(b) Includes Kwinana.

(c) Includes Port Stanvac.

**§ 6. Shipping Cargo**

1. Oversea and Interstate Cargo.—(i) *Australia*. The table hereunder shows the aggregate tonnage of oversea and interstate cargo discharged and shipped at Australian ports for the years 1958–59 to 1962–63. Most of the cargo is recorded in terms of the ton weight of 2,240 lb., the remainder, mainly bulky commodities, being shipped and recorded on the basis of 40 cubic feet of space occupied representing one ton measurement.

**SHIPPING CARGO MOVEMENT: AUSTRALIA**

('000 tons)

Year	Oversea cargo				Interstate cargo			
	Discharged		Shipped		Discharged		Shipped	
	Weight	Meas.	Weight	Meas.	Weight	Meas.	Weight	Meas.

**§ 7. Vessels Registered in Australia**

1. Australian-registered Trading Vessels.—The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30th June, 1963, classified according to—(i) year of construction, 1959 to 1963, and 1958 and earlier years, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in overseas shipyards. The statistics in this table have been compiled by the Commonwealth Department of Shipping and Transport. The *Merchant Shipping Act 1894* (Imperial) under which vessels are registered in Australia, does not make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

## AUSTRALIAN-REGISTERED TRADING VESSELS, 30TH JUNE, 1963 (a)

Year of construction	Oversea and interstate vessels		Intrastate vessels		Built in Australian yards		Built overseas		Total

3. *World Shipping Tonnage.*—At 1st July, 1963, the total steamships, motorships and auxiliaries of 100 gross tons and upwards throughout the world amounted to 39,571, with a gross tonnage of 145,863,463. Of these totals, steamships numbered 12,118 for 74,584,310 gross tons, motorships 26,681 for 71,125,967 gross tons, and auxiliaries 772 for 153,186 gross tons. Included therein were 4,984 oil tankers of 100 gross tons and upwards, with a gross tonnage of 47,121,017. Australian steamships, motorships and auxiliaries, 293 for 557,052 gross tons, constituted 0.74 per cent. and 0.38 per cent. respectively of the total number and tonnage. This information has been derived from *Lloyd's Register of Shipping*.

§ 8. Miscellaneous

1. Lighthouses.—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

2. Distances by Sea.—The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia were published in Year Book No. 48, page 525.

3. Shipping Freight Rates.—The *Quarterly Summary of Australian Statistics* shows a list of the current freight rates for general merchandise in respect of both oversea and interstate shipments.

The following table shows the freight rates from Australia to various countries for certain important commodities at 31st December, 1963.

Interstate rates per ton weight or measurement for general cargo at 31st December, 1963, (expressed in Australian currency) were:—Sydney–Melbourne, 159s. 6d.; Sydney–Brisbane, 155s.; Sydney–Adelaide, 185s.; Sydney–Fremantle, 250s.; Sydney–Hobart, 147s.; Sydney–Darwin, 258s. 6d.

4. **Depth of Water at Main Ports.**—A table showing the depth of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*. For some major ports, information is given in Chapter XX. Local Government.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1959 to 1963 are shown in the table below.

## GOVERNMENT RAILWAYS

1. **General.**—The policy of government ownership and control of railways has been adopted generally throughout Australia, and, although a number of private railways exist, most of them are light railways intended primarily to transport goods involved in the commercial operations of their owners. There are three main gauges in use in the several States (5 ft. 3 in., 4 ft. 8½ in. and 3 ft. 6 in.), but in recent years considerable progress has been made towards the standardization of main trunk routes (*see para. 3 below*).

In the tables in this division, details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line and more detailed statistics for all lines are shown in the annual bulletin, *Transport and Communication*.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 was given in Year Book No. 6, page 681, and in No. 22, page 259. The main ports on the mainland are connected by lines running approximately parallel to the coast and are the focal points of lines which radiate inland to the agricultural, mining and pastoral areas of the continent to a distance of up to 750 miles. However, Darwin in the Northern Territory is not connected by rail to any other port. A 3 ft. 6 in. gauge railway extends southward from Darwin to Birdum, a distance of 317 miles, and from Port Augusta in South Australia a 4 ft. 8½ in. gauge railway of 217 miles extends northwards to Marree from where a 3 ft. 6 in. gauge of 540 miles continues to Alice Springs.

3. **Standardization of Railway Gauges.**—The first step towards uniform gauge railway communication between the capitals of the mainland States was effected in 1930 with the construction of the 4 ft. 8½ in. gauge line from Grafton to South Brisbane. The finance required for the construction was provided by the Commonwealth Government. For details of the agreement between the Commonwealth and New South Wales and Queensland, *see Official Year Book No. 31, page 122*. This line is operated by the New South Wales Railways, and details of operations in New South Wales are included with those of the New South Wales system. Details of operations on the Queensland portion are included with Queensland railway statistics unless otherwise specified.

In March, 1944, the late Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport, and formerly Chairman of Commissioners, Victorian Railways, was requested by the Commonwealth Government to submit a report and recommendation regarding the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge. A summary of his report and recommendations, made in March, 1945, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States, was published in Year Book No. 37, pages 146–9. The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had not ratified the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949 by each Government concerned. The Commonwealth–South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth–Three States Agreement, and that the Commonwealth shall provide all funds required under the Agreement, with 30 per cent. of such moneys being repaid with interest by South Australia over 50 years, while the Commonwealth shall meet the full cost of works on Commonwealth railways in South Australia.

At the request of the South Australian Government, an amendment to the Agreement was approved to enable, as an interim measure, the narrow gauge (3 ft. 6 in.) lines in the South-Eastern Division of the State railways system to be converted to the broad gauge (5 ft. 3 in.). This work was completed in 1959 at a cost of £5 million. Construction and conversion work on the Central Australian Railway between Stirling North and Marree, 216 miles, has been completed by Commonwealth Railways at a cost of £12.2 million. In 1958, the Commonwealth Government made available £50,000 to South Australia for surveying the standard gauge line to be constructed between Broken Hill and Port Pirie, and in April, 1963, it announced its intention to provide funds for the standardization of the line. Preliminary work on this project has commenced.

In 1961, the Commonwealth undertook to provide £1.3 million, outside the Standardization Agreement, for the purchase of diesel-electric locomotives and ore wagons for use on the existing narrow gauge line on this route, the State to bear the cost of their subsequent conversion for operation on standard gauge track.

As a further step towards standardization, a committee consisting of members of the Federal Parliament was formed in March, 1956, to ascertain whether a scheme confined to the main trunk routes would be desirable. This committee recommended in October, 1956, that standard gauge (4 ft. 8½ in.) lines be provided from Wodonga to Melbourne, from Broken Hill to Adelaide via Port Pirie and from Kalgoorlie to Fremantle via Perth.

In 1962, the opening of a new uniform gauge line between Albury and Melbourne completed the standard gauge link between South Brisbane and Melbourne, and for the first time through services were operated between Sydney and Melbourne. There is an agreement on this project between the Commonwealth and the two States, New South Wales and Victoria, whereby the Commonwealth is to meet 70 per cent. of the cost of unification and the two States are to share equally the remaining 30 per cent., with the Commonwealth advancing the whole of the necessary funds initially, and the States' portion, plus interest, being repayable over 50 years. Legislation was enacted by the Commonwealth and the two State Governments in three separate Acts assented to towards the close of 1958. Estimated total cost for the project is £15.8 million. The cost of operations of, and the revenue derived from, the line are based proportionately on a Sydney-Melbourne mileage basis. Details of operations are included in the statistics of the respective States.

In 1961, the Commonwealth and Western Australian Governments enacted legislation to enter into an Agreement to undertake certain standard gauge railway works, including the provision of rolling stock, in that State, at an estimated cost of £41.2 million. The proposal is linked with the establishment of an integrated iron and steel industry at Kwinana in Western Australia, and the new railway facilities will be used to transport iron ore from the Koolyanobbing deposits some 33 miles beyond Southern Cross. These railway facilities will also link Kalgoorlie with East Perth and Fremantle by a standard gauge line. It has been agreed that the project has standardization and developmental components in approximately equal parts, and, initially, the Commonwealth will in effect provide finance for all of the standardization portion of the works and 70 per cent. of the developmental portion. The State will repay with interest 30 per cent. of the standardization costs over 50 years and all the advance for developmental works over 20 years. Work on the project commenced in 1962 and is planned to be completed by December, 1967.

4. Mileage Open for Traffic, all Lines.—The following table shows the route-mileage of Commonwealth and State lines open in each State and Territory at various periods since the inauguration of railways in Australia in 1854.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN**

(a) Portion of Victorian system. (b) Excludes 201 miles of 5 ft. 3 in. gauge line which roughly parallels the uniform gauge (4 ft. 8½ in.) line between Albury and Melbourne. (c) Queensland section of Grafton-South Brisbane Uniform Gauge Line. (d) Portion of Commonwealth system. (e) Includes 432 miles of Commonwealth system.

6. Summary of Operations.—In the following table, a summary is shown of the operations of government railways open in Australia during 1962–63. Figures for earnings exclude State government grants and certain other earnings payable to railways, while figures for working expenses exclude certain other expenses charged to railways (see para. 10, p. 577).

## GOVERNMENT RAILWAYS: SUMMARY OF OPERATIONS, 1962-63

Particulars	Commonwealth railways	State railways	Total
Route-mileage (30th June) .. .. miles	2,252	23,245	25,497

7. Gross Earnings.—(i) *General.* Gross earnings are composed of earnings from (a) coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) carriage of goods and livestock; and (c) rents and miscellaneous items. State Government grants are excluded. Details of these grants made during 1962–63 are shown in para. 10, page 577.

(ii) *Coaching, Goods and Miscellaneous Earnings.* (a) *Summary.* In the following table, gross earnings are shown for the years 1958-59 to 1962-63, together with earnings per average route-mile worked and per revenue train-mile.

<b>Australia ..</b>	<b>47,741</b>	<b>154,225</b>	<b>10,410</b>	<b>22.48</b>	<b>72.62</b>	<b>4.90</b>

(a) Excludes government grants; see para. 10 p. 577.

8. Working Expenses.—(i) *General.* In comparing the working expenses of the several States and Territories, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same system.

Working expenses, wherever presented in the Railways section of this chapter, include reserves for depreciation in South Australia, Western Australia and Tasmania but exclude interest, sinking fund, exchange and certain other payments (*see* para. 10, p. 577).

(ii) *Working Expenses.* The following table shows the total working expenses, the ratio of working expenses to gross earnings, and working expenses per average route-mile worked, and per revenue train-mile for the years 1958–59 to 1962–63.

## GOVERNMENT RAILWAYS: WORKING EXPENSES(a)

(a) See para. 10, p. 577.

(b) See footnote (b) to table on p. 575.

NOTE.—Minus sign (-) denotes loss.

10. Net Earnings, Grants to Railways, Interest, Sinking Fund, Surplus or Deficit, 1962-63.—The following table shows, for each railway system for the year 1962-63, (i) net earnings as in para. 9 above, (ii) State grants and other items credited to railways accounts, (iii) loan interest, exchange, sinking fund, etc., payments charged against the accounts, and (iv) the net surplus or deficit after these items have been taken into account. Particulars of items (ii) to (iv) are not included in the preceding tables in this section.

The figures shown in this table accord with those published in the Annual Reports of the Railways Commissioners of the several systems. Because of the differences in governmental practice concerning costs other than operative charged against railways accounts, compensation for non-paying and developmental lines, etc., and the inclusion in some railways finances of the operations of ancillary transport services, direct comparison cannot be made between the results shown in the table.

GOVERNMENT RAILWAYS: SURPLUS OR DEFICIT AT 30th JUNE, 1963

## GOODS AND LIVESTOCK CARRIED PER AVERAGE ROUTE-MILE WORKED

(Tons)

1958-59	..	3,228	2,133	1,303	1,661	950	2,010	624	1,823
1959-60	..	3,623	2,257	1,266	1,594	1,100	2,111	658	1,947
1960-61	..	3,976	2,559	1,256	1,791	1,172	2,236	772	2,118
1961-62	..	3,967	2,412	1,334	1,823	1,387	2,124	869	2,169
1962-63	..	3,904	2,542	1,438	1,778	1,262	2,257	990	2,193

(a) Traffic originating on the 3 ft. 6 in. gauge system and continuing on the Uniform Gauge Railway, or vice versa, has been counted once only. (b) Based on ticket sales, making allowances for periodical tickets. Except in Tasmania, tickets sold at concession rates are counted as full journeys. (c) Concession tickets are counted according to the proportion of the adult fare charged.

