(a) Includes construction staff. (b) Included with operating staff. (c) Excludes Queensland portion of Uniform Gauge Railway. (d) Construction work is carried out by private contractors and the staff engaged is therefore not under the control of the Railway Commissioner. (e) Includes construction staff, Victoria.

**C. TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES.**

1. **Systems in Operation.**—(i) *Tramway and Trolley-bus.* Since 1st April, 1947, all systems have been operated by government or municipal authorities. During the year 1960–61 tramway systems were in operation in the following cities—Sydney (to February, 1961), Melbourne, Bendigo, Ballarat, Brisbane, Adelaide and Hobart (to October, 1960). Trolley-bus services operated in Brisbane, Adelaide, Perth, Hobart and Launceston. All systems were electric.

In many parts of Australia, private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Motor Omnibus.* Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities, Canberra, Newcastle, Maryborough, Rockhampton, Fremantle and the Eastern Goldfields area of Western Australia, and for country road services operated by the Western Australian Government Railways. In Sydney, the government tramway system has now been replaced by omnibus services, and in Perth the Metropolitan Passenger Transport Trust has acquired a number of formerly privately owned metropolitan services. In Hobart the Government trolley-bus and omnibus services have replaced the government tramway service.

Particulars of motor omnibus services under the control of private operators are recorded for the States of New South Wales, Victoria, Queensland, South Australia and Western Australia. In New South Wales, particulars of private services are compiled for the Sydney metropolitan and Newcastle transport districts and the city of Greater Wollongong. In Victoria particulars relate to the Melbourne metropolitan area only, and in South Australia to services licensed by the Metropolitan Transport Trust and the Transport Control Board. In Queensland they relate to all cities with a population of 10,000 or more persons. In Western Australia, particulars of all private services throughout the State are included.

2. Government and Municipal Services.—(i) *Summary of Operations, States.* Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor omnibus services, it is no longer possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. In this section, therefore, statistics of public tramway, trolley-bus and motor omnibus services are combined in single tables with separate details shown for each form of transport where possible.

Since October, 1960 the tramway gauge has been 4 feet 8½ inches throughout.

The following table gives a summary of the operations of tramway, trolley-bus and omnibus systems controlled by Government and Municipal authorities, for 1960–61.

TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES: GOVERNMENT  
AND MUNICIPAL, 1960–61.

1960–61..	..	92	3,358	8,914	257	514	215

(a) Metropolitan, Newcastle and Wollongong transport districts only. (b) Nine months ended March, 1961. (c) Metropolitan area only. (d) Vehicles only. (e) Drivers only. (f) Partly estimated. (g) Services licensed by the Metropolitan Transport Trust and the Transport Control Board. (h) Not available. (i) Includes 156 Transport Control Board licensed omnibuses previously excluded. (j) Includes services operated in metropolitan and rural areas. (k) During 1958–59, five private services were taken over by the Metropolitan Transport Trust.

## D. FERRY (PASSENGER) SERVICES.

1. **General.**—Ferry passenger services are operated in the following States—New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Derwent River at Hobart, on the Mersey River at Devonport and across D'Entrecasteaux Channel to Bruny Island. Control is exercised both by governmental authorities and by private operators. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

2. **Summary of Operations.**—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1956–57 to 1960–61 are summarized in the following table. Particulars of vehicular ferries are not included.

## FERRY (PASSENGER) SERVICES.

## E. MOTOR VEHICLES.

1. **Motor Industry.**—Chapter VI.—Manufacturing Industry contains summarized information on the motor industry of Australia and includes some data on the imports of motor bodies and chassis. Chapter XIII.—Trade contains further data on imports, including those of petroleum products.

2. **Registration.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30th June, 1960, were given in Official Year Book, No. 47, pp. 553–6.

3. **Taxi-cabs and Other Hire Vehicles.**—In all the capital cities and in most of the provincial centres, taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned, but particulars of their operations are not available.

4. **Motor Omnibuses.**—In both urban and provincial centres, motor omnibus traffic has assumed considerable proportions during recent years, and in some States the railway and tramway systems run motor services complementary to their main services. There has been a considerable replacement also, during the last few years, of existing tramway services by trolley-bus and motor omnibus services. (See page 540.)

5. Motor Vehicles on the Register, etc.—(i) *Registrations and Revenue.* The following table shows particulars of the registration of motor vehicles, licences issued and revenue received for 1960–61 and a summary for Australia for each of the years 1956–57 to 1960–61. It should be noted that in Victoria registration is made on the basis of the purpose for which the vehicle is to be used; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

A graph showing, for all motor vehicles other than motor cycles, the registrations in force at 30th June of each year from 1935 to 1961 will be found on page 549.

MOTOR VEHICLES: REGISTRATIONS AND REVENUE.

6. **New Vehicles Registered.**—(i) *States and Territories, 1960–61.* The following table shows the number of new vehicles registered in each State and Territory during 1960–61. This series has been revised and is not strictly comparable with the "On Register" series. A graph showing the number of new motor vehicles (excluding motor cycles) registered during each of the years 1935–36 to 1960–61 will be found on page 549.

**NEW MOTOR VEHICLES REGISTERED, 1960-61.(a)**

Vehicles.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

<b>Total .. ..</b>	<b>214,829</b>	<b>238,363</b>	<b>252,686</b>	<b>302,824</b>	<b>290,190</b>

(a) This series has been revised and is not strictly comparable with the "On Register" series. (b) Includes utilities, panel vans, trucks, omnibuses and ambulances.

7. **World Motor Vehicle Statistics, 1961.**—At 1st January, 1962, there were 135,220,800 motor cars, trucks and omnibuses registered in various countries of the world. This is an increase of 5.6 per cent. on the figure for the previous year, 128,035,000. Of the 1962 registrations, 75,880,000 or 56.1 per cent. of the world total were in the United States of America, whilst Australian registrations amounted to 2.1 per cent. This information is largely derived from the *Automobile International*, May, 1961.

**F. ROADS AND BRIDGES.**

Information on the length of roads in Australia, the class of roads and the composition, together with particulars of the financial operations of the roads authorities in the several States is included in Chapter XIX.—Local Government, of this Year Book.

**G. ROAD TRAFFIC ACCIDENTS.**

**§ 1. Accidents Reported.†**

1. **General.**—Statistics of "Total Accidents Recorded" were collected to 31st December, 1957, on a comparable basis for all States except Tasmania, where, under legislation passed on 10th August, 1954, it became no longer obligatory to report accidents involving only damage to property. However, this series was suspended from 1st January, 1958, owing to the inconsistency between States in recording "damage only" accidents.

Details are not available in respect of road traffic accidents which occur in the Northern Territory.

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for the year 1960-61, the number of accidents involving casualties in which each of several classes of vehicles, road users, etc., were involved. The persons killed and injured are similarly classified. As in the table in sub-paragraph (ii) above, responsibility for cause of accident is not indicated by this classification.

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED: AUSTRALIA, 1960-61.

Particulars.	Motor Vehicle.	Motor Cycle.	Pedal Cycle.	Tram.	Animal and Animal-drawn Vehicle.	Pedestrian.	Fixed Object.	Other Vehicle.
Accidents Involving								
Casualties .. ..	42,471	5,269	4,086	283	364	8,968	2,928	247
Persons Killed .. ..	2,452	148	143	17	8	793	201	68
Persons Injured .. ..	57,814	5,975	4,142	362	426	8,735	4,025	387

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

NOTE.—As accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals.

The 42,471 accidents involving casualties in which motor vehicles were involved comprised 14,936 collisions with other motor vehicles, 3,505 with motor cycles, 3,476 with pedal cycles, 107 with trams, 211 with animals and animal drawn vehicles, 8,431 with pedestrians, 2,640 with fixed objects, 201 with vehicles other than those mentioned, 8,538 instances of overturning or leaving the roadway, and 426 accidents to passengers only.

3. Road Traffic Accidents Involving Casualties, and Persons Killed or Injured.—The following table shows the number of road traffic accidents involving casualties and persons killed or injured in road traffic accidents in each State and the Australian Capital Territory during each of the years 1956-57 to 1960-61.

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a) AND PERSONS KILLED OR INJURED.

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

## § 2. Road Safety Organizations.

1. The National Safety Council of Australia.—The National Safety Council of Australia was founded in Melbourne in 1927 with the object of developing, mainly by education, safety in all spheres—on the road, in industry, in the home and on the farm. The Council's functions thus extend beyond the development of road safety, but, because of its work in this sphere a description of its activities has been included here. It is a non-profit making organization supported by Government grants, public subscriptions and payments for service. Its work is carried out by a small staff controlled by committees and governed by an executive.

In 1959, the Council's work in industrial safety was consolidated and expanded by the formation of an Advisory Committee composed of leading industrialists with Australia-wide associations, and the Council is now being reorganized on a national basis. A strong Advisory Committee has been established in New South Wales, and action is being taken to register the Council's national headquarters in Canberra. In addition to the Industrial Safety Service of posters, slips for pay envelopes and the bi-monthly journal "Safety News", available to industry by subscription, the Council's Industrial Safety Division also provides advice on setting up safety programmes, information on safety problems, safety surveys of plant and works, safety instruction for foremen, technical library facilities, and safety service to small factories.

In Victoria, the Road Safety Division undertakes campaigns, lectures and film screenings to schools and organizations. Posters and literature are distributed to schools in connexion with road safety lessons, and special films are available on loan for child and adult road safety instruction. With the co-operation of other interested organizations, the Road Safety Division undertakes School Driver Training courses in various Melbourne schools. This scheme is proving most successful and it is hoped to expand it greatly. A "Safe Driving" campaign for individual motor drivers and a "Freedom from Accidents" campaign for employee drivers are conducted, and those completing a year free from any accident for which they were responsible are given a certificate or award in recognition.

2. **Australian Road Safety Council.**—(i) *Origin, Objectives and Organization.* The Australian Road Safety Council was formed in 1947 by the Australian Transport Advisory Council, which comprises Commonwealth and State transport ministers and Commonwealth ministers with associated interests, to conduct a nation-wide programme of public education. It was re-constituted in February, 1961, by the Australian Transport Advisory Council, in order to provide a smaller, more effective, organization.

The objectives of the reconstituted Council are—

- (a) To conduct a continuous programme of public education, aimed at improving the knowledge, skills, attitudes and practices of all classes of road users;
- (b) To encourage a better understanding and observance of State and Commonwealth traffic laws by road users;
- (c) To stimulate greater public interest, support and active participation in road accident prevention;
- (d) To co-ordinate, in a balanced programme, the Commonwealth and State public education campaigns, and to integrate with these campaigns the support accorded by non-governmental bodies and the general public;
- (e) To collect, collate, publish and distribute educational and informative data regarding road accidents; and
- (f) To advise on specific road safety matters referred to it by the Australian Transport Advisory Council.

The Australian Road Safety Council comprises 16 members, representing the Commonwealth and State Governments and the major categories of organized road users. It meets approximately three times each year and has established a number of temporary sub-committees to investigate and report upon particular aspects of its activities. Its first meeting was held in Hobart on April 10th and 11th, 1961.

The Department of Shipping and Transport provides the central executive for the Council. Each section represented on the Australian Road Safety Council—Commonwealth, State and community/commercial—exercises full control over its own activities. One of the Council's principal functions is to co-ordinate the Commonwealth and State public education campaigns and to integrate with these campaigns the support accorded by commerce, industry, and community service organizations.

A sum of £150,000 is provided annually by the Commonwealth Department of Shipping and Transport for the promotion of road safety practices; £50,000 is distributed to the State Governments for public education in road safety, and the remaining £100,000 is used for the national public education campaign. The £50,000 grant to the States is allocated in the following proportions:—New South Wales, £12,500; Victoria, £10,000; Queensland, £9,250; South Australia, £6,250; Western Australia, £8,250; Tasmania, £3,750.

(ii) *Mode of Operation.* The media used by the Australian Road Safety Council in its national campaigns include metropolitan daily press and metropolitan radio and television, platform and pulpit, plus a wide variety of posters, pamphlets, booklets, publications and films. Close liaison is maintained with State and Commonwealth educationists in the preparation and distribution of road safety instructional material for schools.

The Council, through its Central Executive in the Department of Shipping and Transport, works in close collaboration with two companion Committees, established by the Australian Transport Advisory Council. These are the Australian Road Traffic Code Committee, which is charged with the responsibility of drafting recommendations for uniform road traffic laws throughout the Commonwealth in keeping with modern traffic requirements, and the drafting of a complete National Road Traffic Code suitable for adoption in all States and Territories; and the Australian Motor Vehicle Standards Committee, which devises national standards for the construction, equipment, and operational efficiency of all road vehicles.

Because of the great increases in population and vehicle numbers, the exposure to risk of road users is considerably greater today than ever before. This is the basic problem confronting the Australian Road Safety Council, and in its efforts to deal with it, the Council has recognized the consideration that, notwithstanding advances in road and vehicle design and traffic laws, road safety still remains essentially a problem of human behaviour.

The primary aim of road accident prevention, as envisaged by the Council, is thus to create a state of mind under which all classes of road users realize the imminence and consequence of road accidents, and are willing to accept the restraints necessary to prevent them. It is the Council's belief that, for the most part, this can best and often only be done effectively through education in the broad and practical sense, by improving knowledge, skill, attitudes and habits of all classes of road users, and by creating a public conscience about road accidents.

## H. CIVIL AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration was published in Official Year Book No. 16, pages 334–5, and a brief account of the foundation and objects of this Administration was published in Official Year Book No. 19, page 299. Official Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

The Department of Civil Aviation is divided in twelve Divisions as follows:—Air Transport; International Relations; Administration, Personnel and Establishments; Finance and Stores; Airport Engineering; Aviation Buildings and Property; Flying Operations; Airworthiness; Airways Operations; Airways Engineering; Aviation Medicine; Accident Investigation and Analysis.

2. **International Activity.**—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appeared in Official Year Book No. 37 and particulars of subsequent activity in the international field were included in issue No. 38. The International Civil Aviation Organization had a membership of 90 nations at the 31st December, 1961. Australia has continued her representation on the Council, a position which she held since I.C.A.O. was established in 1947. The fourteenth meeting of the South Pacific Air Transport Council was held in Melbourne in November, 1960. Further details will be found in Official Year Book No. 40 and earlier issues.

(ii) *International Agreements.* The following agreements between Australia and other countries for the use by Australia of certain overseas routes and reciprocal routes granted in return were in force at 30th June, 1961.

*Canada.*—An Australian route via intermediate specified points to Vancouver; a Canadian route via intermediate specified points to Sydney.

*United States of America.*—Australian routes via intermediate points to San Francisco and beyond to Vancouver, and also beyond San Francisco to New York, the British Isles, Europe and beyond; American routes via intermediate points to various points in Australia and beyond.

*Pakistan.*—Australian routes via specified intermediate points to Karachi and optionally beyond via specified points to the United Kingdom; Pakistan routes via specified intermediate points to Darwin and Sydney.

*India.*—Australian route via specified intermediate points to Calcutta or Delhi and any other points in India to be agreed upon and beyond; Indian route via specified intermediate points to Sydney and Melbourne and/or any other point in Australia to be agreed upon and beyond.

*Ceylon.*—An Australian route via specified intermediate points to Ceylon and beyond via specified points to the United Kingdom; Ceylonese route from Ceylon via intermediate points to Darwin and Sydney.

*Netherlands.*—Australian routes (1 and 2) from Australia via specified intermediate points to Amsterdam and beyond to London; and (3 and 4) from Australia or New Guinea to Netherlands New Guinea; Netherlands routes (1 and 2) from Amsterdam via specified intermediate points to Darwin and Sydney; and (3 and 4) Netherlands New Guinea to Australia or Lae and/or Port Moresby.

- Egypt (now United Arab Republic).*—Australian routes via specified intermediate points to Cairo and beyond via specified points to the United Kingdom; an Egyptian route to be agreed.
- Lebanon.*—Australian routes via specified intermediate points to Beirut and beyond via specified points to London; a Lebanese route from Lebanon via specified intermediate points to Darwin and Sydney.
- South Africa.*—An Australian route from Australia via specified intermediate points to Johannesburg; a South African route from South Africa via specified intermediate points to Perth.
- Japan.*—Australian routes from Australia via specified intermediate points to Tokyo; Japanese routes from Japan via specified intermediate points to Darwin and Sydney.
- Germany.*—An Australian route from Australia via specified intermediate points to Frankfurt and beyond to Holland and/or United Kingdom; a German route from Germany via intermediate specified routes to Darwin and Sydney.
- Ireland.*—An Australian route via Fiji to Shannon and beyond; Ireland was given a reciprocal route to Australia and beyond.
- United Kingdom.*—Australia was given a variety of routes from Australia east about and west about to the United Kingdom and to United Kingdom territories; the United Kingdom was given various routes east about and west about into various points in Australia.
- Malaya.*—An Australian route via specified intermediate points to Kuala Lumpur and Penang and beyond; a Malayan route from Malaya via specified intermediate points to Darwin and Perth.
- Thailand.*—An Australian route via intermediate specified points to Bangkok and beyond to specified points and beyond; a Thai route from Thailand via specified intermediate points to Darwin and Sydney.

(iii) *International Air Services.* Qantas Empire Airways Ltd. has an operational fleet of 11 Boeing 707 jet aircraft, 4 Lockheed Electras and 7 Lockheed Super Constellations. The Boeings operate to the United Kingdom via North America and via the Middle East, and to Hong Kong, Japan and Noumea. The Electras are used on services to New Zealand and Fiji, and the Super Constellations on the South Africa service and on cargo services. Qantas was operating aircraft over 68,080 route miles on international services at 30th September, 1961. A summary of the operations of oversea services wholly or partly Australian-owned appears on page 560.

Three Lockheed Electra aircraft operated by Tasman Empire Airways Ltd., link Sydney with Auckland, Christchurch and Wellington; Melbourne with Auckland and Christchurch; and Brisbane with Auckland.

**3. Australian National Airlines Commission.**—The Commonwealth Australian National Airlines Act 1945 constituted the Australian National Airlines Commission for the purpose of establishing, maintaining and operating airline services for the transport of passengers and goods between Australian States and/or Territories and within Australian Territories. The Commission may, with the approval of the Minister, undertake services between Australia and places outside Australia, and, in certain circumstances, may engage in intra-state operations.

The operating organization set up to give effect to the Act is Trans-Australia Airlines.

**4. Regular Air Services within Australia.**—Details of the Government's rationalization scheme and the 1957 amendment to the Civil Aviation Agreement Act consequent upon Ansett Transport Industries Ltd. purchasing Australian National Airways Pty. Ltd. was published in Official Year Book No. 44, pages 420 and 421. The financial and rationalization provisions of the earlier Acts were varied as a result of the Civil Aviation Agreement Act 1961 which extended the operation of rationalization of domestic services to 1977.

The Airlines Equipment Act, assented to in October, 1958, gave effect to financial arrangements whereby re-equipment programmes would be assisted. An important example of this re-equipment programme was the introduction of Fokker Friendship and Lockheed Electra aircraft into regular air services within Australia. This Act has been affected by the Airlines Agreement Act 1961 to secure its continual application to the two major domestic airlines for the term of the Civil Aviation Agreement Act 1961.

A summary of the operations of regular air services within Australia appears on page 560.

**5. Air Ambulance Services.**—A brief statement on the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pages 145 and 146.

During the year 1960-61, the Air Ambulance and Royal Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Royal Flying Doctor Service of Australia, operating from Broken Hill, New South Wales, Cloncurry, Queensland, and Alice Springs, Northern Territory (operated in conjunction with the Department of Health), covers a wide area of inland Australia. The Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, operates from Ceduna in South Australia. The federal Methodist Inland Mission operates services from Meekatharra, Western Australia, and the Queensland Ambulance Transport Brigade operates a service from Cairns in Queensland. Recently a Flying Surgeon Service came into operation in Queensland.

For further information *see* Chapter XVII.—Public Health.

**6. Training of Air Pilots.**—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, page 146, and details of further assistance granted are given in subsequent Year Books. Year Book No. 44, page 421, contains particulars of the existing system of maintenance grants for hours flown and bonus payments for licences obtained.

During the year 1960-61, the flying training organizations (non-profit aero clubs and commercial flying schools) earned bonuses in respect of 383 private pilot licences, 108 commercial pilot licences and 45 initial instructor ratings. Subsidized hours flown by aero clubs and flying schools numbered 88,392, and the total earnings of all organizations amounted to £197,554. An overall limit placed on the subsidy restricted the total payments to £145,000. There were 37 aero clubs and 16 commercial flying training schools in operation during the year, and, in addition to subsidized civil flying, some 25,723 unsubsidized civil hours and 3,812 service training hours were flown; in all, a total of 117,927 hours.

**7. Gliding Clubs.**—For the year 1960-61, a total subsidy of £3,000 was distributed to member clubs of the Gliding Federation of Australia, on the basis of £1,500 for membership and £1,500 for gliding certificates issued. In addition, the Federation received a grant of £1,000 towards the cost of operation of its school for instructors and engineers.

During 1960-1961 there were 1,037 flying members operating 75 gliders which flew approximately 5,300 hours and recorded 36,000 launchings.

**8. Airways Engineering.**—In the field of airways engineering, which includes the provision of radio navigation facilities, radiocommunication systems, and airport lighting systems, steady progress has continued through 1960-61. The plan for the extension of radiocommunication networks and navigational facilities to cater for increases in traffic, number of aircraft and speed of aircraft has further progressed.

During 1960-61 the following main portions of the plan were completed.

- (a) V.H.F. repeater stations at Mount Major (Vic.) and Pt. Lookout (N.S.W.). Mount Major extends direct speech with aircraft from Melbourne as far as Canberra, while Pt. Lookout provides direct speech to aircraft on the Sydney-Brisbane air route.
- (b) Perth international transmitting station.
- (c) Madang remote transmitting station.
- (d) The following radio navigational aids were installed:—3 distance measuring beacons, 8 non-directional beacons, 1 visual aural range, 1 visual omnirange and 2 instrument landing systems. Two long range surveillance radars have been ordered for Sydney and Adelaide.

In the field of air traffic control engineering new communication centres were installed at Adelaide and Charleville and a new traffic control centre at Brisbane. In the field of airport lighting a high intensity approach lighting system was installed at Cairns, 2 visual approach slope indicators at Sydney and 6 airport lighting systems at country aerodromes.

**9. Meteorological Services.**—The Department of Civil Aviation is the greatest user of meteorological services in the Australian Commonwealth and its territories, and therefore the requirements for civil aviation purposes have played a big part in determining the form of meteorological organization that exists at the present time. The Department and the

Commonwealth Bureau of Meteorology have completed working arrangements designed to meet the very precise requirements of modern civil aviation in Australia, which specify the standards of service, times and places of operation and facilities required for the provision of meteorological services for civil aviation.

10. Search and Rescue.—The Department of Civil Aviation has assumed responsibility for co-ordination of search and rescue activity throughout all Australian flight information regions, and also arranges for the availability of search and rescue facilities.

Particulars of systems and methods of operation are given in the statement following.

**DEPARTMENT OF CIVIL AVIATION: SEARCH AND RESCUE POLICY.**

Function.	Civil Aircraft.		Military Aircraft.	
	Responsibility.	Assistance where Necessary.	Responsibility.	Assistance where Necessary.
Overall Co-ordination of Land, Sea and Air Search	D.C.A.	..	R.A.A.F.	..

11. **Statistical Summaries.**—(i) *Registrations, Licences, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June in each of the years 1957 to 1961.

**CIVIL AVIATION: REGISTRATIONS, LICENCES, ETC., AUSTRALIA.(a)**

Particulars.	At 30th June—				
	1957.	1958.	1959.	1960.	1961.
Registered aircraft owners ..	485	570	642	745	850
Registered aircraft ..	1,054	1,180	1,246	1,360	1,502
Pilots' Licences—					
Private ..	2,592	2,628	2,801	3,001	3,206
Private Helicopter ..	..	..	..	..	2
Commercial ..	709	845	910	948	973
Senior Commercial ..	99	100	130	132	147
Helicopter (Commercial) ..	21	18	17	30	34
Student ..	3,397	3,489	3,461	3,696	4,151
Student Helicopter ..	..	4	4	14	10
1st Class Airline Transport	606	656	652	618	659
2nd „ „ „	7	} (b) 389	389	418	471
3rd „ „ „	414				
Navigators' Licences—					
Flight Navigator ..	187	176	177	168	142
Radio Operators' Licences—					
1st Class Flight Radio-Tele- graphy Operator ..	69	63	56	55	43
Flight Radio-Telephone Operator ..	1,574	1,823	2,203	2,651	3,679
Flight Engineers' Licences ..	116	176	189	193	200
Aircraft Maintenance Engineers' Licences ..	1,915	2,016	2,266	2,382	2,492
Aerodromes, Australia—					
Government(c) ..	169	168	168	149	132
Licensed(d) ..	313	311	304	323	351
Flying Boat Bases(e) ..	13	13	13	13	13

(a) Except for aerodromes and flying-boat bases, includes the Territory of Papua and New Guinea.  
 (b) 3rd class abolished, and existing 3rd class licences became 2nd class. (c) Under the control and management of the Department of Civil Aviation. (d) Aerodromes under the control and management of a municipality, shire, station owner, private individual, etc. Includes emergency aerodromes.  
 (e) Includes alighting areas.

(ii) *Types of Aircraft on the Australian Register.* At 31st December, 1961, there were 1,545 aircraft on the Australian register, including aircraft based in New Guinea and Papua. Of these, 185 were engaged in regular public transport, and included 11 Boeing 707, 4 Bristol Freighter, 5 Convair 440, 63 Douglas DC3, 7 Douglas DC4 (Skymaster), 4 Douglas DC6B, 20 Fokker Friendship, 10 Lockheed Electra, 8 Lockheed Super Constellation, and 21 Vickers Viscount. At the same date there were 351 aircraft available for charter, including 18 Auster, 198 Cessna, 33 de Havilland and 52 Piper. Aircraft used for private purposes numbered 643, of which Auster (156), Cessna (145), and de Havilland (142) were the most numerous. Aircraft used for purposes such as flying school training, aerial agricultural work, etc., numbered 366, of which de Havilland (224) were the most numerous, including 151 DH82 Tiger Moth.

(iii) *Types of Gliders on the Australian Register.* At 31st December, 1961, there were 122 gliders on the Australian register: 51 were two-seater trainers, 62 were single-seater medium performance gliders, 9 were single-seater high performance gliders.

(iv) *Operations of Regular Internal Services.* The next table summarizes the flying activities of regular internal services operating within Australia during each of the years 1956-57 to 1960-61.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES,  
AUSTRALIA.(a)**

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Hours flown .. .. .	251,139	237,981	229,396	225,050	219,918
Miles .. .. .	42,120	40,533	40,287	43,199	42,301
Paying passengers .. .. .	2,125,338	2,122,794	2,235,070	2,660,412	2,639,080
Paying passenger-miles .. .. .	891,196	898,542	944,379	1,132,517	1,109,552
Freight—					
Tons(b) .. .. .	75,092	70,003	62,755	65,402	62,971
Ton-miles(b).. .. .	36,330	32,987	28,841	29,240	28,220
Mail—					
Tons(b) .. .. .	2,514	2,642	2,727	4,825	5,956
Ton-miles(b).. .. .	1,404	1,446	1,472	2,567	3,064

(a) Includes only services operating within the Australian mainland and Tasmania. (b) In terms of short tons (2,000 lb.).

(v) *Operations of Oversea Services wholly or partly Australian-owned.* The following table furnishes a summary of overseas services, wholly or partly owned by Australian interests, during the years 1956-57 to 1960-61. This table incorporates aggregate particulars of all traffic originating on overseas services of Qantas Empire Airways Limited and Tasman Empire Airways Limited, which, in the case of Qantas, includes considerable traffic which does not enter Australia. The transfer of the Australian Government's shares in Tasman Empire Airlines to the New Zealand Government on 25th July, 1961, made TEAL a wholly New Zealand owned airline. Thus statistics of the operations of TEAL will not be shown in Australian statistics after 1960-61. An air services agreement was signed whereby air traffic rights into and through the two countries were exchanged at the same time, and on 1st October, 1961, both airlines commenced joint scheduling arrangements for Trans-Tasman services. The table also includes traffic between Australia and Papua, New Guinea, and Norfolk Island.

**CIVIL AVIATION: OPERATIONS OF OVERSEA SERVICES.(a)**

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Route miles (unduplicated) at 30th June ..	62,675	71,729	74,704	76,125	72,290
Hours flown .. .. .	56,939	63,917	68,811	54,668	57,385
Miles .. .. .	13,514	15,267	16,486	16,992	20,068
Paying passengers .. .. .	155,618	164,634	176,120	232,714	291,258
Paying passenger-miles .. .. .	476,831	501,388	534,728	720,099	847,713
Freight—					
Tons(b) .. .. .	2,957	3,205	3,431	5,150	6,575
Ton-miles(b).. .. .	11,203	12,051	15,381	24,625	30,134
Mail—					
Tons(b) .. .. .	1,622	1,749	1,647	2,015	2,335
Ton-miles(b).. .. .	9,450	9,789	8,834	10,351	11,269

(a) Airlines wholly or partly owned by Australian interests. (b) In terms of short tons (2,000 lb.).

(vi) *Accidents and Casualties.* The number of accidents involving aircraft on the Australian register, in which persons were killed or injured, is shown in the following table for the years 1956-57 to 1960-61.

**CIVIL AVIATION: AUSTRALIAN AIRCRAFT<sup>(a)</sup>, ACCIDENTS INVOLVING CASUALTIES.**

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Number .. ..	37	35	39	43	40
Persons killed .. ..	24	28	21	44	28
Persons injured .. ..	36	31	30	42	38

<sup>(a)</sup> Aircraft on Australian register and gliders irrespective of location of accident.

12. **Territory of Papua and New Guinea.**—For brief particulars of civil aviation in Papua and New Guinea *see* Chapter V.—The Territories of Australia, pages 138 and 147.

**I. POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SERVICES.**

NOTE.—In this Division particulars for the Australian Capital Territory are included with those for New South Wales, while the South Australian figures include particulars for the Northern Territory unless otherwise indicated.

**§ 1. General.**

1. **The Postmaster-General's Department.**—Under the provisions of the Post and Telegraph Act 1901, the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 572-4), and co-operates with the Overseas Telecommunications Commission (*see* page 569) in providing facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment, and military allotments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, and the collection of land tax.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1961.

**POSTAL FACILITIES: RELATION TO AREA AND POPULATION AT 30th JUNE, 1961.**

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.

5. Profit or Loss, Postmaster-General's Department.—The foregoing statements of gross revenue and expenditure represent actual collections and payments made, and cannot be taken to represent the actual results of the working of the Department for the year. The net results for each branch, after providing for working expenses (including superannuation, pensions and depreciation) and interest charges including exchange, are shown in the following table for the years 1959–60 and 1960–61.

**POSTMASTER-GENERAL'S DEPARTMENT: PROFIT OR LOSS, BRANCHES.**

(a) Includes postal service plant, miscellaneous plant, furniture and office equipment.

The net value of the fixed assets of the Postmaster-General's Department has increased by nearly 52 per cent. from £357,906,000 at 30th June, 1957 to £543,366,000 at 30th June, 1961.

## § 2. Posts.

1. Postal Matter Dealt With.—(i) *States*, 1960–61. The following table shows a summary of the postal matter dealt with in each State during the year 1960–61. Mail matter posted in Australia for delivery therein is necessarily handled at least twice, but only the number of distinct articles handled is included in the following table.

## POSTAL MATTER DEALT WITH(a), 1960–61.

('000.)

State.	Letters.	News- papers and Packets.	Parcels.	Regis- tered Articles.	Letters.	News- papers and Packets.	Parcels.	Regis- tered Articles.

Australia ..	97,243	58,663	988	1,555	1,700,544	318,614	15,976	12,935

(a) Number of distinct articles handled. (b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters. (c) Includes newspapers and postal articles not included in letter mail. (d) Includes registered, cash on delivery and duty parcels. (e) Includes registered articles other than parcels.

(ii) *Australia*. The next table shows the total postal matter dealt with in Australia in relation to the mean population during each of the years 1956–57 to 1960–61.

## TOTAL POSTAL MATTER DEALT WITH: AUSTRALIA.

Year.	Letters, Postcards and Letter-cards.		Newspapers and Packets.		Parcels.(a)		Registered Articles other than Parcels.	
	Total ('000.)	Per 1,000 of Mean Popula- tion.	Total ('000.)	Per 1,000 of Mean Popula- tion.	Total ('000.)	Per 1,000 of Mean Popula- tion.	Total ('000.)	Per 1,000 of Mean Popula- tion.
1956–57 ..	1,443,337	151,372	306,417	32,136	16,998	1,783	17,007	1,784
1957–58 ..	1,538,509	157,865	323,684	33,213	17,726	1,819	15,566	1,597
1958–59 ..	1,599,400	160,702	317,633	31,914	18,903	1,899	15,156	1,523
1959–60 ..	1,602,830	157,619	319,831	31,452	16,433	1,616	13,671	1,344
1960–61 ..	1,700,544	163,656	318,614	30,662	15,976	1,537	12,935	1,249

(a) Includes registered, cash on delivery and duty parcels.

During 1960–61, the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—road £4,014,000; railway £1,252,000; sea £218,000; air—internal £1,195,000, oversea £5,156,000; Grand Total £11,835,000.

2. **Cash on Delivery Parcels Post.**—The Postmaster-General's Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcels post within Australia, or between Australia and Norfolk Island, Nauru, the Territory of Papua and New Guinea, or Fiji, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and of traders and others who do not wish their goods to be delivered except on payment.

There were 372,000 such parcels posted in Australia during 1960–61 valued at £1,487,000, and the revenue derived from commission and postage thereon amounted to £152,000. Both number and value of these parcels have decreased substantially and with little interruption in trend since the peak reached in 1950–51 (1,155,000 parcels valued at £2,933,000).

3. **Money Orders and Postal Notes.**—The issue of money orders and postal notes is regulated by sections 74–79 of the Post and Telegraph Act 1901–1950. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the dollar area is £A.5 a month and for remittances to countries outside the dollar area, £A.10 a week. A postal note is not available for a sum larger than twenty shillings.

The following table shows the number and value of money orders and postal notes issued in Australia in each of the years 1956–57 to 1960–61.

#### MONEY ORDERS AND POSTAL NOTES: TRANSACTIONS, AUSTRALIA.

Year.	Money Orders.			Postal Notes.		
	Issued.		Net Commission Received.	Issued.		Poundage Received.
	Number.	Value.		Number.	Value.	
	'000.	£'000.	£'000.	'000.	£'000.	£'000.
1956–57.. ..	8,127	74,542	551	20,332	9,493	377
1957–58.. ..	8,668	78,411	581	18,937	9,155	340
1958–59.. ..	9,420	87,034	643	18,012	8,845	347
1959–60.. ..	9,535	94,335	805	16,492	8,380	324
1960–61.. ..	9,653	100,760	867	15,959	8,194	307

Of the total money orders issued in Australia during 1960–61, 9,226,000 valued at £99,386,000 were payable in Australia, and 427,000 valued at £1,374,000 were payable overseas. Of the total money orders paid in Australia during 1960–61, 9,354,000 (£99,648,000) were issued in Australia, and 167,000 (£968,000) were issued overseas.

Of the total postal notes paid in Australia during 1960–61, 15,920,000 valued at £8,163,000, 11,340,000 (£6,056,000) were paid in the State in which issued, and 4,580,000 (£2,107,000) were paid in States other than in which issued.

### § 3. Telegraphs.

1. **General.**—A review of the development of telegraph services in Australia up to 1921 appeared in Official Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. During the past few years substantial improvements in both the speed and grade of telegraph services throughout Australia have been effected, the entire system being subjected to intensive re-organization, and these matters have been dealt with in some detail in recent issues of this Year Book.

2. **Telegraph and Telephone Mileage.**—At 30th June, 1961, the combined single-wire mileages for both telegraph and telephone purposes were:—aerial, underground and submarine cables, 8,982,000 miles; trunk telephone and telegraph cables, 336,000 miles; aerial wires, 1,366,000 miles. There were 122,000 miles of pole routes. Joint use is made of poles for power and telephone reticulation.

3. **Telegraph Offices.**—The numbers of telegraph offices, including railway telegraph offices, in the various States at 30th June, 1961, were:—New South Wales, 2,922; Victoria, 2,294; Queensland, 1,733; South Australia, 986; Western Australia, 966; Tasmania, 522; total, 9,423.

4. **Telegrams Dispatched within Australia.**—The following table shows the number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea, according to the class of message transmitted.

## TELEGRAMS DISPATCHED, 1960-61.

('000.)

State.	Paid and Collect.							Unpaid (Departmental).	Total Telegrams.
	Ordinary.	Meteorological.	Urgent.	Radio-grams.	Press.	Letter-grams.	Total.		
New South Wales	6,123	226	268	65	50	23	6,755	241	6,996
Victoria ..	3,665	148	149	6	20	10	3,998	137	4,135
Queensland ..	3,154	204	106	85	38	21	3,608	130	3,738
South Australia	1,478	103	38	16	20	19	1,674	57	1,731
Western Australia	1,427	150	20	78	13	18	1,706	40	1,746
Tasmania ..	424	55	11	1	4	7	502	26	528
<b>Australia ..</b>	<b>16,271</b>	<b>886</b>	<b>592</b>	<b>251</b>	<b>145</b>	<b>98</b>	<b>18,243</b>	<b>631</b>	<b>18,874</b>

The number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea has decreased with few interruptions of trend since the peak of 35,970,000 in 1945-46.

5. **International Telegrams.**—For particulars of telegrams received from, and dispatched to, other countries, see § 5, para. 2, p. 569.

## § 4. Telephones.

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. Particulars of the total single wire mileage used for telephone, trunk and/or telegraph purposes are shown in § 3, para. 2, above. Developments in the telephone system in recent years have been dealt with in previous issues of this Year Book.

In June, 1959, work was commenced on a coaxial cable link between Sydney, Canberra and Melbourne, and in April, 1962, this link was completed at a cost of approximately £5 million and was immediately placed in service. This 599 mile long cable contains three pairs of tubes, each pair being capable of carrying 1,260 simultaneous telephone conversations or one television programme between the three cities. The cable has a repeater station every six miles and has made possible subscriber trunk dialling from Canberra to Sydney.

2. **Summary.**—Particulars relating to the telephone services in each State at 30th June, 1961 are shown in the following table.

**TELEPHONE SERVICES: SUMMARY, 30th JUNE, 1961.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Exchanges .. .. .	2,171	1,764	1,337	739	767	383	7,161
Services in operation .. '000	631	509	206	144	92	49	1,631
Instruments connected .. '000	889	708	277	199	126	67	2,266
(i) Subscribers' instruments '000	871	692	268	193	122	64	2,210
(ii) Public telephones .. '000	9	6	4	2	2	1	24
(iii) Other local instruments '000	9	10	5	4	2	2	32
Instruments per 100 of population	22.6	24.2	18.4	20.3	17.2	19.1	21.6

Of the total telephones (2,266,307) in service at 30th June, 1961, 813,185 or 36 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks.

3. **Trunk Line and Local Calls.**—Because of the introduction of a scheme of extended local service areas on 18th May, 1960, whereby many telephone calls which would previously have been short distance trunk calls became local calls, precise statistics distinguishing between local calls and trunk line calls are no longer available. However, estimates of the local and trunk line traffic during 1959–60, on the basis of the system existing prior to the introduction of the new scheme, are as follows:—effective paid local calls, 1,625,000,000; trunk line calls, 75,000,000, representing averages of 1,106 local calls and 49 trunk calls per line respectively.

4. **Oversea Telephone Services.**—These services are provided by the Overseas Telecommunications Commission (see § 5, para. 1) for operation by the Postmaster-General's Department. At 30th June, 1961, telephone calls could be made from Australia direct to over 100 countries. International telephone calls to and from Australia during 1960–61 numbered 128,257, an increase of 18,466 or 17 per cent. on 1959–60. Additional capacity was provided to Papua and New Guinea, New Zealand, the United Kingdom (via Vancouver), India, Japan and the United States, and services were extended to Trinidad (via the United Kingdom), and to Sarawak (via Singapore).

5. **World Telephone Statistics, 1961.**—The following table shows the number of telephones in use in various countries with 2 million or more telephones at 1st January, 1961, together with the number per 100 of population and the proportion in each country to the world total.

**WORLD TELEPHONE STATISTICS(a) AT 1st JANUARY, 1961.**

Country.	Number of Telephones '000.	Telephones per 100 of Population.	Proportion of Total. (Per cent.)

<b>Total .. .. .</b>	<b>141,749</b>	<b>..</b>	<b>100.0</b>

(a) Partly estimated. Information derived, in the main, from the "World's Telephones" compiled by the American Telephone and Telegraph Company. (b) Excludes Hawaii. (c) At 31st March, 1960. (d) At 30th June, 1961.

### § 5. Oversea Telecommunication Services; Radiocommunication Stations Authorized.

1. **General.**—The Overseas Telecommunications Commission (Australia) is the authority responsible for the operation of Australia's external telecommunication services by cable and radio.

The Commission was established in August, 1946, under the Overseas Telecommunications Act. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunication services of the British Commonwealth countries concerned and for the establishment of a representative advisory board, the Commonwealth Telecommunications Board, to co-ordinate their development.

The Commission provides telegraph, telex, photo-telegraph, and, in conjunction with the Postmaster-General's Department, telephone services with overseas countries and Australian territories. Leased one and two-way circuits are also provided for large commercial users. In addition, it operates the Australian coastal radio services for communication with ships at sea in Australian waters and high frequency radio services for communication with ships in any part of the world. The Commission's coastal radio stations also provide certain services to a number of remote stations within Australia and its territories.

Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Official Year Book No. 37, pages 220-4.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in current forms of telegraph cables and high frequency radio systems, the Commission is at present engaged, in partnership with the overseas telecommunications authorities of Britain, Canada and New Zealand, in constructing and laying a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. This project stems from the Pacific Cable Conference held in Sydney, 28th September, to 20th October, 1959, at which representatives of Britain, Canada, Australia and New Zealand met to discuss and make recommendations on the feasibility of such a cable, and to formulate a financial and construction programme.

Following agreement of the four governments concerned in the plan, work was commenced in August, 1960, and the first section, between Australia (Sydney) and New Zealand (Auckland), opened in July, 1962. When completed in 1964, the cable will form part of the projected British Commonwealth round-the-world large capacity cable scheme, in which a complementary cable between Britain and Canada was officially opened late in 1961.

The Pacific Cable project is administered by a Management Committee consisting of representatives of the overseas telecommunication authorities of the four partner Governments.

2. **International Telegrams.**—(i) *Number of Telegrams.* The number of telegrams received from and dispatched overseas in each State during 1960-61 is shown hereunder.

#### INTERNATIONAL TELEGRAMS, 1960-61.

(<sup>000</sup>.)

(a) Year ended 31st March.

Words transmitted to "Other places" included 10,933,348 words to other Commonwealth countries and 13,767,066 to foreign countries. Words received from "Other places" included 11,772,152 words from other Commonwealth countries and 11,352,278 from foreign countries.

3. *Oversea Telephone Services.*—See § 4, para. 4, page 568 for particulars of these services.

4. *Coast Stations.*—At 30th June, 1961, there were 90 radio stations established at points around the Australian coast and 15 about the coast of Papua and New Guinea and other External Territories. During the year ended 31st March, 1961, these stations handled 717,986 messages (586,371 paying, 26,497 free traffic and 105,118 meteorological) with a total of 16,150,264 words.

5. *Radiocommunication Stations Authorized.*—The following table shows particulars of the different classes of radiocommunication stations authorized in Australia and the External Territories at 30th June, 1961. Figures relate to radiocommunication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners' licences are shown on pages 575 and 577 respectively.

The number of radiocommunication stations has increased considerably in recent years, having nearly doubled since June, 1956. While the increase is fairly generally distributed, it is perhaps most noticeable in the mobile services stations.

RADIOCOMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1961.

(a) Stations established at fixed locations for communication with other stations similarly established. (b) Stations established in out-back areas for communication with control stations such as those of the Royal Flying Doctor Service. (c) Stations established at fixed locations for communication with mobile stations. (d) Land stations for communication with ocean-going vessels. (e) Equipment installed in aircraft (aeronautical), motor vehicles (land mobile services), harbour vessels (harbour mobile services) and ocean-going vessels (ships), and mobile equipment of organizations such as the Royal Flying Doctor Service. (f) Stations which cannot be classified according to States, etc. (g) Includes 4,281 mobile transmitting and receiving stations, which cannot be classified according to States, etc.

J. BROADCASTING AND TELEVISION.

§ 1. General.

Broadcasting and television services in Australia operate under the Broadcasting and Television Act 1942-1961 and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board (see below). Details of each service will be found on pages 572-7. Licence fees for commercial broadcasting and television stations are payable under the Broadcasting and Television Stations Licence Fees Act 1956.

The Australian Broadcasting Control Board, which was constituted on 15th March, 1949, consists of five members (including two part-time), and operates under the Ministerial jurisdiction of the Postmaster-General. Its principal functions, as set out in section 16 of the Broadcasting and Television Act 1942–1961, are to ensure:—(a) that services by broadcasting stations and television stations are provided in accordance with plans prepared from time to time by the Board and approved by the Minister; (b) that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate; (c) that adequate and comprehensive programmes are provided by the stations to serve the best interests of the general public; and (d) that sources of interference to the transmission and reception of broadcast and televised programmes are detected and that assistance is given in the detection and prevention of such interference. In addition, the Board may exercise such other functions as are prescribed in relation to broadcasting stations and television stations. For information as to the powers and constitution of the Board see Official Year Book No. 46 and earlier issues.

The Australian Broadcasting Commission, which consists of seven members, at least one of whom must be a woman, controls the activities of the National Broadcasting Service and the National Television Service.

## § 2. Broadcasting.

1. **The National Broadcasting Service.**—(i) *General.* In sound broadcasting, the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission, and the provision and operation of transmitters and technical facilities in the studios are the responsibility of the Postmaster-General's Department.

(ii) *Technical Facilities.* At 30th June, 1961, the National Broadcasting Service comprised 69 transmitting stations, as follows.

### *Medium-frequency Stations—*

#### New South Wales—

2BL and 2FC Sydney, 2BA Bega, 2CO Albury, 2CR Orange, 2GL Glen Innes, 2KP Kempsey, 2LG Lithgow, 2ML Murwillumbah, 2NA and 2NC Newcastle, 2NB Broken Hill, 2NR Grafton, 2NU Tamworth, 2TR Taree, 2WN Wollongong.

#### Victoria—

3AR and 3LO Melbourne, 3GI Sale, 3WL Warrnambool, 3WV Horsham.

#### Queensland—

4QG and 4QR Brisbane, 4AT Atherton, 4GM Gympie, 4MI Mount Isa, 4QA Mackay, 4QB Maryborough, 4QL Longreach, 4QN Townsville, 4QS Toowoomba, 4QY Cairns, 4RK Rockhampton, 4SO Southport.

#### South Australia—

5AN and 5CL Adelaide, 5CK Port Pirie, 5LN Port Lincoln, 5MG Mt. Gambier, 5MV Renmark, 5PA Penola, 5WM Woomera.

#### Western Australia—

6WF and 6WN Perth, 6AL Albany, 6GF Kalgoorlie, 6GN Geraldton, 6NM Northam, 6WA Wagin.

#### Tasmania—

7ZL and 7ZR Hobart, 7NT Launceston, 7QN Queenstown.

#### Northern Territory—

8AL Alice Springs, 8DR Darwin, 8KN Katherine, 8TC Tennant Creek.

**Australian Capital Territory—**

2CN and 2CY Canberra.

**Papua—**

9PA Port Moresby.

**High-frequency Stations—**

VLI Sydney, New South Wales, VLG, VLH and VLR Lyndhurst, Victoria, VLM and VLQ Brisbane, Queensland, VLW and VLX Perth, Western Australia, VLT Port Moresby, Papua.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles per second. The high-frequency stations, using frequencies within the band 3 to 30 megacycles per second, provide service to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland, and in Papua and New Guinea and adjacent islands.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilized to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

In June, 1961, 47 of the medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

(iii) *Programme Facilities.* (a) *General.* The programmes of the Australian Broadcasting Commission cover a wide range of activities, which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programme during 1960–61 was as follows:—Classical Music, 25.5 per cent.; Light Music, 11.0 per cent.; Variety, 18.3 per cent.; News, 7.3 per cent.; Talks, 6.3 per cent.; Sporting, 5.7 per cent.; Parliament, 4.4 per cent.; Youth Education, 3.6 per cent.; Drama and Features, 3.4 per cent.; Religious, 3.7 per cent.; Children's Session, 2.8 per cent.; Rural, 1.7 per cent.; Non-departmental, 6.3 per cent.

(b) *Music.* The A.B.C., in addition to its extensive activities in the field of musical broadcasting, is one of the largest concert-giving organizations in the world. Its regular broadcasts command a large audience, and a total of 1,016,802 people attended A.B.C. concerts during 1960–61. There are symphony orchestras in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, which have developed from the studio broadcasting orchestras set up in 1936.

In 1960–61, the A.B.C. organized 608 public orchestral concerts (including 201 free concerts for school children and 42 free concerts for adults) and 157 public recitals by famous artists throughout the Commonwealth. In 1959, the Czech Philharmonic Orchestra became the first oversea orchestra to visit Australia.

(c) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the world's great plays as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular radio drama programmes are broadcast on Sunday afternoons and Sunday and Monday evenings, and special series of longer plays are also given at various times. In recent years the technique of the feature programme has also been developed. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way.

(d) *Youth Education.* The A.B.C. provides a regular series of broadcasts to schools as an addition to normal class-room education. The total number of listening schools at the end of June, 1961 was 9,627 or about 94 per cent. of all schools, State and private, throughout the Commonwealth. (See also Chapter XV.—Education, on this subject.)

(e) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs and on general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. An extension of this type of programme is the documentary. Major controversial topics are covered in sessions such as the "Nation's Forum of the Air" and "I Put it to You". Another session in this type of programme is "News Review", containing comments on the news of the day recorded over landline from all States of the Commonwealth and, in the case of significant world events, from overseas by radio-telephone.

(f) *Rural Broadcasts.* The Rural Broadcasts Department exchanges programmes with several oversea countries and provides service, educational, and entertainment programmes all designed to be of value to the man-on-the-land and industries allied with primary production. A complete weather and marketing service is provided. Rural programmes are broadcast on a national, State, and regional basis, with separate programmes originating from 20 Regional Stations and relayed through a total of 33 stations. The 20 Rural Officers in Regional Stations present specific information and educational programmes in relation to their own regions. During 1961-62 a total of 7,486 rural talks and interviews, as well as 8,684 market reports, were broadcast.

(g) *News.* The Commission collects all its Australian (including Papua and New Guinea) news through its own staff journalists and part-time correspondents. It also maintains a news room in London for the selection and transmission of news obtained from major oversea agencies, and has special representatives in south-east Asia. Regional bulletins are broadcast from country centres and also from capital cities to cover near-city districts. Radio Australia (the Overseas Service of the A.B.C.) broadcasts Australian and oversea news daily in English, French, Mandarin, Indonesian, Japanese, Cantonese and Thai, with special attention to Asia and the Pacific. Each day the A.B.C. re-broadcasts two news bulletins from the British Broadcasting Corporation. The A.B.C. broadcasts 160 news bulletins each day, including those given over Radio Australia.

(h) *Other Activities.* The proceedings of the Federal Parliament are broadcast regularly on one of the two national transmitters in each capital city, one in Newcastle and one domestic short-wave station (VLR).

The National Children's Hour, presented seven days a week, is composed of over 40 programme items, including stories, music, games, art, literature, natural history and sport.

In co-operation with the various religious denominations, the A.B.C. broadcasts several religious sessions each week-day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The variety and sporting programmes of the A.B.C. provide the lighter side of the service. With its variety session the policy of the A.B.C. is to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music.

A comprehensive coverage of sport at home and abroad is provided by the A.B.C. On Saturday afternoons the sporting panel provides listeners with progress results, scores and descriptions from several fields of sport. Events of international interest such as Test matches and the Davis Cup are covered by simultaneous descriptions from A.B.C. commentators.

2. **The Commercial Broadcasting Service.**—Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is £25 on the grant of the licence, and thereafter £25 a year plus one per cent. of the gross earnings of the station from the broadcasting of advertisements or other matter during the preceding financial year. Licensees of these stations rely for their income on the broadcasting of advertisements and other publicity.

3. **Oversea Broadcasting Service.**—There are six high-frequency stations at Shepparton, Victoria (VLA, VLB, VLC, VLD, VLE, VLY), which provide the oversea service known as "Radio Australia". As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department and their programmes are arranged by the A.B.C. During certain periods, station VLG Lyndhurst is also used for the purpose of oversea transmission. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The oversea audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

4. **Broadcasting Stations.**—The following table shows the number of broadcasting stations in operation at 30th June, 1961.

BROADCASTING STATIONS, 30th JUNE, 1961.

Type of Station.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea.	Total.
National—

Overseas ..	..	6	..	..	..	..	..	..	..	6
Commercial ..	37	20	21	8	14	8	1	1	..	110

(a) One station (VLG) is shared between domestic and oversea service.

Tables showing the call sign, location, frequency and aerial power of national and commercial broadcasting stations in operation at 30th June, 1961, are shown in *Transport and Communication*, Bulletin No. 52.

### § 3. Television.

1. **General.**—Television services in Australia operate under the Broadcasting and Television Act 1942–1961 and comprise the National Television Service and the Commercial Television Service.

2. **The National Television Service.**—(i) *General.* The A.B.C. provides the programmes for the National Television Service from stations provided and operated by the Postmaster-General. Six stations have been established—ABN Sydney, commenced operation, 5th November, 1956; ABV Melbourne, commenced operation, 18th November, 1956; ABQ Brisbane, commenced operation, 2nd November, 1959; ABS Adelaide, commenced operation, 11th March, 1960; ABW Perth, commenced operation, 7th May, 1960; and ABT Hobart, commenced operation, 4th June, 1960—each of which operates on Channel 2. Additional national television stations have been authorized as follows:—Australian Capital Territory—Canberra area ABC (channel 3); New South Wales—Central Tablelands area ABCN (channel 1), Newcastle–Hunter River area ABHN (channel 5), Richmond–Tweed Heads area ABRN (channel 6), Illawarra area ABWN (channel 5A); Victoria—Bendigo area ABEV (channel 1), Ballarat area ABRV (channel 3), Latrobe Valley area ABLV (channel 4), Goulburn Valley area ABGV (channel 3); Queensland—Darling Downs area ABDQ (channel 3), Rockhampton area ABRQ (channel 3), Townsville area ABTQ (channel 3); Tasmania—North Eastern Tasmania area ABNT (channel 3). It is expected that services will commence progressively from the middle of 1962.

(ii) *Programme Facilities.* (a) *General.* The television programmes provided by the A.B.C. cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30th June, 1961, was as follows:—Drama and Features, 17.1 per cent.; Talks Department, 18.7 per cent.; Sport, 13.2 per cent.; Children's Session, 9.8 per cent.; News, 9.0 per cent.; Variety, 12.6 per cent.; Youth Education, 5.5 per cent.; Rural Services, 2.9 per cent.; Religion, 3.8 per cent.; Classical Music 1.9 per cent.; Light Music, 0.4 per cent.; Non-departmental (including trade demonstration films), 5.1 per cent. A summary of the activities of the departments in the field of television is given in the following paragraphs. Transmission hours in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, for the 12 months ended 30th June, 1961, totalled 16,815.

(b) *Talks.* In television, talks cover a very wide field, ranging from commentaries on international affairs to panel games and outside telecasts of public events. Discussions, topical interviews, magazine programmes, women's programmes, demonstrations and film and studio documentaries are all part of the regular output.

(c) *Drama and Features.* A considerable proportion of television time is devoted to drama and features, and "live" television plays featuring Australian artists may usually be seen fortnightly in all State capitals. A Television Writers' Workshop gives writers practical advice on television writing. Of 23 live plays produced during 1960–61, 9 were by Australian authors and, in addition, twelve half-hour episodes of a locally written serial, "Stormy Petrel"—based on the life of Governor Bligh—and "The Outcasts" were telecast.

(d) *Music.* During 1957, the A.B.C.'s musical activities extended to the field of television. A number of public concerts and studio performances were successfully telecast and there is reason to believe that the new medium will contribute to the further development of musical appreciation in Australia.

(e) *Rural Services.* Weather reports and forecasts are telecast six evenings a week on National T.V. stations. Emphasis is placed on films showing facets of Australian agriculture and livestock activities. These films are exchanged with the European Broadcasting Union, films received in return being featured in the "Farming Overseas" series. "Gardening", "To Market, to Market" and "Food Front" sessions are planned for city viewers and consumers. Demonstration programmes of a technical nature are programmed in such series as "Microscope", the "Australian Homestead" and "Wool Customer".

(f) *Education.* The A.B.C. provides a daily television programme for schools in all Australian States with certain series repeated to meet their convenience. In addition there is a daily programme for pre-school children entitled "Kindergarten Playtime". At the adult level there are two television programmes weekly, designed in series and known as "University of the Air". These programmes are presented in the evening.

(g) *News.* Television news bulletins and newsreels have been included in the programmes presented in both Sydney and Melbourne since the television services began in November, 1956. Since then those news items have been included in the programmes of State capitals. The A.B.C. is a member of the British Commonwealth International Newfilm Agency (B.C.I.N.A.), through which it receives world-wide television newfilm and provides newfilm of Australian origin for international distribution.

(h) *Other Activities.* Special television programmes are presented for children, including filmed material obtained on an exchange basis from oversea television organizations. Special religious services and programmes have also been televised. Outside television cameras have covered a number of sporting events, including the Olympic Games, Davis Cup tennis, Test and Sheffield Shield cricket and swimming championships.

3. **The Commercial Television Service.**—Commercial television stations are operated under licences granted by the Postmaster-General. Licences for commercial television stations have been granted as follows:—Australian Capital Territory—Canberra area CTC (channel 7); New South Wales—Sydney ATN (channel 7), TCN (channel 9), Central Tablelands area CBN (channel 8), Newcastle—Hunter River area NBN (channel 3), Richmond—Tweed Heads area RTN (channel 8), Illawarra area WIN (channel 4); Victoria—Melbourne HSV (channel 7), GTV (channel 9), Bendigo area BCV (channel 8), Ballarat area BTV (channel 6), Latrobe Valley area GLV (channel 10), Goulburn Valley area GMV (channel 6); Queensland—Brisbane BTQ (channel 7), QTQ (channel 9), Darling Downs area DDQ (channel 10); South Australia, Adelaide ADS (channel 7), NWS (channel 9); Western Australia—Perth TVW (channel 7); Tasmania—Hobart TVT (channel 6), North Eastern Tasmania area TNT (channel 9). Commercial stations have been authorized in the Rockhampton and Townsville areas. Licences for these stations will be issued shortly. The following stations commenced operations on the dates indicated:—ATN Sydney, 2nd December, 1956; TCN Sydney, 16th September, 1956; GTV Melbourne, 19th January, 1957; HSV Melbourne, 4th November, 1956; BTQ Brisbane, 1st November, 1959; QTQ Brisbane, 16th August, 1959; ADS Adelaide, 24th October, 1959; NWS Adelaide, 5th September, 1959; TVW Perth, 16th October, 1959; TVT Hobart, 23rd May, 1960. It is expected that the other stations will commence operations in late 1961 or early 1962.

The initial grant of a licence is for a period of five years, and thereafter the licence is renewable annually. The fee payable is £100 for the first year, and thereafter £100 a year plus one per cent. of the station's gross earnings from the televising of advertisements or other matter during the preceding financial year.

4. **Extension of Television Services.**—The Government has approved the establishment of a national station in each of the following areas, and the calling of applications for a commercial television station in each area has also been approved:—New South Wales—Upper Namoi (Tamworth), South Western Slopes and Eastern Riverina (Wagga-Cootamundra), Grafton-Kempsey, Manning River (Taree), Central Western Slopes (Dubbo), Murrumbidgee Irrigation Area (Griffith), Bega-Cooma, Broken Hill; Victoria—Upper Murray, Mildura, Murray Valley (Swan Hill); Queensland—Wide Bay (Maryborough), Cairns, Mackay, Southern Downs (Warwick); South Australia—Spencer Gulf North, South East (Mt. Gambier); Western Australia—Bunbury, Southern Agricultural Area (Katanning-Albany), Central Agricultural Area (Northam-York).

When the stations commence operation, it is estimated that 91 per cent. of the Australian people will be able to receive a television service.

#### § 4. Licences, Revenue from Fees, etc.

1. **Broadcast Listeners' and Television Viewers' Licences.**—(i) *General.* Broadcast listeners' and television viewers' licences are issued at post offices in accordance with the provisions of the Broadcasting and Television Act 1942-1961, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence authorizes the operation of any broadcast receiver, and a television viewer's licence any television receiver, which is:—(a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and/or ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or of a member of his family, and is ordinarily kept at that address while not in use.

The fee for a broadcast listener's licence or a renewal thereof is:—Zone 1, £2 15s.; Zone 2, £1 8s. Zone 1 is the area within approximately 250 miles of specified broadcasting stations and Zone 2 is the remainder of the Commonwealth. A television viewer's licence costs £5.

A licence may be granted at reduced rates to persons who are in receipt of certain types of pension and are otherwise qualified to receive this concession.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school. Inmates of a hospital or charitable institution are covered by the licence held by the institution.

(ii) *Broadcast Listeners' Licences. (a) Number in Force.* The following table shows the number of broadcast listeners' licences in force at five-year intervals from 1925 to 1960 and for 1961.

#### BROADCAST LISTENERS' LICENCES IN FORCE.

At 30th June—	N.S.W.(a)	Vic.	Qld.	S.A.(b)	W.A.	Tas.	Aust.
1925 .. ..	34,857	20,290	1,267	3,331	3,562	567	63,874

## CHAPTER XV.

## EDUCATION AND RESEARCH.

NOTE.—For the most recent statistics available on subjects dealt with in this Chapter, reference should be made to the series of mimeograph bulletins *Social Statistics* and *University Statistics* issued by this Bureau. The *Quarterly Summary of Australian Statistics* contains summarized information on these subjects, and financial aspects are dealt with in the annual bulletin *Finance, Part I.—Public and Private Finance*.

## A. EDUCATION.

## § 1. Introduction.

An account of the development of the Australian school system up to 1929 may be found in Official Year Books Nos. 1, 2, 17 and 22. In Official Year Book No. 40, a reasonably complete review of changes which occurred up to 1951 and of the practices then current was presented from material furnished by the Commonwealth Office of Education.

In the sections which follow, the information relating to the educational programme applies mainly to the year 1961. The statistics given in the tables relate to 1960.

## § 2. Education in Australian Schools.

1. *Administration*.—Primary and secondary education in Australia is provided by both government and non-government schools. Education in government schools is mainly the responsibility of the State Governments, but the Commonwealth Government provides financial assistance to students and meets the full cost of such education in Commonwealth Territories (*see* Chapter V.). Non-government schools are mainly conducted by religious denominations, subject to certain government controls (*see* para. 4, p. 581). In general, non-government schools charge fees and are not usually assisted financially by State or Commonwealth Governments.

Although there is a tendency towards regional administration, State educational administration is centralized. The permanent head of the Education Department in each State is responsible to the Minister for Education. Contact with the schools is maintained principally through Inspectors or Superintendents. Departments are usually divided into primary, secondary and technical divisions. Some technical colleges are in a large measure autonomous. Universities are independent foundations, although much of their income is derived from State and Commonwealth grants.

Examination Boards, which represent universities, Education Departments and non-government schools, control public examinations and syllabuses, and curriculum committees prepare primary and secondary curricula. State Ministers for Education meet periodically as the Australian Education Council, and Directors of Education meet annually to discuss matters of common interest.

2. *The School System*.—(i) *Compulsory*. In all States, there is legislation for compulsory school attendance. The Victorian Education Act was passed in 1872, followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), and Tasmania and Western Australia (1893).

In 1961, the ages between which children were required by law to attend school were as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years (children may not leave school until the end of the term during which they reach the age of 14 years); Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years. The full-time employment of children of school age is restricted by law.

In Victoria, South Australia, and Western Australia, amendments to the Acts have provided for the raising of the school leaving age to 15 years, but to date this legislation has not been proclaimed.

(ii) *Non-Compulsory.* Modern development has demanded a diversity of skills and a general raising of the educational level of the population. The trend towards raising of the school leaving age and the tendency everywhere for children to stay longer at school have been expressions of public realization of this. In recent years, less than half of all children left school when they reached the age limit for compulsory attendance. Indeed, a substantial number now proceed to some form of further education beyond secondary school, either as full-time students, as part-time apprentices or trainees released during the day by their employers, or as part-time evening students.

In the early years of government provision of education, the main emphasis was on the primary school, which catered for children receiving compulsory education and offered a course largely confined to the "tool" subjects, reading, writing and arithmetic. However, a process of extension and differentiation both at the bottom—infants' schools and kindergartens—and at the top—secondary schools—was well under way during the early years of this century.

3. *The Educational Ladder.*—(i) *Infants' Schools.* It is now customary, although not compulsory, for children to begin school when they are five years old. In larger primary schools they enter the infants' school, and in smaller schools infants' classes, which occupy two or three years, the first year in some States being called "Kindergarten" or "Preparatory". The emphasis in the infants' classes is very much on general development, on play activities and on the informal aspects of the educational processes. Whether in a separate establishment or as a part of a primary school, there is a gradual move towards formal instruction in infants' departments. At the end of the period, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and can write in pencil. In addition, they have acquired skills with art materials and the like. A good deal of the instruction is carried on through activity methods, involving, for example, dramatic work, puppetry, and school "shops". Children then pass at about the age of eight or nine years to the more formal primary school, in which they normally spend four or five years.

(ii) *Primary Schools.* The main emphasis in the primary school as distinct from the infants' school still lies on the "tool" subjects (reading, writing and arithmetic) and, in more recent years, on oral language, but the methods of teaching have undergone considerable changes. Changes in the purpose and outlook of educationists, and the raising of the professional standards of teachers, have made for greater freedom for pupils and teachers, some departure from the methods of mass instruction, and the closer linking of the curriculum with the child's social environment.

In general, there is now less emphasis on results than formerly, and basic skills are taught at a somewhat later stage. At the same time, the curriculum has been broadened. More individual instruction has led to a reduction in minimum standards of achievement for the less able, and a stress on curriculum enrichment for the bright. Retardation, i.e., the repeating of grades, has been considerably reduced, the aim being for each child to remain with his age group. In all States, opportunity classes exist for backward children, and in one State opportunity classes are provided for the especially bright.

(iii) *Secondary Schools.* At the age of 12 or 13 years (in Queensland, 14) children transfer to a secondary school course. In the cities and larger country centres, this is provided in a separate school, but in less densely populated areas secondary classes share the same buildings as primary classes. In rural areas, secondary pupils may share teachers or classrooms with primary pupils, and in one-teacher schools a few secondary students may carry out correspondence assignments under the supervision of the primary teacher-in-charge.

Secondary curricula have developed from the matriculation requirements of the universities. Formerly English grammar and literature, and mathematics, including algebra, geometry and trigonometry, were the core. Languages, chiefly Latin and French, or science, chiefly physics and chemistry, and history had an important place. Geography and drawing were often taken in the first two or three years.

As a result of changes in the academic course for matriculation, greater emphasis has been placed on oral and written expression in the English course and on language generally (English or foreign languages); in two universities, new matriculation regulations require a pass in either mathematics or a foreign language (not necessarily Latin, which in recent years has been less popular than previously). A general science course has been introduced in some States, and social studies, a synthesis of history, geography and civics, is a subject to matriculation level in two States. More emphasis has been placed on art, music and physical education.

In recent years, expert committees in all States have examined the problem of the provision of secondary education for all. The reports made by these committees, perhaps the best known of which is the "Wyndham Report" in New South Wales, have principally recommended the broadening of secondary school studies to provide a basic general education for all students. Alongside the academic course other courses have grown up. In country areas, they may be offered in the same school, or the academic course may even be largely abandoned. In the city, it is usual to offer non-academic courses in separate schools, although there is a trend towards comprehensive high schools offering several types of courses and catering for all the pupils from the district. Schools providing academic courses are usually known as High Schools, while the other types are generally distinguished by such names as Junior Technical Schools and Home Science Schools.

Particular mention should be made of the recent development of the all-stage consolidated school, sometimes with an agricultural bias, found under various names in different States. Tasmania and South Australia adapted the idea of the English village area schools to Australian conditions and established "Area Schools", some of which have farms attached.

The courses followed in the non-academic schools are, in general, broader than in the academic schools. There is less concentration on establishing an academic discipline and method peculiar to each subject, but more attention to correlation between fields of knowledge, sometimes expressed by projects involving them all. Generally, less time is devoted to mathematics and the formal sciences, and more time to practical work and to art and musical appreciation. In English, oral language is emphasized rather more and grammar much less than in the academic schools.

(iv) *State Details.* Very brief particulars of the position in each of the States are given on pages 432-3 of Official Year Book No. 40.

4. **Public Authority and the Non-Government Schools.**—In all States, it is compulsory for all children between certain ages to receive education in a government school, unless the child is under "regular and efficient" instruction elsewhere. This may be at home, or in a non-government school. The provision for control over the regularity and efficiency of instruction in the non-government schools varies considerably from State to State. In New South Wales and Western Australia, provision is made for an initial inspection when a new school starts, and for inspections thereafter as the Minister requires, to ensure efficiency. In Victoria and Tasmania, registers are kept of teachers and schools, and both teachers and schools must satisfy the administering authority that they are efficient before registration is granted. Without such registration, neither a teacher nor a school may operate. Provision is made, too, for inspections at any time by the registering authority.

In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. These are the only non-government schools in Australia for which an annual inspection is prescribed by statute. Other non-government schools in Queensland may be inspected at their own request, but it is possible for these schools—and also those in South Australia—to exist without inspection.

Public authority over schools or institutions having scholars above the compulsory ages is generally less direct. It is effected directly by the registration procedures in Victoria and Tasmania, and in all States there is a measure of indirect control through provisions governing the award of State scholarships, bursaries or other forms of financial assistance to secondary scholars, which are available only in government or approved non-government schools. In New South Wales, also, the Intermediate and Leaving Certificates are awarded only to pupils of schools whose courses of study are approved by the Department of Education.

In all States, non-government schools are required, under the authority of either the Education Acts or Statistics Acts, to furnish certain statistical returns. The form of these returns may be prescribed in the Acts or may be subject to alteration with the Minister's consent.

5. **The Organization of Roman Catholic Schools.**—There is, in each State capital, an official who acts under the Archbishop as a Director of Catholic Education for the area. Each diocese within the area is, however, autonomous and manages its own educational affairs subject to the local episcopal authority. The State Director has, in addition to possible inspectorial functions within his own diocese, the duty of co-ordination of educational matters within his area, and of liaison with other educational authorities, particularly the State Education Department.

The system includes kindergartens, sub-primary, primary, academic secondary, home science, commercial, agricultural and technical schools, juniorates and seminaries, schools for the mentally and physically handicapped, orphanages and a variety of special schools of a charitable nature for under-privileged or socially handicapped children.

With the exception of a small number of permanent lay teachers and a number of visiting teachers, usually specialists in such matters as physical education, sport, and speech, teaching is done by members of religious orders.

**6. The Organization of Other Non-Government Schools.—(i) General.** Practically all non-government schools, except a limited number under private ownership, are governed by a controlling body known variously as a School Council or Board of Trustees or Governors.

Although the other non-government schools may be organized into loose forms of association for purposes such as sports, conferences, and uniform conditions, there is no system within each State corresponding in size, detail or organization with the Roman Catholic schools.

The Headmasters' Conference of Australia and the Headmistresses' Association of Australia are composed of headmasters and headmistresses respectively of a number of the larger non-government schools, including some Roman Catholic schools. Neither body has executive powers. One of the chief considerations for the admission of new members is the degree of independence enjoyed by the governing body and principal of the school concerned.

(ii) *Church of England Schools.* The various types of Church of England schools include small schools associated with a local parish; schools under direct ownership of a diocese; schools established by Acts of the Church Synod, in which the majority of the members of the council are church representatives but which, otherwise, have almost complete independence; and schools conducted by religious orders of the church.

The proportion of members of a school council nominated by the church varies. In some schools, members may also be nominated by parents, by former students, and by the council itself.

In general, schools incorporating the words "Church of England" in their title follow a diocesan syllabus of religious education.

(iii) *Other Denominational Schools.* In general, control of Presbyterian schools is exercised through School Councils appointed by the General Assembly of the Presbyterian Church in the State concerned. Councils vary considerably in size and in the bodies represented on them. Similarly, appointments to councils of Methodist schools are made by the annual Conference of each State. In Queensland, five schools are operated under the joint auspices of the Presbyterian and Methodist churches.

A limited number of schools are conducted by other denominations, such as the Baptist, Congregational and Lutheran churches and by the Seventh-day Adventists. The Society of Friends conducts one school in Australia, the Friends' School, Hobart.

Jewish schools are conducted in several capital cities.

(iv) *Undenominational Schools.* There are a number of undenominational schools in Australia. Some of the larger, although not State-operated, have Government nominees on their boards. They include Sydney Grammar School, the Hale School, Perth, and the eight Queensland grammar schools. Other undenominational schools operate under the auspices of corporate bodies, usually in the form of a limited liability company, while others are privately owned. The majority of schools in this last category are small kindergartens, preparatory and primary schools.

**7. Examinations and Accrediting.—(i) Examinations.** The various public examinations which were formerly held at different stages of education were described in previous Year Books, in particular in No. 40 (1954). There are no public examinations in primary school, but each school normally holds internal examinations yearly or half-yearly. In most States, there is no public examination barrier at the end of primary school, and pupils proceed to high schools of various types. The trend is towards greater use of internal examinations and headmasters' recommendations. In Queensland, a Scholarship Examination is held at the end of primary school, and pupils passing this examination qualify for scholarships tenable at government and non-government secondary schools.

## STUDENTS ENROLLED

AUSTRALIA, 1954 TO 1960

## TEACHERS EMPLOYED

AUSTRALIA, 1954 TO 1960

There are two important examinations in secondary school—one about half-way through the course, and one at the end. The first examination is usually called the Intermediate or Junior, and pupils sit for this after two, three or four years of secondary study at the age of 15 or 16 years. Many pupils leave school at this stage and enter technical and agricultural colleges, or undertake commerce, insurance, banking certificate, or nursing and secretarial courses. The remaining pupils, after one or two years further study, sit for the Leaving or Matriculation examination and qualify for entry to universities, teachers' colleges, and technical college diploma courses. There are, of course, many variations from State to State, and details of these are given below. Most of the examinations are public ones, set and marked by an external authority and conducted on a state-wide scale, but some examinations are taken internally, or a compromise between these two forms may be arranged to meet special circumstances.

(ii) *State Details. New South Wales.* The Intermediate Certificate Examination is taken after three years, either internally or externally, at an average age of 15 years, and the Leaving Certificate Examination (Matriculation) is taken after five years, at an average age of 17 years. Following the report made by the Committee Appointed to Survey Secondary Education, it has been decided, from 1962, to make the secondary school course a six-year one, with a School Certificate after four years and a Higher School Certificate after six years.

*Victoria.* The Proficiency Certificate is taken internally after three years at school, at an average age of 14½ years, the Intermediate is taken at the end of the fourth year, the School Leaving at the end of the fifth year, and the Matriculation at the end of the sixth year. Pupils at approved schools may be accredited for the Intermediate and Leaving—i.e., the Certificate is awarded under certain conditions by the Education Department on the recommendation of the school principal.

*Queensland.* The Junior Public Examination is taken at the end of second year; pupils are then aged about 16 years. The Senior Public Examination (Matriculation) is held at the end of fourth year.

*South Australia.* The Intermediate Examination is taken at the end of third year, at an average age of 15½ years, the Leaving Certificate (Matriculation) at the end of fourth year, and the Leaving Honours at the end of fifth year.

*Western Australia.* The Junior Certificate Examination is taken at the end of third year by pupils aged about 15½ years; the Leaving (Matriculation) is taken at the end of fifth year. Certain schools are approved for accrediting in a few subjects at the Junior Certificate Examination.

*Tasmania.* The Secondary School Certificate (an internal examination) is taken at the end of third year, when pupils are aged about 15½ years, the Schools Board Certificate is taken at the end of fourth year, and the Matriculation at the end of fifth year. Certain schools are approved for accrediting for the Schools Board Certificate.

### § 3. Numbers of Schools, Teachers and Pupils.

1. *General.*—The government schools shown in the following tables include primary, secondary, junior technical, correspondence and subsidized schools, but exclude senior technical colleges, evening schools and continuation classes.

Particulars relating to senior technical colleges are given in § 6, page 594.

Pupils enrolled may be counted in a number of ways, such as "gross enrolment", "net enrolment", and "average weekly enrolment". Throughout the tables in this section the figures shown for the numbers of pupils are the "census enrolment", which means the number of children enrolled on a chosen day, usually in the first week of August.

2. Statistical Summary.—The numbers of schools, teachers and pupils for 1960 are shown in the following table.

## SCHOOLS: NUMBER, TEACHERS, PUPILS, 1960.

**§ 4. Other Aspects of Education in Schools.**

1. **Health Services to Schools.**—Information relating to school medical and dental services is given in Chapter XVII.—Public Health.

2. **Guidance.**—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of school record cards. In general, the functions of these services are:—selection and differentiation for secondary education, diagnosis and guidance of atypical children, preliminary vocational guidance and, in some States, research. The weight given to each of these functions varies considerably from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service cooperate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the Department of Labour and Industry.

3. **Research.**—(i) *State Education Departments.* All State Education Departments have set up research branches which function as integral parts of head offices. In several States, the officer who directs research is also responsible for the guidance service offered by his department. The research undertaken is directed towards departmental activities and the findings are examined carefully in the determination of policy and procedures; in addition, many problems of immediate importance are handled. In the majority of States, too, the Research Branch supervises the collation of statistics and also plays an important part in curriculum revision and modification of examinations.

(ii) *Australian Council for Educational Research.* The Australian Council for Educational Research, a non-governmental body, is also engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for

disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State Governments contribute some financial support.

4. *Atypical Children.*—Pupils who, for one reason or another, cannot progress to their best advantage in an ordinary school are catered for by special schools or classes. Among groups given special attention are the mentally backward, the gifted, the physically handicapped, the blind, deaf and dumb, the epileptic, the cerebral palsied, the partially sighted, the hard-of-hearing and the socially maladjusted. The provision of special schools and classes has involved the appointment of departmental specialists, special training courses and close liaison with school health services. In some States, special clinics attached to hospitals, or functioning as an independent child-welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

5. *Education of Native Children in Australia.*—The Commonwealth Government is responsible for the education of full-blood native children in the Northern Territory. Each State has responsibility for the welfare and education of native children within its boundaries.

Native children are admitted to government schools in all States except in areas where separate facilities are provided. In those States where natives are more numerous, special schools are located at or near aboriginal reserves, settlements and stations. The schools are for the most part staffed by teachers from the Education Departments, and the curriculum is similar to that in ordinary government schools with a bias towards handicrafts. Numbers of native children also attend the mission schools conducted in several States by the various religious denominations. The standard of education in these schools is generally similar to that in the government schools.

6. *Provision for Rural Areas.*—(i) *General.* The population of Australia is so scattered that there is a problem in providing primary, and more especially secondary, education for all children. One method of meeting this problem has been the establishment of a wide network of one-teacher primary schools, staffed in the main with trained teachers. The practice of sending itinerant teachers to assist correspondence students in outlying areas has been introduced in the far north of Western Australia. The School of the Air, which is dealt with more fully below, is another method used for dealing with the problem.

(ii) *Subsidized Schools.* Where a group of children is too small to warrant the establishment of a one-teacher school, a "subsidized school" may be opened. The Education Department pays part of the cost, and in some States appoints a teacher. Some States also administer "provisional schools", which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(iii) *Consolidated Schools.* In some States, in districts where a number of small centres are scattered around a larger centre or country town, recent policy has been to close the one-teacher schools and transport pupils each day by bus to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted usually has a bias towards practical activities and training in subjects bearing on the primary industries of the locality.

(iv) *Special Assistance.* Another way of bringing children to the school has been the provision of financial assistance for children who have to live away from home in order to attend school. Most of these board in private homes, but in the several States there are a few government hostels and over 60 private hostels (excluding private boarding schools), many of which are government-subsidized. Together, these cater for almost 2,000 children of secondary school age and a small number of primary school children also. In all States, some provision is made for financial assistance towards the living and travelling expenses of children who are obliged to live away from home in order to attend school.

(v) *Correspondence.* For children who are still unable to attend school, systems of correspondence tuition have been established in every State. The Education Departments provide tuition through primary and secondary school levels and up to matriculation standard if required. In addition, there is a Technical Correspondence School in each State which arranges for correspondence tuition up to matriculation standard for students over the school leaving age. Further reference to the work of the Technical Correspondence Schools is made on page 595 of this chapter.

**7. School Broadcasting and Television.**—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The A.B.C.'s Education Department is responsible for the broadcasting of the programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison officers with State Education Departments. It was estimated that in 1961 over 90 per cent. of Australian schools were equipped to receive radio lessons.

School broadcasts are presented as part of the regular A.B.C. programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcast to school work by the extensive distribution of booklets, giving details of programmes in advance, and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons. The success of the first School of the Air, which has been in operation at Alice Springs in the Northern Territory since 1950 and serves correspondence pupils of the South Australian Education Department, has led to the opening of similar schools based at Ceduna and Port Augusta in South Australia, at Broken Hill in the far west of New South Wales, at Meekatharra, Derby and Kalgoorlie in Western Australia, and at Cloncurry in Queensland. In all, these schools serve a total of a million square miles. By means of special two-way radio equipment, children hundreds of miles apart can participate in the same lesson and teachers and pupils can talk directly with each other.

During 1961, more than 300 schools throughout Australia made use of the telecasts provided for schools by the A.B.C. A working party on school television set up by the A.B.C. and the Directors of Education is at present planning specific tests to establish subjects in which television can best be used.

The "Kindergarten of the Air" and the television programme, "Kindergarten Playtime" are described on page 594 of this chapter.

**8. Teacher Training and Recruitment.**—(i) *General.* The training of government school teachers is carried out by the State Education Departments, but in most States persons who wish to train for teaching in private schools may attend government training colleges on payment of a fee. Many non-government school teachers have been drawn from the government teaching services and others have been recruited at the university graduate level. Private training institutions also provide some teachers.

An account of the early growth of teacher training systems is to be found in Official Year Book No. 22, and subsequent developments were reviewed extensively in Official Year Book No. 40. The pupil-teacher system has been abandoned as the chief method of training teachers and, in general, students are recruited for primary school teaching at the Leaving Certificate level, and undergo training at colleges controlled by the Education Departments. Secondary school teachers are usually recruited at the matriculation level and train principally at universities. The raising of standards and lengthening of training have led to a close association between the Education Departments and universities. The trend has been towards placing teacher training on the same basis as other professional training.

The teacher shortage evident in past years is not now quite as serious, some States having no difficulty in obtaining satisfactory students for training as primary teachers. However, the need for increased numbers of graduate secondary teachers is apparent almost everywhere, and most States make special efforts towards recruiting people in this field.

(ii) *Training Colleges.* Every State maintains at least one teachers' training college. Most students are trained at colleges in the capital cities, although there has been a movement towards the establishment of colleges in the country. At the end of 1961, there were in Australia 26 teachers' colleges conducted by Education Departments and professional training in education was being provided by eight universities.

(iii) *Training of Primary Teachers.* In most States, teachers for government primary schools are trained in co-educational teachers' training colleges controlled and administered by the State Education Departments. Departmental trainees are given a monetary allowance while in training, and are required to enter into a bond to serve for a specified period on completion of training or to repay all or portion of the cost of training.

The entrance standard is generally at the Leaving Certificate level at about the age of seventeen. In some States, intending teachers can obtain a scholarship at the Intermediate Certificate level to enable them to complete teachers' college entrance requirements. In return, they are required to enter into a bond of service additional to that normally required of departmental teachers' college trainees.

In general, the duration of courses is two years for primary teachers, including infants' teachers. The basic subjects taken in the various courses are principles, history and general methods of teaching, special methods of teaching primary school subjects and educational psychology. In addition, students undertake courses in physical education, art, music, school hygiene and handicrafts as well as lectures designed to widen their own cultural background.

In South Australia, primary teacher trainees attend certain university courses, including education, as part of their training. In Tasmania, while the majority of departmental teacher trainees receive their training at the university, there is also a government teachers' college providing courses in infant, primary and home arts teaching.

In some States, separate courses are provided for teachers in infants' schools and in small one-teacher schools. In Victoria, an extension course of one year following the primary course is designed to train teachers of home-crafts for primary schools.

(iv) *Training of Secondary Teachers.* Prospective secondary teachers are required to undertake a university degree course followed by a one-year post-graduate course leading to a degree or diploma in education, a four-year degree course in education, or a two or three year course at a teachers' college. All these forms of training include lectures on subjects associated with educational theory and practice, study of methods and techniques appropriate to secondary school subjects, periods of practice teaching, and the observation of classroom techniques in the teaching of special subjects.

(v) *Training of Specialist Teachers.* Teachers of specialist subjects such as music, art, manual arts, domestic science and commercial subjects receive from two to five years' training varying according to the institution concerned and the type of secondary school in which the teacher is to teach. In several States, the shorter courses are provided wholly by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education, and in some cases the specialist course is followed by a year of professional training.

In four States, teachers of music receive their specialist training at conservatoria of music; in New South Wales and Queensland, the conservatorium is a State institution under the Minister for Education; in Victoria and South Australia, it is attached to the university.

Courses designed to train physical education teachers are offered in five States, in one at a teachers' college and in the others by the universities.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows the normal two-year primary teachers' course. In New South Wales, in addition to the three-year university agricultural course followed by one year's professional training, there is a two-year teachers' college agricultural course.

(vi) *Training of Technical Teachers.* Teachers of general subjects in technical schools and colleges usually receive their training either as primary or as secondary teachers and, after some experience in either or both fields, are transferred to a technical institution.

Teachers of specialist subjects in technical schools are usually recruited from the ranks of qualified tradesmen engaged in either industry or commerce. Upon appointment, teachers of technical subjects usually receive instruction in classroom teaching techniques and procedures. In Victoria, there is a separate Technical Teachers' College.

(vii) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

Such training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evenings. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers, on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts and physical education. In some States, there are also in-service courses for special groups of teachers, such as headmasters or teachers of one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers where professional topics are discussed.

Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. In most States, the magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(viii) *State Details.* The details of teacher training in the States are given on pages 442-3 of Official Year Book No. 40.

(ix) *Sex and Status of Teachers.* Although about half of the teachers in government schools in Australia are men, the ratio varies from State to State. In the infants' schools and generally in girls' departments, women teachers only are employed. Men, however, predominate in the senior positions, both because of their greater numbers amongst those with long service and because, except in infants' schools and girls' schools, the higher promotion positions are generally reserved for men.

9. *School Buildings and Grounds.*—In 1930, school building programmes were seriously cut because of the financial difficulties of the depression. The 1939-45 War intervened before school building could be resumed on a large scale. After the War, the building of schools was given a high priority, but the rapid post-war increases in school population have imposed a severe strain on available school accommodation, and such emergency measures as the use of halls, cloakrooms and weather-sheds for class instruction have been adopted in some areas.

In more recent years, there has been great activity in the field of school building. The temporary and emergency structures of the immediate post-war period are giving way to more permanent buildings. As well as the increased expenditure on school buildings, there has been greater attention given to their appearance and to their functional design. In most new plans for schools, assembly halls, which may also serve as gymnasias, are a feature and, in many instances, these facilities have been provided for existing schools.

10. *School Equipment.*—(i) *Text Books and Materials.* The State Education Departments supply government schools with essential equipment free of charge, including scientific apparatus and equipment, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are supplied free in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools, and Departments, with one exception, produce monthly school magazines which are supplied free or at a small cost. Textbooks, however, are supplied to primary pupils free of charge in one State only. In other primary schools and in all secondary schools, textbooks must be purchased by students, although in several States schools own stocks of textbooks which are hired to students, and in one State secondary textbooks are sold at reduced rates.

Other equipment is supplied free by the Departments on a limited basis only. Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books are ordinarily purchased for individual schools by the parent and citizen organizations associated with them, with the assistance of subsidies from the Departments.

(ii) *Furniture.* There has been considerable development in this field. Originally most schools were equipped with long desks and benches, seating six to eight pupils, but these were later replaced by the standard dual desk with tip-up seat, and in infant classes by individual chairs and small tables. After the war, considerable research was undertaken on posture and the physical measurement of children. The dual desk is now being replaced in some States by the individual table and chair, provided in a range of sizes suitable to each class. In some States, tubular steel furniture is used. The new type of furniture is more suitable for flexible arrangements of the class in line with modern educational practice.

(iii) *Visual Aids.* Visual aids are widely used in Australian education. Projection equipment in government schools is subsidized by Education Departments, the initial funds usually being raised by parent and citizen bodies.

Each of the State Education Departments has a visual education branch to handle the production and distribution of its visual aids. Film strips are the main item of production, but posters and films are also produced in some cases. Film strips and posters are distributed free or at low cost. Films are held in central libraries and are requisitioned by schools several months in advance of their being required for teaching purposes.

Non-government schools can usually obtain aids produced by education departments at a low cost and can borrow films from either State film centres or from Education Department libraries.

**11. Parent and Citizen Organizations.**—In Australia, where all government schools are administered by central departments, there is little opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide teaching aids and recreation materials not supplied by the departments, to assist in the regular attendance of children at school and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils of federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

**12. School Banking.**—Particulars of School Savings Banks are included in Chapter XX.—Private Finance.

## § 5. Pre-School Education.

**1. Types of Pre-School Centres.**—Free kindergartens were originally established in congested industrial areas and financed mainly by voluntary effort, but over the years the Commonwealth Government, the State Governments and some municipal councils have provided an increasing amount of financial assistance, and in addition themselves maintain pre-school centres in certain areas.

In 1938, the six Kindergarten Unions, the voluntary organizations which pioneered pre-school education in Australia, met to form a federal organization. Its title "Australian Association for Pre-school Child Development" was changed in 1954 to "Australian Pre-school Association". Its membership is now open to all organizations whose main objective is the care of the pre-school child, and includes bodies in the Australian Capital Territory, the Northern Territory, and the Territory of Papua and New Guinea.

The aim of the association is to promote the continuous advancement of pre-school movements throughout Australia. It sets out standards which act as a guide throughout Australia to those sponsoring pre-school centres, and is responsible for the administration of the six Lady Gowrie Child Centres. These centres are demonstration nursery schools which the Commonwealth Government established in each of the capital cities in 1940 and which are maintained by Commonwealth grants.

To-day, pre-school centres are found not only in inner city areas but also in suburban and country districts. Programmes are adapted to suit the areas in which the centres are situated. Types of pre-school centres include nursery kindergartens, crèches with full-day care for children of working mothers, play groups and play centres, occasional care centres and residential holiday homes.

There are only a limited number of State-subsidized pre-school centres and kindergartens conducted by public authorities and voluntary bodies such as the Kindergarten Unions. However, many children of pre-school age attend private non-subsidized nursery schools or kindergartens. No comprehensive statistics are available concerning the operations of pre-school centres and kindergartens.

**2. The Training of Teachers.**—Although the principle is that all types of pre-school work should be under the guidance of trained pre-school teachers, this cannot always be put into practice, owing to the shortage of teachers.

The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three-year courses. The minimum entrance age is 17 years, and the Leaving Certificate is usually required before admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college, and a two-year course for nursery teachers is available at the Sydney Teachers' College.

In Tasmania, prospective teachers complete a two-year course of training at one of the Education Department's pre-school centres. Those wishing to gain a Kindergarten Training College diploma must attend a college on the mainland.

Many students-in-training receive government scholarships, and others are sponsored by government departments or voluntary organizations.

**3. Kindergarten of the Air and Kindergarten Playtime.**—The "Kindergarten of the Air", which has been run by the Australian Broadcasting Commission since 1942, consists of a programme of 25 minutes every weekday, based on the interests of children from three to five years of age.

"Kindergarten Playtime" was first telecast in December, 1956, only a month after the Australian Broadcasting Commission had commenced televising programmes. It consists of a programme of 15 minutes every weekday, and is now shown in all State capital cities.

## § 6. Technical Education.

**1. General.**—In this section, technical education refers to that branch of education which is concerned with the preparation for entry to skilled occupations, including trades and professions. In the main, this education is vocational and is chiefly part-time, being carried out by the student while he is engaged in his occupation. The work of technical high schools, junior technical schools and other schools of this nature, which provide courses with a bias towards technical handwork, has been excluded, as these schools provide a form of education which is more properly regarded as secondary education.

The chief institutions for higher education other than the universities are the technical colleges, which are administered in five States by a division of the Education Department. In New South Wales, there is a separate Department of Technical Education, and in Victoria a number of the foremost technical colleges are controlled by independent councils which, although responsible to the Minister of Education, have a large measure of autonomy.

The technical colleges offer training not only in all the major industrial skills, but also in a variety of commercial, artistic and domestic occupations. Their courses may be divided into three main types, as follows.

- (i) Diploma courses giving advanced training in the technical professions and other fields such as accountancy and art.
- (ii) Vocational courses, usually leading to the award of a certificate, for skilled technical and semi-professional workers. Many of these courses are in fields not covered by an apprenticeship award.
- (iii) Craftsman or artisan training in the apprenticeship trades.

A brief description of the expansion in technical training since the 1939-45 War appears in Official Year Book No. 43, page 449. The following table gives some indication of the growth of technical education in the years 1956 to 1960.

#### TECHNICAL EDUCATION: AUSTRALIA.

Year.	No. of Colleges.	No. of Students.	No. of Teachers.(a)	Total Expenditure.
				£'000.
1956 .. .. .	164	(b)	8,364	8,775
1957 .. .. .	169	205,225	8,967	9,592
1958 .. .. .	171	220,500	9,765	10,344
1959 .. .. .	181	(b)	10,601	11,238
1960 .. .. .	187	239,427	11,044	13,327

(a) Includes both full-time and part-time teachers.

(b) Not available.

Training in certain technical aspects of agriculture such as farm mechanics and wool classing, and in related fields such as food technology is also provided by the technical colleges, while the seven State agricultural colleges (*see also* Chapter XXII), located in all States except Tasmania, provide comprehensive agricultural courses of two to three years' duration which lead to diplomas in agriculture. At some colleges, other diploma courses are offered in addition, including horticulture, dairying and dairy manufactures, food technology and oenology. The Queensland Agricultural High School and College is administered by the Department of Education; in other States, the Departments of Agriculture are responsible for administration of the colleges.

**2. Correspondence Training.**—Technical correspondence courses were first offered in Australia about 1910. During the period 1940 to 1944, technical correspondence schools were founded in each State in conjunction with the Commonwealth and these have become an important part of the system of technical education in the Australian States.

These schools not only offer a wide variety of correspondence courses, including trade and apprenticeship, rural, commercial and art courses, but, in addition, provide secondary courses up to matriculation or diploma entrance standard. Students who, because of distance or working hours, cannot attend technical college classes may enrol for these courses. In New South Wales, mobile instructional units, consisting of rail cars equipped as self-contained workshops, are used to provide practical experience for correspondence students, as well as for the instruction of apprentices and tradesmen at smaller country centres.

In 1955, the Royal Melbourne Technical College established a shortwave broadcasting station to provide further tuition for its correspondence students.

An interesting recent development in technical correspondence education, in which the Australian technical colleges are co-operating with the Commonwealth Government, is the correspondence scholarship scheme operating under the Colombo Plan. Through this scheme, south and south-east Asian students may take correspondence courses conducted by the technical colleges and by the University of Queensland, which has a highly

organized system of external tuition. Courses include commercial, rural, teacher-training, engineering and other technical courses. Where practical training is required as part of the course, it is taken by the student in his own country.

3. **Teacher Training.**—Prior to the 1939–45 War, technical colleges were staffed chiefly by men drawn from two sources. They were either trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers. In order to remedy this, technical schemes have been developed to train college teachers without breaking the important link provided by recruiting specialist tradesmen to teach in the colleges. In Victoria, the Technical Teacher's College provides training for students with the appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in both general educational theory and teaching method, and correspondence courses and visiting lecturers care for the newly appointed teacher-instructor in country colleges. Modifications of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers' colleges.

4. **Colleges, Teachers and Students.**—The number of colleges, teachers and enrolments of individual students during the years 1956 to 1960 is given in the following table.

#### TECHNICAL EDUCATION: COLLEGES, TEACHERS AND ENROLMENTS.

State.	Colleges.	Teachers.			Individual Students Enrolled.

## § 7. Expenditure on Schools and Technical Colleges.

1. Government Schools Expenditure.—(i) *Total Net Expenditure.* The figures shown in this section for expenditure on Government schools are on a more uniform basis than those published in previous issues of the Official Year Book.

The following table shows particulars of the total net expenditure (i.e., gross expenditure less receipts for services rendered) from certain funds on government schools and education departments. The data have been compiled on the same basis as far as differences in organization and accounting methods between States and Territories will permit.

The table includes only expenditure from the consolidated revenue funds and certain trust or special funds. It excludes loan fund expenditure; expenditure on debt charges, payroll tax and superannuation payments, in so far as it is possible to identify these items; and some items for which information cannot be obtained from the public accounts of all States.

The figures relate throughout to years ended 30th June. Net expenditure per pupil relates the total net expenditure to the mean of the numbers of pupils enrolled at the beginning and end of the year. Net expenditure per head of population relates the total net expenditure to the mean population.

(ii) *Classification of Expenditure.* The following table shows, for the six States, the net expenditure on government schools and education departments classified into the following headings:—(i) Primary Education, (ii) Secondary Education, (iii) Administration, (iv) Training of Teachers, and (v) Transportation of School Children and Students. Expenditure on technical and agricultural education is excluded from the tables.

It has been necessary to estimate some items of expenditure, largely because the meanings of "primary" and "secondary" differ between States, and because elementary and higher education are sometimes given in the same school by the same teachers.

The table showing total net expenditure includes expenditure on government schools in the Northern Territory and Australian Capital Territory, but in the following table this expenditure has been excluded, because the detail is not available.

(a) Excludes Northern Territory and Australian Capital Territory.

2. **Non-Government Schools Finance.**—Most Roman Catholic parochial schools do not charge fees, but families make a contribution if they can afford to do so. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers, and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school. With these exceptions, pupils of non-government schools must pay fees.

Certain State scholarships and bursaries are tenable at approved non-government secondary schools. Since the establishment of educational systems by the State Governments, official policy has been largely against the provision of direct financial assistance to non-government schools. The eight undenominational grammar schools in Queensland, however, receive a State subsidy under the Grammar Schools Acts 1860-1900. In 1956, the Commonwealth Government undertook to contribute to the interest payments on loans raised in order to build non-government secondary school accommodation in the Australian Capital Territory. This contribution is now available for both primary and secondary school buildings extensions and additions.

3. **Technical Colleges Expenditure.**—The following table shows the net expenditure on technical education from the State consolidated revenue funds, together with expenditure on technical education in the Australian Capital Territory.

**TECHNICAL EDUCATION: NET EXPENDITURE.**

### § 8. Commonwealth Activities.

Although the primary responsibility for education rests with the States, the Commonwealth Government is committed to a number of educational activities related to its other functions. For example, it maintains officer training colleges and education services for each of its defence services, a School of Pacific Administration for the training of administrative and other officers for service in Commonwealth Territories, and a School of Forestry. In each of the Australian Territories, the educational programme provides for both the native and European children who live there. References to these programmes appear in Chapter V.—The Territories of Australia.

The Australian Broadcasting Commission features school broadcasts and other educational broadcasts as part of its daily programmes. The Commonwealth Scientific and Industrial Research Organization undertakes research, the results of which are made available to educational institutions. Under the Commonwealth Reconstruction Training Scheme, many ex-servicemen and women have received training which has enabled them to enter a variety of trades and professions.

The Commonwealth Office of Education, established under the Education Act 1945, acts as the Commonwealth's educational adviser, undertakes research work as Commonwealth activities require, and is the channel for liaison between Commonwealth and State educational authorities. Some of its major commitments are those related to international relations in education, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization (UNESCO), the teaching of English as a second language and the provision of scholarships and fellowships for selected students under the Technical Co-operation Scheme (Colombo Plan) and under the scheme known as Australian International Awards. The office also acts as a co-ordinating body in the administration of the British Commonwealth Scholarship and Fellowship Plan.

The activities of the Commonwealth Scholarships Board, which was formerly known as the Universities Commission, are described on page 602 of this chapter.

The Commonwealth assists a number of other bodies concerned with education. Besides grants to organizations such as the Australian Council for Educational Research, grants are made to the States, on the recommendation of the Australian Universities Commission, for payment to universities.

Further details of Commonwealth assistance to students (including the Commonwealth Scholarship Scheme) and of grants for universities are given on page 602 of this chapter.

### § 9. Australia and International Relations in Education.

Australia has always been responsive to educational developments in oversea countries, particularly those in the United Kingdom, but it is only recently that it has begun to make any considerable impact on educational thought overseas.

In this connexion, there have been important developments since the 1939-45 War. For instance, there has been a remarkable increase in the volume of information on educational matters exchanged between Australia and south-east Asia, and Australia participates in the Technical Co-operation Scheme (Colombo Plan), the Korean Training Scheme, the United Nations Technical Assistance programme, the cultural programme of SEATO, and the scheme of Australian International Awards, under which a limited number of scholarships are given annually. Australia also participates in the British Commonwealth Scholarship and Fellowship Plan. In 1960, there were 5,441 oversea students, most of them Asian, attending institutions of higher learning in Australia; of these, 2,871 were in universities and 1,710 in technical colleges.

Perhaps the most important single factor behind the quickening of Australian interest in international cultural affairs has been membership of UNESCO. Australia has been a member since 1946. Twelve expert committees in Australia are responsible for a wide and varied programme of activities on behalf of UNESCO. Their advice has helped to make Australia's contribution to international conferences and seminars highly effective. Other work undertaken by these committees has included the provision of technical material and advice to the countries of south and south-east Asia, the conducting of seminars in Australia, arranging for exhibitions and displays in Australia and overseas, and the publication of handbooks and brochures to assist teachers and other persons in meeting the problems involved in educating for international understanding.

The Australian National Advisory Committee for UNESCO, on which all the other committees are represented, advises the Commonwealth Government and co-ordinates the work of the specialist committees.

### § 10. Universities.

1. **General.**—There are ten universities in Australia. The following list shows the date of foundation and the faculties existing at each.

- University of Sydney, established in 1850, located in Sydney, New South Wales. Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.
- University of Melbourne, established in 1853, located in Melbourne, Victoria. Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.
- University of Adelaide, established in 1874, located in Adelaide, South Australia. Agricultural Science, Architecture and Town Planning, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.
- University of Tasmania, established in 1890, located in Hobart, Tasmania. Arts, Commerce, Education, Engineering, Law, Science.
- University of Queensland, established in 1909, located in Brisbane, Queensland. Agriculture, Architecture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Science, Veterinary Science.
- University of Western Australia, established in 1912, located in Perth, Western Australia. Agriculture, Arts, Dental Science, Economics, Education, Engineering, Law, Medicine, Science.
- Australian National University, established in 1946, located in Canberra, A.C.T. *Institute of Advanced Studies*: John Curtin School of Medical Research, the Research School of Physical Sciences, the Research School of Social Sciences, the Research School of Pacific Studies. *School of General Studies* (consisting substantially of the former Canberra University College): Arts, Economics, Law, Science.
- University of New England, established in 1954 (established in 1938 as New England University College), located in Armidale, New South Wales. Agricultural Economics, Arts, Rural Science, Science.
- University of New South Wales, established in 1958 (established in 1948 as New South Wales University of Technology), located in Sydney, New South Wales. Architecture, Arts, Commerce, Engineering, Medicine, Science, Applied Science. The University also provides part-time instruction in science and engineering at technical colleges in country towns in New South Wales.
- Monash University, established in 1958, located in Melbourne, Victoria. Arts, Economics and Politics, Engineering, Medicine, Science.

There are also three university colleges in Australia. Newcastle University College, founded in 1951, located in Newcastle, New South Wales, is affiliated with the University of New South Wales and has degree courses in the faculties of Applied Science, Architecture, Arts, Commerce, Engineering and Science. Townsville University College, founded in 1961, located in Townsville, Queensland, is a constituent part of the University of Queensland. It offers first-year degree, diploma and certificate courses in the faculties of Arts, Science, Engineering, Commerce and Economics, Agriculture, Law, Veterinary Science, Dentistry, Medicine and Education, and second-year courses in Arts, Science and Engineering. Commencing in 1962, Wollongong University College, affiliated with the University of New South Wales, will offer some courses in the faculties of Engineering and Applied Science.

2. *Expansion within the Universities.*—Within the past 20 years, the appearance of some of the universities has altered to a striking extent. Many new permanent buildings and some temporary ones have been erected and new wings have been added. The universities are expanding their accommodation greatly to meet the increasing enrolments.

There was a continuing increase in university enrolments from 1929 (approximately 9,000) to 1940, followed by a slight recession. In the closing year of the 1939–45 War, however, the number of students had risen beyond any previous figure, and rapid post-war expansion was responsible for a peak enrolment of 32,453 students in 1948. After 1948, the numbers decreased each year until 1953 as ex-service personnel completed their training under the Commonwealth Reconstruction Training Scheme. Thereafter, enrolments increased again and it is expected that they will continue to increase rapidly. Enrolments in 1960 were 53,633.

3. *Courses.*—A brief survey of developments in university courses since the war and up to 1954 was given in Official Year Book No. 42 (p. 476). Outlines of some developments from 1954 to 1960 have appeared in successive Year Books. Developments since 1960 have included the establishment of a number of courses offered for the first time in Australia, as follows.

At the University of New South Wales, Ceramic Engineering was offered as a course for the Bachelor of Applied Science degree in 1961. At the University of Melbourne, a post-graduate Diploma in Criminology was offered in 1961, and at The University of New England a post-graduate Bachelor of Letters degree was introduced for external students in 1961.

Other developments in 1961 included the establishment of a Faculty of Applied Science and a School of Oriental Studies at the University of Melbourne, and the establishment of a Faculty of Medicine at the University of New South Wales.

A major development in 1962 was the establishment of a Faculty of Oriental Studies in the School of General Studies at the Australian National University. At the University of Queensland, a Department of Anthropology began in 1962.

For the majority of university courses, full-time attendance is required. At most universities, however, certain courses, such as arts, commerce and economics, may also be undertaken by part-time or evening study. At the University of New South Wales, a variety of degree courses are available to evening students.

Several universities have limited systems of external tuition whereby students in country areas may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea and adjacent Pacific islands. External students within Queensland receive tutorial assistance at university centres in the principal country towns. In addition, the university co-operates in the Colombo Plan Correspondence Scholarship Scheme (*see p. 595*).

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degree of Bachelor of Arts and the Diploma in Education. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

4. *Research.*—A wide range of research work is carried out by the universities as part of their normal functions. The research activities of the universities have been greatly stimulated over recent years by the interest and assistance of the Commonwealth and State Governments, government instrumentalities such as the Commonwealth Bank, the Rural Bank of New South Wales, and the C.S.I.R.O., private foundations, both oversea and Australian, such as the Nuffield Foundation, the Carnegie Corporation and the Water Research Foundation of Australia, and industrial undertakings. Details of research work carried out at each university can be obtained from its calendar or research report.

Grants are made by the Commonwealth Government to bodies such as the Post-Graduate Committee in Medicine at the University of Sydney to facilitate arrangements for medical specialists from overseas to lecture and demonstrate advanced techniques in Australia.

Grants have been made by the Commonwealth Government, through the Australian Atomic Energy Commission, to a number of Australian universities for nuclear research.

The further expansion of teaching and research in various agricultural and veterinary fields was assisted by the annual and special grants of the Commonwealth Bank's Rural Credits Development Fund to several Australian universities. The C.S.I.R.O. also contributed to research in these and other fields.

5. *The Commonwealth and the Universities*—(i) *General*. The Commonwealth has given support to the Australian universities for many years. Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment. Since 1951, the Commonwealth has made special grants to the States for their universities and during the same time has continued to support the university institutions for which it is responsible.

(ii) *Assistance to Students*. Up to 1945, the Universities Commission, now the Commonwealth Scholarships Board, functioned under National Security Regulations, but in that year it was established on a permanent basis under the Commonwealth Education Act 1945. After the 1939–45 War, the Commission continued to provide financial assistance to students under an interim scheme until 1951, when the interim scheme was superseded by the Commonwealth Scholarships Scheme.

From January, 1961, the number of Commonwealth scholarships granted annually increased from a maximum of 3,000 to a maximum of 4,000. These are allocated to the States on a population basis and are tenable at universities and other approved institutions. Awards are made on merit and all successful applicants have their fees paid. In addition, scholarship holders may be paid a living allowance subject to a means test. As from 1st January, 1961, the maximum rates of allowance have been £364 per annum for a scholar living away from home and £234 per annum in the case where he lives at home.

At 30th September, 1961, 16,555 scholars had completed courses of training under the Scheme. At the same date, there were 12,688 scholars in training, of whom 11,936 were at universities and 752 at other institutions.

As from 1st January, 1959, post-graduate awards for training at Australian Universities were made available under the Scheme. One hundred awards were granted in each of the years 1959, 1960 and 1961. From 1962, an additional 25 awards will be available each year if the quality of candidates is sufficiently high. The benefits comprise a living allowance without a means test and payment to universities for tuition and facilities.

The Commonwealth Scholarships Board also provides for the training, at universities and similar institutions, of ex-service personnel and war widows under the Reconstruction Training Scheme, the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme. A detailed description of the Reconstruction Training Scheme was given on page 240 of Official Year Book No. 39. At 30th September, 1961, 21,503 students had completed courses under these schemes and at the same date there were 66 in training.

(iii) *Commonwealth Grants to the States for University Purposes*. Following a report submitted by a committee of inquiry appointed to report on university finances and requirements, the Commonwealth, since 1951, has made grants to the States for recurrent expenditure on university purposes. The payments have been made under the various States Grants (Universities) Acts.\*

In 1957, the Prime Minister appointed a committee to investigate the problems of Australian universities. The Committee was given wide terms of reference. Among other things, it was asked to consider the role of the university in the Australian community, the extension and co-ordination of university facilities, technological education at university level, the financial needs of universities and appropriate means of providing for those needs, and the Commonwealth Scholarship Scheme.

In accepting the principal recommendations of the Committee (Murray Report)†, the Commonwealth agreed to continue grants for recurrent expenditure in 1958, 1959 and 1960, to make additional unmatched recurrent grants, and to assist with the capital needs of the universities for building projects and for equipment. The Commonwealth was also to provide grants between 1958 and 1960 for the building programmes of residential colleges affiliated with universities.

\* No. 81 of 1951; No. 75 of 1953; No. 28 of 1955; No. 37 of 1956; No. 7 of 1957; No. 27 of 1958; and No. 106 of 1960. † Report of the Committee on Australian Universities (Canberra, Commonwealth Government Printer, 1957).

The States Grants (Universities) Act No. 27 of 1958 operated from 1st January, 1958, and gave effect to these recommendations. This Act amended those parts of the States Grants (Universities) Act No. 7 of 1957 which referred to 1958 and provided for payments for 1957 to the South Australian School of Mines and Industries (now the South Australian Institute of Technology).

In 1959, following the Report of the Committee on Australian Universities, the Commonwealth Government established the Australian Universities Commission under the Australian Universities Commission Act No. 30 of 1959. The Commission's principal functions are to advise the Prime Minister on financial assistance to Commonwealth Universities and to States in relation to their Universities and also on the balanced development of Australian Universities. The Commission commenced its work in July, 1959. The first report of the Commission, covering the period 1961-63, was presented in October, 1960. The Commission recommended that Commonwealth grants in the period should be £93,300,000, approximately twice as great as grants available in the period 1958-60. The States Grants (Universities) Act No. 106 of 1960 which operated from 1st January, 1961, gave effect to these recommendations. This Act (No. 106 of 1960) amended those parts of the States Grants (Universities) Act 1958, which referred to recurrent grants to all universities for 1960.

The general grant for recurrent expenditure is a continuation of matched grants provided since 1951, and the maximum amount available in 1961 is shown in the following table.

RECURRENT COMMONWEALTH GRANTS TO UNIVERSITIES, 1961.

University.	General Grant for Recurrent Expenditure.
	£
New South Wales—	
The University of Sydney .. .. .	1,562,000
The University of New South Wales .. .. .	1,350,000
The University of New England .. .. .	458,000
Victoria—	
The University of Melbourne .. .. .	1,374,000
Monash University .. .. .	233,000
Queensland—	
The University of Queensland .. .. .	929,000
South Australia—	
The University of Adelaide .. .. .	832,000
The South Australian Institute of Technology .. .. .	63,000
Western Australia—	
The University of Western Australia .. .. .	577,000
Tasmania—	
The University of Tasmania .. .. .	273,000
<b>Total .. .. .</b>	<b>7,651,000</b>

From 1961, the matched grants have been made on a basis of £1 of Commonwealth money for every £1.85 of income received by a university from fees and State grants. From 1951 to 1960, the matching ratio was, in general, £1 to £3.

From 1961, there has been a change in the method of calculating the unmatched Commonwealth grants for the teaching and administrative costs of residential colleges administered by or affiliated with a university. The grant consists of payments each year of £2,000 to each college, plus £15 for each resident student, and, a further £5 for each non-resident student receiving tutorial assistance. The Commonwealth total grant paid in 1961 was £154,190.

Commonwealth grants for selected building projects, for the period 1961-63, are shown in detail in the Second Schedule to the 1960 Act. Payments are made up to a given maximum for each project, on the basis of £1 from the Commonwealth for every £1 of State grants. The total Commonwealth grant for each University is shown in the following table.

**COMMONWEALTH GRANTS FOR UNIVERSITY BUILDING PROJECTS, ETC.  
1961-63.**

University.							Commonwealth Contribution.
							£
New South Wales—							
							1,450,000
							2,880,000
							670,000
Victoria—							
							1,056,000
							3,890,000
Queensland—							
							1,100,000
South Australia—							
							1,060,000
							10,000
Western Australia—							
							1,200,000
Tasmania—							
							900,000
							<b>14,216,000</b>

The States Grants (Universities) Act No. 106 of 1960 amended those parts of the States Grants (Universities) Act No. 27 of 1958, which referred to grants for University building projects at Monash University. In addition, a grant of 5 per cent. of the cost of each project is made for equipping and furnishing buildings. This grant is also matched £1 for £1 by the States. In the period 1958-60, the Universities received an unmatched Commonwealth grant for equipment equal to 16 per cent. of the cost to the Commonwealth of each project.

The Commonwealth also makes available, at the request of the State, grants for buildings for residential colleges affiliated with a university. Commonwealth grants are up to one half of the cost for the purchase, erection or alteration of a building at an affiliated residential college. The maximum amount available for distribution in each State in the period 1961-63 is shown in the following table.

**MAXIMUM COMMONWEALTH GRANTS FOR RESIDENTIAL COLLEGE  
BUILDINGS, 1961-63.**

University.							Maximum Grant.
							£
New South Wales—							
							142,000
							150,000
Victoria—							
							223,000
Queensland—							
							195,000
South Australia—							
							101,000
Western Australia—							
							120,000
Tasmania—							
							69,000
							<b>1,000,000</b>

For the first time, for the three years covered by the 1960 Act, a grant is made for the purchase of items of equipment specially approved by the Australian Universities Commission on the basis of £1 from the Commonwealth for every £1 of State grants. This grant is made available in two parts.

The allocation to Universities of one-half of this grant is shown in the Third Schedule to the 1960 Act. The maximum amount available to each University is shown in the following table.

**COMMONWEALTH GRANTS FOR EQUIPMENT, 1961-63.**

University.						Commonwealth Contribution.
						£
New South Wales—						
The University of Sydney .. .. .	..	..	..	..	..	45,000
The University of New South Wales .. .. .	..	..	..	..	..	40,000
The University of New England .. .. .	..	..	..	..	..	15,000
Victoria—						
The University of Melbourne .. .. .	..	..	..	..	..	45,000
Monash University .. .. .	..	..	..	..	..	15,000
Queensland—						
The University of Queensland .. .. .	..	..	..	..	..	25,000
South Australia—						
The University of Adelaide .. .. .	..	..	..	..	..	25,000
Western Australia—						
The University of Western Australia .. .. .	..	..	..	..	..	25,000
Tasmania—						
The University of Tasmania .. .. .	..	..	..	..	..	15,000
<b>Total .. .. .</b>	..	..	..	..	..	<b>250,000</b>

The remaining half of the grant (totalling £250,000 from the Commonwealth) is to be distributed among the Universities listed in the table above on the basis of grants for individual items specially approved by the Commission.

The grants for capital building projects at universities and residential colleges and capital equipment grants for universities are payable at any time within the period 1961-63.

6. Teaching and Research Staff.—The following table shows particulars of the teaching and research staff of Australian universities during 1960.

**UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1960.**

(a) Adjustment made for students enrolled for more than one course.

8. **Principal University Benefactions.**—Issues of the Official Year Book up to No. 40 included details of the principal private benefactions to universities. (See Year Book No. 40, pp. 467–8.)

9. **University Income for General Activities.**—The income of the universities is derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations. From all sources other than new bequests, the income during 1960 for general university functions was as shown in the table below. In South Australia, Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute.

**UNIVERSITIES: INCOME FOR GENERAL ACTIVITIES, 1960.**

10. **University Expenditure for General Activities.**—The principal item of disbursements on general university activities is the maintenance of the teaching and research staff, accounting for 59.0 per cent. of the total in 1960 compared with 62.0 per cent. in 1959.

The following table shows the expenditure including capital expenditure during the year 1960.

**UNIVERSITIES: EXPENDITURE FOR GENERAL ACTIVITIES, 1960.**

(a) Includes degrees conferred on students of the Canberra University College.

(b) Excludes the number of B.S. degrees conferred.

### § 11. Other Aspects of Education.

1. **General.**—Beyond the schools, colleges and universities, there are agencies engaged in less direct educational work which cannot be readily assessed and described. Among these are such things as press, film, radio and television, which are powerful educational forces—whether they are used specifically to disseminate information such as new agricultural techniques or preventive health measures, or, on the other hand, in a much more general way to exert an influence on the cultural level of the population. There are also bodies and institutions such as the adult education authorities, libraries, art galleries and museums which aim at catering for the educational and cultural needs of the general public.

2. **Adult Education.**—(i) *General.* The term “adult education” is used in Australia to refer in the main to non-vocational educational and cultural activities for adults provided by some of the universities and by various adult education authorities, which vary in form from State to State. In 1960, an Australian Association for Adult Education was formed, and its first Annual Conference was held in Adelaide in 1961. It handles matters pertaining to adult education at a national level and arranges liaison with similar bodies in other countries.

The Workers' Educational Association movement, which has for its object the bringing of the universities into closer relationship with the community in general and providing for higher education in civic and cultural subjects, has been active in Australia. In 1913, associations were formed in all the Australian States. In four States, the associations have been superseded by Adult Education Boards or Councils set up by the State Governments in Victoria, Queensland and Tasmania and by the university in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

While the choice of courses offered by these bodies is naturally more limited in the smaller States, a variety of topics, including social studies and current affairs, language and literature, drama, music, arts and crafts, are available in all States.

(ii) *New South Wales.* (a) *Adult Education Advisory Board.* State Government grants for adult education are allocated by the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of N.S.W. (Adult Education Section), and the Arts Council of Australia (N.S.W. Division).

(b) *University of Sydney.* The Extension Board of the University of Sydney provides lectures and short courses in city and country.

In 1914, the Department of Tutorial Classes was established to provide classes and study groups along the lines of similar work in England. Its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and "kits" to serve the needs of country districts and people who cannot be catered for by tutorial classes, and publication of the fortnightly *Current Affairs Bulletin*. This publication, begun in 1942 and produced for four years by the Australian Army Education Service, was recommenced in 1947 as a civilian and service publication by the Commonwealth Office of Education. At the beginning of 1952, the Department of Tutorial Classes took over full responsibility for the Bulletin. It receives an annual grant from the Commonwealth Government for this purpose.

In 1960, there were 167 tutorial classes with a total enrolment of 4,845 and 145 discussion groups with a total enrolment of 2,217.

The Department works in conjunction with the Workers' Educational Association through the Joint Committee of Tutorial Classes, appointed by the university senate.

(c) *Workers Educational Association.* In addition to co-operating with the Department of Tutorial Classes in organizing certain classes and groups, the Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education, and maintains a property near Sydney where short residential schools are held throughout the year.

In 1960, the Association ran 82 classes, for which there were 4,454 enrolments.

(d) *University of New England.* When the New England University College became an autonomous university in 1954, its Department of Adult Education took over full responsibility for the activities formerly undertaken by it on behalf of the Department of Tutorial Classes of the University of Sydney. It brings university extension activities to the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area.

(e) *Public Library of New South Wales.* The Public Library's adult education section provides an adult education library service for all classes and groups conducted by the Department of Tutorial Classes of the University of Sydney, the Workers' Educational Association, and the Department of Adult Education of the University of New England.

(f) *Arts Council.* The New South Wales Division of the Arts Council of Australia provides a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns. Musicians provide some short lecture courses in the city.

(g) *Education Department.* The New South Wales Education Department provides evening colleges, housed in its schools and staffed by trained teachers, which provide non-vocational courses in a wide variety of crafts and dramatic and musical activities. Adults may prepare for the Intermediate and Matriculation examinations at certain of these colleges.

(iii) *Victoria.* The Council of Adult Education is a government instrumentality established by the Adult Education Act 1946. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes on topics ranging from social studies, psychology, language and literature, to crafts, music, drama, etc., and usually lasting from 10 to 20 weeks. An annual 10-day summer school is another important activity. The Council publishes a bi-monthly bulletin, *C.A.E. Newsletter* and a quarterly journal, *Adult Education*. Its group service assists and provides programme material for the discussion groups formed by organizations and individuals throughout the State. In 1959-60, there were 6,365 enrolments for classes and 2,880 individual enrolments in 261 discussion groups.

A recent development of importance is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its community arts service, the Council organizes tours, by musicians and by theatrical and other companies, in country towns which otherwise would have no opportunity of seeing such performances. It provides an advisory service to musical societies and co-operates with the National Gallery of Victoria in the organization of travelling art exhibitions.

The council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

(iv) *Queensland.* The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board, the Supervisor, are six district officers, one based in Brisbane and five in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some of which extend over a full year, and film screenings. Library and film services are provided.

In 1960, enrolments for lectures totalled 3,176. Some form of adult education activity was available in almost 300 centres.

(v) *South Australia.* Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided year by year in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, in co-operation with the Workers' Educational Association of South Australia.

In 1957, a Department of Adult Education was established and a full-time Director of Adult Education appointed. A wide range of University extension courses and educational conferences, summer schools and seminars, including a number dealing with subjects at post-graduate level, are organized directly by the University. In 1960, enrolments for tutorial and extension classes totalled 2,974.

The Workers' Educational Association of South Australia, in addition, carries on an independent educational programme of classes, schools, and exhibitions or film festivals.

The State Education Department also arranges an extensive programme of educational activities.

(vi) *Western Australia.* Adult education in Western Australia is organized by the Adult Education Board, established in 1928 under the terms of the statutes of the University of Western Australia. The board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The Board conducts, in the metropolitan areas, classes, refresher courses and short schools, conferences, seminars and public lectures, and maintains a library. Classes were held in 1960 with a total enrolment of 1,785. The Board's country work is mainly operated through a box library scheme for discussion groups, of which there were 72 in 1960. Lecture tours and week-end schools are held, and local adult education is encouraged through semi-autonomous local committees. Metropolitan work and country work are drawn together in an annual summer school.

The Board also operates a community arts service in city and country and arranges screenings of foreign films. Regional drama festivals and music festivals are arranged culminating in the annual Festival of Perth, inaugurated and administered by the Board.

(vii) *Tasmania.* Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had a Director of Tutorial Classes. Later the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. In 1948, the Adult Education Act was passed, providing for the formation of an Adult Education Board whose functions are to plan and develop adult education in Tasmania and to assist other bodies actively engaged in adult education.

The executive officer of the board, located at Hobart, is the Director of Adult Education. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

The board organizes classes of ten weeks' duration on a wide range of subjects. In 1960, 452 courses were held with a total enrolment of 4,500. It sponsors special lectures, film screenings and art exhibitions, recitals of music and dramatic performances, in both city and country areas. Its income is derived from a State government grant and from students' fees.

3. **The New Education Fellowship.**—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly. A major conference of the New Education Fellowship is to be held in Australia in 1962, during which prominent educationists from Australia and overseas will visit all States.

4. **Australian College of Education.**—An Australian College of Education was formed in 1959. Its aim is to bring together leading members of every field of education for their mutual benefit and the furtherance of education in the Commonwealth.

5. **Migrant Education.**—The Commonwealth government's post-war immigration policy has brought to Australia over 750,000 immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia.

Before arriving in Australia, migrants who do not speak English are given some instruction in English by shipboard education officers.

In Australia, free evening classes are arranged by State Education Departments wherever a group of nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. Should migrants find it impossible to attend classes, they may apply, through State Education Departments, for a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials.

In October, 1961, 19,395 migrants were enrolled in classes and 10,770 were taking correspondence lessons. At the same time, 15,776 were receiving the monthly booklet accompanying the radio lessons.

## B. CULTURAL ACTIVITIES.

### § 1. Libraries.

1. **General.**—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne. In 1960, the first library school to be attached to an Australian University was opened. This is in the University of New South Wales.

2. **Commonwealth.**—(i) *National Library of Australia.* This Library grew directly from the Library of the Commonwealth Parliament established in Melbourne in 1901, the Committee of which soon afterwards announced its intention to develop a library patterned on the Library of Congress at Washington, U.S.A., capable of serving purposes beyond those essential to the Parliament itself, appropriate to a national library and on

a national scale. This policy was steadily pursued, so that, in addition to its primary function of serving Parliament, it gradually became a central source of information for the government and its departments and other agencies, and assumed increasing reference and bibliographical responsibilities in relation to scholarship and research in Australia and abroad. It was also influenced by the basic elements of the national library concept of the older countries of Europe: namely, that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries. For these growing extra-Parliamentary activities, the Parliamentary Library Committee, in 1923, adopted the title of Commonwealth National Library.

A committee appointed to examine the future control and functions of the Commonwealth National Library recommended, in 1957\*, its establishment as the National Library of Australia, separate from the Parliamentary Library, with wide functions and controlled by a board subject to a Minister; the transfer, as a separate agency to an appropriate department, of its Archives Division, which constituted the Commonwealth's agency for the custody and organization of departmental records of permanent value which need no longer be held within departmental offices; and that the Parliamentary Library be a separate library under separate Parliamentary control. Continuing co-operation, where possible, between the two libraries was also proposed.

Effect was given to these recommendations by the National Library Act, No. 69 of 1960, which created the National Library of Australia as a body corporate under the control of a Council of nine members, of whom one is a Senator elected by the Senate, one a member of the House of Representatives elected by that House, and seven appointed by the Governor-General, and with the following functions:—

on behalf of the Commonwealth—

- (a) to maintain and develop a national collection of library material, including a comprehensive collection relating to Australia and the Australian people;
- (b) to make the national collection available to such persons and institutions in such manner and subject to such conditions as the Council determines with a view to its most advantageous use in the national interest;
- (c) to make available such other services in relation to library matters and material, including bibliographical services, as the Council thinks fit, and in particular for the purposes of—
  - (i) the library of the Parliament;
  - (ii) the Departments and authorities of the Commonwealth; and
  - (iii) the Territories of the Commonwealth; and
- (d) to co-operate in library matters (including the advancement of library science) with authorities or persons, whether in Australia or elsewhere.

The National Library comprehensively collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving picture films and sound recordings. In this, it has been assisted by the deposit provisions of the Copyright Act 1912–1950, and has also been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews Ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts and printed material in 1959, and the Ferguson Sociological collection which is still under transfer. A feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including over three million pages in the Public Record Office in London.

The Library publicizes Australian publications, both at home and abroad, through select lists which include *Australian Books* (annual), and *Australian Public Affairs Information Services* (a monthly subject index with an annual cumulation), and by collections of Australian books maintained by it at all posts at which Australia is officially represented abroad. In London and New York, the National Library maintains and staffs Australian Reference Libraries supervised by its own Liaison Officers in those centres.

\* National Library Inquiry Committee. Report . . . with appendices. (Canberra, Commonwealth Government Printer, 1957.)

In the discharge of its wider bibliographical responsibilities, the Library publishes the *Australian National Bibliography* (monthly with an annual cumulation), which lists books, pamphlets, maps, prints, sheet music, government publications, the first issue of each new periodical or newspaper, and moving picture films produced in or relating to Australia. Commonwealth and State official documents, both monographic and serial, are listed in *Australian Government Publications* (annual). The Library has also compiled a union catalogue of serials in the social sciences and humanities in Australian libraries, and in 1961 began publication of the *National Union Catalogue of Current Monographic Accessions*. Preliminary steps have also been taken for a retrospective union catalogue of monographic holdings of Australian libraries.

In 1956, the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State libraries and library boards, the Commonwealth Scientific and Industrial Research Organization, each of the universities, and the Library Association of Australia, plans the further development and co-ordination of bibliographical services and co-operates with UNESCO and the International Advisory Committee of Bibliography. The Centre organizes bibliographical projects recommended by the Council, and operates as a centre for bibliographical information in Australia and overseas. It has published a *Union List of Newspapers in Australian Libraries*; Part 1: *Newspapers published outside Australia* (1959); and Part 2: *Newspapers published in Australia* (1960).

The Library acts as a central library of documentary and educational films, its film collection containing over 6,000 titles, together with Australian historical films and a great number of film strips. It published *Australian Films: a Catalogue of Scientific, Educational and Cultural Films, 1940-58* in 1959 and a first supplement in 1960. A revised edition of the *Catalogue of 16-mm. Films*, which lists all films available for loan, was also published in 1960. Special efforts are being made to discover and preserve samples of early Australian film production.

Through its Extension Division, the Library conducts the Canberra Public Library Service for residents of the Australian Capital Territory, to whom 435,000 books were loaned during 1960-61. It also assists in the provision of similar services in the Northern Territory, the Territory of Papua-New Guinea, and Norfolk Island.

The National Library's collections contain approximately 675,000 volumes, 32,000 pictures, prints, drawings and other graphic materials, one million feet of microfilm, 65,000 maps, and nine million feet of moving picture films. Special features of the book collection are its strong holdings of Australianiana, of materials relating to the Pacific area and to east and south-east Asia, the publications of foreign governments and international organizations, and works in the social sciences, particularly in political theory and economics.

(ii) *Patent Office Library.* The Library of the Commonwealth Patent Office, Canberra, contains approximately 9,000 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 7,000,000. Indexes include a microfilm of a classified index to 3,000,000 U.S.A. patents and translations of abstracts of U.S.S.R. patents.

(iii) *Commonwealth Scientific and Industrial Research Organization.* The library holdings of the Organization cover the pure and applied sciences. In addition to the Head Office Library in East Melbourne, each of the Divisions and Sections has a specialized collection covering such subjects as food preservation, forest products, chemistry, physics, animal health and fisheries. The collections are particularly strong in the publications of oversea scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Head Office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and is responsible for the following publications.

(a) *Scientific Serials in Australian Libraries.*

(b) *Australian Science Index.* Index of articles published in Australian scientific and technical periodicals.

(c) *C.S.I.R.O. Abstracts*, which includes abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organizations and additions to the British Commonwealth Index of Scientific Translations.

The larger libraries in the Organization have photocopying facilities which, while normally for internal use, will provide a service for the public when a publication is not held elsewhere in Australia.

(iv) *The Australian War Memorial Library*. In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914-18 and 1939-45 Wars, together with collections covering the war in Korea, 1950-53, and earlier wars in which Australian troops participated—Sudan, 1885, South Africa, 1899-1902 and the Boxer Rebellion in China, 1900-01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both World Wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914-18, 1939-45 and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but all requests for information are met where practicable.

(v) *Other Commonwealth Government Libraries*. Most Commonwealth authorities have specialized collections in their own fields, and in addition draw largely on the National Library.

3. *States*. (Other than University Libraries, for which see p. 620).—(i) *State Public Libraries*. In each of the capital cities there is a well-equipped public library, the libraries in Melbourne and Sydney, especially, comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1960.

STATE PUBLIC LIBRARIES, 30th JUNE, 1960.

City.	Number of Volumes in—			Total.
	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra(a) .. .. .	675,000	..	(b)	675,000
Sydney .. .. .	(c) 582,752	..	(d) 152,381	735,133
Melbourne .. .. .	668,267	117,433	46,013	831,713
Brisbane .. .. .	139,530	..	63,746	203,276
Adelaide .. .. .	194,933	(e) 72,086	99,742	366,761
Perth .. .. .	187,057	(f) 174,146	..	361,203
Hobart .. .. .	78,110	(g) 148,418	122,712	349,240
Darwin(h) .. .. .	..	37,854	..	37,854

(a) National Library of Australia, including Parliamentary Section. (b) Books are lent to libraries or students throughout Australia wherever necessary for research work. (c) Includes 168,791 volumes in the Mitchell Library and 12,322 volumes in the Dixon Library. (d) Includes 1,943 volumes in the Model School Library. (e) Includes 24,693 volumes in the Children's Branch and 8,691 volumes in the Youth Lending Branch. (f) Public libraries and circulation stock. (g) Includes 120,986 volumes in the Children's Branch. (h) Northern Territory Library Service. Includes the Country Lending Branch and the Children's Branch.

(ii) *New South Wales.* The Free Library movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. Of the 167 councils which have adopted the Library Act, 150 have put their adoption into effect. During 1960-61, they spent on their libraries £1,303,669, including £399,465 received in subsidy. There are 190 libraries, of which 49 are in the metropolitan area and 141 in the country. There are also 15 bookmobiles, of which two are in Sydney, six in the suburbs of Sydney and seven in country municipalities and shires. These libraries contain 2,205,385 volumes.

New South Wales departmental libraries are staffed by officers attached for duty from the State Library, which also provides a central cataloguing service for municipal and shire libraries constituted under the 1939-1959 Act. The State Library maintains an adult education section servicing adult education activities for the universities of Sydney and New England and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1960-61, 97,782 books were lent to small State schools, and 1,843 to country libraries, while 44,007 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library, known as the Public Library of New South Wales, includes a general reference department of 412,150 volumes, together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixson Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 172,820 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixson gave a collection of historical pictures then valued at £25,000. These were subsequently added to, and at his death in 1952 Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material, together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The total number of volumes in the State Library now exceeds 730,000, apart from manuscripts, historical pictures, and other material.

The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council to become the City of Sydney Public Library.

The State Library, which had previously been the repository for State archives, transferred this responsibility to an Archives Authority in June, 1961. The Authority consists of nine members, one of whom the Trustees of the Public Library have a right to nominate.

Other important libraries in New South Wales are the Sydney Public Library, 201,717 volumes; Teachers' Colleges, 197,177; Railways Institute, 163,500; Technical Education Branch, 87,146; Government Transport Institute, 35,905; Australian Museum, 33,081; New South Wales Public School Teachers' Federation Library, 20,500; Workers' Educational Association, 14,500; and the Library at the National Herbarium, 10,120 volumes. At 30th June, 1961, the Parliamentary Library contained 137,602 volumes.

(iii) *Victoria.* Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the State Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 91 municipalities have established libraries. Of these, 20 are in the city and 71 in the country. An amount of £309,000 was paid to the Councils in library subsidy for the year 1960-61 and £615,000 was expended in municipal library service for the same year. More than 1,500,000 books are available to the communities in which libraries are established.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are seventeen, comprising a total of 57 Councils, consist of groups of Councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities.

Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1960-61, 52 of them shared a grant of £2,000.

(iv) *Queensland.* The Library Board of Queensland was established in 1945 under the provisions of the Libraries Act of 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of nine members with the State Librarian as *ex officio* member and secretary. A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library, being as it is the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946, and the collection has been kept separate. Its object is to collect books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia, and of Queensland in particular, and to provide facilities for research students in Queensland literature and history.

In 1958, the section of the Libraries Act dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist was appointed.

