled cattle are raised for meat production. Under good management these breeds have done well in the Territory.

Most of the sheep now in the Territory are Romney Marsh breed located at Nondugl in the highlands of New Guinea.

*The introduction of rabbits, foxes, hares and monkeys into the Territory is prohibited.*

8. *Co-operative Societies.*—The following table sets out details of the number of societies, members, etc., for the year ended 31st March, 1961.

**TERRITORY OF PAPUA AND NEW GUINEA: CO-OPERATIVE SOCIETIES,

#### § 4. Native Labour.

Most of the indigenous inhabitants are farmers who are mainly living a subsistence existence and are comparatively free of economic or other pressures forcing them into wage employment.

Labour policy is designed to serve the general aim of the advancement of the people of the Territory and the development of its resources, particularly by controlling the nature and rate of social change.

As from 6th October, 1960, previous native labour legislation was superseded by the Native Employment Ordinance 1958, which covers the great majority of native workers. The Ordinance divides the native labour force into three categories: agreement workers, casual workers and advanced workers.

*Agreement workers* are those who enter into an agreement with an employer to work for a specified period. The maximum agreement period for workers unaccompanied by their dependants is two years, but other workers may work for periods up to four years.

*Casual workers* are those workers who are employed without an agreement and their employment may be terminated at their own or the employer's desire at any time. Casual workers can only be employed within their own home sub-district except where the place of employment is within 25 miles of their home.

Workers who have a skill which should enable them to secure remunerative employment and whose education and social advancement enables them to look after themselves and their families properly in a cash economy may be classed as *Advanced Workers* and be issued with an Advanced Workers' Certificate. Advanced Workers may be employed anywhere in the Territory and be paid a cash wage which includes cash in lieu of rations, clothing and other articles as prescribed under the Ordinance.

The Ordinance prescribes a minimum cash wage of 390s. a year, equivalent to 30s. a lunar month. In the case of an employee who has more than one year's service with an employer, the prescribed minimum wage is 455s. a year. For workers engaged in heavy labour the wage is increased by 130s. a year. In addition to the cash wage, an employer is required to provide the worker, free of charge, with rations, clothing and other articles such as blankets, eating utensils and toilet gear. Rations take into account the dietary needs of the worker and clothing and blanket issues vary according to location.

In addition, the employer is required to provide accommodation and to arrange for the movement of the agreement worker from and to his home village at the beginning and at the end of the contract, without cost to the worker.

The Ordinance requires the employer to provide, free of charge, first aid equipment for the use of his employees and to provide medical supervision of the employees on a full time basis. Medical and hospital treatment is provided at the employer's expense.

Rations, clothing, etc., accommodation, medical and hospital care have also to be provided to the workers' dependants when accompanying him with the employer's consent.

The maximum working week without penalty rates is 44 hours and provision is made for overtime, call-out duty and a stand-by rate.

Provision is made under the Workers' Compensation Ordinance 1958-1960 for compensation in the case of injury or death.

Natives employed in the native constabulary come under the provisions of the Royal Papua and New Guinea Constabulary Ordinance 1955-1959, while those employed in the Auxiliary Division and the Third Division of the Territory Public Service come under the provisions of the Public Service Ordinance 1949-1960.

### § 5. Secondary and Tertiary Industries.

Secondary industries which have been established in the Territory are most frequently of the type associated with the elementary processing for export of local products such as copra, rubber, cocoa, coffee, passion-fruit and timber on or near the plantations. There has been a gradual growth in the manufacture of more highly processed products, and industries already established include a paint factory, twist tobacco factories, a copra crushing mill, a plywood factory, biscuit factories, soft drink factories and breweries. Large service industries already well established include air, sea and land transport services, and the building industry, which is serviced by sawmilling, joinery, furniture and metal industries, concrete products manufactures, brickworks, etc.

A wide variety of maintenance facilities is also available to service the various Territory industries, including engineering workshops, slipways, etc.

The following table shows details of factory operations for the year ended 30th June, 1960.

**TERRITORY OF PAPUA AND NEW GUINEA: FACTORY OPERATIONS.**

(a) Includes coconut oil processing, tyre retreading, paint manufacture, printing, etc.

## PAPUA.

## § 1. General Description.

1. **Early Administration.**—Particulars of the early administration of Papua are given in Official Year Book No. 19, page 576.

2. **Administration by the Commonwealth of Australia.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the Commonwealth by the Papua Act, 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is under the control of the Commonwealth, but not included within it, and is divided into six magisterial districts, Southern Highlands, Western, Gulf, Central, Milne Bay and Northern.

3. **Area, etc.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude; its southernmost portion, comprising Tagula and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 920 miles; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,600 square miles, of which 87,806 are on the mainland, and 2,794 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (*see* No. 18, p. 633).

## § 2. Population.

1. **Non-indigenous Population.**—At the Census of 30th June, 1961, the non-indigenous population of Papua was 5,490 males, 4,304 females, 9,794 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947 and 1954 was, respectively, 2,078, 2,173, 3,239 and 6,313 persons.

The European population of Papua increased slowly, and with some reversals in trend, from less than 700 in 1906, the year in which the Territory came under Commonwealth control, to 1,343 at the Census of 1921. It numbered only 1,148 at the 1933 Census, but at the 1954 Census amounted to 5,295.

2. **Native Population.**—It is not possible to give exact data regarding the number of natives, because part of the interior is not as yet under complete Government control. However, the enumerated and estimated population of the Territory of Papua at 30th June, 1960 numbered 493,518 persons. This comprised 410,478 enumerated persons (218,164 males and 192,314 females) and 83,040 estimated. The total number was distributed through districts as follows:—Southern Highlands, 146,871; Western, 51,332; Gulf (including the former Delta district), 63,485; Central, 98,868; Milne Bay, 84,850; and Northern, 48,112.

## § 3. Education and Health.

1. **Education.**—Education in the Territory is provided by the Administration and various Mission Organizations. Schools for natives have also been established by Native Village Councils. The Education Ordinance 1952–1957 enables the Administration to establish an education advisory board, district education committees and European and native schools, and to grant financial aid for educational purposes. European teachers are recruited from Australia, and native teachers are trained in the Territory by the Administration and Missions. During the year ended 30th June, 1960, 107 schools were maintained by the Administration for 7,758 children, of whom 709 were Europeans, 81 Asian or of mixed race, and 6,968 natives. The total number of pupils in the various grades of mission schools was 57,849, of whom there were 224 Europeans, and 466 Asian or of mixed race. To assist

the educational work of the Missions, the Administration provides expert advice, educational equipment, and text-books. In addition, the sum of £107,404 was distributed among the Missions as grants-in-aid during the year ended 30th June, 1960.

2. Health.—The Department of Public Health of the Territory of Papua and New Guinea has the general oversight of all dental and medical services. The Department has the following seven functional divisions: Medical Services; Preventive Medicine; Medical Training; Infant, Child and Maternal Health; Medical Research; Administration; and Mental Health. The services for the Territory of Papua are under the administrative control of a regional medical officer, with headquarters staff at Port Moresby.

At 30th June, 1960, the Administration had established 27 general hospitals, three special hospitals for the treatment of tuberculosis and Hansen's disease and one mental hospital; the Missions had established 24 general hospitals, with special wards at Balimo and Tari for the treatment of Hansen's disease. There were 374 village aid posts (175 Mission) and 112 maternal and child welfare clinics (45 Mission). School medical examinations, immunization, ante-natal and post-natal care and pre-school services are also provided. The Missions employ their own doctors and nurses in their medical establishments.

For some years, suitably qualified natives have attended the Central Medical School at Suva, Fiji, to be trained as Assistant Medical Officers and in auxiliary medical schools. In 1959, first year students were enrolled at the Papuan Medical College established in association with the Port Moresby General Hospital. Training for nurses and medical auxiliaries in many categories is also being provided.

The cases treated in hospital are mainly malaria, tropical ulcers, pneumonia, tubercular infections and tuberculosis, bronchitis and confinements.

#### § 4. Land Tenure.

The basic principle of the land laws of Papua is that all land not specifically alienated by due process from the natives, or established to be vacant and ownerless, is native land. At 30th June, 1960, of the total estimated area of Papua, approximately 58,000,000 acres, only 1,866,119 acres had been alienated. The distribution of alienated land at 30th June, 1960, according to tenure, was as follows:—held by private non-indigenous inhabitants freehold, 24,280 acres, leasehold, 335,452 acres; native reserves, 68,197 acres, other, including public reserves and land available for leasing, 1,438,190 acres.

Although, as the figures above show, a small amount of freehold land exists in Papua, no further estates in freehold can be granted under the provisions of the Land Ordinance 1911–1961 of Papua. Leases of various kinds may be granted by the Administration. The principal types of leases available are agricultural leases, pastoral leases, leases of town allotments, business leases and residence leases of other than town allotments, and various forms of special leases and licences over land. Leasehold terms are liberal and, in general, leases may be granted for periods of up to 99 years. Rent is based on the unimproved value of the land. For agricultural leases, the rental rate per annum is 5 per cent. of the unimproved value and for pastoral leases the rate is 2½ per cent. Concessions regarding freedom from, or reduction of, rents apply during the early developmental periods of agricultural and pastoral leases. All leases are subject to improvement conditions which may be varied or relaxed under certain circumstances. The following classes of leases were in force in Papua at 30th June, 1960:—agricultural, 716—285,829 acres; pastoral, 31—42,437 acres; residence, 174—262 acres; business, 161—284 acres; town allotment, 816—355 acres; mission, 407—1,076 acres; special, 290—3,677 acres; agricultural (mission), 7—1,532 acres; total, 2,602—335,452 acres.

Leases of Crown land are granted by the Administrator following a land use examination, advertisement of leases available and consideration of applications by the Land Board. Dealings in privately-owned land are a matter for private treaty. Native-owned land, however, cannot be acquired or leased from the native owners by private individuals. The Administration alone may purchase native-owned land, and then only if the owners are willing to sell and the Administration is satisfied that the owners do not require, and are not likely to require, the land.

The registration of titles, interests and dealings in alienated land is provided for under the Real Property Ordinance 1913–1955 modelled on the Torrens system of land registration. A start has been made on the recording of native land ownership under the Native Land Registration Ordinance 1952.

### § 5. Production.

1. **General.**—The products of the Territory are obtained principally from its agricultural, forestry, mining and fishing industries. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, bananas and papaws. Peanuts are becoming of increasing importance in native diet. Non-indigenous enterprise produces most of the commodities exported. Natives, however, do produce copra for export, while native enterprise in other fields of agricultural production for export purposes, e.g., cocoa and coffee, is being encouraged. The principal agricultural products of Papua for the export trade are copra and rubber. Native production of copra is increasing. Practically all the timber milled during 1959–60 was absorbed by local building requirements. The main products of fisheries exported from Papua are trochus and green snail shell. Gold, manganese, zinc-lead and copper ores have been mined in commercial quantities in the past, but current production is limited.

For the sake of convenience, agricultural and pastoral conditions in Papua and New Guinea have been dealt with as a whole, and reference should be made to pages 128–131 for information on the soils, climate, crops, methods of cultivation, etc., throughout both Territories. The following paragraphs relate to forestry, mining, fisheries and water-power resources in Papua.

2. **Forestry.**—(i) *General.* A general description of the forest policy which applies in Papua as well as in the Trust Territory of New Guinea is given under the heading “Timber” on page 144.

(ii) *Timbers.* Mixed species tropical rain forest covers most of Papua, although north-east of Port Moresby there is an area of monsoonal savannah country. Because of the mixed nature of the timbers in any one area, their utilization on an economical basis is somewhat difficult. Mangroves occur in large areas fringing the Gulf of Papua.

(iii) *Survey Work.* Forestry field work is carried out in Papua with a view to assessing the forest resources available and also to survey areas subsequently made available for cutting.

(iv) *Permits.* At 30th June, 1960, 26 permits and four licences were current. The total areas of forest involved were 140,044 acres and 28,927 acres respectively. The total number of mills was 11, and the total sawn-timber produced for the year was 3 million super. feet, most of which was used locally.

3. **Mining.**—(i) *Variety of Minerals.* Although a large number of minerals have been found in Papua, including platinum, gold, silver, copper, tin, lead, zinc, cinnabar, iron, osmiridium, manganese, sulphur, chromite, gypsum and lignite, current mineral production is not of economic importance.

Gold was discovered in 1888 and has been found since in many parts of Papua. Before the 1939–45 War, gold was an important item in the Territory's production, but has dwindled to insignificance since the war. During 1960–61, the production of gold realized £998 bringing the total value of gold won up to 30th June, 1960, to £3,346,362.

Large quantities of copper ore were mined and exported up to 1940. Good samples of galena (sulphide of lead) have been obtained, but other minerals are not found in commercial quantities.

(ii) *Oil Search.* Since the search for oil began in Papua in 1911, over £33 million has been spent. The existence of petroleum has been traced at scattered intervals over a large area, but commercial quantities have not been discovered. At 30th June, 1961, four companies held petroleum prospecting permits and licences under the provisions of the Petroleum (Prospecting and Mining) Ordinance 1951–1961. Oil prospecting is, at present, confined mainly to the Gulf and Western Divisions.

4. Fisheries.—Surveys have been carried out of the fisheries resources of Papua. These have been demonstrated to be considerable, and efforts are being made to increase the small degree of utilization. Shell fishing, particularly trochus, provides the main cash return, exports being valued at £38,000 in 1959–60.

5. Water Power.—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10 million horse-power available for this purpose.

## § 6. Trade, Transport and Communication.

1. Imports and Exports.—(i) *Total Values.* The table below summarizes the values of imports and exports for the years 1955–56 to 1959–60.

### TERRITORY OF PAPUA: IMPORTS AND EXPORTS.

(£.)

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
<i>Imports</i> (a) .. ..	9,046,753	8,734,152	8,850,437	8,324,388	8,409,546
<i>Exports</i> —					
Domestic exports .. ..	2,965,559	2,261,734	2,082,667	2,564,551	2,986,448
Re-exports .. ..	398,976	504,588	693,385	1,040,909	871,111

(b) *Principal Commodities.* The following table provides details of the value of the principal domestic exports for the same years. The decrease in value of total domestic exports during 1956-57 and 1957-58 was caused mainly by decreases in the prices of copra and shell.

**TERRITORY OF PAPUA: PRINCIPAL DOMESTIC EXPORTS.**  
(£.)

Commodity.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Rubber .. .. .	1,386,787	1,148,542	1,114,716	1,151,871	1,500,197

<b>Total Domestic Exports .. .. .</b>	<b>2,965,559</b>	<b>2,261,734</b>	<b>2,082,667</b>	<b>2,564,551</b>	<b>2,986,448</b>

2. *Shipping.*—In 1959-60, 167 British vessels and 25 of other nationalities called at Territory ports and discharged 92,335 tons of cargo and loaded 23,612 tons. Corresponding figures for 1958-59 were 173, 16, 96,672 and 27,969 respectively.

Regular passenger and freight services operate between Australia, New Guinea and Papua. Vessels trading between Australia and the East also call at Territory ports, and there are occasional ships to the United Kingdom, vessels of one shipping line trading between the United Kingdom and Australia calling at Port Moresby approximately at quarterly intervals. Coastal and inter-island shipping services are maintained by vessels operating from the two principal ports of Port Moresby and Samarai.

3. *Other Forms of Transport and Communication.*—Air services link Papua with Australia, New Guinea, the British Solomon Islands and Hong Kong. There were 67 aerodromes and seaplane alighting areas in Papua at 30th June, 1960, and of these 16 were the responsibility of the Department of Civil Aviation, 28 were operated and maintained by the Administration, and 23 owned and maintained by Missions, plantation and mining interests. Much of the internal traffic and freight is carried on a charter basis. Regular air services operate from Port Moresby to Daru in the West, Samarai and Popondetta in the East, and to various centres in New Guinea.

At 30th June, 1960, there were 1,576 miles of road in Papua, of which 591 miles were suitable for medium and heavy traffic, the greater proportion being located in the Central and Northern Districts.

Telephone services operate in the main centres. The radio station at Port Moresby for both transmission and reception is jointly shared by the Overseas Telecommunications Commission and the Administration. The former provides a service between Papua, Australia and the Territory of New Guinea, while the latter operates radio telephone and radio telegraph services from Port Moresby and Samarai to outstations.

Medium and short-wave programmes are broadcast from the Australian Broadcasting Commission stations 9PA and VLT located at Port Moresby.

## § 7. Finance.

The following table shows the principal items of revenue and expenditure for the Territory for each year from 1956-57 to 1960-61.

**TERRITORY OF PAPUA: REVENUE AND EXPENDITURE.**

(a) Includes Harbour Dues and Wharfage.

For particulars of the finances of the combined Territory administration, see page 127.

**TRUST TERRITORY OF NEW GUINEA.**

**§ 1. General Description.**

The land area of the Territory of New Guinea is about 93,000 square miles, and the area, including the sea, within the lines drawn through its extreme outer points is more than one million square miles. As the coast lines have not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands, together with the small islands adjacent thereto, are as follows:—North-East New Guinea, also called the mainland, 70,200 sq. miles; Bismarck Archipelago—New Britain, 14,100 sq. miles, New Ireland, 3,340 sq. miles, Lavongai, 460 sq. miles, Admiralty Islands, 800 sq. miles, total Bismarck Archipelago, 18,700 sq. miles; Solomon Islands—Bougainville, 3,880 sq. miles, Buka, 220 sq. miles, total Solomon Islands, 4,100 sq. miles; grand total, 93,000 sq. miles.

Information regarding physiography and climate will be found in Official Year Book No. 22, page 613, and in the *Official Handbook of the Territory of New Guinea*.

**§ 2. Government.**

1. **The Military Occupation (1914-18 War).**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government on 9th May, 1921.

2. **Mandate (1920).**—In 1919, it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted to the Government of the Commonwealth under Mandate from the League of Nations. However, the issuing of the Mandate was delayed and it was not until 17th December, 1920, that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (see p. 264).

3. 1939–45 War.—For the events following the outbreak of the Pacific War and the formation of the Papua-New Guinea Provisional Administration in 1945, see page 126 of this chapter and earlier issues of the Official Year Book.

4. Trusteeship (1946).—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are shown in Official Year Book No. 39, pages 355–7.

5. Administration.—For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration see Official Year Book No. 36 and earlier issues.

For administrative purposes, the Territory is divided into the following nine districts:—New Britain, comprising New Britain and adjacent islands; Morobe, Madang, Eastern Highlands, Western Highlands, and Sepik on the mainland; New Ireland, comprising New Ireland, Lavongai and adjacent islands; Manus, comprising the Admiralty Group; and Bougainville in the Solomon Islands. Each district is administered by a District Commissioner.

### § 3. Population.

1. Non-indigenous Population.—At the Census of 30th June, 1961, the non-indigenous population of the Territory was 9,158 males, 6,378 females, 15,536 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947 and 1954 was, respectively, 3,173, 5,216, 6,200 and 11,442 persons.

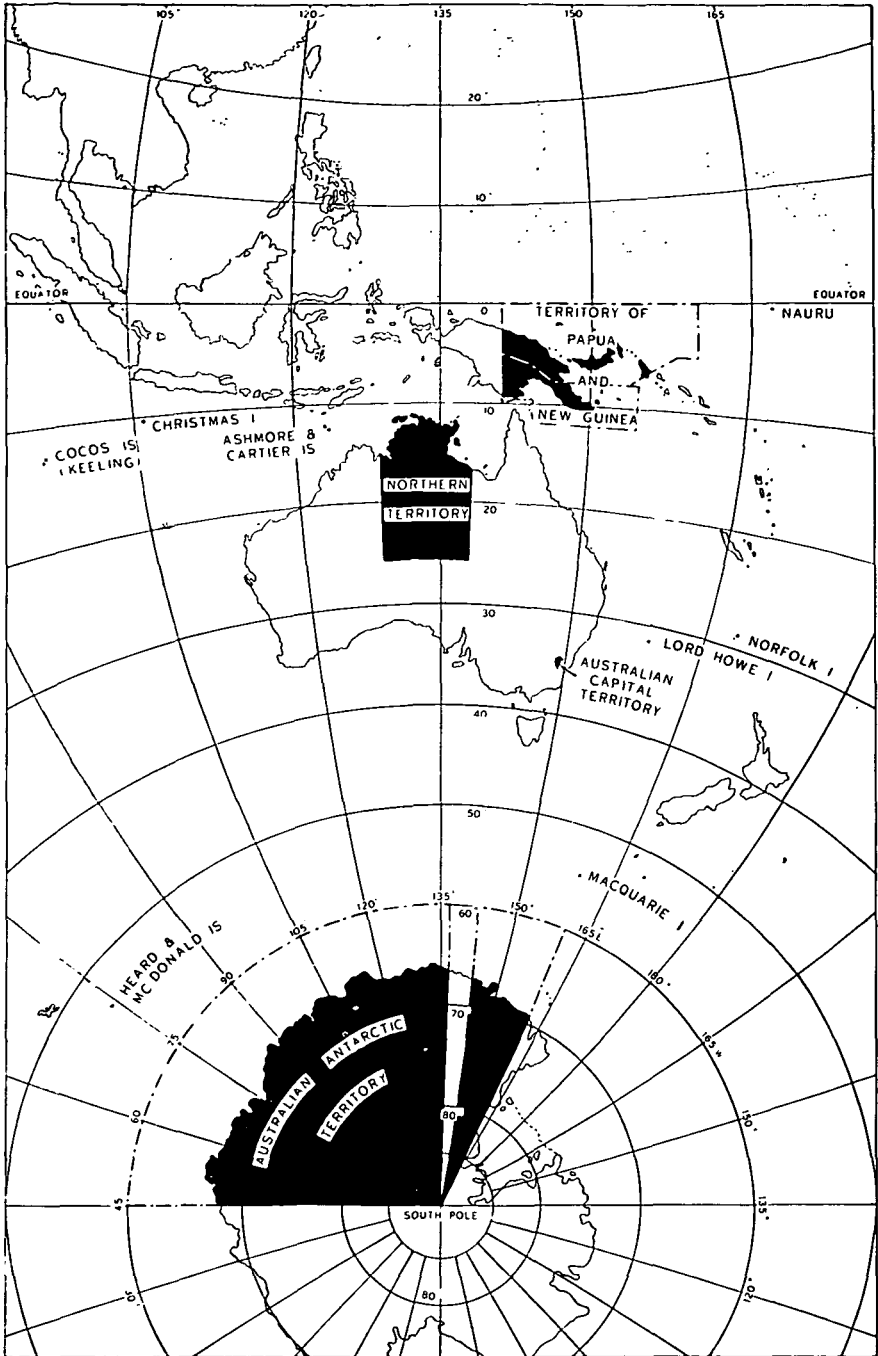

2. Native Population.—The enumerated and estimated native population of the Territory as at 30th June, 1960, numbered 1,386,808 persons, comprising enumerated, 1,306,308 (688,267 males and 618,041 females), and estimated, 80,500. The total population was distributed throughout the several districts as follows:—Eastern Highlands, 338,121 persons; Western Highlands, 256,114; Sepik, 247,453; Madang, 136,857; Morobe, 190,330; New Britain, 107,362; New Ireland, 38,813; Bougainville, 54,627; Manus, 17,131.

### § 4. The Natives.

1. General.—The natives are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Some tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (See Official Year Book No. 16, p. 670, and *Official Handbook of the Territory of New Guinea*, Pt. V.)

2. Education.—Education in the Territory is provided by the Administration and various Mission organizations. Schools for natives have also been established by Native Village Councils. The Education Ordinance 1952–1957 enables the Administrator to establish an education advisory board, district education committees and European and native schools and to grant financial aid for educational purposes. European teachers are recruited from Australia, and native teachers are trained in the Territory by the Administration and the Missions. During the year ended 30th June, 1960, 198 schools were maintained by the Administration for 14,385 children, of whom 891 were Europeans, 270 Asians, 113 of mixed race and 13,111 natives. The total number of pupils in the various grades of mission schools was 115,884, of whom there were 375 Europeans, 32 Asians and 277 of mixed race. To assist the educational work of the Missions, the Administration provides expert advice, educational equipment, and text-books. In addition, the sum of £158,689 was distributed, among the Missions as grants-in-aid during the year ended 30th June, 1960.

# THE TERRITORIES OF AUSTRALIA

3. **Health of Natives.**—The cases treated in hospital are mainly malaria, pneumonia, tropical ulcers, bronchitis, tubercular infections and tuberculosis, skin infections and confinements. The Department of Public Health is engaged in combating diseases with a staff of fully-trained medical officers, medical assistants and orderlies in native hospitals. Its staff also supervises hospitals on plantations. It has facilities for research in tropical medicine, and schemes for training natives as medical orderlies and nurses. At 30th June, 1960, there were 73 Administration hospitals, including four Hansenié colonies and two tuberculosis hospitals. The Missions have established an additional 75 hospitals, including three Hansenié colonies. There are 1,319 village aid posts (321 conducted by Missions) and 406 maternity and child welfare centres (72 provided by Missions). The Missions staff their own medical establishments but receive financial assistance from the Administration, which also provides much of their medical stores and supplies.

4. **Missions.**—A number of Mission societies operate in the Territory. The Society of the Sacred Heart of Jesus works in the Bismarck Archipelago, the Society of the Holy Ghost, the Franciscan Order and the Society of the Divine Word in the five districts of mainland New Guinea, and the Marists in Buka and Bougainville. These are Roman Catholic Missions. Protestant Missions include the Methodist Overseas Mission in New Britain and New Ireland, the New Zealand Methodist Mission in Bougainville, the Lutheran Mission (supported and staffed by the Lutheran Churches in Australia and America) which works in Morobe, Madang, the Eastern and Western Highlands, the New Guinea Anglican Mission in the Eastern and Western Highlands, the Seventh-day Adventist Mission in Bougainville, Manus, New Ireland, New Britain and the Mainland of New Guinea, the East and West Indies Bible Mission and the Baptist Mission in the Central Highlands. The South Seas Evangelical Mission (Undenominational) and the Assemblies of God Mission are also working in the Sepik area. All these Missions include teaching with their missionary work. Other Missions operating in the Territory are the Apostolic Church Mission in the Western Highlands, Christian Missions in Many Lands in the Sepik area, Church of Christ Mission in Madang, Church of the Nazarene in the Western Highlands, Faith Mission in the Eastern Highlands, New Tribes Mission in Morobe and the Eastern Highlands, Swiss Evangelical Mission in the Eastern and Western Highlands, Sola Fide Mission in the Sepik area, and Salvation Army and World Missions, both in the Eastern Highlands.

## § 5. Land Tenure.

The principles governing the acquisition and ownership of land and types of tenure available in New Guinea are in general similar to those which obtain in Papua, and although, under the Land Ordinance 1922–1961, grants of freehold estates may be made, as a matter of policy all grants are now restricted to leaseholds. In New Guinea, however, the amount of freehold land of earlier origin held by private non-indigenous owners amounts to more than half a million acres. Freehold titles to this land, which includes a good deal of plantation land, may be transferred by purchase, subject only to the general provision that dealings in land require the approval of the Administrator.

The area of the Territory of New Guinea is estimated at 59,520,000 acres, of which at 30th June, 1960, only 1,435,829 acres were alienated. The following was the distribution of alienated land according to tenure at 30th June, 1960:—Held by private non-indigenous inhabitants—freehold, 541,253 acres, leasehold, 329,974 acres; held by Administration, 537,666 acres; native reserves, 26,936 acres.

Leases in force at 30th June, 1960, were as follows:—Agricultural, 828—223,351 acres; dairying, 6—1,300 acres; pastoral, 17—85,907 acres; residential and business, 2,345—1,649 acres; special, 327—9,367 acres; mission 741—3,885 acres; long period leases from German régime, 104—4,515 acres; total, 4,368—329,974 acres.

Under German law there was a system of registration of titles in a "Ground Book", but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in the Lands Registration Ordinance 1924–1955. The land registers were lost during the 1939–1945 War, but provision for restoration of the lost titles is made in the New Guinea Land Titles Restoration Ordinance 1951–1955. A start has been made on the recording of native land interests under the Native Land Registration Ordinance 1952.

## § 6. Production.

1. **General.**—The products of the Territory are obtained principally from its agricultural, mining, fishing and forestry industries. A copra crushing mill near Rabaul, established in 1952, commenced crushing at about 18,000 tons of copra per annum, and its capacity is now about 60,000 tons of copra per annum. Crushing of about 40,000 tons of copra is in view for 1961. At Bulolo, a company (Commonwealth-New Guinea Timbers Ltd.), in which the Commonwealth Government has a controlling interest, is producing high quality moisture-proof plywood and veneers in a factory whose capacity is over 40 million square feet, on a  $\frac{3}{8}$ -in basis, per annum. Native subsistence agriculture, fishing, and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, coconuts, bananas and papaw. Non-indigenous enterprise produces most of the commodities exported. Natives, however, produce copra for export, and in recent years have taken up the production of introduced crops such as peanuts, rice, cucurbits and maize for their own consumption and cocoa and coffee for export. The principal agricultural products of New Guinea for the export trade are copra and cocoa. While most of the timber milled during 1959–60 was absorbed by the local market, exports continued to increase (*see* para. 2 below). The main products of fisheries exported from New Guinea are trochus and green snail shell, including that collected by natives. Gold is the principal mineral mined. Natives are taking an increasing interest in mining for alluvial gold on their own account, and production from this source is continually rising, in contrast to falling European production.

For information on the agricultural and pastoral industries, which for the sake of convenience covers the Territory of Papua and New Guinea as a whole, *see* pages 128–31. The following paragraphs relate to the timber, fishing and mining industries in the Territory of New Guinea alone.

2. **Timber.**—Various species of timber are found in the Territory, but the only accessible pure stand is the valuable pine forests of the Bulolo Valley. This timber is used mainly for the production of plywood and veneer by Commonwealth-New Guinea Timbers Ltd., which has an annual cut of about 10 million super. feet of logs. About 30.5 million square feet of plywood, on a  $\frac{3}{8}$ -in. basis, was produced by the company in 1959–60 from these logs and from the bulk of 47.5 million square feet of  $\frac{1}{8}$ -in. veneer produced by South Pacific Timbers Limited at Lae. Exports of plywood in 1959–60 were 30.5 million square feet, valued at £1,255,000, and 7 million square feet of veneer, on a  $\frac{1}{8}$ -in. basis, valued at £41,000. During the year, 1.3 million super. feet of logs, valued at £40,000, and nearly 5 million super feet of sawn timber, valued at £320,000, were also exported from the Territory. The Territory forests also provided flitches, battery veneer and egg-case parts for export.

The Administration sawmill at Lae provides a considerable amount of sawn timber for local consumption, and serves as a training centre for operatives in the sawmilling industry. The Administration also operates a training centre for forestry workers, nurseries and a herbarium, and is establishing a research institute in Port Moresby.

The Forestry Ordinance 1936–1951 provides for the issue of permits and licences to cut timber. Present policy calls for the orderly development of the timber industry on sound forestry principles to ensure no waste of the resources and no over-exploitation; the grant of emergency timber permits for limited quantities to assist in providing timber for Territory requirements; the disposal by public tender of timber areas designated by forest officials of the Territory; and the development of the pine stand in the Bulolo Valley by Commonwealth-New Guinea Timbers Ltd. Timber growing on native lands cannot be acquired by private purchasers direct from the natives, but must be obtained through the Administration. Royalty is payable on all forest produce taken under permit or licence. Re-forestation of areas dedicated for forestry in perpetuity is carried out by the Administration.

At 30th June, 1960, 32 permits and four licences were current, the total area of forest involved being 300,232 acres and 3,703 acres respectively.

3. **Fisheries.**—The wealth of the waters of the Territory has been little exploited, but as the result of surveys and the development of the Administration fisheries service, action is being taken to promote increased use of the resources. Fish are caught at many places along the coast to supply the small local demand of the natives and of Europeans. Trochus shell to the value of £59,598 and green snail shell to the value of £11,961 were exported during 1959–60.

4. **Mining.**—The production of gold and associated silver is the most important mining activity in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold deposits were first discovered in the Morobe District in 1926. The field is situated about 80 miles (40 by air) inland from Lae, the nearest coastal port. Communication is established with the coast by regular air service and by road transport. Silver is found usually associated with the gold in these deposits. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kabenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron ore occurs as magnetite and haematite in the Baining District. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland. The commercial production of minerals other than gold and silver has not been undertaken.

The granting of rights, leases and claims for mining purposes is provided for in the Mining Ordinance 1928–1957 and regulations thereunder.

The production of gold in New Guinea since the 1939–45 War has been on a much smaller scale than before the war, averaging less than £900,000 in value per annum for the last five years. The 1960–61 production was valued at only £681,240.

The Petroleum Ordinance 1936 has been superseded by the Petroleum (Prospecting and Mining) Ordinance 1951–1961, which has facilitated the carrying out of geological surveys and prospecting activities generally. There are, however, no prospecting permits for oil current at the present time.

## § 7. Trade, Transport and Communication.

1. **Imports and Exports.**—(i) *Total Values.* The table below summarizes the values of imports and exports for the years 1955–56 to 1959–60.

### TERRITORY OF NEW GUINEA: IMPORTS AND EXPORTS.

(£.)

<b>Total Domestic Exports</b>	<b>9,220,446</b>	<b>9,548,624</b>	<b>8,815,592</b>	<b>11,903,187</b>	<b>14,117,463</b>

2. **Shipping.**—Regular passenger and freight services operate between Australia, Papua and the Territory of New Guinea. Vessels trading between Australia and the East and also some on voyages to the United Kingdom and to North America call at Territory ports. Coastal and inter-island shipping services are maintained by vessels operating from the principal ports of the Territory. Shipping within the Territory is regulated by the Shipping Ordinances 1951–1960, and the Coastal Shipping, Ports and Harbours Regulations.

Main ports of call for oversea vessels are Lae, Madang and Wewak (mainland), Rabaul (New Britain), Kavieng (New Ireland), Lorengau (Manus), and Kieta (Bougainville). Ports proclaimed under the Coastal Shipping, Ports and Harbours Regulations for the service of local vessels are, in addition to the main ports above-mentioned, Salamaua, Aitape and Vanimo (mainland), Gasmata and Talasea (New Britain), Namatanai (New Ireland), and Buka Passage (Bougainville).

There are no inland waterways and the natural river system is not generally suitable for vessels except those of small tonnage.

In 1959–60, 186 British vessels and 83 vessels of other nationalities called at Territory ports and discharged 154,933 tons of cargo and loaded 159,163 tons. Corresponding figures for 1958–59 were 180, 76, 141,180 and 139,420 respectively.

3. **Other Forms of Transport and Communication.**—There are no railways in New Guinea, but a road construction programme is being undertaken progressively to assist the economic development of the Territory. Road transport services operate in the main towns and on the trunk roads linking Rabaul and Kokopo; Lae, Bulolo and Wau; Kavieng and Namatanai; and on the network in the Eastern and Western Highland Districts centred on Goroka and Mt. Hagen. The total mileage of roads in the Territory of New Guinea at 30th June, 1960, was 4,564, of which 1,846 were suitable for heavy and medium traffic.

Air services link the Territory with Papua, Australia, Netherlands New Guinea and the British Solomon Islands. There are 151 aerodromes and seaplane alighting areas in New Guinea at 30th June, 1960, and of these 25 are controlled by the Department of Civil Aviation, 59 by the Administration, and 67 by private interests, and one by the Royal Australian Navy.

Telephone services operate in the main centres. Radio telephone trunk circuits link Port Moresby with Lae, Rabaul and Madang and service is available from subscribers, telephones in Port Moresby, Lae and Rabaul, and from the Post Office at Madang. Six zone or group centres for radio telephone communication with out-stations have been established at Lae, Madang, Rabaul, Kavieng, Wewak and Lorengau. From these centres, radio telegraph services are also available to 111 out-stations.

## § 8. Finance.

The principal items of revenue and expenditure for the Territory of New Guinea during the years 1956–57 to 1960–61 are shown in the following table.

### TRUST TERRITORY OF NEW GUINEA: REVENUE AND EXPENDITURE.

For information on the finances of the combined Territory administration see Papua and New Guinea, § 2, page 127.

## TRUST TERRITORY OF NAURU.

1. **General.**—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in latitude 0° 32' S. and longitude 166° 55' E. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that most of the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners, and the Missions, the whole of the island is owned by individual natives. The temperature range is from 76° F. at night to 94° F. during the day and the average humidity about 80 per cent. Normally the rainfall is comparatively low for islands of the Pacific, the annual average for twenty years from 1920 to 1940 being 80.5 inches. However, falls as high as 181.76 inches during 1940 and as low as 12.29 inches during 1950 have been recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1899, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator, who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919 and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the Nauru Island Agreement Act 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, the island was occupied by Japanese forces and communications with Nauru ceased. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947, the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand, and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand, and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement were given in Official Year Book No. 39, pages 370–1.

4. **Administration.**—The administration of the island is vested in an Administrator, who is obliged to conform to instructions issued by the Government which appointed him. The Administrator is advised on matters affecting the Nauruan community by the Nauru Local Council, consisting of nine Nauruan Councillors elected by adult suffrage. This Council also carries out works and supplies certain services for the Nauruan community, and acts as the Board of Directors of the Nauru Co-operative Society. Until the Government of Australia ceases to exercise full powers of legislation, administration, and jurisdiction in and over the Territory on behalf of the Administering Authority in pursuance of Article 4 of the Trusteeship Agreement, all ordinances made by the Administrator are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue and phosphate royalties. Native industries such as canoe-building, fishing, mat-making, etc., are encouraged by the provision of prizes at annual competitions. An agency of the Commonwealth Savings Bank has been established. There is a co-operative store managed to a large extent by Nauruans. The store books, however, are audited by Government officers. Natives are not allowed to carry or be in possession of firearms, and the use by them of intoxicating liquors and deleterious drugs is prohibited.

5. **Population.**—The Nauruan component of the population numbered about 1,100 in 1921, but had grown to more than 1,800 before the Japanese invasion in August, 1942. In 1946, it numbered less than 1,400, but by 30th June, 1960, had risen to 2,328. Chinese have, for many years, formed a considerable part of the population of Nauru, but their numbers are not as great as formerly, and at 30th June, 1960, they amounted to 715. The number of other Pacific Islanders in the early 1920's was almost 300, but they subsequently decreased to rise again, and at 30th June, 1960, there were 1,052. The European population after 1921 fluctuated, but with a generally upward trend, between one and two hundred, and in recent years has gradually increased, reaching 373 in 1957. The total population of Nauru at 30th June, 1961, was 3,019 males, 1,594 females, 4,613 persons.

6. **Health.**—Cases of the usual diseases known in the Pacific occur but the health of all sections of the population is generally satisfactory. An area has been set apart for the segregation of sufferers from Hansen's disease, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30th June, 1960, was 48, of whom, however, only four were in segregation at the Hansenside colony. Three hospitals are maintained on the island, one by the Administration for Nauruans, and two by the British Phosphate Commissioners, one for European and one for non-European employees. The Administration also conducts eleven maternity and child health centres. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo medical examination at intervals of three months.

7. **Education.**—The Administration assumed full responsibility for education on 1st October, 1923. Prior to that date, the education of native children was undertaken by the Missions, which were subsidized by the Administration. There are three primary schools, one each for European, Nauruan and Gilbertese students, one Nauruan secondary school and one mission school providing primary and secondary classes. Primary education only is provided for European children, allowances being provided to those who proceed to secondary schools in Australia. At 30th June, 1960, 658 Nauruans, 86 other Pacific Islanders, 19 Chinese and 62 Europeans were enrolled in the primary schools, and 137 at the two secondary schools.

The curriculum is based generally on that used in Australian schools, and the teaching is generally in English. Education is compulsory for Nauruan children from six to sixteen years of age. At 30th June, 1960, 32 Nauruans were studying in Australia. Of these, 17

were at secondary schools, and the remainder were receiving vocational training. Nineteen held Administration scholarships, four were Administration Cadets, and the remaining nine were privately sponsored. In addition to these, there were three students at the Central Medical School, Suva, and one private student in New Zealand.

8. **Judiciary.**—The District Court is a court of record and consists of such magistrates as the Administrator appoints. Additionally, there is the Central Court which, as a superior court of record, consists of such judges or magistrates as are appointed and which, *inter alia*, may hear and determine appeals from judgments of the District Court. A Court of Appeal comprising a judge appointed by the Administrator has also been constituted with jurisdiction to hear and determine appeals from judgments of the Central Court.

9. **Religion.**—The London Missionary Society (Protestant) and the Sacred Heart Jesus Mission (Roman Catholic) operate in Nauru.

10. **Phosphate Deposits.**—(i) *General.* From 1906 to 1919, the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island (about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity remaining on Nauru has been estimated at about 64 million tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments on 25th June, 1920, for £3,500,000, the purchase money being contributed in the proportions of 42, 42 and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by three British Phosphate Commissioners, one appointed by each Government, and the three countries are entitled to receive the output in the same proportions of 42, 42 and 16 per cent.

(ii) *Royalty on Phosphate.* Under an agreement between the British Phosphate Commissioners and the Nauruan landowners, a royalty of 1s. 6d. for each ton of phosphate exported has been payable since 1st July, 1953. As from 1st July, 1959, this rate was increased to 2s. 1d. a ton as follows:—

- (a) 7d. to the Nauru Royalty Trust Fund to be used for the benefit of Nauruans;
- (b) 1s. 4d. to the landowner, being an immediate payment of 1s. 1d. a ton, and 3d. a ton to be invested on his account;
- (c) 1s. to the Nauruan Community Long Term Investment Fund.

From 1st July, 1957, the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £60 an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* Exports of phosphate from Nauru and Ocean Island in 1939–40 amounted to 1,243,428 tons, of which Australia received 54 per cent. and New Zealand 32 per cent. Following the interruption to production by the war in the Pacific, this figure was not exceeded until 1949–50 when 1,285,998 tons were exported (76 per cent. to Australia, 24 per cent. to New Zealand). Figures for 1959–60 were:—1,545,151 tons exported (including Ocean Island 317,351 tons), 60 per cent. to Australia, 28 per cent. to New Zealand and 12 per cent. to the United Kingdom.

Receipts from the sale of phosphate in 1939–40 amounted to £1,041,418, and the f.o.b. cost, including interest on capital, sinking fund, etc., amounted to £1,037,208. In 1946–47, sales and costs each amounted to about £500,000, but they have since increased to more than £3,000,000. In 1959–60, receipts from sales, etc., amounted to £3,835,535, and costs, etc., to £3,824,056.

During the period of the Japanese occupation from August, 1942, to September, 1945, while waiting to resume activities at Nauru and Ocean Island, the Commissioners were engaged in meeting the phosphate requirements of Australia and New Zealand from other available sources.

The amount due by the British Phosphate Commissioners to the partner Governments for purchase-money and other capital sums was £3,666,457 on 30th June, 1921, and at 30th June, 1942, this had been reduced to £3,024,373. The partner Governments agreed to a suspension of interest and sinking fund payments from 1st January, 1942, while operations at Nauru and Ocean Island were curtailed. Modified payments were resumed in 1946–47, pending a review of the position.

The review was carried out in 1950, and as a result the revised capital indebtedness of the Commissioners to the partner Governments at 30th June, 1950, was determined at £3,881,711. Interest and sinking fund payments were resumed with effect from 1st July, 1950, on the basis of repayment of the revised capital indebtedness in 35 years. At 30th June, 1960, this indebtedness had been reduced to £3,248,950.

(iv) *Employees.* Apart from a limited number of Europeans, the employees are Chinese and Pacific Islanders engaged under one year contracts. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

(v) *Christmas Island Phosphates.* The Australian Government is also interested in phosphate deposits on Christmas Island (*see* p. 158).

11. *Transport.*—There is no regular air service to Nauru, but when the need arises charter flights are made to the island.

There is relatively frequent communication by sea with the island. Most of the vessels are run or chartered by the British Phosphate Commissioners for the carriage of phosphate. Many of them also provide for the carriage of passengers and other cargo as required. The total calls by vessels were 134 in 1959–60.

12. *Trade.*—The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider and perry. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt. The tariff rates apply to all countries alike. In 1959–60, imports were valued at £1,342,201 and exports, 1,227,800 tons of phosphate, at £2,823,940. Of the total imports in 1959–60, Australia supplied 81 per cent. valued at £1,090,318; the balance came mainly from the United Kingdom, Hong Kong, New Zealand and the United States.

In 1959–60, 705,200 tons of phosphate were exported to Australia, 339,650 tons to New Zealand and 182,950 tons to the United Kingdom.

13. *Revenue and Expenditure.*—The revenue of the Administration has risen from £33,084 in 1939 to £438,246 in 1959–60, and expenditure from £29,391 to £408,906.

Of the revenue for the year ended 30th June, 1960, payments by the British Phosphate Commissioners amounted to £412,052, post office and radio receipts, £9,370, and import duties, £3,586. Main items of expenditure were administration, £101,470, miscellaneous services (health, education, etc.), £145,702 and capital works and services, £89,528.

#### TERRITORY OF HEARD ISLAND AND McDONALD ISLANDS.

These islands, about 2,500 miles south-west of Fremantle, were transferred from the United Kingdom to Australia as from 26th December, 1947. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard Island and McDonald Islands by the Heard and McDonald Islands Act 1953.

In December, 1947, an Australian scientific station was established on Heard Island and meteorological investigations were conducted until the station was closed in March, 1955, following the establishment of Mawson station on the Antarctic mainland. Heard Island is about 27 miles long and 13 miles wide. The McDonald Islands are 26 miles to the west of Heard Island. They are small, rocky and precipitous.

#### AUSTRALIAN ANTARCTIC TERRITORY.

An Imperial Order in Council of 7th February, 1933, placed under Australian authority all the islands and territories other than Adelie Land situated south of 60° S. lat. and lying between 160° E. long. and 45° E. long. The Order came into force with a Proclamation issued by the Governor-General on 24th August, 1936, after the passage of the Australian Antarctic Territory Acceptance Act 1933. The boundaries of Adelie Land were definitively fixed by a French Decree of 1st April, 1938, as the islands and territories south of 60° S. lat. lying between 136° E. long. and 142° E. long. The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory.

On 13th February, 1954, the Australian National Antarctic Research Expeditions (A.N.A.R.E.) established a base on MacRobertson Land at latitude  $67^{\circ} 36' S.$  and longitude  $62^{\circ} 53' E.$  The base was named Mawson in honour of the late Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13th January, 1957, at latitude  $68^{\circ} 34' 36'' S.$  and longitude  $77^{\circ} 58' 36'' E.$  The station was named Davis in honour of Captain John King Davis of Melbourne, who commanded a number of famous Antarctic ships. In February, 1959, the Australian Government accepted from the United States Government custody of Wilkes Station, which was established by the United States on 16th January, 1957, on Vincennes Bay, at latitude  $66^{\circ} 15' S.$  and longitude  $110^{\circ} 33' E.$  The station was named in honour of Lieut. Charles Wilkes, who commanded the 1838–40 United States expedition to the area. Scientists from both countries participate in the programme of research at Wilkes. A.N.A.R.E. have also operated a station, since the 1947–48 Antarctic season, at Macquarie Island, approximately 850 miles south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On 1st December, 1959, Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, U.S.S.R., United Kingdom and the United States of America. The Treaty reserves the Antarctic area south of  $60^{\circ} S.$  latitude for peaceful purposes, provides for international co-operation in scientific investigation and research, and freezes, for the duration of the Treaty, the *status quo* with regard to territorial sovereignty, rights and claims. The Treaty entered into force on 23rd June, 1961.

#### TERRITORY OF COCOS (KEELING) ISLANDS.

1. **General.**—The Cocos (Keeling) Islands, two separate atolls comprising some 27 small coral islands with a total area of about five square miles, are situated in the Indian Ocean in latitude  $12^{\circ} 5' S.$  and longitude  $96^{\circ} 53' E.$  They lie some 1,720 miles north-west of Perth and 2,290 miles almost due west of Darwin, while Johannesburg is some 3,800 miles further distant to the south-west, and Colombo is 1,400 miles to the north-west of the group.

The main islands of the Territory are West Island, the largest, about 6 miles from north to south, on which is the aerodrome and most of the European community; Home Island, the head-quarters of the Clunies-Ross Estate; Direction Island, on which is situated the Cable and Wireless Station and the Department of Civil Aviation's Marine Base; and Horsburgh Island. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants.

Main settlements are on West Island, Home Island and Direction Island. The group of atolls is low-lying, flat and thickly covered by coconut palms, and surrounds a lagoon which has a harbour in the northern part but which is extremely difficult for navigation.

The climate is equable and pleasant, usually being under the influence of the south-east trade winds for about three-quarters of the year. However, the winds vary at times and meteorological reports from the Territory are particularly valuable to those engaged in forecasting for the eastern Indian Ocean. The temperature varies between  $70^{\circ}$  and  $89^{\circ} F.,$  and its average rainfall is 80 inches. There are occasional violent storms. The worst cyclone in their recorded history struck the islands in 1909, when about 400,000 coconut palms were uprooted or decapitated and the accompanying tidal wave left only five buildings standing.

2. **History.**—The islands were discovered in 1609 by Captain William Keeling of the East India Company. They were uninhabited and remained so until 1826 when the first settlement was established on the main atoll by an Englishman, Alexander Hare, who quitted the islands in about 1831. In the meantime, a second settlement was formed on the main atoll by John Clunies-Ross, a Scottish seaman and adventurer, who landed with several boat-loads of Malay seamen. In 1857, the islands were annexed to the Crown and formally declared part of the British Dominions, and in 1878 responsibility for their supervision was transferred from the Colonial Office to the Government of Ceylon, and

subsequently, in 1882, to the Government of the Straits Settlements. By indenture in 1886, Queen Victoria granted the land comprised in the islands to John Clunies-Ross in perpetuity, and until 1946, the patriarchal rule of the head of the Clunies-Ross family was recognized. The head of the family had semi-official status as resident magistrate and representative of the Government. However, in 1946, when the islands became a dependency of the Colony of Singapore, a Resident Administrator, responsible to the Governor of Singapore, was appointed.

Other items of significance in the islands' history are:—1901—a small cable relay station was established at Direction Island; 1903—the islands were incorporated in the Settlement of Singapore; 1914—the German cruiser *Emden* raided Direction Island but was destroyed by H.M.A.S. *Sydney*; 1944—the Islands were under military administration with allied troops stationed there (a military Administrator was appointed during the minority of the Clunies-Ross heir, who came of age in 1949); 1945—a R.A.F. air-strip was constructed on West Island; 1946—civil administration was re-established.

3. **Transfer to the Commonwealth of Australia.**—On 23rd November, 1955, the Cocos Islands ceased to form part of the Colony of Singapore and were placed under the authority of the Commonwealth of Australia. The transfer was effected by an Order in Council made by Her Majesty Queen Elizabeth the Second under the Imperial Act entitled the Cocos Islands Act 1955 and by the Cocos (Keeling) Islands Act 1955 of the Commonwealth whereby the islands were declared to be accepted by the Commonwealth as a Territory under the authority of the Commonwealth to be known as the Territory of Cocos (Keeling) Islands.

4. **Administration.**—Responsibility for the administration of the Territory rests with the Minister for Territories. The first Official Representative was appointed on 23rd November, 1955, to take charge of the local administration of the Territory. Under the Official Representative Ordinance 1955 of the Territory, the Official Representative is given such powers and functions in relation to the Territory as are delegated to him by the Minister under the Cocos (Keeling) Islands Act 1955–1958 or are otherwise conferred on him under that Act or by or under any other law of the Territory. The laws of the Colony of Singapore which were in force in the islands immediately before the date of the transfer were, with certain exceptions, continued in force by the Cocos (Keeling) Islands Act 1955–1958. They may be amended or repealed by Ordinances made under the provisions of that Act which empower the Governor-General to make Ordinances for the peace, order and good government of the Territory.

5. **Population.**—The population of the Territory at 30th June, 1961, was 606, comprising 180 Europeans and 426 others, all except 4 being Malay race.

6. **Transport.**—There is an international airport at West Island under the control of the Department of Civil Aviation. This is a re-fuelling point for aircraft of Qantas Empire Airways Ltd., which operates a weekly service between Australia and South Africa, and South African Airways which operates a fortnightly service on the same route. Although there is no regular shipping service, vessels from Australia and Singapore call at intervals.

## TERRITORY OF CHRISTMAS ISLAND.

1. **General.**—Christmas Island is an isolated bank, situated in the Indian Ocean in latitude 10° 25' 19" S., longitude 105° 42' 57" E. It is approximately 220 miles south from Java Head, at the south entrance to Sunda Strait, 810 miles from Singapore and 1,625 miles from Fremantle. Christmas Island covers an area of about 55 square miles. It consists of a central plateau at about 600 to 800 feet, with several prominent rises up to 1,170 feet. The plateau descends to the sea in a series of steep slopes alternating with terraces, the last dropping in a cliff of 200 to 300 feet to a shore terrace, terminating in a sea cliff of 10 to 150 feet, which is continuous round the island except in a few places, the chief of which is Flying Fish Cove where the shore is formed of coral shingles.

The principal settlement is at Flying Fish Cove which is also the only known anchorage. Vessels are moored close inshore opposite two piers with extension conveyors by which means direct loading to ships is carried out. The main installations of the phosphate industry are located here together with the European married quarters and the Chinese and

Malay settlements. There is a secondary settlement with maintenance shops, etc., at South Point, and several other small settlements or camps across the central plateau and at the small pumping plants at springs and wells.

The climate is healthy and pleasant, the prevailing winds being from the south-east to east-south-east from May to December, but from then to April (the wet season) they occasionally shift round from north to north-east. The average yearly rainfall is about 80 inches with a marked summer incidence. The porous nature of the ground prevents the formation of pools of water, but there are several good springs which maintain an adequate supply of fresh water for the small population and the installations. The mean average temperature is about 80° and does not vary greatly throughout the year.

**2. History and Administration.**—The first mention of Christmas Island appears in a map published in Holland in 1666, in which it is called *Moni Island*, although it is believed that Captain William Mynors of the East India Company had sighted the island on Christmas Day in 1643 and had named it accordingly.

In June, 1888, it was annexed by Captain H. W. May of H.M.S. *Imperieuse* as part of the British Dominions and placed under the supervision of the Straits Settlements Government for administrative purposes. Following upon this, a small settlement was established at Flying Fish Cove by Mr. G. Clunies-Ross of Cocos (Keeling) Islands. In February, 1891, Sir John Murray and Mr. Clunies-Ross were granted a 99 year lease of the Island. This lease was transferred to the Christmas Island Phosphate Co. Ltd. in 1897, following the discovery of large deposits of phosphate of lime on the Island. In 1900, Christmas Island was incorporated for administrative purposes with the Settlement of Singapore and the laws of Singapore were generally applied to the Island.

The Straits Settlements (Repeal) Act 1946, passed by the United Kingdom, repealed the Act establishing the whole of the Straits Settlements as a single colony. Subsequently the Singapore Colony Order in Council, in 1946, decreed that the Island of Singapore and its dependencies, the Cocos or Keeling Islands and Christmas Island should be governed and administered as a separate Colony and called the Colony of Singapore. From 1st January, 1958, pending transfer to Australia, Christmas Island was administered by the United Kingdom as a separate Crown Colony. The Island was transferred to the Commonwealth of Australia on 1st October, 1958, by the Christmas Island Act 1958, and is now administered as a Territory under the authority of the Commonwealth. Responsibility for the administration and government of the Territory rests with the Minister for Territories, and day to day affairs on the Island are administered by an Official Representative under delegation from the Minister. The laws which were in force in the Island at 30th September, 1958, were continued as the laws of the Territory after its transfer to Australia on 1st October.

**3. Industry and Commerce.**—The only commercial activity carried out is the mining of phosphate. The British Phosphate Commissioners act as managing agents for the Christmas Island Phosphate Commission.

There are three principal phosphate deposits on the Island, the largest being that now being worked at South Point. This field is situated on the 600' to 800' level and is approximately 11 miles from the drying and shipping plant at Flying Fish Cove. The present output is about 400,000 tons annually. In addition, about 30,000 tons of phosphate dust are supplied annually to Malaya.

There is little prospect of any economic developments outside the phosphate industry.

**4. Population.**—The population of Christmas Island at 30th June, 1961, was 3,099 (1,963 males and 1,136 females); including 204 Europeans, 2,088 Chinese, 619 of Malay race, and 88 of Javanese.

**5. Communications.**—Transport to and from the island is maintained by vessels operated under charter by the Christmas Island Phosphate Commission. One vessel makes regular trips between Christmas Island and Singapore, and other vessels carry phosphate to Fremantle and other Australian ports.

## CHAPTER VI.

### MANUFACTURING INDUSTRY.

NOTE.—Further detail on the subjects dealt with in this chapter is contained in the annual printed bulletin, *Secondary Industries*. Information is also published, as soon as the data can be prepared, in a series of 34 annual mimeograph bulletins, *Manufacturing Industries*, each relating to a particular industry or group of industries. Details of the industries covered are contained in § 2., Statistical Publications of Australia, of Chapter XXXI.—Statistical Organization and Sources of Information. Advance annual information is published in mimeograph form in *A Summary of Principal Statistics of Factories* and in *Principal Factory Products*. Current information on factory products is available in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*. A preliminary annual statement (*Factory Statistics*) and a monthly statement (*Production Statistics*) are also issued.

In addition to the above-mentioned publications there is also a series of 45 monthly *Production Summaries*, each relating to the production of a particular commodity or group of commodities (see reference above).

#### § 1. General.

1. **Introduction.**—A complete statistical account of the growth of the manufacturing industry in Australia cannot be given, as the necessary statistics were not collected by the several States on a definite and uniform basis prior to 1906. A standard classification of manufacturing industries was formulated at a conference of Australian statisticians in 1902 and adopted by all States in 1906, and figures on this basis were prepared for 1907 and subsequent years.

Prior to the federation of the Australian States in 1901, the manufacturing industry in Australia was engaged primarily in the production of goods for local use, mainly food commodities, furniture, bricks, clothing made from imported materials, printing, the repair rather than the manufacture of machinery, and the preliminary treatment of primary products, such as wool-scouring and sawmilling.

After federation, steady expansion of the manufacturing industry resulted from the removal of interstate trade barriers and the operation of a uniform protective tariff. This expansion was quickened as a result of the demands created by the 1914–18 War, the curtailment of imports, and the rapid growth of spending power within the community. New and more advanced development took place, iron and steel works and many related and subsidiary industries were established, extensive manufacture of machinery was begun, and a wide range of high-grade products—textiles, metal manufactures, electrical goods, etc.—was added to the list of commodities made in Australia. A factor in the post-war growth of manufacturing industry in Australia was the creation in 1921 of the Tariff Board (see Chapter XIII.—Trade). Besides encouraging primary industries, the Tariff Board assisted, by means of protective tariffs, new manufacturing industries until they were soundly established, and local manufacturers who had been adversely affected by oversea competition.

This expansion was checked by the world-wide economic depression of 1929–33, but in 1933 returning general prosperity and the opportunities opened to local manufacturers by import restrictions, together with depreciation of Australian currency, gave renewed stimulus to manufacturing enterprise. As economic conditions improved, the tariff, revenue duties, and primeage were reduced, but without materially prejudicing the progress of local manufactures.

When war broke out in September, 1939, Australia became a major source of supply for British countries east of Suez, and in meeting their demands, as well as those arising locally because of interruption of oversea imports, existing manufacturing industries expanded, and new enterprises were developed rapidly for the production of all classes of munitions, aircraft, ships, many new kinds of machinery and metal manufactures, scientific equipment, textiles, chemicals, etc. The outbreak of war with Japan, the basing of Allied armed forces in Australia, and Australian responsibilities for supplies in the South-west Pacific Area, gave added impetus to these developments, and manufacturing in Australia outstripped all previous levels.

The cessation of war production and the transition of industry to a peace-time basis temporarily retarded progress, but from 1945-46 onward there was renewed expansion of the manufacturing industries to which an inflow of capital from overseas contributed.

**2. Decentralization of Manufacturing Industries.**—Following upon a report by the Secondary Industries Commission, the Commonwealth Government called a conference of Commonwealth and State Ministers in August, 1945, to formulate a national policy for the decentralization of secondary industries. It was agreed that the State Governments should seek to promote decentralization along the lines appropriate to each, providing necessary services, assistance and concessions to the full extent of State resources. The Commonwealth undertook to collaborate in all matters of Commonwealth industrial policy affecting the development and location of industry, to investigate, in association with the States, the prospects of developing secondary industries in selected areas, to advise the States of developments desirable for defence purposes, and to provide financial assistance for projects of national importance where the cost would be great relative to the State's resources.

The Commonwealth assisted decentralization by allocating to private industry munitions and other defence buildings in decentralized areas and accommodating migrants in provincial centres with prospects of development. Oversea firms contemplating establishment in Australia are encouraged to select locations in rural areas or the less industrialized States.

**3. Customs and Excise Tariffs and Bounties on Manufactures.**—Particulars of Australian customs and excise tariffs, and the constitution and functions of the Australian Tariff Board in relation to matters affecting the industrial development of Australia, are given in Chapter XIII.—Trade.

Bounties are paid by the Commonwealth Government to encourage local manufacture of certain products. The statutory provisions usually fix a term of operation of the bounty, provide for payment at a rate varying according to changes in the corresponding customs duty, specify the annual maximum amount of bounty payable and require the bounty to be withheld or reduced if a manufacturer's net profit in production of the commodity exceeds a certain rate, or if rates of wages and conditions of employment in production of the commodity do not conform to prescribed standards.

**4. Scientific Research and Standardization.**—(i) *The Commonwealth Scientific and Industrial Research Organization.* The function of this Organization is to initiate and conduct research in connexion with industries in Australia, to train research workers, to establish industrial research studentships and fellowships, to make grants in aid of pure scientific research, to establish industrial research associations in various industries, to provide for testing and standardization of scientific equipment, to conduct an information service relating to scientific and industrial matters, and to act for Australia in liaison with other countries in matters of scientific research. For further information concerning the work of the Organization, see Chapter XV. of this Year Book.

(ii) *The Standards Association of Australia.* The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929, by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State Governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State Governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemicals, timber, transportation, aircraft materials, ferrous and non-ferrous metallurgy, plastics, textiles, mining, ceramics, medical and dental materials, household and domestic economy, agricultural and dairying, safety, packaging, and water supply and sewerage.

These committees are composed of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality, and dimension, and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations, and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committee of the International Electrotechnical Commission.

The Association is also the representative of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The headquarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne; School of Arts Building, 166 Ann Street, Brisbane; 11 Bagot Street, North Adelaide; 10 Hooper Street, West Perth; c/o Engineering School, University of Tasmania, Sandy Bay; and Howard Smith Chambers, Watt Street, Newcastle.

(iii) *The National Association of Testing Authorities.* The National Association of Testing Authorities organizes national testing facilities throughout Australia to serve private and governmental needs. Laboratories may register voluntarily in respect of tests within their competence and the Association ensures the maintenance of their standards of testing. It is expected that there will be general acceptance of certificates of tests issued in the name of the Association by the registered laboratories.

(iv) *Industrial Design Council of Australia.* The Industrial Design Council of Australia was established in June, 1958, for the purpose of encouraging better design in Australian-made goods and fostering an appreciation of good design throughout the community. The decision to set up the Council arose from a realization on the part of representatives of industry and government, designers and educationists, that there was a pressing need in Australia for an independent and authoritative body to promote better design in the interests of trade development.

The Council has a membership fully representative of industry, commerce and government, together with designers and educationists. Initial finance has been raised by donations from industry and commerce, and a grant of £10,000 has been made by the Commonwealth Government for establishment purposes.

As part of its programme of assisting industry, the Council has conducted several lecture series in Sydney and Melbourne, dealing with various aspects of product design. Design counselling is available to manufacturing companies on request, and manufacturers seeking the services of designers are put in touch with qualified people.

Other projects include the setting-up of a Design Index, providing a photographic catalogue of well-designed Australian goods, for reference by manufacturers, retailers, architects, designers and the public; a Register of Designers, providing a comprehensive reference to Australian designers to assist those seeking their services; Displays and exhibitions of well-designed goods, both local and overseas; Design Training—the council is aware of the urgent need to raise the standard of training in industrial design and will co-operate with education authorities to this end; Information Services—it is intended to establish information offices in both Sydney and Melbourne, and later in other States, to provide information on all matters concerned with design.

The offices of the Council are in ICI House, 1 Nicholson Street, Melbourne, C.2.

5. *Definitions in Factory Statistics.*—The statistics relating to factories have been compiled from tabulations made by the Deputy Commonwealth Statisticians in the several States, from returns supplied to them annually by manufacturers in accordance with the statistical acts of the States and the Commonwealth. A return must be supplied in respect

of every factory, which is defined for this purpose as an establishment where four or more persons are employed or where power (other than manual) is used in any manufacturing process. This definition includes factories in educational and charitable institutions, reformatories, and other public institutions (except penitentiaries), but does not cover smallgoods makers, laundries, photography studios, florists and seedsmen, or most abattoirs. It should be noted that details relating to small establishments not classified for statistical purposes as factories are not included in the figures contained in this chapter.

If a manufacturing business is conducted in conjunction with any other activity, particulars relating to the manufacturing section only are included in the statistics. Where two or more industries are conducted in the same establishment, a separate return is obtained for each industry if practicable.

Manufacturers are requested to state in their returns particulars as to the number, age, wages, etc., of their employees, the value of premises and equipment, the horse-power of machinery, the value, and in most cases the quantities, of raw materials and fuel used, and quantities and values of principal materials and articles produced. The returns obtained from manufacturers are not intended to show a complete record of the income and expenditure of factories nor to show the profits or losses of factories collectively or individually.

The *average number of persons* employed is quoted on two different bases, the average during the period of operation and the average over the whole year. Of these, the former is simply the aggregate of the average number of persons employed in each factory during its period of operation (whether the whole or only part of the year). This average is used only in respect of details relating to classification according to the number of persons employed. The latter, which is used in all other instances, is calculated by reducing the average number working in the factories (irrespective of period of operation) to the equivalent number working for a full year.

*Working proprietors* are included in all employment figures other than those relating to monthly employment and age dissections, but salaries and wages paid in all cases exclude drawings by working proprietors.

The *value of factory output* is the value of the goods manufactured or their value after passing through the particular process of manufacture, and includes the amount received for repair work, work done on commission and receipts for other factory work. The basis of valuation of the output is the selling value of the goods at the factory, exclusive of all delivery costs and charges and excise duties, but inclusive of bounty and subsidy payments to the manufacturer of the finished article.

The *value of production* is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of the materials used, containers and packing, power, fuel and light used, tools replaced, and materials used in repairs to plant (but not depreciation charges).

In the process of manufacture, many goods are treated in several industries, the output of one becoming the raw materials of another, so that such commodities are counted more than once in the aggregate value of output and of raw materials. Examples are raw sugar passing from the mills to the refinery, metals from the smelters which become raw materials in establishments concerned in the production of metal goods, and timber from the sawmills used in furniture factories and in joinery. On the other hand, the aggregate value of production is assessed without duplication, the value added by each industry being taken into account once only. For this reason, the value of production, and not the value of the output, is used as a measure of activity in the manufacturing industries as a whole.

In the special case of government factories and workshops, the value of output is, in most cases, estimated by adding 10 per cent. to the value of materials and fuel used and other factory costs, including salaries and wages paid.

Statistics relating to factory activity in the Australian Capital Territory and Northern Territory are not included in the figures contained in this chapter.

**6. Classification of Factories.**—In the compilation of statistical data relating to factories in Australia, a standard classification of manufacturing industries, formulated at a conference of Australian statisticians in 1902 and revised from time to time, was used until the year 1929–30. A new classification was introduced in 1930–31, and this in turn was revised and extended (principally in respect of the placement and composition of sub-classes) in accordance with decisions of the 1945 Conference of Statisticians.

Owing to limitations of space, details published in general tables in this chapter are confined either to the sixteen classes of industry or to total factory activity. Particulars of certain of the sub-classes shown below are published in the latter portion of this chapter, and full details for all sub-classes may be found in the bulletin *Secondary Industries*, published annually.

The classes and sub-classes in the current classification of factories are as follows:—

### CLASSIFICATION OF FACTORIES.

#### CLASS I.—TREATMENT OF NON-METALLIFEROUS MINE AND QUARRY PRODUCTS.

Coke Works.  
Briquetting and Pulverized Coal.  
Carbide.  
Lime, Plaster of Paris, Asphalt.  
Fibrous Plaster and Products.  
Marble, Slate, etc.  
Cement, Portland.  
Asbestos Cement Sheets and Mouldings.  
Other Cement Goods.  
Other.

#### CLASS II.—BRICKS, POTTERY, GLASS, ETC.

Bricks and Tiles.  
Earthenware, China, Porcelain and Terracotta.  
Glass (other than Bottles).  
Glass Bottles.  
Other.

#### CLASS III.—CHEMICALS, DYES, EXPLOSIVES, PAINTS, OILS, GREASE.

Industrial and Heavy Chemicals and Acids.  
Pharmaceutical and Toilet Preparations.  
Explosives (including Fireworks).  
White Lead, Paints and Varnish.  
Oils, Vegetable.  
Oils, Mineral.  
Oils, Animal.  
Boiling-down, Tallow-refining.  
Soap and Candles.  
Chemical Fertilizers.  
Inks, Polishes, etc.  
Matches.  
Other.

#### CLASS IV.—INDUSTRIAL METALS, MACHINES, CONVEYANCES.

Smelting, Converting, Refining, Rolling of  
Iron and Steel.  
Foundries (Ferrous).  
Plant, Equipment and Machinery, etc.  
Other Engineering.  
Extracting and Refining of other Metals; Alloys.  
Electrical Machinery, Cables and Apparatus.  
Construction and Repair of Vehicles (10 groups).  
Ship and Boat Building and Repairing, Marine  
Engineering (Government and Other).  
Cutlery and Small Hand Tools.  
Agricultural Machines and Implements.  
Non-Ferrous Metals—  
Rolling and Extrusion.  
Founding, Casting, etc.  
Iron and Steel Sheets.  
Sheet Metal Working, Pressing, and Stamping.  
Pipes, Tubes and Fittings—Ferrous.  
Wire and Wire Working (including Nails).  
Stoves, Ovens and Ranges.  
Gas Fittings and Meters.  
Lead Mills.  
Sewing Machines.

#### CLASS IV.—INDUSTRIAL METALS, MACHINES, CONVEYANCES—continued.

Arms, Ammunition (excluding Explosives).  
Wireless and Amplifying Apparatus.  
Other Metal Works.

#### CLASS V.—PRECIOUS METALS, JEWELLERY, PLATE.

Jewellery.  
Watches and Clocks (including Repairs).  
Electroplating (Gold, Silver, Chromium, etc.).

#### CLASS VI.—TEXTILES AND TEXTILE GOODS (NOT DRESS).

Cotton Ginning.  
Cotton Spinning and Weaving.  
Wool—Carding, Spinning, Weaving.  
Hosiery and Other Knitted Goods.  
Silk, Natural.  
Rayon, Nylon and Other Synthetic Fibres.  
Flax Mills.  
Rope and Cordage.  
Canvas Goods, Tents, Tarpaulins, etc.  
Bags and Sacks.  
Textile Dyeing, Printing and Finishing  
Other.

#### CLASS VII.—SKINS AND LEATHER (NOT CLOTHING OR FOOTWEAR).

Furriers and Fur-dressing.  
Woolscouring and Feltmongery.  
Tanning, Currying and Leather-dressing.  
Saddlery, Harness and Whips.  
Machine Belting (Leather or other).  
Bags, Trunks, etc.

#### CLASS VIII.—CLOTHING (EXCEPT KNITTED).

Tailoring and Ready-made Clothing.  
Waterproof and Oilskin Clothing.  
Dressmaking, Hemstitching.  
Millinery.  
Shirts, Collars, Underclothing.  
Foundation Garments.  
Handkerchiefs, Ties and Scarves.  
Hats and Caps.  
Gloves.  
Boots and Shoes (not Rubber).  
Boot and Shoe Repairing.  
Boot and Shoe Accessories.  
Umbrellas and Walking Sticks.  
Dyeworks and Cleaning, etc.  
Other.

#### CLASS IX.—FOOD, DRINK AND TOBACCO.

Flour-milling.  
Cereal Foods and Starch.  
Animal and Bird Foods.  
Chaffcutting and Corncrushing.  
Bakeries (including Cakes and Pastry).  
Biscuits.  
Sugar-mills.  
Sugar-refining.

**CLASS IX.—FOOD, DRINK AND TOBACCO—**  
*continued.*  
Confectionery (including Chocolate and Icing Sugar).  
Jam, Fruit and Vegetable Canning.  
Pickles, Sauces, Vinegar.  
Bacon Curing.  
Butter Factories.  
Cheese Factories.  
Condensed and Processed Milk Factories.  
Margarine.  
Meat and Fish Preserving.  
Condiments, Coffee, Spices.  
Ice and Refrigerating.  
Salt.  
Aerated Waters, Cordials, etc.  
Breweries.  
Distilleries.  
Wine-making.  
Cider and Perry.  
Malting.  
Bottling.  
Tobacco, Cigars, Cigarettes, Snuff.  
Dehydrated Fruit and Vegetables.  
Ice Cream.  
Sausage Casings.  
Arrowroot.  
Other.

**CLASS X.—SAWMILLS, JOINERY, BOXES, ETC.,**  
**WOOD TURNING AND CARVING.**

Sawmills.  
Plywood Mills (including Veneers).  
Bark Mills.  
Joinery.  
Cooperage.  
Boxes and Cases.  
Woodturning, Woodcarving, etc.  
Basketware and Wickerware (including Sea-grass and Bamboo Furniture).  
Perambulators (including Pushers and Strollers).  
Wall and Ceiling Boards (not Plaster or Cement).  
Other.

**CLASS XI.—FURNITURE OF WOOD, BEDDING, ETC.**  
Cabinet and Furniture Making (including Billiard Tables and Upholstery).  
Bedding and Mattresses (not Wire).  
Furnishing Drapery.

**CLASS XII.—FURNITURE OF WOOD, BEDDING, ETC.—**  
*continued.*

Picture Frames.  
Blinds.

**CLASS XIII.—PAPER, STATIONERY, PRINTING,**  
**BOOKBINDING, ETC.**

Newspapers and Periodicals.  
Printing—  
Government.  
General, including Bookbinding.  
Manufactured Stationery.  
Stereotyping, Electrotyping.  
Process and Photo Engraving.  
Cardboard Boxes, Cartons and Containers.  
Paper Bags.  
Paper-making.  
Pencils, Penholders, Chalks, Crayons.  
Other.

**CLASS XIII.—RUBBER.**

Rubber Goods (including Tyres Made).  
Tyre Retreading and Repairing.

**CLASS XIV.—MUSICAL INSTRUMENTS.**

Gramophones and Gramophone Records.  
Pianos, Piano-Players, Organs.  
Other.

**CLASS XV.—MISCELLANEOUS PRODUCTS.**

Linoleum, Leather-cloth, Oil-cloth, etc.  
Bone, Horn, Ivory and Shell.  
Plastic Moulding and Products.  
Brooms and Brushes.  
Optical Instruments and Appliances.  
Surgical and Other Scientific Instruments and Appliances.  
Photographic Material, (including Developing and Printing).  
Toys, Games and Sports Requisites.  
Artificial Flowers.  
Other.

**CLASS XVI.—HEAT, LIGHT, AND POWER.**

Electric Light and Power.  
Gas Works.

7. Factory Development since 1901—Australia.—The development of the manufacturing industries in Australia at intervals since 1901 is summarized in the following table.

**FACTORIES: AUSTRALIA.**

Year.	Factories.	Employment.(a)	Salaries and Wages Paid.(b)	Value of—				
				Materials and Fuel Used.	Output.	Pro-duction. (c)	Land and Build-ings.	Plant and Ma-chinery.
	No.	'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
1901 .. ..	11,143	198	(d)	(d)	(d)	(d)	(d)	(d)
1911 .. ..	14,455	312	27,528	81,763	133,022	51,259	32,701	31,516
1920-21 ..	17,113	367	62,932	213,559	323,993	110,434	60,831	68,655
1930-31 ..	21,751	339	62,455	172,489	290,799	118,310	112,211	124,498
1940-41 ..	27,300	650	137,919	386,881	644,795	257,914	144,094	161,356
1950-51 ..	43,147	969	491,718	1,306,963	2,150,835	843,872	302,785	336,615
1955-56 ..	52,406	1,060	853,469	2,263,346	3,764,060	1,500,714	653,574	797,835
1956-57 ..	53,200	1,063	891,090	2,400,293	4,022,413	1,622,120	759,687	917,037
1957-58 ..	53,988	1,074	929,290	2,545,159	4,273,882	1,728,723	849,036	1,012,735
1958-59 ..	54,888	1,088	970,553	2,649,331	4,491,932	1,842,601	947,899	1,108,385
1959-60 ..	56,657	1,132	1,086,359	2,948,814	5,023,696	2,074,882	1,063,852	1,220,064

(a) 1901 and 1911—average employment during period of operation. Later years relate to average employment over whole year. Working proprietors are included in all years. (b) Excludes drawings by working proprietors. (c) Value added in process of manufacture (i.e., value of output less value of materials and fuel, etc., used). (d) Not available.

## § 2. Number of Factories.

1. Number of Factories in each State.—The following table shows the number of factories operating in each State in the years 1955–56 to 1959–60.

## FACTORIES: NUMBER.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1955-56 .. ..	21,602	16,053	5,378	3,908	3,871	1,594	52,406
1956-57 .. ..	21,838	16,232	5,537	4,063	3,935	1,595	53,200
1957-58 .. ..	22,270	16,426	5,528	4,168	3,941	1,655	53,988
1958-59 .. ..	22,684	16,527	5,651	4,235	4,125	1,666	54,888
1959-60 .. ..	23,274	16,979	5,758	4,684	4,279	1,683	56,657

2. Number of Factories in Industrial Classes.—(i) *Australia*. The next table shows the number of factories in Australia during 1955–56 to 1959–60 classified to the industrial classes agreed upon by the Conference of Statisticians in 1930. Details of some of the principal industries included in the table will be found in § 11.

## FACTORIES: NUMBER IN INDUSTRIAL CLASSES, AUSTRALIA.

Class of Industry.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
I. Treatment of Non-metalliferous Mine and Quarry Products .. ..	1,337	1,331	1,328	1,344	1,374
II. Bricks, Pottery, Glass, etc. .. ..	666	672	660	663	682
III. Chemicals, Dyes, Explosives, Paints, Oils, Grease .. ..	1,139	1,162	1,184	1,218	1,248
IV. Industrial Metals, Machines, Conveyances .. ..	18,860	19,766	20,518	21,254	22,622
V. Precious Metals, Jewellery, Plate .. ..	782	824	808	818	823
VI. Textiles and Textile Goods (not Dress) .. ..	1,362	1,364	1,364	1,373	1,435
VII. Skins and Leather (not Clothing or Footwear) .. ..	789	785	761	729	727
VIII. Clothing (except Knitted) .. ..	7,390	7,312	7,266	7,195	7,267
IX. Food, Drink and Tobacco .. ..	7,468	7,315	7,455	7,580	7,449
X. Sawmills, Joinery, Boxes, etc., Wood Turning and Carving .. ..	5,895	5,872	5,764	5,676	5,771
XI. Furniture of Wood, Bedding, etc. .. ..	2,203	2,199	2,200	2,184	2,211
XII. Paper, Stationery, Printing, Bookbinding, etc. .. ..	2,303	2,367	2,413	2,518	2,619
XIII. Rubber .. ..	513	536	565	606	620
XIV. Musical Instruments .. ..	84	88	88	86	87
XV. Miscellaneous Products .. ..	1,188	1,185	1,207	1,251	1,330
<i>Total, Classes I. to XV.</i> .. ..	<i>51,979</i>	<i>52,778</i>	<i>53,581</i>	<i>54,495</i>	<i>56,265</i>
XVI. Heat, Light and Power .. ..	427	422	407	393	392
<b>Grand Total</b> .. ..	<b>52,406</b>	<b>53,200</b>	<b>53,988</b>	<b>54,888</b>	<b>56,657</b>

Except for the two war years 1941–42 and 1942–43, when there were decreases, the number of factories increased each year from 1931–32 to 1959–60. In the latter year, the number of factories in Australia reached the record total of 56,657, or more than twice the number in 1938–39.

(ii) States, 1959-60. The following table shows the number of factories in each State classified according to the nature of the industry.

**FACTORIES: NUMBER IN INDUSTRIAL CLASSES, 1959-60.**

Class of Industry.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
I. Treatment of Non-metalliferous Mine and Quarry Products .. .. .	476	449	104	164	131	50	1,374
II. Bricks, Pottery, Glass, etc. ..	312	176	56	71	48	19	682
III. Chemicals, Dyes, Explosives, Paints, Oils, Grease .. .. .	613	367	83	89	70	26	1,248
IV. Industrial Metals, Machines, Conveyances .. .. .	9,401	6,414	2,255	2,151	1,869	532	22,622
V. Precious Metals, Jewellery, Plate .. .. .	374	248	40	80	75	6	823
VI. Textiles and Textile Goods (not Dress) .. .. .	479	811	31	54	42	18	1,435
VII. Skins and Leather (not Clothing or Footwear) .. .. .	328	272	52	37	30	8	727
VIII. Clothing (except Knitted) ..	3,381	2,416	531	440	399	100	7,267
IX. Food, Drink and Tobacco ..	2,690	2,104	1,025	719	624	287	7,449
X. Sawmills, Joinery, Boxes, etc., Wood Turning and Carving .. .. .	2,237	1,404	828	350	470	482	5,771
XI. Furniture of Wood, Bedding, etc. .. .. .	826	664	283	198	175	65	2,211

**§ 3. Classification of Factories according to Number of Persons Employed.**

1. General.—The size classification of factories is based on the average weekly number of persons employed during the period of operation (including working proprietors).

2. States, 1959-60.—The following table shows, for each State, the number of factories classified according to the average number of persons employed.

**FACTORIES: CLASSIFICATION ACCORDING TO SIZE OF FACTORY, 1959-60.**

Size of Factory (Persons employed).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

CLASSIFICATION OF FACTORIES ACCORDING TO NUMBER EMPLOYED. 163

The relative importance of large and small factories is illustrated by the following classification of the average number of persons employed according to the size of factory in which they worked.

FACTORIES: AVERAGE NUMBER OF PERSONS EMPLOYED ACCORDING TO SIZE OF FACTORY, 1959-60.

Size of Factory (Persons employed).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
AVERAGE NUMBER EMPLOYED DURING PERIOD WORKED.

## § 4. Power Equipment in Factories.

1. **General.**—Since 1936-37, statistics of power equipment in factories relate to the "rated horse-power" of engines ordinarily in use and engines in reserve or idle, omitting obsolete engines. In addition, particulars of the power equipment of Central Electric Stations are collected in greater detail. To avoid duplication, it is essential that some disjunction should be made between Central Electric Stations and other classes of industries. In the following tables, Central Electric Stations have been treated separately from other factories.

2. **Rated Horse-power of Engines in Factories other than Central Electric Stations.**—The following table shows the total number of factories and the total rated horse-power of engines and electric motors ordinarily in use and in reserve or idle during 1959-60.

**FACTORIES(a): TOTAL RATED HORSE-POWER OF ENGINES AND ELECTRIC MOTORS, 1959-60.**

State.	Factories.(a)	Rated Horse-power of Engines and Motors.	
		Ordinarily In Use.(b)	In Reserve or Idle (omitting obsolete).

(a) Not available for publication; figures are included in total for Australia.

### § 5. Employment in Factories.

1. *Number Employed.*—(i) *General.* All persons employed in the manufacturing activities of a factory, including proprietors who work in their own business and "out-workers" (see para. 4 (ii) p. 170), are counted as factory employees, while those employed in selling and distributing, such as salesmen, travellers, collectors, carters employed solely on outward delivery of manufactured goods and retailing storemen, are excluded. Prior to 1945-46, the occupational grouping collected was (i) working proprietors; (ii) managers and overseers; (iii) accountants and clerks; (iv) engine-drivers and firemen; (v) workers in factory, skilled and unskilled; (vi) carters and messengers; and (vii) persons working regularly at home for the establishment. This grouping did not record separate details for technical staff (e.g., chemists, draftsmen, etc.) and supervisory staff and, in 1945-46, the collection form was amended to obtain the following groupings:—(i) Working proprietors; (ii) managerial and clerical staff including salaried managers and working directors; (iii) chemists, draftsmen and other laboratory and research staff; (iv) foremen and overseers; (v) skilled and unskilled workers; (vi) carters (excluding delivery only), messengers and persons working regularly at home.

Prior to the year 1928-29, average employment in factories was computed by dividing the sum of the number employed each week by the number of weeks worked. The figures, therefore, represented the average number employed over the period worked, which, for many factories, was less than a full year. Commencing with the year 1928-29, the figures represent the equivalent average number employed over a full year of fifty-two weeks. The classification of factories according to the number of persons employed (see § 3, p. 162), however, is still based on the old method, but for all other purposes the average number engaged over the full year is used.

(ii) *Australia.* Particulars of the numbers employed, the increase in employment and the rate per cent. of such increase are given for the years 1955-56 to 1959-60 in the following table.

## FACTORIES: EMPLOYMENT, AUSTRALIA.

4. *Persons Employed According to Occupational Grouping.*—(i) *General.* In the following table, the average number of persons employed in each State during 1959-60 is classified according to occupational grouping. As mentioned previously, persons employed in factories are now classified on a basis different from that adopted prior to 1945-46. The nature of this change is indicated in para. 1 of this section (*see p. 166*).

**FACTORIES: PERSONS EMPLOYED—OCCUPATIONAL GROUPING, 1959-60.**

State.	Average Number of Persons Employed.						Total.
	Working Proprietors.	Managerial and Clerical Staff, etc.(a)	Chemists, Draftsmen, etc.	Foremen and Overseers.	Workers in Factory (Skilled and Unskilled).	Carters (excluding Delivery only) and Messengers, etc. (b)	
New South Wales ..	15,493	59,025	7,526	20,727	362,121	2,247	467,139
Victoria ..	13,401	45,913	6,677	18,060	295,423	2,040	381,514

<b>Total Persons</b> ..	<b>41,133</b>	<b>135,556</b>	<b>18,467</b>	<b>51,578</b>	<b>879,693</b>	<b>5,250</b>	<b>1,131,677</b>

(a) Includes salaried managers and working directors at home.

(b) Includes persons working regularly at home.

(ii) *Outworkers.* The term "outworker" or "homeworker" has acquired a special meaning in connexion with manufacturing industries, and embraces only persons to whom work is given out by factories to be done at home. Owing to the amended employment groupings adopted in 1945-46, persons working regularly at home for factories are now included with carters, messengers and others, and separate details are no longer available.

5. *Monthly Employment, 1955-56 to 1959-60.*—(i) *Australia.* The following table shows the number of persons (excluding working proprietors) employed in factories on the last pay-day of the month during the years specified.

6. Distribution of Employees According to Age.—The extension of statistics of employment in factories, decided upon at the Conference of Australian Statisticians held in 1945, provides for a distribution of employees (excluding working proprietors) into seven age-groups from 1945-46 onwards, instead of three as in previous years. The particulars are collected as at June. The numbers employed in each age-group on the last pay-day in June, 1959 and 1960, are given below.

**FACTORIES: DISTRIBUTION OF EMPLOYEES ACCORDING TO AGE, JUNE, 1959 AND 1960.**

(EXCLUDING WORKING PROPRIETORS.)

Age Group.	June, 1959.			June, 1960.

NOTE.—Minus sign (—) indicates decrease.

3. **Masculinity of Persons Employed in Factories.**—The extent to which females are employed in the factories of Australia may perhaps be more clearly shown by the proportion of males to females employed in each State. The following table shows particulars for the years 1955–56 to 1959–60.

**FACTORIES: MASCULINITY(a) OF PERSONS EMPLOYED.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1955–56 .. ..	309	265	491	463	640	448	327
1956–57 .. ..	308	266	490	460	636	433	326
1957–58 .. ..	311	265	500	458	655	461	327
1958–59 .. ..	313	266	506	463	649	478	330
1959–60 .. ..	303	259	491	459	642	465	320

(a) Number of males per 100 females.

For a number of years prior to 1926–27, there were on the average 300 males employed in factories for every 100 females, but by 1932–33, as a result of the particularly severe effect of the depression on the heavier industries where males predominate in number, there were only 239 males employed to every 100 females. With the subsequent recovery of employment in the heavier industries, the proportion of males per 100 females increased to 271 in 1937–38 and 1938–39. The enlistment of men in the armed services, the expansion of industry and the consequential absorption of women brought about by the 1939–45 War caused a decrease in masculinity from 1938–39 to 1943–44. However, following the cessation of hostilities in 1945 and the return of servicemen to civilian life, the number of females employed in factories declined and masculinity increased. In 1959–60, there were 320 males to every 100 females employed in factories.

4. **Employment of Females in Particular Industries.**—(i) *General.* The majority of females in manufacturing industries are employed in four classes, namely:—IV., Industrial Metals, Machines, etc.; VI., Textiles; VIII., Clothing; and IX., Food, Drink and Tobacco. In 1959–60, these industries accounted for 78.51 per cent. of all females in factories. In two classes only did the number of females exceed the number of males, namely, in Class VI., Textiles, where there were 138 females to every 100 males and in Class VIII., Clothing, with 245 females to every 100 males. The following table shows the average number of males and females employed in each of the four classes in 1955–60.

**MALES AND FEMALES EMPLOYED IN PARTICULAR INDUSTRIES, 1959-60.**

Class.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

(a) Number of females per 100 males.

## § 7. Children Employed in Factories.

1. Number of Children Employed, 1958 to 1960.—In the returns for the various States, the term "child" denotes any person under sixteen years of age. The decline in the number of children employed from the peak of 33,553 reached in June, 1940, to 16,084 in June, 1960, was probably caused largely by the raising of the school leaving age.

The following table shows the number of children of each sex employed in manufacturing industries in June of the years mentioned.

## FACTORIES: CHILDREN(a) EMPLOYED, JUNE.

State.	1958.			1959.			1960.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.