(ii) *Passenger Traffic.* With the exception of the Commonwealth railway systems, which operate only country services, all systems provide both suburban and country passenger services. Traffic classed as "suburban" moves between stations within a classified suburban area around each capital city, whilst traffic classified as "country" originates or terminates at stations outside this suburban area. Particulars of suburban and country passenger traffic are shown separately in the two tables following.

(a) *Suburban Passenger Traffic.* The following table shows a summary of suburban passenger operations for the years 1958-59 to 1962-63. Most of the suburban services in New South Wales and Victoria are operated within electrified areas.

## GOVERNMENT RAILWAYS: SUBURBAN PASSENGER SUMMARY

1962-63	334	939	107,991	115	322.99	957	686 59	2 13	244

(a) Based on ticket sales, making allowances for periodical tickets. Except in Tasmania, tickets sold at concession rates are counted as full journeys. (b) Includes a proportion of mixed train-miles. (c) Passenger-miles divided by passenger train-miles inclusive of a proportion of mixed train-miles. (d) Passenger earnings divided by passenger train-miles inclusive of a proportion of mixed train-miles. (e) Not available. (f) Traffic originating on the 3 ft. 6 in. gauge system and continuing on the Uniform Gauge Railway, or vice versa, has been counted once only. (g) Concession tickets are counted according to the proportion of the adult fare charged. (h) Railways controlled by Commonwealth Government.

NOTE.—Train-miles refer to revenue mileages only. Figures have been revised to include a proportion of mixed train-miles for all systems except Western Australia, where they do not apply. Mixed train-miles do not apply for Victoria also during 1962-63.

(iii) *Freight Traffic. (a) Commodities Carried and Earnings.* The following table shows the quantities of various commodities carried on the various systems and the earnings derived during 1962-63.

GOVERNMENT RAILWAYS: COMMODITIES CARRIED AND EARNINGS, 1962-63

(a) Includes construction staff. (b) Included with operating staff. (c) Excludes Queensland portion of Uniform Gauge Railway. (d) Construction work is carried out by private contractors and the staff engaged is therefore not under the control of the Railway Commissioner. (e) Includes construction staff, Victoria.

**TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES**

1. Systems in Operation.—(i) *Tramway and Trolley-bus.* Since 1st April, 1947, all systems have been operated by government or municipal authorities. During the year 1962-63, tramway systems were in operation in the following cities—Melbourne, Bendigo, and Ballarat, Victoria; Brisbane, Queensland; and Adelaide, South Australia. Trolley-bus services operated in Brisbane, Queensland; Adelaide, South Australia; Perth, Western Australia; and Hobart and Launceston, Tasmania. All systems were electric.

In many parts of Australia, private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Motor Omnibus.* Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Maryborough and Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Launceston and Burnie, Tasmania; Darwin, Northern

Territory; and for country road services operated by the Western Australian Government Railways. In Sydney, the government tramway system has been replaced by omnibus services, and in Perth, the Metropolitan (Perth) Passenger Transport Trust has acquired all but one of the formerly privately owned metropolitan services. In Hobart, the government trolley-bus and omnibus services have replaced the government tramway service.

Particulars of motor omnibus services under the control of private operators are recorded for the States of New South Wales, Victoria, Queensland, South Australia and Western Australia. In New South Wales, particulars of private services are compiled for the Sydney metropolitan and Newcastle transport districts and the city of Greater Wollongong. In Victoria, particulars relate to the Melbourne metropolitan area only, and in South Australia to services licensed by the Municipal Tramways Trust and the Transport Control Board. In Queensland, they relate to all cities with a population of 10,000 or more persons. In Western Australia, particulars of all private services throughout the State are included.

2. Government and Municipal Services.—(i) *Summary of Operations, States.* Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor omnibus services, it is no longer possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. In this section, therefore, statistics of public tramway, trolley-bus and motor omnibus services are combined in single tables with separate details shown for each form of transport where possible.

Since October, 1960, the tramway gauge has been 4 feet 8½ inches throughout.

The following table gives a summary of the operations of tramway, trolley-bus and omnibus systems controlled by government and municipal authorities, for 1962-63.

(a) Includes particulars of New South Wales trolley-buses up to cessation of operation in August, 1959, and tramway services up to February, 1961. (b) Includes a small number of passenger-ferry miles for Western Australia. (c) Includes particulars for Tasmanian trams (to October, 1960) and trolley-buses. (d) Excludes government grants. (e) Includes provision of reserves for depreciation, etc., where possible. (f) Excludes accidents to employees.

NOTE.—Minus sign (—) denotes deficit.

3. Private Services.—*Summary of Operations.* The following table shows the operations of motor omnibus services under the control of private operators in New South Wales, Victoria, South Australia and Western Australia during each of the years 1958–59 to 1962–63, and in Queensland during the years 1959–60 to 1962–63. Particulars are not available for Tasmania.

## MOTOR OMNIBUS SERVICES: PRIVATE

1962–63..	54	1,088	1,696	120	135	74

(a) Metropolitan, Newcastle and Wollongong transport districts only. (b) Nine months ended March, 1961; subsequent figures relate to the years ended 31st March. (c) Metropolitan area only. (d) Partly estimated. (e) Vehicles only. (f) Drivers only. (g) All cities with a population of 10,000 persons or more. (h) Services licensed by the Municipal Tramways Trust and the Transport Control Board. (i) Excludes Transport Control Board licensed omnibuses. (j) Not available. (k) Includes services operated in metropolitan and rural areas. (l) Decrease due to Metropolitan Perth Passenger Transport Trusts acquisition of services previously privately owned.

## FERRY (PASSENGER) SERVICES

1. **General.**—Ferry passenger services are operated in the following States—New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Derwent River at Hobart and on the Mersey River at Devonport. Control is exercised by both governmental authorities and private operators. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

2. **Summary of Operations.**—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1958–59 to 1962–63 are summarized in the following table. Particulars of vehicular ferries are not included.

## FERRY (PASSENGER) SERVICES

1962–63	.. .. .	4	1,482	380	10,376	12

## MOTOR VEHICLES

1. **General.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30th June, 1960, were given in Year Book, No. 47, pp. 553–6.

In all the capital cities and in most of the provincial centres, taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned, but particulars of their operations are not available.

In both urban and provincial centres, motor omnibus traffic has assumed considerable proportions during recent years, and there has been a considerable replacement of existing tramway and trolley-bus services by motor omnibus services. Tramway services by 30th June, 1963, had ceased to operate in New South Wales, Western Australia and Tasmania whilst in South Australia only 7 miles of route remained in operation (*see p. 585*).

2. Motor Vehicles on the Registers, etc.—The following table shows particulars of motor vehicles on the registers, licences issued and revenue received for 1962–63 and a summary for Australia for each of the years 1958–59 to 1962–63.

Figures for numbers of motor vehicles at 31st December, 1962, shown in the tables in this paragraph are as obtained from the census of motor vehicles and relate to motor vehicles as defined for the purposes of the census; figures for other dates are estimates on a basis comparable with the figures from the censuses of 1955 and 1962 (see p. 590).

MOTOR VEHICLES: REGISTRATIONS AND REVENUE

State or Territory, and year	Numbers of motor vehicles on the registers					Number of drivers' and riders' licences in force at 30th June	Gross revenue derived from—

(a) Census of 31st December, 1962. (b) Numbers of motor vehicles are estimates as at 30th June on a basis comparable with the figures from the censuses of 1955 and 1962. (c) Numbers of motor vehicles at census of 31st December, 1962. (d) Not available. (e) Included in registration fees. (f) Excludes Queensland. (g) Excludes Australian Capital Territory but includes drivers, etc., licence fees for South Australia. (h) Excludes South Australia and Australian Capital Territory. (i) Excludes Australian Capital Territory.

NOTE.—All Commonwealth-owned vehicles are included except those belonging to the Defence Services.

The table following shows the number of vehicles (excluding motor cycles) registered per 1,000 of population in each State and Territory at 30th June for each of the years 1959 to 1962 and at 31st December, 1962.

MOTOR VEHICLES (EXCLUDING MOTOR CYCLES) REGISTERED PER 1,000 OF POPULATION

Date	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
30th June, 1959 ..	236	261	248	273	261	248	286	287	251

Motor cycles .. ..	10,036	9,689	7,879	5,314	5,446
<b>Total .. ..</b>	<b>252,686</b>	<b>302,824</b>	<b>290,190</b>	<b>273,361</b>	<b>350,429</b>

(a) Includes utilities, panel vans, trucks, omnibuses and ambulances.

4. **World Motor Vehicle Statistics, 1963.**—At 1st January, 1963, there were 144,269,800 motor cars, trucks and omnibuses registered in various countries of the world. This was an increase of 6.6 per cent. on the figure for the previous year, 135,346,400. Of the 1963 registrations, 78,630,000 or 54.5 per cent. of the world total were in the United States of America, while Australian registration amounted to 2.3 per cent. This information is largely derived from the *Automobile International*, May, 1963.

**CENSUS OF MOTOR VEHICLES, 31st DECEMBER, 1962**

1. **General.**—A census of motor vehicles on the register in each State and Territory at 31st December, 1962, was conducted by the Commonwealth Statistician in co-operation with the Deputy Commonwealth Statisticians and the motor vehicle registration authorities. The census covered items shown on the motor vehicle registration certificate such as make of vehicle, year of model, type of vehicle, horsepower, motive power, location (i.e. address on registration certificate), ownership (private, government, etc.), and for specific types of vehicles such items as unladen weight, carrying capacity, passenger capacity, and in some States gross vehicle weight.

The detailed results of the census are being published in mimeographed and printed bulletins for each State and Territory and for Australia, and in issue No. 54, 1962–63 of the annual bulletin *Transport and Communication*. Previous enumerations of this nature were the census of motor vehicles, 31st December, 1955, and the survey of motor vehicles, 1947–48. The results were published in a series of bulletins and, in summarized form, in issues of the annual bulletin *Transport and Communication* No. 48, 1956–57 (1955 census) and No. 40, 1948–49 (1947–48 survey). Year Book No. 44, 1958, contains on page 415 a summary, for each State and Territory and for Australia, of the vehicles of each type recorded at the census of 31st December, 1955.

2. Summary.—(i) *Types of Vehicles.* (a) *Number.* A summary for each State and Territory of the number of motor vehicles of each type on the register at 31st December, 1962, is given in the following table. The total number of each type recorded for Australia at the previous motor vehicle census (31st December, 1955) is included for purposes of comparison.

## CENSUS OF MOTOR VEHICLES, 31st DECEMBER, 1962: TYPES OF VEHICLE

State or Territory	Motor cars	Station wagons	Utilities	Panel vans	Trucks	Other truck-type	Omnibuses	Motor cycles	Total motor vehicles
New South Wales	742,947	85,746	137,138	49,479	84,670	2,822	5,004	20,398	1,128,204

(a) Year of model not recorded.

**ROADS AND BRIDGES**

Information on the length of roads in Australia, the class of roads and their composition, together with particulars of the financial operations of the roads authorities in the several States, is included in Chapter XX. Local Government, of this Year Book.

## ROAD TRAFFIC ACCIDENTS

## § 1. Accidents Reported

1. Accidents Involving Casualties.—(i) *States, 1962-63.* The following table gives a summary of accidents involving casualties in each State and Territory for the year 1962-63.