Since 1948, a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the Preliminary Examination of the Library Association of Australia. In 1959, a course covering the compulsory subjects of the Association's Registration Examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1960-61 were:—Main Reference Collection, 124,061 volumes and 6,598 maps and pamphlets; Country Extension Service, 68,971 volumes; Oxley Memorial Library, 20,381 volumes and 8,901 maps, pamphlets and miscellaneous items.

Local authorities are empowered by the Libraries Act to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1960-61, 67 local authorities were conducting 93 library services and 10 others indicated that they would do so in the near future. The Brisbane City Council has established 12 of these libraries. There were 73 libraries in Queensland free to adults.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1961, four regional library services had been established:—the South Western (six shires), the Central Western (seven shires), the North Western (six shires), and the Central Highlands (five shires), with head-quarters at Charleville, Barcaldine, Mt. Isa and Emerald respectively. Other regional services are being planned.

During 1960-61, the Board received a grant of £182,829 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies of fifty per cent. on the purchase of books and the acquisition or improvement of library buildings and equipment. Subsidies were paid to four regional library service boards, 47 local authorities, 44 schools of arts and seven other bodies.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1961, the library held 89,121 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature.

The Libraries Act Amendment Act, 1949 provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 199,000 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 39,000 volumes in the lending department available to persons living in the metropolitan area, and the country lending service has 125,000 volumes, of which more than half are suitable for children.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1960.

There are eleven local public libraries in South Australia provided by eight local government authorities. The libraries are subsidized on a £1 for £1 basis by the State Government. The Library Board of South Australia, through the Public Library of South Australia, provides various central services. Book-stocks are pooled in the Public Library of South Australia and are interchanged between the libraries.

At the end of June, 1961, these local public libraries contained 43,000 books. There were 25,000 registered borrowers. In the year 1960-61, 351,000 books were lent.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds.

The Board has the following major functions:—

- (a) To encourage local authorities throughout the State to establish public libraries, and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established;
- (b) to administer the State Library;
- (c) to advise the Government on all matters relating to libraries;
- (d) to provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing, and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1961, 47 libraries had been established.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:—

- J. S. Battye Library of West Australian History;
- Library of Business, Science and Technology;
- Library of Social Sciences, Philosophy and Religion;
- Library of Literature and the Arts.

The State bibliographical centre is housed at the State Library and there is also a commercial information centre. The State archives are maintained by the State Library and managed by the staff of the Battye Library. The State Library is fully equipped with microfilm and photocopy apparatus.

The book-stock of the Board at 30th June, 1961, was approximately:—

- Lending library services (including books in public libraries), 222,000 volumes;
- State Library, 191,000 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 18,000 volumes of general reading and fiction. Books are sent to country readers each month.

There are some 100 special libraries in government departments and industrial firms.

Union catalogues of periodicals and books received in the libraries of all types in the State are maintained by the Library Board of Western Australia in the bibliographical centre of the State Library.

(vii) *Tasmania.* The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library head-quarters in Hobart, for the extension of library services throughout the State and for the control of State aid for libraries. State aid to municipalities is provided in the form of books of a value equal to the amount of library rates collected. The total cost of library services to the State during 1960-61 amounted to £128,644.

The Tasmanian Library Board provides lending and reference services for the people of Hobart, and operates a reference service for people throughout the State. In addition, it conducts screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session. It catalogues all new books added to the library and supplies recreational reading.

4. *University Libraries.*—(i) *General.* These libraries provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the library of the University of Sydney is the fourth library in Australia, and the libraries of the Universities of Melbourne and Adelaide are respectively eighth and ninth. The following table shows the sizes, accessions during the year, and expenditure of the Australian university libraries; borrowing statistics are not shown, as they differ too widely to be comparable without considerable explanation.

UNIVERSITY LIBRARIES, 1960.

University or College.	Volumes.	Accessions during year.	Expenditure.
			£
Australian National University .. ..	157,864	10,989	68,920
Canberra University College(a) .. ..	71,184	8,814	39,670
Sydney(a) .. ..	647,130	79,729	196,082
New South Wales .. ..	151,970	30,756	151,054
New England(a) .. ..	107,823	15,150	58,835
Melbourne(a) .. ..	292,243	22,972	136,535
Monash(a) .. ..	10,000	10,000	26,720
Queensland .. ..	221,998	24,823	101,788
Adelaide .. ..	255,829	12,217	96,140
Western Australia .. ..	184,790	12,591	70,002
Tasmania(a) .. ..	125,000	8,173	49,676
<b>Total .. ..</b>	<b>2,225,831</b>	<b>236,214</b>	<b>995,422</b>

(a) Includes pamphlets.

(ii) *Australian National University.* This library consists of two main collections; the former Australian National University Library, founded in 1948, serves primarily the Institute of Advanced Studies, and the former Canberra University College library, founded in 1938, serves primarily the School of General Studies. At the end of 1961, the stock comprised about 255,000 volumes including some 50,000 volumes in oriental languages. The collection serving the Institute of Advanced Studies specializes in the fields of the physical and medical sciences, excluding clinical works, and in the social sciences it aims to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics. The collection serving the School of General Studies has been built up to meet the needs primarily of undergraduates in the Faculties of Arts, Economics, Law and Science, and will develop strength as a research collection in the humanities.

(iii) *University of Sydney.* This library consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkitt Library for preclinical medicine, and some fifty-two departmental libraries. The University Library, together with departmental libraries, held 718,707 volumes in December, 1961. Associated libraries in the University grounds bring the grand total to 963,872 volumes.

The first books were acquired in 1851, and shortly afterwards the library of Sydney College was added. The notable collection of Nichol D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885, Thomas Fisher bequeathed the sum of £30,000, the income from which is used as a book fund. The Fisher Fund was matched in 1961 by establishment of the *W. H. and Elizabeth M. Deane Library Fund*. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library. In 1961, the University acquired the notable English literature collection of the late Hugh Macdonald. Sydney University Library has an extensive collection of mediaeval manuscripts and early printed books.

(iv) *University of New South Wales*. The libraries of this University consist of the Central Library at Kensington, a Medical Library at present at Prince Henry Hospital, and the Newcastle University College Library. The Broadway campus is serviced by the Sydney Technical College Library, where 37,167 books from the University's library are placed. Service to University divisions at other centres is also provided by the Technical Education Department. In December, 1961, the university had 193,841 volumes in its libraries or located in Technical Education Department libraries.

(v) *University of New England*. The Dixson Library was founded in 1938, when the New England University College was established. Sir William Dixson was its first benefactor. The library is now housed in a three-storied building, air-conditioned and containing all facilities. The library has approximately 100,000 volumes and receives 2,150 current periodical titles annually. The library is able to accommodate 200 readers and 278,000 volumes. A fourth floor is to be built later to house a further 120,000 volumes. The building also houses a bindery, photographic and archives division. The library has its own training officer and conducts formal courses in librarianship.

(vi) *University of Melbourne*. Early in 1854, the first allocation for books was made, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State governments, and a new building costing £700,000 was occupied at the beginning of 1959, the first in the University to be designed specifically for library purposes. It provides space for 1,300 readers and 300,000 books. During the academic year, admissions of readers to the building average nearly 8,000 a day and the library's services to the University have practically quadrupled since the occupation of the new building. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of textbooks and certain valuable volumes, is made as easy as possible. The resources of the library are also used extensively on inter-library loan by industries and other organizations throughout Australia. The University Library, including 13 branch libraries in various departments, is administered from the centrally situated Baillieu Library, and at the end of 1961 it contained approximately 311,000 books and pamphlets. The large medical branch library is specially rich in periodicals.

(vii) *University of Queensland*. This library was founded in 1911. The main library is in its own building in the University at St. Lucia, and there are a considerable number of departmental libraries. All books are in open access and most are available for borrowing. At 30th November, 1961, the library contained more than 251,000 volumes. The main library includes a special collection of material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

(viii) *Adelaide University*. This library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over £50,000 for the library. Although readers have access to all parts of the library, the book collection is in two divisions, a collection of some 25,000 of the most frequently used books being kept in the main reading room, and the remainder, consisting of older or more specialized books, being shelved on the four levels of the extensions. Bound periodicals are shelved in steel stacks under the main reading room. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are branch libraries for medicine, law and music. The British Medical Association (S.A. Branch) and the Australian Physiotherapy Association (S.A. Branch) make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of publications in agriculture.

(ix) *University of Western Australia.* The first permanent library staff was not appointed until 1927. Provision for a permanent library was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. In 1960, a temporary annexe capable of holding some 200 readers and 30,000 volumes was provided. The first stage of the new library building is included in the buildings approved by the Australian Universities Commission for completion in the 1961-63 triennium. The University Library developed very slowly in the early years, but recently has been adding about 12,000 volumes a year to its stock and making good earlier deficiencies. In addition to the Central Library, there are a number of departmental libraries of which the more important are engineering, agriculture, pre-clinical and law. There is also a medical library, in accommodation provided by the Royal Perth Hospital, for the use of the medical school.

(x) *University of Tasmania.* Although this library was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the University Library, thus providing a major reference tool for all bibliographic inquiries in the State. At the end of 1961, the library contained approximately 132,000 volumes, and receives 2,500 periodicals currently. The University Library also collects private and business archives and it has some important classical manuscripts as well as a collection of early printed books.

5. *Children's Libraries and School Libraries.*—(i) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools have trained teacher librarians.

(ii) *Victoria.* Under the auspices of the Free Library Service Board, 91 municipal children's libraries have been, or are being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern children's book collections which are constantly being augmented. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, seven independently controlled children's libraries shared in this grant in 1960.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the government subsidises the purchase of books. In June, 1960, 350 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. Two hundred and ninety schools benefited from this scheme in 1960.

The Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 20 teachers are trained each year.

(iii) *Queensland.* The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 90 libraries free to children, of which 10 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba, and Townsville are particularly active. Country children who are not catered for locally may borrow from the Country Extension Service which possesses a separate children's collection. The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Trainees at the Teachers' College are instructed in school library organization and management.

(iv) *South Australia.* A children's library of 27,000 volumes is used by school classes and individual children living in the metropolitan area. Except for works of reference, all books are available for loan. In August, 1957, a youth lending service was opened for young people from 13 to 18 years of age. It has a stock of 10,000 volumes.

(v) *Western Australia.* The State Education Department makes library subsidies and grants to schools.

All high schools are provided with a library room and furniture, and trained teacher-librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley travelling library and the small schools fixed library services. Under the fixed library scheme, permanent libraries of reference books and encyclopaedias were placed in each such school. Books to the value of £15 were added to each of these libraries annually from 1948 to 1954. Since then, the grant for these books is made at three-year intervals. The Hadley library provides recreational reading and operates 348 boxes which are exchanged every three months. The government grants £500 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Savings Bank—about £140.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania*. The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania with books. At 30th June, 1961, 202 children's libraries and depots had been established.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in six of them. A school's library service gives a book service to schools and assists schools wishing to set up their own libraries. In 1961, the number of schools receiving service was 96 and the number of books issued was 12,734.

6. *Special Libraries*.—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being administered increasingly by trained librarians.

7. *Microfilms*.—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), National Library of Australia (PM), C.S.I.R.O. (M), Australian National University (M), Patent Office (P); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

## § 2. Public Museums.

1. *New South Wales*.—The Australian Museum in Sydney, founded in 1836, is the oldest in Australia. In addition to possessing fine collections of Australian fauna, the museum contains valuable anthropological and mineral collections. The number of visitors to the institution during 1959–60 was 318,400 and the average attendance 826 on week-days and 1,217 on Sundays. The expenditure for 1959–60 amounted to £189,415. A valuable library containing 33,000 volumes is attached to the museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, and afternoon lectures for school children are provided; 10,540 children attended during 1959–60. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University of Sydney, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public.

There is a Museum of Applied Arts and Sciences in Sydney with branches in three country centres. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally. Expenditure during the year 1959-60 was £70,931.

2. **Victoria.**—The National Museum at Melbourne, devoted to natural history, geology and ethnology, is in the eastern section of the public library building. The Institute of Applied Science, also housed under the same roof, contained at 30th June, 1960, 24,000 exhibits which covered applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne botanic gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the School of Mines in the chief mining districts.

3. **Queensland.**—The Queensland Museum, founded in 1855, is the State museum of natural science. It is a Government sub-department and is maintained by the State. The collections comprise extensive exhibited and reference series, mainly in the fields of zoology, geology, and ethnology, and some mechanical and historical material is held with a view to future museum development. Lessons supported by film displays are arranged for the public, and an annual refresher course in natural science is conducted for teachers. The museum is now the recognized State depository for valuable material in natural science, and the collections in general are constantly being increased. In addition, the Museum contains the outstanding library of the State in the fields of zoology, geology and anthropology.

4. **South Australia.**—The South Australian Museum has considerable collections of most branches of natural history. In 1960-61, there were at least 277,000 visitors and expenditure was £73,422.

5. **Western Australia.**—The Western Australian Museum was established in 1895. It is under the statutory management of a board of five members, appointed by the State Government, but operates under its own director and staff. It is primarily a museum of natural history, with active departments of vertebrate and invertebrate zoology, palaeontology, entomology, archaeology and anthropology. Principal research interests are in the fauna of Western Australia and the ethnology of the Western Australian aboriginal.

The Education Department of Western Australia provides a teacher to the Museum who instructs visiting classes and who is in charge of a Children's Centre during school holidays. Members of the Museum staff also take part in the teaching of undergraduates at the University of Western Australia.

6. **Tasmania.**—There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Queen Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral and miscellaneous products. The museum received aid from the Government during 1960-61 to the extent of £32,500.

### § 3. Public Art Galleries.

1. **New South Wales.**—The Art Gallery of New South Wales originated in the Academy of Art founded in 1871. At the end of 1960, its contents comprised 1,498 oil paintings, 963 water colours, 2,579 prints and drawings, 141 sculptures and casts, and 1,332 ceramics, works in metal and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns. The expenditure for 1960-61 was £73,662.

2. **Victoria.**—The National Gallery at Melbourne at 30th June, 1960, contained 1,266 oil paintings, 7,897 objects of statuary, bronzes, ceramics, etc., and 9,147 water colour drawings, engravings and other prints. The gallery is situated in the same building as the museum and public library. Expenditure by the National Gallery in 1959-60 was £90,868, including £17,559 from both government grants and legacies for purchases of works of art. Several bequests were made to the institution by private citizens. There are provincial art galleries at Ballarat, Bendigo, Castlemaine, Geelong, Hamilton, Mildura, Shepparton, St. Arnaud and Warrnambool, to which, periodically, pictures are sent on loan from the National Gallery.

3. **Queensland.**—The Queensland Art Gallery, maintained by the State Government, was established in 1895.

During 1959, the Government passed a new Queensland Art Gallery Act re-organizing the gallery, appointing a new Board of Trustees and granting a site for the building of a new art gallery.

The collection has been enriched by numerous bequests. In 1959, an anonymous gift of £126,000 was devoted to the purchase of an important collection of modern French paintings. The collection comprises 503 oils, 649 watercolours and drawings, 74 sculptures and 195 art objects.

4. South Australia.—The National Gallery at Adelaide originated in an exhibition of pictures in the public library building in 1881. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1961, there were in the gallery 1,919 paintings in oil, water colours and pastels, 108 items of statuary and large collections of drawings, prints, furniture, ceramics and coins. The expenditure during 1960–61 was £46,042.

5. Western Australia.—The Western Australian Art Gallery was established in 1895. Although under the statutory management of a board of five members, appointed by the State Government, it functions under its own director and staff. At 30th June, 1961, the collection included 378 oil paintings, 209 water colours, 10 pastels, 795 drawings, 578 prints, 1,067 reproductions, 9 miniatures and 29 pieces of sculpture. International and interstate exhibitions are frequently held, and travelling exhibitions are sent to country centres.

6. Tasmania.—In Tasmania, the Art Gallery at Hobart was opened in 1887. In June, 1961, it contained 220 oil paintings, 186 water colours, 127 black and white, 3 statuary and 159 etchings, engravings, etc. Expenditure in 1960–61 was £27,517.

The Art Gallery at Launceston was opened in 1891. In June, 1961, there were on view 241 oil paintings, 360 water colours, 143 black and white, and 251 miscellaneous exhibits. Expenditure in 1960–61 was £18,128.

#### § 4. The Commonwealth Literary Fund.

In 1908, the Commonwealth Government, under Alfred Deakin, first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty and for writers who were unable for financial reasons to continue their activities.

In 1939, in an endeavour to encourage the development of Australian literature and to foster appreciation of it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards a limited number of Fellowships each year, assists in the publication of manuscripts of high literary merit, makes annual grants for lectures in Australian literature, and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity to do creative work in the field of literature, but who are prevented from exercising their abilities because of financial circumstances. The Fellowship gives a writer the opportunity to devote all his time to creative writing for a period of up to one year. Since 1956, the Fellowships have had a maximum value of £1,000 per annum. The Fund does not seek out people on whom to bestow Fellowships, but considers only those who submit applications.

The Fund also assists in the publication of manuscripts which have outstanding literary merit, but which would not be commercially attractive propositions. This assistance takes the form of a guarantee of assistance to the publisher. The Fund does not itself enter the field of the publisher.

Since 1940, annual grants for lectures in Australian literature have been made to universities. In 1956, the Fund decided to initiate a scheme of lectures to the general public and to schools in both city and country areas, with the co-operation of State Adult Education authorities. Annual grants are now made to the State Adult Education authorities for this purpose.

The Fund also assists certain literary magazines of long standing and recognized literary value.

The Fund is administered at present by a Committee consisting of the Prime Minister (Chairman), the Leader of the Country Party and the Leader of the Opposition in the House of Representatives, assisted by an Advisory Board of five persons with special literary qualifications.

### § 5. Film Censorship Board.

1. **Legislation.**—The Commonwealth Government's powers over censorship of films extend only to imported films and imported advertising matter and stem from the Customs Act. Under that Act, the Customs (Cinematograph Films) Regulations provide for the appointment of a Film Censorship Board whose function is to ensure that films and related advertising material coming within certain defined categories are not admitted into Australia. Under those regulations, the Film Censorship Board may pass films in their original form, reject them, or pass them after eliminations have been made. The Commonwealth Regulations give the Board no power to classify films.

Legislation passed by the State Governments of Victoria, Queensland, Western Australia and Tasmania names the Commonwealth Film Censorship Board as the censorship authority and vests in it the power to classify films as suitable for general exhibition or otherwise.

The State Acts give the Commonwealth Board the authority to censor films made in Australia for commercial exhibition and advertising matter made in Australia.

The Censorship organization comprises a Censorship Board of seven persons and an Appeal Censor, the headquarters being in Sydney. Importers have a right of appeal to the Minister against decisions of the Board and the Appeal Censor.

2. **Import of Films.**—(i) *35 mm. Films for Exhibition in Motion Picture Theatres.* In 1961, 1,161 films comprising approximately 4½ million feet were censored. This represents approximately 832 hours' screening time. Four hundred of these films originated in the United States of America, 416 in the United Kingdom and 345 in other countries. Of the last-mentioned, U.S.S.R. 68, Italy 37, France 33, Greece 28, Germany 17 and Czechoslovakia 13, were the principal suppliers.

Included above were 450 full-length feature films which constitute the main theatrical attractions. This was an increase of 49 compared with the imports for 1960. Feature films came from:—the United States of America 172, the United Kingdom 135, Italy 29, Russia and Greece 27 each, France 15 and Germany 6.

Nine feature films were rejected and cuts were made from 152. There were eight appeals, five against rejection and three against cuts. Four were allowed and four disallowed.

Feature films classified as suitable for general exhibition numbered 260 and 190 were not suitable for children. Of the latter, 43 carry the special condition that all advertising shall indicate that they are suitable only for adults. These classifications are advisory only and are designed to enable picture-goers and particularly parents to obtain a general idea of the nature of any particular film.

In addition to these imported films, 411 35mm. films of 281,514 feet produced in Australia were cleared. These were mainly newsreels and documentaries and concerned the Board only when intended for commercial exhibition or export. This figure does not represent the total production in Australia.

(ii) *16mm. Films.* Apart from television films, these are largely confined to those commercially produced for use in certain country picture theatres, in theatres used by business undertakings for advertising and instructional purposes, in churches, schools and universities, and on home movies. These are of all types—dramatic, scenic, topical, medical, advertising, educational, religious, etc.

Excluding those imported for television use, 5,619 16mm. films of approximately four million feet were examined. There were three rejections but no eliminations. 16mm. films imported for television are dealt with below (*see* (iv)).

(iii) *8mm. and 9.5mm. Films.* The Board's responsibilities in regard to these have been removed to a large extent, following the decision to discontinue the censorship of films brought in by travellers depicting incidents during their travels. Periodical checks are made and only commercially produced films are examined. Of these, approximately 15,000 feet were censored. Eight films, totalling 700 feet, were rejected.

(iv) *Television Films.* 9,037 films, predominantly 16mm., of approximately 11 million feet, for use on television, were censored.

The number of films is not a true indication of volume because many of these were of very short duration. The screening time of films censored for television amounted to approximately 4,962 hours.

On a footage basis, the United States of America supplied approximately 83 per cent. of the total imports and the United Kingdom 13 per cent.

Twenty-three television films were rejected outright and an additional nine were classified as unsuitable for televising. Eliminations were made from 1,446. There were five appeals against rejection, of which two were upheld and three disallowed.

(v) *Foreign Language Films.* Countries other than the United Kingdom and the United States of America supplied 345 of the 35mm. films imported for theatrical exhibition. Of these, 143 were feature films.

Generally, the dialogue is in a foreign language with explanatory English captions. A few have an English commentary, and in isolated cases, English "dubbed" dialogue. The main countries of origin are shown above (*see (i)*).

Of 5,619 16mm. commercial films censored, 854 originated from non-English-speaking countries. The chief supplying countries were Germany 156, France 134, Malaya 74, Czechoslovakia 65, Holland 63, Japan 58, Switzerland 50, Italy 40 and Sweden 36.

An interpreter attends all censor screenings of films in a foreign language.

3. **Export of Films.**—The quantity of films exported for the year was approximately 2,000,000 feet. This footage includes, in many cases, several prints of the one film.

## § 6. Australian National Film Board and the Film Division.

1. **The Australian National Film Board.**—The Australian National Film Board was inaugurated in April, 1945, on the recommendation of a Commonwealth Government inter-departmental committee which considered the suggestions of a conference of interested individuals and Commonwealth and State officials, including Directors of Education, called in November, 1944, by the Ministers for Information and Post-war Reconstruction. It was attached, for administrative purposes, to the Department of Information.

With the abolition of the Department of Information in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for the following purposes:—

- (a) for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration;
- (b) for dissemination abroad to expand trade and commerce with other countries, to encourage tourist traffic with Australia, to improve Australia's relations with other countries and, where necessary, to explain Australia's national policies and encourage immigration.

The constitution provides for a membership of eleven with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities, and organizations interested in the production, distribution or utilization of films for national publicity.

2. **The Film Division of the News and Information Bureau.**—The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939–45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit. Production and distribution of all films required by Commonwealth Departments are now undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical and television distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its oversea representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

Since 1946, the Film Division has produced 409 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 50 oversea centres, where distribution is arranged by News and Information Bureau officers or other Australian

representatives. In Britain, there is regular distribution through more than a thousand theatres, and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. Selected films have been recorded in French, Dutch, German, Italian, Japanese, Malay, Thai, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division produces films under the sponsorship of, or with the co-operation of, Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, Overseas Telecommunications Commission, Snowy Mountains Hydro-electric Authority, Australian Wine Board, the Australian National University and the Australian Broadcasting Commission.

The co-operation of the Australian motion picture industry with the Commonwealth, spontaneously offered at the outset of the 1939-45 War, continues. Special films for urgent national appeals are planned, produced and distributed, with the assistance of the National Films Council of the motion picture industry and its Film Production Advisory Committee.

### C. SCIENTIFIC RESEARCH.

A number of organizations for scientific research have been set up by the Commonwealth Government. These are the Commonwealth Scientific and Industrial Research Organization, the Commonwealth Observatory (now incorporated in the Australian National University), and the Atomic Energy Commission. Particulars concerning these organizations are contained in the sections which follow, together with details of the various scientific societies in Australia.

Particulars regarding Commonwealth medical research institutions are to be found in Chapter XVII.—Public Health.

#### § 1. Commonwealth Scientific and Industrial Research Organization.

1. **General.**—By the Science and Industry Research Act 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (See No. 14, p. 1061 and No. 37, p. 1183.)

2. **Science and Industry Research Act 1949-1959.**—This Act provides for—

- (a) an Executive of the Organization consisting of nine members, to be appointed by the Governor-General, at least five of whom shall be persons possessing scientific qualifications; and
- (b) an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) To initiate and carry out scientific research in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance (a) to persons engaged in scientific research; and (b) in the training of students in scientific research. Provision is made for gifts or bequests to the fund which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. *Work of the Organization.*—The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Centralization has been avoided, in the first place by establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contracts and other suitable conditions could best be found, and secondly by the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. In 1937, however, the Commonwealth Government decided to extend the activities of the C.S.I.R. so as to provide assistance to secondary industries, and several laboratories were established for work in that field; it was thus able to render to these industries assistance almost immediately after the outbreak of war.

For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now twenty-six, comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations extend on a Commonwealth-wide basis, and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

The Divisions which have been established are as follows.

- Plant Industry, with main laboratories at Canberra and Brisbane and field stations.
- Entomology, with main laboratories at Canberra and field stations.
- Animal Health (main laboratory in Melbourne), Animal Genetics (main laboratory in Sydney) and Animal Physiology (main laboratory in Sydney) which together comprise the Animal Research Laboratories.
- Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- Soils, with main laboratories at Adelaide and extensive operations in the field.
- Forest Products, with main laboratories in Melbourne and field experiments.
- Food preservation, with main laboratories at North Ryde (New South Wales), and a subsidiary laboratory in Brisbane.
- Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), and experimental work in coastal waters of Australia.
- Physics and Applied Physics, comprising the National Standards Laboratory at Sydney.
- Radiophysics, with main laboratory at Sydney and Observatory at Parkes, New South Wales.
- Physical Chemistry, Chemical Physics, Mineral Chemistry and Organic Chemistry, which together with the Sections of Cement and Refractories, and Chemical Engineering, comprise the Chemical Research Laboratories in Melbourne.
- Tribophysics, with laboratories in Melbourne.
- Building Research, with laboratories in Melbourne.
- Mathematical Statistics, with main laboratory in Adelaide.
- Meteorological Physics, with main laboratory and field station in Melbourne.
- Land Research and Regional Survey, with headquarters in Canberra, and field stations at Alice Springs and Katherine (Northern Territory) and Ivanhoe (Kimberley, Western Australia).
- Protein Chemistry (Melbourne), Textile Industry (Geelong, Victoria) and Textile Physics (Sydney), which together comprise the Wool Research Laboratories.
- Coal Research, Sydney.

The following are the Sections.

- Commonwealth Research Station, Murray Irrigation Area, Merbein (Victoria).
- Irrigation Research Station, Griffith (New South Wales).

Upper Atmosphere, with laboratory at Camden (New South Wales).  
 Dairy Research, Melbourne.  
 Mineragraphic Investigations, Melbourne.  
 Ore-dressing Investigations, Melbourne and Kalgoorlie.  
 Fodder Conservation, Melbourne.  
 Physical Metallurgy, Melbourne.  
 Wildlife Survey, with main laboratory in Canberra, subsidiary laboratory at Albury and field experiments.  
 Soil Mechanics, Melbourne.  
 Engineering, Melbourne.  
 Agricultural Research Liaison, Melbourne.  
 Industrial Research Liaison, Melbourne.  
 Editorial and Publications, Melbourne.

In addition to its investigational work, the Organization deals with inquiries covering a wide range of scientific and technical subjects and maintains Scientific Liaison Offices in London and Washington.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

An Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section, Industrial Research Liaison Section and Editorial and Publications Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants.

For details of the investigations in progress throughout the comprehensive and widely distributed activities of C.S.I.R.O., reference should be made to the publications of the Organization.

## § 2. Mount Stromlo Observatory.

Mount Stromlo Observatory—since 1957 incorporated into the Australian National University—is the largest observatory in the southern hemisphere. It is in effect the Department of Astronomy of the Australian National University, and its staff members assist in the training of the future astronomers of Australia. In its instrumental resources, it is second only to some of the great observatories of America. Since it is located south of the Equator, it is placed especially advantageously for the conduct of research into the structure of the Milky Way System and of the Star Clouds of Magellan. The telescopes and auxiliary equipment at the Observatory provide access to parts of the sky that are forever hidden from the view of northern hemisphere astronomers. Mount Stromlo astronomers have therefore a special responsibility to do research on stars and other celestial objects at far southern declinations.

Mount Stromlo itself is a ridge of hills, approximately one mile long, situated at 35° 19' 16" South Latitude and 149° 0' 20" East Longitude, seven miles west of the city of Canberra. Its highest point is about 2,560 feet above sea level, and telescopes can be situated so as to be well screened from the lights of the city.

The first permanent installation on the site was established in 1911, but, because of the war and other circumstances, the development of the Observatory was delayed. It was not until 1925 that regular astronomical work could be undertaken. Since then, the Observatory has developed steadily, and now, under its third Director, the scientific staff consists of thirteen astronomers. This does not include eight scholars and a number of oversea astronomers visiting Mount Stromlo for periods of a year or so. With technical, clerical and maintenance personnel, the total staff amounts to about 60 persons.

Mount Stromlo Observatory possesses eight mounted telescopes with apertures ranging from five inches to 74 inches. The 74-inch reflector is the largest telescope in the southern hemisphere. There are also special telescopes for the Time Service and two oversea groups have major telescopes on the Observatory grounds. These telescopes are a 26-inch refractor from the Universities of Yale and Columbia, U.S.A., and a 26-inch Schmidt Telescope from the University of Uppsala, Sweden.

The principal fields of research at Mount Stromlo are as follows.

- (i) Studies of the structure and dynamics of the Milky Way system.
- (ii) Investigation of the Large and Small Magellanic Clouds.
- (iii) Studies of the physical properties of the interstellar medium of gas and dust, and its relation to the spiral structure of our galaxy.
- (iv) Studies of the physics of the stars of the southern hemisphere by spectrographic means and by photoelectric techniques.
- (v) Maintenance of the National Time Service leading to studies of the variable rotation of the earth and polar motion.

Published accounts of the researches have a world-wide distribution.

The Observatory is at present engaged in a major expansion of equipment and staff. A search is being made for an area, more cloud-free than Mount Stromlo, where a permanent Field Station may be established. A preliminary installation of a 26-inch reflector has been made at Mount Bingar near Griffith, New South Wales. Other sites are being examined for the future development of astronomy in Australia.

At certain times, Mount Stromlo is open for inspection by members of the public when arrangements can be made so that the scientific work of the Observatory is not interrupted. A more detailed description of the Observatory's work is given in Official Year Book No. 46, pages 1142-1144.

### § 3. Australian Atomic Energy Commission.

1. **Establishment and Functions of the Commission.**—In November, 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the Atomic Energy Act 1953, the Commission was established as a statutory authority, with powers and functions as defined in the Act. Under amending legislation, the number of Commissioners was increased to five in April, 1958. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology. These powers and functions are set out in detail in Part II. of the 1953 Act. In general, and subject to the Commonwealth's defence powers and particular provisions of the Act, they are exercisable only in or in relation to the Territories of the Commonwealth.

2. **Uranium Prospecting and Mining.**—Uranium prospecting and mining in the Territories of the Commonwealth are freely open to private enterprise, subject to the Atomic Energy Act 1953 and the Ordinances of the Territories. In the past, the Bureau of Mineral Resources, Geology and Geophysics of the Department of National Development has carried out, on behalf of the Commission, widespread aerial and ground surveys aimed at ascertaining the uranium resources of the Territories and delineating areas in which further search for uranium by private prospectors was considered worthwhile. Although rewards are no longer paid for discoveries of uranium, tax concessions are still allowed in respect of income earned from uranium mining. The Bureau of Mineral Resources provides prospectors and mining companies in the Territories with a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth assistance, in the form of aerial, geological and geophysical services, is available to the States, and State Mines Departments inspect uranium prospects and test samples submitted by prospectors.

Interest in the search for deposits of uranium has, however, declined in recent years because of world-wide over supply.

Uranium oxide is being produced in Australia from ore deposits at Rum Jungle and South Alligator River, in the Northern Territory, and Mary Kathleen in Queensland. The Rum Jungle deposits have been worked under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. The mining and treatment operations are conducted for the Commonwealth by an Australian mining company. The treatment plant began operations on the field in September, 1954, and the total production since that date has been sold to the Agency for defence purposes. No mining was carried out between November, 1958, and April, 1961, but mining was recommenced with the discovery of a new ore body. Treatment operations are continuing with ore stockpiled from the previous mining. These stockpiles are more than sufficient to complete the contract with the Combined Development Agency which expires in January, 1963. Exploration is continuing to determine whether or not further ore bodies exist in the area.

Uranium deposits at Radium Hill in South Australia were worked by the State government, which built an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. Production of uranium oxide began in 1955, the output being sold to the Combined Development Agency. Operations ceased at the end of 1961, when the contract expired.

The Mary Kathleen ore body in the Mt. Isa-Cloncurry district in Queensland has proved to contain Australia's largest reserve of uranium ore. A mine and treatment plant which cost over £10 million has been established in the area by a large mining company. Production from the plant is being sold to the United Kingdom Atomic Energy Authority for the British nuclear power programme under arrangements approved by the Commonwealth Government. Two other companies in the South Alligator region in the Northern Territory also had contracts with the Authority for the British nuclear power programme. These contracts were for relatively small tonnages, and one has now been completed. Both companies began production in 1959.

**3. Research.**—The Commission's Lucas Heights Establishment is the major Australian centre for atomic energy research and information. It has a programme of research in the development of nuclear power, the utilization of radio-isotopes, and in other associated fields, directed towards the long-term development of the resources of the country.

The main feature of the research programme is the investigation of a high temperature gas cooled (H.T.G.C.) reactor of a type which could suit Australian conditions. By comparison with the nuclear power stations in existence or being planned at the present day, this is an advanced system. It is expected to be capable of competing on a cost basis with new coal-burning power stations in many parts of Australia.

For the time being, research is being concentrated on an extremely precise and careful study of the basic physics and engineering of the system, and of the materials involved in its construction. It is necessary to develop nuclear materials which can be fabricated to the required shape and form and can withstand the severe chemical and nuclear conditions within the proposed reactor. The Research Establishment is now doing considerable research into the properties of beryllium and its oxide, which have valuable nuclear qualities. It is already making significant contributions to the world's knowledge of the chemistry, physics and metallurgy of beryllium.

As the research programme goes forward, the way is being prepared for the introduction of nuclear power in Australia, through the H.T.G.C. reactor and other suitable reactor systems, and for other applications of atomic energy. These activities are building up a body of knowledge and local skill which will be needed when it is decided that nuclear power stations should be built in this country. On present indications, the Commission expects that the first such station may be in operation by about 1970.

The Commission is also seeking to extend the use of radio-isotopes in Australia in scientific research and development, in the treatment of disease, in raising production and lowering costs in agriculture and in manufacturing industry. There is a vast field of fruitful applications, and new ones are being continually devised. In Australia, these new processes

are being used only in a small fraction of the possible fields. The use of isotopes is fostered by providing an advisory service which is a ready source of information on established uses, and by investigation of other projected applications. Isotopes, including short-lived isotopes which cannot be economically imported, are being produced in the high flux research reactor HIFAR, and some are being exported.

Research and development work on technical and scientific applications of radiation is also being carried out. The possibilities of radiation for such purposes as industrial sterilization, food preservation, and the control of insect pests are being investigated. Scientists at Lucas Heights are also studying the biological effects and questions of health and safety involved in the use of radio-active materials.

Lucas Heights is a centre of specialised equipment and information. In addition to the research reactor HIFAR, used for testing materials and producing radio isotopes, there is much other equipment unique in Australia. All these facilities are available to Universities and other institutions under suitable conditions. In these endeavours, the Atomic Energy Commission is working in close co-operation with the United Kingdom Atomic Energy Authority, under arrangements which give Australia access to results of United Kingdom research on peaceful atomic energy uses. Results of research in Australia are in like manner available to the United Kingdom. Work in Australia, though constituting a self-contained programme, is co-ordinated with the United Kingdom programme, to avoid overlapping of research objectives and duplication of investigations. Australia also has bilateral arrangements with the United States and Canada, and is taking part in the promotion of the peaceful uses of atomic energy through the International Atomic Energy Agency.

#### § 4. Scientific Societies.

1. Royal Societies.—The following table contains the latest available statistical information regarding the Royal Society in each State, the headquarters of which are in the capital cities.

##### ROYAL SOCIETIES.

(December, 1961.)

Particulars.	Sydney.	Mel- bourne.	Bris- bane.	Ade- laide.(a)	Perth (b)	Hobart.	Can- berra.
Year of charter .. ..	1866	1859	1884	1880	1913	1844	1930
Number of members .. ..	357	394	270	195	197	592	192
Volumes of transactions issued ..	95	99	71	85	43	95	..
Number of books in library ..	41,000	24,500	58,500	20,500	6,220	33,400	..
Societies on exchange list ..	390	350	288	279	220	316	..

(a) November, 1961.

(b) December, 1960.

2. Australian Academy of Science.—The Australian Academy of Science was founded in 1954 to promote scientific knowledge, to maintain standards of scientific endeavour and achievement in the natural sciences in Australia, and to represent Australian science at national and international level. These objectives it shares with the Royal Society of London and with the national academies of science of most other countries.

Her Majesty Queen Elizabeth II presented her Charter to the provisional Council of the Academy on 16th February, 1954, thus following the precedent of King Charles II who presented his Charter to the Royal Society of London in 1662.

Six Fellows, distinguished for their achievements in the natural sciences, are elected annually. The total Fellowship in 1962 was 101.

The affairs of the Academy are managed by an elected Council consisting of the President, the Treasurer, two Secretaries (one representing the Physical and the other the Biological Sciences) and eight other members. The Assistant Secretary (who must not be a Fellow) is the Academy's salaried administrative officer.

The headquarters of the Academy is situated in Canberra. This building houses the offices of the Academy and provides a conference centre of international standard for scientific and other meetings.

3. **The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months in the various States and in the Dominion of New Zealand. The latest congress was held in Brisbane in May, 1961.

4. **Other Scientific Societies.**—The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney who are members of the Society and resident in New South Wales research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship was awarded for 1962. The library comprises some 19,000 volumes. Eighty-six volumes of Proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1961 was 267.

The British Astronomical Society has a branch in Sydney, and in each of the States there is a branch of the British Medical Association.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

#### D. STATE GOVERNMENT EXPENDITURE ON EDUCATION, SCIENCE AND ART.

The expenditure by each State Government on education, science and art during the year 1959–60 is shown in the following table. Since details are not available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under public health.

#### STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1959-60. (£'000.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
New South Wales .. ..	51,432	14,953	..	66,385	1,107	65,278
Victoria .. ..	36,234	1,678	..	37,912	473	37,439
Queensland .. ..	15,500	3,610	1,126	20,236	659	19,577
South Australia .. ..	13,499	4,019	..	17,518	1,433	16,085
Western Australia .. ..	10,276	2,115	19	12,410	215	12,195

<b>Total .. ..</b>	<b>132,374</b>	<b>28,150</b>	<b>1,173</b>	<b>161,697</b>	<b>4,349</b>	<b>157,348</b>

## CHAPTER XVI.

## PUBLIC JUSTICE.

NOTE.—In interpreting statistics of public justice, it should be realized that a number of factors affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) The methods of compilation of the figures (e.g. *see* footnotes to the tables dealing with convictions);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

## § 1. The Australian Legal System.

1. **Development of the System.**—The two major factors in the development of the Australian legal system have been its British origin and the Federal Constitution of 1900. When the various parts of Australia were first settled by British colonists, the common law and statutes of England were brought with them by the settlers. When local law-making bodies were established, the law so brought in was gradually modified and augmented by local legislation, but the Imperial Parliament in London also continued to legislate (to a lesser and lesser extent) in respect of Australia. The Federal Constitution of 1900, which is itself an Imperial Act, limited the legislative power of State Parliaments in some respects and created a federal legislature. Since the Statute of Westminster Adoption Act 1942, the Imperial Parliament can legislate for Australia only at Australia's request. The sources of Australian law of today are, therefore, found in Commonwealth and State legislation, in some Imperial legislation and in the common law. No significant attempt has been made at codification of the law, but three of the States (Queensland, Western Australia, and Tasmania) have Criminal Codes. However, separate consolidations of the statutes of the Commonwealth and of all States except Western Australia (which has adopted a system of reprinting of individual statutes from time to time) have been brought out from time to time.

There are few constitutional or other legislative guarantees of individual rights and liberties in Australia. These rights are nevertheless protected, because a basic feature of the Australian system is the "rule of law": no act, official or unofficial, however *bona fide* and apparently reasonable, which infringes the liberty or rights of an individual, is justifiable unless it is authorized by law, and for any such unlawful act, by whatever authority commanded, the official or other person is personally liable in an action in the ordinary courts. In the case of subordinate legislation and even in the case of Federal or State Acts, the validity of the law itself may be challenged in the courts. The remedy for the protection of the personal liberty of the individual is the writ of habeas corpus, which requires the person named therein to be produced in the court.

Australian law adheres to the principle that Federal control must in general be exercised by ordinary courts. There is no integrated system of administrative tribunals, but there is a great variety of administrative tribunals of various descriptions. The ordinary courts exercise supervision over administrative tribunals either by way of statutory appeal or by the use of prerogative writs of mandamus, prohibition, or *certiorari*, by which the administrative tribunals can be enjoined to perform a duty or to abstain from excess of jurisdiction, or can have their decisions set aside.

Independence of the judiciary is an essential part of the Australian legal system. Security of tenure of superior court judges is guaranteed, mostly by the Constitutions of the Commonwealth and the States, and they can be removed from office only by resolution of both Houses of Parliament of the Commonwealth or the States, as the case may be, for proven misbehaviour or incapacity. Their independence is further secured by relatively high salaries which, in the case of High Court judges, cannot be reduced during their tenure of office, and liberal (mostly non-contributory) pensions for the judges or their widows.

*Judgments given in the courts of any part of Australia can be enforced in any other part of Australia under the Service and Execution of Process Act 1901–1958 of the Commonwealth.*

2. *State Courts.*—(i) *Civil jurisdiction.* Lower courts (which term includes, for the purposes of this chapter, Magistrates' Courts, Courts of Petty Sessions, Local Courts when not constituted by a judge, and Small Debts Courts) are presided over by a stipendiary or police magistrate. In some limited instances, justices of the peace may exercise the jurisdiction of the court. The powers of the magistrates in the various States and Territories are set out in § 2 below. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case, the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction.

In the higher courts (which term includes, for the purposes of this chapter, Local Courts when constituted by a judge, District Courts, County Courts, and the Supreme Courts), actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases, the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are discussed below.

(ii) *Criminal jurisdiction.* Criminal courts are of two kinds, namely, courts of summary jurisdiction, usually called Courts of Petty Sessions, which may deal summarily with minor offences, and higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions, and the Supreme Court, which hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace: a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case and the judge determines the applicable law.

In the case of other than minor offences, a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail.

There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

3. *Federal Courts.*—The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. Further particulars regarding the judicial power of the Commonwealth will be found in Chapter III. (§§ 71–73) of the Commonwealth Constitution (*see p. 16 of this Year Book*).

Particulars concerning the Federal Court of Bankruptcy and the High Court of Australia will be found in §§ 4c and 5, respectively, of this chapter. Information regarding the Commonwealth Industrial Court, which was established under the Conciliation and Arbitration Act 1904–1961, will be found in Chapter XII.—Labour, Wages and Prices (p. 399).

4. *Appeal to the Privy Council.*—There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-à-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

## § 2. Lower (Magistrates') Courts.

## A. POWERS OF THE MAGISTRATES.

1. *New South Wales.*—There is no general limit to the powers of the magistrates with regard to offences punishable summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated, the amount is limited to £150 before a court constituted by a stipendiary magistrate. Where the amount claimed exceeds £50, the Court must transfer the action to the District Court when the defendant gives notice that he objects to the action being heard and determined by a Court of Petty Sessions. Magistrates have power to entertain claims of up to £500 under the Money Lenders and Infants Loans Act, 1941, as amended. The amount in actions of debt before two or more justices of the peace is limited to £30 and in actions of damage it is limited to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts, one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 or to £30 by consent of parties.

2. *Victoria.*—The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £100, and to actions arising out of torts or contracts to the extent of £250. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences, sentences of up to two years' imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

3. *Queensland.*—Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the Criminal Code (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice not more than one sentence is generally made cumulative on a previous sentence.

4. *South Australia.*—The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of £100 fine or two years' imprisonment is fixed by the Justices Act 1921–1960. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £1,250.

5. *Western Australia.*—The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of Local Courts is restricted in general to £500. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Courts of Session. They may be appointed as Commissioners of the Supreme Court. On the goldfields, the magistrate is also the warden.

6. *Tasmania.*—Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In addition, stealing and analogous crimes may be heard and determined summarily on the election of the person charged, when the amount involved does not exceed £100.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889 provides that a fine of £50 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts and damages not exceeding £250. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court, that at Currie, King Island, has the maximum jurisdiction, the others being limited to £30.

**7. Northern Territory.**—Magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available, the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a magistrate or a justice of the peace. Certain minor indictable offences may be tried summarily by a magistrate or two justices of the peace, who may impose a fine up to £100 or imprisonment for up to two years.

A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than £1,000. A local court constituted by two justices of the peace has a civil jurisdiction to hear claims up to £50.

**8. Australian Capital Territory.**—Magistrates have jurisdiction to try an offence which is punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends upon the statute which creates the offence. Certain indictable offences of a less serious nature may be tried summarily by a magistrate, who may impose a fine not exceeding £50 or imprisonment for up to one year. Magistrates also hear proceedings for committal on indictable offences. The stipendiary magistrate is also the coroner. In civil proceedings, magistrates try actions for amounts up to £200. Justices of the peace have no judicial functions.

## B. CRIMINAL PROCEEDINGS.

**1. Cases Tried.**—The total numbers of cases tried at magistrates' courts in each State and Territory for the years 1956 to 1960 are shown in the following table.

### CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1956.	1957.	1958.	1959.	1960.
New South Wales(a) ..	271,172	307,824	323,097	331,195	332,728
Victoria .. ..	175,899	224,015	270,017	287,622	(a) 268,104
Queensland(b) ..	47,072	53,611	(a) 62,468	(a) 65,773	(a) 73,804
South Australia(b) ..	31,799	34,399	36,305	38,003	47,427
Western Australia(a) ..	62,753	59,205	49,945	50,696	50,107
Tasmania(a) .. ..	19,274	19,120	20,009	21,355	24,047
Northern Territory ..	(b) 2,779	(b) 2,615	3,103	3,617	2,958
Australian Capital Territory .. ..	1,564	1,875	2,197	2,539	3,168
<b>Australia .. ..</b>	<b>612,312</b>	<b>702,664</b>	<b>767,141</b>	<b>800,800</b>	<b>802,343</b>

(a) Excludes minor traffic offences settled by payment of fines without court appearance.  
 (b) Twelve months ended 30th June of year shown.

In addition, in most States, provision exist for settlement of minor traffic offences by payment of fines without court appearance. The following table shows the number of such offences for the years 1956 to 1960.

MINOR TRAFFIC OFFENCES SETTLED BY PAYMENT OF FINES.(a)

State.	1956.	1957.	1958.	1959.	1960.

(c) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

3. Convictions for Serious Crime at Magistrates' Courts.—(i) *General.* The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at Magistrates' Courts for what may be regarded as the more serious offences, i.e. offences against the person, offences against property, forgery and offences against the currency.

(ii) *Number and Rates.* The following table shows the number of convictions for serious crime at Magistrates' Courts for the years 1956 to 1960.

**CONVICTIONS FOR SERIOUS CRIME<sup>(a)</sup> AT MAGISTRATES' COURTS.**

State or Territory.	1956.	1957.	1958.	1959.	1960.

(a) Twelve months ended 30th June of year shown.

The term "drunkenness" includes "drunkenness and disorderliness", and "habitual drunkenness".

(ii) *Convictions per 10,000 of Population.* In the twenties, the convictions for drunkenness averaged approximately 100 per 10,000 of population, but the rate fell away considerably during 1930 and 1931, being only 57.1 in the latter year. The average then rose steadily, the annual average for the period 1936 to 1939 being 82.7 and that for the years 1940 to 1945, 90.8. In 1946, the convictions per 10,000 rose very steeply to 132.1, increasing further to 174.5 by 1951, since when they have declined again to 134.9 in 1960.

The rates of convictions for drunkenness for the years 1956 to 1960 are shown in the following table.

## CONVICTIONS FOR DRUNKENNESS.

(PER 10,000 OF POPULATION.)

State or Territory.	1956.	1957.	1958.	1959.	1960.
New South Wales .. ..	217.0	209.6	184.9	183.9	178.9

(a) Twelve months ended 30th June of year shown.

(iii) *Remedial Treatment of Drunkenness.* For particulars of relevant legislation and some details of the various institutions established for the treatment of inebriates, see Official Year Book, No. 46, p. 632.

6. *First Offenders.*—In all States and Territories, statutes are in force for dealing with first offenders. For particulars of the relevant legislation, see Official Year Book, No. 46, page 632. Provisions are incorporated in the various Acts whereby courts may extend leniency to the offender by means such as: (i) dismissal of the charge without proceeding to a conviction; (ii) freeing the offender or suspending sentence with the requirement of a recognizance for good behaviour for a specified period; and (iii) by placing the offender under the supervision of a probation officer for a specified period. The provisions existing in the individual States and Territories are set out in Year Book No. 46.

## C. CIVIL PROCEEDINGS.

The total numbers of complaints entered and the amounts awarded to plaintiffs during 1960 are shown in the following table. The figures are compiled from returns from the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in the Northern Territory and the Court of Petty Sessions in the Australian Capital Territory.

(a) Year ended 30th June.

## § 3. Children's Courts.

1. **New South Wales.**—Children's Courts, first established in 1905, now exercise jurisdiction under the Child Welfare Act, 1939-60. Each court consists of a special magistrate with jurisdiction within a proclaimed area. Elsewhere, the jurisdiction of a court may be exercised by a special magistrate or two justices of the peace. Where practicable, children's courts are not held in ordinary court rooms, and persons not directly interested are excluded from any hearing in order that children may be protected against the adverse influences which they would encounter in ordinary courts.

The magistrates exercise all the powers of a Court of Petty Sessions in respect of offences committed by or against children under 18 years of age. They also exercise jurisdiction in respect of neglected and uncontrollable children. Their functions are reformatory, not punitive; they may commit children to institutions, to the care of persons other than the parents, or to the care of the Minister.

2. **Victoria.**—Under the Children's Court Act 1958, the jurisdiction of Children's Courts is restricted, with certain exceptions, to children up to 17 years of age. Two stipendiary special magistrates with jurisdiction throughout the State and, in addition, honorary special magistrates, operate in some metropolitan courts and provincial cities. At country courts to which no special magistrates are appointed, the local stipendiary magistrate usually constitutes the bench. The Children's Court may deal with all offences except homicide. However, consent to the jurisdiction of the Children's Court must be indicated by the child (or by a parent if the child is under 14 years of age) before an indictable case may proceed.

The primary aim of the Children's Court is reformation and rehabilitation of the offender and the court is bound under Section 27(3) of the Children's Court Act 1958 to "firstly have regard to the welfare of the child".

The probation system has been in use by the Children's Court since 1907, and there are now in Victoria a large number of honorary probation officers as well as six stipendiary probation officers. Problem cases are referred by the Court for investigation to a Children's Court Clinic, which is staffed by psychiatrists, psychologists and social workers.

3. **Queensland.**—Children under the age of 17 years before the Court on summary charges are dealt with under the Children's Court Acts, 1907-1930, and the State Children Acts, 1911-1955. The Children's Court in the metropolitan area is presided over by a magistrate, and the services of the psychiatric clinic are available to him if he considers they are needed. Proceedings are held *in camera*. A non-commissioned police officer is present to offer any observations he considers necessary and to assist the magistrate. In country areas, the court is presided over by the local stipendiary magistrate or, in his absence, by two justices. If found guilty, a child may be either admonished, released on probation, or committed to the care of the State Children Department or an institution. A conviction will not necessarily be recorded against him. His parent or guardian may be ordered to pay damages to the wronged party, and in default is liable to the same consequences as a defendant in an ordinary Court of Petty Sessions.

4. **South Australia.**—Provision for the treatment of juvenile offenders under the age of 18 years is contained in various Acts, the main ones being the Maintenance Act, 1926–1958, the Juvenile Courts Act, 1941, the Justices Act, 1921–1960, and the Offenders Probation Act, 1913–1953. A Juvenile Court to hear cases of offences by children is constituted by a special magistrate or two justices of a Juvenile Court, and it has power to determine all charges other than homicide. A child convicted of an offence punishable by imprisonment can be committed by a court only to a reformatory. For indictable offences, the penalty is committal to a reformatory or a fine of up to £50.

5. **Western Australia.**—Children's Courts deal with offenders under the age of 18 years and hear cases of certain offences against children. Special magistrates are appointed for Children's Courts, and the Governor may appoint other persons to be members of a particular Children's Court. One member may sit and adjudicate with the special magistrate, but in the magistrate's absence at least two members must be present.

A Children's Court is deemed to be a court of summary jurisdiction and may exercise exclusive jurisdiction in respect of all offences except wilful murder, murder, manslaughter or treason alleged to have been committed by children.

Adults charged with certain indictable offences against children may forego the right to trial by jury and agree to be dealt with summarily by Children's Courts.

6. **Tasmania.**—Under the provisions of the Child Welfare Act 1960, Children's Courts are established to deal with offenders under the age of 17 years. Special magistrates may be appointed by the Governor to adjudicate in these Courts and one such Magistrate is sufficient to constitute a Court. In the absence of a Special Magistrate, the Court may be constituted by a Police Magistrate or two justices.

A Children's Court is a court of summary jurisdiction, but in the case of children under 14 years of age it may hear and determine all indictable offences except murder, attempt to murder, manslaughter, and wounding with intent to do grievous bodily harm. When children over this age are charged with an indictable offence they, or their parents on their behalf, may elect to be dealt with by the Court in a summary way instead of being tried by a jury, except when the offences are murder, attempt to murder, manslaughter, rape, wounding with intent to do grievous bodily harm and robbery with violence.

7. **Northern Territory.**—The Child Welfare Ordinance 1958–1960 provides for the establishment of Children's Courts. These courts are constituted by a special magistrate and one member of the Child Welfare Council authorized to sit as a member of the Children's Court. Where no Children's Court has been established for a particular area, or where special circumstances require it, the jurisdiction of a Children's Court may be exercised by a court of summary jurisdiction constituted by a special magistrate.

Proceedings in a Children's Court are in form similar to proceedings in a court of summary jurisdiction, but no reports of proceedings may be published without the express authority of the Court, and any person not directly concerned may be excluded from the hearing.

A Children's Court has jurisdiction in respect of all offences committed by persons under 18 years of age in respect of which proceedings may be taken in a court of summary jurisdiction. In dealing with such offences, the Court may, in cases other than homicide, impose a fine not exceeding fifty pounds or a sentence of imprisonment for not more than six months, and, in addition to or in lieu of these punishments, may make an order committing the child to the care of the Director of Child Welfare or of a person who is willing to undertake the care on the Court's terms and conditions (in which case the child may be declared a State child), or it may commit the child to an institution for a specified period or release the child on probation on such conditions as the Court orders. Children's Courts also exercise jurisdiction in respect of destitute, neglected, incorrigible or uncontrollable children.

8. **Australian Capital Territory.**—The Child Welfare Ordinance 1957 provides that the Court of Petty Sessions constitutes the Children's Court when it is hearing proceedings involving persons under the age of 18 years. Its proceedings are similar to those of an ordinary Court of Petty Sessions except that persons not directly interested are excluded from the Court.

In addition to the power to deal with summary offences, the Children's Court has power to hear and determine summarily a charge for an indictable offence other than an offence punishable by death. In either case, the Court's powers include releasing an offender on probation, committing him to the care of a specified person, making him a government ward, or committing him to an institution for up to three years.

## § 4. Higher (Judges') Courts.

## A. CRIMINAL PROCEEDINGS.

1. Offences for which Persons were Convicted at Higher Courts.—The following table shows the number of persons convicted at higher courts in each of the States and Territories of Australia during 1960, classified according to the nature of the offence.

(a) Twelve months ended 30th June of year shown. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately. (c) Convictions.

3. **Habitual Offenders.**—An account of the methods adopted in each jurisdiction in connexion with habitual offenders is given in the following paragraphs.

(i) *Commonwealth.* Under the provisions of the Crimes Act 1914–1960, where a person who is convicted of an indictable offence against the law of the Commonwealth has been previously convicted on at least two occasions of indictable offences against the law of the Commonwealth or of a State or Territory, the court before which he is convicted may declare that he is a habitual criminal, and may direct as part of his sentence that on expiration of the term of imprisonment then imposed on him he be detained during the pleasure of the Governor-General.

(ii) *New South Wales.* The Habitual Criminals Act, 1957, gives power to judges to declare as a habitual criminal any person of or above the age of 25 years who has been convicted on indictment and has on at least two occasions previously served separate terms of imprisonment as a consequence of convictions for indictable offences, provided that such offences were not dealt with summarily without his consent. A person may also be pronounced by a Judge to be a habitual criminal upon recommendation by a Stipendiary Magistrate.

A judge, having pronounced a person to be a habitual criminal, shall sentence him to a term of imprisonment of not less than five years nor more than fourteen years.

A habitual criminal so sentenced may be considered for release on licence in the light of his conduct and attitude after he has served two-thirds of his sentence. He will, in any event, be granted a remission to permit his release on licence after five-sixths of his sentence, subject to good conduct and industry.

At 30th June, 1961, there were 77 prisoners detained in pursuance of this Act.

(iii) *Victoria.* The Indeterminate Sentences provisions of the Crimes Act were abolished as from 1st July, 1957, with the proclamation of the Penal Reform Act 1956. The terms "reformatory prison" and "habitual criminal" also ceased to exist as from that date.

Under the Penal Reform Act 1956, a sentence of twelve months or more must contain provision for an offender's release on parole after he has served a minimum term which must be named. With sentences of under twelve months, the courts may fix a minimum term.

The relevant parts of the Penal Reform Act 1956 have now been embodied in Sections 506 to 542 of the Crimes Act 1958. In the case of the persistent offender, if the court is satisfied that it is expedient for the protection of the public that he should be detained in gaol for a substantial time, the court may pass a sentence of preventive detention for a term of not more than ten years, and where any such sentence is passed shall fix a minimum term during which the offender shall not be eligible to be released on parole.

(iv) *Queensland.* Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be a habitual criminal. A habitual criminal is detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of a habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

A habitual criminal may be released by order in writing (called a "parole order") by the Parole Board set up under the provisions of "The Offenders Probation and Parole Act of 1959," after he has been detained during a period of two years (Section 32).

(v) *South Australia.* The Criminal Law Consolidation Act, 1935-1956 provides that persons previously convicted of a certain number of indictable offences of a particular class may be declared habitual criminals and shall then be detained during Her Majesty's pleasure. Proof of previous convictions is in all cases relevant to the question of penalty.

(vi) *Western Australia.* Under the Criminal Code Amendment Act, 1918, power is given to sentence a prisoner to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be a habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventive detention on 30th June, 1960, was 25, and the total number dealt with since the passing of the Act was 199.

(vii) *Tasmania.* Since the Indeterminate Sentences Act came into operation in 1922, 132 persons have been confined under its provisions and 14 were in custody at the end of 1961.

Of the 118 released on probation, 28 have been re-committed.

(viii) *Northern Territory.* The Habitual Criminals Amendment Act, 1907, of South Australia is still in force in the Northern Territory. By virtue of that Act, a Judge of the Northern Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is detained for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large.

(ix) *Australian Capital Territory.* The Habitual Criminals Act, 1905, of New South Wales is still in force in the Australian Capital Territory. By virtue of that Act, a judge of the Australian Capital Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is confined for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large. Habitual criminals declared in the Australian Capital Territory are detained in New South Wales.

4. **Capital Punishment.**—There were ten executions in Australia during the period 1951 to 1960. Three took place in Victoria (in 1951), three in South Australia (one each in 1953, 1956, and 1958), two in Western Australia (one each in 1952 and 1960), and two in the Northern Territory (in 1952). In each case the offence was murder.

Under the Criminal Code Amendment Act of 1922, capital punishment was abolished in Queensland, and in New South Wales the Crimes Act was amended in 1955, abolishing capital punishment for all offences except treason and piracy. In the Australian Capital Territory, the Child Welfare Ordinance 1957 now provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years.

In the early days of the history of Australia, the penalty of death was attached to a large number of offences, many of which would now be dealt with in a Magistrate's Court. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; from 1941 to 1950, 0.5; and from 1951 to 1960, 1.

## B. DIVORCE AND OTHER MATRIMONIAL RELIEF.

1. **Separation and Maintenance Orders of Courts of Summary Jurisdiction.**—In all States and Territories, there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and in the Northern Territory, courts of summary jurisdiction also have power to make separation orders. A separation order is primarily intended for the protection of the person of the wife.

2. **Divorce and Other Matrimonial Relief Granted by Higher Courts.**—A marriage may be terminated by a Supreme Court of a State or Territory in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties.

Until recently, each State was primarily responsible for the provision of matrimonial relief. The law varied from State to State; for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage.

In 1959, however, the Commonwealth Parliament passed the Matrimonial Causes Act 1959 which came into force on 1st February, 1961. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

All statistical information given in this section relates to proceedings under the system before the operation of the Commonwealth Act. The various grounds of dissolution available are shown in the tables.

3. **Matrimonial Causes Act 1959.**—Under the Commonwealth Matrimonial Causes Act 1959, a decree for the dissolution of marriage may be granted on various grounds, such as adultery, desertion, insanity, separation for five years in certain circumstances, or failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all, and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds, as, for example, where at the time of the marriage either party was a mental defective. Proceedings must be taken before the marriage is terminated by dissolution or death. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people, and transactions concluded on the basis of the existence of that status cannot be undone or reopened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may re-marry.

A decree for dissolution or annulment is first a decree *nisi*. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot re-marry until a decree *nisi* has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage, but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife, except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot re-marry, but a divorce may be obtained on the same facts as those on which the decree of judicial separation was based.

The new Commonwealth Act provides for financial grants to approved marriage guidance organizations and the courts are enjoined to consider at all times the possibility of reconciliation, and they may take certain steps to endeavour to effect a reconciliation.

In the following tables the term "divorce" is used to cover dissolution of marriage, nullity of marriage and judicial separation.

4. Number of Petitions Filed.—The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State during 1960.

**PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE AND JUDICIAL SEPARATION, 1960.**

(a) Includes non-compliance with order for restitution of conjugal rights, 402.

9. Ages of Husband and Wife at Time of Dissolution of Marriage.—The following table shows the number of husbands and wives in each age group who were parties to marriages dissolved in 1960. Age is taken at the time the decree absolute is made.

Forty-two per cent. of wives were in the 25-34 years age group and 42 per cent. of husbands in the 30-39 years age group. These proportions have varied little during recent years, and are considerably higher than the proportions of married persons of those age groups in the whole population (27 per cent. and 26 per cent. respectively at the Census of 30th June, 1947; 28 per cent. and 26 per cent. respectively at the Census of 30th June, 1954).

## AGES OF PARTIES AT TIME OF DISSOLUTION OF MARRIAGE: AUSTRALIA, 1960.

Age of Husband (Years).	Age of Wife (Years).										Total Husbands.	
	Under 21.	21 to 24.	25 to 29.	30 to 34.	35 to 39.	40 to 44.	45 to 49.	50 to 54.	55 to 59.	60 and over.		Not stated.
Under 21 ..	4	..	..	..	..	..	..	..	..	..	..	4

10. Duration of Marriages Dissolved and Number of Children.—The following table shows the number of dissolutions of marriage granted in 1960, classified according to the legal duration of the marriage (i.e., the period from the date of marriage to the date when the decree nisi was made absolute) and number of children. In 1960, approximately two-thirds of the marriages dissolved were of less than fifteen years' duration and 38 per cent. were of less than ten years' duration.

## DURATION OF MARRIAGES DISSOLVED AND NUMBER OF CHILDREN(a): AUSTRALIA, 1960.

(a) The term "children" used in the table above, being dependent upon State legislation and court rules, is not comparable in all States, and is defined as follows:—New South Wales, Victoria and Western Australia, issue of the marriage, of all ages, living and dead; Queensland, children, including adoptions and step-children of all ages, living and dead; South Australia, issue of the marriage, living, under 16; Tasmania, living issue of the marriage.

11. Number of Divorced Persons at each Census 1901 to 1954.—The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1901 to 1954. A classification of these persons by age appeared in earlier issues of the Official Year Book (*see* No. 39, p. 269). Prior to 1911, no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

**DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA.**

Sex.	Number.						Proportion per 10,000 of Males or Females, 15 years of age and over.

(a) Excludes South Australia.

**C. BANKRUPTCY.**

1. General.—Particulars relating to bankruptcy in each State to the end of 1927 were incorporated in issues of the Official Year Book prior to No. 23. On 1st August, 1928, the Commonwealth Bankruptcy Act, which is now the Bankruptcy Act 1924–1960, came into operation.

Under the Bankruptcy Act 1924–1960, the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia, but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may apply voluntarily for the sequestration of his estate, or his creditors may apply for a compulsory sequestration, if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt, or satisfy the Court that he has a counter-claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor, provided that—

- (1) the debt or debts amount to £50;
- (2) the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition; and
- (3) the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order, the property of the bankrupt vests in the official receiver named in the order, and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI of the Bankruptcy Act 1924–1960, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act, a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The Bankruptcy Act 1924–1960 provides for an Inspector-General in Bankruptcy, and for a Registrar and an Official Receiver to be appointed for each bankruptcy district.

A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorized by the Court. He may examine a bankrupt or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor, and to realize and administer the estate of the debtor. In respect of these activities, the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition, or assignment (Parts XI and XII of the Bankruptcy Act) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

**2. Bankruptcy Proceedings.**—The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during the twelve months ended 30th June, 1961.

**BANKRUPTCY PROCEEDINGS, 1960-61.**

(a) Excludes judgments signed in the Supreme Court.

(b) Twelve months ended 30th June, 1960.

(c) Judgments signed and entered.

(d) Not available.

## § 5. High Court of Australia.

The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices.

The Constitution itself confers original jurisdiction on the High Court in all matters (i) arising under any treaty, (ii) affecting consuls or other representatives of other countries, (iii) in which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party, (iv) between States, or between residents of different States, or between a State and a resident of another State, (v) in which a writ of mandamus or prohibition or an injunction is sought against an officer of the Commonwealth. In addition, Parliament may, under the Constitution, confer additional original jurisdiction on the High Court in certain classes of matters, and has in fact conferred original jurisdiction on the High Court in all matters arising under the Constitution or involving its interpretation and in trials of indictable offences against the laws of the Commonwealth. In matters (i) and (v) and in suits between the Commonwealth and a State or between States, the jurisdiction of the High Court is exclusive of that of the State Courts, and in matters (other than trials of indictable offences) involving any question as to the limits *inter se* of the constitutional powers of the Commonwealth and those of the States, the jurisdiction of the High Court is exclusive of that of the Supreme Courts of the States.

Under the Constitution, the High Court has jurisdiction, with such exceptions and subject to such regulations as the Parliament permits, to hear and determine appeals from all judgments, decrees, orders and sentences of (i) any Justice or Justices exercising the original jurisdiction of the High Court, (ii) any other Federal court or court exercising Federal jurisdiction and (iii) from the Supreme Court or other court of any State from which appeal lay to Privy Council at the establishment of the Commonwealth. In respect of (iii), the Parliament has prescribed that, generally, appeal can be brought only by special leave of the High Court. However, in the case of judgments affecting the status of any person under the laws relating to aliens, marriage, bankruptcy or insolvency, or in respect of any sum or matter at issue, or involving any claim, demand, or question, to or regarding any property or civil right, amounting to or of the value of £1,500, appeal may be brought as of right from final judgments, and by leave of the High Court or the Supreme Court from interlocutory judgments.

By Acts of Parliament and by subordinate legislation, the High Court has also been given appellate jurisdiction in respect of the courts of the Territories under the control of the Commonwealth. Provision is also made in various enactments for appeal to the High Court on points of law from administrative determinations, such as decisions of the Commissioner of Taxation and Taxation Boards of Review, the Commissioner of Patents, or the Registrar of Trade Marks. Such proceedings, although called appeals, are in reality proceedings in the original jurisdiction of the High Court.

The following table shows the transactions of the High Court for 1960 and 1961.

## TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA.

Original Jurisdiction. (a)	1960.	1961.	Appellate Jurisdiction.	1960.	1961.
	Number of writs issued	183		130	Number of appeals set down for hearing ..
Number of cases entered for trial ..	40	51	Number allowed ..	49	31
Judgments for plaintiffs	23	27	Number dismissed ..	85	65
Judgments for defendants	4	8	Otherwise disposed of	16	31
Otherwise disposed of ..	48	29			
Amount of judgments ..	£182,693	£58,175			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as cases.

During 1960 and 1961, respectively, the High Court dealt also with the following:— appeals from assessments under the Taxation Assessment Act, 130, 39; special cases stated for the opinion of the Full Court, 13, 11; applications for prohibition, etc., 22, 21. The fees collected amounted to £4,305 in 1960 and £2,952 in 1961.

## § 6. Police, Prisons and Prisoners.

1. **Police.**—(i) *General.* The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens, and inspectors under the fisheries and various other acts. In metropolitan and large country areas, they also regulate the street traffic. With the exception of the Commonwealth Police Force (*see* next page) and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State governments, but their members perform certain functions for the Commonwealth government, such as acting as aliens registration officers and policing various acts and regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings, and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of persons to each police officer are shown in the following table for the years 1956 to 1960. The figures include traffic police, probationers, cadets, special constables and women police, but exclude parking police, native trackers (natives employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses and interpreters. Figures refer to 30th June, except where otherwise indicated.

## STRENGTH OF POLICE FORCES.

## NUMBER OF NATIVE TRACKERS.(c)

1956 .. ..	(a) 8	(a) 1	25	(d)	7	..	31	..	72
1957 .. ..	(a) 8	(a) 1	23	(d)	3	..	30	..	65
1958 .. ..	7	1	23	(d)	4	..	31	..	66
1959 .. ..	5	1	24	(d)	4	..	35	..	69
1960 .. ..	5	1	18	(d)	4	..	32	..	60

(a) Figures refer to 31st December of year shown. (b) Included in total strength shown above.  
 (c) Not included in total strength shown above. (d) One native tracker, who is paid a small weekly retainer and is supplied with rations, is continually on call.

(ii) *The Commonwealth Police Force.* The Commonwealth Police Force commenced operations on 21st April, 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth.

This Force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organization for the suppression of traffic in women and the suppression of obscene literature.

Under the control of the Force is the Australian Police College at Manly, N.S.W., which provides training for members of various police forces and other agencies in Australia and New Zealand.

District Offices of the Force are in each State Capital City while the Head Office is in Canberra. Kennels are maintained in Melbourne and Adelaide for the breeding and training of guard dogs which are used by the Force. Some of these dogs are specially trained in tracking and are made available as required to the State Police Forces.

Strength.	Policemen.	Policewomen.	Guard Dogs.
30th June, 1960 .. .. .	498	Nil	35
30th June, 1961 .. .. .	560	2	44

2. *Prisons and Prison Accommodation.*—The table below shows the number of prisons in each State and the accommodation therein at 30th June, 1960.

#### PRISONS AND PRISON ACCOMMODATION, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Australia.
Prisons .. .. .	18	11	8	18	19	1	2	77
Accommodation .. .. .	2,804	2,046	929	959	900	244	59	7,941

There is no gaol in the Australian Capital Territory, but there is a lock-up consisting of five cells attached to the police station at Canberra, and another lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a Magistrate's Court.

3. *Convicted Prisoners.*—The number of convicted prisoners at 30th June of each of the years 1956 to 1960 and the proportion per 10,000 of the population are shown in the following table. The figures exclude aborigines, except for New South Wales and Victoria.

#### CONVICTED PRISONERS.

At 30th June—	N.S.W. (a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Australia.
NUMBER.

1960 .. .. .	7.5	5.9	5.8	6.0	7.3	5.7	10.2	6.6

(a) Includes the Australian Capital Territory. Includes short-term prisoners held in lock-ups at police stations.

§ 7. Cost of Administration of Law and Order.

1. *Expenditure by the States.*—The tables below show the net expenditure (i.e., gross expenditure less receipts from fees, fines, recoups for services rendered, etc.) from Consolidated Revenue during 1960–61 in connexion with the administration of justice, police and prisons in each State.

In South Australia, the receipts for legal fees and registrations exceed the expenditure under "Justice". Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

NET EXPENDITURE ON LAW AND ORDER, 1960-61.

State.	Net Expenditure.			Per Head of Population.		
	Justice.	Police.	Prisons.	Justice.	Police.	Prisons.
	£.	£.	£.	s. d.	s. d.	s. d.

Western Australia ..	113,549	1,836,362	281,822	3 1	50 4	7 9
Tasmania ..	213,264	893,911	182,988	12 2	51 1	10 5
<b>Total ..</b>	<b>1,733,730</b>	<b>25,126,278</b>	<b>3,687,527</b>	<b>3 4</b>	<b>48 9</b>	<b>7 2</b>

2. *Commonwealth Expenditure.*—(i) *Attorney-General's Department.* The expenditure shown in the previous table is that incurred by the State Governments. Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following table, however, shows the gross expenditure by the Commonwealth Attorney-General's Department during the year 1960–61 on the main services performed by that department.

EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT, 1960-61.

(£.)

Item.	Gross Expenditure.
Administration .. .. .	317,504
Bankruptcy .. .. .	214,506
Commonwealth Police Force .. .. .	288,016
Court Reporting Branch .. .. .	185,251
Crown Solicitor's Office .. .. .	419,855
High Court .. .. .	158,144
Industrial Court .. .. .	110,022
Industrial Registrar's Branch .. .. .	207,986
Judges' Pensions .. .. .	20,166
Legal Service Bureau .. .. .	59,410
Matrimonial Causes—Grants to organizations .. .. .	36,500
Patents, Trade Marks and Designs .. .. .	475,938
Rent .. .. .	71,284
Repairs and Maintenance .. .. .	29,913
<b>Total .. .. .</b>	<b>2,594,495</b>

In addition, £262,675 was spent by the Attorney-General's Department on capital works and services.

The items of expenditure shown in the table above are gross. Receipts of the Attorney-General's Department for 1960-61 aggregated £812,493, of which revenue on account of Patents, Trade Marks and Designs, and Copyright amounted to £476,292, Bankruptcy £142,404, Court Reporting Branch £131,871, Fees, Fines and Costs of Court £35,969, and Miscellaneous £25,957.

Expenditure and receipts of the Attorney-General's Department for the five years 1956-57 to 1960-61 is shown in the following table.

**EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S  
DEPARTMENT.**

(£.)

Year.	Gross Expenditure.	Receipts.	Net Expenditure.
1956-57 .. .. .	1,952,184	451,758	1,500,426
1957-58 .. .. .	1,984,776	516,090	1,468,686
1958-59 .. .. .	2,100,388	572,771	1,527,617
1959-60 .. .. .	2,434,828	670,048	1,764,780
1960-61 .. .. .	2,594,495	812,493	1,782,002

(ii) *Police and Prisons.* Expenditure (other than capital) by the Commonwealth Government on police in the Australian Capital Territory (excluding the Commonwealth Police Force shown above), and police and prisons in the Northern Territory for the five years 1956-57 to 1960-61 is shown in the following table.

**EXPENDITURE ON POLICE AND PRISONS IN THE NORTHERN TERRITORY  
AND THE AUSTRALIAN CAPITAL TERRITORY.**

(£.)

Year.	Northern Territory.	Australian Capital Territory.(a)
1956-57 .. .. .	136,000	109,710
1957-58 .. .. .	208,099	142,462
1958-59 .. .. .	227,031	137,894
1959-60 .. .. .	262,261	168,952
1960-61 .. .. .	322,763	197,275

(a) Expenditure on police only. There is no prison in the Australian Capital Territory.

## CHAPTER XVII.

## PUBLIC HEALTH.

## A. STATE GOVERNMENT ACTIVITIES.

(Including activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory).

## § 1. Public Health Legislation and Administration.

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is a Director-General of Public Health who is Chief Medical Adviser to the Government, *ex officio* President of the Board of Health, Chairman of the Nurses Registration Board and Director of State Psychiatric Services. In the latter capacity, he is responsible for the administration of the part of the Mental Health Act relating to the care and treatment of mental patients.

The Department's activities embrace all matters relating to public health and the greater part of the general medical work of the Government. These include:— (a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—Public Health Act, Noxious Trades Act and Pure Food Act; (b) Scientific divisions (Government Analyst, Microbiological Laboratory, Institute of Clinical Pathology and Medical Research, and Division of Occupational Health); (c) Tuberculosis and Epidemiological Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore; (e) State hospitals and homes and State sanatoria; (f) Mental hospitals; (g) Public hospitals (Hospitals Commission); (h) Maternal and baby welfare (baby health centres); (i) School medical and dental services; and (j) Publicity, nutrition and library services.

2. **Victoria.**—The Department of Health, which is constituted under the Health Act 1958, contains, in addition to the central administration, four branches, the General Health Branch, the Maternal and Child Hygiene Branch, the Tuberculosis Branch, and the Mental Hygiene Branch. The work of these branches is described below.

(a) *The General Health Branch.* This branch, which, *inter alia*, is the administrative branch for the Commission of Public Health, protects or promotes the health of the community in the following ways.

The Engineering Division scrutinizes from a public health point of view the plans of all public buildings and provincial sewerage installations and makes periodical inspections. Other activities include prevention of stream pollution and supervision of abattoirs and cattle sale yards.

The Poliomyelitis Division provides a comprehensive orthopaedic, physiotherapy and respirator service for all eligible patients and carries out rehabilitation in conjunction with the Commonwealth Government. Facilities developed for poliomyelitis are now being used for other neurological disorders. The Division is also concerned with the Salk immunization campaign being undertaken in Victoria. Through the municipalities, immunization against poliomyelitis, diphtheria, smallpox, whooping cough, and tetanus is encouraged and supervised.

Prevention and control of infectious diseases are functions of this Branch, which also sponsors original research into virus diseases and epidemiological investigations throughout Victoria.

The Venereal Diseases Division provides a centrally situated headquarters where the use of modern remedies is effecting a general improvement in the standard of treatment.

Standards of quality and purity of foods and drugs are fixed by the Food Standards Committee and are administered and enforced by both departmental and municipal health inspectors.

Investigations into occupational hazards to the health of workers, the treatment and incidence of occupational diseases, and research into the effects of toxic substances used in industry are conducted by the Industrial Health Division.

Subsidies are granted to municipalities to provide meals for pensioners, to clubs for elderly citizens, and to emergency housekeeper services.

Other services operated by the Branch are:—registering plumbers and gasfitters; providing free travel to hospital for people with limited incomes; analysing food, drink, water and sewerage effluents; registering cinematograph operators; administering the Cemeteries Acts and the Clean Air Act; and advising industry on health hazards associated with handling radioactive substances.

(b) *The Maternal and Child Hygiene Branch.* This branch is concerned with pre-natal hygiene, the development of pre-school services, and the school medical and dental services.

(c) *The Tuberculosis Branch.* The Tuberculosis Branch is concerned with the prevention of tuberculosis and the treatment and rehabilitation of tubercular patients.

(d) *The Mental Hygiene Branch.* This Branch is controlled by the Mental Hygiene Authority and consists of institutions for in-patient care and out-patient's clinics and other services necessary for a comprehensive community mental health programme. Since the appointment of the Authority in 1951, existing buildings have been remodelled and new ones provided. Services have been re-organized to conform with modern requirements.

(e) *The Cancer Institute.* This Institute was incorporated in 1948 and provides, *inter alia*, facilities for research and investigation related to the causes, prevention, diagnosis and treatment of cancer and allied conditions. The policy of the Cancer Institute Board has been to ensure the provision of maximum clinical service to patients and to carry out related research. Clinics have been opened in a number of country centres in co-operation with the local hospital committees.

Under an agreement with the Government of Tasmania, clinics are also conducted at Launceston and Hobart.

A four million electron volt linear accelerator was installed in Melbourne in 1956 and a cobalt 60 unit in Launceston in 1957. A second 4 M.E.V. unit came into operation in Melbourne at the beginning of 1962, and the acquisition of still another high voltage X-ray unit is contemplated.

During the 12 months ended 30th June, 1961, out-patient attendances totalled 128,790 involving 9,008 individual patients. In-patient beds have been increased during the year by 20 to 120.

3. **Queensland.**—(i) *General.* The Health Acts 1937 to 1960 are administered by the Director-General of Health and Medical Services subject to the Minister for Health and Home Affairs. A central staff controls the following divisions,

(a) *Division of Public Health Supervision.* This Division is controlled by the Deputy Director-General of Health and Medical Services, and comprises separate sections of communicable disease control, environmental sanitation, food and drug control, enthetic (venereal) diseases, hookworm control and Hansen's disease (leprosy) control. Free treatment of venereal diseases is offered at the Department's clinics in Brisbane and at any public hospital. Free immunization against poliomyelitis, diphtheria, whooping cough and tetanus is offered by most of the local authorities. The majority of school children have been immunized against diphtheria and poliomyelitis.

(b) *Division of Tuberculosis.* A central chest clinic in Brisbane offers Mantoux tests, X-ray examinations, and inoculations of Mantoux negative reactors free of charge, and this service is extensively used. Similar clinics are situated at the Cairns, Rockhampton, Thursday Island, Toowoomba, and Townsville district hospitals. Children in the final grade of primary schools are now being Mantoux-tested and given B.C.G. vaccine. The compulsory X-ray examination of all persons over the age of 14 years has been completed in Northern Queensland and is proceeding in Southern and Central Queensland.

(c) *Division of Industrial Medicine.* The services of this division are available both to industry and to the trade union movement, for the prevention of industrial hazards. This division is particularly interested in occupational diseases, such as silicosis and lead and other poisoning, and advises on industrial problems such as lighting, ventilation, fatigue, air pollution and the use of radio-active isotopes.

(d) *Division of Maternal and Child Welfare.* This Division offers supervision and advice on the rearing and health of infants and pre-school children at 248 baby health centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services.* This Division comprises the Chief Medical Officer, School Health Services, and a staff of doctors, dentists and visiting school nurses. Every child has a medical examination at least once in three years.

(f) *Division of Mental Hygiene.* The Director is responsible for the care and treatment of mentally sick patients in the State's four mental hospitals at Brisbane, Toowoomba, Ipswich and Charters Towers.

(g) *Division of Laboratory Services.* Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to institutions, country hospitals and private doctors, and provides a medico-legal service for the whole State. The Institute of Forensic Pathology is controlled by the medical staff of the Laboratory of Microbiology and Pathology, and coroner's autopsies are conducted there.

(ii) *Hospitals.* All public hospitals operate under the district system, which provides for the constitution of hospitals regions and hospitals districts, and a hospitals board for each district. The State is divided into 11 hospitals regions with a base hospital for each region. Each region comprises a number of hospitals districts, the purpose of the regional scheme being to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospital services, including public dental services, in each hospitals district is vested in the hospitals board, which comprises not less than four members nor more than eight members appointed by the Governor-in-Council, and one member elected by the component local authorities. During the year 1959-60, there were 57 hospitals boards controlling 132 public hospitals. In addition, five other general hospitals received aid from the Government, and there were two institutions for the treatment of Hansen's disease, one of which (Peel Island) closed in August, 1959.

An institution for the treatment of Hansen's disease in aboriginals is maintained at Fantome Island near Townsville. Modern therapy has rendered the Peel Island institution unnecessary and patients are now treated at the South Brisbane Hospital.

Private hospitals in Queensland are controlled under the provisions of the Health Acts, 1937 to 1960, and the Private Hospitals Regulations, 1937. There are 57 private hospitals licensed in the State, containing 1,839 beds and cots, of which 22, containing 902 beds and cots, are in Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the Food Drugs Advisory Committee, the Radiological Advisory Committee, the School Health Services (comprising School Medical and Dental Services and Deafness Guidance Clinic), Poliomyelitis Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey and the Chest Clinic, under the control of the Director of Tuberculosis.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor, while one is elected by metropolitan local boards and one by all other local boards. The Central Board of Health administers the Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registrations and Early Notification of Birth Acts. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The Health Act 1935-1956 constitutes every municipal council and every district council a local board of health for its municipality or district. There are 143 local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act each local board is constituted the local authority for its respective district except in the metropolitan area, for which the Metropolitan County Board is the local authority.

5. *Western Australia.*—Health services are provided under the Health Act 1911-1959. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is divided into local government areas, each administered by a municipal council. All local government authorities have health administration powers.

In any emergency, the Commissioner may exercise all the powers of a health authority in any part of the State.

Features of legislation since 1947 are as follows:—(a) Act No. 70 of 1948 gives power to control sufferers from tuberculosis and establishes a Tuberculosis Control Branch; (b) Act No. 11 of 1952 gives wide powers to regulate the sale and use of pesticides; (c) Act No. 34 of 1954 provides for the licensing of manufacturers of therapeutic substances; (d) Act No. 21 of 1957 gives power to require the notification of any prescribed condition of health in addition to infectious diseases; (e) Act No. 17 of 1956 gives local authorities power to provide or subsidize centres for the accommodation and care of the aged; (f) Act No. 30 of 1958 provides for the establishment of the Health Education Council with the object of promoting and improving the health of the people of Western Australia; (g) Act No. 43 of 1958 provides for the establishment of the Cancer Council of Western Australia with the objects of co-ordinating, promoting and subsidizing cancer research; and (h) Act No. 23 of 1960 establishes a Maternal Mortality Committee to investigate each maternal death and to recommend preventive measures.

6. **Tasmania.**—The Department of Health Services is under the jurisdiction of the Minister of Health. The Department consists of a Headquarters and three Divisions. The Director-General of Health Services is the permanent head of the Department, and he administers the Department through Directors of each of the three divisions (Division of Public Health, Division of Mental Health, and Division of Tuberculosis) and through several other clinical directors and other senior officers attached to the Headquarters of the Department, including the Directors of Orthopaedics, Pathology and Anaesthetics, and the Government Analyst and Chemist.

In addition to his responsibility for the functioning of the Department as a whole, the Director-General of Health Services directly administers the various branches of the work performed by Headquarters. This is concerned particularly with the following.

- (a) The Administration of the Hospital Services throughout the State.
- (b) The District Medical Service.
- (c) The Hospital and Government Nursing Service, which includes the administration of 27 District Nursing Centres throughout the State.
- (d) Legislation concerned with Health and allied matters and the Nurses' Registration Board.
- (e) The Health Education Council and National Fitness Council.
- (f) Specialist Medical Services.
- (g) Statistical classification of Diseases and Injuries.
- (h) Liaison with other States and the Commonwealth Health Department, and all matters dealing with the maintenance of departmental property and the appointments and salaries of departmental staff.

The Division of Public Health is responsible for the oversight of those services (except those specifically related to tuberculosis), which aim at the attainment and maintenance of good physical health in the community. It controls the school health services (both medical and dental) and the child health service. It supervises the immunization campaigns conducted by local health authorities and is responsible for custody of poliomyelitis vaccine and maintenance of records of its use. The Division also sets standards of food quality and of environmental sanitation, which are policed in detail by local health authorities. The Division administers laws relating to standards of food and drugs, and of food premises, and to environmental sanitation, public buildings, infectious disease (other than tuberculosis) and cremation.

The Division of Mental Health provides a community psychiatric service. This includes a mental hospital and a neurosis hospital; institutional care for mental defectives, alcoholics, and sexual offenders; and a community psychiatric service on a regional basis covering the whole State. In addition, the Division administers the Mental Hospitals Act, the Mental Deficiency Act and provides a State-wide service for the supervision of mental defectives in the community.

The Tuberculosis Division is concerned with the prevention (including B.C.G. vaccination), detection, notification, examination and treatment of all forms of tuberculosis, and the maintenance of chest hospitals and diagnostic clinics.

7. **Northern Territory.**—The Commonwealth Department of Health provides hospital, health and medical services in the Northern Territory.

Four general hospitals have been established. The Darwin Hospital has accommodation for 253 in-patients, Alice Springs Hospital 125, Katherine Hospital 36, and Tennant Creek Hospital 34. The treatment of Hansen's disease (leprosy) is carried out at East Arm Settlement. A full range of ancillary services is available at the Darwin hospital, which serves as a base hospital for the Territory. Dental clinics have been set up at Darwin and Alice Springs.

Medical and dental services to outback areas are provided by road and air. Aircraft used in the Territory are two De Havilland Doves stationed at Darwin, and one at Alice Springs. They are staffed and serviced by Trans-Australia Airlines and are extensively used in ambulance and survey medical work. At Alice Springs, doctors of the Northern Territory provide the medical services to the Royal Flying Doctor Service (South Australian) base.

A section of the Department of Health undertakes continuous investigation into native health.

School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment. Public health services are provided, and health inspectors visit all settlements periodically.

Darwin, as a first port of entry for overseas aircraft and shipping, has a quarantine station.

8. *Australian Capital Territory.*—The Public Health Ordinance 1928–1951 places under the control of the Minister for Health all matters relating to public health and hygiene in the Australian Capital Territory. A Medical Officer of Health and a number of Health Inspectors are appointed to administer and police this ordinance. The Canberra Community Hospital is administered, subject to the Minister for Health, by a board consisting of five elected members and three members appointed by the Minister. The hospital has accommodation for 305 in-patients. A district nursing service, administered by the Commonwealth Department of Health, was established in 1950 to provide a home-nursing service for the sick and aged. The service is available at the request of a registered doctor.

## § 2. Supervision and Care of Infant Life.

1. *General.*—The number of infant deaths and the rate of infant mortality for the five years 1956 to 1960 are given in the following table. Further information regarding infant mortality (including information for each State as a whole and for the Territories) will be found in Chapter X.—Vital Statistics (*see page 341*).

### INFANT DEATHS AND DEATH RATES.

(a) Northern Territory and Australian Capital Territory included in "Remainder of State".

(b) Number of deaths of children under one year of age per 1,000 live births registered.

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government and private organizations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by baby health centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out of the wards of the State to suitable persons, and wherever possible the child is boarded out to its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of Part V. of the Social Services Act 1947-1961, a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under 16 years of age. Where there are one or two other children under 16, the amount payable is £16, and where there are three or more other children under 16, the amount payable is £17 10s. Where more than one child is born at a birth, the amount of the allowance is increased by £5 in respect of each additional child born at that birth. More detailed information concerning maternity allowances is devoted in Chapter XVIII.—Welfare Services.

2. Nursing Activities.—(i) *General.* In several States, the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (see No. 22, pp. 515-16), information concerning the activities of institutions in each State is given.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations for the year 1961.

#### BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1961.

(c) Excludes New South Wales.

In the last thirty years, the number of attendances at the Baby Health Centres has nearly quadrupled. The numbers of attendances, at five-year intervals, since 1930 were as follows:—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; 1955, 3,099,233; and 1960, 3,480,203. During the year 1961, the number of attendances was 3,641,479.

### § 3. Medical Inspection of School Children.

1. *General.*—Medical and dental inspection of school children is carried out in all States, in the Northern Territory and in the Australian Capital Territory. In some States, travelling clinics have been established to deal with dental defects.

2. **New South Wales.**—(i) *School Medical Service.* Doctors of the School Medical Service examine children attending all schools administered by the Department of Education and the majority of other schools in the State. They make annual visits to schools in the metropolitan, Newcastle and Wollongong areas, and in Armidale, Bathurst, Lismore and district, Grafton and district, and Cootamundra, and examine children in kindergarten or 1st grade in primary schools, and 2nd year in secondary schools. Children in 4th grade in primary schools and 4th year in secondary schools are reviewed. Children in other classes are examined or reviewed as necessary.

In country areas, school children are examined by local medical practitioners according to the normal practice of the School Medical Service and under the supervision of local Municipal and Shire Councils. During the first examination, all children at these schools are examined, and following that, the same procedure is adopted as in the metropolitan area. This scheme is growing and the majority of Councils in New South Wales have expressed interest and are endeavouring to arrange with local medical practitioners to have the scheme introduced. If treatment is necessary, the parent is informed and, if possible, is called in for interview. In the metropolitan, Newcastle, Wollongong, Lismore and Grafton areas, school nurses follow up these cases with the object of persuading parents to seek medical advice for the children.

As well as examining school children, the medical officer examines the sanitary arrangements at each school. Bush nurses act as school nurses in schools at or near the bush nursing centres. Medical officers of this service examined 178,818 children in 1960. Notifiable defects were found in 27.3 per cent. of the children examined.

Various surveys of school children are undertaken from time to time, e.g. hearing surveys, hookworm surveys, height-weight surveys, nutrition surveys, and investigations to determine the incidence of enlargement of the thyroid gland, defective vision, and postural defects.

Six child guidance clinics in the metropolitan area and one at Newcastle operate under the administration of the School Medical Service. One clinic functions at the Yasmarr Boys' Shelter and deals exclusively with cases which come before the Children's Courts. Each clinic is staffed by a psychiatrist, a psychologist and social workers.

(ii) *School Dental Service.* There are 28 dental officers and 23 dental assistants of the staff of the Division of Dental Services, Department of Public Health, providing a School Dental Service for New South Wales school children. At the beginning of the 1962 school year, twelve fully-equipped mobile dental clinics were in service in country areas. The clinics are staffed by a dentist and assistant. They visit country schools and provide treatment free of charge.

Arrangements are proceeding for the erection of five fixed clinics, each of two surgeries, waiting room, office and separate washrooms for patients and staff. These will be located at Newcastle and Wollongong, and at Hurstville, Parramatta and Naremburn in the Sydney metropolitan area. When the clinics are completed, free treatment may be obtained for those school children whose parents desire it. It will be necessary to restrict the treatment to children of 6, 7 and 8 years of age although children of any age may obtain free treatment of an emergency nature. A system involving examination only was commenced in September, 1960, whereby as many primary school children as possible are encouraged to seek private treatment.

A well-equipped dental surgery is in continuous operation at the Stewart House Preventorium, staffed by officers of the Division. A free dental service is provided, in co-operation with the Royal Flying Doctor Service, for children living in far western areas. In country areas where no adequate dental facilities exist, school children of all ages are eligible for treatment in the mobile clinics.

In 1961, 99,259 school children were examined and 15,423 were treated in 49,205 visits; 24,611 extractions, 50,650 fillings and 53,672 other treatments were completed. The parents of a further 57,670 children were notified of dental defects requiring treatment.

3. **Victoria.**—School Medical Services are conducted in close association with the Education Department. All children between the ages of 5 and 14 years attending State and registered primary schools are examined regularly, and any disabilities found in the children are brought to the notice of their parents. School nurses, under medical direction, visit the homes and schools. Children suffering from physical and mental disabilities are recommended to attend appropriate schools or classes by the medical officers. Some special training for the handicapped is given.

The School Dental Service has a staff of 40 dental officers and provides dental attention for children in parts of the metropolitan area at one of three dental centres and for a number of country districts by means of 15 mobile units. It also provides dental service for children's institutions in and around Melbourne and certain provincial centres. This service is now providing dental attention for some 80,000 primary school children.

4. **Queensland.**—During 1960–61, medical officers and nurses examined 98,846 school children, referring children with defects to their own doctors. In western Queensland, local doctors act as part-time ophthalmic surgeons. Advice is given on school sanitation, infectious diseases in schools, and health education.

During 1960–61, school dentists gave treatment to 13,887 school children whose parents could not afford private treatment. The treatment was carried out at four rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

5. **South Australia.**—The Metropolitan State schools are visited annually and the children are examined while in Grades 1, 4 and 7 in the primary schools, and in their second and fourth years in secondary schools. Efforts are made to visit country schools every three years, when all the children are examined. Students who wish to become teachers are examined on appointment as Leaving Teaching Scholars while still attending secondary schools, again immediately prior to entering the Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in hygiene and in first aid are given to all College students and, in addition, domestic arts students are lectured on home nursing.

During 1960, 54,868 children were examined by medical officers in 154 country and 86 metropolitan schools. Of these, 3,814 required treatment for defective vision, 1,261 for defective hearing, and 11,118 for dental disorders.

There were 992 children examined at the Deafness Guidance Clinic during 1960. Of the 484 new patients, 312 were referred to doctors or hospitals for treatment.

Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

6. **Western Australia.**—The School Medical Service of the State Health Department employs seven full-time medical officers for schools. During 1960, these officers examined 60,207 children (metropolitan 36,795, country 23,412). The 398 schools visited comprised metropolitan, 215 (state schools 153, private schools 62), and country, 183 (state schools 148, private schools 35). The aim is to examine each school child three times in his school career.

During 1960, the nine full-time dentists employed by the School Dental Service visited 17 metropolitan schools, 103 country schools, 12 orphanages and 8 native missions. The number of children examined was 10,470. With the consent of their parents, 6,213 of these were treated. The number of dental vans operating was 12. The cost of the School Medical Service and the School Dental Service for 1959–60 was £88,324.

7. **Tasmania.**—During 1961, two full-time and three part-time medical officers examined school children in State and private schools, and 17 full-time and one part-time sisters visited homes and schools. Of the 26,346 children examined by medical officers, 9,377 were found to have defects.

Twelve school dental officers were employed during 1961, operating from surgeries at Hobart, Launceston, Burnie, Devonport, Queenstown and Currie, and from mobile clinics in other districts. A full-time dental surgeon is in charge of each surgery or clinic. During the year, there were 16,914 new visits to the school dentists and 26,544 repeat visits.

The cost of school medical and school dental services for the year ended 30th June, 1961, was £92,877.

8. **Northern Territory.**—(i) *School Medical Service.* The Schools Medical Officer makes routine physical examinations of all children attending both pre-school centres and the schools which come under the supervision of the Assistant Supervisor of Education in the Northern Territory. The only children not so examined by him are those at the Native Welfare Settlement School, i.e. full-blood aboriginals, who are examined during native health surveys.

An immunization clinic and a paediatric clinic are held each week at the Darwin Hospital.

(ii) *School Dental Service.* A special service for school and pre-school children is available in Darwin.

9. *Australian Capital Territory.*—The Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include a school medical service carried out by a medical officer and a trained nurse who are full-time officers of the Health Department.

Routine examinations are carried out at all schools, public and private, within the Territory. The programme is planned to provide for examinations at the ages of six, eight and 12 years. During 1961, the total number of children examined in these age groups was 3,262.

Examinations of children attending Pre-School Centres are made according to the time available, an attempt being made to cover children aged 4½ to five years. In 1961, lack of time prevented full coverage, but 59 pre-school children were examined.

In addition, an immunization programme for the protection of children aged from six months to 12 years against diphtheria, whooping cough and tetanus is carried out by the school doctor. Injections given during 1961 numbered 7,437.

Anti-poliomyelitis injections are also given to children attending both primary and secondary schools, and 886 injections were given during 1961. Anti-poliomyelitis injections numbering 6,235 were given, also, to infants and pre-school children and adults.

The officer-in-charge of the school service also acts as medical adviser to the Mothercraft Council and at the Baby Health Centres.

The school dental service is staffed by ten dentists and eleven dental nurses, and has operated since 1950. Free dental treatment is available to children at primary and infants' schools and pre-school centres. During 1961, approximately 86 per cent. of children accepted treatment and 9,607 children were examined, involving 26,439 visits.

#### § 4. Inspection of Food and Drugs for Sale.

Public health legislation in force in all States provides for the inspection of foods and drugs, with the object of ensuring that all goods sold shall be wholesome, clean, and free from contamination or adulteration, and that all receptacles, places and vehicles used for their manufacture, storage, or carriage shall be clean.

#### § 5. Supervision of Dairies, Milk Supply, etc.

Earlier issues of the Official Year Book (*see* No. 22, p. 498), refer to the legislation in force in the various States to ensure the purity of dairy produce.

#### § 6. Disposal of Dead by Cremation.

The first crematorium in Australia was opened in South Australia in 1903. At 31st December, 1961, there were eighteen crematoria in Australia, situated as follows:—New South Wales, 7; Victoria, 4; Queensland, 2; South Australia, 1; Western Australia, 2; Tasmania, 2.

There is no crematorium in the Northern Territory or in the Australian Capital Territory.

The following table shows the number of cremations in each State for each of the years 1957 to 1961.

#### CREMATIONS.

**B. COMMONWEALTH GOVERNMENT ACTIVITIES.****§ 1. General.**

At the time of Federation, the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. All other health powers remained with the State Governments. The Commonwealth Quarantine Act was passed in 1908, and a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1st July, 1909. The systems of quarantine originally established by the State Governments were transferred to the control of the Commonwealth.

The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. It had certain other functions in the field of public health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

**§ 2. National Health Benefits.**

**1. Pharmaceutical Benefits.**—A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital.

The patient pays the first 5s. of the cost of the prescription, but pensioners who are eligible for treatment under the Pensioner Medical Service (*see* para. 5, page 673) receive all benefits without any contribution being made.

Total Commonwealth expenditure on pharmaceutical benefits in the year 1960–61 was £27,881,222.

**2. Hospital Benefits.**—The payment of hospital benefits to the States is authorized under Part V. of the National Health Act 1953–1961. This Act continues the agreements entered into with the various States under the Hospital Benefits Act 1951. Under these agreements, the Commonwealth pays the States certain sums of money which vary according to the number of occupied beds in public hospitals and the status of patients.

The agreements provide for the payment of 12s. a day for patients who are pensioners or their dependants, and for patients in certain South Australian hospitals. The rate of 8s. a day is paid for other patients.

The National Health Act also provides for the payment of 8s. a day for patients in approved private hospitals. This payment is made to the proprietor of the private hospital. A condition of the benefit is that an equivalent amount has been allowed against the patient's account.

Commonwealth additional benefit is paid in the case of patients who are members of a registered hospital benefit organization. The additional benefit is payable at the rate of 4s. a day if a person contributes for a fund benefit of at least 6s. a day but less than 16s. a day, and at the rate of 12s. a day if a person contributes for a fund benefit of at least 16s. a day. Payment of the additional benefit is made through the benefit organization, and the patient normally receives it with the amount of fund benefit payable by the organization. Reimbursement of the Commonwealth additional benefit is subsequently made to the organization by the Commonwealth.

Until 1st January, 1959, organizations' rules generally provided for disallowance of claims for fund benefit in cases of chronic or pre-existing ailments, or after the contributor had received benefit for a certain maximum period each year. As from 1st January, 1959, provision was made for fund benefit to be paid in these cases. The fund benefit generally

payable in such cases is 16s. a day and is paid either from special accounts guaranteed by the Commonwealth, or from the ordinary accounts of the organizations. One of the original conditions of payment was that the treatment was given in a hospital recognized for the purpose of paying this benefit. While this condition still remains as a general rule, provision has been made as from 1st January, 1960, for fund benefit to be paid in certain circumstances to particular cases for treatment in hospitals which are not recognized. If the payments from special accounts exceed the contributions credited to the account, the amount of the deficit is reimbursed by the Commonwealth.

Australian residents and their dependants who receive hospital treatment while temporarily living overseas are eligible to receive the benefit of 8s. a day and the additional benefit to which they are entitled.

Expenditure on hospital benefits in 1960-61 was £18,533,706. In addition, Commonwealth payments towards special account deficits totalled £2,134,304. This does not include expenditure on mental hospitals (*see* para. 3, below).

The following tables show the amount of ordinary benefit paid for each of the years 1956-57 to 1960-61, together with the number of registered organizations, the membership thereof, and payments of Commonwealth additional benefit and hospital fund benefit on account of occupied beds in public and approved private hospitals, for the year 1960-61. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members. Reliable figures for coverage are not available.

The figures for Commonwealth Benefits in the table below, and for Medical Benefits shown on page 673, exclude payments towards special account deficits.

(a) An additional benefit of 4s. a day is payable to registered hospital benefit organizations for persons who contribute for a fund benefit of at least 6s. a day but less than 16s. a day, or 12s. a day for those who contribute for a fund benefit of at least 16s. a day. (b) No hospital benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of these territories, or who are overseas, receive their Commonwealth additional benefit and fund benefit through membership of an organization registered in one of the States. (c) Includes 17 Bush Nursing Hospitals.

3. Mental Hospitals.—In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals, the Commonwealth Parliament passed the Mental Institutions Benefits Act 1948. This Act ratified agreements with the States, whereunder it was provided that:—

- (a) the Commonwealth would pay the States a benefit equal to the amount being collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance; and
- (b) the States would cease making charges for the maintenance of mental patients.

These agreements operated for five years, and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling a day for each patient. When the agreements terminated, Dr. Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey on mental health facilities and needs in Australia. His report was released in May, 1955. The report stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of £10 million to the States, as part of a capital expenditure programme of £30 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer.

The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government each year from 1955-56 to 1960-61.

1960-61 ..	432,881	83,819	97,642	45,691	15,276	51,933	727,242

Amounts shown in the foregoing table represent payments made during the year shown, under the States Grants (Mental Institutions) Act 1955. The total amounts payable to each State under this Act are in aggregate £10,000,000, to be distributed as follows:—New South Wales, £3,830,000; Victoria, £2,740,000; Queensland, £1,460,000; South Australia, £895,000; Western Australia, £720,000. Tasmania, £355,000; Victoria and Tasmania have received their full entitlement under the Act.

There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

**4. Medical Benefits.**—A medical benefits scheme has operated since July, 1953, being authorized firstly by the National Health (Medical Benefits) Regulations and then by the National Health Act 1953.

The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits payable by the Commonwealth are paid either on a fee-for-service basis in respect of the items set out in the first and second schedules to the National Health Act, or in the form of a subsidy not exceeding half of the payments made to doctors by registered organizations under contract arrangements.

In order to qualify for the Commonwealth benefit, a person is required to be insured with a registered medical benefits organization. The organization pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organization by the Commonwealth.

Provision was made from 1st January, 1959, for payments of fund benefit in cases of pre-existing ailments and long-term illnesses. These payments are made from the special accounts referred to on page 671.

Substantially increased Commonwealth and fund benefits were introduced for a number of medical services from 1st January, 1960. The largest increases were for major operations, where the combined benefits were doubled.

An organization wishing to be registered by the Commonwealth for the purposes of the medical benefits scheme is required to provide to its contributors, subject to its rules, all benefits specified in the first schedule to the National Health Act 1953-1961, at rates not less than those provided by the Commonwealth. The organization must be non-profit-making.

In 1960-61, Commonwealth expenditure on medical benefits was £9,783,423. In addition, Commonwealth payments towards special account deficits totalled £192,731.

The following table shows the number of registered medical benefit organizations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organizations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors. Reliable figures for total coverage are not available.

#### MEDICAL BENEFITS: SUMMARY, 1960-61.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)
Registered Organizations							
Members	No. 26	23	6	9	9	10	83
Medical Services	No. 1,210,614	753,096	296,582	273,778	216,891	99,112	2,850,073
Commonwealth Benefit	£ 8,369,871	5,078,882	2,204,442	2,139,080	1,702,750	628,002	20,123,027
Fund Benefit	£ 4,112,952	2,414,490	1,071,462	1,038,890	851,831	293,798	9,783,423
	£ 6,240,220	2,776,308	1,539,933	1,396,182	1,141,656	471,878	13,566,177

(a) No medical benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of those territories, or who are overseas, receive their Commonwealth Benefit and fund benefit through membership of an organization registered in one of the States.

5. **Pensioner Medical Service.**—The Pensioner Medical Service, which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the National Health Services Act 1948-1949. The service has been continued under the provisions of the National Health Act 1953-1961.

The service provided to eligible pensioners consists of medicines provided free of cost and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the service are those who satisfy a means test and are receiving an age, invalid or widow's pension under the Social Services Act or a service pension under the Repatriation Act; persons receiving a tuberculosis allowance under the Tuberculosis Act; and dependants of persons eligible for the service.

Since 1st November, 1955, the means test which has applied to new enrolments in the service is the income test that had to be satisfied in order to qualify for a full rate pension as at 31st December, 1953.

The means test does not apply to persons who had applied for and were eligible to receive a pension prior to 1st November, 1955, or to persons receiving a tuberculosis allowance.

At 30th June, 1961, 5,861 doctors were enrolled in the scheme to attend to approximately 766,251 pensioners and their dependants.

During the year ended 30th June, 1961, doctors in the scheme performed 6,996,483 services—visits and surgery consultations—for persons enrolled in the scheme. For these services, they were paid £4,200,273. The average number of services rendered by doctors to each person was 9.1.

6. **Anti-Tuberculosis Campaign.**—The main provisions of the Tuberculosis Act 1948 are as follows:—(a) Section 5 authorizes the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and to their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947–48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health. Other members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and an Administrative Officer of the Commonwealth Department of Health.

To help reduce the spread of infection, the Commonwealth Government pays living allowances to persons suffering from tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13th July, 1950. Since 5th November, 1961, the rates payable have been:

Married sufferer with a dependent wife . .	£12 2s. 6d. a week.	
Dependent child or children under sixteen years of age—		
First dependent child . . . . .	15s. a week	} (additional to child endowment)
Each dependent child in addition to the first . . . . .	10s. a week	
Sufferer without dependants . . . . .	£7 7s. 6d. a week (reducible to £5 5s. a week if a person is maintained free of charge in an institution)	

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a married person, £7 a week, and in the case of a person without a dependent wife, £3 10s. a week.

The following table gives particulars of the number of new cases of tuberculosis notified in Australia for the year 1960–61.

**TUBERCULOSIS: NEW CASES NOTIFIED, 1960-61.**

State or Territory.	Age Group.					Total.
	0–14.	15–34.	35–54.	55 and over.	Not Stated.	
New South Wales ..	67	269	557	544	9	1,446

<b>Australia .. .. .</b>	<b>242</b>	<b>776</b>	<b>1,396</b>	<b>1,272</b>	<b>28</b>	<b>3,714</b>

Expenditure by the Commonwealth Government during 1960-61 on its anti-tuberculosis campaign is set out in the following table. The figures for "Maintenance" differ from those in the table shown in Chapter XVIII.—Welfare Services, A. § 2, because they include administrative costs which are not a charge on the National Welfare Fund.

**ANTI-TUBERCULOSIS CAMPAIGN: EXPENDITURE BY THE COMMONWEALTH GOVERNMENT, 1960-61.**  
(£.)

State or Territory.	Allowances.	Maintenance. (a)	Capital.	Total.
New South Wales .. ..	327,994	1,300,221	125,807	1,754,022

**7. Anti-Poliomyelitis Campaign.**—The success of the 1954 United States field trials of the poliomyelitis vaccine developed by Dr. Jonas Salk and his associates at the University of Pittsburgh was announced in April, 1955. The Commonwealth Government immediately decided to produce the anti-polio vaccine in Australia.

With the advantage of the experience of the campaigns in the United States and Canada, Australia has adopted a vaccine which has proved to be safe and effective in building up immunity against poliomyelitis.

The vaccine was being produced in Australia by the end of 1955 under the most rigid safety conditions. Plans were made for comprehensive testing procedures to be carried out at many stages both during the production process and with the finished product. These tests ensured the maintenance of safety standards no less rigid than those laid down in other countries where vaccination campaigns were in progress. The Research Laboratory at the Fairfield Hospital, Melbourne, agreed to act as an independent testing authority under an arrangement with the Commonwealth Government, and the pathology department of the University of Melbourne also agreed to conduct tests. No vaccine was released for use unless the searching requirements of the Commonwealth Serum Laboratories, the Fairfield Hospital, and the University of Melbourne were met.

The vaccine was supplied to the States free of charge and the States accepted responsibility for the cost of their particular vaccination programmes. No child can be vaccinated without the consent of his parents or guardian.

Distribution of the Salk poliomyelitis vaccine to the States began in July, 1956. The States were responsible for the organization and running of their own campaigns and for the distribution of the vaccine in accordance with priority groups established by the National Health and Medical Research Council. Up to 1958, priority was given to children in the 0-14 age group, expectant mothers, and persons subjected to special risk. During 1958, this priority was extended to persons in the 15-44 age group.

Vaccination against poliomyelitis takes the form of three injections of the vaccine. The second injection is given approximately four weeks after the first, and the third injection is given not less than 32 weeks after the first.

Where the incidence of the disease in certain areas approaches epidemic proportions, special efforts have been made to vaccinate as soon as possible all persons in the area who give their consent.

The following figures relating to immunization coverage are taken from reports presented by the States at the meeting of the Poliomyelitis Committee of the National Health and Medical Research Council held in July, 1961.

State.	Age Group.	Percentage of Population Completed Course of Immunization.
New South Wales .. .. .	0- 4 .. .. .	67.5
	5- 9 .. .. .	89.2
	10-14 .. .. .	92.6
	15-19 .. .. .	75.3
	20-40 .. .. .	42.6
Victoria .. .. .	0-14 .. .. .	72.0
	15-44 .. .. .	15.6
Queensland .. .. .	0-14 .. .. .	75.0
	15-44 .. .. .	46.0
South Australia .. .. .	0-14 .. .. .	78.0
	15-44 .. .. .	46.0
Western Australia .. .. .	0- 4 .. .. .	64.0
	5- 9 .. .. .	84.0
	10-14 .. .. .	89.0
	Total under 15 years .. .. .	78.0
	Total 15 years and over .. .. .	47.0
	Total 20 years and over .. .. .	41.0
	Total all ages .. .. .	57.0
Tasmania .. .. .	Under 17 years .. .. .	91.7
	17-45 .. .. .	52.0

The number of new cases of poliomyelitis notified in each State is shown for each year from 1956 to 1961 in the following table.

## POLIOMYELITIS: NEW CASES NOTIFIED.

8. Free Milk for School Children Scheme.—In 1950, the States Grants (Milk for School Children) Act was passed. The object of this Act was to improve the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending public or private primary schools, including nursery schools, kindergartens, crèches and aboriginal missions, are eligible to receive free milk. The cost of the milk plus half the capital or incidental costs, including administrative expenses of the scheme, is reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30th June, 1961, approximately 1,619,500 children were entitled to receive free milk under this scheme.

Expenditure by the Commonwealth Government under the scheme since its inception has been as follows.

## COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME.

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
1950-51 to 1955-56 ..	4,081,809	2,040,766	890,940	746,042	531,840	700,665	2,880	41,041	9,035,983
1955-56 ..	1,042,173	540,000	308,000	184,000	137,211	185,000	1,016	14,048	2,411,448
1956-57 ..	1,094,469	600,901	386,999	200,000	158,659	156,275	1,323	16,146	2,614,772
1957-58 ..	1,139,512	677,000	401,000	212,000	153,600	160,433	860	18,186	2,762,591
1958-59 ..	1,190,048	782,623	474,909	235,879	182,249	181,025	2,799	19,104	3,068,636
1959-60 ..	1,286,672	910,000	480,246	275,000	229,872	156,358	10,493	22,874	3,371,515
1960-61 ..	1,279,460	1,020,000	518,244	282,000	225,377	200,075	21,994	24,064	3,571,214

The figures in the foregoing table differ slightly from those in the table shown in Chapter XVIII., Welfare Services, A. § 2, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund (i.e., the cost of the milk).

## § 3. Commonwealth Laboratories and Research Institutions.

1. National Health and Medical Research Council.—In 1926, the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between the Commonwealth and State Health Authorities". This Council held sessions each year except in 1932. In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions.

- To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research.
- To advise the Commonwealth Government on the expenditure of money specifically appropriated to be spent on the advice of this Council.
- To advise the Commonwealth Government on the expenditure of money on medical research and on projects of medical research generally.
- To advise Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The council consists of the Commonwealth Director-General of Health (as chairman), two officers of his department, a representative of the Commonwealth Serum Laboratories Commission, the official head of each State Health Department, and the Director of Public Health for Papua and New Guinea, together with ten other members, one each being nominated by the Australian Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Australian College of General Practitioners, the College of Pathologists of Australia, the Australian Dental Association, the Australian Paediatric Association, the College of Radiologists of Australasia and the Australian universities having medical schools. An eminent layman and laywoman, appointed by the Commonwealth Minister for Health, also serve on the council.

The first session of the National Health and Medical Research Council was held at Hobart in February, 1937. The fifty-second session was held at Canberra in November, 1961.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to assist:—(a) departments of the Commonwealth or of a State engaged in medical research; (b) universities for the purpose of medical research; (c) institutions and persons engaged in medical research; and (d) in the training of persons in medical research. In 1961–62, this appropriation was £298,500.

Approved research institutions under this system now number 75. For 1962, grants for projects numbered 89 in the following fields:—biochemistry, biophysics, clinical research, dentistry, experimental biology, experimental medicine, experimental pathology, haematology, microbiology, neurology, obstetrics, physiology and pharmacology. In certain instances, equipment and apparatus have been made available by the council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the council on such subjects as public health, epidemic diseases, occupational health, radioactive isotopes, medical statistics, radio-therapy, medical radiation, antibiotics, tropical physiology and hygiene, ultrasonics, maternal and child welfare, nutrition, dental research, nursing and veterinary public health.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputations. Beyond this practical achievement, the original objectives of the council are being attained by encouraging young graduates to take up research work and by securing a continuity and permanence of medical research in Australia.

Four scholarships are available each year to allow study overseas for one year. In addition, assistance is often given to scholarship-holders to cover part of their travel expenses.

**2. The National Biological Standards Laboratory.**—The Therapeutic Substances Act 1953–1959 provides the Commonwealth with powers to ensure that therapeutic substances used for the prevention, diagnosis and treatment of disease in man and animals are safe, pure and potent.

The Director-General of Health is authorized under this Act to set up laboratories to test such substances. In 1958, the first steps were taken to establish an Australian National Biological Standards Laboratory in Canberra.

The Laboratory is divided into two main divisions, a Biological Division and a Pharmaceutical Division. The Biological Division consists of the Bacterial Products Laboratory, the Viral Products Laboratory and an Antibiotic Products Laboratory. The Pharmaceutical Division consists of an Analytical Chemistry Laboratory, an Endocrine Products Laboratory and a Pharmacology Laboratory.

All these laboratories have now been established and have commenced work with the exception of the Bacterial Products Laboratory.

Samples of therapeutic agents available in Australia are taken and tested for compliance with legal standards. A major function of the Laboratories is the establishment of such standards where none at present exist or present standards are unsatisfactory.

The Laboratories receive international reference standards of biological substances from stocks maintained by the World Health Organization, and will on request issue Australian reference standards which have been assayed against international standards.

3. **Commonwealth Serum Laboratories.**—The laboratories were established in 1916 under the administration of the Department of Trade and Customs and from 1921 to 1961 were operated under the Department of Health. By Act No. 38 of 1961, control of the laboratories passed to the Commonwealth Serum Laboratories Commission on 2nd November, 1961.

The laboratories' basic function is to ensure the supply of essential biological products in accordance with national health needs. This includes:—

- (a) Production and supply of essential biological products;
- (b) research and development relating to biological products and allied fields;
- (c) the maintenance of potential production capacity for use in emergencies.

Since their foundation, the Laboratories have greatly extended in size and scope. They now produce some 450 regular products and many special products for use in the diagnosis, prevention and treatment of human and animal diseases. Professional, technical and other staff total over 1,000.

Products comprise a full range of human bacterial and virus vaccines, veterinary bacterial and virus vaccines, serum products such as blood fractions, a wide variety of antibacterial and antitoxic sera, antivenenes, penicillin, endocrines, including insulin, A.C.T.H., pituitary and thyroid extracts, allergy testing materials and desensitizing preparations, culture media and diagnostic agents for clinical and laboratory work. More recently, tissue culture materials have been prepared and supplied to virus research workers throughout Australia.

Continuous research is conducted into the relevant aspects of microbiology and immunology, and related fields. As the growth of medical and scientific knowledge in Australia and overseas reveals new methods of diagnosis, prevention and treatment of diseases, this information is applied to the preparation of new biological products at the Laboratories, the most recent being the production of a combined vaccine for simultaneous immunization against tetanus, diphtheria, whooping cough and poliomyelitis.

Facilities are maintained for investigation into public health matters which are inconvenient or impracticable to handle at the Commonwealth Health Laboratories or the School of Public Health and Tropical Medicine.

The Laboratories serve as a national centre for the maintenance in Australia of International Standards of the Permanent Commission on Biological Standards (World Health Organization). They act as a regional reference centre for W.H.O. in collating reports of the prevalence of certain infectious diseases, and provide facilities for the identification of these diseases.

Veterinary biological products produced at the Laboratories have given the lead to other producers in Australia, resulting in the diminution of incidence of a number of serious infectious stock diseases.

4. **The Commonwealth Health Laboratories.**—Health Laboratories, of which there are fifteen, are situated in the following towns: Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. They were established as an essential part of the quarantine system, but were also to undertake research into local health problems and to provide doctors of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner, with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other, is essential to the investigation and control of disease.

From this standpoint, the Laboratories have already proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems in Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations, close co-operation has existed with State and local health and hospital services, especially in Queensland, where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers previously unclassified in that State. In this investigational work, as well as in more routine activities, the Laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the School of Public Health and Tropical Medicine, Sydney.

These laboratories are unique in that, with the exception of the use of X-rays, they cover all the fields of diagnostic requirements, namely, pathology, public health, haematology, parasitology, mycology, bacteriology and biochemistry.

**5. Commonwealth Acoustic Laboratories.**—Sponsored by the National Health and Medical Research Council, the Acoustic Research Laboratory, Sydney, investigated inter-communication difficulties and noise problems in aircraft and tanks (1942–46). It then investigated the problem of congenital deafness in children resulting from maternal rubella. The Department of Health took over this laboratory in January, 1947, and subsequently established branch laboratories in all other State capitals.

The Acoustic Laboratories Act 1948 gave the Minister for Health the right to establish, maintain and operate, within the Commonwealth, acoustic laboratories for scientific investigations, including tests in respect of hearing aids and their application to the needs of individuals, and in respect of problems associated with noise as it affects individuals. In 1949, the Government approved the provision and maintenance of hearing aids, without charge, to deaf school and pre-school children. This service has since been extended to those whose hearing loss is discovered after leaving school, but who are still under 21 years of age. The Laboratories' functions also include:—(1) provision and maintenance of hearing aids on behalf of Repatriation and other Commonwealth Departments; (2) assistance to the State Education Departments in measuring deafness by providing and maintaining portable audiometers; (3) the making of hearing tests of Civil Aviation aircrew as required by international agreement; and (4) the making of independent tests on behalf of State and other authorities.

The Sydney Laboratory is responsible for staff training, production of equipment, calibration of hearing-aids and audiometers, and the technical administration of branch laboratories.

**6. Commonwealth X-ray and Radium Laboratory.**—The Commonwealth Radium Laboratory was established in 1929 by the Commonwealth Department of Health to act as the custodian of radium and to ensure its equitable distribution and efficient use.

A total of 10 grams of radium, purchased in 1928 by the Commonwealth Government for use in treatment and research, is distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all persons requiring it, irrespective of their ability to pay. This work is co-ordinated by the Department. From time to time, portions of the original radium holding have been remounted by the Department in forms more suitable for recently developed techniques.

In 1935, the Commonwealth Department of Health extended the work of the Commonwealth Radium Laboratory to include the investigation of the physical problems of X-ray therapy. This laboratory, known since then as the Commonwealth X-ray and Radium Laboratory, is maintained by the Commonwealth Department of Health. It is specifically designed for work with X-rays and radioactive materials, and is provided with equipment for research work, including a 400 kV. high-tension generator. The free-air chamber which acts as the Australian standard X-ray dosimeter is maintained in the Laboratory.

Since 1939, the functions of the Laboratory have included investigations of the physical aspects of the diagnostic use of X-rays with particular emphasis on miniature radiography and high-kilovoltage techniques.

The Laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of radiation exposure of those who work with X-rays and radioactive materials.

A radon service has been operated by the Laboratory since its inception. During the year 1960–61, 39,360 millicuries of radon were prepared and issued from the Laboratory in the form of implants, needles and tubes for use in Victoria, Tasmania, South Australia and Western Australia. A further 27,872 millicuries were issued by the associated centres in Sydney and Brisbane. The corresponding figures for 1959–60 were 32,150 and 23,223 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is an Australian development and enables very efficient use to be made of the radium available.

Through the development of atomic energy programmes overseas, supplies of radio-isotopes have been available for use in Australia since 1946. The Australian Atomic Energy Commission is now able to prepare, in its own reactor, some of the radio-isotopes required in Australia. The Commission has for some years maintained an advisory service in the use of radio-isotopes in industry and non-medical research. However, the Department of Health continues to have the responsibility for procurement and distribution of radio-isotopes in industry and non-medical research.

The importation of radio-isotopes is restricted under the Customs (Prohibited Imports) Regulations. Approval for importation is given either by the Director-General of Health or by the Australian Atomic Energy Commission, depending on the category of use, after it has been established that the isotope will be used safely and usefully. Isotopes used in Australia are obtained from Great Britain, Canada and the United States of America, and are imported through the Laboratory as the central procurement agency.

During 1960-61, 54 different radio-isotopes were imported for all purposes. This represented 1,134 separate deliveries from overseas sources of supply. Of this number of shipments, 445 were for medical purposes, 655 for research purposes and 34 for industrial purposes. In 1959-60, the total deliveries were 820, of which 389 were for medical purposes, 411 for research purposes and 20 for industrial purposes. In addition to the 1,134 deliveries of radio-isotopes arranged by the Laboratory in 1960-61, 66 certificates of approval under the Customs (Prohibited Imports) Regulations were issued to permit the entry of radioactive materials imported directly by local firms from their overseas principals. These radioactive materials were for use in industry, medicine and research. In 1959-60, the corresponding figure was 49. In addition, in 1960-61, 22 certificates of approval were issued to the Australian Atomic Energy Commission to permit the entry of special radio-active materials, including calibrated reference sources, for use within that establishment. Nine shipments of static isotopes were also procured.

Bulk supplies of radio-isotopes for medical purposes are obtained regularly, and these are distributed by the Laboratory as individual doses for use on patients throughout Australia in accordance with a policy developed by the Committee on Radio-isotopes of the National Health and Medical Research Council. These radio-isotopes are issued free of charge.

Ten different radio-isotopes were imported in the year 1960-61 for medical purposes, iodine-131, phosphorus-32, chromium-51 and iron-59 being in greatest demand. The therapeutic use of colloidal gold-198 has decreased considerably in favour of the alternative use of colloidal chromic phosphate and colloidal zirconium phosphate. The demand for special compounds labelled with iodine-131 has been maintained.

In all, approximately 8,700 individual doses of radio-isotopes were issued by the Laboratory during 1960-61 for use on patients. The corresponding figure for 1959-60 was approximately 7,300.

During 1960-61, a radiochemical laboratory and associated equipment were set up in the Laboratory to permit the assay of radio-active material present in minute amounts in the environment, in particular, in foods and in biological material.

Investigations of the degree of protection necessary in particular applications of X-rays and radio-active materials continue to be an important activity of the Laboratory. It prepares specifications of the protection facilities necessary in departments and laboratories employing ionizing radiation in medicine, research and industry, and carries out measurements of radiation levels in existing departments and laboratories. A film-badge service to measure the radiation dose received by those exposed to ionizing radiation is maintained. In 1960-61, 26,238 film-badges were processed and assessed. The corresponding figure for 1959-60 was 21,351 films.

The Laboratory has an extensive library of radiological literature and issues library bulletins at appropriate intervals. Technical communications on topics related to its functions are issued from time to time to medical men engaged in the clinical investigation and treatment of cancer, to research workers, and to those in industry interested in applications of radiation.

Officers of the Laboratory serve on a number of committees, both national and international. The services of the Laboratory are available to all who work with ionizing radiation.

**7. The School of Public Health and Tropical Medicine.**—In March, 1930, the Commonwealth government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The School comprises sections of Preventive Medicine, Tropical Medicine, Occupational Health, Environmental Health, Biochemistry, Bacteriology and Pathology, Parasitology, Medical Entomology and Medical Statistics. The Child Welfare section of the Institute of Child Health is located at the School, with which it is closely associated. The Occupational Health Section undertakes surveillance of the health of persons employed at the Small Arms

Factory, Lithgow, and at the Munitions Filling Factory, St. Mary's. The library, which includes approximately 17,000 bound volumes and a large collection of official and institutional papers and reports, forms an important information centre in the subjects of public health and tropical medicine.

The work of the school comprises both teaching and investigation. Courses are held for the university post-graduate diploma in public health and the diploma in tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Courses are also provided in hygiene and social medicine for students of architecture and social studies, in tropical medicine for lay officers, nurses in tropical service, and missionaries, and in industrial health for engineering students. Training is also provided for certain personnel of the armed services, for laboratory workers from various services and institutions, and for post-graduate nursing diploma students.

Investigation covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out in Australia and in Papua, New Guinea, Norfolk Island and Nauru in co-operation with the local administrations and the South Pacific Commission. Limited accommodation and other facilities for investigation can be made available at the school for independent research workers.

**8. Institute of Child Health.**—Associated with the School of Public Health is the Institute of Child Health, part of which is located in the School of Public Health and Tropical Medicine in the grounds of the University of Sydney and part at the Royal Alexandra Hospital for Children, Camperdown. The activities of the Institute are concerned with research into medical and social problems of childhood, undergraduate teaching of students of the Faculty of Medicine in the University of Sydney, post-graduate teaching of doctors and members of associated professions, and collaboration with other bodies concerned with the general field of child health.

The director of the Institute is the Professor of Child Health in the University of Sydney. He is also a senior honorary paediatrician on the staff of the Children's Hospital.

The director is required to co-ordinate and control undergraduate and post-graduate teaching in paediatrics and child health. Each group of medical students attends the Children's Hospital for 10 weeks tuition in paediatrics and child health.

The particular research activities of the Institute vary with the immediate and long term problems which present themselves. Fields of study have included rheumatic fever, scurvy, accidents, prematurity, hypothyroidism and mental deficiency. Studies are undertaken into the problems of infants and children deprived of a normal home life.

Members of the Institute staff are available for consultation by Commonwealth and State authorities and voluntary agencies.

The establishment of the Institute at present consists of the director, two senior medical officers, one child psychiatrist, five other medical officers, a psychologist, a social worker and clerical and stenographic staff.

**9. Commonwealth Bureau of Dental Standards.**—This Bureau is concerned with research, standards, and testing, related to dental and allied materials and processes. It became part of the Department of Health in January, 1947, but for the preceding eight years it was sponsored by the National Health and Medical Research Council. During that time, the former Dental Materials Research Laboratory established itself as a recognized authority in its special field and proved to be of particular value to the defence services, government departments, the dental profession and manufacturers of dental products. By maintaining the quality of dental materials and improving techniques for their use, the Bureau continues to assist the dentist in his service to the community—a service that calls for restorations and appliances of a high degree of precision and permanence under very exacting conditions.

The functions of the Bureau are: (1) original research into dental equipment, materials, techniques and processes; (2) regular reporting of the results of these investigations in recognized Australian scientific journals; (3) the development of specifications for dental materials and equipment, through the Standards Association of Australia, in consultation with a committee representing the Commonwealth Department of Health, the Australian Dental Association, and manufacturers and distributors; and (4) the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials with a view to assisting them in the improvement of existing products and the development of new materials.

**10. The Australian Institute of Anatomy.**—The Australian Institute of Anatomy is situated in a building erected in Canberra by the Commonwealth Government under the Zoological Museum Agreement Act 1924. Prior to the passing of this Act,

the Commonwealth Government had expressed regret that the Australian nation possessed neither a collection of specimens of the unique and fast disappearing fauna of Australia, nor a museum in which such specimens could be preserved for future generations. Sir Colin MacKenzie, the first Director of the Institute of Anatomy, presented his entire private collection of Australian fauna to the Commonwealth Government. This gift was housed in the Institute. The Institute became part of the Commonwealth Department of Health in 1931.

The original collection has been greatly augmented. A list of gifts to the Australian nation may be found in Official Year Book No. 39, page 1277. In addition to these donations of material, there have been several endowments for orations and lectures, particulars of which are shown in previous issues of the Official Year Book.

The Institute consists of a museum section and a laboratory section. In the museum section, which is open to the public, a portion of the original collection of anatomical specimens assembled by Sir Colin MacKenzie is displayed, together with ethnological collections which have been added since the foundation of the Institute. The material has been arranged to present simple lessons in human hygiene, to display the anatomical features and peculiarities of Australian fauna, and to display aspects of the character of Australian aboriginals and natives of Papua and New Guinea.

A number of Health Department sections are now situated in the Institute. These include the Museum and Medical Artistry Section, the Nutrition Section, the Commonwealth Health Laboratory for the Australian Capital Territory, and a Veterinary Laboratory.

The scientific research work of the Institute is now concentrated on problems of nutrition. It takes the form of field surveys of the dietary status of the Australian population and laboratory investigations into the biochemistry of nutrition and metabolism.

#### § 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts with regard to the compulsory notification of infectious diseases, and the precautions to be taken against the spread thereof, may be conveniently dealt with under the heading of quarantine and notifiable diseases, including venereal diseases.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

(i) *Human Quarantine.* All passengers and crews arriving in Australia from overseas, whether by air or sea, are subjected to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports, full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague and typhus fever. These diseases are not endemic to Australia, and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever and measles are directed to appropriate care and placed in isolation where necessary.

The increasing use of air travel has created particular quarantine problems. Before the use of air transport, persons suffering from an infectious disease would show symptoms on arrival and before disembarkation. Passengers travelling by air, however, can arrive well within the incubation period, and they are, therefore, required to be vaccinated against smallpox before departure. Those from an area infected with cholera or yellow fever

are required to be inoculated, in addition, against the particular disease prevalent in that area. They are also required to report any sickness which they might suffer within the fourteen days after arrival. Passengers arriving in Australia by sea are also required to be vaccinated against smallpox, but exemption is granted to infants under twelve months of age, and to those who hold religious convictions against vaccination or who are suffering from a medical condition which makes vaccination undesirable. All passengers, whether they arrive by sea or air, are required to give their intended place of residence, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

The number of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of oversea vessels and aircraft calling at Australian ports during the year ended 30th June, 1961, and during the preceding four years, are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES ON OVERSEA VESSELS AND AIRCRAFT CALLING AT AUSTRALIAN PORTS, 1960-61.**

Disease.	Number of Oversea Vessels and Aircraft on which Cases were Found.	Number of Cases of Infectious Disease.	
		Passengers.	Crew.
Chicken Pox .. .. .	24	67	3
Infectious Hepatitis .. .. .	8	10	..
Measles .. .. .	31	179	1
Mumps .. .. .	16	29	..
Rubella .. .. .	5	8	..
Scarlet Fever .. .. .	1	1	..
Varicella .. .. .	1	2	..
<b>Total .. .. .</b>	<b>(a) 55</b>	<b>296</b>	<b>4</b>

(a) On some vessels there were cases of more than one disease.

**HUMAN QUARANTINE: OVERSEA VESSELS AND AIRCRAFT ARRIVING IN AUSTRALIA AND CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASE, FOUND THEREON.**

Year ended 30th June.	Number of Oversea Vessels and Aircraft Cleared.		Number of Oversea Vessels and Aircraft on which Cases were Found.	Number of Cases of Infectious Disease.	
	Ships.	Aircraft.		Passengers.	Crew.
1957 .. .. .	2,702	1,747	53	216	10
1958 .. .. .	2,658	1,881	61	202	20
1959 .. .. .	2,826	1,938	63	344	9
1960 .. .. .	3,046	2,063	61	234	12
1961 .. .. .	3,481	2,354	55	296	4

(ii) *Animal Quarantine.* Animal quarantine, authorized by the provisions of the Quarantine Act 1908-1961, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats and poultry are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention.

Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, special types of wool, skins and hides, are specially treated under quarantine control, while such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items, such as harness fittings, fodder, and ship's refuse, are treated to destroy any possible infection.

The Animal Quarantine Service is also responsible for the health certification of animals for export to overseas countries in accordance with their various requirements.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. Formerly, the full responsibility for this administration fell on the Director of Quarantine. The organization of the Division provides an excellent example of Commonwealth and State co-operation. The central administration is situated within the Health Department at Canberra, with a director, an assistant director, and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the quarantine control of imports, there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the "General" and "Plant" divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

In each alternate year, the director of the Division convenes the Biennial Conference of Principal Commonwealth and State Veterinarians, which meets under the auspices of the Australian Agricultural Council to discuss problems of animal health and disease control and animal quarantine.