All other Industries .. .. .	863	561	139,262	31,479	0.62	1.78
<b>Total .. .. .</b>	<b>8,627</b>	<b>7,457</b>	<b>840,832</b>	<b>270,402</b>	<b>1.03</b>	<b>2.76</b>

(a) Under sixteen years of age.

(b) Excludes working proprietors.

3. **Apprenticeship.**—In all the States, Acts are in force for the regulation of the age at which children may be employed in gainful occupations. Legislative provision is also made for the regulation of apprenticeship under the various State Factories Acts or Arbitration Acts. These Acts, while laying down general principles, leave to the wages tribunals the actual determination of the conditions under which apprentices may be employed.

### § 8. Value of Production, Materials Used, Salaries and Wages.

**Note.**—In all tables relating to salaries and wages paid in factories, the amounts drawn by working proprietors are excluded.

1. **General.**—The gross value of factory output for 1959–60 was £5,023,696,000, of which £2,767,999,000 was the value of the materials used, including containers, etc., tools replaced and repairs to plant and buildings, and £180,815,000 the value of the power, fuel and light used. The difference between the sum of the last two amounts and the gross value of output, namely, £2,074,882,000, represents the net value of factory production, defined as “the value of consumable commodities produced during the year, deducting so far as possible the value of goods consumed in process of production.” Depreciation, however, is not deducted (*see* para. 6 of this section, p. 183). The gross value of factory output and the value of materials used each contain *inherent elements of duplication*, as the output of some factories becomes the materials used in other factories. They therefore have little statistical significance. The net value of factory production indicates the relative importance of manufacturing in the Australian economy in current money terms. The total amount of salaries and wages paid in factories in 1959–60 was £1,086,359,000, excluding amounts drawn by working proprietors.

2. **Salaries and Wages Paid.**—(i) *In Classes of Industry, 1959–60.* The amounts of salaries and wages paid in the various classes of industry in each State are shown in the following table.

## FACTORIES: SALARIES AND WAGES PAID, 1959-60.

(ii) *Totals and Averages, 1955-56 to 1959-60.* The following table shows the total amount of salaries and wages paid, and the average amount paid per employee in each State, for each of the years indicated. The figures exclude working proprietors and the amounts drawn by them.

## FACTORIES: TOTAL AND AVERAGE SALARIES AND WAGES PAID.

Year	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
------	--------	------	---------	----------	----------	------	-------

## TOTAL AMOUNT PAID (£'000).

1955-56 .. ..	359,023	286,944	72,460	76,237	37,207	21,598	853,469
1956-57 .. ..	378,332	296,608	77,780	77,818	36,916	23,636	891,090
1957-58 .. ..	396,692	310,540	78,958	79,844	37,935	25,321	929,290
1958-59 .. ..	413,015	324,336	85,497	83,145	38,732	25,828	970,553
1959-60 .. ..	461,144	370,181	89,367	95,238	41,643	28,786	1,086,359

## AVERAGE PER EMPLOYEE (£.)

1955-56 .. ..	860.91	841.16	740.93	848.43	785.23	828.65	837.35
1956-57 .. ..	900.06	869.21	789.63	872.87	801.95	886.68	871.98
1957-58 .. ..	923.40	904.81	814.86	891.80	829.22	936.70	900.46
1958-59 .. ..	952.82	928.60	856.33	911.89	847.81	942.94	927.13
1959-60 .. ..	1021.03	1005.62	896.09	995.96	890.43	1004.27	996.16

In comparing the figures in the preceding table, regard should be paid to the nature of certain industries which are carried on to a greater extent in some States than in others. In Victoria, for instance, a large number of hands are employed in Class VIII., Clothing, comprising a relatively high percentage of women and children. The highest average wages per employee in 1959-60 were paid in New South Wales, Victoria and Tasmania in that order.

The average earnings per employee rose annually from 1938-39 to 1943-44, when a level of £291 was attained as a result of war-time conditions. In 1944-45, the average dropped to £285 and remained at this level in 1945-46. From 1945-46, average earnings rose each year and in 1959-60 had reached a level of slightly over £996.

(iii) *Total and Average Earnings of Males and Females, 1955-56 to 1959-60.* Particulars for these years are given in the following table.

**FACTORIES : TOTAL AND AVERAGE SALARIES AND WAGES—MALES AND FEMALES.**

(a) *See* para. 1 of this section, p. 176.

5. *Value of Output.*—(i) *In Classes of Industry, 1959-60.* The value of the output of factories in the various classes in each State in 1959-60 is shown in the following table. It represents the selling value at the factory (excluding delivery costs and charges) of goods made or processed during the year, including by-products. In addition, it includes the amount received for other work done such as repair work, assembling and making up for customers. The difference between the sum of the values of the materials and of the power, fuel and light used, and the value of output is the net value of factory production (*see* paras. 1 and 6 of this section).

(a) See para. 1 of this section p. 176.

6. *Value of Production.*—(i) *In Classes of Industry, 1959-60.* The value of production for any industry was defined at the Conference of Statisticians at Sydney in 1925 as “the value of consumable commodities produced during the year, deducting, so far as possible, the value of goods consumed in process of production.”

VALUE OF PRODUCTION, MATERIALS USED, SALARIES AND WAGES. 183

In accordance with this definition, it was agreed that a deduction consisting of the costs of raw material, containers, power, fuel, light, lubricants, water, tools replaced, repairs to plant and depreciation should be made from the "value of output". On account of the difficulty experienced in securing accurate figures for depreciation, however, it was subsequently decided that no deduction should be made on this account. All the deductions mentioned above, with the exception of depreciation, are included in the items "value of materials used" and "value of fuel used" as defined above. The net value of production as given in the following tables is obtained, therefore, by deducting only "value of materials used" and "value of fuel used" from the "value of output".

Only certain selected items of costs are recorded in the annual census of production. It must not, therefore, be inferred that, when wages and salaries are deducted from the value of production, the whole of the "surplus" is available for interest and profit, as many miscellaneous expenses such as taxation, insurance, advertising and other overhead charges, as well as depreciation, also have to be taken into account.

The value of factory production, therefore, approximates "net value added" in the manufacturing process. In 1959-60, it amounted to £2,075 million, to which Class IV., Industrial Metals, etc., with £849 million made the greatest contribution.

The following table shows the value of production in 1959-60 in each State for the various classes of industry.

FACTORIES: VALUE OF PRODUCTION, 1959-60.(a)

## § 9. Value of Land, Buildings, Plant and Machinery.

1. General.—The following statement shows the value of land and buildings and of plant and machinery used in connexion with manufacturing industries during the year 1959-60.

FACTORIES: VALUE OF LAND, BUILDINGS, PLANT AND MACHINERY(a), 1959-60.  
(£'000.)

Value of—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Land and buildings	440,548	353,735	76,352	77,632	43,573	72,012	1,063,852
Plant and machinery	506,638	377,092	120,211	98,240	64,225	53,658	1,220,064
Total ..	947,186	730,827	196,563	175,872	107,798	125,670	2,283,916

(a) Includes estimated value of rented premises and plant.

The values recorded in this section are generally the values apportioned in the books of the individual firms after allowance has been made for depreciation, but they include estimates of the capital value of premises and plant rented. Consequently, the totals shown in the table do not represent the actual amount of capital invested in the items specified.

2. Value of Land and Buildings.—(i) *Total for Australia.* The following table shows, for Australia as a whole, the approximate value of land and buildings occupied in connexion with manufacturing industries for 1955–56 to 1959–60.

**FACTORIES: VALUE OF LAND AND BUILDINGS(a), AUSTRALIA.**  
(£'000.)

Class of Industry.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.

(a) Includes estimated value of rented premises.

(iii) *Totals in each State.* The following table shows the value of land and buildings in each State for the years 1955-56 to 1959-60.

**FACTORIES: VALUE OF LAND AND BUILDINGS.(a)**

(£'000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1955-56 .. ..	260,268	212,913	52,602	48,353	32,859	46,579	653,574
1956-57 .. ..	303,981	249,716	58,654	55,343	35,520	56,473	757,687
1957-58 .. ..	350,169	277,557	63,927	61,084	36,846	59,453	849,036
1958-59 .. ..	400,273	309,833	68,995	66,278	40,690	61,830	947,899
1959-60 .. ..	440,548	353,735	76,352	77,632	43,573	72,012	1,063,852

(a) Includes estimated value of rented premises.

Prior to 1929-30, the increase in the value of land and buildings was uninterrupted, rising from £23 million in 1903 to £118 million in 1929-30, an increase of £95 million in 27 years. During the three years ended 1932-33, there was a decline of £12 million to £105.8 million, but since that year the value has risen annually, and it stood at £1,063.9 million in 1959-60.

3. *Value of Plant and Machinery.*—(i) *Total for Australia, 1955-56 to 1959-60.* The following table shows for Australia the approximate value of plant and machinery used in factories.

**FACTORIES: VALUE OF PLANT AND MACHINERY(a), AUSTRALIA.**

(a) Includes estimated value of rented plant and machinery.

Except for the years 1930-31 to 1933-34, when decreases were recorded, there has been a continuous increase in the value of plant and machinery in factories in Australia. The increase in 1959-60 of £111.7 million over 1958-59 extended over practically all industrial classes.

(ii) *Totals in each State.* The following table shows the value of plant and machinery in each State during the years 1955-56 to 1959-60. During 1959-60, increases occurred in all States, except Western Australia which declined by 2.8 per cent. South Australia showed the greatest relative increase with 15.9 per cent.

§ 10. Principal Factory Products.

The factory production of certain commodities is shown in the monthly and quarterly publications of this Bureau and in the bulletin *Secondary Industries* (see NOTE at beginning of this chapter).

The following table shows the total recorded production of some of the principal articles manufactured in Australia during the years ended 30th June, 1959 to 1961. A more complete list, together with values, where available, is published in the *Secondary Industries* bulletin.

(e) Includes mixtures predominantly of

## § 11. Individual Industries.

1. General.—Particulars on pages 161–88, §§ 2–9 afford a general view of the magnitude of industries in the sixteen groups adopted by the Conference of Statisticians in 1930. While it is not possible, within the limits of this publication, to give a detailed account of each industry, particular industries dealt with hereunder are of special importance because of the employment which they provide for labour and capital or for other features of special interest. Where there are only one or two establishments in a particular industry in the State or the Commonwealth, details of activities are not published, but are combined with some other factory group so that operations of individual concerns will not be disclosed.

The statistics in the following tables should be read in the light of the following definitions.

*Factory.* A factory is taken to be a manufacturing establishment in which four or more persons are employed or in which power, other than manual, is used.

*Average Number of Persons Employed.* All persons employed in the manufacturing activities of a factory are counted as factory employees, including working proprietors and “out-workers”. The average number of persons employed means, in general, the average number over the whole year and not the average over the period worked.

*Value of Materials Used.* This item includes the value, in the usual sense, of the materials used, stores used, containers, tools replaced, and materials used in repairs to plant.

*Value of Fuel, etc., Used.* This item includes also the cost of power and light used, of lubricants and of water.

*Value of Output.* The amounts given under this heading represent the selling value at the factory of goods made or processed during the year, including by-products, also the value of other work done.

*Value of Production.* The value of production is the value added to raw materials by the process of manufacture. It is calculated by deducting “Value of materials used” and “Value of fuel used”, as defined above, from the “Value of output”.

*Rated Horse-power of Engines Used.* Statistics of power used in factories other than Central Electric Stations relate to the “rated horse-power” of engines ordinarily in use.

For more detailed definitions, see § 1, para. 5 of this chapter, page 158.

Details of some of the principal articles produced in factories in Australia during the years 1958–59 to 1960–61 are shown in the table on the preceding pages (§ 10).

2. Portland Cement and Cement Goods.—The manufacture of portland cement and cement goods is an important industry included in Class I. Particulars for the three industries under this general heading are shown for 1959–60 and for a series of years in the following table.

## PORTLAND CEMENT, ASBESTOS CEMENT SHEETS, ETC., AND OTHER CEMENT GOODS.

AUSTRALIA, 1959–60.

8. Iron and Steel Works and Engineering.—(i) *General.* The first group included under this heading (Smelting, Converting, Refining and Rolling of Iron and Steel) covers blast furnaces, steel works and rolling mills. The second group, Foundries (Ferrous), covers those engaged in the founding of iron and steel. The third group (Plant, Equipment and Machinery including Machine Tools) covers those industries engaged in the production of boilers, engines, machines and machinery, machine tools, structural steel fabrications, steel furniture, etc. The fourth group (Other Engineering) includes jobbing and general engineers, not elsewhere included. Detailed statistics for the four groups mentioned are shown in the following tables.

(ii) *Smelting, Converting, Refining and Rolling of Iron and Steel.* In the following table, particulars are shown for each State for 1959-60 and for Australia for a series of years for the group Smelting, Converting, Refining and Rolling of Iron and Steel.

## SMELTING, CONVERTING, REFINING AND ROLLING OF IRON AND STEEL.

Made .. .. No.	129,700	120,781	160,675	169,486	204,007	213,828
Assembled from Panels imported or made elsewhere .. .. No.	94,676	77,548	81,630	77,835	99,013	85,461
Imported (c) .. .. No.	19,041	7,062	(d) 5,890	(d) 6,104	(d) 6,178	(d) 8,352

(a) Excludes sidescars.  
 on complete vehicles imported.

(b) Preliminary—subject to revision.  
 (d) Since 20th March, 1958, includes only those bodies imported as complete vehicles.

(c) Includes bodies

13. **Agricultural Machines and Implements.**—Owing to the extensive agricultural activities conducted in Australia and the demand for modern mechanized farm equipment, the manufacture of agricultural implements constitutes an important branch of Australian industry. The articles manufactured include a wide range of implements for tillage, seeding and planting, and the harvesting of crops. Other farm machinery made includes windmills, chaff-cutters and machinery used in the dairying industry.

The following table shows details of establishments classified as agricultural implement works in each State for 1959-60 and for Australia for a series of years.

					42,922

14. **Wireless and Amplifying Apparatus.**—This industry is confined mainly to New South Wales, Victoria and South Australia. Technical advances and the requirements of the fighting forces led to considerable expansion in the industry during the 1939-45 War and this development has continued, with one or two exceptions, in each subsequent year. The introduction of television services in 1956 gave a further stimulus to the industry. The number of broadcast listeners' licences increased from a third of a million in 1930-31 to 2,256,000 at 30th June, 1961, and this increase reflects the advancement of the industry during that period. At 30th June, 1961, 1,217,000 television viewers' licences were in force.

(a) Including radiograms and car radios.

15. Cotton.—(i) *General.* Cotton has been grown in Australia since 1860, but never on a very large scale. Production shows marked fluctuations over the long term, varying during the last forty years from 27 million lb. in 1934–35 to 719,000 lb. in 1949–50. During 1959–60, 9.5 million lb. were produced and in 1960–61, 15.5 million lb. The growing of cotton, which is confined mainly to Queensland, is referred to in some detail in Chapter XXII.—Agricultural Production.

(ii) *Ginning.* The ginning and marketing of cotton is controlled by the Queensland Cotton Board which operates ginneries and processes by-products. The production of raw cotton is insufficient for local factory requirements and is supplemented by imports from overseas, chiefly (in 1960–61) from the United States of America, Mexico, China (Mainland), Pakistan and Peru.

(iii) *Spinning and Weaving.* The post war expansion in the spinning and weaving section of the cotton industry marks an important stage in its development. New factories have been established and Australia is now producing an extensive range of cotton goods, including duck and canvas from cotton or flax, denims, drill, etc., tyre cord and tyre cord fabric. The number of establishments engaged in cotton spinning and weaving in Australia and other particulars of the industry are shown in the following table for the years 1955–56 to 1959–60.

## COTTON SPINNING AND WEAVING: AUSTRALIA.

Items.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.

Horse-power of engines ordinarily in use h.p.	34,657	34,568	35,880	38,779	37,240

16. Wool Carding, Spinning and Weaving.—The importance of this industry is emphasised by the fact that Australia is the world's chief source of wool and the development of the woollen industry since its establishment at an early period in Australian history is of singular interest. The production consists chiefly of woollen cloth and tweed, worsted cloth, rugs, blankets and yarn, all of which have acquired a reputation for purity and durability.

The following quantities of yarn were used in these establishments during 1959-60:—Worsted or woollen 8,898,762 lb.; mixtures predominantly woollen or worsted, 1,637,901 lb.; cotton, 12,449,066 lb.; mercerised cotton, 266,385 lb.; rayon, spun, 951,820 lb.; rayon filament, 3,306,928 lb.; silk, 4,637 lb.; polyamides (nylon, etc.), spun, 949,794 lb.; filament, 3,712,573 lb.; other, including mixtures, 2,412,484 lb. Production of garments and stockings is shown in § 10 (see p. 189).

18. Tanning, Currying and Leather Dressing.—(i) *Details of Industry.* In Class VII. the most important industry is tanning. Formerly the production of tanneries in Australia was confined to the coarser sorts of leathers, but there are now very few kinds which cannot be produced locally, and an export trade has been built up in some varieties.

22. Boots and Shoes.—(i) *Details of Industry.* Boot and shoe factories hold an important place in respect of both employment afforded and extent of output. The following tables refer to boot and shoe factories as distinct from those devoted to repairing, except in Tasmania, where it has been necessary to include details of boot and shoe repairing, in order to avoid disclosure of confidential information for that State. Factories engaged in the manufacture of sand shoes, goloshes and gum, etc., boots of rubber are not included here, being classified under Rubber Goods, see para. 39, page 220.

(ii) *Production of Flour and By-products.* The production of flour by the mills in each State (including other than flour mills) for the years 1955-56 to 1960-61 was as follows.

## FLOUR-MILLING: PRODUCTION OF FLOUR.(a)

(Tons of 2,000 lb.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1955-56 ..	571,084	454,628	169,793	154,327	193,490	27,983	1,571,305
1956-57 ..	621,476	492,956	170,397	164,274	184,717	29,157	1,662,977
1957-58 ..	416,490	482,731	143,613	138,537	163,347	28,739	1,373,457
1958-59 ..	455,709	431,656	151,457	137,806	160,909	29,707	1,367,244
1959-60 ..	564,149	434,444	160,382	146,527	170,839	30,872	1,507,213
1960-61 (b) ..	573,856	470,142	160,780	154,730	183,120	28,405	1,571,033

(a) Includes wheatmeal for baking and sharps.

(b) Preliminary, subject to revision.

In addition, 565,827 tons (2,000 lb. per ton) of bran and pollard were produced in 1959-60 and 583,711 tons in 1960-61. The total quantity of wheat ground in flour mills was 67,999,773 bushels in 1959-60 and 72,129,000 bushels in 1960-61.

24. Bakeries.—Information regarding establishments in which the manufacture of bread, cakes, etc., was carried on is given in the table below. It should be noted, however, that the details refer only to establishments coming within the definition of a factory as explained at the beginning of this section. For that reason, the table does not give complete details of the industry, as a large number of bakeries, etc. not coming within the definition are excluded. This is true of all other industries covered by the statistics of manufacturing production, but, in view of the omission of such a large number of establishments in this instance, special mention is deemed necessary.

## BAKERIES (INCLUDING CAKES AND PASTRY).

1959-60.

(a) Includes confectionery in Tasmania.

25. Sugar-mills.—(i) *General.* Sugar-cane is grown in New South Wales and Queensland and particulars of area, yield, etc., are given in extended detail in Chapter XXII.—Agricultural Production.

The products of the sugar-mill are raw sugar and molasses, the former being sent to the refineries in different parts of Australia for further treatment. Particulars of cane crushed and sugar produced included in the following table refer to the quantities treated during the years ended 30th June, irrespective of the season in which the cane was grown; consequently, the figures relating to cane crushed and sugar produced may differ slightly from those given in Chapter XXII.—Agricultural Production, which relate to harvest years.

(ii) *Details for States.* The following table shows details of the operations of sugar mills in New South Wales and Queensland for the years 1955–56 to 1959–60.

## SUGAR-MILLS.

26. *Sugar-refining.*—The establishment of the sugar-refining industry considerably antedates the establishment of the sugar-milling industry, the raw material operated on in the earlier years coming chiefly from Mauritius and the East. In 1959–60, there were two sugar refineries in Queensland and one each in New South Wales, Victoria, South Australia and Western Australia. The total quantity of raw sugar treated amounted to 558,510 tons for a yield of 540,087 tons of refined sugar.

27. *Confectionery.*—Particulars for 1959–60 for each State and for Australia for a series of years are shown hereunder.

(ii) *Production.* During the 1939–45 War, production of jams increased greatly and an output of 171 million lb. was attained in 1943–44. Production afterwards decreased, but attained a new record of 198.5 million lb. in 1947–48. Production in recent years has been considerably lower, and in 1959–60 was 84.7 million lb. Preliminary figures for 1960–61 show production as being 81.3 million lb.

Production of preserved fruit in 1959–60 was 344.3 million lb., the highest on record being 349.4 million lb. in 1957–58. Preliminary figures for 1960–61 show production as being 310.5 million lb.

There has also been a marked development in the production of canned vegetables. In 1938–39, output totalled 10.3 million lb. but, as a result of the war-time demand by the armed services, production reached the record level of 119.1 million lb. in 1944–45. However, it has since declined and in 1959–60 amounted to 83.2 million lb. Preliminary figures for 1960–61 show production as being 90.0 million lb.

The following table shows the total quantity of jams, pickles, sauces and other items manufactured in each State in 1959–60.

(a) Not available for publication; figures are included in the total for Australia. (b) The cheese used in the manufacture of these products is included in Cheese (Green Weight) made as shown above.

The butter, cheese and condensed milk industries are dealt with more fully in Chapter XXIV.—Farmyard, Dairy and Bee Products.

31. **Meat and Fish Preserving.**—The industries included in this group are engaged chiefly in the freezing and preserving of meat. Works have been established at the seaports for the purpose of handling beef, lamb and mutton for export, and insulated space for the carriage of chilled and frozen produce is provided by shipping companies trading between Australia and other parts of the world. The substitution of chilled for frozen meat exported is referred to in Chapter XXIII.—Pastoral Production. In recent years, there has been considerable expansion in the canning of meat and fish.

**MEAT AND FISH PRESERVING.**

Particulars of the quantities and values of beef, mutton and lamb preserved by cold process exported from Australia over a series of years will be found in Chapter XXIII.—Pastoral Production.

32. **Breweries.**—(i) *Details of Industry.* The following table gives particulars of breweries in each State for the year 1959-60 and for Australia for a series of years. It should be noted, however, that the data shown are not strictly comparable throughout, owing to the inability or failure of some breweries to furnish a separate return for each branch of activity. Consequently the figures for some States include details of employment, wages, output, etc., not directly concerned with the brewing of beer, although associated with it. These extraneous activities include cooperage, malt works, aerated waters, etc.

**BREWERIES.**

(a) Excludes Excise Duty.

(ii) *Production, Consumption, Materials Used.* The quantity of ale, beer and stout brewed fell from 73.7 million gallons in 1928-29 to 49.8 million gallons in 1931-32, but thereafter increased each year to 109.2 million gallons in 1941-42. Under the Control of Liquor Order which operated between March, 1942, and March, 1946, the production of beer was restricted and consequently annual output remained static at about 100 million gallons from 1942-43 to 1944-45. Thereafter, production increased, and in 1960-61 amounted to nearly 242 million gallons.

The average annual consumption of ale, beer and stout per head of population exceeded 11 gallons prior to the economic depression of the early thirties; it dropped to 7.3 gallons in 1931-32, increased to 13.8 gallons in 1941-42 and declined again to about 13 gallons during the period of control from 1942 to 1946. The consumption per head in 1960-61 was 22.2 gallons.

The table below shows the quantities of materials used and the quantity and value of ale, beer (excluding waste beer) and stout brewed in each State during 1959-60.

(a) Not available for publication; figures are included in the total for Australia.

(b) Excludes Excise Duty.

For many years the production of locally-grown leaf was comparatively small, and manufacturers were dependent on imported leaf for the supply of their raw materials. Increased import duties stimulated local production, and the quantity of Australian leaf used by manufacturers rose from 1.2 million lb. in 1929-30 to over 3 million lb. in 1930-31. During the 1939-45 War, about 4.7 million lb. of Australian-grown leaf was used annually and the 1959-60 usage was 11.5 million lb. For further information see Chapter XXII.—Agricultural Production.

Imports of tobacco during 1959-60 comprised: manufactured tobacco, 591,796 lb., cigars, 139,714 lb., cigarettes, 975,434 lb., unmanufactured tobacco, 37,004,900 lb.; and in 1960-61 were 611,072 lb., 155,394 lb., 1,028,701 lb. and 35,711,198 lb. respectively.

35. Sawmills, etc.—The most important industry in Class X. is sawmilling. Because of difficulties associated with the classifying of sawmills into forest and town mills, they have been combined in the following table, together with plywood and veneer mills. The figures exclude particulars of a small number of itinerant and travelling sawmills.

The sawmill output of Australian grown timber, which declined from 740 million super. feet in 1925-26 to the abnormally low figure of 237 million super. feet during the depression, recovered to 717 million super. feet in 1938-39, and in 1960-61 stood at 1,397 million super. feet. Further reference is made to the sawmilling industry in Chapter XXV.—Forestry.

36. Cabinet and Furniture Making and Upholstery.—These industries constitute the principal manufactures in Class XI. The following table shows particulars for each State in 1959-60 and for Australia for a series of years.

37. **Printing Works.**—Printing and bookbinding rank high in importance among the industries of Australia and in 1959-60 afforded employment for 43,181 employees, and paid £43,766,529 in salaries and wages while the value of output amounted to £143,647,122. The following table gives particulars of establishments engaged in general printing in each State for 1959-60 and for Australia for a series of years. These establishments include those engaged in lithographic printing, bookbinding, paper ruling and linotyping and Government printing works.

38. Paper Making.—Although the paper manufacturing industry has been established in Australia for many years, it was not until the manufacture of paper pulp from indigenous timber commenced in 1938-39 that any marked development occurred.

Mills producing pulp from eucalypt timber are operating in Victoria and Tasmania, while in South Australia pulp is being produced from locally-grown softwoods. The production of pulp rose from 6,000 tons in 1938-39 to 88,000 tons in 1946-47. It remained at about this level until 1949-50, but in 1959-60 nearly 213,000 tons were produced.

The number of factories operating in 1959-60 comprised four in New South Wales, nine in Victoria, two in Queensland, one each in South Australia and Western Australia, and three in Tasmania. In Tasmania, newsprint, writing and printing papers are produced, and in the other States wrappings, other papers and boards. Particulars for this industry are shown in the following table.

Coke produced (b) '000 tons	398	135	76	103	(a)	(a)	759

(a) Not available for publication; figures are included in the total for Australia. (b) In addition, 2,376,097 tons of metallurgical coke were made in Coke Works in 1959–60.

Since 1938–39, when the output of gas was 21 thousand million cubic feet, production has increased each year with one exception (1949–50) and reached 50,648 million cubic feet, with an equivalent of 265,783 thousand therms (1 Therm = 100,000 B.T.U.), in 1960–61.

## CHAPTER VII.

### ELECTRIC POWER GENERATION AND DISTRIBUTION.

This chapter is divided into three major parts. A.—Introduction, which deals briefly with the resources, generation and distribution, and future development of electric power in Australia; B.—The Snowy Mountains Hydro-electric Scheme; and C.—The origins, development, present situation and new projects of electrical systems in each Australian State and Territory. A Statistical Summary is appended.

It should be noted that the information contained in the chapter relates to situations existing and projects contemplated in 1961 and that it may be considerably affected by changes in policy or plans, or by developments in the projects themselves.

#### A. INTRODUCTION.

1. *Distribution of Population and Location of Power Resources.*—The geographical pattern of electric power generation and distribution in Australia has been affected by two main influences—the distribution of population, with a resulting distribution of industry, and the location of fuel and water resources.

The Australian population increased between 1939 and 1961 from approximately 6,969,000 to 10,500,000. The two principal centres of population and industry, the metropolitan areas of Sydney and Melbourne, make the greatest demands for electric power and their growth has been associated with the development of large deposits of coal located relatively close to the source of demand. This, together with the fact that the major water resources are also located in the south-eastern portion of the Commonwealth, materially influences the distribution of industrial population and the location of major electric power stations.

By far the most important source of energy used in the production of electric power in Australia is coal. At 30th June, 1960, thermal power equipment represented 72 per cent., hydro plant 24 per cent. and internal combustion equipment 4 per cent. of the total installed generating capacity.

Most of Australia is poorly supplied with water, only about 15 per cent. receiving an annual rainfall of 30 inches or over. This is confined largely to Tasmania and to the narrow coastal strip along the east coast of the mainland. The possibility of establishing large hydro stations in inland areas is, therefore, strictly limited by the lack of sufficient water.

The only region on the mainland of Australia high enough to receive reliable winter snowfall, and from which, therefore, reasonably constant water supplies throughout the year can be expected, is the mountain chain which stretches from the high plateaux of south-eastern New South Wales through to the north-eastern highlands of Victoria. The hydro-electric potential of this area is considerable, and plans have been formulated to develop more than 3,000,000 kW within the next 25 years. The two major construction projects in this area are the Snowy Mountains and Kiewa Schemes. Other hydro-electric potential does exist on the mainland on the rivers of the coastal areas of New South Wales and Queensland, but the amount there available is only small compared with the potential of the Alpine region. In Tasmania, hydro-electric resources have been estimated at about 50 per cent. of the total Australian hydro-electric potential. Whereas on the mainland the chief source of energy is coal, water occupies this position in Tasmania.

2. *Electric Power Generation and Distribution.*—(i) *Ownership of Undertakings.* At the beginning of this century, Australia's electrical undertakings were carried on mainly by private enterprise, but some measure of governmental control was exercised through various electric light and power Acts. This legislation was designed to provide standards of safety, and to define the scope and obligations of the private organizations engaged in producing electric power for sale. A trend towards public ownership commenced during the 1914–18 War and became more pronounced after the 1939–45 War. By 1961, all major

generating stations supplying the public were, in varying degrees, under the control of State statutory organizations constituted with the object of unifying and co-ordinating the generation and distribution of electricity supplies within the various States. There are, however, still a large number of small private and municipal enterprises generating power for supply to country towns, although central authorities are extending supply to these places wherever practicable. In many areas, however, it has been, and remains, the practice for central authorities to sell power in bulk to local distributing organizations which undertake reticulation.

In addition to the private, local government and statutory organizations which generate and/or distribute electricity for sale, there are numerous firms generating power for use in their own establishments, particularly those engaged in mining pursuits remote from the main centres of population. This chapter, however, is concerned mainly with the activities of central electric stations, and the power regularly produced for such internal consumption is, in any case, a relatively small proportion of the total power produced.

(ii) *Power Production and Generating Capacity.* In the period between 1938-39 and 1960-61, production of electric power in Australia increased by more than 400 per cent. from 4,688 to 25,072 million kilowatt hours.

Since the 1939-45 War, industry and commerce have expanded rapidly, many new houses have been built and the population has increased by approximately 42 per cent. These factors, together with the extension of electricity supplies to rural areas and the increased use of domestic electric appliances, have all helped to bring about a position where the greatly increased demand for power cannot be satisfied by the existing installed capacity of central generating stations.

At 30th June, 1960, installed generating capacity in Australia totalled 5.95 million kW compared with 5.53 million kW in 1959, an increase of nearly 8 per cent. In 1959-60, each kW of installed capacity produced an average of nearly 4,000 kWh. These figures are based on Commonwealth totals; figures for the States vary, depending on such factors as the distribution of demand, number of consumers, and type of equipment employed.

## B. SNOWY MOUNTAINS HYDRO-ELECTRIC SCHEME.\*

1. *Snowy Mountains Hydro-electric Power Act, 1949.*—In July, 1949, the Commonwealth Government passed the Snowy Mountains Hydro-electric Power Act establishing the Snowy Mountains Authority.

The functions and powers of the Authority as defined in the Act are:—

- (a) to generate electricity by means of hydro-electric works in the Snowy Mountains Area;
- (b) to supply electricity generated to the Commonwealth:—
  - (i) for defence purposes;
  - (ii) for consumption in the Australian Capital Territory.

The Authority is empowered also to supply to a State, or to a State Authority, electricity not immediately required for defence purposes or for consumption in the Australian Capital Territory.

To enable it to perform its functions, the Authority is given power to construct, maintain, operate, protect, manage and control works:—

- (a) for the collection, diversion and storage of water in the Snowy Mountains Area;
- (b) for the generation of electricity in that area;
- (c) for the transmission of electricity generated by the Authority;
- (d) incidental or related to the construction, maintenance, operation, protection, management or control of any works otherwise specified in the Act.

The Authority is constituted by a Commissioner appointed by the Governor-General. He is assisted by two Associate Commissioners also appointed by the Governor-General.

The Snowy Mountains Act is supported by a detailed Agreement between the States of New South Wales and Victoria and the Commonwealth with regard to the construction and operation of the Scheme, the distribution of power and water, charges to be made for

\* See also Chapter VIII.—Water Conservation and Irrigation, page 257 of this issue and special detailed article in Official Year Book No. 42, pp. 1103-1130.

electricity, and other such matters. The Snowy Mountains Council, established under the terms of the Agreement and consisting of representatives of the Commonwealth, the Authority and the two States, directs and controls the operation and maintenance of the permanent works of the Authority and the allocation of loads to generating stations.

2. **Geography of the Area.**—The Snowy Mountains Area in south-eastern New South Wales is the only part of the continent in which altitudes exceed 7,000 feet and in which there is a substantial area over the altitude of 6,000 feet. The precipitation which results from the presence of this barrier on the line of the prevailing winter depressions of Antarctic origin amounts to as much as 120 inches a year in the vicinity of Mt. Kosciusko, the highest point in Australia. The drainage from the snowfields is practically all to three systems—those of the Murray and Murrumbidgee Rivers, which flow inland, and that of the Snowy River, which flows southward to Bass Strait.

3. **Description of the Scheme.**—(i) *General.* The Scheme involves two main diversions, the diversion of the Eucumbene, a tributary of the Snowy, to the Upper Tumut River and the diversion of the main stream of the Snowy River at Island Bend and Jindabyne to the Swampy Plain River. These two diversions divide the Scheme geographically into two sections, the Snowy-Tumut Development and the Snowy-Murray Development. The features referred to may be identified by reference to the map on page 240. For purposes of both power production and irrigation, it is necessary to provide a considerable degree of regulation of run-off and this will be achieved by the use of Lake Eucumbene formed by the construction of Eucumbene Dam and other smaller storages to control the waters of the Eucumbene, Murrumbidgee, Tooma, and Tumut Rivers for the Snowy-Tumut Development and of the Snowy River for the Snowy-Murray Development. A sectional diagram of the Scheme appears on page 239.

(ii) *Snowy-Tumut Development.* This Development comprises works for the diversion and regulation of the waters of the Eucumbene, Upper Tooma, Upper Murrumbidgee and Upper Tumut Rivers and their combined development through a series of power stations down the Tumut River. A major dam has been constructed on the Eucumbene River to create Lake Eucumbene which has an ultimate usable storage of 3.5 million acre feet. The waters of the Upper Murrumbidgee River are diverted into Lake Eucumbene by a dam at Tantangara and a 10½-mile tunnel from Tantangara Reservoir. From Lake Eucumbene, the water flows through a 14-mile tunnel to Tumut Pond Reservoir on the upper reaches of the Tumut River, where it joins the waters of the Tumut River itself and the waters of the Tooma River diverted to Tumut Pond Reservoir by a diversion dam and a 9-mile tunnel. A feature of this 14-mile Eucumbene-Tumut Tunnel is its use during periods of high flow to divert waters of the Tumut River from Happy Jacks Shaft or the combined waters of the Tumut and Tooma Rivers from Tumut Pond reservoir back to Lake Eucumbene for storage.

From Tumut Pond reservoir water is conveyed by pressure tunnel to Tumut 1 underground Power Station (capacity 320,000 kW), returned to the Tumut River and then by another pressure tunnel to Tumut 2 underground Power Station (capacity 280,000 kW), thence discharging into Tumut 3 Reservoir at Lobs Hole, also on the Tumut River.

Tumut 3 and Tumut 4 Power Stations will be constructed between Tumut 3 and Blowering Reservoirs. Blowering Dam is to be constructed by the State of New South Wales and will provide for the regulation of power station discharges for use for irrigation in the Murrumbidgee valley. The Authority will, however, construct another power station at the foot of this dam to make use of irrigation releases for power purposes.

(iii) *Snowy-Murray Development.* The principal features of the Snowy-Murray Development are the diversion of the main stream of the Snowy River by tunnels, shafts, and pipelines westwards through the Great Dividing Range into the Swampy Plain River in the catchment of the Upper Murray, and the development of power on the western slopes of the Alps. The main works of the Development will be as follows:—

- (a) The construction of a tunnel from the Snowy River near Island Bend through the Great Dividing Range to Geehi Reservoir on the Geehi River and two power projects between Geehi Reservoir and the Swampy Plain River near Khancoban. The power stations associated with these two power projects, Murray 1 and Murray 2, will be the Scheme's largest stations and will have a combined capacity of 1,200,000 kW.
- (b) Construction of a tunnel from a small dam on the Snowy River near Island Bend to Eucumbene Dam to carry Snowy water to Lake Eucumbene for storage at times of high river flows. When river flows are lower than average,

this stored water will be returned towards Island Bend and thence through the Snowy-Geehi Tunnel to Geehi Reservoir and Murray 1 and Murray 2 Power Stations.

- (c) The construction of a dam on the Snowy River near Jindabyne to store the residual flow of the Snowy and Eucumbene Rivers downstream from Island Bend and Eucumbene Dams, including the flows of major tributaries, the Crackenback and Mowamba Rivers, and the construction of a pumping plant, pipeline and tunnel to lift this water from Jindabyne Reservoir to the Snowy-Geehi Tunnel near Island Bend, where it will join the flow to the Geehi Reservoir for use through Murray 1 and Murray 2 Power Stations.

Associated with the main Snowy-Murray diversion are power developments of the Upper Snowy and Upper Geehi Rivers. The Upper Snowy proposals provide for a series of three power projects utilizing the fall in the waters of the Snowy River from Kosciusko Reservoir at elevation 5,800 feet to Island Bend at elevation 3,900 feet. One of these, the Guthega Project, came into operation in February, 1955.

On the western side of the Divide, the waters of the Upper Geehi River and its tributary, Windy Creek, falling from an altitude of 5,200 feet to Geehi Reservoir at elevation 3,600 feet, will generate power in Windy Creek Power Station.

**4 Utilization of Power.**—The future electric power plants on the mainland of Australia will be predominantly thermal or thermo-nuclear installations, and in an electrical system in which the greater part of the energy is generated in thermal plants it is usually found that the hydro installations operate to the best advantage on peak load. However, the existing New South Wales and Victorian systems include a proportion of relatively old and less efficient installations which, for reasons of fuel economy, are also best used for the production of peak load power. Therefore, in order to utilize the potential of the Snowy Mountains Scheme most effectively, it is proposed to arrange the order of development so that the early stations will operate, initially, somewhat below the peak of the system load, with a progressive change to predominantly peak load operation as construction proceeds and as the load increases in magnitude.

The Snowy Mountains Scheme is situated geographically about midway between the principal load centres of Sydney and Melbourne and will be connected to these centres by 330,000 volt transmission lines. It will, consequently, be in a strategic position to take advantage of the diversity in the power requirements of these two load systems, a most important factor in so far as it affects the economy of operation of the supply systems of the two States.

Although most of the output from the Scheme will go to the States of New South Wales and Victoria, the Commonwealth Government has the right to draw from the Scheme its requirements of power and energy for the Australian Capital Territory and for defence purposes. For convenience, the Commonwealth's share of power and energy will be drawn from the New South Wales transmission network by an exchange arrangement between the Commonwealth and the Electricity Commission of New South Wales. After fulfilling the Commonwealth's requirements, the remaining power and energy from the Scheme will be divided between the States of New South Wales and Victoria in the ratio of 2 : 1.

**5. Progress and Future Programme.**—The first power station in the Scheme, Guthega, of 60,000 kW initial capacity, came into operation in February, 1955. This was followed by Tumut 1 Power Station, total capacity 320,000 kW, which came into operation progressively during 1959. Eucumbene Dam, which provides the major regulating storage for the Scheme, was completed in May, 1958, and water now being stored in Lake Eucumbene will be used later for power generation through the Tumut Power Stations. Completion of the Eucumbene-Tumut Tunnel in June, 1959, made possible the first major trans-mountain diversion of water. Construction of the second of the Tumut River Power Stations, Tumut 2, with a capacity of 280,000 kW, was completed in 1962. Tantangara Dam on the Murrumbidgee River was completed in February, 1960, and water is now being stored and diverted to Lake Eucumbene through the Murrumbidgee-Eucumbene Tunnel which was completed early in 1961. The Tooma-Tumut Tunnel to Tumut Pond Reservoir was also completed early in 1961.

The next works to be constructed will be parts of the main Snowy-Murray Development, and it is anticipated that the first production of power from the Murray 1 Power Station and the first trans-mountain diversion of the water from the Snowy River to the Murray will occur during 1966.

## C. STATES AND TERRITORIES.

## § 1. New South Wales.

1. **General.**—In Official Year Book No. 39, an account was given, in some detail, of the origin and development of electricity generation and distribution in New South Wales, describing in particular the growth of the systems of the Sydney County Council, the Department of Railways, the Electric Light and Power Supply Corporation Ltd., the Southern Electricity Supply and the Clarence River County Council (now the Northern Rivers County Council). A description was also given of the legislation which constituted The Electricity Authority of New South Wales and the Electricity Commission of New South Wales as well as legislation existing prior to their constitution. At present, the following are the three main Acts governing electricity supply in New South Wales.

- (i) The Local Government Act, 1919, which lays down the various rights and responsibilities of local government bodies in the establishment and operation of electricity trading undertakings.
- (ii) The Electricity Development Act, 1945–1957, which established The Electricity Authority of New South Wales as the body responsible for the co-ordination of electricity supply throughout the State.
- (iii) The Electricity Commission Act, 1950–1957, which constituted the Electricity Commission of New South Wales as the major generating authority and not subject to the provisions of the Electricity Development Act.

2. **Organization.**—(i) *The Electricity Commission of New South Wales.* The Commission, which was constituted under the Electricity Commission Act, 1950–1957, consists of five members of whom one is full-time Chairman and one is full-time Vice-Chairman. In its administration, the Commission is directly responsible to the Minister for Local Government.

When the Commission was established, 93 per cent. of the State's power requirements were generated by four bodies—the Sydney County Council, the Department of Railways, the Southern Electricity Supply (a division of the Department of Public Works) and the privately-owned Electric Light and Power Supply Corporation Ltd. The Electricity Commission Act, 1950–1957, and the Electricity Commission (Balmain Electric Light Company Purchase) Act, 1950, provided for the acquisition of the power stations and main transmission lines of those bodies. The transfer of the power stations and transmission lines of all these undertakings has been effected. On 1st July, 1956, the Commission acquired the power station and bulk supply system of the Tamworth City Council, which supplied in bulk to a number of distributing bodies in the north of the State.

The main function of the Commission is the generation and transmission of electricity, which it sells in bulk to distributing authorities (mainly local government bodies) throughout a large part of the State, to the government railways and tramways, and to certain large industrial consumers. As the major generating authority, it is also responsible for the development of new power sources. An important exception is the hydro-electric potential of the Snowy Mountains region, which is being developed by the Snowy Mountains Hydro-electric Authority, a Commonwealth Government body.

(ii) *Other Electricity Supply Authorities.* The retail sale of electricity to the public is, in general, carried out by separate electricity supply authorities—municipal and shire councils, electricity county councils (consisting of groups of shire and/or municipal councils) or private franchise holders. At 30th June, 1961, there were 58 of these supply authorities throughout the State, of which 20 also generated part or all of their power requirements. The majority of country power stations are small oil engine plants which are becoming increasingly costly to operate. Consequently, they are gradually being closed down as the main transmission network is extended further afield.

Over the past few years, there has been a distinct trend towards the consolidation of supply areas, many of which have been regarded as being too weak individually to form satisfactory areas for distribution. Generally these consolidations have taken the form of a county district consisting of a number of neighbouring shire and municipal areas grouped for electricity supply purposes only, and administered by a county council of representatives elected by the constituent shire and municipal councils.

Of the 227 cities, municipalities and shires in New South Wales, 213 are included in one or other of the 36 electricity county districts. The majority of these county districts have been constituted since 1945. The largest of the county councils is the Sydney County Council, which at 30th June, 1961, was supplying 485,484 consumers in the Sydney Metropolitan Area. Unlike the other county councils, which are constituted under the provisions of the Local Government Act, 1919, the Sydney County Council was specially constituted under the Gas and Electricity Act, 1935.

(iii) *The Electricity Authority of New South Wales.* The Electricity Authority was constituted under the Electricity Development Act, 1945–1957, for the stated purpose of promoting and regulating the co-ordination, development, expansion, extension and improvement of electricity supply throughout the State. The Authority, which is a regulatory body only, consists of seven members of whom one is a full time Chairman. Like the Commission, it is responsible to the Minister for Local Government.

The following are the main functions of the Authority.

(a) *Distribution.* Under the Act, the approval of the Authority is required, *inter alia*, for the establishment or acquisition of an electricity trading undertaking by a local government council, for the granting or renewing by such a council of electricity franchise agreements or corresponding agreements with other councils, and for the giving or taking of bulk supplies of electricity. It also has power to formulate proposals for the establishment of county councils.

In exercising these powers, the Authority is mainly concerned with seeing that distributing authorities are sufficiently strong to provide an economical, efficient and satisfactory service. Its most important activities in this regard are in investigating supply areas and in making recommendations to the Minister for the consolidation of such areas into county districts. Many of the new county districts referred to earlier have been formed largely as a result of the Authority's advice.

(b) *Rural Electrification.* The Authority administers the rural electricity subsidy scheme under which rural electrification throughout the State is progressing very rapidly (*see* para. 4, p. 230).

(c) *Safety.* The Electricity Development Act, 1945–1957, contains provisions for the making of regulations relating to most aspects of safety, and these powers are being used more and more extensively. Safety regulations now in force cover such matters as inspection of consumer's installations, licensing of electricians and electrical contractors, approval of electrical appliances, safety of linesmen and overhead line construction.

(d) *Generation and Transmission.* The approval of the Authority is required for the establishment or extension of power stations and main transmission lines (with the exception of those of the Electricity Commission).

3. *Generation and Transmission.*—(i) *General.* Except in the Snowy Mountains district and in one or two other areas, New South Wales is lacking in major water power potential and for the generation of electricity the State is, therefore, dependent mainly on steam power stations. During the year ended 30th June, 1961, coal-fired stations generated 91.8 per cent. of the State's energy requirements, hydro-electric stations 7.6 per cent. and internal combustion plants 0.6 per cent.

The proportion of power generated in the hydro-electric stations will increase considerably with the future plant development of the Snowy Mountains Scheme by the Commonwealth Government, but at no stage of its development will the Scheme supply more than 15 per cent of the State's energy requirements. Coal-fired steam power stations, therefore, will continue to supply the greater part of requirements for the foreseeable future.

(ii) *Major Generating Stations.* In New South Wales, the generation of electricity has followed the general world trend towards large centralized power stations supplying large areas through inter-connected transmission networks. Whereas until a few years ago the greater part of the coal-fired generating plant was located in the industrial areas of Sydney, Newcastle and Wollongong, where most of the population is also located, major power stations are now being located on the coalfields to the north, south and west of Sydney, and power is transmitted to the load centres through high voltage transmission lines.

As at 30th June, 1961, the major power stations of the State system of the Electricity Commission of New South Wales and their installed capacities were as follows:—*Steam*—Bunnerong "A" and "B" (Sydney), 375,000 kW; Wangi (Lake Macquarie), 330,000 kW; Tallawarra (Lake Illawarra), 320,000 kW; Pyrmont (Sydney), 200,000 kW; Wallerawang (near Lithgow), 180,000 kW; White Bay (Sydney), 172,000 kW; Balmain (Sydney), 107,000 kW; Ultimo (Sydney), 80,000 kW; Port Kembla, 60,500 kW; Zarra Street (Newcastle), 45,000 kW; Muswellbrook, 30,000 kW; Lithgow, 27,000 kW; Tamworth, 27,000 kW; Maitland, 20,000 kW; Penrith, 20,000 kW; Liverpool, 20,000 kW; *Hydro*—Hume (near Albury), 50,000 kW; Warragamba (near Penrith), 50,000 kW; Burrinjuck (near Yass), 20,000 kW. There were also various other steam, hydro and internal combustion stations aggregating 36,870 kW. The total installed capacity of the Electricity Commission's system was 2,170,370 kW.

The greater part of the Commission's generating plant is therefore concentrated within a hundred mile radius of Sydney—the largest stations outside this area being located at Hume, capacity 50,000 kW, at Muswellbrook, capacity 30,000 kW, and at Tamworth, capacity 27,000 kW.

(iii) *Major Transmission Network.* The retailing of electricity to 97 per cent. of the population of New South Wales is in the hands of local distributing authorities, who obtain electricity in bulk from the Commission's major State network. This network of 330 kV, 132 kV and 66 kV and some 33 kV and 22 kV transmission lines links the Commission's power stations with the load centres throughout the eastern portions of the State, extending geographically up to 400 miles inland.

At 30th June, 1961, there were in service 376 route miles of 330 kV (including 291 miles operating for the time being at 132 kV and 66 kV) and 1,366 miles of 132 kV transmission lines (including 258 miles operating for the time being at 66 kV or lower). There were also in service 2,365 miles of transmission line of 66 kV and lower voltages.

Superimposed upon the 132 and 66 kV network will be a powerful 330 kV trunk system extending from the Snowy Mountains Hydro-electric Scheme in the south through Wollongong, Sydney and Newcastle to Armidale in the north. At 30th June, 1961, the section, 85 miles long, between the Snowy Mountains Upper Tumut Switching Station and the Commission's Yass 330/132 kV Sub-station had completed its second year of operation, conveying power from the Snowy Mountains Scheme to the Commission's State network and interconnecting the systems of the Electricity Commission of New South Wales and the State Electricity Commission of Victoria at the Upper Tumut Switching Station. A further 291 miles of this 330 kV transmission network has been built, but these sections are operating at lower voltages for the time being.

The installed transformer capacity at the Commission's 99 sub-stations is 3,992,500 kVA.

(iv) *Separate Systems and Total State Installed Capacity.* There are a number of small isolated plants which have not yet been interconnected with the main network and which supply isolated towns and villages. Some councils along the Victorian border receive bulk supplies from Victorian authorities.

A number of local government bodies have undertaken the development of independent power stations. Of these, the more important are:—the Northern Rivers County Council which has constructed a steam power station at Koolkhan (near Grafton) with an installed capacity of 28,750 kW, and the North-West County Council, which has established a 12,500 kW steam power station on the Ashford coalfield.

The aggregate installed capacity for the whole of the New South Wales systems and isolated plants was 2,271,371 kW as at 30th June, 1961.

(v) *Future Development.* The major new thermal stations already built and those now being developed on the coalfields will become the main base load centres for the northern, southern and western regions respectively. Wangi, on Lake Macquarie, and Tallawarra, on Lake Illawarra, have been completed, the latter including two 100,000 kW generating units which are the largest in operation in the State. At Wallerawang work is proceeding on the installation of a second 60,000 kW unit which will bring the station to its planned capacity of 240,000 kW.

At Vales Point, on Lake Macquarie, work is in progress on a large thermal station with an initial capacity of 875,000 kW. The first stage will comprise two 200,000 kW units and the second stage one 200,000 kW and one 275,000 kW unit.

The site of a further major station, to be called Munmorah power station, has been selected between Lakes Munmorah and Budgewoi (on the central coast) and tenders invited for the first stage of construction comprising two 350,000 kW generating units.

The development of the 330 kV main system is expected to be rapid in the next few years. The most recent section is that of 42 miles between a new 330 kV substation just south of Sydney and the site of a future 330 kV switching station at Dapto to which a connexion to Tallawarra Power Station will be made. Work is in progress on a 110 mile section between Yass and Dapto, which will permit full 330 kV operation of the whole of the link between the Upper Tumut Switching Station and Sydney South early in 1962, to bring power from the Tumut 1 and Tumut 2 stations. The 330 kV line from Snowy to Yass is being duplicated. Work has also begun on two new lines from Sydney South to a new substation just north of Sydney, and a further link from there to the new power station at Vales Point ready for the operation of that station in 1963.

New construction of 132 kV and 66 kV transmission lines will extend the system geographically within the next two or three years to South Grafton in the north, to Hay and to Moulamein in the west and south-west, and subsequently down to Moruya on the South Coast. The mileage of these and other lines to be built within this period exceeds 650 miles and in the same period the Commission will build three 330 kV substations, ten new 132 kV substations and a number of substations of lower voltages. The additional transformer capacity resulting from this work and the augmentation of existing substations will be of the order of 2,500,000 kVA.

(vi) *Hydro-electricity.* The greater part of the hydro-electric potential of New South Wales is concentrated in the Snowy Mountains Area (see Snowy Mountains Hydro-electric Scheme, p. 224). Apart from this area, there are in operation the new hydro-electric stations at the Warragamba Dam (50,000 kW), and Hume Dam (50,000 kW), and stations at the Burrinjuck Dam (20,000 kW), Wyangala Dam (7,500 kW) (shortly to be closed during repairs and extensions to the Dam), and Keepit Dam (6,000 kW). The output of Warragamba Power Station is dependent upon the availability of water surplus to the requirements of the Sydney Metropolitan Area, and the output of the other stations on the release of water for irrigation.

Of the remaining hydro installations, the largest is that of the New England County Council on the Oakey River, a tributary of the Macleay River, which has a capacity of 5,250 kW.

The Northern Rivers County Council operates a hydro-electric power station on the Nymboida River, a tributary of the Clarence River. This station has a capacity of 4,500 kW.

The Bega Valley County Council has constructed a hydro-electric scheme at Brown Mountain utilizing the headwaters of the Bemboka River. This installation has a capacity of 3,950 kW.

The Mullumbimby Municipal Council has in operation two 150 kW hydro units on Wilson's Creek, a tributary of the Richmond River.

**4. Rural Electrification.**—When The Electricity Authority of New South Wales was constituted in 1946, one of its first tasks was to devise a scheme for subsidizing the cost of rural electrification. At that time, only 16,000 New South Wales farms were being served with electricity—less than one-quarter of those within reasonable reach of public electricity supply systems. In August, 1946, a subsidy scheme was approved by the Government and put into immediate operation. Under this scheme, local electricity suppliers receive subsidies from The Electricity Authority towards the cost of new rural lines. The amount of subsidy is based on the estimated cost of the proposed extension and the number of consumers able to be served by the new lines. In order that the funds available for subsidy purposes might be used to the best possible advantage, the scheme was designed to encourage local electricity supply authorities to construct the more economic extensions first. This was achieved by fixing a limit to the cost eligible for subsidy. Originally this limit was £250 per consumer when averaged over the cost of the whole extension, but the limit was raised to £400 in December, 1953. Some subsidy was paid on higher cost extensions but the excess over an average of £400 was not subsidized.

To assist supply authorities in extending supply to less populated, and thus high-cost, areas of the State, the subsidy scheme was extended from May, 1959, to provide for payment of increased subsidy in respect of extensions where the average capital cost per consumer lies within the range of £600–£800.

Between August, 1946, and June, 1961, about 39,900 miles of new distribution lines in rural areas were erected at a cost of over £27,000,000. These lines served 48,800 farms and 30,000 other rural consumers. At 30th June, 1961, The Electricity Authority was committed to the payment of £11,867,048 in subsidies, of which £5,485,177 had been paid.

## § 2. Victoria.

1. **General.**—In Official Year Book No. 39, a detailed description is given of the development of electricity generation in the cities of Melbourne, Geelong, Bendigo and Ballarat up to the time of transfer of control of electricity undertakings in those cities to the State Electricity Commission of Victoria. An account is also given of the events culminating in the establishment of the Commission in 1919, and of the early developments in the Commission's undertakings.

2. **State Electricity Commission of Victoria.**—(i) *Power and Fuel Authority.* Since it began operating in 1919, the State Electricity Commission has expanded and co-ordinated the production and supply of electricity on a State-wide basis to the point where its system now generates almost all the electricity produced in Victoria and serves about 97 per cent. of the population through a supply net-work covering more than three-quarters of the populated area of the State.

Development of Victoria's electricity system is based on the utilization for both power and fuel of Victoria's extensive brown coal resources in the Latrobe Valley in eastern Gippsland, with supplementary development of the hydro-electric potential of north-eastern Victoria. Victoria is entitled to one-third of the electricity from the Snowy Mountains Hydro-electric Scheme, after the Commonwealth has taken the power it needs for the Australian Capital Territory and within the Snowy Mountains area. Output from the Snowy scheme was made available to Victoria in the latter half of 1959. Victoria also shares with New South Wales in the electricity generated at Hume Hydro Station on the River Murray. Nearly four-fifths of the State's electricity is generated from brown coal, either used in its raw state or manufactured into higher quality fuel in the form of brown coal briquettes. All of the brown coal and briquette fuel is supplied by undertakings which the Commission itself owns and operates. Output of brown coal in 1960-61 from the three open cuts at Yallourn, Yallourn North and Morwell totalled 15,221,385 tons, of which 9,390,007 tons were used in the Commission's own power stations, and 5,343,214 tons were manufactured into 1,806,619 tons of brown coal briquettes, 51 per cent. of the briquette output then being used for electricity production in metropolitan and provincial steam power stations.

The two functions, generation of electricity and production of fuel, are closely integrated. Apart from the large proportion of brown coal and briquette fuel consumed in the power stations, the actual process of briquette manufacture results also in large-scale generation of electricity, since the steam needed for processing the raw coal for briquetting is first used to operate turbo-generators.

(ii) *Status and Powers.* Constituted by Act of the Victorian Parliament, the State Electricity Commission is a semi-governmental authority administered since 1921 by a full-time Chairman and three part-time Commissioners. The principal duty of the Commission is to co-ordinate and extend on an economic basis the supply of electricity throughout Victoria. For this purpose, it is vested with power to erect, own, and operate power stations and other electrical plant and installations, supply electricity retail to individual consumers, or in bulk to any corporation or public institution, acquire and operate electricity undertakings, develop, own, and operate brown coal open cuts and briquetting works, and develop the State's hydro-electric resources. From its own revenues, which it controls, the Commission must meet all expenditure in the operation of its power, fuel and subsidiary undertakings, and all interest and other charges incurred in the service of its loans and other capital commitments.

The Commission is the controlling authority for all electrical undertakings in Victoria. It is responsible for the registration of electrical contractors, the licensing of electrical mechanics, the control of installation methods and material and the testing and approval of electrical equipment and appliances. Incidental to its main operations, the Commission owns and operates the tramway systems in Ballarat and Bendigo. For the accommodation of its employees at Yallourn, the Commission owns and administers the town of Yallourn. It also owns large housing estates in the surrounding area, but is progressively selling houses in these estates to Commission employees. In the Kiewa hydro-electric works area, it has built the two townships of Mount Beauty and Bogong, municipal administration of the former now being vested in the Shire of Bright. With construction at Kiewa now complete, many houses at Mount Beauty have been sold for holiday homes.

(iii) *Electricity Supply.* At 30th June, 1961, consumers in Victoria served by the State system totalled 906,638. Outside the State system, there were 18,190 other consumers served by local country undertakings. The system supplies all the Melbourne metropolitan area and nearly 1,650 other centres of population.

The Commission sells electricity retail in all areas except part of the metropolitan area, where it sells in bulk to eleven municipal undertakings which operate as local retail supply authorities under franchises granted before the Commission was established. Bulk supply is also being provided at present to several New South Wales municipalities and irrigation settlements bordering the River Murray. Rural electrification is now more than 87 per cent. completed, the over-all plan to extend the State system to all populated regions of Victoria having made rapid progress during recent years. Consumers served by the State system outside Melbourne metropolitan area (390,185) have more than doubled, and the number of farms connected to supply (46,838) has almost trebled in the past ten years. Of the new consumers connected to supply each year, more than two-thirds are outside the metropolitan area. New farm connexions average nearly 3,000 a year.

The Commission's retail consumers totalled 712,421 at 30th June, 1961. Retail supply is administered through the metropolitan branch, seven extra-metropolitan branches (namely Ballarat, Eastern Metropolitan, Geelong, Gippsland, Midland, North Eastern and South Western) and the North Western Region, which comprises Northern branch (based on Bendigo) and the two sub-branches based on Mildura and Horsham (Wimmera). At 30th June, 1961, there were branch and district supply offices in 83 towns in Victoria.

(iv) *Electricity Production.* Electricity generated in the State system or purchased by it totalled 6,577 million kWh in 1960-61 or 99 per cent. of all Victoria's electricity. The system comprises a series of thermal and hydro-electric power stations. Inclusive of generator capacity both within the State and available to the Victorian system from outside the State, the total installed generator capacity at 30th June, 1961, was 1,682,000 kW. All but two small regional power stations are interconnected, and feed electricity into a common pool for general supply. The major power station in this interconnected system is the brown coal burning power station at Yallourn, which alone generates nearly half of Victoria's electricity. Other power stations in the interconnected system comprise the important brown coal burning power station at Morwell, steam stations in Melbourne (Newport, Richmond and Spencer Street), Geelong and Ballarat; hydro-electric stations at Kiewa, Eildon, on the Rubicon and Royston Rivers, near Eildon, and at Cairn Curran; and internal combustion stations at Shepparton and Warrnambool. All within Victoria are Commission owned, except Spencer Street Power Station, which remains the property of the Melbourne City Council, although operated as a unit in the interconnected system. A 330,000-volt transmission line links the Victorian system with the Snowy Mountains undertaking, and also provides facilities for interconnexion between the Victorian and New South Wales State generating systems. Also linked with the Victorian interconnected system is the hydro station at Hume Dam on the River Murray. This power station is operated by the Electricity Commission of New South Wales. Output and operating costs are shared by Victoria and New South Wales.

In meeting the total demand on the system, which fluctuates throughout the day and from month to month, each group of stations in the interconnected system, whether steam, hydro or internal combustion, is assigned a predetermined function dependent upon the availability of power from each group and the overall economics of generation. The various stations are utilized in the combination that will meet the system load most economically at a given time. This procedure results in an arrangement of the system on the following general lines.

- (a) Yallourn Power Station, owing to the low cost of extraction and ample supply of raw brown coal, is a base-load station, and is operated continuously at its maximum economic capacity. Morwell Power Station which, like Yallourn, burns raw brown coal, is also a base-load power station.
- (b) Metropolitan and provincial steam stations and provincial internal combustion stations situated close to load centres are designed to operate as peak load stations to assist in meeting the heavy, short period load.
- (c) Hydro stations are operated in accordance with the availability of water. Their primary function is to provide peak load power. As the basic purpose of Eildon reservoir is to provide water for irrigation, generation of electricity is mainly governed by irrigation requirements, but provision has been made

for limited operation of the power station in winter, when electricity requirements are heaviest and there is no irrigation demand for water. Hume Hydro Station also operates on water released for irrigation, and no regular output of electricity can be expected during the non-irrigation months in the winter.

Commission power stations not yet connected with the rest of the State system comprise the two steam stations (Redcliffs and Mildura) serving the Mildura region.

(v) *Transmission and Distribution.* The electrical transmission and distribution system in the State supply network at 30th June, 1961, comprised 34,559 miles of power-lines, sixteen terminal receiving stations and nearly 27,000 distribution sub-stations. Main transmission is by 220 kV, 132 kV and 66 kV power lines which supply the principal distribution centres and also provide interconnexion between the power stations. The 330 kV line connecting the Victorian system with the Snowy Mountains Scheme via Dederang, near Kiewa, came into service in November, 1959. The 220 kV system now extends from Yallourn to Melbourne, Melbourne to Geelong, Melbourne to Kiewa and Kiewa to Shepparton. Two further sections of the 220 kV system—Geelong to Colac and Shepparton to Bendigo and Kerang—are operating temporarily at 66 kV. From Yallourn there is also a 132 kV transmission line to Melbourne. The 66 kV lines radiate from Melbourne to Geelong and main centres in the South West, Ballarat and Horsham, and Bendigo and Charlton, and also to Benalla and other main centres in the North East. Further 66 kV lines radiate from Yallourn to main centres in Gippsland.

(vi) *Future Development.* With the completion of the Kiewa hydro-electric undertaking, major new construction is now concentrated on the development of the Commission's brown coal undertakings at Yallourn and Morwell in the Latrobe Valley and the erection of a large new brown coal burning power station (Hazelwood) near Morwell. At the same time, the Commission continues its programme of rural electrification, extension of the State system (particularly in western and north-western Victoria) and reinforcement of supply by extending the 220 kV system from Bendigo north-westward to Redcliffs, near Mildura, and also between Bendigo and Geelong, where connexion will be made with the existing Melbourne-Colac line, thus completing a 220 kV circle around Central Victoria. The 220 kV system is also being extended from Colac to Terang. Another major supply extension is a new 66 kV line from Bairnsdale to Orbost in Eastern Gippsland.

Yallourn Power Station is being greatly enlarged. An extension of 240,000 kW capacity is due for completion in 1962. The first generating unit (120,000 kW) went into service in June, 1961. Enlargement of the power station has required a corresponding expansion in production of brown coal at Yallourn. New dredger plant increased annual output at the Yallourn open cut to nearly 12 million tons in the 1960-61 financial year.

At Morwell, six miles from Yallourn, the Commission has developed a second brown coal power and briquette undertaking. The new undertaking comprises a large brown coal open cut and a major power station operating in association with a large briquetting plant. Some of the electricity generated at Morwell is needed to operate the briquette works, but most of the output of the power station is transmitted through Yallourn to metropolitan terminal stations for general supply through the State network. The power station began operation at the end of 1958. Installed generator capacity, now 110,000 kW, will be increased to 170,000 kW in the 1962-63 financial year. Commercial production of briquettes began in December, 1959. The briquette works (completed in September, 1960) have a production capacity of approximately 1,300,000 tons of briquettes a year. The Commission's new Hazelwood Power Station will be located a short distance south of Morwell. It will operate on raw brown coal fuel supplied by belt conveyor direct from the Morwell open cut. The power station will have a capacity of 1,200,000 kW and will comprise six turbo-generators each of 200,000 kW capacity. Hazelwood will be built in stages. Contracts have been placed and site work begun for the first two generating units (400,000 kW) and the related boiler plant. The first turbo-generator is due to be in service in 1964 and the second in 1965. Succeeding units are scheduled to be in service in 1967, 1968, 1970 and 1971. Power generated at Hazelwood Power Station will be transmitted at high voltage to Melbourne metropolitan terminal stations for distribution through the State supply network.

(vii) *Hydro Electricity.* At the Kiewa hydro-electric undertaking, in addition to the two existing stations, totalling 87,600 kW capacity, a third power station of 96,000 kW capacity was completed in December, 1960. The total installed capacity of the completed undertaking is 183,600 kW.

3. *Local Country Electricity Undertakings.*—At 30th June, 1961, there were 30 independent electricity undertakings in country centres in Victoria generating and distributing their own local supply. Most of these undertakings were in the far south-west, west and north-west of the State. Under the State Electricity Commission's rural electrification programme, almost all the independent local country undertakings will ultimately be acquired and absorbed into the State system. For the year 1960–61, the total production of the independent undertakings was 44 million kWh. The number of consumers at 30th June, 1961, was 18,190. The operation of the independent undertakings is governed by the Electric Light and Power Act, 1958, which the State Electricity Commission administers.

### § 3. Queensland.

1. *General.*—In Official Year Book No. 39, an account is given of the growth of electricity generation in Queensland, with particular reference to the City Electric Light Co. Ltd. of Brisbane (now the Southern Electric Authority of Queensland), the Brisbane City Council and the Toowoomba Electric Light and Power Co. Ltd.

The first of these organizations supplies a large part of Brisbane's electric power requirements, and those of a considerable rural area in the south-eastern corner of the State, from modern power stations at Bulimba, a suburb of Brisbane. Capacity is 95,000 kW at Bulimba "A", 120,000 kW at Bulimba "B", and a 10,000 kW "packaged plant" at Abermain (near Ipswich). The output from a 3,200 kW hydro-electric unit installed at Somerset Dam near Brisbane is also fed into the Southern Electric Authority system. With these plants, 840 million kWh were generated in 1959–60, while the total number of the Authority's consumers at 30th June, 1960, was 124,643.

The Brisbane City Council's electrical undertaking and power production in 1959–60 had an installed capacity of 205,000 kW, comprising 75,000 kW at New Farm and 120,000 kW at the new Tennyson Station, plus a 10,000 kW "packaged plant" also erected at Tennyson. Units purchased and generated amounted to 716 million kWh, and there were 137,891 consumers connected.

The Toowoomba Electric Light and Power Co. Ltd., which commenced operations in 1905, was absorbed by the Southern Electric Authority of Queensland in 1954.

The generation and distribution of electric power in Queensland had in earlier years tended to lag behind developments in this field in other States of Australia. The comparatively slow growth in the production and consumption of electricity can be attributed to some extent to the absence, prior to 1938, of a central statutory authority constituted to undertake the functions of co-ordinating, unifying and controlling the production and transmission of electric power. In addition, Queensland's vast area, coupled with a low population density, made large-scale rural electrification an uneconomic proposition, except in the south-eastern portion of the State, which surrounds the major centres of industry and population.

Before establishment of the Regional Electricity Boards in 1945, no attempts had been made to unify or co-ordinate electricity supplies outside of south-eastern Queensland, and rural electrification, apart from reticulation within certain townships, was practically unknown.

2. *Royal Commission on Generation and Distribution of Electric Power in Queensland, 1936.*—On 5th December, 1935, the Queensland Government appointed a Royal Commission to inquire into and make recommendations on matters relating to the generation and distribution of electric power in Queensland. An account of the results of its investigations and of the alternative proposals put before it will be found on page 1182 of Official Year Book No. 39.

3. **The State Electricity Commission of Queensland.**—The State Electricity Commission of Queensland commenced to function during January, 1938. Its main powers were to secure a proper and efficient supply of electric power, review tariffs, grant licences to supply electricity, secure the safety of the public, and control and advise electrical undertakings generally. It was thus a controlling authority as distinct from an operating authority. Details of its growth and development may be found in earlier issues of the Official Year Book (see No. 44, p. 284). Since its inception, the Commission has made considerable progress in its task of developing the State's power resources and promoting a more widespread use of electric power. The degree of utilization of electrical energy in Queensland now compares favourably with other States in the Commonwealth.

4. **Regional Electricity Boards.**—With a view to facilitating the control and development of electricity supply in areas of low population density and those having a predominantly primary producing economy, the Government, in 1945, passed the Regional Electric Authorities Act providing for the creation of regions of electricity supply and the constitution of Regional Electricity Boards.

Soon after passage of the Act, four Regional Boards were constituted, namely, Wide Bay, Capricornia, Townsville and Cairns. A fifth Board, entitled South Burnett, became an operating authority in October, 1947, but on 1st July, 1951, was absorbed in the Wide Bay Regional Board and this organization is now known as the Wide Bay-Burnett Regional Electricity Board.

As from 1st March, 1957, a further Regional Board became operative, covering the areas of Mackay, Sarina, Proserpine and adjacent rural areas under the name of Mackay Regional Electricity Board. Supply throughout this Region is provided from the central generating station at Mackay and accelerated electrical development of this area is being undertaken.

The Townsville Regional Electricity Board's area was extended in July, 1957, to include that of the Bowen Electricity Undertaking and in October, 1959, to include the Hughenden Electricity Undertaking and in September, 1960, to include the Collinsville Electricity Undertaking. The local authority areas of Thursday Island and Cook were included in the Cairns Regional Electricity Board's area from 1st July, 1956, and 1st July, 1957, respectively. As from 1st January, 1958, the Capricornia Region was extended to include the Shires of Bauhinia, Belyando, Emerald and Peak Downs in central-west Queensland.

Activities of the five Regional Boards in 1959-60 and 1960-61 compared with operations of the stations located in regions in 1945-46 are shown in the following table.

#### QUEENSLAND: REGIONAL OPERATIONS.

Region.	1945-46.		1959-60.		1960-61.	
	Units Generated.	No. of Consumers.	Units Generated.	No. of Consumers.	Units Generated.	No. of Consumers.
	Million kWh		Million kWh		Million kWh	
Wide Bay-Burnett ..	13.7	11,467	90.3	31,298	102.9	33,199
Capricornia ..	19.5	11,196	151.3	23,210	159.4	24,355
Townsville ..	25.8	11,612	(a) 70.4	28,555	(a) 53.1	30,338
Cairns ..	22.7	9,722	230.8	22,425	276.5	23,686
Mackay ..	6.5	4,283	37.3	11,157	40.9	12,198
<i>Total</i> ..	<i>88.2</i>	<i>48,280</i>	<i>580.1</i>	<i>116,645</i>	<i>632.2</i>	<i>123,776</i>

(a) Excludes 94 m.kWh purchased from Tully Falls Power Station in 1959-60 and 131.4 m.kWh in 1960-61.

Installed generator capacity of the five Regional Boards at 30th June, 1961, was:—Wide Bay-Burnett, 37,500 kW; Capricornia, 54,508 kW; Townsville, 41,815 kW; Mackay, 15,250 kW; Cairns, 86,820 kW; total, 235,893 kW.

**5. Creation of the Southern Electric Authority of Queensland.**—A major step in electrical progress was taken by the passing of the Southern Electric Authority of Queensland Act of 1952. This Act constituted the City Electric Light Co. Ltd. as a public authority to be known as the Southern Electric Authority of Queensland.

Two Government representatives are included on the Board of the Authority, whose establishment prepares the way for the complete amalgamation, in due course, of the electrical undertakings serving the south-eastern Queensland area of supply.

As from 1st July, 1954, the Southern Electric Authority acquired the Toowoomba Electric Light and Power Co. Ltd., thus bringing that company's area of supply under its control. The Southern Electric Authority is now responsible for the electrical supply and development of a consolidated area of 19,386 square miles and is also providing bulk supply to the Western Downs area centred on Dalby.

**6. Hydro-electricity.**—Behind the coastal plain of the Cairns-Ingham area is an extensive plateau with elevation ranging from 2,000 to 3,000 feet, although isolated peaks exceed 4,000 feet. The short coastal streams which rise on the plateau descend rapidly into deep gorges, which they have cut through the divide. With heavy monsoonal rainfall on their catchments and concentrated fall, these streams represent a considerable potential source of power, but storage, which can be provided in most cases, is essential to control the very variable flow.

There is a pronounced wet season from December to March, with a dry season from July to November. Average annual rainfall varies greatly with geographic location, being 178 inches at Deeral (midway between Cairns and Innisfail), but only 34 inches at Cashmere (120 miles south-west of Innisfail).

In 1935, a small hydro-electric power station was placed in service at Barron Falls, ten miles north-west of Cairns. The station comprises three 2,000 h.p. turbines, each driving a 1,320 kW generator, and with a hydraulic head of 410 feet. An output of 34 million kWh was attained during 1960–61, the station operating essentially as a run-of-river station, without any significant water storage capacity being available. Power is fed at 22 kV into the main network at Mareeba and Cairns.

The hydro-electric power scheme at Tully Falls was commissioned in September, 1957, with an initial plant installation of 36,000 kW. Work was completed during 1958–59 on the installation of a further two 18,000 kW sets, making a total installation of 72,000 kW. An output of 241 million kWh was obtained from this station during 1960–61. Power is transmitted to the load centres at Cairns and Innisfail by means of 132 kV transmission lines. Future automatic power plants upstream and downstream from Tully Falls consisting of two 7,500 kW sets under 405 feet head and one 5,400 kW set under 230 feet head are under consideration. The combined peak load for the three plants would then be 69,000 kW. Interconnexion of the Tully Scheme with the Townsville area, which is also being served by a thermal station, was completed in February, 1958, by the provision of a 160 mile double circuit 132 kV transmission line. On present estimates, power from the completed Tully Scheme will be sufficient to supply the interconnected area until 1963, when additional power will be required.

A new peak load power station is under construction at Barron Falls to provide a firm (dry year) output of 60,000 kW at 25 per cent. load factor (i.e. firm output of 131 million kWh per annum). This scheme will ensure an adequate supply of power to the Cairns and Townsville areas until 1967. The completed scheme will provide for an underground power station below the Barron Falls containing two 30,000 kW Francis turbines, operating under a head of 920 feet.

Other major schemes which are currently being investigated include North Johnstone-Russell Rivers (32,000 kW); Beatrice-North Johnstone Rivers (9,000 kW); South Johnstone River (25,000 kW); Herbert River (90,000 kW).

In the Townsville Region, the Commission, acting on behalf of the Burdekin River Authority, investigated the proposed hydro-electric development of the Burdekin. The Scheme envisaged a power plant immediately below the Burdekin Falls Dam to operate under an average head of 225 feet.

In relation to other projects, the Scheme is not as favourable economically as a power production project alone, but as a joint power production, irrigation, and flood mitigation scheme, it has considerable potentialities. An estimated output of 80,000 kW at 50 per cent. load factor would be available.

The State Electricity Commission, in conjunction with other Government Departments, is carrying out an extensive investigation into the development of hydro-electric resources. It is estimated that full development of the hydro-electric potential of North Queensland would provide the equivalent of over 300,000 kW of power at 50 per cent. load factor or approximately 1,300 million kWh a year.

A number of small hydro-electric projects are being investigated in other parts of the State. On the Broken River near Eungella (50 miles west of Mackay), a site exists for the establishment of a peak load hydro-electric power station, and this is being examined. The construction, in the future, of a major dam on the Dawson River at Nathan Gorge (near Cracow) in the Capricornia Region for irrigation purposes, would permit the installation of a small hydro-electric power station at this site if the power produced could be economically absorbed. A plant of 3,200 kW capacity has been installed to utilize the outflow from Somerset Dam on the Stanley River a few miles above its confluence with the Brisbane River.

7. New Capacity.—(i) *Regions.* To provide for development of the electric power resources in the regions, the State Electricity Commission formulated a ten-year programme divided into two five-year periods. In the first, it was planned to erect main transmission systems to connect existing power stations located within the regions and supplement generating capacity by the construction of new stations. Work on this section of the plan in the original Regional Board areas is now complete. In the second, the transmission system will be extended to more sparsely settled areas, the ultimate purpose being the provision of "ring" transmission lines throughout each region and interconnexion between the regions.

The following new generating stations were commissioned:—Wide Bay (Burnett Region) of which 15,000 kW was placed in service during September, 1951, and 7,500 kW in 1954, while a further set of 15,000 kW was installed in 1957; Rockhampton (Capricornia Region) of which 22,500 kW was placed in service during September, 1952, a further 15,000 kW in May, 1956, and a further 15,000 kW in December, 1958; and Townsville (Townsville Region) of which 22,500 kW was commissioned in July, 1953, and a further 15,000 kW in January, 1956. Each of these stations is to have an ultimate installed capacity of 52,500 kW and be steam-operated. In the Cairns Region, the Tully Falls Hydro-electric Power Station has been completed with 72,000 kW installed capacity.

The Tully Falls Scheme (*see* para. 6, p. 236) was planned to link with the Townsville Regional Electricity Board's system for the purpose of marginal supply, and this interconnexion was completed by the close of 1957. Preliminary work has commenced on the construction of a further hydro-electric scheme on the Barron River which should be completed by June, 1963, and will add 60,000 kW to the available hydro-electric generation capacity in the area. The first stage of the Scheme's development is estimated to cost £5,850,000, and, initially, full use will be made of available storage capacity at Tinaroo Falls Dam, thus enabling construction of a £5,000,000 storage dam on Flaggy Creek to be postponed for a number of years.

At Mackay, where supply was first given in 1924, a Regional Electricity Board has now been constituted and a 66 kV transmission line to Proserpine has been erected. The generating capacity of the station under the control of this Regional Board is 12,500 kW, and a further 3,000 kW of diesel plant is being installed. To supplement this output a transmission line from the Townsville Region is being erected. At Bowen, the Town Council, which established the service in 1952, transferred control of its area to the Townsville Regional Electricity Board, and transmitted supply is provided by a 66 kV

transmission line. During 1935, a small (3,800 kW) power house—Australia's first underground hydro station—was placed in service at Barron Falls near Cairns. When the Cairns Regional Board was established during 1946, operation of the station passed to the Board's control and now comprises part of its generating plant.

(ii) *Western Queensland.* In western Queensland, where a number of small isolated generating stations supply power to some of the larger towns, the Commission evolved a plan to increase and modernize existing capacity. It involved installation of small internal combustion units ranging in size from 100 kW to 600 kW according to the load likely to be experienced, and conversion from direct to alternating current supply. The Government has assisted the scheme by subsidy—a feature of electrical development in Queensland. Assistance provided for regional electrical development comprises subsidies of up to one-third of capital cost on annual loan charges, with special subsidies of up to 50 per cent. for authorities in the larger towns outside the Regions.

In addition to improving supplies to the larger western towns, a scheme was devised for electricity supplies for smaller towns in the western districts, where consumers range from 50 to 200. Subsidies of 65 and 60 per cent. apply in those cases where the number of consumers supplied is less than 100 and 200, respectively. This plan has been implemented, and at 30th June, 1961, 30 townships in western Queensland had been provided with electricity. The power is supplied by small oil driven generating sets with automatic controls which can be run with a minimum of operating attendance. In addition, investigations of the possibility of supply have been carried out at a number of other small centres.

Coal-burning gas producers have been successfully commissioned for public electricity supply purposes at Longreach, Clermont, Blackall and Barcaldine and further extension of their use in western Queensland is predicted, as lower tariffs and more efficient production of electricity should follow their use.

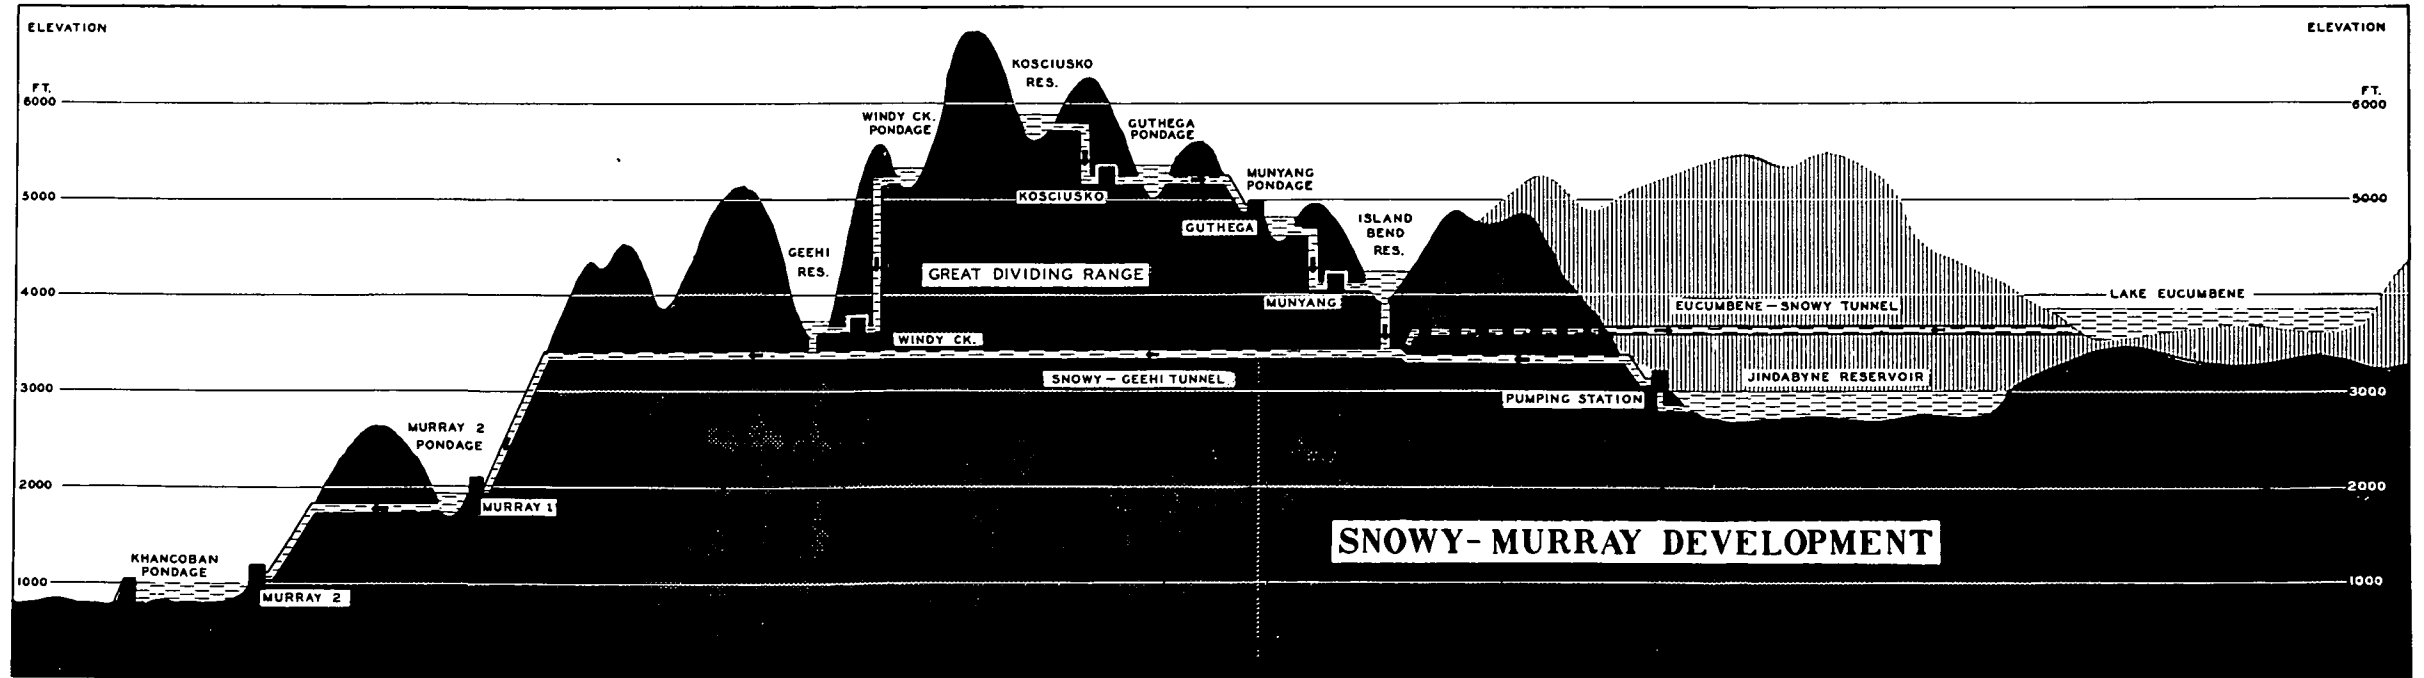

(iii) *South-eastern Queensland.* To increase the availability of electric power in the south-eastern area of the State, the two major generating authorities, in conjunction with the Commission, have power station projects under construction which are designed to place in service, by 1968, new generating units totalling 400,000 kW. The Southern Electricity Authority is continuing the development of the station known as Bulimba "B" on a site adjacent to Bulimba "A"; 120,000 kW had been installed to 30th June, 1961, and the ultimate capacity may reach 180,000 kW. At Tennyson in the Brisbane area, the Brisbane City Council has constructed a new power station with an initial capacity of 60,000 kW which may be increased ultimately to 180,000 kW. At 30th June, 1961, generating plant of 120,000 kW was in service at this station. To supplement capacity pending completion of these projects, "packaged" generating units totalling 20,000 kW were obtained from overseas and commissioned early in 1953, one 10,000 kW set having been installed at Tennyson and another 10,000 kW set at Abermain near Ipswich.

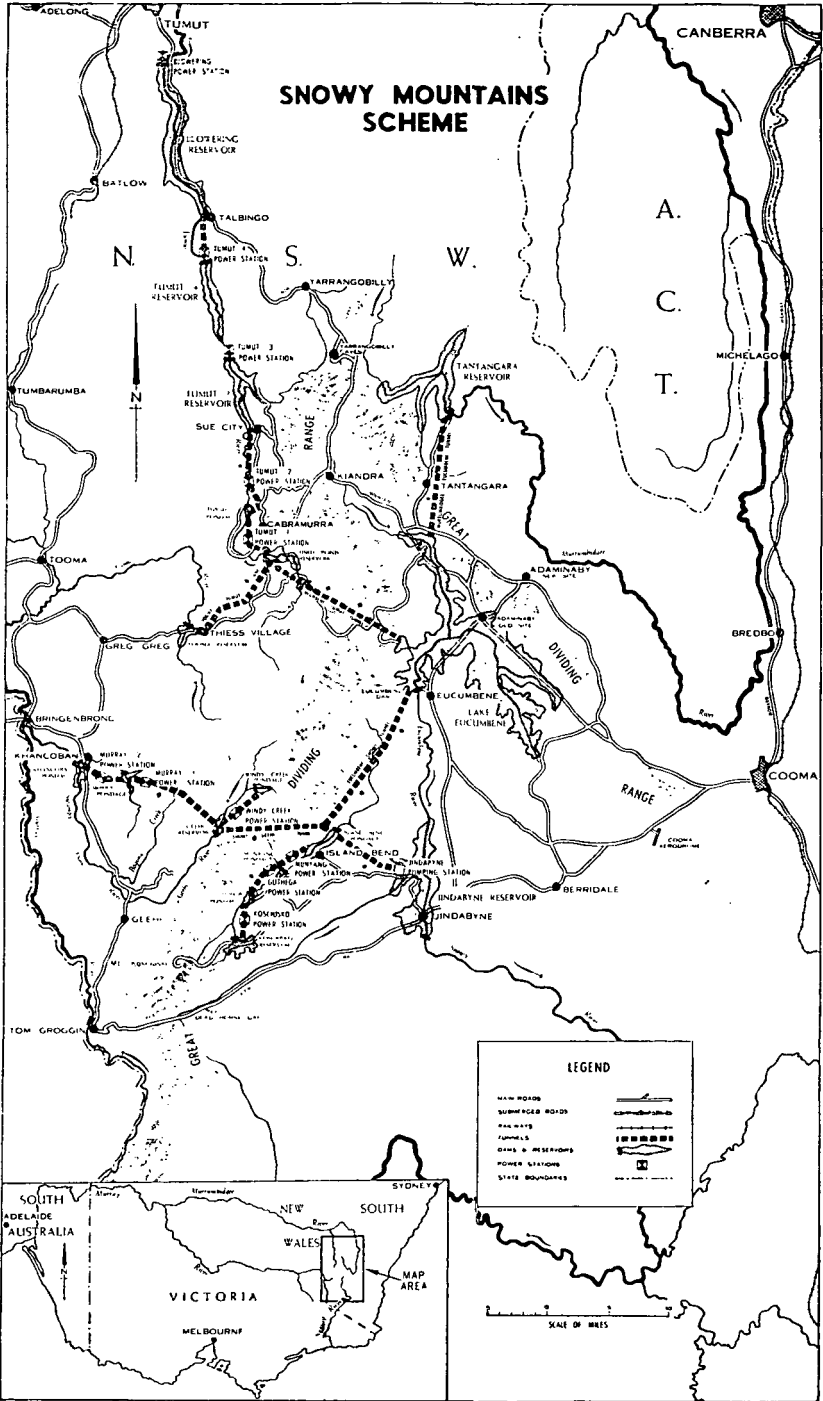

The power stations of the two major generating authorities at New Farm and Bulimba are interconnected at 33 kV.