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): ACCIDENTS RECORDED AND CASUALTIES, 1962-63

State or Territory	Accidents involving casualties	Persons killed			Persons injured		
		Number	Per 100,000 of mean population	Per 10,000 motor vehicles registered	Number	Per 100,000 of mean population	Per 10,000 motor vehicles registered
New South Wales ..	17,891	894	22	8	24,580	612	220
Victoria ..	12,330	803	27	8	17,149	567	179
Queensland ..	6,345	420	27	9	8,779	566	195
South Australia ..	6,343	201	20	6	8,216	822	247
Western Australia ..	3,926	164	21	7	5,360	701	216
Tasmania ..	919	67	19	6	1,354	374	128
Northern Territory	187	14	51	12	256	927	221
Aust. Cap. Terr. ..	411	12	17	5	593	857	259
<b>Total ..</b>	<b>48,352</b>	<b>2,575</b>	<b>24</b>	<b>8</b>	<b>66,287</b>	<b>613</b>	<b>204</b>

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

(ii) *Riders, Drivers, Pedestrians, etc., Killed or Injured.* The following table shows the number of persons killed and the number injured during 1962-63 in each State and Territory, classified into drivers, riders, pedestrians, etc. Responsibility for cause of accident is not indicated by this classification.

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): DRIVERS, RIDERS, PEDESTRIANS, ETC., KILLED OR INJURED, 1962-63

Drivers, riders, pedestrians, etc.	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Total
<b>PERSONS KILLED</b>

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for the year 1962-63, the number of accidents involving casualties in which each of several classes of vehicles, road users, etc., were involved. The persons killed and injured are similarly classified. As in the table in sub-paragraph (ii), p. 595, responsibility for cause of accident is not indicated by this classification.

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED: AUSTRALIA, 1962-63**

Particulars	Motor vehicle	Motor cycle	Pedal cycle	Tram	Animal and animal-drawn vehicle	Pedestrian	Fixed object	Other vehicle
Accidents involving casualties .. ..	46,377	4,262	4,018	148	387	9,172	3,942	277
Persons killed .. ..	2,491	131	113	9	20	805	200	72
Persons injured .. ..	64,106	4,749	4,058	201	469	8,974	5,420	329

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

NOTE.—As accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals.

The 46,377 accidents involving casualties in which motor vehicles were involved comprised 17,520 collisions with other motor vehicles, 2,975 with motor cycles, 3,507 with pedal cycles, 96 with trams, 285 with animals and animal drawn vehicles, 8,741 with pedestrians, 3,709 with fixed objects, 239 with vehicles other than those mentioned, 8,876 instances of overturning or leaving the roadway, and 429 accidents to passengers only.

2. Road Traffic Accidents Involving Casualties, and Persons Killed or Injured.—The following table shows the number of road traffic accidents involving casualties and persons killed or injured in road traffic accidents in each State and the Australian Capital Territory during each of the years 1958–59 to 1962–63, and for the Northern Territory for the year 1962–63.

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), AND PERSONS KILLED OR INJURED**

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to an extent requiring surgical or medical treatment.

## § 2. Road Safety Organizations

1. Australian Road Safety Council.—(i) *Origin, Objectives and Organization.* The Australian Road Safety Council was formed in 1947 by the Australian Transport Advisory Council, which comprises Commonwealth and State transport ministers and Commonwealth ministers with associated interests, to conduct a nation-wide road safety public education campaign. It was re-constituted in February, 1961, by the Australian Transport Advisory Council, in order to provide a smaller, more effective, organization.

The objectives of the reconstituted Council are:—

- (a) to conduct a continuous programme of public education, aimed at improving the knowledge, skills, attitudes and practices of all classes of road users;
- (b) to encourage a better understanding and observance of State and Commonwealth traffic laws by road users;
- (c) to stimulate greater public interest, support and active participation in road accident prevention;
- (d) to co-ordinate, in a balanced programme, the Commonwealth and State public education campaigns, and to integrate with these campaigns the support accorded by non-governmental bodies and the general public;
- (e) to collect, collate, publish and distribute educational and informative data regarding road accidents; and
- (f) to advise on specific road safety matters referred to it by the Australian Transport Advisory Council.

The Australian Road Safety Council comprises 16 members, representing the Commonwealth and State Governments and the major categories of organized road users. It meets approximately three times each year and has established a number of temporary sub-committees to investigate and report upon particular aspects of its activities.

The Department of Shipping and Transport provides the central executive for the Council. Each section represented on the Australian Road Safety Council—Commonwealth, State and community/commercial—exercises full control over its own activities. One of the Council's principal functions is to co-ordinate the Commonwealth and State public education campaigns and to integrate with these campaigns the support accorded by commerce, industry, and community service organizations.

A sum of £150,000 is provided annually by the Commonwealth Department of Shipping and Transport for the promotion of road safety practices; £50,000 is distributed to the State Governments for public education in road safety, and the remaining £100,000 is used for the national public education campaign. The £50,000 grant to the States is allocated in the following proportions:—New South Wales, £12,500; Victoria, £10,000; Queensland, £9,250; South Australia, £6,250; Western Australia, £8,250; Tasmania, £3,750.

(ii) *Mode of Operation.* The media used by the Australian Road Safety Council in its national campaigns include metropolitan daily press and metropolitan radio and television, platform and pulpit, plus a wide variety of posters, pamphlets, booklets, publications and films. The official publication of the Council is the *Australian Road Safety Council Report* which is published monthly. Close liaison is maintained with State and Commonwealth educationists in the preparation and distribution of road safety instructional material for schools.

The Council, through its Central Executive in the Department of Shipping and Transport, works in close collaboration with two companion Committees, established by the Australian Transport Advisory Council. These are the Australian Road Traffic Code Committee, which prepares model regulations with the object of attaining national uniformity of traffic laws; and the Australian Motor Vehicle Standards Committee, which devises national standards for the construction, equipment, and operational efficiency of all road vehicles.

Because of the great increases in population and vehicle numbers, the exposure to risk of road users is considerably greater today than ever before. This is the basic problem confronting the Australian Road Safety Council, and in its efforts to deal with it, the Council has recognized the consideration that, notwithstanding advances in road and vehicle design and traffic laws, road safety still remains essentially a problem of human behaviour.

The primary aim of road accident prevention, as envisaged by the Council, is thus to create a state of mind in which all classes of road users realize the imminence and consequence of road accidents, and are willing to accept the restraints necessary to prevent them. It is the Council's belief that, for the most part, this can best, and often only, be done effectively through education in the broad and practical sense, by improving knowledge, skill, attitudes and habits of all classes of road users, and by creating a public conscience about road accidents. The current national public education campaign is based on the theme "Road Safety Starts With You".

2. **National Safety Council of Australia.**—The Council, founded in Victoria in 1927, was registered as a company limited by guarantee and later as a foreign company in New South Wales, Queensland, Tasmania and Western Australia. In 1959, new articles of association were adopted, placing the National Safety Council of Australia on a more truly federal basis reflecting the expanded character of the Council in the 35 years since its formation. It is a membership organization whose members include transport, education and other authorities as well as numerous industrial concerns. Membership is open to any person or organization wishing to further the objects and purposes of the Council.

The objects of the Council, summarized, are:—

- (a) to devise and encourage the adoption of safety measures of all kinds;
- (b) to promote discussion of all matters relating to safety measures;
- (c) to conduct an educational campaign among the people of Australia to stimulate the adoption and observance of safety measures; and
- (d) to consider, initiate and support improvements, calculated to prevent accidents, in the laws of the Commonwealth of Australia, the States and local governing bodies.

The Council is now registered in Canberra, with Divisions established in all States. It is managed by a Federal Council, whose members are appointed by the State Divisions. The Federal Council is responsible for those objectives which are of a national character, and each State Division controls its own affairs which are of State or local character.

The Council is a non-profit making organization and, apart from fees which may be charged to members and others for services provided, its work is financed by subscriptions, grants and donations, which in general are received at State level by the various State Divisions.

## CIVIL AVIATION

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration was published in Year Book No. 16, pages 334–5, and a brief account of the foundation and objects of this Administration was published in Year Book No. 19, pag. 299. Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

The Department has 12 Divisions as follows:—Air Transport; International Relations; Aviation Medicine; Flying Operations; Airworthiness; Airways Operations; Communications and Air Traffic Control; Airport Engineering; Finance Management; Air Safety Investigation; Navigational Aids, Electrical and Mechanical Engineering; and Administrative Management.

2. **International Activity.**—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appeared in Year Book No. 37, and particulars of subsequent activity in the international field were included in No. 38. The International Civil Aviation Organization had a membership of 101 nations in November, 1963. Australia has continued her representation on the Council, a position which she held since I.C.A.O. was established in 1947. Further details will be found in Year Book No. 40 and earlier issues.

(ii) *International Agreements.* In November, 1963, there were 17 air services agreements in force between Australia and other countries.

A list of the agreements at 30th June, 1961, was given on pp. 555-6 of Year Book No. 48. The countries concerned were:—Canada, United States of America, Pakistan, India, Ceylon, Netherlands, United Arab Republic, Lebanon, South Africa, Japan, Germany, Ireland, United Kingdom, Malaya and Thailand.

Since June, 1961, two further agreements have entered into force and the routes which may be used by Australia and the reciprocal routes granted in return are as follows.

*New Zealand*—separate Australian routes to Auckland, Wellington and Christchurch and optionally beyond; separate New Zealand routes to Sydney, Melbourne, Brisbane, Norfolk Island and optionally beyond.

*Italy*—an Australian route via specified intermediate points to Rome and beyond via specified points to London; an Italian route via specified intermediate points to Sydney-Melbourne.

(iii) *International Air Services.* Qantas Empire Airways Ltd. has an operational fleet of 11 Boeing 707 jet aircraft and 4 Lockheed Electras. The Boeings operate a round the world service through the United States of America and the United Kingdom and to Hong Kong, Japan and Noumea. The Electras are used on services to New Zealand, Fiji and South Africa. Qantas was operating aircraft over 67,903 unduplicated route miles on international services in June, 1963. A summary of the operations of overseas services wholly or partly Australian-owned appears on page 604.

Three Lockheed Electra aircraft operated by Tasman Empire Airways Ltd. link Sydney with Auckland, Christchurch and Wellington; Melbourne with Auckland and Christchurch; and Brisbane with Auckland.

A total of eleven international airlines operate services into and out of Australia, mainly to and from Sydney.

3. *Australian National Airlines Commission.*—The *Commonwealth Australian National Airlines Act 1945* constituted the Australian National Airlines Commission for the purpose of establishing, maintaining and operating airline services for the transport of passengers and goods between Australian States and/or Territories and within Australian Territories. The Commission may, with the approval of the Minister, undertake services between Australia and places outside Australia, and, in certain circumstances, may engage in intra-State operations.

The operating organization set up to give effect to the Act is Trans-Australia Airlines.

4. *Regular Air Services within Australia.*—Domestic airline services throughout Australia and the Australian sector of Papua-New Guinea are provided by three distinct groups of airlines, operating over a route network of some 95,000 miles. The three groups are as follows.

*Trans-Australia Airlines*—operated by the Australian National Airlines Commission on behalf of the Commonwealth Government. T.A.A. operates on the main interstate routes throughout Australia and on territorial air services, as well as intrastate services in Queensland and Tasmania, and internal services in the Australian sector of Papua-New Guinea.

*Ansett Transport Industries airline group*—a private enterprise organization. This group comprises Ansett-A.N.A., also operating on the main interstate and territorial air routes, and six subsidiary airlines which operate basically intrastate services in Queensland, New South Wales, South Australia, Western Australia and the Australian sector of Papua-New Guinea.

*Small private enterprise airlines*—this group comprises three independent feeder type airlines operating basically intrastate services in New South Wales, Western Australia, Northern Territory and internally in Papua-New Guinea.

Competition between the two major domestic airlines, T.A.A. and Ansett-A.N.A. is controlled by Commonwealth legislation and Airline Agreements. These controls are designed to prevent uneconomic competition between the two companies. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act 1952-1961* and the *Airlines Equipment Act 1958*. The Airlines Equipment Act establishes the machinery for the achievement and maintenance of comparable aircraft fleets between T.A.A. and Ansett-A.N.A., and is designed to prevent the provision of excess aircraft capacity. The Airlines Agreement Act establishes the basis of the control of the two-airline competitive system and extends this machinery until 1977, and also establishes certain requirements covering the introduction of jet aircraft to Australian domestic services after 1st July, 1964. Under the terms of this Act, on 19th November, 1962, T.A.A. and Ansett-A.N.A. applied for, and received, government approval for each to buy two Boeing 727 jet airliners for introduction on Australian domestic services in late 1964 or early 1965.