(iii) *Plant Quarantine.* Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the Quarantine Act 1908-1961, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921, the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created, under a director who is responsible for policy and legislation and for co-ordinating the work of the State officers, who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or, if the treatment be impracticable, may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles. (a) The importation of plants likely to be infected with plant diseases, noxious fungi or poison plants is prohibited. (b) Agricultural seed must conform to standards of purity, insect pest and disease freedom. Some seeds are prohibited except with special permission of the Director of Quarantine, who specifies conditions of importation. (c) Many commodities such as hops, cotton, peanuts in shell, potatoes, certain crop seeds, vines and specified plants may be imported only by approved importers under special conditions. (d) Certain plant products such as bulbs and timber (in logs or sawn) from specified areas may be imported only if accompanied by certificates showing that prescribed treatment has been given in the country of origin.

(e) All nursery stock, including bulbs, must be grown in post-entry quarantine. Propagating material for commercial fruits, vines and berries are permitted importation only after being specially screened for virus diseases. It may only be imported by approved importers who are registered for this purpose. The numbers of plants which may be imported in any one year are limited.

3. Notifiable Diseases.—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the Health Acts of all States for the compulsory notification of certain infectious diseases and for the application of preventive measures. When any such disease occurs, the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts, and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from or to be carriers of infectious disease must submit to clinical and laboratory examination. Persons suffering from certain communicable diseases, for example, smallpox and leprosy, may be detained in isolation.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and Territory the diseases notifiable in 1960 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

**DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY OF AUSTRALIA AND NUMBER OF CASES REPORTED DURING 1960.**

(iii) *Venereal Diseases.* The prevention and control of venereal diseases is the responsibility of State Health Departments. The necessary powers for the purpose are provided either by a special Venereal Diseases Act or by a special section of the Health Act. These Acts make it obligatory upon the patient to report for and continue under treatment until certified as cured. Treatment of venereal disease must be by a registered medical practitioner. Facilities for treatment of venereal disease free of charge may be arranged at subsidized hospitals or at special clinics. Drugs and instruments required for the treatment of venereal disease may be sold only by a registered pharmaceutical chemist on the prescription of registered medical practitioners.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person, or the employment of an infected person in the manufacture or distribution of foodstuffs.

## § 5. Commonwealth Grants to Organizations Associated with Public Health.

1. *General.*—In addition to providing the services mentioned in §§ 1-4 above, the Commonwealth Government gives financial assistance to certain organizations associated with public health. Examples of organizations included in this category are the National Fitness Organizations, the Royal Flying Doctor Service of Australia, the Red Cross Blood Transfusion Service, and the Lady Gowrie Child Centres.

2. *National Fitness.*—In 1938, arising from a recommendation of the National Health and Medical Research Council, the Commonwealth Government appointed a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and Local Government authorities in the National Fitness Movement. Following the recommendations of the first Commonwealth Council meeting in 1939, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years, and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In June, 1942, this grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory.

The functions of autonomous National Fitness Councils operating in each State are connected with voluntary leader training, camping and hostels, assisting the work of voluntary youth and amateur sports organizations, and providing advisory services to these organizations.

The six State education departments spend their Commonwealth grants to assist the promotion of physical education programmes in schools and teachers' colleges. This is done mainly through the organization of training courses for teachers and the development of school camping, which in most States is part of the regular school physical education programme. In New South Wales and Victoria, holiday play centres and camps have become a special feature of the programmes, while Queensland has led the way in the provision of school swimming pools financed in co-operation with parent organizations.

In the universities, departments of physical education provide either a diploma course in physical education or a major course in physical education as part of a degree course.

An annual grant of £2,000 is allocated in the Australian Capital Territory, and is distributed on a £1 for £1 basis to youth and sports organizations for the purchase of equipment, the development of coaching schemes, and the extension of club and camp facilities.

**3. Royal Flying Doctor Service of Australia.**—The purpose of the Royal Flying Doctor Service of Australia is to provide medical and dental services to white and aboriginal persons in isolated areas. Most remote homesteads are equipped with two-way radio sets which they use for receiving ordinary radio programmes, participating in the School of the Air, and for contacting each other. In cases of minor illness or injury, they also use these sets to seek medical advice. If the illness or injury is serious, a doctor flies to the homestead and, if necessary, flies the patient to the nearest hospital. Standard medicine chests are supplied by the service. Each chest contains a first-aid book and instructions on the use of the various drugs and medical supplies in it. Further instructions are given by doctors over the air.

From time to time, special purpose work is undertaken in connexion with flood relief, searching for lost parties and co-ordinating cattle movements.

The service is not conducted with a view to profit. In some sections, small charges are made for particular services or a fixed annual charge is levied on graziers. Other sections rely on voluntary contributions from those who use their services. Donations and government contributions help to provide much of the overhead and capital expenditure incurred each year.

The Commonwealth has made an annual grant to this organization for operational expenses since 1936. Prior to that, from 1928 to 1931, the Commonwealth subsidized the Australian Inland Mission Aerial Medical Service. The Commonwealth annual grant to the Royal Flying Doctor Service of Australia towards maintenance was increased from £25,000 to £40,000 per annum for four years from 1st July, 1958. The Commonwealth grant towards capital expenditure was increased from £15,000 to £27,500 per annum for the same period. This capital expenditure grant is made on a £1 for £1 basis, in respect of approved projects.

The Royal Flying Doctor Service of Australia is conducted by a federal council comprising representatives of six sections, namely Queensland, New South Wales, Victoria, South Australia, Western Australia and the Eastern Goldfields of Western Australia. The Queensland, New South Wales and South Australian sections are centred in their own States but in Western Australia there are three centres, that in the far north being under the control of the Victorian section, and that in the south-east under the control of the Eastern Goldfields section. The third one, which has bases at Port Hedland and Meekatharra, is sponsored by the Western Australian section.

**4. Red Cross Blood Transfusion Service.**—The Australian Red Cross Society conducts a blood transfusion service in all States.

Before 1952–53, the cost of the Red Cross Blood Transfusion Service was borne by the Red Cross Society with assistance from the State Governments. In 1952, the Commonwealth made an amount of £50,000 available to the Red Cross Society through the State Governments. The States were to continue to assist the society at the same level as previously and make arrangements with the society to share any deficit still remaining.

The Commonwealth recognized that the proper maintenance of a blood transfusion service was of the utmost importance to the welfare of the community, and that the service was one eminently suited for operation by the Australian Red Cross Society. In March, 1954, therefore, the Commonwealth offered each State Government a grant equal to 30 per cent. of the certifiable operating expenses incurred by the Society in the conduct of the blood transfusion service in that State. The grant was to be made subject to the condition that the government of the State concerned agreed to meet 60 per cent. of the cost of operating the service in that State, leaving the society to meet the remaining 10 per cent. of the cost. All States accepted this proposal. The payments made by the Commonwealth government to the State governments in 1960–61 were as follows:—New South Wales, £41,800; Victoria, £49,994; Queensland, £28,182; South Australia, £17,535; Western Australia, £14,503; Tasmania, £5,520; Total, £157,534.

5. **Lady Gowrie Child Centres.**—In 1940, the Commonwealth Government established a pre-school demonstration centre in each of the six capital cities. These centres are known as the Lady Gowrie Child Centres and are administered by the Australian Pre-school Association for the Commonwealth Department of Health.

The specialized function of the centres is that of demonstration and research, and the programmes are carried out under the supervision of the Federal Pre-school Officer. Each centre is concerned with a study of the factors promoting and retarding physical and mental health in young children, and in demonstrating an educational health programme based on the developing needs of children aged 3 to 6 years.

The centres are used for observation by university students of Medicine, Psychology, Education, Social Studies, Architecture, Physical Education, Teacher Training Colleges, Nursing Colleges and Domestic Science.

Fuller information concerning these centres was given in earlier issues of the Year Book (see No. 44, p. 536).

### C. INSTITUTIONS.

#### § 1. General.

Institutions referred to in this section are classified into the following groups:—

- (i) Public (other than mental);
- (ii) Mental;
- (iii) Private;
- (iv) Repatriation;
- (v) Isolation (leper).

#### § 2. Public Hospitals (other than Mental Hospitals).

1. **General.**—The statistics shown under this heading refer to all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals, leper hospitals, and private hospitals conducted commercially. They include hospitals wholly provided for by the State, hospitals partially subsidized by the State or by State endowments but receiving also private aid, and hospitals established and endowed by individuals for the benefit of the needy generally. All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres, there are special hospitals for infectious diseases, tubercular patients, women, children, and patients suffering from chronic diseases.

The particulars given herein refer to public hospitals at the latest available date.

2. **Number, Staff and Accommodation.**—Details regarding the number of public hospitals, staff, and accommodation for the year 1959–60 are given in the following table.

**PUBLIC HOSPITALS: NUMBER, STAFF AND ACCOMMODATION, 1959–60.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

3. **In-Patients Treated.**—The following table furnishes particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital after their mothers' discharge.

## PUBLIC HOSPITALS: IN-PATIENTS TREATED, 1959-60.

<b>Average daily number resident ..</b>	17,644	8,808	7,961	2,683	2,913	1,809	309	196	42,323

In addition to those admitted to the hospitals, there are large numbers of out-patients treated. During 1959-60, there were 1,155,822 out-patients treated in New South Wales, 571,020 in Victoria, 576,191 in Queensland, 142,881 in South Australia, 124,000 (estimated) in Western Australia, 89,655 in Tasmania, 82,312 in the Northern Territory and 12,544 in the Australian Capital Territory, making an estimated total for Australia of 2,754,400. The figures quoted refer to cases, as distinct from persons and attendances.

4. Revenue and Expenditure.—Details of the revenue and expenditure for the year 1959-60 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme.

Revenue .. .. . £'000	71,612	82,182	87,692	90,512	98,976
Expenditure .. .. . £'000	74,568	83,922	86,817	90,157	97,987

(a) Partly estimated.

**§ 2. Mental Hospitals.**

1. General.—The methods of compiling statistics of mental patients are fairly uniform throughout the States, but there is an element of uncertainty about possible differences in diagnosis in the early stages of the disease. Statistics of mental hospitals (except those relating to revenue and expenditure) include particulars of the two licenced houses in New South Wales. The figures exclude those of reception houses and observation wards in gaols. There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

2. Hospitals, Staff and Accommodation.—Particulars regarding the number of hospitals, the medical and nursing staff, and accommodation are given in the following table for the year 1960. Figures for Victoria and Western Australia relate to 31st December, 1960. Figures for the other States relate to 30th June, 1960.

**MENTAL HOSPITALS: NUMBER, STAFF, ACCOMMODATION, 1960.**

<i>Persons</i> .. .. .	3.06	2.93	2.77	2.62	2.33	2.47	2.87

(a) Year ended 31st December, 1960.

(b) Includes persons treated at the Epileptic Home.

Persons who are well advanced towards recovery are allowed to leave the hospitals and live with their relatives or friends, but they are under supervision and their names are kept in the records. These persons have been included in the table above as patients at the end of the year.

4. Revenue and Expenditure, 1959-60.—Mental hospitals are maintained by the State Governments. They derive a small proportion of their revenue from other sources (chiefly patients' fees, pharmaceutical benefits and sale of farm produce), but in 1959-60 this source provided less than six per cent. of all their revenue. For a statement on the funds provided by the Commonwealth Government for mental hospitals, see para. 3, Mental Hospitals, page 671.

In New South Wales, the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals.

(a) Includes the Epileptic Home. (b) Capital expenditure includes purchases of land, cost of new buildings and additions to buildings.

5. Summary for Australia.—The following table gives a summary relating to mental hospitals in Australia for each of the years 1955-56 to 1959-60.

MENTAL HOSPITALS: SUMMARY, AUSTRALIA.

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Hospitals .. .. .	35	36	37	38	38
Medical Staff .. .. .	161	188	206	219	232
Nursing Staff and Attendants .. .. .	6,030	6,470	6,761	6,895	7,027
Beds .. .. .	30,089	30,617	31,587	32,025	32,026
Admissions .. .. .	7,524	8,276	9,244	9,477	8,854
Discharged as recovered, relieved, etc.	4,235	5,282	6,288	6,797	8,052
Deaths .. .. .	2,529	2,672	2,468	2,658	2,394
Patients at end of year .. .. .	32,453	32,775	33,521	33,543	31,951
Average daily number of patients resident .. .. .	28,639	29,032	29,323	29,553	29,276
Revenue (excluding Government Grants) .. .. .	£ 803,873	916,201	1,026,689	1,070,673	1,138,727
Total Expenditure £ .. .. .	£ 15,579,361	17,553,438	18,236,114	18,195,831	20,073,181

6. **Number of Mental Patients.**—The total number returned as under treatment at the end of each year from 1956 to 1959 showed a slight increase, but the proportion to total population showed a slight decline. In 1960, however, the number under treatment decreased and the proportion to total population showed a greater percentage decline. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, would not necessarily imply an increase in mental diseases. The difference between States in the number of patients in mental hospitals per 1,000 of population may to some extent be the result of differences in practice. Figures for Victoria and Western Australia relate to 31st December of the year shown; figures for the other States relate to 30th June of the year shown.

**PATIENTS IN MENTAL HOSPITALS.**

§ 4. Repatriation Hospitals.

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department, which provides a comprehensive service.

In-patient treatment is provided at Repatriation General Hospitals in each capital city, and at auxiliary hospitals in all States except Tasmania. "Anzac Hostels" are maintained in Queensland and Victoria for long-term patients. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

The average daily number of patients resident in Repatriation General Hospitals during the year ended 30th June, 1961, was 2,941.

### § 5. Leper Hospitals.

Isolation hospitals for the care and treatment of persons suffering from Hansen's disease (leprosy) are located at Little Bay, New South Wales; Fantome Island, North Queensland; Derby, Western Australia; and East Arm Settlement, Northern Territory. Special wards for the isolation of leprosy patients have been provided at Fairfield (Victoria) and Wooroloo (Western Australia). Peel Island (Queensland) Hospital was closed down on 5th August, 1959, the patients being transferred to the chronic diseases section of South Brisbane Hospital. At the end of 1961 there were eight cases at Little Bay, 12 at Fantome Island, six at South Brisbane Hospital, 169 at Derby, two at Wooroloo, 180 at East Arm Settlement and eight at Fairfield. Of the 385 cases, 317 were full-blood aboriginals, 38 were half-caste aboriginals, two were Pacific Islanders, one was an Asian and 27 were Europeans.

## CHAPTER XVIII.

### WELFARE SERVICES.

NOTE.—Further information on subjects dealt with in this chapter may be found in the annual *Bulletin Finance, Part I.—Public and Private Finance*. Current and summarized information is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

#### A. COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES.

##### § 1. Introduction.

The Welfare services outlined in this chapter are those administered by the Commonwealth Department of Social Services. Particulars of benefits provided under the National Health Service appear in Chapter XVII.—Public Health, page 670.

##### § 2. National Welfare Fund.

The National Welfare Fund was established by the National Welfare Fund Act 1943 to finance a scheme of national welfare. In introducing this measure to Parliament, the Prime Minister said that part of the scheme was to be introduced immediately, and part was to be deferred until after the end of the war. A certain balance, which would therefore accrue to the fund, would be invested in Commonwealth securities, and would thus provide finance for the war effort.

The fund operated from 1st July, 1943. At its commencement, it was used to finance funeral benefits and maternity allowances. Other social and health benefits were made a charge on the fund from time to time. At present, expenditure on all benefits except repatriation and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

For particulars of the income of the fund, see Chapter XXI, Public Finance, Division A, § 2, C., para. 6. The following table sets out expenditure from the fund during 1960–61.

(a) Payments for some Health Services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes special benefits to migrants in reception and training centres. (c) Includes payments to Bush Nursing Centres and the Royal Flying Doctor Service. (d) Paid to the State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (e) Includes costs of manufacturing B.C.G. Vaccine for distribution through Australia. (f) This item covers the cost of district laboratory services, the free supply of prophylactic materials and biological products (e.g., insulin, poliomyelitis and diphtheria prophylactics), the supply and maintenance of hearing aids for children, subsidies to voluntary organizations conducting home-nursing services, and certain costs associated with the blood transfusion services of the Australian Red Cross Society. (g) Includes £475,000 for the production of poliomyelitis vaccine, £115,422 for running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories, £78,014 for home-nursing services throughout Australia, and £23,000 for the production of smallpox vaccine.

Expenditure from the fund during each of the years 1956-57 to 1960-61 is shown in the following table. A graph showing expenditure from the fund from 1945-46 to 1960-61 is to be found on page 713.

### § 3. Capital and Administrative Expenditure.

Particulars of Commonwealth capital expenditure on mental hospitals and the Anti-Tuberculosis campaign are given in Chapter XVII., Public Health (*see* pages 671 and 674). Grants are made to private organizations for the construction of homes for elderly people (*see* para. 4, p. 712).

Information concerning the cost of administering each benefit separately is not compiled. Particulars of the cost of administering the Department of Health and the Department of Social Services may be found in Chapter XXI., Public Finance, Division A, § 2, C., para. 5.

## B. COMMONWEALTH SOCIAL SERVICES.

### § 1. Introduction.

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:—

“(xxiii) Invalid and old-age pensions:

(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:”.

The latter paragraph was inserted in the constitution after being accepted by the electors at a referendum on 28th September, 1946. The enabling Act was assented to on 19th December, 1946.

Before 1947, each social service benefit was paid under a separate Act. On 1st July, 1947, with the passage of the Social Services Consolidation Act 1947, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions and changed the title “old-age pension” to “age pension”. The word “Consolidation” was dropped from the short title of the Act in 1954. The Act is at present styled the Social Services Act 1947–1961.

The social service benefits provided by the Commonwealth Government, and the date on which each came into operation, are:—

Age pension .. .. .	..	1st July, 1909
Child endowment (for other than first child) ..	..	1st July, 1941
Child endowment (for first child) ..	..	20th June, 1950
Commonwealth Rehabilitation Service ..	..	10th December, 1948
Funeral benefit .. .. .	..	1st July, 1943
Invalid pension .. .. .	..	15th December, 1910
Maternity allowance .. .. .	..	10th October, 1912
Sickness benefit .. .. .	..	1st July, 1945
Special benefit .. .. .	..	1st July, 1945
Supplementary assistance (age, invalid and widow's pensions) .. .. .	..	15th October, 1958
Unemployment benefit .. .. .	..	1st July, 1945
Widow's pension .. .. .	..	30th June, 1942.

### § 2. Age and Invalid Pensions.

Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who are British subjects and who have resided in Australia continuously for at least 20 years, which need not be immediately prior to the date of claim for a pension. Absence in a Territory of the Commonwealth, any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances including, in the case of a claimant who has had at least 18 years' residence, occasional absences aggregating up to 2 years plus 6 months for every year of residence in excess of 18 years, are counted as residence. Residence in New Zealand or the United Kingdom counts as residence in Australia.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years (including certain absences), and who are permanently incapacitated for work to the extent of at least 85 per cent., or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a total of 20 years' residence is necessary. Certain absences count as residence, and residence in New Zealand or the United Kingdom counts as residence in Australia.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for age and invalid pensions on the same conditions as other members of the community.

A pension is not payable to:—an alien; a person who has deprived himself of property or income in order to qualify for a pension; a person whose annual rate of income is £455 per annum (£910 per annum for a married couple) or more; a person who owns property apart from his permanent home and other exempt property, valued at £4,750 or more (£9,500 for a married couple). A pensioner with dependent children may, in certain circumstances, have additional income of 10 shillings a week for each child under 16 years of age.

Since 5th October, 1961, the maximum rate of pension has been £273 per annum (£5 5s. a week). The wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) may be granted a wife's allowance of not more than £123 10s. per annum (£2 7s. 6d. a week). A child's allowance of £39 per annum (15s. a week) is also paid to an invalid pensioner for the first child under 16 years of age. The pension is increased, subject to the means test, by £26 per annum (10s. a week) for each other child under 16 years. Supplementary assistance of £26 per annum (10s. a week) is payable to single pensioners and to married pensioners whose spouses do not receive pension or allowance, if the pensioner pays rent and is considered to be entirely dependent on his pension. At 30th June, 1961, 505,338 age pensioners (90 per cent. of all age pensioners) and 82,653 invalid pensioners (93 per cent. of all invalid pensioners) were receiving the maximum pension (£260 at that date).

If a pensioner is an inmate of a benevolent home, £1 17s. a week of his pension is paid to him. The rest is paid to the home for his maintenance, except where he is a patient in an infirmary ward.

Age and invalid pensions (other than invalid pensions paid to blind persons) and allowances paid to wives of invalid pensioners (but not the child's allowance of 15s. a week) are subject to a means test which applies to income and to property. From March, 1961, the means tests previously applied separately on income and property were merged into one composite means test. The pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to £1 for each complete £10 of his net property above £200. A person's *means as assessed* may consist entirely of income, entirely of property component, or of various combinations of income and property component. The pension payable is calculated by deducting from the maximum annual rate of pension the amount by which the *means as assessed* exceeds £182. No pension is payable if the pensioner's property is £4,750 or more.

Certain types of income are excepted. The main exceptions are:—income from property; gifts or allowances from children, parents, brothers or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organizations.

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to £750) of life insurance policies, the capital value of annuities or contingent interests and the value of any reversionary interests.

For the purposes of the means test, the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances. The pension is then assessed as for a single pensioner.

The following statement shows the rates of pension at 1st July, 1909, and the rates as they have been varied since that date, subject in all cases to income and property qualifications.

(a) Excludes amounts payable for wives and children of invalid pensioners and supplementary assistance. (b) Additional pension of £6 10s. per annum (2s. 6d. a week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. a week were paid additional pension of 2s. 6d. less the amount of income. (c) Variation according to change in retail price index number. (d) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942. (e) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulations 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index numbers was repealed on 6th April, 1944.

The number of age pensioners at 30th June, 1961 was 562,790 of whom 177,271 (or 31 per cent.) were males and 385,519 (or 69 per cent.) were females. This was an increase of 24,768 for the year.

During 1960–61, 71,351 age pension claims were granted and 47,727 pensions expired through cancellations and deaths. Of these, deaths accounted for 34,757.

The recorded ages of the 71,351 persons (26,918 males and 44,433 females) to whom age pensions were granted during the year 1960–61 varied considerably, ranging from 10,240 at age 60 to 11 who were over 97; 47,883 were in the 60–69 age-group. The conjugal condition of the new pensioners was as follows:—Males—single and divorced, 3,072; married, 19,513; and widowed, 4,333; Females—single and divorced, 6,946; married, 23,290; and widowed, 14,197.

The number of invalid pensioners at 30th June, 1961, was 88,642 of whom 47,204 (or 53 per cent.) were males and 41,438 (or 47 per cent.) were females. During 1960–61, 16,838 invalid pension claims were granted, 7,104 pensions ceased through cancellation or death, and 1,304 invalid pensioners were transferred to the age pension list.

The recorded ages of the 16,838 persons (10,107 males and 6,731 females) to whom invalid pensions were granted during 1960–61 varied widely, 1,592 (10 per cent.) were in the 16–19 years age-group, 2,839 (17 per cent.) were in the 20–44 years age-group, 8,150 (48 per cent.) were in the 45–59 years age-group, 3,537 (21 per cent.) were in the 60–64 years age-group, and 720 (4 per cent.) were over 65 years of age.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—males—single, 3,418; married, 6,008; and widowed, 681; females—single, 2,558; married, 3,253; and widowed, 920.

## AGE AND INVALID PENSIONS, 30th JUNE, 1961.

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes age and invalid pensioners in benevolent homes. (c) Includes allowances and supplementary assistance. (d) Excludes age pensioners in benevolent homes. (e) Excludes invalid pensioners in benevolent homes. (f) On 30th June, 1958, 15,205 invalid pensioners in New South Wales were transferred to their correct designation of age pensioners. (g) On 30th June, 1960, a number of invalid pensioners were transferred to their correct designation of age pensioners as follows:—Victoria, 4,843; Queensland, 4,908; and Western Australia, 486.

## § 3. Child Endowment.

A person who is resident in Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates, shall be qualified to receive an endowment in respect of each child under 16. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the mother and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia.

Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas. Endowment is payable to aboriginal natives unless they are nomadic or primitive.

From 1st July, 1941, the rate of endowment was 5s. a week for each child in excess of one in a family, and for each child under 16 in an approved institution. The rate was increased to 7s. 6d. a week in June, 1945, and to 10s. a week in November, 1948. Since June, 1950, the rates of endowment have been 5s. a week for the first child in a family, 10s. a week for each other child in a family, and 10s. a week for each child in an institution.

The number of families receiving child endowment at 30th June, 1961, was 1,501,180, an increase of 24,345 or 1.6 per cent. during the year. The following table shows, for each State and Territory, the number of claims for child endowment in force and the number of endowed children at 30th June, 1961.

**CHILD ENDOWMENT: CLAIMS AND ENDOWED CHILDREN, 30th JUNE, 1961.**

<b>Total .. ..</b>	<b>66,628,510</b>	<b>704,002</b>	<b>67,332,512</b>	<b>74,302,614</b>

The following table shows, for Australia, the number of claims, the number of endowed children and the annual liability at 30th June for each of the years from 1957 to 1961 and the actual expenditure for the years 1956-57 to 1960-61.

## CHILD ENDOWMENT SUMMARY: AUSTRALIA.

At 30th June—	Family Group Claims.	Institutions.	Endowed Children.	Annual Liability for Endowment. (a)	Total Payments. (a) (b)
				£	£
1957 .. ..	1,378,169	397	2,978,191	59,516,769	57,036,962
1958 .. ..	1,415,378	415	3,073,945	61,522,656	58,733,561
1959 .. ..	1,451,516	421	3,171,823	63,597,690	(c) 67,539,615
1960 .. ..	1,476,835	443	3,252,413	65,363,883	62,531,977
1961 .. ..	1,501,180	465	3,340,302	67,332,512	(d) 74,302,614

(a) A number of endowments are paid every twelve weeks. During two years out of every three, there are four such payments, but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments. (b) Year ended 30th June. (c) Expenditure for this year includes five twelve weekly payments. (d) Endowment payable on 4th July, 1961, to the credit of bank accounts and in cash at post offices was brought to account in 1960-61.

## § 4. Commonwealth Rehabilitation Service.

The Commonwealth Rehabilitation Service has been set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances and persons aged 14 or 15 who, without treatment and training, would be likely to qualify for

an invalid pension on reaching the age of 16 years. Other persons may participate in the scheme upon reimbursement of the cost of treatment and training. During treatment, payment of pension or benefit continues. When vocational training begins, the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of £1 10s. a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, this is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner, the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing not more than £40. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced in employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

The numbers of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1960-61 are shown in the following table.

COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1960-61.

Type.	Examined.	Accepted.	Completed Training.	Placed in Employment.	
				After Training.	Without Training.
Invalid pensioners .. ..	12,289	247	98	79	77

<b>Total .. ..</b>	<b>21,382</b>	<b>1,402</b>	<b>353</b>	<b>326</b>	<b>744</b>

§ 5. Funeral Benefits.

A funeral benefit of up to £10 is payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

The following table shows the number of funeral benefits which were paid in each State and Territory for the years 1956-57 to 1960-61.

## FUNERAL BENEFITS GRANTED: AUSTRALIA.

## § 6. Maternity Allowances.

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth hospital benefits scheme. They are not subject to a means test.

The allowance is £15 if the mother has no other children, £16 if she has one or two other children and £17 10s. if she has three or more other children under the age of 16 years. The amount is increased by £5 for each additional child born at a birth. An advance payment of £10 on account of a maternity allowance may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least 5½ months.

A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia, is temporarily abroad, or is on board a ship proceeding from a port in Australia or an Australian Territory to another port in Australia or another Australian Territory, or on board a ship proceeding to Australia, provided she receives no maternity benefit from the country from which she came. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia. Aboriginal natives, other than those who are nomadic or primitive, are eligible for maternity allowances on the same conditions as other members of the community.

The following table gives details of the amount paid in each State for the years 1956-57 to 1960-61.

## MATERNITY ALLOWANCES: AMOUNT PAID IN EACH STATE.

**§ 7. Unemployment, Sickness and Special Benefits.**

Unemployment and sickness benefits are paid to men over 16 and under 65 years of age, and women over 16 and under 60 years of age who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the Repatriation Act, or a tuberculosis allowance is ineligible to receive a benefit.

To qualify for an unemployment benefit, a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary.

To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases, a married woman may qualify for an unemployment benefit in her own right.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for these benefits on the same conditions as other members of the community.

Rates of benefit were increased as from 21st September, 1961, and again as from 1st March, 1962. The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 1st March, 1962, have been as follows.

Age and Marital Status of Claimant.	Maximum Weekly Rates.	Permissible Weekly Income.
	£ s. d.	£ s. d.
Unmarried person under 18 years of age .. .. .	1 15 0	1 0 0
Unmarried person 18-20 years of age .. .. .	2 7 6	1 0 0
All others .. .. .	4 2 6	2 0 0

An additional benefit of £3 a week may be paid for a dependent spouse and 15s. a week for each dependent child under 16 years of age if resident in Australia. Prior to March, 1962, additional benefit was paid for only one dependent child under 16 years. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under 16 years of age in his care. It may be granted only if no such benefit is payable for his wife and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the table above. For unemployment benefit purposes, the incomes of the claimant and his spouse are taken into account, unless they are permanently separated. For sickness benefit purposes, the income of the claimant only is taken into account, while any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. "Income" does not include child endowment, or other payments for children, Commonwealth hospital and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses paid. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable. Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth Rehabilitation Service under the same conditions as invalid pensioners.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, if because of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Special benefits are also paid to migrants who are in reception centres and are awaiting their first placement in employment in Australia. During this time, they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

During the year 1960-61, special benefits were granted to 10,073 migrants at a cost of £71,203.

The following table shows the number admitted to benefit during 1960-61, the number of persons on benefit at 30th June, 1961, and the amount paid for each benefit during 1960-61.

UNEMPLOYMENT, SICKNESS AND SPECIAL BENEFITS, 1960-61.

(a) Includes migrants in reception and training centres.

(b) Includes payments to migrants in reception and training centres.

## § 8. Widows' Pensions.

Widows' pensions are payable to the following classes of women. The rates shown have been in operation since 10th October, 1961.

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years—£286 per annum (£5 10s. a week) plus £39 per annum (15s. a week) for each child after the first in her custody, care and control.

Class "B"—A widow who has no children under 16 years of age in her custody, care and control, and who is not less than 50 years of age or who, after having attained the age of 45 years, ceased to receive a Class "A" widow's pension because she no longer had the custody, care and control of a child—£240 10s. per annum (£4 12s. 6d. a week).

Class "C"—A widow who is under 50 years of age and has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband—£4 12s. 6d. a week for not more than 26 weeks. If at the time of her husband's death the widow is pregnant, this period will be extended until the child's birth. She may then become eligible for a Class "A" widow's pension.

Widow pensioners may receive supplementary assistance of £26 per annum (10s. a week) if they pay rent and are considered to be dependent entirely on their pensions.

For classes "A" and "B", the term "widow" includes a deserted wife, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain "dependent females" may qualify for "A" "B" or "C" Class pensions.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences count as residence.

A widow's pension is not payable to an alien, a woman receiving an age or invalid pension, a tuberculosis allowance, or a war widow's pension, a woman who has deprived herself of property or income in order to qualify for a pension, or a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband. Aboriginal natives, other than those who are nomadic or primitive, are eligible for widows' pensions on the same conditions as other members of the community.

Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to £1 for every complete £10 by which the value of her property is in excess of a stipulated sum. In the case of a Class "B" widow, £200 of property is exempt. A Class "A" widow has a basic exemption of £1,000 when the value of her property exceeds £2,250, but no property component is calculated where she has property of no more than £2,250 in value. A Class "A" pension is not payable where a widow has property valued at £5,680 or more; no Class "B" pension is payable where property is £4,430 or more. There is no specific means test for the Class "C" pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions.

The pension payable to a Class "A" widow may be continued until her child reaches the age of 18 years if the child continues with full-time education at a school or university, is still dependent on the widow and is not in employment.

The number of widows' pensions by class, current at 30th June, 1961, was as follows:—Class "A", 24,491; Class "B", 30,830; Class "C", 115; total, 55,436.

The amount paid in pensions during 1960-61 was £13,468,519. The following table shows details of widows' pensions paid in each State and Territory in the year 1960-61.

## WIDOWS' PENSIONS AT 30th JUNE, 1961.

(a) Included in figures for State in which pensioner is permanently domiciled.

## § 9. Reciprocal Agreements with Other Countries.

1. **New Zealand.**—An agreement between the governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

2. **United Kingdom.**—A new reciprocal agreement on social services between the United Kingdom and Australia came into operation on 1st April, 1958, replacing the original agreement which operated from 7th January, 1954.

Under this agreement, residence in one country now counts as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to the United Kingdom for permanent residence are treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

## C. OTHER SERVICES.

## § 1. Benevolent Homes.

1. **General.**—Numerous establishments exist for the housing and protection of persons no longer able to provide for themselves. These homes are supported by government and municipal aid, public subscriptions, bequests, etc. In many cases, relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation of all forms of charitable aid provided by benevolent institutions is difficult because these services differ considerably.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (see No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1959–60 are given in the following table.

## BENEVOLENT HOMES: REVENUE AND EXPENDITURE, 1959–60.

(a) These figures relate to the three State hospitals and homes only. (b) Includes Commonwealth hospital benefits and age and invalid pension receipts. (c) Includes such items as purchase of land, cost of new buildings and additions to buildings.

4. **The Aged Persons Homes Act.**—The Aged Persons Homes Act, which operated from 16th December, 1954, was amended in October, 1957. The purpose of the Act is to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under this Act an organization must be—

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

# COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES

1945-46 TO 1960-61

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a £2 for £1 basis with money raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the money expended and the money presently available for expenditure by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home. Expenditure by the Commonwealth Government was £397,994 in 1955-56, £751,136 in 1956-57, £837,895 in 1957-58, £1,767,470 in 1958-59, £1,871,748 in 1959-60 and £2,153,551 in 1960-61.

## § 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, some being placed in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases, employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Children under Government Authority.**—The following table shows the expenditure by State Departments during 1959-60 in connexion with children under their control or supervision. In addition to neglected children, the figures refer to uncontrollable and convicted children who are wards of a government authority, as well as poor children whose parents obtain assistance from the government without giving up the legal right of custody.

<i>Net Cost to State</i>	<i>1,992,271</i>	<i>1,229,798</i>	<i>527,466</i>	<i>344,590</i>	<i>238,887</i>	<i>88,790</i>	<i>4,421,802</i>

(a) Year ended 31st December, 1960.

The total expenditure on children's relief in the foregoing table shows considerable variation between the States, owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania, large amounts have been excluded from the total expenditure on this account, owing to the difficulty of obtaining separate particulars for allowances made in respect of the dependent children only.

### § 3. Protection of Aborigines.

For the protection of the aboriginal Australian race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1960–61 was as follows (figures in brackets are for the year 1959–60):—New South Wales, £250,658 (£239,541); Victoria, £25,000 (£25,000); Queensland, £770,013 (£695,773); South Australia, £428,021 (£357,169); Western Australia, £762,294 (£636,224); Northern Territory, £965,227 (£979,984); Australian Capital Territory, £5,485 (£5,102); Australia, £3,206,698 (£2,938,793).

### § 4. Lifesaving.

There are two life saving organizations in Australia, the Royal Life Saving Society—Australia, and the Surf Life Saving Association of Australia.

The objects of these organizations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organizations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and lifesaving.

The Royal Life Saving Society operates at lakes, rivers, bay and harbour beaches, and gives instruction to school pupils and members of other bodies throughout Australia except on surf beaches. The Surf Life Saving Association patrols surf beaches.

Numerous certificates and medallions of proficiency in various grades are awarded.

### § 5. Royal Humane Society.

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age.

### § 6. The Order of St. John.

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

Members of the St. John Ambulance Association teach first aid, home nursing, hygiene and child welfare.

Members of the St. John Ambulance Brigade provide first aid at public functions.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of the order.

The Order of St. John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Lifesaving Medal is awarded by the Order as warranted.

### § 7. Other Charitable Institutions.

Owing to the variety of names and functions of other charitable institutions, it has been found impracticable to give detailed particulars. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bushfire, flood and mining accident relief funds.

## CHAPTER XIX.

## LOCAL GOVERNMENT.

## § 1. Introduction.

1. **Local Government Authorities.**—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the construction and maintenance of roads, streets and bridges, water, sewerage and drainage systems, and health and sanitary services, the supervision of building, and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas, and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 903, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, towns and shires;\* and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g., the county councils. Within shires, there are also some municipal units known as urban areas. Apart from the more thinly populated parts of New South Wales and South Australia, and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

2. **Semi-Governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g., roads and bridges, water and sewerage, electricity and irrigation, harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, harbours, and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a government department whose duties relate to the construction, reconstruction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the government or by the central road authority do not properly come under the heading of "Local Government", they have been included in this chapter for the

---

\* Commencing 1st July, 1961—formerly known as cities, municipalities and road districts.

sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure of the various local governing bodies in respect of roads under their control, the details of receipts and expenditure given in § 4 are those of central governments only, relating either to the supervisory board or commission in the State or to direct activities of a department. However, estimates of the aggregate net expenditure of all public authorities concerned with roads and bridges in Australia are given in paragraph 10 of that section. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special boards, while in Adelaide and Perth these services are under the direct supervision of government departments. In most of the other cities and towns, the municipal councils or, in some cases, water trusts, are the controlling bodies, which either construct the works out of their own resources or take them over after they have been constructed by the government.

5. **Harbours.**—The majority of the harbours in Australia are managed by boards, the members of which are either elected by persons interested, or appointed by the government. In some instances, however, they are directly controlled by the government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by boards. These boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the government. Occasionally, volunteer or country fire brigades are represented.

7. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services, and electricity and gas undertakings, which are not dealt with in this chapter except to the extent that they are represented in the finances as shown in the following section. Chapter XIV., Transport and Communication, contains information on municipal transport services, and Chapter VII., Electric Power Generation and Distribution, deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter VI., Manufacturing Industry.

## § 2. Local Government Authorities.

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1959, the area incorporated was 272,000 square miles, or nearly nine-tenths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. At 31st December, 1959, there were 54 county councils, including the Sydney County Council.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres) off Port Fairy, and Tower Hill (1,460 acres) adjacent to the Borough of Kororoit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. Western Australia.—Local government is established throughout the State, the divisions since 1st July, 1961, being cities, towns and shires (formerly cities, municipalities and road districts).

6. Tasmania.—The whole State is divided into municipal districts, Hobart and Launceston being incorporated as cities under separate Acts.

7. Area, Population, Dwellings and Value of Ratable Property.—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown for the year 1959-60 in the following table. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1954 Census, and are compiled from information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide meaning and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include "week-end" and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

8. Finances.—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the year 1959-60, except for New South Wales, where they relate to the year 1959.

For further detail on local government finances see *Finance, Part I.—Public and Private Finance*, Bulletin No. 52, 1960-61, issued by this Bureau.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1959-60 in the following tables, the proceeds from loans and expenditure thereof have been excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

### § 3. Local and Semi-Governmental Authorities' Debt.

1. **General.**—Statistics of local and semi-governmental debt for the years 1955–56 to 1959–60 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services.

*New South Wales.* Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

*Victoria.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

*Queensland.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Fire Brigades, University, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

*South Australia.* Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

*Western Australia.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Housing and University of Western Australia.

*Tasmania.* Harbours, Electricity Supply, Fire Brigades, Transport, and Housing.

A detailed list of the authorities included is shown in *Finance, Part I.—Public and Private Finance, Bulletin No. 52, 1960–61.*

2. **Local and Semi-Governmental Authorities' Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local and semi-governmental authorities for the year ended 30th June, 1960. For greater detail, see *Finance, Part I.—Public and Private Finance, Bulletin No. 52, 1960–61.*

Annual Interest Payable(a) ..	(c)	28,112	4,511	6,272	2,821	4,274	(c)

(a) Includes debt or interest payable in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of \$4.8665 to £1.  
 (b) Included in debt figures above. (c) Not available.

In this and the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised from the public to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts, and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1955-56 to 1959-60.

## § 4. Roads and Bridges.

1. Commonwealth Government Grants.—The following table shows the allocation to the States under the several Commonwealth Aid Roads Acts, for road construction, maintenance, repair and other works connected with transport for each of the years 1956–57 to 1960–61, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for each of the years 1956–57 to 1958–59. After 1st July, 1959, when the Commonwealth Aid Roads Act 1959 came into operation, the Commonwealth made separate provision for expenditure on strategic roads and the promotion of road safety practices. See also Chapter XXI.—Public Finance, and *Finance* bulletins.

(a) In the years prior to 1959–60, allocations under the Commonwealth Aid Roads Act 1954–56 for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practices.

2. New South Wales.—(i) *General.* A central road authority, known as the Main Roads Board, was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads of the State and to administer government subsidies for works on those roads. In 1932, the Main Roads administration was reorganized as a separate department under the control of a Commissioner. The activities of the Department of Main Roads embrace works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and certain associated works, principally bridges and vehicular ferries, constructed from government funds. The Department of Main Roads co-operates with the municipal and shire councils in the work of constructing and maintaining the main roads system.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration the representations made by the councils concerned, availability of funds for construction and maintenance purposes, and the value of the roads as connecting links between centres of population or business. The classes of main roads are (i) the State highways, which form the principal avenues of road communication throughout the State and connect with similar avenues in other States; (ii) trunk roads, which, with the State highways, form the framework of a general system of intercommunication throughout the State; (iii) ordinary main roads, which provide a network of roads connecting towns and important centres of population with the State highways and trunk roads and with each other. In addition to the main roads, there are also (i) secondary roads (in the County of Cumberland), which carry a substantial volume of through traffic and thereby relieve neighbouring main roads of traffic and (ii) developmental roads, which help to develop country districts.

In the County of Cumberland, which for the purposes of the Main Roads Act is deemed to include the City of Blue Mountains and small sections of other councils' areas on the boundary of the County of Cumberland, the full cost of road and bridge construction is paid from the funds of the Department of Main Roads. The Councils contribute towards the cost at the rate of  $\frac{1}{4}$ d. in the £ on the unimproved value of ratable property. The rate payable in respect of lands used principally for primary production is one-half the rate levied on other lands. In country districts, the Department meets the full cost of road and bridge works on State highways, the full cost of bridge works and three-quarters of the cost of road works on trunk roads, and three-quarters of the cost of bridge works and two-thirds of the cost of road works on ordinary main roads. The cost of constructing developmental roads and works is borne in full by the Department of Main Roads, but local Councils are required to maintain them in a satisfactory condition. The Department of Main Roads meets half the cost of works on secondary roads.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The total length of proclaimed roads in New South Wales at 30th June, 1961, was 25,364 miles classified as:—State highways, 6,497 miles; trunk roads, 4,162 miles; ordinary main roads, 11,651 miles; secondary roads,

92 miles; and developmental roads, 2,962 miles. The length of proclaimed main roads was altered slightly because of the proclamation and re-routing of short lengths of road.

During 1960–61, 244 miles of new development roads were proclaimed and 149 miles were removed from the list of proclaimed developmental roads.

The length of main and secondary roads maintained by the Department of Main Roads at 30th June, 1961, was 5,085 miles (23 per cent.), while the length maintained by councils was 17,317 miles (77 per cent.). The proportions of main roads maintained by the Department and councils respectively were:—State highways, 62 per cent., 38 per cent; trunk and ordinary main roads, 7 per cent., 93 per cent. Secondary roads were maintained wholly by councils. In the County of Cumberland (the metropolis and adjoining areas), the Department maintained 56 per cent. of the roads (528 miles).

(b) *Surface of Roads.* In 1960, the total length of all roads in New South Wales was estimated at 129,752 miles. The lengths of roads, according to their surface, were as follows:—bitumen or concrete, 18,476 miles; gravel or stone, 46,775 miles; formed only, 26,966 miles; cleared only, 37,535 miles.

(iii) *Main Roads Department. (a) General.* Progress has continued with the implementation of the Department's plan for main roads development in the County of Cumberland. Most of the Department's proposals have been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the Local Government (Amendment) Act 1951.

The Department's proposals for the development of the main roads system in Newcastle and the surrounding districts have been largely incorporated in the Northumberland County District Planning Scheme, and some sections of the system have been constructed.

With some modifications, the Department's proposals for the planning of the main roads in the Wollongong-Port Kembla district have been incorporated in the planning scheme prepared by the Illawarra Planning Authority.

During 1960–61, 50 new bridges were constructed. In addition, 63 concrete box culverts each having a waterway width of 20 feet or more were completed. Major bridge works under construction include steel and/or concrete bridges over the Cook's River at Tempe on the Prince's Highway (length 300 feet); over the Hastings River near Blackman's Point on the Pacific Highway (length 1,535 feet); over Ironbark Creek at Hexham (duplicate bridges each 320 feet long); over the Richmond River at Lismore (688 feet); over the Parramatta River at Gladesville (1,900 feet); over the Parramatta River at Silverwater (652 feet); over the Lane Cove River at Fig Tree (749 feet); over the Darling River at Tilpa (407 feet); and over the Hunter River at Maitland (Belmore Bridge, 643 feet).

(b) *Revenue and Expenditure.* The funds of the Department of Main Roads are derived principally from (1) motor vehicle taxation; (2) charges on heavy commercial goods vehicles under the Road Maintenance (Contribution) Act 1958; (3) grants under Commonwealth Aid Roads Acts (*see* para. 1 above and Chapter XXI.—Public Finance); (4) other grants from the State or Commonwealth Governments; and (5) proceeds of a levy on municipal and shire councils in the Country of Cumberland in accordance with the Main Roads Act 1924–1958. The State Government also makes repayable advances for Main Roads Department works.

Revenue and expenditure for the five years 1956–57 to 1960–61 are shown below.

(a) Excludes repayable advances by the State Government (£448,073 in 1956-57, £150,000 in 1957-58, £800,000 in 1959-60 and £575,000 in 1960-61) and transfer from Sydney Harbour Bridge Account for Expressway construction (£100,000 in 1958-59, £362,000 in 1959-60, and £768,000 in 1960-61). Expenditure from these amounts is fully reflected in Expenditure. (b) Excludes debt redemption £38,677 in 1956-57, £39,966 in 1957-58, £340,790 in 1958-59, £45,981 in 1959-60, and £448,816 in 1960-61. (c) Mainly purchase of assets not subject to annual depreciation charge. The purchase of other assets is omitted here because the depreciation charge for them is reflected each year in "Roads and Bridges".

The figures shown above represent the aggregate revenue and expenditure of five funds—the County of Cumberland Main Roads General and Special Purposes Funds, the Country Main Roads General and Special Purposes Funds, and the Developmental Roads Fund.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway of eight traffic lanes and two railway tracks, and there is also a footway on each side. The capital cost of the bridge and associated roadways to 30th June, 1961, was £11,786,864, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £10,100,000, is repayable from toll income. The accumulated surpluses of the Bridge Account have been used to make transfers to a Reserve Account (£2,405,000) and from 1958-59 to 1960-61 to convert tram tracks to roadway (£759,879) and construct expressways (£685,000). The Account showed a deficiency of £590,274 at 30th June, 1961. In 1960-61, income amounted to £1,654,000, including road tolls, £1,470,760, railway passenger tolls, £141,149 and omnibus passenger tolls, £16,125. Expenditure amounted to £1,529,000, including interest, exchange, flotation expenses, etc., £883,530, sinking fund, £164,520, maintenance £252,900, and major improvements £24,778. Expenditure from accumulated surpluses on major improvements amounted to £765,748 in 1960-61, including £95,000 from the Harbour Bridge Reserve Account. During 1960-61, 28,387,000 road vehicles (excluding omnibuses and exempt vehicles), 25,097,000 rail travellers and 14,706,000 omnibus travellers crossed the bridge, contributing respectively 90 per cent., 9 per cent., and 1 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State, the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

Following the preparation by the Melbourne and Metropolitan Board of Works of a Planning Scheme for the metropolitan area of Melbourne, and the appreciation of the general principle that where practicable it is desirable for the responsibility for the implementation of planning scheme proposals to be with the Planning Authority, the Melbourne and Metropolitan Board of Works Act was amended in June, 1956, making the Melbourne and Metropolitan Board of Works responsible for the construction and maintenance of such metropolitan highways and bridges as are declared for this purpose.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Victoria at 30th June, 1961, was 14,512 miles, classified as follows:—State highways, 4,502 miles; main roads, 9,111 miles; by-pass roads, 9 miles; tourist roads, 426 miles; forest roads, 464 miles. The length of the surface treated (black) or higher type of pavements included in the foregoing mileage was 11,012 miles or 76 per cent. of the total.

(b) *Surface of Roads.* It is estimated that, in addition to the 14,512 miles of classified roads as above, there were approximately 87,000 miles of unclassified roads at 30th June, 1961. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1960) provides the following information:—bitumen or concrete, 19,426 miles; gravel or stone, 32,392 miles; formed only, 23,443 miles; cleared only, 26,190 miles; total, 101,451 miles.

(iii) *Country Roads Board.* (a) *General.* During 1960–61, 1,887 miles of declared roads under the Board's control were treated with bitumen. In addition, 797 miles of undeclared roads, for which the Board contributed funds, were similarly treated. The total length of bitumen treatment carried out in 1960–61 was 2,783 miles (including 99 miles for other authorities). Of the work on the roads under the Board's control in 1960–61, 746 miles related to State highways and by-pass roads.

During 1960–61, 211 bridge projects with a total value of £1,724,000 were initiated. Of these, 136, costing £864,000, were under municipal supervision.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the Commonwealth Aid Roads Acts, road charges under the Commercial Goods Vehicles Act and repayments by municipalities. In addition, loans have been authorized from time to time under the Country Roads Acts for permanent works on main and developmental roads, State highways, tourists' roads and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1961, loan receipts and payments each amounted to £283,000, and expenditure included £966 for restoration of flood and bush fire damage. The total loan expenditure to 30th June, 1961, was £14,670,183. This figure does not include loan expenditure from the Developmental Roads Loan Account, a fund which was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

Total receipts and payments during each of the years 1956–57 to 1960–61 are shown below.

(a) After costs of collection. Since 1950, one half of the drivers' licence fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (b) Owing to the gradual change-over in currency of drivers' licences from one year to two and three years revenue from drivers' licences increased slightly in 1958-59, reached a peak in 1959-60 and declined to almost normal level in 1960-61. (c) Excludes portion of Commonwealth Aid Roads Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc.

(iv) *Melbourne and Metropolitan Board of Works.* Since assuming responsibility for carrying-out planning scheme proposals relating to metropolitan highways and bridges, a tentative £20,000,000 construction programme of urgent highway works throughout the metropolitan area of Melbourne has been adopted and is being progressively implemented by the Board of Works. Expenditure on these projects up to 30th June, 1961, was £1,181,550.

(v) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the Country Roads and Level Crossings Funds' Act 1954 to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings, (b) the provision of lights, signs, and lighting at, and the improvement of approaches to, level crossings and (c) generally, the reduction of danger at level crossings. The Act provides for the payment into the Fund of one third of all moneys received by way of additional motor registration fees (owner's certificates) and money provided under any other Act. The amount available for expenditure in 1960-61 was £603,255, comprising receipts from owners' certificates, £296,151, and the balance brought forward from 1959-60, £307,104. Expenditure from the Fund amounted to £583,519, of which £388,328 was incurred by the Railways Department and the balance by the Country Roads Board.

4. *Queensland.*—(i) *General.* Under the Main Roads Act 1920, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads and tourist tracks, and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads may be built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1960, was 20,742 miles, comprising State highways, 8,252 miles; main roads, 10,460 miles; developmental roads, 230 miles; and secondary roads, 1,800 miles. By the amendments to the Main Roads Acts published in the Government Gazette of 6th April, 1959, mining access, farmers' and tourist roads became secondary roads, and the provisions relating to the declaration of tourist tracks were repealed.

(b) *Surface of Roads.* The total length of roads and streets in Queensland at 30th June, 1961, was:—bitumen or concrete, 10,141 miles; gravel or stone, 20,515 miles; formed only, 40,768 miles; cleared only, 49,072 miles; total, 120,496 miles.

(iii) *Department of Main Roads.* (a) *General.* During 1959–60, the Department completed 1,175 miles of roads, including new construction and stage construction. Bridges of all types to a length of 7,153 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1960, to 209,549 feet. In addition, at 30th June, 1960, 5,388 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc. under the Transport Acts, contributions under the Commonwealth Aid Roads Acts, and loans, grants and advances from the State Government. The total receipts and payments, including amounts for defence works, during each of the years 1955–56 to 1959–60 are shown below.

5. South Australia.—(i) *General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads, to—

- (a) undertake the construction, maintenance and protection of the principal roads of the State,
- (b) allocate grants to councils for roadworks and supervise the expenditure of these grants,
- (c) assist Councils to purchase road-making plant and to defray the cost of roadworks.

In addition, the Commissioner advises Councils on technical questions concerning the construction, maintenance or repair of roads.

(ii) *Source of Funds.* Funds of the Department are derived mainly from—

- (a) *State Government*—the Highways Fund, into which are paid the proceeds from motor vehicle registration and drivers' licences (less cost of collection), appropriations from loan funds, repayments of advances made to Councils and contributions by the Municipal Tramways Trust.
- (b) *Commonwealth Government*—contributions under the Commonwealth Aid Roads Acts.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are main roads proclaimed under the provisions of the Highways Act and all other roads, commonly designated district roads. At 30th June, 1961, there were 8,188 miles of proclaimed main roads and 54,350 miles of district roads, totalling 62,538 miles. Lengths of road classified by surface were as follows:—Bitumen or concrete, 5,333 miles; gravel or stone, 13,586 miles; formed only, 15,326 miles; cleared only, 28,293 miles.

(iv) *State Highways and Local Government Department, Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1956–57 to 1960–61, of funds controlled by the Highways and Local Government Department.

(a) Administrative Expenses, amounting to £596,876 in 1958–59, £735,738 in 1959–60, and £844,780 in 1960–61, have been charged to "Construction and Reconstruction of Roads and Bridges" and to "Maintenance".

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1956–57 to 1959–60 was, respectively £9,228,000, £9,889,000, £10,556,000 and £12,277,000.

6. *Western Australia.*—(i) *General.* Work connected with road construction and maintenance and associated projects in Western Australia is undertaken by the State Government, through the Main Roads Department, and by local government authorities throughout the State.

Under the provisions of the Main Roads Act, the Main Roads Department was established in 1930 to replace the Main Roads Board originally constituted as a central road authority in 1926. The Department operates under the Main Roads Act 1930–1959, and is administered by a Commissioner of Main Roads responsible to the Minister for Works. The Act makes provision for public roads in the categories of “main” roads, “controlled-access” roads and “developmental” roads. An additional category, that of “important secondary” roads, is used by the Department in determining its works programme.

Main roads are those which provide communication between a large producing area, either actual or potential, and its market or nearest port or railway station; between two or more such areas; between large centres of population; or between the capital city and a large producing area or a large centre of population. Controlled-access roads do not permit direct access from abutting property and may be entered and departed from only at certain selected road connexions located at points which are considered to serve best the traffic for which the controlled access roads were designed. Developmental roads are those which serve to initiate or increase the development of an area. Important secondary roads are those which, though originally classified as developmental, have come to be used consistently by through traffic and therefore warrant a special allocation of funds by the Main Roads Department. The Act provides that, on the recommendation of the Commissioner, any road may be proclaimed a main road and any main road may cease to be a main road.

The construction and maintenance of main roads and controlled-access roads are the responsibility of the Main Roads Department. The Department also makes substantial financial provision for the construction and maintenance of important secondary roads and for the construction of developmental roads. The construction and maintenance of strategic roads and roads of access to Commonwealth property is undertaken for the Commonwealth Government by the Department.

Within its own district, each local government authority is responsible for the provision and upkeep of roads other than those provided by the Main Roads Department. In addition, the local authority is required by the Main Roads Act to maintain any developmental road situated in its district.

(ii) *Length and Surface of Roads.* (a) *General.* The total length of roads and streets in Western Australia at 30th June, 1961, was made up as follows:—bitumen or concrete, 9,148 miles; gravel or stone, 19,622 miles; formed only, 40,583 miles; cleared only, 23,375 miles; total, 92,728 miles.

(b) *Roads under Main Roads Act.* The total length of roads for which financial provision was made by the Main Roads Department at the 30th June, 1961, was:—Declared main roads, 3,471 miles including 5 miles of controlled-access roads; important secondary roads, 7,538 miles; and developmental roads, 22,099 miles.

(iii) *Main Roads Department.* (a) *General.* During the year 1960–61, the activities of the Department included clearing, 2,163 miles; forming, 2,486 miles; gravelling, 1,610 miles; reconditioning, 5,044 miles; and stabilizing, 403 miles. In addition, 1,474 miles were primed and sealed (including widening) and 29 bridges constructed.

(b) *Receipts and Payments.* The funds of the Main Roads Department are derived principally from allocations made under the Commonwealth Aid Roads Act 1959. Other sources of income include one-half of the net amount of traffic fees collected in the Metropolitan Traffic Area and an allocation of Transport Board funds. (Outside the Metropolitan Traffic Area, motor vehicle licence fees are collected and retained by the local authorities.) Receipts and payments for the years 1956–57 to 1960–61 are shown below.

(a) Includes amounts to be distributed to metropolitan and country local authorities early in the following year. (b) Includes administration and expenditure on hire and maintenance of road construction plant, etc., and on purchase of materials.

7. Tasmania.—(i) *General.* Under the Road Construction (Transfer of Functions) Act 1951, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands and Works. Works authorized by the Minister in respect of roads classified as State highways, tourist, and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund, into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licence fees for drivers and public transport, and other moneys made available by Parliament. In addition, provision was made under the Road Construction (Transfer of Functions) Act for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1959-60 on the construction of roads, tracks and bridges amounted to £4,517,000, of which £3,216,000 was charged to road funds, £38,000 to revenue, £1,242,000 to loan and £21,000 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1961, were as follows:—State highways, 1,160 miles; main roads, 666 miles; secondary roads, 196 miles; tourist roads, 46 miles; developmental roads, 16 miles; other roads, 135 miles; total, 2,219 miles. Country roads totalled 9,496 miles. The mileages of sealed roads, and their proportions to the respective totals, were:—State highways, 691 miles (60 per cent.); main roads, 351 miles (53 per cent.); secondary and other roads, 48 miles (12 per cent.); total, 1,090 miles (49 per cent. of all classified roads, and 9 per cent. of all roads in Tasmania).

(b) *Surface of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1961, was as follows:—bitumen or concrete, 1,879 miles; gravel or stone, 8,404 miles; formed only and cleared only, 1,432 miles; total, 11,715 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table below shows particulars of the receipts and payments of the combined Road Funds for the years 1956–57 to 1960–61.

8. *Territories.*—Information relating to the construction of roads and length and composition of roads in the Northern Territory and the Australian Capital Territory may be found in Chapter V.—Territories, of this Year Book (*see pp.* 113 and 118).

9. *Summary of Roads used for General Traffic.*—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1961. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g., insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

10. *Aggregate Net Expenditure on Roads and Bridges in Australia.*—In most States there are three classes of authorities concerned with roads and bridges, the State Government, the central road authority and numerous local government bodies. The Commonwealth Government, in addition to the grants it makes to the States for road purposes, is also concerned with roads in the Northern Territory and the Australian Capital Territory and roads of access to Commonwealth property in the various States. Some information relating to Commonwealth grants to the States for road purposes and particulars of the expenditure on roads and bridges by local government bodies and the central road authorities are given in preceding sections of this chapter.

Most of these authorities may expend money directly on road construction or indirectly by means of grants and payments to other authorities. These indirect payments, which, if included, would duplicate expenditure, together with the fact that some authorities are unable to supply separate information concerning their road expenditure, make it difficult to compile precise statistics of aggregate expenditure on roads and bridges.

The information in the following table, which is partly estimated and which excludes the main indirect payments, provides an approximate measure of the aggregate net expenditure by all public authorities on roads and bridges in Australia during each of the years ended 30th June, 1957 to 1961. The figures cover expenditure from revenue and loan funds on the construction, reconstruction and maintenance of roads and bridges, and direct administration but not debt charges. Because of the difficulties associated with the indirect payments mentioned above, it is not possible to give separate net details for each authority.

### § 5. Water Supply, Sewerage and Drainage.

NOTE.—See also Chapter VIII.—Water Conservation and Irrigation.

1. **New South Wales.**—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards, each consisting of a president and a vice-president appointed by the State Government and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra and Shellharbour, and (b) the Hunter District Water Board serving the Newcastle-Maitland-Cessnock areas. At Broken Hill, a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply—to 30th June, 1961.* (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 577.122 million gallons, drain catchment areas of 3,788 square miles (Warragamba, 3,412 square miles, Upper Nepean, 347 square miles, and Woronora, 29 square miles). The development of a water supply system on the Warragamba River was completed with the official opening of the Warragamba Dam in October, 1960. This dam, constructed in concrete, has a storage capacity of 452,505 million gallons. Its safe net draught is estimated to be 285 million gallons a day. A hydro-electric power station at the dam generates 50,000 kWh a day. At 30th June, 1961, there were 135 service reservoirs in use with a combined capacity of 590 million gallons. Rating for water for 1960-61 was 9½d. in the £1 of assessed annual value and the charge for water measured by meters 2s. 6d. per 1,000 gallons.

(b) *Hunter District.* The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 113 million gallons. Water rating for 1960-61 was 1s. 5½d. in the £1 on assessed annual value for occupied properties and 1s. 2½d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. 6d. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Metropolitan and Hunter District systems, the number of properties, the estimated population supplied, and other details for the years 1956-57 to 1960-61.

## WATER SUPPLY, METROPOLITAN(a): SERVICES.

(a) Newcastle, Maitland and Cessnock areas.

(iii) *Sewerage and Drainage—*to 30th June, 1961. (a) *Metropolitan.* Sydney and suburbs are served by three major sewerage systems and seven minor systems, consisting of six outfalls discharging directly into the Pacific Ocean, and four treatment works. In addition, five centres outside the metropolitan area (Camden, Campbelltown, St. Mary's, Port Kembla and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1961, were 180 miles long. Sewerage rating for 1960-61 was 9d. in the £1 of assessed annual value, and drainage rating 1½d. in the £1.

(b) *Hunter District.* The main sewerage system serves the City of Newcastle and discharges into the Pacific Ocean at Merewether Gulf. There are also local treatment works at Maitland, Cessnock and some of the outlying districts.

Sewerage rates for 1960-61 were 1s. 0½d. in the £1 of assessed annual value of occupied lands and 9½d. in the £1 for unoccupied lands, and drainage rates (on certain areas served) 1½d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains as at 30th June, 1957 to 1961.

**SEWERAGE AND DRAINAGE, METROPOLITAN(a): SERVICES.**

(a) County of Cumberland, City of Greater Wollongong and Shellharbour Municipality.

At 30th June, 1961, 58,631 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle-Maitland-Cessnock areas). The total length of sewers under the Board's control was 805 miles, and the length of drains was 50 miles.

(iv) *Finances, Metropolitan and Hunter District Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1960-61, and for the three services combined during the years 1956-57 to 1959-60.

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) County of Cumberland, City of Greater Wollongong, Shellharbour Municipality. (c) Newcastle-Maitland Cessnock areas.

(v) *Country Water Supply and Sewerage Systems.* (a) *Local Government.* At 31st December, 1959, country water supply services were conducted or under construction by 54 municipalities, 78 shires and 5 county councils, and country sewerage services by 53 municipalities and 28 shires. The capital indebtedness of these schemes was £26,856,626 at 31st December, 1959, namely, £18,198,539 for water and £8,658,087 for sewerage. Debt of the municipalities amounted to £15,307,765, shires to £7,451,804 and county councils to £4,097,057. Government advances amounting to £488,638 are included in these figures. Aggregate income and expenditure amounted to £4,561,902 and £3,513,229, respectively, in 1959.

(b) *Other.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1960, was £3,237,326. In 1960, income (excluding subsidies, State Government £102,604 and Mining Companies £301,978) amounted to £271,222 and expenditure (excluding debt redemption £213,195) amounted to £461,824.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers. Only a small quantity is sold direct to private consumers. The capital indebtedness of these systems was £6,011,169 at 31st December, 1960.

The Mulwala Water Supply and Sewerage Service was constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System is administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board was established by Act of Parliament on 20th December, 1890. Since June, 1959, the Board has consisted of a Chairman and 51 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board until 1954 were to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage system; to deal with main drains and main drainage works; and to control and manage the rivers, creeks and watercourses within the metropolitan area. The Board has carried out since December, 1954, the additional functions of a permanent planning authority, and in June, 1956, it became the authority directly responsible for certain metropolitan main highways, bridges, parks and foreshores.

(b) *Water Supply.* There are six storage reservoirs serving the metropolitan area—Yan Yean, 7,233 million gallons (available for consumption, 6,649 million gallons); Toorourong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 930 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); and Upper Yarra, 45,400 million gallons (44,120 million gallons); total 68,765 million gallons (65,452 million gallons). Service reservoirs number 37, with a total capacity of 370 million gallons.

The water rate levied by the Board in 1959–60 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which, at 1s. 6d. per 1,000 gallons, would equal the assessed water rates on each property, was 1s. 6d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1956–57 to 1960–61.

## WATER SUPPLY, MELBOURNE: SERVICES.

1960-61 ..	395,109	1,422,000	88.1	32,159	223.0	62.0	3,550	193

The metropolitan sewerage system consists of the main system (serving an area of 80,823 acres) and four subsidiary systems—the Sunshine system (serving an area of 2,033 acres), the Laverton system (serving an area of 108 acres), the Kew system (serving an area of 112 acres) and the South-eastern system (serving an area of 2,815 acres in Cheltenham, Parkdale, Mentone and Mordialloc). The Metropolitan Sewage Farm, 26,811 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 98 per cent. of the sewage flow of the metropolis before its discharge into Port Philip Bay. The total capital cost (less depreciation) of the Farm to 30th June, 1961, was £3,994,914. Revenue during 1960-61 amounted to £224,589, cost of sewage disposal to £239,176, trading expenses to £123,955, interest to £197,863, and net cost of sewerage purification to £336,405. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides for the year 1960-61 a summary of the financial operations of the water supply, sewerage and drainage services conducted by the Melbourne and Metropolitan Board of Works.

## MELBOURNE AND METROPOLITAN BOARD OF WORKS: FINANCES, 1960-61.

(£.)

(ii) *State Rivers and Water Supply Commission.* (a) *General.* Water supply and conservation throughout Victoria (except for the area controlled by the Melbourne and Metropolitan Board of Works) is the responsibility of the State Rivers and Water Supply Commission. The events leading to the establishment of the Commission and its works in the spheres of irrigation, domestic and stock water supply to farms, drainage, flood protection and river improvement, have already been described in Chapter VIII.; this section is therefore confined to the Commission's functions in connexion with urban water supply and sewerage.

(b) *Water Supply.* At 30th June, 1961, the Commission provided a reticulated water supply from its own works to 131 cities and towns having a combined population of 200,000 persons.

The principal systems operated by the Commission serve part of the Mornington Peninsula—Dandenong area (about 85,000 people supplied); Bendigo, Castlemaine, etc. (58,000); and about 8,000 people in the Western District. In addition, 10,000 persons in a number of towns in the Bellarine Peninsula receive supply through a Commission-operated distributary system from headworks controlled by the Geelong Waterworks and Sewerage Trust.

Outside these areas, the Commission supplies mainly small towns in the north of the State, in areas where it also supplies farms with water for irrigation or domestic and stock purposes.

Capital expenditure at 30th June, 1961, net of redemption payments, was divided up as follows between the several systems:—Mornington Peninsula, £7,650,000; Bendigo, Castlemaine, £3,950,000; Bellarine Peninsula, £825,000; Otway System (Western District), £700,000; Other, £1,025,000; Total, £14,150,000.

In addition to the towns supplied by the Commission, there are approximately 550,000 people in 187 cities and towns throughout the State who get a reticulated water supply from works operated by local authorities.

All these authorities operate under the supervision of the State Rivers and Water Supply Commission, largely because the Government subsidizes their capital expenditure. Most new works are financed from Government loan funds, but in recent years some local authorities have been able to borrow money privately. In most cases, the local authority controls both headworks and distribution system, but a few large towns—serving about 50,000 people—draw their water from the State Rivers and Water Supply Commission and are concerned only with reticulation of the water. Together, therefore, the Commission and local authorities supply 318 urban centres containing about 750,000 people. Very few towns of any importance are now without a reticulated water supply.

The following table presents the financial position in respect of town water supply at 30th June, 1961.

**TOWN WATER SUPPLY, VICTORIA: CAPITAL LIABILITY, 30TH JUNE, 1961.**  
(£'000.)

Particulars.	Water supply provided by—		
	Local Authorities.	State Rivers and Water Supply Commission.	Total.
Government advances .. .. .	18,100	14,825	32,925
Private loans .. .. .	1,500	..	1,500
<i>Total Expenditure</i> .. .. .	<i>19,600</i>	<i>14,825</i>	<i>34,425</i>
Redemption and repayments .. .. .	1,400	675	2,075
<i>Loan Expenditure Outstanding</i> .. .. .	<i>18,200</i>	<i>14,150</i>	<i>32,350</i>
Borne by State .. .. .	4,000	6,950	10,950
Borne locally .. .. .	14,200	7,200	21,400

The proportion of loan capital borne by the State is much higher in the case of Commission undertakings than for towns supplied by local authorities. This is because most Commission undertakings have been developmental in nature. Besides interest on capital borne by it, the State pays the difference between 3 per cent. and the actual rate paid on practically all of the capital carried locally. The total annual subsidy on country town water supply is currently about £750,000.

(c) *Sewerage.* With the exception of the town of Eildon whose sewerage system is controlled directly by the State Rivers and Water Supply Commission, the construction and management of sewerage works in Victoria's country cities and towns are the responsibility of local authorities supervised by the Commission. Except for the Geelong Waterworks and Sewerage Trust and the Latrobe Valley Water and Sewerage Board which have special Acts dealing with their activities, all sewerage authorities operate under the Sewerage Districts Act.

At 30th June, 1961, there were 39 cities and towns with sewerage systems in operation. These contained about 400,000 persons, approximately a third of the total number of residents outside the metropolitan area.

Expenditure on sewerage in Victorian country towns at 30th June, 1961, was a little over £15,500,000, of which approximately £12,000,000 had been advanced by private lenders. The annual State subsidy on country sewerage in Victoria is currently about £200,000, mainly provided in the form of subsidies on interest rates paid, along the same lines as for town water supply. Comparatively little capital is borne directly by the State.

(iii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910. It was further reconstituted in September, 1950, to include a government nominee (Chairman) and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners. The amount of loan money which may be raised is limited to £6,500,000 for water supply undertakings, and £5,000,000 for sewerage undertakings. The population supplied is estimated by the Trust at 98,650 persons. This and other general information relates to 30th June, 1961.

(b) *Water Supply.* The Trust operates two systems for gathering and storing water, one on the Moorabool River with works extending beyond Ballan to Spargo Creek and the other on the Barwon River with works extending to Forrest. In both systems, water is brought over fifty miles to Geelong. There are seven storage reservoirs and eleven service basins whose total storage capacity is 8,640 million gallons. The length of water mains and reticulation is 501 miles. The total expenditure on water supply to 30th June, 1961, was £4,293,190. General fund expenditure for 1960-61 comprised £145,559 for working expenses and £273,429 for interest, redemption and reserves, while revenue amounted to £423,446. The sinking fund appropriations at June, 1961, amounted to £337,008. The replacement and contingencies reserve amounted to £291,802. There is a water rate of 1s. 7d. in the £1 (with minima of 10s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 234.7 miles of main and reticulation sewers. The sewerage area is 10,559 acres, and the number of buildings connected within the sewered areas is 20,606. The total expenditure on sewerage works to 30th June, 1961, was £1,988,368. The revenue in 1960-61 amounted to £206,251 and the general fund expenditure comprised £84,514 on working expenses and £119,868 on interest, redemption and reserves. Sinking fund appropriations at June, 1961, were £178,632. Replacement and contingencies reserve amounted to £337,266. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iv) *The Ballarat Water Commissioners and the Ballarat Sewerage Authority.* (a) *General.* The body known as the Ballarat Water Commissioners was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commissioners constitute the Sewerage Authority. The Commissioners number nine, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat, one being elected by the Councils of the Borough of Sebastopol and the Shires of Buninyong and Grenville and one being elected by the Councils of the Shires of Bungaree and Ballarat. General and financial information given herein relates to the year ended 31st December, 1961.

(b) *Water Supply.* The water supply district embraces an area of about 65 square miles, containing a population of about 58,000. The total storage capacity of the seven reservoirs is 5,606 million gallons and the catchment area is 24,182 acres.

The capital cost of construction of the waterworks was £2,641,780 to 31st December, 1961. The liabilities amounted to £1,577,031 at 31st December, 1961, including loans due to the Government totalling £1,442,738. The revenue for the year 1961 was £173,925. Working expenses during 1961 amounted to £96,010 and interest and other charges to £77,752. A water rate of 1s. 1d. in the £1 on the net annual valuation is levied, with a minimum charge of £1 10s. per annum on any ratable property.

(c) *Sewerage.* The Ballarat sewerage district embraces the City of Ballarat and parts of the Shires of Ballarat, Bungaree and Grenville and the Borough of Sebastopol. Work was commenced in 1922 and up to 31st December, 1961, the Authority had constructed two disposal works, a nightsoil depot, an ejector station and more than 161 miles of sewers. The capital cost of sewerage construction works to 31st December, 1961, was £1,525,611. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. Two hundred and six sewered areas had been declared as at 31st December, 1961. Assessments in the sewerage district numbered 17,982, while those in sewered areas numbered 14,454. There were 12,483 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1961, amounted to £1,261,787; redemption payments at that date totalled £314,787. An expenditure of £157,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1961 amounted to £132,910, and expenditure, which included £61,589 on interest and redemption, was £126,808.

A sewerage rate of 1s. 4d. in the £1 on the net annual valuation is levied, with a minimum charge of £3 on any ratable property.

(v) *Latrobe Valley Water and Sewerage Board.* (a) *General.* The Latrobe Valley Water and Sewerage Board was constituted on 1st July, 1954. The Board consists of seven members, namely:—two Government nominees (one of whom is Manager and also Board Chairman), three members elected by water supply, sewerage and river improvement authorities within the Latrobe Valley, and one representative each of the State Electricity Commission of Victoria and the Gas and Fuel Corporation of Victoria.

(b) *Water Supply.* The Board is empowered to construct water supply works within the Latrobe Valley, but at present its main construction activities are confined to the central industrialized areas, particularly around the towns of Morwell and Traralgon. At 30th June, 1961, a pumped water supply scheme from the Tyers River had been constructed and work was proceeding on a reservoir with a capacity of 7,000 million gallons on the Upper Tyers River and a 60-inch diameter pipeline connecting that reservoir to the existing distribution mains. The capital cost of construction of the water works was £3,642,439 to 30th June, 1961. Liabilities amounted to £4,020,129 including loans due to the Government totalling £3,915,059. Revenue for the year was £128,121. Working expenses during 1960-61 amounted to £57,135 and interest and other charges to £50,811. The Board does not strike a rate but supplies consumers, including local water supply authorities, by measure. The quantity supplied during the year ended 30th June, 1961, was 3,076 million gallons.

(c) *Sewerage.* The sewerage system consists of a main outfall sewer, about 50 miles in length, to the Dutson Downs Disposal Farm. Wastes conveyed consist mainly of industrial wastes, such as paper wastes and gasification wastes, together with small quantities of domestic sewage. The capital cost of the sewerage construction works to 30th June, 1961, was £2,342,921. Liabilities amounted to £2,651,626 including loans due to the Government totalling £2,482,557. Revenue in 1960-61 was £109,693, and expenditure comprised £53,178 working expenses and £69,355 interest and other charges. No sewerage rate is levied but a charge is made by measure for wastes both from industries and public authorities. The quantities of effluent admitted to the outfall system during 1960-61 averaged 4.73 million gallons a day.

(vi) *Other Sewerage Authorities.* At 30th June, 1961, 64 other sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts and systems were in operation in 36 districts.

3. *Queensland.*—(i) *Brisbane City Council—to 30th June, 1961.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the major portion of that used by the City of Redcliffe. Since September, 1960, Redcliffe has supplemented its supply from that of the Pine Rivers Shire Council.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,720 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are 16 service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1961, was 4½d. in the £1 of unimproved capital value for improved properties, and 3½d. in the £1 for vacant lands, with a minimum charge of £7 and £6 10s. respectively. The following table is a summary of operations of the complete Brisbane City Council system (Brisbane, Ipswich and Redcliffe) for the years 1956-57 to 1960-61.

WATER SUPPLY, BRISBANE(a): SERVICES.

Year.	Services Connected.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Trunk and Reticulation Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1956-57 ..	153,035	560,000	41.1	15,012	269	73.5	1,959	(b)
1957-58 ..	157,750	575,212	41.0	14,970	260	71.3	1,995	(b)

1960-61 ..	171,820	626,470	46.8	17,100	273	74.8	2,196	(b)

(a) Includes Ipswich and Redcliffe.

(b) Not available.

(c) *Sewerage.* The sewage treatment works is situated at **Luggage Point** at the entrance to the Brisbane River. An activated sludge system of treatment was originally planned but since the commencement of pumping operations a sedimentation plant only has been used. Sewerage rating at 30th June, 1961, was 3½d. in the £1 of unimproved capital value for improved properties, and 2½d. in the £1 for vacant lands, with a minimum charge of £7 10s. and £7 respectively. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1956-57 to 1960-61.

**SEWERAGE, BRISBANE: SERVICES.**

Year.	Premises Connected.	Estimated Population Served.	Total Sewage Pumped for the Year.	Length of Main, Branch, Reticulation etc., Sewers.

1960-61 ..	16,837,552	982,345	282,035	489,597	964,578	+ 17,767

(a) Total, including other expenditure.

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were, at 30th June, 1960, 153 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1960, there were 23 cities and towns in addition to Brisbane with sewerage systems. These were—Barcaldine, Blackall, Bundaberg, Charleville, Cunnamulla, Goondiwindi, Hughenden, Ipswich, Kingaroy, Longreach, Mackay, Maryborough, Monte, Mt. Isa, Quilpie, Rockhampton, Redcliffe, Roma, Surat, Toowoomba, Townsville, Warwick and Winton.

Sewerage schemes were in course of construction at Bowen, Cairns, Gordonvale, Richmond and St. George.

(c) *Finances.* The receipts (other than loan and loan subsidy) of water undertakings controlled by the cities and towns referred to above amounted to £2,171,282 in 1959–60. Expenditure amounted to £2,171,734, including £943,924 for debt charges. In addition, expenditure from loans and loan subsidy amounted to £2,449,506.

Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. *South Australia.*—(i) *General.* The water supply and sewerage systems in this State were constructed mainly and are maintained by the Engineering and Water Supply Department, under the control of the Minister of Works. Works controlled by the Department are the Adelaide, Barossa, Beetaloo, Bundaleer, Moorook, Tod River, Warren, Yorke Peninsula and other country water districts systems, the Morgan–Whyalla water supply system, the Adelaide metropolitan sewerage system, the Metropolitan Flood Waters Scheme, works on the River Murray constructed under the River Murray Waters Agreement, and sewerage schemes at Naracoorte and Port Lincoln. The Salisbury–Elizabeth Sewerage Scheme was incorporated in the Metropolitan system during 1960–61. Several water supply schemes on the Murray River are operated by the Department of Lands in conjunction with its irrigation works, and supplies to Woomera and Leigh Creek coalfield are controlled by the operating authorities.

(ii) *South Australian Waterworks.* (a) *Services.* The table below shows particulars of the area, capacity, etc., of combined metropolitan and country waterworks for the years 1956–57 to 1960–61.

#### WATERWORKS, SOUTH AUSTRALIA: SERVICES.

Year.	Assessments.(a)		Area of Districts Supplied. (a)	Capacity of Reservoirs, Tanks, etc.	Length of Mains.	Number of Meters.
	Number.	Annual Value.				
		£	Acres.	Mill. gals.	Miles.	
1956–57..	250,306	22,687,480	12,860,508	24,015	7,916	166,350
1957–58..	262,430	26,810,750	12,983,539	33,949	8,260	180,815
1958–59..	269,825	28,361,294	13,003,305	33,954	8,537	197,914
1959–60..	289,235	31,617,930	13,037,312	33,957	9,016	213,024
1960–61..	319,108	40,593,447	13,118,635	35,405	9,292	232,072

(a) Excludes Morgan–Whyalla Water Supply—water sold by measure.

(b) *Finances.* Figures for 1956–57 to 1960–61 are shown in the following table.

#### WATERWORKS, SOUTH AUSTRALIA: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Deficit.
			Working Expenses. (a)	Interest.	Total.	
1956–57	45,239,197	2,318,072	2,295,444	1,485,486	3,780,930	1,462,858
1957–58	49,161,026	3,028,193	2,944,648	1,740,157	4,684,805	1,656,612
1958–59	54,301,234	3,106,348	2,768,406	1,933,850	4,702,256	1,595,908
1959–60	59,636,914	3,386,221	3,391,892	2,205,764	5,597,656	2,211,435
1960–61	65,183,386	4,284,394	3,188,385	2,373,567	5,561,952	1,277,558

(a) Includes debt redemption.

(iii) *Adelaide Waterworks.* At 30th June, 1961, the Adelaide waterworks supplied a district of 191,434 acres. The capacity of its five reservoirs and storage tanks was 14,500 million gallons and there were 2,403 miles of mains. Water is also drawn from the 11,300 million gallon reservoir at South Para in the Barossa Water District and additional storage capacity is becoming available at the new Myponga Reservoir (5,994 million gallons) and at Mt. Bold Reservoir, where raising the dam is adding 5,000 million gallons capacity.

The Mannum-Adelaide pipeline conveys water from the River Murray to Adelaide at a rate of 53 (currently being raised to 65) million gallons per day. Water is delivered to the River Torrens or, by further pumping, to the River Onkaparinga. With further development, the main will operate as a closed system connected to the metropolitan reticulation. The pipeline supplements the Warren system and other country areas.

Particulars of finances for the years 1956-57 to 1960-61 are shown below.

**ADELAIDE WATERWORKS: FINANCES.**

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (-).
			Working Expenses. (a)	Interest.	Total.	
1956-57.. ..	23,115,689	1,492,610	1,218,285	759,012	1,977,297	- 484,687
1957-58.. ..	25,900,153	2,045,625	1,612,284	915,721	2,528,005	- 482,380
1958-59.. ..	28,719,570	2,101,768	1,437,861	1,032,464	2,470,325	- 368,557
1959-60.. ..	32,074,743	2,311,402	1,919,538	1,136,373	3,055,911	- 744,509
1960-61.. ..	35,078,981	2,958,675	1,731,561	1,218,096	2,949,657	+ 9,018

(a) Includes debt redemption.

(iv) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg, Port Adelaide and Salisbury-Elizabeth areas of 172 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. Work is starting on a new large treatment works at Bolivar. Financial and other particulars for 1956-57 to 1960-61 are shown hereunder.

**ADELAIDE METROPOLITAN SEWERAGE: SUMMARY.**

Year.	Length of Sewers.	Number of Connexions.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (-)
					Working Expenses. (a)	Interest.	Total.	
	Miles.		£	£	£	£	£	£
1956-57 ..	1,370	143,743	8,273,936	1,167,508	648,999	263,270	912,269	+ 255,239
1957-58 ..	1,411	149,104	9,213,112	1,393,260	653,810	309,145	962,955	+ 430,305
1958-59 ..	1,444	154,636	10,437,696	1,471,067	685,104	349,312	1,034,416	+ 436,651
1959-60 ..	1,471	160,407	11,305,495	1,576,769	676,660	401,009	1,077,669	+ 499,100
1960-61 ..	(b) 1,598	173,753	13,376,362	2,060,534	887,921	479,011	1,366,932	+ 693,602

(a) Includes debt redemption.

(b) Includes 93 miles of sewers in the Salisbury-Elizabeth area.

(v) *Country Sewerage Schemes.* Sewerage schemes are operating at Port Lincoln and Naracoorte. At Port Lincoln, there are 16 miles of sewer with an ocean outfall. At June, 1961, there were 238 connexions. The Naracoorte system has a treatment works, covers 2.43 square miles, and comprises 23 miles of sewer with 350 connexions.

(vi) *Country Water Supply.* Water district systems at 30th June, 1961, comprised an area of 12,927,201 acres. Supply came from reservoirs having a total capacity of 20,861 million gallons, from the River Murray and from underground sources.

Apart from local supplies, water from the River Murray comes from branches of the Mannum-Adelaide main and from the Morgan-Whyalla main.

The principal areas of underground supplies are in the south-east of the State where water from the Murray Basin can be had at moderate depths and from sand beds on Eyre Peninsula. The Uley-Wanilla sub-artesian basin has been used to augment Tod River District supplies since 1947 by up to 600 million gallons a year and the Lincoln Basin is now being developed.

The following table gives financial information on country waterworks for 1956-57 to 1960-61.

COUNTRY WATERWORKS, SOUTH AUSTRALIA: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Deficit.
			Working Expenses. (a)	Interest.	Total.	
1956-57.. ..	22,123,508	825,462	1,077,159	726,474	1,803,633	978,171
1957-58.. ..	23,260,873	982,568	1,332,364	824,436	2,156,800	1,174,232
1958-59.. ..	25,581,664	1,004,580	1,330,545	901,386	2,231,931	1,227,351
1959-60.. ..	27,562,171	1,074,819	1,472,354	1,069,391	2,541,745	1,466,926
1960-61.. ..	30,104,405	1,325,719	1,456,824	1,155,471	2,612,295	1,286,576

(a) Includes debt redemption.

(vii) *Morgan-Whyalla Water Supply Scheme.* This scheme, which has 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1961 being £2,687,707. Particulars of the scheme, where applicable, are included in the tables of the combined waterworks in (ii) above. Apart from supplying Whyalla, the main has been used to allow expansion of reservoir supplies in the northern agricultural area of the State, and to meet new demands caused by industrial growth at Whyalla, duplication of the main has commenced. During 1960-61, water used from the scheme amounted to 1,936 million gallons. Revenue was £337,753, working expenses £235,251, interest charges £131,981 and deficit £29,479.

5. *Western Australia.*—(i) *General.* The water supply, sewerage and drainage systems of Western Australia are principally under the management of two State Government Departments, namely, the Metropolitan Water Supply, Sewerage and Drainage Department, having as its territory the metropolitan area centred on Perth and extending to Kwinana and Serpentine in the south, Sorrento in the north and Greenmount on the east, and the Public Works and Country Water Supply Department, which controls the Comprehensive Water Supply Scheme (covering the Goldfields and Agricultural Areas Water Supply and the Great Southern Towns Water Supply) as well as supplies, from local sources, to 57 country towns not included in the scheme. Both Departments are administered under the portfolio of the Minister for Works and Water Supplies. (See also Chapter VIII.—Water Conservation and Irrigation, of this Year Book, pp. 278-281.)

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Serpentine Dam, the Canning Dam, the Churchman Brook Reservoir, the Victoria Reservoir and the Wungong Brook Diversion Weir. The

supply from these sources is supplemented as necessary from a number of artesian bores and from a pipeline link with Mundaring Weir. The largest reservoir, the Serpentine Dam, has a capacity of 39,000 million gallons.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent directly to the ocean. Plant for secondary treatment at Subiaco is now being provided. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. There are three treatment works, situated at West Subiaco, Swanbourne and Fremantle.

(b) *Water Supply.* The following table shows particulars of water supply services for 1956-57 to 1960-61.

**METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA: SERVICES.**

Year.	Number of Services.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.

(iii) *Country Water Supplies.* Information concerning country water supplies is included in Chapter VIII.—Water Conservation and Irrigation, of this Year Book (*see p. 280*).

6. *Tasmania.*—(i) *Waterworks.* At the end of 1959-60, there were 95 municipally operated waterworks in Tasmania. The capacity of the reservoirs was 1,750 million gallons, the estimated population served was 250,000 and the number of tenements served was 63,000. In addition, two regional schemes operated by the State Government were serving an estimated population of 35,000 in 9,000 tenements.

(ii) *Sewerage.* At the end of 1959-60, there were 12 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 165,000 and the number of tenements served was 41,600.

7. *Northern Territory.*—Information relating to water supply in the Northern Territory may be found in Chapter VIII.—Water Conservation and Irrigation (*see p. 282*).

## § 6. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of vessels which entered the major ports in each State during the years 1959-60 and 1960-61 are shown in Chapter XIV.—Transport and Communication (*see p. 520*). Particulars of oversea and interstate cargo discharged and shipped during 1960-61 are shown on page 522 of the same chapter.

1. *New South Wales.*—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of seven Commissioners comprising three full-time members and four part-time members representing shipping and other interests. The Board was constituted on 1st February, 1936, under the Maritime Services Act 1935, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels, and is vested with the general control and management of the navigable waters and ports within the State.

At the Ports of Sydney, Newcastle, and Botany Bay, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of four miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tide) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length, and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated in close proximity to the business centre of the city, about four or five miles from the Heads. At present, there are three dolphin berths each 550 feet long, and 100 effective commercial cargo berths with a total length of 47,463 feet controlled by the Board. Accommodation for harbour craft amounts to 3,465 feet, while the length of other berths including oil and private wharves totals 28,511 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided, and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock ranks amongst the largest graving docks in the world, being 1,139 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

The following table shows particulars of the finances of the Board in respect of the Port of Sydney for 1956-57 to 1959-60.

#### MARITIME SERVICES BOARD: FINANCES OF THE PORT OF SYDNEY.

(£.)

Year.	Total Capital Debt at 30th June.	Revenue.			Expenditure.			Surplus (+) or Deficit (-).
		Wharfage and Transhipment Rates.	Tonnage Rates and Berthing Charges.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Total. (a)	
1956-57	14,041,252	1,725,590	385,006	2,887,506	1,857,539	722,373	2,869,912	+ 17,594
1957-58	14,546,035	1,822,587	378,284	2,899,795	1,964,830	789,230	2,999,060	- 99,265
1958-59	15,322,219	1,871,384	403,342	2,995,160	1,830,589	843,580	2,924,169	+ 70,991
1959-60	16,400,513	2,138,724	414,071	3,326,944	1,870,595	903,590	3,274,185	+ 52,759

(a) Excludes capital expenditure but includes transfers to the Renewals Fund Reserve Account, 1956-57, £290,000; 1957-58, £245,000; 1958-59, £250,000; and 1959-60, £500,000.

The implementation of the Maritime Services (Amendment) Act 1960, as from 1st May, 1961, resulted in some marked changes in the Board's accounting system. The amendment to the Act provided for a new fund known as the Maritime Services Board Fund to be established to replace the Sydney Harbour Trust Fund. All revenue earned by the Board at the Ports of Sydney, Newcastle and Botany Bay, with the exception of that earned from pilotage and navigational services, is now credited to the Maritime Services Board Fund and all revenue expenditure incurred at the three ports is drawn from that Fund.

**MARITIME SERVICES BOARD FUND: FINANCES OF THE PORTS OF SYDNEY,  
NEWCASTLE AND BOTANY BAY.**

Year.	Total Capital Debt at 30th June.	Revenue.			Expenditure.			Surplus(+) or Deficit(-).
		Wharfage and Transhipment Rates.	Tonnage Rates and Berthing Charges.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Total. (a)	
1960-61	(b)	3,130,441	631,432	4,689,602	2,565,141	2,081,110	4,646,251	+ 43,351

(a) Excludes capital expenditure but includes transfer to the Renewals Fund Reserve Account £1,025,000.  
(b) Not available.

(c) *Port of Newcastle.* As from 1st May, 1961, the Maritime Services Board of New South Wales became the single authority for the Port of Newcastle. This was brought about by the implementation of the Maritime Services (Amendment) Act 1960, which resulted in the Board's jurisdiction being extended to include the operation of the coal loading equipment formerly vested in the Department of Railways and the dredging, together with the maintenance and construction of wharves and other port facilities, which had been the responsibility of the Department of Public Works.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,500 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfage accommodation amounts to approximately 13,700 feet, including about 2,700 feet of privately owned wharfage. There are also several dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(d) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members appointed by the Governor has been formed to assist the Board in the operation of the port. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfage accommodation totalling 6,800 feet has been provided for large ocean-going vessels. No cargo sheds are available, as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfage for the steelworks in addition to a modern fast loading coal berth and general cargo berths.

The first stage of the inner harbour basin was opened to shipping on 28th November, 1960. Present accommodation is 1,175 feet of wharfage, with 36 feet (low water ordinary spring tide) of water, alongside. Width in the entrance to the inner harbour basin is 400 feet.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately 1½ miles wide, with a minimum depth of about 36 feet in the dredged swinging basin.

(f) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 29 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Lighthouses Act and the Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £8,057,254 in 1960-61. This figure includes the revenue for the ports of Sydney, Newcastle and Botany Bay (see table on p. 754) and State navigation service collections (£3,367,652 in 1960-61). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £710,205 in 1960-61.

2. Victoria.—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, pages 970-2. Following an amendment to the Melbourne Harbour Act, the Board of Commissioners had a change in representation in 1960. A part-time Commissioner representing the Trades Hall Council replaced the representative of the waterside workers. The number of Commissioners remains at five. At 31st December, 1960, the sheds available for wharfage accommodation had a length of 24,912 feet, covering an area of 1,940,942 square feet. The area of water in Port Philip Bay and the River Yarra under the control of the Trust is approximately 5,327 acres, and the total length of wharves, piers and jetties in the port is 61,890 feet, giving an area of over 60½ acres of wharfage, and 57,150 feet of effective berthing space. During 1960, work was continued on the new berths at Appleton Dock, Victoria Docks, South Wharf, Port Melbourne and Williamstown. The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is 31 to 37 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1956 to 1960.

## MELBOURNE HARBOR TRUST: FINANCES.

(£.)

Year.	Gross Loan Indebtedness at 31st December.	Revenue.		Expenditure.				Surplus (+) or Deficit (-)
		Wharfage and Tonnage Rates.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a)	
1956 ..	11,296,811	1,841,176	2,676,698	1,649,047	483,905	145,825	2,662,047	+ 14,651
1957 ..	12,175,428	1,882,501	2,746,513	1,557,933	520,223	250,938	2,718,159	+ 28,354
1958 ..	12,907,279	2,043,848	3,020,913	1,310,119	603,899	631,988	2,958,686	+ 62,227
1959 ..	13,833,011	2,100,924	3,292,329	1,634,513	766,909	376,397	3,201,943	+ 90,386
1960 ..	14,199,060	2,492,139	3,948,187	1,962,110	766,532	641,175	3,872,264	+ 75,923

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust:—1956, £383,270; 1957, £389,065; 1958, £412,680; 1959, £424,124; 1960, £502,447. Excludes capital expenditure:—1956, £1,609,928; 1957, £1,054,236; 1958, £1,658,589; 1959, £1,458,499; 1960, £1,280,529.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust, constituted in 1905, is under the control of three Commissioners appointed from time to time by the Governor-in-Council. One of these, the chairman, is on a full time basis.

At the end of 1960, there were 17 effective berths in the port, while two extra berths at Refinery Pier were under construction and a further berth for general cargo is in the course of planning. Four berths have a depth of 36 feet at low water and all others (except Yarra Pier 29 feet) have a depth of 32 feet at low water.

Total trade for 1960 amounted to 5,470,466 tons, imports being 3,520,366 tons and exports 1,950,100 tons. During 1960, 551 vessels with a total gross tonnage of 5,003,358 tons entered the port.

Revenue for the year 1960 was £1,150,310 and expenditure from revenue totalled £682,359. At 31st December, 1960, the value of the Trust's fixed assets was £7,827,378 and loans outstanding amounted to £2,894,762.

(iii) *Portland Harbor Trust.* Construction of an all weather deep-sea port of three berths with a low water depth of 36 feet was commenced following the proclamation of the Portland Harbor Trust Act on 18th May, 1951. This was completed to operational standards in 1960.

Operating revenue for the year ended 30th June, 1960, was £54,522 and revenue expenditure was £31,411. The value of the Trust's fixed assets, less depreciation, was £5,605,014 at 30th June, 1960, and loans and advances outstanding amounted to £5,765,560.

During the year ended 30th June, 1960, total trade of the port was 183,765 tons which was carried in 88 vessels of a total gross tonnage of 632,490.

(iv) *Other Victorian Ports.* There are no other Victorian ports of more than minor importance.

3. *Queensland.*—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly because of the increasing size of vessels, are still within easy access of the city. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1955-56 to 1959-60 are shown below.

#### BRISBANE HARBOUR: FINANCES.

(£'000.)

Year.	Loan Indebtedness at 30th June.	Receipts.		Payments.	
		Harbour Dues.	Total.	Working Expenses.(a)	Total.
1955-56 .. ..	2,899	701	817	582	772
1956-57 .. ..	3,011	671	918	843	1,048
1957-58 .. ..	3,042	696	938	731	944
1958-59 .. ..	2,702	709	1,097	664	883
1959-60 .. ..	2,512	772	1,059	731	953

(a) Excludes Interest and Redemption included in Total.

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, and nine smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. Finances for each port for the year ended 30th June, 1960, are shown below, together with a summary for the years ended 30th June, 1956 to 1960.

## HARBOUR BOARDS, QUEENSLAND: FINANCES.

(£.)

Harbour Board.	Loan Indebtedness at 30th June.	Revenue.		Expenditure (excluding Loan).		Surplus(+) or Deficit(-).
		Wharfage and Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption). (a)	
Bowen .. ..	275,327	12,533	61,411	9,827	15,191	+ 46,220
Bundaberg .. ..	2,213,569	115,782	318,521	8,714	192,263	+ 126,258
Cairns .. ..	256,354	198,159	290,790	182,870	261,348	+ 29,442
Gladstone .. ..	667,940	49,785	97,124	28,665	100,380	- 3,256
Mackay .. ..	1,310,496	208,273	395,559	111,824	372,627	+ 22,932
Rockhampton .. ..	630,303	45,483	62,674	38,326	61,846	+ 828
Townsville .. ..	3,076,448	278,896	580,962	181,199	523,115	+ 57,847
Total, 1959-60 ..	8,430,437	908,911	1,807,041	561,425	1,526,770	+ 280,271
„ 1958-59 .. ..	7,099,197	898,822	1,602,409	602,391	1,696,390	- 93,981
„ 1957-58 .. ..	5,435,172	775,436	1,226,581	603,081	1,190,356	+ 36,225
„ 1956-57 .. ..	3,567,335	757,778	1,005,986	578,259	1,170,528	- 164,542
„ 1955-56 .. ..	2,885,528	720,642	955,846	512,776	1,361,568	- 405,722

(a) Includes expenditure on capital works from accumulated revenue.

4. South Australia.—*The South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide, Port Pirie, Wallaroo, Port Lincoln and Thevenard. At a few ports, the wharves or jetties are privately controlled, the principal of these being at Whyalla, Ardrossan and Rapid Bay, all of which are controlled by the Broken Hill Pty. Co. Ltd. Port Augusta is controlled by the Commonwealth Railways on behalf of the Commonwealth Government. Maximum depths of water (low water) at the wharves of the main ports range from 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1956-57 to 1960-61.

## THE SOUTH AUSTRALIAN HARBORS BOARD: FINANCES.

(£.)

Year.	Capital at 30th June. (a)	Revenue.	Expenditure from Revenue.			Surplus (+) or Deficit (-)

(a) State Treasurer's Funds and Reserve employed.

5. Western Australia.—(i) *Fremantle Harbour Trust.* The Port of Fremantle is operated and controlled by the Fremantle Harbour Trust, a body corporate administered by a Board of five Commissioners appointed triennially by the Governor. The port covers an extensive water area of some 180 square miles and comprises an inner and an outer harbour. The inner harbour includes 18 deep water land-backed berths, providing more than 690,000 sq. ft. of covered storage space and 11,148 feet of wharf berth accommodation. All inner harbour berths are dredged to a depth of 36 feet. The outer harbour

includes three main anchorages, Gage Roads, Owen Anchorage and Cockburn Sound. Deep water jetties are available in the outer harbour including the oil refinery jetties in Cockburn Sound. Ocean going deep draft ships enter the Sound by means of channels dredged through Success and Parmelia Banks to a low water depth of 38 feet and a bottom width of 500 feet. The depth of water at the refinery jetties is a minimum of 44 feet.

Gross earnings for the year 1960–61 amounted to £3,081,154, working expenses to £2,485,039, interest charges to £256,791, debt redemption to £73,477 and renewals fund to £2,000. Special loan redemptions were £295,312 and net capital totalled £7,598,832.

(ii) *Albany Harbour Board.* The Albany Harbour is controlled by a board of five members appointed by the Government. The depth of water in the entrance channel is 33 feet, at one arm of the jetty 31 feet and at the other arm 34 feet. On approaches to wharf berths, the depth is 30 feet and dredging to accomplish a depth of 34 feet is being carried out. Wharf accommodation consists of 1,115 feet, and in addition the Deepwater Jetty has 2,500 feet of accommodation. Gross earnings for the year 1960–61 amounted to £143,195, working expenses £48,043, interest and sinking fund charges, £86,100, and amounts debited to loan capital account, £1,803,990.

(iii) *Bunbury Harbour Board.* The Bunbury Harbour is controlled by a board of five members appointed by the Government. The depth of water in the harbour is 30 feet and berthing accommodation is 3,700 feet. Gross earnings for the year 1960–61 amounted to £146,841, working expenses £99,928, interest and sinking fund charges £81,827, and amounts debited to loan capital account, £1,954,964.

(iv) *Other Ports.* The following ports are controlled by the State Government Harbour and Lights Department:—Geraldton, Yampi, Port Hedland, Carnarvon, Wyndham, Derby, Point Samson, Busselton, Onslow and Broome. The Port of Esperance is under the control of the Railways Commission.

6. *Tasmania.*—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport, Strahan, Currie (King Island), and White-mark (Flinders Island), and the harbour trusts those of Smithton and Ulverstone. Aggregate receipts of revenue accounts of all these authorities during the year 1959–60 were £1,489,325, and expenditures £1,290,793 including loan charges £280,484. The total receipts of the Hobart Marine Board during 1959–60 were £557,188, loan charges amounted to £100,684 and total expenditure to £499,630. Launceston Marine Board receipts during 1959–60 amounted to £350,318, loan charges to £33,358 and total expenditure to £296,390. Loan indebtedness of all marine boards and trusts at 30th June, 1960, was £4,019,481, of which £1,228,245 was in respect of Hobart (including Port Huon Wharf) and £460,281 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable oversea shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

## § 7. Fire Brigades.

1. *New South Wales.*—A Board of Fire Commissioners, consisting of five members, one appointed by the State Government (President) and one each representing insurance companies, local government authorities, volunteer firemen, and permanent firemen, operates under the Fire Brigades Act 1909–1958, and 155 fire districts had been constituted at the end of 1960. The cost of maintenance of fire brigades is borne in proportions of local councils and the Government each one-eighth, and the insurance companies three-quarters. The Board's borrowing power is limited to £1,000,000.

At 31st December, 1960, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 395 officers and 1,131 permanent and 2,564 volunteer firemen. Corresponding figures for the Sydney Fire District were 325, 1,027 and 322. The revenue for the year 1960 was £2,926,907, made up as follows:—from the Government,

£362,323; municipal and shires, £352,323; fire insurance companies and firms, £2,173,938, and from other sources, £28,323. The disbursements for the year were £3,110,511. The Board of Fire Commissioners provides the fire protection services for Canberra, in the Australian Capital Territory, and the cost of these services is reimbursed by the Commonwealth Government.

Under the Bush Fires Act 1949–1958, a Bush Fire Fighting Fund exists from which finance is provided for the prevention and fighting of bush fires. Contributions to the Fund by the Government, councils and insurance companies are in the proportion of one quarter, one quarter and one-half, respectively. At 30th June, 1961, Volunteer Brigades, equipped by means of this fund, numbered 2,500 with an active membership in excess of 60,000 persons. Up to 30th June, 1961, expenditure from the Fund for equipment amounted to £1,579,555.

2. Victoria.—(i) *General*. In Victoria, fire brigades are controlled by the Metropolitan Fire Brigades Board consisting of ten members, including an employees' representative, and the Country Fire Authority also consisting of ten members.

(ii) *Metropolitan Fire Brigades Board*. The Metropolitan Fire Brigades Board receives contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. On 30th June, 1961, the Board had under its control 45 stations, 924 permanent staff, 221 special service and clerical, etc., staff, and 20 part-time firemen. The total receipts for 1960–61 were £1,927,423 comprising contributions, £1,616,440, receipts for services, £193,131 and interest and sundries, £117,882. The expenditure was £1,784,581.

(iii) *Country Fire Authority*. This authority is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority receives contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury. At 30th June, 1961, the Country Fire Authority Act applied to 202 insurance companies, 206 urban and 1,035 rural fire brigades. The effective registered strength of the brigades was 102,620 members.

Income for the year 1960–61 amounted to £626,448. Total expenditure other than loan amounted to £555,721.

3. Queensland.—(i) *General*. Fire Districts are constituted under the Acts of 1920–1956. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows:—Treasury one-seventh, insurance companies five-sevenths, and local authorities one-seventh. The insurance companies' contribution is paid to the State Government and thence to Fire Brigades.

(ii) *Fire Brigade Boards*. At 30th June, 1960, there were 78 Fire Brigade Boards. The total number of stations was 142 and full-time staff numbered 789, including 23 administrative, 163 officers and 603 firemen. Volunteers numbered 110. Part-time staff numbered 1,099 including 77 administrative, 111 officers, and 911 firemen. The total revenue for the year 1959–60 was £1,206,434, received mainly from the following sources:—Government £164,778, local authorities £164,778, insurance companies £823,890. Loan receipts (Government and other) were £125,496. The total expenditure for the year was £1,168,358, the chief items being salaries and wages £881,386, and interest and redemption of loans £85,951.

4. South Australia.—The Fire Brigades Act 1936–1958 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury, five-ninths by insurance companies, and two-ninths by the municipalities concerned. When the Treasury proportion exceeds £10,000, the excess is borne five-sevenths by insurance companies and two-sevenths by the municipalities. At 30th June, 1961, there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The strength of the permanent staff at 31st December, 1961, was 391, including 272 officers and men, 89 country auxiliary firemen and 30 other employees (including maintenance workers). The total revenue for the year 1960–61 was £494,155, including contributions of £416,268 made up as follows:—insurance companies £250,621, Treasury £65,398 and municipalities £100,249. The Treasury contribution includes an additional grant of £52,986.

5. **Western Australia.**—In 1942, certain municipal and road board districts were constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 42 fire districts at 30th September, 1961. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 58 and 161 respectively. The brigades, throughout the State, controlled by the Western Australian Fire Brigades Board at 30th September, 1961, numbered 60, with a staff of 1,376 including 274 permanent officers and firemen and 1,102 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1961, was £565,398 and the expenditure £565,619.

Under the Bush Fires Act, a Bush Fires Board, consisting of ten members, five of whom are nominated by the Country Shire Councils Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,660 at 30th June, 1961, and the establishment of bush fire brigades, 761 at 30th June, 1961. Many individual brigades are large organizations with numerous self-contained sections.

6. **Tasmania.**—The Fire Brigades Act 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigades boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of two persons nominated by the Minister, one person elected by the City or Municipal Councils representatives and three persons elected by the insurance representatives of the Fire Brigades Boards. Contributions towards the cost of operations are on the basis of one quarter each from the Treasury and the municipalities and one half from the insurance companies concerned. The cost for the year 1959–60 amounted to £158,000. There were, at 30th June, 1960, 23 brigades controlling 36 stations, and their aggregate staffs numbered 552, including 101 permanent officers, 369 part-time firemen, including officers, and 82 volunteers.

## CHAPTER XX.

## PRIVATE FINANCE.

NOTE.—Further information on the subjects dealt with in this chapter is contained in the annual bulletin *Finance, Part I.—Public and Private Finance* published by this Bureau. Current information is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the monthly mimeograph statements *Australian Banking Statistics* (bulletin and preliminary statement), *Australian Savings Bank Statistics* (bulletin and preliminary statement) and *Australian Life Insurance Statistics* (bulletin). The annual mimeograph bulletin *Australian Fire, Marine and General Insurance Statistics* contains the most recent information available on this subject. Other relevant mimeograph statements are:—*Instalment Credit for Retail Sales*, and *Unit Trusts, Land Trusts, and Mutual Funds, Australia* (quarterly), *New Capital Raisings by Companies in Australia* (quarterly) and *Capital and Maintenance Expenditure by Private Businesses in Australia* (half-yearly). Preliminary monthly statements *Instalment Credit for Retail Sales* are issued also.

## A. CURRENCY.

## § 1. General.

The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian pound was specified as equivalent to 123.27447 grains of gold  $11\frac{1}{12}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 18th September, 1949, this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

## § 2. Coinage.

1. Coins in Circulation.—Brief historical notes relating to the Australian coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation see Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947, (dated 1946 and later) have a millesimal fineness of 500 (one-half silver and one-half other metals).

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916, and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926, and at the Perth branch in 1922 and from 1940 to the present time.

During the 1939–45 War, the two Australian Mints were unable to meet the demand for Australian coins, and some coins were minted in the United States of America and India. In 1951–52 and 1952–53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1961, are as follows:—Melbourne, £49,809,000; Perth, £1,707,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; Total, £61,189,000.

2. **Issues of Australian Coins.**—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1961, were:—Crown (5s.), £276,000; Florin (2s.), £20,206,000; Shilling (1s.) £8,453,000; Sixpence (6d.), £6,031,000; Threepence (3d.), £6,316,000; Total silver coin, £41,224,000; Penny (1d.), £2,575,000, Half-penny (½d.), £770,000; Total bronze coin, £3,345,000. Except in the total, no allowance has been made for £58,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1956–57 to 1960–61.

**AUSTRALIAN SILVER AND BRONZE COINS: PROFITS FROM ISSUE.**

(a) Includes selected and proof pieces.

NOTE.—Minus sign (–) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia, a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1960 and 1961 amounted to 972,963 and 984,517 fine ounces respectively (Melbourne, 115,491 and 118,318 fine ounces respectively; Perth, 857,472 and 866,199 fine ounces respectively).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Reserve Bank, and the export and use of gold have been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted. The issues from Australian mints during 1960 and 1961 amounted to 976,410 and 983,500 fine ounces respectively (Melbourne, 118,631 and 117,097 fine ounces respectively; Perth, 857,779 and 866,403 fine ounces respectively).

5. *Price of Gold.*—The following table shows the average prices of gold and the average values of the sovereign in London and Australia for the years 1956-57 to 1960-61. The average price of gold in Australia is based on the Reserve Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA.

Period.	London.		Australia.			
	Average price per fine oz.	Average value of Sovereign.	Average price per fine oz.	Sovereign.		Equivalent to a premium of—
				Average value.		
	£Stg. s. d.	£Stg. s. d.	£A. s. d.	£A. s. d.	%	
1956-57..	12 10 8	2 18 10	15 12 6	3 12 6	267.8	
1957-58..	12 9 10	2 18 10	15 12 6	3 12 6	267.8	
1958-59..	12 9 11	2 18 10	15 12 6	3 12 6	267.8	
1959-60..	12 10 3	2 18 10	15 12 6	3 12 6	267.8	
1960-61..	12 11 9	2 18 10	15 12 6	3 12 6	267.8	

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements, gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ( $1\frac{1}{2}$ ths).

The average prices per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for each month during 1960-61 for which there were sales were:—October, £15 14s. 1d.; November, £15 16s. 7d.; December, £15 15s. 6d.; January, £15 17s. 2d.; March, £15 13s. 3d.; April and May, £15 13s. 5d.; and June, £15 13s. 9d.

### § 3. Notes.

1. *General.*—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Reserve Bank is prohibited.

2. **The Australian Note Issue.**—(i) *General.* Notes in circulation in Australia are issued by the Reserve Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Reserve Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth, or a State. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1956-57 to 1960-61 are given in the following table.

**AUSTRALIAN NOTE ISSUE.**

(a) Notes of a denomination not exceeding one pound which have been on issue for more than 20 years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

In 1960-61, the net profits of the Note Issue Department amounted to £12,930,000 and were paid to the Commonwealth of Australia.

## B. BANKING.

## § 1. Cheque-Paying Banks.

1. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

2. **Banking Legislation.**—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." The principal Commonwealth Acts at present in force relating to Banking are—

- (a) *The Reserve Bank Act 1959*, which provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue;
- (b) *The Commonwealth Banks Act 1959*, which provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia and Commonwealth Development Bank of Australia; and
- (c) *The Banking Act 1959*, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The Banking Act 1959, which replaced the Banking Act 1945–1953, was assented to on 23rd April, 1959, and came into operation on 14th January, 1960. It applies to all banks, except State banks trading in their own State, operating in Australia or the Territories of the Commonwealth. The objects of the Act are:—(a) to provide a legal framework, uniform throughout Australia, for regulating the banking system; (b) to safeguard depositors of the banks from loss; (c) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (d) to control the volume of credit in circulation and bank interest rates; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 46, pages 759 and 760.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a *Companies Act of the States or the United Kingdom*. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business, are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into the following five groups and a separate series is presented for each.

- (a) *The Reserve Bank of Australia.* Formerly the Commonwealth Bank, this bank is the Central Bank. It also provides special banking facilities through the Rural Credits Department. Statistics of the Central Banking Business (including the Note Issue Department) and of the Rural Credits Department are presented in separate series.
- (b) *The Commonwealth Development Bank of Australia.* This bank, which commenced operations on 14th January, 1960, under the control of the Commonwealth Banking Corporation, an organization entirely separate from the Reserve Bank, was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Its prime purpose is to assist in the development of worth-while enterprises in the field of both primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions.

- (c) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the Commonwealth Bank Act 1953, it took over the business of the General Banking Division of the Commonwealth Bank. On 14th January, 1960, under the provisions of the Commonwealth Banks Act 1959, it came under the control of the Commonwealth Banking Corporation.
- (d) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks, but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Australia and New Zealand Bank Ltd. (an amalgamation of the Bank of Australasia Ltd. and the Union Bank of Australia Ltd.), The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd., The Commercial Banking Company of Sydney Ltd., The English, Scottish and Australian Bank Ltd. and The National Bank of Australasia Ltd. (which has absorbed The Queensland National Bank Ltd. and The Ballarat Banking Co. Ltd.).
- (e) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia. (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three overseas banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and overseas countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks, and the other cheque-paying banks included in the fifth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. *Banks Transacting Business in Australia.*—(i) *Number of Branches.* At 30th June, 1961, the 15 banks operating in Australia transacted all classes of banking business at 3,852 branches and 1,555 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd. transacts business in Brisbane only. The remaining three banks are branches of overseas banks.

(a) At various balance sheet dates during 1961. (b) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the Commonwealth Banks Act 1959. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the Bank for capital purposes. (c) Includes dividends declared but not paid at date of balance-sheet. (d) For the Commonwealth Trading Bank and the State Banks, the amount shown in this column is total capital and reserves. (See footnote (b).) (e) Includes uncalled capital. (f) For the State Government Banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other Banks, the net profit is the profit before writing off bank premises. (g) Dividends paid and payable out of profits earned during 1960-61. (h) These banks are in process of liquidation consequent upon the amalgamation of their business with the National Bank of Australasia Ltd.

5. *The Reserve Bank of Australia.*—(i) *General.* The Reserve Bank of Australia, established under the Reserve Bank Act 1959, which came into operation on 14th January, 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that Bank is given in earlier issues of the Official Year Book (see No. 37, pp. 570 to 573, and No. 45, pp. 735 to 737).

The general functions of the Reserve Bank are set out in Section 10 of the Reserve Bank Act 1959 which states:—

“ It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia and that the powers of the Bank under this Act, the Banking Act 1959, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

- (a) the stability of the currency of Australia;
- (b) the maintenance of full employment in Australia; and
- (c) the economic prosperity and welfare of the people of Australia.”

In addition to its functions as a Central Bank, the Bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as banker to the Commonwealth and some of the States.

Prior to its reconstitution as the Reserve Bank, the Commonwealth Bank also provided general banking facilities through a General Banking Division up to 3rd December, 1953, when that business was taken over by the Commonwealth Trading Bank, and special banking facilities through the Mortgage Bank and Industrial Finance Departments. In addition, the Board of the Commonwealth Bank was responsible for the policy and administration of the Commonwealth Trading Bank and Commonwealth Savings Bank. On 14th January, 1960, on its reconstitution as the Reserve Bank, the Mortgage Bank and Industrial Finance Departments were amalgamated to form the Commonwealth Development Bank, and that institution, together with the Commonwealth Trading Bank and the Commonwealth Savings Bank, was placed under the control of the Commonwealth Banking Corporation, an organization established under the Commonwealth Banks Act 1959 and entirely separate from the Reserve Bank.

(ii) *Management.* Under the Commonwealth Bank Act 1911, the Commonwealth Bank was managed by a Governor. From 1924 to August, 1945, it was controlled by a Board of Directors. Under the Commonwealth Bank Act 1945, control was vested in a Governor, assisted by an Advisory Council. From August, 1951, under the Commonwealth Bank Act 1951, it was controlled by a Board of Directors.

Under the provisions of the Reserve Bank Act 1959, the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

(iii) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911–1943 and under its war-time powers under the National Security Regulations, the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III. of the Commonwealth Bank Act 1945 formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the Reserve Bank Act 1959, the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14th January, 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

(iv) *Note Issue Department.* The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

(v) *Rural Credits Department.* The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the Reserve Bank Act 1959, the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14th January, 1960, and £2,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one half shall be placed to the credit of the Rural Credits Department Reserve Fund and (b) one half shall be placed to the credit of the Rural Credits Development Fund.

(vi) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Reserve Bank at 30th June, 1961, are shown in the following table.

1961 .. .. .	62,332	72,356	54	72,410

(a) Prior to 14th January, 1960, Commonwealth Bank of Australia.

6. The Commonwealth Banking Corporation.—(i) *General.* The Commonwealth Banking Corporation was established under the Commonwealth Banks Act 1959 and came into being on the 14th January, 1960. The Corporation is entirely separate from the Reserve Bank and is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. The general functions of the corporation are set out in Section 9 of the Commonwealth Banks Act 1959 which states:

“ It is the duty of the Board, within the limits of its powers, to ensure that the policy of the Trading Bank, of the Savings Bank and of the Development Bank are directed to the greatest advantage of the people of Australia and have due regard to the stability and balanced development of the Australian economy.”

Under the Banking Act 1959, the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

(ii) *Management.* The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board, the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

In paras. 7 and 8 following, details are given of the assets and liabilities of the Commonwealth Development Bank and the Commonwealth Trading Bank. Details for the Commonwealth Savings Bank are shown in § 2 of this chapter, page 789.

7. Commonwealth Development Bank of Australia.—(i) *General.* The Commonwealth Development Bank of Australia was established by the Commonwealth Banks Act 1959 and commenced operations on 14th January, 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act, the Bank is authorized to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation, and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14th January, 1960, £5,000,000 provided by the Reserve Bank, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Development Bank at 30th June, 1961, are shown in the following table.

**COMMONWEALTH DEVELOPMENT BANK OF AUSTRALIA:

1961 .. .. .	17,954	18,951	17,535	7,407	1,134	45,027

(a) Prior to 14th January, 1960, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank of Australia.

(iv) *Profits.* The net profit of the Commonwealth Development Bank for the year ended 30th June, 1961, was £611,590. The net profit was appropriated to the Commonwealth Development Bank Reserve Fund.

8. The Commonwealth Trading Bank of Australia.—(i) *General.* The Commonwealth Trading Bank of Australia was established by the Commonwealth Bank Act 1953 and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. It was managed by a General Manager under the Governor of the Commonwealth Bank and its policy was determined by the Board of that Bank. Under the provisions of the Commonwealth Banks Act 1959, which came into operation on 14th January, 1960, the Commonwealth Trading Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation. The Commonwealth Trading Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation. The capital of the Commonwealth Trading Bank is the capital of the Commonwealth Trading Bank immediately prior to 14th January, 1960, £2,000,000 provided by the Reserve Bank, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund. Under the Act, the Bank is liable for income taxes. The net profits of the Bank, after provision for taxation, are divided as follows:— (a) one-half shall be placed to the credit of the Commonwealth Trading Bank Reserve Fund and (b) one-half shall be paid to the Commonwealth.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1961, are shown in the following table.

COMMONWEALTH TRADING BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE, 1961.

(a) Includes Territories of Papua and New Guinea. (b) Based on averages of assets and liabilities for the years shown. (c) Coin, bullion, notes and cash with Reserve Bank on current account.

13. *Classification of Advances within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).*—(i) *States, June, 1961.* A classification of bank advances of the Commonwealth and Private Trading Banks outstanding at the end of June, 1961, is shown in the following table.

Resident borrowers cover institutions (including branches of oversea institutions) engaged in business in Australia and persons permanently residing in Australia. Non-resident borrowers cover all other persons and institutions incorporated abroad, which, though represented, do not carry on business in Australia. Advances to resident borrowers have been classified as business advances, advances to public authorities, personal advances and advances to non-profit organizations. Business advances have been further classified to the main industry of the borrower and include advances to partnerships, companies and other institutions engaged in business in Australia, advances to persons actively engaged in business on their own behalf if the advance is mainly for business purposes, advances to mutual, co-operative and benefit societies which distribute their profits or surpluses (if any) to members by way of dividends, rebates on charges for goods and services, or increased benefits. Advances to public authorities cover advances to local and semi-governmental authorities including separately constituted government business undertakings but not the Commonwealth or State Governments. Personal advances cover advances to persons for purposes other than carrying on a business. Advances to non-profit organizations cover advances to organizations which are not carried on for the purpose of making a profit or gain to individual members, any income of the organization being used for the purposes of the organization or for the benefit of the community.

# BANKING: AUSTRALIA, 1952 TO 1961

# LIFE INSURANCE: AUSTRALIA

(a) Excludes deposits of Commonwealth and State Governments. (b) Includes Territories of Papua and New Guinea. (c) "At end of" is used for convenience. Information for individual banks or groups of banks relates to various dates around the end of the period shown. (d) The combined deposits of these two groups are distributed over the industries above.

15. Interest on Deposits: Rates—Cheque-paying Banks.—Particulars of interest rates since 1952 for fixed deposits are shown hereunder.

## BANK FIXED DEPOSIT RATES: AUSTRALIA.

(Per cent. per annum.)

Date from which Operative.	Deposits for—			
	Three Months.	Six Months.	Twelve Months.	Twenty-four Months.
29th July, 1952 .. .. .	1	1½	1½	(a) 1½
1st January, 1955 .. .. .	1½	1½	1½	2
15th March, 1956 .. .. .	2½	2½	2½	3
4th December, 1956 .. .. .	2½	2½	2½	3½
17th November, 1960 .. .. .	4(b)		4½	(c)

(a) On first £10,000; rate on amounts in excess of £10,000 was 1½ per cent. (b) Three months but less than twelve months. (c) The maximum period for fixed deposits is 12 months.

16. **Clearing House Returns—Average Weekly Clearings.**—The average weekly clearings in each capital city for the years ended June, 1957 to 1961, are shown in the following table.

## BANK CLEARINGS(a): AVERAGE WEEKLY CLEARINGS.

(£'000.)

Year ended June—	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Total.
1957 ..	119,381	107,563	25,571	23,042	14,927	4,237	294,721
1958 ..	124,172	114,854	25,835	24,099	15,598	4,427	308,985
1959 ..	135,387	128,870	27,227	25,299	15,786	4,893	337,462
1960 ..	167,858	156,625	34,202	30,461	19,579	6,062	414,787
1961 ..	190,929	172,942	40,263	35,773	23,255	7,122	470,284

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

17. **Debits to Customers' Accounts—Cheque-paying Banks.**—Statistics of debits to customers' accounts have been collected since September, 1945. Generally, they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks (including the Rural Credits Department of the Reserve Bank and the Commonwealth Development Bank) are shown for each State for the years ended June, 1957 to 1961. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

## ALL CHEQUE-PAYING BANKS: AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS.

(Excluding Debits to Australian Government Accounts in Capital Cities.)

(£'000.)

Year ended June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Total.
1957 ..	219,368	195,455	62,743	42,685	28,571	12,609	633	1,229	563,293
1958 ..	230,335	207,059	65,655	44,276	30,215	12,930	724	1,533	592,727

1960 ..	296,295	264,561	79,172	53,374	34,852	15,483	942	2,678	747,357
1961 ..	322,466	282,936	81,901	58,011	37,839	16,236	1,020	3,363	803,772

18. **Rates of Exchange.**—(i) *Overseas Exchange Rates.* In the following table, the par of exchange (based on par values agreed with the International Monetary Fund) and average telegraphic transfer selling rates of exchange for Sydney on a number of overseas countries are shown. Generally, the averages, which are averages of daily quotations, are based on rates quoted by the Commonwealth Trading Bank, but where these were not available rates issued by the Department of Customs and Excise have been used.

**OVERSEA EXCHANGE RATES: PAR OF EXCHANGE AND AVERAGE TELEGRAPHIC TRANSFER SELLING RATES FOR SYDNEY ON OVERSEA COUNTRIES.**

(a) Unchanged since 1st January, 1940.

There is no charge for transfers within a city or a town. In all States except Queensland and Western Australia, the exchange for transfers between towns in the same State is 2s. per £100. Queensland and Western Australia are divided into zones. The exchange rate for transfers between towns in the same zone is 2s. per £100, with higher rates for inter-zone transfers.

The exchange rate between the Territories of Papua and New Guinea and the mainland is 10s. per £100 for all points.

## § 2. Savings Banks.

1. *General.*—For information as to the origin of savings banks in Australia and the facilities currently available, see Official Year Book No. 46, page 779 and earlier issues.

During 1956, four new savings banks, the Bank of New South Wales Savings Bank Ltd., the Australia and New Zealand Savings Bank Ltd., the C.B.C. Savings Bank Ltd., and The Rural and Industries Bank of Western Australia, were established. Three of these are associated with and operate from the same premises as existing private trading banks, and the other is a division of a State bank—The Rural and Industries Bank of Western Australia. Savings banks operating at 30th June, 1961, were—the Commonwealth Savings Bank and the Australian and New Zealand Savings Bank Ltd. (in all States and Territories), the Bank of New South Wales Savings Bank Ltd. (in all States and Territories except South Australia and Tasmania), the C.B.C. Savings Bank Ltd. (in all States except South Australia and Tasmania, and in the Australian Capital Territory), The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Launceston Bank for Savings and The Hobart Savings Bank.

All savings banks, including trustee savings banks but not State savings banks, are subject to the Banking Act 1959. Details of this Act and the special provisions applying to savings banks are given in Official Year Book No. 46, pages 759-60.

2. **Branches and Agencies.**—The number of branches and agencies in Australia of the various savings banks at 30th June, 1961, are given in the following table.

**ALL SAVINGS BANKS: NUMBER OF BRANCHES AND AGENCIES AT 30th JUNE, 1961.**

Bank.	Branches.	Agencies.
Commonwealth Savings Bank .. .. .	723	6,825
Australia and New Zealand Savings Bank Ltd. .. .. .	498	598
Bank of New South Wales Savings Bank Ltd. .. .. .	697	1,679
C.B.C. Savings Bank Ltd. .. .. .	384	82
The State Savings Bank of Victoria .. .. .	387	632
The Savings Bank of South Australia .. .. .	101	629
The Rural and Industries Bank of Western Australia .. .. .	40	213
The Launceston Bank for Savings .. .. .	21	46
The Hobart Savings Bank .. .. .	20	20
<b>Total .. .. .</b>	<b>2,871</b>	<b>10,724</b>

3. **Number of Operative Accounts.**—The following table shows the number of operative savings bank accounts in existence at the end of June, 1960 and 1961. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

**ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS.(a)**

State or Territory.	At end of June—	
	1960.	1961.
New South Wales .. .. .	3,013,260	3,151,362

6. Cheque Accounts.—At most savings banks, cheque accounts are available to non-profit organizations such as friendly, co-operative and charitable societies. Similar facilities are also available to other depositors at the State Savings Bank of Victoria. Details of the transactions on these accounts during the year ended June, 1961 (excluding the Savings Bank of South Australia), together with the number of operative accounts and the amount on deposit at the end of June, 1961, were as follows:—Deposits during the year, £453,758,692; withdrawals during the year, £452,819,295; interest added during the year, £810,135, number of operative accounts at the end of year, 193,378; amount on deposit at end of year, £43,884,011. These figures are included in the statistics in previous paragraphs.

7. **School Banking.**—With the object of encouraging principles of thrift among children, agencies of the savings banks have been established at most of the schools throughout Australia. Particulars of operative accounts within Australia at the end of June, 1957 to 1961, appear below.

**SCHOOL SAVINGS BANKS: AUSTRALIA.**

At end of June—				Number of School Agencies.	Number of Operative Accounts.	Deposits.	Deposits per Operative Account.		
							£	£	s.
1957..	..	..	..	8,294	895,139	6,429,490	7	3	8
1958..	..	..	..	8,650	986,758	6,924,422	7	0	4
1959..	..	..	..	8,856	1,050,742	7,479,254	7	2	4

<b>Total .. .. .</b>	<b>1,596,181</b>	<b>1,662,030</b>

(a) Includes assets in Territories of Papua, New Guinea and Norfolk Island.

9. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (see No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. The total value of savings certificates outstanding at 30th June in each of the last five years was:—1957, £20,043,000; 1958, £16,004,000; 1959, £10,633,000; 1960, £8,205,000; 1961, £5,989,000.

10. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Commonwealth Savings Bank of Australia was established as a separate institution on 9th June, 1928, having functioned previously as a department of the Commonwealth Bank (for particulars of the origin of the Savings Bank Department and the extension of its services see Official Year Book No. 46, page 783 and earlier issues of this Year Book). It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The Commonwealth Bank Act 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the savings bank. This Commission was never appointed, and the Commonwealth Bank Act 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank. Under the provisions of the Commonwealth Banks Act 1959, which came into operation on 14th January, 1960, the Commonwealth Savings Bank was maintained in the same form, but was placed under the control

of the Commonwealth Banking Corporation (see also para. 6, page 771. Under the Banking Act 1959, the Commonwealth Savings Bank is subject to the same conditions as apply to the private savings banks and the trustee savings banks.

(ii) *Balance-sheet, 30th June, 1960 and 1961.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1960 and 1961, are as follows.

**COMMONWEALTH SAVINGS BANK(a): LIABILITIES AND ASSETS, 30th JUNE, 1960 AND 1961.**  
(£'000.)

Liabilities.	1960.	1961.	Assets.	1960.	1961.

			Other Public Securities	996	934
			Loans to Authorized Dealers in the Short-term Money Market	825	3,280
			Loans and Advances (after deducting provisions for Debts considered bad or doubtful) .. ..	136,096	148,394
			Bank Premises ..	11,537	13,146
			Bills Receivable and all other Assets ..	8,099	8,680
<b>Total .. ..</b>	<b>842,317</b>	<b>864,248</b>	<b>Total .. ..</b>	<b>842,317</b>	<b>864,248</b>

(a) Includes branches in London, the Territories of Papua, New Guinea, and Norfolk Island, and the British Solomon Islands.

(iii) *Profits.* Under the terms of the Savings Bank Amalgamation Agreements relative to the absorption of the State savings banks by the Commonwealth Bank, the profits of the Commonwealth Savings Bank in New South Wales, Queensland, Western Australia and Tasmania are equally divided between the Bank and the former controlling authorities in those States. Net profits for the years ended 30th June, 1957 to 1961, and the distribution of those profits, are shown in the following table.

**COMMONWEALTH SAVINGS BANK: DISTRIBUTION OF PROFITS.**

(£.)

Year ended 30th June—	Total Profit.	Payments to State Authorities under Savings Bank Amalgamation Agreements.	Net Profit.	Distribution of Net Profit.	
				Commonwealth of Australia.	Savings Bank Reserve Fund.

12. *Trustee Savings Banks, Hobart and Launceston.*—(i) *General.* Two Trustee Savings Banks, Hobart and Launceston, operate within Tasmania. These banks commenced business in 1845 and 1835 respectively. Under the Banking Act 1959, they are subject to the same conditions as apply to the Commonwealth Savings Bank and the private savings banks.

(ii) *Assets.* The assets of the Trustee Savings Banks as at 31st August, 1960 and 1961, are set out in the following table.

**TRUSTEE SAVINGS BANKS: ASSETS AT 31st AUGUST, 1960 AND 1961.**

## C. REGISTERED BUILDING AND CO-OPERATIVE SOCIETIES.

## § 1. Registered Building Societies.

1. Summary.—During 1959 and 1960, returns were received from 1,454 and 1,571 societies respectively, but the information was not exhaustive, as particulars regarding a number of organizations were not included. In the following table, general information is given relating to the societies in each State for the year 1959–60 and to the combined States for 1958–59.

## REGISTERED BUILDING SOCIETIES: SUMMARY, 1958-59 AND 1959-60.

(a) Includes advances on mortgages of terminating societies which are on a gross basis. Net advances may be derived by subtracting the liability item "Borrowing Members' Funds". See preceding page.  
 (b) Years 1960 and 1959.

3. Co-operative Housing Societies, Victoria.—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the Annual Reports of the Registrar of Co-operative Housing Societies. At 30th June, 1960 (1959 in parentheses), 518 (482) co-operative housing societies were registered in Victoria with 36,641 (34,828) members who had subscribed for 1,544,714 (1,418,663) shares, giving a nominal share capital subscribed of £79,914,179 (£72,850,785). For the twelve months ended 30th April, 1960 (1959), returns were submitted by 494 (460) societies, the total income of those societies being £430,725 (£357,475) and total expenditure, £372,846 (£318,646). The liabilities at 30th April, 1960 (1959), of the societies submitting returns were:—bank or other loans £53,156,151 (£47,290,197), subscriptions £8,851,046 (£7,689,078), surplus interest and management expenses £847,099 (£670,189), other liabilities £2,320,360 (£1,892,399), total liabilities £65,174,656 (£57,541,863). Assets at the same date consisted of:—advances £64,819,623 (£57,273,561), other assets £355,033 (£268,302), total assets £65,174,656 (£57,541,863).

## § 2. Co-operative Societies.

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the Co-operation Act 1923-1954. A summary of the business of all co-operative societies for the years 1959-60 or 1960 for all States except Western Australia is given in the following tables. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Finance, Part I.—Public and Private Finance*, and issue No. 51, 1959-60, contains details for 1958-59 or 1959.

## D. INSURANCE.

## § 1. Introductory.

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the Marine Insurance Act 1909 defining the limits of marine insurance and regulating the terms of contracts, etc., the Insurance Act 1932–1937 requiring the lodgment of deposits by insurance companies, and the Life Insurance Act 1945–1961 generally regulating life insurance business in Australia. The Marine Insurance Act 1909 and the Insurance Act 1932–1937 have limited application, and, except for life insurance business, which is regulated by the Life Insurance Act 1945–1961, insurance business is conducted almost entirely under State laws.

2. **Insurance Act 1932–1937.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; and friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the Life Insurance Act 1945–1961, ceased to apply to life insurance business.

3. **Life Insurance Act 1945–1961.**—The objects of this Act are:—(a) to replace all State legislation on the subject of life insurance, except that relating to the life insurance operations of State insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945, and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Official Year Book No. 37, pages 595 to 597.

The provisions of the Act relating to the establishment of a Commonwealth Government Insurance Office were repealed under the Life Insurance Act No. 94 of 1953.

4. **Export Payments Insurance Corporation Act 1956.**—Details of the operations of the *Export Payments Insurance Corporation set up under this Act may be found in § 5 of Chapter XIII., Trade (see p. 477).*

5. **Deposits under Insurance Acts.**—Deposits lodged under the Insurance Acts at 30th June, 1961, totalled £9,112,053, comprising £1,632,580 held by the Commonwealth in respect of life insurance and £7,257,183 held by the Commonwealth and £222,290 held by the States in respect of other forms of insurance. The deposits consisted of government, local, and semi-governmental securities £6,103,103, fixed deposits £6,000, bank guarantees and undertakings £2,366,000, corporation debentures and stock £226,800 and titles and mortgages £410,150.

## § 2. Life Insurance.

1. **General.**—Since 1947, returns lodged under the Life Insurance Act 1945–1961 have been used to compile life insurance statistics. Except where otherwise indicated, the figures in the succeeding paragraphs refer to Australian business only. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

The information shown has been compiled from returns of life insurance business submitted in the financial years which ended during the year stated.