8. *Future Development.*—The development required to meet future demands for electricity has been the subject of detailed investigation by a firm of oversea consultants in conjunction with the Commission, and the Queensland Government has now given its approval to recommendations providing for the construction of two new major power stations on the coalfields of central and southern Queensland respectively, together with a general plan of development for those parts of the State to meet requirements until 1970. The general plan of development incorporating these works is anticipated to cost approximately £159 million.

#### § 4. South Australia.

1. *General.*—An account of the companies generating electric power in South Australia prior to the establishment of the Adelaide Electric Supply Co. Ltd., and describing the development of that company's activities, was given in Official Year Book No. 39. Also included in the account was some reference to the early measures of public control over electricity supply in South Australia and the extent to which they were applied, and also to the inquiries into the activities of the Adelaide Electric Supply Co. Ltd. in 1932 and 1935.

Following upon an inquiry instituted by the Government in 1943, relative to measures for increasing electricity supply to the metropolitan area and country districts, the Electricity Act 1943 was passed which, *inter alia*, established the South Australian Electricity Commission. However, until the State assumed full responsibility for the supply of electric power, this body was not able to do much more than exercise the formal functions conferred on it by the Act.

2. **The Electricity Trust of South Australia.**—Early in 1946, legislation was passed transferring the assets of the Adelaide Electric Supply Co. Ltd. to the newly formed public authority, the Electricity Trust of South Australia, which became responsible for unification and co-ordination of the major portion of the State's electricity supply. This legislation provided that the Trust should take over the powers vested in the South Australian Electricity Commission under the 1943 Act, which, after establishment of the Trust, ceased to exist. In addition to the powers specified in the Adelaide Electric Supply Company's Acts 1897-1931, the Trust may, *inter alia*, supply electricity direct to consumers within a district or municipality with the approval of the local authority, and by agreement with other organizations which generate or supply electricity, arrange to inter-connect the mains of the Trust with those of other organizations, and give or receive supplies of electricity in bulk.

3. **Capacity and Production.**—There are three main categories of organizations generating electric power in South Australia, namely:—(a) Governmental, which include the Electricity Trust; (b) Local Authorities, e.g., municipal and district councils, and Renmark Irrigation Trust; and (c) other, including individuals and firms primarily engaged in generating power for sale, firms generating power primarily for their own use but supplying outside consumers, and firms generating power solely for their own use.

In 1959-60, total installed capacity in South Australia was 457,469 kW, and electricity generated totalled 1,864 million kWh.

Of the total installed capacity, the Electricity Trust of South Australia operated plant with a capacity of 424,600 kW. It is thus the most important authority supplying electricity in the State. There were approximately 291,000 ultimate consumers of electricity in the State, of whom 268,193 were supplied directly by the Trust and approximately 10,000 supplied indirectly by the Trust (i.e. through bulk supply). Its major steam stations were Osborne "A" (64,000 kW), Osborne "B" (180,000 kW), and Port Augusta Playford "A" (90,000 kW) and Playford "B" (60,000 kW), the balance of the capacity controlled consisting of house sets and regional stations at Port Lincoln and Mount Gambier, where the Trust operates steam power stations of 5,000 kW and 16,800 kW capacity respectively, the former burning fuel oil and the latter either wood waste or fuel oil.

No hydro-electric potential exists in South Australia. Steam generating units comprise 96 per cent. of installed capacity and the balance is internal combustion equipment. Until recently, all fuel consumed in the thermal stations was obtained from sources outside the State, and at times power restrictions were necessary owing to the inadequacy of supplies.

4. **Leigh Creek and other New Capacity.**—With a view to reducing the dependence on external sources of fuel, steps have been taken to produce local coal and to install plant to use it. Fairly extensive deposits of low-grade sub-bituminous coal are obtainable at Leigh Creek, about 360 miles north of Adelaide. Under the Electricity Trust of South Australia Act Amendment Act 1946, the Trust was given authority to develop Leigh Creek coal for use in its own undertakings and also for sale to other consumers. Production from the Leigh Creek field commenced in 1944, and in the year ended 30th June, 1960, 737,468 tons of coal were produced, practically all of which was used by the electricity undertaking.

In order to cope with the rapidly increasing demand for power, the Electricity Trust is constructing a second power station at Port Augusta, known as Playford "B". This station will have a capacity of 240,000 kW, making the combined capacity at Port Augusta 330,000 kW. A 60,000 kW turbo-alternator was commissioned in March, 1961, and the station is scheduled for completion about 1964. Leigh Creek coal will be used exclusively. The power station will be interconnected with the metropolitan area by two 275 kV transmission lines.

Consideration is now being given to the future establishment of some pumped-storage hydro plant, as being possibly the most economic way of handling the peak loads of the system.

## § 5. Western Australia.

1. **General.**—Electrical undertakings in Perth and Fremantle formerly owned by the Perth City Council, the Western Australian Government Electricity Supply, the Fremantle Municipal Tramways and Electric Lighting Board and other metropolitan, municipal and road board supply authorities have been taken over by the State Electricity Commission of Western Australia. For information on the early history of electricity supply in the metropolitan area, see Official Year Book No. 39, page 1189.

2. **Metropolitan Undertaking.**—Statistics relating to activities of the Metropolitan undertaking are shown in the following comparative table.

## WESTERN AUSTRALIA: METROPOLITAN UNDERTAKING.

(Including Bunbury Power Station.)

Particulars.	1938-39.	1959-60.	1960-61.
Plant capacity .. .. . kW	57,000	245,000	275,000
Maximum load .. .. . kW	33,000	149,000	167,000
Units generated .. .. . Million kWh	137	654	755
Fuel used per unit (kWh) generated .. .. . lb.	2.77	1.51	1.49
Coal used .. .. . tons	168,722	442,211	352,045

3. **Kalgoorlie.**—In Kalgoorlie, the Municipal Council supplies approximately 3,800 consumers with either direct or alternating current. A diesel station of 1,825 kW generating capacity provides direct current to the limit of its capacity. Alternating current is purchased from Kalgoorlie Power Corporation and retailed by the Council to some consumers, while portion is passed through a rectifier to convert it to direct current. Primarily established to supply power to the gold mines, the Kalgoorlie Electric Power and Lighting Corporation operates a steam station of 11,000 kW and maintains a 22 kV line of 21 miles to the Celebration mine. Alternating current is also supplied to about 1,400 consumers. The Corporation's undertaking generates approximately 35 million kWh per annum and boilers are fired by Collie coal.

4. **General Pattern of Electricity Supply.**—The State Electricity Commission gives central power station supply to the metropolitan area and an area of approximately 25,000 square miles defined in the report which formed a basis for the South West Power Scheme Act.

These areas include the more highly developed rural districts with a greater population density, which can more readily be connected to a central power station system.

In the other areas of the State, towns are supplied by the local authority or by a concessionaire operating under an agreement with the local authority and the Commission. Power stations operated under these conditions are exclusively diesel of varying sizes, with the exception of Kalgoorlie which is separately mentioned.

5. **The State Electricity Commission of Western Australia.**—(i) *Origin and Aims.* In order to ensure an organized and co-ordinated future growth of electricity generation and distribution throughout the State, the Government introduced a Bill in 1945 to establish the State Electricity Commission, which, together with an Electricity Bill, became law early in 1946. Under these Acts, the Commission was given power, *inter alia*, to secure the ultimate co-ordination of all State or other electrical undertakings in the State, to construct and operate power stations and transmission lines, and to purchase as a going concern and carry on the undertaking of any supply authority. Under the Electricity Act, which should be read in conjunction with, and is subject to, the State Electricity Commission Act, no person or organization is permitted to construct or extend an electricity supply undertaking without consent from the Commission. Local authorities are empowered to operate and construct power stations and other works associated with the supply of electricity, provided that authority is first obtained from the Commission and any proposals are not inconsistent with the Commission's plans.

(ii) *New Projects.* Since its inception in 1946, the Commission has made the provision of an adequate reserve of generating plant its primary object. With the commissioning of the first unit at South Fremantle Power Station in May, 1951, the lag caused by shortages during the war and early post-war years was overcome. The system then developed rapidly to keep pace with the expansion of industry and housing. Generating plant has been quadrupled in the past fourteen years. The three major power stations have been interconnected with the South West Power Station at Collie enabling the most economical units to be used as a base load station. Continuous development of the transmission and distribution system is being undertaken to keep pace with the growth in consumer demand, at present about 8 per cent. per annum.

Tenders have closed for two 60,000 kW turbo alternators, boilers and buildings for the first section of a new station to be constructed at Muja near Collie, adjacent to a source of open-cut coal. The first unit is planned to be in service in the latter part of 1965.

6. *South-west Development.*—At the request of the Government, the Electricity Advisory Committee, in 1945, submitted a report recommending, among other things, that a national power scheme for the south-west be proceeded with. The plan provided for acquisition of the existing Collie Power Station and installation of additional generating capacity, construction of a power station at Bunbury and inter-connexion of the south-west scheme with the metropolitan system. On 12th October, 1946, the State Electricity Commission acquired the Collie Power Station, which prior to 1946 was owned and operated by the Collie Power Company Limited. At the date of acquisition, the Station's installed capacity was 5,000 kW, comprising two steam units, but this was increased to 12,500 kW in 1952.

Since 1950, the Commission has acquired a number of electrical undertakings from municipal bodies and private organizations in the south-west area and is proceeding with arrangements for the purchase of others. In August, 1951, the first portion of the South-West Power Scheme was officially opened at Collie and many of the south-west towns have now been connected by transmission line to the Collie Power Station. When completed, a system of power lines will reticulate electricity over an area of approximately 25,000 square miles. The fourth and final 30,000 kW unit at Bunbury Power Station was commissioned during July, 1961. This completes this station to the planned capacity of 120,000 kW. It is the most economical, and is used as the base load, station of the system.

Diesel stations of 9,400 kW capacity at Albany serve the towns of Albany, Denmark, and Mount Barker in the extreme south of the State.

## § 6. Tasmania.

1. *General.*—A considerable part of the water catchment in Tasmania is at high level, with a substantial natural storage available, and this has made it possible to produce energy at lower cost than elsewhere in Australia, or in most other countries. Another factor contributing to the low costs is that rainfall is distributed fairly evenly throughout the year, with comparatively small yearly variations. The cheap power has led to the establishment in Tasmania of several large electro-chemical works with high load factor, and as a consequence the system load factor is also very high (at present 66.8 per cent.).

For information on hydro-electric development in Tasmania prior to the establishment of the Hydro-Electric Commission in 1930, see Official Year Book No. 39, pages 1192-3.

2. *The Hydro-Electric Commission.*—(i) *Present System.* In 1929, the Government passed the Hydro-Electric Commission Act, under which was established the Hydro-Electric Commission and which vests in the Commission, with some minor exceptions, the right to use the waters of the State of Tasmania and authorizes it to develop and reticulate electric power for all purposes. In 1930, this corporate body took over the State hydro-electric undertaking and the business of the Hydro-Electric Department.

The first project undertaken by the Commission was the Shannon Power Development which utilizes 258 feet of the difference in level between the Great Lake (Miena Dam) and Waddamana forebay. A small earthen dam diverts the outflow from the Great Lake through 2½ miles of canal and then by two pipelines to the Shannon Power Station, where 10,500 kW was added to the system in 1934. After passing through Shannon Power Station, the water discharges into the Waddamana canals to be used again at the Waddamana power stations.

In 1933, the Tarraleah Power Development was commenced. In this scheme, the waters of the River Derwent are picked up near Butler's Gorge by a canal and conveyed 14 miles to the pipeline forebay 982 feet above the power station on the Nive River, where three 15,000 kW generators were placed in service in 1938. Shortly afterwards, two more 15,000 kW units were added, and a sixth machine installed in 1951 brought the total installed capacity at Tarraleah Power Station to 90,000 kW. Storage is provided at Lake St. Clair and at Lake King William, an artificial lake created by the 200-ft. high Clark Dam across the Derwent at Butler's Gorge. In the Butler's Gorge Power Station at the foot of the dam, a single 12,200 kW generator was installed in 1951. To increase the security of the system and to permit variable seasonal loading of Tarraleah Station, a second canal from Clark Dam to Tarraleah was completed in 1955.

Early in 1939, it was decided to make full use of the Great Lake storage by increasing the peak capacity at Waddamana. War conditions impeded progress, but by 1945, two 12,000 kW generators had been installed in a new power station, Waddamana "B", adjacent to the original station Waddamana "A". A third unit installed in 1946 and a fourth in 1949 brought the total to 48,000 kW. To enable a full peak capacity to be maintained at both Waddamana stations a duplicate of the original Waddamana Canal was constructed during 1947-48.

Between 1930 and 1948, the generating capacity of the system was increased by 121,500 kW, but the demand for power continued to increase rapidly and it was obvious that a greatly accelerated construction programme would have to be undertaken. Construction of the Tungatinah Power Development was started in 1948 and the Trevallyn Power Development in 1949.

The Trevallyn Power Development, the first constructed by the Commission outside the Central Plateau region, was undertaken primarily to meet the requirements of the aluminium industry. The waters of the South Esk River are diverted through two miles of tunnel and pipeline to a power station on the Tamar River near Launceston, where four generators, with a total installed capacity of 80,000 kW, were brought into operation before the end of 1955.

The Tungatinah Scheme draws water from three separate catchment areas located on the Central Plateau between the Great Lake (Shannon-Waddamana) and Lake St. Clair (Butler's Gorge-Tarraleah) catchments and control of practically the whole run-off from the Central Plateau has now been effected.

The principal catchment utilized by the Tungatinah Scheme is drained by the Nive River. A 120-ft. high dam at Pine Tier diverts the waters of the Nive through 6½ miles of canal system to the first of a chain of four artificial lakes, created by dams constructed across the outlets from natural marshes and linked by large open cuts. From the southernmost lake, a tunnel and then five steel pipelines lead to the five 25,000 kW generators in Tungatinah Power Station, 1,005 feet below on the Nive River just upstream from Tarraleah Station on the opposite bank of the river. Power was first generated at Tungatinah in mid-1953 with a capacity of 125,000 kW. Water from the smaller Clarence River catchment is brought into one of the lakes in the Tungatinah system by means of a woodstave pipeline 5½ miles in length and the third catchment area utilized is the Lake Echo-Dee River catchment. Regulation of this catchment has been achieved by construction of a dam at Lake Echo to provide the main storage reservoir for the Tungatinah Scheme, construction of the Lake Echo Power Station (one 32,400 kW generator) to utilize 568 feet of the difference in level between Lake Echo and Dee Lagoon, and the diversion of water from Dee Lagoon through 2 miles of tunnel to the main Tungatinah system.

The Wayatinah Power Development, started in 1952, comprises two power stations and headworks to utilize water which is, in the main, already regulated and which has been used several times. The volume of water available is much larger and the head smaller than in the case of other major stations. All the water which passes through Tarraleah or Tungatinah Stations is diverted, by a weir across the Nive River below Tarraleah, through 4 miles of tunnel and then steel pipes to Liapootah Power Station, completed in 1960, with a capacity of 83,700 kW.

A dam across the River Derwent, just below its junction with the Nive, has created a lake into which flows all the water from the Liapootah Station plus water collected by the Derwent below Clark Dam. A mile of tunnel and a mile of pipeline leads the water to Wayatinah Power Station on the Derwent below its junction with the Florentine River. This Power Station, completed in 1957, has an installed capacity of 38,250 kW.

The total installed capacity of the present system in January, 1962, was as follows.

Power Station.	Installed Capacity of Alternators. kW
Shannon .. .. .	10,500
Waddamana " A " .. .. .	49,000
Waddamana " B " .. .. .	48,000
Tarraleah .. .. .	90,000
Butler's Gorge .. .. .	12,200
Trevallyn .. .. .	80,000
Tungatinah .. .. .	125,000
Lake Echo .. .. .	32,400
Liapootah .. .. .	83,700
Wayatinah .. .. .	38,250
<b>Total .. .. .</b>	<b>(a) 569,050</b>
King Island (Diesel Plant) .. .. .	390

(a) In addition, Catagunya, 48,000 kW, is to operate from July or August, 1962.

(ii) *New Capacity.* Four miles below Wayatinah, a diversion dam is being constructed at Catagunya, where a power station, designed to add a further 48,000 kW to the system, is scheduled for completion by 1962. The dam is designed as a pre-stressed concrete structure, 140 feet in height, and is notable as being only the second of its type and the largest yet undertaken by this technique anywhere in the world. The Hydro-Electric Commission is engaged in a progressive construction programme comprising the completion of the Catagunya and the Great Lake Power Developments. In the nine years between June, 1951, and June, 1960, the installed capacity of the system has grown from 184,500 kW to 569,050 kW. Approved construction will bring this total to 917,000 kW by 1966. Investigations are continuing into the very considerable resources as yet untouched, and it is estimated that the potential which can be developed economically should ultimately harness 2,400,000 kW to the system.

The Great Lake Power Development, now in the early stages of construction, is the most recent project to be undertaken by the Commission. In this scheme, the water of the Great Lake, by its diversion in the direction of the most precipitous fall, will be used to much greater advantage than at present. Eventually reaching the South Esk River, it will be used again through the generators of the Trevallyn Power Station.

The works will consist of an intake at the Great Lake, a four mile headrace tunnel through the Western Tiers, one mile of surface pipeline on the face of the Tiers, a vertical shaft leading to the power station some 500 feet underground, a two and a half mile tailrace tunnel discharging into a canal, thence through a regulating pond into a channel flowing into the Lake River, a tributary of the South Esk River.

In this development, the power will be generated by the fall of water through a vertical distance of 2,750 feet to an underground power station where generators of 300,000 kW capacity will be installed. The station will be known as Poatina Power Station. A further section of the scheme includes the provision of a dam at Arthur Lakes to increase greatly the storage of the system, and a pumping station and a conduit discharging into the Great Lake so that water from this catchment may be utilized through the Poatina Power Station. Below Catagunya on the River Derwent, a new three-stage development has been sanctioned for construction. With dams and power stations named Repulse, Cluny and Meadowbanks, the completion of this project by 1968 will add a further 85,000 kW to the system, and it will also bring to an end the exploitation of the power potential of the River Derwent and its tributaries.

There is every indication that the demand for power in Tasmania will continue to increase. The Commission is conducting extensive surveys and investigation of other schemes with a view to further construction after the completion of the present programme.

3. **Power Usage by Secondary Industry.**—The abundant and comparatively cheap supplies of electricity and other natural resources have attracted to Tasmania a number of important secondary industries for which energy costs constitute a significant proportion of the total cost of production. Some of the more important organizations and their continuous power demands when plant is operating are as follows:—Electrolytic Zinc Company of Australasia Ltd., 85,000 kW at Risdon and 4,100 kW at Rosebery; Australian Aluminium Production Commission, 34,000 kW; Australian Newsprint Mills Ltd., 21,500 kW; Associated Pulp and Paper Mills Ltd., 17,200 kW; Australian Commonwealth Carbide Company Ltd., 7,850 kW; Mt. Lyell Mining and Railway Company Ltd., 5,500 kW; and Goliath Portland Cement Company Ltd., 3,600 kW.

In addition to the above, the Broken Hill Pty. Co. is setting up a plant at Bell Bay on the Tamar, for the manufacture of ferro-manganese. This is to be completed early in 1962, with a power demand of the order of 12,000 kW. A new paper pulp mill is being constructed by Australian Paper Manufacturers Ltd., at Geeveston, south of Hobart, and this also is to be in operation in 1962. There are expectations of expansion by, and hence of increased supply to, some of these organizations, and of new supplies to other industrial undertakings contemplating establishment in the State.

## § 7. Commonwealth Territories.

1. **Internal Territories.**—(i) *General.* The electricity supply undertakings at Canberra in the Australian Capital Territory and at Darwin, Katherine, Tennant Creek and Alice Springs in the Northern Territory are operated by the Commonwealth Government.

(ii) *Australian Capital Territory.* The supply authority is the Canberra Electric Supply. Supply was first established at Canberra during 1915 and was met from local steam plant. Connexion to the New South Wales interconnected system was effected in 1929, and all requirements are now taken from this system. Locally owned plant consists of diesel alternators of 4,000 kW, which are retained as a standby for essential supplies, and steam plant of 5,100 kW, which is in retirement.

Total population served with electricity at 30th June, 1961, was 58,000 and the total number of ultimate consumers was 17,279.

During the year 1960–61, the bulk electricity purchased was 142,580,000 kWh and the maximum demand incurred was 38,475 kVA.

(iii) *Northern Territory.* At Darwin, supply was established by the Town Council in October, 1934, but during April, 1937, responsibility for generation and supply was transferred to the Northern Territory Administration. The power station is equipped with diesel generating plant of 6,770 kW capacity, two new 970 kW diesel sets being installed in 1955–56 and an additional 1,380 kW diesel set during 1957. At Alice Springs, the power station is equipped with diesel generating plant of 2,266 kW capacity. A 520 kW set was installed in 1957–58 and an additional 865 kW set in June, 1960.

At Katherine, the power station is equipped with a small diesel generating plant of 450 kW capacity. The diesel station at Tennant Creek was closed down in 1957, supply for the township being purchased in bulk from Peko Mines No Liability.

The total number of ultimate consumers served in the Territory at 30th June, 1961, was 4,919.

In 1956–57, the Department of Works selected a site on the water front of Darwin for a 15,000 kW steam driven generating set. This steam station is being designed to supply Darwin and suburbs when the present diesel station has reached its maximum economical capacity. Construction work is planned to be completed during 1962. A 66 kV transmission system is being built.

2. **External Territories—Papua and New Guinea.**—Responsibility for the operation and establishment of the electrical undertakings in Papua and New Guinea is at present vested in the Administration of the Territory of Papua and New Guinea, whose headquarters are located at Port Moresby. It is anticipated that this responsibility will shortly be vested in an Electricity Commission which will be incorporated under an ordinance of the Territory. The total generating capacity of the diesel engine driven generating sets amounts to 12,022 kW and of the hydro operated sets to 5,930 kW. The generating capacity of the power plants at the main centres is—Port Moresby, diesel 2,303 kW, hydro, 5,500 kW; Rabaul, 2,960 kW;

Lae, 2,640 kW; Madang, 890 kW; Samarai, 300 kW; Kavieng, 194 kW; Wewak, 445 kW; Lorengau, 60 kW; Goroka, hydro, 400 kW; Aiyura, hydro, 30 kW; and 2,230 kW distributed among 96 outstations where generating capacity is between 5 kW and 50 kW. The townships of Wau and Bulolo are supplied by power generated by the Bulolo Gold Dredging Co., which operates a hydro-electric plant of 5,500 kW. Power produced in this plant is used mainly to supply the plywood mill and gold dredges at Bulolo.

The total number of ultimate consumers served in the Territory was 8,357 in 1960-61.

There is a vast hydro-electric potential in New Guinea and it has been estimated at 15,000,000 kW, but, because of the island's location, absence of large load centres and lack of industrialization, there has been very little development.

In 1950, the Commonwealth Government joined with the British Aluminium Co. Ltd. of London to locate and develop large capacity hydro-electric schemes in New Guinea. A new company was formed, known as New Guinea Resources Prospecting Co. Ltd., with a capital of £100,000. The Commonwealth Government held 51 per cent. of the shares and had a controlling interest on the board of five members. The Commonwealth Government later sold its interest to a company formed by Consolidated Zinc Pty. Ltd., and the British Aluminium Co. Ltd., both of London. This company is continuing investigations into the hydro-electric potential of the Purari River, this being considered in conjunction with the treatment of bauxite to be mined in the Gulf of Carpentaria.

The following hydro-electric schemes are now in operation. At Port Moresby, at a site two miles downstream from the Rouna Falls, a plant with an installed capacity of 5,500 kW is operating. Works are at present in hand to regulate the flow of the Laloki River to 180 cusecs, from a present minimum approximating 80 cusecs, by the erection of a dam on the Laloki River at a location known as Sirinumu, 9 miles upstream from the Rouna Falls. The design provides for a second stage in the dam height which will provide regulation to a minimum of 400 cusecs. Designs are at present being prepared for the construction of a second power station which will utilize the head available at the Rouna Falls and some 100 feet head in the rapids above the Falls. The plant proposed will be initially two units each of 6,000 kW and provision will be made for the installation of a further three units, giving a total capacity of 30,000 kW. At Aiyura, a 30 kW hydro-electric station for the Agricultural Experimental Station has been operating since August, 1956.

At Goroka, the plant installed consists of two 100 kW and one 200 kW units. This is the ultimate development at this site. Investigations are being made on other proposals within the area.

Investigations are advanced for a proposal to develop the potential available in the Upper Ramu River for a power supply to Lae, Goroka, Kainantu and Madang. It is proposed that the initial installation will consist of two 5,000 kW sets with provision for the installation of a further three 5,000 kW sets. Investigations are proceeding for a proposal to develop the potential of the Towanokoko and Pondo Rivers in the Bainings area of the Gazelle Peninsula to provide a supply to Rabaul and other settlements in the peninsula.

Stream gauging and other preliminary investigations for hydro-electric schemes have been carried out at Lae, Rabaul, Madang, Wewak and Highland Stations.

There are possibilities for major hydro-electric development in the following localities:—Rouna Falls (near Port Moresby), Upper Snake and Busu-Erap-Leron (near Lae), Upper Ramu (near Markham-Ramu divide—80 miles from Lae) and Hathor Gorge (on Purari River), with an estimated average power of 100,000 kW, 150,000 kW, 2 million kW, 250,000 kW, and 3 million kW respectively. These have estimated run-offs of 1,400, 6,000, 12,000, 1,000, and 75,000 cusecs respectively.

In an area of 150,000 square miles of the Eastern New Guinea mainland, the power potential has been estimated at 150 kW per square mile which compares favourably with potentials of 170 kW per square mile for Switzerland and 95 kW per square mile for Norway.

#### D. STATISTICAL SUMMARY, 1959-60.

The following table shows statistics for each State separately and for the six States combined for the year 1959-60 and relates to:—(i) the numbers and installed capacity of central electric generating stations, (ii) the values of production and output and the average numbers of persons employed in the generating side of the electricity supply industry and (iii) the amount of electricity generated and the number of ultimate consumers of electricity.

For further statistics of the electricity supply industry (years 1955-56 to 1959-60), see Chapter VI.—Manufacturing Industry.

## CENTRAL ELECTRIC STATIONS, 1959-60.

Year.		N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
<i>Generating Stations—</i>

<i>Installed Capacity of Generators—</i>								
Steam .. '000 kW		1,923	1,055	594	(a)	276	(a)	4,301
Hydro .. "		522	269	79	(a)	2	(a)	1,423
Internal combustion ..		80	43	30	(a)	62	(a)	229
<i>Total</i> .. ..		2,525	1,367	703	(a)	340	(a)	5,953
Persons employed(b)	No.	5,162	3,470	1,640	(a)	1,080	(a)	12,810
Value of output(c)	£'000	49,539	29,149	14,558	(a)	7,854	(a)	114,177
Value of production(d)	"	31,979	17,977	6,619	(a)	3,916	(a)	68,582
Electricity generated(e)								
million kWh		9,200	6,198	2,467	1,864	938	2,532	23,199
Ultimate consumers(f)	No.	1,142,520	889,487	400,600	291,000	155,000	117,266	2,995,873

(a) Not available for publication; included in the total for Australia. (b) Average employment in generating station, over whole year, including working proprietors. (c) Value, at generating station, of electricity produced plus certain earnings. (d) Value added in the process of generation. (e) Total generated including that generated by factories for their own use. (f) Approximate figures supplied by the electricity authority in each State. An "ultimate consumer" is a person, business, undertaking, etc., that has contracted to receive electric power from a public or private organization supplying this service. The number of ultimate consumers is not identical with the number of persons served with electricity because one ultimate consumer may represent three or four persons, e.g. in a household.

## CHAPTER VIII.

## WATER CONSERVATION AND IRRIGATION.

## A. RESOURCES, UTILIZATION AND NATIONAL AND INTERSTATE ASPECTS.

## § 1. Introduction.

Official Year Book No. 37, pages 1096-1141, contained a special article "The Conservation and Use of Water in Australia" prepared by Mr. U. R. Ellis. In subsequent issues, much of Mr. Ellis's article of a statistical nature has been advanced, as has the general information on the more important developments in this field, but for details of general, descriptive and historical matter reference should be made to the original article. Appended to the special article, pages 1140-41, was a bibliography of selected books, reports, papers, etc., dealing with the development of the water resources of Australia and their conservation.

For further details on geographical and climatic features determining the Australian water pattern, reference should be made to Chapter II.—Physiography; on water supply and sewerage in metropolitan areas, cities and towns to Chapter XIX.—Local Government; and on the generation of hydro-electric power to Chapter VII.—Electric Power Generation and Distribution, of this issue.

A series of maps showing the location of major dams and reservoirs and the various irrigation schemes operating in each of the States may be found on pages 259-65 of Official Year Book No. 46, and a map showing the extent of known artesian basins throughout Australia is shown on page 273 of this issue.

## § 2. Water Resources and their Utilization.

1. **Surface Supplies.**—Though river gaugings have been recorded over considerable periods in some parts of Australia, records elsewhere are intermittent, of short duration, or non-existent. At present, therefore, it is impossible to estimate, with any degree of reliability, the total average annual flow of Australian streams, but it would probably amount to only a small figure in comparison with the flow of rivers in other continents some examples of which, expressed as mean annual discharges in millions of acre feet, are: Nile, 72; Danube, 228; Amazon, 1,780; Volga, 148; Mississippi, 474; and the ten main rivers of the United States of America in the aggregate, 900.

2. **Major Dams and Reservoirs.**—The table below lists existing major dams and reservoirs, together with those under construction and those projected as at June, 1961. The list is confined to dams and reservoirs with a capacity of 100,000 acre feet or more. There are, in addition, many others of smaller capacity in Australia.

## MAJOR DAMS AND RESERVOIRS IN AUSTRALIA.

Name.	Location.	Capacity (Acre feet).	Height of Wall (Feet).	Remarks.
<b>EXISTING DAMS AND RESERVOIRS.</b>				
Eucumbene ..	Eucumbene River, New South Wales	3,500,000	381	Part of Snowy Mountains Hydro-electric Scheme.
Eildon .. ..	Upper Goulburn River, Victoria	2,750,000	260	Storage for irrigation and for the generation of electricity.
Hume .. ..	Murray River near Albury	2,500,000	142	Part of Murray River Scheme—storage for domestic, stock and irrigation purposes. Hydro-electric power also developed.
Menindee Storage Lakes	Darling River, near Menindee, New South Wales	2,000,000	..	Part of Darling River Water Conservation Scheme for irrigation and possible hydro-electric power generation.
Warragamba ..	Warragamba River, New South Wales	1,570,000	379	For Sydney water supply. Also provides for generation of hydro-electricity and flood mitigation

(a) Useful storage only.

MAJOR DAMS AND RESERVOIRS IN AUSTRALIA—*continued.*

Name.	Location.	Capacity (Acre feet).	Height of Wall (Feet).	Remarks.
<i>EXISTING DAMS AND RESERVOIRS—continued.</i>				
Miena .. ..	Great Lake, Tasmania	(a)984,500	40	Regulates water to Waddamana hydro-electric power station.
Burrinjuck .. ..	Murrumbidgee River, New South Wales	837,000	264	Storage for irrigation and production of hydro-electric power.
Somerset .. ..	Stanley River, Queensland	735,000	173	Brisbane-Ipswich water supply, flood mitigation and small hydro-electric power station.
Lake Victoria .. ..	Murray River near South Australian border, in New South Wales	551,700	..	Natural storage for irrigation in South Australia. Storage improved by construction of embankments and control regulators.
Lake Echo .. ..	Lake Echo, Tasmania	(a)412,200	60	Storage for Lake Echo and Tungatinah hydro-electric power stations.
Keepit .. ..	Namoi River, near Gunnedah, New South Wales	345,000	177	For rural water supplies and hydro-electricity generation.
Waranga .. ..	Goulburn River, Victoria	333,400	..	Irrigation storage.
Tinaroo Falls .. ..	Barron River, North Queensland	330,000	133	For irrigation purposes in the Mareeba-Dimbulah area.
Glenbawn .. ..	Hunter River, near Scone, New South Wales	293,000	251	Part of Hunter Valley conservation work, for irrigation and flood mitigation.
Rocklands .. ..	Gleng River, Victoria	272,000	..	Part of Wimmera-Mallee domestic and stock water supply system.
Clark .. ..	Derwent River, Tasmania	(a)253,400	200	Serves Tarraleah hydro-electric power station.
Wyangala .. ..	Lachlan River, New South Wales	(b)245,000	200	Storage for domestic, stock and irrigation purposes and for generation of hydro-electric power. ( <i>See also</i> under Dams and Reservoirs under Construction.)
Tantangara .. ..	Murrumbidgee River, New South Wales	(a)193,000	148	Part of Snowy Mountains Hydro-electric Scheme.
Avon .. ..	Avon River, New South Wales	173,800	232	Part of Sydney water supply.
G'nenmaggie .. ..	Gippsland, Victoria	154,300	100	Storage for irrigation.
Lake St. Clair .. ..	Central Highlands, Tasmania	(a)154,200	..	Improved natural storage for Tarraleah hydro-electric power station.
Wellington .. ..	Collie River, Western Australia	150,100	112	For supply of water to irrigation districts and to agricultural areas and country towns.
Lake Brewster .. ..	Lachlan River, near Hillston, New South Wales	123,900	..	Storage of rural water supplies for the lower Lachlan.
Cairn Curran .. ..	Loddon River, Victoria	120,600	..	Storage for irrigation.
Upper Yarra .. ..	Yarra River, Victoria	110,000	270	For Melbourne water supply.

## DAMS AND RESERVOIRS UNDER CONSTRUCTION.

Burrendong .. ..	Macquarie River, near Wellington, New South Wales	1,361,000	240	For rural water supplies, flood mitigation and possible hydro-electric power generation.
Wyangala .. ..	Lachlan River, New South Wales	1,000,000	280	Strengthening and enlarging of existing dam for increased water supply and hydro-electric power generation. ( <i>See also</i> under Existing Dams and Reservoirs.)
Eppalock .. ..	Campaspe River, near Heathcote, Victoria	250,000	150	To supplement supply to Bendigo and for irrigation.
Koombooloomba .. ..	Tully River, North Queensland	146,000	123	For hydro-electric and possibly irrigation purposes.
Serpentine .. ..	Serpentine River, Western Australia	143,500	171	For Perth water supply.

(a) Useful storage only.

(b) Temporary reduced level.

MAJOR DAMS AND RESERVOIRS IN AUSTRALIA—*continued.*

Name	Location.	Capacity. (Acre feet).	Height of Wall (Feet).	Remarks.
<b>DAMS AND RESERVOIRS PROJECTED.</b>				
Burdekin Falls ..	Burdekin River, North Queensland	6,584,000	150	For generation of hydro-electric power, irrigation and flood mitigation.
Chowilla ..	Murray River, in South Australia near Victorian border	4,650,000	63	Regulation of the lower Murray River.
Ord River ..	Near Wyndham, Western Australia	3,500,900	200	For irrigation, generation of hydro-electric power and flood mitigation. (Additional 6,000,000 acre-feet flood control proposed.)
Blowering ..	Tumut River, New South Wales	846,000	280	For regulation of discharges from stations of Snowy Mountains Hydro-electric Scheme, primarily for irrigation but also for power generation.
Jindabyne ..	Snowy River, New South Wales	560,000	210	Part of Snowy Mountains Hydro-electric Scheme.
Warkworth ..	Wollombi Brook, Hunter Valley, New South Wales	406,000	130	Flood mitigation and irrigation dam for the Hunter Valley.
Arthur Lakes ..	Source of Lake River near Great Lake, Tasmania	(a)339,000	50	Part of Great Lake hydro-electric power development.
Tumut 4 ..	Tumut River, New South Wales	138,000	300	Part of Snowy Mountains Hydro-electric Scheme.
Tumut 3 ..	Tumut River, New South Wales	120,000	240	Part of Snowy Mountains Hydro-electric Scheme.

(a) Useful storage only.

3. Irrigation.—(i) *History.* For some brief remarks on the history of irrigation in Australia referring to the efforts of the Chaffey brothers and to the Victorian Irrigation Act in 1886 see issues of the Official Year Book prior to No. 39. Trends in irrigation practice in more recent years were described in Official Year Book No. 37, page 1099.

(ii) *Extent and Nature of Irrigated Culture.* About half of Australia's irrigated acreage is in Victoria, and about two-thirds is situated along the Murray and its tributaries (including the Murrumbidgee) in the three States of New South Wales, Victoria and South Australia. In those areas served by the Murray and its tributaries, irrigation water is used extensively for vines, orchards, pastures, fodder, and for domestic and stock purposes. Approximately forty per cent. of Queensland's irrigated acreage is devoted to sugar cane. Western Australia's small irrigated acreage is confined to areas in the south-west where vegetables, orchards, fodder, and pastures are served. Large scale irrigation schemes have not been developed in Tasmania or the Northern Territory, although investigations are at present being carried out in the Northern Territory to determine the availability of irrigation water for rice production.

The following table shows the area of land irrigated in each State during the years 1956-57 to 1960-61.

AREA OF LAND IRRIGATED.

(Acres.)

Season.	N.S.W. (a)	Vic. (b)	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(iii) *Research.* Comprehensive programmes of research and investigation are being pursued by State water and agricultural authorities and the Commonwealth Scientific and Industrial Research Organization, often in collaboration. Special attention is being given to the following:—high water tables due to the application of water; surface accumulation of salt and other soil changes associated with irrigation; methods of applying water efficiently; soil treatments to improve the physical condition of irrigated heavy clay soils; the utilization of irrigated pastures by stock; growth problems affecting plants and trees; the prevention of evaporation from water storages; and the potability of saline waters for stock.

The Commonwealth Scientific and Industrial Research Organization maintains the following research stations:—Merbein (Victoria)—irrigation problems with particular reference to ground-water, hydrology and viticulture; Griffith (New South Wales)—irrigation problems with particular reference to citrus and stone fruits and to vegetables; Deniliquin (New South Wales)—irrigated pastures; and the Kimberley Research Station (Western Australia)—tropical crops and pastures. In the maintenance of Merbein and Griffith stations, the Commonwealth is assisted, financially and otherwise, by the New South Wales Water Conservation and Irrigation Commission, by the Dried Fruits Export Control Board and by private organizations.

The Soils Division of the Organization has made detailed surveys of more than a million acres since 1927, with less detailed reconnaissance surveys over many millions of acres. The Division works closely with State authorities. The keynote of soil investigations is the relationship between soil and land use, and there is an increasing tendency to seek such surveys before irrigation districts are established. Research is also conducted in the field of water percolation in relation to soil structure.

The Physical Chemistry Division of the Commonwealth Scientific and Industrial Research Organization is currently investigating methods of minimizing evaporation losses from both large and small reservoirs.

The Irrigation Research and Extension Committee plays an important part in the agricultural activity of the Murrumbidgee Irrigation Areas. It is representative of the State Department of Agriculture, the Commonwealth Scientific and Industrial Research Organization, the Rural Bank of New South Wales, the Soil Conservation Service of New South Wales and certain farmers' organizations (including Extension Groups). Finance is provided by these authorities on an agreed basis. The objectives are:—to enable the

agricultural extension services to the farmers in the defined sub-region to be continued and developed; to provide a system for advising on local agricultural policy and organization; to provide means for farmer opinion to have due weight in the consideration of regional agricultural administration and policy; to achieve a unified approach to sub-regional extension in all branches of agriculture; to advise on the research needs of the sub-region and the co-ordination of the agricultural research of the various rural institutions working therein; to achieve close liaison between research and extension; and to conduct research in extension methods.

4. **Preservation of Catchments.**—Since water conservation commences on the catchments, it is becoming increasingly recognized that anything which interferes with catchment efficiency affects the quantity of water available for all purposes. Active steps are being taken to counteract soil erosion, to conserve soil generally, and to minimize the effects of floods, overstocking, bush fires, and the destruction of vegetative cover. All States and the Commonwealth have initiated forestry policies which provide for reforestation and the preservation of catchments. In recent years, efforts to counteract soil erosion have been intensified, and there is some evidence of a more unified approach to catchment, water, forestry, and land use factors regarded as parts of a single problem.

5. **Sub-surface Supplies.**—(i) *General.* Much of Australia's underground water is obtained from artesian and sub-artesian basins and is used for stock purposes. These supplies are indispensable in most inland areas. The quality of the water ranges from usable to very saline. In inland areas, a considerable amount of water has been tapped that is unusable because of its high salt content. Because of this, development of an economic desalting process would provide the interior with additional large quantities of usable water.

Considerable use is also made of sub-surface water, other than pressure water, from local storages, particularly in the well-settled areas. The water is used mainly for domestic and stock purposes. Compared with other countries with similar rainfall and climate, underground water is not used extensively for town supplies.

The Underground Water Conference of Australia was established on a Commonwealth basis in May, 1961. This body is made up of representatives from Commonwealth and State departments interested in underground water, and was established as a consequence of recommendations made by the Australian Academy of Science to the Commonwealth Government in 1958.

The various States and Territories maintain Geological Surveys and Water Commissions which are continually extending the knowledge of their own States. For example, in New South Wales, the Hunter Valley Research Foundation is carrying out scientific investigations in the catchment area of the Hunter River, and this includes an integrated study of water, soils and climate.

In addition, The University of New South Wales recently formed the Water Research Foundation which has among its objectives research into underground water. To date, research has been devoted mainly to run-off studies, to the design of large earth farm dams and to sponsoring post-graduate hydrology courses.

As a result, a general picture exists of Australia's available and potential underground water resources. Much remains, however, to be done in the mapping and assessment of individual artesian and sub-artesian basins and in the investigation of their constituent aquifers. Detailed investigations also remain to be carried out of shallower underground water in alluvial deposits, coastal sands and mantles of weathered and jointed rock.

Surveys of this nature are of great importance because of the fundamental need for underground sources of water in the settlement of large areas of Australia.

(ii) *Artesian and Sub-artesian Supplies.* Pressure water (either artesian or sub-artesian) variable in quantity and quality is obtainable in many parts of Australia, the various artesian basins extending over about half the continent. A map of Australia showing the extent of the known artesian basins appears on page 273 of this Year Book.

The Great Artesian Basin, the most extensive in the world, underlies an area of approximately 670,000 square miles, comprising about 430,000 in Queensland, 120,000 in South Australia, 80,000 in New South Wales and 40,000 in the Northern Territory. The following are the principal defined water-bearing basins in Australia.

## PRINCIPAL WATER-BEARING BASINS IN AUSTRALIA.

Name.	State.	Geological Age of Chief Aquifers.	Approximate Area.	Depth to Pressure Water.
			Square Miles.	Feet.
Great Artesian ..	Queensland, New South Wales, South Australia and Northern Territory	Mesozoic .. ..	670,000	Up to 7,000
Canning and Fitzroy	Western Australia	Mesozoic-Palaeozoic	160,000	100 to 1,500
Murray ..	Victoria, New South Wales and South Australia	Miocene-Eocene ..	107,000	100 to 1,300
Eucla .. ..	Western Australia, South Australia	Pliocene-Miocene ..	68,000	300 to 2,000
Barkly-Georgina	Northern Territory, Queensland	Cretaceous, Ordovician, Cambrian and Upper Proterozoic(?)	57,000	150 to 1,000
Carnarvon ..	Western Australia	Cretaceous, Permian ..	40,000	230 to 4,000
Perth .. ..	Western Australia	Tertiary, Quaternary, Mesozoic	10,000	200 to 2,500
Western District	Victoria ..	Miocene-Eocene ..	6,500	100 to 4,500
Pirie-Torrens ..	South Australia ..	Recent, Pleistocene ..	4,000	Up to 600
East Gippsland ..	Victoria ..	Pleistocene-Eocene ..	2,500	200 to 3,500
Adelaide ..	South Australia ..	Recent, Oligocene ..	1,100	10 to 850
Basins of Ord-Victoria Region	Northern Territory, Western Australia	Mainly Cambrian and Permian	Unknown	Unknown

More than 3,000 artesian bores have been constructed within the Great Artesian Basin, while the daily free discharge from all bores continuing to flow in Australia has been stated to exceed 350 million gallons, of which the loss by evaporation and seepage has been estimated at more than 90 per cent. Sub-artesian bores and wells throughout Australia number more than 200,000.

Artesian water generally is good stock water, but most is unsuitable for plant life, while in certain areas sub-artesian waters are suitable for all uses including irrigation. In the Eucla Basin and parts of the Murray and Pirie-Torrens Basins, the water is of poor quality, being barely suitable for stock.

In common with other countries possessing artesian supplies, Australia has been faced with the problem of flow diminution. It was recognized early that flows were diminishing as more bores were drilled, but it is now considered that while many of the bores will ultimately cease to flow, others will assume a perpetually steady rate of flow, corresponding with the average intake of water from rainfall absorbed by permeable outcrops, mainly sandstone and limestone. Diminution in flows from artesian bores has emphasized the need to eliminate wastage as much as possible, and investigations have been made regarding wasteful methods of distribution of artesian water by open channels or "bore drains" and the careless use of water. (For greater detail on this subject see Official Year Book No. 37, pp. 1103-4.)

(iii) *Shallow Groundwater.* Shallow groundwater supplies are used in various parts of Australia for industry, irrigation, stock and domestic purposes. Two of the most important of these supplies are in New South Wales. The Hunter District Water Board pumps 15 million gallons a day for general use from the Tomago coastal sands near Newcastle and at Botany, Sydney, private industry pumps 8-10 million gallons a day for its own use from similar sands. Exploration of the coastal sands north of the Tomago Sands has revealed a further potential production of 25 million gallons a day.

In the sugar-cane growing areas of Queensland, particularly the Burdekin Delta, groundwater is used extensively for irrigation. Having a greater opportunity for replenishment of their water supplies, many of the smaller groundwater occurrences are more important than is suggested by comparison of their extent with that of larger basins. Some of these occurrences have, as yet, not been significantly developed.

### § 3. National and Interstate Aspects.

1. *General.*—As the Commonwealth Constitution makes special reference to water rights, both the Commonwealth and the State Governments have an interest in the control and conservation of water. The main responsibility for control of water resources rests with the individual State governments, but as political boundaries sometimes intersect river valleys and catchments, co-operation between governments has been necessary to develop resources in certain cases. Specific examples of Commonwealth-State and interstate co-operation and approach are given in the following sections.

On page 257 of Official Year Book No. 47, information is given on the Rural Reconstruction Commission's Report of 1945, which emphasized national aspects of water conservation and use, and the Irrigation Production Advisory Committee, whose functions are to prepare for consideration conclusions from investigations as to possible agricultural industries on irrigated lands, and to undertake long-term co-ordination of land utilization in irrigable areas served by the Murray River and its tributaries.

2. *Murray River Scheme.*—(i) *General.* The Murray River and its tributaries form the largest river system in Australia. The catchment is approximately 414,000 square miles, or one-seventh of the area of the Australian continent, comprising five-sixths of New South Wales, over one-half of Victoria, one-sixth of Queensland and one-fortieth of South Australia. The Murray proper is 1,600 miles long. Its main tributaries are the Darling (1,700 miles), the Murrumbidgee (980 miles), and the Goulburn (350 miles). The average annual flow of each of the chief contributory streams is as follows:—Upper Murray, including the Mitta Mitta and Kiewa Rivers, 3,623,000 acre feet; Darling River, 2,896,000 acre feet; Goulburn River (including Broken River), 2,570,000 acre feet; Murrumbidgee River, 2,054,000 acre feet; and Ovens River, 1,222,000 acre feet. Irrigated production in the River Murray Basin is mainly grapes for wine, dried fruits, fresh fruits, rice, vegetables, dairy produce, wool, fat lambs, poultry, eggs and pigs.

For a brief summary of the historical events leading up to the River Murray Agreement (1915) by the Governments of the Commonwealth, New South Wales, Victoria, and South Australia, see issues of the Year Book prior to No. 39. The Agreement provided for the construction of works, the allocation of the water between the three States, and the appointment of a Commission to implement the Agreement. The Commission comprises four Commissioners, representing the Commonwealth and the three States respectively. The Commonwealth representative presides.

(ii) *River Murray Waters Agreement.* Under the Agreement, construction works are carried out by the States (who are also responsible for maintenance) subject to the approval and direction of the Commission. The Agreement provides that the minimum quantity of water to be allowed to pass for supply to South Australia in each year shall be sufficient to fill Lake Victoria storage once, and with the aid of water returned from Lake Victoria, to maintain certain specified flows in the lower river varying from 47,000 acre feet a month in the winter months to 134,000 acre feet a month in the four summer months of maximum demand—the total amounting to 1,254,000 acre feet over twelve months. These flows are to meet domestic and stock requirements in South Australia, losses of water in lockages and evaporation losses other than in the lakes at the Murray mouth, together with 603,000 acre feet per annum for diversion from the Murray in South Australia. The flow at Albury is shared equally by New South Wales and Victoria, and each of these States has full control of its tributaries below Albury, subject in each case to the fulfilment of the South Australian allocation. For a brief outline of the operation of the Agreement prior to 1949, see Official Year Book No. 40, page 1065, and earlier issues.

At a conference of Ministers held in July, 1949, to consider the diversion of the Snowy River, it was decided that, by diversion of streams in the Snowy Mountains area, an average of approximately 440,000 acre feet per annum would be added to the Murray River (see para. 4, Snowy Mountains Hydro-electric Scheme, p. 257) and that a storage of not less than 1,500,000 acre feet should be provided in order to give additional regulation of the Murray River itself as well as to provide for regulation of the diverted waters. Hydro-electric potentialities would also affect the size of the storage.

The River Murray Commission investigated the position and found that an increase in capacity of 500,000 acre feet in storage on the Upper Murray River above Albury was the maximum that was economically justifiable for the regulation for irrigation purposes of the waters of the Upper Murray River and of waters added from the Snowy River. The Commission agreed that this increase could best be provided by increasing the size of the Hume Reservoir from its previously designed capacity of 2,000,000 acre feet to 2,500,000 acre feet, but if additional storages for hydro-electric purposes become justified in the future, better provision could be made at some other site. It subsequently recommended to the contracting Governments that the River Murray Waters Agreement be amended to provide for this enlargement of the Hume Reservoir to 2,500,000 acre feet. A conference of Ministers considered the recommendation in July, 1954, and agreed to the enlargement. In addition, it was agreed that the Commission should be given power to construct regulators and to carry out such other work on the Murray River between Tocumwal and Echuca as it considered necessary to reduce the losses from the regulated flow in that stretch of the river. The amended Agreement was ratified in the Parliaments of the Commonwealth and the three States and was proclaimed on 7th April, 1955. In view of the proposed diversions by the Snowy Mountains Authority to and from the Murray River, and for other reasons, amendments to those sections of the River Murray Waters Agreement dealing with the distribution of the waters of the Murray were considered desirable. Following ministerial conferences, amendments were ratified by the four Parliaments concerned and came into force on 6th November, 1958.

The estimated quantity (in acre feet) of water diverted during 1960–61 from the Murray and its tributaries for irrigation and other purposes under the River Murray Agreement was as follows:—New South Wales, 2,324,000; Victoria, 2,296,000; South Australia, 230,000; a total of 4,850,000 acre feet.

(iii) *River Murray Works.* One of the major works of the Murray River Scheme is the Hume Reservoir, situated just below the junction of the Murray and Mitta Mitta Rivers, 10 miles above Albury, forming a lake of 56,000 acres. The design comprises a mass concrete spillway and outlet works extending 1,000 feet and an earthen embankment 110 feet high extending for 4,000 feet across the river flats, the length of the total structure being approximately one mile. Work on the enlargement of the reservoir to its approved capacity was completed in August, 1961.

The Yarrawonga Diversion Weir, which was completed in 1939, raised the river level so that water could be diverted by gravitation into main channels constructed on either side of the river. Between the Yarrawonga Weir and the Murray mouth, thirteen weirs and locks have been built. Two flood diversion weirs have been constructed on the Murrumbidgee—one between Hay and the Lachlan Junction and the other below the Lachlan Junction.

The Mulwala Canal, served by the Yarrawonga Weir, has an off-take capacity of 2,500 cubic feet a second, to serve 1,500,000 acres of land in New South Wales. The Yarrawonga Channel, on the Victorian side, has an off-take capacity of 1,250 cubic feet a second, to serve 270,000 acres. Only a portion of each area will be irrigated.

Adjoining the river in New South Wales and 35 miles from the Murray-Darling Junction, Lake Victoria storage, with a capacity of 551,700 acre feet and a surface area of 27,670 acres, was completed in 1928. The water released from Lake Victoria is used by the South Australian settlements. The inlet channel to Lake Victoria was enlarged in 1957 to permit greater diversion of periodical flood flows of short duration.

Five barrages across channels near the Murray River mouth connecting Lake Alexandrina with the sea were completed in 1940 to prevent ingress of salt water to Lakes Alexandrina and Albert and to the lower river, thereby increasing the productivity of adjacent lands. The structures maintain a sufficiently high level for 50 miles up river to permit watering by gravitation of a considerable area of reclaimed river flats. The total distance across the barrages and intervening islands is 15 miles.

In addition to the works carried out under the auspices of the Commission, the separate States have constructed thousands of miles of distribution channels and have provided a number of storages on the tributaries, thereby contributing very materially to the large amount of irrigation development in the Murray Basin. The total capacities of such main storages are: New South Wales—Menindee Lakes Storage (Darling), 2,000,000 acre feet; Burrinjuck (Murrumbidgee), 837,000 acre feet; Keepit (Namoi), 345,000 acre feet; Wyangala (Lachlan), 245,000 acre feet; Victoria—Eildon (Goulburn), 2,750,000 acre feet; Waranga (Goulburn), 333,400 acre feet. More details of these and other State works

on Murray tributaries will be found in the sections dealing with State systems. No storages exist on the Murray in South Australia, but a proposal has been made recently by the South Australian Government for a 4½ million acre feet storage at Chowilla on the river about 37 miles above Renmark.

**3. New South Wales-Queensland Border Rivers Agreement.**—The New South Wales-Queensland Border Rivers Agreement came into effect on 1st July, 1947. The Agreement provides for the construction of certain works on those sections of the Severn, Dumaresq, Macintyre and Barwon Rivers which constitute part of the boundary between New South Wales and Queensland, for the furtherance of water conservation, water supply and irrigation in those States.

The works to be constructed comprise a dam on the Dumaresq River at a site to be selected by the Commission to give a storage basin with a capacity as large as is reasonably practicable and not less than six nor more than twelve weirs as may be found necessary to meet the requirements of irrigation along the rivers. Provision is also made for the construction of not more than four regulators in the effluents from the barrier rivers and for the taking over of the existing weir on the Macintyre River at Goondiwindi and the existing weir on the Barwon River at Mungindi. The costs of these works and of administration are to be borne by the States in equal shares. The agreement further provides that the water discharged from the Dumaresq storage, whether by regulated or unregulated flow, shall be available to the two States in equal shares.

The Water Conservation and Irrigation Commission of New South Wales, which is the constructing authority for the dam, carried out investigations of several dam sites on the Dumaresq River near Mingoola Station homestead, which is approximately 39 miles from Tenterfield. Foundation drilling supplemented by a geophysical survey carried out by the Commonwealth Bureau of Mineral Resources disclosed unfavourable foundation conditions at all sites, the depth of alluvium overlying sound rock exceeding 150 feet in all cases. In an endeavour to obtain more economical storages, investigations were extended to tributary streams and superficially suitable sites have been located on Pike Creek and the Mole River. A geophysical survey was made at each of these sites and preliminary comparative estimates prepared to determine the relative economy of providing one large storage at Mingoola or two smaller storages on the tributaries. Following exploratory drilling of the tributary sites, a report dealing with alternative storage proposals and possible amendments to the existing Agreement was submitted to the participating States. This report is at present under consideration.

The Irrigation and Water Supply Commission of Queensland is the constructing authority for the new weirs and regulators. The construction of Bonshaw and Cunningham Weirs on the Dumaresq River was completed in January, 1953 and June, 1954, respectively.

A weir and regulator has been constructed on the Barwon River at the offtake of the Boomi River. A low level weir to establish a pumping pool at Glenarbo on the Dumaresq River was also constructed. The existing Goondiwindi and Mungindi Weirs are being maintained, operated and controlled by the Queensland Irrigation and Water Supply Commission. Until a dam has been constructed, it is unlikely that any weirs, other than those referred to above, will be required.

The catchments for the border streams (2,000 square miles) extend to the granite areas in the vicinity of Tenterfield (New South Wales) and Stanthorpe (Queensland) and elevation rises to 3,000 feet. Average rainfall is 30 inches. The catchments and the areas suitable for irrigation are approximately equal in each State. Climatic conditions are such that it is necessary to supplement rainfall from April to October by irrigation to stabilize and increase production. The capacity of the area to grow lucerne and tobacco under irrigation has already been demonstrated. Other possible development of the area includes irrigation of cotton, root crops, cereals, and citrus fruit, and expansion of the fat stock industry.

**4. Snowy Mountains Hydro-electric Scheme.\***—Following a comprehensive investigation into both the water and power potential of the Snowy River waters by a Technical Committee representative of the Commonwealth and the States of New South Wales and Victoria in 1947 and 1948, and the submission by the committee of reports in 1948 and 1949, the Commonwealth Parliament in July, 1949, passed the Snowy Mountains Hydro-electric Power Act setting up an Authority to implement the proposals agreed upon.

\* See also Chapter VII.—Electric Power Generation and Distribution, p. 224. For more detailed information see special article by the Commissioner, Snowy Mountains Hydro-electric Authority (Sir William Hudson) which appeared in Chapter XXIX—Miscellaneous, of Official Year Book No. 42.

The basis of the proposals is to impound the Snowy River waters at high elevations and, by diverting them into tunnels passing under the Alps, to use their potential power for the generation of electricity and then to discharge them into the Murray and Murrumbidgee River systems for use in the irrigation areas.

The Scheme involves two main diversions, the diversion of the Eucumbene, a tributary of the Snowy, to the Upper Tumut River and the diversion of the main stream of the Snowy River at Island Bend and Jindabyne to the Swampy Plain River. In addition, works required to make use of the waters of the Upper Murrumbidgee, the Upper Tumut, the Upper Tooma and the Geehi Rivers for power generation also provide additional regulation of these streams and this makes more water available for irrigation. Details of the two trans-mountain diversions and the associated power works together with details of progress and construction are given in Chapter VII.—Electric Power Generation and Distribution (*see p. 225*).

Additional water is now available for irrigation in the Murrumbidgee Valley and it is expected that this will amount to 500,000 acre feet per annum by 1963. When all works are completed, it is estimated that the total gain to the Murrumbidgee by diversion and regulation will amount to 1,120,000 acre feet per annum and the total gain to the Murray will be 800,000 acre feet per annum. This additional water should be sufficient to provide irrigation for approximately 1,000 square miles of land which should result in a substantial increase in annual primary production.

## B. STATES AND TERRITORIES.

### § 1. Australian Local Pattern of Water Conservation and Use.

The foregoing sections deal with water conservation and irrigation in Australia generally and with national and interstate projects. The following survey indicates the local pattern of water resources and the steps taken by the State Governments to bring about their development. It will be seen that water policies in the various States tend to assume a distinctive and characteristic pattern closely allied with climatic conditions and specific local needs.

In Victoria, almost every form of water scheme is in operation. In New South Wales, major emphasis at present is on irrigation and stock development in the dry areas along the Murray and Murrumbidgee Rivers, though a substantial scheme of intensive irrigation is being conducted in the Murrumbidgee Irrigation Areas. In Queensland, up to the present, the predominant emphasis has fallen on water (mainly underground sources) for stock, and the development of small irrigation schemes in sub-humid and humid areas, especially to stabilize sugar production.

Apart from regular irrigation practices along the Murray River, South Australian authorities are vitally concerned with reticulated supplies for rural areas and towns. Western Australia has developed unique rock catchments and piped supplies for agricultural areas and towns in dry districts. Tasmanian interest relates almost exclusively to hydro-electric generation. The Northern Territory is concerned primarily with stock supplies and the safeguarding of long stock routes.

### § 2. New South Wales.

1. *General.*—(i) *Rainfall and History.* On page 1110 of Official Year Book No. 37, information is given on the pattern of rainfall and the history of irrigation in New South Wales. (*See also Chapter II.—Physiography, p. 45, of this issue.*)

(ii) *Administration.* The Water Conservation and Irrigation Commission of New South Wales consists of three members appointed by the Governor. The operations of the Commission cover water conservation, control of irrigation areas, the establishment, operation and maintenance of works for domestic and stock water supply, irrigation districts, flood control districts, sub-soil drainage districts, constitution of water trusts, the issue of licences for private irrigation, artesian and shallow boring, assistance under the provisions of the farm water supplies scheme, and river improvement works.

Under the Water Act, the right to the use and flow, and the control of water in all rivers and lakes which flow through, or past, or are situated within, the land of two or

more occupiers, is vested in the Commission for the benefit of the Crown. A system of licences operates for the protection of private works of water conservation, irrigation, water supply, drainage, and prevention of inundation.

For particulars of the New South Wales-Queensland Border Rivers Agreement ratified by Acts of both States in 1947, see page 257 of this chapter.

**2. Schemes Summarized.**—(i) *Location and Type.* The bulk of irrigated land is along the Murray and its tributary the Murrumbidgee. Smaller areas are served by the Wyangala Dam, Lake Cargelligo and Lake Brewster on the Lachlan (a tributary of the Murrumbidgee), by Glenbawn Dam on the Hunter River, by Keepit Dam on the Namoi River, and by the Menindee Lakes Storage on the Darling River. None of the other rivers is regulated by large head storages, though weirs and dams have been provided for town supplies, etc., in many places, and a head storage has been commenced on the Macquarie River. In addition, substantial use is made of artesian and sub-artesian water in pastoral areas.

New South Wales legislation provides for the constitution and control of various schemes having different characteristics and including irrigation areas, irrigation districts, water trust districts, flood control and irrigation districts, and river improvement districts. There are nine irrigation areas, although two of these, Yanco and Mirrool, are generally described under the one heading, namely, the Murrumbidgee Irrigation Areas. The Areas are:—The Murrumbidgee Irrigation Areas consisting of 451,189 acres served with water through a channel system stemming from the river at Berembed Weir; the Coomealla Irrigation Area of 34,672 acres, served by pumping from the Murray; the Curlwaa Irrigation Area of 10,393 acres, supplied from the Murray by pumping; the Hay Irrigation Area of 6,850 acres, supplied with water pumped from the Murrumbidgee; the Tullakool Irrigation Area of 18,006 acres supplied from the Edward River by diversion at Stevens Weir; the Buronga (8,693 acres) and Mallee Cliffs (1,900 acres) Irrigation Areas served by pumping from the Murray; and the Coleambally Irrigation Area (74,133 acres), served by diversion from the Murrumbidgee River. All these Areas are administered by the Commission and details of the various schemes are given in sub-section (iii) below.

(ii) *Works.* The capacities of the main storages (in acre feet) are:—

*Darling:*—Menindee Lakes Storages (2,000,000).

*Murray:*—Half share of Hume Reservoir, weirs and locks to Wentworth (1,361,420); Stevens Weir, Edward River (7,165).

*Murrumbidgee:*—Burrinjuck Dam (837,000); Berembed Weir (10,000); Redbank Weir (7,360); Maude Weir (6,740).

*Namoi:*—Keepit Dam (345,000).

*Lachlan:*—Wyangala Dam (temporary reduced level 245,000); Lake Brewster (123,900); Lake Cargelligo (29,435); Jemalong Weir (2,200).

*Hunter:*—Glenbawn Dam (185,000 acre feet irrigation storage; 108,000 acre feet flood mitigation storage).

Water from the Hume Reservoir is used for domestic and stock purposes, to provide bulk supplies for country towns, for the irrigation of vines, fruits and fodder in the Curlwaa and Coomealla Areas, for fruit, vegetables and dairy products in the Buronga Irrigation Area, for horticulture and mixed farming in the Mallee Cliffs Irrigation Area, for rice and other cereals and for pastures in the Tullakool Irrigation Area, for domestic and stock supply and irrigation in the Berriquin, Wakool, Deniboota and Denimein Districts, and for water trusts for domestic and stock purposes and/or irrigation.

The Wyangala Dam is 30 miles upstream from Cowra in the Central West. It has a catchment of 3,200 square miles. Water from the dam, supplemented by the unregulated flow of the Belubula River, provides for domestic and stock purposes along the full length of the downstream river (approximately 800 miles) and also for irrigation by land holders operating licensed pumps. The towns of Cowra, Forbes, Condobolin, Hillston and Booligal are supplied. Balance storages at Lake Cargelligo and at Lake Brewster conserve water during periods of high flow for release as required. Water from the Lachlan, diverted at Jemalong Weir, supplies the districts of Jemalong and Wylde's Plains, serving an area of approximately 225,000 acres.

The approximate total length of supply channels (including main canals) constructed by the Water Conservation and Irrigation Commission in New South Wales is 3,316 miles. The approximate length of drains and escape channels is 1,202 miles, and the total length of pipe lines is approximately 69 miles, making a grand total of 4,587 miles of channels and pipe lines, etc.

(iii) *Extent of Systems and Nature of Irrigated Culture.* The following table shows the areas of the various irrigation systems and particulars of the areas under irrigated culture in New South Wales during 1960-61.

AREAS OF SYSTEMS AND OF LAND IRRIGATED: NEW SOUTH WALES, 1960-61.

(Acres.)

System, etc.	Total Area.	Area Irrigated.									Total.	
		Rice.	Other Cereals Grown for Grain.	Lucerne.	Other Fodder Crops.	Pastures.		Vineyards.	Orchards. (a)	Vegetables.		Fallow Land and Miscellaneous.

(a) Citrus and deciduous. Deciduous amounted to 8,500 acres, of which 8,288 acres were in the Murrumbidgee Irrigation Area. (b) Not available. (c) Incomplete. (d) Excludes some Irrigation Trusts and Licensed Diversions for which information is not available.

3. **Murrumbidgee Irrigation Areas.**—(i) *Description.* These areas, together with adjacent lands supplied under agreement, received 340,324 acre feet, or about a quarter, of the total water (1,316,949 acre feet) allocated within the State for stock, domestic supply and irrigation. They are served by the Burrinjuck Dam (capacity 837,000 acre feet), on the Murrumbidgee, 40 miles north-west of Canberra. The catchment above the dam is about 5,000 square miles. The river rises on the high plateau north of Mount Kosciusko where the average annual rainfall exceeds 60 inches. Flow for the irrigation areas and districts is supplemented by unregulated flow from the Tumut River below the dam. The dam also provides town supplies for Gundagai, Wagga, Narrandera, Hay, Balranald, and for towns served by the South-West Tablelands scheme.

Domestic and stock water and water for irrigation are supplied to the Irrigation Districts of Tabbita, Benerambah and Wah Wah, and the Flood Control and Irrigation District of Lowbidgee. Flood flows are relied on to serve the Lowbidgee district, and water is not released from the dam for that purpose. For the other undertakings, however, water is stored during the winter, fed by melting snows and spring freshets, and is released during the September-May irrigation season. It passes along the river channel to Berembred Weir, 240 miles westward, where it is diverted to the main canal with an off-take capacity of 1,600 cubic feet a second. The main canal has been completed to beyond Griffith, 96½ miles from the off-take. Reticulation channels aggregate approximately 879 miles and drainage channels 822 miles. In addition, approximately 448 miles of supply channels run through irrigation districts adjacent to the Murrumbidgee areas in which the water supply is operated and maintained by the Water Conservation and Irrigation Commission.

The land on which the Murrumbidgee Irrigation Areas are situated originally comprised large sheep stations and was sparsely populated, but at 30th June, 1961, its population was approximately 26,000, that of Leeton Shire being 10,351, and that of Wade Shire 15,883.

(ii) *Administration.* The Water Conservation and Irrigation Commission controls land transactions and water supplies for the Murrumbidgee Irrigation Areas only, and has no jurisdiction over land transactions in the adjacent irrigation districts, although it is responsible for the operation and maintenance of the water supply in these areas. Other local government services, including electricity and town water supply, are provided by Councils. Land is disposed of by the Commission under freehold or perpetual lease tenure or leased for short terms for grazing or cultivation. The area under occupation at 30th June, 1961, was 381,538 acres, including 36,775 held for short lease grazing, agriculture, etc.

(iii) *Production.* Since the inauguration of the scheme in 1912, the volume of production from the area has greatly increased. Numbers of new crops are grown, while the volume of the major products of the area prior to the scheme, such as wool and livestock for slaughtering, has expanded considerably. The principal products to-day are: wool, livestock for slaughtering, rice, citrus fruits, peaches and nectarines, grapes, tomatoes, peas, beans and root vegetables.

Rice growing was initiated on the Murrumbidgee Irrigation Areas in 1924 and has since become the most important crop grown in the area. In 1960-61, the total area sown was 26,993 acres, and the total quantity of water delivered for the rice crops was 149,011 acre feet. In a normal season, the water supplied for rice represents about one-half of the total delivered to the Murrumbidgee Irrigation Areas.

The co-operative system is a prominent feature in the Murrumbidgee Areas. Co-operative organizations in the Mirool section handle about 200,000 bushels of fruit a year (compared with 54,600 in 1927-28). The annual sales turnover of the Leeton cannery in recent years has approximated £2,000,000. Settlers and government agencies co-operate extensively in all matters relating to irrigation practice.

4. **Other Irrigation Areas.**—The Coomealla, Tullakool, Buronga, Mallee Cliffs, Hay, Curlwaa and Coleambally Irrigation Areas follow the same administrative pattern as the Murrumbidgee Areas—that is, land transactions are administered by the Water Conservation and Irrigation Commission which is responsible also for the operation and maintenance of works to supply water.

Coomoalla Area, 9 miles upstream from Curlwaa, comprises 34,672 acres of which 31,664 acres were occupied at 30th June, 1961. Production consists primarily of vine and citrus fruits. An extension of the Coomealla Irrigation Area was completed in recent years to provide irrigation farms for ex-servicemen.

Tullakool Area, formerly part of the Wakool Irrigation District, comprises 18,006 acres of which 14,394 acres are occupied. Main products are fat lambs, wheat and rice.

Buronga Area, on the Murray River, upstream from Wentworth, consists of 8,693 acres, of which 2,495 acres are occupied. Production is mainly fruit, vegetables and dairy products. Mallee Cliffs is also upstream from Wentworth, its area being 1,900 acres, of which 1,863 acres are occupied.

Hay Area, on the lower Murrumbidgee, consists of 6,850 acres, of which 6,401 acres are occupied. Production comprises dairy products, fat lambs, sheep, wool and fodders.

Curlwaa Area, on the Murray near Wentworth, consists of 10,393 acres of which 7,820 acres were occupied at 30th June, 1961. Production consists of dried vine fruits, deciduous fruits and fodder crops.

Coleambally area, a new area served by the Coleambally Canal off-taking from the Murrumbidgee River upstream from Gogeldrie Weir, has an area of 74,153 acres, of which 65,923 acres are occupied. Production is expected to be mainly fat lambs, wool, beef, citrus fruit and peaches, with rice growing being allowed in the initial stages.

**5. Irrigation Districts.**—These Districts are set up under the Water Act for (a) domestic and stock water supply and (b) irrigation. They differ from water trusts in that the cost of the works is not required to be repaid over a period, but annual charges are made by the State for water supplied to landholders. The following are the districts or provisional districts constituted and the areas of land benefited:—*Murray River*—Wakool District 503,322 acres, Berriquin Provisional District 784,537 acres, Deniboota Provisional District 337,252 acres, Denimein Provisional District 147,005 acres, Jernargo Provisional District (certain portions of which have been included in Berriquin District) 4,325 acres, Barramein Provisional District (domestic and stock supply only—works not yet commenced) 89,080 acres; *Murrumbidgee River*—Wah Wah District 575,716 acres, Benerembah District 112,818 acres, Tabbita District 32,330 acres, Gumly Provisional District 353 acres; *Lachlan River* (completed)—Jemalong and Wyldé's Plains Districts 224,556 acres.

Since the completion of the Hume Reservoir, several such districts have been established along the Murray to utilize the New South Wales share of the storage. Water is not available for the whole of the 5,000,000 acres adjacent to the Murray in New South Wales, and therefore the schemes are based on "extensive" irrigation, that is, water rights are allotted to holdings on the basis that only a portion of each holding (one acre in three, five or ten, according to the district, etc.) will be irrigated, but additional water, when available, may be obtained by landholders. "Water right" means right to such a quantity annually of water, 12 inches deep, as will cover an area of one acre.

Water to serve Berriquin, Deniboota and Denimein Districts is diverted through a main canal which will be 100 miles long when completed. Water for the Wakool Irrigation District and the Tullakool Irrigation Area is diverted from the Edward River at Stevens Weir, and a supplementary supply is also obtainable from Mulwala canal. At 30th June, 1961, the total length of completed canals and channels in Berriquin District was 981 miles, comprising Mulwala canal 75 miles, Berriquin channel 22 miles, subsidiary channels 778 miles, escape channels 96 miles and cross drainage channels 10 miles. Off-take capacity of the Mulwala canal is 5,000 acre feet a day.

Wakool, with 387 miles of channel, contains 306 holdings and the area developed by irrigation includes about one acre in eight of the total area. The total area irrigated in 1960-61 was 68,921 acres and water supplied was 187,657 acre feet. Crops comprised fodders, pastures, rice, cereals and vegetables, but sheep raising is the main industry.

Considerable subdivision has occurred within the Berriquin District and the proportion of the total area developed for irrigation is higher than in the case of Wakool. Total irrigated acreage was 249,889 at 30th June, 1961. Sheep and wheat growing are the main industries. The fat lamb industry is well developed and expanding. A dairying industry with an associated butter factory at Finley has been established.

In the Benerembah, Tabbita and Wah Wah Districts, supplied from the channels of the Murrumbidgee Irrigation Areas, the quantity of water supplied during the 1960-61 season for irrigation, etc., was 121,962 acre feet, and the area irrigated was 71,742 acres, including rice and other cereals, pastures, and fodder crops.

For the same season, 21,405 acre feet of water were supplied from the Lachlan River to irrigate a total area of 22,118 acres within the Jemalong and Wyldé's Plains Districts.

**6. Water Trust Districts, Irrigation Trusts and Flood Control and Irrigation Districts.**—The Water Act provides for the constitution of Trust Districts for domestic and stock water and irrigation and empowers the Commission to construct, acquire or utilize necessary works. When the works are completed, they are handed over to trustees to administer. The trustees are elected by the occupiers of the land and act with a representative of the Commission. They are empowered to levy and collect rates covering the cost of the works

repayable to the Crown by instalments and also the cost of operation and maintenance of the works. The rates are struck according to the area of land which benefits. The following water trusts—other than irrigation—have been constituted (the area in acres of each district is shown in parentheses)—*Murray River*—Little Murrumbidgee Creek (157,440), Tuppal Creek (78,080), Bullalale Creek (68,320), Poon Boon (34,300), Minnie Bend Flood Prevention (2,190); *Murrumbidgee River*—Yanco, Colombo and Billabong Creeks (1,007,780); *Lachlan River*—Marrowie Creek (292,640), Torrigan, Muggabah and Merrimajee Creeks (170,240), Ulonga (64,960), Micabil Weir (11,500), Condobolin West Weir (4,480); *Miscellaneous*—Great Anabranch of Darling River (967,339), Nidgerly Weir (46,880), Algudgerie Creek (9,760), Collarenebri town water supply (117)—making in all a total area of 2,916,026 acres. Thirteen of these trusts have been formed for the provision of water for domestic and stock purposes, one for a town supply and one for flood prevention.

Irrigation Trusts are established under the same Act and are administered by trustees in a similar way. The following are the Trust Districts (area in acres is shown in parentheses):—*Murray River*—Bringan (4,933), Bama (3,446), Goodnight (1,104), Bungunyah-Koraleigh (1,810), Glenview (661); *Darling River*—Pomona (1,580)—making in all a total area of 13,534 acres.

The Lowbidgee Provisional Flood Control and Irrigation District (375,000 acres), the first of its kind, was constituted in 1945. Its purpose is to provide flood irrigation for pasture lands on the lower Murrumbidgee by water diverted from the Maude and Redbank Weirs. Another district, Medgun (272,800 acres) near Moree in the north-west is also in operation. In this area, about 58,000 acres benefit from controlled floodings.

7. **River and Lake, and Farm Water Supplies.**—During recent years, the numbers of licences and permits issued to individuals to draw water from rivers and lakes for irrigation have increased substantially, especially along the coastal streams in sub-humid districts where the value of supplementary irrigation is becoming more recognized as a means of stabilizing production in dry months. There has also been a considerable increase along the Murrumbidgee and Lachlan.

The Farm Water Supplies Act was passed in 1946. Technical advice and assistance, and also financial assistance, are made available to help individual farmers and groups of farmers to provide and improve water supplies for domestic, stock and irrigation purposes by means of wells, bores, excavated tanks, weirs or dams, flood and spray irrigation systems.

8. **Underground Water.**—Extensive use is made of artesian, sub-artesian, and shallow underground water. Nearly eighty thousand square miles in the northern and western portions are covered by the Great Artesian Basin. Eighty-nine Bore Water Trusts and 12 Artesian Wells Districts have been constituted. The Bore Trusts are administered in the same way as Water Trusts, but in Artesian Wells Districts settlers maintain the drains. Bore Trusts and Artesian Districts cover over 5 million acres and water is distributed through approximately 8,000 miles of open earth drains. The number of artesian bores giving a flowing or pumping supply at 30th June, 1961, was 1,081 and the estimated total daily flow from approximately 600 flowing bores was 65 million gallons. The estimated flow in 1914–15 was 99 million gallons a day from 372 bores. The deepest bore is Boronga No. 2 (4,570 feet), which also has the greatest flow, about 1 million gallons a day.

Of other structural basins of sedimentary rocks, e.g. Murray, Cumberland (Sydney), Oxley and Clarence Basins, the Murray is the largest and also the most important in that it affords stock water supplies over an extensive area of the south-western section of the State. Only a few of these bores flow, the remainder being sub-artesian. Good supplies for stock and, in some instances, small scale irrigation, are obtained from porous sandstone in the Moss Vale-Picton area of the south-western lobe of the Cumberland Basin but the remainder has limited potential. Stock supplies are obtained from bores in the fringe zones of the Oxley Basin but the centre of this basin lies under the Liverpool Range. The Clarence Basin is relatively unimportant from a groundwater viewpoint.

In other parts of the State, the largest and best quality groundwater supplies are obtained from sands and gravels in the alluvium of the major rivers and their tributaries, particularly the western flowing rivers, e.g. Lachlan, Macquarie and Namoi. Supplies of up to 50,000 gallons an hour are obtained from wells and screened bores in these areas and are used for irrigation purposes. The Government is carrying out investigations to determine the groundwater potential of the alluvium of such valleys, particularly with regard to irrigation use, and a test-boring programme is in progress in the Lachlan Valley. Coastal river systems have a much more limited potential in this regard, the main exception being the Hunter.

Old sand dune areas along the coast provide large supplies of good quality water. However, since the soils of these areas are not suited to agricultural pursuits, exploitation has been largely confined to the Sydney and Newcastle areas. Initially a source of Sydney's water supply, the Botany sands are now utilized mainly by industry. The Tomago sands provide a considerable proportion of the Newcastle water supply.

The older rocks, which are mostly folded and jointed, are very variable in their groundwater potential and only rarely do they yield supplies sufficient and suitable for limited irrigation. Where suitable conditions obtain, they yield useful stock supplies, mostly at depths between 50 and 250 feet.

It is necessary under the 1955 amendments to the Water Act that all wells and bores be licensed and details of over 14,000 bores and wells in the State are recorded. When assessed in relation to the geologic and topographic conditions of any particular area, such records provide valuable evidence of the groundwater potential and are thus of considerable benefit to landholders.

Since 1912, the Government has assisted settlers in shallow boring operations for which repayments are required over a period. To 30th June, 1961, the number sunk by the Commission's plants was 5,236 and their average depth was 306 feet.

**9. Future Programme.**—The programme of post-war development already in hand includes the provision of additional dams and storages, diversion weirs, and flood mitigation and river protection works in various parts of the State. Construction of Burrendong Dam on the Macquarie River is in progress. Legislation has been passed authorizing the construction of a flood control and irrigation dam at Warkworth in the Hunter Valley and a storage dam at Blowering on the Tumut River. The Hunter River development, of which Glenbawn Dam is an integral part, concerns an exceptionally fertile coastal valley, forming the hinterland to Newcastle, where the annual rainfall is not heavy and variations from month to month are considerable. This is the first coastal scheme initiated in New South Wales. At 30th June, 1961, a diversion weir at Gogeldrie on the Murrumbidgee River was supplying water to a number of farms in a new irrigation area (Coleambally) on the south side of the river to comprise not less than 1,000 new irrigation farms. Later development will extend to a new area on the north side of the river. At Wyangala Dam, on the Lachlan River, the fixed crest of the dam spillway has been lowered temporarily to enlarge the spillway for passage of greater floods. A proposed new earth and rock fill dam will be built behind the present dam to give a storage of 1,000,000 acre feet.

**10. Hydro-electricity.**—A survey of the use of water for power generation in New South Wales may be found in the previous chapter (*see* p. 230).

### § 3. Victoria.

**1. General.**—(i) *Rainfall.* Particulars of the rainfall pattern of Victoria were given on page 1117 of Official Year Book No. 37. (*See also* Chapter II.—Physiography, p. 45, of this Year Book.)

(ii) *Administration.* The passing of the Irrigation Act of 1886 put the control of surface waters under the Crown, provided for the establishment of Irrigation Trusts and marked the beginning of irrigation development. In 1905, the Water Act established the State Rivers and Water Supply Commission and gave it control of all irrigation, rural domestic and stock supplies, town water supplies, and flood protection and drainage undertakings outside the Metropolitan area, with the exception of the irrigation area operated by the First Mildura Irrigation Trust and the town water supplies operated by locally constituted waterworks trusts or local governing bodies.

The operations of the First Mildura Irrigation Trust, the waterworks trusts and local governing bodies administering town water supplies, the river improvement and drainage trusts and the various sewerage authorities which control sewerage undertakings in country towns, are also subject to general supervision by the Commission.

**2. Works Summarized.**—In 1902, a great drought emphasized the need for a concerted attack on water problems. Subsequent to the establishment of the State Rivers and Water Supply Commission the total capacity of storages controlled by that Commission has increased from 172,000 to 4,263,618 acre feet at 30th June, 1961. In addition, Murray River

storages with a combined capacity of 2,722,840 acre feet are shared equally by New South Wales and Victoria under the River Murray Waters Agreement, subject to certain obligations to South Australia. The total storage capacity available to Victoria is thus some 5,625,038 acre feet. Most of the water from these storages is used for irrigation. The area actually irrigated has risen from 105,000 acres in 1906 to 1,007,180 acres in 1960-61 to which 1,373,717 acre feet of water were delivered. The Commission estimated the value of irrigated production in 1959-60 at £57,800,000 representing about one-sixth of the value of Victoria's total rural production.

Besides supplying water to its own irrigation districts, the Commission supervises the diversion of water for irrigation by private persons by means of licences and permits. In the last ten years, the area so licensed has doubled and private diverters now provide a fifth of total irrigation production.

A notable development in the post-war years has been Soldiers' Settlement Schemes based on irrigation. Altogether, more than one thousand holdings have been prepared for settlers, including 550 in the Murray Valley District, 250 at Robinvale and 125 in Gippsland.

Town water supply, sewerage works and land drainage, flood protection and river improvement works serve many thousands of people. A domestic and stock water supply is given to various rural areas throughout the State, but principally to the Wimmera and Mallee about which a detailed description is provided later in this chapter.

3. Storages.—The capacities of the main storages in the various systems (in acre feet) at 30th June, 1961, were as follows:—

*Goulburn System*:—Eildon Reservoir, 2,750,000; Waranga Reservoir, 333,400; Total, 3,104,100; *Murray-Loddon System*:—Half share of Murray River storages, 1,361,420; Cairn Curran, 120,600; Tullaroop, 60,000; Total, 1,690,230; *Wimmera-Mallee*:—Rocklands, 272,000; Total, 563,800; *Gippsland*:—Glenmaggie, 154,300; Total, 154,340; *Coliban*:—62,730; *Werribee-Bacchus Marsh*:—34,900; *Mornington Peninsula*:—5,800; *Otway*:—1,080; *Miscellaneous*:—8,058; *Grand Total*:—5,625,038.

4. Extent of Systems and Nature of Irrigated Culture.—The following table shows the areas of the various irrigation systems and the areas under irrigated culture during 1960-61.

AREAS OF SYSTEMS AND OF LAND IRRIGATED: VICTORIA, 1960-61.  
(Acres.)

System.	Total Area.	Area Irrigated.									Total.
		Cereals.	Lucerne.	Other Fodder Crops.	Pastures.		Vineyards.	Orchards.	Market Gardens.	Fallow and Miscellaneous.	
					Sown.	Natural.					
<i>Goulburn-Loddon</i> ..	1,288,880	2,551	16,461	4,487	358,661	18,934	218	21,662	3,923	5,310	432,207
<i>Murray—</i>											
<i>Torrumbarry</i> ..	377,384	3,669	4,590	3,090	180,715	33,435	5,192	983	951	5,723	238,348
<i>Murray Valley</i>	274,123	100	7,965	391	91,722	1,412	29	5,465	535	211	107,830
<i>Irrigation Area</i>	80,754	..	471	206	571	207	36,243	2,578	398	916	41,590
<i>Pumping(a)</i> ..											
<i>Total</i> ..	732,261	3,769	13,026	3,687	273,008	35,054	41,464	9,026	1,884	6,850	387,768
<i>Other Northern Systems(b)</i>	19,735	95	1,400	33	8,860	835	..	3,710	746	12	15,691
<i>Southern Systems</i> ..	147,260	57	1,403	601	51,548	3,123	..	587	5,584	390	63,293
<i>Private Diversions(c)</i> ..	(d)	1,468	7,582	1,431	62,246	9,068	3,135	5,289	9,598	8,404	108,221
<b>Grand Total</b> ..	<b>2,188,136</b>	<b>7,940</b>	<b>39,872</b>	<b>10,239</b>	<b>754,323</b>	<b>67,014</b>	<b>44,817</b>	<b>40,274</b>	<b>21,735</b>	<b>20,966</b>	<b>1,007,180</b>

(a) Includes First Mildura Irrigation Trust. (b) Area of Campaspe District only. (c) Excludes private diverters in the Torrumbarry System, but includes all other private diverters along the Murray River. (d) Not available. (e) Incomplete; excludes Private Diversions and part of other Northern Systems.

5. *Irrigation Systems.*—(i) *Goulburn.* The storage capacity for this system is provided principally by Eildon Reservoir. The enlargement of the storage capacity of this reservoir was completed in 1956, enabling 600,000 acres to be irrigated when the necessary distributary works are completed. Water from Eildon Reservoir flows down the Goulburn River to the Goulburn Weir, located near Nagambie. This raises the summer level of the river about 45 feet for the purpose of diversion. From this Weir, water is diverted via the East Goulburn Main Channel direct to the irrigation areas around Shepparton. The western main channels from the Weir convey water to the Waranga Reservoir near Murchison in addition to supplying part of the large Rodney Area directly.

Two main outlet channels issue from Waranga Reservoir. One serves the western section of Rodney Area while the other serves Irrigation Areas as far west as Boort, and continues into the Wimmera-Mallee Domestic and Stock System to provide a supplementary supply as far as Beulah East (*see* (iv), below).

Water is also supplied to part of the Goulburn System from Cairn Curran Reservoir on the Loddon River, and from Tullaroop Reservoir on one of its tributaries. Eildon itself may be used to supplement supply to the districts along the Murray River.

The main products of the Goulburn system are dairy produce, fruit, wool and fat lambs. Annual production of deciduous canning fruits in the area is about two-thirds of Australia's total.

(ii) *Murray River System.* The waters of the Murray River are used to supply an area of approximately 750,000 acres between Yarrowonga and Merbein. The districts between Yarrowonga and Swan Hill, except Tresco near Swan Hill, are supplied by gravitation and those west of Swan Hill by pumping.

The Murray Valley Irrigation Area, which is served from Yarrowonga Weir, comprises 274,000 acres west of Yarrowonga between the Murray River and Broken Creek. Dairy products, fat lambs and canning fruit are the main items produced.

The gravitation system based on Torrumbarry Weir (52 miles downstream from Echuca) serves an area of about 378,000 acres around Cohuna, Kerang, Koondrook and Swan Hill. (Also included in the Torrumbarry System is the Tresco District supplied by pumping from Lake Boga.) Dairying and fat lamb raising are the major industries. Vine fruits and vegetables are grown around Swan Hill and tobacco growing is increasing in importance.

West of Swan Hill lie four Commission districts with a pumped supply—Nyah, Robinvale, Red Cliffs and Merbein. These contain about 1,500 holdings devoted mainly to dried vine fruit although citrus fruit and table and wine grapes are of some importance. The area around Mildura is controlled by the First Mildura Irrigation Trust, the only irrigation trust operating in Victoria. It serves an irrigated area about half the combined size of the four Commission districts and has similar major products.