A summary of the operations of regular air services within Australia appears on page 604.

5. Air Ambulance Services.—A brief statement on the foundation and objects of the Air Ambulance Services will be found in Year Book No. 32, pages 145 and 146.

During the year 1962-63, the Air Ambulance and Royal Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Royal Flying Doctor Service of Australia, operating from Broken Hill, New South Wales, Cloncurry, Queensland, and Alice Springs, Northern Territory (operated in conjunction with the Department of Health) covers a wide area of inland Australia. The Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, operates from Ceduna in South Australia. The federal Methodist Inland Mission operates services from Meekatharra, Western Australia, and the Queensland Ambulance Transport Brigade operates a service from Cairns in Queensland. A Flying Surgeon Service is in operation in Queensland.

For further information see Chapter XVIII. Public Health.

6. Training of Air Pilots.—Since 1926, the Commonwealth has subsidized flying training in Australia largely through the Aero Club movement. In 1961 the Government altered the basis of financial assistance to flying training organizations. The new system provides for the payment of £637,000 in subsidies to Australian flying training organizations, including the Aero Clubs, flying schools and the Gliding Federation of Australia, spread over a four-year period from 1961 to 1965. A feature of the new subsidy arrangements was the establishment of the Australian Flying Scholarship scheme which is designed to train career pilots for the Australian commercial aviation industry. The scholarships provide financial assistance in much the same way as Commonwealth scholarships provide for people undertaking other professions. Of the 182 flying scholarships awarded for 1963-64, 138 were scholarships to take the student through to the commercial licence standard, 35 were to commercial licence plus instructor rating and nine were for agricultural rating.

During the year 1962-63, pupils of the Australian flying training organizations (aero clubs and commercial flying schools) received 456 private licences, 102 commercial licences, and 45 instructor licences. Subsidized hours flown by aero clubs and flying schools totalled 116,061 hours out of a total of 157,773 hours flown and their subsidy earnings totalled £93,914. A limit placed on the subsidy restricted the total payment to £75,000. During the year, 19 clubs were also assisted with the purchase of 22 aircraft and 3 aircraft radios. The value of this assistance under the Aircraft Replacement Fund was £20,000. The permanent secretariats of the Royal Federation of Aero Clubs and the Commercial Flying Schools also received £8,000 and £1,000 respectively during 1962-63 as additional financial assistance.

Thirty-three clubs were affiliated with the Gliding Federation of Australia in 1962-63. Membership rose from 1,117 to 1,247 and 363 Certificates and Awards of Competency were obtained during the year. In 1962-63, Australia was represented in the Ninth World Championships at Junin in Argentina by a team of three pilots flying an Australian built "Arrow" glider, assisted by Australian team crews.

During 1962-63 the Commonwealth assisted gliding clubs to the extent of £6,500. This amount was allocated as follows:—£3,000 on the basis of active membership and

certificates and awards gained, £1,000 to the National Gliding School, £2,000 for development and design work and secretarial functions, and £500 towards the costs incurred by the Australian team at the Ninth World Championships.

The Federation Aeronautique Internationale, whose headquarters are in Switzerland, sets certain standards of efficiency which the glider pilot has to attain before he qualifies for an F.A.I. certificate (e.g., certificates are obtainable for height, distance and time aloft). The administrative authority in Australia for F.A.I. is the Royal Aero Club of Australia.

The total of all subsidy payments and financial assistance to flying training organizations and the gliding movement during 1962-63 was £149,000.

**7. Airways Engineering.**—The field of airways engineering includes the provision of radio navigation facilities, radiocommunication systems, and airport lighting systems.

Approvals were given during 1961-62 for extensions and improvement of Australia's airways navigation and communications system. Long-range air traffic control radar units are being installed at Sydney and Adelaide at a cost of £770,000. Both units were expected to be in operation by the end of 1963, and similar units are planned for Melbourne, Brisbane and Perth as part of a radar programme costing £2.5 million. This coincides with the introduction of airborne radar which is a mandatory requirement for all Australian airliners from June, 1963. These two steps will enable radar surveillance of Australia's controlled air space by pilots and controllers to be considerably extended. Approval was also given during the year for the second stage of the Department of Civil Aviation's navigational aids plan. This involves the installation, over the next four years, of 22 visual omni radio ranges for primary directional guidance, and four international standard distance measuring equipment units at Sydney, Melbourne, Brisbane and Perth. In the communications field, work is proceeding steadily to improve further the high quality direct speech facilities between ground controllers and aircraft operating in controlled air space, and improve generally the communications system throughout the entire Australian aviation area.

The international transmitting station at Llandillo, near Sydney, provides air to ground and point to point communications on the international frequency bands for places as far away as Honolulu, Manila and Singapore.

Members of the South Pacific Air Transport Council have agreed that the Commonwealth Pacific Cable should be used for civil aviation purposes. This should enable the existing radioteletype services between Sydney, Nadi, Auckland and Honolulu to be closed down, and result in improved services between these points. Radio equipment and radio frequencies in the high frequency band will also be released for use on other circuits.

**8. Airports.**—Government approval, in principle, during November, 1962, of a £30 million programme of aerodrome development throughout the Commonwealth marked the beginning of a new phase of increased activity in this field. During recent years, airport development has involved an expenditure of approximately £2 million a year. The new programme, to be spread over five years, includes major projects at Sydney, Melbourne and Launceston, as well as other works in all States and in the Territory of Papua-New Guinea.

Considerable planning and design work has already been done. Much of the works proposed for Sydney, Melbourne and Launceston has already been put before the Parliamentary Standing Committee on Public Works for review, in accordance with the requirement that the Committee should review all major new works involving expenditure over £250,000. Construction work on these three principal projects was planned to start during 1963-64.

At Sydney the north-south runway will be extended from 5,500 feet to 7,500 feet to provide better facilities for the operation of large jet aircraft. This work will be followed by the construction of a new international terminal building with aprons, roads, car parks and engineering facilities, on reclaimed land in the north-western corner of the airport. The project is scheduled for completion in 1968.

At Melbourne, a new airport at Tullamarine for domestic and international aircraft will be developed on a 5,300 acre area, with runways of 7,500 feet and 8,500 feet. The airport is expected to be in use by 1967.

The runway at Launceston will be extended to 6,500 feet and strengthened. Other works include a new terminal, operations building, taxiways and general area development. The project is planned for completion in 1966.

Other aerodromes where major developmental projects are in progress are Alice Springs, Bankstown, Jandakot (near Perth), Meekatharra, Mt. Isa, Perth, Port Moresby and Wyndham.

The number of aerodromes in Australia and its Territories increased by 14 during the year to 634. One hundred and forty-two are owned by the Commonwealth and 492 by local authorities or private interests.

Aerodrome development at Commonwealth aerodromes during 1962-63 continued at about the same rate as in previous years with expenditure totalling £1,653,000. For the same period, the maintenance cost of these aerodromes totalled £2,267,000.

9. *Meteorological Services.*—The Department of Civil Aviation is the major user of meteorological services in the Australian Commonwealth and its Territories, and therefore the requirements for civil aviation purposes have played a big part in determining the form of meteorological organization that exists at the present time. The Department and the Commonwealth Bureau of Meteorology have completed working arrangements designed to meet the very precise requirements of modern civil aviation in Australia, which specify the standards of service, times and places of operation and facilities required for the provision of meteorological services for civil aviation.

10. *Search and Rescue.*—The Department of Civil Aviation has assumed responsibility for co-ordination of search and rescue activity throughout all Australian flight information regions, and also arranges for the availability of search and rescue facilities. Particulars of systems and methods of operation were published in Year Book No. 48, page 558.

11. *Statistical Summaries.*—(i) *Registrations, Licences, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June in each of the years 1959 to 1963.

**CIVIL AVIATION: REGISTRATIONS, LICENCES, ETC., AUSTRALIA(a)**

Particulars	30th June—				
	1959	1960	1961	1962	1963
Registered aircraft owners ..	642	745	850	938	1,006
Registered aircraft ..	1,246	1,360	1,502	(b) 1,600	(b) 1,787
Pilots' licences—					
Private ..	2,801	3,001	3,206	3,627	4,066
Private helicopter ..	..	..	2	2	3
Commercial ..	910	948	973	1,090	1,159
Senior commercial ..	130	132	147	154	176
Helicopter (commercial) ..	17	30	34	33	42

Student helicopter ..	4	14	10	12	15
1st class airline transport ..	652	618	659	690	684
2nd class airline transport ..	389	418	471	432	464
Flight navigators' licences ..	177	168	142	141	135
1st class flight radio-telegraphy operators' licences ..	56	55	43	37	20
Flight radio-telephone operators' licences ..	2,203	2,651	3,679	5,370	6,552
Flight engineers' licences ..	189	193	200	175	168
Aircraft maintenance engineers' licences ..	2,266	2,382	2,492	2,485	2,521
Aerodromes, Australia—					
Government(c) ..	168	149	132	124	122
Licensed(d) ..	304	323	351	359	380
Flying boat bases(e) ..	13	13	13	13	13

(a) Except for aerodromes and flying-boat bases, includes the Territory of Papua and New Guinea.  
 (b) In addition, there were 125 gliders on the register. (c) Under the control and management of the Department of Civil Aviation. (d) Aerodromes under the control and management of a municipality, shire, station owner, private individual, etc. Includes emergency aerodromes. (e) Includes alighting areas.

(ii) *Types of Aircraft and Gliders on the Australian Register.* The various types of aircraft and gliders on the Australian register at 31st December, 1961, were shown in Year Book No. 48, p. 559.

Details of aircraft and gliders on the Australian register at 30th June, 1963 may be found in *Transport and Communication* bulletin No. 54, 1962-63.

(iii) *Operations of Regular Internal Services.* The next table summarizes the flying activities of regular internal services operating within Australia during each of the years 1958-59 to 1962-63.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES,  
AUSTRALIA(a)**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Hours flown .. .. .	229,396	225,050	219,918	207,210	217,897
Miles .. .. . '000	40,287	43,199	42,301	41,176	43,700
Paying passengers .. .. .	2,235,070	2,660,412	2,639,080	2,666,160	2,832,934
Paying passenger-miles .. .. . '000	944,379	1,132,517	1,109,552	1,119,430	1,221,178
Freight—					
Tons(b) .. .. .	62,755	65,402	62,971	57,207	59,373
Ton-miles(b) .. .. . '000	28,841	29,240	28,220	26,076	28,270
Mail—					
Tons(b) .. .. .	2,727	4,825	5,956	6,311	6,467
Ton-miles(b) .. .. . '000	1,472	2,567	3,064	3,198	3,324

(a) Includes only services operating within the Australian mainland and Tasmania.

(b) In terms of short tons (2,000 lb.).

(iv) *Operations of Oversea Services wholly or partly Australian-owned.* The following table furnishes a summary of oversea services wholly or partly owned by Australian interests during the years 1958-59 to 1962-63. This table incorporates aggregate particulars of all traffic originating on oversea services of Qantas Empire Airways Limited and Tasman Empire Airways Limited, which, in the case of Qantas, includes considerable traffic which does not enter Australia. The transfer of the Australian Government's shares in Tasman Empire Airlines to the New Zealand Government on 25th July, 1961, made TEAL a wholly New Zealand-owned airline, and statistics of its operations are therefore not included in Australian statistics after 1960-61. An air services agreement was signed whereby air traffic rights into and through the two countries were exchanged at the same time, and on 1st October, 1961, both airlines commenced joint scheduling arrangements for trans-Tasman services. The table also includes traffic between Australia and Papua, New Guinea and Norfolk Island.