2. **Offices Transacting Business.**—The number of offices which transacted life insurance business in Australia during 1961 was 36, including 10 overseas companies. Of the 26 Australian offices, 6 are purely mutual, including one which transacts general business in respect of which share capital is used, 18 are public companies, and 2 are State Government institutions. Of the total offices, 23 transacted ordinary business only and the remainder both ordinary and industrial business. Where possible, ordinary and industrial business have been kept separate in the following tables.

3. **Australian Business—Policies in Existence.**—In the following table, details of policies on the registers in each State and in the Australian Capital Territory are given for the year 1960.

<b>Australia(c) .. ..</b>	<b>290,315</b>	<b>28,969</b>	<b>1,482</b>	<b>..</b>	<b>..</b>	<b>..</b>

(a) Includes matured, surrendered, forfeited, conversions to other classes of business, etc. (b) Location of register of policies. (c) Includes Territories of Papua and New Guinea. (d) Includes the Northern Territory.

NOTE.—Minus sign (—) denotes an increase in existing business in the registers concerned, due to an excess of transfers from other States or of conversions from other classes of business, over discontinuances.

Policies discontinued or reduced in Australia during each of the years 1956 to 1960 were as shown in the following table.

**LIFE INSURANCE: POLICIES DISCONTINUED OR REDUCED  
IN AUSTRALIA.(a)**

Year.	Insurance and Endowment Policies.			Annuity Policies.			
	Number of Policies.	Sum Insured. (£'000.)	Annual Premiums. (£'000.)	Number of Policies.	Annuities per Annum. (£'000.)	Annual Premiums. (£'000.)	
<b>ORDINARY BUSINESS.</b>							
1956	.. .. .	180,858	119,928	4,534	1,436	878	227
1957	.. .. .	191,520	135,344	4,852	5,498	857	(b) - 308
1958	.. .. .	190,970	159,702	5,627	2,217	543	197
1959	.. .. .	207,796	185,917	6,260	6,890	1,106	330
1960	.. .. .	287,031	242,800	7,028	1,267	1,481	486
<b>INDUSTRIAL BUSINESS.</b>							
1956	.. .. .	275,722	24,907	1,327	..	..	..
1957	.. .. .	296,002	26,383	1,378	..	..	..
1958	.. .. .	285,399	26,960	1,393	..	..	..
1959	.. .. .	280,182	28,886	1,504	..	..	..
1960	.. .. .	290,315	28,969	1,482	..	..	..

(a) See note (a) to preceding table. (b) The negative amount shown is due to an adjustment to the annual premiums on certain annuities which in previous years were treated as single premiums.

The number of policies and sums insured, excluding annuities, discontinued during the years 1956 to 1960 and the causes for discontinuance are given in the following table.

**LIFE INSURANCE: POLICIES(a) DISCONTINUED OR REDUCED IN AUSTRALIA—

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their insurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities and assets in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life insurance business of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand) and the Australian business only of the other ten overseas companies operating in Australia. For various reasons, several offices do not attempt the dissection of liabilities and assets between industrial and ordinary business, and, therefore, the figures in the following tables relate to ordinary and industrial business combined. Details of the total liabilities of life insurance offices for the year 1960 are given in the following table.

**ORDINARY AND INDUSTRIAL LIFE INSURANCE: TOTAL LIABILITIES, 1960.**

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.  
(b) Includes Territories of Papua and New Guinea. (c) Includes the Northern Territory.

### § 3. Fire, Marine and General Insurance.

1. **General.**—The following statistics, which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to Fire Brigades, Commission and Agents' Charges, and Expenses of Management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and are not construable as "Profit and Loss" statements or "Revenue Accounts".

In cases where the business is underwritten in one State and the risk is situated in another, the business is included in the State in which the policy was issued.

During 1960-61, revenue from premiums amounted to £198,908,000, and that from net interest on investments, etc., to £10,213,000, a total of £209,121,000. Expenditure on claims amounted to £129,308,000, contributions to fire brigades, £5,150,000, commission and agents' charges £18,274,000, expenses of management £33,857,000, and taxation £7,221,000, a total of £193,810,000.

2. **States.**—The following table shows, for each State, the aggregate premium income less reinsurances and returns, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1956-57 to 1960-61.

**FIRE, MARINE AND GENERAL INSURANCE: PREMIUMS AND CLAIMS—STATES.**

**E. INSTALMENT CREDIT FOR RETAIL SALES BY RETAIL BUSINESSES AND NON-RETAIL FINANCE BUSINESSES.**

1. *General.*—Information relating to instalment credit for retail sales in Australia is given in the following tables. Information in more detail may be found in the monthly and quarterly statements relating to instalment credit for retail sales issued by this Bureau.

The statistics cover operations of all types of instalment credit schemes which relate primarily to the financing of retail sales of goods, whether the credit is advanced by a retail business or by a non-retail finance business. In general, the term "instalment credit" is defined as relating to schemes in which repayment is made by regular pre-determined instalments. Types of schemes covered include Hire Purchase, Time Payment, Budget Account, and Personal Loan schemes which relate primarily to financing of retail sales of goods. In these statistics, the term "retail sales" relates not only to retail sales by retail establishments coming within the scope of the Censuses of Retail Establishments conducted periodically by this Bureau, but includes also other sales of goods to final purchasers (e.g. plant and machinery).

2. *New Retail Agreements, 1956-57 and 1958-59 to 1960-61.*—Details of amounts financed on new retail agreements in the years 1956-57 and 1958-59 to 1960-61 are given in the following tables.

(e) Not available for years prior to 1959–60.

**F. NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA.**

1. **General.**—Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Finance, Part I.—Public and Private Finance* and in quarterly bulletins dealing with capital raisings.

The statistics (the collection of which commenced in July, 1954) relate to capital raised by companies through issues of shares, and in the case of companies listed on stock exchanges, through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included, and, in the case of unlisted companies, capital raised through loans not secured over any of the assets of the company is excluded.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by Australian companies, capital raised in this way from Australian sources by overseas public companies through their Australian offices.

The following are explanatory notes relating to some of the items shown in the tables.

*New Money.* This is the net amount of cash transferred from the investing public to the companies. For this purpose, the investing public includes banks and life insurance companies (except when subscribing to issues by associated companies), and government and private superannuation funds, but excludes other Government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow, the amount of new money is obtained by deducting from the total cash raised the "amount not involving a net transfer of funds from the investing public".

*Amounts not involving new money.* These amounts include cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the "investing public". Also included are amounts which, although subscribed by the "investing public" (i.e. subscribers other than "associated companies"), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the "investing public", and do not represent a net transfer of cash from the "investing public" to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

2. *Companies Listed on Stock Exchanges.*—Details of new capital raised through issues of shares, debentures, or registered notes, or accepting deposits are given in the following table for each of the years 1956–57 to 1960–61.

**LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c).**

(a) Includes preference shares. (b) Excludes deposits accepted by banks, insurance companies, pastoral companies and building societies, and loans to authorized dealers in the short-term money market.

(c) Includes only loans which are secured by charges over the companies' entire assets.

(d) Not available for publication.

## G. UNIT TRUSTS, LAND TRUSTS, AND MUTUAL FUNDS.

1. General.—Statistics relating to operations in Australia of unit trusts, land trusts and mutual funds have been collected quarterly since March, 1961, and are shown in the following tables. The figures do not include details of superannuation funds conducted by unit trusts management companies.

2. Transactions of Trusts and Funds.—Particulars of cash transactions in trust units and fund shares and of purchases and sales of investments by trusts and funds are given below.

## TRANSACTIONS OF TRUSTS AND FUNDS, 1961.

(£ million.)

Quarter ended—	Cash Transactions in respect of Trust Units and Fund Shares.		Purchases and Sales of Investments.(a)	
	Total Amount Received for Trust Units and Fund Shares Issued.(b)	Total Amount Paid for Trust Units and Fund Shares Re-purchased.(c)	Purchases.(d)	Sales.(e)
March, 1961 .. .. .	2.6	1.8	3.6	1.6
June, 1961 .. .. .	3.2	2.0	2.7	1.3
September, 1961 .. .. .	4.3	1.9	3.0	1.1
December, 1961 .. .. .	3.2	1.5	2.1	0.7

(a) Commonwealth Government, Local Authority and Semi-governmental Securities, shares, debentures, unsecured notes, loans, deposits on term or notice of three months or longer, land and buildings, etc. (b) Includes re-issues and new issues. Includes fees and expenses. (c) Includes those units and fund shares intended for re-issue. (d) Payments for assets acquired during quarter. Includes brokerage and stamp duty. (e) Receipts for assets sold or redeemed during quarter. Excludes brokerage and stamp duty.

3. Market Value of Trusts and Funds, and Cash and Short-term Deposits of Trusts and Funds.—The total market value of trusts and funds and the cash and short-term deposits of trusts and funds are shown in the following table.

## TOTAL MARKET VALUE OF TRUSTS AND FUNDS, AND CASH AND SHORT-TERM DEPOSITS OF TRUSTS AND FUNDS, 1961.

(£ million.)

At—	Total Market Value of Trusts and Funds.(a)	Cash and Short-term Deposits.(b)
31st March, 1961 .. .. .	81.0	4.6
30th June, 1961 .. .. .	84.0	3.8
30th September, 1961 .. .. .	85.8	3.2
31st December, 1961 .. .. .	87.7	3.5

(a) Includes value of land trusts at valuation. (b) Includes cash on hand and at bank, loans to authorized dealers in the short-term money market, and other deposits under three months term or notice.

## H. RURAL ADVANCES OF PASTORAL FINANCE COMPANIES.

The following table is derived from returns supplied to the Reserve Bank by major pastoral finance companies, and shows the total rural advances outstanding at the end of June, 1956 to 1960, and of subsequent quarters to June, 1961.

## RURAL ADVANCES OF PASTORAL FINANCE COMPANIES(a).

(Source: Reserve Bank of Australia.)

(£ million.)

At end of—	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia and Tasmania.	Total.
June, 1956 ..	21.1	15.1	15.5	11.8	10.7	74.3
„ 1957 ..	24.0	15.7	14.2	12.8	13.3	80.1
„ 1958 ..	28.4	14.5	20.0	14.4	15.6	92.9
„ 1959 ..	26.5	16.0	21.2	13.4	14.2	91.3
„ 1960 ..	29.6	17.7	24.3	14.9	15.4	101.9
September, 1960 ..	33.4	22.0	25.7	16.5	16.1	113.7
December, 1960 ..	32.0	24.5	26.2	18.7	15.7	117.1

June, 1961 ..	29.8	19.9	23.4	17.4	15.9	106.4
September, 1961 ..	32.2	21.7	24.7	17.5	16.1	112.1
December, 1961 ..	28.2	20.6	24.8	17.8	14.7	106.0

(a) Compiled from returns supplied by major pastoral finance companies. Advances are classified according to the location of the branch holding the advance, which in some cases may differ from the State of residence of the borrower. The statistics refer to the total advances outstanding at the end of the month shown.

## I. SHORT-TERM MONEY MARKET.

1. General.—For some years prior to 1959, leading stockbrokers had been actively engaged in the acceptance of short-term funds against the security of Government securities, but their operations were limited by the absence of suitable short term securities and their liquidity requirements.

In February, 1959, the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorized dealers in the short-term money market.

The form of organization so far developed consists of several companies authorized to act as dealers in the market. These dealers accept loans overnight, at call or for fixed periods in amounts of at least £25,000, and invest the funds in "money market securities", which have been defined as Commonwealth Government securities with currencies not exceeding three years.

Dealers are required to provide for a minimum capitalization and, in addition, to lodge with the Bank part of their capital in the form of money market securities as general backing for their operations. These lodgments which are referred to as "margins" are required to be equivalent on market values to at least:—(a) one per cent. of the total holdings by the dealer of securities maturing in one year; (b) two per cent. of the total holdings by the dealer of securities maturing within one to two years; and (c) four per cent. of the total holdings by the dealer of securities maturing within two to three years.

The Bank approves for each dealer the maximum portfolio of money market securities which may be carried and establishes a line of credit in favour of the dealer to the extent of that approved maximum portfolio. Under the line of credit, which is subject to renewal from time to time, the dealer may borrow in the last resort from the Bank against lodgment of security.

2. Selected Assets and Liabilities of Authorized Dealers and Rates of Interest on Loans Accepted.—In the following table, details of selected assets and liabilities of authorized dealers and the interest rates on loans accepted by dealers are given for each month January to December, 1960.

### J. FRIENDLY SOCIETIES.

1. **General.**—The total membership of friendly societies in Australia is about 450,000, but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowance is made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. **Societies, Members and Revenue.**—The following table sets out the number of societies, members, etc., revenue and expenditure, and funds of registered societies for the year 1959-60. More detailed information is available in the bulletins *Finance, Part I.—Public and Private Finance*, and issue No. 51, 1959-60, contains particulars for the year 1958-59.

K. PROBATES AND LETTERS OF ADMINISTRATION.

The following table gives some particulars of the number and value of estates of deceased persons in each State for the latest year for which information is available. Owing to differences in legislation in the various States, the figures are not entirely comparable. Figures shown for Queensland now relate to all estates dealt with; previous figures shown related only to estates dealt with by the Supreme Court.

## L. LOTTERIES AND BETTING.

## § 1. Lotteries.

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersall Lotteries and Tasmanian Lotteries are operated under Government licences in Victoria and Tasmania respectively. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc. For information as to the origin, purpose and method of payment of proceeds or taxes to State revenues *see* Official Year Book No. 46, page 808 and earlier issues of this Year Book.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State Government revenues, relating to lotteries drawn during each of the years ended 30th June, 1957 to 1961, are given in the following table.

**LOTTERIES: VALUE OF TICKET SALES, PRIZES ALLOTTED, TAXES PAID AND OTHER NET CONTRIBUTIONS TO STATE GOVERNMENT REVENUES.**

**M. PENSION AND SUPERANNUATION SCHEMES.**

**§ 1. Government and Semi-Governmental Pension and Superannuation Schemes.**

The Commonwealth and all State Governments have established pension or superannuation schemes for their employees. These schemes are operated through funds to which both the Government and the employees make contributions. Employees of semi-governmental authorities are in some cases covered by the Commonwealth or State Government scheme and in other cases by a separate scheme of the authority.

In the following tables, aggregate details are given, for the year 1960-61, of the receipts, expenditure, accumulated funds and number of contributors and pensioners of the Commonwealth and State Government and main semi-governmental schemes. The funds included are:—

- (a) *Commonwealth*.—The Superannuation Fund and Defence Forces Retirement Benefits Fund.
- (b) *New South Wales*.—State Superannuation Fund, Government Railways Superannuation Fund and Police Superannuation and Reward Fund.
- (c) *Victoria*.—The State Superannuation Fund, Police Superannuation Fund, Police Pensions Fund, Melbourne Harbor Trust Superannuation Account, Geelong Harbor Trust Superannuation Fund, Melbourne and Metropolitan Board of Works Superannuation Fund, State Electricity Commission Provident Fund, Gas and Fuel Corporation Superannuation Fund, Metropolitan Fire Brigades Board Superannuation Fund, Country Fire Authority Superannuation Fund, Port Phillip Pilots' Sick and Superannuation Fund, and Married Women Teachers' Pension Fund.
- (d) *Queensland*.—Public Service Superannuation Fund and Police Superannuation Fund.
- (e) *South Australia*.—South Australia Superannuation Fund, Police Pensions Fund and Public Service Superannuation Fund.
- (f) *Western Australia*.—The Superannuation Fund.
- (g) *Tasmania*.—Public Service Superannuation Fund (Old and New Funds), Police Provident Fund and State Teachers' Superannuation Fund.

### § 2. Parliamentary Pension and Superannuation Schemes.

Pension and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pages 91 to 99 of Official Year Book No. 38. Details of the Tasmanian scheme, are given on page 72 of Official Year Book No. 44. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or States contribute. Details of the receipts, expenditure, funds and number of contributors and pensioners for the year 1960-61 are shown in the following table:—

**PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES, 1960-61.**

### § 3. Private Pension and Retiring Allowance Schemes.

Special surveys have been conducted by this Bureau on superannuation or pension and retiring allowance schemes conducted under private enterprise, and the results were published in a series of Special Business Surveys, Nos. 7, 9, 11, 12 and 13 relating to the years 1951-52, 1955-56, 1955-56 to 1957-58, 1955-56 to 1958-59 and 1955-56 to 1960-61 respectively.

## CHAPTER XXI.

### PUBLIC FINANCE.

NOTE.—The subject of "Public Finance" is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States' Securities existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of such securities. In view of this, it is convenient to deal with the Commonwealth and State Government Securities on Issue in a separate division of this chapter (D, page 864).

The subject of income taxes is also dealt with in a separate division (E, page 883).

For further detailed information on the subjects covered by this chapter, *see* the annual bulletins *Finance, Part I.—Public and Private Finance* and *Part II.—Commonwealth Taxation*, published by this Bureau. Current information in summarized form is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*.

#### A. COMMONWEALTH FINANCE.

##### § 1. General.

1. **Financial Provisions of the Constitution.**—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book and on pages 841–7 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The majority of the tables relating to Commonwealth Finance have been compiled from the annual Budget Papers as presented to Parliament by the Treasurer of the Commonwealth.

2. **Accounts of the Commonwealth Government.**—The Commonwealth Government bases its accounts upon three funds, the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

##### § 2. Commonwealth Consolidated Revenue Fund.

###### A. NATURE OF FUND.

1. **Provisions of the Constitution.**—The provisions made for the establishment of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on the fund, are contained in Sections 81 to 83 of the Constitution (*see* p. 17 of this Year Book).

2. **Annual Results of Transactions.**—In the early 1920's, receipts and expenditure of the Consolidated Revenue Fund each ranged between £60 million and £70 million. After allowing for special appropriations, amounting to one or two million pounds each year

utilized for a variety of purposes, e.g., for debt redemption, naval construction, main roads, science and industry investigations, prospecting for oil and precious metals, civil aviation, etc., the receipts and expenditure of the Fund were balanced. In the later twenties and early thirties, when receipts and expenditure were each about £70 million or £80 million a year, there were annual deficits, which had accumulated to more than £17 million by the end of 1930-31.

In the years 1931-32 to 1938-39, receipts and expenditure each ranged from £70 million to £95 million and were in balance after allowing for special appropriations of up to £3.5 million a year for reduction of the accumulated deficit, non-recurring grants to the States, post office works and the provision of defence equipment. The amount applied towards reduction of the accumulated deficit was approximately £1.5 million and the balance of the deficit (approximately £15.7 million) was funded in 1937-38.

For most of the 1939-45 War years and thereafter, the Consolidated Revenue Fund was balanced, all available revenue after meeting expenditure on ordinary services being used for defence, war and repatriation purposes.

During the years 1956-57 to 1960-61, the Fund was balanced after special payments of £194.8 million, £104.4 million, £27.9 million, £41.4 million and £142.6 million to the Loan Consolidation and Investment Reserve Trust Account. The amounts so transferred were subsequently invested wholly or partly in special loans for State works requirements.

#### B. REVENUE.

1. General.—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1956-57 to 1960-61. Taxation constitutes the main sources of Commonwealth revenue, accounting for 87.0 per cent. in 1960-61.

(iv) *Other Taxation. (a) General.* Taxes other than customs and excise and the various export charges are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises a Head Office in Canberra, an office in each State assessing the returns of taxpayers whose interests are restricted to that State, and a Central Office situated in Melbourne assessing taxpayers whose interests are in more than one State.

For detailed statistics relating to Commonwealth income taxes, estate duty, gift duty and sales tax, see the annual bulletin *Finance, Part II.—Commonwealth Taxation*, issued by this Bureau.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or those for use in primary production. The most recent exemptions were those granted from 15th August, 1961.

A general rate of tax is levied on all goods other than those specified in the schedules to the Sales Tax (Exemptions and Classifications) Act 1935-1961. These schedules set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 7th August, 1952, were:—

Period.	General Rate.	Special Rates.
7th August, 1952, to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953, to 18th August, 1954 ..	12½ per cent. ..	16½ per cent.
19th August, 1954, to 14th March, 1956 ..	12½ per cent. ..	10 and 16½ per cent.
15th March, 1956, to 3rd September, 1957 ..	12½ per cent. ..	10, 16½, 25 and 30 per cent.
4th September, 1957, to 15th November, 1960 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
16th November, 1960, to 21st February, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 40 per cent.
22nd February, 1961, to 14th August, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
15th August, 1961, to 6th February, 1962 ..	12½ per cent. ..	2½, 16½, 25 and 30 per cent.
From 7th February, 1962 .. ..	12½ per cent. ..	2½, 22½ and 25 per cent.

Particulars of the net amount of sales tax payable, and the sales of taxable and exempt goods in each State for 1960-61, are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on page 823, because the latter include some adjustments in respect of earlier tax years and include only tax payable on returns lodged during the year, which in general cover sales for the period June to May.

(a) Includes the Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole are shown in the following table for the years 1956–57 to 1960–61.

## SALES TAX AND AMOUNT OF SALES.

(£'000.)

Year.	Net Sales on which Sales Tax was Payable.	Sales of Exempt Goods by Registered Persons.	Total Sales of Taxable and Exempt Goods.	Sales Tax Payable.
1956–57 .. .. .	781,250	2,016,828	2,798,078	127,649
1957–58 .. .. .	849,347	2,105,688	2,955,035	138,259
1958–59 .. .. .	890,293	2,152,026	3,042,319	143,296
1959–60 .. .. .	1,020,033	2,354,204	3,374,237	167,839
1960–61 .. .. .	1,040,552	2,447,126	3,487,678	171,584

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the Sales Tax (Exemptions and Classifications) Act 1935–1961. The figures shown do not represent the total sales of all commodities, as vendors trading only in exempt goods are not required to be registered and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e., goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910–11 to 1951–52 on the unimproved value of land. It was abolished from 1st July, 1952.

(d) *Pay-roll Tax.* The Pay-roll Tax Act 1941 and the Pay-roll Tax Assessment Act 1941–1942 imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 a week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. However, the collections now form part of the general revenues of the Commonwealth. For particulars of the present method of financing the National Welfare Fund, out of which Child Endowment is paid, see para. 6, page 837. The exemption was increased to £80 a week (£4,160 per annum) from 1st October, 1953, to £120 a week (£6,240 per annum) from 1st September, 1954, and to £200 a week (£10,400 per annum) from 1st September, 1957. Employers whose export sales have increased above the annual average of export sales effected during a base period of two years ended 30th June, 1960, are entitled under the Commonwealth Government's export incentive scheme to a rebate of pay-roll tax of twelve and one half times the percentage increase in export sales.

Receipts from pay-roll tax for the years 1956–57 to 1960–61 were—1956–57, £48,675,000; 1957–58, £48,552,000; 1958–59, £49,619,000; 1959–60, £55,162,000; and 1960–61, £61,260,000.

(e) *Income Taxes.* Details of taxes on income are given in division E of this chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction scheme operated from 2nd December, 1950, until 17th November, 1951. For particulars, see Official Year Book No. 46, page 819.

(g) *Estate Duty.* The Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions allowed and the rates imposed prior to November, 1957, are given in earlier issues of the Year Book (see No. 43, p. 758).

Under the Estate Duty Assessment Act 1914–1957, Estate Duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:—(a) where the whole of the estate passes to the widow, children (including adopted children, step-children and ex-nuptial children), or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000; and (c) where only part of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

An amendment to this Act, assented to on 20th November, 1957, provided for rebates of duty on estates which become liable for duty on two or more occasions within a period of five years.

The rates of duty levied under the Estate Duty Act 1914–1941 increase as the value of the estate increases, as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; over £500,000, 27.9 per cent.

Total collections for the years 1956–57 to 1960–61 were as follows:—1956–57, £12,712,000; 1957–58, £13,774,000; 1958–59, £13,309,000; 1959–60, £13,753,000; and 1960–61, £14,807,000.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1955–56 to 1959–60, are given in the following table.

## ESTATE DUTY ASSESSMENTS.

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Number of Estates .. .. .	11,069	12,784	13,599	11,794	13,978
Gross Value Assessed .. .. .	£'000 178,361	213,253	227,310	202,899	233,560
Deductions .. .. .	£'000 31,281	37,376	39,707	35,589	40,453
Statutory Exemption .. .. .	£'000 23,802	28,661	30,492	26,555	31,597
Dutiable Value .. .. .	£'000 123,278	147,216	157,111	140,755	161,510
Duty Payable .. .. .	£'000 10,882	13,580	13,967	13,013	14,116
Average dutiable value .. .. .	£ 11,137	11,516	11,553	11,934	11,555
Average duty per estate .. .. .	£ 983	1,062	1,027	1,103	1,010

(h) *Gift Duty.* The Gift Duty Act 1941–1947 and the Gift Duty Assessment Act 1941–1957 impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property which is made otherwise than by will without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the Gift Duty Act 1941–1947 and relate to the value of all gifts made by the donor within a period of eighteen months:—Not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947, provides that gift duty shall not exceed one-half of the amount by which the value of the gift exceeds £2,000.

Total receipts from gift duty for the years 1956–57 to 1960–61 were as follows:—1956–57, £1,940,000; 1957–58, £2,205,000; 1958–59, £2,000,000; 1959–60, £2,435,000; and 1960–61, £2,783,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942, to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (see No. 40, pp. 672 and 673).

(j) *Wool Levy.* The Wool Tax Act 1936 and Wool Tax Assessment Act 1936 provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946, until 30th June, 1952, while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The Wool Tax Acts (Nos. 1 and 2) of 1952 provided for the payment of a levy of four shillings a bale until 30th June, 1953, after which date the rate of tax could be varied within prescribed limits. There was no variation until 1st July, 1957, when the rate was increased to six shillings a bale. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1956–57, 1957–58, 1958–59, 1959–60 and 1960–61 were £979,000, £1,328,000, £1,389,000, £1,542,000 and £1,455,000 respectively.

(k) *Wool Contributory Charge.* The Wool (Contributory Charge) Act 1945 and the Wool (Contributory Charge) Assessment Act 1945 imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge and collections made were given in earlier issues of the Official Year Book (*see* No. 40, p. 675).

The various Wool (Contributory Charge) Acts were repealed by the Wool Tax Assessment Act of 1952 and the charge superseded by the wool levy.

(l) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the Wheat Export Charge Acts 1946, 1948, 1952 and 1954 is contained in previous issues of the Official Year Book (*see* No. 40, p. 676, No. 41, p. 604 and No. 46, p. 820).

The Wheat Export Charge Act 1958 repealed the 1954 Wheat Export Charge Act and provided for an export charge on wheat and wheat products for the seasons 1958–59 to 1963–64 inclusive. The charge levied is the excess of the export price over the cost of production or 1s. 6d. per bushel whichever is the less. Under the Wheat Industry Stabilization Act 1958, to which the Wheat Export Charge is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production of up to 100 million bushels of wheat harvested each season exported from Australia. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £443,000 in 1957–58, £1,211,000 in 1958–59 and £1,000 in 1959–60, and were nil in 1956–57 and 1960–61.

The Wheat Tax Act of 1957 imposed a tax of  $\frac{1}{4}$ d. for each bushel of wheat—

- (a) which has been delivered to the Wheat Board on or after the first day of October, 1956, and before the date of commencement of the Act; or
- (b) which is delivered to the Wheat Board on or after that date.

The Act also provided that where, before the commencement of the Act, a person delivering to the Board wheat upon which tax is imposed by the Act authorized the Board to deduct an amount from the moneys payable to him and to pay the amount so deducted to a person, authority or association for the purposes of soil fertility research or other research likely to benefit the wheat industry, and the Board did so, the tax otherwise payable upon that wheat is to be reduced by the amount so deducted.

The Wheat Research Act 1957 provided for the establishment of a Wheat Research Trust Account to receive moneys payable under the Wheat Act 1957, and for the setting up of a Wheat Industry Research Council to direct the expenditure of moneys from that Trust Account for research, etc., to benefit the Wheat Industry.

Collections of Wheat Tax amounted to £185,000 in 1957–58, £207,000 in 1958–59, £187,000 in 1959–60 and £261,000 in 1960–61, and were paid to the Wheat Research Trust Account.

(m) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (Apple and Pear Export Charges Act 1938–1960), canned fruits (Canned Fruits Export Charges Act 1926–1959), dairy produce (Dairy Produce Export Charges Act 1924–1937), dried fruits (Dried Fruits Export Charges Act 1924–1929), eggs (Egg

Export Charges Act 1947) and meat (Meat Export Charges Act 1935-1954) and on grapes used in the manufacture of wine (Wine Grapes Charges Act 1929-1954). The collections are paid into special funds to be applied, for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1956-57, £375,000; 1957-58, £390,000; 1958-59, £566,000; 1959-60, £540,000; and 1960-61, £529,000.

(n) *Stevedoring Industry Charge.* The Stevedoring Industry Charge Act 1947 and the Stevedoring Industry Charge Assessment Act 1947 imposed a charge of 4½d. a man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows:—11th October, 1949, a reduction to 2½d. a man-hour; 11th December, 1951, an increase to 4d. a man-hour; 28th October, 1952, an increase to 11d. a man-hour; 4th May, 1954, a reduction to 6d. a man-hour; 30th October, 1956, an increase to 1s. 7d. a man-hour; and from 21st May, 1957, an increase to 2s. a man-hour.

A further amendment under the Stevedoring Industry Charge Act 1958 which came into operation on 1st April, 1958, provided for an increase of the charge to 3s. a man-hour until 1st July, 1959, and a reduction to 2s. 6d. a man-hour on or after 1st July, 1959.

Collections during the years 1956-57 to 1960-61 were as follows:—1956-57, £1,926,000; 1957-58, £3,337,000; 1958-59, £4,572,000; 1959-60, £3,718,000; and 1960-61, £3,844,000.

(o) *Tobacco Industry Charge.* The Tobacco Charge Acts (Nos. 1, 2 and 3) 1955 and the Tobacco Charges Assessment Act 1955, which came into operation on 1st January, 1956, provided for charges on tobacco leaf grown in Australia.

The Tobacco Charge Act (No. 1) 1955 imposed a maximum charge of ¼d. a pound on all Australian tobacco leaf sold to a manufacturer.

The Tobacco Charge Act (No. 2) 1955 imposed a charge at twice the rate to be levied under the Tobacco Charge Act (No. 1) on all Australian tobacco leaf purchased by a manufacturer.

The Tobacco Charge Act (No. 3) 1955 imposed a charge on all Australian tobacco leaf grown by a manufacturer and appropriated by him for manufacturing purposes. Where the manufacturer grew, in Australia, not less than nine-tenths of the tobacco leaf used by him in manufacturing, the charge was at the rate imposed by the Tobacco Charge Act (No. 1). In other cases, the charge was at twice that rate.

The charges collected under the Tobacco Charges Assessment Act 1955 were paid into the Tobacco Industry Trust Account which was established by the Tobacco Industry Act, 1955. Moneys in this account are used for the promotion of the tobacco industry.

Collections in 1956-57, 1957-58, 1958-59, 1959-60 and 1960-61 amounted to £41,000, £61,000, £72,000, £112,000 and £136,000 respectively.

(p) *Dairy Produce Levy.* The Dairy Produce Levy Act 1958 imposed a levy on the manufacture of butter and cheese for the purpose of financing a research and sales promotion scheme for the dairy industry. The maximum rates of the levy are fixed at three-sixteenths of a penny a pound on butter and three-thirty-seconds of a penny on cheese. In 1958-59, 1959-60 and 1960-61, collections amounted to £151,000, £334,000 and £350,000.

(q) *Canning Fruit Charge.* The Canning Fruit Charge Act 1959 imposed a levy on apricots, peaches and pears accepted by canneries as of canning quality or for use in the production of canned fruit, for the purpose of promoting the sale of Australian canned fruits both overseas and in Australia. The rate of the charge was ten shillings per ton of fruit delivered to canneries or such lesser rate as may be prescribed from time to time. In 1959-60 and 1960-61, collections amounted to £35,000 and £30,000 respectively.

(r) *Cattle Slaughter Levy.* The Cattle Slaughter Levy Act 1960 imposed a levy upon the slaughter of cattle for human consumption at rates to be prescribed from time to time but not exceeding two shillings per head of cattle slaughtered. The proceeds of this levy may be expended on purposes associated with scientific, economic or technical research related to the raising of cattle or the production or distribution of beef and other products of the slaughter of cattle. In 1960-61, collections amounted to £84,000.

3. Business Undertakings.—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1956–57 to 1960–61 are given in the following table.

**POSTMASTER-GENERAL'S DEPARTMENT: NET RECEIPTS.**  
(£'000.)

Particulars.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.

Further particulars to 1960-61 are given in Chapter XIV.—Transport and Communication (*see* pp. 530-1 and 537-8).

4. **Other Sources of Revenue.**—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1960-61 amounted to £5,455,000 (Australian Capital Territory £3,712,000; Northern Territory £1,740,000; Cocos (Keeling) Islands £3,000). Of other sources of revenue, amounting to £53,816,000, the following are noteworthy:—Interest, £14,817,000; Defence £5,827,000; Net Profit on Australian Note Issue £12,930,000.

For details of the revenue of the Territories *see* Chapter V. of this Year Book.

### C. EXPENDITURE.

1. **Details of Expenditure from Consolidated Revenue.**—The following table shows details of expenditure from the Consolidated Revenue Fund during the years 1956-57 to 1960-61. In this table, particulars of interest, debt redemption, superannuation and pension charges are not shown separately, but are included with departmental, etc. expenditure. Separate figures for debt charges are shown in the table on page 832.

 (d) Includes amounts previously shown under Business Undertakings and Territories.

**2. Defence Services.**—Details of the expenditure on defence services, including capital works and services, but excluding debt charges, etc., by the Departments of Defence, Navy, Army, Air and Supply are shown in the following table. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in oversea posts.

The figures represent the combined expenditures from Consolidated Revenue and Loan Funds for the years 1956–57 to 1960–61. In previous issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure from this source on defence services in recent years.

## DEFENCE SERVICES(a): COMMONWEALTH EXPENDITURE FROM REVENUE AND LOAN FUNDS.

(a) Excludes interest and redemption of War (1914-18) Debt due to the United Kingdom Government, payment of which was suspended in 1931. (b) In addition, £13,400,000 was spent from balance of War Pensions Trust Fund. (c) From Service Departments and Australian Soldiers' Repatriation Trust Account. (d) Excludes International Monetary Fund charges. (e) Munitions stores, etc., supplied to the Government of the United Kingdom and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

4. **Subsidies and Bounties.**—The following table shows details of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers for the years 1956-57 to 1960-61. Expenditure on special relief such as drought, frost, flood and bush fire, etc., is not included here (included under items in table, para. 5), nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (see paragraph 12, p. 847). Payments to the States for Cattle Tick Control, Dairy Industry Extension and Agricultural Advisory Services are also not included under this heading, but under the heading Payments to or for the States (see para. 11, p. 841).

Further information relating to assistance to primary producers is given in Chapter XXII.—Agricultural Production. Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15, respectively, of Official Year Book No. 38.

## SUBSIDIES AND BOUNTIES: COMMONWEALTH EXPENDITURE.

(a) Dairy products.

5. **Total Cost of Departments.**—Expenditure shown in this table covers expenditure on administrative services and other activities (i.e. what might be termed "running expenses") and includes miscellaneous expenditure (previously shown in a separate table) by departments other than the Defence and Repatriation Departments and business undertakings. Interest and debt redemption are included under expenditure by the Department of the Treasury.

Expenditure on defence, war and repatriation services, subsidies and bounties, social services paid from the National Welfare Fund, business undertakings, Commonwealth territories, and capital works and services is excluded.

Information on the function of departments and the Acts administered by the Ministers of departments was published in Official Year Book No. 37, pages 76-86, and particulars of subsequent changes in departmental structure were given in later issues (see No. 43, p. 81) and page 86 of this issue.

6. National Welfare Fund.—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax, and it became necessary to base the contributions on another formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the National Welfare Fund Act 1943-1950, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received a small amount of interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1956–57 to 1960–61. For a detailed account of the establishment of the National Welfare Fund, the services provided and the numbers and amounts of benefits paid, see Chapter XVIII.—Welfare Services.

7. **Loan Consolidation and Investment Reserve Trust Account.**—The Loan Consolidation and Investment Reserve Act 1955 established the Loan Consolidation and Investment Reserve Trust Account for the purpose of repurchase or redemption of securities representing portion of the public debt of the Commonwealth.

Payments from the Consolidated Revenue Fund were made as follows:—1956–57, £194,793,000; 1957–58, £104,378,000; 1958–59, £27,947,000; 1959–60, £41,382,000; and 1960–61, £142,561,000. Expenditure from the Trust Account on repurchase of securities was £43,443,000 in 1956–57; £132,767,000 in 1957–58; £100,046,000 in 1958–59; £79,885,000 in 1959–60; and £30,899,000 in 1960–61. The major portion of the balance of the Trust Account at 30th June, 1961, was invested in Commonwealth securities in special loans to finance Commonwealth and State works programmes.

8. **Business Undertakings.**—(i) *Postmaster-General's Department.* Details of the expenditure of this Department for the years 1956–57 to 1960–61 are given in the following table.

**POSTMASTER-GENERAL'S DEPARTMENT: EXPENDITURE.**

Additional details of the financial operations of the Commonwealth Railways to 1960-61 are given in Chapter XIV.—Transport and Communication (*see* pp. 531-533).

9. *Territories.*—The following table shows the expenditure on account of Commonwealth Territories for the years 1956-57 to 1960-61. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the Northern Territory and the external territories. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in Chapter V.—The Territories of Australia, of this Year Book.

**COMMONWEALTH TERRITORIES : EXPENDITURE.**

10. **Capital Works and Services.**—In the following table, details are given of Commonwealth expenditure on capital works and services during each of the years 1956-57 to 1960-61. The table covers all expenditure on capital works and services made from the Consolidated Revenue Fund and the Loan Fund. In previous issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure on capital works and services from this source in recent years.

**COMMONWEALTH EXPENDITURE ON CAPITAL WORKS AND SERVICES FROM REVENUE AND LOAN FUNDS.**

(a) Excludes relief to primary producers, subsidies and bounties, and other payments for medical research, etc. (b) Paid to National Debt Sinking Fund. (c) Paid to Trust Fund. (d) Grants only—excludes repayable advances.

Particulars of special Commonwealth grants for the relief of primary producers are not included in the foregoing tables. See para. 4, Subsidies and Bounties, page 834 and para. 12, Other Expenditure, page 847.

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685 to 690. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State Loan Securities for a period of 58 years from 1st July, 1927. This amount is distributed among the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926–27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910, as compensation for the States relinquishing, after Federation, the right to levy Customs and Excise Duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State Loan Securities. Details of these are given in Division D of this Chapter, § 2, page 882.

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (see No. 40, p. 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards and the recommendations of the Commission in respect of the years 1957–58 to 1961–62 are shown in the following table. Commencing with 1949–50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1961–62 include an estimate of the indispensable need of the claimant State for 1961–62 and an adjustment to the estimated grant for 1959–60. South Australia agreed with the Commonwealth not to apply for special grants in other than exceptional circumstances after 1st July, 1959, when the new financial arrangements under the State Grants Act 1959 came into operation (see sub-para. (v) below).

payment of £1,027,000 in 1959–60.

(b) Includes the final adjusting

(v) *Financial Assistance Grants.* The States Grants Act 1959 repealed the States Grants (Tax Reimbursement) Acts of 1946, 1947 and 1948 and provided for payment to the States of financial assistance in 1959–60 amounting to £244,500,000 to be distributed amongst the States as follows:—New South Wales, £83,450,000; Victoria, £60,625,000; Queensland, £36,375,000; South Australia, £27,675,000; Western Australia, £25,462,000; Tasmania, £10,913,000. In subsequent years, the financial assistance grant payable to each State has been determined by increasing its grant for 1959–60 in accordance with a formula

which takes into account movements in population in each State and the increases (if any) in the level of average wages per person employed as shown in returns submitted under the Pay-roll Tax Assessment Act 1941-1961. In 1960-61, the grants determined according to this formula were as follows:—New South Wales, £91,988,000; Victoria, £67,371,000; Queensland, £39,951,000; South Australia, £30,727,000; Western Australia, £27,977,000; Tasmania, £11,980,000.

Details of the States Grants (Income Tax Reimbursement) Act 1942 and the States Grants (Entertainments Tax Reimbursement) Act 1942 are given in earlier issues of the Official Year Book (*see* No. 37, pp. 635 to 637). These Acts provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Grants under these Acts ceased after 1945-46 and were replaced by grants under the States Grants (Tax Reimbursement) Act 1946-1948 which expired after 1958-59. *See* Official Year Book No. 46, pages 837-8.

(vi) *Special Financial Assistance Grants.* During the years 1954-55 to 1958-59, there were heavy additions to the financial needs of the States, and special assistance grants amounting to £19,902,000, £15,348,000, £19,405,000, £24,145,000 and £30,437,000 respectively were made. For details of amounts paid to each State *see* earlier issues of the Official Year Book or the annual bulletin *Finance, Part I.—Public and Private Finance.*

(vii) *Additional Financial Assistance.* The States Grants (Additional Assistance) Act 1958 provided for the payment of £5,000,000 from the Consolidated Revenue Fund for financial assistance to the States.

(viii) *Grants for Road Construction.* (a) *Main Roads Development Act 1923-25, Federal Aid Roads Acts 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947-1949, Commonwealth Aid Roads Act 1950, Commonwealth Aid Roads Act 1954, and Commonwealth Aid Roads (Special Assistance) Act 1957.* Details of these Acts are given in earlier issues of the Official Year Book (*see* No. 38, pp. 787-8, No. 41, p. 62 and No. 46, p. 838) and in the annual bulletin *Finance, Part I.—Public and Private Finance.*

(b) *Commonwealth Aid Roads Act 1959.* A new scheme of Commonwealth assistance to the States for roads was established by the Commonwealth Aid Roads Act 1959. Under this Act, which is to operate for a period of five years from 1st July, 1959, the Commonwealth has undertaken to make available up to £250,000,000 to the States for the construction, reconstruction, maintenance and repair of roads.

Of this amount, a total of £220,000,000 will be paid to the States as basic grants for roads over five years. The basic grants are fixed annual amounts which rise progressively by £2,000,000 a year from £40,000,000 in 1959-60 to £48,000,000 in 1963-64. In each year, the grants will be distributed between the States on the basis of 5 per cent. of the total to Tasmania and the balance shared between the other five States, one-third in proportion to their respective populations at the date of the last preceding Census, one-third in proportion to their respective areas and one-third in proportion to the respective number of motor vehicles registered in these States at 31st December preceding the year of payment.

The balance of up to £30,000,000 over the five years will be made available to the States as matching assistance for roads. The total amounts of matching assistance will increase by £2,000,000 a year from £2,000,000 in 1959-60 to £10,000,000 in 1963-64. Up to the limit of its share of the total matching assistance available in any year, each State qualifies for £1 of matching assistance from the Commonwealth for each £1 by which the amount it allocates in that year from its own resources for expenditure on roads exceeds the amount so allocated in 1958-59. The share of each State in the total matching assistance available in any year is determined by the same formula as is used to determine its share of the basic grant in that year.

The full amount of the matching assistance available to each State in any year is being paid during that year on the understanding that the road grants to the State in the following year will be adjusted if it is subsequently found that the State did not qualify in full for the matching assistance paid to it in that year.

The legislation relating to the years 1947-48 to 1958-59 provided for annual allocations to the Commonwealth for expenditure on strategic roads and the promotion of road safety practices. No such provisions are contained in the present legislation, the Commonwealth making separate provision for these purposes.

(ix) *Tuberculosis Act 1948.* The Tuberculosis Act 1948 provided for the reimbursement by the Commonwealth of capital expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis, as from 1st July, 1948.

(x) *States Grants (Mental Institutions) Act 1955.* This Act provides for financial assistance to the States for capital expenditure on mental institutions to a maximum amount of £10,000,000. Each State is entitled to one-third of expenditure made on or after 1st July, 1955, on buildings or equipment of a mental institution.

(xi) *Other Payments.* (a) *Western Australian Waterworks.* The Western Australia Grant (Water Supply) Act 1948–1957 provides for grants to Western Australia not exceeding an aggregate of £5,000,000 for the development of the Agricultural Areas, Great Southern Towns and Goldfields Water Supply schemes. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(b) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty of 6d. a ton on coal produced from 1st November, 1949. The rate of duty was raised to 7d. a ton from 26th August, 1951, and to 8d. a ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(c) *Imported Houses.* Under the States Grants (Imported Houses) Act 1950 the Commonwealth Government undertook to pay to the States a subsidy not exceeding £300 per house for houses imported by a State or a housing authority of a State after 12th October, 1949. Imports of houses under this scheme have now ceased.

(d) *Contribution to South Australia—Port Augusta to Port Pirie Railway.* The Port Augusta to Port Pirie Railway Act 1935–1950 approved an agreement between the Commonwealth and South Australia to provide for the extension of the Trans-Australian Railway by the construction of a railway in South Australia from Port Augusta to Port Pirie. As a contribution towards reimbursing South Australia for the cost of the section to be constructed by the State, and for any additional expense incurred by the State in carrying out the Agreement, the Act provided for a payment by the Commonwealth to the State of South Australia of £20,000 per annum for twenty years, the first payment being made in 1937–38 after the opening of the railway and the final payment in 1956–57.

(e) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia, grants are made to these States for the provision and improvement of roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £150,000 in Queensland and £50,000 in Western Australia.

(f) *Grants to Universities.* Payments to the States for universities were first introduced in 1951–52 under the States Grants (Universities) Act 1951, and were continued under similar legislation passed in 1953, 1955, 1956 and 1957. Following on the Government's acceptance of the main recommendations of the Committee on Australian Universities, the provisions of the 1957 Act relating to financial assistance for 1958 were superseded by the States Grants (Universities) Act 1958, which operated from 1st January, 1958.

This legislation authorized the Commonwealth to make payments to the States for universities of up to £21,400,000 over the three calendar years 1958 to 1960, inclusive, where certain conditions have been satisfied. These payments include increased contributions towards the running expenses of universities, new grants for capital works and equipment and new emergency grants.

Under the States Grants (Universities) Act 1960, which carried on the principle of grants for capital works and equipment introduced in the 1958 legislation, payments of up to £42,000,000 over the three calendar years 1961, 1962 and 1963 are to be made to the States. (See also Chapter XV.—Education and Research, page 602.)

(g) *Cattle Tick Control.* Since 1926–27, the Commonwealth has subsidized the cost of eradication and control of cattle tick in New South Wales. From 1950–51, the subsidy was increased on a £1 for £1 basis up to an agreed maximum. The payments are charged to the departmental expenditure of the Department of Health.

(h) *Western Australia Northern Development.* The Commonwealth provides financial assistance of up to £5,000,000 to the State of Western Australia under the Western Australia Grant (Northern Development) Act 1958–59 in respect of developmental expenditure by the State in the area of Western Australia north of the twentieth parallel of latitude during the period of five years commencing on 1st July, 1958. Under the scheme, Commonwealth

assistance is provided in respect of projects, nominated by the State, which the Commonwealth is satisfied will contribute to the development of the area and which could not reasonably be expected to be carried out during the period of five years without the grant of Commonwealth assistance.

Payments to the State during 1960-61 amounted to £1,208,000, bringing total payments by the Commonwealth in respect of the scheme to £1,863,000.

(i) *Dairy Industry Extension Grant.* The Commonwealth provides financial assistance, with a maximum annual limit of £250,000, to promote improved farm practices in the dairy industry. The grants are charged to the departmental expenditure of the Department of Primary Industry.

(j) *Expansion of Agricultural Advisory Services.* These payments were introduced in 1952-53 to encourage expansion of agricultural advisory services by the State Departments of Agriculture and to promote increased farm efficiency. The payments are charged to the departmental expenditure of the Department of Primary Industry.

(k) *Grants for Railway Standardization.—South Australia.* Under the Railway Standardization (South Australia) Agreement Act 1949, the Commonwealth is providing funds for the conversion of lines in the south-eastern division of the State as an initial step towards eventual standardization of 4' 8½" gauge. The State is to repay three-tenths of the cost of this work over a period of 50 years and is to bear the full cost of subsequent conversion from broad to standard gauge.

*Albury to Melbourne.* Under the Railway Standardization (New South Wales and Victoria) Agreement Act 1958 the Commonwealth provided funds for the construction of the standard gauge rail link between Albury and Melbourne on the basis that the States of Victoria and New South Wales will each bear 15 per cent. of the cost by instalments over a period of 50 years.

The total expenditure on Railway Standardization (the 30 per cent. advances to the States and the 70 per cent. grants to the States) is charged to the Capital Works and Services vote of the Department of Shipping and Transport.

12. **Other Expenditure.**—Expenditure under this item includes the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Information relating to the taxes levied is given in sub-section B. Revenue, of this section (*see pp. 828-9*). Details of expenditure from the trust funds are included in § 3, Commonwealth Trust Funds. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

## § 4. Commonwealth Loan Fund.

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (*see* No. 37, p. 640). In the following table, details are given of the net expenditure from the Commonwealth Loan Fund for the years 1956–57 to 1960–61 and of the aggregate expenditure to 30th June, 1961. The figures shown represent “net” loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

(c) Includes administration and other public buildings, Australian Capital Territory. (d) Payment to National Debt Sinking Fund. (e) Payment to Swiss Loan Trust Account. (f) Payment to Canadian Loan Trust Account.

NOTE.—Minus sign (–) indicates excess of repayments to Loan Fund.

Information relating to the Commonwealth Government Securities on Issue is given in Division D. Commonwealth and State Government Securities on Issue, of this chapter.

## B. STATE FINANCE.

## § 1. General.

1. Functions of State Governments.—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective Governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure, and debt of the individual States are difficult, owing to the fact that functions which in

one State are assumed by the Central Government are in another delegated to municipal or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the Central Government. Care is needed therefore in making comparisons, and the particulars contained in this chapter should be read with those contained in Chapter XIX.—Local Government. In many respects, moreover, the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned with rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

2. **Accounts of State Governments.**—The various financial transactions of the States are in each case mainly concerned with one or other of three Funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by a State is paid into its Consolidated Revenue Fund, from which payments are made under authority of an annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special act.

Figures in § 2 below relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the Government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

3. **Inter-relation of Commonwealth and State Finances.**—A statement in some detail, covering the inter-relation of Commonwealth and State finances during the period from the inception of Federation to the passing of the Financial Agreement Act 1928, was published in Official Year Book No. 22, pages 379–380. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Official Year Book from year to year (*see also* pp. 864–6).

## § 2. State Consolidated Revenue Funds.

### A. REVENUE.

1. **General.**—The principal sources of State revenue are:—

(a) Taxation; (b) the business undertakings controlled by the State Governments; (c) sale of and rental from crown lands; (d) interest on advances; (e) payments by the Commonwealth Government under the Financial Agreement, Special Grants and Financial Assistance Acts, etc.; (f) Commonwealth National Welfare Fund payments; and (g) miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue to the Consolidated Revenue Funds for the States as a whole in the year 1960–61 was Commonwealth payments under financial assistance and other grants (38.2 per cent. of the total revenue). Next in magnitude was the group of business undertakings (31.6 per cent.), the principal contributors being the government railways and tramways, followed by taxation receipts (16.2 per cent.). More than one-quarter of the total State taxation collections are not paid into Consolidated Revenue Funds, however, but into special funds (*see* para. 3 (ii) (b) following). Of the remaining sources of revenue, interest (n.e.i.) constituted 3.7 per cent., land revenue 2.0 per cent., and National Welfare Fund payments 1.5 per cent.

2. **Revenue Received.**—The following table shows particulars of the total amounts, and the amounts per head of population, of consolidated revenue received by the several States during the years 1956–57 to 1960–61.

## STATE CONSOLIDATED REVENUE.

(a) See § 1, para. 2, p. 850. (b) Tasmanian Transport Services are under separate control of the Transport Commission. (c) In all States, certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page. (d) Excludes Commonwealth payments paid to Trust Funds. (e) Includes payments under Financial Agreement, Special Grants, Financial Assistance, Grants to Universities, etc. (f) Consolidated Revenue Fund receipts only. Excludes payments to Trust Funds.

(ii) *Revenue from Taxation.* (a) *General.* In the tables on taxation collections in these paragraphs, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under "Racing Tax" instead of under "Stamp Duties" and "Licences" respectively.

Prior to federation, customs and excise duties were the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the most productive State taxes were the various income taxes which, in 1941-42, included unemployment relief, State development and hospital taxes. From 1942-43 to 1958-59, the States were reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Commencing with 1959-60, however, a new scheme for the payment of financial assistance to the States was instituted (for details see C., para. 11 (v), p. 842). Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Official Year Book.

(b) *Net Collections, 1960-61.* The following tables show, for the year 1960-61, details of the collections in each State from the various types of tax in operation, irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason, the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and represent a comprehensive statement of all taxation collections by the Government in each State.

(iii) *Business Undertakings.* (a) 1960-61. A very large proportion of State gross revenue is made up of receipts from business undertakings under the control of the Governments. The most important of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply, and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1960-61, the revenue from these sources was £238,581,000 or 31.6 per cent. of the revenue from all sources. Details of revenue are as follows.

**STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1960-61.**

For further information on the finances of the various types of business undertakings in the States, see Chapters XIV.—Transport and Communication and XIX.—Local Government of this Year Book.

(iv) *Lands.* The revenue from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of Crown lands for the year 1960-61.

STATE LAND REVENUE, 1960-61.  
(£'000.)

<b>Total .. ..</b>	<b>5,246</b>	<b>3,263</b>	<b>4,064</b>	<b>662</b>	<b>1,399</b>	<b>635</b>	<b>15,269</b>

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1956–57 to 1960–61 respectively was:—£15,455,000, £15,050,000, £12,890,000, £14,324,000 and £15,269,000.

(v) *Commonwealth Grants.* Commonwealth grants to the States represent a considerable proportion of the States' Revenue. In 1960–61, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £288,515,000 (38.2 per cent.). Details were as follows:—Contribution towards interest on States' debts under the Financial Agreement, £7,585,000; special grants to the States of Western Australia and Tasmania, £8,618,000; financial assistance, £269,994,000; grants to universities, £1,778,000; and other grants, £540,000.

In addition to these, the States receive a number of other grants which are paid to trust funds. The main items in this class are the contribution to the sinking fund on States' debts (£6,274,000 in 1960–61) paid to the National Debt Sinking Fund, grants for Commonwealth Aid Roads (£46,000,000 in 1960–61), and grants for Universities (£9,449,000 in 1960–61) paid to State trust funds.

More detailed information concerning Commonwealth grants to the States is given on pages 840–7.

(vi) *Commonwealth National Welfare Fund Payments.* The States also receive payments from the Commonwealth in respect of hospital and pharmaceutical benefits, nutrition of children and reimbursement of maintenance expenditure on tuberculosis sanatoria. These receipts are paid into Consolidated Revenue Funds or Trust Funds according to the varying accounting procedures in the States. In 1960–61, the total amount paid to State Consolidated Revenue Funds was £11,571,000 (1.5 per cent.). This amount was made up of hospital benefits, £4,174,000; pharmaceutical benefits, £1,810,000; nutrition of children, £1,279,000; tuberculosis—reimbursement of maintenance expenditure, £4,266,000; other, £42,000.

(vii) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. Interest, mainly from loans to local governing bodies, on public account balances, and for soldier land settlement amounted to £27,970,000 in 1960–61, while "Miscellaneous" revenue, which includes fines of the courts and fees for services, amounted to £51,190,000 in 1960–61.

## B. EXPENDITURE.

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—

- (a) Interest, exchange and debt redemption charges in connexion with debt;
- (b) working expenses of business undertakings; (c) education; (d) health and charitable expenditure; (e) justice; (f) police; (g) penal establishments; and
- (h) all other expenditure, under which heading are included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions, and miscellaneous.

The working expenses of railways and tramways are the largest item of State Government expenditure. In 1960–61, the working expenses of the railways, tramways and omnibuses were 26.3 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in magnitude were education, 19.7 per cent.; debt charges, 16.6 per cent.; charitable, public health and hospitals, 14.0 per cent.; and law, order and public safety, 5.9 per cent.

As stated at the beginning of this division, figures relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

2. Total Expenditure.—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1956-57 to 1960-61 are shown in the following table.

(a) See para. 1, page 856.

NOTE.—Minus sign (-) indicates deficit.

## § 3. State Trust Funds.

In addition to the moneys received as revenue and paid to the credit of the Consolidated Revenue Funds, considerable sums are held in trust for various purposes by the State Governments. The balances of trust funds held at 30th June for each of the years 1957 to 1961 were as follows.

## STATE TRUST FUND BALANCES.

(£'000.)

At 30th June—	N.S.W.(a)	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	Total.
1957 .. ..	45,392	32,138	48,034	4,718	14,537	1,151	145,970
1958 .. ..	51,776	34,415	53,921	5,650	14,565	1,560	161,887
1959 .. ..	55,093	38,635	53,828	5,057	16,569	2,148	171,330

(a) Special Deposits Account and Special Accounts.

## § 4. State Loan Funds.

1. **General.**—State public borrowing is due mainly to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions such as the construction and operation of the railway systems, which in other countries are usually entrusted to local authorities or left to private enterprise. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State debt thus consists chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and is to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds, may be found in *Finance, Part I.—Public and Private Finance*, Bulletin No. 52, 1960–61. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made.

2. **Gross Loan Expenditure.**—(i) 1960–61. Particulars of gross loan expenditure on works, services, etc., are shown in the following table.

**STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1960–61.**

(a) Expenditure from Loan Funds and on account of Loans; includes expenditure from Loan Funds, from Treasurer's Advance Account and from State Loans Repayment Fund. (b) Excludes expenditure from Commonwealth Loans under Commonwealth-State Housing Agreement. (c) Included with Advances to Settlers. (d) Includes Rural Finance Corporation, for advances to rural industries, £550,000.

NOTE.—The negative amounts shown for Queensland represent transfers of liability on account of expenditure incurred in earlier years. The amounts involved have been debited against the item Loans and Grants to Local Bodies, and included in the expenditure shown for 1960–61.

(ii) 1956-57 to 1960-61. Particulars of gross loan expenditure on works, etc., for these years are shown in the following table.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.  
(b) From Consolidated Revenue Fund.

NOTE.—Minus sign (—) indicates excess of repayments to loan fund.

Information relating to the State Government Securities on Issue is given in division D. Commonwealth and State Government Securities on Issue (*see* p. 864)

### C. COMMONWEALTH AND STATE FINANCE.

1. Revenue and Expenditure.—(i) *Consolidated Revenue Funds.* The following tables show the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1956-57 to 1960-61. In these tables, the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this chapter. The items excluded from the total figures are:—payments made by the Commonwealth to the States and included in the State Consolidated Revenue Funds on account of tax reimbursements up to 1958-59, and financial assistance grants in 1959-60 and 1960-61, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements, grants to universities, cattle tick control, tuberculosis capital expenditure, National Welfare Fund payments, and estimated payments of pay-roll tax by the States to the Commonwealth. There are other relatively minor payments for which adjustments have not been made, and the adjusted figures are therefore still slightly overstated.

#### COMMONWEALTH AND STATES : REVENUE AND EXPENDITURE.

Year ended 30th June—	Revenue.			Expenditure.		
	Commonwealth.	States.	Total.	Commonwealth.	States.	Total.
	£'000.	£'000.	£m.	£'000.	£'000.	£m.
1957.. ..	1,311,835	576,934	1,672.4	1,311,835	583,875	1,679.4
1958.. ..	1,323,771	605,183	1,690.7	1,323,771	612,200	1,697.7
1959.. ..	1,296,050	639,959	1,682.9	1,296,050	647,276	1,690.3

**D. GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES.**

**NOTE.**—The term “public debt” formerly used to describe the subject matter of this division has been replaced by the term “government securities on issue” for the following reasons.

Government securities on issue, as set out in the tables in this division, may not be aggregated without adjustment to indicate what is sometimes described as the “public debt” or “net public debt” of the Commonwealth and State Governments.

There are forms of debt not evidenced by the issue of securities. Again, some of the securities included in the tables are held by the Governments themselves. For example, a State Government may hold temporarily, or even for long periods, securities issued by the Commonwealth Government. The Commonwealth Government itself, through such institutions as the National Debt Commission, or through the Trust Funds, holds large investments in securities issued, either directly by itself or on behalf of the States. In addition, some of the securities issued on behalf of the States and held by the Commonwealth Government represent the proceeds of overseas loans, securities for which were issued directly by the Commonwealth Government. From the point of view of the aggregate net debt of the Commonwealth and the States, it would thus involve duplication if the sum of the securities on issue were to be regarded as representing the “net public debt”.

No change has occurred in the content of the subject matter dealt with in this division, and the figures in the following sections are entirely comparable with those shown in previous issues of this Year Book.

**§ 1. General.**

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth Government accepted responsibility for the securities of the State Governments then on issue, and was empowered to arrange for all future borrowings on behalf of the Commonwealth and the States and to issue Commonwealth securities for all money borrowed. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf, and the securities are redeemed from the National Debt Sinking Fund to which both the Commonwealth and State Governments make contributions.

In the statistical tables relating to Government securities, the units of currency for securities on issue and interest payable, except in § 3, para. 5, are:—Maturing in Australia—£ Australian; maturing in London—£ Sterling; maturing in New York—£ (converted from dollars at the rate of \$4.8665 to £1); maturing in Canada—£ (converted from dollars at the rate of \$4.8665 to £1); Maturing in Switzerland—£ (converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d.).

The totals shown represent the total “face” or “book” value of the securities without adjustment on account of the differences in currency mentioned above.

In § 3, para. 5 only, details of the securities on issue on account of the Commonwealth and each State are given in Australian currency.

**§ 2. The Financial Agreement between the Commonwealth and the States.**

**1. General.**—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pp. 685–690). In this issue, a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the State Premiers, or Ministers nominated by them in writing. Each year, the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the securities issued on behalf of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in its own name, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed, and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may—

- (i) borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including Savings Banks) constituted or established under Commonwealth or State law or practice;
- (ii) borrow from the public by means of counter sales of securities; and
- (iii) use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Government Securities.**—The Commonwealth took over on 1st July, 1929—

- (a) securities issued by each State existing on 30th June, 1927; and
- (b) all other securities of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State,

and in respect of these securities assumed, as between the Commonwealth and the States, the liabilities of the States to bond holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States as from 1st July, 1929, were discharged from any liability in respect of principal, interest or redemption on so much of the securities bearing interest at 5 per cent. per annum taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State securities. The balance of the interest payable on the State securities is paid to the Commonwealth by the States.

7. **Sinking Fund.**—(i) *State Securities existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the securities of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement.

The Commonwealth contributes annually from revenue 2s. 6d. per £100 on the securities of the States existing at 30th June, 1927, and each State contributes annually 5s. per £100 on the securities of such State at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927 (except those for redemptions or conversions, or funding a State deficit), a sinking fund at the rate of 10s. per £100 per annum was established, and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in para. (iv) below) raised by a State after 30th June, 1927, to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927, and 1st July, 1935.* Special contributions are payable in respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit which accrued after 30th June, 1927, and before 1st July, 1935. Details of these contributions are given in Official Year Book No. 37, pages 688 and 689.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the securities of a State, and funds of that State transferred to the National Debt Commission, are not accumulated, but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security for the balance of the period during which the original contribution is payable in respect of that debt.

(vii) *Oversea Securities on Issue.* Sinking fund contributions in respect of oversea securities shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

**8. Borrowing by Semi-Governmental Authorities.**—It was realized from the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of the borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the Government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

§ 3. Government Securities on Issue : Commonwealth and States.

1. Government Securities on Issue, Annual Interest Payable and Average Rate of Interest at 30th June, 1961.—In the following table, details are given of the Commonwealth and State Government Securities on Issue, annual interest payable and average rate of interest at 30th June, 1961.

(a) See § 1, p. 864.

In some States, certain public utilities such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which, in addition to receiving advances from the central Government, raise loans by borrowing on their own behalf, while in other States these services are controlled by the central Government. Comparison of the Government securities on issue on account of the States is therefore difficult, but on page 876 figures showing the aggregate securities on issue of the States, including those of local and semi-governmental authorities, are shown for the years 1955-56 to 1959-60.

5. **Government Securities on Issue and Interest Payable in Australian Currency.**—In the foregoing tables relating to Commonwealth and State securities on issue, the securities maturing in London are expressed in sterling, those maturing in New York and Canada are expressed in pounds converted from dollars at the rate of \$4.8665 to £1, and those maturing in Switzerland are expressed in pounds converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d. This method of showing the securities on issue does not indicate the amount that the Australian Government would have to find to redeem the securities at current rates of exchange. In the following tables, the securities and the interest payable are shown in terms of Australian currency throughout. Securities maturing in London, New York, Canada and Switzerland have been converted to Australian currency at the selling rate of exchange on 30th June, 1961.

(a) See § 1, p. 864. (b) See § 4 following. (c) Consists of overdue, indefinite and interminable securities, securities due at Treasurer's option, and half-yearly drawings.

8. Short-term Securities on Issue.—(i) Amount. Particulars of the short-term securities (Treasury Bills and Debentures) of the Commonwealth and States in London and in Australia at intervals from 30th June, 1957, to 30th June, 1961, are shown in the following table. These securities are included in the Government securities on issue as shown elsewhere.

COMMONWEALTH AND STATE SHORT-TERM SECURITIES ON ISSUE.(a)

30th June, 1961 .. ..	186,000	..	..	186,000

(a) Excludes Overdrafts and Internal Treasury Bills.

(ii) *Australia.* The Treasury Bill rates in Australia were as follows:— $1\frac{1}{2}$  per cent. from 1st January, 1935;  $1\frac{1}{2}$  per cent. from 1st May, 1940;  $1\frac{1}{4}$  per cent. from 1st May, 1943; 1 per cent. from 1st March, 1945;  $\frac{3}{4}$  per cent. from 1st May, 1949; 1 per cent. from 1st August, 1952.

(iii) *Seasonal Securities.* In November, 1959, the Commonwealth Government issued a new form of short-term Commonwealth security called Seasonal Treasury Notes and Seasonal Inscribed Stock. The 1960-61 issues of seasonal securities, which were readily cashable, transferable and interchangeable at any time, were redeemable at par on maturity at the end of three months, and all such securities were redeemed and cancelled before 30th June, 1961. Seasonal securities were issued in multiples of £1,000 over the minimum subscription of £5,000 at a price of £99 5s. 0d. per cent., and yielded a return of approximately 3 per cent. if held for three months. Such increases in value were taxable, but carried the right of rebate of two shillings in the pound as with Commonwealth loan interest.

9. *Government Securities on Issue on Account of the States, Municipal and Semi-governmental Authority Securities on Issue.*—For the reasons indicated on page 872, direct comparisons of the securities on issue on account of the several States should be made with caution. The table following shows, for 1955-56 to 1959-60, particulars of the securities on issue on account of the States and the securities on issue by municipal and semi-governmental authorities in each State.

(a) Excludes amounts due to the Central Government. Includes bank overdrafts. (b) See § 1, p. 864.

## § 4. Commonwealth Loan Raisings.

1. General.—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required either by the Commonwealth or by the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States.

2. New Loans Raised, 1958-59 to 1960-61.—(i) *Australia*. The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1958-59 to 1960-61.

July-June (Special Bonds) (c) ..	..	11,501	4-5	{ 1967 1968	100	2,216	1,502	7,783

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see p. 878).  
 (b) Special issue. For details see following paragraph. (c) Special Bonds open for continuous subscription, redeemable at prices commencing at par and increasing to a premium of £3 per cent. if held until maturity in 1966-68. Interest increases from 4 per cent. to 5 per cent. over period of currency.

The loans of £10,000,000, £55,000,000 and £90,000,000 raised in June, 1959, 1960 and 1961, respectively, were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £210,000,000 in 1958-59, £220,000,000 in 1959-60 and £230,000,000 in 1960-61. Subscriptions to these special loans for the three years covered came from the Loan Consolidation and Investment Reserve Trust Account.

Finance for the approved Loan Council programmes from 1958-59 to 1960-61 was provided from the following sources.

LOAN COUNCIL PROGRAMME(a): SOURCE OF FINANCE.

£.

Source.	1958-59.	1959-60.	1960-61.
Public loans, domestic raisings, etc. . . . .	177,300,000	148,300,000	117,900,000
Oversea loans and special Commonwealth assistance . . . . .	32,700,000	71,700,000	112,100,000
Total . . . . .	210,000,000	220,000,000	230,000,000

(a) Excludes amounts provided for emergency wheat storage, 1958-59, £6,547,000; 1959-60, £6,937,000 and for rehabilitation of the Mount Isa-Townsville-Collinsville railway line, £20,000,000.

In addition to the new loans raised as shown in the foregoing tables and the redemption and conversion loans shown in the following paragraph there were other miscellaneous loan operations during 1959-60, namely:—Savings Certificates and War Savings Certificates (Five and Seven Years' Series), a decrease of £2,216,000 and "Over the Counter Sales" (small amounts borrowed by the States by virtue of certain statutory rights), £4,452,000. Advance loan subscriptions in hand decreased from £1,558,000 at the end of 1959-60 to £781,000 at the end of 1960-61.

(ii) *London.* The following table gives details of cash loans raised in London in October, 1958, and in February, 1960.

(a) No account has been taken of the cost of issuing the conversion loans at a discount. Exchange calculated at £A. 125.375 = £Stg. 100.

(iii) *New York.* During 1946-47, four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose until December, 1954. The most recent loan raised in New York for this purpose was in March, 1957, and amounted to \$17,114,000, at 5 per cent. interest, issued at par, maturing in 1972. No loans were raised for this purpose between 1957-58 and 1960-61.

4. *International Bank for Reconstruction and Development Loans.*—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America or Canada, the Commonwealth Government arranged six loans from the International Bank for Reconstruction and Development between August, 1950, and December, 1956, amounting to \$317,730,000, repayable over periods of from 10 to 25 years, at rates of interest of from 4½ to 4¾ per cent. The proceeds of the latest of these loans were finally drawn in March, 1959.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. The goods are imported and distributed through normal channels and payment made through the Australian banking system.

5. *Swiss Loan.*—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, February, 1955, March, 1960, and March, 1961, of four public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Credit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loan were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was 3¾ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs. The third loan was for a period of fifteen years with an option to redeem after 10 years. The rate of interest was 4½ per cent. and the issue price £99. The fourth loan was issued at par in March, 1961, at the rate of 4½ per cent. maturing in April, 1976. Payments of interest and repayments of principal are to be made only in Swiss francs.

The loans were fully subscribed, and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency.

6. *Canadian Loan.*—In October, 1955, the Commonwealth Government arranged for the issue in Canada of a public loan of 15,000,000 Canadian dollars raised to assist Australia's development programme. The loan was underwritten by Wood, Gundy & Company Limited of Toronto, Canada. The loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part at any time prior to 1st November, 1970. The rate of interest was 4 per cent. payable half-yearly and the issue price \$98.50. A second loan, of 2,000,000 Canadian dollars, was raised in April, 1961, on the security of Commonwealth of Australia, 5½ per cent. twenty year bonds being issued at the rate of 98½ per cent. Bonds and interest are payable in Canadian dollars in each case.

The loans were fully subscribed, and the net Canadian dollar proceeds were sold to the Commonwealth Bank for Australian currency.

7. Summary of Loan Transactions, 1956-57 to 1960-61.—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1956-57 to 1960-61.

## COMMONWEALTH LOAN TRANSACTIONS: SUMMARY.

## E. TAXES ON INCOME.

1. *General.*—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, page 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the Income Tax and Social Services Contribution Assessment Act 1936-1960 and the Income Tax and Social Services Contribution Act 1960. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1961-62 is levied on the income of individuals in 1961-62 and on the income of companies in 1960-61.

2. *Present Taxes.*—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and, in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income other than dividends derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the Social Services Act 1947–1962 and the Tuberculosis Act 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, and (v) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation, and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are:—Zone A, £270 plus an amount equal to one half of the total deductions allowable to the taxpayer for the maintenance of dependants; and Zone B, £45 plus an amount equal to one twelfth of the deductions allowable to the taxpayer for the maintenance of dependants. A deduction equal to the deduction allowed to residents of Zone A is also allowed to members of the defence forces serving for more than one half of the year of income at declared localities outside Australia. The boundaries of Zones A and B are as defined in the Second Schedule, Income Tax and Social Services Assessment Act 1936–1961.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in the following paragraph.

4. **Concessional Deductions.**—Concessional allowances for dependants, medical expenses, life assurance and superannuation contributions, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, for a parent or parent-in-law, or for a housekeeper employed by the taxpayer, for the financial year 1961–62, is shown in the following table.

#### CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.(a)

(£.)

Dependant, etc. (Resident).	Maximum Deduction.
Spouse .. .. .	143
Daughter-housekeeper (b) .. .. .	143
Housekeeper (b) having care of taxpayer's children under 16 years of age .. .. .	143
Parent or Parent-in-law .. .. .	143
One child under 16 years of age .. .. .	91
Other children under 16 years of age .. .. .	65
Invalid relative(c) .. .. .	91
Child 16 to 21 years receiving full-time education (d) .. .. .	91

(a) These deductions are allowed only if the dependant, parent or parent-in-law is a resident of Australia. If the dependant is maintained for part only of the year, a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows:—

In the case of a spouse or daughter-housekeeper, by £2 for every £1 by which the separate net income exceeds £65; for each parent or parent-in-law maintained, by £1 for each £1 of separate income; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1961–62 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or to a hospital, in respect of an illness or operation, payments for dental services not exceeding £30 for any one person, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include, (i) payments of life, etc., insurance premiums and contributions to superannuation funds and friendly societies, not exceeding an aggregate of £400, (ii) payments to medical or hospital benefits funds, (iii) funeral expenses of a dependant not exceeding £30 and (iv) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £100 per child or dependant).

In addition to concessional deductions, all taxpayers (residents and non-residents) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies. Resident taxpayers only are allowed a deduction from income of the full amount paid as calls and as application and allotment moneys to certain companies engaged in the search for oil in Australia and New Guinea.

5. **Effective Exemption from Tax.**—For the financial years 1950–51 to 1961–62, resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

#### RESIDENT TAXPAYERS: EFFECTIVE EXEMPTIONS FROM TAX.

(£.)

Taxpayer with—	Income Tax and Social Services Contribution— Financial Years 1950–51 to 1952–53.	Income Tax and Social Services Contribution— Financial Years 1953–54 to 1956–57.	Income Tax and Social Services Contribution— Financial Years 1957–58 to 1961–62.
No dependants .. .. .	104	104	104
Wife .. .. .	208	234	247

„ „ two children .. .. .	338	364	403
„ „ three children .. .. .	390	416	468
„ „ four children .. .. .	442	468	533

For the 1961–62 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £455. A married couple both of whom qualify by age for the concession, are exempt from tax if their combined net incomes do not exceed £1,293.

6. **Rates of Income Tax and Social Services Contribution on Individuals.**—The following table shows the rates of income tax and social services contribution for the financial years 1953–54 to 1961–62.

16,000	upwards	9,157	5 10	8,417	18 4

(a) For the 1959-60 and 1961-62 financial years provision was made for a rebate to reduce by 5 per cent. the income tax and social services contribution otherwise payable.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election, once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at the ordinary rates applicable to that part. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth Loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth Loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax are subject to a rebate of 2s. for each £1 included in the taxable income.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953.**—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the Income Tax Assessment Act since 1947.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1954–55 to 1961–62.

(a) Provision was made for a rebate to reduce by 5 per cent. the amount of income tax and social services contribution otherwise payable.

9. *Pay-as-you-earn.*—(i) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages or salary to an employee at the appropriate rate, in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate, a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate, the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks, the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(ii) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year are made at the same time as collection and assessment for the previous year are adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged), but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment, the taxpayer may elect to substitute his own estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

An employee with income of £100 or more from sources other than salaries or wages is required to pay provisional tax in respect of that income.

10. *Lodgment of Returns and Assessment of Tax.*—All persons with assessable income in excess of £104 are required to lodge returns by 31st July each year (31st August for business incomes). The Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amounts payable are issued during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already paid and any difference either collected or refunded.

11. *Company Income Taxes.*—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained on the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1956-57 to 1961-62 are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details, see Official Year Book No. 39, page 846 and No. 40, page 743.

Interest paid to a Non-Resident(e) .. .. .	96	96	90	90	96	96	..

(a) Incomes not exceeding £104 are exempt from tax. (b) Where the taxable income does not exceed £228 (1956-57) or £231 (1957-58 to 1959-60) or £260 (1960-61 and 1961-62) the tax may not exceed eleven-twentieths (1956-57) or one-half (1957-58 to 1961-62) of the amount by which the taxable income exceeds £104. (c) The rate of 84d. (1956-57, 1960-61 and 1961-62) or 78d. (1957-58 to 1959-60) is levied on the amount of £5,000 less the mutual income. (d) For non-resident companies dividends included in this part of taxable income are taxed at 72d. (1956-57, 1960-61 and 1961-62) and 66d. per £1 (1957-58 to 1959-60). (A resident company is allowed a rebate of tax in respect of dividends received.) (e) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—

- (a) Primary income tax and social services contribution payable;
- (b) Retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and
- (c) Certain dividends paid by the company.

For the financial years 1953-54 to 1958-59, the retention allowance was the following proportion of the reduced distributable income:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the next £1,000 or part, 35 per cent.
- On the next £1,000 or part, 30 per cent.
- On the balance, 25 per cent., and
- Ten per cent. of distributable income from property, except dividends from other private companies.

For 1959-60 to 1961-62, the minimum retention allowance in relation to business profits has been increased to 35 per cent. The new rates are as follows:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the balance, 35 per cent.

The retention allowance in respect of distributable income from property, except dividends from other private companies, is unchanged at 10 per cent.

For the financial years 1953-54 to 1961-62, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1956-57 to 1960-61.

**INCOME TAX COLLECTIONS.**

(a) Actual income is defined briefly as "Gross Income including exempt income less expenses incurred in gaining that income".

## CHAPTER XXII.

## AGRICULTURAL PRODUCTION.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated. The term "Short Ton" is used to denote a ton of 2,000 lb.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries* and *Part II.—Non-Rural Industries and Value of Production* published by this Bureau. For advance information on these subjects, the following mimeograph statistical bulletins should be consulted—*Rural Land Use and Crop Statistics* (annual), *Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Wheat Industry* (usually two per year), *Fruit Growing Industry* (annual), *Tractors on Rural Holdings* (annual), and *New Tractors: Receipts, Sales and Stocks* and *New Agricultural Machinery Statistics* (quarterly). The annual mimeograph *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia* contains details of the production, distribution and apparent consumption of foodstuffs obtained from the agricultural industry.

## § 1. Introductory.

In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes, and the latest figures available are those for the year 1960–61. The returns are collected on a substantially uniform basis in all States at 31st March, each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes), provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this chapter are therefore shown in "agricultural" years. For most purposes, there will be little error involved in considering them as applying to years ending on 30th June.

## § 2. Progress of Agriculture.

1. *Early Records.*—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797", Governor Hunter gives the acreage of crops as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

A brief reference to the attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (See No. 22, p. 670.)

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area of crops declining from 491,000 acres in 1850 to 458,000 acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres.

2. **Progress of Cultivation.**—The following table shows the area of crops in each of the States and Territories of Australia at decennial intervals since 1860–61 and during each of the ten seasons 1951–52 to 1960–61. On page 911 there is a graph showing the area of crops in Australia from 1900–01 onward.

**AREA OF CROPS.**

(a) Not available.

The progress of agriculture was practically uninterrupted from 1860–61 to 1915–16, when, as the result of a special effort to raise wheat during the 1914–18 War, 18.5 million acres were cultivated in Australia. There was a temporary setback in later war years, but after the termination of hostilities the area continued to expand and rose steadily to the record area of 25.2 million acres in 1930–31. Thereafter, the slump in wheat prices seriously depressed the agricultural industry and the area of crops receded to just under 20 million acres in 1935–36.

By 1938–39, the industry had recovered from the depression and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943–44. After 1943–44, production gradually increased again until, in 1947–48, 22.3 million acres were sown to crops. This upward trend was reversed after 1948–49, largely because, as a result of the high prices of wool, many primary producers transferred from agricultural to pastoral production. Since 1951–52, when the area sown was 20.0 million acres, the area under wheat has increased steadily, except for 1956–57 when excessively wet conditions in the eastern States caused a drop in the area sown. Since that year, the area of crops has shown an upward trend in each year, reaching a record level of 29.6 million acres in 1960–61. As the area under wheat in Australia constitutes a large proportion of the total area cropped (45 per cent. during the five years ended 1960–61), fluctuations in the latter follow broadly the same pattern as changes in wheat areas.

3. **Area under Sown Pastures.**—In all States, there are considerable areas of grasses, mainly sown on land from which scrub has been cleared or on land which it is desired to rest from cultivation. These areas have expanded from about 5.3 million acres in 1929–30 to about 36.3 million acres in 1960–61.

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and Territories and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:— (i) the promotion of the welfare and development of agricultural industries generally; (ii) exchange of information on agricultural production and marketing; (iii) the improvement

of the quality of agricultural products and the maintenance of high grade standards; (iv) to ensure, as far as possible, balance between production and available markets; and (v) organized marketing, etc.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council, to secure co-operation and co-ordination in agricultural research, to advise State and Commonwealth Governments on the initiation and development of agricultural research, and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

### § 3. Distribution, Production and Value of Crops.

1. Area of Crops in States and Territories.—The following table shows the areas in the several States, the Northern Territory and the Australian Capital Territory of each of the crops for the season 1960–61.

4. **Size Classification of Principal Crops.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1959-60 and will be published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity, 1959-1960*. Tables in these bulletins will show a classification by area of holding and area of crop for wheat, oats and barley. Classifications of holdings according to major crops grown and livestock carried, and type of activity will also be shown.

5. **Weights and Measures.**—Details of the weights and measures used in recording production of agricultural commodities appear in the introduction to the bulletin *Primary Industries—Part I.—Rural Industries*.

6. **Production of Crops in States and Territories.**—The following table shows production of crops in the various States and Territories for the season 1960-61.

(a) Includes amounts paid as bounty, relief, etc.

(b) Incomplete, excludes Northern Territory.

(c) Includes payments by the Commonwealth Government of £3,022,000 in 1959-60 and £8,884,000 in 1960-61.

(d) Incomplete, excludes Western Australia.

10. Value of Production and Indexes of Price and Quantum of Production.—(i) *Gross and Net Values*, 1960-61. Values of agricultural production for each State are shown for 1960-61 in the following table. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

In computing the net value of production, no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant; consequently, the figures are overstated to that extent.

## GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1960-61.

(£'000.)

(a) No deduction has been made for depreciation and maintenance.

(b) No allowance has been made for costs of power, power kerosene, petrol and other oils.

(ii) *Net Values, 1956-57 to 1960-61.* In the following table, the net value of agricultural production and the net value per head of population are shown by States for the years 1956-57 to 1960-61.

## NET VALUE OF AGRICULTURAL PRODUCTION.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE.(a) (£'000.)									
1956-57	48,425	63,802	60,127	49,688	24,640	7,978	58	143	254,861
1957-58	44,754	64,971	62,898	32,318	27,338	12,050	52	149	244,530
1958-59	82,472	73,661	68,716	50,571	42,746	10,496	59	222	328,943
1959-60	78,518	68,912	65,357	24,246	44,044	10,645	79	150	291,951
1960-61	98,171	104,031	73,471	58,323	46,708	10,939	80	138	391,861

## NET VALUE PER HEAD OF POPULATION. (£)

1956-57	13.5	24.3	43.1	57.7	36.2	24.6	2.9	3.9	26.7
1957-58	12.2	24.2	44.2	36.5	39.4	36.3	2.4	3.8	25.1
1958-59	22.1	26.8	47.4	55.7	60.6	31.0	2.6	5.1	33.1
1959-60	20.7	24.4	44.2	26.0	61.4	30.9	3.2	3.0	28.7
1960-61	25.4	36.0	48.8	60.9	64.0	31.3	3.1	2.5	37.7

(a) No deduction has been made for depreciation and maintenance.

(iii) *Indexes of Quantum and Price of Agricultural Production.* Indexes of quantum and price of agricultural production are shown in the following table. The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized at the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. Further details on weights used, etc., are to be found in Chapter XXX.—Miscellaneous.

## INDEXES OF QUANTUM(a) AND PRICE OF AGRICULTURAL PRODUCTION.

(Base : Average 3 years ended June, 1939 = 100.)

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Quantum Produced—					
Wheat .. .. .	82	59	131	121	166

<i>Total, All Crops .. .. .</i>	<i>120</i>	<i>109</i>	<i>165</i>	<i>140</i>	<i>177</i>
Total per Head of Population	86	77	114	94	118
Price—					
Wheat .. .. .	347	339	337	350	354
Other Crops .. .. .	327	333	310	313	344
<i>Total, All Crops .. .. .</i>	<i>336</i>	<i>336</i>	<i>322</i>	<i>329</i>	<i>349</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of the base years (1936-37 to 1938-39).

## § 4. Wheat.

1. *Royal Commission on the Wheat Industry.*—A Royal Commission was appointed in January, 1934, to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat-growing industry, the third that of baking, the fourth the flour-milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

2. Licensing of Areas Sown to Wheat, and Acreages Sown.—Details of the operations of the Wheat Stabilization Board in licensing wheat grown during the seasons 1941–42 to 1948–49 will be found in Official Year Book No. 38, pages 940–41. The Board ceased to function on 31st December, 1948.

3. Legislation relating to Wheat Industry.—(i) *Stabilized Marketing*. A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, is given in the Appendix to Official Year Book No. 37, pages 1295–99.

(ii) *The Australian Wheat Board*. The Australian Wheat Board was constituted in September, 1939, under National Security (Wheat Acquisition) Regulations, to purchase, sell, or dispose of, wheat or wheat products, manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

The Board was reconstituted for five years, with similar powers, under the Commonwealth Wheat Stabilization Act 1948, to administer the stabilization plan. The new Board commenced to function on 18th December, 1948. The Board has been continued in existence by the Commonwealth Wheat Industry Stabilization Acts of 1954 and 1958 for the purpose of administering the second and third five-year stabilization plans.

(iii) *Wheat Stabilization Plans*. (a) 1947–48 to 1952–53. Details of the Wheat Stabilization Plan which operated during the seasons 1947–48 to 1952–53 inclusive were published in Official Year Book No. 40, pages 841 and 842, and previous issues.

(b) 1953–54 to 1957–58. Details of the plan which operated during the seasons 1953–54 to 1957–58 inclusive were published in Official Year Book No. 44, page 861, and previous issues.

(c) 1958–59 to 1962–63. Following negotiations during 1958, a new wheat industry stabilization plan was enacted by the Commonwealth and the States towards the end of that year. The new plan follows the lines of the two earlier ones. Details of the plan are as follows.

- (i) *Period of the Plan*. The plan will operate for five years. It will commence with the 1958–59 wheat crop and will end with the marketing of the 1962–63 crop.
- (ii) *Commonwealth Guarantee*. The Commonwealth will guarantee a return of 14s. 6d. a bushel to growers on up to 100 million bushels of wheat exported from the crop in the first year of the plan. The guaranteed return of 14s. 6d. is based on the findings of the recent survey of the economic structure of the wheat industry conducted by the Bureau of Agricultural Economics. It will be adjusted in each of the following years of the plan on up to 100 million bushels in accordance with the movements in costs based on a cost index established from the survey. The first two five-year Wheat Stabilization Plans each guaranteed a similar quantity of 100 million bushels exported.
- (iii) *Australian Wheat Board*. The Australian Wheat Board will be maintained as the sole constituted authority for the marketing of wheat within Australia and for the marketing of wheat and flour for export from Australia for the period of the plan.
- (iv) *Stabilization Fund*.
  - (a) *Export Tax*. A tax will be collected on wheat exported which will be equivalent to the excess of the returns from export sales over the guaranteed return. However, the maximum rate of export tax will be 1s. 6d. a bushel.
  - (b) *Size of Fund*. The ceiling of the Stabilization Fund is established at £20 million; any excess beyond this figure will be returned to growers on the "first-in-first-out" principle.
  - (c) *Balance in Present Wheat Stabilization Fund*. The balance remaining in the Fund at the termination of the present plan will be carried forward to the new plan as the nucleus of a new stabilization fund.
  - (d) *Use of the Stabilization Fund*. When the average export realizations fall below the guaranteed return, the deficiency will be made up first by drawing upon the stabilization fund in respect of up to 100 million bushels of wheat from each crop. When the fund is exhausted, the Commonwealth will meet its obligations under the guarantee.

- (v) *Home Consumption Price.* The home consumption base price for 1958–59, the first year of the plan, was established as 14s. 6d. a bushel, bulk basis, f.o.r. ports plus 2d. a bushel loading to cover the cost of transporting wheat to Tasmania as outlined in (vi) below. There is provision in the plan for annual adjustments in the following years in accordance with the guaranteed price as outlined in (ii) above.
- (vi) *Freight on Wheat to Tasmania.* Provision is made for a loading on the price of all wheat sold for consumption in Australia to the extent necessary to cover the cost of transporting wheat from the mainland to Tasmania in each season of the plan.
- (vii) *Premium on Western Australian Wheat.* A premium will be paid from export realizations on wheat grown in Western Australia and exported from that State in recognition of the natural freight advantage enjoyed by Western Australia owing to its proximity to the principal oversea markets for wheat. The premium will be 3d. a bushel.

By agreement between the parties concerned, the Australian Wheat Growers' Federation, the States and the Commonwealth, a poll of growers as to acceptance of the plan was not considered necessary. The earlier plans had been approved by polls of growers.

The cost of production of wheat, which for the first season of the plan, 1958–59, was fixed at 14s. 6d. a bushel by the legislation, rose to 14s. 10d. a bushel for the 1959–60 season and to 15s. 2d. a bushel for the 1960–61 season. The guaranteed price for the seasons 1959–60 and 1960–61 was therefore 14s. 10d. and 15s. 2d. a bushel respectively, while the home consumption price, in each case including a loading of 2d. a bushel to cover costs of shipment of wheat to Tasmania, became 15s. and 15s. 4d. a bushel respectively. For the 1961–62 season, the guaranteed price is 15s. 9d. a bushel and the home consumption price is 15s. 10d. a bushel, which includes a loading of 1d. a bushel to cover cost of shipment of wheat to Tasmania.

(iv) *Wheat Industry Research.* In 1957, the Commonwealth Parliament passed legislation providing for a levy of a farthing a bushel on wheat handled by the Australian Wheat Board. This money, contributed by the growers, is to be spent by the Wheat Research Committees set up in the wheat-growing States. These Committees, which consist of representatives of wheatgrowers, universities and State Departments of Agriculture, also received a total of £284,000 under the provisions of the Wheat Acquisition (Undistributed Moneys) Act 1958.

The Commonwealth Government has undertaken to supply additional funds for research (with a maximum of £1 for £1 against the growers' contribution) and has set up the Wheat Industry Research Council to make recommendations on the appropriate expenditure of the Commonwealth contribution.

The Council at its inaugural meeting in February, 1958, considered that possible avenues of research would include the breeding of better varieties, cereal chemistry, soil fertility, mechanization, the industry's cost structure and marketing problems.

The Council and the State Committees have incurred an estimated expenditure of £933,507 up to the end of June, 1961, including grants to the Commonwealth Scientific and Industrial Research Organization, State Departments of Agriculture, Universities and Agricultural Colleges.

4. *Marketing of Wheat.*—(i) *Wheat Acquired and Disposed of.* (a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1956–57 to 1960–61 harvests are shown in the following table.

AUSTRALIAN WHEAT BOARD : WHEAT ACQUIRED, 1956-57 TO 1960-61.

Sold for local consumption as flour .. ..	41,162	39,213	40,174	42,713	39,814
Sold for other purposes .. ..	21,459	16,894	13,484	16,635	15,107

(a) Years ended 30th November.  
exported.

(b) Includes wheat equivalent of manufactured wheat products

(ii) *Finance.* The Wartime Wheat Acquisition Regulations empowered the Minister to arrange with the Commonwealth Bank for advances to the Board, the advances being guaranteed by the Commonwealth Government. The Wheat Industry Stabilization Act 1948 included similar provisions for advances to the reconstituted Board established under that Act and these provisions have been continued in the subsequent legislation, with the exception that advances are now arranged through the Reserve Bank.

**AUSTRALIAN WHEAT BOARD : FINANCIAL OPERATIONS, POOLS Nos. 20 to 24.**

(a) Complete. (b) Incomplete. (c) Includes £1,589,000 paid to Wheat Prices Stabilization Fund and £125,000 to Wheat Industry Research Fund. (d) Subject to additional £397,000 withdrawn from Wheat Prices Stabilization Fund and payment of £85,000 to Wheat Industry Research Fund. (e) Subject to additional £6,532,000 withdrawn from Wheat Prices Stabilization Fund and payment of £207,000 to Wheat Industry Research Fund. (f) Subject to additional £8,024,000 (of which the Commonwealth Government provided £3,022,000) withdrawn from the Wheat Prices Stabilization Fund and payment of £187,000 to Wheat Industry Research Fund. (g) Subject to additional £8,884,000 provided by the Commonwealth Government and payment of £261,000 to the Wheat Industry Research Fund.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(iii) *Advances to Growers.* Each year the size of the first advance to growers is announced by the Minister for Primary Industry before the commencement of the season. Additional payments are made as sufficient funds become available to the Board from sales realizations. Details of advances made to wheat growers in respect of the various pools are published in the Statistical Bulletin: *The Wheat Industry, Australia*, last issued in April, 1962.

(iv) *Stabilization Fund.* Particulars of the most recent legislative provisions for this fund are given in para. 3 (iii) on page 903.

In accordance with the provisions of the second Stabilization Plan, amounts of £9,160,000 and £1,589,000 were paid into the Stabilization Fund from the export charge on exports from the 1953-54 and 1956-57 crops. There were withdrawals from the Fund in respect of the years 1954-55, 1955-56 and 1957-58 amounting to £189,000, £1,010,000 and £397,000 respectively. The balance of the Fund, including interest from its investment amounting to over £10 million, was carried forward as the nucleus of the Fund for the third Stabilization Plan commencing with the 1958-59 season.

Under the third Stabilization Plan an amount of £6,532,000 (7.88d. per bushel) has been withdrawn from the Fund to raise export realizations from the 1958–59 harvest. The balance of the Fund with accrued interest, together amounting to £5,002,000, was withdrawn to raise export realizations from the 1959–60 harvest. In addition, an amount of £3,022,000 was contributed by the Commonwealth Government in accordance with the guarantee. In March, 1962, the Commonwealth Government contributed £8,884,000 to meet the export guarantee, the Fund being exhausted.

5. **International Wheat Agreements.**—Details of the first and second International Wheat Agreements operative from 1st August, 1949, to 31st July, 1953, and from 1st August, 1953, to 31st July, 1956, respectively, were published in Official Year Book No. 42 (*see* pp. 840–1) and previous issues. Details of the third International Wheat Agreement, which covered the period from 1st August, 1956, to 31st July, 1959, were published in Official Year Book No. 43 (*see* p. 836).

Following ratification by the required number of wheat exporting and importing countries, a fourth International Wheat Agreement came into force on 1st August, 1959. The Agreement covers the three-year period from 1st August, 1959, to 31st July, 1962.

The new Agreement, negotiated at an international conference convened by the United Nations, continues the basic arrangements covered by previous Agreements, together with some important variations. The Agreement seeks to obtain an element of stability in world wheat marketing by providing that a significant proportion of wheat entering international trade will be bought and sold at prices within a prescribed range. The member exporting countries compete to supply at prices within the agreed price range, which is from 190 cents (Canadian currency) or about 15s. 6d. Australian to 150 cents or about 12s. 3d. a bushel. These prices are used in the following manner:—Maximum price is based on the price of Canada's No. 1 Northern Manitoba wheat in bulk in store at Fort William/Port Arthur, and the minimum price shall be each exporter's f.o.b. price's equivalent to the c.i.f. price in the United Kingdom of the minimum price of Canada's No. 1 Northern Manitoba wheat in bulk in store Fort William/Port Arthur, using currently prevailing transportation costs and exchange rates.

Member importing countries have undertaken to buy each year from member exporting countries a stated percentage of their total commercial requirements at prices within the agreed range instead of a fixed quota as under previous Agreements.

The new Agreement empowers the International Wheat Council to make an annual review of the world wheat situation, including the international implication of national policies in respect to wheat production, stocks and marketing, and the disposal of wheat surpluses on non-commercial terms.

Provision has also been made for a right of appeal against excessive discounts from the minimum price on the basis of differences in quality between the basic wheat—Canada's No. 1 Manitoba Northern Wheat—and the wheat supplied by the other member importing countries.

The provision in the previous Agreements by which the individual exporting countries had separate guaranteed quantities that they would call upon the member importing countries to buy at the minimum price has not been retained.

Member countries of the fourth International Wheat Agreement are:—

Exporters—Argentina, Australia, Canada, France, Italy, Mexico, Spain, Sweden and the United States of America.

Importers—Austria, Belgium and Luxembourg, Brazil, Costa Rica, Cuba, Dominican Republic, El Salvador, Federal Republic of Germany, Greece, Guatemala, Haiti, Honduras Republic, Iceland, India, Indonesia, Ireland, Israel, Japan, Korea, The Netherlands, New Zealand, Norway, Panama, Peru, The Philippines, Portugal, Federation of Rhodesia and Nyasaland, Saudi Arabia, Switzerland, Republic of South Africa, United Arab Republic, United Kingdom, Vatican City, and Venezuela.

6. **Wheat Farms.**—(i) *Number.* Particulars of the number of farms growing 20 acres and upwards of wheat for grain during each of the years 1956–57 to 1960–61, are shown in the following table. It should be noted that a farm worked on the share system or as a partnership is included as one holding only.

**NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN.**

7. **Area, Production and Yield per Acre.**—(i) *Area.* Wheat is the principal crop grown in Australia, and its progress since 1860-61 has been almost continuous, although the area shown has been at a lower level during the past decade. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties of wheat for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1956-57 to 1960-61 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

(a) 60 lb. per bushel.

A graph showing the area sown to wheat for grain in Australia since 1900-1 appears on page 912 while a map showing the distribution of areas growing wheat for grain throughout Australia in 1954-55 appeared on page 833 of Official Year Book No. 43. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39 and 1947-48 appeared respectively in Official Year Books No. 22, page 695, No. 34, page 451 and No. 39, pages 977-8.

(ii) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season, resulting in considerable year-to-year fluctuations in production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it exports flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and a large proportion of the crop is exported.

Production of wheat in 1960-61 was a record at 273,716,000 bushels. This was 75,215,000 bushels greater than production in 1959-60 and 53,600,000 bushels greater than the previous record of 220,116,000 bushels achieved in 1947-48. Record production levels of 67,587,000 bushels and 63,900,000 bushels were recorded in Victoria and Western Australia respectively, and all States except Queensland and Tasmania showed substantial increases over production in 1959-60. The most notable increase occurred in South Australia, where production in 1960-61 was nearly four times the 1959-60 figure of 11,929,000 bushels.

(iii) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to seasonal influences. High yields per acre for Australia for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels; in 1955-56, 19.2 bushels; in 1958-59, 20.7 bushels (a record); in 1959-60, 16.3 bushels; and in 1960-61, 20.4 bushels.

(iv) *Decennial Averages, 1861-70 to 1951-60.* The following table shows the average area, production and yield per acre for decennial periods since 1861.

## WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA.

Period.	Area.			Production.		Yield per Acre.

1951-60 .. ..		10,164		173,622		17.1

8. Varieties of Wheat Sown.—(i) *General*. The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845–1905) did invaluable work in pioneering this field and the results of his labour and the continued efforts of those who have followed him have proved of immense benefit to the industry. Their efforts have resulted in the development of disease-resistant varieties, better average yields, and a greater uniformity of sample, with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown during each season is restricted to about 45.

(ii) *States, 1960–61*. The principal varieties of wheat sown and the percentage of each to the total area sown in the five main producing States during 1960–61 were as follows:—New South Wales, Glenwari (20.4), Bencubbin (10.1), Gabo (9.0); Victoria, Insignia (49.0), Pinnacle (21.5), Olympic (14.2); Queensland, Festival (43.2), Spica (24.7); South Australia, Insignia (23.3), Gabo (20.9), Dirk (14.6); and Western Australia, Gabo (37.7), Insignia (15.3), Bungulla (11.5). A detailed table of wheat varieties sown in these five States appears in the annual bulletin *Primary Industries—Part I.—Rural Industries*.

9. F.A.Q. Standard of Wheat.—Samples of wheat are obtained each year from the different wheat districts, and mixed to give a representative sample of the whole crop in each State. From this representative sample the “f.a.q.” (fair average quality) weight for each State is determined by the use of the Schopper 1-litre scale chondrometer. This standard is used as a basis for sales of each crop and it varies from year to year and from State to State. Until the 1957–58 season, the Chambers of Commerce in each of the four main wheat-producing States determined the f.a.q. standard for each season's crop. Commencing with the 1958–59 season, however, the f.a.q. standard has been determined by State committees comprising representatives of the Australian Wheat Board, the silo authorities, the growers and the State Departments of Agriculture. “F.a.q.” is an Australian term, and the method of selling differs from that of other countries, which sell according to sample, or (as in Canada) according to grades, which are fixed and do not vary from year to year.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1960–61 season's crop was as follows:—New South Wales, North, 64 lb., South and West, 62 lb.; Victoria, 64½ lb.; South Australia, semi-hard, 64 lb., soft, 64½ lb.; and Western Australia, 64 lb.

10. Price of Wheat.—(i) *Home Consumption*. The price charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed was as follows:—Year ended 30th November, 1958, 14s. 4d.; 1959, 14s. 8d.; 1960, 15s. 0d.; 1961, 15s. 4d.; and 1962, 15s. 10d. These prices include an amount used to meet freight charges incurred on wheat shipped to Tasmania (2d. from 1958 to 1961; and 1d. in 1962). The figure quoted for 1958 does not apply to New South Wales and Queensland, where, because of the necessity of meeting the extra cost of importing wheat from Canada and Western Australia, the prices during the greater part of the year were 18s. 4½d. and 16s. 9½d. respectively.

(ii) *Export Wheat Prices—Australian Wheat Board's Basic Selling Price*. The Wheat Board's monthly basic export selling prices for f.a.q. bulk wheat f.o.b. basis, both for wheat sold under the International Wheat Agreement and for “free” wheat sold on the open market, fell in the following ranges:—Season ended 31st July, 1958, 13s. 10½d. to 14s. 11d.; 1959, 13s. 4d. to 14s. 6½d.; 1960, 13s. 3d. to 13s. 6d.; 1961, 13s. 5d. to 13s. 9d.; and 1962, 13s. 10d. to 14s. 10½d. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The maximum and minimum prices fixed under the 1956 International Wheat Agreement are expressed in terms of “Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund for No. 1 Manitoba Northern wheat in bulk in store Fort William/Port Arthur.” The maximum price was set at 200 cents a bushel and the minimum at 150 cents for f.a.q. wheat. Under the current 1959 Agreement operative from 1st August, 1959 (see paragraph 5, p. 906), the agreed price range is between 190 cents and 150 cents. Directly converted into Australian currency these limits are approximately 15s. 6d. and 12s. 3d. a bushel respectively.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949–1953 International Wheat Agreement, are given in Official Year Book No. 40, pages 849–50, and Statistical Bulletin: *The Wheat Industry, Australia*, No. 95 of April, 1959, and in previous issues of these publications.

11. Value of the Wheat Crop.—The estimated gross value of the wheat crop in each State and in Australia during the season 1960–61 and the value per acre are shown below

## WHEAT FOR GRAIN: VALUE OF CROPS (a), 1960-61.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	59,432	48,244	7,735	34,000	46,145	103	19	195,678
Value per Acre £	14.6	18.1	11.2	17.3	11.5	14.7	19.0	14.6

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms. Also includes payment of £8,884,000 by the Commonwealth Government.

12. Production and Disposal of Wheat in Australia.—In the following table, details are given of the production of wheat and its disposal during each of the years ended 30th November, 1957 to 1961. The particulars for local consumption are based on sales made by the Australian Wheat Board, whilst those relating to exports represent actual shipments. (For particulars of production and yield from 1900-01 see graph, p. 912.)

(a) In terms of wheat. (b) Includes allowance for unrecorded movements in stocks, gain or loss in out-turn, etc.

NOTE.—One short ton of flour is taken to be equivalent to 46.3 bushels of wheat.

13. Imports of Wheat.—Owing to drought conditions in 1957-58, wheat supplies, particularly in New South Wales, were insufficient for local requirements. As a result, 1,136,000 bushels were imported from Canada during March, April and May, 1958, and a further 349,000 bushels in July, 1958. No wheat has been imported since this period.

Wheat and flour have been imported in substantial quantities on only two previous occasions since 1900; in 1902-3 the wheat harvest was only 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were imported, while an equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season.

14. Exports of Wheat and Flour.—(NOTE: Statistics in this paragraph relate to years ended 30th June.) (i) *Quantities.* The following table shows particulars of the exports of wheat and flour and the total of both, in terms of wheat, for each of the years 1956-57 to 1960-61.

# AREA OF CROPS: AUSTRALIA, 1900-01 to 1960-61

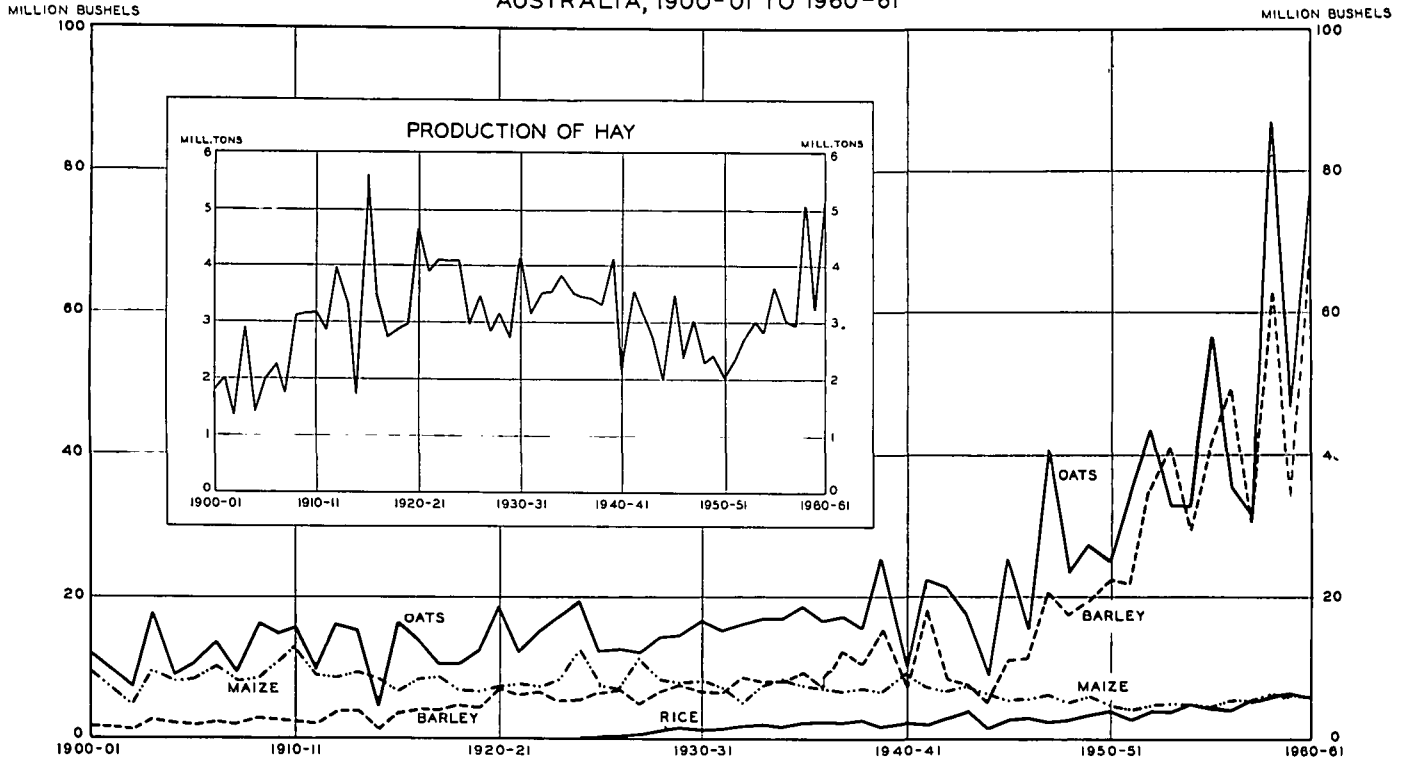

# WHEAT (GRAIN) : AREA, PRODUCTION AND YIELD PER ACRE

AUSTRALIA, 1900-01 TO 1960-61

# PRODUCTION OF OATS, BARLEY, MAIZE, RICE AND HAY

AUSTRALIA, 1900-01 TO 1960-61

(a) Held by the Australian Wheat Board at mills, sidings, ports and depots.

NOTE.—One short ton of flour is taken to be equivalent to 46.3 bushels of wheat.

16. **Bulk Handling and Storage of Wheat in Australia.**—(i) *Description and Development of the Bulk Handling System.* A detailed description of the bulk handling system, including its advantages and disadvantages compared with other methods of handling, appears on pages 954–8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, and, in more recent years, other States have also introduced bulk systems.

(ii) *Bulk Handling and Storage in the States.* Particulars of the operation of the bulk handling and storage systems and projected extensions in the States concerned are set out below.

(a) *New South Wales.* Bulk handling facilities are operated by the Grain Elevators Board of New South Wales. The capacity of storages in the country for the 1961–62 season totalled 63,570,000 bushels and comprised 182 elevators (27,250,000 bushels), 13 horizontal type concrete and steel storages (3,230,000 bushels), 4 sub-terminals (16,500,000 bushels), 78 bulkheads (7,890,000 bushels) and 12 bulk depots (8,700,000 bushels). In addition, port terminal facilities provided storage for 4,200,000 bushels at Newcastle and 7,500,000 bushels at Sydney, making a total capacity of 75,270,000 bushels for the State.

(b) *Victoria.* In the 1961–62 season the Victorian Grain Elevators Board operated bulk storages at 205 country stations having a total capacity of 29,565,000 bushels. The facilities consist of vertical silos (some steel but mostly concrete, some of which have steel annexes), horizontal Behlen sheds, and temporary horizontal bulkheads with a capacity of 2,151,000 bushels, as part of the total of 29,565,000 bushels.

In addition to the above, the bulk terminal at Geelong has a capacity of 22,250,000 bushels, including two horizontal sheds, each of 9,000,000 bushels, while sub-terminal storages at Dunolly, Murtoa and Warracknabeal can hold up to 22,400,000 bushels.

(c) *Queensland.* Bulk storages in this State are controlled and operated by the State Wheat Board. The capacity in the country for the 1961–62 season totalled 5,818,000 bushels. This total is composed of 12 silos (3,250,000 bushels) and 22 bulkheads (2,568,000 bushels).

The terminal bulk storage at Pinkenba commenced receiving wheat in July, 1959, with a storage capacity of 1,300,000 bushels.

(d) *South Australia.* Since the formation of the South Australian Co-operative Bulk Handling Ltd. in 1955, steady progress has been maintained in the expansion of the system.

The present capacity of bulk storages is 18,810,000 bushels—comprising 1,030,000 bushels at Ardrossan; 1,600,000 at Wallaroo; 1,320,000 at Port Lincoln; 820,000 at Thevenard; and 14,040,000 in country areas.

For the 1961–62 season, 24,317,000 bushels of wheat were received in bulk at 38 installations in country areas in addition to the terminals at Ardrossan, Wallaroo, Port Lincoln and Thevenard.

A new terminal is in course of construction at Port Pirie with a capacity of 1,100,000 bushels. Terminal extensions are in course of construction at Wallaroo (800,000 bushels), Port Lincoln (800,000 bushels) and Ardrossan (660,000 bushels). In addition to the above, the company is building 16 country silos with an overall capacity of 3,640,000 bushels. This will raise the total capacity of the company's silos for the 1962–63 season to 25,810,000 bushels.

(e) *Western Australia.* The bulk handling system is operated by Co-operative Bulk Handling Ltd., which is a company controlled by growers. The whole of the marketable harvest is received in bulk. There were, in 1961–62, 295 sidings equipped with bulk handling facilities. Four of these sidings now have concrete storages.

The system of storage at country stations in Western Australia comprises fixed installations of galvanized iron bins and iron and timber horizontal bulkheads. In addition, a type of temporary roofed bulkhead consisting of timber and iron is used. This latter type of storage can be transferred to suit operational requirements, and therefore lends flexibility to the system. Terminal installations comprise concrete silos and timber and iron horizontal bulkheads. Plans are in hand to increase the number of vertical concrete cell type storages at the main ports.

The total storage capacity for the 1961–62 season was 105,094,000 bushels, comprising 80,574,000 bushels in the country and 24,520,000 bushels at ports, including 1,000,000 bushel capacity scheduled for completion during 1962.

(f) *Tasmania.* In order to meet the change to bulk handling of wheat in the mainland exporting States, the Tasmanian Government has constructed grain elevators at Hobart, Launceston and Devonport, each with a capacity of 320,000 bushels, for storage of bulk wheat shipments from the mainland.

17. *World Area and Production of Wheat.*—The figures in the following table of the world area and production of wheat by principal countries and by continents have been compiled from the statistics published by the Foreign Agricultural Service of the United States Department of Agriculture. Years shown refer to years of harvest in the Northern Hemisphere. Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1960 is combined with preliminary forecasts for the Southern Hemisphere harvests, which will begin late in 1960 and end early in 1961.

 (b) Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. (c) Estimated.  
 (d) Not available.

18. **Principal Exporting and Importing Countries.**—The following table shows the quantities of wheat traded by the chief exporting and importing countries for the years 1958–59 to 1960–61, based on statistics recently published by the Food and Agriculture Organization of the United Nations.

While Australia's production of wheat averages less than 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. In 1960–61, for example, Australia's share of world wheat exports amounted to 12.9 per cent.

(a) Preliminary. (b) Unofficial estimate. (c) Total exports do not necessarily agree with total imports because of the time lag between shipments and arrivals, and because export data in official trade returns do not always indicate final destinations. (d) Less than .05 of the unit shown.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

Estimates of exports to, and imports from, the U.S.S.R. and Mainland China (and Poland for 1958-59 only) in the table above are based entirely on available trade returns of the trading partners outside the Sino-Soviet bloc. No account is taken of trade within this bloc owing to the incomplete nature of the data.

## § 5. Oats.

1. Area, Production and Yield per Acre.—Oats is usually next in importance to wheat among the grain crops cultivated in Australia. However, while wheat grown for grain in 1960-61 accounted for 45 per cent., oats grown for grain represented only 12 per cent. of the area of all crops. The area, production and yield per acre of oats in each State are shown below for the years 1956-57 to 1960-61 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## OATS FOR GRAIN : AREA, PRODUCTION AND YIELD PER ACRE.

(a) Less than 500 acres. (b) 40 lb. per bushel. (c) Less than 500 bushels.								

Graphs showing the area sown to oats, and production of oats appear on pages 911 and 913 respectively.

In 1958-59, extremely favourable seasonal conditions for all cereal crops were experienced, and production of oats reached an all-time high at 86,905,000 bushels, the previous record being 56,487,000 bushels in 1955-56. Production was again at a near record level in 1960-61 when 76,107,000 bushels were harvested.

The average yield of 20.9 bushels an acre in 1960-61 was only just below the yield of 21.9 bushels an acre in 1958-59, the highest yield in recent years. The previous highest yield in recent years was 19.3 bushels an acre in the 1947-48 season, which was the highest since 1920-21. The yield per acre recorded in the abnormally dry season 1944-45, 4.4 bushels, was the lowest ever recorded for Australia.

2. **Price of Oats.**—The average wholesale price in the Melbourne market for oats of good milling quality was 7s. 1½d. a bushel in 1960–61, compared with 7s. 9d. in 1959–60.

3. **Value of Oat Crop.**—The estimated gross value of the oat crop in each State for the 1960–61 season and the value per acre were as follows.

OATS : VALUE OF CROP, 1960-61.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	9,034	6,479	146	2,809	6,875	189	3	25,535
Value per acre.. £	9.9	7.8	7.7	5.5	5.2	8.2	3.0	7.0

4. **Exports.**—The production of oats in Australia is sufficient to allow for a regular export trade. The quantities and values of oats exported from Australia during the years 1956–57 to 1960–61 are shown below.

OATS : EXPORTS, AUSTRALIA.

Particulars.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.
Quantity .. .. '000 bus.	8,165	2,296	17,557	11,969	19,005
Value .. .. £'000	2,972	1,064	6,512	5,031	6,854

In 1960–61, the principal countries of destination were the Federal Republic of Germany (6,352,000 bushels), Republic of China (Mainland) (3,596,000 bushels), the Netherlands (3,390,000 bushels), Italy (3,281,000 bushels) and the United Kingdom (1,787,000 bushels). Imports of oats into Australia are not recorded separately.

5. **Oatmeal, etc.**—In 1960–61, the production of oatmeal was 15,868 tons for porridge and 15,677 tons for other purposes. This was equivalent to about 3,500,000 bushels of oats.

6. **World Production.**—The world's production of oats for the year 1960, according to figures released by the United States Department of Agriculture, amounted to 4,000 million bushels, harvested from 110.6 million acres, representing an average yield of 36.2 bushels per acre. This compared with an estimated production in the previous year of 3,725 million bushels from an area of 111.2 million acres and an average yield of 33.5 bushels an acre.

§ 6. Maize.

1. **States Growing Maize.**—Maize is grown for grain chiefly in Queensland and New South Wales, the area so cropped in these States during the 1960–61 season being 181,651 acres, or 98 per cent. of the total for Australia. In all States except South Australia, the crop is grown to some extent for green fodder, particularly in connexion with the dairying industry.

2. **Area, Production and Yield per Acre.**—Although maize for grain is grown extensively in other countries, the area sown to maize for grain in Australia has averaged only 182,549 acres during the five years ended 1960–61. The area in 1960–61 was 184,642 acres, a slight decrease only on the previous year, but considerably less than the comparatively large areas of 414,914 and 400,544 acres sown in 1910–11 and 1927–28 respectively.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize has led to a parallel development in the specialized industry of growing hybrid strains for seed.

The area, production and yield per acre of maize for grain in each State for the years 1956-57 to 1960-61 compared with the averages for the three three-year periods ended 1938-39, 1948-49 and 1958-59 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1960-61.

(a) Not available for publication. (b) Incomplete. See footnotes to individual States. (c) 56 lb. per bushel. (d) Less than 500 bushels.

The average yield for Australia for the five-year period ended 1960-61 was 33.7 bushels per acre. Among principal producing countries during 1960, the United States of America averaged 53.0 bushels per acre and Italy 46.2 bushels.

3. Price of Maize.—The average wholesale price of maize in the Melbourne market in 1960-61 was 20s. 4½d. a bushel compared with 16s. 1d. in 1959-60.

4. Value of Crop.—The estimated gross value of the crop in each State for the 1960-61 season and the value per acre were as follows.

**MAIZE FOR GRAIN: VALUE OF CROP, 1960-61.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value ..	£'000	1,976	137	3,151	..	(a)	5,264
Value per acre ..	£	40.1	45.9	23.8	..	1.3	28.5

(a) Less than £500.

5. Exports of Maize and Maize Products.—Details of exports of maize for the five years ended 1960-61 are shown below.

MAIZE : EXPORTS, AUSTRALIA.

Particulars.		1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Quantity ..	'000 bus.	32	48	15	22	3
Value ..	£'000	26	30	10	15	3

Imports of maize into Australia are not recorded separately.

Exports of cornflour, which prior to the 1939-45 War were very small, increased considerably during the war years, the principal country of destination being New Zealand. In 1960-61, however, only 129,700 lb., valued at £2,652, were exported. It should be noted that these figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are not recorded separately.

6. World Production.—According to preliminary figures released by the United States Department of Agriculture, world production of maize in the year 1960 amounted to 8,200 million bushels, harvested from 268 million acres, giving an average yield per acre of 30.6 bushels. This compared with production in the previous year of 7,940 million bushels from 269 million acres, and an average of 30.4 bushels per acre.

The United States of America is the most important maize-producing country in the world and during the three years ended 1960 the area sown to maize in that country averaged 80 million acres or 30 per cent. of the world total. During the same period, production averaged 4.145 million bushels or about 51 per cent. of the world total. These figures are not strictly comparable with those for other countries included in the above-mentioned world totals, as the area and an estimate of grain equivalent of maize used as green fodder are included.

A graph showing the production of maize in Australia appears on page 913.

§ 7. Barley.

1. Area, Production and Yield per Acre.—The area sown to barley for grain expanded considerably during the ten years preceding the 1939-45 War—from 383,000 acres in 1930-31 to 836,000 acres in 1939-40. This increase was followed by a decline to 443,000 acres in 1943-44, but the area sown has increased in succeeding years and in 1960-61 reached the record level of 2,830,000 acres. Victoria was originally the principal barley-growing State, but since 1913-14 its place has been taken by South Australia which accounted for 55 per cent. of the Australian acreage in 1960-61. There has been a substantial increase in the acreage sown in most States in recent years, particularly in Western Australia and Queensland. Small areas of barley are sown for hay, and larger quantities are sown for green forage, but these are not included in this section. The production of barley for grain in Australia in 1960-61 was a record at 67,970,000 bushels. The previous highest recorded production occurred in 1958-59 when 62,976,000 bushels were produced. The area, production and yield per acre of barley for grain in the several States for the years 1956-57 to 1960-61, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

(a) Less than 500 acres.

(b) 50 lb. per bushel.

(c) Less than 500 bushels.

For Australia (excluding Tasmania), 82 per cent. of the area of barley for grain in 1960-61 was sown with 2-row barley, while the remainder consisted of 6-row varieties. The proportion, however, varied considerably in the several States. The utilization of barley during the season ended November, 1961, was as follows:—exports, 41,583,000 bushels; malting and distilling, 9,017,000 bushels; pearl barley, 178,000 bushels; seed and stock feed, 14,300,000 bushels.

The following table sets out the acreage and production of 2- and 6- row barley in Australia during the seasons 1956-57 to 1960-61 and the averages for the three years ended 1938-39, 1948-49 and 1958-59.

(b) Excludes Tasmania.

A graph showing the production of barley appears on page 913.

2. **Australian Barley Board.**—Following the outbreak of war in 1939, the Australian Barley Board, representative of the whole industry, was formed, and the Commonwealth Government acceded to its request to acquire the entire 1939–40 barley crop, which was placed under the control of the Board. A pool was established, from which proceeds were distributed with appropriate margins for different grades of barley. The Board was responsible for the marketing and storage of barley, and, like the Australian Wheat Board, appointed licensed receivers to receive grain on its behalf.

Following the decision of the Commonwealth Government not to acquire barley in the smaller producing States after 1941–42, the pooling of barley in Queensland reverted to the control of the Queensland Barley Board (originally established in 1930), and in Western Australia a State Barley Board was established to control marketing.

The Commonwealth Government ceased to acquire barley altogether after the 1947–48 crop, and the Victorian and South Australian Governments formed a joint board under the same name as the former Commonwealth board to market the 1948–49 and subsequent crops of the two States. Details for the seasons from 1955–56 to 1960–61 are shown in the table below.

**AUSTRALIAN BARLEY BOARD : BARLEY RECEIVED, SOLD, ETC.**

Pool.	Quantity Received.	Quantity Sold.(a)	Total Advances made per Bushel on 2-row No. 1 Grade less freight.		Total Net Payments to Growers.
			s.	d.	
	'000 bushels.	'000 bushels.			£

„ 22 (1960–61 „) .. ..	44,624	44,624	(b) 8	6	15,267,359

(a) Includes surplus in out-turn except for No. 22 Pool, for which this surplus has not yet been determined. (b) As at 31st December, 1961. At that date, it was estimated that the amount still to be paid to growers was 8.418d. per bushel.

3. **Prices.**—The average wholesale price for 2-row English malting barley in the Melbourne market during 1960–61 was 14s. 11d. compared with 14s. 7d. in 1959–60.

4. **Value of Barley Crop.**—The estimated gross value of the barley crop in each State for the 1960–61 season and the value per acre are shown in the following table.

**BARLEY FOR GRAIN : VALUE OF CROP, 1960-61.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Aggregate value .. £'000	2,884	3,317	2,170	18,989	3,465	247	31,072
Value per acre .. £	15.3	10.7	9.9	12.2	6.4	15.4	11.0

5. **Exports.**—Exports of barley during the five years ended 1960–61 averaged 27,368,000 bushels. South Australia was the principal exporting State, while the Republic of China (Mainland), Italy, the Netherlands and the United Kingdom were the principal countries to which barley was shipped. Particulars of Australian exports for the years 1956–57 to 1960–61 are shown in the following table.

**BARLEY : EXPORTS, AUSTRALIA.**

Particulars.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.
Quantity .. .. '000 bus.	26,501	21,501	29,924	25,013	33,900
Value .. .. £'000	12,745	9,474	16,898	11,541	14,329

Imports of barley into Australia are not recorded separately.

In addition to exports of barley grain, there are also exports of Australian pearl and Scotch barley, the total for 1960-61 amounting to 215,128 lb., valued at £10,982, consigned mainly to Malaya.

6. Malt.—(i) *Production.* Details of the quantity of grain used and the production of barley malt in the years 1956-57 to 1960-61 are given in the following table.

**BARLEY MALT : GRAIN USED AND MALT PRODUCED, AUSTRALIA.**

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Grain used . . '000 bus. <i>a</i>	7,855	8,494	8,198	8,539	9,020
Malt produced . . '000 bus. <i>b</i>	7,895	8,197	8,108	8,435	9,015

(a) 50 lb. per bushel.

(b) 40 lb. per bushel.

(ii) *Exports.* Since 1952-53, the production of malt in Australia has been sufficient to meet local requirements and to provide a margin for export. Exports amounting to 1,103,927 bushels (value £1,046,693) and 2,055,445 bushels (value £1,985,109) were recorded in 1959-60 and 1960-61 respectively.

7. *World Production.*—In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1960 were the United States of America, France, and Canada. China is also normally a major producer, but details for 1960 are not available. Australian production in that year was approximately two per cent. of the world total.

According to estimates made by the United States Department of Agriculture, world production of barley in the year 1960 amounted to 3,410 million bushels harvested from 135.9 million acres, equivalent to a yield per acre of 25.1 bushels. This compared with the production of 3 290 million bushels in the previous year from 136.5 million acres, and a yield per acre of 24.1 bushels.

### § 8. Rice.

The principal rice-growing areas of the world are confined almost entirely to Asia although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25, when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a surplus became available for export. The acreage sown in this area is controlled, as the quantity of water available is limited.

The area sown in New South Wales in 1960-61 was 46,117 acres, which was 4,360 acres below the 1956-57 record of 50,477 acres. Production in 1960-61 amounted to 6,001,066 bushels, which was 730,987 bushels less than the amount produced in 1959-60.

A graph showing the production of rice appears on page 913.

The bulk of Australia's exports of rice in 1960-61 was shipped to Papua and New Guinea, the Pacific Islands and the United Kingdom.

Details relating to area, production and exports for the years 1956-57 to 1960-61 are shown in the following table.

RICE : AREA, PRODUCTION AND EXPORTS, AUSTRALIA.(a)

Season.	No. of Holdings Growing Rice.(b)	Area.	Production (Paddy Rice).			Average Yield (Paddy) per Acre.	Exports.(d)	
			Quantity.	Gross Value. (c)			Un-cleaned.	Cleaned.
			Acres.	'000 Bushels. (e)	£'000.	Bushels. (e)	Cwt.	Cwt.
1956-57 .. ..	652	50,477	4,262	3,069	84.4	177,123	408,634	
1957-58 .. ..	743	46,774	5,658	4,045	121.0	211,426	430,928	
1958-59 .. ..	775	47,054	6,619	4,731	140.7	182,583	704,381	
1959-60 .. ..	848	48,950	6,732	4,450	137.5	265,640	1,055,841	
1960-61 .. ..	787	46,117	6,001	4,125	130.1	359,441	876,216	

(a) Until recently rice-growing in Australia has been practically confined to New South Wales with very small acreages only being sown in Queensland and Western Australia. Production commenced in the Northern Territory in 1956-57 but details, which are confidential, are not included in the table. (b) Twenty acres or more in area. (c) Excludes the value of straw. (d) Imports into Australia are not recorded separately. (e) 42 lb. per bushel.

Experimental rice growing is continuing in the Humpty Doo area of the Northern Territory.

### § 9. Sorghum for Grain.

The growing of sorghum for grain on an extensive scale is a comparatively recent development in Australia. No details of the area and production of this cereal are available prior to 1939-40, but the output was of little importance. The climatic conditions of Queensland and northern New South Wales are particularly suited to the growing of sorghum and so far development has been restricted mainly to these areas, and more particularly to Queensland which accounts for the greater portion of the area sown. The grain produced is fed to livestock and has become an important source for supplementing other coarse grains for the feeding of livestock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet). Particulars of the area and production of sorghum grown for grain are given in the following table.

GRAIN SORGHUM : AREA, PRODUCTION AND YIELD PER ACRE, AUSTRALIA.

Season.	Area.			Production.(a)			Yield per Acre.(a)		
	N.S.W.	Q'land.	Total. (b)	N.S.W.	Q'land.	Total (b)	N.S.W.	Q'land.	Total. (b)
	Acres.	Acres.	Acres.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.

(a) 60 lb. per bushel.

(b) Includes small areas sown and quantities produced in other States.

## § 10. Potatoes.

1. **Area, Production and Yield per Acre.**—Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands and the south-western and Gippsland districts. Until 1958–59, Tasmania came next in order of acreage sown, although production exceeded that of Victoria in some of the war years. Since 1958–59, however, New South Wales, which had previously occupied third position, has supplanted Tasmania as the second most important State in area sown. In 1960–61, owing to adverse conditions during the growing season together with a decline in area sown, production in Tasmania was for the first time exceeded also by that in Queensland, South Australia and West Australia.

The area sown, production and yield per acre of potatoes in each State during the years 1956–57 to 1960–61 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown hereunder.

## POTATOES : AREA, PRODUCTION AND YIELD PER ACRE.

1958–59 ..	4.83	5.62	4.05	8.20	6.68	5.31	1.69	5.49
1959–60 ..	4.28	5.00	4.18	8.33	8.04	6.31	5.37	5.34
1960–61 ..	4.64	4.68	4.95	7.83	6.84	3.59	1.02	4.91

(a) Includes Northern Territory.

After the outbreak of war in the Pacific in December, 1941, the area sown to potatoes increased rapidly and reached a maximum of 241,803 acres in 1944-45. Areas sown in subsequent seasons have been considerably less, and the figure for 1960-61 was 91,805 acres.

The average yield in Australia for 1960-61 was 4.91 tons per acre, which was considerably less than the yield of 5.34 tons obtained the previous season.

2. **Gross Value of Potato Crop.**—The estimated gross value of the potato crop of each State for the 1960-61 season and the value per acre are shown in the following table.

POTATOES : VALUE OF CROP, 1960-61.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	3,066	9,343	1,886	1,596	1,709	1,764	1	19,365
Value per acre £	167	242	157	306	257	162	41	211

3. **Consumption.**—The annual consumption of potatoes in Australia during each of the three years 1958-59 to 1960-61 amounted to 511,934 tons, 523,671 tons and 401,838 tons respectively, or 115.2 lb., 115.4 lb. and 86.6 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 48,700 tons annually over this period.

4. **Marketing.**—Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948 with the completion of sales of the 1947-48 crop.

Potato Marketing Boards were subsequently established in all States under separate State legislation. The life of the Queensland Board was not extended when its term ended in 1954, and the New South Wales Board was voted out by growers in 1956. As the Victorian Board does not acquire the State crop, potato marketing is now conducted chiefly on an open marketing system.

5. **Exports.**—Prior to the 1939-45 War, small quantities of potatoes were exported, principally to the Pacific Islands and Papua. After the war, the export trade expanded considerably. It reached a peak of 37,570 tons in 1952-53, but then fell sharply. Details showing exports for the years 1956-57 to 1960-61 are given in the following table.

POTATOES : EXPORTS, AUSTRALIA.

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Quantity .. .. tons	3,958	7,410	4,489	4,748	5,219
Value .. .. £'000	263	227	152	134	195

Imports of potatoes into Australia in 1960-61 amounted to 1,619 tons, valued at £47,601, coming solely from New Zealand.

## § 11. Onions.

1. **Area, Production and Yield per Acre.**—Up to and including 1959-60, Australia's onion supply came chiefly from Victoria. However, in 1960-61, production in Queensland exceeded that of Victoria by nearly 5,000 tons. Most of Queensland's onion production is grown in the Lockyer Valley, and consists mainly of brown varieties. The Victorian crop consists almost entirely of brown onions, and the bulk of the crop is grown in a small section of the Western Division of the State, where soil conditions have been found to be particularly suitable for onion growing on a commercial scale. Details of the area, production and yield per acre are given in the following table for the years 1956-57 to 1960-61 together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## ONIONS : AREA, PRODUCTION AND AVERAGE YIELD.

1958-59 ..	5.58	7.17	3.98	8.83	12.70	4.62	8.15	6.22
1959-60 ..	5.25	6.96	4.14	8.80	12.32	4.66	3.25	6.10
1960-61 ..	6.31	4.60	5.62	9.05	12.52	4.83	8.00	5.90

2. **Gross Value of Onion Crop.**—The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1960-61 season.

## ONIONS : VALUE OF CROP, 1960-61.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	103	750	537	230	192	18	3	1,833
Value per acre £	165	212	143	350	413	305	300	201

3. **Consumption.**—The annual consumption of onions in Australia averaged 56,700 tons or 12.5 lb. per head of population during the three years ended 1960-61. These figures exclude an estimated wastage which averaged 2,500 tons per annum.

4. **Exports.**—Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1960-61, exports amounted to 2,453 tons, valued at £88,668, and were shipped mainly to Singapore and New Caledonia. The quantity of exports in 1959-60 was 1,124 tons, valued at £70,052. Imports of onions amounted to 2,061 tons, valued at £72,195 in 1959-60, and 2,809 tons, valued at £91,214 in 1960-61.

## § 12. Hay.

1. General.—(i) *Area and Production.* As already stated, the chief crop in Australia, in terms of area, is wheat grown for grain. Up to and including 1946-47, hay was next, but in more recent years it has dropped in relative importance. In 1960-61, the areas sown to green fodder, and oats for grain, were larger than that sown to hay.

In 1960-61, the hay area represented 10.0 per cent. of the total area cropped. A graph showing the area sown to hay crops since 1900-01 appears on page 911. In most European countries, hay consists almost entirely of meadow and other grasses, but in Australia a very large proportion consists of oats, lucerne and wheat. The area, production and yield per acre of hay of all kinds in the several States during the years 1956-57 to 1960-61 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown below.

## HAY : AREA, PRODUCTION AND YIELD PER ACRE.

(a) Includes small amounts grown in the Northern Territory.

For a number of reasons, particularly the variations in the relative prices of grain and hay and whether the season is favourable or not for a grain crop, the area of hay is apt to fluctuate considerably. The area under hay in Australia during the season 1915-16, 3,598,000 acres, was the largest on record, while the area recorded in 1958-59, 3,018,000 acres, was the largest since 1938-39. The area in 1960-61 was 2,973,000 acres while production in that year, at 5,079,000 tons, was the highest since 1915-16.

A graph showing the production of hay appears on page 913.

(ii) *Varieties Grown.* Information regarding areas cut for hay in 1960-61 is given in the following table.

**HAY : AREA OF VARIOUS KINDS GROWN, 1960-61.**  
(Acres.)

State.	Wheaten.	Oaten.	Lucerne.	Other.	Total.

<b>Australia .. ..</b>	<b>248,054</b>	<b>595,438</b>	<b>388,733</b>	<b>1,740,812</b>	<b>2,973,037</b>

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1960-61 were 20.0 per cent. for oaten, 13.1 per cent. for lucerne, 8.3 per cent. for wheaten, and 58.6 per cent. for other hay.

2. **Value of Hay Crop.**—The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1960-61 season.

**HAY : VALUE OF CROP, 1960-61.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	13,179	22,018	3,651	4,622	3,607	3,008	85	(a)50,181
Value per acre £	17.6	17.1	43.3	11.8	12.7	17.6	21.6	16.9

(a) Includes £11,000 in the Northern Territory.