(iii) *Southern Systems.* The most important southern system is an area of 130,000 acres around Maffra and Sale, mainly devoted to dairying. This is supplied from Glenmaggie Reservoir on the Macalister River and from the natural flow of the Thomson River when the flow is adequate. Other important irrigation districts are located quite close to Melbourne around Werribee and Bacchus Marsh. These districts are intensively developed for dairying and vegetable growing.

(iv) *Wimmera-Mallee Domestic and Stock Supply System.* This system serves an area of 11,000 square miles or nearly one-eighth of the State. Without the artificial supply of water, development in this area would be meagre and hazardous owing to the constant threat of drought. The main supply is drawn from the Grampians storages and can be supplemented by water drawn from the Goulburn and Loddon Rivers, via the Waranga Western Channel referred to previously. Works in progress will make the Wimmera and Mallee independent of supplies from the Goulburn and Loddon Rivers in the near future. In addition, certain areas in the north of the system are supplied direct from pumps on or near the Murray River.

As far as possible, water is distributed in the winter and spring to reduce evaporation losses in 6,500 miles of Commission channels and 3,000 miles of farm channels. It is the responsibility of the 7,000 farmers served to provide sufficient storage capacity on their farms to meet their domestic and stock needs for the year. In addition to meeting rural and domestic demand, together with stock requirements, the Grampians storages provide a water supply for more than 40,000 people in 47 towns and are used to irrigate a small area near Horsham.

6. **Town Water Supplies and Sewerage.**—Details of the operations of the State Rivers and Water Supply Commission which supervises water supplies and sewerage for country towns and local government authorities are given in § 5 of Chapter XIX., Local Government, of this Year Book.

7. **Drainage, Flood Protection and River Improvement.**—The largest work in this category undertaken by the State Rivers and Water Supply Commission is the Koo-wee-rup—Cardinia Flood Protection District embracing 80,000 acres of a continuous depression along the seaboard of Westernport. Once useless, indeed a hindrance to communication, this area now yields primary products worth over £3 million a year.

By the River Improvement Act of 1948, the formation of local river improvement and drainage trusts under the supervision of the Commission has been greatly facilitated and since 1950, 20 such trusts have been formed. The importance of river improvement work is expected to continue to grow.

8. **Finance.**—The capital liability of the Commission at 30th June, 1961, was £98,500,000. Of this amount, £69,000,000 was expended on irrigation and £7,000,000 on domestic and stock supply systems. Both these amounts were financed entirely by the State. The total liability for urban supply was £14,000,000 of which 51 per cent. was borne by the State and the remainder by the districts concerned.

9. **Underground Resources.**—The active investigation of a survey of these resources is being carried out by the Victorian Department of Mines. Their deep drilling plant has located suitable water for town supplies at Portland, Heywood, Port Fairy, Timboon and Petersborough in aquifers ranging to 4,500 feet in the Western Districts Basin. Other drilling plants are engaged in other parts of the State and up to date over 100 wells have been successfully completed.

The Murray Artesian Basin underlies an area of 107,000 square miles, of which 27,000 square miles are in Victoria, 28,000 square miles in South Australia and 52,000 square miles in New South Wales. The quality of the water varies, and is suitable for domestic purposes in much of the south-western part of the basin in Victoria, but elsewhere is suitable only for limited stock use. There are innumerable bores in Victoria ranging to 6,000 feet in depth. Some individual bores can yield up to 2,000,000 gallons a day. In the last few years, the Department of Mines has expanded considerably the work of exploration for underground water.

10. **Future Programme.**—The main work under construction is the enlargement of the channels of the Goulburn System to distribute the extra water now available from Eildon, Cairn Curran and Tullaroop Reservoirs. A considerable amount of this work has already been carried out. Other large projects under construction are the enlargement of Eppalock Reservoir on the Campaspe River to a capacity of 250,000 acre feet and important new works in the area known as Carrum Drainage District.

11. **Hydro-electricity.**—Details of hydro-electricity potential and utilization in Victoria may be found in the previous chapter (*see p. 232-4*).

#### § 4. Queensland.

1. **General.**—(i) *Rainfall.* Particulars of the rainfall pattern of Queensland are given in Official Year Book No. 37, page 1122. (*See also* Chapter II.—Physiography, page 45, of this Year Book.)

(ii) *Administration.* In Queensland, the right to the use and flow of non-tidal surface water contained in, or flowing through or past the land of two or more occupiers, and all artesian and sub-artesian water vests in the Crown. Subject to certain reservations for Local Authority and other purposes, such water is controlled by a Commissioner of Irrigation and Water Supply.

For a description of the development of the present administration, *see* Official Year Book No. 42 and earlier issues.

(iii) *Water Utilization.* In Queensland, private diversions from watercourses, artesian wells, and in certain declared areas, sub-artesian wells, are subject to licence by the Commissioner. Dams and weirs are constructed by the Commissioner to safeguard supplies in streams from which private pumping for irrigation takes place, and also to provide water for Irrigation Areas constructed by the Commissioner.

2. *Irrigation.*—(i) *General.* Irrigation as a means of stabilizing and increasing agricultural production continues to receive attention in Queensland. As a large portion of Queensland is tropical, the State's crops differ considerably from those of other States. Sugar cane is the greatest individual crop, representing in value approximately 46 per cent. of total agricultural production. Approximately 15 per cent. of the sugar cane acreage was irrigated in 1960-61, which represented some 40 per cent. of the total irrigated area in Queensland. Queensland is also Australia's major tobacco-producing State, and plans are in hand to increase greatly the annual production of this crop by means of development under irrigation. The area of tobacco irrigated during 1960-61 represented 96 per cent. of the total plantings of this crop in the State.

Most irrigation in Queensland is undertaken by private farmers operating under licence to obtain water by pumping from streams or from natural underground storages. There has been considerable development during recent years of individual water conservation projects (water harvesting) to provide storage for irrigation of pastures, fodder crops and small crops, and orchards. Where available, electricity is the most popular source of power for pumping and the principal areas supplied with electricity are the Burdekin Delta, the Lockyer Valley, and the Darling Downs.

It has been estimated that about two-thirds of the total area irrigated in Queensland is supplied from underground water. The main areas where these supplies have been developed extensively are the Burdekin Delta (Ayr-Home Hill Area), the Pioneer Valley, Callide Valley, Lower Burnett (Bundaberg Area), Lockyer Valley and Redland Bay. Similar development is taking place in other areas such as parts of the Darling Downs.

Furrow irrigation is used for cotton, sugar cane, most tobacco and some other crops. Spray irrigation is used widely on fruit, vegetables, fodder crops and a small part of the tobacco crop. Spraying is well suited for the application of water on deep soils by small pumping plants, particularly when the quantity of water available is limited. Use of the border check method in the irrigation of pasture and fodder crops has proved successful and is increasing.

The following table shows for each division of the State the number of irrigators and the areas irrigated for the year ended 31st March, 1961.

AREA OF LAND IRRIGATED: QUEENSLAND, 1960-61.

Division.	No. of Irrigators.	Area Irrigated (Acres).							Total.
		Vegetables.	Fruit.	Sugar-cane.	To-bacco.	Cot-ton.	Other Crops.	Pas-tures.	
Southern Queensland ..	5,518	24,313	4,686	17,309	3,218	721	42,367	11,876	104,490
Central Queensland ..	609	1,089	256	..	7	1,819	6,257	1,679	11,107
Northern Queensland ..	1,712	4,296	816	51,678	8,841	135	1,515	2,096	69,377
<b>Total .. ..</b>	<b>7,839</b>	<b>29,698</b>	<b>5,758</b>	<b>68,987</b>	<b>12,066</b>	<b>2,675</b>	<b>50,139</b>	<b>15,651</b>	<b>184,974</b>

The pattern of irrigation in Queensland is unlike that in southern States. The spring to autumn "irrigation season" of the temperate southern irrigated lands is not applicable, as round-the-year irrigation is required throughout most of the State, the timing and duration of the summer "wet" season being too variable to enable a definite non-irrigation season to be fixed.

Two of the more important areas of development by irrigation by private pumping are the Lockyer Valley and Burdekin River Delta.

(a) *Lockyer Valley.* West of Brisbane and within 30 miles of that metropolitan market is the Lockyer Valley, which is portion of the Brisbane River Basin. The valley comprises an extensive flood plain where heavy black alluvial soil thickly overlies gravels

and sands carrying water suitable for irrigation. Despite a mean annual rainfall of 30 inches, the variation is great, and irrigation is necessary for continuous agricultural production. Surveys suggest that of some 60,000 acres of land highly suitable for irrigation only about 30 per cent. is under irrigation. Most of the farmers operate electric pumps for irrigation purposes, and a special policy designed to encourage such development is fostered by the Southern Electric Authority of Queensland. The Irrigation and Water Supply Commission has constructed a number of small weirs on Lockyer Creek with a total storage of 1,370 acre feet. These also tend to augment and conserve underground supplies. The Irrigation Research Station established at Gatton has been converted to a Regional Experimental Farm under the control of the Department of Agriculture and Stock.

The Lockyer Valley produces a substantial proportion of Queensland's onions, potatoes, pumpkins, lucerne, hay, green fodder, maize and dairy products.

(b) *Burdekin River Delta.* The Burdekin River, which enters the sea between Townsville and Bowen, is a major factor in the life of North Queensland. In most years, heavy floods from a catchment twice the size of Tasmania cause extensive damage and traffic disruptions. On the other hand, the fertile delta area, with its underground water supplies at shallow depth, has contributed greatly to the agricultural prosperity of North Queensland. The average annual rainfall of this area is some 41 inches, but the major part falls in the months December to March. Consequently, sugar growers and other farmers have tapped the underground water resources of the delta to obtain supplies in the dry periods. Sugar is the main crop irrigated, though citrus fruits, pineapples, vegetables and tobacco are also irrigated. The irrigated area is in excess of 30,000 acres, up to 1,000 acre feet of water being drawn daily from underground sources.

In the Home Hill-Inkerman areas on the south side of the Burdekin, water is obtained from shallow wells by electric pumps supplied from a local power station controlled by the Townsville Regional Electricity Board. Around Ayr, on the north side of the river, electric power from the mains of the Townsville Regional Electricity Board is now being used in place of individual internal combustion engines. At both Home Hill and Ayr, water for domestic supply is raised by a windmill on each property.

In 1940, the Burdekin River Trust was formed to safeguard the sugar areas of the delta from erosion and floods. An irrigation research station studies the development of pastures and irrigated crops under local conditions.

(ii) *Government Projects.* The Irrigation and Water Supply Commission has constructed and operates two dams and forty-one weirs with a storage capacity of 452,776 acre feet. Water from these storages supplies four Irrigation Areas operated by the Commission and supplements numerous streams from which pumping for private irrigation takes place.

(a) *Mareeba-Dimbulah Irrigation Area.* The existence of large areas of sandy soils suitable for tobacco production in the valleys of the Walsh and Barron Rivers in the neighbourhood of Mareeba and Dimbulah led to large-scale investigations into the possibility of irrigation development in the area.

During 1952, a report on the utilization of waters of the Walsh and Barron Rivers was prepared, and the establishment of an irrigation undertaking approved by the Queensland Government. The projected undertaking provided for construction of a major storage at Tinaroo Falls on the Barron River to store 330,000 acre feet, and construction of irrigation works to serve 78,000 acres commanded by this storage, of which 49,000 acres on 910 tobacco farms and 180 mixed farms will be irrigated annually. Construction of Tinaroo Falls Dam has been completed, and work is progressing on the construction of irrigation works. Tobacco will be the basic crop, while peanuts, vegetables, maize, cotton and stock fattening also appear suitable. One hundred and four miles of channels have been constructed, and irrigation water from Tinaroo Falls Dam is available to 335 farms.

In 1960-61, the value of tobacco leaf sold was £4.8 million from 425 farms.

(b) *Burdekin River Irrigation Area.* A major multi-purpose scheme, involving irrigation, flood control and hydro-electric power generation, has been investigated by the various interested government departments under the general supervision of the Burdekin River Authority. The development envisaged includes a dam storing 6,584,000 acre feet, which would make water available for the irrigation of at least 250,000 acres. The principal industries anticipated are tobacco growing, dairying, and cattle-fattening, with sorghum, sun-flowers, peanuts, cotton and sugar-cane as other possible forms of production.

The Clare Irrigation Area, constituted in 1949, the Millaroo Irrigation Area, constituted in 1952, and the Dalbeg Irrigation Area, constituted in 1953, representing the first stage of the major Burdekin River Irrigation, Hydro-electric and Flood Mitigation Project, are at present predominantly used for tobacco production. Located from 25 to 65 miles upstream from the mouth of the Burdekin, these areas comprise 18,862 acres, and obtain irrigation waters from central pumping stations drawing on the flow of the Burdekin. A temporary storage of 7,670 acre feet capacity has been constructed about 79 miles upstream from the mouth of the Burdekin to augment supplies. At 30th June, 1961, 149 farms were occupied, and total production for 1960–61 was valued at £883,331. Construction of further stages of the scheme has been deferred indefinitely.

(c) *Dawson Valley Irrigation Area.* The Dawson River, a 392-mile long tributary of the Fitzroy River, rises in the Carnarvon Range and joins the Mackenzie River to form the Fitzroy River, 50 miles west of Rockhampton. Lands bordering the river in its northerly course of about 170 miles before its confluence with the Mackenzie River are commonly termed the Dawson Valley. A scheme for the development of the Dawson Valley providing for the irrigation of 70,000 acres was inaugurated in 1923. Storage for the scheme was to be provided by a dam of 2,500,000 acre feet capacity at Nathan Gorge. Much investigation and survey work on the scheme was carried out, but the general financial depression and limited loan funds brought about the cessation of this work. However, the initial step in construction has been completed, comprising a weir on the river at Theodore and irrigation works to serve an area of 3,500 acres supplied from a central pumping station. Two additional weirs have since been built, giving a total storage of 10,280 acre feet and covering some 61 farms in production, returning an estimated £350,000. Pasture, vegetables, cotton, fruit and dairy products are the principal produce. Recently, further attention has been given to the former plans for the valley, and earlier work has been under close scrutiny as a prelude to future development. Construction of works to serve some 2,400 acres at Gibber Gunyah, adjacent to the existing Theodore Area, has been completed, and 17 farms have been occupied.

(d) *St. George Irrigation Area.* The St. George Irrigation Area comprises 18 farms engaged mainly on raising fat lambs in conjunction with irrigated pastures. Water supply for the area is obtained by pumping from the combined weir and road bridge on the Balonne River at St. George.

(e) *Warrill Valley Project.* Moogerah Dam on Reynolds Creek (a tributary of Warrill Creek) is of double curvature thin arch construction 105 feet high to spillway crest level, and will serve some 11,000 acres of the Valley by private diversion of water released from its 73,000 acre feet storage into Reynolds and Warrill Creeks.

(f) *Mary Valley Project.* Township accommodation and facilities at Borumba Dam site have been completed by the commission and the construction of the Dam on Yabba Creek by contract is proceeding satisfactorily. This is a rockfill structure with an upstream impermeable concrete membrane 144 feet high above stream bed. In its initial stage, storage capacity will be 34,500 acre feet with provision for later increase to 80,000 acre feet. In its first stage, water released from the dam will be available to maintain the town water supply for Gympie, and will allow extension of the area irrigated by private diversion from the Mary River to some 18,000 acres.

(g) *Upper Condamine Project.* Work has commenced on the establishment of township accommodation and facilities at Leslie Dam Site. This will be a mass concrete gravity dam 95 feet above foundation level. In its initial stage, storage capacity will be 38,500 acre feet with provision for later increase to 87,000 acre feet. Water released from the dam will be available for irrigation of sections of the Darling Downs downstream the Condamine River as far as Cecil Plains. In addition, the City of Warwick will be supplied by pipeline from Leslie Dam.

(h) *Border Rivers Project.* The development of the rivers constituting portion of the border between Queensland and New South Wales is under the authority of the Dumaresq-Barwon Border Rivers Commission on which each State is represented. For information on the project see page 257.

3. **Great Artesian Basin.**—(i) *General.* Western Queensland, beyond the 20 inch rainfall belt, is predominantly pastoral and is mainly dependent for water supplies on artesian and sub-artesian bores, and where surface storage is not readily available, on excavated tanks. The Great Artesian Basin in Queensland corresponds approximately with the area lying west and south of the Great Dividing Range, excluding the Cloncurry Mineral Field and the Barkly Tableland. It comprises 430,000 square miles or about two-thirds of the total State area of 667,000 square miles.

(ii) *Artesian Water.* Although the number of bores has gradually increased over the years, the total flow of all bores has declined since the peak flow of 351 million gallons a day. This decline gave rise to the fear that supplies from the basin would eventually cease. As a result, in 1939, the Queensland Government appointed a committee to ascertain the nature and structure of the Great Artesian Basin, with particular reference to the problem of diminishing supply. The final report, which was presented in 1954, indicated that the majority of the Committee expected the output to continue its decline during the next sixty years, at which stage the flow from the remaining flowing bores would be of the order of 110 million gallons a day. The discharge from windmills, springs and other leakages, together with the underflow past the Queensland borders would then be about 20 million gallons a day. It was further expected that the total discharge, of the order of 130 million gallons a day, would be in equilibrium with the recharge of the basin.

It was anticipated that numbers of bores on higher ground would cease to flow during the next sixty years and the area served by the flowing bores would contract by perhaps twenty per cent.

Up to 30th June, 1961, 2,709 artesian bores had been drilled of which 1,816 were still flowing. The total depth drilled amounted to 3,816,910 feet and the estimated daily flow was 208 million gallons. Although very few bores exceed 2,000 feet in depth (the average depth is 1,408 feet) and a new bore greater than 3,000 feet deep is exceptional, the deepest bore recorded was sunk to 7,009 feet. Some bores which had been classified as "ceased" have been inspected and found to be still flowing, while other ceased bores have responded to deepening and have recommenced flowing. Both the pressure and flow of artesian bores is steadily diminishing, the rate of decrease varying widely throughout the basin. Present average rates of diminution are:—pressure 1–2 feet/head; total flow 2–3 per cent. per annum.

The greater part of the artesian discharge is distributed by open earth channels which total some 15,500 miles in length. A large proportion of the water flowing along these channels is lost by soakage and evaporation, less than 10 per cent. being actually used by stock. The amount of loss through soakage depends on several factors, including the permeability of the earth, the rate of evaporation (which varies from season to season), and the shape and maintenance of the drains. More effective utilization of this water could be obtained by the use of piping to overcome the loss by soakage and evaporation in the open earth channels.

Although artesian beds underlie a large area of the State, only 79,000 square miles are primarily watered by bore drains. The remaining area is watered by artesian bores (with small or no flow and limited drains), sub-artesian bores, excavated tanks, dams and natural waterholes. In many districts, artesian bores do not provide economical watering facilities because of depth, limited area to be watered, and difficult terrain for distribution of water by drains.

The quality of artesian water from the greater part of the basin is not suited for prolonged use for irrigation on most soils, nor are the supplies sufficient for both large scale irrigation and stockwatering. Practically the whole of the final steady-rate discharge from flowing bores will be needed for the watering of stock.

A programme of strict conservation, involving the restriction of bore flows and the improvement of bore drains, would result in smaller shrinkage of the area served by flowing bores. Such a scheme would actually cost less than the installation and maintenance of pumps or other watering facilities which would be required to provide alternative water supply as additional bores ceased to flow because of a policy of non-restriction. On the other hand, strict conservation would not increase the amount of water ultimately available as perennial flowing supply, and would in fact decrease the amount of water passed from intake beds to aquifers within the basin by flattening the hydraulic gradient. It is considered that the benefit from strict conservation was not sufficiently great, nor sufficiently concrete, to warrant implementation.

Shallow sub-artesian supplies, which come from beds unconnected with artesian beds, are of variable quality and volume. These supplies are available at depths of less than 1,000 feet over a large area of the basin. Some 9,740 sub-artesian bores, within the Great Artesian Basin, have been registered in Queensland. An essential practical consideration is that the main artesian beds are continuous and the sub-artesian beds are not continuous.

Detailed surveys of numerous other sources of underground water in the State, such as the smaller sedimentary basins, the Cainozoic alluvial deposits, recent coastal sands and fractured older rocks, still largely remain to be carried out.

(iii) *Bore Water Areas.* The constitution of Bore Water Areas was inaugurated in 1913 to aid pastoral settlement in districts where large flows were available at a cost beyond

individual capacity, and to conserve artesian supplies by fully utilizing flows from the existing bores on the land resumed for closer settlement. Bores and drains are constructed from loan funds repayable over a period of years. The areas are administered by Local Boards or by the Commissioner of Irrigation and Water Supply, acting as a Board. Rates are levied to meet interest, redemption, maintenance and administration costs. Statistics for the year 1960-61 are: Areas constituted, 72; administered by Commissioner, 54; administered by local boards, 6; number abolished, 12; area benefited, 3,842,297 acres; average rate per acre, 1.01d.; number of flowing bores, 58; total flow, 24,868,000 gallons a day; drains served, 2,627 miles.

4. **Other Basins.**—Two major areas bordering the Great Artesian Basin in Queensland carry artesian water. One is located on the western slopes of Cape York Peninsula and the other in the Dawson-Mackenzie River (Bowen) Basin. A small area in which flowing wells occur (the Gatton Basin) extends from Gatton to the coast.

Sub-artesian water supply from the Barkly Basin which extends into western Queensland from the Northern Territory, is referred to in the section dealing with the Northern Territory.

5. **Stock Watering.**—(i) *General.* A predominant interest in the field of water conservation has been the provision of stock and domestic water supplies in Queensland's great pastoral areas which contain more than 40 per cent. of the Commonwealth's cattle and about a seventh of the sheep. In addition to the stabilization of water supplies in the pastoral areas, the provision of water along stock routes for travelling stock has received much attention in recent years.

(ii) *Main Stock Routes.* During 1935, a scheme was inaugurated to water adequately stock routes in the western portion of the State including main trunk routes connecting Eromanga to Burketown, Charleville to Normanton, and Clermont to Einasleigh, with branches to railheads, a total distance of 3,117 miles. Watering facilities were also provided on subsidiary routes. Under the Stock Routes and Rural Lands Protection Act of 1944, a co-ordinating board was constituted, representative of Government departments and pastoral interests, under the direction of the Minister for Lands and with an officer of the Department as superintendent. His duty was, *inter alia*, to investigate and implement a long-range, co-ordinated plan for adequate watering of all stock routes throughout the State. Natural waters are being supplemented by artificial facilities at intervals of about 9 miles. Construction is supervised by the Irrigation and Water Supply Commission and by local authorities. On completion, facilities are vested in local authorities for control and maintenance. From 1935 to 30th June, 1961, 536 facilities had been completed, and at 30th June, 1961, 40 facilities were under construction or investigation.

(iii) *Channel Country Stock Routes.* Extensive investigations have been made of the Channel Country fed by inland rivers in the south-western corner of the State. This country is intersected by shallow and irregular flood channels through which huge volumes of flood waters pass in favourable seasons. Consequent on the flooding, a heavy growth of natural pastures is produced on the flooded lands, providing feed in quantities far in excess of that required for the normal stock population of the area. If flooding could be made more reliable by means of storages to create artificial floods, the pastoral resources of the area would be enormous. However, inquiries directed on these lines have revealed that little can be done to increase or stabilize the turn-off of fat cattle by artificial storage.

At 30th June, 1952, 41 watering facilities at an estimated cost of £300,000 had been proposed under a Commonwealth-State agreement for stock routes through, and in the approaches to, the Channel Country. By 30th June, 1961, 35 had been completed, while one sub-artesian bore and one excavated tank were under construction.

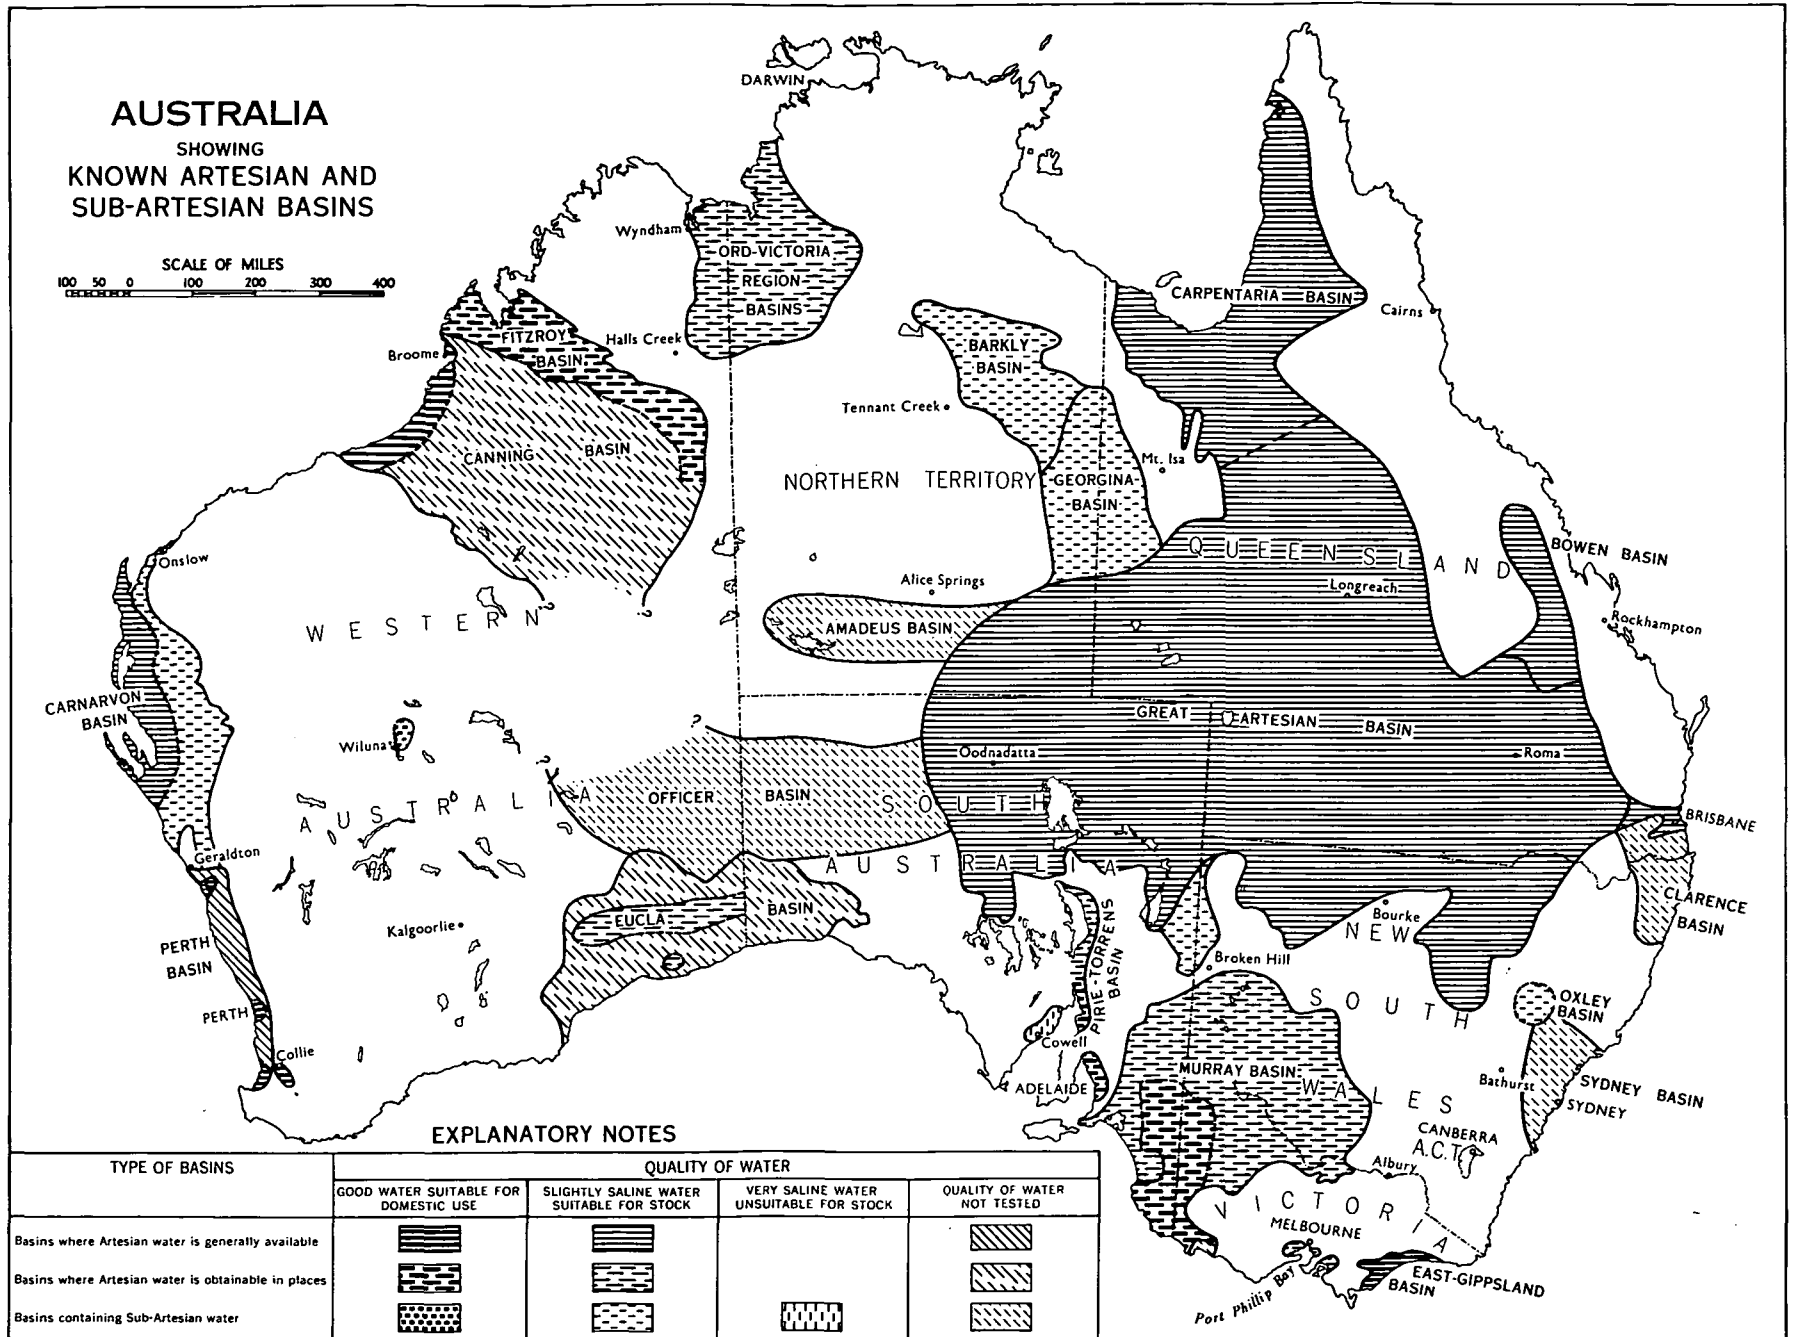

6. **Technical and Financial Assistance to Farmers.**—The year 1960-61 was the third year of operations under The Farm Water Supplies Assistance Act of 1958. The purpose of the Act is to:—

- (i) Improve the standard of stock and domestic water supply installations on individual holdings;
- (ii) Encourage greater development of individual irrigation schemes by—
  - (a) Modern methods of water conservation and water harvesting,
  - (b) Development and utilization of sub-surface supplies,
  - (c) Ensuring that such development is soundly planned, technically and economically;
- (iii) Provide greater stability of production and avoid losses in time of drought together with generally increasing production.

Basins where Artesian water is generally available				
Basins where Artesian water is obtainable in places				
Basins containing Sub-Artesian water				

Compiled from map "Underground Water" (1953) of the Atlas of Australian Resources and later information.

To achieve this purpose the Act authorizes the provision of technical and financial assistance to landowners for the investigation, design and installation of approved works of farm water supply. All projects for which finance is provided under the Act are carried out under Commission supervision, and for the payment of a small charge the Commission will supervise the construction of works designed by its staff, but for which the landowners do not require financial assistance under the Act.

During 1960-61, 721 requests (463 for technical assistance only, and 258 for technical and financial assistance) were dealt with in addition to advice on a further 641 requests on groundwater supplies. An amount of £290,340 was approved for advances under the Act in 1960-61.

7. **Hydro-electricity.**—An outline of Hydro-electricity Schemes operating in Queensland is given in the previous chapter (*see* p. 236).

## § 5. South Australia.

1. **General.**—(i) *Rainfall.* Brief particulars of the climatic conditions in South Australia are given on page 1129 of Official Year Book No. 37. (*See also* Chapter II.—Physiography, page 45 of this Year Book.)

(ii) *Administration.* Water supplies, other than irrigation works, are under the control of the Engineering and Water Supply Department, which administers the Waterworks Act governing the supply of water through mains in water districts for townships and farm lands. The Water Conservation Act provides for the construction of storages in non-reticulated areas, and authorizes the Minister concerned to “divert and impound the water from any streams or springs or alter their courses, and take water therefrom, or any other waters as may be found in, under, or on, any land entered upon for the purpose of supplying water to the inhabitants of any water district”.

(iii) *Methods of Catchment and Conservation.* Early in the history of the State the rights to all running streams, springs and “soaks” were vested in the Crown. The Water Conservation Act was passed in 1886 and, up to 30th June, 1961, more than 550 dams, tanks and “rainsheds” had been built or acquired by the State, in addition to 460 wells and 340 bores, at a total cost of £1,774,888. The “rainsheds” are timber frameworks roofed with galvanized iron to catch precipitation which is delivered to storage tanks and is available for surrounding settlers and travellers. Rainshed catchments vary from a few hundred square feet to four acres, discharging into tanks ranging from 2,000 to 500,000 gallons. Over most of the State, extraordinary precautions are taken to counteract evaporation, and pipelines in preference to open channels and covered storages are used for this purpose. Meters are attached to practically all services to check usage by individual consumers.

2. **Irrigation.**—In South Australia, irrigation is almost exclusively confined to the Murray Valley. Except for that held in various lock pools, no water from the Murray is stored in South Australia. Water is either pumped onto the land or gravitated from the river. The upper Murray of South Australia and the Mildura area of Victoria formed the cradle of Australian irrigation. South Australian irrigation commenced with an agreement between the Government and the Chaffey brothers in 1887 whereby an area of land at Renmark was made available for the establishment of certain irrigation works. Including land allotted for War Service Land Settlement purposes, the Department of Lands administers in the Murray Valley an area of 32,933 acres of irrigable high land, together with 9,532 acres of reclaimed swamp and 166,870 acres of non-irrigable land in the irrigation areas, and 29,794 acres of land temporarily leased and reserved for commonage or other purposes amounting in all to 239,129 acres. In addition, the Renmark Irrigation Trust controls 20,557 acres, of which 9,300 are irrigated. Water used for irrigation purposes in 1960-61 in the high land irrigation areas controlled by the Department of Lands was approximately 100,000 acre feet and, in addition, approximately 41,000 acre feet were applied to the reclaimed areas. In the Renmark area, approximately 35,000 acre feet of water were used for irrigation in 1960-61. The production of the upper Murray areas is almost exclusively fruit and vines. Principal crops are sultanas, currants, leixias, apricots, peaches, nectarines, pears and figs (mainly for dried fruit), wine grapes, and citrus fruits. Before irrigation, these semi-arid lands were of little productive value.

Renmark Irrigation Trust is administered by a local board of management consisting of seven members. This area differs from other South Australian irrigation areas in that

the land is freehold instead of leasehold and is self-contained and self-controlled. Every settler is entitled to vote for the election of Trust members. The Trust maintains 100 miles of channel for reticulation to 9,300 acres.

The following table shows the acreage devoted to various crops in the government-controlled and Renmark Irrigation Trust areas on the upper Murray, and in the government-controlled reclaimed swamp districts near the mouth of the Murray, which are devoted to dairying. It should be noted that these acreages are exclusive of areas of land irrigated privately by landowners. In 1960-61, a total of 102,023 acres under irrigation was reported in the annual Agricultural and Pastoral Census, a figure which includes areas administered by the Department of Lands and the Renmark Irrigation Trust.

3. **Water Supply Schemes.**—(i) *Adelaide Metropolitan Water Supply.* Adelaide derives its water from five reservoirs in the nearby Mount Lofty Ranges, and by means of pumping stations and a pipeline from the Murray River at Mannum. The reservoirs have a storage capacity of 51,497 acre feet. At present Mount Bold Dam is being raised to store an additional 18,365 acre feet. Additional pumps have been installed to give the pipeline a capacity of 65,000 acre feet a year.

A concrete arch dam is nearing completion at Myponga, and this will impound 22,000 acre feet of water. This storage will supply development projects south of Adelaide. To the north, the new city of Elizabeth receives water from South Para Reservoir in the Barossa system and from the metropolitan storages. The consumption for the whole area for the year 1960-61 was 80,735 acre feet, equivalent to a consumption of 96 imperial gallons per head per day. The capital cost to 30th June, 1960 was £36,573,780.

(ii) *Country Reticulated Supplies.* Areas extending to a distance of 90 miles north of Adelaide are supplied from the Warren, Barossa, and South Para Reservoirs (50,350 acre feet) in the Barossa Ranges. Agricultural towns and areas further north are supplied from Beetaloo, Bundaleer and Baroota Reservoirs, and the Morgan-Whyalla Pipeline. There is a supplementary supply from the Mannum-Adelaide pipeline through the Warren Reservoir. The 223-mile pipeline from Morgan to Whyalla can remove up to 10,000 acre feet of water a year from the Murray River. Work is commencing on a second main of more than double the capacity. A large part of Eyre Peninsula is supplied from the 240-mile Tod River Main. The 104-mile East Coast main will obtain water from the Tod River reservoir (9,160 acre feet), the sand beds of the Uley-Wanilla Basin and the newly developed Lincoln Basin. Along the Murray River, all towns are supplied from the river. Water from the river is also reticulated through adjacent farmlands for up to 30 miles. Surface and underground resources have been developed to supply most rural centres not covered by the larger schemes.

Water conservation and distribution works in country districts have cost £36,675,924 (exclusive of river control and irrigation works on the Murray River) and contain 6,889 miles of water mains.

4. **Underground Water.**—The occupied portion of South Australia is, on the whole, well endowed with underground water, and the extent of the several artesian basins is reasonably well known. There are also considerable areas, notably in the south-east of the State, in which ground water occurs. Quality varies widely, but a great deal is at least useful for watering stock, and this is the major use to which it is put.

The deepest portion of the Great Artesian Basin (in the north-east) is not extensively developed because development costs are high in proportion to the carrying capacity of the arid land. However, deep boreholes have been drilled by the Government to provide watering places along stock routes, and pastoralists rely largely on supplies from non-pressure aquifers at shallower depths. Marree township is supplied from this source, its deepest bore being 575 feet.

The use of the waters of the Murray Basin is essential to settlement in the Murray Mallee country and in the south-east of the State, especially for farms and township supplies. Mount Gambier draws its water from Blue Lake, which is fed from the Basin. Bores are used to supply Naracoorte, Bordertown, Pinnaroo, Penola, La.neroo, Coonalpyn, Nangwarry, Mount Burr, Kingston (S.E.), Parilla and Karoonda. The deepest bore in this Basin is 1,805 feet. Other towns which are supplied from bores include Mount Barker, Peterborough (supplemental to supplies from the Morgan-Whyalla pipeline), Warooka, Willunga and Port Lincoln as part of the Eyre Peninsula supply system.

Pastoralists, farmers, market gardeners and others have been assisted with expert advice on drilling, and the Government maintains and operates 30 drilling plants which to date have developed an underground water supply potential in excess of 140 million gallons of water per diem throughout the State. The whole of the Murray River Basin has been examined critically to ascertain the extent of land which could be used for lucerne, and considerable tracts of previously undeveloped country in the upper south-east, Kangaroo Island and Yorke Peninsula have been found to have usable water and are now being opened up.

Ground water resources surveys are undertaken continually by departmental geologists, the results being published in various bulletins and reports issued from time to time. The *Groundwater Handbook* published in 1959 by the Department of Mines provides a comprehensive detailed review of the State's ground water resources.

5. **Farm Water Schemes.**—While the Department of Mines and the Engineering and Water Supply Department give assistance to individual farmers in the provision of supplies from underground sources, a great part of the farming areas is supplied with water under pressure from the extensive distribution systems connected to various reservoirs or the Murray River.

6. **South-Eastern Drainage.**—Nature has played an ironic prank in the south-east of South Australia where it has been necessary to construct costly drainage schemes to dispose of surplus water. The area comprises a series of valleys or flats separated by low ranges parallel to the coastline which prevent natural drainage. The highest "range" is approximately 50 feet above the adjacent flat and the most easterly flat, some 50 miles from the coast, is 200 feet above sea level. The ranges are generally of poor soil or stony but the flats are fertile.

The Millicent Drainage System, completed in 1885, reclaimed 100,000 acres. The South-Eastern Drainage Area System, which is controlled by the South-Eastern Drainage Board, comprises drains constructed by the Government at national cost, plus those undertaken by the Government in co-operation with the landholders. The area is bounded on the east by the State boundary, and on the west by the sea coast. It extends from about 55 miles north of Kingston southerly to near Millicent and Kalangadoo. Up to 1948, about 430 miles of drains had been provided at a cost of £720,876. These were of a developmental nature intended more to promote the rapid removal of floodwaters than to provide a complete system of drainage. Since 1948, the complete drainage of the Biscuit, Reedy Creek and Avenue Flats in the Western Division has been in progress. The southern section of 260,000 acres, involving an excavation of 8,100,000 cubic yards, has been completed. Work is in progress on the Northern Section of 140,000 acres where 23 miles of the main outlet drain, involving the excavation of nearly 2 million cubic yards of material, have been completed. In addition, work has commenced on the construction of the main outlet drain for the Eastern Division where an area of 727,000 acres of land will benefit by drainage.

The capital cost of drainage in the South-Eastern Drainage Area System to 30th June, 1961 was £5,728,886, and the length of drains constructed was 715 miles.

## § 6. Western Australia.

1. **General.**—(i) *Rainfall.* Brief particulars of the climatic conditions in Western Australia are given on page 1133 of Official Year Book No. 37. (*See also* Chapter II.—Physiography, page 45 of this Year Book.)

(ii) *Administration.* Natural water rights in the State, with few exceptions, are vested in the Crown. Irrigation districts are administered by the Minister for Water Supply, Sewerage and Drainage under the Rights in Water and Irrigation Act 1914–1954, and he is advised by an Irrigation Commission representing the local irrigationists and governmental technical and financial branches. Water supplies in country areas in Western Australia coming under the provisions of the Water Boards Act 1904–1954, and the Country Areas Water Supply Act 1947–1960 are controlled either by the local authority or by the Water Supply, Sewerage and Drainage Department. Those controlled by the Department (except for some local water supplies to country towns still under the provisions of the Water Boards Act) form the Country Areas Water Supply, consisting of the Goldfields and Agricultural Water Supply, the Great Southern Towns Water Supply and local water supplies to country towns and districts. The Department also controls individual water supplies serving isolated mines, stock routes, and agricultural areas.

2. Irrigation.—(i) *South-West*. The main irrigation areas are situated along the South-Western Railway between the towns of Waroona (70 miles from Perth) and Dardanup (116 miles from Perth).

The Water Supply, Sewerage and Drainage Department controls three irrigation districts—Waroona, Harvey and Collie River—the total area irrigated in these districts during 1960–61 being 22,603 acres and the total water used 88,600 acre feet. The total of acre waterings (that is, the number of acres watered multiplied by the average number of waterings) was 141,379. Investigations are being carried out with a view to irrigating a further 30,000 acres south of the Collie River Irrigation District.

The Waroona Irrigation District (3,417 rated acres) is supplied from Samson Brook Dam (7,437 acre feet capacity) and Drakes Brook Dam (1,855 acre feet), the Harvey Irrigation District (14,369 rated acres) from Stirling Dam (46,191 acre feet) and the Harvey Weir (8,372 acre feet), and the Collie River Irrigation District (9,269 rated acres) from the Wellington Dam (150,107 acre feet). The Logue Brook Dam (19,246 acre feet) within the Harvey Irrigation District is currently under construction.

The following table shows acre waterings supplied to crops in the irrigation districts of Harvey, Waroona and Collie River during the seasons 1956–57 to 1960–61.

IRRIGATION, WESTERN AUSTRALIA: ACRE WATERINGS(a).

Year.	Pasture.	Fodder.	Potatoes.	Other vegetables.	Orchards and Vineyards.	Flax, Broom Millet, and Miscellaneous.	All Crops.
1956–57 .. ..	129,502	3,757	3,995	3,317	1,024	119	141,714
1957–58 .. ..	133,634	5,384	3,299	2,947	972	..	146,236
1958–59 .. ..	136,940	6,324	1,858	2,495	1,014	1	148,632
1959–60 .. ..	112,193	4,774	1,351	1,978	729	844	121,869
1960–61 .. ..	133,185	3,886	1,780	1,964	507	57	141,379

(a) Number of acres watered multiplied by average number of waterings.

(ii) *General*. In 1960–61, the total area irrigated in Western Australia was 48,551 acres made up of pastures (24,652 acres), vegetables (9,076 acres), fruit (8,335 acres), vineyards (897 acres) and other crops (5,591 acres).

An area of approximately 650 acres of Gascoyne River flats adjacent to Carnarvon is under irrigated cultivation. The principal crops are bananas and beans, but others such as tomatoes are also grown. For this agriculture, some 130 acre feet of water a week are drawn from river underflow.

On the Liveringa flood plain, 65 miles south east of Derby, commercial production of rice has been achieved following successful experimental work. Irrigation water from the Fitzroy River is diverted through Uralla Creek, an anabranch, for 25 miles to the rice growing area where a natural storage of approximately 1,200 acre feet exists. During periods of low flow in the Fitzroy River, the supply of water is augmented by pumping. Further storage with a capacity of 4,500 acre feet has been provided by the construction of a dam on Uralla Creek 18 miles from the Fitzroy River. A weir which is under construction across the Fitzroy River will provide gravity flow to Uralla Creek while the Fitzroy River is flowing.

The Ord River in the Kimberley Division of Western Australia traverses a tropical area served with monsoonal rains of irregular incidence and quantity, varying from 20 inches in the south to 30 inches in the north. The hottest months (December to March) are also the months of highest rainfall. Communications and population are sparse. The Western Australian Government is considering a proposal to build a dam to conserve 3,500,000 acre feet of water, equipped with a hydro-electric plant, which might supply water for an area of some 200,000 acres agriculturally and topographically suitable for irrigation. Investigations show that the climate and soil conditions are suitable for the cultivation of sugar cane, rice, cotton, safflower and various oil seeds. The economic production of these and other crops, as well as the possible use of such irrigation areas for fattening cattle, is being examined at the Kimberley Research Station on the Ord River. Construction of a diversion dam at Bandicoot Bar, now in progress some 30 miles downstream from the main dam site, will enable a number of pilot irrigation farms to be established.

3. **Water Supply Schemes.**—(i) *Metropolitan.* Particulars relating to the Metropolitan Water Supply are given in § 5 of Chapter XIX., Local Government.

(ii) *Goldfields and Agricultural Water Supply.* Western Australia has one of Australia's most spectacular water supply schemes, and a brief account of its development will be found on page 1134 of Official Year Book No. 37. Mundaring Reservoir on the Helena River, 26 miles from Perth, is the source of water supplied to the Eastern Goldfields and has a capacity of 62,435 acre feet and a catchment of 569 square miles. The water passes through 346 miles of main pipeline, mostly steel and 30 inches in diameter, equipped with eight pumping stations.

Maximum pumping capacity from Mundaring Pumping Station is 13.3 million gallons a day with provision to increase this to 18.5 million gallons a day. The total capacity of all receiving, regulating, standby and service tanks along the main pipeline is 154 million gallons, which includes three standby reservoirs at Kalgoorlie having a combined capacity of 60 million gallons.

Hundreds of miles of branch pipelines have been laid to mining areas, agricultural areas and country towns, a notable one being the Norseman extension of 101 miles. The system serves some 83 towns and water is reticulated to 3,800,000 acres of mixed farming lands. The total length of pipelines is 3,528 miles and the number of services is 23,728. The total quantity of water pumped from Mundaring Reservoir in 1960-61 was 3,168 million gallons. The total cost of the scheme to the end of 1960-61 was £17,290,300, of which the Commonwealth Government contributed £3,318,400 under the terms of the Comprehensive Water Supply Scheme.

District water supply schemes established for the purpose of supplying certain country towns and mixed farming lands have been absorbed into the Goldfields and Agricultural Water Supply. For further particulars see Official Year Book No. 37, page 1135.

(iii) *Comprehensive Water Supply Scheme.* A comprehensive water supply scheme to supplement water supplies to the goldfields, agricultural areas, and country towns, authorized in 1947 as a joint work between the Commonwealth and State Governments and estimated to cost £10,200,000 is under construction in two main parts. The northern section is an enlargement and extension of the Goldfields and Agricultural Water Supply. The southern section is the Great Southern Towns Water Supply. Linked with Wellington Dam (initially an irrigation work on the Collie River) by 80 miles of 30-inch diameter pipe through three pumping stations to Narrogin, it now supplements the existing water supplies to country towns along the Great Southern Railway, north to Brookton and south to Katanning. The raising of the impounding wall of Wellington Dam to increase its storage to about 150,100 acre feet was completed in 1960. Expenditure on the Scheme to 30th June, 1961, amounted to £9,915,300.

(iv) *Local Water Supplies.* Local schemes other than as above comprise those in the remaining agricultural and mining areas, including the North-west and Kimberley Divisions. Seventy-six separate reticulated water supplies serve country towns and districts. Of these, seventy-two are controlled by the Water Supply, Sewerage and Drainage Department and the remainder by local authorities.

(v) *Commonwealth and State Government Railways.* Railways of the Commonwealth and State Governments make independent provision for supplies of water for their own purposes, although considerable additional quantities are consumed by the Railways from other sources, e.g., Public Works and Metropolitan Water Supply Departments.

(vi) *Catchments.* The water supplies to these country schemes come from stream flow, dams, tanks, wells and bores.

A total of 72 rated stream gauging stations is operating in the South-west, North-west and Kimberley Divisions. Three types of catchment peculiar to this State developed in connexion with local water supplies and deserving special mention are:—rock catchments, which consist mainly of clear granite out-cropping rock, from which the overall run-off from rain amounts to approximately 40 per cent.; bituminous catchments, which are areas which have been sealed with emulsified bitumen—some hundreds of acres have been so treated and yield a run-off of approximately 80 per cent. of the rainfall; and roaded catchments, where selected areas of a catchment are cleared, graded and formed into roads to assist in obtaining additional rainfall run-off.

4. **Underground Water.**—Individual farmers, orchardists, market gardeners and others pump groundwater from wells and bores, using windmills, engines or electric power. Water is also obtained from artesian and sub-artesian bores. Local artesian aquifers are utilized for town supplies at Bunbury and Busselton, while underground water is piped from the Wicherina Basin (in the Perth Basin) for the town supply at Geraldton. The Public Works Department hires out to local authorities boring plants which are then hired out to farmers to assist their boring operations. In addition, the department operates its own boring plants and contracts with private firms in connexion with water supply works.

Considerable advances in the knowledge of aquifers and quality of water in the main sedimentary basins have been made as a result of the extensive geological surveys in connexion with oil exploration during the past ten years and most of these results are now in the course of publication. The Geological Survey of Western Australia has established a Hydrological Division to investigate and advise on the underground water resources of the State. A detailed survey of the Perth Basin, extending from Northampton to Augusta, is in progress. The Mines Department Drilling Section, with its own plant and by separate contracts, drills the exploratory holes recommended by the Geological Survey.

## § 7. Tasmania.

1. **General.**—(i) *Rainfall.* Brief particulars of the rainfall pattern in Tasmania are given on page 1136 of Official Year Book No. 37. (*See also* Chapter II.—Physiography, page 45 of this Year Book.)

(ii) *Main Purposes of Conservation and Utilization.* Owing to the generally more adequate rainfall in Tasmania, scarcity of water is not such a problem as it is in most mainland areas, though not all streams are by any means permanently flowing. The only large scale conservation by reservoirs is for hydro-electric power generation, but there are some moderately sized dams built by mining interests, and by municipal authorities for town water supplies.

Until a few years ago, irrigated areas were negligible except for long-established hop fields, but there is a rapidly extending use of spray irrigation on orchards and pastures, and to some extent on potatoes and beans. Up to the present, there has been almost complete dependence on natural stream flows, but the need for some regulating storages is now apparent. A few farmers are constructing storages of their own, and the extension of this practice is foreseen as the logical solution in most areas, as valleys are narrow and steep sided. Single large reservoirs cannot economically serve large areas of suitable land, as nearly every valley is separated from others by pronounced hills, prohibiting the construction of cross-country channels.

Underground water is generally of poor quality through mineralization, but a small quantity, exploited to a minor degree by bores and pumps, exists over an area in the midlands, and on King Island.

(iii) *Administration.* Municipal water supply is primarily the responsibility of local Councils, subject to approval of plans and finance by the Rivers and Water Supply Commission. This body came into existence in September, 1958, taking over all functions of the old Water, Sewerage and Drainage Board as well as other duties and powers.

With regard to water, the Commission does not own the waters of streams and lakes, but is empowered to take them, or issue licences, subject to pre-existing statute and common law rights. These include water reserved for specific industries, municipal requirements, and ordinary riparian rights. The Commission is also concerned with Drainage Trusts' operations, river improvement, including repairs after flood damage, and stream gauging.

2. **Hydro-electricity.\***—With the exception of a small diesel plant at King Island, electricity generation in Tasmania has resulted entirely from the development of its plentiful waters, and on a world basis this State ranks second to Norway in electricity consumption per head of population. The Hydro-Electric Commission, the authority controlling the generation of electricity in Tasmania, conducts a continuous survey of the water power resources of the State assisted by modern methods such as aerial photography and geo-physical exploration.

\* *See also* Chapter VII.—Electric Power Generation and Distribution, p. 243.

Most of the water potential is located on the Central Plateau, with an area of about 1,500 square miles at an altitude of from 2,000 to 4,000 feet, and subject to rainfall of from 30 inches a year in the east to 80 inches on the western perimeter. On the plateau are a large number of lakes which provide the means for storage at low cost. These include Great Lake with an area of 58 square miles, Lake St. Clair and Lake Echo each more than 12 square miles, and others of smaller area.

The Derwent River and its tributaries, which flow south-easterly, carry off by far the greatest part of the water which falls on the plateau, and these rivers are therefore the most abundant source of power. They have been the cheapest to develop to date and most of the existing generating stations are located on them.

The three main rivers running westerly from the plateau—the Arthur, Pieman and Gordon—have only a small portion of their catchment areas at high level, but they run through regions of high rainfall and their power potentials are considerable. However, because of inaccessibility and climate, development of these rivers may be rather expensive and has been deferred so far in favour of more convenient schemes.

Rivers draining from the plateau towards the north and north-west coast, including the Emu, Forth and Mersey, have small catchments at high levels and no natural storages.

Two other important water power sources, independent of the Central Plateau, are the South Esk River in the north and the Huon River in the south. A power station at Trevallyn, near Launceston, utilizes water from the South Esk. The Huon has a large low-level catchment in the high-rainfall area near the west coast. Storage could be provided on this river at a reasonable cost and, because of its proximity to Hobart, a future power station would have considerable value for peak load development.

**3. Industrial.**—Three principal industrial schemes have been installed privately. Australian Newsprint Mills Ltd. pump approximately 10 million gallons a day from the Derwent River at Lawitta for the Boyer Mills. Associated Pulp and Paper Mills Ltd. pump several million gallons a day from the Emu River at Burnie, and Titan Products Pty. Ltd. reticulate water from Chasm Creek to their factory at Heybridge. In addition, the State Government has constructed a regional water scheme to serve the aluminium refinery at Bell Bay on the River Tamar and to supply several municipalities with bulk water for domestic and industrial purposes.

A second regional water scheme draws water from the River Derwent at Lawitta to provide domestic and industrial supplies in five southern municipalities. Potential sources capable of greater development without storage exist on the Derwent, South Esk, Huon, Lake, Mersey and Forth Rivers. There is also a great reserve of untapped permanent streams in the western half of the State which is largely unsettled. Diversion to the eastern side of the watersheds is not regarded as practicable.

**4. Irrigation.**—There are no State irrigation projects at present, but the Rivers and Water Supply Commission is investigating the possibility of establishing a storage for the Coal Valley. Preliminary investigations have also been made in the Jordan Valley. The Water Act 1957 provides for irrigation works to be undertaken by municipalities and by Trusts constituted for the purpose, but no such works have been undertaken to date. All systems operating are privately owned, and with one exception (at Bushy Park) are single-farm units. At Bushy Park, a small system serves a group of properties. The larger proportion of the area under irrigation is watered by gravitational systems and the remainder comprises areas devoted to vegetables and served by municipal water supplies or private spray systems. Irrigation in Tasmania was applied in 1960–61 to 18,934 acres devoted to: pastures (10,369 acres); fruit (3,311 acres); hops (1,364 acres); vegetables (2,103 acres); and other crops (1,787 acres).

## § 8. Northern Territory.

**1. Climate and Topography.**—Some particulars of the climate and main topographical features of the Northern Territory are given on page 1138 of Official Year Book No. 37, and in this issue information on climatic conditions will be found in Chapter II.—Physiography, and a brief outline of contour and physical characteristics in Chapter V.—The Territories of Australia.

2. **Administration.**—Under the Control of Waters Ordinance 1938-1959 of the Northern Territory, natural waters are vested in the Crown. Where a watercourse or lake forms a boundary of any land alienated by the Crown, the beds and banks are deemed to remain the property of the Crown (except in special cases) and diversion of water is prohibited except under prescribed conditions. There is a Water Resources Branch in the Northern Territory Administration under the control of a Director. The functions of the Branch include systematic stream gauging, collection of data on surface and underground water supplies, planning of water use for irrigation and town water supplies, and flood prevention and control.

Another function of the Branch, which is increasing in importance as it builds up a body of technical data and information about the Territory's water resources, is the dissemination of this knowledge by the provision of advice and assistance to the public and professional drillers.

3. **Underground Water.**—The marked seasonal rainfall over the whole of the Northern Territory is one of the basic factors affecting the pastoral industry which provides the bulk of the Territory's income. The inadequacy of surface water during the dry season emphasizes the importance of underground water supplies in the Territory, where most of the cattle population is dependent on underground supplies for three to five months each year.

Rainfall is one of the factors controlling cattle population, but geological features, controlling both soils and the storage of underground water, are equally important. In the northern-most portion of the Territory, which receives from 25 to 60 inches of seasonal rainfall a year, surface water supplies are, in general, adequate for the pastoral industry. Despite this, however, this area has a comparatively low carrying capacity for cattle, and the pastoral industry is concentrated more in inland areas where feed retains more nutritive value in the winter, despite dry conditions.

South from this well-watered northern-most portion, the Territory becomes progressively drier, with an average annual rainfall of only 5 inches at the margins of the Simpson Desert in the south-east corner. In the lower rainfall areas, the search for potable underground water becomes exacting, but in the Ord-Victoria Region and the Barkly Tablelands the best pastures are generally in areas where sub-surface conditions are suitable for the storage of underground water.

In the Ord-Victoria Region, the best grass lands overlie volcanic rocks and extend over some 10,000 square miles. Ground water is obtained in shallow bores averaging 70 to 80 feet in depth and producing small supplies which range up to 1,500 gallons an hour. For the most part, water is stored in joints, faults or cracks in the rocks, although in places sub-artesian conditions pertain, and, on the whole, selection of bore sites is difficult. There are also small sedimentary basins in the region, some of which yield sub-artesian, and in places artesian, water and provide areas of good pastures.

The Barkly Tablelands, which extend into Western Queensland, overlie flat-lying limestone, sandstone and shale of the Barkly Basin. In most places, underground water is under pressure (sub-artesian), but no flowing bores are known. Sandstones and beds of limestone with fractures and solution cavities provide a number of aquifers within the Basin. The hydraulic surface (to which pressure water will rise in bores) ranges between 500 and 600 feet above sea level and adequate supplies for the watering of stock are available at depths ranging from 150 to 400 feet from the surface. The water from over 90 per cent. of the bores is suitable for stock and over 50 per cent. of it is suitable for human consumption. Investigations by the Commonwealth Bureau of Mineral Resources indicate that underground water supplies will be more than sufficient for the future development of the pastoral industry on the Tablelands.

In the Alice Springs district, valuable pastures occur on a great variety of rock types, and from some of these very little underground water is available. Many shallow bores obtain water from alluvium near stream channels. There are also many successful bores in porous sands and limestone in Mesozoic and Cainozoic sedimentary basins and in some Upper Proterozoic and Palaeozoic limestones and sandstones. Boring in the metamorphic rocks and granite of the basement has, on the whole, met with little success. In many areas, the underground water is of poor quality.

Considerable research has been undertaken in recent years into increasing the Alice Springs water supply from alluvial basins and provision of a water supply for the mining town of Tennant Creek from the Cabbage Gum Basin, a small basin in deeply weathered Precambrian rocks, 15 miles south of the town.

Up to 30th June, 1961, 2,510 bores and wells had been registered in the Territory. Of these, 1,655 were on pastoral properties, 71 on agricultural properties, 122 served town and domestic water supplies, 20 were located on mining fields, 35 were being used as test-bores and 369 were used by Defence Departments during World War II. The number of registered stock route bores established by the Government is 238.

4. **Irrigation.**—There are no large-scale water conservation projects in the Territory with the exception of the Manton Dam (12,700 acre feet), which serves Darwin with a reticulated supply. Some water is drawn from the rising main between the Manton Dam and Darwin for irrigation purposes, but the trend is for properties in this area to develop their own water supplies, either by boring or by pumping from watercourses or lakes. Investigations for a further dam site to augment Darwin's water supply and to provide reticulated water to properties without natural waters are expected in the near future. Hydrological investigations are being carried out by the Administration to determine the supply of water and the best methods of control and use in the potential rice-growing areas of the Territory. One hundred and twenty gauging stations were in operation in the Territory at 30th June, 1961, under the control of the Administration's Water Resources Board. Of these, 68 are equipped with automatic water level recorders. The remaining 52 are staff gauges. Sixteen gauging stations are for recording changes in water level only, one of these being the Darwin Harbour Tide gauge, which is operated on behalf of the Harbour and Marine Branch. The other 15 gauges of this kind are scattered over the north sub-coastal plains and measure the depth of flooding over the plains. The information is required for future agricultural production in these areas, notably rice culture. Agricultural activity in the Territory is not extensive, being confined to the Darwin, Adelaide River, Coomalie Creek, Daly River, Katherine River and Alice Springs areas with only small acreages being utilized.

The Katherine River appears to offer irrigation potentialities on the level soil below the township. Approximately 14 properties in and around Katherine are at present drawing water from the Katherine River for irrigation purposes, vegetables and pastures being the usual crops grown. The Katherine River passes through a gorge upstream of the town under conditions which appear suitable for dam construction. The Administration and the Commonwealth Scientific and Industrial Research Organization are investigating the potentialities of the Katherine area for agricultural production.

## § 9. Papua and New Guinea.

1. **Rainfall.**—Rainfall in Papua and New Guinea varies considerably from approximately 250 inches near Lindenhafen (New Britain) and 231 inches at Kikori (Papua) to about 70 inches near Marienburg (New Guinea) and 40 inches at Port Moresby (Papua).

2. **General.**—For a general description of these territories *see* Chapter V.—The Territories of Australia, page 129, of this Year Book. Irrigation has not been developed on any organized basis owing to the availability of high rainfall and the nature of agricultural development.

The Territory of Papua and New Guinea is well served with large rivers deriving their water from heavy tropical rains and high mountains which rise to over 14,000 feet. However, complete data regarding water resources are not available.

The largest rivers in the Territory include the Fly (a description of which is given in Chapter XXVI. of Year Book No. 40), the Sepik (700 miles), the Ramu (450 miles), the Purari (300 miles) and the Markham (110 miles).

The main water conservation interest in New Guinea at present is the hydro-electric potential, which is extensive. An outline of schemes at present in operation is given in the previous chapter.

## CHAPTER IX.

### POPULATION.

At the time of preparation of this chapter the latest results available from the Census of 30th June, 1961, were those derived from the preliminary check of the Census schedules. These figures are subject to amendment on completion of tabulation. The summarized final results of the Census will be included in the Appendix to this Year Book. Population estimates shown in this chapter for the intercensal period 1954 to 1961 are revised figures which have been adjusted in accordance with preliminary results of the 1961 Census. They will be further revised when final Census figures are available.

In general, the remaining statistics in this chapter cover the year 1961. More detailed figures will be found in the annual bulletin, *Demography*, and current statistics are published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the *Australian Demographic Review* (a mimeograph series issued at intervals throughout the year on population and vital statistics).

Statistics of the population of the principal countries and continental groupings of the world are set out in § 15 of this chapter.

#### § 1. Population Statistics.

Population statistics for Australia or the component States and Territories at specific dates are of two types.

- (i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.
- (ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date.
  - (a) Original estimates for dates subsequent to a census made before another census is taken. These estimates represent the population ascertained at the Census, plus natural increase and recorded net migration since the Census. As complete records of interstate migration are not available, the estimated State or Territory populations so derived are approximate, and are subject to revision when the actual population of each State or Territory is ascertained at the next Census. For some States such revisions are substantial.
  - (b) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations and thus effect adjustment for unrecorded movement of population in the intercensal period. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-month period, such mean is calculated as described in § 4. As populations at specific dates are used in these calculations, consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy, all Australian population statistics shown in this issue of the Official Year Book for dates up to 30th June, 1954, and all mean populations for calendar years up to 1953 and financial years up to 1953-54 are final. Population statistics for dates or years subsequent to these have been revised in accordance with preliminary results of the Census of 30th June, 1961. These figures will be further revised when the final results become available.

Since the establishment of the Commonwealth Bureau of Census and Statistics, the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration records, both oversea and interstate, and efforts were directed towards their improvement. The 1911 Census disclosed an error in the pre-censal estimates equivalent to proportions of 14.5 per cent. and 10.0 per cent., respectively, of recorded male and female oversea departures from Australia. These proportions were used as adjusting factors to recorded oversea departures during the intercensal period 1911-21. These adjusting factors were

reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were discontinued altogether after the 1933 Census. Since then, the accuracy of the records of oversea migration has been such that little adjustment to recorded figures is now necessary for Australia as a whole.

It is improbable that the same degree of accuracy as has been attained in the record of oversea migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, rail and air, but it has not been practical, with occasional important exceptions, to record the movements by road.

## § 2. The Census.

1. **Census-taking.**—Although “musters” of the population were carried out at least annually from 1788 to 1825, the first regular census in Australia was not taken until 1828, when a count of the population of the Colony of New South Wales was made. Subsequent censuses were taken sporadically in the various colonies until 1881, when a census was taken on the same date throughout Australia.

In 1891 and 1901, census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first census of the Commonwealth of Australia. The second was taken in 1921, the third in 1933, the fourth in 1947, the fifth in 1954, and the sixth in 1961.

2. **Population recorded at Censuses.**—State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1961 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter 1, § 4 and § 5. The total populations recorded at the censuses taken in the Colonies from 1828 to 1881 were shown in Official Year Book No. 40, page 326.

(a) Based on preliminary results of the Census of 30th June, 1961. These figures will be revised when the final results become available. (b) Includes Australian Capital Territory prior to 1911. (c) Part of New South Wales prior to 1911.

NOTE.—Minus sign (-) denotes decrease.

§ 3. Growth and Distribution of Population.

1. Growth of Population.—The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population at 31st December in 1900 and thereafter at decennial intervals to 1960. Each year from 1957 to 1961 is included in order to show recent growth in greater detail.

ESTIMATED POPULATION: 1900 TO 1961.

(a) Part of New South Wales prior to 1911. (b) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment. (c) Revised figures based on the preliminary results of the Census of 30th June, 1961. These figures will be further revised when the final results become available.

Estimates of population for intercensal years are obtained in the manner outlined in § 1.

The estimated population at 31st December each year from 1788 to 1946 was shown in *Demography*, Bulletin No. 67, 1949, and for the period 1881 to 1960 in *Demography*, Bulletin No. 78. A graph illustrating the growth of the population of Australia and of each State and Territory appears on page 307.

2. **Present Numbers.**—The population of Australia at 31st December, 1961, was estimated at 10,603,936 persons, of whom 5,354,591, or 50.50 per per cent., were males and 5,249,345, or 49.50 per cent., were females. The increase during 1961 was 212,016, equal to 2.04 per cent., males having increased by 101,518, or 1.93 per cent., and females by 110,498, or 2.15 per cent.

3. **Proportion of Area and Population, Density and Masculinity.**—The previous table shows the estimated number of persons in each of the States and Territories, at 31st December, 1961. In the following table, the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population.

## DENSITY AND MASCULINITY OF POPULATION, 1961.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Proportion of Total Area. (Per cent.)	Proportion of Estimated Population, 31st December, 1961. (Per cent.)			Density. (a)	Masculinity. (b)

(a) Number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

4. **Urban and Rural Distribution.**—A table showing the distribution of the population between metropolitan urban, other urban, and rural areas in each State and Territory at the Census of 30th June, 1954, was included in earlier issues of the Official Year Book (see No. 47, p. 291). Particulars for the 1961 Census may be found in the Appendix to this issue.

5. **Capital Cities: Australia and Other Countries.**—The following table presents a comparison of the populations of the capital cities of the Australian Commonwealth and States with the capitals of various other countries. Unless otherwise indicated populations, of urban agglomerations are shown.

POPULATION OF CAPITAL CITIES: AUSTRALIA AND OTHER COUNTRIES.

(a) Metropolitan Area. (b) Entire Urban Area. (c) Non-municipal town, i.e., a town not separately incorporated for purpose of local government.

7. Urban Areas Outside Metropolitan Areas.—The proportion of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Censuses was shown in Official Year Book No. 39, pages 522-3. In Official Year Book No. 40, page 334, a table was given showing aggregate population at the 1947 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more inhabitants, irrespective of whether such centres were incorporated separately or not. In addition, the proportion of the aggregate population of these cities and towns to the total population of the State was shown. Similar particulars for the 1954 Census were included in earlier issues of Official Year Book (see No. 47, p. 295). Particulars for the 1961 Census may be found in the Appendix to this issue.

8. Principal Cities in the World.—The following table shows the population of the world's largest cities at the latest available date:—

POPULATION OF THE WORLD'S LARGEST CITIES.

§ 4. Mean Population.

1. General.—Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods.

2. Method of Calculation.—From 1901 onwards the mean population for any year has been calculated by the formula:—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where a, b, c, d and e, respectively, are the populations at the end of the quarter immediately

preceding the year and at the end of each of the four succeeding quarters; e.g., in the case of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, *e*.

3. Results.—(i) *Calendar Years*. The following table shows the mean population of each State and Territory for the calendar years 1952 to 1961.

(a) Recalculated from population estimates revised in accordance with the preliminary results of the Census of 30th June, 1961.

## § 5. Elements of Increase.

1. General.—The two factors which contribute to the growth of a population are the "natural increase", i.e., the excess of births over deaths, and the "net migration", i.e., the excess of arrivals over departures. The "total increase" of the population is obtained by combining natural increase with the increase by net migration. However, comparison of the total increase so obtained with that derived by subtracting the population recorded at one Census from that recorded at the next Census reveals differences which can be attributed partly to differences in the coverage of the Census enumerations, and partly to deficiencies in the records of the elements of increase. The principal source of error in the elements of increase in earlier years lay in migration records, oversea as well as interstate, and adjustments were made to these records for the intercensal periods. With the gradual improvement of records of oversea migration it was considered that from July, 1933, it was no longer possible to attribute the much smaller differences solely to records of oversea migration, and since that date the differences, when ascertained for the intercensal period, have been shown as a separate item, with the elements of increase left as recorded. However, it has not been possible to effect a similar improvement in the records of interstate migration, and much of the difference between the figures for particular States may be attributed to deficiencies in this factor.

2. Elements of Increase, 1936-1961, Australia.—In the following tables, particulars are given of the elements of increase for each five-year period from 1936 to 1960 and for each of the years 1954 to 1961. The numbers of males, females and persons are shown in the first table. In the second table the rates of natural increase, net migration and population growth for persons are shown.

1961..	151,025	61,523	-532	212,016

(a) Excess of births over deaths. For the period September, 1939, to June, 1947, the following deaths of defence personnel, whether overseas or in Australia, have been included: 1936-40, males 461 (includes 272 male deaths of defence personnel registered in civil registers in 1940), female 1, persons 462; 1941-45, males 36,348 (includes 418 male deaths of defence personnel registered in civil registers in 1941), females 144, persons 36,492; 1946-50, males 716, females 13, persons 729. (b) Excess of arrivals over departures. Excludes troop movements for the period September, 1939, to June, 1947. (c) Adjustment of population on the basis of the final results of the 1947 and 1954 Censuses and the preliminary results of the 1961 Census. For periods subsequent to the Census of 30th June, 1961, the intercensal adjustment will not be known until after the next Census has been taken.

## POPULATION: RATES OF INCREASE, AUSTRALIA.

(Persons.)

Period.	Rate of Natural Increase.(a)	Rate of Net Migration.(b)	Rate of Population Growth.(c)
			Per cent.

(a) Excess of births over deaths per 1,000 of mean population. Excess of births over civilian deaths for the period September, 1939, to June, 1947. In calculation of these rates the following deaths of defence personnel registered in civil registers, 1940 males 272, and 1941, males 418, have been included. (b) Excess of oversea arrivals over departures per 1,000 of mean population. (c) Total increase in population during the period expressed as a proportion (per cent.) of the population at the end of the previous period.

3. Analysis of Intercensal Increase, 30th June, 1954, to 30th June, 1961.—In the following table, particulars are given for States and Territories of the recorded elements of increase and the intercensal adjustment for the whole of the seven-year intercensal period from 30th June, 1954, to 30th June, 1961.

As stated in § 1. of this chapter (see p. 285), complete records of interstate migration are not available. For this reason, the differences between the estimated populations and those recorded at the Census of 30th June, 1961, i.e., the intercensal adjustment were substantial for some States. The figures shown in the following table for the Census of 30th June, 1961, are preliminary and subject to revision when the final results become available. Any such revision will affect the figures of intercensal adjustment.

(a) Census. (b) Excess of births over deaths. (c) Excess of arrivals over departures for recorded interstate and overseas migration. (d) Adjustment of population on the basis of the preliminary results of the Census of 30th June, 1961. Subject to further revision when final Census results are available. (e) Preliminary results of the Census of 30th June, 1961.

4. Rate of Population Growth.—(i) *Australia.* The annual percentage rate of population growth is computed by the compound interest formula. The formula is as follows:—

$$P_1 = P_0 (1+r)^t$$

where  $P_0$  and  $P_1$  are the populations at the beginning and end of the period respectively,  $t$  is the number of years intervening and  $r$  is the annual rate of growth.

The annual rates of growth per cent., of population in Australia during each of the years 1952 to 1961 were as follows:—1952, 2.48; 1953, 1.87; 1954, 2.10; 1955, 2.44; 1956, 2.35; 1957, 2.24; 1958, 2.09; 1959, 2.15; 1960, 2.27; and 1961, 2.04.

The annual rate of population growth during the present century has been 1.71 per cent., but the results from year to year have deviated widely from this figure. In the following table, the period 1st January, 1901, to 31st December, 1961, has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

## POPULATION: PERIODICAL RATES OF GROWTH.

Period.	Interval (Years.)	Total Increase. ('000.)	Average Annual Numerical Increase. ('000.)	Annual Rate of Population Growth. (Per cent.)		
				Natural Increase.	Net Migration.	Total.
1901 to 1913 ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 ..	10	862	86	1.50	0.15	1.64
1924 to 1929 ..	6	680	113	1.28	0.64	1.88
1930 to 1939(a) ..	10	569	57	0.82	0.03	0.85
1940 to 1946(a) ..	7	513	73	1.05	0.01	1.01
1947 to 1952(a) ..	6	1,222	204	1.41	1.23	2.54
1953 to 1961 ..	9	1,864	207	1.44	0.83	2.17

(a) For the period September, 1939, to June, 1947, overseas movements of Australian defence forces have been excluded and deaths of members of these forces, whether occurring in Australia or overseas, have been included.

Up to 1913, the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914–18 War was a dominating influence in the decade 1914–23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. From 1924 to 1929, more settled and prosperous conditions were experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression and immigration ceased—in fact, Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the annual rate of growth of the population fell to 0.85 per cent. With the outbreak of war in 1939, Australia entered a new phase in her demographic history. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The period 1947 to 1961 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in very high net gains in each of the four years 1949 to 1952. The annual rate of growth for the period 1947 to 1952 was 2.54 per cent., and from 1953 to 1961 2.17 per cent.

Rates of population growth from 1881 are shown for each State and Territory of Australia in the annual bulletin, *Demography*.

(ii) *Comparison with Other Countries.* Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the years 1953–1959 are shown in the table in § 15. International Statistics.

## § 6. Density.

1. **General.**—From certain aspects, population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,971,081 square miles and an estimated population at 31st December, 1961, of 10,603,936 excluding full-blood aborigines, has a density of only 3.57 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continents, the densities in 1959 were approximately as follows:—Europe (excluding U.S.S.R.), 221; Asia (excluding U.S.S.R.), 156; U.S.S.R., 24; Africa, 20; Northern and Middle America, 28; and South America, 20. The population density of Australia in 1959 was 3.4; about one-sixth of that of South America and of Africa; about one-seventh of that of U.S.S.R.; about one-eighth of that of Northern and Middle America; about one-forty-sixth of that of Asia (excluding U.S.S.R.); and about one sixty-sixth of that of Europe (excluding U.S.S.R.).

On account of the large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole, the figure has increased from 1.29 per square mile in 1901 to 3.57 in 1961. The rise in density from 1901 to 1961 in each State and Territory was:—New South Wales 4.45 to 12.78, Victoria 13.77 to 33.57, Queensland 0.76 to 2.28, South Australia 0.95 to 2.58, Western Australia 0.20 to 0.76, Tasmania 6.68 to 13.89, Northern Territory 0.01 to 0.05, and Australian Capital Territory 2.05 (in 1911) to 66.12. When comparing the density of population of the several States, consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The proportion of the area of Australia receiving less than 10 inches of rainfall is 38 per cent.; that of the various States is:—New South Wales, 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; and Tasmania, nil.

2. **Main Countries of the World.**—The number and density of population of the principal countries and continental groupings of the world are shown in the table in § 15. International Statistics.

## § 7. General Characteristics.

1. Sex Distribution.—(i) States. The number of males to each hundred females has been adopted as a measure of the "masculinity" of the population. The masculinity of the population of each of the States may be obtained for each year from 1796 to 1900 from the table on pages 163–5 of Official Year Book No. 2 and for the years 1901 to 1910 from the table on page 123 of issue No. 5.

With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and from the general long-term fall in the birth rate. At the 1947 Census, the numbers of the sexes were practically equal, but there has since been an increase in masculinity owing to the greater number of males as compared with females in net overseas migration, which offsets the femininity of natural increase.

The following table shows the masculinity of the population at ten-year intervals from 1900 to 1960 and for each of the years 1957 to 1961.

## POPULATION: MASCULINITY, 1900 TO 1961.

(NUMBER OF MALES PER 100 FEMALES.)

(a) Part of New South Wales prior to 1911.

(b) Based on preliminary results of the Census, 30th June, 1961.

(ii) Comparison with other Countries. The masculinity of the population in the principal countries of the world is shown in the table in § 15. International Statistics.

2. Age Distribution.—The age distribution of the population is obtained only at a census, but estimates, based on the census distribution and on births, recorded ages at death and recorded ages of migrants, are made for intercensal years. Particulars of ages ascertained at the Census of 30th June, 1961, may be found in the Appendix to this issue.

The next table shows the change which has taken place in the age constitution of the population of Australia since 1871. Up to the 1954 Census, each successive census except that of 1921 had revealed a larger percentage of the population 15 years of age and over than had been recorded at the previous census. In 1954, however, the proportion of this age group dropped sharply to a level (71.5 per cent.) slightly below that of 1933, the proportion under 15 years showing a corresponding increase to 28.5 per cent. of the total population. The proportions at 30th June, 1960, were estimated to be 69.9 per cent. and 30.1 per cent. respectively.

(a) Estimate 30th June.

3. Other General Characteristics.—Details of the conjugal condition, birthplace, period of residence, nationality, religion, industry, occupational status, race, and other general characteristics of the Australian population are obtained only at a population census. Tables showing particulars as at the Censuses of 30th June, 1947, and 1954, were included in earlier issues of the Official Year Book (see No. 47, pp. 305–16). Particulars available for the Census of 30th June, 1961, may be found in the Appendix to this issue.

## § 8. Oversea Migration.

1. Oversea Migration during the Present Century.—Earlier issues of the Official Year Book contain, in summary form, tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1881 is published in the annual bulletin, *Demography*. The following table shows, for Australia, arrivals and departures and net migration since 1936, and refers to total movement irrespective of length of stay. A graph showing arrivals and departures from 1921 to 1961 appears on page 308.

## OVERSEA MIGRATION: AUSTRALIA.

Period.	Arrivals.			Departures.			Excess of Arrivals over Departures.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.
1936–40(a)	161,774	159,538	321,312	140,901	137,283	278,184	20,873	22,255	43,128

1960 ..	169,579	129,582	299,161	116,857	92,169	209,026	52,722	37,413	90,135
1961 ..	170,404	142,686	313,090	141,349	110,218	251,567	29,055	32,468	61,523

(a) Excludes movements of defence personnel from September, 1939 to June, 1947.

2. **Classification of Arrivals and Departures.**—Since 1st July, 1924, overseas travellers have been classified according to declared intention in regard to residence. Certain of the headings previously used in this classification were changed, as from 1957, to ensure more accurate definition and to assist in interpretation of the figures. The figures themselves, however, are exactly comparable with those published in issues of the Official Year Book prior to No. 44.

“Long Term and Permanent Movement” (formerly described as “Permanent Movement”) relates to *persons arriving* who state that they intend to reside in Australia for a period of one year or more; and to *persons departing* who state that they intend to reside abroad for a period of one year or more.

“Short Term Movement” (formerly described as “Temporary Movement”) relates to *persons arriving* who state that they intend to reside in Australia for a period of less than one year; and to *persons departing* who state that they intend to reside abroad for a period of less than one year. Since 1st July, 1947, it also includes Australian defence personnel irrespective of intended length of residence. Although considerable in number, the short term movement is of little significance from the point of view of population growth, as it represents principally the movement of people travelling on business or for pleasure.

These definitions are in accordance with international usage and do not purport to represent permanent migration as such. For various reasons, the intentions of travellers are subject to subsequent modification and the classification headings used must therefore be accepted as indicating intention only. The numbers so classified since 1st January, 1936, are as follows.

**ARRIVALS AND DEPARTURES CLASSIFIED ACCORDING TO INTENDED RESIDENCE: AUSTRALIA.**

Period.	Arrivals.				Departures.			
	Long Term and Permanent Movement.(a)	Short Term Movement.(a)		Total.	Long Term and Permanent Movement.(a)	Short Term Movement.(a)		Total.
		Australian Residents Returning.	Visitors Arriving.			Australian Residents Departing.	Visitors Departing.

1961 ..	127,586	86,208	99,296	313,090	59,147	89,880	102,540	251,567

(a) For definitions of long term and permanent and short term movement see letterpress above.

(b) Includes evacuees arriving in Australia during the war years as follows:—1936-40, 4,543; 1941-45, 12,586.

3. **Country of Origin or Destination.**—Since 1st January, 1945, the journeys undertaken by passengers have been recorded for Australian overseas migration statistics in two ways: (a) according to country of embarkation or disembarkation and (b) according to country of last or intended future residence. Details are published in the annual bulletin, *Demography*.

## 4. Nationality.—The principal nationalities for the years 1960 and 1961 are as follows.

## NATIONALITY OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Nationality.	Arrivals.		Departures.		Excess of Arrivals over Departures.

1957 .. .. .	62,361
1958 .. .. .	55,799
1959 .. .. .	64,146
1960 .. .. .	68,254
1961 .. .. .	55,685

2. **Joint Commonwealth and States Scheme.**—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Official Year Book (*see* No. 38, p. 576). After the outbreak of hostilities in 1939, it was decided to discontinue the grant of assisted passages for the duration of the war.

3. **United Kingdom Migration.**—(i) *General.* Resumption of migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945 and two agreements were signed in March, 1946. These agreements, which came into operation on 31st March, 1947, provided for free and assisted passages to be granted to British residents desirous of settling in Australia. The Free Passage Agreement, which applied to British ex-servicemen and their dependants, was terminated on 28th February, 1955. From 1st April, 1949, the Assisted Passage Agreement continued in operation under renewal from time to time and was again renewed as from 1st April, 1957. It is due for renewal again as from 1st April, 1962.

(ii) *Assisted Passages.* Under the existing financial arrangements, the United Kingdom Government's contribution towards the Assisted Passage Scheme is agreed upon when the agreement is extended, and for the five years from 1st April, 1957, was fixed at a maximum amount of £150,000 sterling a year.

The Assisted Passage Agreement covers five main groups of migrants (and their families), namely, personal nominees, group nominees, Commonwealth nominees, "Bring out a Briton" campaign families, and unnominated migrants. *Personal nominees* are migrants sponsored by residents of Australia able to provide suitable accommodation for them (any adult resident of Australia may nominate friends or relatives in the United Kingdom who are eligible to be considered for assisted passages under this agreement). *Group nominees* are recruited on a trade-qualification basis to meet applications lodged by employers and State Governments, who undertake to provide employment and accommodation for those selected; *Commonwealth nominees* comprise workers selected against known and assessed employment demands in Australia. Migrants in this group can live in hostels established by the Commonwealth Government for up to two years while they are seeking to obtain private accommodation. The Commonwealth nominee scheme was introduced in 1950 in order to reinforce the personal and group nomination schemes. "Bring out a Briton" campaign families are selected to fill employment and accommodation vacancies located by special voluntary committees formed by community effort to stimulate the flow of British migrants who are otherwise unable to obtain sponsorship. *Unnominated migrants* may also be granted assisted passages, even though they are unable to arrange personal nominations and are not occupationally qualified for approval under other existing assisted passage selection schemes. Unnominated families must possess a minimum of £500 sterling for transfer to Australia and must be prepared to make their own accommodation arrangements after arrival. Unnominated single persons must possess £25 sterling, and married couples without children £50 sterling.

Although the Commonwealth is not generally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing, the parents or close relatives of intending migrants or of persons established in Australia may, if otherwise acceptable under the scheme, be granted passages irrespective

of age. Each migrant of 19 years of age and over is required to contribute £10 sterling towards the cost of his or her passage, while persons under 19 years travel free. Apart from this contribution and that made annually by the United Kingdom Government, the cost of the passages is borne by the Commonwealth Government.

(iii) *Number of Arrivals.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the years January, 1947, to June, 1961, are given in the following table.

**UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT: NUMBER OF MIGRANTS.(a)**

Period.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	A.C.T.	Commonwealth Nominations.	Total.
1956-57 ..	4,169	5,018	2,730	1,713	1,715	700	175	7,356	23,576
1957-58 ..	6,069	6,402	4,040	3,446	2,406	976	233	6,397	29,969
1958-59 ..	4,375	4,931	2,449	2,912	1,853	706	210	11,070	28,506
1959-60 ..	6,341	6,324	2,862	3,988	1,442	873	277	11,790	33,897
1960-61 ..	6,313	6,186	2,579	3,308	1,613	637	234	13,830	34,700
<b>Total, January, 1947 to June, 1961 ..</b>	<b>82,679</b>	<b>93,936</b>	<b>43,334</b>	<b>32,753</b>	<b>33,295</b>	<b>11,974</b>	<b>3,910</b>	<b>98,987</b>	<b>400,868</b>

(a) Includes child migrants as shown in para. 4 (iii) below.

4. *Child Migration from the United Kingdom.*—(i) *General.* Since the commencement of the assisted passage schemes in 1947, the migration of unaccompanied children and youths from the United Kingdom has been encouraged under the auspices of approved voluntary organizations. The organizations at present introducing child migrants include the Fairbridge Farm Schools, Dr. Barnardo's Homes, the Big Brother Movements of New South Wales and Tasmania, and the Northcote Children's Emigration Fund. All the principal religious denominations are also participating in the scheme. There are 34 approved homes in Australia caring for approximately 800 child migrants.

(ii) *Financial Assistance.* The United Kingdom Government contributes 12s. 6d. a week for each child and in addition the respective State Governments contribute amounts varying from 7s. a week in New South Wales to £1 3s. 3d. in Western Australia. The Commonwealth Government pays the normal child endowment of 10s. a week. In addition, the Commonwealth Government and the State Government concerned have contributed towards the capital expenditure on accommodation for child migrants.

(iii) *Number of Arrivals.* From the beginning of 1947 to 30th June, 1961, a total of 6,037 British children and youths arrived under the sponsorship of voluntary organizations. New South Wales took 3,761, Western Australia 1,309, Victoria 531, and the other three States 436. These children were brought to Australia under the United Kingdom Free and Assisted Passage Scheme and are included in the figures shown in the table above.

5. *Maltese Migration.*—On 31st May, 1948, the Commonwealth Government and the Government of Malta entered into an agreement under which both Governments grant financial assistance towards the passage costs of selected Maltese migrants. The Commonwealth contribution is £30 sterling per adult, with proportionate amounts for children,

and the Government of Malta contributes an amount at least equal to this sum. This agreement has been extended from time to time. On 13th August, 1957, a new agreement, which was acknowledged to have come into effect as from 1st July, 1956, was signed between the two Governments. This agreement, which was to be of 2 years' duration, was extended to 30th June, 1959, and subsequently to 30th June, 1962.

From its inception until 30th June, 1961, a total of 26,512 Maltese had arrived under this scheme. Up to the end of June, 1961, 241 Maltese children had been brought out to approved institutions in Australia. These are included in the number shown above.