**CIVIL AVIATION: OPERATIONS OF OVERSEA SERVICES(a)**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Route miles (unduplicated) at 30th June ..	74,704	76,125	72,290	69,712	71,676
Hours flown .. .. .	68,811	54,668	57,385	51,066	48,669
Miles .. .. . '000	16,486	16,992	20,068	19,240	20,343
Paying passengers .. .. .	176,120	232,714	291,258	247,517	294,908
Paying passenger-miles .. .. . '000	534,728	720,099	847,713	836,570	1,014,867
Freight—					
Tons(b) .. .. .	3,431	5,150	6,575	6,432	6,756

Mail—					
Tons(b) .. .. .	1,647	2,015	2,335	2,015	2,468
Ton-miles(b) .. .. . '000	8,834	10,351	11,269	11,622	15,191

(a) Airlines wholly or partly owned by Australian interests.

(b) In terms of short tons (2,000 lb.).

(v) *Accidents and Casualties.* The number of accidents involving aircraft on the Australian register, in which persons were killed or injured, is shown in the following table for the years 1958-59 to 1962-63.

**CIVIL AVIATION: AUSTRALIAN AIRCRAFT<sup>(a)</sup>, ACCIDENTS INVOLVING CASUALTIES**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Number .. .. .	39	43	40	46	32
Persons killed .. .. .	21	44	28	52	16
Persons injured .. .. .	30	42	38	38	26

(a) Aircraft on Australian register and gliders irrespective of location of accident.

12. Territory of Papua and New Guinea.—For brief particulars of civil aviation in Papua and New Guinea see Chapter V. The Territories of Australia, pages 126 and 132.

**POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SERVICES**

NOTE.—In this division, particulars for the Australian Capital Territory are included with those for New South Wales and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated.

**§ 1. General**

1. The Postmaster-General's Department.—Under the provisions of the *Post and Telegraph Act* 1901-1961, the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (see pp. 617-21), and co-operates with the Overseas Telecommunications Commission (see pp. 612-3) in providing facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment, and military allotments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, and the collection of land tax.

2. Postal Facilities.—(i) *Relation to Area and Population.* The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1963.

**POSTAL FACILITIES: RELATION TO AREA AND POPULATION AT 30th JUNE, 1963**

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Number of post offices—							
Official .. .. .	515	326	229	170	147	54	1,441

## § 2. Posts

1. **Postal Matter Dealt With.**—(i) *States, 1962-63.* The following table shows a summary of the postal matter dealt with in each State during the year 1962-63. Mail matter posted in Australia for delivery therein is necessarily handled at least twice, but only the number of distinct articles handled is included in the following table.

## POSTAL MATTER DEALT WITH(a), 1962-63

('000)

State	Letters (b)	News- papers and packets (c)	Parcels (d)	Registered articles (e)	Letters (b)	News- papers and packets (c)	Parcels (d)	Registered articles (e)
	Posted for delivery within Australia				Posted for delivery overseas			
New South Wales ..	617,948	123,958	5,598	3,692	37,484	10,617	250	699
Victoria ..	519,132	78,411	4,773	2,961	16,710	3,015	123	173
Queensland ..	212,952	27,250	2,251	1,368	7,525	860	31	25
South Australia ..	147,962	14,185	1,253	749	5,524	847	40	61
Western Australia ..	118,270	9,857	954	533	6,289	1,228	22	53
Tasmania ..	42,548	6,822	201	373	548	75	12	2
<b>Australia</b> ..	<b>1,658,812</b>	<b>260,483</b>	<b>15,030</b>	<b>9,676</b>	<b>74,080</b>	<b>16,642</b>	<b>478</b>	<b>1,013</b>
	Received from overseas				Total postal matter dealt with			
New South Wales ..	49,623	31,980	484	1,027	705,055	166,555	6,332	5,418
Victoria ..	40,084	10,400	325	500	575,926	91,826	5,221	3,634
Queensland ..	4,886	4,914	75	63	225,363	33,024	2,357	1,456
South Australia ..	3,241	4,977	72	28	156,727	20,009	1,365	838
Western Australia ..	3,036	5,963	57	28	127,595	17,048	1,033	614
Tasmania ..	2,107	2,285	24	4	45,203	9,182	237	379
<b>Australia</b> ..	<b>102,977</b>	<b>60,519</b>	<b>1,037</b>	<b>1,650</b>	<b>1,835,869</b>	<b>337,644</b>	<b>16,545</b>	<b>12,339</b>

(a) Number of distinct articles handled. (b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters. (c) Includes newspapers and postal articles not included in letter mail. (d) Includes registered, cash on delivery and duty parcels. (e) Includes registered articles other than parcels.

(ii) *Australia.* The next table shows the total postal matter dealt with in Australia in relation to the mean population during each of the years 1958-59 to 1962-63.

## TOTAL POSTAL MATTER DEALT WITH: AUSTRALIA

Year	Letters, postcards and letter-cards		Newspapers and packets		Parcels(a)		Registered articles other than parcels	
	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion
1958-59 ..	1,599,400	161	317,633	32	18,903	1.9	15,156	1.5
1959-60 ..	1,602,830	158	319,831	31	16,433	1.6	13,671	1.5
1960-61 ..	1,700,544	164	318,614	31	15,976	1.5	12,935	1.2
1961-62 ..	1,748,054	165	324,694	31	15,854	1.5	12,357	1.2
1962-63 ..	1,835,869	170	337,644	31	16,545	1.5	12,339	1.1

(a) Includes registered, cash on delivery and duty parcels.

During 1962-63, the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—road £4,123,000; railway £1,425,000; sea £255,000; air—internal £1,360,000, oversea £5,490,000; grand total £12,653,000.

2. **Money Orders and Postal Notes.**—The issue of money orders and postal notes is regulated by sections 74–79 of the *Post and Telegraph Act* 1901–1961. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent by any one person to a person or persons outside Australia is £A.10 a week. A postal note is not available for a sum larger than twenty shillings.

The following table shows the number and value of money orders and postal notes issued in Australia in each of the years 1958–59 to 1962–63.

**MONEY ORDERS AND POSTAL NOTES: TRANSACTIONS, AUSTRALIA**

Year	Money orders			Postal notes		Poundage £'000
	Issued		Net commission received £'000	Issued		
	Number	Value		Number	Value	
	'000	£'000		'000	£'000	
1958–59.. ..	9,420	87,034	643	18,012	8,845	347
1959–60.. ..	9,535	94,335	805	16,492	8,380	324
1960–61.. ..	9,652	100,760	867	15,959	8,194	307
1961–62.. ..	(a) 10,176	(a)132,496	876	15,514	8,096	307
1962–63 . . .	(a) 11,076	(a)153,433	929	16,330	8,620	321

(a) Includes official money orders used in bringing to account telephone accounts and collections on War Service Homes repayments.

Of the total money orders issued in Australia during 1962–63, 10,683,000 valued at £152,209,000 were payable in Australia, and 393,000 valued at £1,224,000 were payable overseas. Of the total money orders paid in Australia during 1962–63, 10,660,000 (£151,889,000) were issued in Australia, and 168,000 (£1,045,000) were issued overseas.

Of the total postal notes paid in Australia during 1962–63 (16,624,000 valued at £8,803,000), 11,488,000 (£6,376,000) were paid in the State in which issued, and 5,136,000 (£2,427,000) were paid in States other than those in which issued.

### § 3. Telegraphs

1. **General.**—A review of the development of telegraph services in Australia up to 1921 appeared in Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. During the past few years, substantial improvements in both the speed and grade of telegraph services throughout Australia have been effected, the entire system being subjected to intensive re-organization, and these matters have been dealt with in some detail in recent issues of this Year Book.

2. **Telegraph and Telephone Mileage.**—At 30th June, 1963, the combined single-wire mileages for both telegraph and telephone purposes were:—aerial, underground and submarine cables, 10,976,000 miles; trunk telephone and telegraph cables, 561,000 miles; aerial wires, 1,379,000 miles. There were 123,000 miles of pole routes. Joint use is made of poles for power and telephone reticulation.

3. **Telegraph Offices.**—The numbers of telegraph offices, including railway telegraph offices in the various States at 30th June, 1963, were:—New South Wales, 2,797; Victoria, 2,261; Queensland, 1,679; South Australia, 1,028; Western Australia, 954; Tasmania, 502; total, 9,221.

4. **Telegrams.**—The following table shows the number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea, according to the class of message transmitted.

**TELEGRAMS DISPATCHED WITHIN AUSTRALIA, 1962-63**  
(’000)

State	Paid and collect						Unpaid (departmental)	Total telegrams	
	Ordinary	Meteorological	Urgent	Radio-grams	Press	Letter-grams			Total
New South Wales	6,060	241	211	50	50	26	6,638	216	6,854
Victoria ..	3,639	164	123	5	20	11	3,962	123	4,086
Queensland ..	3,231	221	94	91	43	18	3,698	139	3,837
South Australia	1,537	111	38	23	16	12	1,737	45	1,782
Western Australia	1,512	158	14	96	17	17	1,814	36	1,850
Tasmania ..	418	53	12	1	2	6	492	23	515
<b>Australia ..</b>	<b>16,397</b>	<b>948</b>	<b>492</b>	<b>266</b>	<b>148</b>	<b>90</b>	<b>18,341</b>	<b>582</b>	<b>18,924</b>

With the steady expansion of telephone and radio communication networks since the second world war, the number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea has decreased, with few interruptions of trend, since the peak of 35,970,000 in 1945-46.

For particulars of telegrams received from, and dispatched to, other countries, see § 5 para. 2, pages 613-4.

#### § 4. Telephones

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. Particulars of the total single wire mileage used for telephone, trunk and/or telegraph purposes are shown in § 3, para. 2, p. 610. Developments in the telephone system in recent years have been dealt with in previous issues of this Year Book.

2. **Summary.**—Particulars relating to the telephone services in each State at 30th June, 1963, are shown in the following table.

**TELEPHONE SERVICES: SUMMARY, 30th JUNE, 1963**

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Exchanges .. .. .	2,105	1,723	1,278	740	765	371	6,982
Services in operation .. '000	695	569	226	162	106	54	1,812
Instruments in operation .. '000	999	772	306	225	145	75	2,522
(i) Subscribers' instruments '000	979	753	296	218	140	72	2,458
(ii) Public telephones .. '000	10	7	4	2	2	1	26
(iii) Other local instruments '000	10	12	6	5	3	2	38
Instruments per 100 of population	24.2	25.3	19.5	21.7	18.8	20.7	23.1

Of the total telephone services (1,812,181) in operation at 30th June, 1963, 688,790 or 38 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks, and 1,445,578 or 79 per cent. were connected to automatic exchanges.

During 1962-63, 1,809 million local calls and 84.5 million trunk line calls were made within Australia, averaging 998 local calls and 47 trunk calls per service.

3. **Oversea Telephone Services.**—Telephone circuits to other countries are provided by the Overseas Telecommunications Commission (see §5, para. 1) for conduct of these services by the Postmaster-General's Department. At 30th June, 1963, telephone calls could be made from Australia direct to 126 countries. International telephone calls to and from Australia during 1962-63 numbered 201,175, an increase of 65,511 or 48 per cent. over 1961-62. Switched radiotelephone services were established with Peru, West Irian and Guam during the year. The marked increase in traffic on the oversea service was brought about largely by the introduction of cable working to New Zealand in July, 1962.

4. **World Telephone Statistics, 1963.**—The following table shows the number of telephones in use in various countries with two million or more telephones at 1st January, 1963, together with the number per 100 of population and the proportion in each country to the world total.

WORLD TELEPHONE STATISTICS(a) AT 1st JANUARY, 1963

Country	Number of telephones ('000)	Telephones per 100 of population	Proportion of total (per cent.)
United States of America .. .. .	80,969	43	50.9
United Kingdom(b) .. .. .	8,911	17	5.6
Japan(b) .. .. .	7,356	8	4.6
Germany, Federal Republic of .. .. .	7,047	12	4.5
Canada .. .. .	6,330	34	4.0
U.S.S.R. .. .. .	5,769	3	3.6
France .. .. .	4,978	11	3.1
Italy .. .. .	4,655	9	2.9
Sweden .. .. .	3,054	40	1.9
Australia(c) .. .. .	2,522	23	1.6
Spain .. .. .	2,096	7	1.3
Other .. .. .	25,513	..	16.0
<i>Total</i> .. .. .	<i>159,200</i>	<i>..</i>	<i>100.0</i>

(a) Partly estimated. Information derived, in the main, from *The World's Telephones* compiled by the American Telephone and Telegraph Company. (b) At 31st March, 1963. (c) At 30th June, 1963.