3. **Farm Stocks of Hay.**—Particulars of stocks of hay held on farms at 31st March in each year 1957 to 1961 are given in the table below.

**STOCKS OF HAY HELD ON FARMS.**  
(Tons.)

31st March—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1957 ..	775,464	2,008,678	156,599	555,681	222,941	296,257	7,617	4,023,237
1958 ..	553,691	1,643,876	89,897	384,143	211,069	256,199	3,492	3,142,367
1959 ..	1,463,334	2,464,050	166,657	679,003	290,988	311,825	9,323	5,385,180
1960 ..	1,535,252	1,766,857	203,675	304,227	292,086	255,471	10,778	4,368,346
1961 ..	1,704,486	2,640,249	155,209	648,267	258,859	327,696	12,338	5,747,104

4. **Exports.**—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not figure largely among the exports of Australia. During 1960-61, exports amounting to 2,001 tons, valued at £43,011 were made principally to Singapore, the Federation of Malaya and Hong Kong. There were no imports of hay in 1960-61.

### § 13. Green Fodder.

1. **Nature and Extent.**—Considerable areas are devoted to the growing of green fodder, mainly in connexion with the dairying industry. In the 1960-61 season, green fodder ranked second to wheat in area of crops throughout Australia. A graph showing the area sown to green fodder appears on page 911. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder, or ensilage, together with areas fed off to stock as green forage. Included with the latter are areas which may have been sown with the intention of harvesting for grain, but which, owing to adverse conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities

of barley, sorghum, maize, rye and sugar cane are also used in this way. In 1960-61, the area under green fodder (4,407,561 acres) consisted of oats (1,868,320 acres), lucerne (1,590,794 acres), wheat (208,373 acres), barley (163,488 acres), sorghum (155,509 acres), maize (40,536 acres), rye (29,919 acres), sugar cane (2,801 acres) and other crops (347,821 acres). Particulars concerning the area of green fodder in the several States during each of the years 1956-57 to 1960-61 are given in the following table.

GREEN FODDER : AREA.  
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Austr.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1956-57 ..	813,642	333,115	640,316	657,967	752,072	48,435	2	77	1,246,321
1957-58 ..	993,039	465,009	714,048	748,089	770,739	54,094	4	1,03	1,746,034
1958-59 ..	1,238,314	319,150	638,667	550,366	769,199	61,322	273	66	1,577,958
1959-60 ..	1,578,759	422,237	725,155	595,713	708,793	62,229	240	96	1,094,094
1960-61 ..	1,691,408	430,920	874,702	743,538	606,039	59,563	144	1,24	1,407,561

2. Value of Green Fodder Crops.—The value of these crops is variously estimated in the several States, but the Australian total, excluding Western Australia, may be taken as approximately £7,600,000 for the 1959-60 season and £9,600,000 for the 1960-61 season.

### § 14. Sugar Cane.

1. Area.—Sugar cane growing appears to have commenced in Australia in or about 1862, and is confined, on a commercial basis, to New South Wales and Queensland. In recent years, sugar cane has been grown experimentally in Western Australia. A brief outline of the development of the industry was included in earlier issues of the Official Year Book (see No. 38 page 985). The area of sugar cane in Australia for the seasons 1956-57 to 1960-61 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

SUGAR CANE : AREA.(a)  
(Acres.)

Season.	New South Wales.			Queensland.			Australia.			Total.
	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	
Average for three years ended—										
1938-39	10,468	10,366	(b)	247,632	89,690	(b)	258,100	100,056	(b)	(b)

1960-61	13,657	11,385	568	327,246	110,704	11,574	340,903	122,089	12,142	475,134

(a) Excludes areas cut for green fodder.

(b) Not available.

2. Productive and Unproductive Cane.—The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1960-61 amounted to 2,801 acres. The whole area planted is not cut for crushing during any one season there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants. Thus the season in which the highest acreage is recorded may not show the greatest area of cane cut for crushing.

3. Production of Cane and Sugar.—For Queensland, statistics of the production of sugar cane are not available for seasons prior to 1897-98. In that season, the total for Australia was 1,073,883 tons, compared with 9,165,573 tons in the 1960-61 season. The record production of 10,212,593 tons was achieved in 1958-59.

In the following table, production data relating to cane and raw sugar are shown for the seasons 1956-57 to 1960-61 and averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**SUGAR CANE : PRODUCTION OF CANE AND SUGAR.**  
(Tons.)

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.(a)	Cane.	Sugar.(a)	Cane.	Sugar.(a)
Average for three years ended—						
1938-39 .. ..	324,531	43,419	5,215,217	760,994	5,539,748	804,413
1948-49 .. ..	283,613	35,444	4,767,291	700,053	5,050,904	735,497
1958-59 .. ..	356,324	43,881	9,221,497	1,260,564	9,577,821	1,304,445
Year—						
1956-57 .. ..	294,087	35,918	8,978,081	1,171,879	9,272,168	1,207,797
1957-58 .. ..	303,086	36,854	8,945,617	1,256,271	9,248,703	1,293,125
1958-59 .. ..	471,798	58,870	9,740,795	1,353,543	10,212,593	1,412,413

1960-61 .. ..	480,147	62,978	8,685,426	1,319,633	9,165,573	1,382,611

(a) Raw sugar at 94 net titre.

The production of raw sugar (at 94 net titre) in Australia in 1960-61 amounted to 1,382,611 tons manufactured from 9,165,573 tons of cane.

The number of separate holdings growing 5 acres or more of cane was 7,195 in 1960-61.

4. Average Production of Cane Sugar.—Owing to climatic variations, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be made accurately except on an annual basis. In New South Wales, the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. The average yields of cane and sugar per acre for the years 1956-57 to 1960-61 and for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown below. Allowance should be made in interpreting these figures for the disparity in maturing periods noted above.

**SUGAR CANE AND SUGAR : YIELD PER ACRE.**  
(Tons.)

1959-60.. ..	40.32	4.96	8.13	28.12	4.06	6.92	28.67	4.10	6.99
1960-61.. ..	35.16	4.61	7.62	26.54	4.03	6.58	26.89	4.06	6.63

5. Quality of Cane.—The quantity of cane required to produce a ton of sugar varies with the variety planted, the district, and the season. In 1960-61, a yield of 4.06 tons of sugar per acre was obtained. This was only slightly less than the record yield of 4.10 tons in 1959-60.

The Bureau of Sugar Experiment Stations in Queensland renders useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

6. **Production and Utilization.**—Details of the production and utilization of sugar for the years 1956–57 to 1960–61 are shown below. It should be noted that the details of sugar production refer to the annual periods shown, without regard to the season in which the sugar was produced. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

**SUGAR : PRODUCTION AND UTILIZATION, AUSTRALIA.**

Year.	Changes in Stocks.	Pro-duction (Raw).	Exports. (a)	Miscel-laneous Uses.(b)	Consumption in Australia.(a)	
					Total.	Per Head.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
1956–57 .. ..	+21.1	1,217.7	698.7	20.0	477.9	112.3
1957–58 .. ..	–21.1	1,222.2	733.8	29.4	480.1	110.3
1958–59 .. ..	+10.3	1,353.4	827.4	18.4	497.3	111.9
1959–60 .. ..	+25.9	1,270.6	725.2	18.6	500.9	110.3
1960–61 .. ..	–13.4	1,324.8	815.6	22.0	500.6	107.9

(a) Includes sugar content of manufactured products exported. (b) Includes industrial uses, refining, losses and quantities used in processed food (e.g., canned fruit, jams, etc.), golden syrup and treacle.

7. **Consumption in Factories.**—The quantity of refined sugar used in factories in 1960–61 amounted to 307,120 tons compared with 293,822 tons in 1959–60 and 274,575 tons in 1958–59. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1960–61, consumption by factories engaged in the production of jams, jellies and preserved fruit amounted to 83,497 tons, by those producing confectionery, ice cream, etc., to 66,029 tons, by breweries to 44,944 tons and by factories producing aerated waters, cordials, etc. to 47,947 tons.

8. **Control of Cane Production in Queensland.**—Agreements between the Commonwealth and Queensland Governments have fixed the wholesale price of sugar and sugar products from time to time. Details of prices are shown in para. 14 of this section (*see* page 937).

The Queensland Government acquires the whole of the sugar production of that State and of New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

Sugar production barely met local requirements in 1923, but increased rapidly until 1925 when approximately 44 per cent. of the production was exported. Steps were taken by the Government to restrict planting of new areas and production was fairly stable until 1929. In that year, the pool was reorganized and mills received the full pool price for sugar up to the amount of their previous maximum production, further output being acquired at export prices.

Between 1929 and 1939, production rose by more than 70 per cent. despite the restrictions above-mentioned and the fact that export prices were generally less than half the pool price.

In 1939, following the International Sugar Agreement, which limited exports, the Queensland Government limited the pool (mill peaks) to 737,000 tons in respect of Queensland production. Mill quotas were allotted on the understanding that mills would allot quotas to individual growers. Mill peaks have been raised since 1939, following the negotiation of the Commonwealth Countries Sugar Marketing Agreement of 1949, which allowed the Queensland Government to initiate a planned expansion of the industry. In 1960 and 1961, peaks were 1,214,600 tons and 1,220,100 tons respectively.

9. **Sugar Agreement in Australia—Embargo on Imports, etc.**—Reference was made in Official Year Book No. 37, pages 940–41, to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. The current agreement, which was for a five-year period ended 31st August, 1961, was extended to 31st May, 1962. The Commonwealth Government, on 28th November, 1960, appointed a Committee of Enquiry to investigate all facets of the sugar and canned fruits industries. Although the Committee presented its report towards the end of 1961, at the end of February, 1962, it was still under consideration by the Commonwealth and Queensland Governments and it has not yet been published.

10. **International Sugar Agreement.**—The International Sugar Agreement of 1937 was superseded by the International Sugar Agreement of 1953 which came into force on 1st January, 1954. Details of the 1937 Agreement were given in Official Year Book No. 40, pages 881 and 882, and previous issues.

The 1953 agreement, which was amended by protocol from 1st January, 1957, was for the five-year period ended 31st December, 1958.

In October, 1958, a new agreement was negotiated at a conference held in Geneva under the auspices of the United Nations. The new agreement, which follows the lines of the 1953 agreement, is for five years commencing 1st January, 1959, with provision for a review during the third year. It is designed to assure supplies of sugar to importing countries and markets for sugar to exporting countries at equitable and stable prices, to facilitate a steady increase in the consumption of sugar and a corresponding increase in the supply of sugar, and, in general, to further international co-operation in connexion with world sugar problems. Basic export quotas of exporting countries are established and provision is made for adjustment of quotas according to fluctuations in the world sugar price. A number of price levels are stipulated at which the International Sugar Council may or must take action. The Council has considerable discretion to adjust quotas during the quota year.

Under the 1953 agreement, the British Commonwealth, as a whole, was granted an export quota of 2,375,000 tons rising to 2,500,000 tons in 1958. Under the 1958 agreement, the quota remains at 2,500,000 tons for 1959 but is increased by 75,000 tons to 2,575,000 tons in 1960 and 1961. This quota is not subject to the fluctuations mentioned above. The allocation of the total quota among exporting members of the British Commonwealth is a matter for internal arrangement by those countries and territories themselves. Australia's quota for 1960 and 1961 was approximately 651,000 tons.

The quota and price provisions cover only the first three years to 31st December, 1961. A conference in Geneva in 1961 failed to reach agreement on quota provisions for 1962 and 1963. The conference adjourned with a resolution that it be reconvened if circumstances for an agreement on quotas become favourable. In any event, consideration is to be given in the second half of 1963 to convening an international conference to prepare a new agreement in place of the current agreement which expires at the end of 1963.

The principal practical effect of the adjournment of the 1961 conference is that former export limitations on participating exporting countries, including Australia, do not apply until such time as agreement on this question is again reached at a resumed session of that conference, or at a newly convened conference.

Details of the marketing arrangements for Australian sugar are given in paragraph 15 below.

11. **Net Return for Sugar Crop.**—Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1956–57 to 1960–61 are shown in the following table.

**RAW SUGAR(a): NET RETURNS, AUSTRALIA.**

Year.	Proportion Exported. (b)	Net Value of Exports per Ton. (b)	Average Price per Ton for Whole Crop.	Estimated Value of Crop.
	Per cent.	£ s. d.	£ s. d.	£'000.
1956–57 .. ..	56.01	41 6 5	46 14 3	56,403
1957–58 .. ..	57.44	45 16 8	49 7 6	63,829
1958–59 .. ..	60.53	39 8 2	45 9 11	64,263
1959–60 .. ..	55.42	40 6 2	47 9 11	61,131
1960–61 .. ..	59.53	39 19 6	49 2 1	67,869

(a) 94 net titre.

(b) As supplied by the Queensland Sugar Board.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1960–61 amounted to £980,274. The value thus obtained represents the net market value of all raw sugar sold, which, less the rebates, is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

12. Exports of Sugar.—Particulars of the exports of cane sugar (raw and refined) for each year from 1956-57 to 1960-61 are as follows.

## SUGAR : EXPORTS, AUSTRALIA.

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Quantity .. .. tons	675,282	707,806	802,971	701,319	796,528
Value .. .. £'000	28,780	34,996	32,163	26,671	35,073

13. Sugar By-products.—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantities produced and the amounts used for distilling, fuel, manure and other purposes will be found in Chapter VI.—Manufacturing Industry.

Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugar cane and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

14. Sugar Prices.—The prices of sugar in Australia, from 1953 to 1960 in the case of raw sugar, and from 1952 to 1962 in the case of refined sugar (as determined under the Sugar Agreement in Australia—see para. 9 above), are shown in the following table.

## SUGAR : PRICES IN AUSTRALIA.

Year.	Raw Sugar, 94 Net Titre.			Refined Sugar.		
	Average Return per Ton Received by Millers and Growers for—			Date of Determination.	Wholesale Price to Retailer per Ton.	Retail Price, Capital Cities per lb.
	Home Consumption.	Exports.(a)	Whole Crop.(a)			
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	d.
1953 ..	47 18 6	38 13 9	42 10 8	13. 10. 52 to 13. 5. 56	73 16 11	9
1954 ..	47 1 0	37 8 0	41 6 11	14. 5. 56 to 15. 5. 60	82 1 0	10
1955 ..	46 18 0	38 11 6	42 9 0	16. 5. 60 to 31. 5. 62	90 5 2	11
1956 ..	53 11 6	41 6 5	46 14 3			
1957 ..	54 3 0	45 16 8	49 7 6			
1958 ..	54 15 0	39 8 2	45 9 11

1960 ..	60 10 6	39 18 8	49 2 1			

(a) Includes "Excess" Sugar.

15. Marketing Arrangements.—From 1939 to 1952, the British Ministry of Food purchased Australia's surplus raw sugar at prices negotiated annually and varying from £stg.11 5s. in 1939 to £stg.38 10s. a ton in 1952 including tariff preference (for prices in other years see earlier issues of the Year Book).

On 1st January, 1953, the British Commonwealth Sugar Agreement became effective. This agreement, which has been extended to 1969, provides for Australia to export a maximum of 600,000 tons per annum, subject to annual review. Of the 600,000 tons, 315,000 tons is purchased by the United Kingdom Government at an annually negotiated price and the balance is sold at world market prices plus tariff preferences where applicable. The negotiated prices for 1960 and 1961 were £stg.44 8s. 10d. and £stg. 45 2s. In 1960 and 1961, Australia had an additional quota of 51,000 tons as her share of the increased allocation to Commonwealth exporters under the current International Sugar Agreement. This tonnage was not to receive the benefit of tariff preferences. Export limitations under the International Sugar Agreement are not applicable to 1962 and 1963 (see para. 10).

The Sugar Bill introduced into the House of Commons on 5th July, 1955, provided for the reversion of dealings in sugar in the United Kingdom to a trader to trader basis as from 1st January, 1957. However, under the bill, a Sugar Board was created which is responsible for the purchase of the negotiated price sugar which the United Kingdom Government has contracted to take under the British Commonwealth Sugar Agreement.

16. **Fruit Industry Sugar Concession Committee and Sugar Rebates.**—The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund contributed by the Queensland Government on behalf of the sugar industry.

Until 15th May, 1960, a rebate of £2 4s. per ton of refined sugar used in processing approved fruit products was paid to Australian manufacturers, provided they bought the fresh fruit at prices not lower than those declared by the Committee as reasonable. This was increased to £5 per ton from 16th May, 1960.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Under the Supplementary Sugar Agreement for 1956–1961, the Queensland Government contributes to the fund £264,000 annually and also reimburses the Committee for the actual expenditure on export sugar rebates. Any money remaining in the fund after the payment of rebates and administrative expenses may be used by the Committee for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruit.

17. **Bulk Handling of Sugar.**—The conversion of the Australian sugar industry to bulk handling and mechanized loading and unloading of raw sugar is well advanced. About 80 per cent. of raw sugar in Australia is now handled in bulk without being bagged at any stage.

Terminals for the bulk loading of sugar were opened at Mackay in 1957, at Lucinda and Bundaberg in 1958, at Townsville in 1959, and at Mourilyan in 1960.

Bulk receiving facilities are in operation at all Australian refineries.

## § 15. Vineyards.

1. **Progress of Cultivation.**—(i) *Area of Vineyards.* Since the early days of Australian settlement, the expansion of the cultivation of vines has been most rapid in Victoria and South Australia, the area under vineyards in the 1960–61 season in these two States comprising 78 per cent. of the total area of vineyards. Grapes are grown in Australia for wine-making, table use and drying. The total area of vines in the several States during each of the years 1956–57 to 1960–61 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown in the following table.

VINEYARDS : AREA.  
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Aust.(a)
Average for three years ended—						
1938–39 .. ..	16,824	42,071	2,670	57,185	6,197	124,947
1948–49 .. ..	16,482	44,114	3,099	58,971	9,965	132,631

Drying .. ..	7,306	36,693	..	10,636	3,722	58,357
<i>Total</i> .. ..	<i>16,988</i>	<i>44,649</i>	<i>3,110</i>	<i>56,897</i>	<i>8,864</i>	<i>130,508</i>

(a) Excludes particulars for Northern Territory and Australian Capital Territory.

NOTE.—There are no vineyards in Tasmania.

(ii) *Wine Production, Bounties, etc.* The total production of wine (beverage and distillation) in Australia has shown a marked increase in recent years, rising from 14.3 million gallons in 1938-39 to 33.8 million gallons in 1960-61. In the same period, consumption of beverage wine in Australia has increased from 4.5 million gallons (0.7 gallons per head of population) to 11.7 million gallons (1.12 gallons per head of population). For many years prior to the 1939-45 War, a bounty was paid from the Wine Export Encouragement Account on wine shipped overseas under the provisions of the Wine Export Bounty Act 1930. Details of the bounty, payment of which was discontinued in 1947, may be found in Official Year Book No. 39, page 992.

The quantity of wine produced in the several States during the 1956-57 to 1960-61 seasons, together with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, are shown in the following table.

**WINE : PRODUCTION.(a)**  
(<sup>'000</sup> Gallons.)

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Australia.
<b>Average for three years ended—</b>						
1938-39 .. ..	2,712	1,359	31	14,021	396	18,519
1948-49 .. ..	4,178	3,040	31	25,906	689	33,844
1958-59 .. ..	3,974	2,435	36	25,190	743	32,378
<b>Years—</b>						
1956-57 .. ..	3,412	2,369	38	24,038	886	30,743
1957-58 .. ..	4,150	2,583	21	26,400	700	33,854
1958-59 .. ..	4,360	2,354	49	25,131	644	32,538

1960-61 .. ..	4,903	3,021	32	25,061	776	33,793

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallage of spirits added in wine fortifying.

(iii) *Wine Research Trust Fund.* Details of this fund are given in Official Year Book, No. 47, page 927.

2. Imports and Exports of Wine.—(i) *Imports.* Imports for 1960-61 amounted to 98,004 gallons valued at £205,286 compared with 60,029 gallons valued at £130,265 in the previous year.

During 1960-61, Italy supplied 31,566 gallons valued at £39,203, France supplied 26,620 gallons valued at £89,195, and the Federal Republic of Germany supplied 8,293 gallons valued at £25,453.

(ii) *Exports.* Exports in 1960-61 totalled 1,897,337 gallons, of which the United Kingdom received 1,361,815 gallons, Canada 348,529 gallons, New Zealand 66,293 gallons and other countries 120,700 gallons.

Exports for the five years ended 1960-61 are shown in the following table.

**WINE : EXPORTS FROM AUSTRALIA.**

Year.	Quantity (Gallons).			Value (£).		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
1956-57 .. ..	6,701	1,743,648	1,750,349	23,737	1,108,314	1,132,051
1957-58 .. ..	4,872	1,484,656	1,489,528	18,194	978,616	996,810
1958-59 .. ..	5,203	1,742,046	1,747,249	10,989	1,141,036	1,152,025
1959-60 .. ..	6,480	1,738,867	1,745,347	19,898	1,245,755	1,265,653
1960-61 .. ..	11,529	1,885,808	1,897,337	30,461	1,274,210	1,304,671

3. **Oversea Marketing of Wine.**—(i) *The Wine Overseas Marketing Act 1929–1961.* This Act was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board, consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board also engages in wine publicity and trade promotion activities both in Australia and overseas. In London, the Board maintains an office and an Australian Wine Centre, which is both a retail outlet for Australian wines and brandy and as a medium for promoting interest in these products.

(ii) *The Wine Grapes Charges Act 1929–1957.* This Act provides for the imposition of a levy on all grapes used in Australia for the manufacture of wine, brandy and spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

4. **Other Viticultural Products.**—(i) *Table Grapes.* Grapes for table use are grown in all States except Tasmania, but the area of this type was only about 7 per cent. of the productive area of vines in 1960–61. The quantities of table grapes produced during the season 1960–61 in each State are shown in § 3 of this chapter. (See p. 899.)

(ii) *Raisins and Currants.* The quantities of raisins (including sultanas and lexias) and currants dried during each of the seasons 1956–57 to 1960–61 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown in the following table.

RAISINS(a) AND CURRANTS : PRODUCTION.  
(Tons.)

(a) Including sultanas and lexias.

5. **Production and Disposal of Dried Vine Fruit.**—As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. Total production during the 1960–61 season amounted to 81,672 tons, while exports for the 12 months ended December, 1961, were 60,968 tons, leaving an estimated 20,704 tons available for Australian consumption from that season's production. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The following table shows the oversea exports of raisins and currants during each of the years 1956-57 to 1960-61.

RAISINS AND CURRANTS(a) : EXPORTS, AUSTRALIA.

Year.	Raisins.		Currants.		Total Raisins and Currants.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£'000.	Tons.	£'000.	Tons.	£'000.
1956-57.. ..	38,496	5,377	6,521	831	45,017	6,208
1957-58.. ..	52,297	8,019	7,398	938	59,695	8,957
1958-59.. ..	68,245	11,215	7,585	1,051	75,830	12,266
1959-60.. ..	45,634	7,726	4,540	637	50,174	8,363
1960-61.. ..	48,805	7,133	7,838	1,032	56,643	8,165

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian raisins and currants are the United Kingdom, Canada and New Zealand, the quantities exported thereto in 1960-61 being 27,657 tons, 18,726 tons and 4,486 tons respectively.

6. Oversea Marketing of Dried Fruits.—(i) *The Dried Fruits Export Control Act 1924-1953.* This Act was passed to organize oversea marketing of Australian dried vine fruits. The Dried Fruits Control Board, consisting of growers' representatives, members with commercial experience in marketing dried fruits and a Government representative, controls the sale and distribution of dried fruit exports, recommends the licensing of exporters and contributes to dried vine fruits publicity activity overseas.

In conjunction with its London agency, the Board has improved dried fruit marketing overseas by its system of appraisalment, regulation of shipments and advertising.

(ii) *Dried Fruits Export Charges Act 1924-1929.* This Act provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board. Provision is made for exemption from the levy upon recommendation by the Board.

(iii) *Post-war Contracts.* For details of the agreements which were negotiated between the Governments of the United Kingdom and Australia during the period 1946-1953, see Official Year Book No. 40, page 888. From 1st December, 1953, exports have been made on a trader to trader basis.

§ 16. Orchards and Fruit Gardens.

1. Area.—The largest area of orchards and fruit-gardens prior to the 1939-45 War was 281,899 acres which was attained in 1933-34. Since then, the acreage has varied but has not fallen below 260,000 acres. It reached 290,000 acres in 1947-48 but declined somewhat in subsequent years, rising again to 289,000 acres in 1959-60 and 1960-61.

ORCHARDS AND FRUIT-GARDENS : AREA.

(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1956-57 ..	87,920	63,319	39,561	33,998	22,040	22,994	94	113	270,039
1957-58 ..	88,170	66,221	40,856	35,295	22,186	23,013	81	93	275,915

2. **Varieties of Crops.**—The varieties of fruit grown differ in various parts of the States, ranging from pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are grown extensively. The principal varieties grown in Victoria are apples, pears, peaches, oranges and apricots. In Queensland, apples, pineapples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to oranges, apples, peaches, apricots and pears, almonds and olives are grown extensively. In Western Australia, apples, oranges, plums and pears are the chief varieties. In Tasmania, apples occupy over three-quarters of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries, are grown extensively, the balance of the area being mainly taken up with pears and apricots. The following table shows the acreage—bearing and non-bearing—of the principal kinds of fruit, and the quantities produced in the 1960–61 season.

### ORCHARDS AND FRUIT-GARDENS, 1960-61.

4. Production of Jams and Jellies and Preserved Fruit.—In Australia, considerable quantities of fruit are used in the production of jams and jellies and for preserving. During 1960-61, output of jams, conserves, fruit spreads, etc., amounted to 83,080,000 lb. while output of preserved fruit amounted to 307,866,000 lb. Of the latter figure, pears accounted for 121,991,000 lb., peaches 78,664,000 lb. and pineapples 36,057,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 228,990 tons in 1960-61.

5. Consumption of Fruit and Fruit Products.—Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1960-61 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

6. Imports and Exports of Fruit.—(i) *General.* The imports of fresh fruit into Australia are negligible, while those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values of the shipments in 1960-61 amounted to £10,368,594 and £9,097,485 respectively. Apples constitute the bulk of the fresh fruit exported, although exports of pears and citrus fruit are considerable.

(ii) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1956-57 to 1960-61 are shown in the following table.

## FRESH AND FROZEN FRUIT : EXPORTS, AUSTRALIA.

Year.	Apples.		Pears.		Citrus.		Total.(a)	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.
1956-57	3,969	5,582	1,020	1,731	613	926	5,670	8,585
1957-58	5,892	9,076	1,448	2,755	572	882	7,961	13,062
1958-59	4,948	6,625	1,100	1,783	415	664	6,559	9,413
1959-60	4,889	6,123	1,328	1,970	589	918	6,876	9,294
1960-61	5,729	7,321	1,235	2,080	419	664	7,454	10,369

(a) Total, including exports of all other fresh and frozen fruit.

(iii) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1956-57 to 1960-61 are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq.

**DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA.**

Year.	Imports.(b)		Exports.	
	Quantity.	Value	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1956-57 .. .. .	7,052	158	2,887	378
1957-58 .. .. .	8,683	209	1,366	186
1958-59 .. .. .	8,411	203	3,352	482
1959-60 .. .. .	10,791	310	6,221	703
1960-61 .. .. .	9,178	303	8,237	932

(a) Excludes raisins and currants referred to separately under Vineyards (see p. 940). (b) Dates and figs only.

(iv) *Jams and Jellies.* Exports of jams and jellies reached large proportions immediately following the 1939-45 War and in 1946-47 amounted to 65,434,000 lb., compared with the average for the five years ended 1938-39 of 7,118,000 lb. Since 1949-50, when exports totalled 65,229,000 lb., there has been a marked decline and in 1960-61 exports amounted to only 6,331,099 lb., valued at £493,264. Imports of jams and jellies are negligible.

(v) *Preserved Fruit.* The total value of fruit preserved in tins or other airtight containers, or pulped, imported into Australia during 1960-61 was £140,460. Large quantities of fruit preserved in tins or other airtight containers are normally exported from Australia, the quantity recorded in 1960-61 being 151,983,474 lb. valued at £9,773,004. Exports in 1960-61 were principally made up of pears (84,424,293 lb.), peaches (35,574,901 lb.), pineapples (12,742,638 lb.) and apricots (5,661,493 lb.). In addition, the exports of pulped fruits during 1960-61 amounted to 2,912,189 lb. valued at £243,155.

7. *Marketing of Apples and Pears.*—(i) *Apple and Pear Organization Act 1938-1960.* This Act provides for the establishment of an Australian Apple and Pear Board comprising representatives of growers, exporters, employees and the Commonwealth Government. A representative in London has also been appointed by the Board.

The function of the Board is the organization and control of exports of fresh apples and pears, and it has the power to regulate shipments, determine export quotas, allocate consignments from each State and recommend the licensing of exporters. The Board contributes to apple and pear publicity activities overseas.

(ii) *Apple and Pear Export Charges Act 1938-1960.* This Act provides for an export levy to meet the expenses of the Board.

(iii) *Apple and Pear Acquisition.* Exports of apples and pears were seriously curtailed during the war and the 1940 to 1948 crops were acquired and marketed under National Security and Defence Regulations. Details of the acquisition scheme will be found on pages 1003 and 1004 of Official Year Book No. 38 and in earlier issues.

8. *Marketing of Canned Fruit.*—(i) *The Canned Fruits Export Control Act 1926-1959.* This legislation was introduced with the object of organizing the oversea marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing the Commonwealth Government, canners of apricots, peaches, pears, pineapples and fruit salad, and a representative of the growers of canning apricots, peaches and pears, was appointed to organize the oversea marketing of canned fruit and also to recommend the licensing of exporters. The Board establishes terms and conditions of sale overseas and contributes to oversea publicity connected with the canned fruit industry. It also maintains an office in London.

The system of marketing adopted by the Board has resulted in the satisfactory disposal of the exportable surplus of canned fruits.

(ii) *The Canned Fruits Export Charges Act 1926-1956.* This Act provides for a levy on exports to meet the Board's expenses. Provision has been made for certain exemptions when recommended by the Board.

(iii) *The Australian Canned Fruit Sales Promotion Committee.* This Committee was established in 1959 to promote the sale of canned deciduous fruits on the home market and

overseas. The operations of the Committee are financed by a levy on fruit accepted by the canneries for the production of canned fruit. The Committee comprises representatives of growers and processors of canning fruit and a representative of the Commonwealth Government.

### § 17. Vegetables for Human Consumption.

1. Area and Production of Fresh Vegetables.—Details of the areas planted and production of individual kinds of vegetables, excluding potatoes and onions referred to in §§ 10 and 11 of this chapter, are shown below for the seasons 1958–59 to 1960–61.

#### FRESH VEGETABLES(a) FOR HUMAN CONSUMPTION: AUSTRALIA.

<b>Total .. ..</b>	<b>152,864</b>	<b>..</b>	<b>147,326</b>	<b>..</b>	<b>154,764</b>	<b>..</b>

(a) Excludes potatoes and onions. (b) Incomplete, excludes New South Wales. (c) Incomplete, excludes New South Wales and Tasmania.

2. Production of Processed Vegetables.—Total production of canned vegetables in 1960–61 amounted to 98,987,000 lb., which was considerably higher than pre-war production, but only 83 per cent. of the peak war-time production of 119,149,000 lb. recorded in 1944–45. The principal canned vegetables produced in 1960–61 were green peas (including mint-pro peas) 25,715,000 lb., green beans 5,190,000 lb., baked beans (including pork and beans) 25,096,000 lb., asparagus 7,401,000 lb., beetroot 10,305,000 lb., and mushrooms 5,319,000 lb.

The production of dehydrated vegetables, which was initiated by the Commonwealth Government during the 1939–45 War, rose to a maximum of 22,000,000 lb. in 1945–46, but in 1960–61 it was only 706,000 lb. Production of potato crisps, chips and flakes, which has increased substantially in recent years, amounted to 9,290,000 lb. in 1960–61.

There has been rapid development in the quick-frozen vegetable industry. Data were collected for the first time in 1957–58, when 13,846,000 lb. of frozen vegetables were produced, made up primarily of 10,131,000 lb. of peas and 2,540,000 lb. of beans. In 1960–61, production had risen to 21,046,000 lb., of which 13,141,000 lb. were peas and 4,915,000 lb. were beans.

3. Imports and Exports of Vegetables.—The quantity and value of oversea exports of pulse and fresh vegetables during 1960–61 were respectively:—pulse, 5,013 tons, £284,422; onions, 2,543 tons, £88,668; potatoes, 5,219 tons, £194,667; other vegetables, 2,491 tons, £230,301. Imports of pulse amounted to 7,437 tons, valued at £517,958, while imports of fresh vegetables in total were 8,256 tons, valued at £993,033.

In 1960–61, exports of vegetables preserved in liquid consisted of:—Asparagus, 517,420 lb. (£75,409); Beans (including baked), 108,570 lb. (£7,285); Peas, 108,735 lb. (£9,499); Tomatoes, 112,089 lb. (£7,629); Other Vegetables, 573,360 lb. (£64,884).

4. Consumption of Vegetables.—Details of the estimated consumption of vegetables for a series of years ending 1960–61 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

## § 18. Tobacco.

1. *States, Area and Production.*—Tobacco has been grown in Australia for a considerable number of years. As early as the season 1888–89, the area of this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria and 123 in Queensland. Thereafter, the industry fluctuated for many years, reaching a peak in 1932–33 when 26,272 acres were planted. After the 1939–45 War the area fell to below 4,000 acres, but it has increased again largely as a result of the beneficial effect of improved varieties and techniques on average yields and of the protection to Australian growers given by the tariff (*see also* (vi) Tobacco Factories, p. 947).

In 1960–61, the area planted was 29,213 acres. This exceeded the previous highest post-war level of 19,654 acres, reached in 1959–60, by 9,559 acres, or 49 per cent. The production of dried leaf in 1960–61 at 29,862,000 lb. was also a record.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1956–57 to 1960–61, together with averages for the three-year periods ended 1938–39, 1948–49 and 1958–59.

## TOBACCO : AREA AND PRODUCTION.

1960–61 ..	3,538	9,728	15,308	..	(d) 1,288	..	..	(d) 29,862

(a) Less than half an acre. (b) Less than 500 lb. (c) Includes 289,000 lb. of unsold leaf.  
(d) Includes 655,000 lb. of unsold leaf.

2. *The Tobacco Industry.*—(i) *Marketing.* In the early days, purchase of the leaf at the farms was the usual practice, but towards the end of the 1930's the auction system was introduced by arrangement between the growers' associations and the manufacturers.

On 9th May, 1941, the Australian Tobacco Board was constituted under the National Security (Australian Tobacco Leaf) Regulations for the purpose of facilitating and regulating the marketing of Australian grown tobacco leaf. All leaf was under the control of the Board, the growers being paid on the valuation as appraised by the Board. The Board ceased to function on 24th September, 1948, and subsequent crops have been marketed at open auction in the respective States. Queensland has had its own Tobacco Leaf Marketing Board since 1948. Growers in New South Wales voluntarily submit their leaf to the Queensland Board for sale at auction. Leaf from Victoria is sold at auction in Melbourne for the Victorian Tobacco Growers' Association. In Western Australia, the leaf is sold in Perth for the Western Australian Tobacco Growers' Association (Inc.).

(ii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and the Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53. The terms of reference of this committee are given in Official Year Book No. 47, page 935.

A Sub-Committee on curing was formed in 1960 to investigate new curing methods. A grant of up to £10,000 was made available for initial investigations which include down-draught curing, the conversion of conventional kilns to down-draught and bulk curing. In 1961, a Research Sub-Committee was established to review annually scientific programmes and finance in relation to the Tobacco Industry Trust Account and make recommendations to the Central Tobacco Advisory Committee.

(iii) *Industry Inquiries.* The tobacco industry has been the subject of a number of investigations during the past 30 years. The Tariff Board inquired into the industry in 1923, 1926, 1931 and 1940 and reports were issued in respect of the last three inquiries.

(iv) *Commonwealth Grants.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, are given in Official Year Book No. 40, pages 895, 896 and in previous issues.

(v) *Research and Investigations.* The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development in the mid-1930's of a technique to control blue mould in the seed bed. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices. The New South Wales Department of Agriculture has developed a commercial blue mould resistant hybrid.

In 1955, the Central Tobacco Advisory Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme were estimated at £168,000, of which the Commonwealth Government and tobacco manufacturers each agreed to contribute half. Annual contributions are made to the fund by the Commonwealth and State Governments, tobacco growers and manufacturers. A Tobacco Industry Trust Account was established to receive these contributions. This programme commenced in 1956.

During the first five years of the operation of the Trust Account, £818,376 was paid to State and Commonwealth departments. The allocation for 1961-62 is £289,081.

(vi) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf, provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages rose from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946, to 35 per cent. and 32 per cent. respectively from 1st July, 1961. The percentages to apply from 1st July, 1962, are 43 per cent. and 40 per cent. respectively. In 1960-61, the quantity of cured leaf used in tobacco factories in Australia amounted to 52.4 million lb., of which 14.7 million lb. was of local origin. The balance was imported, chiefly from the United States of America and Rhodesia.

3. *Oversea Trade.*—Imports of tobacco and manufactures thereof into Australia during 1960-61 were valued at £13.4 million, including 35.7 million lb. of unmanufactured tobacco valued at £11.7 million. Exports of tobacco and tobacco manufactures during 1960-61 were valued at £415,355.

## § 19. Hops.

Hop-growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for 1960-61 being 1,903 acres, of which 1,447 acres were in Tasmania, and 456 acres in Victoria. A small area was also under hops in Western Australia, but the details are not available for publication. The Tasmanian area in 1901-02 was 599 acres while in the decade to 1960-61, it has ranged between 1,332 acres and 1,447 acres. On the other hand, the cultivation of hops was much more extensive in Victoria during the latter part of the last century. For example, in 1883-84, 1,758 acres were cultivated, compared with an average of 450 acres in the five years ended 1960-61.

The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table, details of the production and imports of hops and the quantity of hops used in breweries are shown for each of the years 1956-57 to 1960-61. Exports of hops are not recorded separately, but are negligible.

## HOPS : PRODUCTION AND DISPOSAL, AUSTRALIA.

Year.	Production.		Imports.	Net Available Supplies. (a)	Quantity used in Breweries.
	Quantity.	Gross Value.			
	Cwt.	£'000.	Cwt.	Cwt.	Cwt.

(a) Disregards movements in stocks.

## § 20. Flax.

1. **Flax for Fibre.**—During the 1914-18 and 1939-45 Wars, there was an acute shortage of flax fibre and the expansion of production was encouraged by the Commonwealth Government, the area sown reaching a maximum of more than 61,000 acres in 1944-45.

In recent years, the growing of flax for fibre has been confined to Victoria, South Australia and Western Australia, although none has been produced in South Australia since 1957-58. In Victoria and South Australia (until production ceased in 1957-58), production has been directed and controlled by the Flax Commission, which took over the Commonwealth flax undertakings from the Flax Production Committee on 1st November, 1954. In Western Australia, the industry is carried on by a co-operative company.

In November, 1957, the Government approved a three-year extension of bounty assistance to flax producers and decided that the Commonwealth should withdraw from flax fibre production. One important factor which influenced the Government in making this decision was the view expressed by the defence authorities that the industry no longer has the same defence significance as it had when the Flax Commission was first established.

In accordance with the decision, growing of flax under contract to the Flax Commission was discontinued in 1959, all of the Commonwealth mills ceasing to operate before the end of the year.

Details of the area under flax and the production of straw are given in the following table.

## FLAX FOR FIBRE : AREA AND PRODUCTION.

Season.	Victoria.	S. Aust.	W. Aust.	Australia.

2. **Flax for Linseed.**—Prior to 1948-49, the growing of flax for linseed oil had not been developed extensively in Australia. Since then, however, action has been taken to develop this industry, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements. Development of the industry proceeded rapidly until 1951-52 when 53,741 acres were sown. In 1952-53, there was a decline in the acreage and a further decline in 1953-54 when 6,343 acres only were sown. In more recent years, the

area has been between ninety and one hundred thousand acres, with the exception of 1958-59 when 37,225 acres were sown. Production in 1960-61, at 13,564 tons, was about half that of the record year, 1959-60.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953 and their conclusions are contained in their Report on *Linseed and Linseed Products* dated 23rd October, 1953.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1956-57 to 1960-61.

#### FLAX FOR LINSEED : AREA AND PRODUCTION.

#### § 21. Peanuts.

The production in Australia of peanuts, or groundnuts, is mainly confined to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory. Details of the area and production are given in the table below.

#### PEANUTS : AREA AND PRODUCTION.

Season.	Area (Acres).				Production (Cwt.).			
	N.S.W.	Q'land.	N.T.	Aust.(a)	N.S.W.	Q'land.	N.T.	Aust.(a)
1956-57 .. ..	419	25,017	208	25,644	4,674	173,522	339	178,535
1957-58 .. ..	686	34,739	156	35,581	8,014	366,518	302	374,834
1958-59 .. ..	867	59,279	211	60,357	11,623	621,687	2,412	635,722
1959-60 .. ..	837	41,547	388	42,772	10,639	360,314	4,306	375,259
1960-61 .. ..	788	41,659	335	42,782	9,578	446,215	1,215	457,008

(a) Excludes Western Australia for which details are not available for publication.

The gross value of the 1960-61 crop (excluding the small crop in Western Australia) was £2,089,000, which was approximately £307,000 more than in 1959-60.

In earlier years, considerable quantities of peanut kernels were imported, chiefly from India, for the extraction of oil. These imports were suspended from 1946 to 1949, but have since been resumed on an increasing scale. Total supplies available for consumption in Australia in 1960-61 were 484,720 cwt. (shell equivalent), after allowing for an increase in stocks held by the Peanut Marketing Board of 78,000 cwt. Supplies were made up of 510,340 cwt. from Australian production received into store by the Board and 52,380 cwt. imported.

#### § 22. Cotton.

1. General.—The production of cotton in Australia has been, until recently, restricted to Queensland, where cultivation began in 1860. Cotton has, however, been grown experimentally in some other States in recent years, for example, along the Murray River in New South Wales and Victoria, at Narrabri in New South Wales and in the Kimberleys in

Western Australia. The first commercial crop grown outside Queensland was harvested at Robinvale in Victoria in the 1960 season. Details of this production are not, however, available for publication.

Australia produces only a small part of its requirements of raw cotton, the balance being obtained chiefly from the United States of America and Mexico. Since the 1939-45 War, efforts have been directed towards increasing Australian production by an extension of area, the introduction of irrigation methods and payment of bounties. These have met with some measure of success, although production has not reached the 1939-40 level of 17,550,000 lb. of seed cotton. Cotton spinning and weaving industries are referred to in Chapter VI.—Manufacturing Industry.

The Raw Cotton Bounty Act 1940 provided an extension, until 31st December, 1946, of assistance previously granted by way of bounty. The Act was amended in August, 1946, to provide a guaranteed net average return to cotton-growers of 15d. per lb. of raw cotton for five years from 1st January, 1947. It was superseded by the Cotton Bounty Act 1951, which guaranteed a net average return of 9½d. per lb. of seed cotton for five years from 1st January, 1951. The 1951 Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Act, as amended in 1952, 1955 and 1957, was extended in 1958 to cover production up to 31st December, 1963. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season.

2. **Area and Production.**—In the five seasons 1956-57 to 1960-61, the area sown and quantity of unginned cotton produced have increased more than threefold. The yield in the same period has risen by 25 per cent. Production is mainly confined to Queensland, although small quantities are also grown in New South Wales, Victoria and Western Australia.

The area under cultivation and the production in Australia for the years 1956-57 to 1960-61 are shown hereunder.

**COTTON: AREA AND PRODUCTION, AUSTRALIA.(a)**

Season.	Area Sown.	Production of Cotton.			Average Yield per Acre Sown.

### § 23. Financial Assistance to Primary Producers.

NOTE.—See also Chapter XXI.—Public Finance, page 834.

Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below.

(i) *Cotton Bounty.* The Cotton Bounty Act provides for payment of a bounty on seed cotton of a grade higher than "strict good ordinary" delivered to a ginnery and processed at the ginnery into raw cotton for sale for use in Australia. The present rate of bounty is designed to give growers an average return of 14d. per lb. The total payment in 1959–60 was £214,456 and in 1960–61 it was £373,487.

(ii) *Dairy Products Bounty.* Under the provisions of the Dairy Industry Act 1952, a subsidy was paid to dairymen to ensure them a return based upon the estimated cost of production for a specified quantity equal to local consumption plus twenty per cent. The Dairy Industry Act 1957 provided for continuation of the scheme for a further five years. A new feature, however, was that any subsidy made available under the scheme would be determined before the commencement of each season and would be on the basis of a fixed amount in any dairying year. In 1961–62, total payments amounted to £13,500,000, the same as in each of the previous five years.

(iii) *Flax Fibre Bounty.* The period covered by the bounty terminated on 31st October, 1960. (See Official Year Book No. 47, p. 939, and previous issues, for details of, and payments under, the bounty.)

Other forms of financial assistance to primary producers include payments for Cattle Tick Control, the Dairy Industry Extension Grant, Flood, Drought and Bush Fire Relief, Food Production, Expansion of Agricultural Advisory Services and Assistance to the Tobacco Industry.

### § 24. Fertilizers.

1. *General.*—In the early days of settlement in Australia, scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. This practice is very much less in evidence now than in the early days of Australian agricultural development. Under the guidance of the State Departments of Agriculture and the relevant Commonwealth authorities, such as the Bureau of Agricultural Economics and the Commonwealth Scientific and Industrial Research Organization, scientific farming is now much more widely practised. The importance of fallowing, crop rotation, and the application of suitable fertilizers in adequate quantities is now appreciated by farmers. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures and much land formerly regarded as useless for cultivation has now been made productive. With the rapid increase in the area of sown pastures, particularly since the 1939–45 War, large quantities of artificial fertilizers have been used. Fertilizer is generally applied at the time of sowing, and periodical (usually annual) top-dressings are carried out afterwards to keep the pastures in good condition. In addition, increasing areas of native pastures have been top-dressed in recent years. In 1960–61, pastures accounted for nearly 60 per cent. of both the total area fertilized and the total quantity of fertilizers used. The application of fertilizers from aircraft, particularly to pastures, has become a feature of modern farm technique, and has enabled the artificial fertilization of some areas which would not be readily accessible to ground machinery. Details of the area treated and quantity of fertilizer used by both aerial and ground methods of application in total are shown in para. 3, below, while further details on aerial top-dressing are given in § 25.

In order to protect the users of artificial fertilizers, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features are given in Official Year Book No. 12, page 378.

2. *Imports and Exports.*—The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate and is sufficient for local requirements.

The chief sources of Australia's supplies of rock phosphate are Nauru, Christmas Island (Indian Ocean) and the Gilbert and Ellice Islands. Sodium nitrate is obtained chiefly from Chile.

An extensive deposit of rock phosphate has recently been discovered in the Northern Territory, although no plans have yet been announced with regard to its development on a commercial basis.

The imports of artificial fertilizers during the five years ended 1960-61 are shown in the following table.

**ARTIFICIAL FERTILIZERS : IMPORTS INTO AUSTRALIA.**

Fertilizer.		1956-57.	1957-58.	1958-59.	1959-60.	1960-61.

	£'000	4,338	5,208	5,605	4,811	5,953

(a) Less than £500.

Exports of fertilizers (practically all of which were manufactured locally) amounted to 15,400 tons valued at £295,000 in 1960-61 compared with 20,900 tons valued at £313,000 in 1959-60.

3. Quantities Used Locally.—Information regarding the area treated with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1960-61 season is given in the following table. Details of the area fertilized with natural manure (stableyard, etc.) are no longer collected.

**AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1960-61.**

State or Territory.	Area Fertilized ('000 Acres).			Fertilizers Used (Tons).

4. **Local Production.**—Complete information regarding local production of fertilizers not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1960–61 was 44, made up as follows:—New South Wales, 12; Victoria, 6; Queensland, 4; South Australia, 9; Western Australia, 6; and Tasmania, 7. The production of superphosphate in Australia during 1960–61 amounted to 2,531,000 tons.

### § 25. Aerial Agriculture.

During recent years, an increasing use has been made of aircraft for top dressing and seeding (principally of pastures) and for spraying and dusting of crops and pastures. During the year ended 31st March, 1961, the total area treated by aircraft was 6,239,524 acres—5,031,081 acres were top-dressed and/or seeded, 1,173,682 acres were sprayed or dusted with insecticides, fungicides or herbicides, and 35,451 acres were baited for rabbit destruction. For 1956–57 (the first year for which data are available), the total area treated was 1,465,959 acres which represents about 24 per cent. of the area covered in 1960–61. The following table shows details of area treated and materials used for each State for the year ended 31st March, 1961. The information was collected by the Department of Civil Aviation.

#### AERIAL AGRICULTURE : OPERATIONS DURING 1960–61.

		(b)	(c)					(d)

(a) Areas treated with more than one type of material in one operation are counted once only.  
 (b) Includes 5,470 acres baited for rabbit destruction. (c) Includes 29,981 acres baited for rabbit destruction.  
 (d) Includes 35,451 acres baited for rabbit destruction. See footnotes (b) and (c)

### § 26. Ensilage.

1. **Government Assistance.**—The several State Governments devote a considerable amount of attention to the education of the farming community with regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

2. **Quantity Made and Stocks Held on Farms.**—Information regarding production and farm stocks of ensilage for the years ended 31st March, 1958 to 1961, are given in the following table.

## ENSILAGE : PRODUCTION AND FARM STOCKS.

(Tons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
<b>Production during—</b>								
1957-58 Season ..	91,486	194,850	41,367	23,230	27,988	52,125	58	431,104
1958-59 ..	243,990	301,839	73,365	68,988	76,997	63,974	410	829,563
1959-60 ..	202,821	281,566	60,129	19,744	73,265	46,933	90	684,548
1960-61 ..	256,459	303,198	51,198	100,727	50,911	72,344	80	834,917
<b>Farm Stocks, as at—</b>								
31st March, 1958 ..	134,895	(a)	77,972	20,605	16,501	52,263	205	(a)
.. 1959 ..	333,178	254,695	126,693	50,170	53,549	62,758	435	881,478
.. 1960 ..	404,777	201,584	136,317	21,773	51,807	50,671	330	867,259
.. 1961 ..	499,244	231,315	117,749	79,269	43,518	46,570	80	1,017,745

(a) Not available.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage, and in the following seasons there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The accumulated stocks proved of great value during the 1914 drought. In recent years, there has been an increasing tendency to produce more ensilage. From 117,000 tons in 1950-51, the quantity produced rose fairly uniformly to 464,000 tons in 1956-57 and subsequently to a record level of 830,000 tons in 1958-59. Output in 1959-60 declined to 685,000 tons from the previous year but subsequently rose to a new record level of 835,000 tons in 1960-61.

## § 27. Agricultural Colleges and Experimental Farms.

Agricultural colleges have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agriculture and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days, which are held at regular intervals, through publication in various agricultural or scientific journals and through the agricultural extension services of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations in many parts of Australia, and sometimes undertakes research jointly with the appropriate State authorities. It also has regional laboratories in several States, conducting research into agronomic and livestock problems as they occur in each particular region (see also Chapter XV.—Education and Research). The State Departments of Agriculture study problems of particular significance within their own boundaries. In addition, the universities carry out valuable work on their experimental farms.

## § 28. Tractors on Rural Holdings.

The growth of mechanization in agriculture is indicated by the increase in the number of tractors on rural holdings from 41,943 in 1939 to 253,515 in 1961. The annual increase in numbers reached its peak in 1951-52 when over 20,000 additional tractors were enumerated on holdings. The rate of increase has declined in more recent years and over the last five years averaged only about 10,000 per annum.

The table below sets out the number of wheel and crawler type tractors by States for the five years ended 1961.

## TRACTORS ON RURAL HOLDINGS.

(a) Separate details for wheel and crawler tractors are not available for 1961.

## § 29. Number and Area of Rural Holdings and Employment Thereon.

1. Number and Area.—A holding in Australia has been defined by statisticians on a more or less uniform basis and discrepancies which exist are not of sufficient importance to prevent comparisons. For the purpose of these statistics, a holding may be defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of livestock or the products of livestock.

There are considerable fluctuations from time to time in the numbers of very small holdings and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition, in the very dry parts, such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia, there are large areas of marginal lands sporadically occupied under short-term lease or other arrangement, and the areas so occupied tend to fluctuate with the seasons. Similarly, there are rugged areas in the mountain country of some States which are also occasionally occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1956-57 to 1960-61.

## RURAL HOLDINGS : NUMBER AND AREA.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

2. **Special Tabulation Relating to Rural Holdings—Classification by Size and Type of Activity.** Some of the information obtained from the 1959-60 Agricultural and Pastoral Census was classified by size of principal characteristics (area of holdings, area of sown grasses and clovers, area of selected crops and numbers of livestock). In addition, all holdings were classified according to type of activity. Tables showing this information and an outline of methods used will be published in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity*, 1959-60. Similar information on size classification was published in a series of bulletins for the year 1955-56.

3. **Employment on Rural Holdings.**—The following table shows, for each State, the recorded number of males working on rural holdings as at 31st March, 1961. Additional particulars relating to the number of males employed in agriculture are available up to 1941-42 in Official Year Book No. 36, page 852, and previous issues. Similar details for later years are not available.

## MALES(a) ENGAGED ON RURAL HOLDINGS AT 31st MARCH, 1961.

(a) Australian totals for 1959, 1960 and 1961 are not available.

(b) Excludes Northern Territory.

## CHAPTER XXIII.

## PASTORAL PRODUCTION.

NOTE.—All values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b., port of shipment, except where otherwise indicated. All export tables relate to exports of Australian produce only, but quantities and values quoted in the text sometimes include re-exports, the amounts involved, however, being generally small.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries*, and *Part II.—Non-Rural Industries and Value of Production* published by this Bureau. For advance information on these subjects, the following mimeograph statistical bulletins should be consulted—*Livestock Numbers* (annual), *Meat Industry* (monthly), *Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Wool Production* (annual), and *Wool Production and Utilization* (annual). The annual *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia* contains details of the production, distribution and apparent consumption of foodstuffs obtained from the pastoral industry. Current information on meat and wool production is available in the *Monthly Review of Business Statistics* and the *Digest of Current Economic Statistics* (monthly).

## § 1. Initiation and Growth of the Pastoral Industry.

1. *Livestock Numbers*.—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from 1860 to 1950, and from 1957 onwards in single years, are given in the following table, and are shown continuously on the graph on page 979.

LIVESTOCK : AUSTRALIA.  
(\*000.)

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123
1880 ..	1,069	7,527	62,184	816					
1890 ..	1,522	10,300	97,881	891	1957 ..	737	17,257	149,802	1,325
1900 ..	1,610	8,640	70,603	950	1958 ..	694	16,892	149,315	1,423
1910 ..	2,166	11,745	98,066	1,026	1959 ..	671	16,257	152,685	1,289
1920 ..	2,416	13,500	81,796	764	1960 ..	640	16,503	155,174	1,424
1930 ..	1,793	11,721	110,568	1,072	1961 ..	598	17,332	152,679	1,615

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of droughts which have from time to time left their impression on the pastoral history of Australia. These occurred in 1868, 1877, 1883-4, 1892, 1893, 1895, 1901-2, 1912, 1914, 1918, 1919, 1922-23, 1925-26, 1927-28, 1929-30, 1940-41 and 1944-45 to 1946-47.

The years in which the numbers of livestock attained their maxima are as follows:—Horses, 1918 (2,527,000); cattle, 1961 (17,332,000); sheep, 1960 (155,174,000) and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs as at 31st March, 1955, is shown in the maps on pages 909-12 of Official Year Book No. 43.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in Chapter XXIV.—*Farmyard, Dairy and Bee Products*.

2. **Carrying Capacity of Pastoral Holdings.**—The carrying capacity of pastoral holdings has been increased in recent years, owing in some measure to the succession of good seasons experienced since 1946 (with the exception of the 1957–58 season, when prevailing dry conditions caused a slight decline in cattle and sheep numbers). Other important factors contributing to the progressive increase over this period have been the increased attention to pasture improvement and the reduction of rabbit infestation.

There was a considerable decline in the number of rabbits following the introduction in 1950 of the disease myxomatosis, which spread rapidly. The number of rabbits has also been kept at a low level in recent years by the use of poison baits, etc.

Statistics of the area under sown grasses and clovers which have been collected on a uniform basis in all States since 1952–53 reveal that the area sown has been considerably increased. In 1960–61, the area under sown grasses and clovers (excluding native grasses) totalled 36.3 million acres, an increase of 3.0 million acres (9 per cent.) compared with 1959–60 and an increase of 15.6 million acres (75 per cent.) over 1952–53, the earliest year for which this comparison is available. In recent years, the sowing and top-dressing of pastures have been facilitated by the increasing use of aircraft in these operations, an area of 5.0 million acres being sown and/or top-dressed in the year ended March, 1961. This represents an increase of 2.4 million acres (94 per cent.) on the area treated in the previous year.

3. **Size Classification of Cattle Herds and Sheep Flocks.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1959–60 and will be published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity*, 1959–60. Tables in these bulletins relating to beef and dairy cattle and sheep will show classifications according to size of herd or flock, area of holding, area of wheat for grain, area of sown pastures, and type of activity.

4. **Value of Pastoral Production.**—(i) *Gross, Local and Net Values*, 1960–61. Values of pastoral production for each State are shown for 1960–61 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXX.—Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

#### GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1960-61.

1959-60 ..	52.3	48.1	67.6	53.6	55.3	22.8	52.8
1960-61 ..	41.3	40.2	62.7	37.7	54.8	18.3	44.1

(a) No deduction has been made for depreciation and maintenance. Payments to woolgrowers of profits from the war-time wool disposal plan, which were virtually completed by 30th June, 1959, have been excluded. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

5. *Indexes of Quantum and Price of Pastoral Production, 1956-57 to 1960-61.*—The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized in the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. For further details of the methods of calculating these indexes and of the weights used, see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION:  
AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

(a) Index of value at constant prices, i.e., quantities revalued at average unit values of base years, 1936-37 to 1938-39.

## § 2. Horses.

1. **Distribution throughout Australia.**—About 80 per cent. of the total number of horses in Australia are in the States of New South Wales, Victoria and Queensland. In the following table, figures are shown for each State and Territory for the years 1957 to 1961.

HORSES: NUMBER.  
(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1957	235	108	255	41	45	14	38	1	737
1958	221	98	243	35	44	13	39	1	694
1959	214	91	240	33	41	12	39	1	671
1960	204	81	234	30	41	11	38	1	640
1961	192	65	224	27	40	9	40	1	598

The number of horses in Australia reached its maximum during 1918, when a total of 2,527,149 was recorded. The United States of America recorded its highest number in the same year and Canada in 1921. The number in Australia has declined considerably since 1918 owing to the mechanization of transport and farming. During the period 1918 to 1961, the decrease in numbers has averaged about 45,000 per annum.

A graph showing the number of horses in Australia from 1860 onwards appears on page 979.

The percentage distribution of the number of horses in each State and Territory for 1961 was:—New South Wales, 32; Victoria, 11; Queensland, 37; South Australia, 5; Western Australia, 7; Tasmania, 1; and Northern Territory, 7.

2. **Oversea Trade in Horses.**—The export of horses from Australia during the early years of this century was fairly considerable, averaging about 15,000 head per annum between 1901 and 1920, exclusive of those used for war purposes during the 1914–18 War, but has since declined. The 1960–61 exports amounted to 1,014 horses, valued at £507,994 (Australian produce 922 for £350,054; re-exports 92 for £157,940), made up of horses for breeding (208 valued at £126,262), horses for racing (291 valued at £300,261, shipped principally to Singapore) and horses for other purposes (515 valued at £81,471, shipped principally to Hong Kong and India).

The few horses imported into Australia are mainly stud animals from the United Kingdom and racehorses from New Zealand. The total number imported in 1960–61 was 579 valued at £649,047.

## § 3. Cattle.

1. **Objects of Cattle-raising.**—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in the coastal districts of Victoria, New South Wales and southern Queensland, the portion of Australia in the temperate zone which is best adapted to this industry. On the other hand, beef cattle are more widely distributed, particularly in the eastern States, and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. **Distribution throughout Australia.**—Until 1880, New South Wales was the principal cattle-raising State, but in that year Queensland took the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,312,000 head were depastured. The effects of droughts and the ravages of tick fever subsequently reduced the number to 7,063,000 in 1902. Following the disastrous drought which terminated in the latter year, the herds were gradually built up

and, despite recurring droughts, they continued to increase up to 14,441,000 in 1921. Numbers fluctuated in succeeding years, but from 1947 to 1957 there was a general upward movement to a peak of 17,257,000 in the latter year. Drought conditions together with a very high level of slaughtering in subsequent years resulted in a reduction in numbers, but some recovery was made in 1960, followed by a record level of 17,332,000 in 1961.

A graph showing the number of cattle in Australia from 1860 onwards appears on page 979.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1957 to 1961, compared with averages for the three-year periods ended 1939, 1949, and 1959 are shown below.

**CATTLE: NUMBER.**  
(<sup>'000.</sup>)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
<b>Average for three years ended—</b>									
1939 ..	3,040	1,861	6,002	324	767	260	882	8	13,144
1949 ..	3,122	2,153	5,971	443	830	244	1,006	9	13,778
1959 ..	3,770	2,722	7,177	598	985	367	1,173	10	16,802
<b>Year—</b>									
1957 ..	3,911	2,765	7,462	621	957	354	1,176	11	17,257
1958 ..	3,736	2,750	7,187	597	997	371	1,244	10	16,892
1959 ..	3,664	2,651	6,884	576	1,000	374	1,099	9	16,257
1960 ..	3,840	2,624	7,012	500	1,030	375	1,111	11	16,503
1961 ..	4,242	2,864	7,004	561	1,100	394	1,154	13	17,332

Although the proportion was not as high as it has been in some previous years, Queensland was carrying 40 per cent. of the cattle in Australia in 1961. The percentage in each State and Territory during that year was:—New South Wales, 25; Victoria, 17; Queensland, 40; South Australia, 3; Western Australia, 6; Tasmania, 2; and Northern Territory, 7.

Maps showing the distribution of beef and dairy cattle in Australia have been published in previous issues of the Official Year Book (*see* No. 43, pp. 909–10, for 1955; No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. Classification of Cattle According to Purpose.—Of the total number of cattle in Australia in 1961, 12,431,000 or 72 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories, during the years 1957 to 1961, compared with averages for the three-year periods ended 1949 and 1959, are shown in the following table.

**BEEF CATTLE: NUMBER.**  
(<sup>'000.</sup>)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
<b>Average for three years ended—</b>									
1949 ..	1,832	686	4,592	171	604	100	1,006	6	8,997
1959 ..	2,462	1,023	5,882	341	763	165	1,173	7	11,816
<b>Year—</b>									
1957 ..	2,577	1,044	6,087	356	733	158	1,176	8	12,139
1958 ..	2,429	1,026	5,917	338	771	167	1,244	6	11,898
1959 ..	2,382	998	5,643	328	784	171	1,099	6	11,411
1960 ..	2,562	946	5,757	260	814	168	1,111	8	11,626
1961 ..	2,961	1,147	5,790	313	876	180	1,155	9	12,431

Particulars relating to dairy cattle numbers will be found in Chapter XXIV.—Farm-yard, Dairy and Bee Products.

4. **Size Classification of Cattle Herds.**—See § 1, para. 3, page 960 for information available.

5. **Comparison with other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world for the years 1936-40 and at the latest available date. The figures relate to areas embraced by post-war boundaries, but do not in all cases cover identical areas for the two periods.

#### CATTLE: NUMBER IN VARIOUS COUNTRIES.

(a) In some cases census for a single year, and in others an average for two to four years.  
(b) Includes buffaloes. (c) Subject to revision.

6. **Imports and Exports of Cattle.**—The products of the cattle-raising industry figure largely in the export trade of Australia, although until recently the export of live cattle has never been large. In 1959-60, most of the cattle exported were sent to Hong Kong for slaughter. However, in 1960-61, 4,654 head valued at £153,804 were exported to the Philippines, while 3,673 head, valued at £82,882, were exported to Hong Kong. The number of cattle imported is small and, as in the case of horses, consists mainly of valuable animals for stud purposes. Since June, 1958, an embargo has been imposed on the import of cattle in order to prevent the possible introduction of the disease blue-tongue. Details for the years 1956-57 to 1960-61 are shown in the following table.

#### CATTLE: IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.	
	No.	Value.	No.	Value.
		£'000.		£'000.
1956-57 .. .. .	145	123	18,360	754
1957-58 .. .. .	272	174	23,933	932
1958-59 .. .. .	37	62	13,900	493
1959-60 .. .. .	(a)	(a)	13,602	456
1960-61 .. .. .	(a)	(a)	10,159	404

(a) An embargo was placed on the import of cattle in June, 1958; see para. 6, above.

7. **Cattle Slaughtered.**—The numbers of cattle slaughtered during each of the years ended June, 1957 to 1961, compared with averages for the three-year periods ended June, 1939, 1949 and 1959, are shown in the following table.

**CATTLE (INCLUDING CALVES) SLAUGHTERED.**

8. **Production of Beef and Veal.**—Details of the production of beef and veal during each of the years ended June, 1957 to 1961, compared with averages for the three-year periods ended June, 1939, 1949 and 1959 are shown in the following table.

**PRODUCTION OF BEEF AND VEAL (CARCASS WEIGHT).**  
(’000 tons.)

Period.	N.S.W.	Vic.	Qld.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Average for three years ended—</b>									
1938-39..	181	123	199	26	28	10	1	1	569
1948-49..	160	106	206	27	30	9	3	1	542
1958-59..	248	176	305	41	41	19	5	2	837
<b>Year—</b>									
1956-57..	236	159	317	40	38	18	5	2	815
1957-58..	233	181	270	41	39	20	5	2	791
1958-59..	275	189	328	42	45	20	5	2	906
1959-60..	217	159	267	33	46	23	5	2	752
1960-61..	168	125	247	27	42	17	6	1	633

9. **Consumption of Beef and Veal.**—Since the 1939-45 War, consumption per head of beef and veal has been at a somewhat lower level than in the pre-war period (an average of 144 lb. carcass equivalent per head per annum for the three years ended 1938-39). For the three years 1946-47 to 1948-49, the average annual consumption per head was 112 5 lb. or 22 per cent. below the immediate pre-war level. There was a considerable recovery during the ensuing years to a post-war peak of 132 7 lb. per head in 1956-57. With the buoyant overseas market for beef and the high prices ruling in Australia during the following four years, consumption per head fell substantially and in 1960-61 amounted to only 88.3 lb. consisting of 85 3 lb. of carcass meat and 3 0 lb. (carcass equivalent) of canned meat. There was a marked substitution of mutton and lamb for beef in Australia during this period.

The figures quoted in the paragraph above include the consumption of canned beef and veal, and differ on that account from the figures shown in the last column of the next table.

In the following table, details of the production and disposal of beef and veal are shown for the years 1956-57 to 1960-61, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

(a) Includes carcass equivalent of boneless beef exported and ships' stores. (b) Not available.

10. Exports of Frozen Beef and Veal.—The quantity and value of frozen beef and veal exported in each year 1956-57 to 1960-61 are shown in the following table. The figures in this table represent actual weight shipped, not carcass equivalent.

**EXPORTS OF FROZEN AND CHILLED BEEF AND VEAL: AUSTRALIA.**

Year.	Exports of Frozen and Chilled Beef.		Exports of Frozen Veal.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1956-57 .. ..	331,253	22,863	3,391	408
1957-58 .. ..	276,607	20,961.	5,397	609
1958-59 .. ..	499,371	54,154	10,869	1,331
1959-60 .. ..	414,749	54,568	6,827	897
1960-61 .. ..	295,686	39,447	4,506	663

Prior to 1959-60, the largest purchaser of Australian beef and veal was the United Kingdom. Exports to the United States of America have been growing in recent years, and in 1959-60 and 1960-61 exceeded those to the United Kingdom. This was particularly evident in 1960-61 when the total value of beef and veal exports to these two countries was: United States of America, £25,542,000; United Kingdom, £9,622,000.

The export of frozen meat from Australia dates from about 1881, but because of the preference overseas for chilled beef, the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to the United Kingdom in a chilled condition. Trial shipments began in 1932-33 and exports in subsequent years increased to a maximum of 58,963,000 lb. in 1938-39. However, the 1939-45 War seriously affected the export trade in chilled beef, which declined to a negligible amount after 1939-40. In 1960-61, chilled beef exports were 1,213,000 lb. valued at £126,000, while frozen beef exports amounted to 294,472,811 lb. valued at £39,321,134.

While beef and veal were previously shipped largely in carcass form, there has been in recent years a substantial increase in the amount of boneless beef exported. From 1958-59 to 1960-61, the quantity of boneless beef shipped exceeded that exported in carcass form. The trade in boneless beef has been developed principally with the United States of America.

11. **Research.—Cattle and Beef Research Scheme.** In May, 1960, legislation was enacted to provide for a Commonwealth scheme for an expanded programme of research into the scientific, technical and economic problems connected with the Australian beef industry.

Funds are raised by a levy on all cattle weighing over 200 lb. dressed which are slaughtered for human consumption, and the Commonwealth provides a matching contribution on a £1 for £1 basis to meet expenditure on new research. The scheme is administered by the Australian Cattle and Beef Research Committee, whose main function is to formulate plans for projects on which the funds may be expended. The actual research work is undertaken by existing bodies such as the universities, C.S.I.R.O. and State Departments of Agriculture.

The Minister for Primary Industry has approved a research programme of £323,000 for 1962–63.

At its first meeting in June, 1960, the Committee agreed to recommend to the Minister for Primary Industry that the levy be fixed at the maximum provided in the Act, namely 2s. per head. The levy was operative from 1st July, 1960.

However, the levy was suspended in October, 1960, as a result of a High Court writ being issued by certain meat operators challenging the validity of the Act. Amending legislation was enacted in October, 1961, and the levy again became operative from the 14th October, 1961.

The three Acts covering the research arrangements and collection of the levy are the Cattle and Beef Research Act 1960–1961, the Cattle Slaughter Levy Collection Act 1960–1961, and the Cattle Slaughter Levy Act 1960.

The Cattle Slaughter Levy (Suspension) Act 1961 covers the suspension of levy from 14th October, 1960, to 13th October, 1961.

#### § 4. Sheep.

1. **Movement in Sheep Numbers in Australia.**—Fluctuations in the number of sheep recorded in Australia for each year from 1860 onwards may be seen from the graph on page 979. Up to 1945, there were five marked periods of decline, but the losses were made up rapidly. In each of the years 1925 to 1945, the sheep flocks exceeded 100 million, reaching 125.2 million in 1942. During the three years ended 1947, however, a sharp decline to 95.7 million occurred. This was largely attributable to the severe drought conditions experienced during 1944, 1945 and 1946. The passing of the drought and consequent re-stocking resulted in a steady increase in sheep numbers, and although dry seasonal conditions were responsible for a slight decline at 31st March, 1958, a record level of 155.2 million was reached at 31st March, 1960. The reduction in sheep numbers to 152.7 million during 1960–61 was due primarily to dry conditions in Queensland and northern New South Wales.

The following table shows the approximate movement in sheep numbers in Australia in each year 1956–57 to 1960–61.

#### SHEEP AND LAMBS : ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA.

(\*000.)

Season.	Lambs Marked.	Excess of Exports.	Sheep and Lambs Slaughtered.	Estimated Number of Deaths from Disease, Drought, etc.(a)	Number at 31st March.	Annual Net Increase (+) or Decrease (—)
1956–57..	39,902	122	19,503	9,599	149,802	+ 10,678
1957–58..	(b) 36,850	120	24,417	12,800	149,315	— 487
1958–59..	38,748	136	26,963	8,279	152,685	+ 3,370
1959–60..	44,150	(c) 226	32,084	9,351	155,174	+ 2,489
1960–61..	39,794	(c) 148	32,210	10,612	152,679	— 2,495

(a) Balance figure. in this year.

(b) Excludes Northern Territory prior to 1957–58.

(c) No imports

2. **Distribution throughout Australia.**—With the exception of a short period in the early eighteen-sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing nearly one-half of the sheep of Australia.

Maps showing the distribution of sheep in Australia have been published in previous issues of the Official Year Book (see No. 43, p. 911, for 1955; No. 39, p. 907, for 1948; No. 34, p. 432, for 1938–39; and No. 22, p. 659, for 1924–25).

The numbers of sheep in the several States and Territories at 31st March of each year 1957 to 1961 compared with average numbers for the three-year periods ended 1939, 1949 and 1959 are shown in the following table.

## SHEEP : NUMBER.

('000.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.
Average for three years ended—									
1939 ..	51,202	17,845	21,889	8,916	8,972	2,460	23	251	111,558
1949 ..	46,525	17,900	16,442	8,793	10,368	2,060	24	227	102,339
1959 ..	67,006	26,615	22,537	15,285	15,609	3,259	25	265	150,601
Year—									
1957 ..	67,670	25,831	23,190	14,984	14,887	2,943	30	267	149,802
1958 ..	65,410	27,090	22,274	15,236	15,724	3,298	27	256	149,315
1959 ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685
1960 ..	71,000	26,597	23,332	14,025	16,412	3,494	15	299	155,174
1961 ..	68,087	26,620	22,135	14,952	17,152	3,439	16	278	152,679

Except when affected by drought, the relative numbers of sheep in the different States have remained fairly constant in recent years. The percentage distribution in 1961 was:—New South Wales, 45; Victoria, 17; Queensland, 15; South Australia, 10; Western Australia, 11; and Tasmania, 2.

3. **Classification of Sheep According to Age, Sex and Breed.**—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March of the years 1957 to 1961.

## SHEEP : AGE AND SEX, AUSTRALIA.

('000.)

Description.	1957.	1958.	1959.	1960.	1961.
Rams, 1 year and over ..	1,830	1,883	1,919	1,898	1,934

Lambs and hoggets, under 1 year .. .. .	31,108	27,890	29,423	32,499	29,220
<b>Total, Sheep and Lambs</b>	<b>149,802</b>	<b>149,315</b>	<b>152,685</b>	<b>155,174</b>	<b>152,679</b>

Particulars relating to the principal breeds of sheep at 31st March, 1959, the latest date for which these data are available (details are collected on a triennial basis only), are shown in the following table.

## SHEEP : PRINCIPAL BREEDS, 31st MARCH, 1959.

('000.)

Breed.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Merino ..	52,467	11,410	21,725	13,112	14,921	325	19	245	114,224
Other recognized breeds ..	6,037	6,118	72	1,061	542	1,841	..	12	15,683
Merino come-backs(a) ..	3,408	3,422	70	312	146	466	..	2	7,826
Crossbreds(b) ..	6,024	5,975	281	1,149	606	904	..	13	14,952
Total ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685

(a) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e., finer than half-bred.  
(b) Half-bred and coarser.

4. Numbers of Sheep on Rural Holdings.—See § 1, para. 3, page 960, for information available.

5. Comparison with other Countries.—Australia has long occupied a leading position amongst the sheep-raising countries of the world in respect of the size of its flocks and the quantity and quality of wool produced. In 1960–61, Australian flocks numbered 153 million sheep, compared with an estimate of 235 million for the U.S.S.R., China, and Eastern Europe combined, about 48 million in New Zealand, and about 46 million in Argentina. The total world sheep numbers were estimated at about 913 million in 1960–61. These figures relate to woolled sheep only, non-woolled sheep accounting for about 5 per cent. of the world total of all types of sheep. Further details of sheep numbers in the principal wool producing countries of the world for 1958–59 to 1960–61 are given in the table on page 976.

6. Imports and Exports of Sheep.—As in the case of cattle, the overseas exports of live sheep from Australia are of comparatively little importance. On 27th November, 1929, the export of stud merino sheep was prohibited, except with the approval of the Minister for Primary Industry. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly from Western Australia, to Singapore. Since June, 1958, an embargo has been imposed on the import of sheep in order to prevent the possible introduction of the disease blue-tongue. The following table shows the imports and exports of all sheep for the years 1956–57 to 1960–61.

## SHEEP : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.

1958–59 ..	156,020	193,379	29,286	55,001	40,875	16,403	93	1,269	492,326
1959–60 ..	184,600	223,519	35,886	62,760	44,385	20,780	111	1,292	573,333
1960–61 ..	196,417	210,245	48,529	52,242	46,560	18,925	98	1,292	574,308

9. **Consumption of Mutton and Lamb.**—Civilian consumption of mutton and lamb (in carcass equivalent weight, including canned mutton) rose substantially during the 1939–45 War, but fell again in 1946–47, and up to 1951–52 was lower than in pre-war years (an average of 74.8 lb. carcass equivalent per head per annum for the three years ended 1938–39). It rose during succeeding years to 78 lb. per head in 1952–53, and except for slight drops in 1955–56 and 1956–57, this level was maintained up to 1957–58. There was a sharp rise in 1958–59 to 89 lb. per head, and in 1959–60 a level of 105 lb. per head was reached. In 1959–60, consumption of mutton and lamb exceeded that of beef and veal for the first time on record. A small decline followed in 1960–61 when the amount of mutton and lamb consumed per head was estimated as 103 lb. Figures quoted in this paragraph include the consumption of canned mutton, and differ on that account from the figures in the last column of the table following.

The following table gives details of the production and disposal of mutton and lamb.

**PRODUCTION AND DISPOSAL OF MUTTON AND LAMB (CARCASS WEIGHT): AUSTRALIA.**

1960-61 .. ..	+ 1	207	29	..	177	38.2

(a) Includes carcass equivalent of boneless mutton exported.

10. Exports of Frozen Mutton and Lamb.—The export trade in mutton and lamb preserved by cold process has not since attained the level of 205 million lb. shipped in 1913, although in 1942-43 it almost reached this level again. In earlier years, shipments consisted mainly of frozen mutton, but commencing with 1923-24 lamb has predominated in almost every year. The position has been reversed in 1959-60 and 1960-61 when exports of frozen mutton have been considerably in excess of shipments of frozen lamb.

The quantities and values of exports of frozen mutton and lamb in each year 1956-57 to 1960-61 are shown in the following table.

**EXPORTS OF FROZEN MUTTON AND LAMB: AUSTRALIA.**

Year.	Exports of Frozen Mutton.		Exports of Frozen Lamb.		Exports of Frozen Mutton and Lamb.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	<sup>0</sup> 000 lb.	£ <sup>0</sup> 000.	<sup>0</sup> 000 lb.	£ <sup>0</sup> 000.	<sup>0</sup> 000 lb.	£ <sup>0</sup> 000.
1956-57.. ..	23,012	1,322	53,262	4,773	76,274	6,095
1957-58.. ..	42,270	2,253	64,352	6,132	106,622	8,385
1958-59.. ..	74,650	5,851	91,192	8,151	165,842	14,002
1959-60.. ..	71,763	4,719	59,264	4,389	131,027	9,108
1960-61.. ..	83,075	7,437	64,430	5,790	147,505	13,227

The principal customer for Australian frozen mutton and lamb was formerly the United Kingdom, although the United States of America has become a major buyer of mutton in recent years. In 1960-61, exports of mutton and lamb to the United Kingdom represented 21 per cent. and 69 per cent., respectively, of the total quantities exported. Forty-five per cent. of the mutton exported went to the United States of America, largely in the form of boneless meat, and the proportion of lamb exported to that country was nine per cent.

### § 5. Consumption and Marketing of Meat.

1. **Consumption of Meat.**—The apparent consumption per head of meat (including cured and canned meat) and edible offal in Australia is shown in the table below for the years 1956-57 to 1960-61 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

#### MEAT (INCLUDING CURED AND CANNED) AND EDIBLE OFFAL AVAILABLE FOR CONSUMPTION: AUSTRALIA.

(lb. per head per year.)

Period.	Beef and Veal. (a)	Mutton. (a)	Lamb. (a)	Pork. (a)	Offal.	Canned Meat. (b)	Bacon and Ham. (c)	Carcass Equivalent of Meat and Meat Products. (d)

1960-61 ..	85.3	63.2	38.2	11.5	10.9	4.2	6.8	224.2

(a) Carcass weight of fresh meat. (b) Canned weight. (c) Cured weight. (d) Includes offal.

2. **Marketing of Meat.**—(i) *General.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the Meat Export Control Act 1935-1960 is given on page 801 of Official Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939-45 War up to 30th June, 1952, and of the Fifteen Year Meat Agreement (1952-67) are given on page 710 of Official Year Book No. 41 and in earlier issues.

The Fifteen Year Meat Agreement (1952-67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia, enabling increased exports to be made to the United Kingdom, and the provision of a satisfactory market in the United Kingdom for such meat. It covers beef and veal, and mutton and lamb.

(iii) *Cessation of Bulk Purchasing.* Following the announcement in September, 1953 that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements were given in previous issues of the Year Book (see No. 47, p. 960).

The agreed minimum prices (f.o.b. port of shipment), which operated until 30th September, 1955, were as follows:—Beef and veal, 13.18d. stg. per lb.; lamb, 13.61d. stg. per lb.; and mutton, 6.05d. stg. per lb. These minimum prices were reviewed for subsequent years.

In the event of market prices for the various classifications of meat averaging below the minimum, the Ministry is to make a payment to the Australian Government corresponding to the amount of the deficiency. So as to determine the extent of any deficiency, a procedure designed to measure as accurately as possible the weighted average level of wholesale prices of Australian meat on the United Kingdom market has been agreed upon.

(iv) *Private Trading.* As part of the negotiations which have taken place in Australia and the United Kingdom at various times since 1954, minimum prices have been reviewed periodically. The result has been a general reduction in minimum prices, and up to the 1960–61 season this had amounted to 5 per cent. in the case of beef and veal and lamb, and about 25 per cent. in the case of mutton, compared with 1954–55 minimum prices. At the same time, however, Australia has been permitted to export increasing quantities of all types of meat to destinations other than the United Kingdom and the Colonies. For the years 1957–58 to 1960–61, the beef export “free quota” was set at a maximum of 7,500 tons a year of 1st and 2nd quality beef, without restriction as to the quantity of lower grades that may be exported to these other destinations.

Minimum beef prices for the three years to 1963–64 were fixed during the 1958 negotiations at 9 per cent. below the 1960–61 level. Further price negotiations were held in August, 1961, at which beef prices to 1963–64, previously agreed upon, were revised upward to a level 4½ per cent. higher than those negotiated in 1958. The new price level for beef was further extended to cover the period 1964 to 1967. It was also agreed that the existing guaranteed minimum prices for lamb would continue until October, 1962, and from then until October, 1964, they would be 2½ per cent. lower. From October, 1961, there will be no minimum prices in respect of mutton because of the difficulty in determining them owing to the change in marketing from carcass to piece mutton. Also, from October, 1961, the “free quota” restrictions were removed and, under the Agreement, meat may now be exported to any destination free of quantitative restriction.

After eight months of open trading, the Australian Meat Board estimated that a deficiency payment would be received in respect of beef for the first year. In order to make arrangements for this anticipated payment to be passed on to the producer, the Meat Agreement (Deficiency Payments) Act was passed by the Commonwealth Government in May, 1955. Payments were to be made on the understanding that they were, or would be, reflected in the price paid to producers. To make provision for recoupment by the Board of any overpayment, the Meat Export (Additional Charge) Act was also passed in May, 1955.

Because of a rise in beef prices in the United Kingdom, the deficiency payments made by the Board during the year ended 30th September, 1955, exceeded the sum received from the United Kingdom for the same period. In an endeavour to recoup some of this overpayment, under the terms of the Meat Export (Additional Charge) Act, a levy of one-eighth of a penny per lb. was imposed on certain classes of beef exported to the United Kingdom out of stocks placed into store from 1st February to 16th April, 1956.

From 1st October, 1955, until April, 1958, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia “earned” deficiency payments which enabled the Australian Meat Board to make substantial bounty payments on beef exported to the United Kingdom. The rates of payment made during the 1954–55 and 1955–56 seasons are given on pages 888–9 of Official Year Book No. 43 and on pages 920–1 of Official Year Book No. 44 for 1956–57. No deficiency payments have been received for beef since 1956–57. A deficiency payment was earned on lamb for the first time during the 1960–61 season and as a result a bounty has been paid at the rate of 2s. per carcass and ¾d. per lb. for piece lamb entered into cold store for export to the United Kingdom during the period 1st August, 1961, to 28th April, 1962.

In 1958, a new “chiller” grade of export beef was introduced. Beef of the new grade, whether exported in the chilled or frozen form, received a bounty of 5d. per lb. The bounty on boneless piece beef was increased from 4d. to 5d. per lb., and that on certain classes of carcass piece beef from 3d. to 5d. per lb. The basic rate of 3d. per lb. was maintained for other 1st and 2nd quality quarter beef. The bounty payments were discontinued on 27th December, 1958, on account of the relatively high prices being obtained in the United Kingdom.

Prior to 1959 the heaviest volume of beef exports went to the United Kingdom. However, with the relaxation of the quota restrictions which operated to 1st October, 1958, Australian exporters were able to take advantage of the market for boneless manufacturing meat in the United States, and during 1959–60 and 1960–61 the United States market eclipsed the United Kingdom as the principal market for Australian beef exports.

## § 6. WOOL

1. **General.**—Australia is the leading wool-growing country in the world. With about one-sixth of the world's woolled sheep, Australia produces more than one-quarter of the world's wool and more than half of the world's fine-quality merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool, wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, has amounted to only about 7 per cent. of the total production (greasy basis) in recent years.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on page 976.

2. **Clean Yield.**—Wool as shorn from the sheep contains an appreciable amount of grease, dirt and other extraneous matter, and is termed "greasy wool". The quantity of grease and other matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

To allow for this factor, the weight of greasy wool is sometimes given on a "clean" basis, i.e., minus the estimated amount of impurities. The net wool fibre content of greasy wool, expressed as a percentage, is termed "clean yield".

From 1946-47 to 1952-53, the Australian Wool Realization Commission, and from 1953-54, the Wool Statistical Service, have assessed annually the clean yield of the Australian wool clip. During the period of assessment, the clean yield has shown a continuous rise up to 1951-52, when it reached 57.5 per cent. It has since fluctuated between 55.8 per cent. and 57.7 per cent.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 54 per cent. The quantity of this wool exported during 1960-61 was about 13 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

For the clean yield of Australian scoured wools, a standard factor of 93 per cent. is taken.

3. **Production.**—The production of wool in the States and Territories varies broadly in accordance with the number of sheep depastured and with seasonal conditions which affect clip per head (*see* para. 4, p. 975). In general, however, South Australia obtains from its large-framed merinos a much heavier fleece per sheep than the Australian average, while Tasmania generally obtains from its predominantly non-merino flocks a lighter fleece per sheep. In addition, as a result of better management (improved pastures, fodder conservation, better breeding, control of diseases, etc.), the long-term trend has been towards higher fleece weights.

The following table shows details of total wool (i.e., shorn, dead and fellmongered, and exported on skins) produced by each of the States and Territories during the years 1956-57 to 1960-61 compared with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

PRODUCTION OF WOOL (IN TERMS OF GREASY).  
(<sup>000</sup> lb.)

The bulk of the Australian wool production (about 91 per cent. in recent years) is shorn from live sheep. The remainder is obtained by fellmongering (about 2 per cent.), or is exported on skins (about 7 per cent.). The following table shows details of total wool production according to method of obtaining wool, and also the gross value of wool produced. Gross value is based, for shorn wool, upon the average price realized for greasy wool sold at auction and, for skin wools, on prices recorded by fellmongers and skin exporters.

**QUANTITY (IN TERMS OF GREASY) AND VALUE OF WOOL PRODUCED:  
AUSTRALIA.**

Period.	Shorn (incl. Crutchings).	Dead and Fell- mongered.	Exported on Skins.	Total Production.	
				Quantity.	Value.
	'000 lb.	'000 lb.	'000 lb.	'000 lb.	£'000.
Average of three years ended—					
1938-39.. .. .	889,338	49,280	57,983	996,601	53,425
1948-49.. .. .	902,007	50,660	60,265	1,012,932	152,536
1958-59.. .. .	1,411,424	36,804	81,490	1,529,718	394,145
Year—					
1956-57.. .. .	1,457,387	37,724	69,144	1,564,255	507,615
1957-58.. .. .	1,319,941	30,894	83,019	1,433,854	363,406
1958-59.. .. .	1,456,759	41,795	92,308	1,590,862	311,415
1959-60.. .. .	1,529,362	38,894	111,744	1,680,000	389,761
1960-61.. .. .	1,471,747	37,820	115,539	1,625,106	340,431

In comparing successive clips, allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

4. Average Weights of Fleeces Shorn.—The average weights of sheep and lamb fleeces shorn in each of the States of Australia and in the Australian Capital Territory are shown in the following table for each season 1956-57 to 1960-61.

**AVERAGE WEIGHT OF FLEECES SHORN (SHEEP AND LAMBS).

(a) Excludes Northern Territory.

5. Wool classified according to Quality.—The following table provides a detailed analysis of wool sold at auction, according to quality, for the years 1956-57 to 1960-61. These data are compiled by the Wool Statistical Service on the basis of catalogues of auction sales. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

(a) All greasy wool sold at auction except "wool re-offered account buyer".

6. World Sheep Numbers and Wool Production.—The following table shows particulars of the woolled sheep numbers and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred and carpet type wool for the latest available years.

In 1960-61, Australia produced 29 per cent. of the world total of all types of wool, the share of all British Commonwealth countries combined representing approximately 50 per cent. The principal wool producers, other than Australia, were New Zealand with 10 per cent. of the world total, Argentina, 8 per cent., United States of America, 6 per cent., and Republic of South Africa, 6 per cent. Production in the U.S.S.R., China and Eastern European countries together amounted to 20 per cent. World production of wool (all types) in 1960-61 exceeded the pre-war average for the years 1934 to 1938 by approximately 1,824 million lb. or 48 per cent.

Australia's wool clip is predominantly merino. New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of merino wool in 1960-61 was 44 per cent. above the average for the years 1934 to 1938, and the production of crossbred types has risen by about 64 per cent. Carpet wool production has risen by about 34 per cent.

7. *Marketing of Wool.*—(i) *War-time Contracts.* Details of the contract entered into between the Governments of Australia and the United Kingdom for the purchase of the surplus wool clip of Australia for the duration of the war and one full clip thereafter (1939–40 to 1945–46) will be found in Official Year Book No. 36, page 1106.

Details of the war-time contract arrangements for the period April, 1940, to June, 1946, between the Australian and United Kingdom Governments for the purchase of Australia's exportable surplus of woolled sheepskins will be found in Official Year Book No. 37, page 875.

(ii) *Australian Wool Realization Commission.* Details relating to this Commission may be found in Official Year Book No. 47, page 967. Earlier references are also given on that page.

(iii) *Minimum Reserve Price Plan.* Details of the minimum reserve price plan which was completed by the Governments of Australia, New Zealand, South Africa and the United Kingdom in May, 1951, and which was rejected at a referendum of woolgrowers in Australia in August, 1951, will be found in Official Year Book No. 39, page 925.

(iv) *Subsidy on Woollen Goods, 1950–51.* Details of the subsidy paid on woollen goods manufactured for consumption in Australia from wool sold during the 1950–51 season will be found in Official Year Book No. 41, page 727.

(v) *Wool Marketing Committee of Enquiry.* At the request of woolgrower organizations, the Commonwealth Government, in January, 1961, appointed an independent committee to inquire into the marketing and promotion of Australian wool.

The Committee's terms of reference were:—

- (a) to inquire into the present systems of marketing and of promoting the sale of the Australian wool clip and matters relating thereto, and to report upon the efficacy of these systems;
- (b) to report upon the merits of any other systems or of modifications of the present systems which may be advocated to the committee of enquiry or which the committee itself considers would be of long-term benefit to the wool-growing industry and in the best interests of the nation.

After investigations extending over a period of about twelve months, the Committee presented its report to the Government in February, 1962. The report was tabled in both Houses of Parliament on 7th March, 1962, and released to the public.

8. *Australian Wool Bureau.*—(i) *Wool Promotion.* The Australian Wool Bureau is a statutory body which is responsible for the promotion of wool on behalf of Australian woolgrowers. It has been in existence since 1936, but prior to its reconstitution in 1953, it was called the Australian Wool Board.

The Bureau consists of seven members appointed by the Governor-General for a term of three years. Of the seven members, three represent the Australian Wool and Meat Producers' Federation, three the Australian Woolgrowers' and Graziers' Council and one member is nominated by the Commonwealth Government.

The present structure and functions of the Wool Bureau are laid down by the Wool Use Promotion Act 1953–1960. The principal function of the Bureau is the promotion, by publicity and other means, of the use of wool in Australia, and promotion of and research into wool in overseas countries. The Bureau is also empowered to perform other approved functions for the benefit of the wool industry in Australia.

The Bureau is associated with the New Zealand Wool Board and the South African Wool Board in maintaining the International Wool Secretariat, which was founded in 1937 to promote the use of wool throughout the world by publicity, education and research on behalf of the three bodies.

Finance for the Wool Bureau's activities is provided by woolgrowers through the wool promotion levy (see para. 9. below), and supplemented by income from wool stores under the Bureau's administration (see (iii) below).

(ii) *Wool Statistical Service.* In 1953, the Australian Wool Bureau took over the statistical division of the former Australian Wool Realization Commission. As the Wool Statistical Service of the Australian Wool Bureau, this unit publishes detailed statistical analyses by type and quality of wool sold at auction in Australia, and also publishes regularly wool price reports and other statistical data on the Australian wool clip.

A Statistical Service Committee consisting of representatives of the Australian Wool Bureau, the Commonwealth Statistician, wool buyers, woolgrowers and wool-selling brokers acts in an advisory capacity to the Australian Wool Bureau.

The Wool Statistical Service is financed out of the income received by the Wool Bureau from wool stores under its control and from an annual contribution by the Commonwealth Government.

(iii) *Wool Stores.* Some three hundred wool stores, formerly the property of the Joint Organization and purchased from it by the Commonwealth Government, were transferred to the ownership of the Australian Wool Bureau by virtue of the Wool Stores Act 1953. The Bureau formally assumed control of these stores on 11th January, 1954, and at the same time received a substantial sum of money representing accumulated rentals and receipts from sales which had come to hand while the stores were held by the Commonwealth Government. Under the Act, the Bureau may dispose of these stores only with the permission of the Minister for Primary Industry and, in the event of war, may be required to return the stores without compensation to the Commonwealth Government. The stores are let by the Wool Bureau as a commercial proposition. The rental income is used to meet the expenses of maintaining, managing and insuring the stores, to defray the cost of operating the Wool Statistical Service and to help finance the wool promotion activities of the Bureau.

9. *Wool Levy.*—In 1936, legislation was passed providing for the collection from wool-growers of a levy on all shorn wool produced in Australia (Wool Tax Act 1936 and Wool Tax Assessment Act 1936). The object of the levy was to finance a scheme for wool promotion and research, administered by the Australian Wool Board.

Initially, the rate of the levy was 6d. a bale. Legislation passed in 1945 raised the levy to 2s. a bale, and made other arrangements for the financing of wool research, so that the entire proceeds of the wool levy became available for wool promotion. Between 1946 and 1952, the wool levy was collected as part of a charge levied on woolgrowers to finance the post-war wool disposals scheme (under Wool (Contributory Charge) legislation). For details see Year Book No. 40, pages 675 and 819.

Following the termination of the disposals scheme, separate collection of the wool levy was resumed with the passage of the Wool Tax Acts (Nos. 1 and 2) 1952. These Acts provided for the rate of levy to be prescribed within the limits of 2s. and 5s. a bale. The operative rate of the levy was set at 4s. a bale, and this rate remained unaltered until 1960.

In 1957, new Wool Tax Acts were passed to provide for the collection from woolgrowers, as part of the wool levy, of a contribution for wool research. The wool levy thus became a composite charge consisting of the wool promotion levy (i.e., the amount collected for wool promotional purposes), which was left unchanged at 4s. a bale, and the wool research levy, which was fixed at 2s. a bale.

In 1960, the wool promotion levy was raised to 5s. a bale, and the following year amending legislation set the levy for 1961–62 at 10s. a bale. However, the operation of this rate was subsequently extended for the year 1962–63. The wool research levy has remained unchanged at 2s. a bale since 1957.

The imposition and collection of the wool levy is governed by three complementary Acts, the Wool Tax Acts (Nos. 1 and 2) 1957–1962 and the Wool Tax Assessment Act 1936–1962.

10. *Wool Research.*—When the Australian Wool Board came into being in 1936, it adopted the role of co-ordinating and fostering the work of the various Australian institutions engaged in research for the benefit of the wool industry. Annual grants were made by the Board to support this work.

The Wool Use Promotion Act 1945 relieved the Australian Wool Board of its research responsibilities and established the Wool Research Trust Account, into which the Commonwealth Government paid annually a sum equivalent to 2s. for each bale of shorn wool on which Wool Tax had been collected. Subsequently, additional finance was made available for wool research through the Wool Industry Fund (a fund created in 1946 from certain war-time profits of the Central Wool Committee). The research funds were administered by an inter-departmental committee and, from 1955 onwards, the wool industry also had representatives on the Committee which then became known as the Wool Research Committee. The recommendations of the Committee were subject to the approval of a panel of Ministers.

The Wool Research Act 1957 and associated legislation altered the research arrangements as follows.

- (a) A wool research levy of 2s. a bale was imposed on woolgrowers.
- (b) The Government contribution to wool research was increased to 4s. a bale.
- (c) A single fund for wool research, known as the Wool Research Trust Fund, was established which amalgamated the Wool Research Trust Account and the Wool Industry Fund. The use of this fund is limited to sheep and wool research and associated matters.

1870 TO 1960-61

(d) A statutory body known as the Wool Research Committee was set up to administer the Wool Research Trust Fund. The Committee consists of representatives of the Australian Woolgrowers' and Graziers' Council and the Australian Wool and Meat Producers' Federation, the Australian Wool Bureau, textile manufacturers, the C.S.I.R.O., Universities engaged in wool research and the Department of Primary Industry. There is also an observer representing the Australian Agricultural Council. The recommendations of the Committee are subject to the approval of the Minister for Primary Industry.

The greater part of the annual budget for wool research is allocated to the C.S.I.R.O. for biological and textile research in connexion with the wool industry. Allocations are also made to Universities to provide facilities for post-graduate training and research, and to State Departments of Agriculture for applied research and extension work. Funds are also provided for economic research relating to wool carried out by the Bureau of Agricultural Economics, a division of the Commonwealth Department of Primary Industry. The economic research work falls into two main categories, namely, farm production economics dealing with economics of wool growing and sheep-station management generally, and commodity research dealing with the economic aspects of the wool industry in Australia and of wool as a commodity in world trade.

11. **The Australian Wool Testing Authority.**—This body was established under the Australian Wool Testing Authority Act 1957. Its control is vested in seven members who represent wool buyers, wool selling brokers, wool processors, the Australian Wool Bureau, the C.S.I.R.O. and the Commonwealth Government (two members, of whom one is an officer of the Department of Primary Industry).

The Authority has laboratories in Melbourne, Sydney and Perth, and sampling centres in most Australian wool auction markets. Its services are used extensively by exporters of scoured and carbonized wool to determine accurately the moisture content of wool for invoicing purposes. Many wool traders also seek yield tests on greasy wool. Apart from these and other tests to measure the properties of wool which are of commercial importance, the Authority carries out various performance tests on wool textiles.

The initial capital of the Authority was provided by loans from the Commonwealth Government. However, the Authority is expected to meet its financial obligations from its revenue. This comes from charges made for tests performed and certificates issued.

The Authority is listed by the International Wool Textile Organization as a public testing body, and its certificates have world-wide acceptance.

12. **Consumption of Wool.**—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption), plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects, as they disregard oversea trade in semi-processed wool (e.g., tops and yarns) as well as woollen goods. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia are shown in the following table for the years 1956–57 to 1960–61.

ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA.  
(<sup>000</sup> lb.)

Year.	Greasy Basis.			Clean Basis.		
	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.
1956–57 .. ..	108,255	5,218	113,473	65,504	2,479	67,983
1957–58 .. ..	103,704	4,480	108,184	63,153	2,128	65,281
1958–59 .. ..	103,180	3,992	107,172	62,834	1,896	64,730
1959–60 .. ..	123,529	5,092	128,621	75,226	2,419	77,645
1960–61 .. ..	110,382	3,480	113,862	67,221	1,653	68,874

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Estimated Consumption of Locally Processed Wool in Australia" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown in the following table for the years 1956-57 to 1960-61. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for oversea trade in woollen piece goods, clothing, etc., because of the obvious difficulties of estimating accurately the wool content of these products.

13. *Exports of Wool.*—(i) *Quantities.* (a) *Greasy.* Prior to the 1939-45 War, Australian greasy wool exported overseas was sent principally to the United Kingdom and other European countries. During the 1939-45 War, exports to the United States of America showed great expansion but have since dwindled to slightly more than 1 per cent. Of the total shipments in 1960-61, 33 per cent. went to Japan, 17 per cent. to the United Kingdom, 12 per cent. to France, 8 per cent. to Italy and 8 per cent. to Belgium-Luxembourg. The following table shows the quantities of greasy and slipe wool exported, and the principal countries of consignment.

(ii) *Total Value of Exports.* The value of wool (other than wool on sheepskins) exported from Australia during 1960-61 was 35 per cent. of the total value of exports of merchandise of Australian origin, while the proportion for the five years ended 1960-61 averaged 40 per cent. The value for the five years ended 1960-61, together with the principal countries to which wool was exported, is shown in the following table.

VALUE OF WOOL EXPORTS: AUSTRALIA.(a)  
(£'000.)

<b>Total .. .. .</b>	<b>483,724</b>	<b>373,397</b>	<b>302,243</b>	<b>386,153</b>	<b>334,442</b>

(a) Excludes wool exported on sheepskins.

14. *Stocks of Wool.*—Stocks of raw wool held in Australia at 30th June, 1961, amounted to 252.3 million lb. (greasy basis) of which 64.3 million lb. (40.7 million lb. as greasy and 23.6 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers, and 188.0 million lb., assumed to be all greasy, were held by brokers. Of the wool held by brokers, 62.8 million lb. were unsold wool and 125.2 million lb. were sold wool held awaiting shipment. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

15. *Price.*—Wool is the chief factor in the pastoral wealth of Australia, and the nation's prosperity is largely dependent upon its satisfactory sale. Auction sales are conducted at Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Albany, Hobart and Launceston, and are attended by buyers representing manufacturers and merchants in the United Kingdom, France, the United States of America, Japan, U.S.S.R. and many other countries. More than 95 per cent. of the Australian wool clip is now disposed of at auction in Australia. During the five years ended 1960-61, the price of greasy wool sold in the selling centres of Australia averaged 60.0d. per lb. compared with the average selling price of 11.5d. per lb. during the ten years ended 1938-39. The average for the nine years ended 1928-29 was 18d. per lb., and for the seven years ended 1913-14, 9d. per lb.

As indicated in para. 7 above, the price of wool during the 1939-45 War was determined by the British Government wool contract. With the return to auction sales since 1945-46, the average price of greasy wool sold rose rapidly from the contract price of 15.45d. per lb. applicable in 1945-46 to the unprecedented level of 144.19d. per lb. in 1950-51. This was followed by a sharp fall, and prices in the years 1951-52 to 1958-59 fluctuated in the range 49d. to 82d. The average price of greasy wool sold was 57.8d. in 1959-60 and 52.1d. in 1960-61.

The prices quoted above, except for United Kingdom contract prices, are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

16. *Value.*—Fluctuation in Australian wool prices has a marked effect on the nation's rural and national income. In 1945-46, the gross value of wool production was £58,597,000, representing 17.4 per cent. of the gross value of all rural industries, while in 1950-51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total for all rural industries. The value of wool production fell in subsequent years even though the quantity produced increased substantially, and in 1960-61 was £340,431,000. This figure represented 24.8 per cent. of the gross value of rural industries.

Details of the value of wool production for the years 1956-57 to 1960-61 are shown in the following table.

**ESTIMATED GROSS VALUE OF TOTAL WOOL PRODUCTION.(a)**

(a) Greasy, Slipe, Washed and Scoured, and Carbonized.

Australian wool represented 35 per cent. of the total quantity imported into the United Kingdom during 1961. New Zealand supplied 25 per cent., while the total quantity received from Commonwealth countries constituted 66 per cent. of all United Kingdom imports of wool.

18. **Principal Importing Countries and Sources of Supply.**—The following table, prepared from information published by the Commonwealth Economic Committee, furnishes, in respect of the principal importing countries, details of their production and imports of wool for 1960 together with the chief sources of supply. The quantities imported refer to the actual weight of wool, without distinguishing between greasy and scoured, except in the case of the United States of America, where estimated clean content of raw wool is quoted.

## WOOL: PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1960.

(Source: Information published by Commonwealth Economic Committee.)  
(Million lb.)

Importing Country.	Pro- duction of Importing Country. (a)	Quantity Imported from— (b)					Total Imports.
		Australia.	New Zealand.	Republic of South Africa.	Argen- tina.	Other Countries.	
United Kingdom ..	121	265.3	161.0	48.4	54.6	116.2	645.5
Belgium .. ..	(c)	104.1	35.2	(c)	15.7	34.5	189.5
France .. ..	57	167.7	104.0	50.7	29.4	22.6	374.4
Germany (Federal Republic) ..	(c)	68.0	32.5	34.4	22.3	52.3	209.5
Italy .. ..	32	133.2	24.4	26.9	25.2	66.3	276.0
Japan .. ..	(c)	350.6	18.8	14.4	23.8	9.5	417.1
United States of America(d) ..	323	26.5	55.2	17.4	52.7	76.4	228.2

(a) Greasy basis, 1960-61. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 309.4 million lb.

As a considerable transit trade exists between continental countries, it must not be assumed that the whole of the imports recorded by these countries is retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom (8 per cent. of total imports re-exported in 1960) and Belgium.

## § 7. Oversea Trade in Hides and Skins.

1. *Extent of Trade.*—In addition to the hides and skins treated locally, considerable quantities are exported. The value of cattle and horse hides, sheep and other skins, and skin pieces, sent overseas during 1960-61 amounted to £27,194,000, compared with a total of £31,779,000 in 1959-60 and £23,572,000 in 1958-59.

2. *Export of Sheepskins.*—(i) *With Wool.* Of the total exports of sheepskins with wool, amounting to 172,066,000 lb. valued at £21,429,000 during 1960-61, 120,946,000 lb. valued at £14,757,000 (69 per cent. of total value) were shipped to France, 16,497,000 lb. valued at £2,392,000 (11 per cent.) to Italy, and 15,448,000 lb. valued at £1,819,000 (8 per cent.) to the United Kingdom. In the previous year, France obtained about 73 per cent. (by value) of all sheepskins with wool exported, Italy 10 per cent. and the United Kingdom 8 per cent. The exports of sheepskins with wool during each of the years 1956-57 to 1960-61 were as follows.

## EXPORTS OF SHEEPSKINS WITH WOOL: AUSTRALIA.

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Number .. .. '000	14,239	19,441	20,180	25,560	26,883
Value .. .. £'000	19,438	20,219	14,768	23,238	21,429

(ii) *Without Wool.* Up to 1943-44, sheepskins without wool were exported chiefly to the United States of America. During 1943-44, that country accounted for 97 per cent. of the total shipments. In subsequent years, however, there has been a decline in the proportion shipped to the United States of America. In 1958-59, the United States received 66 per cent., but in 1959-60 and 1960-61 only 28 and 11 per cent. respectively. In the latter year, the United Kingdom was the main importer, taking 24 per cent. (value, £32,102), while Finland purchased 16 per cent. (value, £21,604). In 1960-61, a total of 768,000 sheepskins without wool were exported, valued at £135,000. Since 1954-55, the number exported has exceeded two million only once (in 1958-59), and the value has fluctuated about £350,000.

3. *Hides.*—(i) *Exports.* The export trade in cattle hides and calfskins during 1960-61 was distributed amongst the main importing countries as follows:—Japan, £2,230,000; Italy, £260,000; the Netherlands, £200,700; and Germany (Federal Republic), £183,000. The total quantity exported was 43,985,150 lb., valued at £3,453,000.

(ii) *Imports.* The imports of cattle hides and calfskins are fairly substantial, the chief sources of supply being New Zealand and the Pacific Islands. The quantity of cattle hides, including calfskins, imported into Australia during the year 1960-61 amounted to 12,280,000 lb. valued at £1,208,000, the highest figures attained since 1953-54.

4. *Furred Skins.*—The exports of furred skins in 1960-61 were valued at £1,485,000, of which rabbit and hare skins constituted £957,000. This is considerably less than the highest total value of £2,013,000, recorded in 1955-56, when rabbit and hare skins accounted for £1,711,000. In 1959-60, they accounted for £1,156,000 out of a total of £1,755,000.

Skins were shipped principally to the United States of America, the United Kingdom, Belgium and Luxembourg, the values shipped to each in 1960-61 being:—United States of America, £944,900; United Kingdom, £269,800; and Belgium-Luxembourg, £111,800.

5. *Marketing of Hides and Skins.*—(i) *Sheepskins with Wool.* Details of the agreement between the United Kingdom and Commonwealth Governments for the purchase by acquisition of the "exportable surplus" of woolled sheepskins in Australia during the 1939-45 War were given in Official Year Book No. 37, page 886. The contract expired on 30th June, 1946, and sheepskins have since been marketed mostly at open auction.

(ii) *Sheep and Lamb Pelts.* Details of the marketing control of sheep and lamb pelts were given in Official Year Book No. 38, page 930. Pelts have since reverted to open marketing without export restrictions.

(iii) *Hides and Leather.* A hide acquisition and marketing scheme operated from November, 1939, to August, 1954. The Australian Hide and Leather Industries Board, which administered the scheme, acquired all cattle hides and yearling and calf skins produced in Australia at set prices and allocated them to tanners at these prices. Further details of the war-time operations of the scheme will be found in Official Year Book No. 37, page 887, and Official Year Book No. 38, pages 930-1.

Pre-war, about 40 to 45 per cent. of Australian production of cattle hides and calf skins was exported but, with the development of the local tanning industry, the proportion is now in the vicinity of 30 per cent.

(iv) *Rabbit Skins.* A marketing control scheme for rabbit skins was introduced under the National Security (Rabbit Skins) Regulations on 10th June, 1940, and terminated in April, 1949. Details of the scheme will be found in Official Year Book, No. 38, page 931.

## § 8. Tallow.

1. *Consumption of Tallow in Factories.*—Details of consumption are collected from the principal factories using tallow. Consumption of inedible tallow in these factories (soap and candle, chemical and woollscouring works) for the five years 1956-57 to 1960-61 was as follows:—1956-57, 1,207,578 cwt.; 1957-58, 1,280,984 cwt.; 1958-59, 1,216,668 cwt.; 1959-60, 1,277,542 cwt.; 1960-61, 1,161,504 cwt. These figures are, however, deficient to the extent that no allowance has been made for small unrecorded amounts used in other types of establishments. Details of edible tallow consumed in factories are not available.

2. *Exports of Tallow.*—Particulars of exports of edible and inedible tallow are shown in the following table for the five years 1956-57 to 1960-61.

TALLOW: EXPORTS, AUSTRALIA.  
(cwt.)

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Edible .. .. .	120,194	116,986	74,053	118,848	50,436
Inedible .. .. .	936,951	878,060	1,022,844	1,533,734	968,535
<b>Total .. .. .</b>	<b>1,057,145</b>	<b>995,046</b>	<b>1,096,897</b>	<b>1,652,582</b>	<b>1,018,971</b>

3. *Marketing of Tallow.*—Reference is made in Official Year Book, No. 47, page 976, to the now inoperative contracts relating to the sale of tallow to the United Kingdom.

## § 9. Exports of Principal Pastoral Products of Australia.

The quantities and values of the principal pastoral products of Australia exported for the years 1958-59 to 1960-61 were as follows.

## EXPORTS OF PASTORAL PRODUCTS: AUSTRALIA.

Product.	Unit of Quantity.	Quantity.			Value (£'000.)

(a) Includes chilled beef.

## CHAPTER XXIV.

## FARMYARD, DAIRY AND BEE PRODUCTS.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A f.o.b. port of shipment, except where otherwise indicated.

For further detail on subjects dealt with in this chapter, reference should be made to the annual printed bulletins *Primary Industries, Part I.—Rural Industries, Part II.—Non-rural Industries and Value of Production*, and *Secondary Industries* (butter, cheese, etc., factories) issued by this Bureau. The following mimeograph publications also contain considerable detail on the particular subjects dealt with, and are issued as soon as possible after the information has been compiled:—*The Dairying Industry* (monthly and half-yearly), *Manufacturing Industries No. 21.—Butter, Cheese and Condensed, Concentrated, etc., Milk* (annual), *Livestock Numbers* (annual), *Bee-farming* (annual), *Milking Machines on Rural Holdings* (annual), and *Value of Production and Indexes of Price and Quantum of Farm Production* (annual). The mimeograph annual *Report on Food Production and the Apparent Consumption of Foodstuffs in Australia* contains information on the production and utilization of farmyard, etc., products. A series of bulletins *Classification of Rural Holdings by Size and Type of Holding, 1959–60*, is being prepared. These will show particulars of rural holdings classified according to size, nature and area of crops and numbers of livestock, and also according to main type of activity. Current information on commodities produced is obtainable in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics* and the *Monthly Bulletin of Production Statistics*.

## § 1. Introduction.

1. **General.**—The introduction of cattle into Australia and the early history of the dairying industry are referred to in some detail in earlier issues of this Year Book. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the wider application of scientific methods in the treatment of animals and pastures and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the loss during cold storage even for as long as two years is insignificant.

2. **Mixed Farming.**—Apart from specialized dairy farms, dairying is carried on fairly extensively on mixed farms. Originally, dairying on mixed farms was conducted mainly in conjunction with agriculture, but in more recent times it has been carried on also in conjunction with various types of grazing. In non-coastal regions, it is generally carried on in association with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. The extent to which dairy cattle were run in conjunction with beef cattle, sheep, and pigs in 1959–60 will be shown in the relevant tables published in a series of bulletins *Classification of Rural Holdings by Size and Type of Holding, 1959–60*.

3. **Employment.**—The numbers of persons who described themselves at the population census as being engaged in dairy farming at the Censuses of 30th June, 1947 and 1954, were shown in previous issues of this Year Book. Similar details from the Census of 30th June, 1961, are not yet available.

4. **Growth of the Dairying Industry.**—The following table gives some indication of the growth of the dairying industry since 1916–17.

## DAIRYING INDUSTRY: AUSTRALIA.

Period.	Number of Dairy Cows at 31st March.			Production of—			Milking Machines (No. of Stands). <sup>(a)</sup>
	In Milk.	Dry.	Total.	Whole Milk for all Purposes.  Million Gallons.	Butter (Factory and Farm).  Tons.	Cheese (Factory and Farm).  Tons.	
Average for three years ended—							
1918-19..	1,281,820	569,611	1,851,431	565.1	84,043	11,403	(b)
1928-29..	1,689,887	626,180	2,316,067	791.2	122,750	13,159	(b)
1938-39..	2,552,092	658,232	3,210,324	1,142.0	190,827	24,848	(b)
1948-49..	2,278,043	855,223	3,133,266	1,153.2	157,064	42,343	135,137
1958-59..	2,333,147	1,032,243	3,365,390	1,330.9	187,393	41,567	213,555
Year—							
1956-57..	2,354,301	1,097,149	3,451,450	1,357.9	192,854	45,216	210,664
1957-58..	2,281,571	1,080,003	3,361,574	1,264.4	175,757	35,976	213,716
1958-59..	2,363,569	919,578	3,283,147	1,370.2	193,568	43,509	216,287
1959-60..		3,243,472		1,406.5	197,552	44,517	221,260
1960-61..		3,162,449		1,339.3	181,653	46,947	223,815

(a) "Number of Stands" indicates the number of cows that can be milked simultaneously—i.e., the cow capacity of installed milking machines. (b) Not available.

5. **Official Supervision of the Dairying Industry.**—Dairy experts of the various State Agricultural Departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce, with the result that a high standard of cleanliness prevails.

The export trade is regulated by the terms of the Commonwealth Customs Act 1901-1954 and the Commonwealth Commerce (Trade Descriptions) Act 1905-1950, and regulations thereunder. This legislation requires that the true trade description, etc., be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

6. **Australian Agricultural Council.**—General information on the constitution and functions of the Australian Agricultural Council is given on page 896 of Chapter XXII.—Agricultural Production.

## § 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantum of Production.

1. **Gross Value of Farmyard, Dairy and Bee Production, 1956-57 to 1960-61.**—The following table shows the gross value of recorded farmyard, dairy and bee production at the principal markets in Australia.

### GROSS VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA. (£'000.)

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
Whole Milk used for—					
Butter <sup>(a)</sup> .. .. .	66,991	61,252	66,328	72,615	64,601
Cheese <sup>(a)</sup> .. .. .	9,398	7,399	10,120	10,124	10,658
Preserved Milk Products .. .. .	8,901	9,540	9,230	10,340	9,376
Other purposes .. .. .	55,393	58,179	59,887	61,768	64,098
Subsidy Paid on Whole Milk for Butter and Cheese .. .. .	13,500	13,500	13,500	13,500	13,500
<i>Total Whole Milk (including   Subsidy) .. .. .</i>	<i>154,183</i>	<i>149,870</i>	<i>159,065</i>	<i>168,347</i>	<i>162,233</i>

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values of base years (1936-37 to 1938-39).

## § 3. Dairy Cattle and Dairy Products.

1. **Dairy Herds.**—Lack of uniformity in the schedules used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a series of years. From 1,326,524 in 1902, their numbers rose gradually, with frequent reversals in trend, to a peak of 3,292,048 in 1936. This level was not reached again until 1956, when the number recorded was 3,403,507, and 1957, when the record level of 3,451,450 was attained. In the last four years, however, numbers have declined gradually to 3,153,875 in 1961.

There is a preponderance of dairy cattle in Victoria and Tasmania, while in New South Wales and South Australia the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, other cattle predominate, the main use of cattle in these areas being for the production of beef. The numbers of dairy cattle in Australia classified according to age and sex are shown in the following tables for the average of the three-year periods ended March, 1939, 1949 and 1959, and for the years 1957 to 1961.

## NUMBER OF DAIRY CATTLE: AUSTRALIA.

Period.	Dairy Cows (in milk and dry).	Dairy Heifers 1 year and over.	Dairy Calves under 1 year.	Dairy Bulls.	Total Dairy Cattle.

(a) Includes 5,404,000 gallons of milk, the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (b) Includes 1,277,000 gallons of milk, the produce of Victoria, sent as cream to New South Wales. (c) Includes 448,000 gallons of milk, the produce of Queensland, sent as cream to New South Wales. (d) Includes butter made from cream, the produce of Victoria and Queensland. (e) Includes butter made from cream, the produce of New South Wales. (f) Includes cheese made in establishments not classified as factories.

4. Whole Milk.—(i) *Production and Utilization.* During the three years ended 1938–39, approximately 78 per cent. of Australia's milk supply was used for making butter, 5 per cent. for cheese manufacture, 3 per cent. for preserved milk products and 14 per cent. for fluid consumption and other purposes. There has since been a considerable decline in the proportion of milk used for butter-making, with a corresponding increase in the quantity used for other purposes. For the average of the three years ended 1958–59, 65 per cent. of the total milk supply was used for butter, 7 per cent. for cheese, 6 per cent. for preserved milk products and 22 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each of the years 1956–57 to 1960–61 compared with the averages for the three year periods ended 1938–39, 1948–49 and 1958–59.

#### PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA.

(\*000 Gallons.)

Period.	Total Production.	Quantity used for—			
		Butter (Factory and Farm).	Cheese (Factory and Farm).	Preserved Milk Products.	Other purposes. (a)
Average for three years ended—					
1938–39 .. ..	1,142,006	891,742	54,934	33,226	162,104
1948–49 .. ..	1,153,248	738,377	91,642	78,739	244,490

(a) Principally fluid milk for domestic purposes.

In the following table, particulars of the production of whole milk in the several States are shown for the years 1956–57 to 1960–61 compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59. Victoria is the principal milk-producing State, and in 1960–61 the output from that State, 596.7 million gallons, represented 45 per cent. of total production. Output from New South Wales in 1960–61 was 319.4 million gallons, or 24 per cent. of the total, and that of Queensland 212.7 million gallons (16 per cent.). Production in the remaining States accounted for 15 per cent. of the total Australian output.

#### TOTAL PRODUCTION OF WHOLE MILK.

(\*000 Gallons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

(ii) *Production per Cow.* The quantity of milk produced by a dairy cow can be as high as 1,000 gallons a year, varying greatly with breed, locality and season. For the whole of Australia, for all dairy cows and for all seasons prior to 1916, production averaged considerably less than 300 gallons per annum. In later years, not only has there been an improvement in the quality of the cattle, but the application of scientific methods has been continually extended, and the 300-gallon average has been exceeded in each year since 1924. More than 400 gallons per cow has been obtained in five of the last seven years. In 1960-61, the average yield was 418 gallons. The annual average yields per cow shown in the following table are obtained by dividing the total production of whole milk for the year ended June by the mean of the number of dairy cows (in milk and dry) at 31st March of that year and of the preceding year. They are, in effect, based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year, but it may be accepted as sufficiently reliable to show the general trend.

## AVERAGE MILK PRODUCTION PER DAIRY COW.

(Gallons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

1960-61 .. ..	355	548	263	574	468	505	447	418

5. *Factory System.*—(i) *General.* Cream separation and butter-making are often carried on together under the co-operative system. The establishment of large central butter factories, either on the co-operative system or on an independent basis, has resulted in a considerable reduction in the cost of manufacture. The product is also of a more uniform quality, and whereas formerly the average quantity of milk used per pound of hand-made butter was about three gallons, factory butter requires only about two gallons. In addition, subsidy payments by the Commonwealth Government are made only on factory-produced butter. As a result, the production of farm-made butter has declined substantially, and in 1960-61 represented only about 1.3 per cent. of all butter made. A similar position exists in the cheese-making industry where a negligible amount is now made on farms.

(ii) *Number of Factories.* In 1960-61, factories in Australia engaged in the processing of milk into butter or cheese or the various preserved milk products numbered 361 and were distributed among the States as follows:—New South Wales, 72; Victoria, 130; Queensland, 74; South Australia, 44; Western Australia, 19; and Tasmania, 22. More details regarding numbers of factories, output, etc., are given in Chapter VI.—Manufacturing Industry.

6. *Butter Production.*—There was a steady increase in the annual output of butter for many years prior to the 1939-45 War. Following the record output of 211,987 tons in 1939-40, the general trend of butter production declined until 1946-47, when 143,308 tons were produced. Output increased again in subsequent years and in 1955-56 was 208,911 tons, the highest figure recorded in post-war years. Production in 1960-61, 181,653 tons, was 15,899 tons (8.0 per cent.) less than that produced in 1959-60, and 27,258 tons (13.0 per cent.) less than production in 1955-56. The foregoing figures include butter produced on farms, which has shown a decline from 8,714 tons in 1938-39 to 2,445 tons in 1960-61.

The following table shows production of butter in factories and on farms in each State for the years 1956-57 to 1960-61 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## BUTTER PRODUCTION IN FACTORIES AND ON FARMS.

(Tons.)

(a) Includes small quantities produced in the A. C. T. There is no recorded production in the Northern Territory.

7. Cheese Production.—Prior to 1937-38, the annual production of cheese in factories and on farms had not reached 20,000 tons. From then on, it increased, but with frequent reversals of trend, to an output of 49,057 tons in 1953-54. Production has fluctuated in succeeding years between 35,000 and 47,000 tons, 46,947 tons being recorded in 1960-61.

The following table shows production of cheese in factories and on farms in each State in the years 1956-57 to 1960-61 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

(a) Northern Territory and Australian Capital Territory: nil.

8. **Production of Preserved Milk Products.**—The manufacture of these products expanded greatly after 1938–39 to meet the needs of the Services during the 1939–45 War and for export purposes since the war. The average output of condensed, concentrated and evaporated full cream milk (sweetened and unsweetened) for the three years ended 1958–59 was three and a half times as high as the average for the three years ended 1938–39, while that of powdered milk (full cream and skim) was more than five times as high. Over the same period, the quantity of whole milk used in the manufacture of the products shown below increased from 33.2 million gallons to 79.7 million gallons or by 140 per cent. These products are manufactured mainly in Victoria, which produced 63 per cent. of the total (in terms of whole milk equivalent) in 1960–61. New South Wales accounted for 21 per cent. and the remaining States for 16 per cent.

The following table shows details of the output of preserved milk products during the years 1956–57 to 1960–61, compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59.

(a) Includes mixtures of full cream and skim milk and mixtures of full cream, skim and buttermilk.

(b) Includes malted milk and milk sugar (lactose). (c) Includes Coffee and Milk. (d) Not available separately—included in condensed, concentrated and evaporated full cream milk. (e) Not available separately—included in powdered full cream milk. (f) Excludes powdered whey.

9. **Local Consumption of Butter and Cheese.**—In the last year of the war-time and post-war rationing of butter, 1949–50, consumption was 25.3 lb. per head per annum compared with an average of 32.9 lb. during the years 1936–37 to 1938–39. Following the cessation of rationing, consumption rose sharply to 31.2 lb. in 1951–52, and until 1955–56, fluctuated between 29 lb. and 31 lb. per head per annum. It has since declined to 25.1 lb. per head in 1960–61.

Cheese consumption rose considerably during the period of butter rationing, from 4.4 lb. per head pre-war to 6.3 lb. per head in 1947–48. Consumption has fluctuated considerably since then between a minimum of 5.2 lb. in 1948–49 and a maximum of 6.8 lb. in 1957–58.

The following table shows details of the production and disposal of butter and cheese for each of the years 1956–57 to 1960–61 compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59.

(a) Includes allowance for movements in stocks other than those held in main cold stores.  
 (b) Figures for butter include ghee expressed as butter as well as butter shipped as ships' stores. Figures for cheese include ship's stores.

10. Butter and Cheese Equalization Schemes.—During the period from January, 1926, to April, 1934, a voluntary scheme for equalizing returns to all participating factories from their sales of butter, known as the "Paterson Plan" was in operation. This had the effect of stabilizing the price of butter in Australia. Details of this scheme may be found on page 1028 of Official Year Book No. 38 and in earlier issues.

On 1st May, 1934, the "Paterson Plan" was superseded by a compulsory price equalization plan, details of which are shown on page 1029 of Official Year Book No. 38 and earlier issues. This compulsory plan was invalidated in 1936 by the decision of the Privy Council which declared in the James (Dried Fruits) Case that the Commonwealth had no power under the Constitution to regulate trade between the States.

Since 1936, the butter price equalization scheme has operated by voluntary action based on agreements between manufacturers and the Commonwealth Dairy Produce Equalization Committee Ltd. The Committee, which comprises members of the State Dairy Products Boards and other persons representing the industry, enters into agreements with manufacturers to secure to them equal rates from sales of butter and cheese, and for this purpose may fix basic prices at which these products sold in Australia or abroad are to be taken into account. The effect is that local and export trade are distributed in equitable proportions among the manufacturers by means of quotas. The Committee fixes basic prices and equalizes returns to factories through an Equalization Fund. The States originally participating in the scheme were New South Wales, Victoria, Queensland and Tasmania in respect of both butter and

cheese, and South Australia in respect of cheese. South Australia and Western Australia entered the scheme in respect of butter on 1st April, 1946, and Western Australia extended its participation to include cheese in January, 1947.

Details are given in para. 15 on page 1002 of the returns realized on local and oversea sales and of the average equalization rate for the years ended June, 1957 to 1961. Details are also given in para. 12 of the wholesale prices of butter and cheese for home consumption as determined by the Commonwealth Dairy Produce Equalization Committee Ltd.

11. **Casein Equalization Scheme.**—A similar equalization scheme to that for butter and cheese has been operated by the Commonwealth Dairy Produce Equalization Committee Ltd. for casein since 1952. Average realizations under the scheme were 184s. 6 d. in 1956–57, 185s. 3 d. in 1957–58, 171s. 7.9d. in 1958–59 and 175s. 7.5d. in 1959–60. The interim equalization value for 1960–61 has been fixed at 172s. 0d. per cwt.

12. **Wholesale Price of Butter and Cheese in Australia.**—Details of prices operating in each of the States since 1st July, 1952, are shown in the following table.

(a) Maximum prices as determined by the Commonwealth Dairy Produce Equalization Committee Ltd., for choicest grade bulk butter and cheese.

13. **Marketing of Dairy Products.**—(i) *The Dairy Produce Export Control Act 1924–1958.* Introduced at the request of the dairying industry, this Act was passed by the Commonwealth Parliament with the object of organizing the oversea marketing of Australian dairy produce. A Dairy Produce Control Board was appointed and was in existence from 1924 to 1935. The Board regulated shipments to ensure regularity of supply in the London market, controlled forward selling, obtained reductions in oversea freights and insurance rates, and participated in an advertising campaign in the United Kingdom.

Prior to the appointment of the Dairy Produce Control Board, a voluntary body—the Australian Dairy Council—was established to advise and make recommendations to the Governments on problems connected with the production, manufacture and quality of dairy produce, pasture improvements and diseases of dairy cattle.

Following a recommendation by the Australian Agricultural Council, the functions of these bodies were combined by an amending Act of 1935 under the Australian Dairy Produce Board and provision was made for the allocation of money from the Board's funds for research and investigation into pastures, diseases of dairy cattle and the quality of butter. The functions of the Board were later extended to enable it to advise the Government in connexion with the transport of dairy produce, the securing of new markets, the expansion of existing markets and other matters.

The Australian Dairy Produce Board was re-constituted in 1947 by an amendment to the Dairy Produce Export Control Act, its membership being reduced from seventeen to twelve. The functions of the Board were extended to enable it to purchase and sell, on behalf of the Commonwealth, dairy produce intended for export, and to control all matters concerning the handling, storage, protection, treatment, transfer and shipment of the produce so purchased or sold. In 1953, the direct dairy farmer representation on the Board was increased from two to three members, thus raising the total membership from twelve to thirteen.

In April, 1954, the Act was further amended to prepare for the implementation of an export marketing plan to follow the expiration of the United Kingdom-Australia Butter and Cheese Contract. The amendment enabled the Board to purchase dairy produce intended for export to the United Kingdom and to sell such produce on behalf of the dairying industry in lieu of its previous function of selling on behalf of the Commonwealth Government. In the interests of the stability of the industry, the Act provides that the Board may be the sole Australian exporter of butter and cheese to the United Kingdom.

The Dairy Produce Export Control Act was again amended in 1958, principally to increase the membership of the Board by one to a total of 14 members. The additional member, designated the Administrative Member, is charged with the task of executing the Research and Sales Promotion campaign.

(ii) *The Dairy Produce Research and Sales Promotion Act 1958.* This Act provides for a levy on all butter and cheese produced in Australia to provide funds for research and for sales promotion on the local market. Two-thirds of the levy is paid into the Sales Promotion Fund and one third into the Research Trust Account. As is the case in other industries, expenditure on research is supported by the Commonwealth Government on a £1 for £1 basis of actual expenditure. Research is carried on in the Universities, C.S.I.R.O. and by other competent institutions. Both schemes are administered by the Australian Dairy Produce Board.

(iii) *The Dairy Produce Export Charges Act 1924-1937.* This Act provides for the imposition of a levy on all butter and cheese exported from Australia to cover the administrative expenses of the Board and for advertising and other purposes. The rate of the levy is fixed by regulation.

**14. Commonwealth Subsidies and Stabilization Plans.—(i) *Butter, Cheese and Processed Milk Products.*** Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter and cheese. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Ltd. through factories to milk producers by payments on butter and cheese manufactured. Subsidy on milk supplied for the manufacture of processed milk products was also payable from 1942 until 30th June, 1948, and again from 1st July, 1949, to 30th June, 1952.

The first of the two five-year stabilization plans came into operation on 1st July, 1952. Under this plan, the Commonwealth Government, with the approval of the States, determined the ex-factory prices of butter and cheese, guaranteed to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within the Commonwealth, plus an additional 20 per cent. (if produced), and agreed to make available an amount by way of subsidy to lift the return on that part of output covered by the guarantee to the guaranteed level. The second five-year stabilization plan, which came into operation on 1st July, 1957, continued all the important features of the first plan. A new feature, however, was that any subsidy made available under the scheme should be on the basis of a fixed amount in any dairying year.

The actual amount of subsidy paid by the Commonwealth Government was in excess of its original commitment in 1955-56, when, to assist in offsetting a fall in export returns, the Government agreed to increase subsidy payments to a fixed figure of £14,500,000. In each of the years 1956-57 to 1961-62, a fixed amount of £13,500,000 was provided.

In 1958, following a period of low incomes due to drought and low export returns, the Government decided to give additional support to the dairy industry. This support took the form of underwriting a final equalization payment to factories on total production of butter and cheese for the 1958-59 season. The amount underwritten for butter was 40d. per lb. commercial butter basis. The Government also decided that it would consider applying the same principle of underwriting a final equalized return at levels determined by it each year, after an examination of all relevant factors for the remaining period of the 1957-62 five-year stabilization plan. For the 1959-60, 1960-61 and 1961-62 seasons, the underwriting of a final minimum return of 40d. per lb. commercial butter was again determined. The principal value underlying this guarantee is that it enables the Commonwealth Dairy Produce Equalization Committee Ltd. to make a higher initial payment to factories than would otherwise be possible without risk of over-payment.

Following representations by industry organizations, the Commonwealth Government established the Joint Dairy Industry Advisory Committee in November, 1946, comprising a chairman nominated by the Government, four representatives of Commonwealth Government Departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947, to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members, was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in March, 1954, to advise the Government on the guaranteed return for each year of the remaining three-year period of the Stabilization Plan. For the current five-year plan, the Committee has been re-appointed to determine the cost of efficient production of butter-fat only.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948, for the purpose of stabilizing returns from exports. During 1951-52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. From 1st July, 1952, to 30th June, 1957, it was available to the industry to be used, in whatever manner it considered desirable, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. The Act was amended in 1957 to enable the Board to use the fund for such other purposes as are approved by the Minister for Primary Industry. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1961, totalled approximately £1,823,000.

(ii) *Whole Milk*. In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44 to 1948-49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, page 1031.

15. *Average Returns from Butter and Cheese Sold and Assessed Farm Production Costs.*—The first of the two following tables shows, in respect of butter and cheese, particulars of the rates realized on local, interstate and oversea sales and the average equalization and subsidy rates in operation for the years ended June, 1957 to 1961. The second table shows the distribution between factory and farm of the overall return to manufacturers for butter. The assessed farm production cost for commercial butter is also shown for comparison with the average returns to dairy farmers.

1961.. ..	50.210	5.339	44.871	54.19

(a) Up to 1956-57, the figures shown are the guaranteed returns as recommended by the Dairy Industry Investigation Committee and accepted by the Commonwealth Government; from 1957-58, they represent the cost of production as found by the Dairy Industry Investigation Committee.

16. **Dairy Industry Extension Grant.**—An annual grant of £250,000, to be expended by State Governments for the purpose of promoting improved farming practices in the dairying industry, was first made by the Commonwealth Government for the five years from 1st July, 1948. This assistance was continued by the Commonwealth Government for a further period of five years from 1st July, 1953, again by means of annual grants of £250,000, and similarly for a further five years from 1st July, 1958, at the same rate.

17. Dairy Industry Research and Sales Promotion.—At the request of the Australian Dairy Industry Council, legislation was enacted in 1958 to provide for a sales promotion campaign for butter and cheese in Australia and also for research into industry problems. The legislation provides for a statutory levy (the Dairy Produce Levy) to be imposed on all butter and cheese manufactured in Australia. The maximum rates of levy are  $\frac{1}{16}$ d. per lb. on butter and  $\frac{1}{8}$ d. per lb. on cheese, but the initial rates which commenced in November, 1958, were  $\frac{1}{8}$ d. per lb. on butter and  $\frac{1}{16}$ d. per lb. on cheese. Until November, 1959, the proceeds from the levy were divided equally between research and sales promotion, but after that date one-third was allocated to research and two-thirds to sales promotion. The rates of levy operative from November, 1959, were increased to the maximum provided under the Act, the increase being utilized solely for the purposes of intensifying the sales promotion campaign.

The Commonwealth Government agreed to contribute one half of the costs incurred on approved projects included in the programme of research, with a maximum contribution of £1 for £1 against funds raised by way of levy and allocated to research. The sales promotion programme is financed solely by the levy. The following table lists the amounts of levies collected, and the amounts allocated to research and sales promotion, during the three years 1958–59 to 1960–61.