**6. Netherlands Migration.**—A migration agreement outlining the terms and conditions under which Netherlands nationals may be selected in the Netherlands and assisted with their passage costs to enable them to settle in Australia was concluded between the Commonwealth and Netherlands Governments in February, 1951, and came into operation on 1st April of that year. The agreement was extended for a period of 5 years as from 1st April, 1956, and subsequently until 1st April, 1962. This superseded an earlier arrangement in 1946, between the Commonwealth and the Netherlands Emigration Foundation (*see* Official Year Book No. 39, p. 567).

The migrant is required to contribute towards his passage costs in accordance with a formula devised by the Netherlands Government. The balance is met by the Commonwealth and Netherlands Governments and the Intergovernmental Committee for European Migration. The Commonwealth Government's contribution is now equivalent to \$118 a head.

The provision of shipping is the responsibility of the Netherlands Government. The Commonwealth arranges for the reception of migrants and their after-care and assists in the securing of employment. Families who have not obtained private accommodation prior to arrival may be temporarily accommodated in an Immigration Centre. When the breadwinner is placed in employment, he proceeds either to employer-found accommodation or to a Commonwealth Hostel. These arrangements continue until the family can secure its own accommodation, or vacancies enable a family to be united in a hostel.

Up to the end of June, 1961, 61,948 Dutch migrants had settled here under the Netherlands-Australia Migration Agreement.

**7. Italian Migration.**—On 29th March, 1951, the Commonwealth and Italian Governments entered into a migration agreement effective for a period of 5 years, under which certain selected Italian migrants were assisted to Australia. The agreement came into force on 1st August, 1951.

The agreement was temporarily suspended at the end of 1952, but in March, 1954, provision was made for assisted passages to be granted to certain relatives and fiancées of migrants who had previously settled in Australia under the agreement. On 1st December, 1954, the agreement proper was re-opened and was extended to 31st July, 1959. It has since been further extended to 31st July, 1962. At present, the Commonwealth contributes the equivalent of \$100 towards the fare of each migrant. The balance of passage costs is contributed by the migrants themselves, the Italian Government, and the Intergovernmental Committee for European Migration. Up to 30th June, 1961, arrivals under this agreement totalled 43,938 persons.

**8. German Migration.**—On 29th August, 1952, a migration agreement was signed between the Commonwealth Government and the Government of the Federal Republic of Germany. This was somewhat similar to the agreements concluded with the Netherlands and Italy and was effective for a period of 5 years. The agreement was renewed on 27th August, 1958, to be effective from 29th August, 1957. The Commonwealth Government's contribution towards passage costs is the equivalent of \$100 a head. The migrants may be required to pay a small contribution and the balance of passage costs is paid by the Intergovernmental Committee for European Migration. The ICEM payment is derived in part from a lump sum contribution which the Government of the Federal Republic of Germany makes annually to the Committee. Arrivals of German assisted migrants numbered 65,613 to the end of June, 1961.

9. **Austrian Migration.**—Late in 1952, arrangements were made with the Intergovernmental Committee for European Migration for the migration to Australia of a small number of selected rural and other workers and their families from Austria. Later, these arrangements were extended to cover greater numbers and wider categories of migrants. The Commonwealth contributes an amount equivalent to \$100 a head towards the passage costs of Austrian migrants. The Austrian Government, the Intergovernmental Committee for European Migration and the migrants themselves also contribute towards passage costs. Reception arrangements, temporary accommodation, after-care and placement in employment are undertaken by the Commonwealth. Under these arrangements, 16,523 Austrians arrived in Australia up to 30th June, 1961.

10. **Greek Migration.**—An arrangement similar to the Austrian one was made with the Intergovernmental Committee for European Migration late in 1952. The Commonwealth's contribution and the arrangements for reception, accommodation, employment and after-care are the same as for Austrian migrants. Under this arrangement, 28,796 Greek assisted migrants had settled in Australia up to 30th June, 1961.

11. **Refugee Migration.**—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization to settle displaced persons in Australia. Although the International Refugee Organization concluded its activities in 1951, the Commonwealth agreed to receive those displaced persons already accepted for migration, but whose passages had still to be arranged. A total of 170,700 persons settled in Australia under this scheme. Following the cessation of the Displaced Persons Scheme in 1951, Australia has accepted for permanent resettlement under assisted passage arrangements 29,850 refugees of European origin to 30th June, 1961. Included in this figure are 14,060 Hungarians who have been granted asylum in Australia since the uprising in October, 1956. The Commonwealth Government granted a total of £A130,000 for the relief of Hungarian refugees and, in addition, contributed the equivalent of \$100 a head to the passage costs of those refugees who were granted assisted passages.

Australia continues to accept refugees under assisted passage and full-fare arrangements. In recent years, a special assisted passage quota has been established with application mainly in Italy and Austria. In the post-war period to 30th June, 1961, 261,399 refugees arrived as assisted passage or full-fare migrants.

12. **General Assisted Passage Scheme.**—To encourage the migration of persons from the United States of America, Switzerland, Denmark, Norway, Sweden and Finland, the Commonwealth Government on 10th September, 1954, introduced an assisted passage scheme for nationals of these countries. Later, the scheme was extended to cover certain British subjects living in a number of countries other than the United Kingdom and to nationals of Eire, Belgium and France. (As from 1st February, 1961, new arrangements have operated for Belgium. *See* para. 14 following.) Up to 31st December, 1958, the Commonwealth made a contribution of £37 10s. sterling per adult and *pro rata* amounts for children according to the fare paid, but this was increased to £57 2s. 10d. sterling (\$160) per adult and *pro rata* for children in respect of migrants approved on and after 1st January, 1959. To the end of June, 1961, 16,080 migrants had arrived in Australia under this scheme.

13. **Spanish Migration.**—Negotiations were finalized in 1958 with the Spanish Government and the Intergovernmental Committee for European Migration under which selected rural workers suitable for sugar-cane cutting were offered assisted passages to Australia. Later this arrangement was extended to include other occupational groups, recruitment being handled by the Chief Migration Officer, Rome.

The Commonwealth contributes £A.44 12s. 9d. (\$100) towards the passage costs of each approved migrant while the Spanish Government, the migrant, and the Intergovernmental Committee for European Migration contribute the balance.

Reception arrangements, temporary accommodation and initial placement in employment are the responsibility of the Commonwealth. Under these arrangements 2,005 Spanish nationals arrived in Australia up to 30th June, 1961.

14. **Belgian Migration.**—On 1st February, the General Assisted Passage Scheme, which had covered Belgian nationals, ceased to operate in Belgium and arrangements similar to those operating in Greece and Austria were introduced following negotiations with the Belgian Government and with the Intergovernmental Committee for European Migration.

The Commonwealth contribution and the arrangements for reception, accommodation, employment and after-care are the same as for Austrian migrants. Under these arrangements 232 Belgian assisted migrants arrived in Australia up to 30th June, 1961.

15. **Other Assisted Migration Schemes.**—The Displaced Persons Scheme, the Empire and Allied Ex-Servicemen's Scheme, the Triestian Scheme and the Eire Assisted Passage Scheme have now lapsed. Details of these schemes were published in earlier issues of the Official Year Book (see No. 47, p. 320).

16. **Summary of Arrivals of Assisted Migrants.**—The following table shows the number of assisted migrants who arrived in Australia in each of the last five financial years and since January, 1947.

#### ARRIVALS UNDER ASSISTED MIGRATION SCHEMES.

Assisted Migration Scheme.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.	January, 1947 to June, 1961.

(a) Mostly Scandinavians and U.S. Americans, but includes some British nationals from countries other than the United Kingdom.

NOTE.—(i) All arrivals indicated in this table have obtained some financial assistance from the Australian Government towards payment of their passage money. Transport to Australia for the migrants concerned has been arranged on (1) ships under charter to the Department of Immigration, (2) ships and aircraft under charter to the Intergovernmental Committee for European Migration and (3) normal commercial shipping and airlines.

(ii) The arrivals under these schemes include a small number of nationals of countries other than those referred to, and stateless persons.

### § 10. The Regulation of Immigration into Australia.

1. **Powers and Legislation of the Commonwealth.**—(i) *Constitutional.* Under section 51 (xxvii.) and (xxviii.) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens, and the influx of criminals.

SCALE OF MILES

(ii) *Legislation.* Immigration into the Commonwealth is regulated by the Migration Act 1958 which came into force on 1st June, 1959, and repealed the Immigration Act 1901-1949 and Aliens Deportation Act 1948.

Any immigrant entering Australia after the commencement of the Act without having been granted an "entry permit" and without being within an exempted class, is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries and seamen whose ships are in Australian ports. "Immigrant" includes persons entering for temporary stay.

Entry permits are normally granted at ports of entry by means of stamps in travellers' passports or equivalent documents, without any form of application having to be completed. Temporary entry permits are granted to persons who have been authorized to enter for a limited period only. Persons eligible to enter for permanent residence are granted permits of unrestricted validity. Persons who are refused entry permits must be kept on board the ship on which they arrive; otherwise, the shipping company is liable to a fine of £500.

The Act abolishes the "Dictation Test" as a means of excluding or deporting ineligible persons. Other deportation powers which were contained in the repealed legislation were largely re-enacted, though with some revision.

The Act also revises the law relating to the emigration of aborigines and children, repealing the Emigration Act 1910.

The new Act does *not* affect passport or visa requirements for entry to Australia. All persons who, prior to the 1958 Act, had been required before embarkation to obtain visas, or other kinds of provisional authority to proceed to Australia, still have to obtain them. Likewise, persons who have *not* had to produce prior authority to enter Australia, before being given passages to Australia, do *not* have to obtain them solely as a result of the new Act. Persons previously allowed to enter Australia without production of passports—notably British people arriving from New Zealand—are still able to do so.

The Immigration (Guardianship of Children) Act 1946-1952 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each "immigrant child".

The Aliens Act 1947-1959 provides that a register of aliens shall be maintained for every State and mainland Territory of the Commonwealth. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify the Department of any change of address, occupation or employment, and of their marriage. The Act also provides that consent must be obtained before an alien may change his surname.

2. *Conditions of Immigration into Australia.*—(i) *Persons of Non-European Race.* In pursuance of established policy, the general practice is not to permit persons of non-European descent to enter Australia for the purpose of settling permanently, but exceptions are made in favour of the spouses and minor unmarried children of Australian citizens and other British subjects permanently resident in Australia. Special provision exists for the temporary admission of non-Europeans who are highly qualified or of special distinction or who are bona fide merchants, students, tourists or of numerous other categories. They are permitted to enter and remain in Australia under temporary entry permits while they retain their status. Such persons must obtain prior authority to enter Australia.

(ii) *Persons of European Race.* Maltese, Cypriots and aliens of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration or an Australian Oversea Post. Their admission under the present policy is subject to their compliance with the Commonwealth's requirements in regard to health, character, freedom from security risk and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers:—

- (a) In Australia—The Secretary, Department of Immigration, Canberra, Australian Capital Territory, and Commonwealth Migration Officers in the capital cities of the various States;
- (b) In Great Britain—the Chief Migration Officer, High Commissioner's Office, Australia House, Strand, London;
- (c) In other British Commonwealth countries—The High Commissioner for Australia;
- (d) In Holland, Italy, Germany, Greece, Austria, Sweden, Switzerland and Hong Kong—the Chief Migration Officer or Migration Officer in the capital city of each of those countries;
- (e) In other countries where Australia is represented—the Secretary, Australian Embassy, Legation or Consulate.

For details of Australian representatives in the British Commonwealth and other countries *see* the section entitled " Australian Representation Abroad: Oversea Representation in Australia " in Chapter XXX.

3. **Nationality of Persons Arriving.**—For details of the nationality of persons who arrived in Australia during the years 1960 and 1961, *see* page 300.

### § 11. Passports.

Australian passports are issued, under the Passports Act 1938–1948 and Passport Regulations, to Australian citizens.

Diplomatic passports are issued to persons travelling on official missions of a diplomatic character. Official passports are granted persons travelling on the official business of the Commonwealth or a State Government.

Australian passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State of Australia or from overseas offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas.

Applicants for passports must furnish evidence of their identity and nationality and pay a fee of £1.

Approximately 47,000 Australian passports are issued each year in Australia and abroad.

### § 12. Citizenship and Naturalization.

1. **Commonwealth Legislation.**—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of " Australian Citizen ". In this respect, the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. For details of the Act, *see* Official Year Book No. 42, page 619.

2. Certificates Granted.—(i) *Australia*. The following tables show the number of certificates granted during 1960 and the number of persons affected by these certificates. The certificate covers the person being naturalized and his/her children under the Nationality and Citizenship Act 1948–1958.

## NATURALIZATION: CERTIFICATES GRANTED, AUSTRALIA, 1960.

						<b>Total ..</b>	<b>39,649</b>

(a) Excludes children affected by grant of certificates.

(ii) *States.* The number of persons affected by certificates granted in 1960 in respect of residents of the various States and Territories was as follows:—New South Wales, 15,493; Victoria, 19,273; Queensland, 3,224; South Australia, 5,795; Western Australia, 4,664; Tasmania, 807; Northern Territory, 186; Australian Capital Territory, 357; External Territories 469; Total, 50,268.

### § 13. Population of External Territories.

Ordinances of the individual external territories under the control of Australia provide for a Census of the population to be taken on the day prescribed for the taking of a Census in the Commonwealth of Australia.

The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua, the Trust Territory of New Guinea and the Trust Territory of Nauru at the Census of 30th June, 1961, in comparison with the population at the Census of 30th June, 1954.

#### POPULATION: EXTERNAL TERRITORIES.

(a) Not available.

(b) Non-indigenous population only.

Particulars concerning the indigenous populations of the territories will be found in Chapter V.—The Territories of Australia.

### § 14. The Aboriginal Population of Australia.

In Official Year Book No. 17, pages 951–61, a brief account was given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pages 914–6 of Official Year Book No. 22, particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687–96 of Official Year Book No. 23.

The aboriginals are scattered over the whole of the mainland, but are mostly in Western Australia, Queensland and the Northern Territory. Particulars of the number in each State and Territory at the Census of 30th June, 1954, are shown in the following table. Full-blood aboriginals in employment or living in proximity to settlements were enumerated at the census, while estimates of the total numbers, including those living in the nomadic state, were furnished by the authorities responsible for native welfare. Half-caste aboriginals are included in the numbers of the population and are of course enumerated at the census. The figures shown for Queensland are exclusive of Torres Strait Islanders.

ABORIGINAL POPULATION, 30th JUNE, 1954.

State or Territory.	Full-blood.				Half-caste. (Enumerated at the Census.)			Total, Full- blood and Half- caste.

(a) Enumerated at the Census of 30th June, 1954. (b) Furnished by the native welfare authorities. (c) Approximate. (d) Revised estimates.

For further information as to the estimated numbers of full-blood aboriginals, and the difficulty of arriving at precise figures, see Official Year Book No. 47, page 329. The Appendix to this volume contains particulars of the numbers of the aboriginal population ascertained at the time of the Census of 30th June, 1961.

## § 15. International Statistics of Population.

1. Introduction.—In the following tables, the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least one million persons in 1959, together with Cyprus, Papua and Netherlands New Guinea. The source of these figures is the 1960 *Demographic Yearbook* which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics as between countries, but this information has been shown to provide some form of guide as to the magnitude and trend of population movements in oversea countries.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistic rate (e.g. marriages), has been omitted from the tables and this is indicated by a footnote.

For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, reference should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

**2. Population, Rate of Growth and Density: World, Continents and Regions.**—The following table shows for the World, Continents, and Regions, estimated population and density at ten yearly intervals since 1920, and for 1959. The annual rate of increase (per cent.), together with the average annual increase during the period 1950–59, is also shown. It should be noted that the population figures have been adjusted for underenumeration and errors in estimation. In preparing these figures, the Population Branch of the United Nations revises, from time to time, the estimates for previous years as new data become available, for example, from a census. The figures are estimates only, and as such are subject to a substantial margin of error.

**POPULATION, DENSITY AND RATE OF INCREASE FOR THE WORLD AND CONTINENTS—SELECTED YEARS.**

## CHAPTER X.

### VITAL STATISTICS.

**NOTE.**—The tables in this chapter are confined to the principal characteristics of vital statistics for Australia, and relate, in the main, to the year 1960, except for the totals of marriages, births, deaths and infant deaths, for which it has been possible to include figures for 1961. Comparisons have been restricted, in general, to the individual years 1957 to 1961 and the five-year periods 1926–30 to 1955–60, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, will be found in the annual bulletin, *Demography*. Current information is published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics* and the *Australian Demographic Review* (a mimeograph series issued at intervals throughout the year on population and vital statistics).

Figures of births and deaths for Australia throughout are exclusive of full-blood aboriginals.

Rates for the period 1954 to 1960 have been recalculated on the basis of revised population figures ascertained from the preliminary results of the Census of 30th June, 1961. Further revisions to these rates will be made when final results of the Census become available.

Vital statistics for the principal countries of the world are set out in §7. International Vital Statistics, of this chapter.

#### § 1. Provisions for Registration and Compilation of Statistics.

In Australia, vital statistics are compiled from information supplied for the registration of births, deaths and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853 and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration in respect of the Northern Territory having been taken over from South Australia in 1911 and in respect of the Australian Capital Territory from New South Wales in 1930. The authority responsible for the registration of births, deaths and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

In the Australian Capital Territory and the Northern Territory, information concerning a birth is required to be supplied within 21 days, in South Australia in 42 days, and in all other States 60 days is allowed. In all States, however, provision has been made for the late registration of births. For the registration of a death, the period allowed is 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, the Northern Territory and the Australian Capital Territory, 21 days in Victoria and 30 days in New South Wales and Queensland. Provision is made in all States and Territories for the celebration of marriages by ministers of religion registered for that purpose with the Registrar-General (the Government Statist in Victoria) or the Principal Registrar of Births, Deaths and Marriages of the State or Territory, and also by certain civil officers. In all cases, the celebrant, whether minister of religion or civil officer, is required to register particulars of the parties married with the Registrar-General's Office. In Victoria, Western Australia, the Northern Territory and the Australian Capital Territory, registration of a marriage is required immediately following the ceremony, in Tasmania and South Australia within 7 days, and in New South Wales and Queensland within 30 days.

The registration of stillbirths is compulsory in all the States and Territories, except Tasmania. Western Australia was the first State to introduce compulsory registration in 1908, followed by the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937, the Northern Territory in 1949, Victoria in 1953, and Queensland in 1959. Registration in New South Wales, Western Australia, the Northern Territory and the Australian Capital Territory is effected as a birth and subsequent death; in the other States as a stillbirth. Though registration is not compulsory in Tasmania, it is believed that for various reasons nearly all stillbirths are registered voluntarily. In this chapter, stillbirths have been excluded from all tables of births and deaths and are shown only in those specially relating to stillbirths.

The data for the compilation of vital statistics are obtained from registry records and forwarded, through the Statistical Office in each State and Territory, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is one of the functions of the Commonwealth Statistician. The Deputy Commonwealth Statisticians compile and publish statistics relating to their respective States.

## § 2. Marriages.

1. **Number of Marriages.**—The number of marriages registered in Australia during the year ended 31st December, 1961, was 76,686, giving a rate of 7.31 per 1,000 of the mean population for the year. A summary of the number of marriages registered in each State and Territory in five-year periods from 1926–30 to 1956–60 and for each of the years 1957 to 1961, is given in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, page 575. A graph showing the number of marriages in each year from 1870 to 1961 appears on page 343 of this issue.

1961 ..	7.60	7.28	6.86	7.02	6.98	7.57	7.82	7.13	7.31

(a) Number of marriages per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with the preliminary results of the Census of 30th June, 1961.

3. **Marriage Rates based on Marriageable Population.**—As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the eight census periods to 1953-55. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows.

**PERSONS MARRYING PER 1,000 OF UNMARRIED POPULATION: AUSTRALIA.**

Period.				Rate.(a)	Period.				Rate.(a)
1880-82	..	..	..	48.63	1920-22	..	..	..	55.97
1890-92	..	..	..	44.04	1932-34	..	..	..	42.88
1900-02	..	..	..	42.14	1946-48	..	..	..	71.24
1910-12	..	..	..	50.12	1953-55	..	..	..	65.32

(a) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

4. **Crude Marriage Rates of Principal Countries.**—The crude marriage rates of Australia and the principal countries of the world for the latest available year are shown in § 7. International Vital Statistics.

5. **Age and Conjugal Condition at Marriage.**—(i) *General.* Particulars of age at marriage in age groups and previous conjugal condition of bridegrooms and brides in 1960 are given hereunder. There were 7,876 males under 21 years of age married during 1960, while the corresponding number of females was 28,875. At the other extreme, there were 962 bridegrooms and 441 brides in the age group 65 years and over.

(iv) *Average Ages of Bridegrooms and Brides.* The average age at marriage of brides and bridegrooms has declined during recent years. The average ages, in years, of brides for each of the five years to 1960 were:—1956, 25.34; 1957, 25.18; 1958, 25.00; 1959, 25.01; and 1960, 24.84. The average ages, in years, of bridegrooms were 28.66 in 1956, 28.54 in 1957, 28.36 in 1958, 28.39 in 1959 and 28.15 in 1960. The difference in the average age at marriage as between brides and bridegrooms is generally just over three years, the difference in 1960 being 3.31 years.

6. Previous Conjugal Condition.—The following table shows the relative conjugal condition of bridegrooms and brides in 1960.

**CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES: AUSTRALIA, 1960.**

Conjugal Condition of Bridegrooms.	Total Bridegrooms.	Conjugal Condition of Brides.		
		Spinsters.	Widows.	Divorced.
Bachelors .. ..	67,914	63,722	1,330	2,862
Widowers .. ..	3,015	994	1,375	646
Divorced .. ..	4,499	2,361	638	1,500
<b>Total Brides .. ..</b>	<b>75,428</b>	<b>67,077</b>	<b>3,343</b>	<b>5,008</b>

7. Birthplaces of Persons Marrying.—A table showing the relative birthplaces of bridegrooms and brides married in each year will be found in the annual bulletin, *Demography*.

8. Occupation of Bridegrooms.—The distribution of the 75,428 bridegrooms for 1960 amongst classes of occupations was as follows:—craftsmen, 20,818; commercial and clerical, 14,236; operatives, 12,006; rural, fishing and hunting, 7,381; labourers, 7,351; professional and semi-professional, 4,582; domestic and protective service, 4,176; administrative, 2,848; not gainfully occupied and not stated, 2,030.

9. Celebration of Marriages.—In all the States, marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar-General, or by certain civil officers—in most cases district registrars—but most of the marriages are celebrated by ministers of religion. The registered ministers in 1960 belonged to more than forty different denominations, some of which, however, have only very few adherents. A number of these have been combined under the heading "Other Christian". The figures for 1960 are shown in the following table.

**MARRIAGES IN EACH DENOMINATION, 1960.**

## § 3. Divorce.

The number of dissolutions of marriage, nullities of marriage and judicial separations in 1960 was 6,709. Further information may be found in Chapter XVI.—Public Justice, and detailed tables relating to divorce statistics for 1960 and summary tables for earlier years in *Demography*, Bulletin No. 78.

## § 4. Fertility and Reproduction.

1. **Introduction.**—Of the two elements of increase in the population, natural increase and net migration, the former has been by far the more important in Australia for many years. The level of natural increase depends on the excess of births over deaths and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

2. **Number of Live Births and Confinements.**—(i) *Year 1960.* There are various methods of measuring the fertility of the population by relating the number of births to the number in the population. In each, the basic data are, of course, the numbers of live births.

The number of live births registered in Australia during 1960 is shown in the following table. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

## LIVE BIRTHS AND CONFINEMENTS, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Australia.
LIVE BIRTHS.									
Single births..	80,204	62,565	34,443	20,500	16,568	8,675	748	1,542	225,245
Twins ..	1,762	1,449	747	460	353	178	26	41	5,016
Triplets ..	17	11	23	6	5	..	3	..	65
Males ..	42,231	32,825	18,164	10,760	8,699	4,483	416	837	118,415
Females ..	39,752	31,200	17,049	10,206	8,227	4,370	361	746	111,911
Total ..	81,983	64,025	35,213	20,966	16,926	8,853	777	1,583	230,326

## STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE.

Twins ..	56	19	17	2	7	10	..	1	112
Triplets ..	4	1	1	..	1	..	..	..	7

## CONFINEMENTS RESULTING IN BIRTHS SHOWN ABOVE.

Nuptial ..	77,052	60,941	32,684	19,897	15,844	8,341	666	1,538	216,963
Ex-nuptial ..	4,068	2,362	2,149	836	906	428	96	25	10,870
Total ..	81,120	63,303	34,833	20,733	16,750	8,769	762	1,563	227,833

NOTE.—Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was live-born the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also para. 13, p. 330.

(ii) *Live Births, Years 1926 to 1961.* The average annual number of live births in each State and Territory for each five-year period from 1926 to 1960 and the total number of live births for each year from 1957 to 1961 are given in the following table. Corresponding figures for each five-year period from 1861 to 1950 were published in *Official Year Book No. 39*, page 583.

## LIVE BIRTHS.

A graph showing the number of oirths in each year from 1870 to 1961 will be found on page 343.

3. *Crude Birth Rates.*—The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 326 *et seq.*

Crude birth rates for each five-year period from 1926 to 1960 and for each year from 1957 to 1961 for each State and Territory are set out below.

## CRUDE BIRTH RATES.(a)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES.									
1926-30 ..	21.76	19.65	21.90	19.41	21.54	22.29	15.60	14.96	20.98
1931-35 ..	17.28	15.60	18.48	14.89	18.36	19.95	15.99	15.77	16.94
1936-40 ..	17.51	16.20	19.48	15.82	19.16	20.58	19.96	18.68	17.52

1946-50 ..	22.60	22.51	24.69	24.41	25.24	26.71	23.77	37.92	23.39
1951-55(b) ..	21.78	22.42	24.11	23.25	25.37	25.58	29.37	32.22	22.86
1956-60(b) ..	21.55	22.52	23.80	22.27	24.20	25.45	31.49	30.10	22.59

## ANNUAL RATES.

1957(b) ..	21.92	22.76	23.97	22.35	24.62	25.68	31.33	29.84	22.86
1958(b) ..	21.66	22.55	23.59	22.35	23.90	25.55	32.05	31.01	22.60
1959(b) ..	21.49	22.36	24.31	22.12	24.04	25.26	33.70	29.22	22.57
1960(b) ..	21.38	22.41	23.62	22.19	23.41	25.52	30.95	30.12	22.42
1961 ..	22.06	22.57	24.19	23.11	23.16	25.40	33.19	29.49	22.87

(a) Number of births per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with the preliminary results of the Census of 30th June, 1961.

NOTE.—The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders.

The variations thus caused in the birth rates for the States and Territories by referring the birth registrations to the mother's usual residence, are shown by the following corrected rates for 1961:—New South Wales, 22.08; Victoria, 22.59; Queensland, 24.10; South Australia, 23.02; Western Australia, 23.19; Tasmania, 25.46; Northern Territory, 34.28; and Australian Capital Territory, 30.02.

See Official Year Book No. 47 (p. 339) for the effect of the variations in the availability of hospital facilities on the birth rate in the Australian Capital Territory and in the neighbouring town of Queanbeyan in New South Wales.

A graph showing the birth rate for each year from 1870 to 1961 will be found on page 344.

In the earlier years of the present century, the crude birth rate fluctuated somewhat, but from 1912, when 28.60 was recorded, there was an almost continuous decline to the very low figure of 16.39 in 1934. The decline in the depression years was occasioned to some extent by the postponement of marriages. With subsequent improvement in economic conditions the rate rose, and in 1940 it increased quite appreciably, owing to a continued improvement in the economic welfare of the community and the war-time increase in marriages. The improvement in the birth rate has been substantially maintained since the end of the war despite some falling off in marriage rates. The post-war peak of 24.07 was recorded in 1947.

4. **Crude Birth Rates of Principal Countries.**—The crude birth rates of Australia and the principal countries of the world for the latest available year are shown in § 7. International Vital Statistics.

5. **Fertility Rates.**—The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a higher proportion of married women of child-bearing age will have a much higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical.

In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880–82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child bearing age. For purposes of this table, the child-bearing age has been taken to be 15–44 years inclusive, but births to mothers who were stated to be under 15 or over 44 years have been included in the compilations.

**CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA.**

Period.	Average Annual Rates.			Index Nos. (Base: 1880–82= 100).		
	Crude Birth Rate.(a)	Fertility Rates.		Crude Birth Rate.(a)	Fertility Rates.	
		Births per 1,000 Women aged 15–44 Years.	Nuptial Births per 1,000 Married Women aged 15–44 Years.		Births per 1,000 Women aged 15–44 Years.	Nuptial Births per 1,000 Married Women aged 15–44 Years.
1880–82.. ..	35.3	170	321	100	100	100
1890–92.. ..	34.5	159	332	98	94	103
1900–02.. ..	27.2	117	235	77	69	73
1910–12.. ..	27.2	117	236	77	69	74
1920–22.. ..	25.0	107	197	71	63	61
1932–34.. ..	16.7	71	131	47	42	41
1946–48.. ..	23.6	104	160	67	61	50
1953–55.. ..	22.7	109	149	64	64	46

(a) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate, for married women increased by only 22 per cent. over the period 1932–34 to 1946–48, the crude birth rate rose by 41 per cent. owing principally to the greatly increased number of marriages during that period.

6. **Age-specific Fertility Rates for Females.**—So long as customary ages at marriage do not change drastically, the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group, the fertility of women of different ages varies considerably and a clearer view of the fertility

of the population can be obtained from an examination of what are known as its age-specific fertility rates, that is, the number of births to women of specified ages per thousand women of those particular ages.

Age-specific fertility rates are more commonly expressed in age groups than in single ages. In the following table, such rates, calculated in terms of female births for the purpose of obtaining the gross and net reproduction rates described in para. 7, are shown in five-year age groups for Australia for the period 1926 to 1960.

AGE-SPECIFIC FERTILITY RATES(a): AUSTRALIA.

Age Group (Years).	1926.	1931.	1936.	1941.	1946.	1951.	1956.	1959.	1960.
15-19 .. .. .	14.02	13.08	12.18	11.90	12.63	18.59	20.84	22.05	21.62
20-24 .. .. .	60.23	53.08	50.33	59.42	73.52	85.84	101.46	106.06	107.11
25-29 .. .. .	76.82	62.47	62.02	70.78	89.51	90.24	98.11	104.40	104.99
30-34 .. .. .	61.90	51.25	46.33	49.72	65.03	59.16	59.65	61.64	61.65
35-39 .. .. .	43.55	33.23	28.89	28.69	37.43	32.29	31.32	31.61	30.43
40-44 .. .. .	17.63	13.61	10.19	9.52	11.87	9.97	9.48	9.13	8.93
45-49 .. .. .	1.90	1.45	1.11	0.80	1.03	0.80	0.76	0.70	0.70

(a) Number of female births per 1,000 women in each age group.

The table shows that in recent years the most fertile age group has been 20-24 years, whereas previously fertility had been highest for the 25-29 age group. The decline in fertility between 1926 and 1936 was general, but was more pronounced in the higher age groups. During the period 1936 to 1960, a rise in fertility occurred in all age-groups below 40. The most noticeable increase has been in the 20-24 age group, in which, as mentioned, fertility is now highest, as the result of a marked trend towards earlier marriage.

7. Gross and Net Reproduction Rates for Females.—A single measure of reproduction, known as the gross reproduction rate, is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on an average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility in paragraph 9, page 328.

GROSS AND NET REPRODUCTION RATES: AUSTRALIA.

Year.	Gross Reproduction Rate.	Net Reproduction Rate.	Year.	Gross Reproduction Rate.	Net Reproduction Rate.
1881(a) .. .. .	2.65	(b) 1.88	1947 .. .. .	1.493	(g) 1.416
1891(a) .. .. .	2.30	(b) 1.73	1954 .. .. .	1.558	(h) 1.497
1901(a) .. .. .	1.74	(c) 1.39	1956 .. .. .	1.608	(h) 1.546
1911 .. .. .	1.705	(d) 1.421	1957 .. .. .	1.662	(h) 1.598
1921 .. .. .	1.511	(e) 1.313	1958 .. .. .	1.667	(h) 1.603
1931 .. .. .	1.141	(f) 1.039	1959 .. .. .	1.678	(h) 1.614
1941 .. .. .	1.154	(f) 1.053	1960 .. .. .	1.677	(h) 1.613

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-1948 mortality experience used. (h) 1953-1955 mortality experience used.

NOTE.—It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking account of previous fertility and marriage experience. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

Since 1881, there has been a substantial downward trend in both rates, but the gross rate has fallen considerably more than the net, showing that the decline in fertility has been offset to some extent by a decline in mortality. The net reproduction rate was below unity over the period 1932 to 1939. If such low levels were to be experienced indefinitely, ultimate population decline would be certain. The progressive rise in both gross and net reproduction rates from 1939 to 1947 was due largely to higher marriage rates during the war and early post-war years than had been experienced in the immediately pre-war years. Owing to various influences, the number of marriages in each year since 1950 has remained at a relatively high level and the net reproduction rates have been rising slowly. The fertility of marriages is shown in paragraph 9 below.

8. **Gross and Net Reproduction Rates, Various Countries.**—In the following table, a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1954 to 1960. These represent the latest available international comparisons.

**GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES.**

Country.	Period.	Reproduction Rate.		Country.	Period.	Reproduction Rate.	
		Gross.	Net.			Gross.	Net.
Thailand .. ..	1954	2.26	1.70	Finland .. ..	1959	1.31	1.24
New Zealand(a) ..	1959	1.95	1.88	Austria .. ..	1959	1.26	1.16
Canada .. ..	1959	1.92	1.83	Belgium .. ..	1959	1.26	1.15
United States of America(b) ..	1958	1.73	1.67	Czechoslovakia ..	1958	1.25	1.12
Australia(c) ..	1960	1.68	1.61	Denmark .. ..	1958	1.23	1.13

(a) Excludes Maoris.

(b) White population only.

(c) Excludes full-blood aboriginals.

(d) Not available.

In comparing the reproduction rates of the countries shown above, allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage, as well as the stationary or life table population used.

9. **Fertility of Marriages.**—Estimates of the fertility of marriages which were published in issues of the Official Year Book prior to No. 36 were calculated by relating the births of one five-year period to the marriages in the preceding five years (*see* Official Year Book No. 35, p. 329). Since the publication of that issue, an improved method has been formulated for measuring current marriage fertility by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

**FERTILITY OF MARRIAGES: AUSTRALIA.**

Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.
1946.. ..	2.55	1951.. ..	2.55	1956.. ..	2.76
1947.. ..	2.55	1952.. ..	2.63	1957.. ..	2.87
1948.. ..	2.44	1953.. ..	2.66	1958.. ..	2.88
1949.. ..	2.45	1954.. ..	2.66	1959.. ..	2.93
1950.. ..	2.56	1955.. ..	2.71	1960.. ..	2.96

NOTE.—*See* NOTE to table on page 327.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. There was an almost continuous decline for a number of years to 1942, but a pronounced increase has since occurred. In comparing this index with the net reproduction rate, it is evident that the rise in the latter since 1935 has been caused mainly by a rise in the proportions of women married in the fertile age groups. Only since 1944 has there been an increase in the fertility of marriages compared with pre-war levels.

The figures for 1949 and subsequent years present a somewhat inflated index, as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and consequently are not included in Australian marriage records. Partial investigation suggests that this factor probably overstated the index by very little in 1949, but that the overstatement at present is about 8 per cent.

10. **Masculinity of Live Births.**—The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, totals for smaller States), considerable variation is shown. The averages for the ten years 1951–60 were as follows:—New South Wales, 105.38; Victoria, 105.50; Queensland, 105.80; South Australia, 104.89; Western Australia, 105.25; Tasmania, 104.96; Northern Territory, 107.16; Australian Capital Territory, 108.77; Australia, 105.43. The following table shows the figures for Australia for each ten-year period from 1901 to 1960 and for each of the years 1959 to 1961.

**MASCULINITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA.**

Particulars.	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.	1951-60.	1959.	1960.	1961.
Total Births ..	105.22	105.27	105.55	105.12	105.38	105.43	104.97	105.81	105.34
Ex-nuptial Births	104.08	105.25	105.16	105.36	105.34	103.99	103.72	104.22	108.02

(a) Number of males born for every 100 female births.

11. **Ex-nuptial Live Births.**—(i) *General.* The highest proportion of ex-nuptial births in any one year since 1901 was recorded in 1905, when there were 6,545 ex-nuptial births, representing 6.24 per cent. of total births. Since then, the proportion has declined. The largest number of ex-nuptial births was recorded in 1961, when 12,269 were registered, but this number represented only 5.11 per cent. of total births. The lowest proportion was 3.78 per cent. in 1940.

The variations in the proportions of ex-nuptial births as between the individual States and Territories for 1961 are shown below.

**EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION, 1961.**

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number ..	4,575	2,706	2,445	1,026	959	404	120	34	12,269
Proportion of Total Births %	5.30	4.11	6.67	4.58	5.62	4.50	13.67	1.96	5.11

The number and proportion of ex-nuptial births at intervals from 1901 to 1961 are as follows.

**EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION, AUSTRALIA.**

Particulars.	Annual Average.						1957.	1958.	1959.	1960.	1961.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.	1951-60.					
Number ..	6,498	6,836	6,238	5,133	6,780	9,013	9,362	10,131	10,687	10,987	12,269
Proportion of Total Births %	6.05	5.22	4.66	4.40	4.13	4.25	4.25	4.55	4.71	4.77	5.11

(ii) *Rate of Ex-nuptiality.* A further measure is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows:—1880–82, 14.49; 1890–92, 15.93; 1900–02, 13.30; 1910–12, 12.53; 1920–22, 10.50; 1932–34, 6.91; 1946–48, 11.45; and 1953–55, 14.45. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown.

(iii) *Comparison of Rates.* The following table, showing the relative proportions of ex-nuptial and nuptial births to the total population, discloses a much greater proportional movement in the ex-nuptial birth rate than in the nuptial rate.

**CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES(a): AUSTRALIA.**

Birth Rate.	Annual Average.						1958. (b)	1959. (b)	1960.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.	1951-60.			
Ex-nuptial ..	1.60	1.39	1.04	0.76	0.90	0.97	1.03	1.06	1.07
Nuptial ..	24.91	25.18	21.40	16.47	20.99	21.75	21.57	21.51	21.35
<b>Total ..</b>	<b>26.51</b>	<b>26.57</b>	<b>22.44</b>	<b>17.23</b>	<b>21.89</b>	<b>22.72</b>	<b>22.60</b>	<b>22.57</b>	<b>22.42</b>

(a) Number of births per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with the preliminary results of the Census of 30th June, 1961.

12. *Legitimations.*—Acts have been passed in the several States to legitimize children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who comes within the scope of their purposes, born before or after the passing thereof, is deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. During 1960, the number of children legitimized in Australia was 928.

13. *Multiple Births.*—Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

During 1960, multiple births recorded on this basis comprised 2,564 cases of twins and 24 cases of triplets, the resultant numbers of live-born and still-born children being respectively 5,016 and 112 for twins, 65 and 7 for triplets. This represents an average of 11.25 recorded cases of twins and 0.11 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 89 mothers and mothers of triplets 1 in every 9,493. Total cases of multiple births represented 11.36 per 1,000 confinements or 1 in every 88 mothers.

The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

14. *Ages of Parents.*—The relative ages of the parents of children whose births were registered in 1960 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 78. In the following table, the relative ages of parents are shown in five year groups.

CONFINEMENTS: RELATIVE AGES OF PARENTS, AUSTRALIA, 1960.

15. Birthplaces of Parents.—A table showing birthplaces of parents of children whose births were registered during 1960 appears in *Demography*, Bulletin No. 78.

16. Occupation of Fathers.—A table showing occupations of the fathers of nuptial children whose births were registered in 1960 appears in *Demography*, Bulletin No. 78.

17. Age, Duration of Marriage and Issue of Mothers.—(i) *General*. The total number of nuptial confinements resulting in live births in 1960 was 216,963, comprising 214,499 single births, 2,440 cases of twins and 24 cases of triplets. The following tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

(ii) *Duration of Marriage and Issue of Mothers*. The following table shows that in 1960 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1960 was 2.59, compared with 2.58 in 1959, 2.56 in 1958, 2.54 in 1957, and 2.52 in 1956.

NUPTIAL CONFINEMENTS: DURATION OF MARRIAGE AND ISSUE OF MOTHERS, AUSTRALIA, 1960.

(iii) *Age and Average Issue of Mothers.* The following table shows the average number of children born to mothers of different ages. In the younger ages, there is, naturally, little difference from year to year in the average number of children born to each mother, but for mothers in the higher age groups the number of issue has fallen, until recently, in comparison with past years. In 1960, average issue was greater in all age groups under 45 years than in the decade 1951-60. The average issue of mothers of all ages recorded for 1960 (namely, 2.59) is 20.3 per cent. below the average of 3.25 for the years 1911-20.

**NUPTIAL CONFINEMENTS: AGE AND AVERAGE ISSUE OF MOTHERS: AUSTRALIA.**

(v) *Multiple Births—Previous Issue of Mothers.* Figures regarding the previous issue of married mothers of twins in 1960 show that 564 mothers had no previous issue either living or deceased, 630 had one child previously, 510 had two previous issue, 362 three, 173 four, 100 five, 44 six, 28 seven, 17 eight, 6 nine, 2 ten, 2 eleven, and 2 had twelve previous issue.

Of the 24 cases of nuptial triplets registered during 1960, 5 mothers had no previous issue, 4 had one, 3 had two, 6 had three, 4 had four, 1 had five and 1 had ten previous issue.

18. *Nuptial First Births.*—(i) *Duration of Marriage.* The following table shows the interval between marriage and first birth for periods since 1911. In cases of multiple births, the first live-born child only is enumerated.

NUPTIAL FIRST BIRTHS: DURATION OF MARRIAGE, AUSTRALIA.

19. *Stillbirths.*—The registration of stillbirths has been compulsory in Western Australia since 14th January, 1908; in the Australian Capital Territory since 1st January, 1930; in New South Wales since 1st April, 1935; in South Australia since 1st May, 1937; in the Northern Territory since 1st July, 1949; in Victoria from 1st January, 1953; and in Queensland from 22nd March, 1959. Prior to the introduction of compulsory registration in 1953 in Victoria, and in 1959 in Queensland, provision for voluntary registration had existed for a number of years. Registration is not compulsory in Tasmania.

Interstate comparisons of the figures and rates in the following tables are affected by the differences in the definitions of stillbirths adopted by the various States and only the trends in the rates for the States should be compared.

For various reasons the registration of stillbirths is not as complete as for live births and deaths. Particulars for the Territories and smaller States are more affected on this account than are those for the larger States.

The number of stillbirths recorded in each State and Territory since 1936 is shown in the following table.

STILLBIRTHS.

Period	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

## § 5. Mortality.

1. Number of Deaths.—(i) Year 1961. The following table shows the number of deaths, male and female, registered in each State and Territory during the year. Stillbirths, although registered as both births and deaths in some States, are excluded from the death statistics published herein.

## DEATHS, 1961.

Sex.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Males ..	19,652	13,534	7,546	4,362	3,326	1,601	98	129	50,248
Females ..	15,396	10,966	5,210	3,453	2,403	1,188	30	67	38,713
Persons ..	35,048	24,500	12,756	7,815	5,729	2,789	128	196	88,961

(ii) Years 1926 to 1961. A summary of the number of deaths in each State and Territory from 1926 to 1961 is given in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, page 597.

## DEATHS.

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

1959 ..	35,249	25,078	12,349	7,943	5,497	2,780	124	192	89,212
1960 ..	35,030	24,547	12,370	7,804	5,697	2,670	134	212	88,464
1961 ..	35,048	24,500	12,756	7,815	5,729	2,789	128	196	88,961

a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September, 1939 to June, 1947.

A graph showing the number of deaths in each year from 1870 to 1961 will be found on page 343.

2. **Crude Death Rates.**—The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period. Crude death rates for each State and Territory from 1926 to 1961 are shown in the following table.

CRUDE DEATH RATES.(a)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES.									
1926-30 ..	9.26	9.56	9.06	8.83	8.91	9.44	15.83	5.36	9.26
1931-35 ..	8.68	9.72	8.62	8.72	8.83	9.63	13.46	3.81	9.00

1946-50(b) ..	9.70	10.37	9.13	9.76	9.23	9.30	6.27	5.31	9.74
1951-55(c) ..	9.49	9.55	8.71	9.25	8.49	8.48	6.86	4.58	9.25
1956-60(c) ..	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78
ANNUAL RATES.									
1957(c) ..	9.19	9.08	8.29	8.67	7.71	8.13	5.58	4.42	8.81
1958(c) ..	8.75	8.69	7.98	8.63	7.94	8.07	4.87	4.43	8.50
1959(c) ..	9.37	9.01	8.43	8.62	7.72	8.14	5.25	4.12	8.87
1960(c) ..	9.14	8.59	8.30	8.26	7.88	7.70	5.34	4.03	8.61
1961—									
Males ..	9.97	9.19	9.77	8.90	8.85	8.95	6.18	4.17	9.46
Females ..	7.92	7.59	7.02	7.21	6.65	6.80	2.83	2.40	7.46
Persons ..	8.95	8.39	8.42	8.06	7.77	7.89	4.84	3.33	8.48

(a) Number of deaths per 1,000 of mean population. (b) Excludes deaths of defence personnel from September, 1939 to June, 1947. (c) Recalculated from population figures revised in accordance with the preliminary results of the Census of 30th June, 1961.

A graph showing the crude death rate for each year from 1870 to 1961 will be found on page 344.

3. **Standardized Death Rates.**—(i) *General.* The death rates quoted above are crude rates, i.e., they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, "standardized" death rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group had been as recorded, but the age and sex distribution had been the same as in the standard population. For the standardized rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900.

(ii) *Death Rates in Age Groups.* An examination of the age distribution of deaths and the resultant age-specific death rates is made in paragraph 8, page 348.

(iii) *Comparison of Crude and Standardized Death Rates.* The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947 and 1954 is illustrated in the following statement of crude and "standardized" death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

## CRUDE AND STANDARDIZED DEATH RATES.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
<b>Crude Death Rate(a)—</b>							
1921 .. .. .	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 .. .. .	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 .. .. .	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954 .. .. .	9.46	9.19	8.64	9.01	8.38	8.67	9.10
<b>Standardized Death Rate(b)—</b>							
1921 .. .. .	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 .. .. .	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 .. .. .	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954 .. .. .	7.24	6.63	6.80	6.52	6.71	7.02	6.90

(a) Total deaths per 1,000 of mean population. in para. 3 (i) above.

(b) See explanation of standardized death rates

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

4. **True Death Rates.**—The main objections to standardized death rates are that the choice of a standard population is arbitrary and that the standardized rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. However, a correct measurement of the mortality of the population can be obtained from life tables. A life table represents the number of survivors at each age from a group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is 50 years, say, then each person will on the average die 50 years after birth, so that in a stationary population one person in 50 or 20 per thousand will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

## COMPLETE EXPECTATION OF LIFE AT BIRTH AND TRUE DEATH RATES: AUSTRALIA.

Period.	Complete Expectation of Life at Birth (Years).		True Death Rate.	
	Males.	Females.	Males.(a)	Females.(b)
1881-1890 .. .. .	47.20	50.84	21.19	19.67

1932-1934 .. .. .	63.48	67.14	15.75	14.89
1946-1948 .. .. .	66.07	70.63	15.14	14.16
1953-1955 .. .. .	67.14	72.75	14.89	13.75

(a) Number of deaths per 1,000 males in stationary population.

(b) Number of deaths per 1,000 females in stationary population.

5. **Crude Death Rates of Principal Countries.**—The crude death rates and the true death rates of Australia and the principal countries of the world for the latest available year are shown in the table on pages 361-2 of § 7. International Vital Statistics.

6. **Australian Life Tables.**—(i) *Life Tables prior to 1954.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician.

Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-1890, 1891-1900 and 1901-1910. These compilations furnished a comprehensive view of Australian mortality in respect of sex, of time, and of geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the ten years 1901-1910 were prepared and published.

At the Census of 1921, Life Tables were prepared by the Commonwealth Statistician from the recorded census population and the deaths in the three years 1920 to 1922. In 1933 and 1947, Life Tables based on the census population and the deaths in the years 1932 to 1934 and 1946 to 1948 respectively were compiled by the Commonwealth Actuary.

(ii) *Life Tables of Census of 1954.* On the occasion of the 1954 Census, the seventh Life Tables in the series were compiled by the Commonwealth Actuary. These were based on the population recorded at the Census, adjusted to allow for variation in the net movement into Australia over the years 1953 to 1955, and deaths during these years. Full particulars of the data used, the method of construction and the tabulations of these Life Tables will be found in the report of the Commonwealth Actuary which was published by the Commonwealth Statistician in 1958. This report will also appear in Volume VIII of the detailed tables of the 1954 Census.

The main features of the tables, including comparisons with earlier Australian tables, and the latest experience in the United Kingdom and New Zealand are set out in the following summary tables.

## 7. RATES OF MORTALITY FROM 1953-55 AUSTRALIAN EXPERIENCE, AS A PROPORTION OF THE RATES FOR THE UNITED KINGDOM AND NEW ZEALAND.

Age.	Males.		Females.	
	Australia 1953-55	Australia 1953-55	Australia 1953-55	Australia 1953-55.
	United Kingdom 1950-52.	New Zealand 1950-52.	United Kingdom 1950-52.	New Zealand 1950-52.
0 .. ..	.77	1.01	.79	1.00
10 .. ..	1.08	1.12	1.00	1.25
20 .. ..	1.44	1.16	.77	.94
30 .. ..	1.08	1.06	.76	.87
40 .. ..	1.02	1.11	.96	1.04
50 .. ..	.96	1.13	1.01	.96
60 .. ..	.94	1.14	.95	.91
70 .. ..	.94	1.13	.92	.99
80 .. ..	.88	1.06	.89	1.00

The main features of the 1953-55 mortality rates were as follows.

(a) *Male Mortality.* With the exception of ages 16 to 26 inclusive, and 69 to 73 inclusive, the 1953-55 mortality rates were less than those for 1946-48. The most significant reduction occurred at age 0, where the mortality rate was 79 per cent. of the corresponding rate for 1946-48, and only 27 per cent. of the experience for the period 1901-1910.

The most disturbing feature of the 1953-55 experience was the increase in mortality which occurred in the 16-26 age group. This was the result of heavier mortality from accidents of all types, which more than counterbalanced a decrease in the rates of mortality due to other causes.

At advanced ages, the experience suggests that only a slight improvement in male mortality occurred since 1946-48.

(b) *Female Mortality.* The comparative tables above show that very substantial decreases in female mortality rates occurred over the whole range of ages since the 1946-48 experience. This improvement was considerably greater overall than that for males.

Accident mortality among females, which has never been as significant as among males, increased very slightly, but this increase was more than offset by the reduction in the mortality from other causes. There was a notable disparity between the high male accident rate and the low female rate.

In the 1946-48 experience, female mortality from causes other than accident was, in the age range 20 to 39 years, heavier than the corresponding male mortality. For 1953-55, however, the position was reversed. At high ages the female mortality rates showed substantially greater improvement since 1946-48 than the male rates.

7. Infant Deaths and Death Rates.—(i) States. (a) Under One Year. For each State and Territory, the number of deaths under one year of age and the rates of infant mortality during the period 1926 to 1961 were as follows.

(a) Number of deaths of children aged four weeks and under one year per 1,000 live births registered.

(ii) *Australia. (a) Under One Year.* The fact that out of 571,439 male infants born from 1956 to 1960, 13,310 (23.29 per 1,000) died during the first year of life, while of 540,858 female infants only 10,107 (18.69 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Stillbirths, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

**INFANT DEATHS AND MORTALITY RATES: AUSTRALIA.**

(a) Number of deaths per 1,000 live births registered.  
under one day.

(b) Not available.

(c) Includes

The foregoing tables indicate the decrease in infant mortality in Australia, the mortality rate of children aged under one year per 1,000 live births for 1960 being 49 per cent. of the average rate for 1931-35. The improvement was due largely to the decrease in deaths from preventable causes, the mortality rate for children aged one week but under one year of age declining by 61 per cent., while that for children aged under one week declined by 43 per cent.

A graph showing infant mortality rates for each year from 1910 to 1961 will be found on page 346.

(iii) *Statistical Divisions.* The total numbers of births and of deaths of children under one year of age in each statistical division of the States are shown in the annual bulletin, *Demography*.

(iv) *Principal Countries.* Compared with other countries Australia occupies a favourable position in respect of infant mortality. In 1960, only a few countries recorded a lower rate than Australia. Rates for Australia and the principal countries of the world for the latest available year are shown in the tables on pages 361-2 of § 7. *International Vital Statistics*.

(v) *Causes of Death—Children under one Year.* Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. In 1960, 2,953 deaths or 63.6 per cent. of infant deaths occurred during the first week of life. Causes mainly of pre-natal and natal origin accounted for 2,811 deaths or 95.2 per cent. of these deaths (congenital malformations 395, or 13.4 per cent.; birth injury 660, or 22.4 per cent.; post-natal asphyxia and atelectasis 490, or 16.6 per cent.; immaturity unqualified, or primary to diseases other than of early infancy 923, or 31.3 per cent.). These causes accounted for 278, or 66.5 per cent. of the total of 418 deaths occurring during the second, third and fourth weeks of life, and 334, or 26.3 per cent. of the total of 1,272 deaths from four weeks and under one year of age (congenital malformations 311, or 24.4 per cent.). Causes mainly of post-natal origin accounted for 705, or 55.4 per cent. of the deaths four weeks and under one year (pneumonia and bronchitis 341, or 26.8 per cent., gastro-enteritis and diarrhoea of the newborn 95, or 7.5 per cent.).

A summary for 1960 of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

CAUSES OF DEATH: CHILDREN UNDER ONE YEAR OF AGE, AUSTRALIA, 1960.

8. Age Distribution.—(i) *Number of Deaths.* Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for Australia is given in the following table for the year 1960.

## AGE AT DEATH: AUSTRALIA, 1960.

There are different mortality rates at various stages of life and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups.

In Australia, during the last fifty years, there has been a steady decline in the rate of mortality at all ages. This has been most pronounced at ages under one year. The increased length of life due to this factor, coupled with the long-term decline in the birth rate and the effects of past and present migration, has been a significant cause in changing the age distribution of the population and consequently the age distribution of deaths, thus obscuring the effects of declining mortality rates.

The combined effect of these various influences can be seen from the following table, which shows the proportion of deaths in various age groups in ten-year periods from 1901 to 1960 and for the year 1960.

PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA.  
(Per Cent.)

Period.	Age at Death (Years).								Total.
	Under 1.	1-4.	5-19.	20-39.	40-59.	60-64.	65 and over.	Unspeci- fied.	
1901-10 ..	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 ..	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 ..	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 ..	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 ..	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1951-60 ..	5.59	1.33	1.80	4.90	17.27	9.18	59.90	0.03	100.00
1960—									
Males ..	5.34	1.05	2.13	5.18	19.80	9.88	56.57	0.05	100.00
Females ..	5.13	1.22	1.42	3.40	13.81	7.20	67.81	0.01	100.00
Persons ..	5.25	1.12	1.82	4.40	17.17	8.70	61.51	0.03	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Official Year Book No. 39, page 614.

(ii) *Age-specific Death Rates.* In previous issues of the Official Year Book, average annual age-specific death rates were given for each State and Australia for the periods 1932-34, 1946-48 and 1953-55 (see Official Year Books, No. 37, p. 778, No. 39, pp. 615-6 and No. 44, pp. 640-1). These rates were based on the age distribution of the population at the relevant censuses.

Intercensal estimates of the age distribution of the population are available for Australia and for the larger States. The following table shows age-specific death rates for Australia for the years 1958, 1959 and 1960.

AGE-SPECIFIC DEATH RATES(a): AUSTRALIA.

(a) Average number of deaths per 1,000 of population in each age group.

9. *Causes of Death.*—The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), and 1955 (Seventh) were successively adapted for use in Australian statistics.

The Sixth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death was used in Australia for deaths registered in 1950 to 1957. The Seventh Revision has been used for deaths registered in 1958 and subsequent years. The Sixth Revision, for the first time in connexion with the International classification, laid down rules for a uniform method of selecting the main cause to be tabulated if more than one cause is stated on the death certificate. These rules were maintained in the Seventh Revision which was concerned mainly with certain essential changes and amendment of errors and inconsistencies in the previous classification. Prior to 1950, the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform to successive revisions of the International List.

The adoption of the new method introduced with the Sixth Revision and maintained in the Seventh, marked a fundamental change in Australian cause of death statistics, emphasis now being placed on the underlying cause of death as indicated by the certifying practitioner. The introduction of this method required the adoption by all States of a form of medical certificate substantially identical with the International Form of Medical Certificate of Cause of Death as laid down in Article 9 of the World Health Organization Regulations No. 1. By 1950, all States had adopted satisfactory forms of certificate and it was possible to apply the new principles uniformly to all State cause of death records.

This change in principle affects the comparability of the statistics for 1950 and subsequent years with those for earlier years. For convenience in assessing the extent of the change and in accordance with a recommendation of the Sixth Decennial Revision Conference, causes of death for Australia for 1950 were also classified according to the detailed classification of

the Fifth Revision, on the joint cause rules current for that revision. A complete detailed classification according to both the Fifth and Sixth Revisions was shown in *Demography*, Bulletin No. 68, 1950. Commencing with 1951, the classification was according to the Sixth Revision only, and from 1958, the Seventh Revision has been used. Except in a few instances, comparability was maintained with the introduction of the Seventh Revision. *Demography*, Bulletin No. 76, 1958, indicates the few instances in which comparability was affected by the use of the Seventh Revision.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the base of the cause of death tabulations A to C which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Tables A and B show deaths of males and females in age groups, respectively, for 1960 and Table C shows the total numbers of males and females who died and the death rates per million of mean population and percentage of total deaths for 1960.

10. Deaths from Principal Causes.—(i) *General*. In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Seventh Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification numbers used in tables A to C (pp. 351-4) are indicated in parentheses for each cause or group of causes.

(ii) *All Forms of Tuberculosis (B1, B2)*. (a) *General*. The total number of deaths classified to all forms of tuberculosis in 1960 was 489, consisting of 368 males and 121 females. In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years, consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Official Year Book No. 39, page 626.

(b) *Age at Death*. The following table shows the age groups of males and females who were classified as dying from tuberculosis in 1960, together with figures for 1921, 1931, 1941 and 1951.

**TUBERCULOSIS (ALL FORMS): DEATHS IN AGE GROUPS, AUSTRALIA.**

Age Group (Years).	Males.					Females.				
	1921.	1931.	1941.	1951.	1960.	1921.	1931.	1941.	1951.	1960.
0-14 .. ..	143	90	63	23	2	128	81	54	35	2
15-29 .. ..	477	294	162	46	4	540	487	275	68	5
30-44 .. ..	718	585	428	135	35	514	422	319	142	33
45-64 .. ..	692	674	793	570	151	278	252	251	126	40
65 and over ..	138	193	279	306	176	56	89	110	86	41
Not stated ..	3	..	..	..	..	..	..	..	1	..
<b>Total ..</b>	<b>2,171</b>	<b>1,836</b>	<b>1,725</b>	<b>1,080</b>	<b>368</b>	<b>1,516</b>	<b>1,331</b>	<b>1,009</b>	<b>458</b>	<b>121</b>

(c) *Death Rates*. The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 68 per 100,000 of mean population in 1921 (males, 78; females, 56) to 18 in 1951 (males, 25; females, 11) and still further to 5 in 1960 (males, 7; females, 2). The crude death rate does not reveal the even more striking fall in the number of deaths in the younger age groups, which can be seen from the table above.

(d) *Death Rates, Various Countries*. A comparison of the death rates from tuberculosis for Australia with those for various other countries, made on the latest figures available, shows that Australia, with a rate of 5 deaths per 100,000 of mid-year population, occupies a favourable position as regards this disease. Whereas the rate for the Netherlands is only 4, rates range as high as 51 for Portugal. For various other countries, rates are as follows:—Denmark, 5; Canada and New Zealand, 6; Union of South Africa (European population) and United States of America, 7; United Kingdom, 10; Switzerland, 15; Greece, 18; Italy, 20; France, 23; Finland, 29; Japan, 36.

(iii) *Malignant Neoplasms, including Neoplasms of Lymphatic and Haematopoietic Tissues (B18)*. (a) *General*. Deaths classified under this heading according to the Sixth Revision of the International List (used in Australia for deaths registered in 1950 to 1957) are not directly comparable in total with those on the Fifth Revision basis (see Official Year Book No. 39, page 628). This should be kept in mind in considering the comparisons shown in the following pages.

(b) *Seat of Disease*. Tables showing the seat of disease in conjunction with age and conjugal condition of the persons dying from malignant neoplasms in 1960 will be found in *Demography*, Bulletin No. 78. A summary regarding seat of disease for 1960 is given below.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND HAEMATOPOIETIC TISSUES, AUSTRALIA, 1960.**

(c) *Age at Death.* The ages of males and females who died from malignant neoplasms in 1960 are given below, together with figures for 1921, 1931, 1941 and 1951. The increase in the number of deaths from malignant neoplasms in the years since 1921 is due principally to the increase in the number of people in the higher age groups, at which ages the risks of cancer are much greater. While the total population increased by about 89 per cent. between 1921 and 1960, the number of people over 54 years of age increased by about 175 per cent. The increase in the number of deaths in the lower age groups from 1951 is partly due to the inclusion of neoplasms of lymphatic and haematopoietic tissues, and it is probable also that part of the increased number of deaths from cancer recorded in recent years has been due to improved diagnosis and certification on the part of the medical profession.

**MALIGNANT NEOPLASMS(a): NUMBER OF DEATHS IN AGE GROUPS, AUSTRALIA.**

(a) Includes neoplasms of lymphatic and haematopoietic tissues.

(d) *Death Rates.* The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent they reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see previous paragraph). In 1921, the rate for Australia was 87 (males, 88; females, 87); in 1931 it was 101 (males, 105; females, 97); in 1941 it was 119 (males 119; females, 120); and in 1951 it had risen to 126 (males, 130; females, 122). Figures for 1960 gave a rate of 129 (males, 139; females, 120).

(e) *Death Rates, Various Countries.* Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows:—Portugal, 91; Japan, 98; Canada, 128; Australia, 129; Union of South Africa (European population), 134; Italy, 138; New Zealand (excluding Maoris), 144; United States of America (all races), 147; Finland, 152; the Netherlands, 163; Switzerland, 193; France, 194; and England and Wales, 214. The rates are for the latest available year in each case.

(iv) *Diseases of the Heart (B25 to B28).* The number of deaths classified to diseases of the heart in 1960 was 31,827 (18,654 males and 13,173 females). This class is the largest amongst causes of death, the rate having increased from 112 per 100,000 of mean population in 1911–15 to 310 in 1960. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates for heart diseases for various years from 1921 were as follows:—1921, 93 (males, 102; females, 83); 1931, 159 (males, 178; females, 142); 1941, 269 (males 306; females, 231); 1951, 314 (males, 367; females, 259); and 1960, 310 (males, 359; females, 259). Deaths from heart diseases in 1960 represented 36 per cent. of the total deaths.

(v) *Puerperal Causes (B40).* It was shown in Official Year Book No. 39, page 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The Seventh Revision, introduced in 1958, did not affect comparability. The death rate from these causes (including criminal abortion) has fallen rapidly during recent years and in 1960 the rate was 0.5 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 121 deaths in 1960 correspond to a death rate of 2.38 per 100,000 females. The death rate may be expressed in other terms by stating that 1 of every 1,883 women giving birth to a live child in 1960 died from puerperal causes.

The death rate per 1,000 live births from puerperal causes in various countries for the latest available year is as follows:—the United States of America (all races), Denmark, and England and Wales, 0.4; The Netherlands and Australia, 0.5; New Zealand (excluding Maoris), France, and Canada, 0.6; Finland, 0.7; Switzerland, 0.8; Italy, 1.1; and Japan, 1.5.

Tables showing ages at marriage and at death, duration of marriage and issue, will be found in *Demography*, Bulletin No. 78.

(vi) *Causes of Infant Mortality.* See section devoted to causes of infant deaths on pages 341–8.

(vii) *Accidents, Poisonings and Violence (BE 47 to BE 50).* (a) *General.* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. It can be seen also that in 1960 the proportion of deaths caused by violence was 7.51 per cent., compared with 6.76 per cent. in 1931–35.

The low level of the rates and proportions for the years 1941–45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July, 1947, deaths of defence personnel from accidents, etc., have again been included.

## ACCIDENTS, POISONINGS AND VIOLENCE: DEATH RATES.(a)

1960 ..	72	33	52	15	6	11	2	1	2	89	40	65	934	518	751

(a) Number of deaths per 100,000 of mean population. (b) Includes "open verdict".  
(c) Includes late effects of injuries due to operations of war. (d) Recalculated on the basis of the revised population figures adjusted in accordance with the preliminary results of the Census of 30th June, 1961.

(b) *Accidents (BE 47, BE 48).* In 1960, the total number of deaths from accidental causes was 5,395 (3,750 males and 1,645 females). Just over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows:—Motor vehicle traffic accidents, 2,570 (47.64 per cent.); motor vehicle non-traffic accidents, 66 (1.22 per cent.); other road vehicle accidents, 66 (1.22 per cent.); railway accidents, 95 (1.76 per cent.); water transport accidents, 95 (1.76 per cent.); aircraft accidents, 45 (0.84 per cent.); a total of 2,937 (54.44 per cent.). Other important causes were accidental falls, 902 (16.72 per cent.); accidental drowning, 400 (7.41 per cent.); and accident caused by fire and explosion of combustible material, 203 (3.76 per cent.).

(c) *Suicide (BE 49). Modes Adopted.* Deaths from suicide in 1960 numbered 1,092 (males, 778; females, 314). Firearms and explosives were used in 283 cases (25.92 per cent. of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows:—Poisoning other than by gases, 302 (27.65 per cent.); poisoning by gases, 201 (18.41 per cent.); hanging or strangulation, 152 (13.92 per cent.); submersion (drowning), 59 (5.40 per cent.); other modes, 95 (8.70 per cent.).

Of the 778 males who committed suicide, 266 (34.19 per cent.) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 148 cases (47.13 per cent.).

*Age at Death.* The following table shows the age of persons who committed suicide in 1960.

## AGE OF PERSONS WHO COMMITTED SUICIDE: AUSTRALIA, 1960.

Age Group (Years).	Males.	Females.	Persons.	Age Group (Years).	Males.	Females.	Persons.
10-14 ..	3	..	3	60-64 ..	59	34	93

50-54 ..	78	33	111				
55-59 ..	63	37	100				
				<b>Total Deaths ..</b>	<b>778</b>	<b>314</b>	<b>1,092</b>

(d) *Homicide and Operations of War (BE 50).* Of the 159 deaths recorded in 1960, there were 151 deaths from homicide and injury purposely inflicted by other persons (not in war), of which assault by firearms and explosives caused 51, assault by cutting and piercing instruments 26, assault by other means 73, and injury by intervention of police 1. Deaths from injury resulting from the operations of war numbered 8, but all were deaths from late effects of such injuries.

11. Age at Death and Average Issue of Deceased Married Males and Females.—*Demography*, Bulletin No. 78 contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1960. Deaths of married males in 1960 numbered 37,772, and those of married females, 30,581. The tables which follow deal, however, with only 37,276 males and 30,367 females, the information regarding issue in the remaining 710 cases being incomplete. The total number of children in the families of the 37,276 males was 112,458 and of the 30,367 females, 98,892. The average number of children is shown for various age groups in the following table.

AGE AT DEATH AND AVERAGE ISSUE OF DECEASED MARRIED (a) MALES AND FEMALES: AUSTRALIA.

## § 6. Vital Statistics of External Territories.

Because of the outbreak of hostilities in the Pacific during the 1939-45 War, civil administration in the external territories was suspended on 11th February, 1942, and registration of births, deaths and marriages was not resumed until 1946. The following table for the year 1960, shows the number of marriages, births and deaths registered in the external territories under the control of Australia. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 78.

## VITAL STATISTICS: EXTERNAL TERRITORIES, 1960.

Territory.	Marriages.	Births.	Deaths.
Christmas Island(a) .. .. .	8	93	15
Cocos (Keeling) Islands(b) .. .. .	..	2	..
Norfolk Island(a) .. .. .	1	10	16
Papua(c) .. .. .	89	218	15
Trust Territory of New Guinea(c) .. .. .	96	329	50
Trust Territory of Nauru(c) .. .. .	2	17	4

(a) Total population.  
population only.

(b) Excluding those registered on Home Island.

(c) Non-indigenous

## § 7. International Vital Statistics.

**Vital Statistics Rates—Principal Countries.**—In the following table, vital statistics rates for selected countries are shown. Crude marriage, birth and death rates represent the number of "events" reported for the year stated per 1,000 of the population. Infant mortality rates

are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nation's *Demographic Yearbook*, 1960 (See explanation of true death rates, para. 4, p. 337).

In many instances, the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nation's *Demographic Yearbook*, 1960 (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

## CHAPTER XI.

### HOUSING AND BUILDING.

NOTE.—In § 1 of this chapter details are given of the characteristics of dwellings as obtained from censuses, § 2 outlines government assistance to housing since 1945 and operations under the War Service Homes Act 1918–1956, and a summary of building activity, including building approvals, is provided in § 3.

For further information on dwellings as obtained from censuses, reference should be made to the results published in the detailed tables of the 1954 Census (*see Price List of Publications at end of this volume*) and earlier censuses.

More detailed information on building activity may be found in the *Quarterly Bulletin of Building Statistics*, and current information is obtainable also in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and in the mimeograph statements *Building Statistics: Number of New Houses and Flats* (quarterly), and *Building Approvals* (monthly).

Details of dwellings at the 1961 Census are being published progressively in mimeograph form for the individual States and Territories.

#### § 1. Census Dwellings.

1. *General.*—At each Census, in addition to the questions relating to the personal particulars of the individual members of households, there have been a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the Census. For the purpose of the Census, a "dwelling" is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution.

2. *Number of Dwellings.*—(i) *Censuses 1911 to 1954.* The following table shows the number of occupied and unoccupied dwellings in Australia at each Census from 1911 to 1954. Occupied dwellings are classified into private and other dwellings. Dwellings other than private include hotels, boarding houses, lodging houses, hostels, hospitals, educational, religious and charitable institutions, defence and penal establishments, etc. The term "unoccupied dwellings" is not synonymous with vacant houses and flats available for occupancy, but refers mainly to "week-end", holiday and other dwellings whose usual occupants were temporarily absent on the night of the Census; newly-completed dwellings awaiting occupancy are also included.

#### DWELLINGS: AUSTRALIA, CENSUSES, 1911 TO 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Census.	Occupied.			Unoccupied.
	Private.	Other than Private.	Total.	
1911 .. .. .	894,389	29,070	923,459	33,473
1921 .. .. .	1,107,010	46,275	1,153,285	51,163
1933 .. .. .	1,509,671	37,705	1,547,376	68,772
1947 .. .. .	1,873,623	34,272	1,907,895	47,041
1954 .. .. .	2,343,421	36,932	2,380,353	112,594

(ii) *Censuses, 1954 and 1961.* A table showing the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the Census of 30th June, 1954, was included in earlier issues of this Year Book (*see* No. 47, p. 378). Particulars for the 1961 Census may be found in the Appendix to this issue.

(iii) *States and Territories, 1947 and 1954.* The total numbers of occupied and unoccupied dwellings in each State and Territory at the Censuses of 1947 and 1954 were as follows.

#### DWELLINGS: STATES AND TERRITORIES, 1947 AND 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

State or Territory.	Census, 30th June, 1947.		Census, 30th June, 1954.

<b>Australia .. .. .</b>	<b>1,907,895</b>	<b>47,041</b>	<b>2,380,353</b>	<b>112,594</b>

The numbers of occupied dwellings in the External Territories at the 1954 Census were as follows:—Norfolk Island, 310; Papua, 1,605; Trust Territory of New Guinea, 3,098; Trust Territory of Nauru, 99. (The foregoing figures are exclusive of dwellings occupied solely by indigenous population.)

3. *Class of Dwelling.*—A table showing the number of the various classes of occupied dwellings in the Metropolitan Urban, Other Urban, and Rural Areas of Australia at the Censuses of 1947 and 1954 appeared in earlier issues of this Year Book (*see* No. 47, p. 381). Particulars available from the 1961 Census may be found in the Appendix to this issue.

4. *Population According to Class of Dwelling, etc.*—The following table shows the number of the various classes of occupied dwellings at the Censuses of 1947 and 1954, together with the number of inmates.

OCCUPIED DWELLINGS, ETC. AND INMATES, AUSTRALIA, 1947 AND 1954.

(a) Includes shared private houses for which only one Householder's Schedule was received.

(b) Portion of a shared private house which was occupied separately and for which portion a separate Householder's Schedule was received.

(c) Shipping, railway and air travellers.

5. **Occupied Private Dwellings.**—(i) *Material of Outer Walls.* Tables showing occupied private dwellings classified according to the material of which the outer walls were built, the number of rooms in the dwelling, the number of inmates, the nature of occupancy, weekly rental, and date of building for 1947 and 1954 were included in earlier issues of this Year Book (see No. 47, p. 383). Particulars available from the Census of 30th June, 1961, may be found in the Appendix to this issue.

## § 2. Finance for Housing.

1. **General.**—Financial assistance for the building or purchase of homes in Australia is provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments.

The private sources of housing funds include life assurance offices, private trading and saving banks, permanent building societies and private mortgagees. Details of the extent of lending by these private sources are not available.

The government sources of finance include both Commonwealth and State Governments, War Service Homes Division and Government Banks.

2. Housing Agreements between Commonwealth and State Governments.—Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial loans to the States for the construction of housing.

(i) *The 1945 Agreement.* In November, 1945, the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Tasmania withdrew from the Agreement in August, 1950, and South Australia did not begin to operate under it until July, 1953. The Agreement expired on 30th June, 1956. Between 1945-46 and 1955-56 under this Agreement the Commonwealth Government advanced £88,849,000 to New South Wales; £85,781,000 to Victoria; £24,344,000 to Queensland; £11,700,000 to South Australia; £27,050,000 to Western Australia; and £2,835,000 to Tasmania.

For the amount of money advanced by the Commonwealth Government to each State in individual years and for features of the 1945 Commonwealth and State Housing Agreement see Year Book No. 47, p. 389.

The number of dwellings erected in each State under the 1945 Agreement is shown in the following table.

(a) Includes flats.

Initially, houses constructed under the 1945 Commonwealth and State Housing Agreement could be sold to tenants, provided the tenant was able to arrange payment of the full purchase price of the house to the State Authority immediately on sale. Under this arrangement sales to tenants were relatively few. In April, 1955, the Commonwealth and the States entered into a supplementary agreement whereby the State Governments were permitted to sell houses to tenants on terms. These were:—deposit, 5 per cent. of the first £2,000 and 10 per cent. of the balance of the purchase price of the house, the maximum amount of the remaining balance being limited to £2,750 and repayment of the balance to be made over a maximum period of 45 years at an interest rate of 4½ per cent. a year. The 1945 Agreement has been amended by the 1961 Housing Agreement so that the States may sell houses built under the 1945 Agreement on terms decided by them rather than on the above-mentioned terms. Tenants eligible under the War Service Homes Act are entitled to purchase houses built under the Agreement on the terms provided in that Act. The number of houses sold under the Agreement is as follows.

(a) Tasmania did not operate under the 1945 Agreement after August, 1950.

(ii) *The 1956 Agreement.* In 1956, the Commonwealth and the States entered into a new agreement, under which added emphasis was placed on the construction of homes for private ownership. Features of the agreement are as follows.

- (a) The Commonwealth Government provided finance to the States over a period of five years ending 30th June, 1961, for the erection of housing projects.
- (b) For the first two years of the agreement, 20 per cent. of the money allocated to each State was advanced to building societies and other approved institutions for lending to private house builders. During the remaining three years of the agreement this proportion was 30 per cent.
- (c) The remaining 70 per cent. (first two years, 80 per cent.) of the allocation to each State was used by the States for the erection of houses for either rental or sale. The States determined the type of houses to be erected, their location and the selection of tenants. They also fixed the terms of selling.

(d) The Commonwealth was entitled to specify that a portion, not exceeding 5 per cent. in any one year, of the moneys referred to in (c) above, be set aside for the erection of houses for serving members of the defence forces nominated by the Commonwealth. The Commonwealth provided supplementary advances to the States equal to the amounts set aside by them for this purpose.

(e) Each advance of money and interest thereon is to be repaid in equal annual instalments over a period of 53 years from the date each advance was made. The rate of interest chargeable on advances is the long-term bond rate at the time the advance was made less three quarters of one per cent. when the bond rate does not exceed  $4\frac{1}{2}$  per cent. per annum, and, less one per cent. when the bond rate exceeds  $4\frac{1}{2}$  per cent. per annum. From the inception of the Agreement until February, 1961, the effective interest rate was 4 per cent. per annum; subsequently the rate was  $4\frac{3}{4}$  per cent. per annum.

The following table shows progress made under the 1956 Housing Agreement during 1960-61.

(iii) *The 1961 Agreement.* Following the termination of the 1956 Housing Agreement on 30th June, 1961, a new agreement running for a further period of five years was entered into by the Commonwealth and the State Governments. This Agreement continues with some amendment the terms and conditions of the 1956 Agreement. The main amendments have the result that:—

- (a) the rate of interest on advances by the Commonwealth to the States will be equal to the long-term Commonwealth bond rate at the time the advance was made less one per cent., and

- (b) the Commonwealth and/or a State may agree to contribute funds in excess of the previous statutory maximum of 5 per cent. of a State's allocation, for the erection of dwellings for servicemen.

The new Agreement also amends the 1945 Agreement so that the provisions in respect of sale of houses built under the 1945 Agreement are the same as for those built under the 1956 Agreement.

3. **State Housing Authorities.**—(i) *General.* In each State, the major Government housing schemes operated by the State Housing Authorities are those provided for under the Housing Agreements between the Commonwealth and State Governments referred to earlier. Other State Government assistance to housing is referred to in the following paragraphs.

(ii) *New South Wales.* The principal schemes operating in New South Wales are as follows.

- (a) *Commission-Financed Advances.* Under the Housing Act 1912–55, the Housing Commission is empowered to provide finance to persons to have houses erected on their own land, to purchase existing dwellings, or to effect improvements or repairs to houses. In respect of advances made under the Act prior to 1952, the maximum amount that could be lent was limited to £1,540, repayment of which could be made over a maximum period of 45 years. Interest charged was at the rate of 4½ per cent. a year. Under this scheme, 786 houses were erected while a further 106 houses were erected by the Housing Commission on Commission land and sold, under this section of the Act, to approved applicants. Regulations prescribing the present maximum amount that may be advanced and the limitation on income which may be received by an applicant for a loan have not been published and at present no advances or sales are being made.

(b) *Rental Housing (other than Housing Agreements).*

- (1) Upon request by other State Departments, the Housing Commission will erect houses for employees of those Departments, e.g., Education, Agriculture, Water Conservation, etc. These Departments provide the necessary land and funds needed to finance the erection of the houses. Rentals charged are fixed by the Departments in accordance with the salaries of the officers occupying the houses. The number of rental houses erected (other than under the Housing Agreements) is 925.
- (2) Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units are £1 per week for elderly single persons and £1 10s. per week for elderly couples. Four hundred and twenty-seven of these units have been completed.

(c) *Sales Scheme.*

- (1) During 1953–54, the Housing Commission began the erection of 100 houses for sale. Under this scheme, the Commission acted as the construction authority while administrative arrangements were carried out by the Rural Bank. Houses were sold on the basis of 10 per cent. deposit with repayment of the balance over a maximum period of 40 years. Construction of all houses has been completed.
- (2) Applicants who have established eligibility for Housing Commission accommodation may now apply to have a standard type dwelling erected on their own block of land. Terms of repayments are the same as for the 1956 Agreement dwellings, i.e. a minimum deposit of £50 with a maximum repayment period of 45 years with interest at 5½ per cent. Under this scheme 100 dwellings have been completed.

(iii) *Victoria. (a) Home Finance Trust.* In 1956, a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants. Except in special circumstances, no loan will be granted if the borrower or wife or husband of the borrower already owns a house in Victoria at the date of the proposed mortgage.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed 95 per cent. of the value of the security (house and land) and are not made if the value of the security exceeds £5,000. In the case of purchase, the house must not have been erected more than two years before the date of the mortgage. Repayment of loans may be made over a maximum period of 30 years, with interest charges determined by the Trust. At 30th June, 1961, 1,770 loans totalling £4,898,685 had been made.

(b) *Housing of Aborigines.* Under the Aborigines Act 1958 as amended by the Aborigines (Housing) Act 1959, the Housing Commission of Victoria is empowered to erect houses for the Aborigines Welfare Board for occupation as dwellings by aborigines.

(iv) *Queensland.* The following housing schemes are operating in this State.

(a) *Queensland Housing Commission.* The Queensland Housing Commission was established in 1945 to take over the operation of the State Advances Corporation which had been set up in 1916 to make advances to home builders under the State Advances Act. The Commission was given increased powers to assist in meeting the existing housing shortage, and was empowered, as well as to make advances to private house builders, to build houses itself either for sale or for letting, under the State Housing Acts, 1945 to 1961. A person to be eligible must be the proprietor of a suitable building site, must not already own a dwelling and must undertake to use the completed dwelling as a home for himself and family. The present maximum advances allowable under the Acts are £3,000 for a timber-frame building, £3,100 for a brick veneer and £3,350 for a brick or concrete building. The rate of interest on advances is 5½ per cent. a year. Repayment may be made at the option of the borrower over either a 30-year or a 45-year period. A borrower or purchaser who elects to repay over a 30-year period, who is under 40 years of age, and who has passed a prescribed medical examination, is entitled to free life insurance cover to an amount sufficient to liquidate his indebtedness to the Commission in the event of his death before his loan has been fully repaid, provided that the maximum benefit payable under such insurance cover does not exceed £2,250. In the sixteen years ended 30th June, 1961, 24,120 houses were completed under all schemes administered by the Commission. Of the completed houses, 13,491 are being acquired under home-ownership schemes and 10,629 are for rental.

(b) *Workers' Dwellings.* The maximum advances under this scheme were increased to £3,000 for a timber dwelling, £3,100 for a brick veneer, and £3,350 for a brick or concrete dwelling from 19th May, 1960. During 1960-61, 593 workers' dwellings were erected. Since the inception of this scheme in 1910 to 30th June, 1961, 27,304 dwellings have been completed, and total advances made for those dwellings amounted to £23,011,569.

(c) *Workers' Homes.* Workers' homes are erected by the Queensland Housing Commission under the Workers' Homes Act 1919-1957. These homes are intended for persons who are not the owners of building sites, and applications are confined to persons with a net annual income for taxation purposes of not more than £800. The Housing Commission builds the home to suit the applicant's needs, on Crown Land or on land purchased for the purpose, which is then converted to perpetual leasehold tenure. An applicant pays a deposit of 5 per cent. of the purchase price of the home and the balance by monthly rent over a term of 30 to 45 years. The rate of interest is 5½ per cent. a year. The number of houses constructed under this Act up to 30th June, 1960, was 2,347.

On 29th March, 1961, the Workers' Homes Acts were repealed, and no further applications for homes to be erected under this scheme can be accepted.

(v) *South Australia.* In South Australia, the Housing Trust builds houses for both rental and sale and, in addition, administers an emergency dwelling scheme for the South Australian Government. From July, 1946 to 30th June, 1961, 40,801 houses were erected by the Trust in both city and country areas.

- (a) *Rental Houses.* In the main, houses built for rental by the Trust are built with funds provided under the Housing Agreement. However, in 1958, the State Government made available funds for the purpose of providing houses in the country towns for people who cannot afford to pay an economic rent, and to 30th June, 1961, 155 houses had been built.

Upon request by State Government Departments the Trust will erect houses for purchase by those Departments for the accommodation of their employees. During the financial year 1960-61, 175 houses were built for Education, Police, Highways and Woods and Forests Departments, etc. Rents for the houses are determined by the Public Service Board. Rents charged for other accommodation are generally based on the overall cost of construction, and vary not only according to the size of the dwelling but also according to date of erection. As at 1st November, 1961, the rents of 5-roomed houses (i.e., 3 bedrooms) ranged from £2 2s. a week for houses of an older type to £3 12s. 6d. a week for houses then being completed. Factors taken into consideration when allotting rental houses include date of application, housing need and suitability of tenant. Persons with high incomes are asked to consider purchasing their own homes.

- (b) *Sales Scheme.* Houses built under this scheme, which was inaugurated in 1946, are of solid or timber-frame construction. More than 19,000 have been completed in both metropolitan and country areas since the scheme began. When houses are sold, the usual practice is for the Trust to recover the total cost of the house and land by the purchaser paying the total amount in cash or (as is usually the case) paying a deposit (which varies according to the type of house and locality—at present £350 for a timber-frame house and £550 for a 5-roomed brick house—and the purchaser's ability to pay) and raising the balance by way of mortgage. In cases where the deposit and first mortgage are insufficient, the Trust may advance the balance by way of a second mortgage, the repayment term of which is a maximum of 30 years, interest being at the rate of 6 per cent. a year. In 1956, the Trust began the erection of houses, which may be of solid or timber-frame construction or a mixture of both, for individuals on their own land. Houses are built by contract under the Trust's supervision. Prices for building and supervision of the standard houses covered by the scheme in late 1961 ranged from £3,350 for a 2-bedroom brick house to £5,500 for a 6-roomed house.
- (c) *Rural Housing.* In order to assist primary producers, the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting prefabricated houses to the site. At the 30th June, 1961, prices for houses erected on level sites within 100 miles of Adelaide ranged from £2,300 for a 2-bedroom minimum type timber house to £3,000 for a 3-bedroom, asbestos cement sheeted timber house.

(vi) *Western Australia.* The State Housing Commission is encouraging home ownership under the State Housing Act 1946-1961, which is a continuation of the Workers' Home Board Act, originally promulgated in 1911.

Purchases can be arranged under—(a) a freehold scheme, either by way of mortgage or contract of sale, and (b) leasehold on either a perpetual Crown Lease or a lease for a term of years from the Commission. Under the leasehold scheme purchasers can convert to freehold conditions upon having a 10 per cent. equity in the improvements and agreeing to purchase the land at the valuation originally determined at the date of commencement of the lease.

The housing authority builds the houses by private contract on land provided by the applicant or the Commission. The maximum loan is £2,500 under State Housing Act except for houses built north of the 26th parallel of latitude, in which case the Minister can approve of an advance exceeding £2,500.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent. is required, but under the contract of sale or leasehold provisions the minimum deposit is £100. The interest rate in both cases is 5½ per cent. per annum and the repayment period is 45 years. To obtain assistance, an applicant cannot have an income exceeding £1,230 a year, plus £25 for each dependent child under 16 years of age. This figure varies according to the movement of the basic wage. North of the 26th parallel, the Minister may allow a higher income family to be assisted.

A second mortgage scheme exists under the State Housing Act which provides that assistance be limited to those applicants who are building or purchasing new residential improvements, the cost of which does not exceed £3,000. By policy decision, the Commission limits the second mortgages to a maximum of £1,000.

The number of houses completed under this Act to 30th June, 1961 was—freehold 1,514, leasehold 2,932, assistance by second mortgage 705.

(vii) *Tasmania*. The Agricultural Bank is authorized under the terms of the Homes Act 1935 to make loans to eligible persons for home building on the security of a first mortgage over the property. To be eligible, a person must be married or be about to marry or have dependants for whom it is necessary to provide a home. At present, there are no statutory limitations as to the maximum income which an eligible applicant may receive. However, it is the policy of the Bank not to make loans to persons who are well able to provide houses for themselves. The maximum amount which the Bank will lend at present is £3,300 on homes built in proclaimed brick areas, and £3,000 on timber houses. The rate of interest at present charged is 5½ per cent. a year. Present policy is to allow a maximum of 31 years for repayment of loans.

4. **Housing Schemes in Commonwealth Territories.**—(i) *Northern Territory*. In 1946, control of all Government-owned residences in the Territory (excluding those belonging to the Defence Services, Commonwealth Railways or attached to post offices) was vested in the Administration. The Administration provides houses for rental to Commonwealth employees.

- (a) In 1953, a Housing Scheme was inaugurated under which potential house builders may obtain loans of up to £2,750 for the erection of houses, the purchase or extension of existing houses or the discharge of mortgages on houses. Up to 30th June, 1961, 665 loans totalling £1,696,220 had been approved. These were for:—construction, 487; purchase 132; discharge of mortgage, 46.
- (b) In January, 1959, an Ordinance was passed to set up a Housing Commission to construct houses for letting at an economic rental to low income groups. At 22nd July, 1960, the first 20 Housing Commission homes were completed at Alice Springs.
- (c) The Administration is prepared to sell to its tenants the houses they occupy for cash or on terms with a minimum deposit of 5 per cent. of the first £2,000, and 10 per cent. of the balance. The maximum advance by mortgage is £2,750. Repayment is over a maximum of 45 years, and interest is at present 4½ per cent.

(ii) *Australian Capital Territory.* The Commonwealth Government provides houses primarily for rental to employees of Government organizations and to persons privately employed in the Australian Capital Territory.

From 1st July, 1945, to 30th June, 1961, 8,333 houses and flats were erected for the Department of the Interior for letting.

Government rental houses may be purchased by tenants, and the basis of sale is a minimum deposit of 10 per cent. of the purchase price fixed by the Department of the Interior, with no limit to the amount which may be held on mortgage. Repayment may be made over a maximum period of 45 years. Interest charged on loans is 4½ per cent. per annum. Since 1950, 1,874 houses have been sold to tenants.