### § 5. Oversea Telecommunication Services; Radiocommunication Stations Authorized

1. **General.**—The Overseas Telecommunications Commission (Australia) is the authority responsible for the operation of Australia's external telecommunication services by cable and radio.

The Commission was established under the *Overseas Telecommunications Act* 1946-1948. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunication services of the British Commonwealth countries concerned and for the establishment of a representative advisory board, the Commonwealth Telecommunications Board, to co-ordinate their development.

The Commission provides telegraph, telex, photo-telegraph, and, in conjunction with the Postmaster-General's Department, telephone services with oversea countries and Australian Territories. Leased one- and two-way circuits are also provided for large commercial users. In addition, it operates the Australian coastal radio services for communication with ships at sea in Australian waters and high frequency radio services for communication with ships in any part of the world. The Commission's coastal radio stations also provide certain services to a number of remote stations within Australia and its Territories.

Details of oversea communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Year Book No. 37, pages 220-4.

To meet Australia's increasing demand for oversea communication channels, and because of limitations to performance and capacity inherent in current forms of telegraph cables and high frequency radio systems, the Commission, in partnership with the oversea telecommunications authorities of Britain, Canada and New Zealand, installed a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. This project stemmed from the Pacific Cable Conference between representatives of Britain, Canada, Australia and New Zealand held in Sydney, 28th September to 20th October, 1959. Work was commenced in August, 1960, and the first section, between Australia (Sydney) and New Zealand (Auckland), opened in July, 1962. The next section, between New Zealand (Auckland) and Fiji (Suva), was opened in December, 1962, and the remaining section in December, 1963. This cable forms part of the British Commonwealth round-the-world large capacity cable scheme, in which a complementary cable between Britain and Canada (CANTAT) was officially opened in December, 1961. The two cable connexions are linked across Canada by a microwave system.

The Commonwealth cable system feeds into the United States of America network at Hawaii, and into the European network at London.

The Pacific Cable project is administered by a management committee consisting of representatives of the oversea telecommunication authorities of the four partner Governments.

2. International Telegrams.—(i) *Number of Telegrams.* The number of telegrams received from and dispatched overseas in each State during 1962-63 is shown hereunder.

## INTERNATIONAL TELEGRAMS, 1962-63

('000)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Received .. ..	737	(a) 400	104	72	80	(a) 21	1,414
Dispatched .. ..	725	475	107	80	85	21	1,493
<b>Total .. ..</b>	<b>1,462</b>	<b>875</b>	<b>211</b>	<b>152</b>	<b>165</b>	<b>42</b>	<b>2,907</b>

(a) Estimated.

The traffic in international telegrams to and from Australia has not varied greatly in recent years.

(ii) *Number of Words.* Particulars of the international business, originating and terminating in Australia, transacted over the cable and radio services during 1962-63 are shown in the following table.

**INTERNATIONAL TELEGRAMS: NUMBER OF WORDS, AUSTRALIA, 1962-63(a)**  
(‘000 words)

Class of telegram	Words transmitted to—			Words received from—		
	United Kingdom	Other countries	Total	United Kingdom	Other countries	Total
Letter .. ..	4,112	11,446	15,558	3,850	10,248	14,098

Government .. ..	62	632	694	216	1,267	1,483
Urgent .. ..	236	374	610	142	310	452
Other .. ..	..	8	8	..	130	130
<b>Total .. ..</b>	<b>14,912</b>	<b>25,466</b>	<b>40,378</b>	<b>15,795</b>	<b>23,772</b>	<b>39,567</b>

(a) Year ended 31st March.

Words transmitted to “Other countries” included 10,676,000 words to other Commonwealth countries and 14,790,000 to foreign countries. Words received from “Other countries” included 10,928,000 words from other Commonwealth countries and 12,844,000 from foreign countries.

3. *Oversea Telephone Services.*—See § 4, para. 3, page 612 for particulars of these services.

4. *Coast Stations.*—At 30th June, 1963, there were 111 radio stations established at points around the Australian coast and 18 about the coast of Papua and New Guinea and other External Territories. During the year ended 31st March, 1963, the radio telegraph service of these stations handled 17,168,000 paid words, of which 6,104,000 were classified as ship traffic and 11,064,000 as fixed point to point traffic. The radio telephone service traffic extended over 96,217 paid minutes, 12,943 of which were taken up with ships calls and 83,274 to Australian Territories.

5. *Radiocommunication Stations Authorized.*—The following table shows particulars of the different classes of radiocommunication stations authorized in Australia and the External Territories at 30th June, 1963. Figures relate to radiocommunication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners’ licences are shown on pages 619 and 623 respectively.

									(f)		

(a) Stations established at fixed locations for communication with other stations similarly established. (b) Stations established in out-back areas for communication with control stations such as those of the Royal Flying Doctor Service. (c) Stations established at fixed locations for communication with mobile stations. (d) Land stations for communication with ocean-going vessels. (e) Equipment installed in aircraft (aeronautical), motor vehicles (land mobile services), harbour vessels (harbour mobile services) and ocean-going vessels (ships), and mobile equipment of organizations such as the Royal Flying Doctor Service. (f) Includes 176 stations which cannot be classified according to State, etc.

BROADCASTING AND TELEVISION

§ 1. General

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act 1942-1963* and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board (see p. 616). Details of each service will be found on pages 617-22. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting and Television Stations Licence Fees Act 1956*.

The Australian Broadcasting Control Board, which was constituted on 15th March, 1949, consists of five (including two part-time) members and operates under the Ministerial jurisdiction of the Postmaster-General. No person shall be appointed a member of the Board who—

- (a) has any financial interest, whether direct or indirect, in any company which is the licensee of, or an applicant for a licence for, a commercial broadcasting station or a commercial television station, or manufactures or deals in equipment for the transmission or reception of broadcasting or television programmes;
- (b) is a member of the governing body of any company or other association of persons which is the licensee of, or an applicant for a licence for, a commercial broadcasting station or commercial television station; or
- (c) is a licensee of, or an applicant for a licence for, a commercial broadcasting station or commercial television station.

The Board's principal functions, as set out in Section 16 of the *Broadcasting and Television Act 1942-1963* are—

- (a) to ensure the provision of services by broadcasting stations and television stations in accordance with plans from time to time prepared by the Board and approved by the Minister;
- (b) to ensure that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate;
- (c) to ensure that adequate and comprehensive programmes are provided by commercial broadcasting and commercial television stations to serve the best interests of the general public; and
- (d) to detect sources of interference, and to furnish advice and assistance in connexion with the prevention of interference, with the transmission or reception of the programmes of broadcasting stations and television stations.

In addition, the Board may exercise such other functions as are prescribed in relation to broadcasting and television stations.

The Board may make recommendations to the Minister as to the exercise by the Minister of any power under Part IV (The Commercial Broadcasting Service and the Commercial Television Service) of the Act.

The Board has power—

- (a) subject to any direction of the Minister, to determine the situation and operating power of a broadcasting station or television station;
- (b) subject to any direction of the Minister, to determine the frequency of a broadcasting station and the frequencies of a television station, within bands of frequencies notified to the Board by the Postmaster-General as being available;
- (c) to determine the hours during which programmes may be broadcast or televised;
- (d) to determine the conditions subject to which advertisements may be broadcast or televised by licensees;
- (e) subject to any direction of the Minister, to regulate the establishment and operation of networks of commercial broadcasting stations or of commercial television stations and the making of arrangements by licensees for the provision of programmes or the broadcasting or televising of advertisements;
- (f) to conduct examinations as to the competency of persons to operate the technical equipment of broadcasting stations and television stations and to charge fees in respect of those examinations; and
- (g) to make recommendations to the Minister, regarding the grant of licences for television translator stations in areas where, in the opinion of the Board, satisfactory reception of television programmes is not being obtained from commercial television stations.

The Board is obliged to hold public inquiries into applications, made to the Minister, for licences for commercial broadcasting and commercial television stations in areas for which the Minister proposes to grant licences and into any other matter within its functions if the Board thinks it necessary or desirable, or the Minister so directs.

In exercising its powers and functions in relation to commercial broadcasting and commercial television stations the Board is obliged to consult representatives of those stations.

The Australian Broadcasting Commission, which consists of seven members, at least one of whom must be a woman, controls the activities of the National Broadcasting Service and the National Television Service.

## § 2. Broadcasting

1. The National Broadcasting Service.—(i) *General.* In sound broadcasting, the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission, and the provision and operation of transmitters and technical facilities in the studios are the responsibility of the Postmaster-General's Department.

(ii) *Technical Facilities.* At 30th June, 1963, the National Broadcasting Service comprised the following 72 transmitting stations, of which 62 were medium frequency and 10 high frequency.

### *Medium Frequency Stations—*

New South Wales—2BL and 2FC, Sydney; 2AN, Armidale; 2BA, Bega; 2CO, Albury; 2CR, Orange; 2GL, Glen Innes; 2KP, Kempsey; 2LG, Lithgow; 2ML, Murwillumbah; 2NA and 2NC, Newcastle; 2NB, Broken Hill; 2NR, Grafton; 2NU, Tamworth; 2TR, Taree; and 2WN, Wollongong.

Victoria—3AR and 3LO, Melbourne; 3GI, Sale; 3WL, Warrnambool; and 3WV, Horsham.

Queensland—4QG and 4QR, Brisbane; 4AT, Atherton; 4GM, Gympie; 4MI, Mount Isa; 4QA, Mackay; 4QB, Maryborough; 4QL, Longreach; 4QN, Townsville; 4QS, Toowoomba; 4QY, Cairns; 4RK, Rockhampton; 4SO, Southport.

South Australia—5AN and 5CL, Adelaide; 5CK, Port Pirie; 5LN, Port Lincoln; 5MG, Mount Gambier; 5MV, Renmark; 5PA, Penola; and 5WM, Woomera.

Western Australia—6WF and 6WN, Perth; 6AL, Albany; 6GF, Kalgoorlie; 6GN, Geraldton; 6NM, Northam; and 6WA, Wagin.

Tasmania—7ZL and 7ZR, Hobart; 7NT, Launceston; and 7QN, Queenstown.

Northern Territory—8AL, Alice Springs; 8DR, Darwin; 8KN, Katherine; 8TC, Tennant Creek.

Australian Capital Territory—2CN and 2CY, Canberra.

Territory of Papua and New Guinea—9PA, Port Moresby; and 9RB, Rabaul.

### *High Frequency Stations—*

VLI Sydney, New South Wales; VLG, VLH and VLR Lyndhurst, Victoria;

VLM and VLQ Brisbane, Queensland; VLW and VLX Perth, Western Australia; and VLK and VLT Port Moresby, Papua.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles per second. The high-frequency stations, using frequencies within the band 3 to 30 megacycles per second, provide service to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland, and in Papua and New Guinea and adjacent islands.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilized to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

In June, 1963, 48 of the Australian medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

(iii) *Programme Facilities. (a) General.* The programmes of the Australian Broadcasting Commission cover a wide range of activities, which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programme during 1962-63 was as follows:—Classical music, 26.2 per cent.; light entertainment, 18.0 per cent.; light music, 10.3 per cent.; news, 7.3 per cent.; talks, 6.3 per cent.; sporting, 5.3 per cent.; drama and features, 3.7 per cent.; education, 3.6 per cent.; religious, 3.5 per cent.; Parliament, 3.5 per cent.; children's session, 2.8 per cent.; rural, 1.8 per cent.; and non-departmental, 7.7 per cent.

(b) *Music.* The A.B.C., in addition to its extensive activities in the field of musical broadcasting, is one of the largest concert-giving organizations in the world. Its regular broadcasts command a large audience, and a total of 1,017,232 people attended A.B.C. concerts during 1962-63. There are symphony orchestras in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, which have developed from the studio broadcasting orchestras set up in 1936.