**DAIRY PRODUCE LEVY: AMOUNTS COLLECTED AND ALLOCATED.**  
(£.)

Particulars.	1958–59.	1959–60.	1960–61.
Allocated to—

Sales promotion .. .. .	75,447	206,918	233,181
<b>Total Collected(a) .. .. .</b>	<b>150,894</b>	<b>333,437</b>	<b>349,772</b>

(a) Excludes amounts contributed by the Commonwealth Government.

The scheme is administered by the Australian Dairy Produce Board, which, in respect of research, is advised by a statutory committee—the Dairy Produce Research Committee.

18. Oversea Trade in Butter, Cheese and Milk.—(i) *General.* The production of butter and cheese in Australia is considerably in excess of local requirements and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon seasonal conditions. Exports of butter averaged 69,700 tons during the three years ended 1958–59, compared with 75,900 tons for the three years ended 1948–49 and 90,000 tons for the three years ended 1938–39. Exports of cheese for the same periods were 13,800 tons, 24,300 tons and 11,500 tons respectively.

During 1938–39, 96,900 tons of butter (95 per cent. of all butter exported) were shipped to the United Kingdom. With the decline in total exports, there has been a substantial reduction in the amount shipped to the United Kingdom. The quantity shipped in 1960–61 was 50,795 tons, representing 83 per cent. of total butter exports.

In 1938–39, exports of cheese totalled 16,000 tons, of which 15,500 tons or 97 per cent. were exported to the United Kingdom. Of the total of 18,000 tons exported in 1960–61, 13,000 tons or 72 per cent. were shipped to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and preserved milk products are shown on page 1011.

(ii) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination of officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as

follows:—Flavour and aroma, 50 points; texture, 30 points; and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality; at 90 to 92 points, first quality; at 86 to 89 points, second quality; and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries, 1959–60, Bulletin No. 54.*

**BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA.**  
(Per Cent.)

#### § 4. Pigs and Pig Products.

1. **Pigs.**—The number of pigs in Australia first reached a million in 1905, while the record level of 1,797,340 was attained in 1941. At 31st March, 1961, 1,615,303 pigs were recorded, representing a 13 per cent. increase on numbers a year earlier. The number of pigs in each State and Territory for each of the five years ended 1957 to 1961 compared with the averages for the three-year periods ended March, 1939, 1949 and 1959, are given in the following table.

#### NUMBER OF PIGS.

Period.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
<b>Average for three years ended—</b>									
1938–39 ..	374,963	285,465	299,707	74,329	74,657	42,802	404	481	1,152,808
1948–49 ..	366,267	261,922	375,191	101,934	91,862	43,184	424	554	1,241,338
1958–59 ..	377,510	263,363	405,702	99,632	135,404	61,389	2,543	160	1,345,703
<b>Year—</b>									
1956–57 ..	386,789	258,336	394,518	92,180	139,982	52,358	755	139	1,325,057

1958–59 ..	348,730	253,125	399,875	98,374	115,446	69,215	3,802	175	1,288,742
1959–60 ..	398,959	284,505	429,034	108,696	130,933	67,118	4,400	151	1,423,796
1960–61 ..	455,345	318,523	448,279	143,645	175,675	70,882	2,845	109	1,615,303

A long-term comparison of pig numbers is given in Chapter XXIII.—Pastoral Production. Maps showing the distribution of pigs in Australia at 31st March, 1955 and 1948, appear on page 912 of Official Year Book No. 43 and on page 908 of Official Year Book No. 39, respectively.

2. **Size of Pig Herds.**—For information on the size of pig herds see references to bulletins *Classification of Rural Holdings by Size and Type of Holding, 1959–60*, in § 1, para. 2, page 989, and in the note at the beginning of this chapter.

3. **Pigs Slaughtered.**—The number of pigs slaughtered during each of the years 1956-57 to 1960-61, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, is shown in the following table.

## PIGS SLAUGHTERED.

('000.)

Period.	Slaughtering Passed for Human Consumption.							Total Slaughtering (including Boiled Down).
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust. (a)

(a) Excludes trimmings from baconer carcasses.

(ii) *Consumption.* As in the case of most other meats, pork was subject to rationing during the 1939-45 War and immediate post-war years, and consumption was at a much lower level than pre-war. In 1954-55, consumption of pigmeat (as pork or smallgoods) reached 10.2 lb., only slightly below the immediate pre-war average, but after falling to 8.7 lb. per head in 1956-57, has since risen to 11.5 lb. per head in 1960-61. In the following table, details of the production and disposal of pigmeat are shown for the years 1956-57 to 1960-61 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## PRODUCTION AND DISPOSAL OF PIGMEAT (CARCASS WEIGHT): AUSTRALIA.

Period.	Change in Stocks.	Production.	Exports.	Curing and Canning.	Apparent Consumption (as Pork or Smallgoods) in Australia.	
					Total.	Per Head per annum.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.

1960-61 .. ..	+0.7	107.5	0.4	52.9	53.5	11.5

5. Bacon and Ham.—(i) *Production.* As in the case of pork, the increased demand for bacon and ham during the 1939-45 War stimulated production to a level not previously attained. Production reached its peak in 1944-45 when 56,246 tons of bacon and ham were cured. This was followed by a decline in output in each succeeding year to 36,628 tons in 1951-52. Production has been maintained at about this level in subsequent years, 36,895 tons being recorded in 1960-61. Details of production are shown by States in the following table for each year 1956-57 to 1960-61, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## PRODUCTION OF BACON AND HAM (CURED CARCASS WEIGHT).(a)

(Tons.)

Period.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Average for three years ended—							
1938-39 .. ..	10,396	7,556	8,759	2,940	1,838	1,022	32,511
1948-49 .. ..	14,436	10,787	9,846	4,580	4,209	1,196	45,054
1958-59 .. ..	11,132	8,299	10,294	3,275	2,987	902	36,889

1960-61 .. ..	11,328	9,192	9,442	3,141	3,169	829	37,101

(a) Pressed and canned bacon and ham have been converted to cured carcass weight for periods subsequent to 1948-49.

(ii) *Consumption.* Consumption per head declined in the early stages of the 1939-45 War from the pre-war average of 10.2 lb. per annum, but subsequently increased to 12.7 lb. in 1946-47. It has declined to about 7 lb. per head in recent years. Details of production and disposal of bacon and ham for the years 1956-57 to 1960-61, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

**PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED CARCASS WEIGHT)(a): AUSTRALIA.**

Period.	Change in Stocks.	Production.	Exports.	Canning.	Apparent Consumption in Australia.

1960-61 .. ..	+0.1	37.1	0.3	5.3	31.4	6.8

(a) Pressed and canned bacon and ham have been converted to cured carcass weight.

6. Oversea Trade in Pigs and Pig Products.—Total quantities and values of exports of Australian origin of pigs and pig products (bacon and ham, lard and frozen pork) for the years 1958-59 to 1960-61 are shown on page 1011.

### § 5. Poultry-farming.

1. General.—Poultry-farming has been carried on in Australia for many years, and the State Departments of Agriculture have encouraged its development by appointing experts to advise on the care and management of poultry and by conducting egg-laying competitions. Originally the industry was conducted in conjunction with other branches of rural activity, mainly dairying, but it is now a specialized and distinct industry and it is from this source that the bulk of the commercial production is obtained. Practically all farms keep poultry for the purpose of supplying their own domestic requirements and in many cases some supplies from this source are also marketed. In addition, many private homes keep small numbers of fowls in back-yard runs to satisfy domestic needs or to help towards this object. Because of the incompleteness of data available on poultry throughout Australia, details of poultry numbers are not published.

2. Recorded Production and Disposal of Eggs.—(i) *Shell Eggs*. Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Marketing Board of New South Wales and the Australian Egg Board. Details of production in the respective States as recorded by these authorities for the years 1956-57 to 1960-61 are shown in the following table.

**SHELL EGGS: PRODUCTION(a) RECORDED BY EGG BOARDS.**  
(<sup>'000 Dozen.</sup>)

State.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
New South Wales .. ..	52,334	49,168	45,221	53,495	62,156
Victoria .. ..	24,874	25,956	23,447	26,521	28,215
Queensland .. ..	8,848	7,894	8,692	10,007	10,810
South Australia .. ..	11,375	11,219	9,692	10,041	10,491

Tasmania .. ..	912	(b)	(b)	(b)	(b)
<b>Total(c)</b> .. ..	<b>106,932</b>	<b>102,839</b>	<b>94,629</b>	<b>107,540</b>	<b>119,005</b>

(a) Receipts from consignors and sales by producer agents. (b) Not available. (c) Excludes Tasmania for years subsequent to 1956-57.

(ii) *Egg Pulp and Egg Powder.* Prior to the 1939-45 War, production of egg pulp was about 7 million lb. per annum. This was used almost entirely for the manufacture of cakes, pastry and biscuits, only negligible quantities being exported. Production was expanded greatly during the war years to meet the requirements of the armed services and was increased further in post-war years to supply a large export market and also a substantially increased home consumption. During recent years, however, production has been at a somewhat lower level. The production of dried egg powder, established in Australia in 1942 as a war-time measure for export purposes, was continued for some time after the war, but has since declined to negligible proportions.

Particulars of the production of whole egg pulp as recorded by the Egg Marketing Board for the State of New South Wales and the Australian Egg Board for the other States are shown in the following table.

**LIQUID WHOLE EGG: PRODUCTION RECORDED BY EGG BOARDS.**  
(‘000 lb.)

State.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
New South Wales .. ..	18,755	13,198	9,808	17,791	21,446
Victoria .. ..	6,245	6,591	3,473	6,460	7,948
Queensland .. ..	3,302	1,658	2,011	2,767	3,716
South Australia .. ..	4,501	4,461	2,495	3,210	3,394
Western Australia .. ..	2,024	2,855	1,600	1,122	916
Tasmania .. ..	133	(a)	(a)	(a)	(a)
<b>Total(b) .. ..</b>	<b>34,960</b>	<b>28,763</b>	<b>19,387</b>	<b>31,350</b>	<b>37,420</b>

(a) Not available.

(b) Excludes Tasmania for years subsequent to 1956-57.

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1960-61 amounted to 3,888,000 lb. and 2,788,000 lb. respectively, compared with 1,268,000 lb. and 815,000 lb. respectively in the previous year. These figures exclude small quantities produced in Tasmania for which details are not available.

3. *Production and Consumption of Eggs.*—Because of the operations of producers in areas outside the control of the Egg Boards and the extent of “back-yard” poultry-keeping, for which no statistics are collected, figures relating to total egg production must be accepted with some reserve. The production shown in the following table, together with details of exports and consumption, is based upon the records of Egg Boards of production from areas under their control, plus estimates of production from uncontrolled areas and from “back-yard” poultry-keepers.

**ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL:**

1959-60 .. .. .	198	14	212	23.2
1960-61 .. .. .	185	15	200	(c) 25.0

(a) In terms of the number of shell eggs. (b) The average weight of an egg in Australia has been taken as 1.75 oz. for the years prior to 1960-61. From 1960-61 the average weight is taken as 2 oz.  
(c) Not comparable with earlier years: see footnote (b).

4. Marketing of Eggs.—(i) *Markets.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 and of the results of trading under free market conditions in the four years following appear in earlier issues of the Official Year Book.

The United Kingdom's importance as a market for Australian shell eggs declined to 28 per cent. of total exports of eggs in both 1958-59 and 1959-60, compared with 86 per cent. in 1952-53. However, a recovery was recorded in 1960-61 when the United Kingdom took 54 per cent. of Australian exports of shell eggs.

The United Kingdom remains virtually the only export market for egg pulp. Australian exports of pulp to this country were approximately 7,000 tons in 1959-60 and 11,000 tons in 1960-61.

The main outlets for Australian eggs in 1960-61, other than the United Kingdom, were the United States of America (456,000 dozen) and Saudi Arabia (315,000 dozen).

(ii) *Egg Export Control Act 1947.* Details of this Act were given in previous issues of the Official Year Book (see No. 47, p. 997).

5. Oversea Trade in Poultry Products.—(i) *Exports.* Total quantities and values of exports of Australian origin of poultry products (live poultry, frozen poultry, eggs in shell, egg pulp and powder) for the years 1958-59 to 1960-61, are shown on page 1011.

(ii) *Imports.* During 1960-61, approximately 2 million lb. of canned chicken, valued at £0.2 million, were imported from the United States of America.

## § 6. Bee-farming.

1. Production of Honey and Bees-wax.—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming. In recent years, there has been considerable growth in the number of itinerant apiarists operating on a large scale with mobile equipment. Some of these apiarists move as far afield as from Victoria to Queensland in an endeavour to provide a continuous supply of nectar from suitable flora for their bees. The returns of honey from productive hives during 1960-61 showed an average of 111 lb. per hive and the average quantity of wax was 1.5 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1960–61 are shown in the following table.

## BEEHIVES, HONEY AND BEES-WAX, 1960-61.

State or Territory.	Beehives.			Honey Produced.		Bees-wax Produced.	
	Pro- ductive.	Unpro- ductive.	Total.	Quantity.	Gross Value.	Quantity.	Gross Value.
	'000.	'000.	'000.	'000 lb.	£'000.	'000 lb.	£'000.
New South Wales ..	134	56	190	15,286	812	197	50
Victoria ..	77	28	105	8,390	525	105	26
Queensland ..	23	11	34	1,848	77	32	7
South Australia ..	47	19	66	4,442	169	59	12
Western Australia ..	37	10	47	5,311	151	71	14
Tasmania ..	5	2	7	441	35	5	2
Aust. Cap. Territory ..	1	(a)	1	83	3	1	(b)
Australia ..	324	126	450	35,801	1,772	470	111

(a) Less than 500.

(b) Less than £500.

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora, particularly the eucalypts, which varies greatly from year to year. Compared with pre-war, there has been a pronounced upward trend in the output of honey, and a record production of 53,200,000 lb. was obtained in 1948–49. The production in 1960–61 was 35,801,000 lb.

The table below shows the production of honey and bees-wax for periods from 1938–39 to 1960–61.

## HONEY AND BEES-WAX PRODUCTION.

('000 lb.)

1960–61 ..	197	105	32	59	71	5	470

(a) Includes Australian Capital Territory and Northern Territory.

2. Oversea Trade in Bee Products.—Prior to the 1939–45 War, the production of honey exceeded Australian requirements and a small quantity was available for export. In 1948–49, the record quantity of 32.1 million lb., was exported. Exports amounted to 13.7 million lb. in 1959–60 and 16.8 million lb. in 1960–61, about two thirds going to the United Kingdom and most of the remainder to the Federal Republic of Germany.

The quantity of bees-wax imported generally exceeded that exported up to 1945-46, but since 1946-47, with the exception of 1951-52, local production has been higher and exports have exceeded imports by substantial margins. In 1960-61, exports exceeded imports by about 200,000 lb.

Total quantities and values of exports of honey and bees-wax for the years 1958-59 to 1960-61 are shown in § 7 below.

### § 7. Exports of Australian Farmyard, Dairy and Bee Products.

The quantities and values of Australian farmyard, dairy and bee products exported during the years 1958-59 to 1960-61 are shown below.

#### EXPORTS OF FARMYARD, DAIRY AND BEE PRODUCTS : AUSTRALIA.

(a) Includes day-old chicks.

### § 8. Imports of Dairy and Farmyard Products into the United Kingdom.

(Source: Board of Trade Accounts relating to Trade and Navigation of the United Kingdom.)

NOTE.—Values of imports in this section are expressed in £ sterling c.i.f. at the landed point.

1. Butter.—Until 1950, Australia had regularly supplied between 20 and 30 per cent. of the butter imported into the United Kingdom. After 1950, when butter rationing was abolished in Australia, the quantity shipped was considerably lower, but in 1956 it again amounted to 1,515,000 cwt., or 21.4 per cent. of the total United Kingdom imports. Shipments fell away again in subsequent years. In 1961, Australia supplied 1,182,000 cwt. or 14.0 per cent. of the United Kingdom imports, New Zealand supplied 36.9 per cent. and Denmark 22.2 per cent.

In the following table, particulars of the quantity and value of butter imported into the United Kingdom are shown for the years 1959, 1960 and 1961 according to country of origin.

**BUTTER: IMPORTS INTO UNITED KINGDOM.**

Country from which Imported.	1959.		1960.		1961.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 cwt.	£'000.	'000 cwt.	£'000.	'000 cwt.	£'000.
New Zealand .. .. .	3,250	53,475	2,899	45,002	3,124	38,750
Australia .. .. .	1,282	20,206	1,163	18,167	1,182	14,308
Other Commonwealth Countries and Republic of Ireland ..	160	3,611	153	2,211	553	6,871
Denmark .. .. .	1,891	33,185	1,963	29,737	1,878	26,006
Netherlands .. .. .	270	5,109	347	5,078	316	4,281
Other Foreign Countries ..	1,161	18,726	1,580	22,037	1,411	16,153
<b>Total .. .. .</b>	<b>8,014</b>	<b>134,312</b>	<b>8,105</b>	<b>122,232</b>	<b>8,464</b>	<b>106,369</b>

2. Cheese.—The value of cheese imported into the United Kingdom in 1961 was £31,466,000. Of this, £17,931,000 was imported from New Zealand, £3,276,000 from Australia, £2,546,000 from Denmark, £1,095,000 from Canada and £1,689,000 from the Netherlands.

3. Bacon.—Of a total import in 1961 of bacon (excluding bacon in airtight containers), valued at £95,072,000, the value of that supplied by Denmark was £69,077,000, Poland, £10,447,000, the Republic of Ireland, £7,061,000 and the Netherlands, £3,660,000.

4. Pork.—The value of the United Kingdom imports of pork (excluding pork in airtight containers) was £4,166,000 in 1961. The Republic of Ireland (£687,000) and Denmark (£406,000) were the principal suppliers.

5. Eggs.—In 1961, the value of eggs imported into the United Kingdom was £10,592,000, comprising eggs in shell, £4,805,000, and liquid or frozen eggs, £5,787,000. Eggs in shell were supplied principally by Denmark and the Republic of South Africa.

6. Milk Products.—In 1961, the value of preserved milk imported into the United Kingdom was £6,069,000. Of this total, imports from New Zealand amounted to £2,320,000, the Netherlands, £1,099,000 and Australia, £168,000.

## CHAPTER XXV.

### FORESTRY.

NOTE.—For further details on subjects dealt with in this chapter *see* the annual bulletins *Primary Industries, Part II.—Non-Rural Industries and Value of Production and Secondary Industries* (sawmills, etc., operations).

#### § 1. Introduction.

1. **Source of Statistics.**—Statistics relating to forestry are, in general, provided by the various authorities concerned with forestry administration. In each State, suitable areas of Crown Land have been reserved for forestry purposes, either as State forests or other reserves, and the administration of these is the responsibility of the respective State Government forestry authorities. In addition, in some States, areas of forests on Crown Lands dedicated as National Parks and the like are administered by Government Departments other than the forestry authorities. There are timber resources on private land in each State, but details concerning these areas and production therefrom are not complete for all States. Forestry activities in the Northern Territory and the Australian Capital Territory are administered by the Commonwealth Government.

Particulars of forested areas contained in this chapter have been collected by the Statisticians of the several States, mainly from information provided by the State Forestry authorities. The Forestry and Timber Bureau of the Commonwealth has provided figures for the Northern Territory and the Australian Capital Territory and, in addition, has made available certain other data.

Statistics of timber and by-products have been compiled from the annual factory collections undertaken by the Statisticians in the several States. Figures of production of gums, resins and tanning barks have been provided by the State Forestry authorities.

Data of imports and exports of forest products and timber and timber products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the statistics of overseas trade.

The figures shown relate, in general, to financial years ending 30th June.

Forested areas shown in this chapter relate to areas administered by the State or Commonwealth authorities, or to those reserved by government legislation. They are not based on any inventory of forest resources using standard and uniform definitions throughout the Commonwealth. It should be noted, therefore, that the figures are not comparable between States owing to the lack of uniformity in the definition of a forest.

2. **Objects of Forestry.**—The main object of forestry authorities is to manage the forests of the country in a manner that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, provision of recreational facilities and aesthetic effects. Forestry also aims at improving existing forests and woodlands by properly controlled exploitation, by protection from such destructive agencies as fire and insect attack, and by inducing regeneration where it is desirable. The provision of a partial tree cover on denuded lands where this cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other land use, is a further aim of forestry.

## § 2. Forestry in Australia.

1. **General Account of Forests and Timbers.**—The area of land in Australia suitable for the production of commercial timber as the primary crop is very small in comparison with the size of the continent. It is concentrated mainly around the wetter coastal belts in the eastern highlands and includes the bulk of the land suitable for intensive development by agricultural or pastoral undertakings or other forms of closer settlement.

The trees which make up the forests of Australia are mainly evergreen hardwoods. The characteristic genus is *Eucalyptus*. There are over 600 different species of eucalypts, and with few exceptions the natural occurrence of all of them is restricted to Australia. The genus includes species such as the mountain ash (*Eucalyptus regnans*) of Victoria and Tasmania, the world's tallest growing hardwood, and the karri (*E. diversicolor*) of Western Australia, another forest giant. At the other end of the scale, there are many eucalypts which do not grow to tall trees, including the species collectively known as the "mallees". The mallees develop a number of small stems from an underground structure called the "mallee root". Less than 100 species of eucalypts are used for sawmilling and not more than 40 are exploited extensively. The main commercial eucalypts are listed in Official Year Book No. 39 and earlier issues.

A large number of other genera represented in the Australian forest flora also produce commercial hardwoods. Among the outstanding furniture, cabinet and veneer timbers are red cedar (*Cedrela toona* var. *australis*), Queensland maple (*Flindersia brayleyana*), Southern and Northern silky oak (*Grevillea robusta* and *Cardwellia sublimis*, respectively), Queensland walnut (*Endiandra palmerstoni*), blackwood (*Acacia melanoxyton*), rose mahogany (*Dysoxylum fraserianum*), etc. Turpentine (*Syncarpia laurifolia*) ranks with the world's best as a harbour piling timber. Coachwood (*Ceratopetalum apetalum*) came into prominence for rifle furniture and for aircraft plywood during the 1939–45 War.

The most important indigenous softwood resources of Australia were in the forests of hoop pine (*Araucaria cunninghamii*) of Queensland and New South Wales. The greater part of the original hoop pine forest has been exploited, but considerable areas have been replanted with this species in Queensland and, to a lesser extent, in New South Wales. There are considerable areas of the useful termite-resisting cypress pine (*Callitris* spp.) in the inland areas of Queensland and New South Wales, which have not been cleared for grazing. These cypress pine areas are gradually being brought under systematic management.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya pine (*Araucaria bidwilli*) and kauri (*Agathis* spp.) of Queensland, and huon pine (*Dacrydium franklinii*), celerytop pine (*Phyllocladus asplenifolius*) and King William pine (*Arthrotaxis selaginoides*) of Tasmania.

The lower quality forests of inland Australia yield such commercial commodities as sandalwood, tan-barks and essential oils. They also have an important function in providing fuel and rough timbers for the development of agricultural and pastoral holdings.

2. **Extent of Forests.**—According to data assembled for the Eighth British Commonwealth Forestry Conference held in Kenya in 1962, the total area of forest in Australia was estimated at 800,263 square miles, or about 27.2 per cent. of the total land area of the continent. The large apparent increase in forested land area, when compared with the previous (1955) land classification, is due to altered definitions which have resulted in the inclusion of approximately 625,000 square miles of land carrying only stunted tree growth. It has not been possible to show the distribution of the forested areas by States as this information is not available. Of the total forested area, it is estimated that approximately only 30,000 square miles consists of residual prime native forest. Further particulars are set out in the following table.

## CLASSIFICATION OF FOREST AREA(a): AUSTRALIA.

(Source.—Forestry and Timber Bureau.)

Forested Area.	Area in Square Miles.
LANDS.	
Accessible Forests—	
Productive Forests in Use—	
Coniferous (softwood) .. .. .	769
Non-coniferous (broadleaved) .. .. .	38,050
Mixed Woods .. .. .	8,806
Open Areas .. .. .	383
Total .. .. .	48,008
Productive Forests not in Use .. .. .	(b) 49,939
Unproductive Accessible Forests .. .. .	(c) 402,636
<i>Total Accessible Forests</i> .. .. .	(d) 500,583
Inaccessible Forests .. .. .	299,680
Total Forested Area .. .. .	800,263
OWNERSHIP OF ACCESSIBLE FORESTS.	
Publicly-owned Forests—	
State Forests .. .. .	36,772
Other Forests .. .. .	234,889
<i>Total</i> .. .. .	271,661
Privately-owned Forests .. .. .	227,402
Ownership not yet Determined .. .. .	1,520
Total Accessible Forests .. .. .	500,583

(a) Based on the 1960 classification of forests. (b) Includes approximately 39,062 square miles capable of producing fuelwood only. (c) This area carries only sparse, stunted trees. (d) Includes approximately 400,000 square miles of land carrying only stunted trees.

Further particulars of forested areas are set out in § 3, page 1017.

3. Persons Engaged.—Previous issues of this Year Book contained particulars collected in the Population Censuses of Australia of 30th June, 1947 and 1954, showing the numbers of persons whose "industry" was stated to be "forestry (excluding sawmilling)", together with the numbers engaged in all primary industries and the total work force. Corresponding information for the Census of 30th June, 1961, is not yet available.

Particulars of the number of persons employed by Forestry Departments and in Saw-mills are included in § 5, para. 2, page 1022.

4. Value of Production.—(i) *General.* Statistics of both the gross value (at principal markets) and local value (at place of production) of the forestry industry are available. Particulars of the value of materials used in the process of production are not available for all States; for this reason, values cannot be stated on a net basis, as has been done with most other industries.

In 1960–61, the local value of forestry production amounted to £52,057,000. The most important States were New South Wales, Victoria and Queensland with £15,300,000, £14,795,000 and £7,149,000 respectively.

(ii) *Gross and Local Values, 1960–61.* The following table shows gross and local values of forestry production for each State in 1960–61. A more detailed reference to the value of production of forestry and other industries in Australia, as well as a brief explanation of the terms used, will be found in Chapter XXX.—Miscellaneous.

**GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1960–61.**  
(£'000.)

State or Territory.	Gross Value (Gross Production Valued at Principal Markets).	Marketing Costs.	Local Value (Gross Production Valued at Place of Production).
New South Wales .. .. .	15,816	516	15,300

1960–61 .. .. .	3.9	5.1	4.8	3.9	7.1	16.4	5.0

(a) Includes Northern Territory and Australian Capital Territory.

## § 3. Forested Areas.

1. **Forest Reservations.**—The first estimate of the forest area which should be reserved solely for purposes of timber production was made at an interstate forestry conference held at Hobart in 1920. This conference decided that an area of 24½ million acres of indigenous forest should be permanently dedicated to timber production. According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia as at 30th June, 1961, totalled 36,928,000 acres, of which 23,307,000 acres were Dedicated State Forests and 13,621,000 acres were Timber and Other Reserves. The distribution of those areas is shown by States in the following table.

## AREA OF FOREST RESERVATIONS, 30TH JUNE, 1961.

(Acres.)

State or Territory.	State Forests.	Timber Reserves (Forest Acts).	Other Reserves. (a)	Total.
New South Wales .. .. .	6,581,788	1,406,322	(b) 1,557,468	9,545,578
Victoria .. .. .	4,860,170	(c) 861,276	(b) 366,888	6,088,334
Queensland .. .. .	5,124,220	3,048,339	848,196	9,020,755
South Australia .. .. .	271,108	981	760,500	1,032,589
Western Australia .. .. .	4,343,153	(d) 2,554,920	321,015	7,219,088
Tasmania .. .. .	(e) 2,126,744	137,028	(f) 1,266,679	3,530,451
Northern Territory .. .. .	..	8,620	(g) 352,000	360,620
Australian Capital Territory .. .. .	..	..	(h) 131,000	131,000
<b>Australia .. .. .</b>	<b>23,307,183</b>	<b>8,017,486</b>	<b>5,603,746</b>	<b>36,928,415</b>

(a) Includes National Parks and Scenic Reserves. (b) Reserved under the Lands Acts.  
 (c) Includes 151,499 acres reserved under the Lands Acts. (d) Includes 775,339 acres reserved under the Lands Acts.  
 (e) Includes 464,984 acres of State Forests under pulpwood concession. (f) Includes 612,000 acres of pulpwood concessions over Crown land and 419,908 acres of exclusive forest permits on Crown land.  
 (g) Comprises mainly a fauna and flora reserve on Coburg Peninsula.  
 (h) Forest land not specifically reserved.

If the permanently reserved areas were all of good quality, accessible, and fully productive, and if they supplied the class of timber required, they could be regarded as adequate for a larger population than exists in Australia at the present time. Actually, a considerable proportion is in inaccessible mountainous country and many of the forests contain a mixture of species, only some of which are at present of commercial value. Much of the area consists of inferior forest and a large proportion of the whole has been seriously degraded by recurrent fires. Moreover, the indigenous forest does not contain adequate supplies of softwoods and Australia's requirements have had to be met largely by imports.

It is freely acknowledged by Australian forest authorities that information on forest resources is imperfect. It is not possible to give a reliable estimate of the forest area needed to meet future demands because of the unknown variables involved, in particular, the yield capacity per acre, future consumption of different classes of timber, and the future population.

It appears, however, that all available good forested country and an adequate area suitable for plantations of coniferous timber must be reserved, protected and systematically managed if Australia is to approach the goal of self-sufficiency in timber supplies in the future.

2. **Plantations.**—Reference has been made to the inadequacy of indigenous softwood supplies, but as a result of the planned policy of the Forest Services and of several private commercial organizations, the area of softwood plantations, mainly of exotic species, is steadily increasing. It was natural that this aspect of forestry should receive earliest attention in South Australia, as this is the State most poorly endowed with natural forest. South Australia now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now over 200,000,000 super. feet per annum and is expected to be increased substantially during the next decade. Production is also increasing in the other States and the thinnings from their plantations are already supplying a significant volume of timber.

Data relating to areas of plantations for years prior to 1960 were shown as at 30th June. As new areas are being planted in most States at this time of the year, data for 1960 and 1961 have been compiled by the Forestry and Timber Bureau as at 30th September. The following table shows particulars for 30th September, 1961.

**SOFTWOOD PLANTATIONS, 30TH SEPTEMBER, 1961.**  
(Acres.)

State or Territory.	Government.			Private (mainly <i>P. radiata</i> ).	Total.
	<i>Pinus radiata</i> .	Other species.	Total.		
New South Wales .. ..	68,343	19,198	87,541	12,495	100,036

<b>Australia .. .. .</b>	<b>264,267</b>	<b>157,593</b>	<b>421,860</b>	<b>120,044</b>	<b>541,904</b>

(a) Forests Commission area only. There are approximately 4,000 acres of plantations owned by other State instrumentalities about which no reliable information is available. (b) Estimated. (c) Excludes plantings during 1961.

A special article giving a detailed account of the history and development of softwood plantations and of the characteristics of individual species has been prepared by the Forestry and Timber Bureau, and is included in Official Year Book No. 45, pages 975 *et seq.*

Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area and the total acreage at 30th June, 1961, was 31,266 acres, nearly two-thirds of which was mallet (*Eucalyptus astringens*). Plantations of this species have been established in Western Australia for tan-bark production.

#### § 4. Forestry Production.

1. Timber.—Particulars of logs treated and the production of sawn, peeled and sliced timber by sawmills and other woodworking establishments are shown in the following table, by States, for the year 1960-61. These figures have been compiled from the annual factory collections in each State which cover virtually all sawmills. The only omissions are some small portable mills operated by itinerants, e.g., sleeper cutters.

**OUTPUT OF AUSTRALIAN-GROWN TIMBER : ALL MILLS, 1960-61.**

<b>Australia(b) .. .. .</b>	<b>1,418,859</b>	<b>1,391,177</b>	<b>1,459,974</b>	<b>1,521,046</b>	<b>1,418,737</b>

(a) Total production of sawn, peeled and sliced timber. (b) Excludes the Australian Capital Territory and Northern Territory, details of which are not available for publication.

In addition to the sawn timber shown in the preceding table, a large amount of hewn and round timber, e.g., sleepers, piles, poles, fencing timber, timber used in mining, and fuel, is obtained from forest and other areas. Complete information in respect of the volume of this output is not available.

2. **Veneers, Plywood, etc.**—Cutting of timber for the manufacture of veneers, plywood etc., has been carried out in most States for a number of years. In recent years, this has been considerably extended, since plywood manufacture has allowed the use of some species unsuitable for sawing. Special attention has been paid to ensure that logs suitable for peeling are diverted to ply factories. However, the supply of Australian-grown logs is inadequate and greater use is being made of imported logs.

The following table shows the production of plywood for each of the years 1956–57 to 1960–61.

**PLYWOOD PRODUCED.**  
(’000 square feet— $\frac{3}{16}$ -in. basis.)

State.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.
New South Wales .. ..	41,921	45,647	56,378	62,701	64,930
Queensland .. ..	118,647	131,205	139,743	134,824	112,414
Other States .. ..	33,797	35,784	40,083	44,574	46,045
<b>Australia .. ..</b>	<b>194,365</b>	<b>212,636</b>	<b>236,204</b>	<b>242,099</b>	<b>223,389</b>

Of the total plywood produced in 1960–61, 155,737,000 square feet ( $\frac{3}{16}$ -in. basis) were classed as “Commercial”, 44,907,000 as “Waterproof”, 2,544,000 as “Case” and 20,201,000 as “Sliced Fancy”.

During 1960–61, 593.7 million square feet ( $\frac{1}{8}$ -in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 230.5 million square feet ( $\frac{1}{8}$ -in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 44.7 million square feet of sliced veneers were produced.

**3. Hardboard.**—The production of hardboard from pulped wood for building purposes has increased considerably in Australia in recent years. There were five factories producing hardboard during 1960–61 (two in New South Wales, and one in each of Victoria, Queensland and Tasmania) and during each of the three years ended 30th June, 1961, the following quantities were produced:—1958–59, 29,067,000 square yards; 1959–60, 31,645,000 square yards; and 1960–61, 31,085,275 square yards.

Most of this hardboard enters into usage in the condition in which it leaves the producing factories. The remainder is further treated and surfaced to a variety of finishes, and in 1960–61 this production accounted for 1,451,653 square yards valued at £548,328.

**4. Wood Pulp and Paper.**—(i) *Wood Pulp.* The manufacture of wood pulp from Australian-grown timber was established in Australia in 1939, after years of experimentation with eucalypt hardwoods. During 1960–61, six wood pulp mills were operating in three States and production was 148,640 tons of chemical pulp and 64,569 tons of mechanical pulp, a total of 213,209 tons. During the previous year, production was 144,872 tons of chemical pulp and 58,061 tons of mechanical pulp.

(a) *Victoria.* In Victoria, wood pulp is produced at Maryvale in Gippsland by a chemical process known as the Kraft or Sulphate process. The pulpwood used at this mill consists mainly of eucalypt timber below sawmilling quality, together with a quantity of plantation pine thinnings.

During the year 1960–61, 343,554 tons of eucalypt and pine pulpwood were supplied to Maryvale Mill. Plantations of both pines and eucalypts are being established in Gippsland at the rate of approximately 3,000 acres a year.

(b) *South Australia.* In South Australia, three wood pulp mills operate in the south-eastern part of the State, using raw material in the form of logs from the State forests. One mill produces paper board, one tissue paper, and the other particle board. During 1960–61, a total of 17 $\frac{1}{4}$  million super. feet of pulpwood was supplied to the three mills.

Investigations are proceeding for the establishment of another large pulp mill near Mount Gambier.

(c) *Tasmania.* In Tasmania, two large mills are making pulp and paper from indigenous hardwoods. At Burnie, on the north-west coast, a mill using the soda process produces wood pulp for fine writing parchment and printing papers. A continuous digester at the Burnie mill makes it the only one in Australia to use a continuous pulping process. In addition, a semi-chemical pulp plant was brought into operation in 1959 by the same company.

In 1960-61, 71,827 tons of paper were produced. The company holds freehold and State concession forest areas which are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Pine plantations are being established to provide softwoods for pulping.

The other mill at Boyer, 20 miles from Hobart, is the only producer of newsprint in Australia. Wood pulp is produced from hardwoods drawn from State timber concession areas. A mechanical process was used until 1957, when additional plant was installed for the manufacture of semi-chemical pulp. This plant uses the cold soda process which allows the utilization of additional species not suitable for ground wood pulp. The components of Boyer newsprint average 60 per cent. of groundwood pulp, 22 per cent. of cold soda pulp (both made at Boyer from hardwoods) and 18 per cent. of imported Kraft pulp made from *Pinus radiata* in New Zealand. Newsprint production capacity is 85,000 long tons per annum. To secure more complete bush utilization, the company has established sawmills to convert understory species, principally myrtle and sassafras, to sawn timber. The forests are managed on a sustained yield basis. Forest utilization and management are designed to promote eucalypt regeneration. Experimental work into the problems involved is being carried out by the company and the Tasmanian Forestry Commission.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States but the greater part of the industry is in New South Wales, Victoria and Tasmania. During 1960-61, twenty-two paper mills were operating, ten in Victoria, four in New South Wales, three in Tasmania, two each in Queensland and South Australia and one in Western Australia. A wide variety of paper and paper board is produced in Australian mills. The quantity and value of paper produced in 1960-61 includes the following items. Comparable figures for 1959-60 are shown in parentheses. Newsprint, 88,039 (88,510) tons valued at £6,490,754 (£6,682,005); blotting, 755 (800) tons, £133,373 (£144,685); duplicating, 7,055 (5,804) tons, £1,176,251 (£916,420); printing and writing, 80,166 (67,825) tons, £12,640,988 (£11,507,234); kraft wrapping, 98,607 (66,451) tons, £12,226,040 (£9,000,408); other wrapping, 9,828 (12,600) tons, £1,828,591 (£2,275,045); felt and carpet felt, 3,112 (4,145) tons, £326,760 (£472,668). In addition, 209,532 (221,338) tons of paper boards valued at £17,687,277 (£18,724,122) were produced.

5. *Other.*—(i) *Eucalyptus Oil.* Oil may be distilled from the foliage of all varieties of *Eucalyptus*, and several of them furnish a product widely known for its commercial and medicinal uses. Complete information regarding Australian production and consumption of eucalyptus oil is not available, but considerable quantities are manufactured, particularly in New South Wales and Victoria. The quantity and value of exports of eucalyptus oil distilled in Australia were 209,451 lb., £77,083 in 1958-59; 256,888 lb., £94,760 in 1959-60; and 236,921 lb., £80,738 in 1960-61.

(ii) *Gums and Resins.* Gums and resins are produced in most States of Australia, the main product being grass tree or yacca gum. This gum, which is used in the preparation of varnishes and lacquers, comes chiefly from South Australia, but small quantities are also produced in New South Wales and Western Australia. In 1960-61, the recorded production for Australia of gums and resins was 9,659 cwt. Exports of acaroid resin, grass tree and yacca gum from Australia during the same period amounted to 8,949 cwt. valued at £17,173.

(iii) *Tanning Barks.* The forests of Australia are capable of yielding a wealth of tanning materials. Many species of *Eucalyptus* and other genera contain varying proportions of tannin, chiefly in the bark, but also in the wood and twigs. Their scattered distribution, however, has resulted in the use of only the richest tan-bearing species in Australia. These are:—Golden wattle (*Acacia pycnantha*), green or black wattle (*Acacia decurrens* or *mollissima*), and mallet (*Eucalyptus astringens*). Mallet (*E. astringens*), of Western Australia, is not extensively used in Australian tanneries, but is exported. References to oversea trade in tanning substances are made in § 8, pages 1025 and 1026.

The production of extract from the bark of karri (*E. diversicolor*), of which very large quantities are available at karri sawmills, has passed the experimental stage, and private enterprise has started production on a commercial scale. The experimental work in kino impregnated marri (*E. calophylla*) bark is not yet complete. The total production of tanning bark in Australia approximated 25,000 tons per annum in the years prior to 1939, but since then production has declined and in 1960-61 was only 3,715 tons. However, this decrease is offset by the increased use of vegetable tanning extracts and synthetic tanning agents.

## § 5. Employment in Forestry.

1. **Persons Engaged in Forestry Activities.**—Particulars of the numbers of persons who, at the population censuses of 30th June, 1947 and 1954, stated that they were engaged in "forestry (excluding sawmills)" are shown in previous issues of this Year Book. Corresponding information for the census of 30th June, 1961, is not yet available.

2. **Employment by Forestry Departments.**—In the table below, details are shown of the number of persons employed by State Forestry Departments, and by the Forestry and Timber Bureau in the Australian Capital Territory and the Northern Territory, at 30th June, 1961.

## PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, 30TH JUNE, 1961.

Occupational Group.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Professional Staff	208	201	87	80	59	33	3	7	678
Non-professional									
Field Staff ..	203	250	95	2	139	85	4	1	779
Clerical Staff ..	334	232	183	103	52	80	1	5	990
Extraction of Timber	1,240	117	117	74	31	4	6		6,095
Milling of Timber Labour (Forest Workers, etc.)		19	..	716	21	..	13	..	
		743	1,748	242	634	226	98	46	
Total ..	1,985	1,562	2,230	1,217	936	428	(a) 125	59	8,542

(a) Includes 105 full blood aboriginals who were employed in the following occupations: 4 in extraction of logs, 11 in milling of timber, and 90 as forest workers.

3. **Employment in Milling Operations.**—Details of the average number of persons employed, including working proprietors, in sawmills during the year 1960-61 are shown in the next table. Further details regarding the operations of sawmills in 1959-60 are shown in Chapter VI.—Manufacturing Industry.

## NUMBER OF SAWMILLS AND NUMBER OF PERSONS EMPLOYED, 1960-61.

Particulars.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Aust.(a)
Number of Sawmills .. ..	907	506	583	84	222	328	2,630
Average number of Persons Employed during Year—							
Males .. ..	8,857	6,465	5,941	2,062	3,798	2,721	29,844
Females .. ..	411	232	297	186	47	84	1,257
Total .. ..	9,268	6,697	6,238	2,248	3,845	2,805	31,101

(a) Excludes Northern Territory and Australian Capital Territory, details of which are not available for publication.

## § 6. Forest Administration and Research.

1. **Forestry Activities of the Commonwealth.**—Although control of forests is a function of the State Governments, the Commonwealth Government has entered the research field with the aim of assisting both public and private enterprise. The two main research authorities administered by the Commonwealth Government are the Commonwealth Forestry and Timber Bureau and the Division of Forest Products of the Commonwealth Scientific and Industrial Research Organization. A brief account of the activities of these two organizations is given below.

(i) *Commonwealth Forestry and Timber Bureau.* In 1925, the Commonwealth Government established the Commonwealth Forestry Bureau which received statutory powers in 1930. Its functions included advising the various Territorial Administrations on forestry

matters, the management of forests placed under its control, the establishment of experimental forest stations the training of professional foresters, etc. In 1946, the title of the Bureau was changed to "The Forestry and Timber Bureau" and its functions were extended to embrace investigations, research and advice relating to the supply, production, distribution and use of timber.

The main activities of the Bureau under its statutory functions are as follows.

(a) *Forestry Education.* The Australian Forestry School, located in Canberra, trains professional foresters. Training at the school covers the third and fourth years of a four-year degree course in forestry. The first two years of the course are spent in a study of prescribed science subjects at one of the Australian universities. The third and fourth years are spent at the Forestry School studying specialized forestry subjects. Students who satisfactorily complete the course graduate in Forestry at their home university and are awarded the Commonwealth Diploma in Forestry. The Commonwealth Diploma in Forestry or the Diploma in Forest Technology may also be awarded to suitable graduates from Australia or overseas who complete an appropriate course at the Australian Forestry School.

(b) *Silvicultural Research.* Research headquarters and a Central Experimental Station have been established in Canberra. Other forest experimental stations have been established at Mount Burr in the south-east of South Australia, in Tasmania, and at Dwellin; up in Western Australia, on a co-operative basis with the Forest Service of those States. An experimental station is also operating at Traralgon, Victoria in co-junction with a private company. It is proposed to establish similar co-operative experimental stations in other States and Territories.

The research work being carried out covers a wide field of studies of forest conditions; the genetic relationships and soil and climatic requirements of various species; forest nutrition; factors affecting the growth of trees; and the improvement of forest yields. Studies in fire protection, watershed management, forest entomology and pathology are also being actively pursued. Considerable expansion in research activities is planned as suitable trained staff becomes available.

(c) *Forest Management Research.* A national forest stocktaking is being carried out in co-operation with the Forest Services of the States, and special consideration is given to the use of aerial surveys to assist in forest assessment.

Research in the fields of forest management and mensuration is being carried out and further investigations into the economics of management are proposed.

A research station has been established at Darwin for the Northern Territory Administration.

In 1961, the Commonwealth Government decided to expand the research work of the Bureau and to form a Forest Research Institute to carry out silvicultural and forest management investigations.

(d) *Timber Supply Economics.* Advice is currently made available to government departments and private enterprise on timber supply matters. Research is undertaken on logging methods and machines and on matters associated with the marketing of timber products.

(e) *Management of Forests.* A Division of the Bureau manages the forests of the Australian Capital Territory, while the Darwin research station advises on the management of the forests of the Northern Territory. In addition, advice is made available to the Administrations of the Australian External Territories on the management of the forests in those Territories.

(ii) *Commonwealth Scientific and Industrial Research Organization, Division of Forest Products.* Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Division of Forest Products of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g., structure and chemistry of wood, tans, etc.; properties and uses of wood; methods of production of sawn timber, pulp, paper, etc.

2. *Forestry Activities of the States.*—The powers and functions of State Forest Authorities are laid down under Forestry Acts and Regulations. In each State, there is a department or commission to control and manage State forests, etc. Its functions are summarized as follows: (a) the introduction of proper measures for the control and management of forest

land; (b) the protection of forest land; (c) the conversion, marketing and economic utilization of forest products; (d) the securing of an adequate and permanent reservation of State forests; (e) the establishment and maintenance of coniferous forests to remedy the existing deficiency of softwoods in Australia. All State forest services are actively engaged on research programmes involving problems of a more practical nature as opposed to the fundamental biological research being carried out by the federal authorities.

Annual reports are issued by each State forest authority. The Forestry Commission of Victoria maintains a Forestry School at Creswick, where recruits are trained for employment in the Commission or in other avenues of forestry.

In addition to developing permanent forest reserves in each State, foresters are surveying all timber lands with a view to obtaining dedications of new State forests to add to the permanent forest estate or to release areas unsuitable for forestry for other uses. State forest authorities also usually control all timber on unoccupied Crown lands as well as over 10 million acres of timber reserves, national parks, etc.

The Universities in all States provide facilities for forestry graduates attending the Universities or, in some cases, for forestry graduates working within, or outside, the States to proceed to advanced degrees. The University of Melbourne has established a Department of Forestry to assist both undergraduates and post-graduate students.

3. **Private Forestry.**—A number of private forestry companies are now operating in Australia. They are concerned mainly with the supply of raw materials to specific wood processors (often parent companies). The majority have professional foresters on their staff, several being engaged on research.

An estimate of the area of softwood plantations established by private companies and individuals is included in the table in § 3, para. 2, page 1018.

## § 7. Fire Protection.

Fire control measures in Australia are the responsibility of the individual State Governments, and the provision of adequate fire protection is one of the main problems facing forest authorities. Of some 52 million acres of dedicated and reserved forest areas throughout Australia, the forest services maintain a high degree of protection over a relatively accessible area of about 20 million acres; about 19 million acres, being more difficult of access, are not so highly protected; about 13 million acres are, at present, not protected.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia there are over 5,000 registered volunteer bush fire brigades with a membership approaching 250,000. Although both forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-Government bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

Over the five-year period 1957–61, the annual cost of protecting from fire the 39 million acres of forest land for which State Forest Services provide protection is estimated at £2,100,000 or about 1s. 1d. an acre. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy, because by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of a particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944, 1952 and 1957 account for a large proportion of the average annual burn. Over 80 per cent. of the area burnt carries little commercial timber, being mainly firewood and protection forest. The number of fires and the forest area burnt during the last five years is shown in the following table.

## NUMBER OF FIRES AND FOREST AREAS BURNT: AUSTRALIA.

(Source: Forestry and Timber Bureau.)

Year.	Number of Fires.	Forest Areas Burnt.		Burnt Areas as a Proportion of Total Forest Areas.
		No.	'000 Acres.	
1956-57	1,999	344	0.86	
1957-58	2,908	2,073	5.11	
1958-59	1,175	456	1.10	
1959-60	1,504	1,314	2.48	
1960-61	2,667	1,294	2.47	

Since the 1939-45 War, forest services have greatly expanded their fire detection facilities and big advances have been made in the use of power water-pumping equipment. Radio communication is now being used extensively by both forest services and rural organizations, and considerable progress has been made in the provision of legislative power for the rural bush fire movement, although the volunteer movement itself dates back to the turn of the century.

Intensive research work is being undertaken on fire problems, and several governmental groups are working on such projects as the study of fire behaviour and associated fuel and meteorological conditions; the use of chemical aids in fire suppression; the development of protective clothing and devices to aid fire-fighters and of more efficient fire-fighting equipment.

Since fire prevention is one of the most important aspects of the problem, intensive campaigns are being conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for 90 per cent. of all fires, and of this figure at least 80 per cent. were preventable. It is estimated that "burning-off" (much of which is started illegally) accounts for 30 per cent. of all fires. Lightning accounts for a little over 10 per cent. of all fires in Australia, although the incidence of fires caused by lightning is much higher in certain areas, especially the Southern Highlands region in New South Wales and Victoria. Although lightning is a relatively small numerical cause of fire, the percentage area burnt from this cause is estimated at about 20 per cent. This high percentage is due to the multiple fire outbreaks causing fire fighting difficulties and to the general inaccessibility of the areas in which such fires generally occur.

## § 8. Oversea Trade in Forest Products, Timber and Timber Products.

1. Imports.—Quantities and values of forest products, timber and timber products imported into Australia during the years 1958-59 to 1960-61 are shown in the following table.

IMPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS:  
AUSTRALIA.

Particulars.	Unit of Quantity.	Quantity.			Value (£A.f.o.b. Port of Shipment).		
		1958-59.	1959-60.	1960-61.	1958-59.	1959-60.	1960-61.

(a) Non-pored woods.

(b) Pored woods.

(c) Less than 500 super. feet.

Imports of softwood logs in recent years have come almost exclusively from British Borneo and the Solomon Islands, and more than 90 per cent. of the imports of hardwood logs have also come from British Borneo. Imports of undressed softwood timber comprise mainly Douglas Fir (Oregon Pine) from Canada and the United States of America and Radiata Pine from New Zealand. Imports of undressed hardwood timber come mainly from Malaya and British Borneo. Timbers from Scandinavian countries provide most of the dressed timber imports.

Imports of timber products are mainly veneers and plywoods. The Australian Trust Territory of New Guinea provides most of the plywood imports and together with the United Kingdom, more than half of Australia's imports of veneer.

Tanning substances are the only other forest products imported in significant quantities. The most important of these is wattle bark produced in the Republic of South Africa.

2. Exports.—The quantities and values of timber, railway sleepers, veneers, plywood and other timber and forest products exported during the years 1958–59 to 1960–61 are shown in the following table. The figures given represent total exports and therefore include particulars of re-exported materials, but the amounts involved are, in general, relatively small.

**EXPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS:  
AUSTRALIA.**

(a) Excludes stumps and the like.

(b) Non-pored woods.

(c) Pored woods.

In 1960–61, New Zealand received more than 50 per cent. of Australia's exports of sleepers as well as the greater part of exports of logs and almost 40 per cent. of exports of all undressed timber. The United Kingdom received most of Australia's exports of plywood and veneers.

Exports of tanning substances in 1960–61 were mainly to the United States of America and that country also was the largest importer of eucalyptus oil produced in Australia. More than 60 per cent. of the charcoal exports were shipped to New Zealand.

## CHAPTER XXVI.

### FISHERIES.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated.

Further information on subjects dealt with in this chapter is contained in the annual printed bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* and in the annual mimeograph statistical bulletin *Fishing and Whaling*, particularly as regards types of fish, etc., caught.

#### § 1. Introduction.

1. **Source of Statistics.**—Fisheries statistics in Australia are, in general, collected by the various authorities responsible for the administration of the industry. The fisheries within territorial waters (i.e. within three miles of the shore) are administered by State Departments, while the Fisheries Division of the Department of Primary Industry develops and administers fisheries in extra-territorial waters and co-ordinates fisheries administration.

Statistics of production of fish, crustaceans, molluscs and pearl-shell and trochus-shell included in this chapter are collected and supplied by State Fisheries Authorities through the Statisticians of the several States. Statistics are provided on a year ended 30th June basis, although figures for pearl-shell and trochus-shell refer to the season ended December or January of the fiscal year shown.

Details of the catch shown in this chapter refer in most instances to the recorded commercial production only. In view of the importance of amateur fishermen in certain types of fishing, details shown (both for particular species and for totals) cannot be taken as representing the total catch. In addition, it is likely that the figures shown may understate to some extent the full commercial catch because no information is available on fish taken for sale by persons not licensed as professional fishermen.

Particulars of whaling are collected on a calendar year basis and are supplied for publication by the Fisheries Division of the Department of Primary Industry.

Data of imports and exports of fisheries and whaling products are compiled in the Commonwealth Bureau of Census and Statistics as part of the statistics of oversea trade.

2. **Presentation of Fisheries Statistics.**—In the preparation of Australian fisheries production statistics, the quantities of individual products are, generally, in terms of the form in which they are taken from the water. For example, the statistics of fish production published in this chapter are in terms of "estimated live weights" which are calculated from landed weights by using conversion factors for each species in each State. These conversion factors allow for the fact that the quantities of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Crustaceans are reported on a "whole weight" basis, and molluscs (edible) on a "gross (in-shell) weight basis". The figures of pearl-shell and trochus-shell refer to the actual quantities of dry shell for sale and exclude the weight of the fish.

The catch is generally shown according to the State in whose waters it was taken. However, a quantity of sharks and crayfish taken by Victorian-based fishermen in Tasmanian waters, but marketed in Victoria, is included in the Victorian catch, since the economy of that State is most directly affected. Similarly, pearl-shell taken by Queensland luggers operating in Northern Territory waters is included in the Queensland take. Pearl-shell taken by Japanese fishermen operating in Australian waters is excluded from Australian production figures, although the quantities taken are shown as a footnote to the table on page 1030.

## § 2. The Fishing and Whaling Industries.

1. **Resources and Fishing Areas.**—(i) *Fish.* The waters surrounding the Australian continent contain a great variety of marine fauna. Despite this, the fish stocks in Australian waters, with the exception of a few species, are small by comparison with the stocks in the Northern Hemisphere, which supplies most of the world production. Nevertheless, the Australian catch is low, even after making allowance for the smaller resources available, and the estimated consumption of fish in Australia per head of population is small. Consequently, with the exception of crayfish, there is not the pressure on resources necessary to induce expansion in the fishing industry and to encourage the investment of large amounts of capital. On the other hand, even this somewhat restricted Australian demand for fish is not met from purely local sources of supply, and large quantities of fish are imported each year. This is explained by the fact that the fisheries in the estuaries of the Australian coasts (the so-called estuarine fisheries) and those offshore for fish that dwell on the bottom of the sea (the demersal fisheries) have been over-exploited, with a consequent diminution of stocks. On the other hand, of those species of fish which have their environment near the surface of the sea (the pelagic fish), some have been continuously exploited, while others of value to Australia are still comparatively unexploited. It can be anticipated that the greatest future development of the Australian fishing industry will take place in the pelagic fisheries. However, no great contribution to the supplies of fresh fish can be expected from this source since most of the pelagic species caught are canned or processed.

The principal fishing areas at present are the coastal lakes, streams, estuaries and beaches which are for the most part associated with coastal streams. The offshore demersal grounds fall into two classes—(a) the reefs extending virtually right around Australia, from which cod, snapper, etc., are taken, and (b) the grounds from which flathead, morwong, etc., are taken. The flathead grounds lie on the continental shelf off south-east Australia, chiefly from Port Macquarie to south of Gabo Island and off the eastern Tasmanian coast. The demersal shark grounds lie principally in Bass Strait and on the continental shelf off eastern South Australia. Other demersal grounds also exist in the Great Australian Bight and off the southern part of Western Australia.

The grounds of existing pelagic fisheries include those for tuna which is taken in commercial quantities off the New South Wales and South Australian coasts. Barracouta is taken in Bass Strait and off eastern Tasmania. Spanish mackerel is found off the north-eastern coast from about Coff's Harbour to Cairns, and along the northern and north-western coast of Australia.

(ii) *Crustaceans.* Of the crustaceans exploited in Australia, crayfish is the most important and is taken on reefs of the continental shelf in the waters of all States. Considerable development has taken place in the crayfish fisheries, particularly in Western Australian, South Australian and Tasmanian waters, owing to the large market which has been established in the United States of America for these crustaceans. Crabs of various species are found in practically all coastal waters, while prawns are taken in the temperate waters of Queensland, New South Wales and Western Australia. Lobsters are caught in some freshwater streams of New South Wales.

(iii) *Molluscs (Edible).* In the mollusc group, edible oysters of various species are distributed around the entire Australian coastline. Oysters are taken in all States, with the exception of South Australia, and in the Northern Territory, but their commercial cultivation is restricted mainly to New South Wales. Until 1956, scallops were taken commercially only in Tasmanian waters, but since then they have been taken also in Queensland and Western Australia. Small quantities of other molluscs are also taken in some States.

(iv) *Pearl-shell and Trochus-shell.* Australia is the world's largest producer of pearl-shell, which is fished from Cairns in northern Queensland round the north coast of Australia to Exmouth Gulf in Western Australia. Trochus-shell is obtained from Mackay in Queensland to King Sound in Western Australia.

(v) *Whales.* Baleen whales, particularly the humpback whale, migrating from Antarctic waters to their breeding grounds in the warmer waters of low latitudes, pass up both the western and eastern coasts of Australia, returning to the Antarctic in the spring. Two whaling stations operate in Western Australia, one in New South Wales, and one in Queensland.

The company operating in New South Wales also operates a station at Norfolk Island. In addition to baleen whales, one of the two Western Australian stations also processes sperm whales, which are taken off the south-west coast of that State throughout the year.

2. *Persons Engaged.*—Particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, showing the numbers of persons whose "industry" was stated to be "fishing and whaling", were included in previous issues of this Year Book. Corresponding particulars from the Census of 30th June, 1961, are not yet available.

Particulars of the number of persons engaged in the fishing industry, as shown in licensing records of the various States, are included in § 7, page 1039.

3. *Value of Production.*—(i) *General.* Although statistics of the value of production of the fishing industry have been on an established basis for some years, the actual collection of statistics of the quantity of fish taken presents many difficulties, and, consequently, any defects which may occur in the quantities must necessarily be reflected in the value of production. Statistics of both the gross value (at principal markets) and local value (at place of production) of the fishing industry are available. Particulars of the value of materials used in the process of production are not available for all States, so that value of production cannot be stated on a net basis as has been done with most other industries.

In 1960–61, the local value of fishing and whaling amounted to £12,813,000. The most important State was Western Australia with £4,220,000, followed by New South Wales with £3,299,000.

(ii) *Gross and Local Values, 1960–61.* Values of fishing and whaling production for each State are shown for 1960–61 in the following table. A more detailed reference to the value of production of fishing and whaling and other industries in Australia, as well as a brief explanation of the terms used, is included in Chapter XXX.—Miscellaneous.

## GROSS AND LOCAL VALUE OF PRODUCTION: FISHING AND WHALING, 1960-61.

(a) The catch by Victorian fishermen in Tasmanian waters, comprising 1,040,000 lb. estimated live weight of shark valued at £81,000 and 804,000 lb. crayfish valued at £187,000, is included in Victoria. (b) Includes quantity and value of shark livers for oil extraction; excludes freshwater fish caught in Queensland, particulars of which are not available. (c) Excludes pipis, particulars of which are not available for publication. (d) Western Australia, season ended December, 1960; Queensland and Northern Territory, season ended January, 1961. (e) Excludes 860,000 lb. of pearl-shell taken by Japanese pearl-ers operating in Australian waters. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland.

In the table below, corresponding particulars are shown for the years 1956-57 to 1960-61.

**FISHERIES PRODUCTION : QUANTITY AND GROSS VALUE OF CATCH,

(a) Includes quantity and value of shark livers for oil extraction; excludes freshwater fish caught in Queensland in 1960-61 particulars of which are not available. (b) Excludes pipis in New South Wales for all years, scallops in Western Australia and oysters in Northern Territory for years prior to 1960-61, and oysters in Western Australia for years prior to 1959-60. (c) Excludes pearl-shell taken by Japanese pearl-ers operating in Australian waters. For particulars of quantities taken by these pearl-ers see footnote (e) to table on page 1030.

2. Fish.—The development of Australian fisheries proper has almost invariably occurred in the same sequence at each centre. The earliest fisheries were on-shore, followed by demersal reef fishing using long lines. Trawling operations then followed line fishing in suitable areas, and more recently the exploitation of pelagic fisheries has commenced.

The first major development of the demersal fishing industry came with the institution of trawling operations off the New South Wales coast in 1918, firstly by the New South Wales Government and later by private enterprise, and the fleet of vessels rapidly expanded. In recent years, the number of Danish seine vessels has continued to increase, particularly after the introduction of an improved multi-purpose type of vessel which can be used for tuna fishing as well as for seine trawling. Although steam trawlers based in Sydney formed an important part of the fleet in earlier years, only one boat of this type is still operating. A large diesel-powered trawler, based on Adelaide, now operates in the Great Australian Bight.\* Since 1930, fishing for school and gummy shark has rapidly extended its area of operations, particularly off the Victorian and Tasmanian coasts. A great impetus was given to this fishery during the war by the demand for livers for fish oil production for medicinal purposes. This demand, however, eased with the return of cod-liver oil and availability of synthetic vitamin "A".

As far as pelagic fisheries are concerned, the growth of the Australian tuna fishing industry has been substantial in recent years. Prior to 1959-60, mullet, shark and Australian salmon were the species of fish taken in greatest quantities. After the introduction of the pole fishing method in 1950, however, the catch of tuna increased considerably and by 1959-60 the tuna industry had grown to such an extent that the total catch at 9.8 million lb. estimated live weight was in excess of shark (7.6 million lb.) and Australian salmon (6.6 million lb.) thus placing the size of the catch second to that of mullet. Practically all the tuna catch was canned.

The demand justifying an increased production of other pelagic fish, such as pilchards, sprats, jack mackerel and anchovies, has not been as encouraging as that for tuna. With pilchards caught in southern waters of Australia and sprats taken in Tasmanian waters, there is usually some difficulty in finding a market. Considerable quantities of young jack mackerel, taken off the east coast of Tasmania and off Eden in New South Wales, are used as bait in tuna fishing. Anchovies caught by Victorian fishermen are used for manufacturing fish paste.

In the following table, total Australian recorded production of the main types of fish caught is shown by States in terms of estimated live weight for the year 1960-61.

\* This trawler has since been sold, because catches were not large enough to justify continuance of trawling in that area.

**FISH: PRODUCTION BY TYPE, 1960-61.**

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria. (b) Excludes freshwater fish, particulars of which are not available.

3. Crustaceans.—In terms of gross value of catch, the importance of crustaceans has increased in recent years, and in 1960-61 was nearly equal to that of fish. The crayfish, which is caught in pots or traps in all States, is the most important crustacean. Crayfish fisheries have been developed greatly since the 1939-45 War in order to take advantage of the market in the United States of America for frozen crayfish tails. The total catch increased from approximately 3 million lb. in 1945-46 to more than 27 million lb. in 1960-61. Of the total catch in 1960-61, Western Australia produced about 66 per cent.

Prawns are taken by otter trawl, mainly in Queensland and New South Wales. In 1960-61, Queensland accounted for 54 per cent. of the total catch and New South Wales for 45 per cent.

Approximately three-quarters of Australia's production of crabs is taken from Queensland waters, and nearly all the remainder is caught in New South Wales.

Commercial lobster production, apart from the Queensland shovel-nosed lobster, which is scientifically classified as a crayfish, is restricted to a single freshwater species, *Euastacus serratus*, from some New South Wales streams.

Details of the production of crustaceans are shown by States in the table below on a whole weight basis for the year 1960-61.

## CRUSTACEANS: PRODUCTION BY TYPE, 1960-61.

('000 lb. whole weight.)

Type.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
Crayfish .. (a)	476	(b) 2,070	(c) 41	3,721	18,019	(b) 3,167	27,494

Crabs ..	144	..	595	..	48	..	787
<b>Total ..</b>	<b>3,536</b>	<b>(b) 2,077</b>	<b>4,136</b>	<b>3,721</b>	<b>18,173</b>	<b>(b) 3,167</b>	<b>34,810</b>

(a) Includes catch of freshwater lobster (9,000 lb. in 1960-61). (b) The catch of crayfish by Victorian fishermen in Tasmanian waters (804,000 lb. in 1960-61) is included in Victoria. (c) For years prior to 1960-61, the catch was made up entirely of shovel-nosed lobster (*Thenus orientalis*). In 1960-61, the catch was made up of crayfish, 26,000 lb., and shovel-nosed lobster, 15,000 lb.

The following table contains details of production of crustaceans in Australia for the years 1956-57 to 1960-61.

**CRUSTACEANS: PRODUCTION BY TYPE, AUSTRALIA.**

(<sup>'000</sup> lb. whole weight.)

Prawns .. .. .	5,075	4,687	6,751	7,749	6,529
Crabs .. .. .	835	826	906	1,044	787
<b>Total .. ..</b>	<b>24,815</b>	<b>27,504</b>	<b>33,971</b>	<b>36,816</b>	<b>34,810</b>

(a) Includes freshwater lobster caught in New South Wales.

4. **Molluscs (edible).**—Initially the Australian oyster fisheries depended solely upon the harvesting of naturally grown stock in littoral and submarine areas. However, the stocks soon deteriorated and attention was turned to methods of cultivation. Commercial oyster farming is carried on mainly in New South Wales, where there has been constant improvement in methods and the present technique in certain areas is highly efficient. In 1960-61, New South Wales provided more than 93 per cent. of the Australian production.

Scallops are taken by dredge in Tasmanian waters and by trawl in Queensland waters. Tasmania is the principal producing State and in 1960-61 contributed 77 per cent. of the recorded Australian production.

Of the other molluscs taken, squid is the most important. Smaller quantities of cuttlefish, octopus, mussels, abalone and pipi have been taken from time to time.

Details of the production of molluscs are shown by States in the table below on a gross (in-shell) weight basis for the year 1960-61.

**MOLLUSCS: PRODUCTION BY TYPE, 1960-61.**

5. Pearl-shell and Trochus-shell.—Pearl-shell and trochus-shell are taken from tropical waters of Australia, mostly during the period from April to January. In Western Australia, annual production is recorded for the year ended December, while in Queensland and Northern Territory the annual production is recorded for the year ended January. Statistics in this chapter are these annual production figures related to the financial year ending 30th June following the close of the season.

Australia's pearling industry, which ceased operations on Japan's entry into the war in December, 1941, was faced at the end of hostilities not only with a shortage of ships and gear but also with the scarcity of expert labour, particularly divers. Before the war, a large proportion of the key men were Japanese; others included Malays, Chinese, Koepangers, Filipinos, Papuans and Torres Strait Islanders. The Commonwealth Government, with the view of overcoming this shortage, permitted in 1953 the employment of 35 Japanese divers, tenders and engineers in Australian luggers. At 31st January, 1961, the number of Japanese, employed mainly in Western Australia and in the Northern Territory, was 126, out of a total number of 995 employed in the industry. Queensland, with a more ready source of labour from Torres Strait Islands, was able to expand its fishing more rapidly, and in the 1949 season achieved its highest post-war production of 1,191 tons. At 31st January, 1961, Queensland pearl-ers employed 487 Torres Strait Islanders in its total personnel of 654. Torres Strait Islanders therefore represented almost half of the total number of 995 employed in the Australian pearl-fishing industry at that date.

Australia's pearl-fishing takes place offshore to the 25 fathom line. In September, 1953, following the arrival of a Japanese pearl-fishing fleet in Australian waters, the Commonwealth Pearl Fisheries Act 1952-1953 was brought into operation. This Act aims at the management of the pearl-shell resources in accord with Australia's proclamation of sovereign rights over the natural resources of the sea bed and subsoil to the 100 fathom line. Japan disputed Australia's right to apply this legislation to foreign ships, and Australia agreed to refer the dispute to the International Court of Justice on condition that meanwhile Japanese pearling in Australian waters would be conducted in conformity with the Australian Government's policy of regulation and conservation, and that Japan would abide by the Court's decision. On these conditions, a Japanese pearling fleet has operated in prescribed waters since 1954. No pronouncement has yet been made by the International Court of Justice on the dispute.

In 1960-61, Australian production of pearl-shell and trochus-shell was 3,313,000 lb. and 319,000 lb. respectively. In addition, Japanese pearl-ers took 860,000 lb. of pearl-shell from Australian waters, but as this was not landed in Australian ports it is not regarded as Australian production. The seasons of highest recorded production of pearl-shell have been—Queensland, 3,200,000 lb. in 1929; Western Australia, 4,480,000 lb. in 1917; and Northern Territory, 1,800,000 lb. in 1937.

In the following table, particulars of the quantity of pearl-shell and trochus-shell produced are shown for the years 1956-57 to 1960-61.

**PEARL-SHELL AND TROCHUS-SHELL: PRODUCTION.**

(<sup>0</sup>000 lb.)

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.

(a) Excludes pearl-shell taken by Japanese pearl-ers operating in Australian waters. The quantities taken were as follows:—1956-57, 1,458,000 lb.; 1957-58, 1,572,000 lb.; 1958-59, 1,064,000 lb.; 1959-60 763,000 lb.; 1960-61, 860,000 lb. (b) Season ended January of years shown. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland. (c) Season ended December of years shown.

Complete particulars are not available of the production of natural pearls in Australia.

In 1956, the production of cultured pearls was introduced into Australia, with the establishment of a station at Augustus Island, off the northern coast of Western Australia. This station was later moved to Kuri Bay (Brecknock Harbour). This station, 130 miles north-east of Derby, produced its first crop of high quality pearls in 1958. Following the success of the operations at Kuri Bay, four culture farms have commenced operations in Queensland and one in Western Australia. Particulars of the production of cultured pearls are not available for publication.

Exports of pearls from Australia were valued at £158,000 in 1960-61, including cultured, £67,000.

#### § 4. Marketing and Distribution of Fish.

Most of the fish taken in Australian waters is sold in the metropolitan markets, although many of the fisheries are considerably distant from these centres. The arrangements for marketing of fresh fish vary from State to State, and in some cases the State Government exercises a certain amount of control.

In New South Wales, marketing of fish is controlled by the Chief Secretary. The bulk of the State's catch is sold through the Sydney market, owned by municipal authorities but controlled by the Chief Secretary. A small branch market operates in Wollongong, and the eighteen fishermen's co-operatives market fish in their own regions also. By law, all fish for human consumption must be sold through a recognized market (i.e. Sydney, Wollongong or the co-operatives), unless ministerial consent for direct sale to consumers has been obtained.

In Victoria, there are no fish marketing regulations, and most of the catch, as well as considerable quantities of interstate fish, is sold by agents at the main Melbourne market, owned and controlled by the City of Melbourne. In addition, the fishermen's co-operatives engage in the wholesale and retail sale of fish within their own areas.

In Queensland, the Government Fish Board controls all marketing and, in addition to the main Brisbane market, regulates the sale of fish through eighteen coastal markets and eight agencies extending along the coast from Southport to Port Douglas.

In South Australia, the Adelaide city fish market, the only one in the State, is owned and operated by the South Australian Fishermen's Co-operative. Of the total State catch, approximately 80 per cent. is handled by the co-operative, the balance being sold privately either to local or to interstate fish agents.

In Western Australia, the Perth market is established as a government instrumentality, but handles only a portion of the fish offered for sale in the main metropolitan area. Besides this, there are two other markets in Fremantle. One is conducted by the local fishermen's co-operative and the other by a private concern. Both are erected on land leased from the Crown. Outside the main metropolitan area, marketing is conducted on a more or less private basis.

In Tasmania, there is no established market, and the sale of fish is conducted on a private basis with fish agents playing a considerable part in the disposal of fish locally and to the mainland.

§ 5. Freezing, Processing and By-products.

1. Freezing.—Cold storage facilities, which were rather inadequate in the past, have in most States been improved and increased in recent years. In Queensland and New South Wales particularly, most depots which have been established at fishing ports have now been equipped with cold storage space. In several States, there has been a development of establishments equipped for snap freezing of fish, in particular the freezing of crayfish tails, prawns and scallops for export. In Western Australia, 41 vessels have been equipped with freezing plants to process crayfish at sea.

2. Processing.—The attempt to establish the fish preserving industry at the commencement of this century met with little success, although a bounty was paid to encourage production. The industry, however, continued to operate, but there was no marked development until after the 1939-45 War. Production of canned fish in 1960-61 was 8,212,000 lb.

In addition to the fish canned in 1960-61, 252,000 lb. of smoked fish, 1,193,000 lb. of fish paste, more than 7,500,000 lb. of frozen crayfish tails and whole cooked crayfish for export, and a considerable quantity of quick-frozen fish for the local market were produced.

In 1939, New South Wales and Tasmania were the only States canning fish, but the industry has since been extended to Victoria, South Australia and Western Australia. Details of production are given in the following table for the years 1956-57 to 1960-61.

FISH PROCESSING (EXCEPT FREEZING): AUSTRALIA.  
(‘000 lb.)

Particulars.	1956-57.	1957-58.	1958-59.	1959-60.	1960-61.

Fish Paste .. .. .	1,266	1,700	1,314	1,379	1,261
Fish Meal(f) .. .. .	1,840	1,294	1,442	1,718	2,041

(a) Fish used for canning (including fish loaf), smoking and the manufacture of fish paste, but excluding the weight of oysters, other shellfish and crustaceans used for canning. (b) The weight of headed and/or gutted fish is taken as 85 per cent. of live weight. (c) Includes fish loaf, fish cakes, etc. (d) Not available. (e) Not available for publication. (f) Excludes whale meal.

The varieties canned in the several States differ according to the species caught, but complete details for each variety are not available. Tuna is the principal variety canned in New South Wales and South Australia, while barracouta is of major importance in Victoria and Tasmania. The greater proportion of fish canned in Western Australia is Australian salmon.

3. **By-products.**—Processing of offal for fish-meal, etc., has been established in certain States. The processing of livers for vitamin-rich oils was undertaken in several States but, as mentioned in § 3, para. 2, page 1031, production has fallen to a low level in recent years.

### § 6. Consumption of Fish.

Particulars of the estimated supplies of fish, crustaceans and molluscs available for consumption per head of population, in terms of edible weight, are included in the table below for the years 1956–57 to 1960–61. For the purpose of compiling this table, the non-commercial fish catch has been estimated at ten per cent. of the recorded catch.

#### ESTIMATED SUPPLIES OF FISHERIES PRODUCTS AVAILABLE FOR CONSUMPTION: AUSTRALIA.

(lb. edible weight per head per annum.)

### § 7. Boats and Equipment.

The boats used for the inshore and estuary fisheries are mostly small vessels propelled by diesel or petrol engines of low power. The fishing gear used includes mesh nets, beach seines, various types of pots and traps, trolling and hand lines, and small otter type prawn trawls. The offshore vessels range in length from 30 feet to approximately 100 feet, and are almost invariably powered by diesel engines. Many of them have insulated holds to carry fish in ice, while some of the crayfish boats are fitted with wells in which the catch is kept alive. Other vessels have dry or brine refrigeration.

Almost every type of fishing equipment is used. This includes otter trawls for fish and prawns, Danish seines, beach seines for Australian salmon, mullet and other species, beehive type pots for crayfish, traps for crayfish and reef fish, long lines for fish and edible shark, and trolling gear for pelagic fishes including spanish mackerel, barracouta and the tunas. Most of the tuna is now taken by the live bait pole fishing method, the bait fish generally being caught with a lampara net, although several of the larger vessels have employed small purse seine or ring nets very successfully for this purpose in recent years.

The following two tables show details of the number of boats, value of boats and equipment, and number of persons employed in the taking of fish, crustaceans, molluscs (edible), pearl-shell and trochus-shell, together with some other particulars of oyster fisheries. These details have been compiled from information supplied for licensing purposes.

It should be noted that the data shown are not comparable between States. In some States, besides professional full-time fishermen, amateur part-time fishermen are licensed and the figures shown are overstated to this extent. These data should not be used as a guide to the relative effort applied in obtaining the recorded catch. Figures for 1959-60 and 1960-61 are not all comparable with those for previous years for the following reasons: in Queensland, numbers of men employed and boats engaged now refer only to those licensed to take fish for sale, whereas previously all licensed men and boats were included; in South Australia, the value of boats and equipment has been adjusted upward compared with previous years.

(a) Excludes edible oyster fisheries, except in Tasmania for years prior to 1959-60, but includes crustacean and other mollusc fisheries. (b) Figures not comparable with those for previous years. See text preceding table on page 1039. (c) Excludes particulars for Western Australia and Tasmania for years prior to 1959-60 and for Northern Territory for all years except 1960-61. (d) Figures for years prior to 1958-59 exclude the value of stakes, timber frames, etc., used on oyster leases in New South Wales. (e) Excludes Queensland. (f) Excludes Japanese pearling fleet which operated in Australian waters. (g) Excludes particulars of edible oyster fisheries for Western Australia and Tasmania for years prior to 1959-60 and for Northern Territory for all years except 1960-61.

### § 8. Whaling.

The whaling industry was re-established in Australia in 1949, operations being carried out from shore-based stations. In that year, a station began operating at Point Cloates, Western Australia. The Australian Whaling Commission, established in 1949, built a station at Babbage Island near Carnarvon, Western Australia, and began operations towards the end of the 1950 season. In 1956, legislation was passed to dissolve the Commission and its assets were sold to the private company operating at Point Cloates. The operations of this company were transferred to Babbage Island and the Point Cloates station was closed in 1956. Other stations commenced operations in the following years: Cheynes Beach, near Albany (Western Australia), in 1952, Moreton Bay (Queensland) in 1952, Byron Bay (New South Wales) in 1954, and Norfolk Island in 1956.

Each of the stations operating is allowed a quota (in terms of humpback whales) determined by the Minister for Primary Industry, acting on the advice of the Secretary of the Department of Primary Industry, who represents Australia on the International Whaling Commission. This catch quota, which may not be exceeded, was introduced in Australia in 1951 and aims at conserving the stock of whales to enable the industry to continue on a stable basis.

Sperm whaling, which commenced in 1955 on an exploratory basis, is still being carried out on the Western Australian coast, but the catch of this species is not subject to the quotas determined.

There is no prescribed season for sperm whaling, but other details shown in the following table relate to seasons extending from 1st May to 31st October of each year.

(a) In terms of humpback whales. For quota purposes, 1 blue whale is taken as equivalent of 2 fin, 2½ humpback, 6 sei or 6 bryde whales. Sperm whales are not subject to quota restrictions. (b) Includes 1 humpback whale taken on special permit. (c) Includes 2 blue whales and 3 bryde whales. (d) Includes 12 blue whales and 1 fin whale. (e) Includes 2 blue whales. (f) Excludes sperm whales, particulars of which are not available for publication. (g) 6 barrels = 1 ton. (h) Estimated. (i) Personnel employed at the beginning of the season were considerably reduced as the season progressed.

### § 9. Inquiries and Research.

1. General.—Research into the Australian fishing industry has been directed mainly towards seeking an explanation of the very slow rate of development and the conditions prevailing within the industry, as well as the paucity of supplies available to the public. Details of the inquiries undertaken and the recommendations arising from them are given in Official Year Book No. 38, page 1082, and subsequent developments are outlined below.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography.**—The work of this Division was referred to in earlier issues of the Official Year Book (*see* No. 47, p. 1029).

3. **Fisheries Division, Department of Primary Industry.**—The creation of the Fisheries Division of the Department of Primary Industry arose from a Tariff Board recommendation in 1941. Details of the establishment, organization and functions of the division, which was formerly known as the Commonwealth Fisheries Office, are given in Official Year Book No. 38, page 1084.

In accordance with the Tariff Board report, scientific research, as distinct from developmental and administrative functions, was left to the Commonwealth Scientific and Industrial Research Organization, which had established a Division of Fisheries for this purpose in 1937.

The Fisheries Division of the Department of Primary Industry is responsible for the development and administration of all forms of fishing in extra-territorial waters, commercial development of fisheries, management of marine resources (fishing, pearling and whaling), co-ordination of conservation measures imposed by the States and the Commonwealth, economic research statistics, and negotiations with foreign nations on fisheries matters, information and extensions.

4. **Fisheries Development Trust Account.**—In early 1956, the assets of the Australian Whaling Commission, an authority set up by the Commonwealth Government in 1949, were sold to private interests. The finance derived from the sale, authorized by the Fishing Industry Act 1956, was paid into a fund, known as the Fisheries Development Trust Account. Provision was made in the Act for the moneys to be used for the purposes of developing the fishing industry through research, direct financial assistance, the development of particular fisheries, training schemes, and the dissemination of information and advice through various publications and the press.

An Advisory Committee on fisheries development was formed to advise the Minister on specific projects for fisheries development. Projects which have so far been approved following recommendations by this committee include:—the purchase of a modern diesel trawler to investigate the commercial potentialities of trawling in the Great Australian Bight; a survey of the prawn resources off the east coast of Australia; a survey of the pilchard resources off the New South Wales coast; a barracouta survey in Bass Strait; a crayfish survey off the south coast of Western Australia; a tuna survey in Western Australian waters and a training school for fisheries field officers.

5. **North Australia Development Committee.**—Reference to the North Australia Development Committee was made in previous issues of the Official Year Book (*see* No. 47, p. 1030).

## § 10. Oversea Trade in Products of Fishing and Whaling.

1. **Imports of Fish.**—The value of edible fish and fish products imported in 1960–61 amounted to £9,693,000 compared with £8,047,000 in 1959–60.

Of the total quantity of 34.6 million lb. of fresh and frozen fish imported in 1960–61, South Africa contributed 12.9 million lb., United Kingdom 6.8 million lb., New Zealand 5.8 million lb., and Denmark 4.1 million lb. A quantity of 27.5 million lb. of canned fish and fish products was imported in 1960–61, and of this 9.0 million lb. originated in Japan, 6.9 million lb. in the United Kingdom and 4.2 million lb. in Canada. Particulars of the imports of fish and edible fisheries products are shown below for the years 1958–59 to 1960–61.

## IMPORTS OF FISH, CRUSTACEANS AND MOLLUSCS: AUSTRALIA.

Classification.	Quantity ('000 lb.).			Value (£'000.)		
	1958-59.	1959-60.	1960-61.	1958-59.	1959-60.	1960-61.

Fisheries Products, not elsewhere included .. ..	..	..	..	148	157	139
<i>Total Fisheries Products</i> .. ..	..	..	..	<i>6,140</i>	<i>8,047</i>	<i>9,693</i>

(a) Excludes frozen smoked which is included with "Smoked or Dried". (b) Includes extracts and caviare.

2. Exports of Fish.—In 1960-61, exports of items other than crayfish remained at the low levels of earlier years, but crayfish still retained its relative importance, its value representing nearly 92 per cent. of the total value of fish, etc., exports. Nearly all of this was exported to the United States of America.

The following table shows details of the total exports of edible fisheries products (including those produced in other countries) from Australia for the years 1958-59 to 1960-61.

## EXPORTS OF FISH, CRUSTACEANS AND MOLLUSCS: AUSTRALIA.

Particulars.	Quantity ('000 lb.).			Value (£'000.)		
	1958-59.	1959-60.	1960-61.	1958-59.	1959-60.	1960-61.

<i>Total Fisheries Products</i> .. ..	..	..	..	<i>3,675</i>	<i>4,196</i>	<i>4,398</i>

(a) Excludes frozen smoked, which is included with "Fisheries Products, not elsewhere included".

**3. Imports and Exports of Unmanufactured Shell.**—Imports of unmanufactured shell include quantities of pearl, trochus and green snail shell from New Guinea, Papua and the Pacific Islands which are subsequently re-exported from Australia.

Imports of unmanufactured shell for the three years 1958–59 to 1960–61 were, respectively, 227,000 lb. (£44,000); 156,000 lb. (£18,000); and 114,000 lb. (£10,000). Exports during the same years were:—4,312,000 lb. (£832,000); 3,572,000 lb. (£752,000); and 3,629,000 lb. (£717,000). Pearl and trochus shell accounted for most of this, the quantity and value exported in 1960–61 being:—pearl-shell, 3,089,000 lb. (£661,000); trochus-shell, 519,000 lb. (£51,000).

**4. Imports and Exports of Marine Animal Oils.**—Imports of marine animal oils during the three years 1958–59 to 1960–61 were, respectively:—494,000 gals. (£232,000); 588,000 gals. (£266,000); 774,000 gals. (£338,000). Whale oil constituted the major part of these imports.

Of the total quantity of 486,000 gals. of whale oil imported in 1960–61, 348,000 gals. originated in Norfolk Island. Imports of other marine animal oils consisted of 115,000 gals. of cod liver oil, 127,000 gals. of unrefined fish oils and 45,000 gals. of other marine animal oils.

Exports of marine animal oils during the three years 1958–59 to 1960–61, consisting almost entirely of whale oil, amounted to:—3,403,000 gals. (£1,156,000); 3,062,000 gals. (£900,000); 2,304,000 gals. (£885,000). Of the total exports in 1960–61, whale oil accounted for 2,298,000 gallons valued at £865,000.

## CHAPTER XXVII. MINERAL INDUSTRY.

**NOTE.**—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated. Further detailed information on the subjects dealt with in this chapter is contained in the annual printed Bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* issued by this Bureau, and in *The Australian Mineral Industry—Annual Review* and other publications issued by the Bureau of Mineral Resources, Geology and Geophysics, which also issues, in co-operation with this Bureau, a quarterly publication *The Australian Mineral Industry*, comprising two parts—Part I.—Quarterly Review, and Part II.—Quarterly Statistics. The mimeograph statistical bulletin *Mining and Quarrying* of this Bureau contains annual statistics of the industry prepared and published as soon as possible after the data have been compiled. A monthly statistical bulletin *The Gold Mining Industry, Australia* is issued also, and other current information on mining or mine products is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*.

### § 1. Introduction.

**1. Sources of Statistics.**—In the main, the data contained in this chapter consist of official statistics of the Mines Departments of the several States and of the Northern Territory Mines Branch. The particulars shown have been compiled as far as practicable on the standardized basis which has been used in Australia since 1950, and this presentation has involved some rearrangement of official statistics published by the Mines Departments in some States. These statistics have been supplemented, as necessary, by data obtained from the Statisticians of the several States, the Commonwealth Bureau of Mineral Resources, the Joint Coal Board, the Australian Mines and Metals Association (Inc.), the Mineral Resources Division of the United Kingdom Overseas Geological Surveys and from several other sources.

**2. Presentation of Mineral Statistics.**—(i) *Mineral Industry Data.* The mineral industry includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. Ore-dressing and elementary smelting of metallic minerals (e.g., in the case of gold) and miscellaneous treatment of non-metallic minerals, where these are carried out in an associated plant at or near the mine, are included in the mineral industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mount Morgan and Mount Isa in Queensland and at Mount Lyell in Tasmania are omitted and classified to the manufacturing industry.

For mines and quarries which produce more than one product, it is not possible to apportion some particulars relating to the operations of the mine (employment, salaries and wages paid, and costs incurred in production) to the minerals produced. It is, therefore, the practice to record these data only as a total for each mine and then to classify each mine to the industry of the most important mineral produced. Thus a mine producing, say, both tin and tungsten minerals, would be classified as a tin mine if tin were the more important product by value, or vice versa if tungsten were the dominant product.

The mineral industries are classified into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining, and Construction Material Quarrying.

Mineral industry data have been obtained annually, since 1952, from the Mining and Quarrying Census. This census is carried out in collaboration with the several Mines Departments and involves the uniform collection of particulars from all establishments employing on the average four or more persons during the period worked by the mine. A representative specimen collection form is included in the Bulletin *Primary Industries, Part II.*, No. 54, 1959–60, pages 47 and 48. For smaller mines, either simplified Census returns covering number of persons employed and value of output are collected, or these particulars are compiled from data made available by the Mines Departments.

Statistics of oil search operations have been excluded in accordance with the definition of the mining industry set out above, but a special article on current developments in the search for oil, contributed by the Commonwealth Bureau of Mineral Resources, may be found in § 15 of this chapter. Details of the activities of establishments engaged in the mining and treatment of uranium ore have been excluded because of the confidential nature of these operations.

(ii) *Mineral Product Data.* In the preparation of Australian mineral production statistics, the quantities and values of individual minerals produced are recorded in terms of the products in the form in which they are dispatched from the locality of each mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine, or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the

contents of metallic minerals and contents or average grade of selected non-metallic minerals are recorded. Whenever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral. Other metallic contents which are not recovered are excluded.

Minerals are divided into four major groups, namely, Metals, Fuels, Non-metals (excluding Fuels) and Construction Materials. In this chapter, individual mineral products are arranged in these four groups.

Particulars relating to uranium-bearing minerals are excluded.

**3. Occurrences of Minerals.**—The greatest part of the area of outcropping rock on the Australian continent is Precambrian in age. These basement rocks form the western and central core of the continent and are flanked by younger Palaeozoic rocks which, along the eastern edge of the continent, form a belt several hundred miles wide extending from north Queensland to Tasmania. Smaller areas of Palaeozoic rocks occur in other States. Mesozoic sediments overlie large areas of the continent and reach their greatest development in central Queensland. Cainozoic rocks occur mainly in the southern parts of Victoria and South Australia and as residual basalt cappings over an extensive area of the Palaeozoic rocks of eastern Australia.

Minerals occur widely throughout the Precambrian and Palaeozoic rocks of the continent. Palaeozoic mineralization is perhaps more varied, but the deposits now being worked are in general smaller than those found in Precambrian rocks. Most of the larger deposits of minerals now being mined in Australia are shown in the following table according to the geological era in which they were formed.

#### PRINCIPAL AUSTRALIAN MINERAL DEPOSITS.

Age of Geological Formation in which Located.	Metal or Mineral.	State or Territory.	Locality.
Precambrian (more than 520 million years old)	Copper ..	Queensland ..	Mount Isa
	Gold .. ..	Northern Territory	Tennant Creek
	Iron .. ..	Western Australia	Kalgoorlie and other localities
	Lead-Silver-Zinc	South Australia ..	Middleback Ranges
	Uranium ..	Western Australia	Yampi Sound
Palaeozoic (between 200 and 520 million years old)		New South Wales	Broken Hill
	Black Coal ..	Queensland ..	Mount Isa
		Western Australia	Mary Kathleen
	Copper-Gold ..	Queensland ..	Radium Hill
	Lead-Silver-Zinc	South Australia ..	Rum Jungle and South Alligator River Area
	Tin (Iode) ..	Northern Territory	
	Tungsten ..	New South Wales	Hunter Valley, Lithgow, South Coast
		Queensland ..	Baralaba, Blair Athol, etc.
		Western Australia	Collie
		Queensland ..	Mount Morgan
Mesozoic (between 75 and 200 million years old)		Tasmania ..	Mount Lyell
	Black Coal ..	Tasmania ..	Mount Read and Rosebery
	Mineral Sands(a)	Queensland ..	Herberton
		Tasmania ..	North-east of State
		Tasmania ..	King Island and North-east of State
Cainozoic (less than 75 million years old)	Black Coal ..	Queensland ..	Ipswich
	Mineral Sands(a)	South Australia ..	Leigh Creek
		Tasmania ..	St. Marys
		New South Wales	North Coast
	Queensland ..	South Coast	
Cainozoic (less than 75 million years old)	Brown Coal ..	Victoria ..	Gippsland
	Tin (alluvial) ..	New South Wales	Tingha
		Queensland ..	Herberton
		Tasmania ..	North-east of State

(a) The deposition of mineral sands, derived from Palaeozoic granites, continued throughout the Cainozoic Era.

The large bauxite (aluminium) deposits of Cape York Peninsula in Queensland, for which an extensive mining programme is being developed, were formed during the early part of the Cainozoic Era as a result of climatic conditions then prevailing.

Of the non-metallic minerals, many, such as clay, sand and silica, etc., are not restricted to the rocks of any particular era. However, Precambrian rocks do contain important deposits of asbestos in Western Australia, limestone and dolomite in South Australia, and mica in the Northern Territory. All crude salt is produced by the evaporation of water from pans constructed along the sea coast or from inland lakes.

4. **Mineral Concentrates.**—Concentration is a physical process involving the removal of mineral impurity from the ore. Most mines now dispatch ore in concentrate form, as this considerably reduces the transport costs and produces a saleable product in the form required by smelters. Most concentrates are nearly pure mineral and the ore-dressing processes (with the exception of that for uranium) involve no chemical change to the mineral being won. Various methods are used in concentration. Sulphide ores which now comprise the greatest tonnages treated are, in most instances, separated from the gangue by flotation. In this method of concentration, the ore is ground finely enough to liberate the individual mineral particles, aerated, and agitated in tanks of water to which chemicals have been added. Under certain conditions, particles of one sulphide mineral adhere to the froth bubbles and are collected in the froth overflow, while gangue and even other sulphides are depressed. By treating the tailings of one flotation process with different chemicals and conditions, it is often possible to separate a further concentrate, as is done at Broken Hill where the zinc sulphide is recovered from the tailings of the lead sulphide concentration process. Until operations ceased in 1962, differential flotation was extensively developed at Captain's Flat, in New South Wales, where successive concentrates of copper, lead, zinc and pyrite were obtained from a lead-silver-zinc-copper ore.

Other methods of concentration used are gravity (alluvial tin, mineral sands, some lead-zinc ores), electromagnetic (wolfram, scheelite, glauconite and mineral sands) and electrostatic (mineral sands).

Particulars of an average Broken Hill ore mined during 1960, showing metal contents before and after differential flotation, are shown in the following table. It should be noted that in both the ore and the concentrate, lead and zinc are contained in the form of lead sulphide and zinc sulphide respectively. Most of the silver is contained in minerals which are collected with the lead sulphide.

**ORE TREATED AND CONCENTRATES PRODUCED BY DIFFERENTIAL  
FLOTATION AT BROKEN HILL (a), 1960.**

Particulars.	Quantity.	Proportion of weight of ore mined.	Average Assays.			Proportion of Metal Distribution.		
			Lead.	Silver.	Zinc.	Lead.	Silver.	Zinc.
	tons.	%	%	f. oz.	%	%	%	%
Ore treated ..	1,996,365	100.0	11.4	4.1	11.9	100.0	100.0	100.0
Lead Concentrate	294,555	14.8	75.3	25.9	4.1	97.9	94.0	5.2
Zinc Concentrate	413,727	20.7	0.8	0.7	52.3	1.5	3.8	91.4
Residues(b) ..	1,288,083	64.5	0.1	0.1	0.6	0.6	2.2	3.4

(a) Average particulars for the five operating companies. (b) These are of no economic use at present and are either pumped as filling for underground workings or otherwise discarded.

## § 2. The Mineral Industry.

1. **Persons Engaged.**—Particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, showing the numbers of persons whose "industry" was stated to be "mining and quarrying", were included in previous issues of the Year Book. Corresponding particulars from the 1961 Census are not yet available.

Particulars of the numbers of persons engaged in the various mining and quarrying industries, as collected in the Annual Mining and Quarrying Census, are included in paras. 4 (ii) and (iii), pages 1051-2.

2. **Size Classification of Mines and Quarries.**—Most of the mines and quarries worked during 1960 employed less than four persons, including working proprietors. However, more than half of the persons engaged in mining and quarrying were in the 56 mines each employing 200 persons or more. The following table shows the distribution of the total number of mines into various size groups according to the average number of persons employed during the period worked by each mine in 1960. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1045.

**MINING AND QUARRYING: SIZE CLASSIFICATION OF ESTABLISHMENTS, 1960.**

Mines and Quarries employing on the average(a)—	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T. (b)	Aust.
<b>Less than 4 persons—</b>								
Establishments ..	639	83	298	271	248	64	71	1,674

Persons ..	22,335	4,140	8,796	2,329	8,055	2,951	504	49,110

(a) Average during period worked. Includes working proprietors. (b) Includes Australian Capital Territory, details of which are not available for publication separately. (c) Not available for publication; included in total.

3. **Value of Production.**—(i) *General.* In 1960, the local value of mining and quarrying in Australia (the value of output, or the selling value of mine and quarry products at the mine or quarry) was £180,898,000, or 12.3 per cent. of the production of all primary industries. The most important State was New South Wales with £79,204,000, followed by Queensland with £37,608,000 and Western Australia with £22,166,000.

(ii) *Local and Net Values of Production, 1960.* Local and net values of mining and quarrying production for each State are shown for 1960 in the following table. A more detailed reference to the value of production of mining and quarrying and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

## MINING AND QUARRYING: LOCAL AND NET VALUES OF PRODUCTION, 1960.

(£'000.)

State or Territory.	Local Value (Value of Output at Mine or Quarry).	Cost of Power, Fuel, Light and Other Materials and Stores Used.	Net Value. (a)
New South Wales .. ..	79,204	16,427	62,777
Victoria .. .. .	16,267	3,109	13,158
Queensland .. .. .	37,608	10,148	27,460
South Australia .. ..	13,952	2,548	11,404
Western Australia .. ..	22,166	6,722	15,444
Tasmania .. .. .	8,162	2,591	5,571
Northern Territory(b) .. ..	3,539	668	2,871
<b>Australia .. .. .</b>	<b>180,898</b>	<b>42,213</b>	<b>138,685</b>

(a) Local value less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Includes Australian Capital Territory, details of which are not available for separate publication.

(iii) *Local Values, 1956 to 1960.* In the following table, the local values of mining and quarrying production are shown by States and Territories for the years 1956 to 1960.

## MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION.(a)

(£'000.)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1956 ..	88,790	11,891	30,204	11,910	20,230	10,555	2,594	146	176,320
1957 ..	83,170	12,728	25,576	11,872	20,979	8,421	2,195	170	165,111
1958 ..	71,414	13,694	27,632	12,308	20,777	7,358	2,564	208	155,955
1959 ..	71,090	14,935	33,329	13,209	21,787	7,639	2,727	269	164,985
1960 ..	79,204	16,267	37,608	13,952	22,166	8,162	b 3,539	(c)	180,898

(a) Value of output or selling value of products at the mine or quarry. (b) Includes Australian Capital Territory. (c) Not available for publication; included with Northern Territory.

(iv) *Net Values of Production, 1956 to 1960.* In the following table, the net value of mining and quarrying production and the value per head of population are shown by States and Territories for the years 1956 to 1960.

## MINING AND QUARRYING: NET VALUE OF PRODUCTION.(a)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE OF PRODUCTION.(a) (£'000.)									
1956 .. ..	72,053	9,457	24,148	9,487	14,350	8,298	2,084	105	139,982
1957 .. ..	66,091	9,944	18,810	9,320	14,889	5,897	1,741	110	126,802
1958 .. ..	55,801	10,987	19,796	9,999	14,454	5,168	1,997	134	118,336
1959 .. ..	56,331	12,101	24,481	10,698	14,765	5,398	2,202	179	126,155
1960 .. ..	62,777	13,158	27,460	11,404	15,444	5,571	(b)2,871	(c)	138,685

NET VALUE OF PRODUCTION(a) PER HEAD OF POPULATION.  
(£.)

1956 .. ..	20.1	3.6	17.3	11.0	21.2	25.6	104.6	2.9	14.7
1957 .. ..	18.2	3.7	13.2	10.5	21.5	17.8	82.0	2.8	13.0
1958 .. ..	15.0	4.0	13.6	11.0	20.5	15.3	88.7	3.1	11.9
1959 .. ..	14.8	4.3	16.6	11.5	20.6	15.7	89.6	3.6	12.4
1960 .. ..	16.2	4.5	18.3	11.9	21.2	15.9	(b) 35.5	(c)	13.3

(a) Local value, or value of output, less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Includes Australian Capital Territory. (c) Not available for publication; included with Northern Territory.

4. Statistics of the Principal Mining and Quarrying Industries.—(i) Summary, 1960. In the next table, statistics of numbers of mines and quarries, persons employed, local and net value of production and other particulars are shown for the major industry groups for the year 1960. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1045.

## MINING AND QUARRYING: SUMMARY OF OPERATIONS, INDUSTRY GROUPS, AUSTRALIA, 1960.

Industry Group.	Mines and Quarries.	Persons Employed. (a)	Salaries and Wages Paid. (b)(c)	Local Value of Production. (d)	Total Fuel, Materials, etc., Used.	Net Value of Production. (e)	Value of Additions and Replacements to Fixed Assets.(b)
	No.	No.	£'000.	£'000.	£'000.	£'000.	£'000.
Metal Mining ..	746	19,889	26,727	83,918	23,504	60,414	6,823
Fuel Mining ..	221	19,812	27,703	61,609	11,942	49,667	12,861
Non-metal (excluding Fuel) Mining(f) ..	702	2,925	2,664	10,866	2,340	8,526	588
<i>Total, All Mining ..</i>	<i>1,669</i>	<i>42,626</i>	<i>57,094</i>	<i>156,393</i>	<i>37,786</i>	<i>118,607</i>	<i>20,272</i>
Construction Material Quarrying(g) ..	892	5,016	3,628	24,505	4,427	20,078	1,624
<b>Total, All Mining and Quarrying</b>	<b>2,561</b>	<b>47,642</b>	<b>60,722</b>	<b>180,898</b>	<b>42,213</b>	<b>138,685</b>	<b>21,896</b>

(a) Average number employed (including working proprietors) during whole year. (b) Excludes mines and quarries employing less than four persons. (c) Excludes drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees. (d) Value of output or selling value of products at mine or quarry. (e) Local value less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (f) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g., clays and salt). (g) Incomplete owing to difficulties of coverage.

In the next table, statistics of numbers of mines and quarries, persons employed, local and net value of production are shown for each State and for the Northern Territory for the year 1960. Details for the Australian Capital Territory are included with the Northern Territory.

## MINING AND QUARRYING: SUMMARY OF OPERATIONS, 1960.

State or Territory.	Mines and Quarries.	Persons Employed. (a)	Salaries and Wages Paid. (b)(c)	Local Value of Production. (d)	Total Fuel, Materials, etc., Used.	Net Value of Production. (e)	Value of Additions and Replacements to Fixed Assets. (b)

<b>Total, All Mining and Quarrying</b> .. .. .	<b>62,394</b>	<b>61,648</b>	<b>57,308</b>	<b>57,486</b>	<b>60,722</b>

(a) Excludes mines and quarries employing less than four persons, and drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees.

(b) Incomplete.

(v) *Accidents in Mining.* Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis in all States, as varying criteria are used in determining what constitutes injury for the purpose of these records. In 1960, 36 persons were recorded as having been killed and 1,537 as having been injured in mining (excluding quarrying) accidents. Recorded deaths and injuries in that year were highest in black coal mines (16 and 463, respectively), gold mines (8 and 409) and lead-silver-zinc mines (3 and 319).

(vi) *Local and Net Values of Mining and Quarrying Production, 1960.* The following two tables show particulars of the local and net value of production for individual mining industry groups and quarrying for the year 1960. It should be noted that these statistics are on an industry basis and not by product. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1045.

**MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION(a), 1960.**

(a) Prior to 1958, the value of lead-copper concentrate was included with copper ore, concentrate, etc. (b) Includes the value of iron oxide for fluxing for years prior to 1959. (c) Excludes Australian Capital Territory, details of which are included with construction materials. (d) Incomplete owing to difficulties of coverage.

NOTE.—Particulars of the value of uranium concentrate produced are not available for publication and have been excluded from the table above.

Particulars of the local value (or value of output) and net value (or value of production) of production of the principal Mining and Quarrying industries for the year 1960 are shown in para. 4 (vi.), page 1053. Owing to the necessity of classifying individual mines according to the principal mineral produced, the values in the tables on pages 1050 and 1053 for mining industry groups differ slightly in some cases from totals of the corresponding groups of mine products shown in the table above.

#### § 4. Gold.

1. Historical.—The earliest definite record of the discovery of gold in Australia was made on 15th February, 1823, by James McBrien, a surveyor, while surveying the Fish River between Rydal and Bathurst, New South Wales, and there are records of gold having been identified in several places during the next 27 years. It is believed that the first authentic

discovery of gold from which actual mining operations resulted was made in January, 1846, about 10 miles east of Adelaide, South Australia. However, credit for the first discovery of payable gold is generally given to E. H. Hargraves, who, on 3rd April, 1851, notified the Government of New South Wales of his find, located at the junction of the Summerhill and Lewis Pond Creeks in the Bathurst (N.S.W.) district. This caused a gold rush, and prospecting started in many localities.

The Colony of Victoria was separated from New South Wales on 1st July, 1851, and within a few days of its inception, the new government was notified of the discovery of gold in several places. It would appear that the Hon. W. Campbell discovered gold near Clunes (Victoria) in March, 1850, but temporarily concealed the fact, and his discovery was not disclosed until 8th July, 1851. The discovery of gold at Ballarat and Bendigo followed soon afterwards.

The early discoveries were of alluvial gold, and only crude equipment was required to work them. As a consequence, cities and towns were depleted of their population as large numbers rushed to the diggings. The Australian population growth from 438,000 at the end of 1851 to 1,168,000 at the end of 1861 can be said to be due largely to the discoveries of gold.

Discoveries continued to be made, including such important fields as Canoona (Queensland) in 1858, Forbes (New South Wales) in 1862, Gympie (Queensland) in 1868, and Charters Towers and Mount Morgan (both in Queensland) in 1882. With the discovery at Mount Lyell (Tasmania) in 1886, the major discoveries in the eastern States ceased.

Western Australia did not enter the field for a considerable time after gold mining had become well established in most of the other States. Although some specimens had been found between 1850 and 1870, it was not until 1886 that the Kimberley field was discovered, followed by Yilgarn in 1887. In 1892, Bayley and Ford discovered Coolgardie, and in May of the following year Hannan and Flannigan found Kalgoorlie. In the years since, there have been no further discoveries of major goldfields although many profitable deposits in other localities have been found and worked.

The amount of gold won in Australia in any one year attained its maximum in 1903, the year in which Western Australian production reached its highest level. For the other States, the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904; and Tasmania, 1899. In recent years, output from the Northern Territory has expanded considerably and the highest annual production was recorded as recently as 1956.

Owing to the exhaustion of the more easily worked deposits and increased costs due to deep mining, the production of gold in Australia declined from 3,837,979 fine oz. in 1903 to 427,160 fine oz. in 1929, the lowest output since its discovery. Increased activity in prospecting due to prevailing economic conditions resulted in some improvement in 1930, but the marked development between that year and 1939 was caused by the heavy depreciation of Australian currency in terms of gold. Following the outbreak of the 1939–45 War, there was a sharp fall in gold production to 656,867 fine oz. in 1944 and 657,213 fine oz. in 1945, but with the release of man-power after the war, there has been an upward trend in mine production of gold, which in 1953 exceeded 1,000,000 fine oz. for the first time since 1942. The devaluation of Australian currency in September, 1949, gave an impetus to gold production, but this was offset in the following years by increasing costs which forced several large producers to cease operations. The payment of gold subsidy since 1954 has been an important factor in maintaining production slightly in excess of 1,000,000 fine oz. annually in subsequent years.

**2. Present Methods of Mining and Treatment.**—Gold ores can be divided into two types, namely, free-milling and refractory. Free-milling ores are those that, when finely ground, will yield their gold content to amalgamation and/or cyanidation, and these are found in most of the gold deposits of Australia.

Some refractory ores, which are not amenable to amalgamation, allow their gold to be dissolved by cyanidation, from which solution the gold is then precipitated. However, on the Coolgardie field, where gold-bearing sulphide and telluride minerals occur, it is necessary first to recover these from gangue by flotation. This concentrate is then roasted and the resulting calcine, an impure oxide containing free gold, is cyanided to yield gold. This is usually smelted as bullion, in which form it leaves the vicinity of the mine.

3. **Mine Production.**—The table hereunder shows the mine production of gold (gold content of minerals produced) during 1960 according to the mineral in which it was contained and the State or Territory of origin. It should be noted that the minerals shown below contain certain other metals in addition to gold.

## GOLD : MINE PRODUCTION, 1960.

(Fine oz.)

Mineral in which contained.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc. ..	3,066	..	64,222	..	1,313	7,188	12,545	88,334

Lead-Copper Concentrate ..	..	..	..	..	..	10,978	..	10,978
Pyrite Concentrate ..	..	..	..	..	(a)	..	..	(a)
Zinc Concentrate ..	1,716	..	..	..	..	2,124	..	3,840
<b>Total Gold ..</b>	<b>13,628</b>	<b>28,566</b>	<b>78,267</b>	<b>36</b>	<b>869,966</b>	<b>23,994</b>	<b>72,252</b>	<b>1,086,709</b>

(a) A small quantity of gold recovered from pyrite concentrate dispatched from Kalgoorlie for sulphuric acid manufacture is included with gold ore, concentrate, etc.

The principal sources of production during 1960 were as follows.

(i) *New South Wales.* There are now no mines employing four or more hands engaged solely in gold mining in New South Wales. Most of the gold produced during 1960 was contained in lead and zinc concentrates produced at Broken Hill and copper, lead, zinc and gold concentrates milled at Captain's Flat.

(ii) *Victoria.* At Chewton, near Castlemaine, one mine produced more than half of the State's production. In addition, four gold mines located in the north-east of the State each produced more than 1,000 fine oz.

(iii) *Queensland.* The copper concentrate produced at Mount Morgan contained more than three-quarters of the State's output of gold, nearly all the remaining production coming from a mine at Cracow.

(iv) *South Australia.* The only gold produced was won by prospectors.

(v) *Western Australia.* More than half of the total production came from the Coolgardie goldfields, while most of the remaining production came from the Dundas, Murchison and Yilgarn goldfields. A single mine at Fimiston maintained its position as the largest gold producer in Australia, mining 174,219 fine oz. during 1960, and three other mines each produced over 100,000 fine oz. in the same period.

(vi) *Tasmania.* Lead-copper, lead and zinc concentrates milled at Rosebery contained more than two-thirds of the gold produced in Tasmania during 1960, nearly all of the remaining production being contained in copper concentrate produced at Mount Lyell.

(vii) *Northern Territory.* Gold production in the Northern Territory is centred around Tennant Creek.

The following table shows the recorded mine production of gold (i.e., gold content of minerals produced) in the several States and in Australia as a whole during each of the ten decennial periods from 1851 to 1950, and in single years from 1951 to 1960. Owing to defective information in the earlier years, it is likely that the recorded production falls considerably short of the actual totals.

(a) Gold content of minerals produced.

(b) Less than 500 fine oz.

4. Refinery Production.—Amalgam and gold slimes from cyanide extraction are treated at the mines to produce gold bullion, which at some mines may be partly refined before dispatch to the Royal Mints, located in Melbourne and Perth. By-product gold from lead smelting is refined at Port Pirie in South Australia, while the gold contained in copper refinery sludges, resulting from electrolytic copper refining at Mount Lyell and Port Kembla, is recovered at Port Kembla. Gold bullion and other gold-bearing materials are also refined in Sydney.

Details of the refinery production of gold in Australia and the value of refined newly-won gold of Australian origin are shown in the following table for each of the years 1957 to 1961. The value of the refined newly-won gold is based on the price fixed by the Reserve Bank, but allowance is made for premiums on sales of gold overseas and for industrial purposes in Australia.

## PRODUCTION OF REFINED GOLD IN AUSTRALIA.

(a) Excludes U.S.S.R. The United States Bureau of Mines has estimated U.S.S.R. production at 9-10 million fine oz. per annum in recent years.

7. **Prices of Gold.**—Under existing legislation, all gold produced in Australia is sold to the Reserve Bank. The official price of gold is fixed by the Reserve Bank. On 1st May, 1954, it was raised from £15 9s. 10d. to £15 12s. 6d. per fine oz. and has remained unchanged since that date. The current price reflects the "parity" value of Australian currency established by the International Monetary Agreement Act 1947. Prior to 1947, the price of gold was based on the price for which it could be sold abroad in official markets, less cost of movement.

Average prices of gold per fine oz. at mints in Australia and on the London gold market, for the years 1957 to 1961, are shown in the following table.

**PRICES OF GOLD: AUSTRALIA AND LONDON.**  
(per fine oz.)

London .. Estg. s. d.	12 10 3	12 9 9	12 9 10	12 11 2	12 11 0

8. **Sales of Gold on Oversea Premium Markets.**—In November, 1951, the Commonwealth Government decided to allow Australian gold producers to benefit from the higher prices then being paid for gold on some overseas markets. To implement this decision, the Gold Producers' Association Limited was incorporated in December, 1951, and the first sales were made in that month. By arrangement with the Reserve Bank of Australia, the total quantity of newly-won gold delivered to the Bank by members of the Association in any calendar month, less the quantity required for industrial purposes in Australia, is available to the Association for sale on overseas premium markets during the ensuing two calendar months. The net proceeds from premium sales are distributed to members in proportion to their production of gold. The actual volume of sales on overseas premium markets has been dependent largely on the premium over the Australian fixed price.

The following table shows the quantity and value of gold sold on overseas premium markets and the average price realized for these sales during the years 1957 to 1961. It should be noted that this series is in no way indicative of the average return to gold producers for all gold produced.

**GOLD SOLD ON OVERSEA PREMIUM MARKETS.**

9. **Assistance to the Gold-Mining Industry.**—(i) *Gold Subsidy.* Towards the end of 1953, the price of gold on overseas premium markets fell sharply and conditions in the gold-mining industry became acute. Many producers were faced with the likelihood of closing down. To meet this situation, the Gold-Mining Industry Assistance Act was assented to on 18th November, 1954. The purpose of this Act was to assist the gold-mining industry in Australia and the Territories of Papua and New Guinea by the payment of a subsidy, subject to certain conditions, on the production and sales of gold. To be eligible for the subsidy, the value of a producer's output of gold must exceed 50 per cent. of the total value of his mine output. The subsidies paid under the original Act were increased under amendments enacted on 22nd October, 1957, and 22nd May, 1959. Under the Act as it now stands, the subsidy payable to small producers whose annual output does not exceed 500 fine oz. is £2 8s. 0d. per fine oz., irrespective of cost of production. For large producers, subject to certain provisions, subsidy is paid at the rate of three quarters of the excess of the average cost of production over £13 10s. 0d. per fine oz. with a maximum amount of subsidy of £3 5s. 0d. per fine oz. A producer whose output during the year exceeds 500 fine oz. may elect to be treated as a small producer. In this case the amount of subsidy allowable is reduced by one penny for each fine oz. in excess of 500 fine oz. produced. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of sales on overseas premium markets or otherwise, the subsidy payable is reduced

by the amount of the excess. The subsidy is also limited to the extent that the annual net profit of a producer shall not, with the addition of the subsidy, exceed 10 per cent. of the capital investment in the company. The maximum expenditure on development allowable in determining costs is £5 5s. Od. per fine oz. A further condition of the Act is that the recovery rate of the mine shall not fall below nine-tenths of that for the year previous to the commencement of the Act. Payments under the Act are to continue until 30th June, 1965.

Payments under the Act commenced in March, 1955, and the amounts paid to gold producers in the various States and Territories of Australia in each of the years 1957 to 1961 are shown in the following table.

NET SUBSIDY PAYMENTS TO GOLD PRODUCERS.

(ii) *Income Taxation Exemption.* Income from gold mining is exempt from taxation in the hands of the producer. If the producer is a company, such income is exempt from taxation in the hands of the shareholders when paid as dividends.

10. *Employment in Gold Mining.*—Particulars of the numbers of persons employed in gold mining are shown in paras. 4 (ii) and (iii), pages 1051–2.

## § 5. Lead, Silver and Zinc.

1. *Historical.*—Prior to the discovery of the great Broken Hill lead-silver-zinc lode in 1883 by Charles Rasp, a boundary rider, the mining of lead-silver-zinc ores at other localities in New South Wales had been intermittent and only small quantities were produced. The Broken Hill lode has proved to be one of the biggest in the world and to date over 80 million tons of ore have been raised. The Broken Hill Proprietary Co. Ltd., now engaged in steel manufacture, was the company first formed to operate at Broken Hill and continued operations there until 1939 when the ore in its leases became exhausted. The first ores mined at Broken Hill were oxidized and required only simple smelting to produce a lead-silver bullion. No initial attempt was made to recover zinc and it was not until 1897 that the first commercial zinc concentrate was produced. The exhaustion of the oxidized ore early this century led to the mining of the deeper sulphide ores. The need to produce separate lead and zinc concentrates for smelting purposes, with economic metal recoveries, resulted in the perfection at Broken Hill of the differential ore flotation process. The preparation of sulphide concentrates by flotation methods is now used throughout the world. Mining operations at Broken Hill are now mainly carried on to the north and south of the original leases. In 1939, Lake George Mines Ltd. at Captain's Flat, near Canberra, commenced large-scale mining of a lead-zinc-copper ore body which had been first worked in 1882. The Captain's Flat mine ceased operations during 1962 because of the exhaustion of ore reserves.

Lead-silver-zinc ores have been mined in Queensland since 1870, but it was not until 1923 that the largest ore-body, at Mount Isa, was discovered by John Miles. Mount Isa Mines Ltd. commenced mining operations at this centre in 1931. Mount Isa is now the second largest centre in Australia producing lead-silver-zinc ores and the largest producer of copper. During the 1939–45 War, mining of lead-silver-zinc ores at Mount Isa was suspended in favour of copper production.

Lead-silver ores were first discovered in Western Australia in the Northampton District in 1848 and most of the subsequent production in that State has been from that District.

The first recorded production of lead in Tasmania was in 1888, and of zinc, in 1919. Production has been restricted to the West Coast.

2. *Present Methods of Mining and Treatment.*—Nearly all ores now mined are composed of deep-lying sulphide minerals and it is therefore necessary to mine these ores by underground methods. At all large mines, it is the practice to produce separate lead and zinc concentrates

with the lead concentrate containing most of the silver. These concentrates are prepared by differential flotation except in cases where a satisfactory concentrate can be obtained by gravity methods. In flotation plants, the ore is finely ground and by differential flotation a lead concentrate is first produced, with the zinc concentrate subsequently separated from the tailings. At Captain's Flat, differential flotation methods were used to produce successive concentrates of copper, lead, zinc and pyrite.

Particulars of representative Broken Hill lead and zinc concentrates are shown in para. 4 page 1047.

3. Mine Production.—The following table shows for 1960 the mine production (metal content of ores and concentrates produced) of lead, silver and zinc in Australia, and the respective minerals in which these metals were contained.

**LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES

(a) Includes lead-silver ore.

(b) Estimated.

The principal sources of production of lead, silver and zinc during 1960 were as follows.

(i) *New South Wales.* Lead and zinc concentrates, produced only at Broken Hill and Captain's Flat, contained nearly all the New South Wales production of lead and silver and all the zinc. The five Broken Hill mines now operating, are:—Zinc Corporation Ltd., New Broken Hill Consolidated Ltd., North Broken Hill Ltd., Broken Hill South Ltd., and Barrier Central Pty. Ltd. These mines, during 1960, produced (in terms of the contents of all ores and concentrates produced) more than three-quarters of Australia's lead and zinc and more than one half of the silver.

(ii) *Victoria.* All the silver produced was obtained from gold mining operations. No zinc-bearing minerals are mined in Victoria and lead was last mined in 1957.

(iii) *Queensland.* Mount Isa produced all the zinc concentrate and nearly all the lead concentrate in Queensland during 1960. These contained most of the State's production

of lead and silver and all the zinc. Nearly all the remaining silver was contained in copper concentrate produced at Mount Morgan.

(iv) *South Australia.* A small quantity of zinc ore for fertilizer was mined during 1960; there was no mine production of lead or silver during the year.

(v) *Western Australia.* Most of the silver produced in Western Australia was obtained from gold bullion produced by the gold-mining industry. All the lead produced was contained in lead concentrate. No zinc was produced during 1960.

(vi) *Tasmania.* All the lead, silver and zinc was produced from mines on the West Coast. All the zinc and most of the lead and silver were produced from mines at Rosebery and Mount Read and milled at Rosebery to produce separate lead, zinc, and lead-copper concentrates.

(vii) *Northern Territory.* All the silver was contained in copper concentrates produced from Tennant Creek and Rum Jungle. No ores containing lead or zinc were mined.

The table hereunder shows the quantities of lead, silver and zinc contained in minerals won in the several States and the Northern Territory during the years 1956 to 1960.

4. **Smelter and Refinery Production.**—(i) *Lead Concentrate.* Lead concentrate produced at Broken Hill is railed to Port Pirie, in South Australia, for smelting and refining. Lead-silver bullion is produced from initial smelting, and lead, silver and gold are then refined. Cadmium is obtained from smelter fumes and refined to produce rods of metal. The sulphur dioxide gas formed during pre-smelter sintering operations is used to manufacture sulphuric acid. The antimony contained in the concentrate is alloyed with lead to form marketable antimonial lead while the copper is processed to the matte and speiss stage and sent to copper refineries for copper extraction. Because of the continued low price of lead, production in 1960 of refined metal at Port Pirie was below capacity. Some of the Broken Hill concentrate not treated at Port Pirie was exported.

Lead ore and concentrate produced at Mount Isa is smelted at the mine to derive a lead bullion which is rich in silver. All this bullion is exported to the United Kingdom for refining. A lead-copper dross is produced as a by-product of lead smelting and this is also exported.

Lead and lead-copper concentrates produced in Tasmania, and lead concentrates produced in Western Australia and at Captain's Flat in New South Wales, are exported.

(ii) *Zinc Concentrate.* More than half of the zinc concentrate produced at Broken Hill is exported, and the remainder is shipped from Port Pirie to Risdon, near Hobart, for refining. At Risdon, the Broken Hill concentrate, together with all zinc concentrate produced in Tasmania, is roasted to form zinc oxide, or calcine. Sulphur dioxide formed during this roasting process is used for the manufacture of sulphuric acid. The calcine is leached with a weak solution of sulphuric acid to form a zinc sulphate solution which, after purification, is electrolysed. Zinc of high purity is deposited on the cathodes and this zinc is melted and cast into ingots. Cadmium metal and cobalt oxide are also recovered. Lead-silver residues are recovered and forwarded to Port Pirie for smelting with lead concentrates. Copper residues are sent to Port Kembla for treatment.

Prior to 1960, zinc concentrates produced at Mount Isa and Captain's Flat were exported. Part of the 1960 production by Mount Isa and all the 1961 production at Captain's Flat were shipped to Risdon, Tasmania, for refining.

In the following table, details are given of the production and sales of refined primary lead, silver and zinc as recorded from data received from the Bureau of Mineral Resources and the Australian Mines and Metals Association. The figures shown for refined silver production include small quantities recovered from imported materials.

6. Prices of Lead, Silver and Zinc.—The following table shows average prices of lead, silver and zinc in Australia and on the London Metal Exchange during the years 1957 to 1961.

## PRICES OF LEAD, SILVER AND ZINC.

Particulars.	1957.	1958.	1959.	1960.	1961.
<i>Australian Prices, in Australian currency—</i>					
Lead, per ton(a) .. £	117	87	100	100	99
Silver, per fine oz.(b) s. d.	8 3	8 0	8 2	8 3	8 4
Zinc, per ton(c) .. £	104	91	105	113	102
<i>London Metal Exchange Prices, in sterling—</i>					
Lead, per ton .. £	97	73	72	72	65
Silver, per fine oz. s. d.	6 7	6 4	6 7	6 7	6 8
Zinc, per ton .. £	82	65	80	88	78

(a) Average market price was used prior to 23rd December, 1958. On that date, the minimum price was fixed at £100 per ton. This was reduced to £95 per ton on 14th November, 1961. (b) Silver prices shown represent export parity calculated from London Metal Exchange prices. (c) Average market price was used prior to 1st January, 1958, and subsequent to 30th June, 1959. On 1st January, 1958, a minimum price was fixed at £90 and this minimum was raised to £100 on 22nd December, 1958. The minimum price was abolished on 1st July, 1959.

7. **Employment in Lead, Silver and Zinc Mining.**—Particulars of the number of persons employed in mining for these metals are shown in paras. 4 (ii) and (iii), pages 1051–2.

## § 6. Copper.

1. **Historical.**—Copper was first discovered in Australia in 1842, at Kapunda in South Australia and in the Northampton district of Western Australia. The subsequent large-scale mining of the South Australian deposits contributed significantly to that State's development, but now only very small quantities are mined in South Australia.

The mining of copper commenced in New South Wales in 1847, near Rockley. Copper was first recognized in the Cobar district in 1869, and large-scale mining continued at Cobar until 1952. Other fields were opened at Mount Hope in 1878, Nymagee in 1880 and Captain's Flat in 1882, but none of these is now producing, the last centre to close down being Captain's Flat which ceased operations in 1962.

The first important discovery of copper in Queensland was made in 1862, when a rich lode was found near Clermont. Copper was discovered in the Herberton mineral field in 1879 and at Mount Morgan in 1882. The copper ore body at Mount Isa was not recognized as an outcrop when the lead-zinc ore body was discovered in 1923, and was discovered as a result of underground development.

Copper mining was first undertaken at Mount Isa during the 1939–45 War, but it was not until the erection of a copper smelter at that centre that large-scale production commenced. The Mount Isa mine is today Australia's largest producer of copper.

In Tasmania, the Mount Lyell deposit was discovered in 1886.

2. **Present Methods of Mining and Treatment.**—Most of the large copper ore bodies contain the mineral chalcopyrite, an iron-copper sulphide. Copper ore is mined by open-cut methods at Mount Morgan and Mount Lyell and by underground methods at Mount Isa and Ravensthorpe (Western Australia). Oxidized copper ore is mined at Mount Isa and at numerous other localities, mainly in Western Australia.

It is the practice for the sulphide ore to be finely ground and for the chalcopyrite contained in it to be recovered by flotation. At Mount Lyell and Mount Morgan, the tailings from the copper flotation are subjected to a further flotation and a pyrite concentrate is produced. The oxidized ore mined at Mount Isa is not concentrated and is fed direct to the smelters.

3. **Mine Production.**—The following table shows for 1960 the copper content of all minerals produced in the several States and the Northern Territory.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1960.**  
(Tons.)

Mineral in which Contained.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc. . . . .	898	..	82,163	5	1,656	10,798	9,764	105,284
Gold Concentrate . . . . .	..	..	..	..	5	..	..	5
Lead Concentrate . . . . .	2,134	..	590	..	..	86	..	2,810
Lead-Copper Concentrate . . . . .	..	..	..	..	..	598	..	598
Zinc Concentrate . . . . .	540	..	..	..	..	198	..	738
<b>Total . . . . .</b>	<b>3,572</b>	<b>..</b>	<b>82,753</b>	<b>5</b>	<b>1,661</b>	<b>11,680</b>	<b>9,764</b>	<b>109,435</b>

The following were the principal sources of copper during 1960.

- (i) *New South Wales.* Most of the copper produced in this State was contained in lead concentrate milled at Broken Hill. At Captain's Flat, nearly all the copper was contained in copper concentrate. During 1960, the search for ore along the Cobar line of lode and in the surrounding districts was actively continued. The prospecting methods employed included geological mapping, geophysical work, geochemistry and diamond drilling. Deep diamond drilling was carried out and the de-watering of underground workings commenced. Prospecting work consisted largely of "follow-up" work on magnetic anomalies by geological investigations and by ground geophysical methods.
- (ii) *Victoria.* There was no copper ore mined in Victoria during 1960.
- (iii) *Queensland.* Mount Isa was the most important copper producing centre in Australia, its 1960 output being 66 per cent. of the Australian total. The copper produced at Mount Isa is contained in copper sulphide concentrate, oxidized copper ore and lead concentrate. Copper concentrate produced at Mount Morgan contained most of the remainder.
- (iv) *South Australia.* Only a small quantity of copper ore for fertilizer was produced during 1960.
- (v) *Western Australia.* More than one half of the copper mined was contained in copper concentrate produced at Ravensthorpe. The remainder was contained in copper ore won at various localities in the State for fertilizer manufacture.
- (vi) *Tasmania.* Most of the State's production was at Mount Lyell, where copper was contained in copper concentrate, ore and precipitate. Lead-copper concentrate, lead concentrate and zinc concentrate milled at Rosebery made up the remainder of Tasmania's production.
- (vii) *Northern Territory.* Copper concentrate from Tennant Creek contained most of the Territory's output of copper. The remainder was contained in copper concentrate and precipitate produced at Rum Jungle.

The table hereunder shows the quantities of copper contained in minerals produced in the several States and the Northern Territory during the years 1956 to 1960.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED.**

Northern Territory . . . . .	5,002	7,313	8,660	9,953	9,764
<b>Australia . . . . .</b>	<b>54,547</b>	<b>59,255</b>	<b>75,715</b>	<b>94,950</b>	<b>109,435</b>

4. **Smelter and Refinery Production of Copper.**—Most of the copper concentrate milled in Australia is smelted locally, blister copper being produced at Mount Isa, Mount Morgan, Mount Lyell and Port Kembla.

Blister copper smelted at Mount Isa is railed to Townsville for electrolytic refining at the refinery which commenced production there in 1959. Mount Lyell blister copper is electrolytically refined at Mount Lyell and the bulk is re-melted and cast into primary shapes at Port Kembla. Mount Morgan blister copper is shipped to Port Kembla, where together with blister produced at Port Kembla, it is refined. Most Port Kembla copper is electrolytically refined, although fire refining, which is a cheaper process and undertaken when there are no other metals to be recovered, is used to a lesser extent. Copper from some copper drosses and speisses, by-products of lead refining operations at Port Pirie, is also extracted at Port Kembla.

At Port Kembla, gold and silver contained in electrolytic refining tank house slimes from Mount Lyell, Townsville, and Port Kembla are recovered.

In the following table, details are given of the production of blister copper, and the production and sales of refined copper for the years 1956 to 1960.

6. Prices.—Details of the average market price for the years 1957 to 1961 are given in terms of Australian currency and sterling in the following table.

**AVERAGE PRICE OF ELECTROLYTIC COPPER IN AUSTRALIA AND THE UNITED KINGDOM.**

(£ per ton.)

Country.	1957.	1958.	1959.	1960.	1961.
Australia — in Australian currency(a) .. ..	341	284	312	324	307
United Kingdom—in sterling	220	193	235	239	228

(a) Ex works Port Kembla.

7. Employment in Copper Mining.—Particulars of the numbers of persons engaged in the mining of copper and copper-gold ores are shown in paras. 4 (ii) and (iii), pages 1051–2.

8. Assistance to the Copper-mining Industry.—(i) *Copper Bounty*. The Copper Bounty Act was enacted in 1958, following a Tariff Board inquiry and recommendation, to provide assistance to the industry partly by duty and partly by bounty. The provisions of the Act were reviewed in 1960, and it will continue in its present form until 31st December, 1963. The bounty is payable on copper sold on the Australian market, and provides in effect payment at the rate of £1 for each £1 by which the Australian price falls short of £340, with a maximum of £35 a ton, or, in the case of producers of 50 tons per annum or more, such lesser bounty as will give a return of 10 per cent. on assessed capital employed in the production of copper. The bounty reduced the net effective price of copper to Australian consumers from £340 to £305. A duty is imposed on imported copper when the Australian equivalent of the London Metal Exchange price falls below £290 (£Stg.232), increasing by £1 for each £1 that the Australian equivalent falls below £290. Including freight and other charges, the landed cost is thus expected to be maintained at about £305 so long as the Australian equivalent of the London Metal Exchange price is not in excess of £290.

(ii) *Income Taxation Concession*. One-fifth of the net income from copper mining is exempt from taxation in the hands of the producer. If the producer is a company, this concession also applies to such income when paid to the shareholders as dividends.

## § 7. Tin.

1. *Historical*.—Although specimens of tin had been found in New South Wales as early as 1851, it was not until tin stone was discovered near Inverell in 1872 that mining operations commenced. The New England area is still the most important producing area in New South Wales.

The first notable discovery of tin in Queensland occurred in 1872, when rich deposits of stream tin were found in the country to the south of Warwick, but these alluvial deposits soon became exhausted. In 1879, important discoveries were made in the Herbert River district and rich fields, including that at Herberton, were opened up.

Tin was first discovered in Western Australia in 1888, and since then has been found in several widely separated localities in the State. More than half of the production to date has come from the Greenbushes Mineral Field, and most of the remainder from the Pilbara goldfield.

Tin mining in Tasmania dates from the year 1871, when the Mount Bischoff mine was discovered. Soon afterwards, rich deposits were located in the north-east of the State and near St. Helens. In 1875, tin was discovered at Mount Heemskirk.

2. *Present Methods of Mining and Treatment*.—All tin produced in Australia is contained in tin concentrate, which is usually of the mineral cassiterite (tin oxide). The greater proportion of the production is obtained from alluvial workings as a gravity concentrate. In the lode deposits, tin is usually not associated with other recoverable minerals. However,

at two mines in Tasmania tin is associated with wolfram and sulphide minerals. At these mines, a gravity concentrate of tin, wolfram and sulphide minerals is obtained and from this the wolfram is separated by electromagnetic means. The tin and sulphide minerals are separated by flotation, the sulphides being floated off and the tin remaining as tailings.

3. **Mine Production.**—The following table sets out the tin content of tin concentrate produced in Australia during the years 1956 to 1960. No tin is recorded from minerals other than tin concentrate.

**TIN: CONTENT OF TIN CONCENTRATES PRODUCED.**

(Tons.)

State.	1956.	1957.	1958.	1959.	1960.
New South Wales .. ..	269	211	239	174	223
Victoria .. ..	..	(a)	..	..	..
Queensland .. ..	(b) 630	772	1,019	(b) 1,104	(b) 885
Western Australia .. ..	240	182	94	174	190
Tasmania .. ..	938	777	883	890	884
Northern Territory .. ..	1	10	2	9	20
<b>Australia .. ..</b>	<b>2,078</b>	<b>1,952</b>	<b>2,237</b>	<b>2,351</b>	<b>2,202</b>

(a) Less than half a ton.

(b) Estimated.

The following were the principal sources of production in 1960.

- (i) *New South Wales.* Virtually the whole of the State's production was from alluvial deposits. The New England region, mainly around Tingha, produced over 55 per cent. of the total production.
- (ii) *Victoria.* No tin was produced in Victoria.
- (iii) *Queensland.* Most of the tin concentrate produced in Queensland was from the Herberton field, principally alluvial tin concentrate being produced. Tin concentrate was also produced in the Chillagoe, Kangaroo Hills and Cooktown districts.
- (iv) *South Australia.* No tin was produced in South Australia.
- (v) *Western Australia.* Nearly all the tin concentrate produced in Western Australia was lode tin won from the Pilbara field.
- (vi) *Tasmania.* Most of the tin concentrate produced in Tasmania is won in the north-east part of the State, from both lode and alluvial deposits. The largest amount of tin concentrate produced in Australia during 1960 came from a lode deposit in north-east Tasmania, and wolfram concentrate, as well as tin concentrate, was produced.
- (vii) *Northern Territory.* Almost the whole of the Territory's output of tin came from a single mine at Mount Harris.

4. **Smelter and Refinery Production.**—Except for occasional small parcels of concentrate shipped to overseas smelters, all local production is treated by the two tin smelters located in Sydney. The combined capacity of the two smelters is well in excess of the domestic supply of concentrates and there seems little prospect of this capacity being fully utilized in the foreseeable future unless concentrates could be economically imported and smelted.

The production of refined tin in Australia from locally produced tin concentrate during recent years, as recorded by the Bureau of Mineral Resources, was as follows:—1957, 1,806 tons; 1958, 2,121 tons; 1959, 2,226 tons; 1960, 2,254 tons; and 1961, 2,599 tons.

5. **Production in Principal Countries.**—World production of tin reached its maximum in 1941 when 241,400 tons were recorded. Australia's contribution to the world's tin production is about 1 per cent.

The production of tin ore (metal content) as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, for the principal producing countries in 1959 and 1960, was as follows.

#### TIN : PRODUCTION IN PRINCIPAL COUNTRIES.

(Tons.)

Country.	Production.		Country.	Production.	
	1959.	1960.		1959.	1960.
Malaya, Federation of	37,521	51,979	Australia .. ..	2,351	2,202

(a) Estimated smelter production.

(b) Estimated by the International Tin Council.

(c) Estimated.

(d) Excludes U.S.S.R., Czechoslovakia and Vietnam.