Loans may be granted by the Commissioner for Housing to enable persons to purchase, erect or enlarge houses in the Territory or to discharge mortgages. Where the Commissioner's valuation of the property concerned does not exceed £2,000 the maximum loan may not exceed 95 per cent. of the valuation. If the Commissioner's valuation exceeds £2,000 the maximum loan is 95 per cent. of the first £2,000 and 90 per cent. of the balance (but in no case can the amount lent exceed £3,500). Repayment may be made over a maximum period of 45 years. The current rate of interest is 5½ per cent. per annum. From 1st July, 1950, to 30th June, 1961, 1,052 loans were granted. Before 16th May, 1962, the maximum amount of loan was £2,750.

(iii) *Papua and New Guinea.* The Housing Loans Ordinance 1953–58 permits the advance of loans of up to £2,750 to any member of the community for the erection of a house or the purchase or extension of an existing house. The loans are limited to declared township areas and are repayable over a maximum period of 35 years. The effective rate of interest is 5 per cent. per annum. Up to 30th June, 1961, 172 loans totalling £394,683 had been approved.

In 1960, the Administration started a project for providing 50 low-cost houses for rental to indigenes and mixed-bloods. These houses were completed during August, 1960, and an additional 20 houses were completed by November, 1960.

**5. War Service Homes.**—The provision of War Service Homes is a function of the War Service Homes Division of the Department of National Development, and the administration of the War Service Homes Act is under the control of the Director of War Service Homes.

The War Service Homes Act 1918–1961 is a measure for the provision of homes for Australian ex-servicemen who served during the 1914–1918 War or the 1939–1945 War and to persons with service in Korea or Malaya. Provision is made also for assistance to the female dependants of Australian ex-servicemen and other classes of eligible persons as defined in the Act. Assistance may be granted to an eligible person and the wife or husband of that person as joint tenants.

The maximum amount of loan or advance which may be granted under the Act is £3,500. The period of repayment may be approved up to 45 years. In the case of a widow or widowed mother of an Australian ex-serviceman, the period may be extended to a maximum of 50 years.

The War Service Homes Division does not provide homes for occupation purely on a tenancy basis.

The following table gives details of the operations of the War Service Homes Division from the inception of the Scheme on 6th March, 1919, to 30th June, 1961, and also details of the activities for the year 1960–61.

## WAR SERVICE HOMES DIVISION: SUMMARY OF OPERATIONS.

In addition to the homes provided under the War Service Homes Act, 1,921 homes which had been provided originally under the Housing Agreements with the States have been taken over in accordance with those Agreements, 129 being taken over during 1960-61.

At 30th June, 1961, the arrears of instalments due on loans made available under the Act totalled £594,442, making an average of £4 0s. 9d. per account.

Insurances in force under the Act as at 30th June, 1961, including cover notes, amounted to £512,433,573. Expenditure from the Insurance Trust Account during the year ended 30th June, 1961, totalled £207,065, whilst the premiums received during the same period amounted to £253,639, giving a surplus of £46,574.

6. Other Forms of Government Assistance.—(i) *General.* In addition to the assistance given to housing as outlined above, the Commonwealth and State Governments, through advances by government banks and the exercise of certain guarantees of the operations of Co-operative Terminating Building Societies by State Governments, further assist in making finance available for the erection and purchase of houses.

(ii) *Government Banks.* The terms and conditions governing the making of advances may be altered from time to time; consequently, no attempt has been made to tabulate them. However, the usual loan for a house of solid construction (brick, etc.) is generally between £2,500 and £3,000. The average loan for a timber-frame house is £2,250. Interest rates charged range from 5½ per cent to 6½ per cent. a year. In some institutions, this may be changed, usually after from 5 years to 10 years from the date of the loan. The maximum period of repayment ranges from about 20 years for timber-frame houses to 30 to 40 years for a house of more solid construction.

Details of loans made by the Commonwealth Trading Bank of Australia and major Private Trading Banks for the building or purchasing of homes may be found in Chapter XX.—Private Finance.

(iii) *Building Societies.* There are over 2,000 building societies in Australia, 95 per cent. of which are of the terminating type. Most of the terminating societies are in New South Wales and Victoria. The Government of the State guarantees loans made to the societies in New South Wales, Victoria, Queensland, Western Australia and Tasmania. Terminating societies also operate in the Australian Capital Territory, where legislation was introduced in May, 1959, to provide a government guarantee for loans made to them.

In addition to the terminating societies, there are a number of permanent building societies operating in all States under State legislation. State Governments do not generally guarantee the borrowings or lendings of these societies. However, in Western Australia the Housing Loan Guarantee Act, 1957, provided for guarantees in respect of loans made by approved lending institutions (including permanent building societies) to individuals on the security of a mortgage. A premium, one-quarter of 1 per cent. of the balance of the loan outstanding at set intervals, is payable by the lender in return for the guarantee.

In Tasmania, guarantees have been given by the Treasurer to enable permanent building societies to receive substantial bank overdrafts.

Further details of the number, liabilities and assets of registered building societies in Australia may be obtained from Chapter XX.—Private Finance.

### § 3. Building.

1. *General.*—(i) *Statistics of Building Approved.* Statistics of building approvals have been compiled from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorized by governmental authorities. *They relate only to approvals for buildings as distinct from the construction of roads, bridges, railways, earth works, water storage, etc.* Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Additions of £5,000 and over are included with new buildings in all States, except New South Wales, where they are included in “alterations and additions”.

These statistics are available from the year 1953-54.

(ii) *Statistics of Building Commenced, Completed and Under Construction.* These relate to building by private contractors, Government authorities and owner-builders.

The following outlines the scope of the statistics: (a) *only the erection of new buildings as distinct from the construction of railways, bridges, earthworks, water storage, etc., is covered;* (b) major new additions to existing buildings are included as new buildings; (c) minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached; figures for flats include “home units”); (f) imported prefabricated houses are included; (g) details obtained from Government authorities and building contractors refer to all areas whereas details for owner-builders cover only areas subject to building control by Local Government Authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

*Private or Government.* A building is classified as "private" or "government" according to ownership.

*Owner-built.* An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

*Contract-built.* Includes the operations of all building contractors and Government instrumentalities which undertake the erection of new buildings.

*Commenced.* A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

*Completed.* A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

*Employment.* Figures relate to persons actually working on the jobs of contractors who undertake the erection of new buildings and of Government instrumentalities which erect new buildings on their own account. They include persons actually engaged on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and instrumentalities. The figures include working principals and their employees, men working as or for sub-contractors, and men temporarily laid off on account of weather.

Contractors are asked to give details of the persons employed *on a specified day*, but, because of frequent movement between jobs and because some persons (such as electricians, etc.) may work on several jobs which are under construction simultaneously, some duplication may occur.

The figures exclude persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

*Values.* All values shown exclude the value of land and represent the estimated value of buildings on completion.

2. New Houses.—(i) *Approved, Commenced, Completed and Under Construction, 1960-61.* The next table provides a summary of the number of new houses approved, commenced, completed and under construction in each State and Territory.

A graph showing the number of new houses commenced, completed and under construction for the period 1949-50 to 1960-61, will be found on page 379.

### NEW HOUSES: NUMBER, 1960-61.

(a) Includes flats.

3. *New Flats.*—The figures in the foregoing tables, except those for the Northern Territory, do not include particulars of new flats. The summary below shows the number of new flats approved, commenced, completed and under construction for the years 1956-57 to 1960-61. It should be noted: (a) that the figures are additional to the numbers of houses shown in other tables, (b) that each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, (c) that new flats only are included, i.e., the conversions of old buildings into flats are omitted, and (d) "home units" are included as flats.

A graph showing the number of new flats commenced, completed and under construction for the period 1949-50 to 1960-61 will be found on page 380.

## CHAPTER XII.

### LABOUR, WAGES AND PRICES.

**NOTE.**—Reference is made in this chapter to retail and wholesale price indexes. For particulars of the Export Price Index, see Chapter XIII., Trade, and of the Farm Production Price Index, see Chapter XXX., Miscellaneous.

For further information on the subjects dealt with in this Chapter, see the *Labour Report*, issued by this Bureau. For current information, see the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Quarterly Summary of Australian Statistics*, also the mimeograph statements *Monthly Bulletin of Employment Statistics*, *Consumer Price Index* and *Wholesale Price (Basic Materials and Foodstuffs) Index*.

In addition, the following relevant special publications have been issued in mimeograph form:—*New Indexes of Minimum Weekly Wage Rates—Adult Males and Adult Females* (S.B. 786); *Minimum Weekly Wage Rate Index—Adult Males: Components of Total Wage Rate* (S.B. 902); *Minimum Weekly Wage Rates, January, 1957 to June, 1961*; *Survey of Wage Rates and Earnings, September, 1960* (S.B. 904); *Survey of Weekly Earnings—Australia, October, 1961* (S.B. 22); *Wage and Salary Earners in Employment, June, 1947 to June, 1960*.

#### A. RETAIL PRICES AND PRICE INDEXES.

##### § 1. General.

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 were collected by the Commonwealth Statistician, and in some cases have been recorded by the Statisticians of various States for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923 for each of the six State capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year from 1914 to 1922 for each of the six State capital cities. The list of items currently priced for index purposes is published in *Labour Report* No. 48, 1960.

Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report* and in the *Quarterly Summary of Australian Statistics*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. In § 2 below, previous retail price indexes for Australia are briefly outlined. The current retail price index, entitled the Consumer Price Index, was published for the first time in August, 1960. It was compiled retrospectively to 1948–49. An account of the Consumer Price Index is given in § 3 on page 388.

##### § 2. Previous Retail Price Indexes.

1. **General.**—Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) The "A" Series Index (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June, 1938.
- (ii) The "B" Series Index (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December Quarter, 1953. It was the food and rent constituent of the "C" Series Index and was designed to replace the "A" Series Index for general statistical purposes.

- (iii) *The "C" Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter, 1960. For certain transitional purposes the "C" Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter, 1960, in ratio to movements shown by the Consumer Price Index.
- (iv) *The "D" Series Index*, derived by combining the "A" and "C" Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May, 1933, to May, 1934, and then discontinued.
- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952-53 as base year = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter, 1960.

2. **The "Court" Index.**—In 1937, the Commonwealth Court of Conciliation and Arbitration introduced a "Court" Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court, the "Court" Index ceased to be issued by the Industrial Registrar as at December Quarter, 1953. "Court" index numbers were an arithmetical conversion of the "C" Series Index.

### § 3. The Consumer Price Index.

1. **General.**—This retail price index was first compiled in 1960, retrospectively to September quarter, 1948. A comprehensive account of the index is given in Labour Report No. 48, 1960.

2. **Origin.**—The list of component items and the weighting pattern of the "C" Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936 but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this, and the circumstances which led to the present Consumer Price Index, appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the "C" Series Retail Price Index, in the light of the new pattern of wage earner expenditure and consumption that appeared to be then emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and the pattern of wage earner expenditure. Under these conditions, it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing "C" Series Index on the 1936 revision.

A Conference of Statisticians considered the matter in June, 1953, and resolved (in part) as follows:—

- "(a) That, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period, it is undesirable to make a general revision of the list of items and weighting system of the "C" Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes.

- (b) That an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure."

The "C" Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index (1952-53 base year) was introduced in 1954 and continued until March quarter, 1960.

This Interim Index was a transitional index designed to measure retail price variations on the "C" Series model in terms of post-war consumption weights, as emerging in the early 1950's. It embraced a wider range of commodities and services than did the "C" Series Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index, concurrently with their happening in those years. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period home owning largely replaced house renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these and other changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together they rendered nugatory the attempt to meet the situation by devising a single Interim Retail Price Index. As studies progressed and new data became available, it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals during the period 1950-1960.

3. Purpose, Scope and Composition.—(i) *General.* The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditures of wage earner households. The weighting pattern relates to estimated aggregates of wage earner household expenditures and not to estimated expenditures of an "average" or individual household of specified size, type, or mode of living. In this way it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Consumer (retail) price indexes are sometimes loosely called "cost of living indexes" and are thought to measure changes in the "cost of living". Neither the Consumer Price Index, nor any other retail price index, measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes. But the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following five major groups:—

- Food;
- Clothing and Drapery;
- Housing;
- Household Supplies and Equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage earner households.

(ii) *Composition and Weighting.* A comprehensive view of the present composition and weighting of the Consumer Price Index is given in the table below. The weights shown are those comprised in the index for the six State capital cities combined. Broadly, they are in proportion to estimated consumption in 1956-57 (see (iii) "*Basis of Weighting*" on p. 391), valued at the relevant prices of March quarter, 1960.

## THE CONSUMER PRICE INDEX.

COMPOSITION AND WEIGHTING PATTERN AS AT MARCH QUARTER, 1960 FOR THE SIX STATE CAPITAL CITIES COMBINED.

Group, Section, etc.	Percentage Weight.	
	Section, etc.	Group.
<i>Food</i> — .. .. .	..	32.1
Cereal Products—Bread, flour, biscuits, rice, and breakfast foods .. .. .	4.1	..
Dairy Produce—Milk, cheese, butter, and eggs .. .. .	7.5	..
Potatoes, Onions, Preserved Fruit and Vegetables—Potatoes and onions, canned and dried fruits, and canned vegetables .. .. .	1.9	..
Soft Drink, Ice Cream and Confectionery .. .. .	4.0	..
Other (except Meat)—Sugar, jam, margarine, tea, coffee, baby foods, and sundry canned and other foods .. .. .	4.2	..
Meat—Butcher's (Beef, mutton, lamb and pork) .. .. .	8.8	..
Processed (Bacon, smallgoods and canned meat) .. .. .	1.6	..
<i>Clothing and Drapery</i> — .. .. .	..	19.0
Men's Clothing .. .. .	4.5	..
Women's Clothing .. .. .	7.4	..
Boys' Clothing .. .. .	0.6	..
Girls' Clothing .. .. .	0.9	..
Piecegoods, etc.—Wool, cotton and rayon cloth, nursery squares and knitting wool .. .. .	1.1	..
Footwear—Men's, women's and children's .. .. .	3.4	..
Household Drapery—Bedclothes, towels, tablecloth, etc. .. .. .	1.1	..
<i>Housing</i> — .. .. .	..	10.7
Rent—Privately owned houses .. .. .	2.0	..
Government owned houses .. .. .	0.9	..
Home Ownership—House price .. .. .	4.7	..
Rates .. .. .	2.1	..
Repairs and Maintenance .. .. .	1.0	..
<i>Household Supplies and Equipment</i> — .. .. .	..	13.2
Fuel and Light—Electricity .. .. .	1.9	..
Gas .. .. .	1.5	..
Other (Firewood and kerosene) .. .. .	0.8	..
Household Appliances—Refrigerator, washing machine, stoves, radio set, television set, vacuum cleaner, electric iron, etc. .. .. .	4.5	..
Other Household Articles— .. .. .	..	..
Floor Coverings .. .. .	0.5	..
Kitchen and Other Utensils, Gardening and Small Tools .. .. .	1.0	..
Household Sundries (Household soaps, etc.) .. .. .	1.1	..
Personal Requisites (Toilet soap, cosmetics, etc.) .. .. .	1.0	..
Proprietary Medicines .. .. .	0.8	..
School Requisites .. .. .	0.1	..
<i>Miscellaneous</i> — .. .. .	..	25.0
Transport—Fares—Train .. .. .	1.6	..
Tram and bus .. .. .	2.8	..
Private Motoring—Car purchase .. .. .	3.0	..
Car operation .. .. .	3.9	..
Tobacco and Cigarettes .. .. .	3.9	..
Beer .. .. .	4.1	..
Services—Hairdressing (Haircuts, wave, etc.) .. .. .	0.9	..
Drycleaning .. .. .	0.5	..
Shoe Repairs .. .. .	0.3	..
Postal and Telephone Services .. .. .	0.8	..
Other—Radio and Television operation .. .. .	1.6	..
Cinema Admission .. .. .	0.6	..
Newspapers .. .. .	1.0	..
Total .. .. .	100.0	100.0

4. *Structure.*—(i) *A Chain of Linked Indexes.*—Substantial changes occurred in consumer usage and patterns of expenditure following the 1939–45 War. In order to keep the weighting pattern representative of current expenditures it became necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. Four new series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, and from the March quarter of 1960 onwards) were therefore constructed and linked to form a continuous retail price index series to be known as the Consumer Price Index. During each period between links the items and weighting remained unchanged. At times of linking the weighting pattern was altered and new items that had become significant in household expenditure were introduced.

Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects price variations only and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

(ii) *Comparison of the Four Linked Series.* The Consumer Price Index is a chain of “fixed weight aggregative” indexes, with significant changes in composition and weighting effected at June quarter, 1952, June quarter, 1956, and March quarter, 1960. The principal changes are:—

- (a) the introduction of private motoring (June quarter, 1952) and of television (March quarter, 1960);
- (b) altered proportions of houses under the various modes of occupancy (June quarters, 1952 and 1956); and
- (c) changes in weights of fuel and fares (June quarters of 1952 and 1956) and of private motoring (June quarter, 1956).

It is envisaged that future links will be made in the index when significant changes in the pattern of household expenditure render it necessary to do so.

(iii) *Basis of Weighting.* For most of the items included in the index, the weights used are based on the pattern of consumption of the years 1952–53 to 1956–57, which for these items is broadly representative of the whole period for which the index has been compiled. In some important fields, no single set of items and weights was adequately representative throughout the whole period. Weights relevant to short-term conditions in these fields were therefore used in each of the four linked series which constitute the Consumer Price Index. The principal fields affected are Fuel and Light, Transport, Household Appliances, and Housing.

The resultant sets of index weights are broadly typical of the patterns of consumption of:—

- 1948–49: for periods up to June quarter, 1952;
- 1952–53: for periods from June quarter, 1952 to June quarter, 1956;
- 1956–57: for periods from June quarter, 1956.

The weighting of the index from the beginning of the current linked series (i.e. March quarter, 1960) is representative of a 1956–57 pattern of consumption as adjusted to incorporate television in the index from March quarter, 1960.

The sets of weights used for the successive periods covered by the index have been derived from analyses of statistics of production and consumption, the general Censuses of 1947 and 1954, the Censuses of Retail Establishments of 1948–49, 1952–53 and 1956–57 and the continuing Survey of Retail Establishments; from information supplied by manufacturing, commercial, and other relevant sources; and from special surveys.

In the main, the weights for items are derived from estimates of average household consumption or expenditure for the community as a whole. The following are the principal exceptions:—

- (a) The proportionate weighting of the various modes of occupancy of houses, and the weighting generally in the Housing Group, are as estimated for wage and salary earner households (in the individual cities).
- (b) The weights for private motoring, tobacco and cigarettes, beer and some services have been adapted to accord with notional estimates of expenditure by wage earner households.
- (c) Local weights for the individual cities are used for some items (e.g. housing, fuel, and fares).

Basic data for many of the item weights were obtained initially from particulars of quantities consumed. Refinements were made where necessary so that item weights would reflect the approximate relative importance of the items (sometimes including similar items not directly priced) in terms of expenditure. Group and section weights were checked

as far as possible against independent estimates of expenditure. Nevertheless, the index is essentially a combination of selected items under various headings and not a dissection of total household expenditure into its component parts. Tables showing the index weighting are provided to assist prospective users in an understanding of the index. The weights are designed as suitable for measuring changes in retail prices within the definition of the index and do not purport to be valid estimates for any other purpose.

#### § 4. Tabular Statements of Retail Price Index Numbers.

1. The Consumer Price Index.—(i) *General.* The index has been compiled for each quarter from September quarter, 1948, and for each financial year from 1948–49. "All Groups" index numbers and "Group" index numbers for each of the five major groups are compiled and published regularly for the six State capital cities separately and combined. The reference base for each of these indexes is: year 1952–53 = 100 0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted merely to avoid the minor distortions that would occur in rounding off the figures to the nearest whole number.

Index numbers for each quarter are first issued in mimeograph statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

Tables of Consumer Price Index Numbers up to the latest available date appear regularly in the following publications: *Digest of Current Economic Statistics* (monthly), *Monthly Review of Business Statistics*, *Quarterly Summary of Australian Statistics*, *Labour Report* (annual).

(ii) *Consumer Price Index Numbers.* The following table shows Consumer Price Index Numbers (Total All Groups), for the six State capital cities separately and combined, for periods from the year 1948–49.

#### CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS. SIX CAPITAL CITIES, SEPARATELY AND COMBINED.

(Base of each Index: Year 1952–53 = 100 0.)

NOTE.—The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

Period.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capital Cities. (Weighted Average.)
<b>Year ended June—</b>

The following table shows Consumer Price Index Group Index Numbers for each State capital city for recent years and quarters.

### CONSUMER PRICE INDEX: GROUP INDEX NUMBERS.

(Base of each Index: Year 1952-53 = 100.0.)

Note.—The index numbers hereunder are designed to measure movements in retail prices of specified groups of items for specified cities individually. They measure variations from time to time and not differences in price level as between cities nor comparative costs of groups of items.

(a) Weighted average.

### § 5. International Comparisons.

The following table shows index numbers of consumer (retail) prices for various countries. Except where otherwise noted, the average prices for the year 1953 are taken as base (= 100). The figures, which have been taken from the *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations, show fluctuations in prices in each country, and do not measure relative price levels as between countries.

(a) Consumer Price Index as converted to base 1953 = 100 by Commonwealth Statistician. (b) Rent is not included. (c) Beginning 1959. Base: 1959 = 100. (d) Index for Europeans only. (e) July-December. (f) Linked at January, 1956.

NOTE.—Symbol - on each side of an index number (e.g., -95-) indicates that two series have been linked at that period.

## B. WHOLESALE PRICES AND PRICE INDEXES.

### § 1. General.

Two indexes of wholesale prices have been compiled by the Commonwealth Bureau of Census and Statistics. These are:—

- (i) The Melbourne Wholesale Price Index;
- (ii) The Wholesale Price (Basic Materials and Foodstuffs) Index.

Particulars of the Melbourne Wholesale Price Index, which is now obsolete, are given in § 3 commencing on page 397.

After reviewing the list of items and weighting of this index, the 1930 Conference of Statisticians resolved that a new index of wholesale prices of basic materials and foodstuffs should be compiled. This index—the Wholesale Price (Basic Materials and Foodstuffs) Index—which extends back to the year 1928 and is compiled monthly, is a special purpose index and one of a series of wholesale price indexes designed for special purposes.

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

1. **Price Quotations.**—The prices used in the index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and, in respect of imported materials, as nearly as may be at the point where they first make effective impact on the local price structure. Thus the prices of imported goods are not taken at the time of import, but rather on an ex-bond (or into factory) basis.

Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950–51, wool for local manufacture was subsidized, and the home-consumption price for wool was used to calculate the index numbers shown in the table on page 397.

2. **Commodities and Grouping.**—For purposes of this index, “basic” materials (as opposed to certain of the foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The list of items is divided into seven main groups, each of which is sub-divided into goods which are mainly imported, and goods which are mainly home-produced. The percentage of the total aggregate in 1960–61 contributed by each group was as follows:—Metals and coal, 16.94; oils, fats and waxes, 8.08; textiles, 2.80; chemicals, 3.73; rubber and hides, 1.91; building materials, 10.40; foodstuffs and tobacco, 56.14. Goods principally imported comprised 22.83 per cent. of the total aggregate in 1960–61, and goods principally home-produced, 77.17.

A full list of the commodities and the quantity-multipliers (weights) is published in *Labour Report* No. 48, 1960, pages 31 to 37.

3. **Method of Construction.**—The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928–29 to 1934–35 inclusive. Changes in usage, changes of category as between “imported” and “home-produced” for some commodities, and changes in the industrial structure have affected the validity of some of the weights in the index.

During 1956, supplies and prices of potatoes and onions fluctuated violently between abnormally wide limits. These fluctuations were so great as to dominate the movement of the sections of the index in which these items were included, namely, “Foodstuffs and Tobacco”, “Goods Principally Home-produced” and “Total All Groups”. In the circumstances of the case, neither seasonal adjustment nor conversion of the index to a “changing weights” formula could be applied to eliminate these fluctuations. Accordingly, in order to provide a representative measure of general trend in wholesale prices, the index was reconstructed as from July, 1936, by omitting potatoes and onions.

Consideration is being given to the enlargement of the index to cover additional groups and to revision of the weighting pattern of the index.

4. **Index Numbers.**—Index numbers for each group of commodities and for all groups combined for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index numbers, on the base: average of three years ended June, 1939 = 100, are published monthly in the mimeograph statistical bulletin *Wholesale Price (Basic Materials and Foodstuffs) Index* and in the *Monthly Review of Business Statistics*. A table showing index numbers computed to the base 1928 = 100 is published in the *Labour Report*.

**WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS.**

(a) Excluding potatoes and onions. See para. 3 on p. 396. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports.

### § 3. Melbourne Wholesale Price Index.

1. General.—An index of Melbourne wholesale prices was first computed in 1912. It related chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the components of the list of items nor the weighting have been varied, except as indicated in footnote (a) to the following table. Consequently, the index is outmoded for current use but it has some historical significance as a measure of changes in the prices of its component items combined in the proportions in which they were in common use about the year 1910. It is now published on an annual basis for "All Groups" only and is used mainly as an approximate indication of long-term trends since the year 1861, for which it was first compiled. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-5.

2. **Index Numbers.**—Index numbers for each group of commodities as well as for all groups combined are shown in the following table.

**MELBOURNE WHOLESALE PRICE INDEX NUMBERS.**

(Base of each Group: Year 1911 = 1,000.)

Year.	Metals and Coal.	Wool, Cotton, Leather, etc.	Agricultural Produce, etc.	Dairy Produce.	Groceries.	Meat.	Building Materials.	Chemicals.	All Groups.
1861 .. ..	1,438	1,381	1,583	1,008	1,963	..	1,070	2,030	1,538
1871 .. ..	1,096	1,257	1,236	864	1,586	..	1,044	1,409	1,229
1881 .. ..	1,178	1,115	1,012	935	1,421	..	1,091	1,587	1,121
1891 .. ..	895	847	1,024	995	1,032	888	780	1,194	945
1901 .. ..	1,061	774	928	1,029	1,048	1,345	841	917	974

1931 .. ..	1,826	1,040	1,121	1,398	1,794	1,512	2,025	2,166	1,429
1941 .. ..	1,960	1,402	1,721	1,554	1,883	1,776	3,138	2,527	1,796
1949 .. ..	3,502	3,966	2,876	2,309	2,558	3,356	4,611	3,221	3,191
1950 .. ..	3,902	5,464	3,155	2,459	2,829	4,616	(a)5,567	3,263	3,816
1951 .. ..	5,080	7,943	4,512	2,930	2,850	6,438	(a)7,074	3,294	5,098
1952 .. ..	6,481	7,365	5,038	4,024	3,455	6,289	(a)9,338	3,723	5,647
1953 .. ..	6,615	6,950	4,958	4,533	3,767	6,303	(a)8,519	4,691	(b)5,631

(a) The list of items and weighting of the original Building Materials group of this index are outmoded in respect of recent years. The movement shown here for this group between 1949 and 1953 has been calculated in accordance with the movement occurring in the Building Materials group of the Basic Materials and Foodstuffs Index. (b) The "All Groups" index numbers for years subsequent to 1953 were:—1954, 5,384; 1955, 5,548; 1956, 5,916; 1957, 5,814; 1958, 5,575; 1959, 5,394; 1960, 5,857; 1961, 5,909.

**C. CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR.**

1. **General.**—An account of the measures taken by the Commonwealth Government to control prices from September, 1939 (immediately after the outbreak of war), until 29th May, 1948 (the date of the Prices Referendum), was given in Official Year Book No. 37, pages 458-64.

2. **Transfer of Price Control to the States.**—Consequent upon the rejection of the proposal embodied in the Prices Referendum held on 29th May, 1948, that permanent power to control rents and prices (including charges) be conferred on the Commonwealth Government, responsibility for price fixation was assumed by the State Governments and steps were taken to pass State Prices Acts. These Acts were proclaimed to operate simultaneously on 20th September, 1948. Except in the case of Queensland, each Act was to remain in force for a specific period, but the period varied from State to State.

On 20th September, 1948, each State Government issued declarations covering uniform lists of goods and services, which were brought under price control. Existing Commonwealth Prices Regulation Orders continued to apply to these goods and services until specially varied in accordance with the terms of the State legislation. At the same time, the Commonwealth Government issued an identical list of declared items to operate in the Australian Capital Territory and other Territories of the Commonwealth.

In the operation of State price control, the State Prices Commissioners collaborated closely. Conferences of Commissioners were held at intervals of approximately two months. Thus a large degree of uniformity was attained in controlling and decontrolling items and in the fixation of margins and prices of major items.

Since 1952, price control has been progressively modified in all States. General price control ceased in Western Australia on 31st December, 1953; in Tasmania on 31st October, 1954; in Victoria on 31st December, 1954; in the Australian Capital Territory on 10th February, 1955; and in Queensland during 1961. In New South Wales, general control of prices was suspended on 15th April, 1955, but was temporarily restored on some items from July, 1955, to September, 1956.

3. **Price Stabilization.**—Expenditure by the Commonwealth Government on price stabilization subsidies reached a peak in 1947-48 and since then the Commonwealth Government has progressively reduced the range of commodities eligible for subsidy.

In addition to those subsidies which had been an integral part of the Price Stabilization Plan, the Commonwealth Government paid bounties and subsidies for assistance to primary production, and these payments also had a stabilizing influence on prices.

For particulars of expenditure by the Commonwealth Government on price stabilization, see Official Year Book No. 38, page 414, and for other subsidies and bounties, see Chapter XXI.—Public Finance.

## D. WAGES.

## § 1. Arbitration and Wages Boards Acts and Associated Legislation.

1. **General.**—Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and conditions of labour were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report* and in issues of the Official Year Book prior to No. 38.

2. **Commonwealth.**—Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to "conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State". The Parliament has made such a law, namely the Conciliation and Arbitration Act.

This Act defines an "industrial dispute" as "(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any one State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act 1920-1960* or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State."

The Conciliation and Arbitration Act was extensively amended by an Act (No. 44 of 1956) assented to on 30th June, 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the Conciliation and Arbitration Act 1904-1961 is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and three other Judges. The jurisdiction of the Court shall be exercised by not less than two Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organization, disputes between an organization and its members and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than two Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers and for inquiries to be held concerning disputed elections in organizations; and certain powers in connexion therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organization. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the Public Service Arbitration Act 1920-1960, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at present consists of a President, five Deputy Presidents, a Senior Commissioner, seven Commissioners and three Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and to make suggestions and to do such things as appear right

and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However, subject to the approval of the President, it is the duty of the Senior Commissioner to organize and allocate the work of the Commissioners and Conciliators.

When an industrial dispute occurs or is likely to occur, a Commissioner shall take steps for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement and shall do so if the parties so request. If an agreement is reached, a memorandum of its terms shall be made in writing, and may be certified by the Commission. A certified memorandum shall have the same effect as an award.

The Commission in Presidential Session, that is, the Commission constituted by at least three presidential members nominated by the President and not otherwise, is empowered to deal with making awards, or certifying agreements, in so far as they concern standard hours, basic wages and long-service leave.

Upon application by a party to an industrial dispute, a Commissioner shall consult with the President as to whether in the public interest any matter in dispute should be dealt with by a Commission constituted by not less than three members nominated by the President, at least one of whom shall be a presidential member and one, where practicable, the Commissioner concerned. The President may direct the Commission to hear the matter in dispute; however, after consideration, the Commission may refer the matter in dispute back for determination to the Commissioner originally dealing with the dispute.

An appeal against the decision of a Commissioner shall be heard by not less than three members nominated by the President, of whom at least two shall be presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is necessary as a matter of public interest. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of the full bench of the Commission, so that the full bench can have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the Conciliation and Arbitration Act or the Public Service Arbitration Act, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connexion with the Maritime Industries, Snowy Mountains Area and Stevedoring Industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member.

The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organization or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section 3 of the Public Service Arbitration Act 1920-1960, not being the Commonwealth Employees' Compensation Act 1930-1959, the Commonwealth Employees' Furlough Act 1943-1959, the Superannuation Act 1922-1959 or any other prescribed Act.

The Act provides that where a State law, or an order, award, decision or determination of a State industrial authority, is inconsistent with or deals with a matter dealt with in an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

For further particulars regarding Commonwealth arbitration legislation, *see* the annual *Labour Report*.

3. States.—In each State, Industrial Tribunals have been established to regulate and arbitrate in industrial matters. The more important of these are the Industrial Commission of New South Wales, the Industrial Conciliation and Arbitration Commission of Queensland, the Industrial Court of South Australia, and the Western Australian Court of Arbitration, together with Wages Boards for specific industries or occupations which operate in Victoria, South Australia and Tasmania. Further details concerning the functions and powers of these authorities may be found in the *Labour Report*.

## § 2. Rates of Wage and Hours of Work.

1. General.—This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes, there are 15 industrial groups for adult males and 8 industrial groups for adult females. For relevant periods, these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April, 1914 = 1,000 for females) published in issues prior to No. 46, 1959. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November, 1954. This second survey showed the number of employees in each occupation within selected awards, etc., thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on pages 402–3, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Miscellaneous group was dissected into two component industry groups, "Wholesale and Retail Trade" and "Public Authority (n.e.i.) and Community and Business Services". A new group, "Communication", was included and the former Domestic, Hotels, etc., group was extended to include Amusement, Sport and Recreation. This group is now shown as "Amusement, Hotels, Personal Service, etc.". The "Domestic" part of this group was omitted because of coverage difficulties. The former Pastoral, Agricultural, etc. group is not included in the new index.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each month or quarter, commencing with 31st March, 1939, for adult males and 31st March, 1951, for adult females. From January, 1957, particulars for adult males have been available as at the end of each month. The index for adult males includes rates and hours for 3,406 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,307. For adult females, the corresponding numbers are 1,103 and 518. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industrial group for each State and Australia. Weighted averages of the components of the total minimum weekly wage rate, i.e., basic wage, margin and loading, were calculated separately for employees covered by Commonwealth awards, etc., and for those covered by State awards, etc. (*See* page 404.)

Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", awards, etc., relating solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of wage for adult males and females in the principal occupations in the capital city of each State.

2. Weekly Wage Rates.—(i) *Adult Males—States.* The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work, and index numbers at the dates specified.

**WEEKLY WAGE RATES: ADULT MALES, ALL GROUPS.(a)**

(a) As prescribed in awards, determinations and agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends. (c) Includes the value of keep, where supplied. (d) Excludes rural.

(iii) *Adult Males—Components of Total Wage Rate.* A dissection of weighted average minimum weekly wage rates for adult males into the three components of the total minimum wage, i.e., basic wage, margin and loading, is given in the following two tables, separate particulars being shown for employees covered by awards, etc., within Commonwealth and State jurisdictions. For the purposes of the index, the Commonwealth jurisdiction embraces awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. State jurisdictions embrace awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

The basic wage rates shown herein are weighted averages of the rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also, in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases, the basic wage rate actually paid is used in tables below. For these and other reasons, the weighted average basic wage rates differ, in the majority of cases, from the metropolitan basic wage rates shown in other sections of this chapter.

Margins are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness and other like factors.

Loadings are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industry loadings and other general loadings prescribed in awards, etc., for the occupations included in the index.

For a more detailed description of this dissection of weekly wage rates into components and for tables for each State and Australia, according to jurisdiction, extending back to 1939, see Statistical Bulletin 902, *Minimum Weekly Wage Rate Index—Adult Males: Components of Total Wage Rate*. Revised figures for 1958 to 1960, together with monthly figures from January, 1957, to June, 1961, were published in the Statistical Bulletin—*Minimum Weekly Wage Rates, January, 1957 to June, 1961*.

(a) *States.* The following table shows the components of the total minimum weekly wage rate for each State and Australia, as at 31st December, 1961, according to jurisdiction.

3. **Standard Hours of Work.**—(i) *General.* In the fixation of weekly wage rates, most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on pages 407-9. The main features of the reduction of hours to 44 and later to 40 per week are summarized below. In considering such changes, it must be remembered that even within individual States the authority to alter conditions of work is divided between Commonwealth and State industrial tribunals and the various legislatures, and that the State legislation usually does not apply to employees covered by awards of the Commonwealth Conciliation and Arbitration Commission. However, it may do so in respect of matters not treated in Commonwealth awards.

(ii) *The 44-hour Week.* No permanent reduction to a 44-hour week was effected until 1925, although temporary reductions had been achieved earlier. In 1920, the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920, the President of the Commonwealth Court of Conciliation and Arbitration (Higgins J.), after inquiry, granted a 44-hour week to the Timber Workers' Union, and in the following year extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and reintroduced the 48-hour week in the case of the above-mentioned two unions then working 44 hours. During 1924, the Queensland Parliament passed legislation to operate from 1st July, 1925, granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4th January, 1926.

In 1927, after an exhaustive inquiry, the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated individually, the nature of the industry, the problem of production, the financial status and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland, no legislation was passed to reduce the standard hours of work, so that, for employees not covered by Commonwealth awards, the change had to be effected by decisions of the appropriate industrial tribunals. In these cases, the date on which the reduction to 44 hours was implemented depended on the decision of the tribunals in particular industries, employees in some industries receiving the benefit of the reduced hours years ahead of those in others. In these States, the change to the shorter week extended over the years from 1926 to 1941.

(iii) *The 40-hour Week.* (a) *Standard Hours Inquiry, 1947.* Soon after the end of the 1939-45 War, applications were made to the Commonwealth Court of Conciliation and

Arbitration for the introduction of a 40-hour week, and the hearing by the Court commenced in October, 1945. Before the Court gave its decision, the New South Wales Parliament passed legislation granting a 40-hour week, operative from 1st July, 1947, to industries and trades regulated by State awards and agreements, and in Queensland similar legislation was introduced in Parliament providing for the 40-hour week to operate from 1st January, 1948.

The Commonwealth Court of Conciliation and Arbitration, in its judgment on 8th September, 1947, granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January, 1948. The Queensland Act was passed, and was proclaimed on 10th October, 1947. On 27th October, 1947, the South Australian Industrial Court, after hearing applications by unions, approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia on 6th November, 1947, approved that, on application, provision for a 40-hour week could be incorporated in awards of the Court, commencing from 1st January, 1948.

In Victoria and Tasmania, the Wages Boards met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of 40 hours or, in certain cases, less.

(b) *Basic Wage and Standard Hours Inquiry, 1952-53.* In the 1952-53 Basic Wage and Standard Hours Inquiry, the employers sought an increase in the standard hours of work per week, claiming that one of the chief causes of the high costs and inflation had been the loss of production due to the introduction of the 40-hour week. This claim was rejected by the Court as it considered that the employers had not proved that the existing economic situation called for a reduction of general standards in the matter of the ordinary working week. (See also § 5, para. 2 (iv).)

(c) *Basic Wage and Standard Hours Inquiry, 1961.* In this case the employers sought an increase in the number of ordinary working hours from 40 to 42 per week, with a concomitant increase in weekly wages by an amount equal to two hours' pay at ordinary rates. This was to be a temporary measure to have effect for four years, after which time hours would revert to forty and the increased wage would remain. The employers submitted that such a measure was called for by the balance of payments crisis, that it would lead to increased productivity at stable prices, and that work in excess of forty hours would be more evenly distributed with consequent financial relief for men not getting overtime work. The Commonwealth Conciliation and Arbitration Commission, which heard the application, was not persuaded that the anticipated consequences would follow, and the claim was rejected. (See also § 5, para. 2 (xi).)

4. *Hourly Wage Rates.*—(i) *General.* The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc., for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes, a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely, the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage given in the following tables relate to all industrial groups except Rural, and Shipping and Stevedoring. The Rural industry is not included in the index and Shipping and Stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

(ii) *Adult Males—States.* The following table shows the weighted average minimum hourly rates of wage payable to adult male workers, and index numbers of hourly rates in each State.

(a) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

5. *Weighted Average Standard Weekly Hours of Work.*—The 40-hour week has operated in Australia generally from 1st January, 1948, and in New South Wales from 1st July, 1947 (see para. 3 (iii), page 406). However, as stated in para. 4 (i) on page 407, the number of hours constituting a full week's work (excluding overtime) differs between occupations and/or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and agreements for a full working week, in respect of adult male workers in all industrial groups except Rural, and Shipping and Stevedoring, at 31st December, 1961, were:—New South Wales, 39.95; Victoria, 39.97;

Queensland, 39.98; South Australia, 39.96; Western Australia, 39.89; Tasmania, 39.97; Australia, 39.96. Corresponding figures for adult female workers at 31st December, 1961 were:—New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.56; Australia, 39.67.

### § 3. Average Weekly Earnings.

1. Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries.—The following figures are derived from employment and wages recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. Corresponding figures for each quarter are published in the *Monthly Review of Business Statistics* and the *Monthly Bulletin of Employment Statistics*, and particulars for each quarter from September quarter, 1947, may be found in the Appendix to *Labour Report* No. 48, 1960.

#### AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS.(a)

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

2. Average Weekly Earnings Index Numbers.—The following table shows, for "All Industries" and for "Manufacturing", the movement in average weekly earnings from 1947-48 to the March Quarter, 1962. The "All Industries" index is based on Pay-roll Tax returns and other data. The index for manufacturing industries for the years 1947-48 to 1960-61 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses (see Chapter VI.—Manufacturing Industry, § 8, para. 2 (iii)); figures for quarters subsequent to June quarter, 1961, are preliminary estimates based on Pay-roll Tax returns.

The index numbers show for "All Industries" and "Manufacturing" the movement in average earnings over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is the year 1953-54 = 100 and both series have been seasonally adjusted.

Particulars for each quarter from September quarter, 1947, were published in *Labour Report* No. 48, 1960.

**AVERAGE WEEKLY WAGE EARNINGS(a) INDEX NUMBERS: AUSTRALIA.**

(a) See note (a) to table on previous page. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

#### § 4. Surveys of Wage Rates and Earnings.

1. **General.**—Towards the end of 1960, a statistical survey of the wage structure of Australia was undertaken by this Bureau. The object of the survey was to obtain information as to marginal rates of wage and actual weekly earnings of adult male employees (excluding part-time and casual employees) for the last pay-period in September, 1960. The results of this survey are summarized in para. 2 below.

A survey as at the last pay-period in October, 1961, provided similar information as to actual weekly earnings. Because marginal rates of wage had changed very little since the Margins Cases of 1959 (see § 6, para. 3), this survey was confined to weekly earnings only. A summary of the results is given in para. 3.

Both surveys were based on returns from stratified random samples of private employers subject to Pay-roll Tax. They did not include government or semi-government employment. Because of insufficient data, employees in rural industry and private domestic service were excluded, as also were employees of religious, benevolent and other similar bodies exempt from Pay-roll Tax. In addition, the 1960 survey excluded the shipping and stevedoring industry, the motion picture industry, certain businesses such as those of accountants, consultant engineers, and trade associations, etc.

2. **Survey of Wage Rates and Earnings, September, 1960.**—The results of this survey were based on returns received from more than 3,000 employers, representing a response rate of about 90 per cent. of those approached. The sample was designed to provide accurate particulars only for Australia as a whole; hence no State details are shown in the tables below.

Definitions relevant to the survey are as follows:—

- (a) *Number of Employees* refers to adult male employees on the pay-roll of the last pay-day in September, 1960, and includes employees who, although under 21 years of age, were paid at the adult rate prescribed in the appropriate award. Part-time and casual employees and those absent in the defence forces were excluded.
- (b) The term *awards*, as used herein, denotes awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals. Employees whose rates of pay and working conditions were not regulated by awards, and employees covered by formal, though unregistered, agreements between employee organizations and employers, are shown as “not covered by awards”.
- (c) *Margins* are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors. For the purposes of this survey the following were not included in margins:—special allowances prescribed in awards, such as shift, dirt, and height money, leading hand allowances, etc.; and other payments such as commission, payments above

the minimum rate for contract and piece work, etc. (see paragraphs (e) and (g) below and also § 6. Wage Margins). In the case of contract work, etc., the margin was determined by the minimum amount prescribed in the award for the class of work performed. Where the marginal rate of wage for an occupation was not specified in an award, the margin was assumed to be the difference between the total minimum prescribed rate of wage for the occupation and the appropriate Commonwealth or State basic wage. For employees not covered by awards, and whose margins were not specified in unregistered agreements, the margin was assumed to be the difference between the appropriate basic wage in the State jurisdiction and the agreed rate of pay for a standard working week (or the weekly equivalent of the agreed rate).

- (d) *Total Weekly Earnings* include ordinary time earnings at award rates (and, for employees not covered by awards, payments at agreed rates for a standard working week), overtime earnings and all other payments. Annual or other periodical bonuses were included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week was included.
- (e) *Ordinary Time Earnings at Award Rates* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for hours of work paid for up to the standard or award hours, calculated at award rates of pay. They include payments for sick leave, proportion of annual leave, special allowances prescribed in awards, etc. (see sub. para. (c) above). For employees not covered by awards, they include payments at agreed rates for a standard working week.
- (f) *Overtime Earnings* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for time worked in excess of award or agreed hours.
- (g) *Other Earnings* include all payments other than those in paragraphs (e) and (f) above, such as commission, payments above the minimum rate for contract work, incentive scheme, piece-work and profit-sharing scheme payments, proportion of annual or other periodical bonuses, points system payments, attendance or good time-keeping bonuses, etc. (see sub. para. (c) above).

(i) *Marginal Rates of Wage. (a) Industrial Groups.* In the following table, adult male employees in each of the main industrial groups are classified according to weekly margin above the basic wage.

(c) Inquiry indicated that many of the adult males in this group were absent for part of the week.

3. *Survey of Weekly Earnings, October, 1961.*—For this survey, returns were received from all employers selected in the sample, numbering more than 3,500. The sample was designed so that particulars of the distribution of earnings in each State could be obtained as well as those for Australia (see below), but it was not possible, without a considerable increase in the number of returns, to obtain particulars for each industry group in each State. State details were therefore restricted to the two major groups, manufacturing and non-manufacturing; those for Australia were obtained for eight separate industry groups. Because of limitations of space, it has not been possible to include all figures in the tables herein. For further details, reference should be made to Statistical Bulletin No. 22—*Survey of Weekly Earnings, October, 1961*, 14th February, 1962.

Within each State, each published industry group was divided into eight size groups, using male employment as recorded on the Pay-roll Tax returns for March, 1961, as a measure of size. This measure was also used to improve the reliability of the sample estimate, using ratio estimation. This technique involved estimating the ratio of adult male employment in a particular earnings class in October, 1961, within each industry group and State, to total male employment in March, 1961, in that industry group and State (derived from expansion of the sample). Since total male employment by industry group and State in March, 1961, was known accurately from Pay-roll Tax records, estimates of adult male employment in

these earning classes in October, 1961, were obtained by applying the estimated ratios to the corresponding known totals. The estimates thus obtained were considerably more reliable than any which could have been produced had this supplementary information not been taken into account.

The businesses selected in the sample were allocated by States and by industry and size groups in such a way that the precision of the sample estimates for total manufacturing and total non-manufacturing, expressed as percentages of the estimates themselves, would be approximately the same in each State.

Definitions relevant to the survey are as follows:—

*Number of Employees* refers to adult male employees on the pay-roll of the last pay-period in October, 1961, and includes employees who, although under 21 years of age, were paid at the adult rate prescribed for their particular occupation. Part-time and casual employees and those absent in the defence forces were excluded. Executive, clerical and sales staff were included, as were employees working short time who would normally have been full-time employees.

*Total Weekly Earnings* (i.e., gross earnings before taxation and other deductions) include ordinary time earnings, overtime earnings and all other payments, such as holiday and sick pay, commission, payments above the minimum rate for contract work, incentive scheme, piece-work and profit-sharing scheme payments, points system payments, attendance bonuses, etc. Annual or other periodical bonuses have been included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week has been included.

(i) *States. (a) All Industries.* In the following table adult male employees in each State are classified according to total weekly earnings. The proportions of employees in each earnings group and at various levels of earnings are also shown.

### § 5. Basic Wages in Australia.

1. **General.**—The concept of a "basic" or "living" wage is common to rates of wage determined by industrial authorities in Australia. Initially the concept was interpreted as the "minimum" or "basic" wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it is now generally accepted "that the wage should be fixed at the highest amount which the economy can sustain and that the 'dominant factor' is the capacity of the community to carry the resultant wage levels".\*

\* Commonwealth Arbitration Reports, Vol. 77, p. 494.

Under the Commonwealth Conciliation and Arbitration Act 1904-1961 (*see* page 339) the Commonwealth Conciliation and Arbitration Commission (previously the Commonwealth Court of Conciliation and Arbitration) may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award "altering the basic wage (that is to say, that wage or that part of the wage, which is just and reasonable for an adult male [female], without regard to any circumstance pertaining to the work upon which, or the industry in which he [she] is employed) or the principles upon which it is computed".

In the past, the Commonwealth Court of Conciliation and Arbitration held general basic wage inquiries from time to time and its findings applied to industrial awards within its jurisdiction. Prior to the decision of the Commonwealth Court of Conciliation and Arbitration, announced on 12th September, 1953, discontinuing the automatic adjustment of basic wages in Commonwealth awards in accordance with variations occurring in retail price index numbers, the relevant basic wage of the Commonwealth Court of Conciliation and Arbitration was adopted to a considerable extent by State Industrial Tribunals. In New South Wales and South Australia, the State industrial authorities adopted the relevant Commonwealth basic wage. In Victoria and Tasmania, where Wages Boards systems operate, no provision was included in the industrial Acts for the declaration of a basic wage, although, in the past, Wages Boards generally adopted basic wages based on those of the Commonwealth Court. In Queensland and Western Australia, the determination of a basic wage is a function of the respective State Industrial or Arbitration Courts and (subject to State law) they took into account the rates determined by the Commonwealth Court. Following the decision of the Commonwealth Court of Conciliation and Arbitration to discontinue automatic quarterly adjustments to the basic wage, the various State industrial authorities have determined State basic wages in accordance with the provisions of their respective State industrial legislation. Details of the action taken in each State and subsequent variations in State basic wages are set out in para. 5 (*see* pages 436-41.)

In addition to the basic wage, "secondary" wage payments, including margins for skill, loadings and other special considerations peculiar to the occupations or industry, are determined by these authorities. The basic wage, and the "secondary" wage, where prescribed, make up the "minimum" wage for a particular occupation. The term "minimum wage" as distinct from the basic wage is used currently to express the lowest rate payable for a particular occupation or industry. (*See also* § 2, para. 2. (iii) *Adult Males—Components of Total Wage Rate*, pages 403-4.)

2. **The Commonwealth Basic Wage.**—(i) *Early Judgments.* The principle of a living or basic wage was propounded as far back as 1890, but it was not until 1907 that a wage, as such, was declared by a Court in Australia. The declaration was made by way of an order in terms of section 2 (d) of the Excise Tariff 1906 in the matter of an application by H. V. McKay that the remuneration of labour employed by him at the Sunshine Harvester Works, Victoria, was "fair and reasonable". Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, defined the standard of a "fair and reasonable" minimum wage for unskilled labourers as that standard appropriate to "the normal needs of the average employee, regarded as a human being living in a civilized community".\* The rate declared was 7s. a day or £2 2s. a week for Melbourne, the amount considered reasonable for "a family of about five".

The "Harvester" standard was adopted by the Commonwealth Court of Conciliation and Arbitration for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of retail price index numbers, covering food and groceries and rent of all houses ("A" Series) for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. The basic wage rates for towns were thereafter varied in accordance with the respective retail price index numbers. Court practice was to equate the retail price index number 875 for Melbourne for the year 1907 to the "Harvester" rate of 42s. a week (or the base of the index (1,000) to 48s. a week). At intervals thereafter as awards came before it for review, the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index. In some country towns, certain "loadings" were added by the Court to wage rates so derived to offset the effect of lower housing standards, and consequently of house rents, on the index numbers for these towns.

\* *Commonwealth Arbitration Reports*, Vol. 2, p. 3.

Over the period of its operation, the adequacy or otherwise of the "Harvester standard" was the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. During the period of rapidly rising prices towards the end of the 1914-18 War, strong criticism developed that this system did not adequately maintain the "Harvester" equivalent. A Royal Commission was appointed in 1919 to inquire as to what it would actually cost a man, wife and three children under fourteen years of age to live in a reasonable standard of comfort, and as to how the basic wage might be automatically adjusted to maintain purchasing power. The Commission's Reports were presented in 1920 and 1921. An application by the unions to have the amounts arrived at by the inquiry declared as the basic wage was not accepted by the Court because they were considerably in advance of existing rates, and grave doubts were expressed by members of the Court as to the ability of industry to pay such rates. Further details of the recommendations of the Commission were given in *Labour Report* No. 41, page 102.

The system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in the retail price index ("A" Series) was first introduced in 1921. The practice then adopted was to calculate the adjustments to the basic wage quarterly on the index number for the preceding quarter. Previously, adjustments had been made sporadically in relation to retail price indexes for the previous calendar year or the year ended with the preceding quarter. The new method would have resulted in a basic wage lower than that to which employees would have been entitled had the previous practice been continued, and in 1922\* the Court added to the basic wage a general loading of 3s. (known as the "Powers 3s."), "a sum . . . which did, to the extent of 3s. per week, relieve the employees from the detrimental effect so far as they were concerned of the change which the Court was then making in its method of fixing the basic wage".† This loading continued until 1934. The practice adopted by the Commonwealth Court in 1921 of making automatic quarterly adjustments continued until the Court's judgment of 12th September, 1953 (*see* page 422).

For a description of the several series of retail price indexes referred to in these paragraphs, *see* page 387 of this Chapter.

(ii) *Basic Wage Inquiries*, 1930 to 1946. No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression in 1930, when applications were made to the Court for a reduction of wages. From 1st February, 1931, the Court reduced all wages under its jurisdiction by 10 per cent. Subsequent applications in 1932 and 1933 for cancellation of this reduction were refused. In May, 1933, the Court transferred the basis of the quarterly adjustment of the basic wage from the "A" Series to the "D" Series Retail Price Index. Further particulars may be found in the *Labour Report*, Nos. 22 and 23.

The "Harvester" standard, adjusted by variations in retail price index numbers, continued to be the theoretical basis of the wage of the Commonwealth Court until the judgment of 17th April, 1934, when automatic adjustment was transferred to the "C" Series Retail Price Index, the base of the index being taken as equal to 81s. a week. The new rate for the six capital cities, £3 5s., was in effect the same as that previously paid under the "A" Series, without the "Powers 3s." and without the 10 per cent. reduction, which then ceased to operate. (*See Labour Report* No. 25, 1934.)

The following were the main features of the judgment of the 1937 Inquiry. (a) Amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" additional to the rates payable under the 1934 judgment (referred to as the "needs" portion of the basic wage). These loadings, commonly referred to as "Prosperity" loadings, ranged, for capital cities, from 4s. to 6s., that for the six capitals being 5s. (b) The minimum adjustment of the basic wage was fixed at 1s. a week instead of 2s. (c) The basis of the adjustment of the "needs" portion of the wage in accordance with the variations shown by retail price index numbers was transferred from the "C" Series to a special "Court" Series based upon the "C" Series. (d) Female and junior rates were left for adjustment by individual Judges when dealing with specific awards. (*See Labour Report* No. 28, pages 77-87.)

In 1940 the combined unions applied to have the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series was based) raised from 81s. to 100s. a week, and the "Prosperity" loadings incorporated in the new rate. In its judgment of 7th

\* *Commonwealth Arbitration Reports*, Vol. 16, p. 32.

† *Ibid.*, p. 841.

February, 1941, the Court unanimously refused to grant any increase, owing mainly to the uncertainty of the economic outlook under existing war conditions. The application was stood over for further consideration. (*See below.*) In the course of the judgment the Chief Judge suggested that the basic wage might be graded according to family responsibilities by means of a comprehensive system of child endowment, and that if a scheme of this nature were established, future fixations of the basic wage would be greatly simplified. (The Commonwealth Child Endowment Act came into operation on 1st July, 1941. For details *see* Chapter XVIII.—Welfare Services.)

In 1946 an application was made for restoration of the adjourned 1940 hearing (*see above*). During the protracted hearing of the Standard Hours Inquiry (*see* page 406) it became apparent that reconsideration of the amount of the basic wage was, in the public interest, a matter of increasing urgency, and the unions therefore applied for an "interim" basic wage declaration. Judgment was delivered on 13th December, 1946, whereby an increase of 7s. a week was granted in the "needs" portion of the basic wage, the rate for the six capital cities as a whole being increased from 93s. to 100s. a week. For automatic quarterly adjustments, a new "Court" Index (Second Series) (Base 1923-27 = 87.0) was adopted. All "loadings" on the basic wage were retained. Further particulars of this judgment may be obtained from *Labour Report* No. 38, page 79.

For more detailed descriptions of the foregoing inquiries, reference should be made to earlier issues of the *Labour Report* and the Official Year Book.

(iii) *Basic Wage Inquiry, 1949-50.* This finalized the case begun in 1940 and continued in 1946 (*see above*). In 1946, during the hearing of the Standard Hours Inquiry and following the restoration to the Full Court List of applications for an increased basic wage, the Chief Judge ruled that the claim for an increase in the basic wage should be heard concurrently with the "40-hour week" claims then before the Court. The unions, however, objected to this course being followed, and, on appeal to the High Court, that Court in March, 1947, gave a decision which resulted in the Arbitration Court proceeding with the "Hours" Case to its conclusion.

The Basic Wage Inquiry, 1949-50, finally opened in February, 1949, and the general hearing of the unions' claims was commenced on 17th May, 1949. Separate judgments were delivered on 12th October, 1950;\* in the judgments, which were in the nature of general declarations, a majority of the Court (Foster and Dunphy *JJ.*) was of the opinion that the basic wage for adult males should be increased by £1 a week, and that for adult females should be 75 per cent. of the adult male rate. Kelly *C.J.*, dissenting, considered that no increase in either the male or the female wage was justified.

The Court on 24th October and 17th and 23rd November, 1950, made further declarations concerning the "Prosperity" and other loadings. The "Prosperity" loading of 1937 (*see* page 420), which was being paid at rates of between 3s. and 6s. a week according to localities, was standardized at a uniform rate of 5s. a week for all localities and was declared to be an adjustable part of the basic wage, the "War" loadings were declared to be not part of the basic wage, and any other loading declared to be part of the basic wage ceased to be paid as a separate entity.

The new rates operated from the beginning of the first pay-period in December, 1950, in all cases being the rate based on the Court Index (2nd Series) for the September quarter, 1950, plus a flat-rate addition of £1, together with the standardized "Prosperity" loading of 5s. The new basic wage rate for the six capital cities (weighted average) was £8 2s., comprising £6 17s. Court (2nd Series) plus 5s. uniform "Prosperity" loading plus the £1 addition. The declaration provided that the whole of this basic wage would be subject to automatic quarterly adjustments as from the beginning of the first pay-period commencing in February, 1951, on the basis of the index numbers for the December quarter, 1950. For this purpose, the new rate of £8 2s. was equated to the "C" Series retail price index number 1,572 for the six capital cities (weighted average) for the September quarter, 1950. From this equation was derived a new "Court" Index (Third Series) with 103.0 equated to 1,000 in the "C" Series Index.

Further particulars of the judgment may be found in *Labour Report* No. 39, page 81.

\* *Commonwealth Arbitration Reports*, Vol. 68, p. 698.

(iv) *Basic Wage and Standard Hours Inquiry, 1952-53.* On 5th August, 1952, the Commonwealth Court of Conciliation and Arbitration began hearing claims by employers' organizations that (a) the basic wage for adult males be reduced; (b) the basic wage for adult females be reduced; (c) the standard hours of work be increased; (d) the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned; and by employees' organizations, that the basic wage for adult males be increased.\*

The decision of the Court, announced on 12th September, 1953, was as follows:—the employers' applications for reduction of the basic wages for adult males and females and for an increase of the standard hours of work were refused; the employers' applications for omission or deletion of clauses or sub-clauses providing for the adjustment of basic wages were granted; and the unions' applications for increases of basic wages were refused.

The Court in the course of its judgment said that nothing had been put before it during the inquiry in support of a departure from its well-established principle that the basic wage should be the highest that the capacity of the community as a whole could sustain. If the Court is at any time asked to fix a basic wage on a true needs basis, the question of whether such a method is correct in principle and all questions as to the size of the family unit remain open.

In order to remove certain misconceptions about its function, the Court stated that it was neither a social nor an economic legislature, and that its function under section 25 of the Act was to prevent or settle specific industrial disputes. However, these must be settled upon terms which seem just to the Court, having regard to conditions which exist at the time of its decision.

The Court intimated that time would be saved in future inquiries if the parties to the disputes, in discussing the principle of the "capacity to pay", directed their attention to the broader aspects of the economy, as indicated by a study of employment, investment, production and productivity, oversea trade, oversea balances, the competitive position of secondary industry and retail trade.

In accordance with its decision, the Court, commencing on 21st October, 1953, amended all Commonwealth awards by deleting the clauses providing for the automatic adjustment of the basic wage. Subsequently, the power of the Court to vary awards not the subject of an application by one of the parties was unsuccessfully challenged in the High Court of Australia.

For further particulars of the judgment, see *Labour Report* No. 46, page 64.

(v) *Basic Wage Inquiry, 1956.* On 14th February, 1956, the Commonwealth Court of Conciliation and Arbitration commenced hearing an application by trade unions for an increase in the basic wage to the amount it would have reached if automatic quarterly adjustments deleted in September, 1953, had remained in force, plus a further £1; the re-introduction of automatic quarterly adjustments; and the abolition of what was known as the 3s. country differential. This application was regarded as a general application for variation of the basic wage in all Commonwealth awards.

All the claims made by the unions were opposed by the respondent employers. The Commonwealth Government in the public interest intervened and opposed the re-introduction of automatic adjustments. The States of New South Wales, Queensland, Western Australia and Tasmania supported the unions' claims for the re-establishment of the system of automatic adjustments and the raising of the basic wage to the levels indicated by the current "C" Series Index numbers, but the State of South Australia opposed these claims. The State of Victoria neither supported nor opposed the unions' claims.

The judgment was delivered on 26th May, 1956. The Court rejected each claim made by the unions, but decided to increase the adult male basic wage by 10s. a week, payable from the beginning of the first pay-period in June. As a result of this decision, the basic wage for adult females was increased by 7s. 6d. a week with proportionate increases for juniors of both sexes and for apprentices.

The Court took the view that its decision in 1953 to abandon the system of quarterly adjustments was clearly right and that "so long as the assessment of the basic wage is made as the highest which the capacity of the economy can sustain, the automatic adjustment of that basic wage upon price index numbers cannot be justified, since movements in the index

---

\* *Commonwealth Arbitration Reports*, Vol. 77, p. 477.

have no relation to the movements in the capacity of the economy".\* After examining the state of the economy and the possible disastrous extension of inflation, the Court decided that the nation had not the capacity to pay a basic wage of the amount to which automatic quarterly adjustments would have brought it.

In its judgment the Court stated that in future a yearly assessment of the capacity of Australia for the purpose of fixing a basic wage would be most appropriate and that it would encourage any steps to have the Court fulfil such a task each year.

For further details, see *Labour Report* No. 46, page 67.

(vi) *Basic Wage Inquiry, 1956-57.* On 13th November, 1956, the Commonwealth Conciliation and Arbitration Commission in Presidential Session commenced to hear claims by the combined unions for an increase of the basic wage to the amount it would have reached if automatic quarterly adjustments had remained in force and for the restoration of automatic quarterly adjustments.† This application was treated by the Commission as a general application for alteration of the basic wage in all Commonwealth awards.

The unions' claims were opposed by the respondent employers. Victoria and South Australia were the only States to appear before the Commission and the Commonwealth Government intervened in the public interest. Victoria neither supported nor opposed the application by the unions. South Australia opposed the unions' claims and suggested that, if an increase in the basic wage were granted, the Commission should decide on the increase to be added to the six capitals basic wage, and then apportion that increase amongst the six capital cities on a basis accurately reflecting the differences in their cost of living. The Commonwealth opposed the restoration of the automatic adjustment system, whatever index was used for this purpose.

After hearing submissions by counsel for the unions that automatic quarterly adjustments of the basic wage should be restored and argument as to the appropriateness of using the "C" Series Index for this purpose, the Commission reaffirmed the decision of the Court in 1953, which, it said, "was primarily based on the view that there is no justification for automatically adjusting in accordance with a price index a wage assessed as the highest that the capacity of the community as a whole can sustain".‡ Accordingly, the claim for restoration of automatic quarterly adjustments was refused.

The Commission, having considered all aspects of the state of the economy, decided that the adult male basic wage should be increased by 10s. a week, payable from the first pay-period to commence on or after 15th May, 1957. The basic wage for adult females was increased by 7s. 6d., with proportionate increases for juniors and apprentices.

The historical background of differential rates of basic wage for respective cities and towns was examined by the Commission and it acknowledged that the Federal basic wage had two components. The first and greater component differed for each capital city and represented a rate of wage calculated by the use of "C" Series retail price index numbers for the June quarter, 1953, and the second component, common to all places, was the uniform 10s. awarded by the Court in 1956. On the question of whether the increase should be of a uniform amount, the alternative open to the Commission appeared to be either to follow what the Court did in 1956, or to recalculate the inter-capital-city differentials of the newly-fixed standard basic wage according to the latest "C" Series index numbers. The Commission decided to grant an increase of a uniform amount.

Judgment was delivered on 27th April, 1957. The Commission advised that it approved an annual review of the basic wage and would be available for this purpose in February, 1958. However, although favouring an annual review of the basic wage, the Commission considered that "it would not be proper for it nor would it wish to curtail the existing right of disputants to make an application at whatever time they think it necessary to do so".§

A more detailed summary of the judgment may be found in *Labour Report* No. 46, pages 68-71.

(vii) *Basic Wage Inquiry, 1958.* On 18th February, 1958, the Conciliation and Arbitration Commission commenced hearing an application by unions respondent to the Metal Trades Award for an increase of the basic wage to the amount it would have reached had the quarterly adjustment system been retained, plus an addition of 10s., and for restoration of quarterly adjustments.||

\* *Commonwealth Arbitration Reports*, Vol. 84, p. 175. † 87 C.A.R., p. 439. ‡ *Commonwealth Arbitration Reports*, Vol. 87, p. 445. § *Ibid.*, p. 459. || 89 C.A.R., p. 287.

These claims were opposed by private employers and by the State of South Australia, which also contended that, as the cost of living was much lower in Adelaide than in Melbourne and Sydney, greater disparities in basic wage rates than then existed should be determined if, against its submission, any general increase in the basic wage were decided upon. Tasmania, the only other State represented, made no submissions. The Attorney-General of the Commonwealth intervened in the public interest, and leave to intervene was granted to a number of professional, salaried and public service organizations.

In its judgment, delivered on 12th May, 1958, the Commission rejected the submission by the Professional Officers' Association that consideration should be given to the question whether increased capacity should be reflected in an increased basic wage only or extended also to the marginal or secondary contents of aggregate wages and salaries. The Commission also rejected the submission by the Australian Council of Salaried and Professional Associations that when the Commission looked at the capacity of industry to pay and gave an increase in the basic wage, it always kept something in reserve for a subsequent marginal claim.

The claim of the unions for the restoration of the 1953 basic wage standard was rejected by the Commission on the same ground as in its 1957 judgment, i.e., that it was unsafe to assume that the economy could sustain the 1953 rate as a "standard" in real terms.

The Commission then considered the three specific issues before it, namely, (a) should the system of automatic adjustments be restored? (b) should the basic wage be increased, and if so, by what amount? and (c) should there be uniform or disparate increases?

Counsel for the unions submitted that the unions still regarded the "C" Series Index as a proper guide for the determination of basic wage levels, but that if this contention were unacceptable to the Commission, there should be an immediate decision upon principle, and later, if need be, an inquiry in an effort to ascertain a proper price index. He also submitted that there should be, from time to time, additions to wages to afford to workers their proper share of increased productivity and efficiency, and that although the unions had never claimed that increments for increased productivity could under present circumstances be made by way of automatic adjustment, the objective of wage increases commensurate with price increases could best be achieved by the use of an automatic adjustment system. After having considered the submissions and without hearing arguments against the proposition, the Commission rejected the application for the restoration of automatic adjustments and for a deferred inquiry thereon. In the reasons for its judgment, the Commission stated that there was nothing in the submission to justify a departure from the decisions of 1953, 1956 and 1957 to reject automatic wage adjustments. The Commission also again expressed the opinion that a yearly assessment of the capacity of Australia for the purpose of fixing a basic wage would be most appropriate.

The Commission was unanimously of the opinion that the position of the economy regarded as a whole was such as to justify an increase in the basic wage, but a difference of opinion existed as to what the amount of the increase should be. A majority of the members, namely, Kirby *C.J.* and Gallagher *J.*, considered that it was undesirable in the interests of all to grant an increase higher than 5s.; Wright *J.*, on the other hand, considered that a basic wage level substantially higher than that proposed by the majority was justified. The decision of the majority prevailed, and the basic wage for adult males under Federal awards was therefore increased by 5s. a week.

The South Australian Government submitted that economically there was no scope at all for a basic wage increase anywhere in Australia; and again pursued the question of inter-city differentials as an answer to the union claim that the amount of the basic wage in Adelaide should be calculated by reference to the "C" Series retail price index numbers for that city. The substance of the State's case was that the actual cost of living was so much lower in Adelaide than in Melbourne and Sydney that greater disparities in basic wage rates than then existed should be determined by the Commission, if any general increase in the basic wage were decided upon. Subject to a stipulation that no reduction should be made in the existing basic wage rate for Adelaide, counsel for the South Australian Government claimed that the rate should be approximately 10 per cent. below the rate fixed for Sydney instead of approximately 5 per cent. below, as it then was. The Commission rejected the claim on the ground that it would not be wise or just to apply it in South Australia in view of the fact that it was neither sought nor supported by any other party, and its application to the Government and its instrumentalities alone was not sought. The Commission indicated that the issues involved in inter-city differential wage rates were complex and could not be decided after a brief hearing.

The decisions of the Commission were as follows:—the claim for restoration of automatic quarterly adjustments and the claim of the South Australian Government for special treatment were refused; and the basic wages of adult male employees covered by Federal awards were increased by a uniform amount of 5s. per week, to operate from the beginning of the first pay-period commencing on or after 21st May. As a result, the basic wage for adult females was increased to 75 per cent. of the new basic wage for adult males with proportionate increases for juniors and apprentices of both sexes.

(viii) *Basic Wage Inquiry, 1959.* On 24th February, 1959, the Conciliation and Arbitration Commission in Presidential Session commenced hearing an application by respondent unions for the following variations of the existing Metal Trades Award, namely, "by increasing the amounts of basic wage prescribed therein for respective cities, towns and localities to the figure they each would have reached had the quarterly adjustment system based on the "C" Series retail price index numbers been retained, plus an addition of 10s. to each basic wage, and by making provision for future adjustment of each of the new amounts at quarterly intervals by the application thereto of the same index numbers".\*

A large number of applications for similar variation of other awards were ordered to be treated as involved in the inquiry, and as such to be decided upon the evidence, material and submissions made from the beginning of the hearing.

The application of the unions was opposed by private employers generally, and by the State of South Australia and two of its instrumentalities. Tasmania was the only other State represented, and it appeared in support of the application of the unions in regard to the increase of the basic wage and the restoration of the quarterly adjustment system. The Commonwealth Government intervened in the public interest and submitted that the application for restoration of the automatic adjustment system should be refused. The Commonwealth again supplied, for the benefit of the Commission and the parties, economic and statistical information and material and, in addition, without making a particular submission as to whether there should be an increase, made a general submission on the state of the national economy.

Organizations of employers in the pastoral industry asked for a reduction in the basic wage in the Pastoral Award of £1 5s., being the aggregate amount of the increases granted in 1956, 1957 and 1958. The Commission decided to join these applications in the main hearing on 17th March, 1959, as a matter of procedure only, and without deciding affirmatively that the Commission as constituted for that hearing had power to grant them in whole or in part. At the conclusion on 5th May, 1959, of submissions in support of these applications and without calling upon employees in reply, the Commission stated that it would reject the applications for reduction of the basic wage in the Pastoral Award, and again indicated that the question of jurisdiction as to whether the Commission had the power to decide a different basic wage remained "undecided and open".

On 5th June, 1959, the three Judges delivered separate judgments. On the question of whether the system of automatic quarterly adjustments should be restored, the members of the Commission were divided in opinion, and therefore the question was decided in accordance with the decision of the majority. The majority decision, namely, that of Kirby C.J. and Gallagher J., was that the claim of the unions for restoration of the said system should be refused. Foster J. dissented.

The members of the Commission were unanimous in the opinion that there should be an increase in the basic wage, but as to the amount of the increase they were divided in opinion as follows.

The President, Kirby C.J., was of opinion that the increase should be 15s. a week, and that the increased basic wage should become payable as from the beginning of the first pay-period commencing on or after 11th June, 1959.

Foster J. was of opinion that the increase should be 20s. a week, payable as to 10s. as from the first pay-period in July, 1959, and as to the balance by increases of 2s. 6d. for four quarters commencing 1st January, 1960.

---

\* *Commonwealth Arbitration Reports*, Vol. 91, p. 683-4.

Gallagher J. was of opinion that the increase should be one of 10s. a week, and that the increased wage should become payable as from the date chosen by the President.

Foster J., while holding his opinion, decided to concur in the decision proposed by the President.

A summary of the separate reasons for judgment was published in Official Year Book No. 46, pages 437-9.

(ix) *Basic Wage Inquiry*, 1960. On 16th February, 1960, the Conciliation and Arbitration Commission, constituted in Presidential Session by Kirby C.J. (President), Ashburner and Moore J.J. (Deputy Presidents), commenced hearing an application by respondent unions for the restoration to the Metal Trades Award of quarterly adjustments to the basic wage and for an increase in the amount of the basic wage. On the six capital cities rate the amount of the increase sought was 22s. a week.\* This amount was composed of two parts—firstly, an addition of 5s. a week to restore to the basic wage the same real value as it had in 1953, and, secondly, a further amount of 17s. representing the unions' estimate of the minimum increase in productivity which had occurred in the period since the automatic adjustment system was abolished.

The Commonwealth Government intervened in the public interest and again presented a detailed analysis of the economic situation of Australia, together with comments on fiscal and budgetary policy. It also announced its opposition to the unions' application both for restoration of automatic quarterly adjustments and for an increase in the basic wage. The State of South Australia presented material to the Commission to show the effect which wage increases would have on its finances, and opposed the unions' application. Victoria, Queensland and Western Australia presented information to show how their finances would be affected by wage increases, but neither supported nor opposed the claims of the applicants. Tasmania indicated that it supported the application for restoration of quarterly adjustments, but made no submissions.

In its judgment, delivered on 12th April, 1960, the Commission refused the unions' application. A summary of the judgment is given in the following paragraphs. Further particulars may be found in Official Year Book, No. 47, pp. 443-6.

Regarding the role of Governments in basic wage proceedings, the Commission stated that it welcomed whatever assistance it could get from parties and from interveners. Governments were in a special position to give the Commission a proper conspectus of the public sector and could also assist the Commission to review the economy as a whole. However, it was a matter for each Government concerned to decide whether it would appear before the Commission, and if so whether it would present material or state an attitude or both.

The role of the economic "indicators" was raised during the proceedings, and the Commission, in its judgment, commented that the indicators originated in 1953 as an attempt by the Commonwealth Court of Conciliation and Arbitration to make more orderly the presentation of material in basic wage cases. They were to be used as a framework for presentation of economic material, but were never intended to be used as a means of excluding material from the Commission's consideration. If parties or interveners wished the Commission to reduce or expand the present set of indicators or to approach the examination of the economy in a different way, they were at liberty to ask the Commission to do so.

*Application for Restoration of Quarterly Adjustments.* Counsel for the unions criticized the decision in the 1953 inquiry to abolish automatic quarterly adjustments to the basic wage and also the decisions, in subsequent inquiries, against their re-introduction. He submitted that it would be inequitable and unjust not to restore the practice which existed for many years prior to 1953, of having the basic wage automatically adjusted each quarter in accordance with movements in a price index. He relied in particular on the 1934 basic wage judgment.

In refusing the application, the Commission stated that the decision in the 1934 case was not relevant, as the question of automatic quarterly adjustments must be decided in the

\* Print No. 7469, p. 1.

light of existing situations and practices. In 1934 the basic wage was determined for an undefined period and automatic quarterly adjustments applied. In 1960 the Commission was considering a situation in which in practice the basic wage was each year re-assessed. The Commission decided that it was preferable to fix a basic wage which it considered just and reasonable for the ensuing twelve months and then review it. In the Commission's view it was not inequitable or unjust not to restore automatic adjustments.

*Application to Increase the Basic Wage.* With regard to this part of the application, the Commission stated:—"It is appropriate first to describe shortly the basic wage and margins as elements of a total wage and the somewhat unusual setting in which the question of an increase in the basic wage comes up this year for consideration. The total wage paid to most workers under federal awards is composed of two elements, namely, the basic wage and a margin for skill, responsibility and the like. The existence of these two elements is a result of the history of federal wage fixation and has received legislative approval. The legislation requires that the basic wage and margins be dealt with by differently constituted benches of this Commission. The basic wage may be altered only by the Commission in Presidential Session, that is, by a bench constituted by three or more judges. Margins may be altered by a single member of the Commission or by a full bench constituted by at least three members of whom at least one must be a judge. In the first instance applications for alterations of margins come before a single member of the Commission but on application by a party the President has power to direct that the matter be dealt with by a full bench if he is of opinion that it is of such importance that in the public interest it should be so dealt with. By such a direction the Metal Trades margins application of 1959 was dealt with by a full bench."

The Commission then went on to state briefly the recent history of basic wage and marginal fixation by the Commission and its predecessor, the Commonwealth Court of Conciliation and Arbitration, and referred to the four basic wage increases in the years 1956 to 1959 and the increases in margins in 1947, 1954 and 1959. The Commission expected that, in the light of the history of marginal fixation since 1947, it would be asked to consider the question of general marginal increases every few years. The Commission stated that so long as its decisions regarding metal trades margins are given general application and so long as the annual review of the basic wage continues, it follows that in one particular year the Commission constituted by a full bench of judges will review the basic wage and, constituted by a mixed bench, review margins. When the economy is found capable of sustaining an increase in both the basic wage and margins, it follows that the economic and psychological effect of each increase is affected and indeed highlighted by the other. This happened in 1959, when the basic wage was increased as from June by 15s., or an increase of 6 per cent., and margins were increased as from December by 28 per cent. of the amount of the margins existing as a result of the 1954 review by the Court. Together the 1959 increases approximated 8 to 10 per cent. of award wages.

The Commission was required by legislation to treat the basic wage and margins separately, but although constituted differently for each task, at the time of fixation of rates it had to look forward to the period which its decision would cover; that is, a year for the basic wage and, generally speaking, a longer period for margins. In dealing with the application then before it, the Commission had to decide whether the basic wage should again be increased, although less than a year had elapsed since increases were granted in both the basic wage and margins.

The unions submitted that since 1952-53 all the economic indicators customarily used by the Commission had shown significant improvement. However, in view of the Commission's conclusions in the case, it did not find it necessary to discuss the indicators. The employers submitted that, whatever might have been established about the indicators, there were two factors dominating the economic scene, namely, the two wage increases granted by the Commission in 1959, and the lifting of import restrictions by the Commonwealth Government. The whole of the economic material available to the Commission had to be discounted by the fact that the combined effect of the two wage increases had not at that time been felt by the economy. As to the lifting of import restrictions, the likelihood was that there would be an appreciable increase in the amount of imports, which would render more difficult the task of local manufacturers, a task already made difficult by the wage increases in 1959.

The Commonwealth Government stated that, although no quantitative estimate could be made of the increase in imports likely to occur as a result of the lifting of import restrictions, the significance of their removal was that it had come at a time when the effects of the 1959 wage increases had not been fully felt. The effect on the annual wages bill of the increased margins was estimated to be about £100 million and the direct cost of the 1959 basic wage increase about £65 million. In the Commonwealth's view, these increases would raise costs and price levels significantly and further secondary effects would follow. They would also give a further strong stimulus to the demand for goods and services. The Commonwealth Government submitted that what was needed was a firm rejection of any new measures that would add to current inflationary pressures and time for the adjustment of the economy to the general wage increases of 1959.

The Commission considered that such a clear statement of the Commonwealth Government's attitude, supported by submissions and economic material, was a matter which it must seriously take into account.

In concluding the reasons for judgment the Commission stated:—" We accept the submission made by the private employers and by the Commonwealth Government that we should not award an increase in the basic wage, bearing in mind that employees under federal awards have in the past twelve months received substantial increases in both basic and secondary wages. It is our view that at the present time, before the effects of these previous wage increases have been reflected in the economy, we cannot find that its capacity is such that a further basic wage increase can be awarded.

We consider that it would be unsafe and perhaps dangerous to increase the basic wage at this point of time. We have formed this opinion with a full sense of the obligation which this Commission has to fix the basic wage from time to time at the highest amount that the economy can sustain so that the wage and salary earner may obtain his proper share of goods and services. On the other hand we are mindful of the danger to the whole community, including the wage and salary earner, of the basic wage being fixed at an amount which might increase inflation and upset the stability of the economy."\*

(x) *Differential Basic Wage Inquiries, 1960.* On 9th August, 1960, the Commonwealth Conciliation and Arbitration Commission commenced hearing claims by:—(a) the Federated Engine Drivers and Firemen's Association of Australia to vary the Engine Drivers and Firemen's (General) Award by eliminating country differentials from basic wages prescribed therein; (b) employers' associations in South Australia to vary the Metal Trades Award by providing that future basic wage increases for Adelaide should be 25 per cent. less than basic wage increases for Sydney until the Adelaide basic wage was 90 per cent. of the Sydney basic wage, and that the basic wage applicable in areas other than Adelaide, Whyalla and Iron Knob should be £13 8s. and should remain unchanged until the Adelaide rate reached £14.

Judgment was delivered on 14th December, 1960. The Commission granted the application to eliminate specified country differentials from the Engine Drivers and Firemen's (General) Award, the new basic wages to be payable from the beginning of the first pay-period commencing on or after 1st January, 1961. Other awards were adjusted similarly on application to the Commission. The employers' applications in respect of basic wages in South Australia were both rejected.

(xi) *Basic Wage and Standard Hours Inquiry, 1961.* On 14th February, 1961, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Ashburner and Moore J.J. (Deputy Presidents), commenced hearing applications by employers and unions for variation of the Metal Trades Award. In the first application the employers sought to increase the number of ordinary working hours per week from 40 to 42, with a concomitant increase in weekly wages by an amount equivalent to two hours pay at ordinary rates, and to effect certain other consequential variations. In the second the unions applied for an increase in the basic wage on a six capital cities basis by the amount of 49s. (which was amended during the hearing to 52s.) and for the re-introduction of automatic

\* Print No. A7469, p. 9.

quarterly adjustments based on the "C" Series Retail Price Index. The amount claimed represented 27s. (30s.) for cost of living increases since 1953 and 22s. to reflect increases in productivity since that time.

In its judgment, delivered on 4th July, 1961, the Commission refused the employers' application, and the unions' application for restoration of quarterly adjustments, and increased the basic wage of adult male employees covered by federal awards by a uniform amount of 12s. a week, payable from the beginning of the first pay-period commencing on or after 7th July, 1961.\*

The applications were heard together, but although from time to time reference was made to the employers' claim, in essence it was the unions' claim which was to the forefront and with which all the parties principally concerned themselves.

*The Unions' Claims.* In dealing with the unions' claims, the Commission first discussed its own role and that of the Commonwealth and States.

In view of certain propositions put forward which seemed to be founded on the assumption that it had jurisdiction to deal with economic matters at large, the Commission once again set out the role and function of a federal arbitral tribunal in cases such as this. After citing what had been said in earlier judgments the Commission further stated:—"We are not national economic policy makers or planners. We are confined to the legislation under which we act, and, in particular, in basic wage cases we have the function of deciding only what is a just and reasonable basic wage. This does not mean of course, that we have not to consider seriously the probable effects of our decision on the economy."

The question of what weight the Commission should give to the attitude and submissions of the Commonwealth Government was again raised. The Commission referred to the 1960 Basic Wage Inquiry, in which the attitude of the Commonwealth was positively stated to be one of opposition to a wage increase, and that attitude, because it was supported by submissions and economic material, was a matter to be taken into account seriously. In the 1961 Inquiry, however, although the Commonwealth followed its usual practice of supplying, for the benefit of the Commission and the parties, certain economic and statistical material, it expressed no attitude other than its opposition to the re-introduction of quarterly adjustments. The Commission stated that it was not concerned with drawing inferences, as it had been asked to do, from the material presented, as to whether the Commonwealth had an attitude, and as to what it might be. On this question of the Commonwealth's attitude the Commission further stated:—"Because of a suggestion made in this case that the mere fact that the Commonwealth adopted an attitude before the Commission would result in that attitude being accepted, we unfortunately consider it necessary to repeat what we have said in the past that this simply is not so. It has not been so in the past and will not be so in the future. We wish to make it clear that any opposition to or support of any claim by the Commonwealth will be treated on its merits."†

All States except New South Wales were represented at the hearing. South Australia made no submissions and called no evidence. Tasmania indicated its support for the unions' application for the restoration of automatic adjustments, plus an adjustment of the basic wage to the level indicated by the movement in the "C" Series Index, but presented no material. Victoria, Queensland and Western Australia neither supported nor opposed the application of the unions, but all presented some statistical information.

In claiming the re-introduction of automatic quarterly adjustments, counsel for the unions submitted, firstly, that the reasoning in each of the judgments of the Court and the Commission from 1952-53 to 1960 was wrong and that there was in none of them any proper reason for rejecting the principle of automatic quarterly adjustments; and secondly, that it was wrong for the Commission to fix a wage based on the capacity of the economy and not to provide some machinery which would ensure that the value of the wage was not subsequently eroded by price movements when prices increased.

The Commission considered it indisputable that at the time of its fixation the amount of a basic wage is both a money wage and a real wage, but the value of the real wage is altered by subsequent changes in price levels. Counsel for the unions submitted that a real basic wage should be determined from time to time with some interval longer than one year between determinations, and that the real value of the basic wage between determinations

\* Print No. A7848, p. 3.

† *Ibid.*, p. 7.

should be maintained automatically by adjustment in accordance with a price index. Unless this were done, the amount of goods and services that could be purchased by the basic wage would decline as prices rose.

The Commission was asked to assume that between basic wage fixations the capacity of the economy to maintain a basic wage would increase or remain constant. If capacity were to diminish, the unions argued that the Commission is of easy access and employers could seek corrective action. The Commission's duty was to fix a just and reasonable basic wage and the provision of automatic quarterly adjustments would ensure that this was done. Further, the provision of automatic adjustments would relieve the Commission of the necessity of annual reviews of the state of the economy. The unions claimed that it was not practicable for the Commission to make a proper assessment of the economy, including movements in productivity, every twelve months, and to give proper consideration to the fixation of a new real basic wage.

The Commission rejected the employers' argument that the unions were really asking it to return to a needs basic wage as distinct from a capacity basic wage.

It went on to consider the practical difficulty which would in the past have confronted both the Court and the Commission if they had attempted to ensure that a basic wage fixed by them could be properly maintained at its real level. The Commission stated:—  
 “. . . . the ‘ C ’ Series Index was over a period becoming suspect and the Court and the Commission could not have relied on it to achieve a proper result. The emergence of the Consumer Price Index, however, has removed that difficulty and we are therefore now able to seek to ensure that the basic wage which we fix should, subject to our supervision, maintain its real standard; in other words, that employees should, between fixations of the real basic wage and subject to our supervision, continue to be able to purchase the same amount of goods and services with the basic wage portion of their wage. We add that amongst other things the emergence of the Consumer Price Index has also enabled us to fix at this time a standard which, in our view, is more likely to be properly maintainable than recent past standards.”\*

Having reached the conclusion that the principle of the maintenance of the purchasing power of the basic wage could be adopted, the Commission found it unnecessary to deal with the first part of the unions' argument, as to the correctness or otherwise of earlier decisions.

After comparing the “ C ” Series Retail Price Index and the Consumer Price Index, the Commission said:—“ In our view the material available demonstrates the superiority of the Consumer Price Index over the ‘ C ’ Series Retail Price Index. The former is an index recently constructed by the Commonwealth Statistician in order to give a proper and accurate up-to-date coverage of movements in retail prices. The latter index on a regimen constructed many years ago can no longer in our view be considered reliable for wage fixing purposes. We find the Consumer Price Index suitable under present circumstances for the maintenance of the purchasing power of the basic wage we will now fix.”†

It was then necessary to consider the question of how movements in the Consumer Price Index could be used. In the 1959 and 1960 basic wage decisions the Commission had stated that it was preferable to have an annual review rather than provide for automatic adjustments. However, with the publication of the Consumer Price Index, upon which greater reliance could be placed, what had been said in those two cases was no longer adequate. Nevertheless, the Commission was not prepared to return to a system whereby adjustment was purely automatic, because it thought that there should be some safeguard. Although the Consumer Price Index was preferred to the “ C ” Series Retail Price Index, it could not be assumed that this index would at all times so accurately measure movements in retail prices that the Commission would be prepared to apply its workings automatically to the basic wage.

In its judgment the Commission stated:—“ We consider it desirable that the application of the Consumer Price Index should always be subject to control by the Commission and the Commission should be able to decide whether a particular increase or decrease in the figures as disclosed in the Consumer Price Index should be applied to the basic wage. Our present opinion is that this consideration of prices should take place annually. We will each year make the assumption that the effect of movements in the Consumer Price Index should be

\* Print No. A7848, p. 10.

† Ibid., p. 11.

reflected in the basic wage unless we are persuaded to the contrary by those seeking to oppose the change. As the basis of our decision is the desirability of maintaining the value of the real wage based on the concept of national capacity, the appropriate matter for consideration would appear to be what should be the effect on the six capital cities basic wage of movements in the six capital cities index. The resulting figure will be applied to all federal basic wages.