In 1962-63, the A.B.C. organized 638 public orchestral concerts (including 191 free concerts for school children and 38 free concerts for adults) and 170 public recitals by famous artists throughout the Commonwealth.

(c) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the world's great plays as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular radio drama programmes are broadcast on Sunday afternoons and Sunday and Monday evenings, and special series of longer plays are also given at various times. In recent years, the technique of the feature programme has also been developed. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way.

(d) *Youth Education.* The A.B.C. provides a regular series of broadcasts to schools in all States as an addition to normal class-room education. The total number of listening schools at the end of June, 1963, was 9,944 or about 94 per cent. of all schools, State and private, throughout the Commonwealth. (See also Chapter XIX. Education, Cultural Activities, and Research, on this subject.)

(e) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs, literature, science and general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. An extension of this type of programme is the documentary. Controversial issues are covered in sessions such as "Wednesday Forum", and "Any Questions" as well as in the commentaries. The weekday "News Review" and the weekly session, "World Report" give the background to current news developments recorded over landline from all States in the Commonwealth, or by radio telephone or cable from abroad.

(f) *Rural Broadcasts.* The Rural Broadcasts Department exchanges programmes with several overseas countries and provides service, educational, and entertainment programmes all designed to be of value to the man-on-the-land and industries allied with primary production. Special programmes are designed for country women and junior farmers, while urban dwellers are provided with gardening programmes and shopping guides. A complete weather and marketing service is provided. Rural programmes are broadcast on a national, State, and regional basis, in the Territory of Papua-New Guinea, and on the Overseas Service (Radio Australia). The 23 officers at regional stations present specific information and educational programmes in relation to their own regions. During 1962-63, a total of 7,886 rural talks and interviews, as well as 8,934 weather reports and 7,128 market reports were broadcast.

(g) *News.* The Commission collects all its Australian (including Papua and New Guinea) news through its own staff journalists and part-time correspondents. It also maintains a news room in London for the selection and transmission of news obtained from major overseas agencies, and has special representatives in south-east Asia. Regional bulletins are broadcast from country centres and also from capital cities to cover near-city districts. Radio Australia (the Overseas Service of the A.B.C.) broadcasts Australian and overseas news daily in English, French, Mandarin, Indonesian, Japanese, Cantonese, Vietnamese and Thai, with special attention to Asia and the Pacific. Each day, the A.B.C. re-broadcasts two news bulletins from the British Broadcasting Corporation. The A.B.C. broadcasts more than 186 news bulletins each day, including those given over Radio Australia.

(h) *Other Activities.* The proceedings of the Federal Parliament are broadcast regularly on one of the two national transmitters in each capital city, one in Newcastle and one domestic short-wave station (VLR).

The National Children's Hour, presented seven days a week, is composed of over 40 programme items, including stories, music, games, art, literature, natural history and sport.

In co-operation with the various religious denominations, the A.B.C. broadcasts several religious sessions each week-day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The variety and sporting programmes of the A.B.C. provide the lighter side of the service. With its variety session, the policy of the A.B.C. is to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music.

A comprehensive coverage of sport at home and abroad is provided by the A.B.C. On Saturday afternoons, the sporting panel provides listeners with progress results, scores and descriptions from several fields of sport. Events of international interest such as Test matches and the Davis Cup are covered by simultaneous descriptions from A.B.C. commentators.

2. **The Commercial Broadcasting Service.**—Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is £25 on the grant of the licence, and thereafter £25 a year plus one per cent. of the gross earnings of the station from the broadcasting of advertisements or other matter during the preceding financial year. Licensees of these stations rely for their income on the broadcasting of advertisements and other publicity.

3. **Oversea Broadcasting Service.**—There are eight high-frequency stations at Shepparton, Victoria, which provide the oversea service known as "Radio Australia". As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programmes are arranged by the A.B.C. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The oversea audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

4. **Broadcasting Stations.**—The following table shows the number of broadcasting stations in operation at 30th June, 1963.

BROADCASTING STATIONS, 30th JUNE, 1963

Type of station	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea	Total
National—										
Medium frequency	17	5	13	8	7	4	4	2	2	62
High frequency—										
Domestic	1	3	2	..	2	..	..	..	2	10
Oversea	..	8	..	..	..	..	..	..	..	8
Commercial	37	20	21	8	14	8	1	1	..	110

Tables showing the call sign, location, frequency and aerial power of national and commercial broadcasting stations in operation at 30th June, 1963, are shown in *Transport and Communication*, Bulletin No. 54.

### § 3. Television

1. **General.**—Television services in Australia operate under the *Broadcasting and Television Act 1942–1963* and comprise the National Television Service and the Commercial Television Service.

2. **The National Television Service.**—(i) *General.* The National Television Service is provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department. At 31st December, 1963, sixteen stations had been established.

Australian Capital Territory—ABC channel 3, Canberra; New South Wales—ABN channel 2, Sydney; ABHN channel 5, Newcastle-Hunter River area; ABWN channel 5a, Illawarra area; Victoria—ABV channel 2, Melbourne; ABEV channel 1, Bendigo area; ABRV channel 3, Ballarat area; ABLV channel 4, Latrobe Valley area; ABGV channel 3, Goulburn Valley area; Queensland—ABQ channel 2, Brisbane; ABDQ channel 3, Darling Downs area; ABRQ channel 3, Rockhampton area; South Australia—ABS channel 2, Adelaide; Western Australia—ABW channel 2, Perth; Tasmania—ABT channel 2, Hobart; ABNT channel 3, North Eastern Tasmania area.

Additional national television stations which had been authorized but had not commenced to operate at 31st December, 1963, are as follows.

New South Wales—Central Tablelands area (channel 1); Richmond-Tweed Heads area (channel 6); Bega-Cooma area (channel 0); Broken Hill area (channel 2); Grafton-Kempsey area (channel 2); Central Western Slopes area (channel 3); Murrumbidgee Irrigation area (channel 7); Upper Namoi area (channel 7); Manning River area (channel 1); South Western Slopes and Eastern Riverina area (channel 0); Victoria—Upper Murray area (channel 1); Mildura area (channel 4); Swan Hill area (channel 2); Queensland—Townsville area (channel 3); Cairns area (channel 9); Mackay area (channel 4); Wide Bay area (channel 6); Southern Downs area (channel 1); South Australia—South East area (channel 1); Spencer Gulf North area (channel 1); Western Australia—Bunbury area (channel 5); Central Agricultural area (channel 4); Southern Agricultural area (channel 2).

It is planned that all services will be in operation by the end of 1966.

(ii) *Programme Facilities.* (a) *General.* The television programmes provided by the A.B.C. cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30th June, 1963, was as follows:—Drama and features, 22.1 per cent.; talks, 18.4 per cent.; sport, 11.1 per cent.; children's session, 10.8 per cent.; news, 9.1 per cent.; light entertainment, 8.0 per cent.; education, 7.4 per cent.; music, 3.2 per cent.; religion, 2.8 per cent.; rural services, 2.5 per cent.; non-departmental, 4.6 per cent. A summary of the activities of the departments in the field of television is given in the following paragraphs. Transmission hours for the year ended 30th June, 1963, totalled 20,765.

(b) *Talks.* In television, talks also cover a wide and growing field, ranging from public affairs type programmes such as "Four Corners" to commentaries on international and Australian affairs and outside telecasts of public events. Film and studio documentaries, discussions on literature, art and science, topical programmes, interviews, magazine programmes, and demonstrations are all part of the regular output.

(c) *Drama and Features.* A considerable proportion of television time is devoted to drama and features, and "live" television plays featuring Australian artists may usually be seen fortnightly in all State capitals. A Television Writers' Workshop gives writers practical advice on television writing. Of 29 live plays produced during 1962–63, 7 were by Australian authors.

(d) *Music.* Extensive development has taken place in the A.B.C.'s television music programmes. Major operas, which are regularly produced in the studios, have achieved a progressively higher standard, and are now fully comparable with overseas productions. Television programmes by resident ballet companies have also been encouraged and further advances in this field are envisaged. The number of telecasts of A.B.C. and visiting overseas symphony orchestras has been increased, while telecasts of overseas and resident artists have become an established part of programme output.

(e) *Rural Services.* Weather reports and forecasts are telecast six evenings a week on National T.V. stations. In Sydney and Melbourne, there are two half-hour magazines each week, namely "Country Call" and "Town and Country". These include rural film items from all States, topical interviews and demonstrations. Gardening programmes are telecast weekly in Sydney and Canberra. Outside broadcast programmes are devised in all States at Royal Shows and other places of rural interest. The National Junior Farmer Radio and Television Competition is a major annual event. Film items are regularly exchanged with member countries of the European Broadcasting Union. In all States, a weekly programme is "To Market, To Market", a practical buying guide for housewives. A half-hour magazine programme, "Town and Country", which includes local interviews, demonstrations and films, and films syndicated from Sydney, is telecast weekly in Brisbane, Adelaide, Perth and Hobart.

The aim of rural broadcasts in television is to provide consumer-interest material for urban viewers and to convey to them aspects of food production and country life and to provide a rural news and extension service to farmer viewers.

(f) *Education.* The A.B.C. provides daily television programmes for schools in all Australian States with certain series repeated to meet their convenience. Programmes for primary schools are of a supplementary type, while those for secondary schools are designed to contribute more directly to classroom instruction. In addition, there is a daily programme for pre-school children entitled "Kindergarten Playtime". At the adult level, there are two television programmes weekly, designed in series and known as "University of the Air" which are presented in the evenings. Initial programmes of a series based on university extension activities have also been transmitted.

(g) *News.* Television news bulletins and newsreels have been included in the programmes presented in both Sydney and Melbourne since the television services began in November, 1956. Since then, those news items have been included in the programmes of other State capitals. The A.B.C. is a member of the British Commonwealth International Newsfilm Agency (B.C.I.N.A.), through which it receives world-wide television newsfilm and provides newsfilm of Australian origin for international distribution.

(h) *Other Activities.* Special television programmes are presented for children, including filmed material obtained on an exchange basis from overseas television organizations. Special religious services and programmes have also been televised. Outside television cameras have covered a number of sporting events, including the Olympic Games, Davis Cup tennis, Test and Sheffield Shield cricket, swimming championships and the Commonwealth Games.

3. **The Commercial Television Service.**—Commercial television stations are operated under licences granted by the Postmaster-General. Licences for commercial television stations have been granted as follows:—*Australian Capital Territory*—Canberra area CTC (channel 7); *New South Wales*—Sydney ATN (channel 7), TCN (channel 9); CBN (channel 8), Central Tablelands area; NBN (channel 3), Newcastle—Hunter River area; RTN (channel 8), Richmond—Tweed Heads area; WIN (channel 4), Murrumbidgee area; *Victoria*—Melbourne GTV (channel 9), HSV (channel 7); BCV (channel 8), Bendigo area; BTV (channel 6), Ballarat area; GLV (channel 10), Latrobe Valley area; GMV (channel 6), Goulburn Valley area; *Queensland*—Brisbane BTQ (channel 7), QTQ (channel 9); DDQ (channel 10), Darling Downs area; TNQ (channel 7), Townsville area; RTQ (channel 7), Rockhampton area; *South Australia*—Adelaide ADS (channel 7), NWS (channel 9); *Western Australia*—Perth TVW (channel 7); *Tasmania*—Hobart TVT (channel 6); TNT (channel 9), north-eastern Tasmania area.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is £100 for the first year and thereafter £100 a year plus one per cent. of the station's gross earnings from the televising of advertisements or other matter during the preceding financial year.

4. **Extension of Television Services.**—On 22nd February, 1962, the Postmaster-General invited applications for the grant of a third commercial television station licence in the Sydney area, the Melbourne area, the Brisbane area and the Adelaide area and for a second commercial television station licence in the Perth area. Licences have been granted in respect of the Sydney and Melbourne areas and the Australian Broadcasting Control Board concluded its inquiries into applications received in respect of the other three areas on 19th September, 1963.

In accordance with the Government's policy of providing both a national and commercial service in each area to which television is extended, the Postmaster-General, on 4th October, 1962, announced that the Government had authorized him to grant licences for commercial television stations in the following areas.