6. **Prices.**—Details of the movement in average market prices of tin for the years 1957 to 1961 are given in terms of Australian currency and sterling in the following table.

#### AVERAGE PRICE OF TIN IN AUSTRALIA AND THE UNITED KINGDOM.

(£ per ton.)

Country.	1957.	1958.	1959.	1960.	1961.
Australia — in Australian currency .. ..	992	995	1,058	1,042	1,170
United Kingdom—in sterling	755	735	786	794	895

7. **Employment in Tin Mining.**—The number of persons employed in tin mining is shown in paras. 4 (ii) and (iii), pages 1051–2.

### § 8. Iron.

1. **Historical.**—Iron ore was first mined in New South Wales to supply raw material for the ironworks that were established near Mittagong in 1852. Iron ore for the ironworks established later at Lithgow was drawn from Carcoar, near Bathurst.

In South Australia, the iron ore deposits of the Middleback Ranges, near Whyalla, were first mined by the Broken Hill Proprietary Co. Ltd. in 1900 to provide a flux for lead smelting operations at Port Pirie. When that company opened its Newcastle steelworks in 1915, it greatly expanded ore production from the Middleback Ranges and most of the Australian steel industry's requirements of iron ore still come from this source.

Regular shipments of iron ore from Yampi Sound, north of Derby in Western Australia, to the steelworks at Port Kembla commenced in 1951. Iron ore for the iron smelter at Wundowie, which commenced operations in 1948, has in recent years been provided entirely from the deposits at Koolyanobbing, near Southern Cross. The Koolyanobbing deposits will be worked on a very much larger scale eventually and will supply the ore for an iron and steel industry to be established at Kwinana, south of Perth. A blast furnace is expected to be in operation in 1968.

In December, 1960, the Commonwealth Government announced a partial relaxation of the embargo on the export of iron ore which had been in force since 1938. Exports are now permitted from some deposits on a controlled basis.

Following this decision, tenders were called for the mining and export of iron ore from two known deposits in Western Australia, Talling Creek and Mount Goldsworthy. The modification of the export embargo has greatly increased exploration for iron ore. Of particular importance was the announcement late in 1961 of the discovery of extensive deposits in the Pilbara district, in the north-west of Western Australia. An extensive testing programme is envisaged to determine the size and grade of these deposits.

Other deposits under examination include Constance Range (Queensland), Scott River (Western Australia) and Savage River (Tasmania).

Besides the large quantities of iron ore that are mined for metal extraction purposes, smaller quantities of iron oxide are mined for other purposes, such as gas purification, cement manufacture, coal washing and fluxing.

**2. Methods of Mining and Treatment.**—All iron ore and iron oxide is won by opencut mining. The ore is selectively mined, crushed and screened to provide a standard assay and size for blast furnace use. No concentration is carried out. The iron ore from Yampi Sound, however, is powdery and friable and has to be sintered, or agglomerated, before making up the furnace charge.

**3. Mine Production of Iron Ore.**—Iron oxide deposits exist in all States and in the Northern Territory, but at present iron oxide for metal extraction purposes, termed iron ore in this chapter, is produced in two States only. The following table shows the estimated iron content of iron ore produced during the years 1956 to 1960.

#### IRON : ESTIMATED IRON CONTENT OF IRON ORE PRODUCED.

(Tons.)

State.	1956.	1957.	1958.	1959.	1960.
South Australia .. ..	2,324,825	2,199,981	2,173,922	2,218,846	2,227,551
Western Australia .. ..	211,215	262,519	365,275	480,769	586,404
<b>Australia .. ..</b>	<b>2,536,040</b>	<b>2,462,500</b>	<b>2,539,197</b>	<b>2,699,615</b>	<b>2,813,955</b>

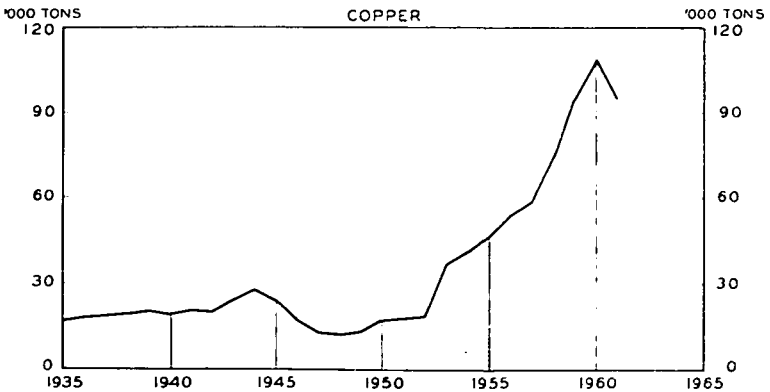

The producing centres during 1960 were as follows.

- (i) *South Australia.* During 1960, 3,427,001 tons of iron ore were drawn from the Iron Monarch and Iron Baron deposits in the Middleback Ranges. Selected foundry grade ore was diverted as required to the Whyalla blast furnace, but the greater part was shipped to Newcastle and Port Kembla for smelting.
- (ii) *Western Australia.* During the year, 837,147 tons of ore were shipped from Yampi Sound, north of Derby, to New South Wales for sintering and smelting. A quantity of 91,316 tons was mined at Koolyanobbing, near Southern Cross, for pig iron production at Wundowie.

**4. Mine Production of Iron Oxide.**—Production of iron oxide, excluding that used for metal extraction (iron ore) and mineral pigments, in the several States during 1960, according to end use, is shown in the following table.

MINE PRODUCTION OF PRINCIPAL METALS  
(METALLIC CONTENT OF MINERALS)

**IRON OXIDE PRODUCTION, 1960.**  
(Tons.)

Use.	New South Wales.	Victoria.	Queensland.	South Australia.	Tasmania.	Australia.
For gas purification ..	1,589	1,153	..	..	228	2,970
For cement manufacture ..	10,748	..	1,759	..	3,269	15,776
For coal washing ..	386	..	..	..	..	386
For fluxing ..	..	..	..	9,600	..	9,600
<b>Total ..</b>	<b>12,723</b>	<b>1,153</b>	<b>1,759</b>	<b>9,600</b>	<b>3,497</b>	<b>28,732</b>

The principal sources of iron oxide production during 1960 were as follows.

- (i) *New South Wales.* Quantities of iron oxide for gas purification were obtained from deposits near Port Macquarie, while that used for cement manufacture was mined from the Lithgow, Mudgee and Rylstone mining divisions. Magnetite, used in coal washing, was produced in the Copmanhurst mining division and also from beach sand deposits near Murwillumbah.
- (ii) *Victoria.* Limonite ore used for gas purification was mined at Buchan.
- (iii) *Queensland.* Iron oxide produced for cement manufacture was mined near Townsville.
- (iv) *South Australia.* A quantity of 9,600 tons drawn from the Middleback Ranges was dispatched to Port Pirie for use as a flux in lead smelting operations.
- (v) *Tasmania.* Iron oxide for gas purification and cement manufacture was mined in the vicinity of Penguin.

Particulars of Australian production of iron oxide for the years 1956 to 1960, according to end use, are shown in the following table.

**IRON OXIDE PRODUCTION: AUSTRALIA.**  
(Tons.)

Use.	1956.	1957.	1958.	1959.	1960.

5. *Iron and Steel Production.*—The production of pig-iron and steel ingots in Australia, of which New South Wales is the main producing State, is shown in the following table for each of the years ended 31st May, 1952 to 1961.

**PIG-IRON AND INGOT STEEL: PRODUCTION, AUSTRALIA.**  
(Tons.)

Year ended 31st May.	Pig-iron. (a)	Steel Ingots. (b)	Year ended 31st May.	Pig-iron. (a)	Steel Ingots. (b)
1952 ..	1,430,027	1,521,386	1957 ..	2,098,352	2,773,995
1953 ..	1,691,693	1,801,028	1958 ..	2,283,925	3,037,705
1954 ..	1,826,711	2,116,813	1959 ..	2,293,709	3,203,584
1955 ..	1,868,841	2,208,708	1960 ..	2,655,237	3,519,719
1956 ..	1,910,521	2,320,289	1961 ..	3,001,800	3,748,037

(a) Includes pig-iron for castings; excludes ferro-alloys. (b) Includes recovery from scrap.

In 1961, ten blast furnaces were operating in Australia; four at Port Kembla and three at Newcastle in New South Wales, two at Wundowie, Western Australia, and one at Whyalla, South Australia. During 1961, ingot steel was produced from 28 open-hearth furnaces (17 at Newcastle and 11 at Port Kembla) and from 11 electric furnaces (5 at Newcastle, 2 at Melbourne, 1 at Whyalla, 2 at Port Kembla and 1 at Bell Bay).

6. **Production of Iron and Steel in Principal Countries.**—Particulars of the production in the principal countries and the estimated world total production during the calendar years 1959 and 1960, according to figures published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, are shown in the next table.

#### IRON AND STEEL: PRODUCTION IN PRINCIPAL COUNTRIES.

### § 9. Mineral Sands.

1. **Historical.**—In recent years, the growing world demand for rutile as a coating for electric welding rods and as a source of titanium metal, and for ilmenite in the production of titanium pigments, has brought about a rapid expansion of Australian mineral sands mining. Australia is the largest producer of rutile and zircon in the world, and nearly all this production comes from the mineral sands deposits along the beaches of the east coast. The ilmenite produced on the east coast has proved unsuitable for titanium oxide pigment manufacture, and most of the production is discarded. However, ilmenite produced from mineral sands mined in Western Australia since 1956 has a much lower chromic oxide content than east coast ilmenite, and is therefore suitable for pigment production.

The first commercial development of the mineral sands deposits commenced at Byron Bay in New South Wales in 1934, when a mixed zircon-rutile-ilmenite concentrate was prepared. Large scale production of zircon-rutile concentrate commenced in Queensland in 1941 when electromagnetic separators were installed to separate the ilmenite. In 1943, after the installation of electrostatic separators, a rutile concentrate was produced. The Commonwealth Government banned the export of mixed concentrates in 1944, and all east coast operators now produce separate concentrates of rutile, zircon and ilmenite. In addition, a few companies produce a high-grade monazite concentrate.

Following the record post-war output of rutile in 1957, production was on a reduced scale during the period 1958-60, mainly because of greatly reduced prices offering on world markets. However, during the second half of 1961 the price of rutile improved and production increased. Strengthening of the rutile market was due in part to the rationalization of the Australian industry and also to increased demand for rutile.

2. **Present Methods of Mining and Treatment.**—Mineral bearing sands are usually recovered from sand dunes, but deposits occurring below sea level are recovered by suction dredges. The mineral sands and beach sand (quartz) are gravity concentrated, either by shaking tables or by spiral concentrators, resulting in the complete elimination of quartz and leaving a mixed concentrate of heavy minerals. Magnetic ilmenite and monazite are separated by electromagnetic methods and are then separately recovered, using increasing magnetic intensities. The remaining zircon and rutile are separated mainly by the use of electrostatic separators.

3. **Mine Production.**—(i) *Titanium Dioxide.* The following table shows the quantities of titanium dioxide contained in rutile and ilmenite concentrates produced during the years 1956 to 1960.

**TITANIUM DIOXIDE: CONTENT OF CONCENTRATES PRODUCED.**

(a) Estimated.

(iii) *Other Products.* During 1960, small quantities of monazite concentrate, magnetite and garnet concentrate were also recovered from mineral sands.

(iv) *Sources of Production.* The principal sources of mineral sands treated during 1961 were as follows.

- (a) *New South Wales and Queensland.* The main deposits of mineral sands occur along the eastern Australian coast from Wyong in New South Wales to Curtis Island, Queensland. At present, the principal mining operations are located between Lake Munmorah and Newcastle in the south and between Evans Head and North Stradbroke Island in the north.
- (b) *Western Australia.* The chief deposits of mineral sands occur on the south-west coast between Bunbury and Wonerup. During 1961, the bulk of production was from the Copel-Yoganup area.

4. *Employment in Mineral Sands Mining.*—Particulars of the number of persons employed in mineral sands mining are shown in paras. 4 (ii) and (iii), pages 1051-2.

### § 10. Aluminium.

1. *Mine Production.*—The source of aluminium is bauxite. Until recent years, the only bauxite production in Australia was from small deposits in Queensland, New South Wales and Victoria. Production from these deposits has been used mainly by the chemical and steel industries.

Large deposits of bauxite exist at Weipa (North Queensland), Gove (Northern Territory) and Darling Range (Western Australia). The deposits at Weipa and the Darling Range are now being developed and trial shipments from both deposits have been sent to Japan for aluminium smelting. The deposit at Gove is being developed for the production of alumina (plant capacity 360,000 tons annually) at that centre and also for the export of bauxite. The Weipa alumina plant will supply the requirements of an aluminium smelter (plant capacity 120,000 tons annually) to be installed at Invercargill (New Zealand). At Kwinana (Western Australia), an alumina plant (capacity 200,000 tons annually) is to be constructed to use Darling Range bauxite. The alumina will be shipped to Geelong (Victoria) for the production of metal. In addition, some alumina is likely to be exported from Kwinana. The alumina content of bauxite produced in Australia during the years 1956 to 1960 is shown in the following table.

ALUMINA : CONTENT OF BAUXITE PRODUCED.

(a) Estimated.

(b) Partly estimated.

2. *Refinery Production.*—There is a refinery for the production of alumina and refined aluminium at Bell Bay on the River Tamar in Northern Tasmania. The location of this refinery was determined by the availability of large supplies of hydro-electric power. Production of alumina commenced in February, 1955, and of refined aluminium in September, 1955. Work is in hand to expand the Bell Bay plant to a capacity of 28,000 tons in 1962 and ultimately to 48,000 tons in 1964. A new smelter with an ultimate capacity of 40,000 tons is to be constructed at Geelong (Victoria). The plant is expected to come into production in 1963. The following table shows the production of alumina and refined aluminium in Australia during the years 1957 to 1961.

## § 11. Uranium.

Uranium concentrate has been produced in Australia since 1954, but particulars of the quantity of  $U_3O_8$  concentrate produced and its value are not available for publication. All  $U_3O_8$  concentrate is exported overseas. During 1961, the principal producing centres were as follows.

- (i) *Queensland.* Uranium ore was mined by opencut methods at Mary Kathleen, 33 miles east of Mount Isa.
- (ii) *South Australia.* Uranium ore was mined by underground methods at Radium Hill, 289 miles north-east of Adelaide. A concentrate of heavy minerals was produced at the mine and this was railed to a treatment plant at Port Pirie for the chemical extraction of  $U_3O_8$  concentrate. The Radium Hill mine closed down in December, 1961, and the Port Pirie plant ceased production of uranium oxide late in February, 1962.
- (iii) *Northern Territory.* At Rum Jungle, uranium-copper and copper ores were treated to produce  $U_3O_8$  concentrate, copper concentrate and copper precipitate. Mining operations ceased at Rum Jungle in November, 1958, but sufficient ore was stockpiled to permit the continuation of full-scale production of uranium concentrate for some years. At the recently discovered Rum Jungle Creek South deposit, removal of overburden is well advanced and full-scale extraction of ore is due to commence in 1962.

During 1961, ore was mined in the South Alligator River area. Two companies opened treatment plants at Moline and Rockhole Creek during the year. Operations at the latter plant ceased at the end of 1961.

Income from uranium mining is exempt from taxation in the hands of Australian producers. If the producer is an Australian company, such income is exempt from taxation in the hands of the shareholders when paid as dividends.

## § 12. Other Metallic Minerals.

1. *Tungsten.*—In recent years, Tasmania has been the principal State producing tungsten ores, scheelite being mined on King Island in Bass Strait and wolfram being mined in association with tin ores in the north-east part of the State. Because of low world prices, scheelite production on King Island ceased in August, 1958, but production was recommenced on a limited scale in 1960.

Particulars of the production of tungstic oxide contained in scheelite and wolfram concentrates produced during the years 1956 to 1960 are shown in the following table.

TUNGSTIC OXIDE ( $WO_3$ ): CONTENT OF CONCENTRATES PRODUCED.

(a) Less than half a ton.

2. **Manganese.**—In recent years, Western Australia has been the principal State producing manganese ore, mined mainly from the Pilbara goldfield.

The following table shows the manganese content of metallurgical grade and the manganese dioxide content of battery and other grades of manganese ore produced during the years 1956 to 1960.

**MANGANESE : CONTENT OF MANGANESE ORE PRODUCED.**

(Tons.)

Year.	Metallurgical Grade.				Battery and Other Grades.			
	In terms of Manganese (Mn) Content.				In terms of Manganese Dioxide (MnO <sub>2</sub> ) Content.			
	N.S.W.	Q'land. (a)	W. Aust.	Australia.	N.S.W.	W. Aust.	N. Terr.	Australia.
1956 ..	436	140	25,280	25,856	371	179	914	1,464
1957 ..	391	557	33,956	34,904	385	186	668	1,239
1958 ..	516	3,181	21,926	25,623	511	195	2,113	2,819
1959 ..	620	4,350	35,996	40,966	907	162	1,406	2,475
1960 ..	342	1,670	26,561	b 28,585	623	9	940	(c) 1,617

(a) Estimated.

(b) Includes Victoria (12 tons).

(c) Includes South Australia (45 tons).

The quantity of manganese dioxide recovered, in 1960, from zinc concentrates produced at Broken Hill and Rosebery amounted to 3,847 tons, of which 452 tons were sold.

3. **Other.**—Production in 1960 (1959 shown in parentheses) of other metallic minerals was as follows.

**Antimony.** The antimony content of antimony-bearing minerals produced was 786 tons (1,280 tons). Of this amount, 632 tons (652 tons) were in lead concentrate and 154 tons (628 tons) in 256 tons (1,022 tons) of antimony ore and concentrate.

**Beryllium.** Production of beryllium ore was 190 tons (317 tons), which came mainly from Western Australia where the Pilbara and Gascoyne goldfields were the main producing areas. The beryllium oxide content of the ore was 2,221 units of 22.4 lb. (3,587 units).

**Chromite.** Production of chromite was 529 tons (120 tons) with an estimated chromic oxide content of 265 tons (60 tons). This production came from Rockhampton, in Queensland.

**Tantalite-Columbite.** The production of tantalite-columbite concentrate was 23,677 lb. (18,950 lb.) and the whole of this output came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 11,500 lb. (8,499 lb.).

**Other.** Fifteen tons of lithium ore containing 1 ton of lithium oxide were produced in New South Wales during 1960. This was the first recorded post-war production of lithium. In addition, 7 oz. of platinum concentrate containing 4 oz. of platinum were obtained in New South Wales as a by-product of gold refining.

### § 13. Coal.

1. **Historical.**—Coal was probably the first of Australia's mineral products to be discovered, being reported from the neighbourhood of Newcastle in 1796. In the following year, outcrop coal was discovered at Coalcliff, 40 miles south of Sydney, and at the entrance to the Hunter River in the Newcastle district. By 1799, outcrop coal was being exported overseas from the latter field. All production was from the Newcastle district until 1857, when the first coal was produced from the southern field. The estimated production in 1830 was 4,000 tons and this increased to 30,000 tons in 1840, 70,000 tons in 1850, and 370,000 tons in 1860. In 1864, the first coal was discovered in the Greta-Cessnock-Maitland field which has since become the principal Australian source of gas coal.

The discovery of coal in Victoria dates from the year 1825, when the mineral was reported to have been found at Cape Paterson, but only a small quantity of coal was mined in Victoria prior to the opening of the State-owned mine at Wonthaggi in 1909. Present

day Victorian production of black coal is obtained almost exclusively from this mine. Brown coal was discovered in Victoria at Lal Lal in 1857 and in the Latrobe Valley in 1874. Mining operations were first undertaken in 1889, but it was not until after the 1914-18 War that large-scale mining began.

In Queensland, coal was first discovered near Ipswich in 1827 and the first colliery was established there in 1846. At Blair Athol, 240 miles west of Rockhampton, coal was discovered in 1864. This field is unique in that the field's total reserves of 200 million tons are available for opencut mining in a seam attaining a thickness of over 90 feet, the greatest thickness of black coal yet found in Australia.

The deposits of black coal at Leigh Creek, 377 miles north of Adelaide, were discovered in 1888 during dam-sinking operations. Small quantities of coal were mined in 1907 and 1917, but it was not until 1944 that extensive opencut mining operations began.

In Western Australia, coal was first discovered on the Irwin River in 1846, but the discovery of the Collie field in 1883 proved to be of far greater importance. This field is located 120 miles south of Perth and commercial mining began there in 1898.

There appear to be no reliable records of the earliest discoveries of coal in Tasmania. Coal was mined on the Tasman Peninsula to provide fuel for penal settlements in the vicinity and for Hobart, and mining continued there until about 1877. In 1824, coal was discovered at South Cape Bay near the most southerly part of the island. The most important deposit is the Mount Nicholas-Fingal-Dalmayne (St. Marys) field in the north-east part of the State.

The mining of black coal on a large scale by opencut methods first began in Australia at Blair Athol in Queensland, where in 1937, the first year of production, 18,494 tons (0.2 per cent. of total Australian black coal production for that year) were produced. Opencut mining of black coal was introduced in New South Wales in 1940, in Western Australia in 1943, in South Australia in 1944, and in Tasmania in 1950. The output from opencuts reached a maximum of 21.1 per cent. of total production in 1952, but in recent years this has been at a lower level (9.6 per cent. in 1960).

Plans have been announced recently for the construction of coal-loading facilities costing £2.5 million at the inner harbour at Port Kembla. The work is the first stage of a plan to expand coal loading facilities at Port Kembla, Newcastle and Balmain in anticipation of greatly increased coal export trade.

A joint company has recently been formed to develop the Kianga-Moura coalfield in central Queensland. Fifteen million pounds will be spent on developing the field and lifting production to 2 million tons of coal a year. Firm orders have already been received from the Japanese steel industry for 3.4 million tons of coal to be delivered during the next seven years.

2. Mine Production of Black Coal.—Production of black coal according to rank in the several States during the years 1956 to 1960 is set out in the following table. The tonnages produced by underground mining and opencut mining are also shown.

Opencut mines ..	2,149,952	2,031,403	2,065,336	1,705,374	2,161,016

(a) Bituminous coal from underground mines.

(b) Sub-bituminous coal from an opencut mine.

(c) Sub-bituminous coal.

The principal producing centres during 1960 were as follows.

- (i) *New South Wales.* The principal deposits worked were in the vicinity of Newcastle, Cessnock and Singleton (northern field), Lithgow (western field) and Wollongong (southern field). Tonnages mined in 1960 were: northern field, 10,234,000 tons; southern field, 5,735,000 tons and western field, 1,578,000 tons. All opencut coal was from the northern field.
- The coal fields of New South Wales, predominantly bituminous, are the most important in Australia, in respect of the magnitude, quality and accessibility of reserves and the extent to which the deposits are being worked. Coal from the various seams differs in properties, coal from the Greta seam worked in the vicinity of Cessnock being particularly suitable for gas making, while coal from the Victoria tunnel, Dudley, Young Wallsend and Borehole seams, all of which are mined near Newcastle, have coking properties and are used in the steelworks. Coking coal is also obtained from the Bulli seam which is mined near Wollongong and in the Burragorang Valley. A multi-purpose coal is available in the Singleton area and steaming coals are mined around Newcastle, Lithgow, Cessnock and Wollongong.
- (ii) *Victoria.* Production of black coal in Victoria was restricted to the Gippsland district. The State Coal Mine at Wonthaggi was the main producer, and the remaining production came from small privately-owned mines.
- (iii) *Queensland.* The principal producing centres were Ipswich, 1,628,633 tons; Bowen, 411,821 tons; Clermont, 170,606 tons; and Mount Morgan, 126,736 tons. Opencut coal was mined on the Bowen, Clermont and Mount Morgan fields and the total coal won by this means was 14 per cent. of total production.
- (iv) *South Australia.* Coal was mined only at Leigh Creek, 377 miles north of Adelaide.
- (v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State and all production during 1960 was from this source.
- (vi) *Tasmania.* Most of the coal produced was won in the north-east of the State, the principal producing centres being St. Mary's, 130,172 tons; Fingal, 96,131 tons; and Avoca, 57,748 tons.

3. *Mine Production of Brown Coal.*—Brown coal is mined only in Victoria and production in recent years has been as follows:—1956, 10,559,801 tons; 1957, 10,740,989 tons; 1958, 11,643,629 tons; 1959, 13,034,605 tons; and 1960, 14,967,202 tons. In the past ten years, the output of brown coal has nearly doubled.

4. *Australia's Coal Reserves.*—The latest available estimate of the measured and indicated coal reserves of Australia is that prepared by the Coal and Lignites Panel of the Power Survey Sectional Committee of the Standards Association of Australia, and is shown in the following table. It should be noted that reserves can only be included in the "measured and indicated" categories when sufficient exploratory and testing work has been completed.

ESTIMATED COAL RESERVES OF AUSTRALIA.  
(Million Tons.)

State.	Bituminous Coal.(a)	Sub-bituminous Coal.	Brown Coal. (Lignite),
New South Wales .. .. .	8,650	800	..
Victoria .. .. .	12	..	56,100
Queensland .. .. .	749	..	..
South Australia .. .. .	..	144	230
Western Australia .. .. .	..	274	..
Tasmania .. .. .	240	..	..
<b>Australia .. .. .</b>	<b>9,651</b>	<b>1,218</b>	<b>56,330</b>

(a) Includes reserves of a small quantity of semi-anthracitic coal.

5. *Production in Principal Countries.*—The following table shows the production of the principal countries in 1959 and 1960 as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys.

**COAL : PRODUCTION IN PRINCIPAL COUNTRIES.**  
(<sup>'000</sup> Tons.)

Country.	Black Coal.		Brown Coal and Lignite.	
	1959.	1960.	1959.	1960.

<b>Grand Total</b> .. .. .	<b>19,717</b>	<b>20,371</b>	<b>20,467</b>	<b>21,231</b>	<b>22,986</b>

(a) Includes miners' and colliery coal. (b) Government railways only. (c) Figures refer only to New South Wales consumption by oversea, interstate and intrastate vessels. (d) Prior to 1959–60, figures refer to New South Wales only. Figures for 1959–60 and 1960–61 include Tasmania. (e) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but has since declined as production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1960-61, exports of black coal were 1,888,415 tons and imports were 6,629 tons. These imports were of black coal for special purposes only.

(ii) *Brown Coal.* The table following shows the production and consumption of brown coal and the production of briquettes in Victoria for the years 1956-57 to 1960-61.

**BROWN COAL: PRODUCTION AND CONSUMPTION, VICTORIA.**  
(<sup>'000</sup> Tons.)

Year.	Production.	Consumption as Fuel.			Consumption as Raw Material in Briquette Manufacture.	Briquettes Manufactured.
		Electricity Generation.	Briquette Factory.	Other Factories. (a)		
1956-57 .. ..	10,772	6,943	806	1,309	1,613	618
1957-58 .. ..	10,866	7,020	810	1,297	1,619	626
1958-59 .. ..	12,243	8,470	819	1,293	1,639	643
1959-60 .. ..	14,101	9,300	1,198	1,248	2,396	975
1960-61(b) .. ..	15,723	8,759	1,991	957	3,984	1,807

(a) Recorded consumption.

(b) Subject to revision.

The State Electricity Commission of Victoria started commercial production of brown coal briquettes at Yallourn in February, 1925. Output for the financial year 1924-25 was 36,500 tons. This had increased to 141,044 tons in 1928-29 and to 642,590 tons in 1958-59. With the commencement of production in the Commission's new works at Morwell, output of briquettes (Yallourn and Morwell combined) rose to 974,670 tons in 1959-60 and to 1,806,619 tons in 1960-61, which was the first complete year of full output at Morwell.

In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened by the Gas and Fuel Corporation of Victoria. This plant operates on briquettes supplied by belt conveyor from the State Electricity Commission's Morwell works, and produces town gas which is sent to Melbourne through 103 miles of pipeline.

7. Exports.—The quantities and values of the oversea exports of Australian coal and of bunker coal for oversea vessels for the five years 1956-57 to 1960-61 are shown in the following table. These shipments were made mainly from New South Wales.

**COAL: OVERSEA EXPORTS AND BUNKER, AUSTRALIA.**

Year.	Oversea Exports.(a)		Bunker Coal for Oversea Vessels.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£
1956-57 .. ..	545,101	2,196,044	9,065	44,116
1957-58 .. ..	836,336	3,390,628	11,608	50,656
1958-59 .. ..	645,249	2,676,042	8,187	37,808
1959-60 .. ..	1,087,844	4,326,810	8,117	25,380
1960-61 .. ..	1,888,415	7,682,223	179	1,716

(a) Excludes bunker coal.

New South Wales, in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas. Of the total of 18,243,000 tons produced in 1960-61, 1,624,000 tons (8.9 per cent.) were exported interstate and 1,888,000 tons (10.3 per cent.) were exported overseas. The demand for bunker coal continues to decline and in 1960-61 a total of 136,000 tons (0.7 per cent.) of New South Wales production was supplied for interstate, intrastate and oversea vessels.

8. Value at the Mine in New South Wales.—Particulars of the average values at the mine (or at screens or mine washeries where these are at a distance from the mine) of saleable coal for each district and for New South Wales as a whole are shown in the following table for the years 1956 to 1960. Saleable coal excludes miners' coal, coal consumed at the mines, and refuse, etc., removed by the use of hand picking belts or at mine washeries. In calculating these values, most coal won by producer consumers is also excluded, and in respect of stocks of coal held at grass by the Commonwealth Government only actual sales have been taken into account. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALEABLE COAL:  
NEW SOUTH WALES.**

(s. d.)

Year.	Northern District.	Southern District.	Western District.	Average for State.
1956.. .. .	59 3	58 1	55 1	58 6
1957.. .. .	58 3	55 7	50 7	56 9
1958.. .. .	56 1	55 0	47 5	54 10
1959.. .. .	52 5	54 4	47 6	52 7
1960.. .. .	51 11	55 11	48 1	52 8

9. Values in New South Wales, United Kingdom and the United States of America.—The following table shows, for the years 1956 to 1960, average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country but they do not necessarily show the relative levels as between the countries concerned.

**PRODUCTION VALUES OF COAL PER TON: NEW SOUTH WALES, UNITED KINGDOM AND UNITED STATES OF AMERICA.**

Country.	1956.	1957.	1958.	1959.	1960.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
New South Wales—Bituminous(a) .. .. .	58 6	56 9	54 10	52 7	52 8
United Kingdom—Deep mined(b) .. .. .	77 0	82 1	85 7	83 5½	86 1½
United States of America—Bituminous and lignite(c) ..	\$ 4.82	\$ 5.08	\$ 4.86	\$ 4.77	\$ 4.69

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to saleable coal and include excise duty. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

10. Employment in Coal-mines.—The number of persons employed, both above and below ground, in coal-mines in each State for each of the years 1956 to 1960 is shown in the following table.

**COAL-MINES: PERSONS EMPLOYED.(a)**

Year.	New South Wales.	Victoria.		Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
		Black.	Brown.					
1956 .. .. .	17,918	610	1,566	3,568	260	1,190	349	25,461
1957 .. .. .	16,622	561	1,579	3,493	223	1,145	301	23,924
1958 .. .. .	15,463	516	1,540	3,295	230	999	292	22,335
1959 .. .. .	13,445	401	1,519	3,172	251	1,095	314	20,197
1960 .. .. .	13,163	407	1,399	3,231	257	1,042	313	19,812

(a) Average number of persons employed (including working proprietors) during whole year.

The year of maximum employment was 1926 when 31,774 persons were engaged in the coal-mines of Australia. Shortly after that year, the industrial depression and a prolonged stoppage of work on one of the principal fields of New South Wales during 1929 and 1930 seriously affected the figures of employment. After 1933, there was a gradual increase up to a level of about 23,000 which was maintained during the war years. There was a further increase after the war to 28,303 in 1952, but since then the number in employment has fallen again. In 1960, it was 19,812.

In New South Wales, during 1960, 15,687,000 tons of coal or 92.4 per cent. of the total output of underground coal, were loaded by machinery as compared with 1,101,000 tons (9.8 per cent.) in 1939, 3,089,000 tons (32.9 per cent.) in 1949, and 13,483,000 tons (88.2 per cent.) in 1959. Similar details for other States are not available, but machinery is used to a considerable extent in Western Australian mines and to a lesser extent in Queensland.

11. Production of Black Coal per Man-shift.—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked, (a) at the coal face, and (b) by all employees, in respect of underground mines for each State concerned and for Australia for the years 1956 to 1960. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by opencut mining.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT: UNDERGROUND MINES.**  
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	W. Aust.	Tas.	Australia.
PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE.						
1956 .. ..	11.43	2.05	6.79	5.14	7.04	9.77
1957 .. ..	13.19	2.01	7.13	5.88	7.60	11.02
1958 .. ..	14.48	2.04	7.28	6.67	8.01	11.96
1959 .. ..	18.07	2.10	7.53	7.60	7.34	14.13
1960 .. ..	20.64	2.16	8.37	8.12	7.64	16.08
PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES.						
1956 .. ..	3.55	0.83	2.65	2.35	3.41	3.28
1957 .. ..	3.99	0.85	2.82	2.77	3.76	3.65
1958 .. ..	4.35	0.89	2.90	3.02	3.91	3.95

12. **Joint Coal Board.**—For details of the powers and functions of this Board, which has functioned since 1947, see page 887 of Official Year Book No. 39.

### § 14. Coke and Other By-products from Coal.

1. **Coke.**—The production of metallurgical coke in Australia was limited to about 250,000 tons per annum prior to the 1914–18 War. This was below local requirements and necessitated an annual import of about 27,000 tons. By 1920, production had risen to more than 500,000 tons, by 1938–39 to 1,164,873 tons, and in 1960–61 it reached the record level of 2,738,505 tons. Imports exceeded exports prior to 1952–53, but in 1952–53 and later years there has been a net export surplus. In 1960–61, exports amounted to 81,075 tons while imports were 9,768 tons. Most of the tonnage imported is petroleum coke for use in the production of aluminium.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1960–61 was 764,626 tons. To date, there has been no production of petroleum coke at Australian oil refineries.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1956–57 to 1960–61. The figures exclude output of coke breeze, which amounted to 316,549 tons in 1959–60 and 376,123 tons in 1960–61.

#### COKE PRODUCTION: AUSTRALIA.

(Tons.)

Industry.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.
Coke Works .. ..	2,234,458	2,295,737	2,210,621	2,376,097	2,738,505
Gas Works .. ..	954,756	831,615	815,464	758,668	764,626
<b>Total .. ..</b>	<b>3,189,214</b>	<b>3,127,352</b>	<b>3,026,085</b>	<b>3,134,765</b>	<b>3,503,131</b>

2. **Other By-products from Coal.**—In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Some of the main items produced, principally in coke and gas works, during 1960–61 (1959–60 in parentheses) were: crude tar, 57,132,117 gallons (51,962,066 gallons); refined tar, 29,672,825 gallons (29,647,990 gallons); and ammonium sulphate, 98,988 tons (104,861 tons).

### § 15. Oil Exploration in Australia.

1. **Introduction.**—The discovery of oil in commercial quantities in Australia has been the objective of oil exploration companies for many years. Recent discoveries in Queensland could indicate that this country is on the verge of proving commercial oilfields.

A comprehensive survey of current developments was presented in a special article prepared by the Bureau of Mineral Resources, Geology and Geophysics, Department of National Development and published in the December, 1961, issue of *The Australian Mineral Industry*. With minor modifications it is reproduced below.

2. **General.**—Within the land areas of Australia and Papua-New Guinea, the twenty-seven sedimentary basins cover 1,480,000 square miles of the total area of 3,519,000 square miles. The individual basins range in area from 4,000 to 510,000 square miles (see map on page 1079), and contain marine and continental sedimentary rocks ranging in maximum thickness from 1,000 to about 50,000 feet and including rocks of all ages from Proterozoic to Pliocene.

At present, seventy-two tenement holders have an aggregate tenement area of 2,200,000 square miles, including off-shore areas. Tenement areas range from four acres to 292,646 square miles. One joint-venture group holds a total of 381,250 square miles. Many of these large areas were granted when there was very little interest in Australian oil exploration and an absence of any general belief in the probability of finding commercial oil. Since then, a number of impressive shows of oil have established the presence of hydrocarbons in many parts of Australia and have given rise to a steady increase in the number of companies engaged in oil exploration.

Basic regional exploration is still only partly complete, and very little detailed investigation has been undertaken. The regional outcrop geology has been established in the New Guinea, Papua, Maryborough, Ipswich-Clarence, Sydney, St. Vincent, Carnarvon, Canning (including Fitzroy), Bonaparte, and Georgina Basins. Reconnaissance aeromagnetic surveys (flight lines at two-mile spacing) cover one-eighth of the Carpentaria Basin, half of the Bowen Basin, two-fifths of the Surat Basin, one-third of the Ipswich-Clarence Basin, the whole of the Perth and Carnarvon Basins, one-third of the Canning Basin, the whole of the Bonaparte Basin and about one-quarter of the Papua Basin. Reconnaissance gravity surveys (one station per 100 square miles) cover about one-third of the Papua Basin, one-fifth of the Carpentaria Basin, one-sixth of the Maryborough Basin, two-fifths of the Bowen Basin, one-third of the Surat Basin, one-fifteenth of the rest of the Great Artesian Basin, one-fifth of the Sydney Basin, the whole of the Gippsland Basin, half of the Murray Basin, half of the St. Vincent Basin, the whole of the Perth Basin, four-fifths of the Carnarvon Basin, two-thirds of the Fitzroy Basin and one-quarter of the rest of the Canning Basin, half of the Bonaparte Basin, and two-fifths of the Georgina Basin. Detailed gravity surveys (one station per ten square miles) have been completed only in the north-western part of the Canning Basin, the north-western part of the Carnarvon Basin and the northern part of the Perth Basin.

Regional seismic surveys and some detailed surveys have been started in the Papua, Surat, Maryborough, Great Artesian, Sydney, Gippsland, Otway, St. Vincent, Perth, Carnarvon, Canning and Bonaparte Basins. A few reconnaissance seismic traverses have been run in the Carpentaria, Bowen, Murray, Amadeus and Georgina Basins.

Stratigraphic drilling has begun in the Papua, Carpentaria, Bowen, Surat, Great Artesian, Maryborough, Ipswich-Clarence, Sydney, Gippsland, Otway, Murray, Eucla, Perth, Carnarvon, Canning and Bonaparte Basins, but only about 1,300,000 feet has been drilled in all (about one foot per square mile of the area of the sedimentary basins).

Expenditure on exploration is a useful guide to the level of activity. Since 1900 about £80 million has been spent in the whole of Australia and Papua-New Guinea—£37 million in Papua-New Guinea; £14 million in Queensland; £1.6 million in New South Wales; £4 million in Victoria; £2.7 million in South Australia; and £20 million in Western Australia. About £10 million only was spent before the 1939-45 War, mainly in Papua and Queensland. Since the War, expenditure has been concentrated in Papua (£28 million), Western Australia (£16 million) and Queensland (£13 million).

**3. Government Assistance.**—The role of Government in oil exploration has been to provide technical and financial assistance. On the technical side, the Bureau of Mineral Resources, Geology and Geophysics carries out geological and geophysical surveys and drilling to obtain regional data on the sedimentary basins, and undertakes laboratory investigations. The State Mines Departments control tenements and also carry out field surveys and laboratory investigations. The Division of National Mapping provides aerial photographs, photo-maps and base maps to form the basis for geological and geophysical surveys.

In addition to taxation concessions to oil exploration companies and their shareholders, since 1957, the Commonwealth Government has been subsidizing exploration for oil; £2,486,092 had been paid in subsidies for stratigraphic drilling, geophysical surveys and bore-hole logging\* to June, 1961. In October, 1961, the Petroleum Search Subsidy Act 1959 was amended to include structure drilling and test drilling under subsidy, to provide for payment of subsidy for drilling on a footage basis and to extend the period of operation of the Act to June, 1964. An amount of £2,700,000 was appropriated for subsidy payments in the year 1961-62.

---

\* The surveying of the physical characteristics of the strata in a bore.

The Subsidy Acts have been designed to increase the total amount of exploration, to encourage companies to enter the field, and to ensure that subsidized exploration is adequately planned, carried out and reported upon, and that the results are generally made available within a short time. Although discoveries of oil would be the most significant immediate results of this policy, the very great improvement in the quality of the exploration work being carried out and its permanent documentation might in the long term prove more important in the success of the exploration effort on a national scale. In order to make the results of subsidized operations available, agreements have specified that the data be made available (and/or published) twelve months after the completion of field work; agreements made under the amended Act will reduce this period to six months.

The Bureau of Mineral Resources, which supervises the technical aspects of the Subsidy Act, insists on a certain minimum standard in operations; in most cases this is higher than previous Australian standards and consistent with oversea exploration practice. For example, before 1958, very few bores were adequately logged and tested; the Bureau's insistence on logging and testing has led to the introduction of several logging units that formerly were not available in Australia. It is expected that the current improvement will continue until Australian exploration is up to the best oversea standards.

A Sedimentary Basins Study Group is being established within the Bureau of Mineral Resources to collect all available data on the sedimentary basins, to collate and compile these data and to publish review maps and reports. The data obtained in subsidized operations will provide a basis on which work can begin, but it is hoped to enlist the co-operation of State Mines Departments and of exploration companies to ensure that all data that have been obtained may be used. Much data that normally are not included in reports, such as detailed outcrop sections, basic gravity data, details of experimental seismic work and copies of seismic records, will be sought.

A Core and Cuttings Laboratory has been established in Canberra, where representative cores and cuttings from all subsidized bores and as many others as can be obtained will be available for examination. Facilities will be provided for visiting geologists to examine the material.

**4. Status of Exploration.**—Several promising oil discoveries have been made—at Rough Range and Meda (Western Australia), Port Campbell (Victoria), Cabawin (Queensland) and Puri (Papua)—but none of these proved commercial. Oil was discovered at Moonie (Queensland) in December, 1961. Production testing in February, 1962, produced flows at rates ranging from 184 to 1,920 barrels a day. Wells are being drilled to assess the size and productive capacity of the Moonie field. Because of the capitalization required to bring the oil to the sea-board it cannot yet be stated that this discovery will be commercial in the sense of covering costs and making profits, and this will not be known until enough wells have been drilled to establish reserves and the optimum total production rate. Gas has been found in many places; the most important shows are at Kura, Bwata, Barikewa and Iehi in Papua (all or any of which may be commercial if a suitable market can be developed); at Roma (Queensland), where the gas is being used in the local electricity generating powerhouse; at Cabawin and Glendullock (Queensland); in the Camden area near Sydney (New South Wales); and at Port Campbell and Flaxman's Hill (Victoria). These discoveries lend additional support to the opinion that oil should be present in Australia's sedimentary basins in commercial quantities.

Domestic risk capital is more readily available than previously for well-organized exploration companies, and many experienced oversea companies are for the first time taking part in, or examining the possibility of taking part in, exploration for oil in Australia. These oversea groups have brought not only funds but also equipment and experienced personnel to assist in exploration.

The main problem is still the establishment of the regional geology of the basins in precise and reliable terms, so that regional structure, formation thicknesses and rock types can be determined and the geological history established. From this the history of movement of hydrocarbons may be indicated and the more prospective areas of the basin selected for detailed exploration.

The information obtained from drilling could be improved to provide more data of potential significance, for example sonic logs\* to help in interpretation of seismic records (or velocity surveys where sonic logging is not available); pressure-temperature information from all tests regardless of the nature of the formation fluid (from this the hydrodynamic characters of each sand can be determined and these may indicate areas where prospects of petroleum accumulation are good); water analyses from formation tests; more porosity and permeability determinations on cores; more cores from permeable formations; more stratigraphic control; logging of organic content and of carbonate content of cuttings.

5. Basins.—The Papua Basin which for years was the area of most intensive exploration in the Australian region is at present being less actively explored. The prospects of the basin have been enhanced by the discovery of wet gas in the Miocene and of dry and wet gas in the Cretaceous. The unconformity between the Mesozoic and the Tertiary and the thrust fault established at Puri introduce problems in exploration, but neither the Cretaceous nor the Miocene has been explored completely. The Omati Basin has sedimentary peculiarities that have not been explained and much more exploration is justified in this area.

Following the entry of several experienced American companies into the State, Queensland has been the locale of greatest exploration activity for several years. Marine Permian sediments containing oil and gas have been found in the Surat Basin, but so far the sub-surface extensions of the Lower Palaeozoic of the Georgina Basin have not been determined. The Mornington Island bores have further restricted the prospective area of the Carpentaria Basin, but examination of the Gulf is required.

The discovery of oil and gas at Cabawin and oil at Moonie in the southward sub-surface extension of the Bowen Basin has increased the prospects of this basin considerably; the search is now for areas of adequate sand development in or in contact with the Permian marine source rocks. It is evident that the Bowen Basin is a structural basin including only the western part of the original basin of sedimentation.

The emphasis within the Great Artesian Basin has been on the exploration of the pre-Mesozoic rocks; very little attention has been given to the salt-water sands within the marine Cretaceous, although these must be rated as definitely promising. The discovery of Lower Palaeozoic marine sediments at Mootwingee on the margin of the Great Artesian Basin increases the probability that the Lower Palaeozoic sequence will be found in the sub-surface of the Basin. Data on the structure of the basin and of pre-Mesozoic basins underlying it are gradually being obtained. The discovery in bores of red-bed sequences below the Mesozoic has reduced the prospects of the pre-Mesozoic basins in the east-central area of the basin. The age of these sequences is not well established.

The Wreck Island bore on the western margin of the northern off-shore extension of the Maryborough Basin revealed marine Tertiary sediments overlying basement. This discovery has not yet been followed up. In the Sydney Basin, marine fossils have been found in the Narrabeen; structural drilling targets, to help in the search for extensions of the Camden gas sands, have been found. A shallow stratigraphic bore at Wentworth (New South Wales) has revealed Permian sediments underlying the Tertiary in the Murray Basin. In the Gippsland Basin, marine Cretaceous sediments were found by re-examination by the Geological Survey of Victoria of material from the Hollands Landing bore. Little new work has been done lately on the St. Vincent and Torrens Basins, but a bore is planned for the Adelaide area.

Significant shows of wet gas and condensate have been found in the Otway Basin. The latest bore to test this area, Flaxmans Hill No. 1, struck wet gas, but on test it produced insufficient quantities for development. The problem is now to locate areas of adequate sand development in contact with the source beds. Submarine seepages of heavy crude petroleum have been located off the coast of south-eastern South Australia. Apart from their adding to the positive indications of petroleum in the basin, these seepages are also important in that they suggest that, whatever its origin, this petroleum is migrating through the Tertiary formations and may, in favourable locations, form pools in the permeable Tertiary sands.

The stratigraphic bores at Eyre and Gambanga in the Eucla Basin revealed shallow basement; although this confirms the thinness of the prospective sediments in these areas, it does not effectively change the prospects of this basin, which have always been regarded as low and related to the possibility of a thicker prospective sequence seawards.

---

\* Sonic logs record the sound velocity characteristics of the strata.

The occurrence of marine Triassic sediments and traces of oil in the Permian in stratigraphic bores drilled at Beagle Ridge and the confirmation of the presence of basement rocks in the Beagle Ridge have provided additional prospective sediments to those already known in the Perth Basin, and have afforded evidence of large structural relief in the basement. The Beagle Ridge and its flank would appear to be one of the more important prospective areas in the Basin. The first deep stratigraphic bore in the central area of the Perth Basin has been drilled at Eneabba, 150 miles north of Perth.

In the Carnarvon Basin, additional seismic work in the Rough Range area apparently has not produced a structural drilling target. Seismic surveys are proposed over the Wandagee basement ridge and in the Salt Lake area, where there are numerous anticlines in Tertiary and Cretaceous sediments, and may presage the exploration of the prospective Palaeozoic sediments. Stratigraphic bores have shown traces of petroleum in both the Sakmarian Lyons Group and the Artinskian Byro Group and of marine sediments and permeable sands in both.

The Canning Basin is now known to include the deep Fitzroy Basin and at least two shallower basins in the south. The deep basin may be repeated at the east margin of the Canning Basin beyond a structurally high saddle at the south-eastern end of the Fitzroy Basin. This deep basin may continue southward to join with the north-western extension of the Officer Basin. The hinge areas on either side of these deep basins and the basement ridges between the shallower basins offer attractive areas for exploration, since Lower Palaeozoic sediments of good permeability have been proved on the Broome Ridge and marine shales in the Samphire Marsh bore. The occurrence of salt intrusions at Frome Rocks No. 1 bore and at Woolnough Hills suggest that salt-dome structure may be found in the Palaeozoic with or without expression in the Mesozoic. Although the pre-Permian has been the main exploration target, oil shows have been obtained in the Permian, and it remains a prospect in areas where contemporaneous structures are intact.

The Spirit Hill bore revealed good source rocks in the Carboniferous of the Bonaparte Basin, but the distribution of the various sequences has yet to be established. Recent marine seismic work in the Gulf may help to establish this and to give useful information on the regional structure.

A regional gravity traverse has suggested a moderately deep Palaeozoic basin in the area east of Newcastle Waters in the Barkly Basin, and geological surveys near Camooweal suggest the possibility of the contemporaneity of the Camooweal Dolomite and the petroliferous Middle Cambrian. Geological, seismic and drilling exploration now programmed by the Bureau of Mineral Resources may change the prospects of this basin very markedly.

Regional surveys of the Georgina Basin have indicated a marine sequence, dominantly carbonate, of moderate thickness and some structural relief. Sediments appear mainly to be of shelf type, but the palaeogeography of the basin of deposition has not been established.

It has also been established that the Amadeus Basin is a structural basin with sediments mainly of shelf type, dominantly of sand and shale. It is suggested that the Georgina and Amadeus Basins are the structural remnants of a single large basin of deposition in which the Amadeus Basin represents the proximal shelf, the Georgina Basin the distal shelf or rim, and the Precambrian gneiss of the Harts Range area the location of the deep basin. The Precambrian gneiss shows strong evidence of deep burial and north-south compression at a stage much later than the high-grade metamorphism. The main problem in these two basins is to determine their structural and sedimentational histories so that possible migration directions of oil in relation to the development of structures may be assessed.

6. **Results.**—The net result to date is that there have been some encouraging discoveries, which are partially disappointing because they have not been commercial. But there has also been, over the past few years, a very significant improvement in the quality as well as the amount of exploration work done, and this has resulted in a very large increase in the understanding of the geology of the sedimentary basins. This in turn has enhanced the prospect of finding oil in commercial quantities.

7. **Footage Drilled in the Search for Oil.**—The following table, while not connected with the article above, shows details of footage drilled in the search for oil in the Commonwealth of Australia and the Territories of Papua and New Guinea during the years 1957 to 1961.

## § 16. Sulphur.

1. **Mine Production of Sulphur.**—There is no production of elemental sulphur (brimstone) in Australia. However, while sulphur is itself non-metallic, considerable quantities are contained in certain metallic minerals produced.

It should be noted that large quantities of the lead and zinc concentrates produced are exported and the sulphur they contain is not available for utilization in Australia.

The following table shows the sulphur content of the metallic minerals produced during 1960 from which sulphur was subsequently recovered.

## SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED, 1960.

(Tons.)

Mineral in which contained.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.

(a) Estimated.

(b) Partly estimated.

The principal producing centres during 1960 were as follows.

(i) *New South Wales.* All the sulphur produced in New South Wales was contained in lead and zinc concentrates produced at Broken Hill and in lead, zinc and pyrite concentrates produced at Captain's Flat.

(ii) *Queensland.* In Queensland, sulphur was contained in zinc concentrate milled at Mount Isa and in pyrite concentrate produced at Mount Morgan. No sulphur was recovered in Australia from the zinc concentrate.

(iii) *South Australia.* A pyrite concentrate containing sulphur was produced from ore mined at Nairne, 22 miles east of Adelaide.

(iv) *Western Australia.* Sulphur was recovered from pyrite concentrates produced at Norseman and at Kalgoorlie. Although both these concentrates are auriferous, gold was recovered only from that produced at Kalgoorlie.

(v) *Tasmania.* A pyrite concentrate was recovered at Mount Lyell after the prior separation of the copper sulphide mineral. Recoverable sulphur was also contained in lead, lead-copper and zinc concentrates milled at Rosebery, but only that contained in zinc concentrate was recovered in Australia.

The following table shows for the years 1956 to 1960 the sulphur content of minerals from which sulphur was subsequently recovered.

2. **Production of Sulphuric Acid.**—The principal use of sulphur is in the manufacture of sulphuric acid, which is produced in all States and in the Northern Territory. Most of this is used for fertilizer manufacture, although small quantities are used in the rubber and chemical industries and in the preparation of uranium concentrates. Sulphur contained in lead concentrate is used for acid manufacture at Port Pirie and sulphur in zinc concentrates is used at Risdon. Pyrite concentrate is used as a source of sulphur for acid manufacture at Cockle Creek, near Newcastle, and at Port Kembla in New South Wales, and at Melbourne, Brisbane, Adelaide, Perth and Fremantle. However, about half the sulphuric acid produced in Australia is made from imported elemental sulphur. The next table shows, for the years 1957 to 1961, the Australian production of sulphuric acid and the quantity of sulphur in the acid produced from various sources.

**SULPHUR USED IN SULPHURIC ACID PRODUCTION: AUSTRALIA.**

## § 17. Non-metallic Minerals.

1. **Asbestos.**—Production of asbestos in Australia has been confined mainly to crocidolite which is found principally in the Hammersley Ranges in Western Australia, about 200 miles south-east of Roebourne. Production from this centre, which has reserves estimated at two million tons, has expanded greatly in recent years. The only deposits of chrysotile, located mainly at Nunyerry in Western Australia and at Baryulgil in New South Wales, are relatively small and widely scattered.

The production of chrysotile and crocidolite in Australia during the five years 1956 to 1960 is shown in the following table.

**PRODUCTION OF ASBESTOS.**  
(Short Tons of 2,000 lb.)

Year.	Chrysotile.			Crocidolite.
	New South Wales.	Western Australia.	Australia.	Australia.(a)

1960 .. .. .	1,072	69	1,141	14,472

(a) Produced in Western Australia only.

2. **Clays.**—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In addition, the statistics are incomplete as some clays are outside the normal administrative control of some State Mines Departments. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1960.

**PRODUCTION OF CLAYS, 1960.**  
(Tons.)

(a) Estimated.

(b) Not available.

(c) Incomplete.

3. **Gypsum.**—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) in the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of St. Vincent Gulf and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important and more than half the total Australian production of gypsum in 1960 came from that State, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia. The greatest part is used in the manufacture of plaster and most of the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry.

The production of gypsum in Australia is set out in the following table for the five years 1956 to 1960.

**PRODUCTION OF GYPSUM.**  
(Tons.)

Year.	New South Wales.	Victoria.	South Australia.	Western Australia.	Australia.
1956 .. ..	94,203	78,895	263,136	27,121	463,355
1957 .. ..	101,491	68,647	274,945	33,353	478,436
1958 .. ..	90,664	72,010	306,749	35,515	504,938
1959 .. ..	101,143	81,101	296,816	37,731	516,791
1960 .. ..	95,514	100,386	340,762	44,216	580,878

4. **Limestone.**—Limestone is quarried in all States, being used mainly for the manufacture of cement. Other uses are in agriculture, in the steel industry as a metallurgical flux, and in the chemical industry.

The recorded statistics of limestone production in each State of Australia for the years 1956 to 1960 are shown in the following table. Details of limestone produced for use as building or road material are not included.

**PRODUCTION OF LIMESTONE(a).**  
(\*000 Tons.)

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
1956 ..	1,700	813	(b)	1,076	(b)	179	4,264
1957 ..	1,897	846	(b)	1,135	(b)	205	4,572
1958 ..	2,061	859	(b)	1,220	(b)	235	5,324
1959 ..	2,056	1,120	(b)	1,017	(b)	230	5,305
1960 ..	2,400	1,157	(b)	1,064	(b)	215	5,669

(a) Includes shell and coral.

(b) Not available for publication, included in total for Australia.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield, Thuddungra and Lake Cargelligo in central New South Wales. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1956 to 1960 are set out in the table below.

**PRODUCTION OF MAGNESITE.**  
(Tons.)

Year.	New South Wales.	Queensland.	South Australia.	Western Australia.	Australia.
1956 .. ..	63,050	..	831	804	64,685
1957 .. ..	83,271	..	202	..	83,473
1958 .. ..	69,030	20	341	..	69,391
1959 .. ..	59,777	..	790	19	60,586
1960 .. ..	61,668	..	498	..	62,166

6. **Mica.**—Almost all Australian production of muscovite mica comes from the Northern Territory, though small quantities of inferior grades have been obtained from most of the States. The centre of mica production in the Northern Territory is the Harts Range area, about 130 miles north-east of Alice Springs, where mining has been carried on intermittently since 1892, and the Plenty River field, 50 miles north-east of Harts Range.

Prior to 31st December, 1960, the Commonwealth Mica Pool, details of which are given on page 1094 of Official Year Book No. 46, purchased all mica which was in accordance with certain specifications. From that date, this agency ceased buying locally-produced mica and will discontinue selling the product as soon as practicable.

Local production of block mica has declined steadily and in 1960 it had fallen to 9,500 lb. which was the lowest since 1925.

The following table shows the quantity of muscovite mica produced in Australia during the five years 1956 to 1960.

## MUSCOVITE MICA PRODUCTION.

Scrap .. .. .	..	40,600	..	..	..

7. Salt.—Salt is obtained in Australia by evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1956 to 1960. Estimates of total Australian production are also shown.

## SALT PRODUCTION.

('000 Tons.)

Particulars.	1956.	1957.	1958.	1959.	1960.
South Australia .. .. .	332	339	336	358	359
Estimated Australian Total .. .. .	409	428	430	468	463

8. Other Non-metallic Minerals.—(i) *General*. Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite*. The principal centre producing first-grade barite is at Oraparinna in the North Flinders Range in South Australia. The production of barite in Australia during 1960 was 11,417 tons, of which 11,357 tons came from South Australia and 60 tons from New South Wales.

(iii) *Diatomite*. Production of diatomite is carried on mainly in the eastern States of Australia. In 1960, 4,659 tons were produced, of which New South Wales produced 3,941 tons, mainly at Coonabarabran and Barraba. The remaining 718 tons were produced in Victoria, principally at Lillcur.

(iv) *Dolomite*. Up to 1950, New South Wales was the main producer of dolomite, but in that year a large deposit at Ardrossan in South Australia, which now produces over 90 per cent. of the total output, was opened up. In 1960, South Australia produced 182,290 tons; New South Wales, 3,357 tons; Tasmania, 2,678 tons; Queensland, 2,139 tons; and Western Australia, 404 tons, making an Australian total of 190,868 tons.

(v) *Felspar*. The main demand for felspar comes from the glass and ceramic industries. Most of the Australian production of felspar comes from New South Wales, which produced 5,325 tons of the Australian total of 8,414 tons in 1960. Of the remainder, 1,942 tons came from Western Australia and 1,147 tons from South Australia.

(vi) *Gemstones.* (a) *Opals.* Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia which produced opals worth £598,000 in 1960. Other production in 1960 was from Lightning Ridge in New South Wales, valued at £40,000.

(b) *Sapphires.* In 1960, sapphires produced in the Inverell District of New South Wales were valued at £3,000 and production from the Anakie Field in Central Queensland was valued at £2,000.

(vii) *Phosphate Rock.* In the course of a search for deposits of uranium ore near Rum Jungle in 1961, the Bureau of Mineral Resources discovered high-grade phosphate rock deposits in the area. At this stage the size and potential of this discovery are not known. However, a programme is being conducted to make a preliminary assessment of the extent and grade of the new deposits.

(viii) *Silica.* The production of silica is not recorded in Victoria and production recorded in all other States may not be complete. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, but does not include production for use as building or road material, was 165,447 tons in New South Wales; 15,882 tons in Queensland; 14,615 tons in South Australia; 8,925 tons in Western Australia; and 5,231 tons in Tasmania; making a total of 210,100 tons recorded for those States during 1960.

(ix) *Sillimanite.* In 1960, 1,524 tons of sillimanite were produced in Australia, all of which came from South Australia.

(x) *Talc.* The Australian output of talc (including steatite) was 15,670 tons in 1960. South Australia produced 9,064 tons, Western Australia 5,470 tons, and New South Wales 1,136 tons.

(xi) *Other.* Other non-metallic minerals produced in Australia in small quantities during 1960 were fluorspar, garnet concentrate, glauconite, industrial diamonds, foundry loam, mineral pigments, pebbles for grinding, perlite, pyrophyllite, and serpentine.

### § 18. Oversea Trade in Minerals and Mineral Products.

Particulars of the quantity and value of the principal mineral and mineral product items imported into and exported from Australia during the years 1958 to 1960 are shown in the following table.

#### IMPORTS AND EXPORTS OF PRINCIPAL MINERALS AND MINERAL PRODUCTS: AUSTRALIA.

Item.	Unit of Quantity.	Quantity.			Value. (£A. 000.)

(a) Includes re-exports.

(b) Includes lead-copper concentrate.

Considerable quantities of metallic ores, concentrates, slags and residues are exported from Australia for refining overseas. The following table shows the quantities of such items exported during 1960 and their principal metallic content as estimated by assay.

## PRINCIPAL METALLIC CONTENTS OF SPECIFIED ORES AND CONCENTRATES, ETC., EXPORTED FROM AUSTRALIA DURING 1960.

Ores and Concentrates, etc.	Quantity Exported.	Metallic Contents—Estimated from Assay.						
		Copper.	Gold.	Lead.	Silver.	Tin.	Tungstic Oxide.	Zinc.
		ton.	ton.	fine oz.	ton.	fine oz.	ton.	ton.

(a) Includes lead-copper concentrate.

**§ 19. Government Aid to Mining, and Mineral Control.**

1. **Aid to Mining.**—(i) *Commonwealth.* (a) *Assistance to the Gold Mining Industry.* For particulars, see para. 9, page 1064.

(b) *Assistance to the Copper Mining Industry.* For particulars, see para. 8, page 1073.

(c) *Assistance to Producers of Sulphuric Acid and Iron Pyrites.* As a result of Tariff Board recommendations, the Sulphuric Acid Bounty Act was extended for a period of five years from 1st July, 1960. Arising from these same recommendations, the Pyrites Bounty Act 1960 was enacted on 15th December, 1960, to be operative for a period of five years from that date. The Acts provide for bounties to be paid to producers of iron pyrites and sulphuric acid.

(d) *Income Taxation Concessions.* For particulars of income taxation concessions to the gold, copper and uranium mining industries, see pages 1065, 1073 and 1085 respectively. Further information is given in a booklet entitled *Income Tax for the Mining Industry*, issued by the Commissioner of Taxation.

(e) *Search for Oil.* The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea and considerable sums have been spent during recent years in geological and geophysical surveys and in drilling operations.

The Bureau of Mineral Resources, in close co-operation with the Mines Departments of the States, has continued regional geological and geophysical surveys throughout the Commonwealth. In 1957, the Commonwealth introduced the Petroleum Search Subsidy Act 1957, whereby stratigraphic drilling operations were subsidised to the extent of 50 per cent. of cost. The Petroleum Search Subsidy Act of 1959 widened the scope of operations for which subsidy was offered to include all types of geophysical surveys and off-structure drilling operations. Another amendment in 1961 further widened the scope of the 1959 act to provide subsidy for test drilling and detailed structure drilling operations. It also provided for the calculation of drilling subsidies on a footage basis as an alternative to the total cost basis. To the end of 1961, actual payments of subsidy totalling more than £3 million had been made in accordance with the terms of the Subsidy Acts and it is anticipated that this amount will be greatly increased during the next three years because of the recent impetus in oil search activities. For further particulars of Government assistance in oil exploration, see § 15.—Oil Exploration in Australia, page 1095.

(f) *Rewards for Discovery of Uranium Ore.* The Commonwealth Government's offer to pay rewards up to a maximum of £25,000 for the discovery of any one deposit of uranium ore was withdrawn on 31st March, 1961.

(g) *Mica Pool.* The Commonwealth Mica Pool ceased purchasing mica on 31st December, 1960, and the Committee of Management was abolished on the same day. The Pool will continue to sell mica while stocks last.

(h) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories, and makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(i) *Ore-dressing and Mineragraphic Investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out at the Ore-Dressing Laboratory, situated in the Department of Mining, University of Melbourne, and at the Ore-Dressing Laboratory, Kalgoorlie, situated at the School of Mines. The Mineragraphic Investigations Section is located in the Geology Department, University of Melbourne.

These two groups of laboratories perform complementary services—the Mineragraphic Investigations Section assesses microscopically the state of dispersion and the mineral association of ore bodies, while the Ore-Dressing Laboratories investigate the composition of ores and provide advice on suitable methods for their full-scale treatment. Much of this research is carried out on a co-operative research basis with the mining industry.

(j) *Department of Territories.* For particulars of the Northern Territory Administration, see paragraph (h) under section (ii) *States* following.

(ii) *States.* (a) *General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining may consist of grants to assist the prospecting and/or mining for gold and minerals, and for the purchase, removal and installation of mining plant or equipment. A quantity of mechanical equipment is also available in several localities for hire at reasonable rentals to prospectors and small mine operators, and District Inspectors have geiger counters and scheelite detectors which are loaned to approved persons.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery for gold mining. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration. A survey of the State's underground water reserves is in progress, in conjunction with the opening up of town water supplies from underground sources.

(d) *Queensland.* Various forms of assistance to mining are made available by the Queensland Department of Development and Mines. Grants are made from the Consolidated Revenue Fund for use on construction and maintenance of roads in mining areas. Advances are made from the Gold Mining Encouragement Fund for mining development work. This assistance is restricted to gold mines and advances are repayable from proceeds of the mine, if any. From the Assistance to Metalliferous Mining Fund, plant, such as jackhammers, compressors and pumps, is purchased and maintained. Such plant is made available on hire, the rental payments being credited back to the fund. Prospecting assistance is made available in approved cases, the rates being £2 10s. a week for a single man and £3 10s. a week for a married man with dependants. This is not repayable. From the Advances to Mining Fund, assistance by way of subsidy is advanced for mine development. This is repayable from proceeds of the mine. The Department also maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry, and diamond-drilling plants in several parts of the State. The Venus State mill at Charters Towers is available for the treatment of gold-bearing ores.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) Hire of boring plant and mining equipment, boring and testing of mineral deposits, financial subsidies in approved cases for prospecting and mining development, development of sub-surface water supplies for farming, pastoral, irrigation and mining purposes, and purchase of basic metal ores from prospectors; (ii) geological examination of mineral deposits, water supply, dam foundation and drainage problems, guidance on mining legislation, and publication and issue of geological bulletins and maps. It also provides, through the Australian Mineral Development Laboratories, chemical and metallurgical, analytical and assay investigation, testing and treatment of ores and minerals, petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £5 a week south of the 26th parallel of latitude, and of £6 a week north of that parallel; also provision is made for the supply of some tools required for prospecting.

There are twenty State batteries operating intermittently throughout the goldfields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government also has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or de-watering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work and for diamond and other types of drilling. The Department has available for hire percussion and diamond drills for exploration, as well as a complete plant for small shaft sinking and tunnelling. Other assistance is rendered to the industry by geological and engineering advice and through ore-dressing research into metallurgical recoveries and the selection and design of treatment plant.

(h) *Northern Territory.* To encourage the development of the mining industry, the Northern Territory Administration has erected four Government batteries for the treatment of miners' ores. Only two of these, at Tennant Creek and Mount Wells near Burrundie, are now in operation. The re-opening of the other two batteries will depend on the revival of small scale wolfram and tin mining in Hatches Creek and Maranboy where these batteries are located.

The crushing charges are subsidized by Government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out developmental work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

2. **Controls on Minerals and Metals.**—Export controls are maintained over certain minerals and metals. These controls are enforced by means of the Customs (Prohibited Exports) Regulations as amended from time to time by Statutory Rules. To export these materials, it is necessary to obtain a clearance from the following Commonwealth Departments:—

- (i) Department of National Development—Mineral sands in all forms (including concentrates) containing zircon, rutile or ilmenite; lithium ores and concentrates; beryllium ores and concentrates; manganese ores; iron ores, beneficiated iron ores and iron concentrates;
- (ii) Department of Trade—Iron, steel and ferrous alloys;
- (iii) Department of Primary Industry—Phosphate rock, phosphate and superphosphate and fertilizers containing phosphate or superphosphate;
- (iv) Australian Atomic Energy Commission—All radio-active minerals, metals and compounds, including uranium and thorium in all forms; lithium metal and alloys; beryllium metal, alloys and compounds; zirconium metal, alloys and compounds.

Further information concerning the Atomic Energy Commission appears in Chapter XV.—Education and Research.

## CHAPTER XXVIII.

## DEFENCE.

## § 1. Department of Defence.

1. **Functions and Organization.**—(i) *Functions.* The functions of the Department of Defence include:—

Defence policy;

Joint Service matters and matters having an inter-departmental defence aspect;

The financial requirements of defence policy and the allocation of the funds made available;

The supply aspect of defence policy including the review of production programmes and capacity;

Important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organization and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

(ii) *Organization, higher defence machinery and the control of the joint Service machinery.* The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on—

(a) The defence policy as a whole and the co-ordination of military, strategic, economic, financial and external affairs aspects of defence policy.

(b) matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect, and

(c) such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The Chiefs of Staff Committee meets regularly for the discussion of technical matters on a joint service basis, and is responsible in peace for the preparation of strategic appreciations and military plans. The functions of the Defence Administration Committee, in addition to the regular review of the progress of the Defence Programme, include the co-ordination and integration of Service activities and the improvement of methods and organization. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

In addition, the Defence Business Board furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

**2. Basis of Current Defence Policy.**—The basic aim of Australia's defence policy is to ensure the security of Australia's mainland and its island territories. This aim can best be achieved by the policy of collective defence in south-east Asia, which is the area of primary defence interest to Australia. Australia is party to the various collective security arrangements which have been developed in the area—SEATO, ANZUS and British Commonwealth arrangements for defence co-operation.

Global war as a deliberate act of policy is considered unlikely, and the main aim of Australia's defence preparation is continually to improve its ability to make prompt and effective contribution of forces to a limited war or insurgency situation in south-east Asia in support of collective arrangements.

**3. The Defence Programme.**—(i) *Objectives.* The defence programme must be maintained at a level that will enable Australia to meet its regional and home defence responsibilities. In the present strategic circumstances, emphasis is placed on having both regular and citizen forces more readily available than in the past, and improving their means of both strategic and tactical mobility. The forces are provided with effective conventional weapons and equipment which is standard or compatible as far as possible with that used by the United States forces, with whom Australia is associated in defence arrangements.

The naval programme provides for the progressive development of a well-balanced and effective operational fleet with modern anti-submarine and air defence capability. Two modern guided missile destroyers of the *Charles F. Adams* type have been ordered from the United States, and the aircraft carrier *Melbourne* will be converted to an anti-submarine helicopter carrier in 1963. Two new type-anti-submarine frigates have already been commissioned, and two more will join the fleet in 1963. These four ships will be equipped with the Seacat short range air defence missile. The former aircraft carrier *Sydney* has been commissioned as a fast transport for the movement of Australian forces overseas, and a fleet tanker is being commissioned in the R.A.N. as H.M.A.S. *Supply*. By agreement with the Royal Navy, modern submarines are maintained on the Australian station for anti-submarine training.

The Army has been reorganized to increase the strength and ready availability of the combat element of the Regular Army and of the volunteer Citizen Military Forces. The combat elements are based on the new pentropic division, and steady progress is being made in the provision of new equipment. The tactical flexibility and mobility of the field force has been improved by the acquisition of four landing ships and the formation of the Army light aircraft squadron equipped with light helicopters and light fixed-wing aircraft.

The Air Force is an operational force consisting of three bomber squadrons, four fighter squadrons, two maritime reconnaissance squadrons and three transport squadrons. A fighter replacement programme has been commenced; the new aircraft will be the Mirage fighter with the air frames and engines manufactured to a substantial extent in Australia. New and improved Neptune maritime reconnaissance aircraft have also been obtained, and the acquisition of helicopters and a surface-to-air guided weapons system is proceeding. A major programme of airfield construction, extensions and installation has been effected.

In the field of research and development, Australia is making its principal contribution through the Long Range Weapons Establishment at Woomera and Salisbury in South Australia, which is a joint United Kingdom-Australian effort for the testing of guided weapons. The executive authority for this project is the Department of Supply (see p. 1119). Woomera is also to be used for the European Launcher Development Organization.

(ii) *Financial.* Details of defence expenditure for 1960-61 and the allocation of the Defence Vote for 1961-62 are set out in the two tables which follow.

DEFENCE EXPENDITURE.  
(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
<b>DEFENCE EXPENDITURE, 1960-61.</b>				
Defence .. .. .	1,255	30	18	1,303

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st December, 1961, are shown in the following table.

## PERSONNEL STRENGTHS: SERVICES, DECEMBER, 1961.

Category.	Navy.	Army.	Air Force.	Total.
Permanent Forces .. .. .	10,803	20,765	15,635	47,203
Citizen Forces (Volunteers) .. .. .	7,259	28,855	705	36,819
<b>Total Forces .. .. .</b>	<b>18,062</b>	<b>49,620</b>	<b>16,340</b>	<b>84,022</b>

4. *Australian Forces Serving in Malaya.*—Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya since it was first established in 1955. The strength of the Australian component of the Reserve is as follows:—

Navy: Two destroyers or frigates; an annual visit by an aircraft carrier;

Army: One infantry battalion and supporting units;

Air Force: One light bomber squadron, two fighter squadrons and supporting units.

At the request of the Government of the Federation of Malaya, the Strategic Reserve continues to be stationed in that country and to assist in border security operations against the communist terrorists.

Australia has also recently deployed to Thailand, at the invitation of the Government of Thailand, a contingent of Sabre fighter aircraft in pursuance of its obligations under the SEATO Treaty. A small number of Army instructors are also being provided at the invitation of the Government of South Vietnam to assist that country in training for jungle warfare, village defence and other related activities.

## § 2. Naval Defence.

1. **Administration.**—Under the provisions of the Constitution, the Minister of State for the Navy administers the Department of the Navy. Under the Naval Defence Act 1910–1952, the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members, and the Secretary, Department of the Navy.

2. **Historical.**—Prior to 1901, naval defence systems were organized under the State Governments. Information regarding these systems is given in Official Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Official Year Books No. 3, page 1060, and No. 12, page 1012. An account of the building of the Australian Navy, its cost, the compact with the Imperial Government, and other details appears in Official Year Book No. 15, pages 921–23. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Official Year Book No. 36, pages 1023–27.

3. **Link with the Royal Navy.**—Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty, and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London, and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers.

A liaison staff is also maintained by the Royal Australian Navy in Washington and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

4. **The Australia Naval Station.**—Defined limits of the Australia Station are as follows.

*Eastern*—From 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south along this meridian.

*Northern*—From 3° 30' North, 169° East, west to 125° East, thence south to the coast of Celebes, thence west along the coast of Celebes to 120° East, thence south along this meridian to 10° South, thence west to 78° East.

*Western*—From 10° South, 78° East, south along this meridian.

5. **Strength of H.M.A. Fleet.**—Ships in commission at June, 1962, were:—

- 1 Aircraft carrier;
- 1 Fast Troop Transport;
- 4 Destroyers;
- 5 Fast anti-submarine frigates;
- 5 Frigates;
- 4 Auxiliary vessels.

6. **Ships' Service Outside Australian Waters.**—During the year ended June, 1962, H.M.A. Ships *Melbourne*, *Vendetta*, *Vampire*, *Voyager*, *Yarra*, *Parramatta*, *Quiberon*, *Quickmatch* and *Queenborough* served on the Far East Station as units of the Commonwealth Strategic Reserve with headquarters at Singapore. H.M.A. Ships *Diamantina*, *Gascoyne* and *Banks* also made visits beyond the limits of the Australia Station.

7. **Personnel.**—The authorized establishment strength of the Royal Australian Navy for 1961–62 is 12,800 comprising 1,359 officers and 11,441 ratings. In December, 1961, the actual strength of the Naval Forces, permanent and reserves, serving full time, was 1,184 officers and 9,203 ratings, including 106 native ratings of the Papua and New Guinea

Division of the Royal Australian Navy. 74 cadet midshipmen were undergoing training at the Naval College. 13 officers and 358 ratings were serving in the Women's Royal Australian Naval Service. Reserve strength serving part-time comprised 1,038 officers and 6,250 ratings.

8. **Women's Royal Australian Naval Service.**—The established personnel strength of the W.R.A.N.S. is 16 officers and 370 ratings. They serve in the shore establishments in the following categories: Radio-operators, Regulating, Writers, Stores Assistants, Sick Berth Attendants, Motor Transport Drivers, Wrans (Radar Plot), Cooks and Stewards.

9. **Reserve Training.**—Members of the Royal Australian Naval Reserve carry out limited training at night or on Saturday afternoons, plus 13 days' annual continuous training; engagements are for three years and pay is approximately that of the Permanent Naval Forces. Special courses and service of longer duration are available to selected members. The Royal Australian Fleet Reserve consists of former ratings of the R.A.N., R.N., or a Dominion Navy.

10. **Papua and New Guinea Division of the Royal Australian Navy.**—A Papua and New Guinea Division of the Royal Australian Navy, consisting of native ratings, was inaugurated in July, 1951, as a separate part of the Permanent Naval Forces for employment in Papua and New Guinea and adjacent waters.

11. **Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy maintains two front line squadrons, embarked in the operational carrier, H.M.A.S. *Melbourne*. This ship is fitted with an angled deck, steam catapult and mirror deck-landing sights. Training and support squadrons for H.M.A.S. *Melbourne's* Sea Venom jet all-weather fighter and ground attack aircraft and Gannet turbo-prop anti-submarine aircraft are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales.

12. **Ship Construction and Repair.**—There are three naval dockyards, at Garden Island and Cockatoo Island, New South Wales, and at Williamstown, Victoria. The dockyard at Cockatoo Island is operated by the Cockatoo Docks and Engineering Company Pty. Ltd., by agreement with the Commonwealth.

Under the present ship construction programme, two anti-submarine frigates are being completed at Cockatoo Island and Williamstown and will commission in June, 1963, and January, 1964, respectively. All three dockyards are also engaged on ship refitting work for the Navy.

The six coastal minesweepers purchased from Admiralty and the fleet replenishment tanker H.M.A.S. *Supply* are undergoing conversion and refit in the United Kingdom and are due to arrive in Australia in December, 1962. In addition, two destroyers of the *Charles F. Adams* class have been ordered from the United States.

13. **Naval College.**—The Royal Australian Naval College, transferred in 1930 from Jervis Bay, A.C.T., to Flinders Naval Depot, was re-established at Jervis Bay in January, 1958, and was commissioned as H.M.A.S. *Creswell*.

14. **Training Establishments.**—Flinders Naval Depot, at Crib Point, Westernport, Victoria, is the basic training establishment for ratings in the permanent forces, while several advanced training schools are established in Sydney, New South Wales. The Apprentice Training Establishment at Quaker's Hill, New South Wales, provides secondary education as well as training in trades in which the lads will be employed during their service in the Royal Australian Navy. Junior recruits training was introduced at Fremantle, Western Australia, during the latter half of 1960. A large proportion of instructional hours is devoted to school subjects, and the remaining instructional time is basic naval training and disciplinary training, so that on completion of training, ratings will be ready to undergo technical and specialist courses.

15. *Ships of the Royal Australian Navy.*—The following ships were in commission or in reserve in June, 1962.

## SHIPS OF THE ROYAL AUSTRALIAN NAVY, JUNE, 1962.

## § 3. Military Defence.

1. *State Systems.*—A detailed historical account of the Australian defence forces prior to federation appears in Official Year Book No. 2, pages 1075–80. *See also* Official Year Book No. 12, page 999.

The strength of the military forces of the States at 31st December, 1900 (the eve of federation), exclusive of cadets, reservists, and rifle club members, was—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353.

2. **Commonwealth Systems.**—(i) *General.* Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organization of Commands after World War II., see Official Year Book No. 46 and earlier issues.

In 1960, a complete re-organization of the Australian Military Forces was undertaken. The re-organization involved the reshaping of the Army by:—

- (a) the adoption of a pentropic divisional organization,
- (b) increasing the Regular Field Force,
- (c) reducing the command, training, and administrative structure, and
- (d) converting the Citizen Military Forces to a wholly volunteer force and eliminating national service training which was introduced in 1951 and suspended in 1959–60.

This re-organization has now been completed.

(ii) *Composition of the Australian Military Forces.*

- (a) *The Australian Regular Army.* Current planning provides for a Regular Army with an annual average strength of 21,000.
- (b) *The Citizen Military Forces.* Planned strength of the C.M.F. is 30,000 volunteers. Members are required to volunteer for service overseas in the event of war.
- (c) *Strength of the Australian Military Forces.* The effective strength of the Australian Military Forces at 30th April, 1962, was—Australian Regular Army (including 652 Pacific Islanders and 586 Women's Services), 21,370; Citizen Military Forces, 30,153.

(iii) *Organization.* Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After World War II., Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the mainland capital cities of Australia. The geographic extent of Commands is as follows.

*Northern Command.*—The State of Queensland and a small part of northern New South Wales and the Territory of Papua and New Guinea.

*Eastern Command.*—The State of New South Wales, less those parts included in Northern, Southern, and Central Commands.

*Southern Command.*—The State of Victoria, the State of Tasmania, and part of southern New South Wales.

*Central Command.*—The State of South Australia, plus a portion of south-western New South Wales.

*Western Command.*—The State of Western Australia.

*Northern Territory Command.*—The Northern Territory.

The basic formation in the re-organized Army is the pentropic division, which is designed to have improved tactical capabilities with increased mobility and flexibility under conditions of tropical warfare. The pentropic division consists of five battle groups, each under the direct command of the divisional headquarters. Each battle group has, as its basic component, an infantry battalion of larger size and greatly increased fire-power compared with the infantry battalion which existed prior to the re-organization. In addition to the strengthened infantry battalion, each battle group includes supporting elements such as armour, artillery, engineers, signals, etc.

There are two pentropic divisions, one consisting of two A.R.A. and three C.M.F. battle groups, and the other of five C.M.F. battle groups.

(iv) *Military Training Systems.* (a) *The Staff College.* Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Empire training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. As from 1961, the course is to be of eighteen months' duration and will be held biennially. The normal intake is 50 students, and, on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for Grade II. appointments in all branches of the staff in peace and war, and to prepare them to assume, after experience, command and higher staff appointments. Each course includes, among the students, Army representatives of the United Kingdom and other Dominions and countries.

Included in the 1961 course are students from the United Kingdom, Canada, New Zealand, India, Pakistan, Ceylon, United States of America, Thailand, Malaya and Indonesia. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is now also provided by New Zealand.

(b) *The Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations and provide for admission by "normal" and "service" entries. The length of the "normal" course is four years; "service" entry cadets attend for three years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organized into military and civil departments, and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces under an agreement made with the Government of that Dominion.

(c) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of 18 and 23 years are eligible to apply for entrance. A special entry provides for candidates up to 25 years. The course is of 44 weeks' duration, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted, before being posted to regimental duties.

(d) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(e) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their

Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(f) *Other Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established:—

Jungle Training Centre.	Royal Australian Army Service Corps Centre.
Armoured School.	Royal Australian Army Medical Corps School of Army Health.
School of Artillery.	Royal Australian Army Ordnance Corps School.
School of Military Engineering.	Royal Australian Electrical and Mechanical Engineers' Training Centre.
Transportation Training Centre.	School of Music.
School of Military Survey.	Air Support Unit (Army Component).
School of Signals.	
Infantry Centre.	
Army Intelligence Centre.	

(v) *Women's Services.* In July, 1950, approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment into the Royal Australian Army Nursing Service commenced in November, 1950, and into the Australian Women's Army Corps early in 1951. In February, 1951, the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June, 1951, the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only—

- (a) Royal Australian Army Nursing Corps,
- (b) Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command.

(vi) *Forces Overseas.* At 30th April, 1962, 1,339 members of the Australian Military Forces were serving in Malaya and Singapore as part of the British Commonwealth Far East Strategic Reserve.

(vii) *History of the Australian Military Forces in War.* Members of the Commonwealth Military Forces have taken part in the following campaigns:—the South African War, 1902; the First World War, 1914–1918; the Second World War, 1939–1945; Korea, 1950–1954; Malaya, 1955–1960.

(viii) *The Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organization. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, however, does not form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units.

The establishment of the Corps is 38,000 all ranks, and at 31st March, 1962, comprised 308 School Cadet units with a posted strength of 37,025, all ranks.

## § 4. Air Defence.

1. **General.**—A statement regarding the preliminary steps taken in connexion with the development of air defence appears in Official Year Book No. 18, page 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War, in Official Year Book No. 36, page 1027.

2. **Administration and Organization.**—The Department of Air is responsible for policy for the organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Technical Services, Air Member for Personnel, Air Member for Supply and Equipment, and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is in Canberra. A R.A.A.F. representative is located in London and Air Attachés are located in Paris and Washington.

The units of the Royal Australian Air Force are organized into the following two functional Commands throughout Australia and its Territories.

*Operational Command.* Operational Command is responsible for the command of operational units and the conduct of their operations within Australia and its territories.

*Support Command.* Support Command is responsible for the command of training units, supply and servicing units; recruitment and individual training in the R.A.A.F.; and supply and servicing, including technical servicing of the R.A.A.F., in Australia.

The organization of the Royal Australian Air Force includes the following types of formations and units.

*Formations.* These comprise a headquarters unit to control the activities of a number of units at one location. Each formation has a base squadron which provides common services to all units at the location.

*Flying Squadrons.* These bomber, fighter, transport and maritime reconnaissance squadrons undertake the operational and, in conjunction with operational conversion units, the operational training flying commitments of the R.A.A.F.

*Operational Conversion Units.* These units specialize in operational conversion training of aircrew for the bomber and fighter squadrons.

*Aircraft Depots.* These units specialize in major overhauls, etc., of aircraft and equipment and relieve flying unit ground staff of these commitments.

*Stores Depots.* Stores and equipment ordered by the R.A.A.F. are delivered to these centrally located depots for distribution to units.

*Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units.* These units specialize in the aircrew and ground staff training required by the R.A.A.F.

*Airfield Construction Squadrons.* These units specialize in the construction of R.A.A.F. aerodromes and associated buildings and works services.

*Royal Australian Air Force Academy.* This unit is the training college for officer cadet entrants to the R.A.A.F.

*Telecommunications Units.* These units are responsible for the communications services of the R.A.A.F.

*R.A.A.F. Staff College.* This college trains specially selected R.A.A.F. officers for higher staff and command posts.

3. **Aircraft.**—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Canberra; fighter squadrons—Avon Sabre; transport squadrons—Dakota, Hercules and Metropolitan; maritime reconnaissance squadrons—Neptune; Army liaison squadron—Bell helicopter and Cessna; Search and Rescue squadron—Iroquois helicopter; training—Avon Sabre, Canberra, Dakota, Meteor, Vampire and Winjeel.

4. **Establishment.**—The Royal Australian Air Force establishment comprises an operational element and a support element consisting of 16,282 personnel. The support element includes headquarters and administrative staffs and the organization for training, supply and maintenance.

5. **Strength of Royal Australian Air Force.**—At 1st May, 1962, the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 15,754; Citizen Air Force, 741; and General Reserve, 15,524.

6. **Women's Royal Australian Air Force.**—At 1st June, 1962, the Women's Royal Australian Air Force had an establishment of 865, with an enlisted strength of 773. There are 27 musterings, excluding members of the W.R.A.A.F. in training. The entry age is 18 to 34 years inclusive. Parental consent must also accompany applications for those between the ages of 18 and 21 years. A good education is necessary and applicants must be of British nationality, single, or a widow without dependants, and must be physically fit. Engagement period is six years with the option of re-enlistment for further periods of two, four, or six years. Members are contributors to the Defence Forces Retirement Benefits Fund.

All W.R.A.A.F. trainees undergo a month's initial training course at Point Cook, Victoria. On graduating they are posted for duty to R.A.A.F. units anywhere in Australia. Wherever possible, the Air Force endeavours to post members of the W.R.A.A.F. to R.A.A.F. units according to an indicated preference.

7. **Operations in Korea and Malaya.**—Reference to R.A.A.F. participation in operations in Korea and Malaya is contained in Official Year Book No. 39, pages 1251–2 and in subsequent issues.

## § 5. War Gratuities.

Reference is made in earlier issues of the Official Year Book to the payments made under the provisions of the War Gratuity Acts 1920 (*see* No. 15, p. 930) and the War Gratuity Act 1945–1947 (*see* No. 41, p. 999).

## § 6. Department of Supply.

1. **General.**—Reference to the creation of the Department of Supply is contained in Official Year Book No. 39, page 1257. On 24th April, 1958, the Department of Defence Production was abolished and the functions previously undertaken by that Department were transferred to the Department of Supply. References to those functions and to the activities of the various branches and establishments of the former Department of Defence Production are contained in Official Year Book No. 44, pages 1059–61.

2. **Functions of the Department.**—The functions of the Department of Supply include:—

- (i) Defence research and development, including the operation of the Joint United Kingdom—Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments;
- (ii) Manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces;
- (iii) Arrangement of contracts for the supply of goods and the performance of services;
- (iv) Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware and other defence goods;

- (v) Acquisition, maintenance and disposal of strategic materials;
- (vi) Planning and establishment of manufacturing facilities for the production of munitions and other defence goods;
- (vii) Investigation and development of Australian sources of supply in connexion with defence.
- (viii) Sale or disposal of surplus Commonwealth property other than land or buildings;
- (ix) Provision of Commonwealth transport facilities outside the Australian Capital Territory;
- (x) Provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required;
- (xi) Provision of security services within the Department;
- (xii) Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions and other defence goods.

3. **Act Administered.**—The Minister for Supply administers the Supply and Development Act 1939–1948, except insofar as it concerns the building (*see also* Chapter XIV., § 1, p. 514 of this volume), repair and maintenance of merchant ships and the building, extension, alteration, repair and maintenance of shipyards, drydocking and repair facilities for merchant ships.

4. **Research and Development Branch.**—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom—Australia Long Range Weapons Organization. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated at 339 Swanston-street, Melbourne, and the following establishments are included in the Branch:—

- (a) Weapons Research Establishment, Salisbury, South Australia.
- (b) Defence Standards Laboratories at Maribyrnong, Victoria, Finsbury, South Australia, and Alexandria, New South Wales.
- (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This Establishment has three main sections, namely, the Trials and Instrumentation Wing, the Weapons Research and Development Wing and the Engineering Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom—Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research but also provides a supporting research service for the Joint Project. The Engineering Wing designs the technical features of new installations on the range and operates the engineering facilities of the Establishment.

The headquarters of Weapons Research Establishment, consisting of the main laboratory, workshop, and administrative services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been established in South Australia at Woomera, which is approximately 280 miles north-west of Adelaide and 9 miles north of Pimba, a settlement on the Trans-continental railway line.

Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia, for scientific purposes, of facilities for space vehicle tracking and communications. A space Research Station has been established at Island Lagoon, south of Woomera, for optical and telemetry

tracking and recording of information from satellite and deep space probe vehicles. The station carries out this work with a Baker Nunn camera, Minitrack radio tracking equipment and an 85 ft. diameter dish radio telescope. Tracking stations have been set up at Red Lake, north of Woomera, and at Muchea in Western Australia. These are an integral part of "Project Mercury", the "Man in Space" project of the United States National Aeronautics and Space Administration.

A modern township of 688 family houses and flats and 1,118 single quarters, together with modern amenities such as hospital, school, kindergartens, community store, swimming pool, and all sporting facilities, has been built at Woomera to accommodate the range and allied services personnel and their families.

(iii) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong, Victoria; Finsbury, South Australia; and Alexandria, New South Wales, continue to give comprehensive service to industry, the armed services and other Commonwealth and State Departments. The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

(iv) *Aeronautical Research Laboratories.* The broad function of the Aeronautical Research Laboratories is the application of scientific knowledge in the field of aeronautics to the operational and technical problems of the armed Services and industry, and to the development of new weapons and military equipment. More specifically, the Laboratories conduct investigations in aerodynamics, structures, materials, and power plants, with particular attention to aeronautical defence problems, especially those of missile design and operational effectiveness. These Laboratories also collaborate with the United Kingdom on aeronautical research matters of mutual interest.

5. *Production.*—(i) *Munitions.* The Department is responsible for the production in Australia of munitions (other than specialized Navy requirements) for the Australian Services. Production is carried out substantially in government factories but large orders are also placed with private industry.

The following government factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, all in Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne and Brunswick, Victoria.

With the exception of the Clothing Factory, these factories are largely complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling the raw materials, and these components are then passed to the filling factories for filling and assembly. However, the Factory makes the complete round for small arms ammunition, the propellant being supplied by the Explosives Factories. Electronic fuses are also being developed and produced with this factory as the co-ordinating establishment. Private industry is producing the electronic components required for these fuses.

The Ordnance Factories have produced armament and propulsion units for Daring class destroyers and frigates. Heavy forgings are produced at Maribyrnong and heavy plate fabrications are produced at both Maribyrnong and Bendigo. At Maribyrnong, production capacity exists for fire control equipment. Steel shell bodies are produced at Maribyrnong and passed to Explosives Filling Factories to be filled with explosives and assembled with other components produced at the Ammunition Factory and in private industry.

At Port Melbourne, production capacity exists for large marine diesel engines. At present, one 5,500 b.h.p. "Doxford" engine for the Australian Shipbuilding Board and two 10,500 b.h.p. "Sulzer" engines for the Broken Hill Proprietary Company Limited are in production. The major components of these engines are forged and/or fabricated at Maribyrnong and Bendigo.

The Small Arms Factory is equipped to make the rifles and other small arms for which the Ammunition Factory produces the ammunition. The Factory is currently producing the F.N. 7. 62mm. automatic rifle for the Australian Army to replace the .303 in. Lee Enfield rifle.

Orders for the new rifle have also been received from the New Zealand, Ghana and Malayan Governments. The stocks required for these rifles are produced from Australian-grown timber and fabricated by private industry.

The Clothing Factory makes uniforms and canvas goods for the three services as well as for the Postmaster-General's and Repatriation Departments and the Department of Supply.

(ii) *Aircraft.* (a) *General.* Production of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is also administered by the Department of Supply. Planning of capacity and the negotiation of contractual arrangements in connexion with aircraft modification, repair and overhaul, and for the supply of certain aircraft and engine spare parts and airborne equipment for the R.A.A.F., the R.A.N. and the Army are also functions of the Department.

The following government factories are operated:—Aircraft Factory, Fishermen's Bend and Test Field, Avalon, Victoria; and Airframe Repair Workshops, Parafield and Northfield, South Australia.

(b) *Aircraft, Engine and Other Production.* The current approved production programmes for the major aircraft manufacturing organizations comprise the French Mirage supersonic fighter, the Jindivik radio-controlled jet-propelled target aircraft, and the Malkara guided missile at the Government Aircraft Factory, Melbourne; Avon-Sabre jet-engined fighters and Rolls-Royce Avon and S.N.E.C.M.A. Atar turbo-jet engines at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne.

The Mirage project is being undertaken by the Government Aircraft Factory acting as the prime contractor, with the Commonwealth Aircraft Corporation manufacturing the engine, wing and fin.

Jindiviks are being produced for the Weapons Research Establishment at Woomera and for the British Government. The Malkara missile is being developed in accordance with British Army needs.

Production activities included the manufacture of engine spare parts at the De Havilland Aircraft Engine Factory, Sydney, of aircraft pressed metal parts at Chrysler Australia Ltd., Adelaide, and of turbine and compressor blades for jet engines at A.N.I. National Forge Pty. Ltd., Melbourne.

(c) *Repair and Overhaul.* During the year, the R.A.A.F. continued the broad policy of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul, repair or the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of certain other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped for the purpose.

Canberra bomber and Jindivik target aircraft were repaired and modified at the Government Aircraft Factories.

Dakota transport and other miscellaneous aircraft were reconditioned and serviced at the Airframe Repair Workshops at Parafield, South Australia.

Vampire trainer and carrier-operated Sea Venom aircraft were modified, repaired and overhauled at De Havilland Aircraft Pty. Ltd., Bankstown, New South Wales. Engines from Sea Venom, Vampire and Gannet aircraft, as well as from Centurion tanks, were modified, repaired, and overhauled by De Havilland at Lidcombe. Propellers from the R.A.A.F. and the R.A.N. were also overhauled there.

The repair and overhaul of carrier-operated Fairey Gannet aircraft for the R.A.N. and the erection of Meteor target aircraft for the Woomera Rocket Range were handled by the Fairey Aviation Company of Australasia Ltd., Sydney.

Sycamore helicopters, Bristol freighter aircraft and Alvis Leonides and Bristol Hercules engines were repaired and overhauled by Bristol Aviation Services, also in Sydney.

Wright turbo-compound engines from Neptune aircraft and Allison T.56 engines from Hercules transports were overhauled at Qantas Empire Airways Ltd., Sydney, for the R.A.A.F.

The reconditioning and servicing of aircraft instruments, electrical, electronic and other ancillary equipment and airframe components were carried out by various contractors.

(d) *Telecommunications.* Developmental and production orders were placed with industry for new and improved types of Service telecommunications equipment. Large quantities of this equipment were also repaired and overhauled.

6. *Contract Board.*—(i) *General.* Under the Supply and Development Act 1939–1948, the Contract Board is the authority responsible for purchasing supplies and arranging services for the Naval, Military and Air Forces of the Commonwealth, as well as for the Department of Supply. It is also responsible for the sale or disposal of all surplus or unserviceable war *matériel* and other goods approved for disposal. In addition, the Board purchases and arranges disposals on behalf of other Commonwealth departments and authorities which have no public contract organization of their own, e.g., Immigration, National Development and External Affairs (Colombo Plan supplies).

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board organization, the purchases and realizations from disposals for the years 1959–60 and 1960–61.

**CONTRACT BOARD ORGANIZATION : PURCHASES AND REALIZATIONS FROM DISPOSALS.**

7. *Defence Supply Planning.*—The central planning authority of the Department is the Planning Branch, the principal functions of which are:—

- (i) to plan for and to assist in the development of additional production capacity to meet the Services' munitions requirements for peace and war;
- (ii) to provide and administer stockpiles of relevant materials and reserve pools of plant and equipment considered essential for expansion of production in the event of war;
- (iii) to prepare and advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- (iv) to provide advisory services in the field of instrumentation, machine tools, materials, and inspection, to Government factories and contractors engaged in the production of munitions requirements; and
- (v) to administer the national stockpile.

A series of Industry Advisory Committees has been established to advise the Minister and the Department in the development of industrial mobilization plans to meet the Services *matériel* requirements for mobilization and war. The Committees are: Ammunition;

Electrical; Explosives and Chemicals; Machine Tools and Gauges and Munitions Factory Equipment; Materials; Military Vehicles; Radar and Telecommunications; Weapons and their Equipment; Hard Fibres; Raw Cotton; and Rubber and Allied Materials.

Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

**8. Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the Central Storage Authority and the Central Transport Authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Australian Capital Territory or the Northern Territory. It has agents in Canberra and Darwin. It also operates a Shipping and Customs Section and the England–Australia Bulk Air Freight Scheme for Commonwealth Departments.

On 30th June, 1960, the Branch had under its control land, buildings and works, vehicles, plant and equipment valued at £10,034,121 and 3,310,254 sq. ft. of storage space, as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

**9. Finance Branch.**—The total expenditure on Department of Supply activities during the year 1960–61 was £51,681,000, comprising £20,982,000 from Parliamentary appropriations, and £30,699,000 from Trust Fund Accounts. The latter consisted of—Stores and Transport, £6,314,000; Government Factories and Establishments, £16,055,000; Munitions Production, £8,180,000; and Defence Production Materials, £150,000.

## CHAPTER XXIX.

### REPATRIATION.

#### § 1. General.

The Repatriation Commission, established under the Repatriation Act 1920-1961, and consisting of three full-time members, is responsible for the administration of the Repatriation Act and associate legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The central office is in Melbourne and there is a branch office under the control of a Deputy Commissioner in each State.

The principal functions of the Department are—

- (i) the payment of war and service pensions to ex-service men and women and their dependants;
- (ii) the provision of medical treatment to ex-service men and women for injuries and illnesses caused or aggravated by their war service;
- (iii) the provision of medical treatment in certain circumstances to ex-service men and women who are suffering from injuries and illnesses not caused or aggravated by war service;
- (iv) the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Other functions of the Repatriation Department are outlined in a later section of this chapter (*see* § 5, General Benefits and Miscellaneous, page 1134).

Benefits are provided in respect of service, not only in the 1914-18 and 1939-45 Wars, but also in the Korea and Malaya operations and with the British Commonwealth Far East Strategic Reserve.

#### § 2. War Pensions.

1. *General.*—The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the War Pensions Act 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the Australian Soldiers' Repatriation Act (amended from 31st December, 1950, to the Repatriation Act). Some of the main features relating to war pensions under the Repatriation Act 1920-1961 are set out in the following paragraphs.

(i) *Eligibility for Pension.* The 1943 amendments to the Repatriation Act considerably widened the provisions in this respect, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarized as follows.

- (a) A member of the forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in circumstances which can be regarded as combat against the enemy, is

covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

- (b) In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.
- (c) There is a third ground applicable to all in (a) and those in (b) who had at least six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

(ii) *Pensions for Incapacity.* From 28th September, 1961, the 100 per cent. pension rate for an ex-serviceman's incapacity was increased from £5 10s. to £5 15s. a week (higher rates were payable in respect of certain commissioned ranks). The rates for wives and children of incapacitated ex-servicemen are £1 15s. 6d. and 13s. 9d. a week, respectively.

(iii) *Supplementation of Pensions.* Where an ex-serviceman is, because of his war disability, temporarily (for at least three months) precluded from earning other than a negligible percentage of a living wage, an additional pension may be granted to bring the total pension to the ex-serviceman up to £13 5s. a week, an increase of 10s. from 28th September, 1961.

(iv) *Women's Nursing and Auxiliary Services.* Members of Women's Services are eligible for pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Pulmonary Tuberculosis.* If, at any time after discharge, an ex-serviceman who served in a theatre of war became or becomes incapacitated, or died or dies, from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also § 3. Service Pensions.) Medical treatment may also be provided on application.

(vi) *Special Rates.* Those who have been totally blinded as a result of war service and those who are permanently and totally incapacitated receive a special pension which was increased from £12 15s. to £13 5s. a week from 28th September, 1961. This special pension may also be granted to ex-servicemen who are suffering from pulmonary tuberculosis. In addition, there is an intermediate rate for tuberculous patients fit for light employment. This intermediate rate was similarly increased from £8 17s. 6d. to £9 7s. 6d. a week. In addition to the special pension, an attendant's allowance of £3 5s. a week is granted to the war-blinded and to certain others who are deemed to be in need of an attendant. A war-blinded ex-serviceman who is also affected with total loss of speech or total deafness is entitled to an attendant's allowance of £5 5s. a week in lieu of that referred to above. The wife and any children under 16 years of age receive the same rates as shown in sub-para. (ii).

(vii) *Clothing Allowance.* As from 1st October, 1959, provision was made for ex-servicemen to receive a clothing allowance ranging from 3s. 9d. to 7s. 6d. weekly for damage to clothing caused by the use of an artificial limb or other appliance, where the incapacity is due to war service, or by the use of oils, ointments, or other substances used in the necessary treatment of accepted disabilities, e.g. skin diseases, suppurating wounds, etc.

(viii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 13s. 6d. to £7 10s. a week in addition to the statutory rate of pension are payable as from 28th September, 1961. In addition, attendant's allowances of either £3 5s. or £5 5s. a week are payable in certain double amputation cases.

(ix) *Time Limit Removed for Wives and Children.* Prior to the 1950 amending Act, wives who were married and children who were born after specified dates, were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(x) *Rates of Pension for Death. (a) Widows.* From 28th September, 1961, the rates of pension were increased by 5s. a week, the minimum rate being increased from £5 10s. to £5 15s. a week (higher rates are payable in respect of certain commissioned ranks).

In addition to pension, a widow receives an allowance if she has a dependent child or children under the age of 16 years, or if she is over 50 years of age, or is permanently unemployable, or has a child over 16 years who is undertaking education or training and who is, in the opinion of the Commission, not receiving an adequate living wage.

(b) *Children.* From 28th September, 1961, the rate of pension for the eldest child (under 16 years of age) was increased from £1 11s. 6d. a week to £1 19s. a week, and that for each younger child from £1 2s. 6d. a week to £1 7s. 6d. a week. Additional pension of 6s. a week may be paid in certain circumstances. Where both parents are dead, pension payable to each child was increased from £3 3s. a week to £3 11s. 6d. a week.

(xi) *Widowed Mother on Death of Member.* A pension ranging from £2 5s. to £4 3s. a week, according to the rank of the ex-serviceman, may be granted to the widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment of an additional amount (not exceeding £5 5s. a week as from 28th September, 1961) according to the extent of other income of the pensioner. The value of property owned does not affect the pension.

2. *Appeals Tribunals.*—The principal Act was amended, as from 1st June, 1929, to create tribunals to hear appeals in respect of war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against a decision of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the Tribunals to hear appeals by certain members whose application for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

3. *Summary of War Pensions, 1960-61.*—The following table provides a summary of war pensions for the 1914-18 War, the 1939-45 War, the Korea and Malaya operations and the Far East Strategic Reserve.

WAR PENSIONS: SUMMARY, AUSTRALIA, 1960-61.

Particulars.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Far East Strategic Reserve.	Total.
New claims granted .. .. .	2,094	27,202	913	61	30,270
Restorations .. .. .	356	976	7	..	1,339
Claims rejected (gross) .. .. .	2,085	14,718	848	118	17,769
Pensions cancelled or discontinued .. .. .	955	15,653	68	1	16,677
Deaths of pensioners .. .. .	4,921	3,112	24	..	8,057

## § 3. Service Pensions.

1. *General.*—The Repatriation Act 1920-1961, administered by the Repatriation Department, provides for a service pension to be paid, subject to a means test of income and property, to the following persons.

- (i) A male ex-serviceman who is sixty years of age and who served in a theatre of war, or to an ex-servicewoman who is 55 years of age and who served abroad. No pension is payable to the wife or children under 16 years of age of an ex-serviceman granted a service pension on account of age.
- (ii) An ex-serviceman who is permanently unemployable and who served in a theatre of war (or in the case of an ex-servicewoman, who served abroad). Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.
- (iii) An ex-serviceman suffering incapacity from pulmonary tuberculosis whether or not the person served in a theatre of war. Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

Only those persons who qualify under (iii) are entitled to receive both service and invalid pensions at the same time.

2. *Rate of Pension.*—The maximum rate of service pension is the same as that for age and invalid pensions paid by the Department of Social Services, namely, £5 5s. a week. A member service pensioner with two or more children under 16 years of age in his care, custody and control, is eligible for a further 10s. a week for each child except the first, if he receives a service pension on the ground of being permanently unemployable, or suffering from pulmonary tuberculosis. In addition, a service pensioner in receipt of service pension at the maximum rate may also receive supplementary assistance of 10s. a week if he pays rent and is entirely dependent upon his service pension.

The maximum rate for a member's wife is £2 17s. 6d. a week; the rate for the first child under sixteen years of age is 15s. a week and for each other child (not exceeding three) 2s. 6d. a week.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable will depend upon the claimant's "means as assessed", which consists of his annual rate of income plus a property component equal to 9d. a fortnight for each complete unit of £10 of net value of property above £200. For married couples, except where they are separated or

in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's "means as assessed" may consist entirely of income, entirely of property component, or of both income and property components. If his "means as assessed" do not exceed £3 10s. a week, the claimant will receive the full pension of £5 5s. a week. If his "means as assessed" exceed £3 10s. a week and are less than £8 15s. a week, a reduced pension will be payable. The rate payable will be the maximum rate of £5 5s. a week less the amount by which "means as assessed" exceed £3 10s. a week. If his "means as assessed" are £8 15s. a week, or in the case of a married couple £17 10s. a week, no service pension is payable.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are—certain income derived from property, gifts or allowances from children, parents, brothers or sisters, benefits from friendly societies, child endowment, Commonwealth health benefits. The value of board and lodgings received by a pensioner is assessed as income at 12s. 6d. a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, livestock. Property does not include an applicant's home, furniture or personal effects, the surrender value of life assurance policies (up to £750), value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1st November, 1941, to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War. Members who served in Korea, and those who served in Malaya prior to the commencement of the Repatriation (Far East Strategic Reserve) Act 1956, are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment and treatment in Repatriation General Hospitals.

3. Operations, 1960-61.—The following table gives a summary of service pensions during 1960-61.

§ 4. Medical Treatment of Ex-Servicemen Suffering from War Service Disabilities.

At 30th June, 1961, there were 4,563 in-patients in Repatriation medical institutions and State mental hospitals, including a number whose care was undertaken by the Repatriation Commission on behalf of other countries or Commonwealth departments. There were 443,119 out-patient attendances for treatment during the year, and 1,794,410 treatments by local medical officers resident in metropolitan and country areas. The expenditure for the year ended 30th June, 1961, on medical treatment was £14,643,130.

## § 5. General Benefits and Miscellaneous.

1. **Other Departmental Activities.**—(i) *General.* During the 1939–45 War, the ordinary activities of the Department in the way of general benefits for the welfare of ex-servicemen and dependants were carried on without interruption. They were mainly education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

By legislation passed in June, 1940, these benefits were extended to servicemen engaged in the 1939–45 War, and in November, 1950, to those engaged in the Korea and Malaya Operations, and new benefits designed for the re-establishment of servicemen after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where such are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings, where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplementing of wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or other occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to £75 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949, the Commission took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction, and became responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now concluded, the prescribed time limits for eligibility having expired. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Commission, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during the five years 1956–57 to 1960–61 on the more important general repatriation benefits for all wars.

## EXPENDITURE ON GENERAL REPATRIATION BENEFITS: SUMMARY.

(£.)

Year ended 30th June—	Medical Treatment.	Employment and Vocational Training.	Business Loans and Furniture.	Soldiers' Children Education Scheme.	Living Allowances.	Other Benefits.	Total.

2. **Expenditure by the Repatriation Department, 1960–61.**—The net expenditure by the Department for the year ended 30th June, 1961, was £94,281,208 distributed as follows.

Pensions, Allowances and other Benefits	..	..	..	£ 74,689,179
Treatment	..	..	..	14,643,130
Administration	..	..	..	3,721,265
Works, Rent and Maintenance	..	..	..	1,227,634
				<b>94,281,208</b>

3. **Settlement of Returned Service Personnel on the Land.**—Reference to the settlement of returned service personnel on the land will be found in Chapter IV.—Land Tenure and Settlement, pages 96–9, of this Year Book.

4. **The Services Canteens Trust Fund.**—(i) *Introduction.* The Services Canteens Trust Fund was established under the Services Trust Funds Act 1947. This Act transferred to the Fund the profits and assets of the Army, Navy and Air Force canteens, the mess and regimental funds of disbanded wartime units, money derived from the sale of amenities supplied to the defence forces between 3rd September, 1939, and 30th June, 1947, and funds held by the A.M.F. Special Benefits Committee, the trustees of the R.A.N. Relief Fund and the trustees of the R.A.A.F. Welfare Fund.

(ii) *Establishment and Administration of the Fund.* The total amount transferred to the Fund to 31st December, 1961, was £5,526,892. The Act prescribed that, of this, £2,500,000 and such further amounts as the trustees of the Fund might from time to time decide should be devoted to the provision of education facilities for the children of eligible ex-service men and women, and that the balance of the fund should be used to provide relief for ex-service men and women and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees, appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration.

Regional committees have been established in all Australian States, the Australian Capital Territory, the Northern Territory (Darwin and Alice Springs), New Zealand and London. All Australian diplomatic and consular posts also act as local representatives of the trustees. They have delegated to them by the trustees specific powers to deal with applications for assistance from the Fund.

Members of regional committees are all persons who served in the 1939–45 War or are widows of men who served during the war, and, with the exception of regional chairmen and deputy chairmen, have been selected by the trustees from nominees of the major ex-service organizations. They serve in an honorary capacity.

(iii) *Assistance from the Fund.* (a) *General.* Persons eligible for assistance from the Fund are those who, between 30th September, 1939, and 30th June, 1947, served in the Australian Naval, Military or Air Forces, including members of the Canteens Staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees are charged under the Services Trust Funds Act with providing educational assistance, including professional and trade training, for the children of deceased or incapacitated eligible servicemen or of eligible servicemen who are in needy circumstances, and for the children of other eligible servicemen in exceptional circumstances, and with providing benefits or other relief for eligible servicemen and their dependants in necessitous or deserving circumstances.

The trustees have introduced schemes for providing—

- (i) Welfare relief for ex-service men and women who are eligible for benefits, and for their dependants;
- (ii) Benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and
- (iii) Education benefits for the children of eligible ex-service men and women.

From its inauguration in 1947, the Fund is to be available for 40 years for welfare relief and for 30 years for educational benefits.

(b) *Welfare Relief.* More than one million men and women served in the Australian Armed Forces during the 1939–45 War and they and all their dependants are eligible for benefits from the Fund. The trustees have therefore prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts.

Applications are carefully investigated to determine the bona fides of the applicant and of the case presented, and to help regional committees in deciding the kind of assistance if any, to be given. Where possible, investigations are made by trained social workers on the staff either of the Fund or of recognized agencies.

To 31st December, 1961, £1,227,417 had been granted as welfare relief from the fund, £860,716 to ex-servicemen and their dependants, and £366,701 to widows and orphans. The amount granted during 1961 was £71,522. A total of 27,879 ex-service men and women, and 11,080 widows and orphans were granted welfare assistance from the Fund to 31st December, 1961.

Of all persons eligible for assistance from the Fund, widows and orphans are considered likely to be in greatest need, especially in the period immediately following the death of an ex-serviceman. Consequently, every effort is made to locate these widows and orphans and their degree of need is interpreted more liberally than is that of ex-servicemen.

(c) *Assistance under Afflicted Children's Scheme.* Also considered particularly deserving of assistance are dependent children suffering from afflictions which permanently disable or seriously retard their progress, or prevent the enjoyment of normal health and strength, who face a prospect of complete or partial dependence on others for all or part of their lives. The trustees introduced a plan to ensure that any eligible child suffering from a serious affliction may be assisted as necessary to have access to whatever treatment or facilities are available to help the child to lead as normal a life as possible, despite his or her handicap. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31st December, 1961, 2,244 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of £110,613.

(d) *Educational Assistance Scheme.* Educational assistance is restricted to children who are 15 years of age and over, except in exceptional circumstances, when it may be granted from the age of 13, and, in the case of orphans, when assistance may commence from the age of 12 years. The object of the trustees is to assist eligible children to obtain the highest education within their capacity. Educational assistance from the Fund is in the form of awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances. These awards are granted for practically every type of course of education, whether secondary, tertiary or commercial. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain years, and a maintenance allowance for the child while at school. Provision exists for one post-graduate scholarship each year for study overseas, valued at £1,000 per annum for three years. Higher training education awards are also provided for selected students for post-graduate study in such fields as physiotherapy, speech therapy, occupational therapy, orthoptic therapy, laboratory technique, etc.

The number of children assisted under the educational scheme to 31st December, 1961, was 35,308, and the expenditure on educational awards, post-graduate scholarships and higher training education awards to 31st December, 1961, was £1,768,104.

## § 6. Seamen's War Pensions and Allowances.

The Seamen's War Pensions and Allowances Act 1940 provided for the grant of pensions to Australian mariners (defined in the Act to cover *inter alia* persons employed in sea-going service on ships registered in Australia and engaged in trading, or on certain other ships owned in Australia and operating from Australian ports) who sustained injury through enemy action, and their dependants, and to the dependants of those who were killed by enemy action. Detention allowances were provided for Australian mariners who were captured, and their dependants, during the period of detention. Compensation to Australian mariners was provided for in respect of personal effects lost or damaged through enemy action. Regulations passed in 1942 provided also for the continuance of wages for those captured by the enemy.

Amendments to the original Act and regulations raised pensions to rates corresponding to those payable under the Repatriation Act, and made mariners eligible for general benefits on the same scale as those available under that Act.

Pensions payable at 30th June, 1961, numbered 235, comprising 55 to incapacitated mariners, 99 to their dependants, and 81 to the dependants of deceased mariners, and the total expenditure during the year 1960-61 was £43,570, compared with amounts ranging between £33,000 and £39,000 in the previous four years.

## CHAPTER XXX.

### MISCELLANEOUS.

This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Patents, Trade Marks and Designs; 5. Copyright; 6. The United Nations; 7. Australian Representation Abroad; Oversea Representation in Australia; 8. Retail Trade.

Other matter previously included in this chapter has been transferred to Chapter VI.—Manufacturing Industry, Chapter XIV.—Transport and Communication or Chapter XV.—Education and Research (*see Preface*).

#### § 1. Valuation of Australian Production.

1. *General*.—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published below have been compiled by the Statisticians in the various States from the latest data available, and relate to 1960–61. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to the production of primary industries and factories, and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used.

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized at the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., the gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, cost of containers, commission, and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The Net Value of Production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

For the years shown in the following tables, no allowance for power, power kerosene, petrol and other oils has been made in New South Wales; and in the case of Tasmania, allowance for these items has been made since 1958–59 only. In the case of the mining and quarrying industry, however, this allowance has been made throughout. Costs of materials used in the process of production are not available for all States in respect of Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1960-61.—The following table shows particulars of the gross, local and net values of production in Australia by industries during the year 1960-61.

**GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES : AUSTRALIA, 1960-61.**

(b) Local value.

In the chapters dealing with the respective industries, tables will be found showing the value of production and the value per head of population for the industry by States for a series of years up to 1960-61.

## § 2. Indexes of Production.

In the first two tables in this section, indexes of price and quantum (i.e., value at constant prices) of production are given for the following industrial groups:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than Wool). In the third table, indexes of quantum (i.e., value at constant prices) of production, exports and consumption of farm products for food use are shown.

1. Farm Production Price Indexes.—The Farm Production Price Indexes shown in the following table relate to average "prices" of agricultural, pastoral, farmyard and dairying products realized at the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. "Prices" for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities produced in the period 1923–24 to 1927–28 were used as fixed weights. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (see No. 43, p. 1050). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product marketed during the period 1946–47 to 1950–51 were used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

**FARM PRODUCTION : INDEXES OF PRICES AT PRINCIPAL MARKETS,  
AUSTRALIA.**

1959–60	329	464	402	403	440	391
1960–61	349	443	404	402	397	404

2. **Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.**—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (*see* No. 43, p. 1051). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average unit values for the period 1936–37 to 1938–39 were used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to livestock in Australia.

### INDEXES OF QUANTUM<sup>(a)</sup> OF FARM PRODUCTION, AUSTRALIA.

(Base: Average 1936–37 to 1938–39 = 100.)

Year.	Agri- culture.	Pastoral.	Farm- yard and Dairying.	All Farming.	Wool (Shorn and Dead).	Products other than Wool.

1960–61	177	152	120	152	165	148

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (*see* text preceding table).

3. **Farm Products for Food Use: Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.**—The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936–37 to 1938–39. The items included comprise products in the form in which they are sold from farms in all cases except live-stock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas. Particulars are not available prior to 1946–47 except for the base years.

**FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM(a) OF  
PRODUCTION, EXPORTS AND CONSUMPTION.**

(Base: Average 1936-37 to 1938-39 = 100.)

Year.	Production.		Exports.		Consumption in Australia.	
	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.
1946-47.. ..	90	82	73	66	107	98
1947-48.. ..	113	102	113	102	110	99
1948-49.. ..	110	97	112	99	111	98
1949-50.. ..	116	99	116	99	114	98
1950-51.. ..	109	90	104	86	120	99

1952-53.. ..	118	93	113	89	119	94
1953-54.. ..	122	94	102	79	124	96
1954-55.. ..	121	91	117	89	127	96
1955-56.. ..	129	95	131	97	131	97
1956-57.. ..	123	88	118	85	136	98
1957-58.. ..	115	81	90	64	139	98
1958-59.. ..	146	101	137	94	142	98
1959-60.. ..	138	93	132	89	145	98
1960-61(b) ..	149	98	170	112	143	95

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years, 1936-37 to 1938-39. (b) Subject to revision.

### § 3. Consumption of Foodstuffs and Beverages.

1. **Quantities Consumed.**—The estimates of total consumption and consumption per head of population in Australia in the two tables which follow have been compiled by deducting net exports from the sum of production and imports and allowing for recorded movements in stocks of the respective commodities. While the estimates may be generally accepted as reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at "producer" level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than previously because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by production by householders for their own requirements. In most cases, broad estimates of non-commercial (householders') production have been made. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made, it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second of the following tables have been derived by dividing the total apparent consumption of each commodity or commodity group in a given year by the mean population of Australia in the same period.

More detailed information on the consumption of foodstuffs and beverages is contained in the statistical bulletin: *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

The following tables show the average annual consumption during the three-year periods ended 1938-39, 1948-49, and 1958-59, together with the data for each of the years 1958-59, 1959-60 and 1960-61.

(a) Subject to revision. (b) Not available. (c) Edible weight. (d) Included with fresh.  
(e) Not comparable with data prior to 1960-61 in which year the average weight of an egg was altered in calculations from 1.75 oz. to 2 oz. (f) In terms of weight of shell eggs. (g) Includes fresh equivalent of manufactured products. (h) Probably understated owing to lack of complete data.  
(i) Less than 0.05 lb.

2. Level of Nutrient Intake.—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1958-59 in comparison with the annual average for the three-year periods ended 1938-39, 1948-49 and 1958-59. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs available for consumption per head of population shown in the preceding table.

ESTIMATED SUPPLIES OF NUTRIENTS AVAILABLE FOR CONSUMPTION:  
AUSTRALIA.

(Per Head per Day.)

Nutrient.	Unit.	Average three years ended—			1958-59.	1959-60.	1960-61. (a)
		1938-39.	1948-49.	1958-59.

(a) Subject to revision. (b) The Vitamin A figures for all periods prior to 1960-61 have been revised on the new basis of estimating total Vitamin A activity, used in 1960-61 i.e., by summing the Vitamin A content and one-third of the carotene value.

## § 4. Patents, Trade Marks and Designs.

1. Patents.—(i) *General.* Patents for inventions are granted under the Patents Act 1952-1960, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £19 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

(ii) *Summary.* The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1957 to 1961 are shown in the following table.

## PATENTS : AUSTRALIA.

Particulars.	1957.	1958.	1959.	1960.	1961.
Applications .. ..	9,899	10,511	11,430	11,828	12,901
Applications accompanied by provisional specifications ..	3,683	3,919	4,063	3,772	3,919
Letters patent sealed ..	6,407	6,093	5,488	4,857	4,940

2. Trade Marks and Designs.—(i) *Trade Marks.* Under the trade marks Act 1955-1958 the Commissioner of Patents is also Registrar of Trade Marks. This Act has replaced the Trade Marks Act 1905-1948.

Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned.

A new classification of goods has been adopted and trade marks registered under the repealed Acts are reclassified on renewal.

(ii) *Designs.* Under the Designs Act 1906–1950, the Commissioner of Patents is also Registrar of Designs.

(iii) *Summary.* The following table shows the applications for trade marks and designs received and registered during the years 1957 to 1961.

**TRADE MARKS AND DESIGNS : AUSTRALIA.**

Particulars.	1957.	1958.	1959.	1960.	1961.
<b>Trade Marks—</b>					
Received .. ..	4,589	5,331	5,436	6,083	6,209

<b>Designs—</b>					
Received .. ..	1,394	1,362	1,366	1,283	1,413
Registered .. ..	917	1,758	819	1,507	1,522

3. *Revenue.*—Revenue of the Commonwealth Patent, Trade Marks, Design and Copyright Offices for the years 1957 to 1961 was as follows:—1957, £302,279; 1958, £347,659; 1959, £348,523; 1960, £417,047; 1961, £552,610.

### § 5. Copyright.

1. *Legislation.*—Copyright is regulated by the Commonwealth Copyright Act 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth government promulgated a further Order in Council which came into operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. *Applications and Registrations.*—The following table shows under the various headings the number of applications for copyright lodged and registered for the years 1957 to 1961.

**COPYRIGHT : AUSTRALIA.**

## § 6. The United Nations.

1. **General.**—The Moscow Declaration of 1943 concerning a new international organization for the maintenance of international peace and security marked the end of the League of Nations. The dissolution of the League and the transfer of certain of its functions to the new body, the United Nations, took place over subsequent years. Information concerning the League of Nations was given in No. 35 and earlier issues of the *Official Year Book*.

The Charter of the United Nations was drawn up by the delegates of 50 nations at the United Nations Conference on International Organization at San Francisco from 25th April to 26th June, 1945. Australia's ratification was deposited on 1st November, 1945.

The full record of the Conference is contained in the *Report by the Australian Delegates on the United Nations Conference on International Organization* held at San Francisco from 25th April to 26th June, 1945.

At San Francisco, an Executive Committee and a Preparatory Commission were established, and when these bodies had completed their work of preparation for the first meeting of the United Nations, the General Assembly met in London on 10th January, 1946.

There were 51 original members. By the end of the Sixteenth Session (28th June, 1962), 53 new members had been admitted. There were then 104 member States, namely:—Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Cameroun, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congo (Leopoldville), Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, the Republic of Ireland, Israel, Italy, Ivory Coast, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Madagascar, Malaya, Mali, Mauritania, Mexico, Mongolia, Morocco, Nepal, the Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Romania, Saudi Arabia, Senegal, Sierra Leone, Somalia, South Africa, Spain, Sudan, Sweden, Syrian Arab Republic, Tanganyika, Thailand, Togo, Tunisia, Turkey, the Ukraine, the Union of Soviet Socialist Republics, the United Arab Republic, the United Kingdom, the United States of America, Upper Volta, Uruguay, Venezuela, Yemen and Yugoslavia.

The principal organs of the United Nations are the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council, the International Court of Justice and the Secretariat.

2. **General Assembly.**—This is the forum of the United Nations. In it, each member State is represented and has one vote. It meets in regular annual sessions from the middle of September and has provision for special sessions. With the exception of disputes which are before the Security Council and matters essentially within the domestic jurisdiction of any State, it has power to discuss any matter within the scope of the Charter and to make recommendations upon it. The Assembly elects the non-permanent members of the other major organs and considers annual reports from them. Upon the recommendation of the Security Council, it may expel a member which has persistently violated the principles of the Charter.

3. **The Security Council.**—This has the primary responsibility for the maintenance of international peace and security. It is composed of five permanent members, namely China, France, the United Kingdom, the Union of Soviet Socialist Republics and the United States of America, and six non-permanent members with two-year periods of office, of whom three retire at the end of each year. At the initial election, three countries, including Australia, were elected for a term of two years and three others for a term of one year only. The following are the non-permanent members of the Security Council for the year beginning on 1st January, 1962; Chile, the Republic of Ireland and the United Arab Republic (whose terms end on 31st December, 1962); Ghana and Venezuela (whose terms expire on 31st December, 1963) and Romania. Following an agreement reached during the sixteenth Session, Romania should retire at the end of 1962, and the Philippines should be elected for the remaining year of the term. On procedural matters, decisions are taken by an affirmative vote of any seven members, but on all other matters decisions can be made only on the affirmative vote of seven members, including the concurring votes of all the permanent members. However, members which are parties to a dispute submitted for peaceful settlement do not vote.

The Security Council is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Council or their representatives.

4. **The Economic and Social Council.**—This body consists of eighteen members, each elected for a period of three years. Its main functions are to make, or initiate, studies and reports, and to make recommendations to the General Assembly or to members of the United Nations upon international, economic, social, cultural, educational, health and related matters. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

The members of the Economic and Social Council for the year beginning on 1st January, 1962, are: Brazil, Denmark, Japan, Poland, the United Kingdom and the Union of Soviet Socialist Republics (retiring at the end of 1962); Ethiopia, El Salvador, France, Italy, Jordan and Uruguay (retiring at the end of 1963); and Australia, Colombia, Senegal, the United States of America, Yugoslavia and India (retiring at the end of 1964).

5. **The Trusteeship Council.**—The Charter declares the political, social, cultural and economic advancement of the Trust Territories to be a sacred trust. Under the Charter, the Trusteeship Council should be composed of those members of the United Nations who are administering trust territories and an equal number of members who are not administering trust territories (including any permanent members of the Security Council who are not administering trust territories). Territories which may be placed under trusteeship in accord with individual trusteeship agreements are those previously held under mandate, those detached from enemy states as a result of the 1939–45 War, and those dependent territories placed under the system by the States responsible for their administration. Australia is automatically a member of the Trusteeship Council, as the power administering the Trust Territories of New Guinea and Nauru, the latter in joint administration with New Zealand and the United Kingdom. The present\* members of the Trusteeship Council are: Australia, Belgium, New Zealand, the United Kingdom and the United States of America (administering States), and Bolivia, China, France, India and the Union of Soviet Socialist Republics. China, France and the Union of Soviet Socialist Republics are members of the Trusteeship Council by virtue of their permanent membership of the Security Council.

The Council has among its duties the consideration of annual reports submitted by the trustee States, the carrying out of periodic inspections by agreement with them, and the formulation of questionnaires on the welfare and advancement of the dependent peoples.

6. **The International Court of Justice.**—This consists of fifteen judges, no two of whom may be nationals of the same State. Its jurisdiction comprises all cases which the parties refer to it, and all matters especially provided for in the Charter or in treaties and conventions in force. Provision exists in the Statute of the Court whereby States, parties to the Statute, may accept the jurisdiction of the Court as compulsory, either conditionally or unconditionally in certain international disputes.

The present\* members of the Court are: Judges Alfaro (Panama), Sir Gerald Fitzmaurice (United Kingdom), Basdevant (France), Cordova (Mexico), and Quintana (Argentina)—all retiring in 1964; Judges Badawi (United Arab Republic), Wellington Koo (China), Winiarski (Poland), Sir Percy Spender (Australia) and Spiropoulos (Greece)—all retiring in 1967; and Judges Jessup (United States of America), Koretsky (U.S.S.R.), Tanaka (Japan), Morelli (Italy), Bustamante y Rivero (Peru), all retiring in 1970. Sir Gerald Fitzmaurice was elected at the Fifteenth Session (1960) to fill the casual vacancy caused by the death of Sir Hersch Lauterpacht.

7. **The Secretariat.**—The Secretary-General is the head of the Secretariat of the Organization. He is appointed by the General Assembly upon the recommendation of the Security Council, and he appoints his staff in accordance with the rules approved by the General Assembly. Mr. Trygve Lie (Norway) was appointed first Secretary-General, and at the Sixth Session of the General Assembly in 1950 his appointment was extended for a further three years as from 1st February, 1951. In November, 1952, Mr. Lie announced his intention of retiring, and in April, 1953, Mr. Dag Hammarskjöld (Sweden) was appointed in his place. He was re-appointed for a further five years in September, 1957, but was killed on 18th September, 1961, in an aircraft crash. U Thant (Burma) was appointed on 3rd November, 1961, to act for the remainder of the term (until 10th April, 1963).

\* June, 1962.

8. **Specialized Agencies.**—In addition to these organs of the United Nations, there are specialized agencies which co-operate closely with the United Nations in many fields on economic and social questions.

Those now\* in operation are: International Labour Organization; Food and Agriculture Organization; United Nations Educational, Scientific and Cultural Organization; International Civil Aviation Organization; International Bank for Reconstruction and Development; International Monetary Fund; International Finance Corporation; International Development Association; Universal Postal Union; World Health Organization; International Telecommunications Union; World Meteorological Organization; Intergovernmental Maritime Consultative Organization.

To enable co-ordination of the work of the specialized agencies, arrangements have been made for them to submit reports on their activities and budgets to the United Nations where they are discussed by the Economic and Social Council and the General Assembly.

## § 7. Australian Representation Abroad : Oversea Representation in Australia.

1. **General.**—The following statements show particulars of the various Australian diplomatic and other representatives overseas and of oversea representatives in Australia in October, 1962. Full details of Commonwealth and foreign representation in Australia—diplomatic and consular—and of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra. A statement is issued each quarter by the Department of Trade, showing the latest particulars of the Australian Trade Commissioner Service overseas.

### 2. Australian Representation Overseas.—

#### AUSTRALIAN DIPLOMATIC AND OTHER REPRESENTATIVES OVERSEAS.

Her Majesty's Australian Ambassador Extraordinary and Plenipotentiary to—

*Argentina* (Buenos Aires)—(Vacant); H. W. Bullock (Chargé d'Affaires *ad interim*).

*Belgium* (Brussels)—W. R. Crocker, C.B.E.

*Brazil* (Rio de Janeiro)—O. L. Davis.

*Burma* (Rangoon)—(Vacant); F. T. Homer (Chargé d'Affaires *ad interim*).

*Cambodia* (Phnom Penh)—N. St. C. Deschamps.

*France* (Paris)—Dr. E. R. Walker, C.B.E.

*Germany, Federal Republic of* (Bonn)—F. J. Blakeney.

*Indonesia* (Djakarta)—K. C. O. Shann.

*Ireland* (Dublin)—(Vacant); H. D. White (Chargé d'Affaires *ad interim*).

*Israel* (Tel Aviv)—(Vacant); J. H. A. Hoyle (Chargé d'Affaires *ad interim*).

*Italy* (Rome)—A. T. Sterling, C.B.E.

*Japan* (Tokyo)—L. R. McIntyre, C.B.E.

*Korea* (Seoul)—(Vacant); J. D. Pethebridge (Chargé d'Affaires *ad interim*).

*Nepal*—(Vacant); W. B. Prichett (Chargé d'Affaires *ad interim*) (resident in New Delhi).

*The Netherlands* (The Hague)—W. R. Crocker, C.B.E.

*The Philippines* (Manila)—T. W. Cutts.

*South Africa* (Pretoria)—J. C. G. Kevin.

*Thailand* (Bangkok)—M. R. Booker.

*Union of Soviet Socialist Republics* (Moscow)—S. Jamieson.

*United Arab Republic* (Cairo)—F. H. Stuart.

*United States of America* (Washington, D.C.)—The Hon. Sir Howard Beale, K.B.E., Q.C.

*Vietnam* (Saigon)—B. C. Hill.

**High Commissioner for Australia in—**

*Britain* (London)—The Rt. Hon. Sir Eric Harrison, K.C.M.G., K.C.V.O.  
*Canada* (Ottawa)—D. O. Hay, D.S.O., M.B.E.  
*Ceylon* (Colombo)—B. C. Ballard.  
*Ghana* (Accra)—(Vacant); N. C. K. Evers (Acting).  
*India* (New Delhi)—(Vacant); W. B. Pritchett (Acting).  
*Malaya, Federation of* (Kuala Lumpur)—T. K. Critchley.  
*New Zealand* (Wellington)—The Hon. Dr. D. A. Cameron.  
*Nigeria* (Lagos)—A. P. Renouf.  
*Pakistan* (Karachi)—D. W. McNicol.  
*Tanganyika* (Dar-es-Salaam)—A. F. Dingle.

**Her Majesty's Australian Envoy Extraordinary and Minister Plenipotentiary to—**

*Laos* (Vientiane)—A. M. Morris.  
*Sweden* (Stockholm)—(Vacant); F. R. Gullick (Chargé d'Affaires).

**Australian Military Mission in—**

*Germany, Federal Republic of* (Berlin)—Head, F. J. Blakeney.

**Australian Mission to—**

*European Economic Community*—Head, Sir Edwin McCarthy C.B.E. (Resident in London).  
*United Nations* (New York)—Ambassador, Sir James Plimsoll, C.B.E.  
*United Nations* (Geneva)—Permanent Representative, R. W. Furlonger.

**Australian Commissioner in—**

*Singapore, Brunei, Sarawak and North Borneo* (Singapore)—G. A. Jockel.

**Consul-General in—**

*Greece* (Athens)—G. V. Greenhalgh.  
*Switzerland* (Geneva)—R. W. Furlonger.  
*United States of America* (New York)—A. R. Cutler, V.C., C.B.E.  
*United States of America* (San Francisco)—(Vacant); K. McCloskey (Acting).

**Consul in—**

*Denmark* (Copenhagen)—C. L. Waterman (Acting).  
*New Caledonia* (Noumea)—K. R. Douglas-Scott.  
*Portugese Timor* (Dili)—J. S. Dunn.  
*United States of America* (New York)—W. H. Bray.

**Trade Commissioner Service of the Commonwealth of Australia in—**

*Britain*—G. P. Phillips, Special Commercial Adviser; D. H. McKay, Trade Commissioner and Agricultural Representative (London).