“ Since such a consideration of price movements is to take place annually, the question remains whether the Commission should at the annual hearing continue to review all factors in the economy to decide whether or not to change the level of the real basic wage. It seems to us that once the question of prices is dealt with otherwise, a review of the economy generally and in particular of productivity increases could more properly take place at longer periods of time, say, every three or four years. This statement of our views does not, of course, preclude any party from seeking to exercise its right to come to the Commission more frequently than every three or four years to seek a change in the real basic wage but, except in unusual circumstances, we consider such a period a proper interval between reviews of this kind.”\*

The Commission concluded that the basic wage which it had fixed took into account increases in productivity up to June, 1960, and it therefore anticipated that a review of the real basic wage would not be necessary for some three years. The Commission went on:— “ If our anticipation is correct, in the proceedings next year the only issue will be whether or not the money wage should be adjusted in accordance with any change in the Consumer Price Index. The onus will be on the party opposing such an alteration to show that it should not be made. If the price index has risen the unions may rely *prima facie* on that fact. It will then be for the employers to show that the increase in prices is of an exceptional character . . . so that it should not be reflected in a basic wage increase or that there is some special factor in the economy which would make it inadvisable to allow the increase.”†

The Commission had felt in the past some difficulty in endeavouring to make a satisfactory assessment of the economy from the long-range point of view every twelve months, and this difficulty played its part in the Commission’s attempt to confine short-term considerations to price movements only, and to allow a longer period of time between considerations of the long-term trends in the economy.

On the subject of departure from past practices, the Commission said:—“ We consider it to be of importance that the Commission should not only consider itself open to depart from past practices when the occasion demands, but that it should make it quite clear that this will happen when the Commission, after due and careful consideration, considers it necessary. The concept is fundamental to our decision to depart from what has become the practice of having annual reviews of the basic wage in which the question of price increases is only one of a number of factors and is not given any special status.”‡

*Productivity.* The unions claimed that there should be an increase of 22s. a week in the basic wage, based on an estimated one per cent. per annum increase in productivity over the previous decade, and that since 1952–53 no proper allowance had been made in the amounts awarded for increases in productivity.

On this subject the Commission stated:—“ The question of productivity has been mentioned from time to time in various judgments of the Commission and there is really no dispute between the parties that workers are entitled to their share of increases in productivity. The issues between the parties are whether productivity can be measured with reasonable accuracy and whether in fact through wage increases workers have received their share of increased productivity.”‡

In evidence presented by the unions, productivity was calculated by taking the Gross National Product for a year, deflating it by a price index and dividing the figure corrected for prices by (a) population and (b) the total of wage and salary earners in civilian employment. On the basis of these calculations it was claimed that from 1952–53 to 1959–60 productivity had increased by about 2.6 per cent. per annum, “ real ” average earnings had increased by less than productivity, and the “ real ” basic wage had decreased. Counsel for the unions submitted that by taking one per cent. per annum the unions had clearly allowed for a safe margin of error.

\* Print No. A7848, p. 12.

† *Ibid.*, p. 13.

‡ *Ibid.*, p. 14.

In answer to this the employers produced a similar type of calculation, but using a different deflator and 1949-50 as the base year. On this basis it was claimed that the "real" basic wage had increased slightly more than productivity per person employed and some 10 per cent. more than productivity measured on a population basis, and "real" average weekly earnings had increased more than the "real" basic wage.

After considering the various calculations which had been submitted, the Commission concluded that 1952-53 was an abnormal year for the purpose of relevant comparison, and that 1949-50 was more satisfactory to take as a starting point. In the Commission's view it followed that the 1960 basic wage properly reflected increased productivity in so far as that could be approximately measured.

The employers claimed that the Commission should look at average weekly earnings as the true indicator of whether increases in productivity had been distributed to the work force, and that the only thing to be measured against productivity was what was in fact earned, and not the basic wage. In the Commission's view, the relevant consideration in fixing a basic wage was whether, if average weekly earnings properly reflected increased productivity but the basic wage did not, there was room for an increase in the basic wage based on the same increased productivity. In view of its finding that the 1960 basic wage did reflect increased productivity, the Commission concluded that it was unnecessary to decide the question on that occasion.

The Commission then reviewed in detail the indicators of the state of the economy. Having examined the problems bound up in the questions of excessive demand, wool and the competitive position of secondary industry and their interlocking with oversea trade and oversea reserves, the Commission considered that the economy had the capacity to sustain an increase of 12s. in the basic wage and that that increase was the highest that could be sustained. This amount was sufficient to restore to the 1960 basic wage its purchasing power as measured by the Consumer Price Index.

The Commission considered the standard of the seven basic wages of the previous ten years and decided that the most appropriate one was the standard of 1960. It felt that the new basic wage combined in the result its conclusions on fundamental factors in a threefold way, because it was fixed at the highest amount the capacity of the economy allowed, it adopted as a standard that set by the basic wage of 1960, and it took account of productivity increases up to and including 1959-60.

Both the employers and the Commonwealth Government warned of the danger of inflation which might result from an increase in wages. However, the Commission pointed out that there was no legal reason why any increase in the basic wage should not be absorbed by over-award payments, although this might not be possible because of industrial pressure and scarcity of skilled labour. While the increase in wages granted would cause some increase in costs, the stimulation of demand would only restore it to the level of the previous year. The estimated increase of £60 million a year in wages and salaries would add less than two per cent. to the annual wages bill.

*The Employers' Claim.* The employers' claim was for an increase in standard hours from forty to forty-two per week, with a concomitant increase in the weekly wage equivalent to two hours pay at ordinary rates. This was to operate for four years, after which time weekly hours would revert to forty but the increased wage would remain. The Commission rejected arguments supporting this application, which stated that such a measure was called for by the balance of payments crisis, and that it would lead to increased productivity at stable prices and distribute more evenly the amount of overtime worked. The Commission did not think that the state of the economy was such that standard hours should be increased.

*Employees on Lower Margins.* During the course of the proceedings the President asked for submissions on the question of whether by prescription of the basic wage special consideration should or could be given to those employees who receive a margin above the basic wage of, say, £1 a week or less. The Commission decided that even if it had jurisdiction it would not, as a matter of discretion, make a differential basic wage at that time.

*Annual Leave Decision.* The Commission rejected the view that the reasons given for not granting an increase in annual leave in 1960 should impel it to refuse an increase in the basic wage. The question of wages was more fundamental and more important to the worker

than the question of leave, and reasons which might delay the granting of additional leave may not be of sufficient weight to delay a basic wage increase. Also, had an increase in annual leave been granted, the Commission might not have been able to grant the increase in wages.

*Decisions.* The decisions of the Commission were as follows:—

- “ 1. The employers' claim for an increase in the standard hours of work from forty to forty-two with a concomitant increase in the weekly wage equivalent to two hours pay at ordinary rates is refused.
2. The unions' claim for restoration of automatic quarterly adjustments is refused.
3. The basic wages of adult male employees covered by federal awards will be increased by a uniform amount of 12s. per week.
4. The new rates will come into effect from the beginning of the first pay-period commencing on or after 7th July instant subject to special cases.
5. For the specific reasons set out in the judgment we consider that in February next the only issue in regard to the basic wage should be why the money wages fixed as a result of our decision should not be adjusted in accordance with any change in the Consumer Price Index and for the purpose of deciding that issue the Order giving effect to the decisions hereby announced will also provide for the adjournment of the application of the unions for increase of the basic wages under the Metal Trades Award to Tuesday, 20th February, 1962, in Melbourne, when such submissions thereon as are desired to be made will be heard.
6. The decision regarding increases in basic wages is applicable to all the applications which have been ordered by the Commission to be joined for hearing and decision with the original application and those joined applications are stood over to a date after 20th February, 1962, to be fixed by the Commission.”\*

(xii) *Basic Wage Inquiry, 1962.* In accordance with decision no. 5 in the 1961 Inquiry (see above), the adjourned hearing was held on 20th February, 1962, before Kirby C.J., and Ashburner and Moore JJ.

Counsel for the unions submitted that, although the 1961 judgment represented a recognition of union claims as to the need to maintain the real value of the basic wage, it had not met in full the demands of the trade union movement. He drew the Commission's attention to certain resolutions of the 1961 Congress of the Australian Council of Trade Unions, and in particular referred to the Consumer Price Index, which, he said, had been issued without the opportunity being provided for proper consultation with the principal parties affected. The trade unions were continuing their investigation of the index.

The unions intended to return to the Commission at the appropriate time to argue at length for the implementation of their policy as to the basic wage standard and the question of quarterly adjustment.

In the employers' submission, reference was made to the Commission's 1961 judgment as indicating a firm intention to confine argument in the current hearing to the quantum of any basic wage change and to exclude any re-examination of the Commission's departure from previously accepted principles. As the Consumer Price Index had shown practically no change between the March and December quarters of 1961, there could be no change in the basic wage. However, the employers' view was that in any hearing involving movement in the basic wage the parties must be free to discuss economic capacity to sustain the basic wage at any given level and the principles upon which it is computed.

Counsel for the Commonwealth stated that at the proper time the Commonwealth would appear before the Commission to present argument as to the use of price indexes in basic wage fixation and other important issues raised by the 1961 judgment. However the matter might come before the Commission as a matter of procedure, when circumstances called for the debate of any substantive issue the Commonwealth would be in a position to make further submissions.

The decision of the Commission was as follows:—

- “ 1. There will be no alteration in the amounts of the existing basic wages until further order of the Commission;
2. The application before the Commission is further adjourned until 19th February, 1963;
3. At such adjourned hearing the issues will be:
  - (a) The issue set out in paragraph 5 of the decisions of 4th July, 1961;
  - (b) Any issue which a party desires to raise and of which it has given notice to the Industrial Registrar, the other parties and to the Attorney-General by the 31st January, 1963;
4. The applications referred to in paragraph 6 of the decision of 4th July, 1961, are stood over to a date after the 19th February, 1963, to be fixed by the Commission with liberty to any of the parties to those applications to apply in the meantime.”

(xiii) *Rates Operative, Principal Towns.* The basic wage rates of the Commonwealth Conciliation and Arbitration Commission for adult males and females, operative as from the beginning of the first pay period commencing on or after 7th July, 1961, were as shown in the following table.

COMMONWEALTH BASIC WAGE: WEEKLY RATES (a), 1962.

(a) Rates include prosperity loadings where applicable. (b) Prior to 30th June, 1956, Commonwealth Court of Conciliation and Arbitration. (c) Rates operative from the beginning of the first pay-period in the month indicated, unless otherwise stated. (d) Automatic adjustment discontinued (see p. 422). (e) For date operative, see the relevant Basic Wage Inquiry (pp. 423-6). (f) Operative from the beginning of the first pay-period commencing on or after 7th July, 1961.

A table showing Commonwealth basic wage rates from 1923 to 1961 was published in *Labour Report* No. 48, Appendix XI.

3. Australian Territories.—In the Northern Territory, there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the "Darwin" rate, and the other in respect of areas south of that parallel and extending down to the 26th parallel (the "Port Augusta" rate).

The basic wage rates payable as from the beginning of the first pay-period commencing on or after 7th July, 1961, were:—"Darwin" rate, adult males, £15 7s., adult females, £11 10s.; "Port Augusta" rate, adult males, £14 14s., adult females, £11 0s. 6d.

In addition to these rates, special loadings were prescribed in Northern Territory awards following the fixation of the basic wage rates operative from November, 1951.

In the Australian Capital Territory, the rates payable as from the beginning of the first pay-period commencing on or after 7th July, 1961, were £14 10s. for adult males and £10 17s. 6d. for adult females.

Further details of basic wage rates in the Northern Territory and the Australian Capital Territory may be found in *Labour Report* No. 48, pages 100-4.

4. Basic Wage Rates for Females.—Reference should be made to *Labour Report* No. 48, (pp. 98-100) for an account of the fixation of minimum rates and basic wages for adult females by the Commonwealth Court of Conciliation and Arbitration. At the end of the 1949-50 Basic Wage Inquiry, the Commonwealth Court of Conciliation and Arbitration, by a majority decision, fixed the basic weekly wage for adult females at 75 per cent. of the corresponding male rate from the beginning of the first pay-period commencing in December, 1950. This percentage has continued to be prescribed in subsequent inquiries.

5. *State Basic Wages.*—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, when the Court of Industrial Arbitration fixed the living wage at £2 8s. a week for adult males in the metropolitan area. A Board of Trade, established in 1918, with power to determine the "living" wage for adult male and female employees in the State, made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act, 1926 transferred its powers, as from 15th April, 1926, to the Industrial Commission of New South Wales.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. However, with the adoption in 1937 of the Commonwealth basic wage, the identification of a specified family unit with the basic wage disappeared.

A State scheme of supplementing wages by child endowment became operative in New South Wales from July, 1927, and continued until superseded by the Commonwealth Government scheme in July, 1941. A brief account of the main features of the New South Wales system was given in Official Year Book No. 37, pages 485–6. For particulars of the Commonwealth scheme, *see* Chapter XVII.

Shortly after the Commonwealth Court of Conciliation and Arbitration announced its decision in the 1937 Basic Wage Inquiry, the Government of New South Wales amended the Industrial Arbitration Act to make the State basic wage agree with the Commonwealth rate ruling in New South Wales, and to adopt, as far as practicable, the general principles of operation laid down by the Commonwealth Court. Further amendments to the Industrial Arbitration Act were made in 1950 to give effect to the new rates declared by the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage inquiry (*see* page 421).

Differential basic wage rates for country areas (except Broken Hill) and for employees under Crown awards were eliminated by an amendment of the Industrial Arbitration Act in 1951. Separate rates for Broken Hill were discontinued in 1961 (*see* below).

Following the decision of the Commonwealth Court of Conciliation and Arbitration in September, 1953, to discontinue the system of automatic adjustment of the basic wage in accordance with changes in the "Court" Series retail price index numbers, the New South Wales Industrial Commission deleted the automatic adjustment clause from awards, etc., within its jurisdiction. As a result, the basic wages applicable for the State and operative from the beginning of the first pay-period commencing in August, 1953, remained unchanged until November, 1955.

In October, 1955, the Industrial Arbitration Act 1940–1955 was amended to provide for the automatic adjustment of the existing basic wage each quarter, in accordance with the movements in the Commonwealth Statistician's "C" Series retail price index numbers. The first adjustment, based on the index number for the September quarter, 1955, represented the amount which would have been added to the basic wage if quarterly adjustments had not been suspended, and was made payable from the beginning of the first pay-period in November, 1955. Automatic adjustments have continued to operate since that date.

Act No. 29, 1961 (assented to on 13th October, 1961) amended the Industrial Arbitration Amendment Act, 1961, by adopting the consumer price index numbers in place of the "C" Series retail price index numbers for purposes of the automatic quarterly adjustment of the basic wage. The November, 1961, variation was the first based on the Consumer Price Index. Consumer price index numbers relate only to capital cities and the weighted average for the six capital cities, and as a result the Sydney basic wage rate became the rate for the whole of New South Wales, separate rates no longer being prescribed for Broken Hill and "5 Towns" after November, 1961.

From the beginning of the first pay-period in February, 1962, the basic wage for adult males was £15 0s. and for adult females, £11 5s.

The Industrial Arbitration (Female Rates) Amendment Act (No. 42, 1958), which became operative on 1st January, 1959, defined the existing basic wage for adult females as being 75 per cent. of the adult male rate and made provision for equal pay for males and females in certain circumstances. Where the Industrial Commission or a Conciliation Committee is satisfied that male and female employees are performing work of the same or a like nature and of equal value, they shall prescribe the same marginal or secondary rates of wage. The basic wage for these adult females was prescribed as 80 per cent. of the appropriate basic wage for adult males as from 1st January, 1959. Thereafter, the basic wage was to be increased annually by 5 per cent., so that on 1st January, 1963, it will be the same as that for adult males.

(ii) *Victoria.* There is no provision in Victorian industrial legislation for the declaration of a State basic wage. Wages Boards constituted from representatives of employers and employees, with an independent chairman, for each industry group or calling, determine the minimum rate of wage to be paid in that industry or calling. In general, these Boards have adopted a basic wage in determining the rate of wage to be paid.

By an amendment to the Factories and Shops Act in 1934, Wages Boards were given discretionary power to include in their determinations appropriate provisions of relevant Commonwealth Awards. A further amendment to this Act in 1937 made it compulsory for Wages Boards to adopt such provisions of Commonwealth Awards. The 1937 Act, as amended, also gave Wages Boards power to adjust wage rates, "with the variation from time to time of the cost of living as indicated by such retail price index numbers published by the Commonwealth Statistician as the Wages Board considers appropriate". The Wages Boards thus adopted the basic wages declared by the Commonwealth Court of Conciliation and Arbitration and followed that Court's system of adjusting the basic wage in accordance with variations in retail price index numbers.

After the Commonwealth Court of Conciliation and Arbitration discontinued the system of automatic adjustment of the Commonwealth basic wage in September, 1953, a number of Wages Boards met in November, 1953, and deleted references to these adjustments. However, an amendment to the Factories and Shops Act in November, 1953, required Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers.

In October, 1956, an amendment to the Labour and Industry Act (which had superseded the Factories and Shop Acts in 1954) deleted the automatic adjustment provision and directed Wages Boards in determining wage rates to take into consideration relevant awards of, or agreements certified by, the Commonwealth Conciliation and Arbitration Commission. As a result of this legislation, the last automatic quarterly adjustment of the basic wage made was based on the variation in retail price index numbers for the June quarter, 1956, and was payable as from the beginning of the first pay-period in August, 1956. Following the judgment of the Commonwealth Conciliation and Arbitration Commission in the 1961 Basic Wage Inquiry, Wages Boards met in July and August, 1961 and varied their determinations by incorporating the new Commonwealth rates. As the 1962 Basic Wage Inquiry resulted in no change being made to Commonwealth basic wage rates, the rates for Melbourne are £14 7s. a week for adult males and £10 15s. for adult females.

A table showing, for the period November, 1953 to July, 1961, the basic wage rates for adult males and females adopted by most Wages Boards was published in the Appendix to *Labour Report* No. 48, 1960.

(iii) *Queensland.* The Industrial Conciliation and Arbitration Act of 1929 established an Industrial Court, and provided that the Court could make declarations as to the basic wage and standard hours. This Act, as subsequently amended, was repealed by the Industrial Conciliation and Arbitration Act of 1961, which established, in addition to the Industrial Court, an Industrial Conciliation and Arbitration Commission. The full bench of the Commission, consisting of not less than three Commissioners, may make declarations as to, *inter alia*, the basic wage for males and/or females and the standard hours of work. The first formal declaration of a basic wage (£4 5s. for adult males) by the Queensland Court of Industrial Arbitration operated from 1st March, 1921. Prior to this declaration, the rate of £3 17s. a week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The Queensland Industrial Conciliation and Arbitration Act provides that any basic wage declared must at least maintain an employee, his wife and family of three children in a fair and average standard of comfort.

From 21st April, 1942, the Queensland Industrial Court adopted the practice of making quarterly declarations of the basic wage on the basis of variations in the "C" Series retail price index number for Brisbane.

The Court granted increases of 7s. and 5s. to the basic wages for adult males and adult females respectively, payable from 23rd December, 1946, following the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration announced earlier in December, 1946.

Following the decision of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950, the Queensland Industrial Court, after an inquiry, granted an increase of 15s. a week to both adult males and adult females, operative from 7th December, 1950. The new male rate was identical with the Commonwealth basic wage for the Brisbane metropolitan area and the basic wage payable to adult females became approximately 66 per cent. of the male rate.

In January, 1953, because the Court was not satisfied that the fall in the "C" Series index for Brisbane for the December quarter, 1952 was a true representation of the economic position for Queensland as a whole, it declined to make any alteration to the then existing basic wage. However, quarterly adjustments were made for the next four quarters.

Following a Basic Wage Inquiry, the Court announced, on 11th June, 1954, that there would be no change in the basic wage rates declared for February, 1954. For the following four quarters the Court also decided not to vary the existing basic wage rates. However, after considering the "C" Series index number for the quarter ended 30th June, 1955, and its relation to the index number for the March quarter, 1955, the Court announced that, as these figures showed a continued upward trend, the basic wage for adult males should be increased from 1st August, 1955. In this judgment, the Court emphasized that it held itself free whether or not to adjust the basic wage upwards or downwards in accordance with movements in the "C" Series retail price index numbers. The Court examined the movement in these index numbers for each subsequent quarter and announced variations in the basic wage.

On 22nd and 23rd April, 1958, the Court heard an application by combined unions for an immediate increase of £1 in the basic wage, on the ground that a state of emergency existed with regard to the cost of living. On 30th May, 1958, the Court, in dismissing the application, stated that no emergency had been proved to exist and that there was no justification for discarding the "C" Series retail price index numbers.

In December, 1960, the Court determined that as from 1st May, 1961, the basic wage for adult females should be 75 per cent. of that for adult males.

In its basic wage declaration of 25th January, 1961, the Court referred to the opinion given by the Commonwealth Statistician that the "C" Series Retail Price Index had become an unreliable measure of retail price changes in recent quarters and to the fact that for current statistical purposes variations in retail prices were measured by the Consumer Price Index. Taking into consideration all relevant factors including the approximate increase in price levels as disclosed by the Consumer Price Index, the Court decided to increase the basic wage for adult males by 4s.

The Industrial Conciliation and Arbitration Act of 1961, which came into operation as from 2nd May, 1961, provided that all persons interested must be given an opportunity to be heard before any general declaration as to the basic wage can be made.

Following an inquiry, the Commission, in a decision issued on 24th May, 1961, increased the adult male basic wage by 4s. a week, which was approximately the amount of the increase indicated by the Consumer Price Index for March quarter, 1961.

Subsequently, employer organizations applied to the Commission for a declaration of a general ruling that "in future the basic wage for males and/or females shall not be reviewed merely by reason of any change in the Consumer Price Index at intervals of less than twelve months". The application was opposed by the trade unions generally. In a judgment delivered on 14th November, 1961, the Commission refused the employers' application.

As there was insufficient variation in the Consumer Price Index for the December quarter, 1961, no application was lodged with the Commission to vary the State basic wage for that quarter.

The rates payable in the Southern Division (Eastern District) from 29th May, 1961, were £14 4s. for adult males and £10 13s. for adult females.

In addition to the basic wage for the Southern Division (Eastern District), which includes Brisbane, adult males in other areas receive district allowances. As from 2nd February, 1959, the allowances have been:—Southern Division (Western District) 10s. 6d., Mackay Division 9s., Northern Division (Eastern District) 10s. 6d., Northern Division (Western District) £1 12s. 6d. The allowances for adult females are not less than 75 per cent. of those for adult males.

In the Appendix to *Labour Report* No. 48, a table was published showing adult male and female basic wage rates payable in the Southern Division (Eastern District) from 1st March, 1921, to 29th May, 1961.

(iv) *South Australia.* The Industrial Code, 1920–1958 provides that the Board of Industry shall after public inquiry declare the "living wages" to be paid to adult male and female employees. The Board has power also to fix different rates to be paid in defined areas.

The family unit was not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage is to be declared is a man with a wife and three children. However, the concept of a family unit has disappeared with the adoption of basic wage rates declared by the Commonwealth Conciliation and Arbitration Commission (*see below*).

The first declaration by the Board of Industry became operative from 4th August, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. a week. A table showing the living wages declared from time to time was published in Section XII. of the Appendix to *Labour Report* No. 48.

Following the "interim" increase in the "needs" basic wage of the Commonwealth Court of Conciliation and Arbitration announced on 13th December, 1946, the South Australian Government made a provision in the Economic Stability Act 1946 for the declaration by the Governor of a living wage based on the Commonwealth basic wage for Adelaide. This action was taken because the Board of Industry had made a determination on 5th September, 1946, and under the Industrial Code was not able to make a further determination for six months.

The Industrial Code Amendment Act, 1949 made provision for the quarterly adjustment of the living wage in accordance with the variations in the Commonwealth basic wage for Adelaide. In effect, this made the State living wage and the Commonwealth basic wage equal from the beginning of the first pay-period commencing in February, 1950. The prescribed adjustment to the female living wage was seven-twelfths of that made to the Commonwealth male basic wage. The Board of Industry retained power to amend the living wage, but any new living wage was to be adjusted quarterly as above.

Following the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry, the South Australian Industrial Code was amended to provide for declarations of the living wage by proclamation to prevent unjustifiable differences between the State and Commonwealth rates of wage. By proclamation dated 30th November, 1950, the South Australian living wage in the metropolitan area was made identical with the December, 1950, rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia. The female basic wage, which had been approximately 54 per cent. of the male basic wage, was increased to 75 per cent. of the corresponding male rate.

When the Commonwealth Court of Conciliation and Arbitration discontinued quarterly adjustments to Commonwealth basic wages in September, 1953, the South Australian living wage also ceased to be varied quarterly, and since that time has remained the same as the Commonwealth basic wage for Adelaide. Following the Commonwealth basic wage inquiries in 1956 and subsequent years, increases were made to the South Australian living wages by proclamation. The rates operative from 10th July, 1961, were £14 3s. for adult males and £10 12s. for adult females.

(v) *Western Australia.* The Industrial Arbitration Act 1912-1952 provides that the Court of Arbitration may determine and declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination shall be made within twelve months of the previous inquiry.

The term "basic wage" is defined in the Act as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies". In determining what is just and reasonable, the Court must take into account not only the "needs of an average worker", but also the "economic capacity of industry" and any other matters it deems relevant.

The Act provides that the Court of Arbitration may make adjustments to the basic wage each quarter, if the statement supplied by the State Government Statistician showing retail price index numbers and monetary equivalents in terms of the State basic wages indicates that there has been a variation of 1s. or more a week compared with the previous quarter. These adjustments generally apply from the dates of declaration by the Court.

The first declaration of the basic wage by the Court of Arbitration, after the authority to fix one was vested in the Court in 1925, operated from 1st July, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. Since that date the principal inquiries have been those of 1938, 1947, 1950 and 1951. A table showing declarations of the basic wage by the Court of Arbitration, operative from 1st July, 1926 to 30th October, 1961, will be found in Section XII. of the Appendix to *Labour Report* No. 48.

Following the judgment of the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage Inquiry, the Western Australian Court of Arbitration decided that the basic wage should be increased by £1 a week for adult males and by 15s. a week for adult females. As the result of a subsequent inquiry, the basic wage for adult females was increased from 1st December, 1951, to 65 per cent. of the corresponding male rate. This was subject to the condition that the increase in the basic wage should be offset by the reduction in, or deletion of, existing margins as specified by the appropriate award or determination.

Following the decision of the Commonwealth Court of Conciliation and Arbitration, in September, 1953, to discontinue quarterly adjustments to Commonwealth basic wages, the Western Australian Court of Arbitration exercised its discretionary power and declined to make any adjustments to the basic wage from November, 1953, to the June quarter, 1955.

However, from 9th August, 1955, the Court decided to increase the adult male basic wage by 5s. 11d. a week for Perth and to make corresponding increases for other areas. No further change was announced in the basic wage until January, 1956, and for each subsequent quarter the Court has varied the State basic wages after considering the official statement supplied by the State Government Statistician, except in February, 1959, and February, 1960, when no change was made.

In a decision issued on 30th January, 1960, the Court, acting in recognition of an agreement between representatives of unions and employers, increased the basic wage for adult females from 65 per cent. to 75 per cent. of the adult male rate. The increased rates were payable from the beginning of the first pay-period commencing on or after this date. As in December, 1951, female margins were to be reduced or deleted to offset the increase in the female basic wage.

The rates payable in the metropolitan area as from 30th October, 1961, were £14 18s. 9d. for adult males and £11 4s. 1d. for adult females.

(vi) *Tasmania*. A State basic wage is not declared in Tasmania. Under the Wages Board Act 1920–1951, Wages Boards are constituted for a number of industries, from representatives of employers and employees and an independent chairman (who is common to all Wages Boards), with power to determine the minimum rates of wage payable in each industry. Until February, 1956, these Boards generally adopted the basic wages of the Commonwealth Court of Conciliation and Arbitration in determining the rates of wage to be paid.

Wages Boards have power to adjust their wage rates in accordance with variations in the cost of living as indicated by retail price index numbers published by the Commonwealth Statistician. When the Commonwealth Court discontinued the system of automatic adjustments of the basic wage in September, 1953, the Chairman of the Wages Boards stated he was of the opinion that automatic adjustment clauses should be deleted from all Wages Boards determinations. Before Wages Boards met to consider this matter, the wage rates for all determinations were automatically adjusted upwards from the beginning of the first pay-period commencing in November. By early December, 1953, all Wages Boards had met and deleted the automatic adjustment clause from determinations and cancelled the adjustment increases payable from November.

Automatic quarterly adjustments in accordance with movements in retail price index numbers were re-introduced by Wages Boards in February, 1956, and restored the basic wage to the level it would have reached if quarterly adjustments had not been discontinued in 1953. A further basic wage increase was payable from the first pay-period in May, 1956.

Upon application by the Employers' Federation of Tasmania, a compulsory conference of employer and employee representatives was held on 22nd and 25th June, 1956, to consider the adoption of Commonwealth basic wages and the deletion of automatic quarterly adjustment provisions. At the conclusion of the conference, the Chairman of the Wages Boards stated he was of the opinion that the adjustments should be suspended for a period in an endeavour to achieve some measure of stability. However, he pointed out that any Wages Board was competent to adopt by agreement between the representatives of employers and employees or majority decision, the Commonwealth Court's basic wage or any other method of fixing the basic wage.

The majority of Wages Boards suspended automatic quarterly adjustments after the August, 1956 adjustment, and wage rates remained unchanged until July, 1959, when the Commonwealth rates were adopted. Following the decision of the Commonwealth Conciliation and Arbitration Commission in July, 1961, to increase the basic wage, Wages Boards met during July, and incorporated the new rates in their determinations. The rates for Hobart then became £14 14s. for adult males and £11 0s. 6d. for adult females. During January, 1961, Wages Boards adopted the basic wage for Hobart as the uniform rate applicable throughout the State.

(vii) *State Basic Wage Rates.* The "basic" wage rates of State industrial tribunals, operative in May, 1961, and May, 1962, are summarized in the following table.

STATE BASIC WAGES: WEEKLY RATES.

(a) Where dates are not quoted, wage rates operate from the beginning of the first pay-period commencing in the month shown. (b) Metropolitan rate applied to whole of New South Wales from November, 1961. (c) No basic wage declared. Rates shown are those adopted by most Wages Boards. (d) During June and July, 1959, Wages Boards varied determinations by adopting the Commonwealth basic wage rate. (e) During July and August, 1961, Wages Boards adopted the Commonwealth rate. (f) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and nearby areas, where a loading of 5s. a week is generally payable. (g) Wages Boards adopted the Commonwealth basic wage rate from July, 1959. (h) Most Wages Boards adopted the Commonwealth rate from July, 1961.

Tables showing State basic wage rates for a long period of years are contained in Section XII. of the Appendix to *Labour Report* No. 48, 1960.

## § 6. Wage Margins.

1. **General.**—Wage margins have been defined as “ minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are the skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance ”.\*

Prior to 1954, the Commonwealth Court of Conciliation and Arbitration had not made any general determination in respect of wage margins, but general principles of marginal rate fixation had been enunciated by the Court in the Engineers' Case of 1924, the Merchant Service Guild Case of 1942 and the Printing Trades Case of 1947.

2. **Metal Trades Case, 1954.**—Employee organizations parties to the Metal Trades Award, 1952, filed applications during 1953 for increased margins for all workers covered by this award. The applications came on for hearing before J. M. Galvin C.C., who decided that they raised matters of such importance that, in the public interest, they should be dealt with by the Commonwealth Court of Conciliation and Arbitration. On 16th September and 6th October, 1953, the Conciliation Commissioner, pursuant to section 14A of the Conciliation and Arbitration Act, referred these applications to the Court.

The actual claims of the trade unions were that the marginal rate of 52s. a week payable to a fitter in the metal trades should be increased to 80s. a week (86s. for certain electrical trades), with proportionate increases for other award occupations. The margins then current, with a few exceptions, had been in existence since 1947. The employees' claims were in the nature of a test case to determine the attitude of the Court to other applications for increased margins.

Employer organizations respondent to the Metal Trades Award counter-claimed that existing margins for skilled tradesmen should remain unaltered, while those paid to partly skilled or unskilled workers should be reduced.

The Court decided to take the Commissioner's two references together, and the matter came on for hearing before the Full Arbitration Court (Kelly C.J., Kirby, Dunphy and Morgan J.J.) in Melbourne on 13th October, 1953.

In a judgment delivered on 25th February, 1954, the Court held that a *prima facie* case had been made for a re-assessment of margins but that the economic situation at that time, particularly in regard to the level of costs, did not permit of such a comprehensive review. The Court decided that, to avoid the creation of new disputes, to save expense and to obviate procedural difficulties, it would not reject the claims but adjourn them until 9th November, 1954.

On 25th and 26th August, 1954, summonses were filed by the employees' organizations for orders that proceedings in this case be brought forward, and the hearing was resumed on 5th October, 1954.

In a judgment delivered on 5th November, 1954†, the Court made an order re-assessing the marginal structure in the Metal Trades Award by, in general, raising the current amount of the margin to two and a half times the amount of the margin that had been current in 1937. However, in cases in which the result of that calculation produced an amount less than the existing margin, the existing margin was to remain unaltered. In effect, this decision increased the margins of a fitter from 52s. a week to 75s. a week, increased similarly margins of other skilled occupations, and made no increase in margins of what may generally be described as the unskilled or only slightly skilled occupations under the Metal Trades Award.

At the end of its judgment, the Court stated that, while its decision in this case related immediately to one particular industry, it was expected to afford general guidance to all authorities operating under the Conciliation and Arbitration Act, or under other legislation which provided for tribunals having power to make references, or being subject to appeal, to the Court, where the wage or salary may properly be regarded as containing a margin. The Court added observations for the guidance of these and of other tribunals “ which may regard decisions of this Court as of persuasive authority ”. Further details were published in *Labour Report* No. 46, 1958, pages 101–8.

† *Commonwealth Arbitration Reports*

Vol. 80, p. 3.

3. Margins Cases, 1959.—On 25th August, 1959, the Commonwealth Conciliation and Arbitration Commission began considering a number of applications for changes in margins referred to it from the appropriate Commissioner. Applications had been made by various employee organizations for increased margins in Parts I. and II. of the Metal Trades Award, Part II. of the Aircraft Industry Award, the Bank Officials' Award and the Gold and Metalliferous Mining Award. An application by employers sought to reduce marginal rates in the Metal Trades Award. The Commission decided to hear all these matters together, permitting the applicant unions in respect of Part II. of the Metal Trades and Aircraft Industry Awards and the Bank Officials Award to ask first for an interim increase. A summary of the principal decisions and reasons for judgment of the Commission is given in the following paragraphs. Further details, including extracts from the judgment, were published in Official Year Book No. 47, pages 455-9.

*Metal Trades Award, Part I.* The employee organizations claimed an increase in the margin for the fitter, as set out in the Metal Trades Award, 1952 (i.e., the award as it existed prior to the Metal Trades Case, 1954—see para. 2, page 442), from 52s. to 134s. a week and an increase of 157 per cent. in the margins for other classifications. The employers counter-claimed for a reduction in margins of 15s. a week.

The Attorney-General of the Commonwealth intervened, and not only submitted statistical material and an analysis of the economic situation, but also assisted the Commission with an exposition of various factors proper to be taken into account in the fixation of margins. In particular, the Commonwealth emphasized the desirability of flexibility in the workings of the arbitration system.

Counsel for the unions put broadly a case that in the proper fixation of margins the basic criteria were the market value at the time of the fixation of the wage and the economic capacity of the economy to pay the wages claimed, and he alleged that the 1954 Metal Trades decision had departed from these principles. He produced to the Commission material to demonstrate that the economic situation would justify the increases asked for. He also submitted that the true relativities in the Metal Trades Award should be those created by a combination of the 1947 Full Court decision and the second variation order made in 1947 by G. A. Mooney, C.C.\*

The employers adopted the view that no case had been made out for any increase and that there should be wage reductions. They also supplied the Commission with economic material in support of their case that there was no capacity in the community to sustain increased margins, and alternatively that any increased economic capacity which may have occurred since 1954 had been exhausted by basic wage fixations. As to relativities, the employers submitted that the 1954 decision should be adhered to and should be carried to its logical conclusion in so far as the lower paid classifications were concerned.

In its judgment, delivered on 27th November, 1959, the Commission rejected the employers' application to reduce margins, and made an order re-assessing the marginal structure in the Metal Trades Award by increasing the existing margins by 28 per cent., the amount of the increase being taken to the nearest 6d. The new margins applied from the beginning of the first full pay-period commencing in December, 1959. The effect of this decision was to increase the margin of the fitter from 75s. to 96s. a week and that for the process worker from 22s. to 28s.

The Commission stated that, not having before it the question of work values, and having decided not to alter the 1954 relativities, the increases had been expressed as a percentage of current margins, but this was not to be taken as an endorsement of that method of fixing margins.

In discussing the principles of marginal fixation, the Commission stated that there was no real reason why a margin should be expressed as a percentage of the basic wage, and that it would be unwise to express any margin in that way. On the related question of whether margins should be increased merely because of the decreasing power of money since last fixed, the Commissioner's view was that, although the automatic or mathematical approach should be rejected, some account must be taken, whenever a margin is under review, of the amount at which the margin was originally fixed and of any decrease in the purchasing power of money since the time of fixation.

---

\* *Commonwealth Arbitration Reports*, Vol. 59, p. 1272.

On the question of economic capacity the Commission said that prior to 1947 it had been the practice, in the metal trades industry at least, to consider the economic situation of the industry itself, but in 1954 the Court considered only the capacity of industry generally. However, the Commission pointed out that in many cases in the past, margins had been fixed without consideration of capacity, and it could see no reason why in appropriate circumstances that practice should not continue.

The submission by the employers that, even if there had been capacity to pay increased wages, that capacity had been exhausted by basic wage decisions in recent years, was rejected by the Commission.

The unions sought to have restored the relativities within the marginal structure of the Metal Trades Award which existed prior to the 1954 decision. The employers not only relied on the relativities created in 1937 and confirmed in 1954, except as to the lower paid classifications, but also asked the Commission to take the 1954 relativities to their logical conclusion in its decision in this matter as far as those classifications were concerned.

The Commission said that in origin, at least, relativities in margins were merely an expression of relative work values and there was no evidence of such values before the Commission. In the circumstances the Commission was not prepared to accede either to the unions' submissions or to the employers' submission in this regard, and it accepted the relativities established by the 1954 decision except to the extent necessary to round some of the figures off. The question of relativities in margins in the Metal Trades Award, based on work value, thus remained open.

During the proceedings the unions presented some evidence as to over-award payments in the industry. The Commission referred to the question whether it should pay regard to payments obtained by duress, and decided that the means by which over-award payments of sufficient duration were obtained was irrelevant when considering economic capacity. The mere fact that such amounts were being paid and had been paid over a considerable period was sufficient to demonstrate capacity.

The Commission could not arrive at any figure which could be said to be a reliable average over-award payment for any classification. The most it could say was that in the Metal Trades industry there were over-award payments of varying amounts in quite a number of establishments, and it had taken this factor, indefinite though it was, into account in arriving at its decision.

In reviewing the economic situation, the Commission considered the current position in the light of information which had become available since the 1959 Basic Wage Judgment. After considering various indicators of the state of the economy, the Commission discussed the problems of inflation and the maintenance of economic stability. The Commission said that it had looked at the increases which it proposed to grant in the light of the submissions about economic stability and it did not consider that such increases were so likely to affect that stability that the economy would be adversely affected. If marginal increases could not be granted in times of economic prosperity, it was difficult to imagine when they could be granted.

Summing up, the Commission stated:—"We have considered, with the qualifications already mentioned in this Judgment, the decrease in the purchasing power of money which has occurred since the 1954 marginal fixation, we have assessed as well as we are able to the increased capacity which has occurred in the Australian economy since that time and the fact that productivity has played its part in that increase of strength, and we have considered the Basic Wage decisions and appraisals of the economy by the Court and the Commission since 1954. In the result we have thought it proper to increase margins in the Metal Trades industry in the particular circumstances which confront us by an amount which exceeds the loss in purchasing power of the 1954 margins, which excess we consider has been earned by the contribution of the employees to productivity increases and made possible by the additional strength of the national economy."\*

*Gold and Metalliferous Mining Award.* Judgment was also delivered on 27th November, 1959, in connexion with the application for variation of margins in this award.† The margin for the miner was increased from 32s. to 42s. 6d. a week from the beginning of the first full pay-period commencing in December, 1959. Marginal claims for other classifications were referred back to the appropriate Commissioner for consideration.

\* Print No. A7072, p. 20.

† *Ibid.*, p. 22.

*Metal Trades Award, Part II. and Aircraft Industry Award, Part II.* On 11th December, 1959, the Commission delivered a judgment granting a 20 per cent. interim increase in margins to graduate and diplomat engineers and scientists, payable as from the beginning of the first full pay-period commencing in December, 1959.

*Bank Officials' Award.* On 11th December, 1959, a 20 per cent. interim increase in margins was granted to officers in the 10th to 18th year of service inclusive and to accountants and managers, payable retrospectively as from 11th June, 1959. Interim increases were not awarded to more junior officers, nor to females. Subsequently the parties to the Bank Officials' Award met before a single Commissioner, and a consent award was made giving final marginal increases to adult males and adult females and making adjustments to junior rates of pay.

### § 7. Leave.

1. *Annual Leave.*—In the judgment given in the Commercial Printing Case of 1936, *Dettridge C.J.*, in granting one week's annual leave with full pay to employees in the industry, said:—"This Court has frequently been asked to award annual leave on full pay but has hitherto not done so except in cases where employees have to work on Sunday, or suffer some other deprivation by reason of isolation or other cause, or in cases where such leave has become the custom generally by the practice of most of the parties concerned."\* This judgment has usually been regarded as the first statement of the principles involved in deciding whether or not annual leave should be awarded.

In 1940, *Beeby C.J.*, awarded annual leave of one week to the manufacturing section of the metal trades industry, and in the same year *O'Mara J.* extended leave throughout the industry, with the exception of that section engaged in the servicing of motor vehicles.

Annual leave in the Commonwealth jurisdiction was introduced over a period of time, industry by industry, when and if the Judge responsible for the industry considered it proper.

The question of annual leave was again before the Court in 1945.† In that case applications had been made seeking variations of awards to prescribe an extension of annual leave from a period of seven days to fourteen days. The court in its judgment set out what it considered to be the principles to be applied in all applications for an extension of the annual leave period to fourteen days. The question of altering any particular award to prescribe for two weeks' annual leave was left to the discretion of the single Judge who heard the application.

Employees in New South Wales in private industry, other than those covered by Federal awards, were granted three weeks' annual leave by provisions of the Annual Holidays Act, 1944–1958. Generally, employees of Government authorities (Commonwealth, State, Local and Semi-Government), with the exception of State and Local Government employees in Western Australia, are entitled to three weeks' annual leave, as are also many salaried employees and wage earners in certain industries. The majority of the remaining employees in Australia receive two weeks' annual leave.

2. *Three Weeks' Annual Leave Inquiry, 1960.*—Unions respondent to the Metal Trades Award applied to the Commonwealth Conciliation and Arbitration Commission on 18th July, 1960, to vary the Award to provide three weeks' paid annual leave instead of two weeks. In a judgment issued by the Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and E. A. Chambers (Senior Commissioner), on 14th December, 1960, the application was refused.‡

At the beginning of proceedings it had been stated by counsel for the unions that the matter was regarded as providing a standard of three weeks' annual leave for all Federal awards, and it was treated accordingly by the Commission. The application was opposed by employers, the State of Victoria and the Electricity Trust of South Australia. The State of Tasmania supported the application. The Commonwealth Government and the State of Queensland neither supported nor opposed the application, although the Commonwealth

\* *Commonwealth Arbitration Reports*, Vol. 36, p. 738. † 55 C.A.R., p. 595. ‡ Print No. A7746, p. 2.

tendered statistical and economic information for the benefit of the Commission and the parties. The Commission stated that it did not disagree with the concept of increased leisure, nor did it think that, at that time, leisure was at a maximum. The issue for decision was whether that was the time to increase it for employees under Federal awards.

Counsel for the unions contended that serious anomalies existed because awards of the Commission lagged behind standards of annual leisure increasingly adopted in other jurisdictions, notably in New South Wales, where the Annual Holidays Act of 1958 had, with effect from the beginning of 1959, extended three weeks' annual leave to employees covered by that legislation. He held that judgments of the previously existing Arbitration Court had shown an eagerness to avoid industrial anomalies, and that the onus lay on employers to show a lack of economic capacity once anomalies as to leisure were established.

Evidence was submitted on the incidence of three weeks' annual leave among members of the Federated Ironworkers' Association of Australia, and similar material was supplied by other unions. Although precise information was not available, it was claimed that 40 to 50 per cent. of all workers were in receipt of three weeks' annual leave. Analysis of this information showed that employees of Government and Government instrumentalities and employees in the State of New South Wales were principally responsible for this high figure.

Thus anomalies arose mainly because of two factors: the first being the operation of the Annual Holidays Act, 1944-1958 in New South Wales, and the second because generally employees of Governments and Local Government and Government instrumentalities throughout the Commonwealth get three weeks' annual leave. The Commission considered it was obvious that dissatisfaction would exist in an establishment covered by both Federal and New South Wales State awards whereby these awards provided for their respective groups of employees annual holidays of different duration.

Although it was of significance to the Commission that dissatisfaction would exist in New South Wales among Federal award workers receiving two weeks' annual leave, the Commission was a Federal body with responsibilities throughout the Commonwealth, and, although it could not ignore the New South Wales legislation, it did not feel impelled, in using its powers, to follow it.

The amount of annual leave enjoyed by public servants had been different for many years, and at present few employees of the Commonwealth either in the public service or elsewhere received less than three weeks' annual leave. However, employment in the public service had never been regarded as setting standards in industry generally. The Commission considered that, since in a federal system differences almost certainly will exist through the use by State legislatures and industrial tribunals of their industrial powers, too much emphasis could be placed on anomalies.

This attitude was consistent with that section of the Conciliation and Arbitration Act which enjoined the Commission "so far as possible, and so far as the Commission thinks proper" to provide uniformity throughout an industry in relation to hours of work, holidays and general conditions, upon which counsel for the unions had relied.

In considering the history of annual leave, various cases involving decisions by the Arbitration Court had been cited. In the forty hours case, upon which much reliance had been placed by counsel for the unions, the Court was pressed by the Commonwealth Government and the Governments of New South Wales, Victoria, Queensland and Tasmania to award a forty-hour week, and that fact had weighed heavily. In the present case, only the Tasmanian Government supported the application, and the Governments of some other States had not appeared. Assuming that the attitudes of Governments were a matter of significance in this case, those attitudes expressed did not help either the applicants or the employers, and in particular the Commonwealth Government's attitude could not be said to be in support of the application as was contended by the unions, any more than it could be said to have opposed the application.

The Commission said that this review of cases was of little assistance to it. It rejected the submission that from them could be found a principle that once desirability for increased leisure was established, the onus moves to employers to demonstrate lack of capacity to pay for this increased leisure. In these cases, principles for general application had not been laid down.

In dealing with the state of the economy, counsel for the unions stated that productivity had increased by about 2 per cent. per annum between 1946-47 and 1959-60, that wages had by no means absorbed this productivity increase, and that in New South Wales the universal grant of three weeks' annual leave had not adversely affected the economy of that State.

Evidence given on behalf of employers, covering the sheep and cattle industries, had provided the view that, if the application succeeded, direct and indirect labour costs would increase, thereby producing an adverse effect on the industries, which would be harmful to the whole economy. Counsel for the employers submitted that at the end of September there was a strong demand for labour. Surveys of overtime taken from time to time in 1960 disclosed that in about 2,400 factories covered, the average weekly hours of overtime per person working overtime were 7.8 and per employee in the survey 2.7. The probability was that any extension in annual leave would result in more overtime being worked rather than more leisure being achieved by employees. In addition, the need in future to find employment for school leavers increasing in numbers with the expansion of population would require an expansion in the economy. This could only be assured by selling more exports to obtain the imports needed in such an expansion. Any extension of annual leave would result in additional costs which would adversely affect export earnings.

He also referred to the position of the balance of international payments and pointed out that this was the third successive year in which reserves had fallen, and that this fall would continue in the current year. Terms of trade had become progressively adverse over the previous ten years, and although they showed some improvement in 1959-60, the adverse trend was resumed in the first quarter of 1960-61.

Material from the International Labour Office was presented, showing the position in all industrial countries as far as yearly hours of work were concerned. The normal hours for an employee under the Metal Trades Award were 1,928 as compared with 1,984 in the United States of America and 2,152 in the United Kingdom. With regard to annual leave, most industrial countries had two weeks or less; the only relevant countries having more were the Scandinavian countries and France.

The Commission stated that, against the background of the attitudes and submissions discussed, its decision was that the application should be rejected. It repeated its belief that the existing amount of leisure was not at a maximum, but it also believed that the time was not appropriate for an increase in paid annual leave.

The Commission considered that Gross National Product was not suitable as a measure of productivity as it is itself increased by wage increases. It was inappropriate to use, as a basis to increase wages, figures which were themselves increased by the very decision made.

Two economic factors considered most significant were the export-import position and the state of employment. Imports were at a higher level than for some time and export earnings appeared to be decreasing. The wool industry was a major factor in the exports position, and in the light of increasing imports, the combination of lower prices for, and lower production of, wool presented Australia with a difficult problem. The industry was suffering a price-cost squeeze which the Commission hesitated to aggravate. While it appreciated that an increase in holidays would not of itself increase prices, experience showed that, even if the application were granted for secondary industries alone, at least some of the resultant increased costs would be passed on in increased prices. In addition, international reserves were likely to fall some £200 million and this emphasized the need for increased production, making more difficult a decision to increase leisure.

At a time when there was a shortage of skilled labour and such extensive use of overtime, it appeared wrong to attempt to increase periods of paid leisure for those employed under Federal awards. The ideal background to the granting of additional paid leave would be that there was enough labour to go round. It appeared that an attempt to increase holidays by 50 per cent. would result in a situation in which it was agreed that production should be maintained or increased, not in increased leisure, but only in increased overtime and thus increased total pay envelopes. It was not the function of the Commission to grant an application for increased leisure when it considered that it would accomplish no such purpose but would merely provide additional pay.

The Commission emphasized that its decision to dismiss the application was not intended to apply to a situation where, for special reasons related to a particular award or industry, it may consider an amount of annual leave greater than two weeks to be justified. (A summary of the unions' claims and of the Commission's judgment in the Three Weeks' Annual leave Inquiry 1962 will be found in the Appendix.)

3. **Long Service Leave.**—(i) *General.* Paid long service leave, i.e., leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of industrial legislation in the several States. A brief summary is given in the following paragraphs. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer.

(ii) *New South Wales.* Long service leave was first introduced for the majority of workers by the Industrial Arbitration Act, 1951, which provided such leave for workers under State awards. This Act was replaced by the Long Service Leave Act, 1955, which extended the benefits to any worker within the State. Leave provided for is three months for twenty years' continuous service with the same employer.

(iii) *Victoria.* The Factories and Shops (Long Service Leave) Act 1953 first provided for long service leave for workers in Victoria, the provisions of this Act being subsequently incorporated in the Labour and Industry Act. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

(iv) *Queensland.* In 1952, the Industrial Conciliation and Arbitration Act was amended to include long service leave provisions for employees within the jurisdiction of the Industrial Court, and the Act was amended again in 1955 to extend these provisions to any employee in respect of whose employment there was not in force an award or industrial agreement under the Act and to seasonal workers in sugar mills and meat works. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer.

(v) *South Australia.* The Long Service Leave Act, which was passed in 1957, exempts a large number of industrial agreements, with wide industrial coverage, specifying long service leave for employees. For those covered by the Act, leave provided for is seven days in the eighth and in each subsequent year of continuous service. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions under the Act.

(vi) *Western Australia.* The Long Service Leave Act was passed in 1958, but it does not apply to employees whose conditions of work are regulated under the Western Australian Industrial Arbitration Act. The Court of Arbitration of Western Australia, in an order dated 1st April, 1958, incorporated in most of the awards and agreements within its jurisdiction provisions similar to those in the Long Service Leave Act. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

(vii) *Tasmania.* The Long Service Leave Act, which was passed in 1956, provides for thirteen weeks leave for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act. Provisions for long service leave for casual waterside workers are contained in the Stevedoring Industry Long Service Leave Act 1960. This Act has been superseded by the (Commonwealth) Stevedoring Industry Act 1961 (*see below*).

(viii) *Commonwealth.* The applicability of long service leave provisions under State law to workers under federal awards has been tested before the High Court and the Privy Council and such provisions have been held to be valid.

The Commonwealth Conciliation and Arbitration Commission can include provisions for long service leave in its awards, and, if it does so, they will take precedence over State law in accordance with the terms of such provisions expressed in individual awards. However, the Commission has generally declined to include such provisions. The Commission's position was set out in its decision, issued on 16th September, 1959, regarding disputes on the inclusion, in the Graphic Arts (Interim) Award 1957, of provisions for long service leave. It stated that it should refrain, until further order, from determining the disputes so far as they concerned long service leave, and that if, in future, the Commission decided that long service leave on a national basis was desirable, it was open to proceed to the making of an award on the matter.

The Stevedoring Industry Act 1961, which came into operation on 6th June, 1961, included provisions granting long service leave to persons who have been continuously registered as waterside workers under Commonwealth stevedoring legislation. Leave provided for is thirteen weeks after the completion of twenty years' qualifying service, and six and a half weeks for each subsequent ten years' qualifying service.

## E. EMPLOYMENT AND UNEMPLOYMENT.

## § 1. Employment.

1. **Total Occupied Persons.**—(i) *General.* The total number of occupied persons in Australia is obtained from the results of each population Census, supplemented by data in respect of Australian defence personnel serving outside Australia, who, in accordance with usual Census procedure, are not recorded in the Census. The figures shown below in sub-para. (ii) and (iii) are derived from the 1933, 1947 and 1954 Censuses, after making certain adjustments of which the more important are referred to in the notes to the tables or in the accompanying text (sub-para. (ii)). For this reason, and because of the distribution of information "not stated", these figures differ from the Census figures shown in Census publications. Figures available from the 1961 Census (without adjustment) are shown in the Appendix to this volume.

(ii) *Australia.* The figures in the table below are divided into three categories:—(a) defence forces; (b) all persons fully occupied as employers, or as self-employed in businesses or on farms; and (c) wage and salary earners fully employed, or occupied as casual, part-time, intermittent or seasonal workers. "Unemployed" persons (see explanation on page 454) are excluded.

All unpaid "helpers" in non-rural industry have been included with wage and salary earners. Male unpaid "helpers" in rural industry have been included with employers and self-employed persons, as it is considered that the majority of these are sons or other close relatives of farmers working in *de facto* partnership, or as learners with the farm owner. Unpaid female "helpers" on farms are fairly numerous. Generally they are occupied mainly in home duties, and, with all other women occupied in unpaid home duties, have been excluded from the category of occupied persons.

**TOTAL OCCUPIED PERSONS: AUSTRALIA, JUNE, 1933, 1947 AND 1954.**

(a) Includes those serving outside Australia. (b) Excludes approximately 10,300 males undergoing full-time National Service Training at the time of the Census. See also footnotes to previous table.

**2. Wage and Salary Earners in Civilian Employment.**—(i) *General.* Monthly estimates of the number of wage and salary earners in civilian employment (excluding employees in rural industry and female private domestics) are obtained from three main sources, namely, (a) monthly data as to persons employed in factories as shown at annual Factory Censuses; (b) current monthly returns from Government Bodies; and (c) current monthly Pay-roll Tax returns. There are also some other direct records of monthly employment (e.g., for hospitals).

These are supplemented by estimates of the number of employees outside the ambit of the Factory Census, returns from Government Bodies, and Pay-roll Tax returns. The numbers of factory employees for months subsequent to June, 1961, are estimated and are subject to revision when the Factory Censuses for 1961-62 and ensuing years are tabulated.

The estimates of wage and salary earners in this section are compiled on an establishment or enterprise basis, and therefore do not cover exactly the same area of industry as do the relevant industry tabulations of the General Censuses of 1947 and 1954, which are based on the returns of individual employees.

The purpose of these estimates of employment is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. Industry groups herein are not identical in coverage with Census groups.

Pay-roll Tax returns are lodged by all employers paying more than £200 a week in wages, other than certain Commonwealth Government authorities, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1961.

(ii) *Australia: Industrial Groups.* The following table shows total male and female wage and salary earners in civilian employment (excluding employees in rural industry, female private domestics, permanent defence forces and National Service trainees in camp) subdivided to show the extent of employment provided by Government authorities and by private employers respectively. Principal industrial groups shown in the table include both private employees and Government employees, if any. (Current figures are published in the *Monthly Bulletin of Employment Statistics, Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*). The manufacturing employment figures published in this table comprise (a) the series showing actual monthly employment in factories as recorded at successive annual Censuses of Factories to June, 1961 (see Chapter VI.), with interim estimates for subsequent months, and (b) estimates of the number of employees in industrial establishments outside the scope of the definition of a factory and persons employed by factory proprietors but engaged in selling and distribution, etc.

### WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT: INDUSTRIAL GROUPS, AUSTRALIA.

(EXCLUDING RURAL WAGE EARNERS, FEMALE PRIVATE DOMESTICS, PERSONNEL IN DEFENCE FORCES AND NATIONAL SERVICE TRAINEES IN CAMP.)

(a) Includes employees engaged in selling and distribution, etc., who are outside the scope of the factory employment figures as defined and published in Chapter VI. (b) Includes road transport; shipping and stevedoring; rail and air transport. (c) Includes forestry, fishing and trapping; law and order; religion and social welfare; other professional; amusement, sport and recreation. (d) Includes employees of Commonwealth, State, Local and Semi-Government authorities. See para. 3 (i) below.

A graph showing wage and salary earners in civilian employment in the main industrial groups appears on page 413.

(iii) *States.* Statistics of total employment of wage and salary earners (excluding rural wage earners, female private domestics and defence forces) since 1957 are shown for each State and Territory in the following table.

### WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT.

(iv) *Factories.* Actual monthly factory employment derived from the results of annual factory censuses is published in the *Bulletin Secondary Industries*, issued by this Bureau.

Additional tables regarding employment in factories may be found in Chapter VI.—Manufacturing Industry, of this Year Book.

3. *Government Employees.*—(i) *States and Territories.* The numbers of civilian employees of Commonwealth Government, State, Local and Semi-Government authorities in each State and Territory at June, 1961, are shown in the following table. These include all employees of government authorities on services such as railways, tramways, banks, post office, air transport, education, broadcasting, television, police, public works, factories and munitions establishments, migrant hostels, etc., as well as administrative employees, within Australia.

(a) Includes Semi-Government authorities. See explanation on previous page.

## § 2. Unemployment.

The total number of persons "unemployed" has been recorded only at the dates of the various Censuses. At Censuses prior to 1947, persons who were "unemployed" were requested to furnish particulars of the cause and duration of unemployment, but from 1947 onwards the inquiry was broadened to include all persons (usually engaged in industry, business, trade, profession or service) who were out of a job and "not at work" at the time of the Census for whatever reason, including any not normally associated with unemployment. Persons included covered (1) those unable to secure employment; (2) those temporarily laid off their jobs; and (3) those not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason. This change in the form of the questionnaire probably resulted in some variation in response. The following table sets out the number of persons recorded within these categories at the Censuses of 1933 to 1954. The percentage of "unemployed" at each date to all wage and salary earners, comprising those estimated to be in employment and those unemployed, is also shown. The proportions shown, however, must be regarded as approximate, since the figures for "unemployed" do not necessarily comprise wage and salary earners only. Figures available from the 1961 Census are shown in the Appendix to this volume.

## UNEMPLOYMENT (ALL CAUSES): AUSTRALIA, CENSUSES, 1933, 1947 AND 1954.

Date.	Wage and Salary Earners Unemployed. ('000.)			Proportion of Wage and Salary Earners Unemployed. (Per Cent.)		
	Males.	Females.	Persons.	Males.	Females.	Persons.
June, 1933(a) ..	405.4	75.8	481.2	25.4	14.5	22.7
June, 1947(b) ..	66.6	16.9	83.5	3.5	2.5	3.2
June, 1954(b) ..	41.0	14.0	55.0	1.8	1.9	1.8

(a) As recorded at the Census. In addition, there were considerable numbers of youths and young women of working ages who had never been employed at the time of the Census. (b) Persons in the work force who were "not at work" (see explanation above) at the time of the Census.

The following table shows the numbers of males and females "unemployed" or "not at work" classified according to cause of unemployment at the Censuses of 1933, 1947 and 1954. The change in the form of questionnaire after 1933 should be borne in mind.

## CAUSES OF UNEMPLOYMENT: AUSTRALIA, CENSUSES, 1933, 1947 AND 1954.

Year.	Unable to Secure Employment.	Temporarily Laid Off.	Illness.	Accident.	Industrial Dispute.	Other.	Total.
MALES.							
1933 ..	374,569	(a)	18,083	4,702	1,595	6,483	405,432

1933 ..	62,630	(a)	9,193	434	95	3,465	75,817
1947(b) ..	2,254	2,449	4,396	280	24	(c) 7,512	16,915
1954(b) ..	3,685	1,386	4,310	318	17	(c) 4,284	14,000

(a) Not available. (b) See note (b) to previous table. (c) The majority of these persons were resting between jobs or changing jobs.

Details of the number of persons receiving unemployment and sickness benefits and the payments made are shown in Chapter XVIII.—Welfare Services. Current figures are included in the *Monthly Bulletin of Employment Statistics*, *Quarterly Summary of Australian Statistics*, *Monthly Review of Business Statistics* and *Digest of Current Economic Statistics*.

### § 3. Commonwealth Employment Service.

Statutory warrant for the Commonwealth Employment Service (C.E.S.) is to be found in the Re-establishment and Employment Act 1945–1959 (sections 47 and 48). In brief, the main functions of the Service are to assist people seeking employment to obtain positions best suited to their training, experience, abilities and qualifications; and to assist employers seeking labour to obtain employees best suited to the demands of the employers' particular class of work.

The organization and functions of the C.E.S. conform to the provisions of the Employment Service Convention 1948 of the International Labour Organization, which was ratified by Australia in December, 1949. In addition, C.E.S. practices follow substantially the provisions of the I.L.O. Employment Service Recommendation, 1948.

The C.E.S. functions within the Employment Division of the Department of Labour and National Service, on a decentralized basis. The Central Office is in Melbourne and there is a Regional Office in the capital city of each State, with 137 District Employment Offices and Branch Offices in suburban and the larger provincial centres and 336 agents in the smaller country centres. The District Employment Offices and Branch Offices are distributed as follows: New South Wales, 53; Victoria, 36; Queensland, 19; South Australia, 11; Western Australia, 12; Tasmania, 4; Northern Territory, 1; Australian Capital Territory, 1.

The C.E.S. provides specialized facilities for young people, persons with physical and mental handicaps, ex-members of the defence forces, migrants, rural workers and persons with professional and technical qualifications. Vocational guidance is provided free of charge by a staff of qualified psychologists. It is available to any person, but is provided particularly for young people, ex-servicemen and the physically handicapped. In New South Wales the State Department of Labour and Industry offers a similar service, mainly to young people leaving school.

The C.E.S. has responsibilities in the administration of the unemployment and sickness benefits provided under the Social Services Act 1947–1962. All applicants for benefits must register at a District Employment Office or agency of the C.E.S., which is responsible for certifying whether or not suitable employment can be offered to them.

The C.E.S. is responsible for placing in employment migrant workers sponsored by the Commonwealth under the Commonwealth Nomination and similar schemes. This includes arranging for them to move to their initial employment and for their admission, if necessary, to Commonwealth migrant hostels. Assistance to obtain employment is provided to other migrants as required. From the inception of the various free and assisted schemes, including the Displaced Persons Scheme, to the end of December, 1961, about 210,500 British and European migrant workers had been placed in employment by the C.E.S. Since 1951, it has been responsible for recruiting Australian experts for oversea service under the Colombo Plan and the United Nations Expanded Programme of Technical Assistance. The principal spheres in which experts have been supplied are agriculture, education, engineering, geology, health and economic and scientific research and development.

In association with placement activities, regular surveys of the labour market are carried out, and detailed information is supplied to interested Commonwealth and State Government Departments and instrumentalities and to the public. Employers, employees and other interested persons are advised on labour availability and employment opportunities in various occupations and areas and on other matters concerning employment.

The service completed its fifteenth year of operation in May, 1961. During the year ended 31st December, 1961, there were 970,772 applicants who registered for employment, of whom 513,744 were referred to employers and 350,303 placed in employment. New vacancies notified numbered 457,409 and vacancies unfilled at the end of December, 1961, 24,284.

Prior to the setting up of the Commonwealth Employment Service, State Labour Exchange Organizations existed in several States, but they have been superseded. Details of the organization and administration of these exchanges were given in *Labour Report* No. 30, page 133.

#### § 4. Industrial Disputes.

1. **General.**—Detailed information regarding industrial disputes involving stoppage of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in Section XIII. of the Appendix to *Labour Report* No. 48, 1960.

Particulars of all disputes in progress during the year are included in the annual figures whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of "the number of disputes" and "workers involved" in disputes which commenced in any year and were still in progress during the following year are included in the figures for both years.

2. **Industrial Groups.**—The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1961, classified according to industrial groups. As from 1959, the industrial groups have been rearranged to conform, as nearly as may be, to the order adopted in other tables in this chapter. However, the figures for each industrial group shown are comparable with those published in issues of the Official Year Book prior to No. 46, 1960.

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes Communication; Finance and Property; Wholesale and Retail Trade; Public Authority (n.e.i.) and Community and Business Services.

A graph showing, for the years 1952 to 1961, the working days lost as a result of industrial disputes in the main industrial groups is shown on page 414.

3. **States and Territories.**—The following table gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1957 to 1961.

## INDUSTRIAL DISPUTES(a): STATES AND TERRITORIES.

State or Territory.	Year.	Number.	Workers Involved.			Working Days Lost.	Estimated Loss in Wages. (£)

	1961	815	288,526	11,831	300,357	606,811	2,723,781

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

4. Duration.—The following table gives particulars of industrial disputes during 1961 in the three groups "Coal Mining", "Stevedoring" and "Other Industries", classified according to duration. This dissection has been made because the pattern of the disputes in coal mining and stevedoring differs significantly from that in other industries.

## DURATION OF INDUSTRIAL DISPUTES(a): AUSTRALIA, 1961.

Duration.(b)	Coal Mining.	Steve-doring.	Other Indus-tries.	All Indus-tries.
NUMBER OF DISPUTES.				
1 day and less ..	160	118	208	486
2 days and more than 1 day ..	34	19	68	121
3 days and more than 2 days ..	24	7	57	88
Over 3 days and less than 1 week ..	5	5	40	50
1 week and less than 2 weeks ..	8	2	33	43
2 weeks and less than 4 weeks ..	4	..	15	19
4 weeks and less than 8 weeks ..	..	..	7	7
8 weeks and over ..	..	..	1	1
Total ..	235	151	429	815

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) One week equals five working days.

DURATION OF INDUSTRIAL DISPUTES(a): AUSTRALIA, 1961—*continued.*

Duration.(b)	Coal Mining.	Stevedoring.	Other Industries.	All Industries.
WORKERS INVOLVED(c).				
1 day and less .. .. .	20,955	46,831	128,486	196,272
2 days and more than 1 day .. .. .	12,091	11,538	32,955	56,584
3 days and more than 2 days .. .. .	5,811	537	9,694	16,042

2 weeks and less than 4 weeks .. .. .	11,254	..	50,241	61,495
4 weeks and less than 8 weeks .. .. .	..	..	115,576	115,576
8 weeks and over .. .. .	..	..	95,533	95,533
Total .. .. .	70,767	61,467	474,577	606,811

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) One week equals five working days. (c) Includes workers indirectly involved. See note (b) to table at top of p. 458.

5. Causes.—(i) *General.* In issues of the Official Year Book prior to No. 40, the causes of industrial disputes were classified in some detail for all industries combined. As from 1950, however; stoppages have been analysed in three separate groups, "Coal Mining", "Stevedoring" and "Other Industries".

Causes have been grouped under four main headings:—(1) Wages, Hours and Leave; (2) Physical Working Conditions and Managerial Policy; (3) Trade Unionism; (4) Other Causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave; minor questions regarding the claims to pay or leave by individual employees are included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, which term covers disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff and disputes arising from the computation of wages, leave, etc., in individual cases. The third group includes stoppages over employment of non-unionists, inter-union and intra-union disputes, disputes over recognition of union activities, and sympathy stoppages in support of employees in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g., political matters, and cases (occurring mainly in the coal mining industry) where the cause of the stoppage is not officially made known to the management.

(ii) *Industry Groups.* The following table shows particulars of industrial disputes for 1961 classified according to cause in three industry groups.

**CAUSES OF INDUSTRIAL DISPUTES(a): AUSTRALIA, 1961.**

Cause of Dispute.	Coal Mining.	Stevedoring.	Other Industries.	All Industries.

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. workers indirectly involved. See note (b) to table at top of page 458.

(b) Includes

## F. WORKERS' COMPENSATION LEGISLATION.

A conspectus of the principal provisions of Workers' Compensation Acts in force in Australia at 30th June, 1960, will be found in *Labour Report* No. 48, pages 157-65.

## G. LABOUR ORGANIZATIONS.

## § 1. Labour Organizations in Australia.

1. Registration.—(i) *Under Trade Union Acts.* In earlier issues of the Official Year Book (see No. 39, p. 448) reference was made to the registration of trade unions under the Trade Union Acts. In general, the available information is inadequate for statistical purposes.

(ii) *Under State Industrial Legislation.* Information with regard to registrations of employers' associations and trade unions under the various State Industrial Arbitration Acts will be found in earlier issues of the Official Year Book (see No. 39, p. 448).

(iii) *Under the (Commonwealth) Conciliation and Arbitration Act.* Under Part VIII. of the Conciliation and Arbitration Act 1904–1960, any association of employers in any industry who have, or any employer who has, employed, on an average taken per month, not less than 100 employees during the six months preceding application for registration, or any association of not less than 100 employees in any industry, may be registered. However, under the Public Service Arbitration Act, an association of less than 100 employees may be registered as an organization, provided that its members comprise at least three-fifths of all persons engaged in that industry in the Service. Such organizations are included in the figures shown below. Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. At the end of 1961, the number of employers' organizations registered under the provisions of the Conciliation and Arbitration Act was 64. The number of unions of employees registered at the end of 1961 was 154, with a membership of 1,529,315 representing 81 per cent. of the total membership of all trade unions in Australia.

2. Particulars regarding Trade Unions.—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organizations:—(a) the local independent; (b) the State; (c) the interstate; and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organization of interstate or federated unions vary greatly in character. In some unions, the State organizations are bound together under a system of unification with centralized control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes.

(ii) *Number and Membership.* Returns showing membership by States as at 31st December each year are obtained for all trade unions and employee organizations. The affairs of single organizations are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information. The following table shows the position at the end of each of the years 1959 to 1961.

## TRADE UNIONS: NUMBER AND MEMBERSHIP.

State or Territory.	Number of Separate Unions.			Number of Members.			Percentage Increase in Membership.(b)

(a) Without interstate duplication. See below. (b) On preceding year.

NOTE.—Minus sign (-) denotes decrease.

In the preceding table, under the heading "Number of Separate Unions", a union reporting members in a State is counted as one union within that State. The figures by States do not add to the Australian total (shown in the last line) because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for the years 1912 to 1960 will be found in Section XIV. of the Appendix to *Labour Report* No. 48.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members thereof in Australia at the end of each of the years 1959 to 1961.

The industrial groups have been rearranged to conform, as nearly as may be, to the order adopted in other tables in this chapter. However, the figures for each industrial group shown are comparable with those published in previous issues.

**TRADE UNIONS: INDUSTRIAL GROUPS, AUSTRALIA.**

Industrial Group.	1959.		1960.		1961.	
	No. of Unions. (a)	No. of Members.	No. of Unions. (a)	No. of Members.	No. of Unions. (a)	No. of Members.

<b>Total</b> . . . . .	<b>369</b>	<b>1,850,727</b>	<b>363</b>	<b>1,912,392</b>	<b>355</b>	<b>1,894,603</b>

(a) Without interstate duplication. See para. (ii) above. (b) Includes Communication Municipal, etc. (c) Includes Professional Services.

(iv) *Number of Members and Proportion of Wage and Salary Earners.* The following table shows the estimated percentages of wage and salary earners in employment who are members of trade unions. As current estimates of wage and salary earners in employment do not include employees engaged in rural industry or females in private domestic service, the percentages have been calculated on figures obtained by adding to the end of year estimates the number of employees in rural industry and females in private domestic service recorded at the Census of 30th June, 1954. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table must be regarded as approximations.

**TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND SALARY EARNERS, AUSTRALIA.**

Year.	Number of Members.			Proportion of Total Wage and Salary Earners. (Per cent.)		
	Males.	Females.	Persons.	Males.	Females.	Persons.
1957 . . . . .	1,463,985	346,169	1,810,154	65	42	59
1958 . . . . .	1,465,682	345,536	1,811,218	65	41	58
1959 . . . . .	1,494,669	356,058	1,850,727	65	41	58
1960 . . . . .	1,534,423	377,969	1,912,392	65	41	58
1961 . . . . .	1,521,900	372,703	1,894,603	65	41	59

(v) *Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated trade unions in 1961.

INTERSTATE OR FEDERATED TRADE UNIONS(a): AUSTRALIA, 1961.

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States.	
Number of Unions .. ..	13	8	21	32	66	140
„ „ Members .. ..	29,939	63,631	183,261	404,810	1,001,917	1,683,558

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory and/or in the Australian Capital Territory.

3. **Central Labour Organizations.**—Delegate organizations, consisting of representatives from a group of trade unions, have been established in each of the capital cities and in a number of industrial centres elsewhere. Their revenue is raised by means of a *per capita* tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council. In Western Australia, a unified system of organization extends over the industrial centres throughout the State. In this State, there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, with which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are generally independent bodies.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith in each State and Territory at the end of 1961.

CENTRAL LABOUR ORGANIZATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, 1961.

Particulars.	N.S.W.	Vic.	Q'land.	S. A.	W.A.	Tas.	N.T.	A.C.T.	Total
Number of Councils ..	12	9	12	6	10	5	..	1	55
Number of Unions and Branch Unions affiliated .. ..	335	278	178	155	411	117	..	24	1,500

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

A Central Labour Organization, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The A.C.T.U. consists of affiliated unions and affiliated Metropolitan and/or State Labour Councils and Provincial Councils. The Metropolitan or State Labour Council in each State is the State Branch of the A.C.T.U. and has the right to appoint one representative to act on the executive of the Council. In addition to the representatives of the State Branches of the A.C.T.U., six delegates are elected by and from Congress, one

from each of the following industry groups of unions:—Building, Food and Distributive Services, Manufacturing, Metal, Services, Transport. To this executive are added the four officers, namely, President, two Vice-Presidents and Secretary, who are elected by and from the Australian Congress of Trade Unions.

The ordinary meetings of Congress are held in each alternate year. Special meetings of Congress shall be held whenever deemed advisable by decisions of the executive, as approved by the majority of its branches, or by resolution of unions representing one-third of the total membership of the A.C.T.U.

The objectives of the A.C.T.U. are the socialization of industry, i.e., production, distribution and exchange, and the utilization of the resources of Australia for the benefit of the people—ensuring full employment, with rising standards of living, real security and full cultural opportunities for all. The methods to be adopted are:—the closer organization of the workers by the transformation of the Australian trade union movement from the craft to an industrial basis, by grouping of unions in their respective industries and by the amalgamation of unions with a view to the establishment of one union in each industry; the consolidation of the Australian Labour Movement, with the object of unified control, administration and action; the centralized control of industrial disputes; educational propaganda among unions; and political action to secure satisfactory working-class legislation.

The A.C.T.U. was the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference.

All the major unions are affiliated with the A.C.T.U., with the exception of the largest, the Australian Workers' Union, which is itself virtually a central organization of branches catering in the main for employees in rural and constructional pursuits.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

## § 2. International Labour Organization.

The International Labour Organization (I.L.O.) was established on 11th April, 1919, as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII. of the Treaty of Versailles and formed part of other treaties of peace. During the years between its establishment and the outbreak of the 1939–45 War, the I.L.O., with headquarters at Geneva, played a leading role in promoting the improvement of labour conditions throughout the world.

In 1940, in order to ensure that the I.L.O. should be able to continue to function freely, a working centre was established at Montreal, Canada. In 1946, the Organization became the first of the specialized agencies of the United Nations. Under the terms of agreement, the United Nations recognizes the I.L.O. as a specialized agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organization, social security and other aspects of social policy. The Organization has three basic parts. These are the International Labour Conference, its highest authority, which as a rule meets annually; the Governing Body, its executive council, which usually meets three times each year; and the International Labour Office, which provides the secretariat of the Organization. The Conference is composed of delegations from the Member States of the Organization. At the end of 1961, there were 101 Member States, each of which is entitled to be represented by four delegates—two government, one representing employers and one representing workers, together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty governments

and ten employers' and ten workers' representatives. Of the twenty government representatives, half are from the ten countries of major industrial importance and ten are elected by the remaining governments. These latter ten government representatives and the ten employers' and ten workers' titular delegates and the deputy members of the three groups are elected by their groups at the Conference every three years. Since the 1939-45 War, Australia has alternated as a member and deputy member of the government group, and is at present a deputy member. Particulars are given in *Labour Report* No. 48 of the proceedings of International Labour Conferences up to the 44th Session, held in Geneva in June, 1960. For details of I.L.O. conventions ratified by Australia see *Labour Report* Nos. 47 and 48.

## CHAPTER XIII.

## TRADE.

NOTE.—Values of Australian overseas trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, unless otherwise indicated.

Because of the limitations of space, the statistics in this chapter are in the main restricted to summarized form. For details of imports and exports, reference should be made to the annual bulletins on *Overseas Trade* (preliminary and final), *Australian Exports*, and *Imports Cleared for Home Consumption*. Current information on overseas trade is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, the *Monthly Bulletin of Overseas Trade Statistics*, and a preliminary monthly statement on *Australian Overseas Trade*. The *Australian Balance of Payments* (mimeograph statement) contains detailed information on this subject, and there are also the following additional mimeograph statements:—*Exports of Wool* (monthly), *Overseas Trade with Major Groups of Countries* (quarterly), *Trade of Australia with the United Kingdom* (half-yearly), *Trade of Australia with Eastern Countries* (annually), and *Monthly Index of Australian Export Prices*.

## § 1. Constitutional Powers.

By the Commonwealth of Australia Constitution Act, section 51 (i), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1st January, 1901. Other references to trade and commerce are contained in sections 87 to 95 of the Constitution (*see pp. 18–19*).

## § 2. Commonwealth Legislation affecting Overseas Trade.

1. *General*.—The principal Acts affecting overseas trade at present in force are: the Customs Act 1901–1960; Customs Tariff 1933–1961; Customs Tariff (Canadian Preference) 1960–1961; Customs Tariff (Dumping and Subsidies) Act 1961; Customs Tariff (New Zealand Preference) 1933–1961; Customs Tariff (Papua and New Guinea Preference) 1936–1959; Customs Tariff (Federation of Rhodesia and Nyasaland Preference) 1960–1961; Customs Tariff (Primage Duties) 1934–1958; Trading with the Enemy Act 1939–1957.

The Customs Act is the administrative Act under which the Department of Customs and Excise operates, while the Customs Tariffs provide the statutory authority for imposing the actual rates of duty operative from time to time.

2. *The Customs Tariff*.—(i) *General*. The first Commonwealth Customs Tariff was introduced by Resolution on 8th October, 1901, from which date uniform duties came into effect throughout Australia. The tariff has since been extensively amended. The Act at present in operation is the Customs Tariff 1933–1961.

The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to imports from certain countries of the British Commonwealth. Duties are also imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue, but in its protective character the tariff has an important influence on the Australian economy.

Australia has three classes of tariff—the British Preferential Tariff, the Intermediate Tariff and the General Tariff.

(ii) *British Preference*. British Preferential Tariff rates of duty apply to goods the produce or manufacture of the United Kingdom, provided that such goods comply with the laws and statutory regulations in force at the time affecting the grant of preference,

and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. For the purpose of the preferential tariff, the following goods are deemed by section 151A of the Customs Act 1901-1960 to be the produce or manufacture of the United Kingdom, provided the final process of their production or manufacture was performed in that country.

- (a) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes:—
  - (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia;
  - (ii) Imported unmanufactured raw materials;
  - (iii) Imported manufactured raw materials as determined by the Minister.
- (b) Goods of the factory or works cost of which not less than 75 per cent. is represented—
  - (i) by labour or material of the United Kingdom; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.
- (c) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works cost of which not less than 25 per cent. (or 50 per cent. if the Minister so determines) is represented—
  - (i) by labour or material of the United Kingdom; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.

With the exception of a relatively small number of commodities which carry special rates of duty, the British Preferential Tariff has also been extended, as a result of separate trade agreements, to Canada and New Zealand and by tariff legislation to the Territory of Papua and New Guinea, and the abovementioned preference conditions apply *mutatis mutandis* to each of those countries, except that in respect of New Zealand the percentage content of goods under clause (b) of the said conditions is 50 per cent. of New Zealand and Australian labour and materials or 75 per cent. of New Zealand and United Kingdom or of New Zealand, Australian and United Kingdom labour and materials. In relation to specified goods, the British Preferential Tariff also applies to Ceylon, Ghana, the Federation of Malaya, Singapore, the Federation of the West Indies, the Federation of Rhodesia and Nyasaland, and most of the British non-self-governing colonies, protectorates and trust territories.

(iii) *Intermediate Tariff.* The Intermediate Tariff has been a feature of the Australian Tariff for a considerable number of years, although its effective application dates only from 1st January, 1937, consequent upon the conclusion of trade agreements with Belgium, Czechoslovakia and France in 1936. The countries to which the Intermediate Tariff applies include those countries with which Australia has concluded trade agreements (including tariff negotiations pursuant to the General Agreement on Tariffs and Trade) and countries which accord Australia reciprocal most-favoured-nation tariff treatment by reason of agreements between those countries and the United Kingdom. The Intermediate Tariff has also been extended to some countries to which Australia has no formal obligation to accord most-favoured-nation treatment. The countries and the particular tariff items to which the Intermediate Tariff applies are specified by order made in pursuance of section 9A of the Customs Tariff 1933-1961.

(iv) *General Tariff.* The General Tariff applies to goods other than those to which the British Preferential Tariff or Intermediate Tariff or special rates under trade agreements apply.

3. *Primage Duties.*—In addition to the duties imposed by the Customs Tariff, *ad valorem* primage duties at rates of 4 per cent., 5 per cent. or 10 per cent. are charged on some goods according to the type of goods and origin thereof under the Customs Tariff (Primage Duties)

1934-1958. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos Islands, Christmas Island and the Territory of Papua and New Guinea are exempt from primage duty.

4. **Tariff Board.**—The Tariff Board Act 1921-1960 provides for the appointment of a Tariff Board consisting of eight members, two, but not more than three, of whom shall be officers of the Commonwealth Public Service. Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the Government on matters relating to the protection and encouragement of Australian industry and to the Customs and Excise Tariffs.

The Chairman of the Board has the duty of ensuring the efficient and orderly conduct of the business of the Board. Provision is made for the appointment of two Deputy Chairmen to whom the Chairman may delegate his powers, duties and functions under the Act.

The more important matters which the Minister of State for Trade shall refer to the Board for inquiry and report include:—the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; any proposal for the application of the British Preferential Tariff or the Intermediate Tariff to any part of the British Commonwealth or any foreign country; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Minister may refer the following matters to the Tariff Board for inquiry and report:—the general effect of the working of the Customs Tariff and the Excise Tariff: the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters:—the classification of goods in the Customs Tariff or Excise Tariff and any matter in connexion with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the Customs Tariff (Dumping and Subsidies) Act 1961.

Inquiries conducted by the Board relating to any revision of the Tariff, any proposal for a bounty, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff, shall be held in public, and evidence in such inquiries shall be taken in public on oath, unless any witness objects to giving any evidence in public which the Board is satisfied is of a confidential nature, when the Board may take such evidence in private. Evidence taken by the Board in connexion with any inquiry under the Customs Tariff (Dumping and Subsidies) Act 1961 shall be taken in public on oath.

During 1960, new legislation was introduced to enable temporary duties to be imposed in cases where urgent action is necessary to protect an Australian industry against imported goods. Under the amended Tariff Board Act, the Minister for Trade may request the Chairman of the Board to arrange for a Deputy Chairman to inquire into cases where urgent action may be necessary pending receipt and consideration of a full report by the Board. The Deputy Chairman's report must be submitted to the Minister within thirty days of the making of the request. Temporary duties recommended by a Deputy Chairman may be imposed, but can only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

5. **Anti-dumping Legislation.**—A Customs Tariff (Dumping and Subsidies) Act 1961 provides protection for Australian industry against various forms of unfair trading. Under this Act dumping duty can be imposed on goods that are sold to Australia at an export price which is less than the normal value of the goods, where this causes or threatens material injury to an Australian industry.

Dumping duty can be levied only after inquiry and report by the Tariff Board.

The four criteria covering normal value are as follows:—

- (i) Fair market value in the country of export;
- (ii) Price in the country of export to a third country;
- (iii) Fair market value in a third country;
- (iv) Cost of production, plus f.o.b. charges, plus selling costs and profit.

Special duties may be collected also if dumped or subsidized goods are imported to the detriment of the trade of a third country in the Australian market.

Countervailing duty can be levied on goods in respect of which any subsidy, bounty, reduction, or remission of freight or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods.

The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

The Act also provides for the collection of an emergency duty on goods which enter Australia under conditions which cause or threaten serious injury to Australian industries or industries in a third country whose exports enter Australia under preferential tariff. The amount of emergency duty payable is the equivalent of the difference between the landed duty paid cost of the goods and a reasonably competitive landed duty paid cost.

For information concerning the Customs Tariff (Industries Preservation) Act 1921–1957 reference should be made to Official Year Book No. 47, page 483.

**6. Trade Descriptions.**—The Commerce (Trade Descriptions) Act 1905–1950 gives power to require the application of a proper trade description on certain prescribed goods imported into or exported from the Commonwealth. Goods which must bear a prescribed trade description upon importation into Australia are specified in the Commerce (Imports) Regulations. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

**7. Import Controls.**—*Customs (Import Licensing) Regulations.* A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the Customs (Import Licensing) Regulations, being Statutory Rules 1939, No. 163, issued under the Customs Act 1901–1936.

Between 1939 and 1945, licensing controls on imports from both sterling and non-sterling sources were progressively intensified. With the end of the War, it was possible to relax the restrictions progressively, and by March, 1952, goods from the non-dollar area (excluding Japan for which special provisions applied until July, 1957) were virtually free from import licensing controls.

During the financial year 1951–52, following a fall in the price of wool and a large increase in the volume of imports, Australia incurred a substantial deficit in overall payments on current account. Oversea reserves fell rapidly in the latter part of 1951 and early 1952, endangering Australia's external financial position to such a degree that it was deemed necessary on 8th March, 1952, to apply the Customs (Import Licensing) Regulations to imports from all sources with the exception of goods originating in Papua, New Guinea and Norfolk Island.

The extension of the restrictions on 8th March, 1952, was made under the authority of these regulations, which had continued in force after the war. The regulations were subsequently replaced by new Customs (Import Licensing) Regulations made under the Customs Act 1901–1954 on 16th December, 1956. The new Regulations continued to provide, *inter alia*, that the importation of any goods (not being goods which are excepted from the application of the Regulations) is prohibited unless—

- (a) a licence under these Regulations to import the goods is in force; and
- (b) the conditions and restrictions (if any) to which the licence is subject are complied with.

The object of import licensing has been to limit the rate of imports to a ceiling figure, determined by the Government, in order that payments for imports do not involve an excessive drawing on Australia's overseas exchange reserves. To achieve the financial objectives of the controls, imports were divided into a number of categories to which special licensing treatment was accorded (largely by the establishment of quotas for individual importers within each category). In general, the nature of goods and their relative essentiality to the Australian economy were taken into account in determining the licensing rate for particular goods.

Since March, 1952, import restrictions have been relaxed or intensified broadly in line with changes in Australia's balance of payments position.

The import controls have been administered without discrimination as to country of origin, with the exception of those relating to imports from Japan and the Dollar Area. The special restrictions against Japanese imports were removed in July, 1957, and in recent years Australia progressively removed discrimination against imports from the Dollar Area. By January, 1960, approximately 95 per cent. of total imports were not subject to dollar discrimination.

In accordance with the principle of relaxing and removing controls in the light of developments in Australia's balance of payments position, large-scale licensing changes involving an almost complete abolition of controls were made as from 23rd February, 1960. As a result of these changes, some 90 per cent. of total imports were exempted from control. On 1st April, 1960, timber was also added to the exempt list, and following the exemption from control of motor vehicles of North American origin as from 1st October, 1960, there is now no discrimination as to country of origin in the administration of import controls.

The retention of control over a small field of trade does not imply any departure from the Government's policy of using the Customs Tariff and the Tariff Board machinery as the normal method of protecting economic and efficient Australian industries from import competition.

The administration of the import controls is the responsibility of the Department of Trade, although the actual issue of import licences is a function of the Department of Customs and Excise at the various ports of the Commonwealth.

**8. Export Controls.**—(i) *Commodity Control.* Section 112 of the Customs Act provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia, and that this power may be exercised by—(a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the Customs (Prohibited Exports) Regulations.

(ii) *Exchange—Banking Act 1959.* As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III. of the Banking (Foreign Exchange) Regulations, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV. of the *Banking Act 1959* to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds £A125, or where jewellery and other articles of high intrinsic worth either exceed £A1,000 in value or have not been the personal property of the passenger for at least twelve months.

**9. Trade Agreements.**—(i) *The United Kingdom.* The original United Kingdom and Australia Trade Agreement (Ottawa Agreement) was signed on 20th August, 1932. Under this agreement, Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities, and in return incurred obligations in respect of tariff levels and the grant of preference to United Kingdom goods.

A new Trade Agreement, designed to replace the original agreement and correct the unbalance in benefits which had emerged in the 25 years of its operation, came into effect on 9th November, 1956. Briefly, this agreement preserves security for Australian exports in the United Kingdom market, but lowers the obligatory margins of preference which Australia extends to the United Kingdom (*see also* page 475).