*France*—L. Corkery, Trade Commissioner (Paris).  
*Germany, Federal Republic of*—R. K. Scott, Commercial Counsellor and Trade Commissioner (Bonn).  
*Ghana*—A. C. Schrape, Trade Commissioner (Accra).  
*Greece*—D. L. Crawford, Commercial Counsellor and Trade Commissioner (Athens).  
*Hong Kong*—R. W. Holberton, Senior Trade Commissioner (Victoria).  
*India*—L. C. Holmes, Commercial Counsellor and Senior Trade Commissioner (New Delhi); G. M. Carr, Trade Commissioner (Bombay); N. S. Pantou, Trade Commissioner (Calcutta).  
*Indonesia*—M. J. S. Knowles, Commercial Counsellor and Trade Commissioner (Jakarta).

- Italy*—F. P. Donovan, Trade Commissioner (Rome).  
*Japan*—P. R. Searcy, Commercial Counsellor and Senior Trade Commissioner (Tokyo).  
*Kenya*—J. M. Keddie, Trade Commissioner (Nairobi).  
*Lebanon*—H. M. Le Marchand, Trade Commissioner (Beirut).  
*Malaya, Federation of*—M. G. B. Coultas, Acting Commercial Counsellor and Trade Commissioner (Kuala Lumpur).  
*New Zealand*—D. F. McSweeney, Trade Commissioner (Wellington); C. L. Steele, Trade Commissioner (Auckland); S. D. Shubart, Trade Commissioner (Christchurch).  
*Pakistan*—D. M. Walker, Commercial Secretary and Trade Commissioner (Karachi).  
*Peru*—M. F. Roberts, Trade Commissioner (Lima).  
*The Philippines*—P. G. Gilmour, Commercial Counsellor and Trade Commissioner (Manila).  
*Rhodesia and Nyasaland, Federation of*—K. F. McKernan, Trade Commissioner (Salisbury).  
*Singapore*—W. Cairns, Commercial Counsellor and Trade Commissioner (Singapore).  
*South Africa*—J. L. Chapman, Trade Commissioner (Johannesburg).  
*Sweden*—F. R. Gullick, Senior Trade Commissioner; M. R. Ballantine, Assistant Trade Commissioner (Stockholm).  
*Thailand*—R. J. C. Schneeman, Commercial Counsellor and Trade Commissioner (Bangkok).  
*United Arab Republic (Cairo)*—F. G. Atkins, Commercial Counsellor and Trade Commissioner.  
*United States of America*—A. R. Callaghan, C.M.G., Commercial Counsellor and Trade Commissioner (Washington); H. C. Menzies, Senior Trade Commissioner (New York); B. T. Connolly, Trade Commissioner (San Francisco); D. R. Johns, Trade Commissioner (Chicago); A. J. Bennett, Agricultural Attaché and Assistant Trade Commissioner (Washington).  
*Venezuela*—J. S. Nicholls, Trade Commissioner (Caracas).  
*West Indies, Federation of*—L. J. Martin, Trade Commissioner (Port of Spain).

**Australian Trade Correspondent in—**

- Fiji*—P. O'Halloran (Suva).  
*Formosa*—E. J. N. Mycock (Taipei).  
*Hawaii*—R. E. Waddy (Honolulu).  
*Malta*—P. H. Toledo (Valletta).  
*Mauritius*—J. L. B. Cowan (Curepipe).  
*Mexico*—N. Pelham Wright (Mexico City).  
*South America*—Captain H. Cross (Montevideo).  
*Spain*—E. E. Glaisher (Madrid).

**Australian Marketing Officer in—**

- Burma*—J. N. Carpenter (Rangoon).  
*United States of America*—Mrs. B. Wilson (Los Angeles).

3. **Oversea Representation in Australia.**—Consular representatives are not included in the following statement. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

## DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.

**Ambassador Extraordinary and Plenipotentiary of—**

- Argentina*—(Vacant); Mr. G. T. Conti (Chargé d'Affaires *ad interim*) (Sydney 32 4315).
- Belgium*—His Excellency Monsieur Willy Stevens (Canberra 7 2501).
- Brazil*—(Vacant); Senhor Edmundo Radwanski (Chargé d'Affaires *ad interim*) (Canberra 9 2680).
- Burma*—His Excellency U Anug Shwe (Canberra 7 1451).
- Cambodia*—His Excellency Mr. Poc Thieun (Canberra 7 2517).
- China*—His Excellency Dr. Chen Chih-Mai (Canberra 9 4030).
- France*—His Excellency Monsieur Phillipe Monod (Canberra 7 1454).
- Germany Federal Republic of*—Herr Wilhelm Fabricius (Chargé d'Affaires *ad interim*) (Canberra U 1553).
- Greece*—His Excellency Monsieur P. Annino Cavalierato (Canberra 9 0144).

**Envoy Extraordinary and Minister Plenipotentiary of—**

- Austria*—(Vacant); Dr. W. de Comtes (Chargé d'Affaires) (Canberra 4 6688).
- Chile*—(Vacant); Mr. G. Bucchi (Chargé d'Affaires) (Sydney 36 7442).
- Denmark*—(Vacant); Mr. Nils C. Stenderup (Chargé d'Affaires) (Sydney 28 3547).
- Finland*—(Vacant); Mr. T. I. Kala (Chargé d'Affaires) (Sydney 36 1252).
- Sweden*—His Excellency M. Nils-Eric Ekblad (Canberra 7 1421).

**Commissioner for—**

- Malta*—Captain George F. L. Stivala, O.B.E. (Melbourne 26 2438).

## TRADE COMMISSIONERS OF OVERSEA GOVERNMENTS IN AUSTRALIA.

*Britain*—Senior British Trade Commissioner (Minister)—Mr. F. B. Arnold, C.M.G., O.B.E. (Canberra 7 2211).

British Trade Commissioners—Messrs. H. W. Woodruff and A. F. Collings (Canberra 7 2211); Messrs. A. R. Bruce, O.B.E., N. L. Hibbs and J. R. Morley (Sydney 27 7521); Messrs. J. W. Stoodley and G. J. Husted (Melbourne 67 7254); Mr. N. A. Pinch (Brisbane 2 2307); Mr. J. D. Leithead (Perth 21 2042); Mr. M. E. Browne (Adelaide 51 4011).

*Canada*—Canadian Trade Commissioners—Mr. S. V. Allen (Sydney 27 7565) and Mr. H. A. Gilbert (Melbourne 61 3473).

*Ceylon*—Ceylon Trade Commissioner—Mr. M. C. M. Shibly (Sydney 25 5039).

*India*—Indian Trade Commissioner—Shri G. L. Puri (Sydney 27 5767).

*Malaya*—Malayan Trade Commissioner—Inche Bahadun bin Haji Hassan (Sydney 27 5298–9).

*New Zealand*—Senior New Zealand Trade Commissioner—Mr. C. H. Fowler (Sydney 25 3941).

New Zealand Government Trade Commissioners—Mr. A. C. Davys (Melbourne 67 8111); Dr. W. A. Brooker (Sydney 25 3941).

## § 8. Retail Trade.

1. *General*.—The statistics in this section relate to the number of retail establishments throughout Australia and the value of retail sales of goods by these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full census of all retail establishments. As this was the first census of its type in Australia, its scope and the data sought were the minima consistent with the objective of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods and a simple commodity dissection together with a record of the value of certain services provided. This census was followed by a second census of all retail establishments trading during the year ended 30th June, 1949.

A third census was taken for the year ended 30th June, 1953, in which retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups, and questions were asked about stocks of goods on hand, the number of persons engaged in the business, and credit sales.

A further census was taken in respect of the year ended 30th June, 1957. The scope of this census followed the same general principles adopted for the previous census, but some additional questions were asked about type of organization, purchases and customers' indebtedness.

In general terms, the censuses covered the retail trading activities of establishments which normally sell goods by retail to the general public from fixed premises (i.e. shops, rooms, kiosks and yards). Certain types of "service" establishments were also included, e.g., boot repairers, hairdressers, motor garages and service stations and cafés. The censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

During the period between censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys and some of the results of the 1956–57 census are contained in this section. Previous issues of this Year Book contain considerable detail from the information derived at the 1956–57 census (see Official Year Book No. 47, 1961, pp. 1149–52).

A census has been taken for the year 1961–62, but results therefrom are not yet available.

2. *Value of Retail Sales in Each Commodity Group, Australia*.—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1954–55 to 1960–61 on a comparable basis throughout. The figures for the year 1956–57 were obtained from the census taken in respect of that year, whereas figures for the other years shown are estimates based on sample surveys.

VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA.(a)  
(£ million.)

Commodity Group.	Year ended 30th June—						
	1955.	1956.	1957.	1958.	1959.	1960.	1961.(b)

Newspapers, Books and Stationery .. ..	368.2	398.3	69.3	439.0	74.9	81.3	85.3
Other Goods(g) .. ..	2,008.2	2,150.6	2,247.8	2,342.2	2,453.5	2,691.3	2,821.4
<i>Total (excluding Motor Vehicles, etc.)</i> .. ..	<i>2,008.2</i>	<i>2,150.6</i>	<i>2,247.8</i>	<i>2,342.2</i>	<i>2,453.5</i>	<i>2,691.3</i>	<i>2,821.4</i>
Motor Vehicles, Parts, Petrol, etc.(h) .. ..	571.6	613.2	631.4	684.6	744.6	894.9	895.6

(a) Excludes Northern Territory and Australian Capital Territory. (b) Subject to revision.  
(c) Includes fresh fruit and vegetables, confectionery, soft drinks, ice cream, cakes, pastry, cooked provisions, fish, etc., but excludes some delivered milk and bread. (d) Excludes sales made by licensed clubs, canteens, etc. (e) Excludes basic building materials (e.g. timber, building sheets, tiles, joinery, cement). (f) Includes radios, television and accessories, musical instruments, domestic refrigerators, etc. (g) Includes tobacco, cigarettes, etc., grain and produce, jewellery, office equipment, etc. (h) Includes tractors, new and used motor vehicles, parts, petrol, etc., but excludes farm machinery and implements, earth-moving equipment, etc.

3. Census of Retail Establishments, 1956-57.—Previous issues of this Year Book contain tables showing particulars of the number of retail establishments and the value of retail sales according to commodity groups and main type of business in each State and Territory, as derived from information collected at the 1956-57 Census of retail Establishments (see Official Year Book No. 47, 1961, pp. 1149-52).

## CHAPTER XXXI.

## STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

## § 1. Statistical Organization in Australia.

1. **Early Development of Australian Statistics.**—(i) *Crown Colony "Blue Books"*. Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although primarily intended for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" formed the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers*. Following the advent of responsible government, which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of government administrative departments.

The first example of extensive government organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony régime. The growing need for quantitative data concerning the progress of the several young communities of Australia eventually led to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences*. To enable the interchange of ideas between States and to obtain uniform State statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. **Creation of the Commonwealth Bureau of Census and Statistics.**—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the Census and Statistics Act 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. **Integration of Statistical Services.**—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liaison between officers dealing with the same subjects in the State and Commonwealth fields, did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the 1914–18 War, when the economic problems that then arose drew attention to deficiencies in Australian statistical data. With a view to overcoming these weaknesses, the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the 1939-45 War, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the 1939-45 War of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals ameliorated the situation to some extent—indeed, without their establishment, the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem and constituted only one of a number of improvisations devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new series of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major question of meeting growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939-45 War, and in 1949 discussions with the Premiers were initiated by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently all State Governments accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth.

The Statistics (Arrangements with States) Bill was introduced into the Commonwealth Parliament on 17th April, 1956, its purpose being to seek parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. This legislation, permissive in nature, was designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The object of such an agreement was that, in each State accepting it, there would be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State governments. Both Commonwealth and State were to be adequately served with statistics, and no State would be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into were provided for. After passing through the usual stages of Parliament, the bill became law on 12th May, 1956.

Integration of the Commonwealth and State statistical services was finally accomplished when the integration arrangement with Victoria came into effect on 15th September, 1958.

**4. Scope of the Commonwealth Bureau of Census and Statistics.**—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939-45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the War, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

The following sections of this paragraph relate specifically to the organization and operation of the Commonwealth Bureau of Census and Statistics in Canberra. In the State Offices, the pattern is broadly similar, although local requirements have naturally given rise to differences in detail.

For administrative purposes, the Commonwealth Bureau, Canberra, is divided into a number of Divisions. These are:—Census, Compiling, Development, Methodology and Sampling, Prices, Publications, Research and Social Accounts, Mechanical Tabulation and Administrative.

(a) *Census Division.* This Division of the Bureau is responsible for the taking of periodic population censuses, and the tabulation, summarization and preparation for publication of the results obtained.

(b) *Compiling Division.* The Compiling Division is divided into the following Branches which compile statistics dealing with specific fields of activity.

Trade and Transport Branch—Responsible for the original compilation, tabulation and analysis of statistics relating to imports and exports, and for the compilation of statistics relating to road and rail transport, aviation, shipping, posts, telegraphs and telephones, and broadcasting and television.

**Employment and Labour Branch**—Compiles all employment estimates, wage and labour statistics.

**Primary Production Branch**—Deals with statistics relating to agricultural and pastoral activities, mining, forestry and fishing. Original data are supplied largely by the Deputy Commonwealth Statistician in each State.

**Secondary Production Branch**—Compiles all factory statistics, both annual and monthly. Collates on a Commonwealth basis original data supplied by Deputy Commonwealth Statisticians.

**Finance and Taxation Branch**—Compiles statistics of private finance (banking, insurance, exchange rates, etc.), public finance (Commonwealth, State, and Local and Semi-Governmental authorities), and statistics relating to all aspects of Commonwealth taxation.

**Demography Branch**—Concerned with statistics of births, deaths, marriages and migration, and the making of periodic estimates of population.

(c) *Development Division.* This Division was created in order to develop new statistical collections to meet post-war demands for more adequate and up-to-date statistics, and also to examine current collections in the light of such requirements. It is divided into the following two Branches.

**Development Branch**—Develops new statistical collections and examines current collections in the light of present-day requirements. Included in the latter are Social Statistics.

**Business Statistics Branch**—Conducts censuses and surveys and analyses statistics relating to internal trade (retail), business and hire purchase activities, and company investments and profits.

(d) *Methodology and Sampling Division.* Undertakes the development of sampling procedures and their application to statistical collections, and furnishes technical advice to other Divisions and Departments.

(e) *Prices Division.* Deals with the collection of retail and wholesale prices and the compilation of retail and wholesale price index numbers. A staff of trained field officers is maintained in the several States to facilitate the collection of accurate information.

(f) *Publications Division.* This Division is responsible for the editing and graphical illustration of all Bureau publications, and, in collaboration with other Divisions, for the initiation, development and co-ordination of statistical publications. It also maintains a regular flow of statistical series to certain international organizations, and revises statistical material in certain oversea and local publications.

(g) *Research and Social Accounts Division.* This Division is responsible for the preparation of all estimates in the field of social accounts and for research into this and other fields of statistics. It is divided into four branches as follows.

**National Income and Expenditure Branch**—Prepares and analyses estimates of national income and expenditure and tables of social accounts.

**Balance of Payments Branch**—Prepares and analyses estimates of Australia's balance of international payments.

**Quantum Indexes Branch**—Prepares indexes of quantum of imports, exports, etc., and undertakes research into quantum of production, national expenditure, etc.

**Research Branch**—Carries out research into specific fields of statistics.

(h) *Mechanical Tabulation Division.* This Division is equipped with modern tabulating equipment including four electronic units, and is responsible for all machine tabulating work required by other Divisions of the Bureau with the exception of the Census Division. It also carries out work for other Commonwealth Departments as capacity is available.

(i) *Administrative Division.* The Administrative Division is responsible for all aspects of staff recruitment and direction, supplies, payment of accounts, etc. The Reproduction Section of the Division is equipped with multilith and duplicating machines for processing statistical statements for more immediate requirements. In addition, a section of this Division is responsible for the co-ordination of statistics in Commonwealth Departments (*see para. 5 below*). The specialized library of official and unofficial publications on statistics and economics is controlled by the Administrative Division.

5. *Relation of the Bureau to other Commonwealth Departments.*—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as statistical developments require and as time and circumstances permit.

## § 2. Statistical Publications of Australia.

1. *General.*—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

2. *Commonwealth Publications.*—Commonwealth publications containing statistics may be grouped under two heads, namely:—(i) Publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician.* The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration.

*Australian Balance of Payments.*—Statements Nos. 1 to 3, 1928–29 to 1951–52.

*Australian Exports.*—Annually, 1958–59 to 1961–62.

*Australian Life Tables, 1901–1910.* *Australian Joint Life Tables, 1901–1910.*

*Australian Life Tables, 1920–1922.*

*Australian Life Tables, 1932–1934.* *Australian Joint Life Tables, 1932–1934.*

*Australian Life Tables, 1946–1948.*

*Australian Life Tables, 1953–1955.*

*Australian Mineral Industry Statistics (formerly Minerals and Metals Bulletin).*—Part 2 of Quarterly Bulletin issued jointly with the Bureau of Mineral Resources.

*Australian Primary Industries.*—Report prepared for the Empire Producers Conference, Sydney, March, 1938.

*Census (1911) Results.*—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix *Mathematical Theory of Population*.

*Census (1921) Results.*—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II. NOTE.—Part XXVII., Life Tables.

*Census (1933) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with the Statistician's Report and Australian Life Tables, 1932–1934, Vol. III.

*Census (1947) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming, with the Statistician's Report and Australian Life Tables, 1946–1948, Vol. III.

*Census (1954) Results.*—Field Count Statements, Nos. 1 to 15. Final Summaries of Population and Dwellings, Nos. 16 to 55. Bulletins, Nos. 1 to 3. Vols. I. to VI., comprising respectively Parts I. to V. for each State; Vol. VII., comprising Parts I. to V. for the Australian Territories; Vol. VIII., comprising Parts I. to III. for Australia, Australian Life Tables 1953–1955, and the Statistician's Report.

*Census (1961) Results.*—See back pages of this volume.

*Census of Motor Vehicles, 1947–48 (see Survey of Motor Vehicles, 1947–48).*

- Census of Motor Vehicles, 31st December, 1955.*—Bulletins, Nos. 1 to 8.
- \* *Census of Retail Establishments (1947-48) Results.*—Bulletins, Nos. 1 to 7.
- \* *Census of Retail Establishments (1948-49) Results.*—Bulletins, Nos. 1 to 7.
- \* *Census of Retail Establishments (1952-53) Results.*—Bulletins, Nos. 1 to 14.
- Census of Retail Establishments (1956-57) Results.*—Bulletins, Nos. 1 to 8 (mimeograph)\* and 9 to 15 (printed).
- \* *Dairying Industry (formerly Summary of Dairying Industry).*—Statistical Bulletin, monthly; first issue, September, 1937.
- Demography.*—Bulletin, annually, 1911 to 1960.
- \* *Digest of Current Economic Statistics.*—August, 1959 onward.
- \* *Factories, Principal Statistics, Summary.*—Annually, 1948-49 to 1960-61.
- Finance.*—Bulletin, 1907 to 1916-17 annually; 1917-18 and 1918-19 (one vol.); 1919-20 and 1920-21 (one vol.); 1922-23 to 1959-60 annually. From 1955-56 issued in two parts; Part I., Public and Private Finance; Part II., Commonwealth Taxation.
- \* *Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia, Report on.*—Statistical Bulletin, half-yearly, 1946-47 to 1947-48; annually, 1948-49 to 1960-61.
- \* *Fruit Growing Industry (formerly Summary of Fruit Growing Industry).*—Statistical Bulletin, annually, 1944-45 to 1960-61.
- Imports Cleared for Home Consumption.*—Annually, 1950-51 to 1961-62.
- Labour and Industrial Statistics.* Memoranda and Reports, various, to 1913.
- Labour Report.*—Annually, 1913 to 1960.
- \* *Livestock Numbers (formerly Summary of Livestock Statistics).*—Statistical Bulletin, annually, 1943 to 1962.
- Local Government in Australia.*—July, 1919.
- \* *Manufacturing Industries.*—Bulletins on Individual Industries, annually, 1936-37 to 1939-40, 1940-41 (issue incomplete), and 1944-45 to 1960-61.†
- Monthly Review of Business Statistics.*—October, 1937 onward.
- \* *Occupation Survey (1945) Results.*—Detailed tables.
- Official Year Book of the Commonwealth of Australia.*—Annually, 1907 to present issue (No. 48). Issues Nos. 40 to 48 also published in parts.
- Oversea Trade.*—Bulletin, annually, 1906 to 1961-62.
- \* *Oversea Trade.*—Preliminary Bulletin, annually, 1952-53 to 1961-62.
- (See also *Australian Exports and Imports Cleared for Home Consumption.*)
- Pocket Compendium of Australian Statistics (formerly Statistical Digest).*—1913, 1914, 1916, and 1918 to 1962, annually.
- Population and Vital Statistics.*—Bulletins and Reports, various, 1906-1910.
- Primary Industries.*—Bulletins, annually, 1950-51 to 1959-60, in two parts—Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Production.*—Bulletin, annually, 1906 to 1949-50. From 1936-37 to 1949-50 issued in two parts—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries and Secondary Industries*).
- Professional Papers.*—Various. A full list appears in Official Year Book No. 13, page 3.
- Quarterly Summary of Australian Statistics (replaced Monthly Summary of Australian Statistics).*—December, 1917 onward.
- \* *Report of Proceedings of the Conference of British Commonwealth Statisticians, 1951.*
- \* *Rural Land Use and Crop Production (formerly Summary of Crop Statistics).*—Statistical Bulletin, annually, 1943-44 to 1960-61.
- Secondary Industries.*—Bulletin, annually, 1950-51 to 1959-60.
- \* *Size Classification of Rural Holdings, 1955-56.*—Bulletins Nos. 1 to 7.

\* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume.

† The series for 1960-61 comprises:—Nos. 1. Cement and Cement Goods, 2. Bricks, Tiles, Pottery and Earthenware, 3. Chemicals, Drugs and Medicines, 4. White Lead, Paints and Varnish, 5. Chemical Fertilizers, 6. Soap and Candles, 7. Basic Metal Industries, 8. Metal Fabricating Industries, 9. Motor Vehicles and Cycles, 10. Cotton Mills, 11. Woollen Mills, 12. Rope and Cordage, 13. Tanneries, 14. Boots and Shoes, 15. Clothing (including Hosiery and Knitted Goods), 16. Flour and Other Grain Mills, 17. Biscuits, 18. Confectionery, 19. Jam, Fruit, Vegetables, Pickles, Sauces, Condiments, etc., 20. Bacon Curing, 21. Butter, Cheese and Condensed, Concentrated, etc., Milk, 22. Aerated Waters and Cordials, 23. Meat and Fish Preserving, 24. Breweries, 25. Wineries and Distilleries, 26. Tobacco, Cigars and Cigarettes, 27. Sawmilling, 28. Pulp and Paper Making, 29. Rubber Works, 30. Brooms and Brushes, 31. Electric Light and Power Works, 32. Gas Works, 33. Plastic Moulding and Products, 34. Leather Goods (including Saddlery and Belting).

*Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.  
*Social Statistics*.—Bulletin, 1907 to 1915 annually, and 1918.

*Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.

\**Survey of Motor Vehicles (1947–48) Results*.—Bulletins Nos. 1 to 7.

*Transport and Communication*.—Bulletin, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1960–61 annually.

*Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.

\**Wheat Industry (formerly Summary of the Wheat Situation)*.—Statistical Bulletin, periodically; first issue, July, 1936.

\**Wool Production and Utilization*.—Bulletin, annually, 1952–53 to 1960–61.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Minor changes in the titles of several publications have not been referred to above. Copies of a number of these publications, particularly earlier issues, are not available. In addition, there is also *The Australian Mineral Industry*, a printed quarterly publication prepared jointly with the Bureau of Mineral Resources, and copies of which are available from the Department of National Development in each capital city (6s. each).

Other mimeographed statements are distributed by the Commonwealth Statistician and deal with a wide variety of subjects, as follows.

*Annually*.—Bee Farming; Factory Products (Principal); Factory Statistics (Preliminary); Fire, Marine and General Insurance; Fishing and Whaling; Livestock Statistics (Preliminary); Milking Machines on Rural Holdings; Mining and Quarrying; Northern Territory Statistical Summary; Oversea Investment; Registrations of New Motor Vehicles; Taxation Collections; Trade of Australia with Eastern Countries; Rural Statistics of the Australian Capital Territory; Tractors on Rural Holdings; University Statistics; Value of Production; Wheat Industry; Wine and Brandy Statistics; Wool Production.

*Half-yearly*.—Australian Balance of Payments; Capital and Maintenance Expenditure; Labour Turnover; Trade of Australia with the United Kingdom; Road Traffic Accidents.

In addition to the above-mentioned publications, most of which are issued regularly, there have been a number of statements issued by this Bureau which contain the results of special surveys or new statistical series and descriptions thereof. The more important of these are listed below.

*Occasional Publications.—Special Business Surveys—*No. 1. Average Wage and Salary Earnings (1947); No. 2. Incidence of Industrial Awards (1948); No. 3. Part-time Employment (1948); No. 4. Methods of Payments to Employees (1949); No. 5. Receipts and Payments of Rent, Interest and Royalties, 1949–50; No. 6. Average Wage and Salary Earnings (1952); No. 7. Private Superannuation Schemes, 1951–52 (reprinted in *Finance Bulletin* No. 44); No. 8. Incidence of Industrial Awards (1956); No. 9. Private Pension and Retiring Allowance Schemes, 1955–56 (reprinted in *Finance, Part I. Bulletin* No. 47); No. 10. Receipts and Payments of Interest, Rent and Royalties, 1956–57; No. 11. Private Pension and Retiring Allowance Schemes, 1955–56 to 1957–58; No. 12. Private Pension and Retiring Allowance Schemes, 1955–56 to 1958–59; No. 13. Selected Large Private Pension Schemes, 1955–56 to 1960–61.

Survey of Wage Rates and Earnings, September, 1960; New Indexes of Minimum Weekly Wage Rates—Adult Males and Adult Females (1960); Minimum Weekly Wage Rate Index—Components of Total Wage Rate (1961); A Description of the Consumer Price Index (1961); Minimum Weekly Wage Rates, January, 1957, to June, 1961; Survey of Weekly Earnings, October, 1961; Wage and Salary Earners in Employment, June, 1947, to June, 1960; Minimum Weekly Wage Rates, 1939 to 1959; Minimum Weekly Wage Rates, January, 1960 to June, 1962. The information in the last two bulletins consolidates and extends that previously published in the relevant bulletins listed above, which are now superseded.

Further information on current publications of the Commonwealth Bureau of Census and Statistics is contained in a List of Publications available free, on request, from the Commonwealth Statistician, Canberra. This List contains also a subject index to show the Bureau publications in which information on the various subjects dealt with by the Bureau is to be found. Publications issued by the State Offices of the Commonwealth Bureau of Census and Statistics are also listed therein.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers.* Lists of the principal official reports and other documents containing statistical information issued from the inauguration of the Commonwealth appear in the Official Year Books up to No. 13, but it is not now practicable to undertake the preparation of such lists.

3. *State Publications.*—The publications issued by the Deputy Commonwealth Statistician of each State are set out hereunder. As with the Commonwealth Parliamentary and Departmental Reports and Papers, it is not practicable to enumerate the various Departmental Reports, statements of accounts, etc., issued by officials, boards, local and semi-governmental authorities, etc., in each State.

(i) *New South Wales.* Statistical Register of New South Wales (annually); Official Year Book of New South Wales (annually); Pocket Year Book of New South Wales (annually); New South Wales Statistical Bulletin (monthly to December, 1919, quarterly to June, 1943, then discontinued to September, 1948); New South Wales Monthly Summary of Business Statistics.

The following other publications are issued by the Deputy Commonwealth Statistician, New South Wales.

*Annually.* Consumption of Intoxicants; Divorce Statistics; General Insurance Business; Mining Statistics; Population of Local Areas; Rural Industries—Agricultural Statistics—Part I.: Crops (excluding Fruit and Vegetables) and Pasture; Part II.: Cultivated Holdings, Area of Crops, and Fruit and Vegetables; Livestock in Local Government Areas and Statistical Divisions, Livestock on Rural Holdings, Machinery on Rural Holdings, Principal Statistics of Agricultural Production in Local Government Areas and Statistical Divisions, Principal Statistics of Rural Production in Statistical Divisions (separate summary for each Division), Tractors on Rural Holdings; Secondary Industries—Factories in Local Government Areas and Statistical Divisions, Factory Statistics, Factory Statistics for Local Government Areas in Division of Cumberland, Secondary Industry in Principal Industrial Areas (Sydney, Newcastle, and Wollongong); Vital Statistics; Wholesale Sales and Stocks of Wine and Brandy.

*Quarterly.* Building Statistics, New Houses and Flats; Mining Statistics\*.

*Monthly.* Building Approved; Mining—Metal and Mineral Prices\*, Mining Production Estimates\*.

(ii) *Victoria.* Statistical Register of Victoria (annually to 1916, then discontinued); Victorian Year Book (annually); Victorian Pocket Year Book (annually); Victorian Statistical Abstract (quarterly to 1917, then discontinued to December, 1946, quarterly to March, 1958, then discontinued); Victorian Monthly Statistical Review.

The following other publications are issued by the Deputy Commonwealth Statistician, Victoria.

*Annually.* Age Distribution of Population of Victoria; Agricultural Statistics; Apicultural Statistics; Citrus Fruit Production; Education; Fire, Marine, and General Insurance; Factory Statistics (also Preliminary); Fruit Production; Grasses and Clovers Harvested for Seed; Hospital Morbidity Statistics; Industrial Accidents; Livestock; Local Government Finance Statistics; Maize Production; Oats and Barley Estimates; Onion Production; Population and Dwellings by Local Government Areas; Potatoes; Road Traffic Accidents; Rural Holdings and Machinery Thereon; Rural Statistics; Vegetables for Human Consumption; Vital Statistics; Viticultural Statistics; Wheat; Wholesale Sales and Stocks of Wine and Brandy.

*Triennially.* Grain and Seed Headers and Harvesters on Rural Holdings; Pick Up Balers and Forage Harvesters on Rural Holdings; Ploughs on Rural Holdings; Tractors on Rural Holdings.

*Quarterly.* Building Estimates (Preliminary); Building Statistics; Mortgages of Real Estate; Road Traffic Accidents.

*Monthly.* Apples and Pears in Cool Stores; Building Approvals; Motor Vehicle Registrations; Production Statistics.

(iii) *Queensland.* Statistics of the State of Queensland (annually); Queensland Official Year Book, 1901; A.B.C. of Queensland Statistics (annually to 1936, then discontinued); Queensland Year Book (annually 1937 to 1941, then discontinued to 1945); Queensland Pocket Year Book (annually); Queensland Statistics, Monthly Summary.

The following other publications are issued by the Deputy Commonwealth Statistician, Queensland.

*Annually.* Agricultural Production; Divorces; Factory Statistics—Summary; Materials Used and Articles Produced; Statistical Divisions and Local Authorities; Fire, Marine and General Insurance; Livestock; Local Government; Machinery in use on Rural Holdings; Patients treated in Public Hospitals; Roads open to Traffic—Types; Road Traffic Accidents; Rural Production, Equipment, etc.; Sugar Production; Wool Production.

*Quarterly.* Building Operations; External Trade; Retail Prices; Road Traffic Accidents; Sawmills; Population and Vital Statistics.

*Monthly.* Building Approvals; Motor Vehicle Registrations.

*Periodically.* Boundaries of Metropolitan Statistical Areas; Areas of Local Authorities and Statistical Areas; Employment Statistics; Farm Type Classification of Rural Holdings; Food and Grocery Prices in Queensland Towns; Population—Age Distribution, Conjugal Condition; Population and Number of Dwellings in Brisbane Statistical Areas; Population and Number of Dwellings in Local Authorities; Rural Holdings—Size Classification; Tractors on Rural Holdings—Fuel Used, Number; Wine and Brandy Statistics.

(iv) *South Australia.* Statistical Register of South Australia (annually); Official Year Book of South Australia, 1912 and 1913; Statesman's Pocket Year Book of South Australia (annually); Quarterly Abstract of South Australian Statistics; Monthly Summary of Statistics, South Australia.

The following other publications are issued by the Deputy Commonwealth Statistician, South Australia.

*Annually.* Beer, Wine, and Spirits; Births, Deaths and Marriages; Cereal Harvest Estimates; Cereal Statistics; Divorce Statistics; Factory Statistics; General Insurance; Livestock Statistics; Machinery on Rural Holdings; Oversea Trade; Rural Production; Vintage Estimate.

---

\* Issued in conjunction with New South Wales Department of Mines.

*Half-yearly.* Population and Dwellings in Local Government Areas.

*Quarterly.* Building Operations; New Houses and Flats (Preliminary).

*Monthly.* Building Approvals; Oversea Trade.

(v) *Western Australia.* Statistical Register of Western Australia (annually); Western Australian Statistical Abstracts (quarterly, previously issued monthly to July, 1917); Pocket Year Book of Western Australia (annually); Official Year Book of Western Australia; Monthly Statistical Summary, Western Australia; Abstract of Statistics of Local Government Areas (annually).

The following other publications are issued by the Deputy Commonwealth Statistician, Western Australia.

*Annually.* Agricultural and Pastoral Activities—General Summary, Cereal Crop Forecast, Cereal Crops, Livestock and Woolclip, Machinery on Rural Holdings; Divorce; External Trade; Interstate Trade; Factories (also Preliminary); Fire, Marine and General Insurance; Motor Vehicles on Register in Licensing Areas; Population, Dwellings and Vital Statistics (Local Government Areas and Statistical Divisions); Road Traffic Accidents; and Salary Earners in Civilian Employment; Wholesale Sales and Stocks of Wine and Brandy.

*Quarterly.* Building Operations; Population and Vital Statistics; Road Traffic Accidents.

*Monthly.* Building Permits and Approvals.

(vi) *Tasmania.* Statistics of the State of Tasmania (annually); Pocket Year Book of Tasmania (annually); Tasmania, Monthly Review of Statistics.

The following other publications are issued by the Deputy Commonwealth Statistician, Tasmania.

*Annually.* Apple Production; Bee Farming; Crops; Dairy Industry; Divorces; Factory Production; Fire, Marine and General Insurance; Hop Production; Livestock; Livestock and Wool Production (Preliminary); Meat Production; Number of Farms, Farm Population, Employment, Irrigation and Machinery used; Population in Local Government Areas; Potato Production; Trade (Oversea); Trade (Oversea and Interstate) by Sea and Air; Wholesale Sales and Stocks of Wine and Spirits, Consumption of Alcoholic Liquors; Wool Production Statistics.

*Triennially.* Tractors on Rural Holdings.

*Quarterly.* Building Statistics (also preliminary statement on Houses and Flats); Population and Vital Statistics.

*Monthly.* Motor Vehicle Registrations; Road Traffic Accidents.

*Irregularly.* Compendium of Municipal Statistics.

### § 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951.

Conferences of the Government Statisticians of the British Commonwealth were held first in London in 1920 and then in Ottawa in 1935. The third Conference was held in Canberra, from 12th to 23rd November, 1951. Delegates were present from Australia, Canada, Ceylon, India, New Zealand and the United Kingdom (including a representative of the Colonial Office). Ireland, the Commonwealth Economic Committee and the United Nations were represented by observers, and the Australian State Government Statisticians were also present. A summary of the activities of the conference may be found in Official Year Book No. 39, page 1320. The fourth Conference was held in London in 1956 and the fifth was held in New Zealand in November, 1960.

## § 4. Select List of Australian Books.

(Compiled by the Librarian of the Commonwealth National Library.)

This list of *Australian Books* is designed to meet the growing need, in Australia as publishing develops, and overseas as interest in Australia widens, for an authoritative current reference and reading list of books dealing with Australia, or of Australian authorship, wherever published.

Australians will find these books in the National Library and in their State Libraries as well as in leading bookshops. Oversea readers may have access to them in the collections which the National Library maintains at 57 Australian posts in 43 countries, at places such as Australian Embassies, or Offices of the Australian High Commission, Consulate-General, Consulate or Trade Commissioners. They will be found also, increasingly, in leading libraries and bookshops in many countries. For example, they are supplied by the National Library to the National Library of Canada and the National Diet Library, Japan. In the United States, also, Australian books are included in the Farmington Plan in which 62 libraries and research institutions co-operate to ensure that at least one copy of all material published in any part of the world, and likely to be required for a serious purpose, will be available promptly somewhere in the country.

The list is classified broadly by subject, and under each heading there is first a list of the principal standard books still in print, then a list of selected books and official publications (excluding annual reports) published in the last few years. To ensure that, so far as is possible, an evenness of standard is maintained in the compilation of the list, the advice of a representative range of experts in the various subject fields has been sought. Where known, the retail price in the country of publication is given, but this is subject to fluctuation.

The Library also issues a series of select lists which include:—*Australian Public Affairs Information Service* (monthly and, since 1955, cumulated annually); a subject index of material in new books, pamphlets, current periodicals and government publications from English-speaking countries, with an important bearing on investigations into Australian political, economic, cultural and social affairs; and the following full bibliographies.

*Australian National Bibliography*, a monthly list of monographs (including government publications), maps, prints, sheet music and moving picture films, of Australian interest.

An annual cumulation of *Australian National Bibliography* and an annual publication entitled *Australian Government Publications*, listing Commonwealth and State government monographs and serials.

## AUSTRALIAN BOOKS, 1961.

## General and Descriptive.

## STANDARD WORKS IN PRINT.

- ANNUAL CATALOGUE OF AUSTRALIAN PUBLICATIONS. Canb. National Library of Australia, 1936 to 1960. 6s. 6d. *per issue*. From 1961, this was superseded by *Australian National Bibliography*.

## DIARY OF PRINCIPAL ECONOMIC EVENTS, 1958-59 to 1961-62.

The principal economic events in earlier years were shown in the following issues:—

YEARS.			OFFICIAL YEAR BOOK NO.				PAGE.
1931 to 1938 .. ..	..	..	33	..	..	..	968-77
1939 to 1944 .. ..	..	..	36	..	..	..	1129-41
1945 to 1948 .. ..	..	..	37	..	..	..	1235-45
1949 to 1951 .. ..	..	..	39	..	..	..	1331-40
1952 to 1955 .. ..	..	..	42	..	..	..	1149-60
1956 to 1958 .. ..	..	..	46	..	..	..	1185-92

In this issue particulars are given on a financial year basis instead of a calendar year basis as in previous issues. To conserve space, some of the items originally shown for the years 1958-59 and 1959-60 have been omitted from this issue. Previous issues should be consulted for additional information for these years.

### 1958-59.

The average price of wool at auctions fell, during the year ended June, 1959, to 47½ per lb., the lowest level since 1948-49. Low opening prices were followed by even lower prices during the main selling season, but prices recovered later. Reduced returns from the wool clip were, however, largely offset by increased world meat prices. In particular, market conditions in the United States enabled Australian producers to ship low-grade beef at very profitable prices. World butter prices also increased steeply and there was a normal harvest following the poor harvest in the drought year 1957-58.

During the year, exports of merchandise were £807,000,000, only slightly below the previous year (£810,000,000). Imports of merchandise in 1958-59 were £794,000,000, £5,000,000 greater than in 1957-58. As a result of an improved capital inflow, international reserves fell by only £9,000,000 to £516,000,000.

The level of internal activity remained largely unaffected by the decline in economic activity overseas. Production, employment, and retail sales showed increases during the year.

The number of persons in civilian employment (excluding rural and female household domestic employees) increased by 50,000 during the year to 2,941,000, and retail sales rose from £579,000,000 in the June quarter, 1958, to £614,000,000 in the June quarter, 1959, an increase of over six per cent. The rate of investment also increased during the year. Registrations of new motor vehicles in June, 1959, were nearly 12 per cent. higher than in the previous June, and the number of new houses and flats commenced increased from 19,500 in the June quarter, 1958, to 21,000 in the June quarter, 1959.

Between the June quarter, 1958, and the June quarter, 1959, the consumer price index rose from 114.8 to 116.8 and the average weekly wage per male unit rose from £19.93 to £20.44.

*1st July.*—Commonwealth Bank at request of Commonwealth Government made available £10,000,000 credit to New Zealand at 4½ per cent.

*4th July.*—Netherlands Government raised loan of £1,354,000 from United States Government to help support co-operative housing project for Dutch migrants to Australia. Additional finance to be raised in Australia and Holland to total of £8,000,000 to £12,000,000 in next ten years.

*31st July.*—Minister for Trade announced easing of restrictions on imports of capital equipment from dollar areas and exemption from licensing on other items.

*5th August-2nd October.*—Commonwealth and State Budgets for 1958-59 introduced. (For details, see pp. 1191-2 of Official Year Book No. 46.)

*8th October.*—First issue of new "Special" Bonds of £10 units, with a limit of £5,000, bearing variable rates of interest and redemption bonuses according to the period held.

High Court ruled Queensland road transport levies valid.

*9th October.*—Victorian State Electricity Commission  $5\frac{1}{2}$  per cent. loan for 7, 10, or 25 years undersubscribed by £800,000 and Queensland S.E.C. loan of  $5\frac{1}{2}$  per cent. undersubscribed by £115,000.

*15th October.*—£Stg.15,000,000 loan floated in London, the first Australian loan floated in London for 19 years. At  $5\frac{1}{2}$  per cent., issued at £98 Stg., this loan was oversubscribed.

*1st November.*—Savings Bank interest raised  $\frac{1}{4}$  per cent. to 3 per cent. on balances up to £2,000.

*7th November.*—Work commenced on new £30,000,000 power station at Wangi, N.S.W. with a planned capacity of 60,000 kW.

*10th November.*—The full bench of the Industrial Commission granted marginal increases of 15–25 per cent. to steel workers.

*1st January.*—New South Wales Acts, Industrial Arbitration (Female Rates) Amendment Act 1958, providing for equal pay for male and female employees performing work of same or like nature, and Annual Holidays Act 1944–1958, providing for three weeks annual holidays for all New South Wales workers under State awards, became operative.

*19th January.*—Australian Exchange Control Regulations eased to allow of payment for imports in convertible sterling or any major non-sterling currencies instead of dollars and sterling, and other adjustments removing differences between remittances to dollar area and other non-sterling countries.

*24th January.*—Contracts let by Electricity Commission of New South Wales for construction of new £14,500,000 power station at Vales Point, Lake Macquarie.

*29th January.*—Export controls lifted on 25 items, including newsprint, copra, margarine and iron and steel products.

*7th February.*—Queensland Government lifted price controls on all items other than basic foods and groceries.

*18th February.*—Commonwealth Government maintained allocation for grants to States for works and housing at £210,000,000 but raised local government ceiling for borrowing from £16,500,000 to £20,500,000.

*25th February.*—Australia's first government-sponsored trade mission to North America left to examine and develop export markets.

*4th March.*—Premiers' Conference opened. Conference accepted Commonwealth plan for roads and bridges involving an expenditure of £720,000,000 over next five years, of which Commonwealth was to contribute £250,000,000.

*23rd March.*—Republic of China sent first trade mission to Australia.

*2nd April.*—Licensing restrictions on dollar imports removed from 330 items.

*6th April.*—First government-sponsored New Zealand trade mission visited Australia.

*23rd April.*—Royal assent given to Reserve Bank Act, Commonwealth Banks Act, Banking Act and Banking (Transitional Provisions) Act (*see p. 765.*)

Production of lead at Mt. Isa reduced by 25 per cent. to help world lead position. Corresponding increase in copper production.

*1st May.*—Commonwealth government decided to increase subsidy on oil search by £1,000,000 a year for each of next three years.

*4th May.*—T.1 underground power station, first major station of Snowy Mountains Scheme, commenced operation with output capacity of 160,000 kW.

*16th May.*—Indian railways mission visited Australia as guest of Commonwealth Government to arrange for purchase of wide range of railway equipment.

*20th May.*—New Zealand eased import restrictions. Market for Australian canned and dried fruits in New Zealand expected to increase by 16 per cent. as a result.

*5th June.*—Commonwealth Conciliation and Arbitration Commission, in majority decision on Basic Wage Inquiry, increased Federal basic wage by 15s. for males and 11s. 3d. for females from first pay period after 11th June. Federal awards higher than State awards for first time in 20 years.

*8th June.*—£10,000,000 blast furnace began production at Port Kembla with a capacity of 600,000 tons of pig iron a year, making a total of 3,000,000 tons for Australia.

**9th June.**—Working hours in State-owned coal mines in New South Wales reduced from 40 to 37½ a week.

**24th June.**—Premiers' Conference accepted Commonwealth proposal for new plan of tax reimbursements based on population and wage levels, grants to be increased from £225,750,000 to £244,500,000 for 1959–60.

Loan Council approved of borrowing programme for 1959–60 of £220,000,000 (£183,900,000 for States, £36,100,000 for Commonwealth–State Housing). Local and semi-governmental borrowing ceiling fixed at £100,000,000.

**26th June.**—Expert committee on coal formed to advise Government on all aspects of uses of coal.

**29th June.**—Australia's quota to International Monetary Fund increased from \$200,000,000 to \$300,000,000.

**30th June.**—Fourteen-mile, £19,000,000, Eucumbene–Tumut tunnel in Snowy Mountains Hydro-electric Scheme completed four months ahead of schedule.

#### 1959–60.

1959–60 opened with bright prospects for Australia's external trade. The wool price in September, 1959, was more than 20 per cent. higher than a year earlier. Profitable meat and butter exports seemed likely to continue and more wheat was available for export.

The Government felt that conditions were favourable for abandoning the import restrictions which had been imposed in March, 1952. Nearly all special restrictions on imports from the dollar area had been removed during 1958–59 and almost all the remaining restrictions on imports generally were abandoned in February, 1960 (*see* p. 471).

Compared with 1958–59 both exports and imports of merchandise increased, from £807,000,000 to £926,000,000 and from £794,000,000 to £925,000,000 respectively.

Internal activity intensified throughout the year. Following the increase in the basic wage in June, 1959, wage margins were increased in November, 1959, mostly by 28 per cent. Average weekly earnings per male unit rose from £20.44 in the June quarter, 1959, to £22.66 in the June quarter, 1960, a rise of more than 10 per cent. The number of persons in civilian employment (other than rural and female household domestic employees) increased from 2,941,000 to 3,047,000, the increase being more heavily concentrated in factories.

The rise in wages increased demand for most types of consumer goods, particularly consumer durables. The number of new motor cars registered rose from 13,700 during June, 1959, to 18,700 in June, 1960, and balances outstanding under hire purchase agreements rose from £355,000,000 to £422,000,000.

Between June quarter, 1959, and June quarter, 1960, private investment in building and construction rose by 22 per cent. and investment in other capital equipment (other than motor vehicles) rose by 20 per cent. The consumer price index rose from 116.8 to 121.1.

**2nd July.**—S.S. *Delfino* left Sydney with 30,000 live sheep for export to United States of America, the first significant shipment of this kind ever made.

First 707 jet-liner arrived in Sydney for Qantas, part of major re-equipment programme on overseas services and conversion to jet-planes of major internal air-lines in Australia.

**19th July.**—Remaining undistributed profits of Joint Organization marketing of wool (about £2,400,000) transferred to Wool Research Fund.

**1st August.**—Import restrictions further eased by about £50,000,000 annually (*see also* 2nd April) and licensing discrimination removed from almost all imports from dollar areas.

**11th August to 29th September.**—Commonwealth and State Budgets for 1959–60 introduced. (For details, *see* pp. 1184–5 of Official Year Book No. 47.)

**15th October.**—Approval of new import levels by Japanese government expected to increase Australia's wool exports substantially.

**16th October.**—New trade agreement with Germany provided for increases in exports of meat, grain, fruit, and wine.

**30th October.**—£15,000,000 special deposits (first for 2½ years) called in from Trading Banks by Commonwealth Bank; (further £20,000,000 called in 30th November, and more calls anticipated next year).

**16th November.**—Currency restrictions for Australians travelling abroad relaxed substantially. Limit £2,000 a year to any part of the world, an increase of 25 per cent. for sterling areas and 150 per cent. for all other areas.

*25th November.*—First issue of 3 per cent. seasonal Treasury Notes, totalling £12,100,000. Further issues to be made fortnightly until March, 1960.

*26th November.*—Full Bench of New South Wales State Industrial Commission, interpreting Industrial Arbitration (Female Rates) Amendment Act, 1958 (assented to 31st December, 1958), provided for 5 per cent. annual increase in female wages from 1st January, 1960, to 1st January, 1963.

*27th November.*—Commonwealth Conciliation and Arbitration Commission in judgment on Metal Trades case, granted increase of 28 per cent. in margins to fitters and other skilled metal trades employees. Followed by similar awards by other tribunals.

*9th December.*—Contracts let for construction of new £120,000,000 power station at Hazlewood (Vic.) planned to double amount of electricity available in Victoria.

*14th January.*—New exchange regulations placed dollar currencies on same basis as other non-sterling currencies. Money orders now able to be sent to dollar areas. Dollar earnings by Australians no longer subject to compulsory repatriation.

*16th January.*—Commonwealth Banks Act 1959 establishing Commonwealth Banking Corporation, Banking Act 1959 regulating banking in Australia, and Reserve Bank Act 1959 replacing Commonwealth Bank of Australia by Reserve Bank of Australia, proclaimed.

*19th January.*—New £17,000,000 catalytic cracking plant, primarily for the production of motor spirit, to be built at Clyde by group of oil companies as part of projects totalling £22,000,000.

*2nd February.*—Commonwealth Cash Loan of £45,000,000 opened, issued at £99½ to par, interest at from 4 to 5 per cent. Closed 17th February, undersubscribed by £4.7 million.

*10th February.*—Australian loan of £12,000,000 sterling opened in London, issued at £99, interest at 5½ per cent.; amount raised in full.

*13th February.*—Statutory reserve deposit ratio raised by Reserve Bank from 16½ to 17½ per cent. Australia and Canada signed a new trade Agreement replacing the 1931 agreement. The new agreement would give both countries additional concessions and the right to invoke anti-dumping legislation; a wide variety of Australian exports would receive increased preference.

*23rd February.*—Items comprising 90 per cent. of Australia's present imports exempted from import licensing provisions.

*9th March.*—New Zealand relaxed import restrictions affecting some 300 items of Australian exports to that country, making an increase of 15 to 20 per cent. in licences for Australian goods.

*14th March.*—Reserve Bank made a further call up of £5,300,000 of trading bank special accounts, making a total of £59,400,000, since call-ups began in October.

*16th March.*—Commonwealth negotiated loan in Switzerland of 60,000,000 Swiss francs (about £A.6,000,000) issued at 99 francs per 100, with interest at 4½ per cent.; fully subscribed.

*1st April.*—Three oil companies announced plans for the joint building of Australia's first major lubricating oil refinery at Kurnell, New South Wales, at a cost of about £13,000,000. Another company on 3rd May announced plans for a similar plant at Kwinana, Western Australia to cost £10,000,000.

*7th April.*—Broken Hill Pty. Ltd. announced the opening of new cold-rolling stainless steel mill at Unanderra, with a capacity of 15,000 tons a year.

Japanese import controls eased to allow of 50 per cent. increase in exports of wool, wheat and coal to Japan.

*8th April.*—Australia's subscription to the International Bank for Reconstruction and Development increased from \$400,000,000 to \$533,000,000, and to the International Monetary Fund from \$300,000,000 to \$400,000,000.

*19th April.*—Commonwealth floated \$25,000,000 loan in New York, issued at \$97½ with interest at 5½ per cent., fully subscribed.

*22nd April.*—Trade mission, consisting of 39 members, left for Canada and the United States.

*24th April.*—Government asked for parliamentary approval for Australia to become a foundation member of the International Development Association, an affiliate of the International Bank for Reconstruction and Development designed to assist industrial development of "less developed" countries. (Approving Act assented to 31st May.)

*4th May.*—Commonwealth Cash and Conversion loan opened, issued at £99½ to £100, with interest at from 4 to 5 per cent.; closed 24th May, with £25,000,000 cash portion under-subscribed by £4,400,000.

*17th May.*—First National Export Convention opened at Canberra as part of National Export Drive.

*1st June.*—All Trading Banks increased service and miscellaneous charges from to-day.

*24th June.*—Loan Council met in Canberra and approved of borrowing programme for 1960–61 of £230,000,000 (£192,800,000 for States, £37,200,000 for Commonwealth-State Housing). Local and semi-governmental borrowing ceiling fixed at £106,000,000. In addition, it approved borrowings by the Commonwealth in the United States of America of \$30,000,000 on behalf of Qantas Empire Airways Limited and of \$2,000,000 on behalf of Trans-Australia Airlines.

#### 1960-61.

During the months following the lifting of import restrictions in February, 1960, the level of imports increased steadily. By the beginning of 1960–61, the degree of inflation had strengthened and labour shortages and other symptoms of boom conditions appeared throughout the economy. In consequence, the Budget presented in August, 1960, was framed with the object of curbing demand and preventing further increases in prices and costs. It provided for an increase in income tax and a cash surplus of £15,500,000 for 1960–61. At the same time the Reserve Bank asked trading banks to restrict new lending and to reduce overdrafts. However, despite these restrictions outstanding advances rose by £65,000,000 between June and December, 1960. In the early months of the year, the consumer price index continued to rise, and share prices, car registrations, housing commencements and balances outstanding on hire purchase agreements all rose to record levels.

To protect Australia's international reserves, which had dropped to £413,000,000 by the end of October, a fall of £111,000,000 in twelve months, a further series of measures were introduced by the Government and the Reserve Bank in November providing for a further tightening of credit restrictions, an increase in the rate of sales tax on motor vehicles from 30 per cent. to 40 per cent., and an increase in the maximum interest rate on bank overdrafts to seven per cent.

Despite the fact that the Government took steps early in 1961 to increase employment on public works, the number of persons in receipt of unemployment benefit rose from 10,364 in October, 1960, to 54,254 in June, 1961, and the total number in civilian employment (other than rural workers and female private domestics) fell from 3,073,000 to 3,021,000.

Retail sales during the first six months of 1961 were less than two per cent. above those during the corresponding months of 1960 and the value of new buildings commenced fell from £145,000,000 in the June quarter, 1960, to £124,000,000 in the June quarter, 1961. Registrations of new motor vehicles during the first six months of 1961 were only 115,000, compared with 167,000 during the previous six months, although the sales tax rates on motor cars were restored to the former level in February, 1961.

Output fell in most secondary industries and the level of advances by trading banks and of balances outstanding on hire-purchase agreements also declined substantially in the second half of 1960–61.

The effect of the restrictions on the level of imports was more delayed. Imports, which exceeded £100,000,000 during October, 1960, were still as high as £90,000,000 in March, 1961, and international reserves had dropped a further £40,000,000 between October and February. A belief by some importers that import controls would be re-introduced was perhaps responsible for the sustained high level of imports, but the government adhered to its policy of freedom from controls and, instead, arranged for a drawing of £78,000,000 from the International Monetary Fund and further stand-by credit.

The year 1960–61 was below the previous year in pastoral production, but well above average in agricultural production. Wheat produced totalled 270,000,000 bushels, 50,000,000 bushels above the previous record. Wool prices were somewhat lower, but the overall gross value of rural production increased from £1,323,000,000 to £1,375,000,000.

Export incentives by way of tax concessions and the negotiation of wheat sales to Mainland China helped to promote exports and, although exports were at a lower level in the earlier months of 1960-61, from March, 1961, the level increased sharply. Total merchandise exported at £928,000,000 was slightly higher than in 1959-60.

*3rd July.*—Following the joining by the United Kingdom of the European Free Trade Association, United Kingdom preference guarantees were waived on nine products, including lead and zinc.

*22nd July.*—Oversea shipping rates on exports increased by 6 per cent. Import rates to rise by 7½ per cent. from 1st October.

*8th August.*—Reserve Bank asked banks to make immediate and significant cut in rate of new lending and guard against providing finance for "speculative activities".

*11th August.*—Oil refinery planned for Port Alma, Queensland, at cost of £15,000,000.

*13th August.*—Commonwealth Statistician issued new Consumer Price Index.

*16th August.*—Commonwealth Budget for 1960-61 introduced into House of Representatives.

In 1959-60, receipts of the Consolidated Revenue Fund (excluding self-balancing items) were £1,431,800,000. The expenditure (excluding self-balancing items and the payment of £41,400,000 to the Loan Consolidation and Industrial Reserve) amounted to £1,390,400,000. The main items of revenue (1958-59 receipts shown in parentheses) were: Income Taxes £671,300,000 (£608,700,000); Excise Duties £252,400,000 (£237,200,000); Customs Duties £84,400,000 (£71,700,000); and Sales Tax £164,200,000 (£143,600,000). The main items of expenditure were: Payments to or for the States £321,400,000 (£286,600,000); Social and Health Services £299,400,000 (£278,200,000); Defence Services (excluding £12,000,000 and £37,300,000 provided from Loan Fund in 1959-60 and 1958-59 respectively) £181,600,000 (£152,000,000); War and Repatriation Services £137,500,000 (£128,500,000), and Capital Works and Services £142,100,000 (£132,400,000).

The Budget for 1960-61 provided for an estimated expenditure of £1,670,800,000 of which £1,358,100,000 would be provided from the Consolidated Revenue Fund and £312,700,000 from the Loan Fund. In addition, it was expected that £125,700,000 would be available for payment to the Loan Consolidation and Investment Reserve.

*17th August.*—New Tariff Bills introduced in House of Representatives to give short-term assistance to industries by imposing temporary tariffs in an emergency. (Assented to 5th September.)

*19th August.*—Report of Committee on Decimal Coinage tabled in House of Representatives. Committee unanimously in favour of decimal system.

*26th August.*—Five-man delegation left for South America to survey trade prospects in eight American countries.

*1st September.*—Commonwealth Government accepted offer from Consolidated Zinc of £10,900,000 for Bell Bay aluminium works.

*6th September.*—1960-61 Budget introduced into South Australian House of Assembly. In 1959-60, revenue amounted to £80,300,000 and expenditure to £80,600,000, leaving a deficit of £300,000. For 1960-61, it was estimated that expenditure would be £85,500,000 and revenue £85,800,000, thus leaving a surplus of £300,000.

*7th September.*—Commonwealth £30,000,000 Cash Loan opened, issued at 98¼ to par, with interest at from 4½ to 5 per cent. Closed 22nd September, oversubscribed by £3,000,000.

*14th September.*—1960-61 Budget introduced into New South Wales Legislative Assembly. During 1959-60, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a surplus of £70,000. After providing for debt charges, there were deficits of £4,100,000 on the Railways and £2,300,000 on the Metropolitan and Newcastle Transport Services. The 1960-61 Budget provided for an overall surplus of £22,000. After meeting debt charges, it was estimated that there would be a deficit of £1,900,000 on the Railways and £3,000,000 on the Metropolitan and Newcastle Transport Services.

*15th September.*—1960-61 Budget introduced into Victorian Legislative Assembly. In 1959-60, revenue exceeded expenditure by £300,000. The deficit on the Railways was £4,600,000 and on the State Coal Mines £200,000. There was a surplus of £5,100,000 on General Account. The budget for 1960-61 provided for a total expenditure of £181,400,000.

It was estimated that revenue would be £181,500,000 leaving a surplus of £100,000. It was estimated that the deficit on the railways would be £4,200,000 after providing for debt charges.

*20th September.*—1960-61 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1959-60 resulted in a deficit of £1,000,000. Receipts of the Consolidated Revenue Fund totalled £24,300,000 and expenditure £25,300,000. For 1960-61, it was estimated that expenditure would be £27,200,000 and revenue £26,800,000 leaving a deficit of £400,000.

*22nd September.*—1960-61 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1959-60 resulted in a deficit of £1,400,000. For 1960-61, it was estimated that expenditure would be £69,800,000 and revenue £69,000,000 resulting in a deficit of £800,000.

*27th September.*—Commonwealth floated \$25,000,000 (about £A.11,000,000) loan in New York, issued at 98, with interest at 5½ per cent.,; fully subscribed.

*29th September.*—1960-61 Budget introduced into Queensland Legislative Assembly. In 1959-60, receipts of the Consolidated Revenue Fund were £103,100,000. Expenditure was £103,300,000 leaving a deficit of £200,000. For 1960-61, it was estimated that expenditure would amount to £110,100,000 and revenue to £109,900,000 leaving a deficit of £200,000.

*7th October.*—Navigation charges to airlines for use of airport facilities raised.

*10th November.*—New South Wales Government introduced Company Law Amendment Bill, the first of a series to provide for a uniform Company Law throughout Australia.

*16th November.*—New economic measures introduced, designed to reduce excessive internal demand and safeguard Australia's overseas funds position. Credit restrictions were tightened, sales tax on cars raised to 40 per cent., bank overdraft rate raised to 7 per cent., and tax deductions of interest paid on borrowed money abolished. It was also proposed that life assurance companies, superannuation funds, etc., should be required to have at least 30 per cent. of their investments in government securities.

*24th November.*—Reserve Bank issued a statement on policy of the Bank and advice to trading banks on selective restriction of advances.

*5th December.*—Japanese trade ship berthed in Sydney.

*10th December.*—Rise to 3¼ per cent. in Savings Bank interest rates announced.

*12th December.*—Graziers supported proposal to introduce reserve price for wool at auction sales.

*20th December.*—New South Wales Industrial Commission granted industry allowance of 15s. a week to building workers.

*5th January.*—Industrial dispute at Newcastle Steelworks involving 1,700 of the 8,500 workers. (Settled 27th January.)

*7th January.*—Australia joined Customs Co-operation Council with headquarters in Brussels. Plans for deepening and development of Port Hedland, Western Australia, to provide outlet for iron ore and pastoral industry estimated to cost £3,900,000.

*16th January.*—£101,000,000 sponge iron industry with capacity of 1 million tons a year planned for Scott River, south-east of Perth. Products to be exported mainly to Japan and West Germany.

*18th January.*—Japanese firm contracted to buy 1 million tons of Burraborang coal over five-year period.

*29th January.*—Minister for Social Services announced introduction of new "merged means test", allowing more liberal pensions to persons with property (*see pp. 700 and 710*).

*9th February.*—Special Loan Council meeting called to consider Commonwealth financial measures agreed to raising of Bond Rate to 5½ per cent.

*21st February.*—Premiers of New South Wales, Victoria and South Australia agreed to co-operate in building a dam of 4,750,000 acre feet on Murray River in South Australia (Chowilla Dam).

*22nd February.*—£7,000,000 plan to expand Nowra paper mill for production of special fine and superfine paper announced by New South Wales Premier. Increased sales tax on motor vehicles (*see 16th November, 1960*) removed. Commonwealth Cash Loan of £35,000,000 opened, issued at 98 15s. to par, interest at 5¼ to 5½ per cent. (closed 9th March, total subscription £34,914,000).

*14th March.*—International Wool Secretariat member countries agreed to constitution giving Australia a majority on board of directors.

*15th March.*—Income tax and pay-roll tax concessions designed to promote Australian exports announced by Acting Prime Minister (the Minister for Trade). Commonwealth negotiated loan in Switzerland of 60,000,000 Swiss francs issued at par with interest at 4½ per cent., fully subscribed.

*22nd March.*—Commonwealth negotiated loan in Canada of 20,000,000 Canadian dollars issued at 98½ dollars per 100 with interest at 5½ per cent., fully subscribed.

*3rd April.*—Export of 200,000 tons of iron ore from field near Grafton (N.S.W.) to Japan approved by Commonwealth Government.

*19th April.*—Forest Research Institute to extend and strengthen the work of the research sections of Forestry and Timber Bureau, established by Commonwealth Government to try and reduce Australian timber losses from borers, insects, fires, etc., totalling about £25,000,000 a year.

*20th April.*—"C" Series Retail Price Index discontinued after being used for 40 years.

*27th April.*—Commonwealth Government drew £78,000,000 from International Monetary Fund and got approval for further stand-by credit of £45,000,000.

*1st May.*—Oil discovered at Tara, Queensland (*see also* 3rd December, 1961).

*3rd May.*—Australia exhibited at British Columbia International Trade Fair as part of export promotion campaign.

*10th May.*—Commonwealth Cash and Conversion Loan opened, issued at £98 15s. to par, interest at 5¼ to 5¾ per cent. Closed 25th May, cash portion of £25,000,000, over-subscribed by £14,500,000.

*12th May.*—Australian Wheat Board contracted to sell 750,000 tons of wheat to Mainland China to be shipped between July and November and paid for in instalments extending over one year. Trading Banks introduced annual service fee to be charged on overdraft limit in addition to interest.

*15th to 19th May.*—Assent given to legislation passed by Commonwealth Parliament providing for Pay-roll and Income Tax relief to companies as incentives to promote increased exports.

*16th May.*—Commonwealth announced details of proposed expenditure of £2,500,000, including Commonwealth grant of £650,000, on provision of all-weather road from Julia Creek to Normanton, Queensland, for stock transport.

*20th May.*—War Service Homes Division acquired land at Mount Druitt for construction of 450 home project. New South Wales State Housing Commission planned joint development, as start of satellite city for Sydney.

*23rd May.*—Electricity charges in Sydney increased by 5.3 per cent. Price of petrol fell in three States.

*29th May.*—Italian Trade Mission of 20 visited Australia.

*9th June.*—Victorian tobacco growers prices at sales greatly below expectations.

*10th June.*—Imperial Chemical Industries announced plans for £6,000,000 ammonia-methanol plant to be built at Botany, to replace company plants at Villawood, New South Wales and Deer Park, Victoria.

*15th June.*—New company formed to mine bauxite in Western Australia and manufacture aluminium in new smelter at Geelong. Professional engineers received substantial rise in minimum salaries after legal proceedings extending over five years. Loan Council approved borrowing programme for 1961–62 of £240,000,000 (£197,100,000 for States, £42,900,000 for Commonwealth-State Housing); local and semi-governmental borrowing ceiling fixed at £111,000,000.

*29th June.*—Australian Census count began.

*30th June.*—Reserve Bank released £17,200,000 of frozen funds of trading banks and restored greater discretion to trading banks in allocation of loans. Savings bank interest rates raised by ¼ per cent. and limit on deposits raised to £3,000. Trading bank fixed deposit rates reduced by ¼ per cent.

## 1961-62.

Exports, especially of wheat, continued at the high level of the closing months of 1960-61 and improved further as the year proceeded. The total of merchandise exported for 1961-62 was £1,069,000,000 as against £928,000,000 for 1960-61. This was largely a result of the disposal of all accumulated wheat stocks available for export, of improved wool prices and of increases in the export of steel and some other non-primary products.

Overall primary production was approximately at the same level as in 1960-61. In quantity, the wool clip was somewhat higher, but other pastoral production and grain crops were somewhat lower. The wheat crop at 247,000,000 bushels was 10 per cent. below 1960-61.

Imports, on the other hand, were affected by the reduced internal activity which had followed the "credit squeeze" initiated in November, 1960. By the beginning of 1961-62, imports had dropped to a level of about £70,000,000 monthly and remained at about that level until December. During the first half of 1962, they showed a rising tendency partly as a result of rising internal activity. In total, imports of merchandise were £883,000,000 in 1961-62 compared with £1,085,000,000 in 1960-61, and there was a favourable trade balance of £186,000,000 in 1961-62, compared with a trade deficit of £157,000,000 in 1960-61.

This improved trade position was reflected in an increase in Australia's international reserves. The drawing of £78,000,000 made from the International Monetary Fund in April, 1961, was repaid in April, 1962. Nevertheless, reserves in June, 1962, at £561,000,000 were £10,000,000 higher than in June, 1961.

The favourable external picture was in contrast with the internal one. Already in June, 1961, it had become apparent that the effect of the restrictive measures of November, 1960, had been stronger than anticipated, as shown by a drop in employment and bank advances, and a level of unemployment higher than for some years. The whole of 1961-62 was therefore characterized by a series of measures to stimulate the economy. In June, 1962, the Reserve Bank had announced an easing of credit and in October all restrictions were removed from bank lending. The Commonwealth Budget introduced in August provided for a deficit of £16,500,000. A small increase in civilian employment occurred between June and December, but as this was regarded as insufficient, the Government in February, 1961, announced a series of further financial measures designed to increase employment and business confidence—an additional grant of £25,000,000 to the States for 1961-62, a 20 per cent. investment allowance for taxation purposes on purchases of plant for manufacturing industry, a rebate of income tax of 5 per cent. retrospective for the whole of 1961-62, and a further reduction in the sales tax rate for motor vehicles. A more rapid rate of recovery took place from March onwards, but by June production in many fields had still not reached the level of two years earlier.

Registration of new motor cars and station wagons increased by 39 per cent. and the value of buildings approved by 11 per cent. from June quarter, 1961, to June quarter, 1962. Employment in June, 1962, was 2 per cent. greater than in the previous June, and the average weekly earnings per male unit in the June quarter was 3½ per cent. higher than in the June quarter, 1961.

Balances outstanding in instalment credit for retail sales fell until the third quarter of the year. Bank liquidity was high, bank advances in June, 1962, being only 1 per cent. higher than in June, 1961. Public loans were oversubscribed and savings deposits showed large increases.

The consumer price index fell by nearly one per cent. between the June quarters, 1961 and 1962. This was largely due to a fall in food prices.

Of significance in Australia's long-term prospects were the discovery of oil at Tara, South Queensland, and the commencement of regular rail services on the new standard gauge railway between Sydney and Melbourne.

*1st July.*—Commonwealth negotiated loan in United States of \$25,000,000 issued at \$97 for \$100, interest at 5½ per cent., fully subscribed. Australia's exports to Mainland of China more than doubled in past year (from £A. f.o.b. 16,000,000 to £A. f.o.b. 40,000,000).

*4th July.*—Commonwealth Arbitration Commission granted 12s. a week increase in Federal basic wage, but rejected unions' request for restoration of automatic quarterly cost of living adjustments. Ford Motor Co. announced plans for £15,500,000 expansion of its Geelong, Melbourne and Sydney plants in next two years. New South Wales Government adopted Consumer Price Index as basis for wage fixation in place of "C" Series Index.

*7th July.*—British Secretary for Commonwealth Relations visited Australia for vital talks on matters concerning trade and Britain's possible entry into the European Economic Community (the "Common Market").

*12th July.*—New paper and pulp mill near Mount Gambier, South Australia, planned, at cost of £13,500,000, with expected capacity of 60,000 tons of brown paper annually. Reserve Bank reduced statutory reserve deposits by 1 per cent., making a further £17,000,000 available to trading banks for advances.

*13th July.*—Legislation introduced in New South Wales to provide for five-day working week for banks.

*14th July.*—Sale of "Manoora", the last Australian coastal passenger vessel, marked end of coastal trade, and existing restrictions on overseas passenger ships were lifted (9th August).

*16th July.*—Cabinet deferred change to decimal currency recommended by Committee (see 19th August, 1960).

*18th July.*—New South Wales Government approved extension of secondary school course to six years commencing in 1962 in accordance with Wyndham report. Feeder roads planned for development of Northern Territory cattle industry at cost of £7,000,000.

*21st July.*—Mount Isa Mines (Queensland) announced that new £3,500,000 copper smelter, designed to give total annual output of 75,000 tons, would be in production by November.

*25th July.*—Australia sold shares in Tasman Empire Airways Ltd. to New Zealand.

*31st July.*—Department of Trade announced that Australian trade exhibition in Malta had established new markets for Australian exports.

*1st August.*—Australia's first international trade fair opened in Sydney.

*3rd August.*—Contract signed for supply and export of 2,500,000 million board feet of softwood to Japan.

*6th August.*—Contracts for £4,000,000 let for construction of generating plant at Station M.1. in second stage of Snowy Mountains Hydro-electric Scheme.

*8th August.*—Chinese trade mission arrived in Melbourne from Hong Kong seeking to improve trade between Hong Kong and Australia.

*15th August.*—Commonwealth Budget for 1961–62 introduced into House of Representatives. In 1960–61, receipts of the Consolidated Revenue Fund were £1,638,000,000. Expenditure (excluding the payment of £142,600,000 to the Loan Consolidation and Investment Reserve) amounted to £1,495,700,000. The main items of revenue (1959–60 figures shown in parentheses) were:—Income Taxes, £807,300,000 (£671,300,000); Excise Duties, £257,400,000 (£252,400,000); Customs Duties, £101,800,000 (£84,400,000); Sales Tax, £173,000,000 (£164,200,000) and Pay-roll Tax, £61,300,000 (£55,200,000). The main items of expenditure were:—Payments to or for the States, £352,900,000 (£321,400,000); Social and Health Services, £330,600,000 (£299,400,000); Defence Services (excluding £12,000,000 provided from Loan Fund in 1959–60), £198,200,000 (£181,600,000); War and Repatriation Services, £149,300,000 (£137,500,000); and Capital Works and Services £140,700,000 (£142,100,000).

The Budget for 1961–62 provided for an estimated expenditure of £1,935,200,000 of which £1,613,900,000 would be provided from the Consolidated Revenue Fund and £321,300,000 from the Loan Fund. In addition, it was expected that £83,300,000 would be available for payment to the Loan Consolidation and Investment Reserve.

*25th August.*—Commonwealth Cash Loan of £40,000,000 issued at par, interest rate 5½ per cent., closed 22nd September, oversubscribed by £33,500,000.

*28th August.*—E. S. and A. Savings Bank established.

*31st August.*—Prime Minister announced plans for Commonwealth subsidy of £2,650,000 towards cost of installing new coal-loading facilities at Newcastle, Port Kembla and Balmain, New South Wales.

*1st September.*—Prime Minister announced that Commonwealth would advance £5,000,000 for cattle roads in Queensland (see 16th May) and further advances of up to £20,000,000 for reconstruction of the Mount Isa—Collinsville Railway. Australian Fisheries Council established by joint Commonwealth and State conference of Ministers responsible for fisheries, to promote the welfare and development of fishing industries.

*2nd September.*—Uniform companies legislation drafted by committee of Commonwealth and State Ministers.

*4th September.*—Approval given for export of a further 200,000 tons of iron ore to Japan (see 3rd April).

*5th September.*—Treasurer announced cancellation of £45,000,000 stand-by credit with International Monetary Fund. 1961–62 Budget introduced into South Australian House of Assembly. In 1960–61, revenue amounted to £86,300,000 and expenditure to £85,100,000 leaving a surplus of £1,200,000. For 1961–62, it was estimated that revenue would be £91,500,000 and expenditure also £91,500,000.

*6th September.*—Commonwealth Cash Loan of £40,000,000 opened, issued at par, with interest at  $4\frac{1}{2}$  per cent. to  $5\frac{3}{8}$  per cent. (Closed 21st September, oversubscribed by £33,499,000.)

*13th September.*—Contracts for £4,800,000 let for construction of 120,000 kW. power station at Muja open cut mine near Collie, Western Australia.

*18th September.*—Number of registered persons seeking employment fell during August by 2,738 to 110,701. This was the first fall since October, 1960.

*19th September.*—1961–62 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1960–61 resulted in a deficit of £200,000. Receipts of the Consolidated Revenue Fund totalled £26,900,000 and expenditure £27,100,000. For 1961–62, it was estimated that expenditure would be £29,900,000 and revenue £29,500,000 leaving a deficit of £400,000.

*20th September.*—1961–62 Budget introduced into New South Wales Legislative Assembly. During 1960–61, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a deficit of £300,000. After providing for debt charges, there were deficits of £200,000 on the Railways and £2,900,000 on the Metropolitan and Newcastle Transport Services. The 1961–62 Budget provided for an overall deficit of £1,800,000. After meeting debt charges, it was estimated that there would be a deficit of £1,500,000 on the Railways and £3,100,000 on the Metropolitan and Newcastle Transport Services.

*21st September.*—Orders received from Japan for further 274,000 tons of steaming coal from Northern Coalfield of New South Wales for delivery in January, 1962. Secretary, Department of Trade, led delegation to present to United Kingdom Departments Commonwealth claims in regard to Britain's proposed joining of European Economic Community.

*22nd September.*—1961–62 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1960–61 resulted in a deficit of £1,200,000. For 1961–62, it was estimated that expenditure would be £75,100,000 and revenue £73,900,000, resulting in a deficit of £1,200,000. First specialist trade mission left for Canada and United States of America for promotion of sale of wool and woollen goods.

*26th September.*—1961–62 Budget introduced into Victorian Legislative Assembly. In 1960–61, revenue exceeded expenditure by £200,000. The surplus on the Railways was £900,000. The Budget for 1961–62 provided for a total expenditure and revenue of £194,200,000. It was estimated that the deficit on the Railways would be £200,000 after providing for debt charges.

*28th September.*—1961–62 Budget introduced into Queensland Legislative Assembly. In 1960–61, receipts of the Consolidated Revenue Fund were £108,800,000. Expenditure was £109,400,000 leaving a deficit of £600,000. For 1960–61, it was estimated that expenditure would amount to £115,000,000 and revenue to £114,400,000 leaving a deficit of £600,000.

*5th October.*—Prime Minister announced that Commonwealth would contribute a quarter of the cost of new dam on Murray River, Australia's largest (see 21st February).

*11th October.*—Broken Hill South announced plans to spend £5,500,000 in next five years on development of old copper workings at Cobar, with estimated reserves of 18,000,000 tons of low to medium grade ore.

*15th October.*—Contracts for £20,000,000 let for tunnelling works for first stage of Snowy-Murray development of Snowy Mountains Hydro-electric Scheme.

*24th October.*—Act assented to amending International Finance Corporation Act 1955 to allow the I.F.C. to make equity investments in Australian companies and to grant immunity from taxes and charges on equity investments.

*27th October.*—Reserve Bank announced that all specific restrictions had been removed from lending by trading banks.

*28th October.*—State Electricity Commission of Queensland announced plans for coal-burning power station with capacity of 360,000 kW. to be built near Ipswich at cost of £33,000,000.

*7th November.*—New South Wales State Electricity Commission purchased two 350,000 kW. generators for Munmorah power station at cost of £5,000,000.

*9th November.*—Commonwealth negotiated £4,900,000 loan, in Netherlands, issued at par, interest rate 5 per cent.; fully subscribed.

*12th November.*—Iron ore deposits, estimated at 1,800 million tons, discovered at Pilbara, Western Australia.

*17th November.*—Victorian Premier opened first units of £27,000,000 petro-chemical complex at Altona, Victoria.

*3rd December.*—Discovery of oil at Moonie (Queensland) showing prospects for commercial development.

*14th December.*—International Sugar Conference announced that from 1st January, 1962, the quota system would be abandoned and production and sales would be on a "free for all" basis. Work began on construction of £44,000,000 aluminium project near Geelong, Victoria (see 15th June).

*3rd January.*—Regular goods service commenced on new direct standard gauge railway between Sydney and Melbourne. Contract for £2,000,000 let for deepening of Newcastle Harbour to allow passage of ships of up to 35,000 tons, primarily Japanese coal ships.

*4th January.*—Further contracts for £19,000,000 let for final stage of Snowy Mountains Hydro-electric Scheme.

*18th January.*—Joint Australian-American company formed to develop Kianga and Moura coalfields in central Queensland at cost of £15,000,000 during next 6 years, to produce 2,000,000 tons of coal annually. National shipping line began construction of new "drive-on" ship for Sydney-Hobart run, to cost £3,500,000.

*24th January.*—New South Wales Government decided to spend £16,000,000 on first section of a Sydney-Newcastle toll road. World Bank lent Australia £44,600,000 for 25 years at 5½ per cent. to finance next stage of Snowy Mountains Scheme. Loan floated in New York for £13,400,000 issued at 98¼ per 100, with interest at 5½ per cent., repayable 1982.

*26th January.*—National Bank of Australasia formed £10,000,000 subsidiary to conduct Savings Bank business.

*6th February.*—Prime Minister announced details of supplementary Budget. States to be offered £10,000,000 for "employment-giving activities" and an extra £5,000,000 for housing; five per cent. rebate on personal income tax restored; sales tax on motor cars, etc., reduced from 30 per cent. to 22½ per cent.; 20 per cent. tax allowance on industrial plant; and maximum advance for War Service Homes increased to £3,500.

*7th February.*—Commonwealth Cash Loan of £55,000,000 opened, issued at £99 12s. 6d. to par, with interest at 4½ per cent. to 5 per cent.; closed 22nd February, oversubscribed by £35,700,000.

*9th February.*—Tariff Board transferred to Canberra.

*12th February.*—Special Advisory Authority appointed to advise on emergency tariff and import controls.

*15th February.*—Loan Council Meeting. Revised programme announced for 1961–62, Government £247,500,000, Local and Semi-Government £104,000,000; States to receive additional allocation of £25,000,000, and Local authorities each to be permitted to borrow up to further £100,000 during remainder of financial year.

*23rd February.*—Commonwealth Bank increased ceiling for housing loans to £2,750 Australian Wheat Board contracted to sell 24,000,000 bushels of wheat valued at between £16,000,000 and £17,000,000 to Mainland China on terms over one year (see 12th May, 1961).

*4th March.*—Contracts announced with Japan for exports of sugar totalling 210,000 tons in 1961–62.

*11th March.*—Lake George Mines ceased operations at Captains Flat after 25 years activity.

**14th March.**—Canadian Trade Mission began trade talks at Canberra with Prime Minister and other Ministers. Australian Trade Mission ship on visit to south-east Asia, began trade promotion with call to Karachi.

**15th March.**—Minister for Trade announced that New Zealand's import licensing for 1962-63 would curtail Australia's exports thereto.

**19th March.**—Agreement reached between shipowners and exporters that freight on exports would be revised in respect of the life of vessels employed in Australian trade, and interest rates which determine return to shipping companies; freights not to increase by more than 5 per cent. between 1961-62 and 1963-64.

**20th March.**—New South Wales government announced details of £6,000,000 plan for flood mitigation on coastal rivers.

**23rd March.**—Work commenced on standardization of railway gauge between Kwinana and Kalgoorlie (Western Australia).

**29th March.**—Victorian Railways adopted scheme of transferring bodies of rolling stock to new bogies at break of gauge points to complement Sydney-Melbourne direct route.

**1st April.**—High grade phosphate deposits discovered near Rum Jungle (Northern Territory).

**6th April.**—Agreement signed with India for supply of 270,000 tons of wheat.

**9th April.**—Commercial Bank of Australia established Savings Bank.

**11th April.**—Bill introduced in Commonwealth Parliament providing for bounty of £2 a ton on production of sulphate of ammonia during three years ending March, 1965. (Assented to 21st May.)

**12th April.**—Treasurer announced agreement between Treasury, Reserve Bank, and Trading Banks for creation of "term lending fund" of £55,000,000 to enable banks to play bigger part in financing general economic expansion and to increase medium and long-term lending to rural and export industries. Contracts signed for supply of further 1,050,000 tons of Burratorang (N.S.W.) coal to Japan.

**8th May.**—United States Secretary of State, in Australia for ANZUS Council meeting, said that United States opposed granting of special terms for sale of Australian produce to European Economic Community.

**10th May.**—Bank of Adelaide formed Savings Bank subsidiary. All major trading banks now operating Savings Bank business. Commonwealth Cash Loan of £40,000,000 issued at £99 10s. to par, with interest from 4½ per cent. to 5 per cent.; closed 24th May, under-subscribed by £1,400,000.

**30th May.**—Approval given for export of 3,000,000 to 4,000,000 tons of iron ore from Geraldton area of Western Australia during next seven to ten years.

**10th June.**—Trade mission arrived in Australia from United Arab Republic.

**14th June.**—Minister for Territories opened £2,000,000 power house in Darwin to double previous capacity.

**20th June.**—Loan floated for \$30,000,000 in New York opening at 97½ per 100 at 5½ per cent. United States House of Representatives passed bill allowing, *inter alia*, Australia's sugar quota to increase from 50,000 tons, to be dependent on purchase of United States agricultural produce by Australia.

**27th June.**—Loan Council met in Canberra and approved of borrowing programme for 1962-63 of £250,000,000 (£204,100,000 for States, £45,900,000 for Commonwealth-State Housing). Local and semi-government borrowing ceiling fixed at £105,155,000 for authorities with programmes in excess of £100,000 in 1962-63, but no overall limit placed in that year on such authorities borrowing under State approval not more than £100,000. A programme of £1,595,000 for Commonwealth authorities in the Territories was also approved by the Loan Council.

## CHRONOLOGICAL TABLE.

---

### CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year, this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

**Year.**

- 1788 N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February.
- 1789 N.S.W.—First wheat harvested at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—"Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River, a locality destined to become an important centre of the dairying industry.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First customs house in Australia established at Sydney.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Qld.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Captain Macarthur. Issue of *The Sydney Gazette*, first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Captain Macarthur.
- 1806 Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Blaxland, Lawson and Wentworth. Macquarie River discovered by Evans.

## Year.

- 1814 N.S.W.—Flinders suggested the name “Australia” instead of “New Holland”. Creation of Civil Courts.
- 1815 N.S.W.—Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley’s first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.
- 1818 N.S.W.—Liverpool Plains and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington (N.T.) by Captain King.
- 1819 N.S.W.—First savings bank in Australia opened at Sydney.
- 1820 N.S.W.—District of future Australian National Capital (Canberra) first visited by white men.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1822 N.S.W.—Formation of Agricultural Society of New South Wales.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Constituted a Crown colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas settlement formed at Melville Island, N.T.
- 1825 Tas.—Van Diemen’s Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.
- 1826 N.S.W.—Settlement in Illawarra district. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.
- 1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military settlement founded at King George Sound by Major Lockyer. First official claim of British sovereignty over all Australia.
- 1828 N.S.W.—Second Constitution. First census. Sturt’s expedition down Darling River. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs and explored Brisbane River.
- 1829 N.S.W.—Sturt’s expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.
- 1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Black line organized to force aborigines into Tasman’s Peninsula, but failed. Small remnant subsequently (1830 to 1835) persuaded to settle on Flinders Island.
- 1831 N.S.W.—Mitchell’s explorations north of Liverpool Plains. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company’s workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield’s first colonization committee. W.A.—Appointment of Executive and Legislative Councils.
- 1832 N.S.W.—State Savings Bank established.
- 1833 N.S.W.—First school of arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Brothers. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarra for continued attacks on settlers.
- 1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.

## Year.

- 1836 N.S.W.—*Mitchell's overland journey from Sydney to Cape Northumberland (S.A.)*. Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.
- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—“Overlanding” of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
- 1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George Sound.
- 1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre's overland journey from Adelaide to King George Sound. New Zealand proclaimed a separate colony.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
- 1844 Qld.—Leichhardt's expedition to Port Essington (N.T.). S.A.—Sturt's last expedition inland.
- 1845 N.S.W.—*Mitchell's explorations on the Barcoo*. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.
- 1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—*Proclamation of North Australia*.
- 1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
- 1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Chinese brought in as shepherds.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignment of *Hashemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
- 1851 N.S.W.—Payable gold discovered by Hargreaves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Arrival of *Chusan*, first P. and O. mail steamer from England. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.
- 1854 Vic.—Opening of first Australian railway—Flinders Street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

## Year.

- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.
- 1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.  
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).
- 1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.
- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoono gold rush.  
Population of Australia reached 1,000,000.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.
- 1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent.
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.
- 1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the continent from south to north. W.A.—First export of pearl-shell.
- 1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.
- 1864 Qld.—First sugar made from Queensland cane.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 W.A.—Arrival of *Hougomont*, last convict ship.
- 1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.
- 1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of transcontinental telegraph.
- 1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.
- 1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.
- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. S.A.—University of Adelaide founded. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison.
- 1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.
- 1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west.
- 1877 W.A.—Opening of telegraphic communication with South Australia.  
Population of Australia reached 2,000,000.
- 1878 Qld.—Restriction of Chinese immigration.  
Introduction of telephone into Australia.
- 1879 N.S.W.—First artesian bore at Kallara Station, near Bourke. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.

- Year.
- 1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne.  
Federal Conference at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration.  
First Australia-wide censuses on same date taken.
- 1882 W.A.—Nugget of gold found between Roebourne and Cossack.
- 1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities.  
Federal Conference held at Sydney. Federal Council created.
- 1884 Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.
- 1885 N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
- 1886 Tas.—Discovery of gold and copper at Mount Lyell.  
First session of Federal Council held at Hobart on 26th January.
- 1887 W.A.—Gold discovered at Southern Cross.  
First “Colonial” Conference in London. Australasian Naval Defence Force Act passed.
- 1888 N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100. Qld.—Railway communication opened between Sydney and Brisbane.  
Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney.
- 1889 S.A.—Railway communication established between Melbourne and Adelaide.  
W.A.—Framing of new Constitution.  
Population of Australia reached 3,000,000.
- 1890 W.A.—Responsible Government granted. Tas.—University of Tasmania founded.  
Meeting at Melbourne of Australasian Federation Conference.
- 1891 N.S.W.—Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison.  
First Federal Convention in Sydney, draft bill framed and adopted.
- 1892 W.A.—Discovery of gold at Coolgardie.
- 1893 Financial crisis, chiefly affecting the eastern States.
- 1894 S.A.—Women’s suffrage granted—first State to do so.
- 1895 N.S.W.—Free-trade tariff. Land and income taxes introduced.  
Conference of Premiers on Federation at Hobart.
- 1896 N.S.W.—People’s Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
- 1897–8 Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
- 1898 Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
- 1899 First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).
- 1900 N.S.W.—Old-age pensions instituted.  
Contingents of naval troops sent to China. Commonwealth Constitution Act received Royal Assent, 9th July. Proclamation of Commonwealth signed 17th September. Sir Edmund Barton formed first Federal Ministry.
- 1901 Proclamation of the Commonwealth at Sydney. First Commonwealth Parliament opened at Melbourne by the Duke of Cornwall and York. Interstate free-trade established.

## Year.

- 1902 Completion of Pacific Cable (all-British). First Commonwealth Tariff.
- 1903 Coolgardie and Kalgoorlie Water Supply Scheme completed. Inauguration of the Federal High Court.
- 1904 Commonwealth Conciliation and Arbitration Act.
- 1905 Population of Australia reached 4,000,000. Re-introduction of assisted immigration in New South Wales.
- 1906 Wireless telegraphy installed between Queenscliffe, Vic., and Devonport, Tas. Papua taken over by Commonwealth.
- 1907 First telephone trunk line service between capital cities, i.e., Sydney and Melbourne. Imperial Conference in London. Declaration of first basic wage in "Harvester Judgment".
- 1908 Canberra chosen as site of Australian Capital.
- 1909 Imperial Defence Conference in London. Visit of Lord Kitchener to report and advise on Australian military defence. Queensland University founded. Establishment of Commonwealth Age Pension Scheme.
- 1910 Penny Postage. Arrival of *Yarra* and *Parramatta*, first vessels built for the Royal Australian Navy. Australian Notes Act passed and first Commonwealth notes issued. Admiral Sir R. Henderson visited Australia to advise on naval defence.
- 1911 First Commonwealth Census. Transfer of Australian Capital Territory and Northern Territory to Commonwealth. Introduction of compulsory military training.
- 1912 Opening of Commonwealth Bank. First payments of Maternity Bonus. First sod of Trans-Australian Railway turned at Port Augusta. University of Western Australia founded.
- 1913 Australian Capital named Canberra and foundation stone laid. Appointment of Interstate Commission.
- 1914 Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Commonwealth Parliament. Transfer of Norfolk Island to Commonwealth.  
European War declared 4th August. German possessions in South West Pacific seized by Australian Naval and Military Expeditionary Force. German cruiser *Emden* destroyed by H.M.A.S. *Sydney* at Cocos Islands, 9th November. Australian and New Zealand Army Corps (ANZAC) formed under Sir William Birdwood.
- 1915 Opening of Broken Hill Proprietary's Ironworks at Newcastle, N.S.W.  
Australian and New Zealand troops landed at Gallipoli, 25th April. Evacuation, 18th-20th December. Australian warships with Grand Fleet.
- 1916 Purchase of steamships by the Commonwealth.  
Australian and New Zealand mounted troops in Egypt, Palestine and Syria. Other troops transferred to France. First proposal for compulsory military service overseas defeated by referendum.
- 1917 National Ministry formed under Rt. Hon. W. M. Hughes. Transcontinental (Kalgoorlie-Port Augusta) Railway completed.  
Australian Flying Corps operating with R.F.C. in Palestine and France. Second proposal for compulsory military service overseas defeated by referendum.
- 1918 Population of Australia reached 5,000,000. Australia House (Strand, London) opened by King George V.  
Armistice with Germany, 11th November. Repatriation Commission created.
- 1919 Peace Conference. England to Australia flight by Capt. (Sir) Ross Smith and Lieut. (Sir) Keith Smith. Peace Treaty signed at Versailles, 28th June.
- 1920 Visit to Australia of H.R.H. the Prince of Wales. Imperial Statistical Conference in London.
- 1921 Mandate over Territory of New Guinea given to Australia. First direct wireless press message, England to Australia. Second Commonwealth Census.
- 1922 First lock on River Murray opened at Blanchetown, South Australia. Queensland Legislative Council abolished.

- Year.
- 1923 First sod turned on the site of Commonwealth Parliament House at Canberra.
- 1924 Directorate of Commonwealth Bank appointed. Australian Loan Council formed.
- 1925 Population of Australia reached 6,000,000.
- 1926 Council for Scientific and Industrial Research established. Imperial Conference. Dominion Status defined.
- 1927 Transfer of Seat of Commonwealth Government from Melbourne to Canberra. Beam wireless established. Financial agreement between Commonwealth and States.
- 1928 State Debts referendum carried.
- 1929 Commonwealth Bank empowered to mobilize gold reserve. Abolition of peacetime compulsory military training in favour of voluntary system.

Australia took over custody of Wilkes Antarctic station from United States of America. International Antarctic Analysis Centre set up at Melbourne within Commonwealth Bureau of Meteorology. Commonwealth plan for expenditure of £720,000,000 on roads and bridges accepted by Premiers' Conference. Population reached 10,000,000. T1. underground power station, first major station of Snowy Mountains Scheme, commenced operation. New Immigration Act, abolishing Dictation Test, and making a number of other changes, became operative. Fourteen mile, £19,000,000 Eucumbene-Tumut tunnel, in Snowy Mountains, completed. Australian Universities Commission constituted. Commonwealth Conciliation and Arbitration Commission granted increase of 28 per cent. in margins of metal trades employees. Australia signed Antarctic Treaty at Washington relating to activities in and the use of Antarctica.
- 1960 Provision made for Social Service benefits to be paid to Australian aboriginals. Commonwealth Banks Act and Reserve Bank Act proclaimed, establishing separate Commonwealth Development Bank, Commonwealth Trading Bank, and Reserve Bank of Australia. Australia and Canada signed new trading agreement, giving increased tariff preference to a wide variety of Australian exports. Goods comprising 90 per cent. of Australia's present imports exempted from licensing provisions. Commonwealth Prime Minister's Conference in London. Severe floods in Derwent Valley (Tasmania). Australia joined International Development Association as foundation member (*see* Diary of Economic Events, 24th April). Telephonic Communications (Interception) Bill passed, prohibiting any interception of telephone messages except in interests of national security. National Service training ended. National Export Drive Campaign and Convention. Report of Committee on Decimal Coinage, unanimously in favour, tabled in House of Representatives. Aluminium works sold to private company by Commonwealth Government. Changes made in Constitution of Papua and New Guinea providing for an increase in number of native members of Legislative Council to eleven, including six elected by natives. Warragamba and Keepit Dams opened by Premier of New South Wales. Approval given for thirteen country areas to have television stations, one commercial, one national in each. New South Wales Government introduced Company Law Amendment Bill, the first of a series designed to provide for uniform Company Law throughout Australia. Government announced special economic measures (restriction of bank and hire purchase credit, increased sales tax on cars, etc.) designed to counter inflationary trend and to safeguard overseas funds.
- 1961 Australia's first guided missile base established at Williamstown (New South Wales). Western Australia announced plans for £10,000,000 iron industry to produce iron for export. Three timber towns in Western Australia destroyed by bushfires. Commonwealth Matrimonial Causes Act, unifying State Acts, became operative (*see* p. 648). Governor-General, Lord Dunrossil, died in office. Bank interest rates rose by about 1 per cent. Australia and United Arab Republic diplomatic

Year.  
1961—  
cont.

missions raised to Embassy status. Residents fled from Carnarvon (Western Australia) to escape exceptional flood. Earl Mountbatten visited Australia for defence talks in Canberra. Last tram service in Sydney stopped running. Monash University (Melbourne) opened. Commonwealth Government announced tax concessions to exporters for promotional expenses in developing oversea export markets. Two women (one native) appointed to Legislative Council of Papua and New Guinea. Australian legation opened at Stockholm. New King Street Bridge opened in Melbourne. International Council of Nurses held conference at Melbourne, attended by 2,000 nurses from 46 countries. New £800,000 radio-telescope, second largest in world, brought into operation at Parkes (New South Wales) for tracking of space probes and radio-astronomy research. Cessation of "C" Series Retail Price Index after being used for 40 years. Tenders let for first works of Snowy-Murray section of Snowy Mountains Scheme. Arrangements made with International Monetary Fund for drawings by Commonwealth Government of £78,000,000 and stand-by credit of £45,000,000. Prime Minister launched appeal for £1,500,000 for National Heart Foundation. Referendum in New South Wales on proposal to abolish Legislative Council defeated (*see* p. 69). Oil discovered in south-west Queensland showing potential for development. Severe earth tremors cause extensive damage in eastern New South Wales. Diplomatic relations established with Argentina at Embassy level. Professional engineers given salary rises, ranging from £2 to £12 a week, by Arbitration Commission. Diplomatic relations established with Switzerland at Embassy level. Contract let for construction of dam at Sirinumu Falls in New Guinea, first of a scheme to develop the hydro-electric potential of the Laloki River. New moving footway opened in Sydney. First non-stop flight from England to Richmond (New South Wales) made in 20 hours by R.A.F. Vulcan jet bomber. New P. and O. ship *Canberra* arrived in Australia, the largest ever to visit Australia on regular service. Cracks appeared in Wyangala Dam (New South Wales), and dam is to be rebuilt by State at cost of £14,000,000. Australian population census taken, population 10,508,186. Inaugural Qantas service to Johannesburg. British Secretary for Commonwealth Relations visited Australia for talks on trade and Britain's possible entry to the European Economic Community (the "Common Market"). Reserve Bank reduced statutory reserve deposits by 1 per cent. to 12½ per cent. First meeting of Antarctic Treaty countries held in Canberra. New South Wales introduced legislation providing for a five-day working week for banks. Sale of *Manoora* ended Australian coastal passenger trade, and existing restrictions on oversea passenger ships engaging therein lifted. New South Wales Government approved plans for implementing Wyndham Report, by extending secondary school course to six years from 1962, with additional bursary assistance. Australia sold interest in Tasman Empire Airways Ltd. to New Zealand. Viscount De L'Isle appointed Governor-General. Japanese collier loaded 20,400 tons of coal, first shipment of total order of 102,000 tons. Treasurer announced cancellation of stand-by credit of £45,000,000 arranged with International Monetary Fund. Sales tax on household furniture, furnishings and appliances reduced from 8½ per cent. to 2½ per cent. Plans made for building of Australia's largest dam (Chowilla Dam) on River Murray in South Australia. International Finance Corporation Act 1955 amended to allow the I.F.C. to make equity investments in Australian companies and to grant immunity from taxes and charges on equity investments. Television licenses granted for major provincial and rural areas. Diplomatic relations established with Korea at Embassy level. Iron ore deposits estimated at 1,800,000,000 tons discovered at Pilbara (Western Australia). Victorian Premier opened first units of £27,000,000 petro-chemical complex at Altona (Victoria). Airliner crashed at Sydney with loss of 15 lives. Menzies Government returned at general elections with majority reduced from 32 to 2.

1962 (to 30th June) Regular goods service commenced on new standard gauge railway between Melbourne and Sydney. New 32,250 ton tanker, largest ship built so far in Australia, launched at Whyalla. Severe bushfires in Victoria, 300 homes destroyed and 8 deaths, with widespread devastation of forests, farms and orchards. National Shipping Line began construction of new "drive-on" ship for Sydney-Hobart run, to cost £3,500,000. Five-day week for banks introduced in all States except Victoria. Australian Mission to European Economic Community

Year.  
1962—  
cont.

raised to Embassy status. Minister for External Affairs announced that Australia would take up \$4,000,000 of United Nations Bonds. Redistribution of electoral boundaries as result of Census count resulted in reduction of one seat each in New South Wales, Queensland and Western Australia, and an increase of one seat in Victoria. Contract signed for construction of New National Gallery and Cultural Centre in Melbourne at cost of £4,250,000. Western Australian Premier signed agreement with American companies for 21-year lease to extract and export up to 15 million tons of iron ore from Pilbara deposits. Minister for Trade went overseas for talks with Britain, United States, France and Germany concerning Britain's proposed joining of European Economic Community. Commonwealth Electoral Act amended to provide for votes for aboriginals. Subscriber trunk dialling service introduced between Canberra and Sydney. New South Wales Government announced details of £6,000,000 plan for flood mitigation on coastal rivers. (a) Not available. (b) Loan expenditure on works, services, etc. (c) At 30th June.  
 (d) Revised, expressed in Australian currency equivalents at ruling rates of exchange, see p. 864.  
 (e) Year ended previous December. (f) At end of June. (g) Figures for 1892 are averages of weekly balances for the December quarter; the remainder are for the June quarter. (h) 1891 at 31st December, thereafter at 30th June. (i) Existing business in Australia. (j) Latest available figures as at 31st December, 1960. (k) Excludes war and service pensions. (l) Includes Northern Territory and Australian Capital Territory. (m) Teaching and research staff. Includes part-time until 1952, thereafter full-time only. (n) Year 1891-92 for Victoria. (o) South Australia includes Adelaide Hospital only. (p) Base: 1911=100.

## APPENDIX.

(Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, and for the latest available statistics, reference should be made to other publications issued by this Bureau (see p. 1160), notably the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics* and the *Digest of Current Economic Statistics*.)

## CHAPTER II.—PHYSIOGRAPHY.

## § 2. Climate and Meteorology of Australia.

**Rainfall: Australian Capital Cities, p. 48.**—Rainfall recorded in Australian capital cities during 1960 was as follows:—Perth, 32.27 ins.; Darwin, 44.09 ins.; Adelaide, 14.91 ins.; Brisbane, 42.36 ins.; Sydney, 57.08 ins.; Canberra, 32.34 ins.; Melbourne, 22.05 ins.; Hobart, 18.03 ins.

## CHAPTER III.—GENERAL GOVERNMENT.

## § 2. Parliaments and Elections.

**Commonwealth Parliaments and Elections, p. 66.**—The second last paragraph on page 66 should be amended to read as follows:—

“The population as disclosed by the Census taken on 30th June, 1961, necessitated further representational changes, New South Wales representation becoming 45, Victoria 34, Queensland 17, and Western Australia 8. The necessary redistribution of boundaries to bring these into effect has not yet been made.”

**State Elections, p. 69.**—Elections for the Legislative Assembly were held in New South Wales and Western Australia during 1962. Particulars of the voting were as follows:—

Particulars.	New South Wales.	Western Australia.
Electors enrolled—		
Males .. .. .	1,060,658	189,517
Females .. .. .	1,113,110	192,288
Total .. .. .	2,173,768	381,805
Electors who voted, Contested Electorates—		
Males .. .. .	960,514	157,390
Females .. .. .	996,894	162,204
Total .. .. .	1,957,408	319,594

## § 3. Administration and Legislation.

**Administrators, p. 74.**—From 5th June, 1962, to 28th September, 1962:—General Sir Reginald Alexander Dallas Brooks, K.C.B., K.C.M.G., K.C.V.O., D.S.O., K.St.J.

**Commonwealth Ministries, p. 75.**—The Hon. L. H. E. Bury resigned the portfolio of Minister for Air on 27th July, 1962, and was succeeded by the Hon. D. E. Fairbairn, D.F.C., M.P. (N.S.W.).

**Governors and State Ministers, pp. 76-78.**—(i) *Victoria*—The Hon. H. R. Petty, M.P., relinquished the portfolio of Minister of Immigration in March, 1962, retaining his other ministerial duties, and the Hon. E. R. Meagher, M.B.E., E.D., M.P., formerly Minister without Portfolio, was appointed in his stead. Later in the year, the Hon. Sir Arthur Warner resigned as Minister of Transport and Mr. Meagher assumed that portfolio, being succeeded as Minister of Immigration by the Hon. R. J. Hamer, E.D., M.L.C.

(ii) *Tasmania—**Ministry (from 19th September, 1961).*

<i>Premier, Treasurer and Minister for Mines—</i> THE HON. E. E. REECE, M.H.A.	<i>Chief Secretary—</i> THE HON. J. B. CONNOLLY, M.L.C.
<i>Deputy Premier and Attorney-General—</i> THE HON. R. F. FAGAN, M.H.A.	<i>Minister for Forests and Housing—</i> THE HON. S. V. WARD, M.H.A.
<i>Minister for Agriculture—</i> THE HON. A. C. ATKINS, M.H.A.	<i>Minister for Health—</i> THE HON. W. D. MCNEIL, M.H.A.
<i>Minister for Lands and Works—</i> THE HON. D. A. CASHION, M.H.A.	<i>Minister for Transport, Licensing and Police—</i> THE HON. H. J. MCLOUGHLIN, M.H.A.
<i>Minister for Education—</i> THE HON. W. A. NELSON, M.H.A.	

## § 5. Cost of Parliamentary Government, p. 87.

The cost of Parliamentary Government, Commonwealth and individual States, for the year 1960–61 was as follows:—

Commonwealth, £3,240,180 (6s. 3d. per head); New South Wales, £1,082,508 (5s. 7d.); Victoria, £748,491 (5s. 2d.); Queensland, £582,588 (7s. 9d.); South Australia, £418,241 (8s. 9d.); Western Australia, £522,687 (14s. 4d.); Tasmania, £280,394 (16s. 0d.); and total, £6,875,089 (13s. 3d.).

## CHAPTER VI.—MANUFACTURING INDUSTRY.

**Summary, p. 160.**—The following table gives a summary of operations in manufacturing industries during 1960–61.

<i>Total in Work Force</i> ..	<i>1,602,365</i>	<i>1,210,011</i>	<i>585,016</i>	<i>377,564</i>	<i>279,800</i>	<i>130,926</i>	<i>4,224,931</i>
<i>Not in Work Force</i> ..	<i>2,314,648</i>	<i>1,720,102</i>	<i>933,812</i>	<i>591,776</i>	<i>456,829</i>	<i>219,414</i>	<i>6,283,255</i>
<b>Grand Total</b> ..	<b>3,917,013</b>	<b>2,930,113</b>	<b>1,518,828</b>	<b>969,340</b>	<b>736,629</b>	<b>350,340</b>	<b>10,508,186</b>

(a) Includes Northern Territory and Australian Capital Territory. Of the employers 224,513 were males and 42,746 females, while 350,437 males, 62,775 females were self employed. Male employees numbered 2,448,458 and female employees 901,746 and there were 13,801 male and 7,941 female helpers. Of those not at work, 128,564 were males and 43,950 females. Females numbering 4,136,776 were in the majority of those not in the work force, the males being only 2,146,479. (b) On wage or salary. (c) Not on wage or salary. (d) The category "Not at Work" includes those who stated that they were usually engaged in work but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

### § 14. The Aboriginal Population of Australia, p. 314.

The numbers of full-blood aboriginals enumerated in each State and Territory at the Census of 30th June, 1961, and an estimate of the total numbers at that date are shown in the following table.

#### FULL-BLOOD ABORIGINAL POPULATION, 30th JUNE, 1961.

State or Territory.	Number of Full-blood Aboriginals Enumerated at Census, 30th June, 1961.			Estimated Number of Full-blood Aboriginals out of Contact at Census.	Total Number of Full-blood Aboriginals as Recorded or Estimated as at 30th June, 1961.
	Males.	Females.	Persons.		
New South Wales .. ..	791	697	1,488	..	1,488

(a) In this table particulars of dwellings occupied by tenants paying rent to a Governmental Housing Authority are excluded for each of the States but included for Northern Territory and Australian Capital Territory.

(b) Includes tenanted dwellings which were rent free, those rented on a furnished basis, and those for which the rents were not applicable.

## § 4. New Building.

**New Houses, p. 377.**—The number of new houses approved, commenced, completed and under construction in each State and Territory during 1961–62 was as follows.

**NEW HOUSES: NUMBER, 1961–62.**

(Including Owner-built Houses.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	26,893	18,114	9,932	7,976	6,291	2,527	404	1,432	73,569
Commenced ..	25,358	18,539	9,166	8,729	6,316	2,475	427	1,590	72,600
Completed ..	26,411	18,969	9,140	9,136	6,082	2,397	394	1,515	74,044
Under construction at 30th June, 1962 ..	11,434	11,580	2,739	4,599	3,250	1,656	303	1,153	36,714

Of the 74,044 new houses completed during 1961–62, 34,990 had outer walls of brick, brick veneer, concrete or stone, 20,896 of wood (weatherboard, etc.), 17,776 of fibro-cement and 382 of other materials.

**New Flats, p. 382.**—The following table shows the number of new flats approved, commenced, completed and under construction in each State and Territory during 1961–62.

**NEW FLATS: NUMBER, 1961–62.**

(Individual Flats.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	5,747	3,291	820	560	592	117	67	28	11,222
Commenced ..	4,927	3,001	588	605	493	166	62	28	9,870
Completed ..	5,938	4,070	928	593	265	154	2	269	12,219
Under construction at 30th June, 1962 ..	3,838	2,242	411	331	379	106	64	23	7,394

**Value of New Buildings, p. 383.**—The values of all new buildings approved, commenced, completed and under construction in each State and Territory are shown in the following table for the year 1961–62.

**NEW BUILDINGS: VALUE, 1961–62.**

(Including Estimated Value of Owner-built Houses.)

(£'000.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	185,848	139,311	56,188	49,760	36,411	17,932	3,729	18,684	507,863
Commenced ..	209,598	152,093	52,917	51,746	36,762	17,693	3,982	19,035	543,826
Completed ..	208,043	148,175	55,054	52,315	34,036	16,727	3,503	15,758	533,611
Under construction at 30th June, 1962 ..	167,408	128,296	28,448	41,508	24,503	13,888	3,928	21,825	429,804

The value of new buildings completed in Australia during 1961–62, according to kind of building, was as follows:—*Houses*—Brick, brick veneer, concrete and stone, £143,741,000; wood (weatherboard, etc.), £66,648,000; fibro-cement, £46,466,000; other, £1,054,000; Total, £257,909,000; *Other Buildings*—Flats, £38,676,000; hotels, hostels, etc., £15,064,000; shops, £23,670,000; factories, £51,034,000; offices, £31,057,000; other business premises,

£21,605,000; educational, £41,343,000; religious, £7,260,000; health, £17,703,000; entertainment and recreation, £11,622,000; miscellaneous, £16,668,000; Total Other Buildings, £275,702,000; Grand Total, New Buildings, £533,611,000.

Persons Working in New Building, p. 385.—The number of persons working on jobs carried out by builders of new buildings in Australia at 29th June, 1962, was as follows:—Carpenters, 46,503; bricklayers, 13,104; painters, 11,274; electricians, 6,645; plumbers, 10,638; builders' labourers, 19,240; other, 19,305; total, 126,709. Of this total, contractors actually working on jobs numbered 9,712, sub-contractors actually working on jobs 19,959 and wage earners, 97,038.

## CHAPTER XII.—LABOUR, WAGES AND PRICES.

### A. RETAIL PRICES AND PRICE INDEXES.

#### § 4. Tabular Statements of Retail Price Index Numbers.

The Consumer Price Index, p. 392.—The following table shows Consumer Price Index numbers for March and June quarters, 1962, for each capital city and the six capital cities combined for each Group and all Groups combined.

#### CONSUMER PRICE INDEX NUMBERS.(a)

(Base of each Index: Year 1952-53 = 100.0.)

Period.	Sydney.	Mel- bourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capital Cities.(b)
FOOD.							
March Quarter, 1962..	121.2	126.6	131.4	126.3	123.4	127.2	124.7
June " " ..	120.0	125.6	129.4	125.7	124.2	126.5	123.7
CLOTHING AND DRAPERY.							
March Quarter, 1962..	111.5	114.2	116.8	111.4	111.8	114.2	112.9
June " " ..	111.5	114.2	116.8	111.5	111.5	114.2	112.9
HOUSING.							
March Quarter, 1962..	147.6	158.1	140.3	154.2	147.1	164.6	151.0
June " " ..	150.2	159.2	141.9	153.9	147.8	166.1	152.6
HOUSEHOLD SUPPLIES AND EQUIPMENT.

June " " ..	113.3	114.4	113.0	106.7	107.2	124.2	112.8
MISCELLANEOUS.							
March Quarter, 1962..	128.0	129.0	134.3	121.5	124.9	126.8	128.0
June " " ..	128.0	129.5	134.3	121.6	124.9	126.9	128.2
ALL GROUPS.							
March Quarter, 1962..	122.4	125.9	127.7	122.1	121.5	127.5	124.1
June " " ..	122.3	125.9	127.3	121.9	121.8	127.5	124.0

(a) The index numbers measure price movements in each city individually and for the weighted average of the six capitals. They do not measure differences in price levels as between cities.

(b) Weighted average.

## B. WHOLESALE PRICES AND PRICE INDEXES.

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

Index Numbers, p. 397.—Index numbers for each group of commodities and for all groups combined for the index of wholesale prices of basic materials and foodstuffs are shown below for the year 1961-62 and for the months April to June, 1962.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS.

(Base of each Index: Average of 3 years ended June, 1939 = 100.)

Period.	Basic Materials.							Foodstuffs and Tobacco. (a)	Basic Materials and Foodstuffs.		
	Metals and Coal.	Oils, Fats and Waxes.	Textiles.	Chemicals.	Rubber and Hides.	Building Materials.	Total.		Goods principally Imported. (b)	Goods principally Home Produced. (a)	Total All Groups. (a)
1961-62	392	212	400	333	302	439	340	332	270	363	336
1962—											
April	390	211	410	334	304	439	340	327	267	361	333
May..	392	211	410	334	299	439	340	330	271	361	334
June	389	211	410	333	293	439	339	337	269	367	338

(a) The indexes for "Foodstuffs and Tobacco", "Goods Principally Home Produced" and "Total All Groups" have been reconstructed as from the base period by excluding potatoes and onions.  
(b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports.

## D. WAGES.

## § 2. Rates of Wage and Hours of Labour.

Weekly Wage Rates, pp. 402-6.—The following table shows for each State and Australia the weighted average minimum weekly rates of wage payable, and the index numbers based thereon, for adult males and for adult females, at 31st March and 30th June, 1962, together with revised figures for 31st December, 1961. Revised particulars of minimum weekly wage rates for 1961 and earlier years were published in the Statistical Bulletins *Minimum Weekly Wage Rates*, 1939 to 1959, and *Minimum Weekly Wage Rates, January, 1960, to June, 1962*, published on 3rd October, 1962.

## WEEKLY WAGE RATES: ADULT MALES AND FEMALES.

WEIGHTED AVERAGE MINIMUM WEEKLY RATES PAYABLE FOR A FULL WEEK'S WORK (EXCLUDING OVERTIME) AND INDEX NUMBERS OF WAGE RATES.

## § 3. Average Weekly Earnings.

Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries, p. 409.—The following table shows for each State and Australia the average weekly total wages and salaries paid, and average weekly earnings per employed male unit, for the year ended June, 1962.

## AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS(a), 1961-62.

N.S.W.(b)	Victoria.	Queensland.	S. Aust.(c)	W. Aust.	Tasmania.	Australia.
-----------	-----------	-------------	-------------	----------	-----------	------------

AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID.  
(£'000.)

--------	--------	-------	-------	-------	-------	--------

AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT.(d)  
(£.)

24.48	23.98	21.67	21.96	21.27	22.50	23.46
-------	-------	-------	-------	-------	-------	-------

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used in each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

Average Weekly Earnings Index Numbers, p. 409.—The average weekly earnings index numbers for Australia for All Industries and Manufacturing (Base of each series: 1953-54 = 100.0—seasonally adjusted series) for the June quarter, 1962, and the year ended June, 1962, were respectively:—All Industries, 146.8, 144.6; Manufacturing, 146.7, 144.7.

State Basic Wage Rates, p. 441.—The table below shows the "basic" weekly wage rates of State industrial tribunals, operative in August, 1962.

STATE BASIC WAGE: WEEKLY RATES, AUGUST, 1962.

State and Area.	Date of Operation.	Males.	Females.
		<i>s. d.</i>	<i>s. d.</i>

Goldfields and other areas .. .. .	30.10.61	291 6	218 8
Tasmania(c) .. .. .	(f)	294 0	220 6

(a) Metropolitan rate applied to the whole of New South Wales from November, 1961. (b) From beginning of first pay-period commencing in August, 1962. (c) No basic wage declared. Rates shown are those adopted by most Wages Boards. (d) During July and August, 1961, Wages Boards varied determinations by adopting the Commonwealth basic wage rate. (e) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and nearby areas, where a loading of 5s. a week is generally payable. (f) Most Wages Boards adopted the Commonwealth basic wage rate from July, 1961.

§ 7. Leave, p. 445.

Three Weeks' Annual Leave Inquiry, 1962.—On 10th April, 1962, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and D. G. Apsey (Commissioner), commenced hearing an application to vary the Metal Trades Award to provide three weeks' paid annual leave instead of two.

In its judgment, delivered on 30th May, 1962, the Commission stated that an increase to three weeks' annual leave generally in secondary industry, subject to special cases, should be granted as soon as it was satisfied that the economy was in a position to cope with the effects of such an increase. However, the Commission first wished to be able better to assess the effects of the recession of 1961 and the effect on Australia of the success or failure of the application of the United Kingdom to enter the European Common Market. Accordingly it adjourned the proceedings to February or March, 1963.

E. EMPLOYMENT AND UNEMPLOYMENT.

§ 1. Employment.

Wage and Salary Earners in Civilian Employment, p. 450.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, female private domestics and defence forces, for the month of June, 1962.

## WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT, JUNE, 1962.

§ 16. Australian Index of Export Prices.

Monthly Index (Fixed Weights), p. 502.—The following are the export price index numbers for the year 1961-62 and for the months April to June, 1962.

EXPORT PRICE INDEXES: AUSTRALIA.

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

INDIVIDUAL COMMODITIES, GROUPS OF COMMODITIES, AND ALL GROUPS COMBINED.

(Base of each Index: Average of three years ended June, 1939 = 100.)

Period.	Wool.	Wheat.	Butter.	Metals. (a)	Meats. (b)	Sugar.	Dried. Fruits. (c)	Tallow.	Hides. (d)	Gold.	All Groups.
1961-62..	412	354	229	358	(e)	430	(f)313	256	307	178	(f)362
1962—											
April ..	422	362	240	350	(e)	437	303	238	304	178	(f)368
May ..	422	364	241	346	(e)	418	(f)311	235	299	178	(f)367
June ..	422	365	258	337	(e)	425	(f)311	231	296	178	(f)369

(a) Silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton and canned meats (see paragraph 4 (ii) on page 500). Guaranteed minimum prices are used when operative. (c) Sultanas, raisins, currants. (d) Cattle hides, calfskins. (e) Actual price realized not yet known; provisional series are included in "All Groups" Indexes which are subject to revision. (f) Preliminary.

Revised figures for the Dried Fruits Group for the months May, 1961, to March, 1962, respectively, were:—344, 343, 341, 327, 325, 309, 307, 309, 304, 303, 303. The All Groups figures remained unchanged.

Since Part VI of this Year Book was issued, a new Export Price Index has been published. A full description of this new index is given in *Statistical Bulletin* No. S.B. 134, issued on 8th October, 1962.

## § 21. The Australian Balance of Payments, p. 507.

The table following shows in summary form revised balance of payments estimates for the years 1959-60 and 1960-61, and preliminary estimates for 1961-62. Further details will be found in the mimeograph publication *The Australian Balance of Payments, 1957-58 to 1961-62*.

(a) For current account balances, minus sign (-) denotes deficit; for capital items other than monetary movements, minus sign (-) denotes outflow; for monetary movements, minus sign (-) denotes decrease in international reserves or net I.M.F. position. (b) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation. (c) Particulars of the Survey of Overseas Investment are not yet available for 1961-62. Private capital movements for this period are therefore combined with the balancing item. (d) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at £127,000,000 in 1959-60, £151,000,000 in 1960-61 and £126,000,000 in 1961-62. (e) Preliminary estimates.

## CHAPTER XIV.—TRANSPORT AND COMMUNICATION.

## A. SHIPPING.

## § 3. Oversea Shipping.

Total Oversea Shipping, States, p. 516.—The following table shows particulars of the entrances and clearances of vessels direct from, and to, overseas countries during 1961-62.

## OVERSEA SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT, 1961-62.(a)

Particulars.		N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	Aust.

Passenger-journeys	'000 315	252,719	152,768	26,514	15,176	11,906	1,816	461,214
Freight Carried—								
Livestock	'000 tons 80	551	264	683	179	125	29	1,911
Coal and Coke	1,235	10,481	2,275	1,808	91	648	305	16,843
Other Minerals	78	2,299	89	1,449	1,104	434	28	5,481
Other Goods	564	10,802	7,723	3,772	3,264	4,135	734	30,994
Total Freight	1,957	24,133	10,351	7,712	4,638	5,342	1,096	55,229

(a) Excludes South Brisbane—Border section of the uniform gauge line (69 route miles). (b) Financial details include road motors. (c) Excludes Government Grants. (d) Included with Coaching. Minus sign (—) denotes loss.

NOTE.—The foregoing table is prepared from quarterly statements supplied by each Government Railway, and figures therein are not completely comparable with those shown in Chapter XIV.—Transport and Communication, which are derived, in the main, from the Annual Reports of the Government Railways.

## E. MOTOR VEHICLES.

Motor Vehicle Registrations, pp. 545–6.—Motor vehicles registered at 30th June, 1962, and new motor vehicles registered during 1961–62 were as follows.

## MOTOR VEHICLES: REGISTRATIONS, 1961-62(a).

State or Territory.	Number of Motor Vehicles Registered at 30th June, 1962.				Number of New Motor Vehicles Registered, 1961-62.(b)			
	Motor Cars.(c)	Com-mercial Vehicles.(d)	Motor Cycles.	Total.	Motor Cars.(c)	Other Vehicles.	Motor Cycles.	Total.

Queensland ..	273,741	146,326	15,190	435,237	25,171	7,802	1,029	34,002
South Australia ..	231,631	75,698	15,681	323,010	18,536	4,710	1,127	24,373
Western Australia ..	151,013	74,748	12,052	237,813	16,857	5,824	896	23,577
Tasmania ..	73,836	26,999	2,398	103,233	6,931	1,775	59	8,765
Northern Territory ..	5,858	5,497	726	12,081	572	523	31	1,128
Aust. Capital Territory ..	16,861	4,173	359	21,393	2,620	465	33	3,116
Total ..	e2,185,088	e868,807	85,369	3,139,264	215,926	52,121	5,314	273,361

(a) Excludes Defence Service vehicles, trailers, road tractors, etc., and dealer's plates. (b) This series is not strictly comparable with the Number of Motor Vehicles Registered series (see p. 546). (c) Includes taxis, hire cars and station wagons. (d) Includes utilities, panel vans, lorries and omnibuses. (e) Registration in Victoria is according to purpose of use and not type of vehicle; consequently, motor car registrations in this series are overstated by the inclusion of commercial vehicles registered for private use.

## H. CIVIL AVIATION.

Statistical Summaries, p. 560.—The following table shows particulars of the operations of regular internal services and oversea services for 1961–62.

## CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES AND OVERSEA SERVICES, 1961-62.

Particulars.	Regular Internal Services.(a)	Oversea Services.(b)
Route miles (unduplicated)(c) ..	59,923	69,712
Hours flown ..	206,215	51,066
Miles flown ..	'000 41,176	19,240
Paying passengers ..	'000 2,665,710	247,517
Paying passenger-miles ..	'000 1,119,331	836,570
Freight—		
Tons(d) ..	57,207	6,432

Mail—		
Tons(d) ..	6,316	2,016
Ton-miles(d) ..	'000 3,202	11,622

(a) Includes only services operating within the Australian mainland and Tasmania. (b) Airlines wholly or partly owned by Australian interests. (c) At 30th June, 1962. (d) In terms of short tons (2,000 lb.).

## J. BROADCASTING AND TELEVISION.

## § 4. Licences, etc.

Broadcast Listeners' and Television Viewers' Licences, pp. 577-8.—Broadcast listeners' licences in force at 30th June, 1962, were as follows:—New South Wales, 812,822; Victoria, 585,752; Queensland, 328,525; South Australia, 249,673; Western Australia, 168,676; Tasmania, 75,014; Australia, 2,220,462. Figures for the Northern Territory and the Australian Capital Territory have been included with those for South Australia and New South Wales respectively.

Television viewers' licences in force at 30th June, 1962, were as follows:—New South Wales, 564,707; Victoria, 460,558; Queensland, 142,422; South Australia, 143,794; Western Australia, 83,951; Tasmania, 29,003; Australia, 1,424,435.

## CHAPTER XVIII.—WELFARE SERVICES.

## A. COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES.

## § 2. National Welfare Fund, p. 698.

The following table shows particulars of payments of social and health services in each State during 1961-62.

COMMONWEALTH EXPENDITURE FROM NATIONAL WELFARE FUND  
ON SOCIAL AND HEALTH SERVICES, 1961-62.

(a) Payments for some Health Services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes special benefits to migrants in reception and training centres. (c) Includes payments to Flying Doctor Service and Bush Nursing Centres. (d) Paid to the State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (e) Includes cost of manufacturing B.C.G. vaccine for distribution throughout Australia. (f) This item covers the cost of district laboratory services, the free supply of prophylactic materials and biological products (e.g. insulin, poliomyelitis and diphtheria prophylactics), the supply and maintenance of hearing aids for children, subsidies to voluntary organizations conducting home-nursing services, and certain costs associated with the blood transfusion services of the Australian Red Cross Society. (g) Includes £255,990 for the production of poliomyelitis vaccine, £100,000 for running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories, £107,668 for Home Nursing Service throughout Australia and £20,300 for the production of smallpox vaccine.

## B. COMMONWEALTH SOCIAL SERVICES.

§ 2. Age and Invalid Pensions, § 3. Child Endowment, § 6. Maternity Allowances, § 7. Unemployment, Sickness and Special Benefits, § 8. Widows' Pensions, pp. 699-711.

The following table gives a summary of age, invalid and widows' pensions, maternity allowances, child endowment, and unemployment, sickness and special benefits for the year 1961-62.

## SOCIAL SERVICES: SUMMARY, 1961-62.

Class "A" pensions in force(d)	8,937	5,845	4,553	2,220	1,905	998	59	67	24,584

(a) Includes children in approved institutions. (b) Includes claims paid overseas.  
 (c) Includes payments to migrants. (d) Pensions paid to widows who maintain at least one child under 16 years of age.

## CHAPTER XV.—EDUCATION AND RESEARCH.

## D. STATE GOVERNMENT EXPENDITURE ON EDUCATION, SCIENCE AND ART, p. 634.

The following table includes amended figures for Victoria and the Australian total which were received subsequent to publication of Part VII of this Year Book.

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1959-60.  
(£'000.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
New South Wales	51,432	14,953	..	66,385	1,107	65,278
Victoria	36,234	11,279	..	47,513	473	47,040
Queensland	15,500	3,610	1,126	20,236	659	19,577
South Australia	13,499	4,019	..	17,518	1,433	16,085
Western Australia	10,276	2,115	19	12,410	215	12,195
Tasmania	5,433	1,775	28	7,236	462	6,774
Total	132,374	37,751	1,173	171,298	4,349	166,949

## CHAPTER XX.—PRIVATE FINANCE:

## A. CURRENCY.

## § 2. Coinage.

**Issues of Australian Coins, p. 762.**—The net issues of Australian coins to 30th June, 1962, were:—silver, £44,702,000; bronze, £3,488,000; total, £48,190,000.

## § 3. Notes.

**The Australian Note Issue, p. 764.**—The average value of notes in circulation for the year 1961–62 was £431,408,000. This amount was distributed in denominations as follows:—10s., £12,526,000; £1, £69,298,000; £5, £192,392,000; £10, £153,613,000; £20, £2,000; £50, £30,000; £100, £36,000; and £1,000, £3,511,000. The amount held by the banks was £59,695,000 and by the public £371,713,000.

## B. BANKING.

## § 1. Cheque-Paying Banks.

**Reserve Bank, p. 769.**—The average liabilities of the Central Banking Business (including Note Issue Department) of the Reserve Bank for the year ended June, 1962, amounted to £1,035,676,000. Capital and Reserve Funds amounted to £26,000,000; Notes on Issue to £427,503,000; Statutory Reserve Deposit Accounts of Trading Banks to £217,733,000; Other Deposits of Trading Banks to £31,454,000; Deposits of Savings Banks to £151,036,000; Other Liabilities to £181,950,000.

Particulars of the average assets were as follows:—Gold and Balances held abroad, £492,083,000; Australian Notes and Coin, £7,985,000; Cheques and Bills of other Banks, £1,790,000; Government and Other Securities (including Treasury Bills), £465,687,000; Bills Receivable and Remittances in Transit, £6,270,000; and Other Assets, £61,861,000.

**Commonwealth Trading Bank, p. 773.**—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1962 were £300,845,000. Of this amount, Fixed Deposits amounted to £97,755,000 and Current Deposits (including Current Deposits bearing interest £15,764,000) to £199,454,000; Balances due to other Banks to £941,000; Other Liabilities to £2,695,000.

The average assets in Australia, £306,974,000, included Cash and Cash Balances £10,842,000; Treasury Bills and Seasonal Securities, £2,195,000; Other Commonwealth and State Government Securities, £84,455,000; Loans to Authorized Dealers in the Short Term Money Market, £2,947,000; Statutory Reserve Deposits with Reserve Bank, £35,704,000; Cheques, Bills and Balances with other Banks, £7,557,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £149,711,000; Other Assets, £13,563,000.

**Private Trading Banks, p. 775.**—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1962, were £1,545,217,000. Fixed Deposits amounted to £436,028,000 and Current Deposits (including Current Deposits bearing interest, £83,621,000) to £1,073,338,000; Balances due to other Banks to £7,457,000; Other Liabilities to £28,394,000.

The average assets in Australia, £1,567,546,000, included Cash and Cash Balances, £61,007,000; Treasury Bills and Seasonal Securities, £32,336,000; Other Commonwealth and State Government Securities, £285,648,000; Loans to Authorized Dealers in the Short

Term Money Market, £27,991,000; Statutory Reserve Deposits with Reserve Bank, £181,558,000; Cheques, Bills and Balances with other Banks, £34,205,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £852,477,000; Other Assets, £92,324,000.

**Classification of Advances within Australia—Commonwealth Trading Bank and Private Trading Banks, p. 781.**—Advances within Australia at the end of June, 1962, dissected by industries were:—*Resident Borrowers*: Business Advances—Agriculture, Grazing and Dairying, £239,601,000; Manufacturing, £209,454,000; Transport, Storage and Communication, £13,975,000; Finance, £66,017,000; Commerce, £216,598,000; Building and Construction, £30,594,000; Other Business and Services, £77,733,000; Unclassified, £8,448,000; Total Business Advances, £862,420,000; Advances to Public Authorities, £12,623,000; Personal advances, £169,631,000; Advances to Non-Profit Organizations, £20,935,000; *Total Resident Borrowers*, £1,065,609,000; *Total Non-Resident Borrowers*, £274,000; *Total advances*, £1,065,883,000.

**Clearing House Returns, p. 784.**—The average weekly bank clearings in each capital city for the year ended June, 1962, were as follows:—Sydney, £200,293,000; Melbourne, £194,352,000; Brisbane, £41,190,000; Adelaide, £39,209,000; Perth, £24,709,000; Hobart, £7,101,000; Total, £506,854,000.

**Debits to Customers' Accounts—All Cheque-paying Banks, p. 784.**—The average weekly debits to customers' accounts in each State for the year 1961–62 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £326,995,000; Victoria, £295,018,000; Queensland, £82,181,000; South Australia, £58,088,000; Western Australia, £40,178,000; Tasmania, £16,040,000; Northern Territory, £1,105,000; Australian Capital Territory, £3,951,000; Total, £823,556,000.

## § 2. Savings Banks.

**All Savings Banks, p. 786.**—The numbers of operative accounts in the several States at end of June, 1962, were:—New South Wales, 3,324,000; Victoria, 2,984,000; Queensland, 1,251,000; South Australia, 1,019,000; Western Australia, 625,000; Tasmania, 332,000; Northern Territory, 19,000; and Australian Capital Territory, 45,000; Total, 9,599,000. The amounts on deposit in the several States at 30th June, 1962, were:—New South Wales, £625,021,000; Victoria, £570,849,000; Queensland, £205,852,000; South Australia, £180,990,000; Western Australia, £90,528,000; Tasmania, £51,230,000; Northern Territory, £3,085,000; and Australian Capital Territory, £7,331,000; Total, £1,734,886,000. Total excess of deposits over withdrawals during 1961–62 was £13,362,000 and interest added was £42,700,000.

## D. INSURANCE.

### § 2. Life Insurance.

**Life Insurance, p. 798.**—The following is a summary of the life insurance business transacted in Australia during 1961 (figures for 1960 in parentheses) compiled from monthly returns collected from the 39 (37) companies registered under the Life Insurance Act 1945–1961, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XX., which are derived from annual returns and include business of the State Government Offices.

Ordinary Business and Industrial Business, respectively:—New Policies issued in Australia—Number, 391,532 (447,082), 176,117 (187,608); Sum Insured, £798,382,000 (£799,631,000), £44,192,000 (£39,772,000); Policies Matured or Otherwise Discontinued in Australia—Number, 342,104 (283,848), 316,278 (296,813), Sum Insured, £301,793,000 (£244,752,000), £33,692,000 (£29,182,000). Particulars of annuities are excluded.

Premium receipts of Ordinary and Industrial Business in Australia in 1961 amounted, respectively, to £125,944,000 (£112,152,000) and £15,962,000 (£15,562,000). Claims, etc., paid amounted to £53,724,000 (£46,315,000) and £14,277,000 (£12,351,000), respectively. Particulars of annuities are included.

## CHAPTER XXI.—PUBLIC FINANCE.

### A. COMMONWEALTH FINANCE.

Consolidated Revenue Fund, pp. 822 and 831.—The table below shows details of revenue and expenditure for the year 1961–62.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: REVENUE AND EXPENDITURE, 1961–62.

(£'000.)

(a) In addition, an amount of £23,641,000 was spent from Loan Fund.

## C. COMMONWEALTH AND STATE FINANCE.

Revenue and Expenditure, p. 862.—Preliminary information relating to Commonwealth and State revenue and expenditure during 1961-62 is given below.

COMMONWEALTH AND STATE REVENUE AND EXPENDITURE, 1961-62.  
(£'000.)

Government of—	Consolidated Revenue Fund.			Loan Fund— Net Expenditure on Works and Services.
	Revenue.	Expenditure.	Surplus (+) or Deficit (-)	
New South Wales .. .. .	(a)296,462	(a)299,587	- 3,125	62,198
Victoria .. .. .	196,309	196,298	+ 11	50,460
Queensland .. .. .	117,325	117,215	+ 110	24,831
South Australia .. .. .	89,103	88,596	+ 507	25,587
Western Australia .. .. .	74,926	75,890	- 964	19,581
Tasmania .. .. .	30,318	30,676	- 358	15,006
<i>Six States</i> .. .. .	804,443	808,262	- 3,819	197,663
<i>Commonwealth</i> .. .. .	1,641,542	1,641,542	..	65,947
<b>Grand Total—Unadjusted</b> .. .. .	<b>2,445,985</b>	<b>2,449,804</b>	<b>- 3,819</b>	<b>263,610</b>
<b>Adjusted(b)</b> .. .. .	<b>2,112,464</b>	<b>2,116,283</b>	<b>- 3,819</b>	<b>263,610</b>

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

## D. GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES.

## § 3. Government Securities on Issue: Commonwealth and States.

Securities on Issue and Annual Interest Payable, p. 867.—The following table shows details of the Government Securities on Issue on account of the Commonwealth and States and the annual interest payable thereon at 30th June, 1962.

GOVERNMENT SECURITIES ON ISSUE AND ANNUAL INTEREST PAYABLE AT  
30th JUNE, 1962: COMMONWEALTH AND STATES.

## GENERAL INDEX.\*

NOTE.—This index is preceded by a list of the special articles, etc., which have appeared in previous issues of the Official Year Book. A list of the maps and graphs contained in this issue will be found on page ix. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*