(ii) *Canada.* The existing agreement between Australia and Canada came into force on 30th June, 1960, replacing an agreement signed on 3rd August, 1931. The agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. With some exceptions, the agreement specifies that Canadian goods shall receive the benefit of the British Preferential Tariff upon importation into Australia. The agreement continues in force until either country gives six months notice of termination.

(iii) *New Zealand.* The existing trade agreement between Australia and New Zealand came into force on 1st December, 1933. The basis of the agreement is, generally, the mutual accord of British Preferential Tariff treatment. The exceptions to this general rule are listed in the schedules to the agreement.

(iv) *Federation of Rhodesia and Nyasaland.* During June, 1955, a trade agreement was negotiated with the Federation. Australia's principal undertaking was to grant an exclusive tariff preference to the Federation on unmanufactured tobacco, a concession formerly accorded only to Southern Rhodesia, under a trade agreement now terminated. The Federation accorded preferential tariff treatment on a wide range of Australian export products, including wheat and powdered and condensed milk.

(v) *Federation of Malaya.* A trade agreement with the Federation was signed on 26th August, 1958, and came into force immediately. The agreement gives an assurance that Australia's traditional flour trade will be protected from subsidized or dumped competition. An undertaking is given that any tariff preferences Malaya accords will be extended also to Australia. Australia guarantees free entry for natural rubber so long as the Papua-New Guinea crop is absorbed, and the Federation is assured that natural rubber would not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment.

(vi) *Japan.* An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6th July, 1957, in Japan. Formal ratification took place in Canberra on 4th December, 1957, following approval of the agreement by the Commonwealth Parliament and the Japanese Diet. It was provided that the Agreement would remain in force until 5th July, 1960, and thereafter unless prior notice of termination should be given by either Government.

Australia received certain specific undertakings. Japan agreed:—

- (a) To accord Australian wool the opportunity of competing in the global quota for wool for not less than 90 per cent. of the total foreign exchange allocation for wool each year, and not to restrict the total foreign exchange allocation for wool beyond the extent necessary to safeguard Japan's external financial position and balance of payments;
- (b) to take no action to vary the present level of duty on wool imports from Australia—initially for a period of three years from date of signature but subsequently extended;
- (c) to admit Australian wheat and barley on a competitive and non-discriminatory basis;
- (d) to accord Australian sugar the opportunity of competing for not less than 40 per cent. of the total foreign exchange allocation for sugar;
- (e) to include Australia as a permitted source of supply for beef tallow and cattle hides on the Automatic Approval (licensing) list;

- (f) to admit Australian dried skim milk on a competitive and non-discriminatory basis;
- (g) to make reasonable provision for the import of Australian dried vine fruits (raisins, currants and sultanas) in each year of the three-year period.

Since the Agreement was signed, Japanese imports of wool, tallow and dried fruits have been fully liberalized.

It was agreed that before the end of the initial three-year period of the agreement, the two Governments would explore the possibility of applying the General Agreement on Tariffs and Trade between the two countries. Following discussions on this and other aspects of the Agreement in October, 1960, and in October, 1961, operation of the Agreement was extended until September, 1962.

Provision exists for either country to suspend obligations under the agreement to the extent and for such time as may be necessary to prevent serious injury to domestic producers as a result of imports of like or directly competitive products from the other country.

The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges and import and export licensing. Japan will not be entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories.

(vii) *Federal Republic of Germany.* This agreement was signed in October, 1959, and was operative initially for the period July, 1959, to December, 1961. It has been agreed to extend the agreement for a further year to 31st December, 1962, but with provision for it to be reviewed during that year. Under the agreement, annual import quotas are provided for Australian wheat, coarse grains, frozen mutton and lamb, canned meat, fruits preserved in sugar, canned tropical fruit and wine.

The agreement also provides for Australia to be included in all global tenders for whole and skim milk powder, butter, cheese, frozen beef, apples, pears, canned fruits, jam and casein.

The Agreed Minute on the export of flour from the Federal Republic of Germany to certain traditional Australian flour markets was also signed in October, 1959. The Agreed Minute was valid initially for the two years 1960 and 1961, and as with the Trade Agreement has been extended to 1962, with the provision for it to be reviewed during that year.

(viii) *Indonesia.* This agreement came into operation on 1st July, 1959. It records the desirability of expanding trade between Australia and Indonesia. It also gives special recognition to the importance of the flour trade from Australia to Indonesia. Australia recognises the importance to Indonesia of its exports to Australia of tea and rubber.

(ix) *Other Countries.* Australia has entered into bilateral agreements with South Africa, Brazil, Czechoslovakia, France, Greece and Switzerland. Summaries of the texts of these agreements were given in earlier issues of the Official Year Book. In 1951, Australia entered into a trade agreement with Israel under which each country undertook to accord most-favoured-nation treatment to imports from the other. A similar agreement with Iceland was concluded in 1952.

(x) *The General Agreement on Tariffs and Trade (G.A.T.T.).* The General Agreement on Tariffs and Trade is an international trade agreement which has been in operation since 1st January, 1948. Australia is one of the original contracting parties to the General Agreement on Tariffs and Trade.

The objectives of the G.A.T.T. include the expansion of world trade and the raising of living standards throughout the world. Its members work towards these objectives by the reduction of tariffs and other barriers to trade, and by reduction of discrimination between countries through negotiations on a reciprocal and mutually advantageous basis. The essential features of the G.A.T.T. are the schedules of tariff concessions which its members

have agreed to apply in tariff negotiations with each other, the application of most-favoured-nation treatment among its members, the avoidance of trade discrimination, and a code of agreed commercial policy rules for fair international trading.

G.A.T.T. is at present being applied pursuant to the Protocol of Provisional Application under which its members apply the commercial policy rules (contained in Part II. of the Agreement) to the fullest extent consistent with legislation existing at the time of becoming members.

Five series of tariff negotiations have been conducted under the provisions of the General Agreement. As a result of these negotiations, Australia has obtained tariff concessions on almost all the principal products of which it is an actual or potential exporter to the individual countries concerned. These concessions were a result both of direct negotiation by Australia and of negotiations by other countries—in the latter case benefits occur through the operation under the Agreement of the most-favoured-nation principle.

In 1954–55, some of the provisions of the G.A.T.T. were revised. The revised G.A.T.T. contains tighter provisions on non-tariff barriers to trade. These barriers are in many respects most significant for some of the export items of interest to Australia. The revised G.A.T.T. also gives more freedom for countries like Australia to revise individual tariff items which had been “bound” against increase in tariff negotiations conducted under the G.A.T.T. In 1958, a Committee was set up to examine problems of expansion of trade in agricultural products and obstacles to the expansion of trade of underdeveloped countries.

There are at present (January, 1962) 40 Contracting Parties to the Agreement comprising most of the world's larger trading nations, and 8 further countries are seeking accession or have some provisional association with the G.A.T.T. The Contracting Parties periodically hold plenary sessions to deal with the questions arising out of the administration of the Agreement. The 18th Session was held in May, 1961, and the 19th Session in November/December, 1961. A permanent Council has been set up to deal with urgent business arising between sessions and to give preliminary consideration to work arising at the sessions.

### § 3. Imperial Preference in the United Kingdom.

1. **Preferential Tariff of the United Kingdom.**—A brief summary of the preferential tariff of the United Kingdom in the years prior to 1931 was published in Official Year Book No. 43, page 328.

By 1931, the United Kingdom had imposed duties on a fairly wide range of goods, provision being made in all cases for preferential treatment to Empire goods. The important preferences for Australia were those on sugar, dried fruit, wine, and jams and jellies. Even at this time, however, the United Kingdom adhered to the principles of free trade and by far the greater part of imports was free of duty.

In order to counteract the flood of dumping which followed the collapse of world trade in 1929–30, the United Kingdom introduced emergency tariff legislation in 1931. *Ad valorem* duties were imposed on almost all goods imported into the United Kingdom with the exception of certain raw materials, goods from Empire countries being exempt from these duties. These temporary measures were embodied in the Import Duties Act of March, 1932, by the enactment of which the United Kingdom finally abandoned free trade as a policy. This Act provided for the free entry for Empire goods pending the conclusion of some permanent agreement. The Ottawa Agreements Act of November, 1932, emerged from the Imperial Economic Conference held in Ottawa and embodied agreements concluded between the United Kingdom and the Dominions, Newfoundland and Southern Rhodesia. For the purpose of considering the present preferences enjoyed by Australia in the United Kingdom, it is expedient to regard the Import Duties Act and the Ottawa Agreements Act as complementary.

The Import Duties Act provided for the imposition of a general *ad valorem* duty of 10 per cent. on all imports with certain exceptions (i.e., those on the Free List and those already dutiable under previous enactments). Additional duties could be imposed and items on the Free List subjected to duty, and in fact the range of items subject to duties under this Act has been extended from time to time since its enactment.

The freedom of Empire goods from these duties was guaranteed under the Ottawa Agreements Act, which also provided for the imposition of new duties on imports from foreign, but not Empire, countries of a number of products of special interest to the Empire countries concerned. While free entry was guaranteed to Empire producers on a wide range of products, the margins of preference thereby applicable were not bound, and the duties could be varied up or down by the United Kingdom Government without the consent of Empire countries. On a selected range of items, however, which are specified in the schedules to the Ottawa Agreements Act, the duties could not be varied by the United Kingdom without the consent of the other party to the respective agreement.

Since 30th October, 1947, Canada and the United Kingdom have, by an exchange of letters, recognized the rights of their respective Governments to reduce or eliminate the preferences they accord one another without prior consultation or consent.

In 1947, the United Kingdom and Australia adhered to the General Agreement on Tariffs and Trade, which prohibits increases in tariff preferences by either country. This rule, as is the case with the other provisions of the General Agreement, may be waived by a two-thirds majority of the signatories to the agreement.

2. The Australia-United Kingdom Trade Agreement.—The provisions and history of the original Australia-United Kingdom Agreement (Ottawa Agreement) were published in Official Year Book No. 43, page 329.

The major provisions of the current agreement (operative since 9th November, 1956) which affect Australia's position in the United Kingdom market are as follows:—

- (a) Continued free entry for those Australian goods in which Australia has an active trade interest, and which were accorded free entry immediately prior to the new agreement.
- (b) A guaranteed minimum margin of preference in the United Kingdom Tariff on all items so treated in the previous agreement plus an extension of this guarantee to several items on which the margin of preference, although in force, was not bound to Australia. This latter group comprised currants, egg powder and egg pulp, jam, rice, tomato juice, pineapple juice and coconut oil. A selection of the items on which Australia receives a bound margin of preference and the extent of that preference is as follows (all values in sterling):—Butter (15s. a cwt.); cheese (15 per cent. *ad val.*); canned peaches, pears and apricots (12 per cent. *ad val.*); raisins (8s. 6d. a cwt.); eggs in shells (1s. to 1s. 9d. a great hundred (10 dozen)); milk powder (6s. a cwt.); sweetened condensed milk (5s. a cwt.); apples (4s. 6d. a cwt. in season); honey (5s. a cwt.); flour (10 per cent. *ad val.*); light wine (2s. a gallon); heavy wine (10s. a gallon at present duty rate).
- (c) All rights under the Ottawa Agreement in respect of meat are maintained.
- (d) Australia receives an assured wheat market of at least 750,000 tons f.a.q. wheat or flour equivalent annually. Any Australian high-protein wheat sold to the United Kingdom is not counted against this obligation.
- (e) There is provision for full consultation between the two Governments on such matters as agricultural production and marketing, transport and communication, the disposal of surpluses and restrictive business practices.
- (f) The agreement shall be the subject of re-negotiation between the two Governments during the fifth year of its operation. (By agreement between the two Governments this re-negotiation has been postponed to 1962.)

#### § 4. Trade Commissioner Service.

The stimulation of interest abroad in Australia's exports is an important Government activity in which the Australian Trade Commissioner Service plays a prominent part. The origin of the Service dates back to 1921, when the first Trade Commissioner was appointed to Shanghai. In the following year, a second Commissioner was appointed to Singapore. These appointments, however, were terminated shortly afterwards.

In 1929, a Trade Commissioner post was opened at Toronto. Wellington was opened five years later. The Trade Commissioners Act 1933 provided for the establishment of an Australian Government Trade Commissioner Service. In 1935, official trade representation was established at Batavia (now Djakarta), Shanghai and Tokyo. Cairo, New York and Calcutta posts were opened between 1937 and 1939 and the Singapore post was established in 1941.

After the War, the service increased steadily to take care of Australia's expanding export interests and the growing diversity of our export commodities. By December, 1961, there were 36 Trade Commissioner posts in 27 countries, new posts having been opened in Beirut (Lebanon), August, 1961, Lima (Peru), October, 1961, and Caracas (Venezuela), March, 1962. With the continuing need to take advantage of new markets the opening of additional posts is being considered.

In 1957, Australia's official commercial representation overseas was extended by the introduction of a system of Government Trade Correspondents. These men, who as a rule already reside in particular centres overseas, are engaged on a part-time basis to carry out market research, arrange introductions between buyer and seller, and generally promote Australia's trade interests in the same way as Trade Commissioners. Each Trade Correspondent operates under the general direction of the nearest Trade Commissioner and acts as a point of local contact for him.

The first two Australian Trade Correspondents were appointed in 1957 at Montevideo (Uruguay) and Nairobi (Kenya). In 1958, four more were appointed at Nadi (Fiji), now located at Suva, Honolulu, Mauritius and Mexico City. One additional appointment was made at Taiwan in 1960. Further limited expansion of this form of official commercial representation is contemplated. The Australian Trade Correspondent at Nairobi has been replaced by an Australian Government Trade Commissioner.

Trade Commissioners and, to a lesser extent, Trade Correspondents, are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organizations include the following:—

- (a) Surveys of market prospects;
- (b) Advice on selling and advertising methods;
- (c) Arranging introductions with buyers and agents;
- (d) Providing reports on the standing of overseas firms;
- (e) Advice and assistance to business visitors;
- (f) Helping to organize and carry through trade missions, trade displays, newspaper supplements and other promotion and publicity media;
- (g) Providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements and other factors affecting the entry and sale of goods.
- (h) Helping to attract desirable investment.

In some countries, Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission (the Federation of West Indies, Hong Kong, the Federation of Rhodesia and Nyasaland, Lebanon, Peru and Venezuela), he is called upon to act as the Australian representative.

Trade Commissioners usually enter the Service from either the commercial world or the public service, and applications for entry into the Service are called for periodically by public advertisement. In the more important posts, it is the practice for the Trade Commissioner to share his duties with an Assistant Trade Commissioner, who is selected to be trained in the Service and qualify at a later stage for appointment as a Trade Commissioner.

These staffing arrangements are designed to enable the Government to draw upon experienced and able executives in both private enterprise and the public service, and at the same time to build up a body of competent personnel to carry out a policy of vigorous expansion in the field of oversea trade.

The Trade Commissioner Service is administered by the Commonwealth Department of Trade (as distinct from the diplomatic and consular services, administered by the Department of External Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (*Commercial Counsellor, Commercial Secretary or Commercial Attaché*).

The oversea trade representation is shown in Chapter XXX.—Miscellaneous.

### § 5. Export Payments Insurance Corporation.

The Export Payments Insurance Corporation Act No. 32 of 1956, established the Corporation with the objective of protecting Australian exporters against risks of loss arising from non-payment of their oversea accounts.

The Corporation is charged to be self-supporting, that is, over a period it is to operate at neither a profit nor a loss. It operates on principles similar to those of any other form of insurance, in as much as in return for payment of a premium the exporter can claim on the Corporation in the event of non-payment by his buyer for any of the reasons set out in his policy. There is no overlap with normal insurance facilities, since the Corporation does not cover risks which can normally be insured with commercial insurers.

The main risks of loss against which the Corporation insures are the "commercial" risks of the insolvency or protracted default of the buyer and "political" risks. The latter include exchange transfer delays; the imposition of Government regulations which prevent the import of goods into the buyer's country; war or revolution in the buyer's country; and generally any other cause not being within the control of the exporter or the buyer, and which arises from events occurring outside Australia. Prior to December, 1959, the Corporation could extend cover only to 85 per cent. for all types of risks insured. From that time, however, cover on the "political" risks was increased to a maximum of 90 per cent. for the amount of loss in the pre-shipment period and a maximum of 95 per cent. in the post-shipment period. The cover for "commercial" risks remains at 85 per cent.

The initial capital of the Corporation was £500,000 and the maximum liability limit of the Corporation was £25,000,000. In April, 1959, these limits were doubled to £1,000,000 and £50,000,000 respectively to enable the Corporation to meet fully the demands of the Australian exporters for this facility.

The Corporation itself does not provide finance for exporters, but the stated policy of the trading banks is that E.P.I.C. guarantees considerably reduce the risks involved in the export trade, and this can assist the exporter in obtaining such finance as he requires.

Since the first policy was issued in September, 1957, Australian exporters have made increasing use of the facilities of the Corporation. On 31st December, 1961, the Corporation had 249 policies current to the value of over £30,000,000—compared with 159 policies current to the value of £22,500,000 on 31st December, 1960. The Corporation has issued policies covering exports to over 120 countries, and has insured a wide range of Australian exports.

A Consultative Council of leading figures in the fields of insurance, commerce and industry has been appointed to advise the Corporation on its activities.

### § 6. Method of Recording Imports and Exports.

1. *Source of Statistics.*—Oversea trade statistics are compiled from documents obtained under the Customs Act 1901–1960 and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. Certain items are excluded for which customs entries are not required. See para. 7 (viii) Balance of Payments, page 483.

2. **Customs Area.**—The area to which all overseas trade statistics issued by this Bureau apply is the whole area of the Commonwealth of Australia. Non-contiguous territories are treated as outside countries and trade transactions between Australia and these non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

3. **The Trade System.**—There are two generally accepted systems of recording overseas trade statistics, namely, (a) special trade and (b) general trade. Statistics of both are published by the Bureau, although greater emphasis is placed on general trade. The Statistical Office of the United Nations defines the two systems as follows.

- (a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported.)
- (b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

The tables which follow refer to general trade, except for those appearing in § 17, para. 2, which refer to imports cleared for home consumption.

4. **Statistical Classification of Imports and Exports.**—Statistics of overseas imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to the revised classification which came into operation on 1st July, 1945. This classification is designed to allow for the inclusion of items which become significant with varying trade conditions, and in 1960–61 provided for over 2,500 import items and over 1,200 export items.

5. **The Trade Year.**—From 1st July, 1914, the statistics relating to overseas trade have been shown according to the financial year (July to June). Prior to that date, the figures related to the calendar year. A table is included in § 18 showing the total value of imports and exports in the calendar years 1957 to 1961 inclusive.

6. **Valuation.**—(i) *Imports.* The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged *ad valorem*.

Section 154 (1) of the Customs Act 1901–1960 provides that “ when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or  
 (ii) the current domestic value of the goods, whichever is the higher; and  
 (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export ”.

“ Current domestic value ” is defined as “ the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country ”. All import values shown throughout this and other chapters of this issue of the Official Year Book are therefore “ transaction value (f.o.b.) ” or “ domestic value (f.o.b.) ”, whichever is the higher. These values are f.o.b. port of shipment Australian currency.

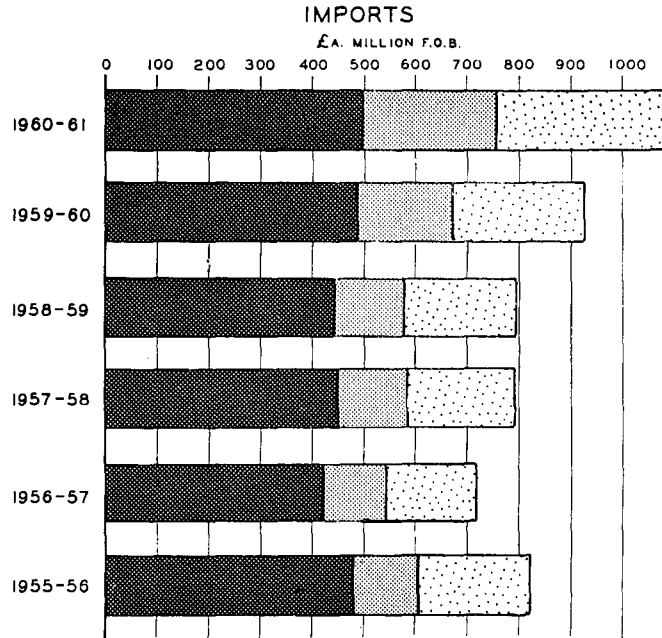

# OVERSEA TRADE: AUSTRALIA, 1935-36 to 1960-61

# OVERSEA TRADE ACCORDING TO MONETARY GROUPS

AUSTRALIA, 1955-56 to 1960-61

■ STERLING AREA    ▨ DOLLAR AREA    ▩ OTHER NON-STERLING AREAS

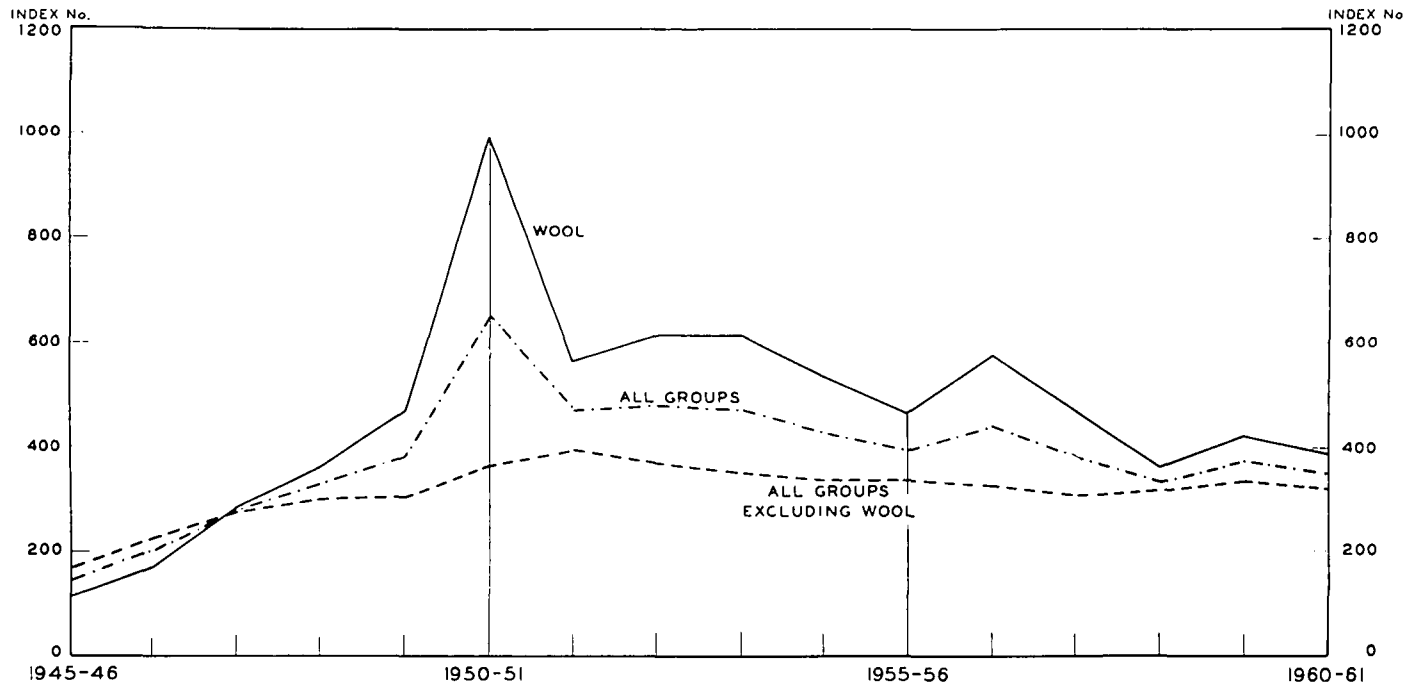

# EXPORTS OF PRINCIPAL COMMODITIES

# EXPORT PRICE INDEX NUMBERS: AUSTRALIA, 1945-46 to 1960-61

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS  
(BASE: AVERAGE OF THREE YEARS ENDED JUNE, 1939=100)

(ii) *Exports.* Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally.

- (a) Goods sold to oversea buyers before export—the Australian f.o.b. port of shipment equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (b) Goods shipped on consignment—the Australian f.o.b. port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. port of shipment equivalent of the current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. port of shipment equivalent of the price ultimately received).

Exporters are required to show all values in terms of Australian currency, and to include the cost of containers.

An account of the bases of valuation in operation prior to 1st July, 1937, was given on page 469 of Official Year Book No. 39.

7. *Inclusions and Exclusions.*—(i) *Stores.* Prior to 1906, goods shipped in Australian ports on oversea vessels as ships' stores were included as exports. From 1906, ships' and subsequently aircraft stores have been specially recorded as such, and omitted from the tabulation of exports. A table showing the value of these stores shipped each year since 1956–57 is shown on page 496.

(ii) *Outside Packages.* Outside packages (containers, crates, etc.) have always been included as a separate item in the tabulation of imports, but, except for those received from the United Kingdom, a classification according to country of origin has been available only since 1950–51. For exports, however, the value recorded for each item includes the value of the outside package.

(iii) *Trade on Government Account.* Imports and exports on Government account are treated as normal transactions and are an integral part of oversea trade transactions.

(iv) *Currency.* Notes and coins are included in the oversea trade statistics at their commodity value only.

(v) *Gold Content of Ores and Concentrates.* The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold.

(vi) *Migrants' Effects.* Migrants' effects are included in imports and exports.

(vii) *Direct Transit Trade.* Particulars of direct transit trade through Australia are not recorded.

(viii) *Balance of Payments.* Statistics relating to oversea trade only do not measure Australia's total balance of payments during the periods shown. Particulars of other transactions entering into the balance of payments, for example, freight charges and oversea travel, payment of dividends, profits and interest and Government expenditure overseas, are provided in the statistical bulletin "*Balance of Payments: Quarterly Summary*" issued by the Commonwealth Statistician (*see also* § 21, page 507). For items such as naval ships, merchant vessels trading overseas, aircraft for use on oversea routes, uranium, and certain materials for inter-governmental defence projects, no customs entries are recorded, but these transactions are taken into account in estimating the balance of payments.

8. *Countries.*—(i) *Imports.* From 1st January, 1905, in addition to the record of the countries whence goods arrived directly in Australia, a record of the countries of their origin was kept, as it was considered that classification of imports according to country of origin was of greater interest and value than classification according to country of shipment. Up to and including the year 1920–21, imports continued to be classified both according to country of shipment and according to country of origin, but the former tabulation was discontinued as from the year 1921–22. "Country of origin" referred to in import tables should be taken to mean the country of production.

(ii) *Exports.* In the export sections of tables in this chapter, "country" refers to the country to which the goods were consigned so far as this can be determined at the time of export.

9. Quantities.—Where quantities are shown, they are generally, but not invariably, expressed in terms of the normal trade unit. Where "cental" is used, the unit is equivalent to 100 lb. avoirdupois. Quantities are not tabulated in respect of items for which there is no appropriate unit of quantity (e.g. an item which covers a number of commodities and cannot be recorded under a uniform unit of quantity).

10. Pre-federation Records.—In the years preceding Federation, each State recorded its trade independently, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports and exports were not on uniform lines. Imports and exports for years prior to Federation may be found in issues of the Official Year Book prior to No. 41. On the introduction of the Customs Act 1901, the methods of recording values were made uniform throughout the States.

### § 7. Total Oversea Trade.

1. Including Gold.—The following table shows the total trade (including gold) of Australia with oversea countries from 1901 to 1960–61. The period 1901 to 1950–51 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in Official Year Book No. 40 and earlier issues, but it should be borne in mind that the figures for imports in issues prior to No. 37 were in British currency.

In this chapter, the values in all tables of imports and exports are shown in Australian currency f.o.b. at port of shipment.

#### OVERSEA TRADE: AUSTRALIA. (INCLUDING GOLD.)

Period.	Value.(£'000.)			Excess of Exports(+) or Imports(-) (£'000.)	Value per Head of Population.(£)		
	Imports.	Exports.	Total.		Imports.	Exports.	Total.
<b>Annual Average—</b>							
1901 to 1905 ..	35,689	51,237	86,926	+ 15,548	9.1	13.1	22.2

(a) Prior to 1906, ships' stores were included in exports. For the value of such goods shipped on oversea vessels and aircraft during each of the years 1956–57 to 1960–61, see table on p. 496.

A graph showing the oversea trade of Australia from 1935–36 to 1960–61 appears on page 479.

2. **Excluding Gold.**—The fluctuations in recent years in merchandise trade (including silver and bronze as merchandise) are shown more clearly in the following table, from which all gold movements have been excluded.

**OVERSEA TRADE: AUSTRALIA.**  
(EXCLUDING GOLD.)

(ii) *Proportions.* In view of the fluctuations in the total values of imports and exports, it is somewhat difficult to ascertain from the preceding table the relative importance of the various countries in the trade of Australia. A better idea of the proportions of imports supplied by the various countries and of their relative importance as markets for Australian exports during the years 1958-59 to 1960-61 may be obtained from the following table.

**COUNTRIES OF ORIGIN OR CONSIGNMENT OF AUSTRALIAN IMPORTS AND EXPORTS: PROPORTIONS.**

2. According to Major Groups of Countries.—The following table shows the trade of Australia with major groups of countries during the years 1959-60 and 1960-61.

The sterling group includes the United Kingdom, its colonies and dependencies, all other countries of the British Commonwealth (except Canada and the New Hebrides Condominium) and certain non-British countries of which the most important are Burma, Bahrain Islands, other Arabian States (excluding Saudi Arabia and Yemen), Iceland, and the Republic of South Africa.

The United States of America and Canada have now been shown separately in lieu of the area previously referred to as "Dollar".

The European Economic Community group consists of Belgium-Luxembourg, France, Federal Republic of Germany, Greece, Italy and the Netherlands (including Netherlands New Guinea).

The European Free Trade Association group in the following table consists of the following countries: Norway and Portugal and their dependencies, Austria, Denmark, Finland, Sweden and Switzerland.

Of the remaining countries included under "other countries" in the non-sterling group, the more important as regards trade with Australia are Czechoslovakia, Poland, the Union of Soviet Socialist Republics, Egypt, Iran, Saudi Arabia, China, Japan, Indonesia, Thailand and Brazil.

4. Imports from the United Kingdom and Competing Countries.—Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of customs duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this chapter.

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufactured in the United Kingdom. Imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom cannot supply. These items, in addition to others not available from that country, have therefore been omitted from the following table.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, the Federal Republic of Germany, Japan, and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for each of the years 1958–59 to 1960–61 are shown in the following table.

## IMPORTS FROM THE UNITED KINGDOM AND ITS MAIN COMPETITORS.

(£'000.)

Nature of Imports.	Year.	United Kingdom.	France.	Federal Republic of Germany.	Japan.	United States of America.	All Countries.

Total, competitive imports	1958-59	265,562	10,247	37,364	27,498	75,145	538,680
	1959-60	288,101	12,065	46,839	37,933	108,332	647,413
	1960-61	301,707	14,938	58,511	60,534	164,119	785,414
Total imports (less bullion and specie) (a)	1958-59	307,435	11,724	42,954	29,949	108,503	794,388
	1959-60	330,301	13,742	53,868	41,533	150,031	924,528
	1960-61	340,530	16,722	66,176	65,445	217,041	1,085,331

(a) Includes outside packages.

The principal classes of competitive imports are metals, metal manufactures and machinery (value £435,751,000 in 1960-61) and manufactured fibres, textiles and apparel (value £132,477,000 in 1960-61). The value of goods included in these two groups represented 72.3 per cent. of the total value of competitive commodities during 1960-61. In 1960-61, the United Kingdom supplied 38.4 per cent. of the total value of competitive goods.

## § 10. Trade with Eastern Countries.

1. Merchandise Trade According to Countries.—The values of imports from and exports to eastern countries during the years 1958-59 to 1960-61 are shown in the following table. The principal commodities imported in 1960-61 according to countries of origin were:—Borneo (British)—petroleum, £8,824,000, timber, hardwood, £3,135,000; Ceylon—tea, £8,910,000; India—bags and sacks, £9,462,000, cotton and linen piece-goods, £3,849,000,

hessian, £3,259,000, and tea, £892,000; Malaya—crude rubber, £7,078,000, latex, £1,840,000, timber, £2,890,000, and tin, £1,360,000; Japan—metals and metal manufactures, £21,983,000, cotton and linen piece-goods, £17,865,000, other textiles, £4,639,000, earthenware, china, glass, etc., £2,861,000, optical, etc., instruments, £1,729,000, and tinned fish, £2,079,000; Indonesia—petroleum spirit, £3,176,000, kerosene, £2,020,000, crude petroleum, £16,738,000, residual, solar and other mineral oils, £1,718,000, and tea, £2,721,000.

<b>Total Exports (Australian Produce)</b> .. .. .	..	..	..	..	<b>794,909</b>	<b>919,688</b>	<b>942,606</b>

(a) 2,000 lb.

(b) Quantity in terms of greasy wool.

A graph showing exports in principal commodity groups in each of the years 1955-56 to 1960-61 will be found on page 481.

4. Imports of Merchandise and Bullion and Specie.—The table hereunder shows the value of imports into Australia during each of the years 1956-57 to 1960-61, grouped under the headings—Merchandise, and Bullion and Specie. The imports of merchandise are shown under the sub-headings of "free" and "dutiable" goods.

## IMPORTS OF MERCHANDISE AND BULLION AND SPECIE: AUSTRALIA.

(£'000.)

Year.	Merchandise.			Bullion and Specie.	Total Imports.
	Free Goods.	Dutiable Goods.	Total.		
1956-57.. ..	403,496	313,186	716,682	2,309	718,991
1957-58.. ..	426,206	363,055	789,261	2,679	791,940
1958-59.. ..	464,274	330,114	794,388	2,211	796,599
1959-60.. ..	509,824	414,704	924,528	2,563	927,091
1960-61.. ..	576,277	509,054	1,085,331	2,246	1,087,577

5. Exports of Merchandise and Bullion and Specie.—The next table shows the value of exports from Australia during each of the years 1956-57 to 1960-61, grouped under the headings—Merchandise, and Bullion and Specie. The exports of Australian produce and re-exports are shown separately.

## EXPORTS OF MERCHANDISE AND BULLION AND SPECIE: AUSTRALIA.

(£'000.)

Year.	Merchandise.			Bullion and Specie.			Total Exports.
	Australian Produce.	Re-exports.	Total.	Australian Produce.	Re-exports.	Total.	
1956-57 ..	959,348	13,650	972,998	19,896	12	19,908	992,906
1957-58 ..	795,527	14,776	810,303	7,626	17	7,643	817,946
1958-59 ..	790,165	16,540	806,705	4,744	14	4,758	811,463
1959-60 ..	907,971	17,988	925,959	11,716	7	11,723	937,682
1960-61 ..	901,809	26,232	928,041	40,797	5	40,802	968,843

6. Imports and Net Customs Revenue.—The ratio of net customs revenue collected, excluding net primage, to the total value of all merchandise imported in each of the years 1956-57 to 1960-61 was as follows:—1956-57, 8.9 per cent.; 1957-58, 8.8 per cent.; 1958-59, 8.8 per cent.; 1959-60, 8.9 per cent.; and 1960-61, 9.2 per cent. Primage duty was in force during these years, and if this is added to net customs revenue the percentages become:—1956-57, 9.6 per cent.; 1957-58, 9.1 per cent.; 1958-59, 9.0 per cent.; 1959-60, 9.1 per cent.; and 1960-61, 9.4 per cent. The ratios of net customs revenue, excluding primage, to the total value of dutiable goods only were:—1956-57, 20.4 per cent.; 1957-58, 19.1 per cent.; 1958-59, 21.0 per cent.; 1959-60, 19.9 per cent.; and 1960-61, 19.5 per cent. The calculations are based on Australian currency values and on the assumption that the value of clearances approximated to the value of imports during the same period.

## § 13. Ships' and Aircraft Stores.

Prior to 1906, goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' and subsequently aircraft stores have been specially recorded as such, and have been omitted from the export figures. The value of these stores during each of the years 1956–57 to 1960–61, with oils separate, is shown in the following table.

**VALUE OF STORES LOADED ON OVERSEA SHIPS AND AIRCRAFT: AUSTRALIA.**  
(£'000.)

Item.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.
Oils .. .. .	9,059	8,383	6,704	7,817	8,937
All Stores (including oils) ..	14,208	12,798	10,876	12,413	14,205

In addition to oils, the principal items supplied to oversea ships and aircraft in 1960–61 were:—Meats, £1,581,226; fruit and vegetables, £474,982; eggs, £189,011; butter, £111,142; ale, porter, beer, etc., £356,988; sea food, £221,376; flour, £59,162; rice, £22,736; milk and cream, £35,524; tobacco and cigarettes, £163,676.

## § 14. Movement of Bullion and Specie.

1. **Imports and Exports.**—The following table shows the values of gold and silver bullion and specie, and of bronze specie, imported into and exported from Australia during each of the years 1958–59 to 1960–61.

**IMPORTS AND EXPORTS, BULLION AND SPECIE: AUSTRALIA.**

§ 15. Exports According to Industries.

1. Classification.—The following table provides an analysis of the total recorded value of Australian exports for the years 1958-59 to 1960-61. This analysis is designed to show fluctuations in the value of exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily arbitrary in some respects.

## EXPORTS OF AUSTRALIAN PRODUCE ACCORDING TO INDUSTRIAL GROUPS.

Industrial Group.	Value. (£'000.)			Proportion of Value of Exports of Australian Produce (excluding Gold). (Per cent.)		
	1958-59.	1959-60.	1960-61.	1958-59.	1959-60.	1960-61.

<b>Gold Exports(a) .. ..</b>	<b>3,279</b>	<b>10,211</b>	<b>39,959</b>	<b>..</b>	<b>..</b>	<b>..</b>
<b>Total Recorded Value of Exports .. ..</b>	<b>811,463</b>	<b>937,682</b>	<b>968,843</b>	<b>..</b>	<b>..</b>	<b>..</b>

(a) The value of refined newly-won gold was £16,645,000 in 1958-59, £16,770,000 in 1959-60, and £16,203,000 in 1960-61.

2. **Relative Importance of Industrial Groups.**—In the year 1960–61, Australian produce (other than gold) exported amounted to approximately £903 million. Of this, £783 million or 87 per cent. was mainly produce of primary industries, comprising £566 million of unprocessed produce and £217 million of goods which had been processed in some degree before export. The values of the principal individual items of processed Australian primary produce exported were:—Raw sugar, £34,227,000; flour, etc., £19,637,000; canned fruit, £9,773,000; dried fruit, £9,097,000; wool (scoured, tops, etc.), £38,234,000; canned meats, £9,374,000; butter, £19,651,000; milk (condensed, dried, etc.), £9,152,000; pig lead, £10,541,000; lead bullion, £5,330,000; zinc bars, blocks, etc., £3,178,000; copper ingots, £7,028,000; and undressed timber, £2,495,000.

The value of manufactures exported as classified above was £88 million, or approximately 10 per cent. of Australian produce (other than gold) exported in 1960–61. The values of principal individual items here included were:—Manufactures of metal, £46,823,000; implements and machinery, £10,768,000; drugs and chemicals, £6,874,000; and paper and stationery, £3,671,000.

The items enumerated indicate the arbitrariness of the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

Refined petroleum oils exported are shown separately, as they consist of imported crude oils refined in Australia and re-exported in the refined form. The values of principal individual items shown as “unclassified” in 1960–61 were:—individual consignments of less than £50 in value, £5,516,000; and military equipment and stores and supplies for Australian projects overseas, £1,311,000.

## § 16. Australian Index of Export Prices.

1. **General.**—Over the past fifty years, the exports of Australia have become increasingly diversified, but although the proportion of highly manufactured exports has increased, it is still small in relation to total exports. Most of the exports still consist of basic products such as wool, wheat, butter, etc.

2. **Historical.**—An annual index of export prices has been published by this Bureau since its inception.

The first index was compiled annually for the years 1901 to 1916–17. The method of computation was to select all articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the base year). The total value so obtained was divided into the total actual (recorded) value of these exports for the year concerned. The quotient (multiplied by 1,000) thus obtained was the export price index number for that year.

The method was changed in 1918. A weight for all principal exports was calculated on the average quantities of exports for the nineteen and a half years from 1st January, 1897 to 30th June, 1916. To these weights were applied the "average unit export values" of each export in successive years, and a weighted aggregative index of "price" variations was derived. It was published for the years 1897 to 1929-30, and particulars of this index were last published in Official Year Book No. 24, page 147.

After the 1914-18 War, however, the relative importance of different exports changed considerably. In addition, the pattern of exports varied considerably from year to year.

3. **Present Indexes.**—For the reasons just mentioned, two new series of monthly export price indexes—one using fixed weights and the other using changing weights—were published in 1937, computed back to 1928. These are the only export price indexes now published.

The data on which both series are based differ from those used in the old series of annual index numbers. The most important change was the use of actual (or calculated) export prices in place of the "unit values" declared at the Customs.

The old index took no account of gold exports. For gold producing countries, although some exports of gold would be irrelevant (e.g., the Australian shipments of gold reserves during the depression), the exports of newly produced gold should be taken into account. In the new series, therefore, gold is included, but the weight given to it is not the quantity exported but the quantity produced.

The two series are compiled monthly, and both relate to commodities which normally constitute about 80 per cent. of the total value of exports of merchandise and silver together with gold production.

4. **The Fixed Weights Index.**—(i) *General.* This is a weighted aggregative index of price variations. It was computed back to 1928, with that year taken as base. It is now published on the base: Average of three years ended June, 1939 = 100.

The purpose of this index is to provide comparisons, over a limited number of years, of the level of prices of those commodities normally exported from Australia, making no allowance for variations during the period in the proportions of the different kinds of exports.

(ii) *Weights.* The original weights (used for the period 1928 to 1936) were, in round figures, the average annual exports (production in the case of gold) during the five years 1928-29 to 1932-33.

From July, 1936, the weights were revised and were based on the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36. Whilst these group weights are still retained, the individual items comprising the meats group have been altered from October, 1960. For October, 1960, and subsequent months the meats group index has been varied by the movement in prices of beef, lamb, mutton and canned meats weighted according to their average annual exports during 1956-57 to 1960-61. Consideration is being given to a general revision of the weighting pattern of the index and to enlargement of the index to cover additional items.

The weight adopted for wheat takes into account the wheat equivalent of flour exported; the weight allotted to greasy wool takes account of the greasy equivalent of scoured wool, tops, and wool on skins; and for some metals allowance is made for the metallic content of ores and concentrates exported.

The twenty items, together with the units of quantity and the weights or "quantity multipliers", are given in the following table.

EXPORT PRICE INDEX: COMMODITIES AND WEIGHTING SYSTEM.

(FROM 1ST JULY, 1936.)

Item.	Unit of Quantity.	"Quantity Multipliers" (Weights).	Percentage Distribution of Total Aggregate.			
			Base Period (1936-37 to 1938-39).		1960-61.

Gold .. ..	fine oz.	937,000	..	6.98	..	3.53
			100.00	100.00	100.00	100.00

(a) From October, 1960, the items comprising the meats group have been altered (see paragraph 4 (ii) on page 500).

The percentage distributions of the "Total Aggregate" shown in the foregoing table are of importance, firstly, as showing their variations from time to time because of differential price movements as between the various commodities or groups, and secondly, as regards the effect on the indexes as a whole of the percentage price variations for each commodity or group.

(iii) *Prices.* The adoption of current market prices (as distinct from the former average unit export values) in the present indexes permitted the use of standards for each commodity. All export prices are calculated from information obtained from the most reliable and representative sources available. In most cases, the prices used are those at which current sales are being effected.

(iv) *Index Numbers.* The following table shows export price index numbers for Australia for individual commodities, groups of commodities, and all groups combined for each financial year from 1936-37 to 1960-61 and monthly from July, 1961, to March, 1962.

## EXPORT PRICE INDEX: AUSTRALIA.

## SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

## INDIVIDUAL COMMODITIES, GROUPS OF COMMODITIES, AND ALL GROUPS COMBINED.

(Base of each Index: Average of three years ended June, 1939 = 100.)

(a) Silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton and canned meats (see paragraph 4 (ii) on page 500).  
 Guaranteed minimum prices are used when operative. (c) Sultanas, raisins, currants. (d) Cattle hides, calf  
 skins. (e) 1936-37 to 1938-39. (f) Preliminary. (g) Nominal. (h) Actual prices realized not yet  
 known; provisional series are included in "All Groups" Index.

A graph showing index numbers for All Groups, for wool, and for All Groups excluding wool appears on page 482.

The group indexes in the table above show the great fluctuations and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool. Since wool is a predominant export, and comprises 46 per cent. of the base aggregate of the index, fluctuations in wool prices obscure the effect on the "All Groups" Index of movements in prices of the other components. For this reason "Wool" and "All Groups Excluding Wool" are shown separately in the table following. The movement of the weighted average index for "All Groups Excluding Wool" contrasts with the pronounced fluctuations in prices of wool. Index numbers for "All Groups Excluding Gold" and for "All Groups Excluding Gold and Wool" are also shown in the table.

EXPORT PRICE INDEX: WOOL AND "OTHER GROUPS", AUSTRALIA.

(Base of each Index: Average of three years ended June, 1939 = 100.)

Period.	Wool.	All Groups.			All Groups.

5. The Changing Weights Index.—This series was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. The fixed weights index numbers indicate satisfactorily the general trend of export prices, but take no account of the relative quantities actually sold at the prices ruling in particular months. The changing weights index numbers, shown below, take account of this factor. In computing these, the "quantity multipliers" are the quantities actually exported (sold, in some cases) in the months (or periods) to which the index numbers relate.

For any given month, the procedure is to multiply the price of each commodity in that month, and its price in the corresponding month of the previous year, by the quantity exported during the given month. A comparison of the resulting aggregates gives one possible measure of the change in prices over the period, i.e., the change assuming that the proportions of the different kinds of exports whose prices are to be measured were the same as their proportions in the given month. Another possible measure is given by assuming that the proportions of the different kinds of exports in the given month

were the same as their proportions in the corresponding month of the previous year. Accordingly, the first step in the procedure is repeated, substituting the quantities exported during the corresponding month of the previous year.

The index numbers so obtained have been proved over a period of years to lie very close together. As it is convenient for practical reasons to have one single figure rather than two close alternatives, the two index numbers are multiplied together and the square root of the product is extracted. This is taken to be the index number for the month, the prices of the corresponding month of the previous year being taken as base.

The index numbers for the whole or portion of a year, as compared with the corresponding period of the previous year, are computed in the same way. The process involves merely the cumulative addition of the aggregates computed for the individual months, and extraction of the index numbers as explained above.

Index numbers computed on this basis are shown in the following table for the months July, 1960, to March, 1962, and for trade year periods ending in those months.

#### EXPORT PRICE INDEX: CHANGING WEIGHTS.

(a) Preliminary.

Monthly export price index numbers are issued in the mimeograph publication *Monthly Index of Australian Export Prices*, in the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* and the *Quarterly Summary of Australian Statistics*.

## § 17. External Trade of Australia and other Countries.

1. **Essentials of Comparison.**—Direct comparison of the external trade of any two countries is possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in one may be declared by merchants, whereas in another they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of imports would result from the different methods of converting the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium-Luxembourg than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total.

2. **"Special Trade" of Various Countries.**—In the following table, the figures, which are expressed in Australian currency, relate as nearly as possible to imports cleared for home consumption in the various countries specified and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The countries listed below are not necessarily all the important trading countries of the world, but those important countries for which comparable statistics are available. Information for countries other than Australia has been extracted from publications of the United Nations.

**IMPORTS CLEARED FOR HOME CONSUMPTION, AND EXPORTS OF DOMESTIC PRODUCTS (MERCHANDISE ONLY(a)): VARIOUS COUNTRIES, 1960.**

(a) Includes silver. (b) f.o.b. (c) Covers goods imported less goods re-exported.  
 (d) Covers goods imported as distinct from goods cleared for home consumption. (e) Year ended June, 1961.

## § 18. Oversea Trade in Calendar Years.

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show Australian imports and exports for each of the calendar years 1957 to 1961.

**OVERSEA TRADE IN CALENDAR YEARS: AUSTRALIA.**  
(£'000.)

Year.	Merchandise.		Bullion and Specie.		Total.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
1957 .. ..	751,543	981,694	2,509	13,891	754,052	995,585
1958 .. ..	792,891	738,913	2,541	4,083	795,432	742,996
1959 .. ..	827,653	898,623	2,174	3,339	829,827	901,962
1960 .. ..	826,233	892,571	2,177	3,338	828,410	895,909
1961(a) .. ..	1,055,942	874,585	2,387	40,577	1,058,329	915,162

(a) Subject to revision.

## § 19. Excise.

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise revenue are shown in Chapter XXI.—Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1959–60 and 1960–61.

**QUANTITY OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID: AUSTRALIA.**

## § 20. Interstate Trade.

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the last published statements were for the year 1909. Later, the Governments of Western Australia and Tasmania revived the records, and relevant statistics are available again for those States. A detailed collection for Queensland was re-introduced from July, 1953.

At the Conference of Statisticians held in January, 1928, it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

Interstate trade statistics are now published in detail for Queensland, Western Australia and Tasmania, prepared by the Deputy Commonwealth Statisticians in those States. The Deputy Commonwealth Statistician in South Australia publishes some figures for that State, made up from the records of Western Australia and Tasmania. The statistics of interstate trade for New South Wales and Victoria are very meagre. The Melbourne Harbour Trust publishes, in its annual report, the quantities of various commodities of interstate trade loaded and discharged in the Port of Melbourne. The trade with individual States is not disclosed.

## § 21. The Australian Balance of Payments.

1. **Introduction.**—Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country and they are mainly regarded as an analysis of those transactions which contribute directly to movements in the level of Australia's international reserves.

Official estimates of Australia's balance of payments covering the period 1928–29 to 1930–31 were included in the Appendix to Official Year Book No. 24, 1931. Except for the war years (1939 to 1945) estimates have since been published annually, and since 1950–51 they have been issued twice yearly in the form of a separate mimeograph publication *The Australian Balance of Payments*. This publication brings the estimates forward to the end of the most recent financial year or half year and, together with a printed volume *The Australian Balance of Payments, 1928–29 to 1950–51*, provides also a description of the various items included and the sources from which the information is obtained. In February, 1962, an additional statistical statement was introduced giving details of Australia's balance of payments on a quarterly basis.

The form in which the Australian estimates are presented closely follows the pattern originally adopted by the International Monetary Fund. In this presentation a basic distinction is drawn between "current account" transactions and "capital account" transactions. Current account transactions are defined as those which involve changes in the ownership of goods, or, the rendering of services between residents of Australia and the rest of the world. They include such important items as exports, imports, shipping freights, dividends, profits and interest, travel and Government expenditure. The current account also includes transfers in the form of personal gifts and Government gifts of technical

assistance, for which there is no consideration. Capital account transactions are defined as those which involve claims to money and titles to investments between residents of one country and those of another country. For practical purposes they may therefore be divided, on the one hand, into investment items (including oversea investment in companies in Australia and Government loans raised abroad), and, on the other, into financing transactions (such as the recent purchase of £78 million from the International Monetary Fund and changes in the level of international reserves).

By definition, the balance of payments on current account is always equivalent to the balance on capital account and the change in international reserves is used as a control figure to which the net sum of all other figures must reconcile. In practice, errors and omissions may occur in the estimation of the amounts involved in various items included in both current and capital accounts, and in addition there are timing differences between the statistical recording of trade transactions and certain invisible items, and the relevant foreign exchange transactions. Therefore, in order to preserve the identity between the total shown in the current account and the total shown in the capital account, it is necessary to introduce a "balancing item". The "balancing item" is included in the capital account, but, as mentioned above, it may include discrepancies in the current account, and it does not, as is frequently supposed, include only errors and timing differences related to investment and financing transactions.

In the annual estimates originally issued for 1960-61, an important addition was made to the estimates by the inclusion of an Import Valuation Adjustment. This adjustment makes allowance for the estimated excess of the value of imports as recorded in statistics of oversea trade (based on value for duty) over the actual "selling price" to the importer as shown in invoices accompanying customs entries. This difference mainly arises from provisions of the Customs Act, whereby the value for duty is based on the current domestic value of the goods in the exporting country in cases where this value exceeds the actual selling price to the importer. The adjustment is estimated from samples of import entries, which do not permit of accurate estimates for particular commodities and individual countries. Consequently, only the total amount involved is shown. This was estimated at £35 million in 1960-61. As the introduction of the Import Valuation Adjustment resulted in substantial reductions in the size of the balancing items shown in previous years' estimates, a fully revised summary of Australia's balance of payments for the years 1945-46 to 1960-61 was included in the mimeograph publication issued in March, 1962. This summary provides estimates for all years of the Import Valuation Adjustment, together with small revisions to other current and capital account items.

Details of the estimates are assembled from a variety of sources of which the following are the more important:—(i) statistics of exports and imports obtained from Australian trade statistics; (ii) information on particular invisible current account items and capital movements obtained by regular inquiry from private organizations and Government departments; (iii) details of receipts and payments of foreign exchange provided by the banking system; (iv) information on dividends remitted, undistributed income and private investment in companies provided by statistics of oversea investment collected by this Bureau; (v) information on freight on imports and other items concerned with oversea shipping provided by statistics of shipping operations collected by this Bureau; and (vi) information on international reserves supplied by the Reserve Bank.

**2. Current Account.**—The balance of payments on current account is arranged to show a series of credit items and a corresponding series of debit items. Entries on the credit side include all current transactions which result in receipts of foreign exchange (for goods and services, investment income or donations), and on the debit side the similar transactions which result in payments of foreign exchange. The principal exceptions to this rule are the amounts shown for undistributed income. In this instance, no movement of foreign exchange takes place, the amounts concerned being treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in the relevant sections of the capital account.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of visible trade. This is the most important and usually the most variable relationship in the balance of payments, and (excluding the Import Valuation Adjustment) resulted in deficits of £9 million in 1959-60 and £147 million in 1960-61. The deterioration between the two years was the result of a large increase in the value of imports.

<b>Balance on Current Account</b> .. .. .	<b>—222.1</b>	<b>—368.4</b>

(a) The amounts shown represent the recorded trade totals adjusted in respect of coverage for purposes of balance of payments estimates. (b) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at £127 million in 1959-60 and £151 million in 1960-61.

A full evaluation of the overall position on current account, however, occurs only after invisible transactions have been taken into account. Whilst the balance of visible trade in the years 1959–60 and 1960–61 showed deficits of £9 million and £147 million, further deficits on invisible transactions in the same periods resulted in total deficits on current account of £222 million in 1959–60 and £368 million in 1960–61.

The most important of the current account invisibles are transportation items. These appear on both the debit and credit sides, the principal component on the debit side being freight (mainly freight on imports into Australia), which is estimated at £127 million in 1959–60 and £150 million in 1960–61.

The items next in importance are those concerning income from investment. Debit entries under this heading include interest, dividends, rents, etc., payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income for which, as mentioned above, no monetary payments occur. In total, investment income debits amounted to £150 million in 1959–60 and £148 million in 1960–61. Credits in these periods amounted to £27 million and £29 million respectively.

The remaining items are much smaller than those mentioned above. Government debits rose from £48 million in 1959–60 to £53 million in 1960–61. Government credits fell from £26 million in 1959–60 to £25 million in 1960–61. Debits on account of donations, etc., rose slightly from £30 million to £31 million, but in both years were more than offset by credits. The principal credit item is funds brought in by immigrants.

**3. Capital Account.**—The capital account shows the annual movements in assets and liabilities, a basic distinction being made between those items which are regarded as Australian residents' assets overseas and Australian liabilities to overseas residents.

On the assets side, by far the most important item is Australia's holdings of monetary gold and foreign exchange, usually referred to as international reserves. These reserves decreased by £4 million in 1959–60, but rose by £39 million in 1960–61.

On the liabilities side, the most important items are public authority debt and private investment in Australian companies.

In 1959–60 and 1960–61, repayments to the International Bank exceeded drawings by £7 million and £8 million respectively. In both years, official borrowings other than from the International Bank showed substantial inflows of £42 million and £20 million respectively. This represented the net proceeds of new loan raisings and conversions less repayments and other sinking fund operations in London, New York, Canada and Switzerland.

Items 2 and 8 relate to Australia's transactions with international monetary and finance agencies. On the assets side (Item 2) are shown increases in subscriptions to these institutions and on the liabilities side (Item 8) are shown corresponding increases in liabilities or changes in liabilities previously incurred. Liabilities comprise, on the one hand, bank balances and special non-negotiable, non-interest bearing securities, payable in Australian currency but convertible by arrangement into foreign currency or gold, related to capital subscriptions to the various agencies and, on the other, drawings from the International Monetary Fund. The principal movement in 1959–60 was an increase of \$100 million in Australia's quota to the International Monetary Fund, in respect of which a gold payment to the value of \$25 million was made to the Fund. The balance therefore represented an increase in the liabilities to the Fund held in Australia in the form of the securities mentioned. There were similar, but smaller, transactions with the International Bank. In 1960–61, the chief item was a drawing of £78 million from the Fund. A more detailed account of these transactions is provided in *The Australian Balance of Payments, 1958–59, 1959–60 and First Half 1960–61* and in Appendix II. of *The Australian Balance of Payments, 1956–57 to 1960–61*.

In the periods shown, capital inflow resulting from overseas investment in Australian companies was substantially greater than net receipts from official loans raised overseas. Excluding life insurance offices, overseas investment in Australian companies rose from £190 million in 1959–60 to £229 million in 1960–61. These amounts included £35 million and £48 million respectively of portfolio investment and £155 million and £181 million of direct investment. The latter included substantial amounts of undistributed income which totalled £69 million in 1959–60 and £62 million in 1960–61.

The balancing item includes errors and omissions and timing differences, referred to on page 508. The increase in the residual from a figure of £9 million in 1959–60 to £102 million in 1960–61 is thought also to have reflected some increases in short-term credits received in connexion with the financing of imports in that year.

4. Balance of Payments on Current Account—Major Groups of Countries.—Estimates are also made of Australia's current account transactions with various countries.

The table following shows the balance on current account in 1959-60 and 1960-61 for sterling and non-sterling countries. The latter include the United States of America and Canada, the European Economic Community, the European Free Trade Association (excluding the United Kingdom), the Soviet Area and "other" countries. (See p. 486 for countries included in the several groups.)

## CHAPTER XIV.

## TRANSPORT AND COMMUNICATION.

NOTE.—The statistics in this chapter relate in the main to the year 1960–61, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication*, and *Finance, Part I.—Public and Private Finance*, published by this Bureau.

Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, the *Monthly Bulletin of Registrations of New Motor Vehicles* and two preliminary monthly statements on *Registrations of New Motor Vehicles*.

## A. SHIPPING.

## § 1. Control of Shipping.

1. **Commonwealth Navigation and Shipping Legislation.**—By section 51 (i) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws in respect of "Trade and commerce with other countries, and among the States". By section 98, this power is further defined as extending to navigation and shipping. Section 51 (vii) empowers the Commonwealth Parliament to legislate in respect of "Lighthouses, lightships, beacons and buoys" and section 51 (ix) in respect of "Quarantine".

A review of the introduction and development of the Navigation Act 1912–1950 was given in Official Year Book No. 40, pages 110–2. Amendments to the Principal Act were made by the Navigation Acts of 1952, 1953, 1956, 1958 and 1961.

Other shipping Acts under the powers of the Commonwealth are the Sea-Carriage of Goods Act 1924–1961, the Seamen's Compensation Act 1911–1960, the Seamen's War Pensions and Allowances Act 1940–1961, the Australian Coastal Shipping Commission Act 1956, the Australian Coastal Shipping Agreement Act 1956 and the Stevedoring Industry Act 1956–1961.

The control of shipping during the 1939–45 War and in the early post-war period, and the establishment of the Maritime Industry Commission (abolished in 1952), the Australian Stevedoring Industry Board (replaced in 1956 by the Australian Stevedoring Industry Authority), and the Australian Shipping Board (replaced in 1956 by the Australian Coastal Shipping Commission) are described in Official Year Books Nos. 36, pages 121–30 and No. 39, pages 147–8.

2. **Australian Coastal Shipping Commission.**—This Commission was established in 1956 for the purpose of maintaining and operating interstate, oversea and territorial shipping services, and replaced the Australian Shipping Board. It operates the Australian National Line, a Commonwealth-owned merchant shipping service which, at 30th June, 1961, comprised 44 vessels totalling 192,201 gross tons.

These included 15 vessels with a gross tonnage of 500 to 3,000; 13 vessels with a gross tonnage of 3,000 to 5,000; 14 vessels with a gross tonnage of 5,000 to 8,000; and 2 vessels with a gross tonnage exceeding 10,000—the bulk ore carriers *Mount Keira* (10,229) and *Mount Kembla* (10,113). The Commission has recently placed an order for a 7,500 ton bulk carrier, and tenders have been called on its behalf for the construction of a passenger-vehicle ship with a displacement of 8,750 tons, for operation between Sydney and Tasmania. This vessel will augment the service already being provided between the mainland and Tasmania

by the *Princess of Tasmania*, the vehicle-container ship *Bass Trader* and the container vessel *South Esk*. The *Princess of Tasmania* commenced operations in October, 1959, and between that time and August, 1961 had carried 148,000 passengers, 37,000 passenger vehicles and 708,000 tons of cargo on commercial vehicles.

3. **Australian Shipbuilding Board.**—(i) *Constitution.* Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception, and in 1948 was constituted on a permanent basis under the control of the Minister for Shipping and Transport. The membership of the Board consists of a Chairman, who is the General Manager, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board. The staff of the Board are employed under the Public Service Act as officers of the Department of Shipping and Transport.

(ii) *Functions.* The existing functions of the Board, which have been summarized in earlier issues of the Official Year Book, are set out in detail in regulation 22 (4) of the Supply and Developments Regulations.

The Board has functioned since 1941 without a permanent staff organization. In April, 1960, however, the Government recognized the desirability of placing the Board's administration on a more satisfactory basis to enable it to exercise its functions on a long-term basis. To this end a permanent staff organization is in course of preparation by the Department of Shipping and Transport for the approval of the Public Service Board.

(iii) *Construction Programme.* From its inception to 30th June, 1961, the Board had arranged for the construction of 69 vessels totalling 443,301 tons deadweight. During the war, the Board was also responsible for the construction of numerous small craft and a 1,000 ton floating dock.

Current orders at 30th June, 1961, placed by the Board, were for the construction of 8 vessels totalling 113,200 deadweight tons. The vessels consisted of one 32,250 dw.t. oil tanker on behalf of Ampol Petroleum Ltd., two 21,400 dw.t. bulk carriers for Broken Hill Pty. Ltd., two bulk ore carriers each of 16,400 dw.t. on behalf of Bulkships Ltd., one 2,500 dw.t. passenger-cargo vessel for the State Shipping Service of Western Australia, one 2,000 dw.t. container vessel for Wm. Holyman and Sons Pty. Ltd., and one 850 dw.t. roll-on roll-off passenger-cargo ferry for the Adelaide Steamship Co. Ltd.

In addition, orders have been placed by the Board for a survey vessel for the Department of the Navy, two 70-foot landing craft for the Department of the Army and three new motor ships, each of 1,800 tons, for the Commonwealth Lighthouse Service.

4. **Australian Stevedoring Industry Authority.**—In March, 1947, legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June, 1949, legislation was enacted to abolish the Stevedoring Industry Commission on which employers and employees were represented, and established in its place a Stevedoring Industry Board of three members, which attended to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August, 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time, the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay, public holiday pay and annual leave under the administration of the Authority. Under amending legislation which operated from 6th June, 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorized stoppages. The statutory provisions regulating the industry are now contained in the Stevedoring Industry Act 1956–1961 and in Division 4 of Part III of the Conciliation and Arbitration Act 1904–1961.

## § 2. System of Record.

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and therefore only one entry and one clearance are counted for each voyage, without regard to the number of States visited (*see also* § 4, p. 517).

On arrival at, or departure from, a port in Australia, whether from or for an oversea country or from or for another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month, the information so obtained is forwarded to the Bureau of Census and Statistics. This information relates, in the main, only to vessels engaged in the carriage of passengers and/or cargo between Australian States or between Australia and oversea countries.

The size of a vessel may be expressed in a number of ways. A vessel's gross tonnage, expressed in tons of 100 cubic feet, represents the total volume of the enclosed space, i.e. a ship of 25,000 tons has a total enclosed capacity of 2,500,000 cubic feet. Its net tonnage, expressed in tons of 100 cubic feet, represents the volume of enclosed space that can be used for cargo or passengers. Its displacement is its total weight and is expressed in tons of 2,240 lb. Its deadweight tonnage is the difference between the displacement of the vessel loaded to its summer deadline and the displacement light, i.e. it is the weight the vessel can carry, including the weight of bunkers and stores. Net tonnage is the concept generally used in the tables in this chapter but since it can give a misleading impression of the size of ships which have a function other than carrying passengers and cargo (e.g. a tug has no net tonnage), certain figures are also given for deadweight tons and tons gross.

Most of the cargo is recorded in terms of the ton weight of 2,240 lb. However, some additional cargo, mainly bulky commodities, is shipped and recorded on the basis of 40 cubic feet of space used representing 1 ton measurement.

Except in § 5. Shipping at Principal Ports (page 520), intra-State (coastal) movements of vessels, including those of vessels engaged solely in trade within State limits, are excluded from the statistics in the following pages.

## § 3. Oversea Shipping.

1. **Total Movement.**—The following table shows the number of entrances and clearances combined of oversea vessels at Australian ports, and the aggregate net tonnage, during each of the years 1956–57 to 1960–61.

OVERSEA SHIPPING: ENTRANCES AND CLEARANCES (COMBINED) OF VESSELS DIRECT, AUSTRALIA.

Particulars.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.
Number of Vessels .. .. .	5,290	5,254	5,463	5,945	6,778
Net Tonnage .. .. . '000 tons	23,659	24,515	26,019	28,874	34,317

Particulars of the total oversea movement of shipping for each year from 1822 to 1920–21 were published in Official Year Book No. 15, page 507, and for each year from 1921–22 to 1950–51 in Official Year Book No. 40, page 97.

2. **Total Oversea Shipping, States.**—The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to oversea countries, and the aggregate net tonnage, during the year 1960–61.

**OVERSEA SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT,  
1960-61.**

Particulars.		N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	Aust.

	'000 net tons	5,643	3,451	1,715	1,034	5,129	218	79	17,269
Clearances	No.	963	477	679	278	924	42	33	3,396
	'000 net tons	4,857	3,123	2,556	1,117	5,130	196	69	17,048

3. **Shipping Communication with Various Countries.**—A vessel arriving in Australia from overseas is recorded as coming from the country where the voyage commenced, irrespective of the number of intermediate ports of call. Similarly, a vessel leaving Australia is recorded as going to the country where the voyage is scheduled to terminate.

The following table shows statistics of the net tonnage entered and cleared, with cargo and in ballast, according to the principal countries where vessels commenced or terminated their voyages to or from Australia.

**OVERSEA SHIPPING: COUNTRIES FROM WHICH ENTERED OR FOR WHICH  
CLEARED, AUSTRALIA.**

4. **Country of Registration of Oversea Shipping.**—Vessels registered at ports in Commonwealth countries accounted for 50.0 per cent. of the net tonnage of shipping entering Australian ports in 1960-61. This proportion has varied considerably since the end of the 1939-45 War. By 1946-47, the proportion had increased from the low level of 43.4 per cent. recorded in 1943-44 to 76.2 per cent., but since then has declined.

Particulars of oversea shipping which entered Australian ports during each of the years 1958-59 to 1960-61 are given in the following table according to country of registration of vessels.

**OVERSEA SHIPPING: COUNTRY OF REGISTRATION OF VESSELS

Japan ..	752	779	907				
Netherlands ..	748	748	997	Grand Total ..	12,947	14,478	17,269

(a) Includes New Caledonia (68 during 1960-61).

The Australian tonnage which entered Australian ports from overseas during the year 1960-61 represented 1.6 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Islands trade.

The proportion of overseas shipping tonnage which entered Australia in cargo was 82.7 per cent. in 1960-61, and has ranged about this figure in recent years. The proportion of shipping which cleared in cargo was considerably lower (69.8 per cent.), also in keeping with the corresponding figures for recent years.

#### § 4. Interstate Shipping.

1. *System of Record.*—*Interstate Shipping* comprises two elements: (a) vessels engaged solely in interstate trade; and (b) vessels trading between Australia and overseas countries and in the course of their voyages proceeding from one State to another. (However, these vessels, except under special circumstances, do not engage in interstate carrying. Numerous overseas vessels obtain single voyage permits or exemptions under the Navigation Act. Such vessels include overseas tankers carrying petroleum products interstate, and, since the withdrawal of interstate passenger liners, other overseas vessels, under permit, carrying passengers and frozen cargo on the interstate run). No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the overseas vessels (b), some explanation is necessary. Each State desires that its shipping statistics should show in full its shipping communication with overseas countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an overseas country—say the United Kingdom—via another State, is recorded in the second State as from the United Kingdom “Oversea via States”, thus distinguishing the movement from a direct overseas entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from the United Kingdom “Oversea via States”. On an inward voyage, the clearance from the first State to the second State is a clearance interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movements, must for the individual States be recorded as “Oversea via States” or “Interstate” according to the direction of the movement. The significance of the record of these movements will be seen more clearly

from the following tabular presentation of the inward and outward voyages to and from Australia of an oversea vessel which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—via South Australia and Victoria. From the terminal port the vessel will commence the outward voyage and retrace its inward track.

Enters Melbourne from Sydney .. ..		Interstate direct	
Clears Melbourne for United Kingdom via Adelaide .. ..			Oversea via States
Enters Adelaide from Melbourne .. ..		Interstate direct	
Clears Adelaide for United Kingdom via Fremantle .. ..			Oversea via States
Enters Fremantle from Adelaide .. ..		Interstate direct	
Clears Fremantle for United Kingdom ..	Oversea direct		

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as "Oversea direct" gives the oversea shipping for Australia as a whole; (b) the aggregate for all ships recorded in any State as "Oversea direct" plus those recorded as "Oversea via States" gives the total *oversea shipping* for that State; and (c) the aggregate for all ships recorded as "Oversea via States" may also be used, together with those recorded as "Interstate direct" (including those engaged solely in interstate movement) to furnish figures showing the total *interstate movement* of shipping.

2. **Interstate Movement.**—(i) *Interstate Direct.* The following table shows the number of entrances and the net tonnage of vessels recorded into each State and the Northern Territory from any other State (including oversea vessels on interstate direct voyages as in column 2 above) during each of the years 1958-59 to 1960-61.

#### INTERSTATE MOVEMENT OF SHIPPING: ENTRANCES OF VESSELS INTERSTATE DIRECT.

State or Territory.	Number.			Net Tons ('000).

**§ 6. Shipping Cargo.**

1. Oversea and Interstate Cargo.—(i) *Australia.* The table hereunder shows the aggregate tonnage of oversea and interstate cargo discharged and shipped at Australian ports for the years 1956–57 to 1960–61. Most of the cargo is recorded in terms of the ton weight of 2,240 lb., the remainder, mainly bulky commodities, being shipped and recorded on the basis of 40 cubic feet of space occupied representing 1 ton measurement.

**SHIPPING CARGO MOVEMENT: AUSTRALIA.**

(\*000 Tons.)

Year.	Oversea Cargo.				Interstate Cargo.			
	Discharged.		Shipped.		Discharged.		Shipped.

**§ 7. Vessels Registered in Australia.**

1. **Australian-registered Trading Vessels.**—The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30th June, 1961, classified according to—(i) year of construction, 1957 to 1961, and 1956 and earlier years, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in oversea shipyards. The statistics in this table have been compiled by the Australian Department of Shipping and Transport. The Merchant Shipping Act, under which vessels are registered in Australia, does not make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

## AUSTRALIAN-REGISTERED TRADING VESSELS, 30TH JUNE, 1961.(a)

3. **World Shipping Tonnage.**—At 1st July, 1961, the total steamships, motorships and auxiliaries of 100 gross tons and upwards throughout the world amounted to 37,792, with a gross tonnage of 135,915,958. Of these totals, steamships numbered 13,548 for 74,256,787 gross tons, motorships 23,364 for 61,496,502 gross tons, and auxiliaries 880 for 162,669 gross tons. Included therein were 4,708 oil tankers of 100 gross tons and upwards, with a gross tonnage of 43,848,760. Australian steamships, motorships and auxiliaries, 314 for 593,080 gross tons, constituted 0.83 per cent. and 0.44 per cent. respectively of the total number and tonnage. This information has been derived from *Lloyd's Register of Shipping*.

## § 8. Miscellaneous.

1. Lighthouses.—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

2. Distances by Sea.—The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia are shown in the following table.

DISTANCES BY SEA BETWEEN PRINCIPAL AUSTRALIAN PORTS, AND BETWEEN VARIOUS AUSTRALIAN AND OVERSEA PORTS.(a)  
(Nautical Miles.)

3. Shipping Freight Rates.—The *Quarterly Summary of Australian Statistics* shows a list of the ruling freight rates for general merchandise in respect of both oversea and interstate shipments. At 31st December, 1961, the rate for general merchandise from Australia to the United Kingdom and the Continent was 214s. per ton weight or measurement.

The following table shows the freight rates from Australia to the United Kingdom and the continent for certain important commodities at 31st December, 1961.

**OVERSEA SHIPPING FREIGHT RATES FROM AUSTRALIA TO THE UNITED KINGDOM AND CONTINENT AT 31st DECEMBER, 1961.**

(1 Ton measurement = 40 cubic feet.)

Commodity.	Shipping Freight Rate.(a)
Apples .. .. .	12s. 2d. per bushel case
Barley (in bags) .. .. .	102s. 6d. per ton weight
Butter (refrigerator)—	
United Kingdom .. .. .	10s. 11½d. per box (56 lb.)
Continent .. .. .	11s. 6½d. per box (56 lb.)
Cheese (refrigerator) .. .. .	2 13/32d. per lb.
Copper (ingots) .. .. .	125s. per ton weight
Eggs (in shell) .. .. .	326s. per ton measurement
Flour, wheaten .. .. .	97s. 6d. per ton weight
Fruit (dried) .. .. .	169s. 6d. per ton measurement
Hides and Skins—	
Calf .. .. .	1 23/32d. per lb.
Sheep—dumped .. .. .	2 9/16d. per lb.
Lead .. .. .	109s. per ton weight
Leather .. .. .	470s. 6d. per ton weight
Meats preserved by cold process (refrigerator)—	
Beef .. .. .	3 11/32d. per lb. net
Lamb .. .. .	4½d. per lb. net
Mutton .. .. .	3 11/32d. per lb. net
Meats preserved in tins .. .. .	214s. per ton measurement
Milk and cream (condensed) .. .. .	214s. per ton measurement
Steel billets (20–30 feet) .. .. .	100s. per ton weight
Sugar (refined)(b) .. .. .	342s. per ton weight
Tallow (unrefined) .. .. .	242s. per ton weight
Timber logs (40–60 feet) .. .. .	74s. 5d. to 85s. 5d. per 100 super feet
Whale oil .. .. .	242s. per ton weight
Wine .. .. .	203s. 6d. per ton measurement
Wool—	
Greasy—dumped .. .. .	3.56d. per lb.
Scoured and washed—dumped .. .. .	4 47d. per lb.
Tops .. .. .	4.26d. net
Zinc—	
Ingots .. .. .	101s. 6d. per ton weight
Dust (in cases) .. .. .	304s. per ton weight
Sheet (in cases) .. .. .	221s. per ton weight

(a) Expressed in sterling, subject to an adjustment of 25½ per cent. when freight is prepaid in Australia.  
 (b) Bagged sugar. There is no freight rate for bulk sugar, as shipments are made on a charter basis, rates being negotiated on the Baltic Exchange in the United Kingdom.

Interstate rates per ton weight or measurement for general cargo at 31st December, 1961 (expressed in Australian currency) were:—Sydney–Melbourne, 157s.; Sydney–Brisbane, 152s.; Sydney–Adelaide, 182s.; Sydney–Fremantle, 243s.; Sydney–Hobart, 147s.; Sydney–Darwin, 258s. 6d.

4. **Depth of Water at Main Ports.**—A table showing the depth of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*. For some major ports, information in greater detail is given in Chapter XIX.—Local Government, § 6. Harbour Boards and Trusts.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1957 to 1961 are shown in the table below.

## SHIPPING CASUALTIES TO OVERSEA AND INTERSTATE STEAM AND MOTOR VESSELS(a): AUSTRALIA.

Year.	Shipping Losses.			Other Shipping Casualties.			Total Shipping Casualties.		
	Vessels.	Net Tons.	Lives Lost.	Vessels.	Net Tons.	Lives Lost.	Vessels.	Net Tons.	Lives Lost.
1957 ..	1	249	..	224	709,432	..	225	709,681	..
1958 ..	1	98	5	179	525,528	..	180	525,626	5
1959 ..	2	346	1	200	623,475	9	202	623,821	10

1961 ..	..	..	..	177	589,080	..	177	589,080	..

(a) Vessels over 50 net tons.

6. Ferry (Passenger) Services.—For particulars of ferry passenger services operating in several States see p. 544.

## B. GOVERNMENT RAILWAYS.

1. General.—The first steam-operated railway in Australia, between Melbourne and Port Melbourne, a distance of 2 miles, was opened on 12th September, 1854. It was owned and operated by the Melbourne and Hobson's Bay Railway Company. In the next 100 years, the mileage increased greatly and at 30th June, 1954, 26,624 route-miles (excluding several hundred miles of privately-owned line) were open for traffic. However, the operation of Australia-wide services is greatly hampered by the presence of many break-of-gauge stations, necessitated by the several gauges at present in use, although progress has been made towards the standardization of main trunk routes (see para. 4 following). The policy of government ownership and control of railways has been adopted in each State and at 30th June, 1961, 23,850 route-miles were owned by the State Governments and 2,252 route-miles by the Commonwealth Government. In the following tables, details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line and more detailed statistics for all lines are shown in the annual bulletin, *Transport and Communication*.

In some States, there are privately-owned railway systems offering passenger and freight services to the public. Details of these private railways were included in Official Year Book No. 39 and previous issues, but owing to their relative unimportance and the incomplete nature of the statistics available, the series has been discontinued.

2. Railway Communication in Australia.—An account of the progress of railway construction in Australia since the opening of the first line in 1854 was given in Official Year Book No. 6, page 681, and in No. 22, page 259. The main ports on the mainland are connected by lines running approximately parallel to the coast and are the focal points of lines which radiate inland to the agricultural, mining and pastoral areas of the continent to a distance of up to 600 miles at some points. However, Darwin in the Northern Territory is not connected by rail to any other port. A 3 ft. 6 in. gauge railway extends southward from Darwin to Birdum, a distance of 317 miles, and from Port Augusta in South Australia a 4 ft. 8½ in. gauge railway of 217 miles extends northwards to Marree and thence as a 3 ft. 6 in. gauge of 540 miles to Alice Springs.

In recent years, besides the construction of air-conditioned passenger trains and high-capacity goods rolling stock, many new locomotives have been built and others purchased. Also, there has been a significant development of diesel-electric traction, the number of diesel-electric locomotives in service having risen from two at 30th June, 1949, to 491 at 30th June, 1961.

3. Distances between Capital Cities.—The distances by rail between the capital cities of Australia are shown in the following table.

## GOVERNMENT RAILWAYS: DISTANCES BETWEEN CAPITAL CITIES.

(Miles.)

Distance to—	Distance from—				
	Melbourne.	Brisbane.	Adelaide.	Perth.	Canberra.
Sydney .. .. .	590	613	1,073	2,695	203
Melbourne .. .. .	..	1,203	483	2,105	519
Brisbane .. .. .	..	..	1,686	3,308	816
Adelaide .. .. .	..	..	..	1,622	1,002
Perth .. .. .	..	..	..	..	2,624

4. **Standardization of Railway Gauges.**—The first step towards uniform gauge railway communication between the capitals of the mainland States was effected in 1930 with the construction of the 4 ft. 8½ in. gauge line from Grafton to South Brisbane. The finance required for the construction was provided by the Commonwealth Government. For details of the agreement between the Commonwealth and New South Wales and Queensland, see Official Year Book No. 31, page 122.

This line is operated by the New South Wales Railways, and details of operations in New South Wales are included with those of the New South Wales system. Details of operations on the Queensland portion are included with Queensland railway statistics unless otherwise specified.

In March, 1944, the late Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport, and formerly Chairman of Commissioners, Victorian Railways, was requested by the Commonwealth Government to submit a report and recommendation regarding the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge. A summary of his report and recommendations, made in March, 1945, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States, was published in Official Year Book No. 37, pages 146–9. The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had failed to ratify the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949 by each Government concerned. The Commonwealth–South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth–Three States Agreement, and that over a period of years the Commonwealth should contribute 70 per cent. and South Australia be responsible for the remaining 30 per cent. of the estimated cost.

As a further step towards standardization, a Committee consisting of members of the Federal Parliament was formed in March, 1956, to ascertain whether a scheme confined to the main trunk routes would be desirable. This Committee recommended in October, 1956, that standard gauge (4 ft. 8½ in.) lines be provided from Wodonga to Melbourne, from Broken Hill to Adelaide via Port Pirie and from Kalgoorlie to Fremantle via Perth.

Preparatory work in the field on the uniform gauge between Albury and Melbourne commenced in November, 1957. By January, 1962, work had progressed sufficiently to allow fast freight trains to commence a new service from Sydney to Melbourne. Passenger services over this new uniform gauge line commenced operation in April, 1962. Funds for this project were advanced by the Commonwealth to enable the work to proceed. An agreement was reached between the Commonwealth and the two States, New South Wales and Victoria, whereby the Commonwealth would meet 70 per cent. of the cost of unification and the two States would share equally the remaining 30 per cent., with the Commonwealth advancing the whole of the necessary funds initially, and the States' portion, plus interest, being repayable over 50 years. Legislation was enacted by the Commonwealth and the two State Governments in three separate Acts assented to towards the close of 1958. Estimated total cost for the project is £14,500,000.

5. Mileage Open for Traffic, all Lines.—Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the conveyance of passengers or the public conveyance of goods.

The greatest recorded route-mileage of government railways was 27,234 at 30th June, 1941. Although short lengths of line have been opened since that date, most railway construction is being confined to the duplication and electrification of existing main lines. The closure of other lines (mainly developmental branch lines whose retention would have been uneconomic) has resulted in a considerable decrease in route-mileage.

The following table shows the route-mileage of Commonwealth and State lines open in each State and Territory at various periods since the inauguration of railways in Australia in 1854.

GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN.

(Miles.)

At 30th June—	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(a) Excludes amounts paid for Commissioner's salary, government contributions under the Superannuation Act, Accident and Insurance Fund and proportion of salaries of Auditor-General's staff—total, £147,792.

A graph showing the route-mileage and traffic of government railways from 1870 to 1960–61 appears on page 547.

8. **Gross Earnings.**—(i) *General.* Gross earnings are composed of earnings from (a) coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) carriage of goods and livestock; and (c) rents and miscellaneous items. State Government grants are excluded. Details of these grants made during 1960–61 are shown in para. 11, page 533.

(ii) *Coaching, Goods and Miscellaneous Earnings.* (a) *Summary.* In the following table, gross earnings are shown for the years 1956–57 to 1960–61, together with earnings per average route-mile worked and per revenue train-mile.

(a) Excludes government grants; see para. 11, page 533.

(b) *Distribution.* The following table shows gross earnings for the year 1960–61 classified according to the three main sources of earnings together with the percentage of each source to total.

## GOVERNMENT RAILWAYS: DISTRIBUTION OF GROSS EARNINGS(a), 1960-61.

Railway System.	Gross Earnings. (£'000.)			Proportion of Total. (Per Cent.)		
	Coaching.	Goods and Livestock.	Miscellaneous.	Coaching.	Goods and Livestock.	Miscellaneous.
New South Wales ..	22,921	63,057	3,773	25.54	70.26	4.20
Victoria ..	13,577	26,582	2,828	31.58	61.84	6.58
Queensland ..	4,873	30,501	1,156	13.34	83.50	3.16
South Australia ..	2,071	10,906	893	14.93	78.63	6.44
Western Australia ..	1,596	13,940	781	9.78	85.43	4.79
Tasmania ..	192	2,456	84	7.05	89.88	3.07
Commonwealth ..	1,046	4,537	453	17.33	75.17	7.50
<b>Australia ..</b>	<b>46,276</b>	<b>151,979</b>	<b>9,968</b>	<b>22.22</b>	<b>72.99</b>	<b>4.79</b>

(a) Excludes government grants; see para. 11 on p. 533.

9. Working Expenses.—(i) *General.* In comparing the working expenses of the several States and Territories, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same system. When traffic is light, the proportion of working expenses to earnings is naturally greater than when traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading. Density or sparseness of population, area to be served, and alternative methods of transport available are other factors to be taken into account.

Working expenses, wherever presented in the Railways section of this chapter, include reserves for depreciation in South Australia, Western Australia and Tasmania but exclude interest, sinking fund, exchange and certain other payments (see para. 11 following).

(ii) *Working Expenses.* The following table shows the total working expenses, the ratio of working expenses to gross earnings and working expenses per average route-mile worked and per revenue train-mile for the years 1956-57 to 1960-61.

## GOVERNMENT RAILWAYS: WORKING EXPENSES.

1960-61 ..	1,682	317	- 315	- 568	- 201	- 1,525	625	301

## NET EARNINGS PER REVENUE TRAIN-MILE.

	(Pence.)							
1956-57 ..	21.63	-22.86	-13.00	-73.69	-93.27	-118.12	91.88	-12.71
1957-58 ..	13.02	-29.03	-28.07	-94.68	-108.17	-99.25	124.80	-22.06
1958-59 ..	32.93	0.40	-15.89	-78.24	-86.91	-79.29	139.08	-2.13
1959-60 ..	46.14	-4.62	-33.24	-89.44	-62.10	-85.93	131.43	0.18
1960-61 ..	64.56	17.90	-26.20	-50.06	-25.47	-128.67	144.17	20.33

(a) See para. 7, note (a), p. 530.

Note.—Minus sign (-) denotes loss.

A graph showing the gross and net earnings and working expenses from 1919-20 to 1960-61 appears on page 548.

11. Net Earnings, Grants to Railways, Interest, Sinking Fund, Surplus or Deficit, 1960-61.—The following table shows, for each railway system for the year 1960-61, (i) net earnings as in para. 10 above, (ii) State grants and other items credited to railways accounts, (iii) loan interest, exchange, sinking fund, etc., payments charged against the accounts, and (iv) the net surplus or deficit after these items have been taken into account. Particulars of items (ii) to (iv) are not included in the preceding tables in this section.

The figures shown in this table accord with those published in the Annual Reports of the Railways Commissioners of the several systems. Because of the differences in Governmental practice in regard to costs other than operative charged against railways accounts, compensation for non-paying and developmental lines, etc., and the inclusion in some railways finances of the operations of ancillary transport services, direct comparison can not, of course, be made between the results shown in the table.

GOVERNMENT RAILWAYS: SURPLUS OR DEFICIT AT 30th JUNE, 1961.

(£.)

System.	Net Earnings—Excess of Gross Earnings over Working Expenses.(a)	Plus Grants and other Income.	Less Other Expenses Charged to Railways.					Surplus (+) or Deficit (-).

(a) See para. 10, page 532. (b) Grants to meet losses on country development lines, £1,000,000 and to subsidize payments due from superannuation account, £800,000. (c) Kerang-Koondrook Tramway recoup from Treasury. (d) Net loss on road motor services not included in previous pages, £36,962 and charge to Railways Equalization Account £920,347. (e) Includes road motor services. (f) Adjustment for net loss on Queensland portion of Uniform Gauge Railway as included in foregoing tables. (g) Interest on unopened lines. (h) Excludes Queensland portion of Uniform Gauge Railway. (i) Grants towards working expenses, £3,500,000 and debt charges, £800,000, and net profit on Road Motors £4,128 not included in foregoing tables. (j) Interest and repayment under Railways Standardization Agreement. (k) Net loss on road motor services. (l) Includes salary of Railways Commissioner, Government contributions under Superannuation Act, expenditure from Railway Accident and Insurance Fund and proportion of salaries of Auditor-General's staff.

NOTE.—For further information on railways finance, in particular expenditure from loan and other funds, see Chapter XXI., Public Finance of this Year Book. See also the Reports of the several Railways Commissioners.

12. Traffic.—(i) General. Reference has already been made to the differing conditions of the traffic on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is located in a fringe of country near the coast, more especially in the eastern and southern districts, and a large proportion of the railway traffic between the chief centres of population is therefore open to competition from road and air transport.

The following table shows particulars of railway traffic for the years 1956-57 to 1960-61.

## GOVERNMENT RAILWAYS: TRAFFIC.

1959-60 ..	3,623	2,257	1,266	1,594	1,100	2,111	658	1,947
1960-61 ..	3,976	2,559	1,256	1,791	1,172	2,236	772	2,118

(a) Includes unremunerative passenger journeys.

(b) Partly estimated.

(ii) *Passenger Traffic.* With the exception of the Commonwealth Railway Systems, which operate only country services, all systems provide both suburban and country passenger services. Traffic classed as "suburban" moves between stations within a classified suburban area around each capital city, whilst traffic classed as "country" originates or terminates at stations outside of this suburban area. Particulars of suburban and country passenger traffic are shown separately in the two tables following.

(a) *Suburban Passenger Traffic.* The following table shows a summary of suburban passenger operations for the years 1956-57 to 1960-61. Most of the suburban services in New South Wales and Victoria are operated within electrified areas.

GOVERNMENT RAILWAYS: SUBURBAN PASSENGER SUMMARY.

Year.	Suburban Passenger-journeys.	Suburban Revenue Train-miles.	Suburban Passenger-miles.	Average Number of Passengers per Train-mile.	Average Mileage per Passenger-journey.	Suburban Passenger Earnings.			
						Gross.	Per Passenger-journey.	Per Passenger-mile.	Per Passenger Train-mile.
	('000.)	('000.)	('000.)		(Miles.)	(£'000.)	(Pence.)	(Pence.)	(Pence.)