New South Wales—Upper Namoi area, South Western Slopes and Eastern Riverina area, Grafton-Kempsey area; Victoria—Upper Murray area; Queensland—Wide Bay area.

On 18th September, 1963, the Postmaster-General announced the approval of the grant of the following further commercial television station licences.

New South Wales—Manning River area, Central Western Slopes area, Murrumbidgee Irrigation area, Broken Hill area; Victoria—Mildura area; Queensland—Cairns area, Mackay area, Southern Downs area; South Australia—South East area; Western Australia—Bunbury area.

The grant of licences for the Spencer Gulf North area and the Bega-Cooma area have been deferred, as the only applicant for a licence in each area did not desire to proceed with the application at present. The only application for a licence for the Murray Valley area was made on the basis that the applicant would accept licences for both the Murray Valley area and the Mildura area, but not for one area only. As the applicant was unsuccessful in obtaining the licence for the Mildura area, the grant of a licence for the Murray Valley area was deferred. No applications were received for the Southern Agricultural area and the Central Agricultural area of Western Australia.

When the stations commence operation, it is estimated that 91 per cent. of the Australian people will be able to receive a television service.

#### § 4. Licences, Revenue from Fees, etc.

1. **Broadcast Listeners' and Television Viewers' Licences.**—(i) *General.* Broadcast listeners' and television viewers' licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942-1963*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence authorizes the operation of any broadcast receiver, and a television viewer's licence any television receiver, which is—(a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and/or ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or a member of his family, and is ordinarily kept at that address while not in use.

The fee for a broadcast listener's licence or a renewal thereof is:—Zone 1, £2 15s.; Zone 2, £1 8s. Zone 1 is the area within approximately 250 miles of specified broadcasting stations and Zone 2 is the remainder of the Commonwealth. The fee for a licence granted to certain types of pensioners is 10s. in Zone 1 and 7s. in Zone 2.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school. Inmates of a hospital or charitable institution are covered by the licence held by the institution.

The fee for a television licence is £5 except in the case of certain classes of pensioners who pay a fee of £1 5s. Licences are granted free to blind persons and to schools.

Each broadcast or television receiver let out on hire (except under a hire purchase agreement) must be covered by a hirer's licence held by the person or firm from whom the receiver is hired. Rented receivers are not authorized by an ordinary listener's or viewer's licence. A hirer's licence may be granted in respect of one or a number of broadcast receivers or in respect of one or a number of television receivers for any period not exceeding twelve months.

The keeper of a lodging house (which includes a hotel, motel, boarding house or any other premises where lodging or sleeping accommodation is provided for reward) must take out a licence for each broadcast or television receiver (other than a receiver provided by a lodger or tenant for his own use) installed in any room or part of the lodging house occupied or available for occupation by lodgers or tenants.

(ii) *Broadcast Listeners' Licences.* (a) *Number in Force.* The following table shows the number of broadcast listeners' licences in force at five-year intervals from 1925 to 1960 and for 1963.

## BROADCAST LISTENERS' LICENCES IN FORCE

At 30th June—	N.S.W.(a)	Vic.	Qld	S.A.(b)	W.A.	Tas.	Aust.
1925 .. ..	34,857	20,290	1,267	3,331	3,562	567	63,874
1930 .. ..	111,253	140,072	23,335	25,729	5,755	6,048	312,192
1935 .. ..	279,166	237,247	67,546	76,515	41,257	20,121	721,852
1940 .. ..	458,256	348,264	151,152	124,928	87,790	42,191	1,212,581
1945(c) .. ..	548,074	394,315	180,089	146,611	98,210	47,930	1,415,229
1950(c) .. ..	683,271	505,078	260,033	195,261	133,199	64,369	1,841,211
1955 .. ..	746,050	549,690	293,542	223,593	150,199	71,602	2,034,676
1960 .. ..	832,659	606,587	344,198	249,148	171,693	78,900	2,283,185
1963 .. ..	802,046	607,036	334,566	256,741	165,637	73,760	2,239,786

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Excludes licences for receivers in excess of one. These licences were introduced in July, 1942, and were abolished on 31st December, 1951.

Of the 2,239,786 broadcast listeners' licences in force at 30th June, 1963, 1,312,174 or 58.6 per cent. were held by persons living in metropolitan areas and 927,612 or 41.4 per cent. by persons in country areas. Short-term hirers' licences (included above) at 30th June, 1963, were:—New South Wales, 504; Victoria, 100; Queensland, 150; South Australia, 581; and Western Australia, 13.

(b) *Revenue Received from Fees.* The following table shows the revenue received from broadcast listeners' licence fees for the years 1958–59 to 1962–63.

## REVENUE RECEIVED FROM BROADCAST LISTENERS' LICENCE FEES

(£'000)

1963 .. ..	637,766	530,256	178,391	167,502	95,907	45,503	1,655,325

(a) These licences were for television sets in the north coast area of Tasmania which were able to receive programmes from Victoria.

Of 1,655,325 television viewers' licences in force at 30th June, 1963, 71,309 were held by short-term hirers, and therefore could not be separated into metropolitan licences or country licences. Persons living in the metropolitan area held 1,161,693 or 73 per cent. of the remainder. Short-term hirers' licences (included above) at 30th June, 1963, were:—New South Wales, 18,343; Victoria, 13,029; Queensland, 13,064; South Australia, 16,956; Western Australia, 6,960; and Tasmania, 2,957.

(b) *Revenue Received from Fees.* The following table shows the revenue received from television viewers' licence fees during the years 1958-59 to 1962-63.

## CHAPTER XVI

### WELFARE SERVICES

NOTE.—The Commonwealth Welfare Services outlined in this chapter are those administered by the Commonwealth Department of Social Services. Particulars of benefits provided under the National Health Service appear in Chapter XVIII. Public Health.

Particulars of Commonwealth capital expenditure on mental hospitals and the Anti-Tuberculosis campaign are given in Chapter XVIII. Public Health. For grants made to private organizations for the construction of homes for elderly people *see* page 640.

Further information on subjects dealt with in this chapter may be found in the annual bulletins *Commonwealth Finance and State, Territories and Local Government Authorities Finance and Government Securities*. Current and summarized information is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

#### § 1. Expenditure on Welfare Services

NOTE.—Information concerning the cost of administering each Commonwealth benefit separately is not compiled. Particulars of the cost of administering the Department of Health and the Department of Social Services are given in Chapter XXII. Public Finance—Commonwealth Consolidated Revenue Fund Expenditure

##### 1. Commonwealth Expenditure on Welfare Services—The National Welfare Fund.—

(i) *General*. The National Welfare Fund was established by the *National Welfare Fund Act* 1943 to finance a scheme of national welfare and has operated from 1st July, 1943. At its commencement, it was used to finance funeral benefits and maternity allowances. Other social and health benefits were made a charge on the fund from time to time. At present, expenditure on all benefits except repatriation and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

For particulars of the income of the fund, *see* Chapter XXII. Public Finance—Commonwealth Consolidated Revenue Fund Expenditure.

(ii) *Expenditure from the National Welfare Fund 1962–63*. The following table sets out expenditure from the fund during 1962–63.

(a) Payments for some Health Services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes special benefits to migrants in reception and training centres. (c) Includes payments to the Royal Flying Doctor Service and Bush Nursing Centres. (d) Paid to State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (e) This item covers the cost of the Commonwealth Health Laboratory Services, subsidies to home nursing services, the cost of radio-active isotopes provided under the National Health Act, and running expenses of the Blood Fractionation Plant. (f) Includes running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories, £305,000, and subsidies to home nursing services, £144,000.

(iii) *Expenditure from the National Welfare Fund, 1958-59 to 1962-63.* Expenditure from the fund during each of the years 1958-59 to 1962-63, and the amount per head of population for each service during 1962-63, are shown in the following table.

2. **State Expenditure on Welfare Services.**—The following table shows net expenditure from certain funds of the State Governments on welfare services. Because of differences in organization and accounting methods, the information is not on exactly the same basis for all States and may not represent total expenditure. Receipts for services rendered have been deducted from gross expenditure. Loan fund expenditure is excluded.

## § 2. Commonwealth Social Services

1. **Introduction.**—(i) *General.* Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:—

“(xxiii) Invalid and old-age pensions:

(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:”.

The latter paragraph was inserted in the constitution after being accepted by the electors at a referendum on 28th September, 1946. The enabling Act was assented to on 19th December, 1946.

Before 1947, each social service benefit was paid under a separate Act. On 1st July, 1947, with the passage of the *Social Services Consolidation Act 1947*, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions and changed the title “old-age pension” to “age pension”. The word “Consolidation” was dropped from the short title of the Act in 1954. The Act is at present styled the *Social Services Act 1947-1963*.

(ii) *Social Service Benefits Provided.* The social service benefits provided by the Commonwealth Government, and the date on which each came into operation, are:—

Age pension .. .. .	..	..	..	..	1st July, 1909
Child endowment .. .. .	..	..	..	..	1st July, 1941
Commonwealth Rehabilitation Service ..	..	..	..	..	10th December, 1948
Funeral benefit .. .. .	..	..	..	..	1st July, 1943
Invalid pension .. .. .	..	..	..	..	15th December, 1910
Maternity allowance .. .. .	..	..	..	..	10th October, 1912
Sickness benefit .. .. .	..	..	..	..	1st July, 1945
Special benefit .. .. .	..	..	..	..	1st July, 1945
Supplementary assistance (age, invalid and widow's pensions) .. .. .	..	..	..	..	15th October, 1958
Unemployment benefit .. .. .	..	..	..	..	1st July, 1945
Widow's pension .. .. .	..	..	..	..	30th June, 1942
Wives' and children's allowances for pensioners who are invalids .. .. .	..	..	..	..	8th July, 1943

**2. Age and Invalid Pensions.**—(i) *General.* Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who are British subjects and who have lived in Australia continuously for at least 10 years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years but not 10 years continuous residence and has lived in Australia for periods which exceed a total of 10 years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of 10 years. Absence in a Territory of the Commonwealth, any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances, are counted as residence. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, 16 years of age and over, who have lived in Australia for a continuous period of five years (including certain absences) at any time, and who are permanently incapacitated for work to the extent of at least 85 per cent., or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a period of 10 years' continuous residence is necessary. But if a person has completed five years but not 10 years continuous residence and has lived in Australia for periods which exceed a total of 10 years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of 10 years. Residence in New Zealand or the United Kingdom may be treated as residence in Australia. Certain absences do not affect eligibility.

Aboriginals, other than those who are nomadic or primitive, are eligible for age and invalid pensions on the same conditions as other members of the community.

A pension is not payable to an alien.

(ii) *Current Rates of Pension.* From 14th November, 1963, a rate of pension, known as the standard rate pension, has been payable to a single, widowed, or divorced pensioner, or a married pensioner whose spouse is not receiving an age or invalid pension, a wife's allowance, an unemployment, sickness or special benefit, a tuberculosis allowance or a service pension. The maximum standard rate of pension is £299 per annum (£5 15s. a week). The maximum married rate is £546 per annum (£10 10s. a week) for a married couple, both pensioners, i.e., £273 per annum (£5 5s. a week) each. The married rate applies to a pensioner whose spouse is also receiving an age or invalid pension or whose spouse receives a wife's allowance, an unemployment, sickness or special benefit, a tuberculosis allowance or a service pension.

A wife's allowance may be granted, subject to the means test, to the non-pensioner wife of an invalid pensioner or a permanently incapacitated or blind age pensioner if she is not receiving an age or invalid pension, or a service pension under the *Repatriation Act 1920-1962* (see Chapter XXVIII. Repatriation). The maximum annual rate of wife's allowance has been £156 per annum (£3 a week) since 3rd October, 1963. A child's allowance of £39 per annum (15s. a week), free of the means test, is payable for the first child under 16 years of a pensioner who is an invalid, and the pension may also be increased by £39 per annum (15s. a week), subject to the means test, for each other child under 16 years.

Since 3rd October, 1963, eligibility for a child's allowance and the additional pension for children has been extended to include a child over 16 years until the end of the calendar year in which he reaches 18 years, provided he is wholly or substantially dependent on the pensioner and is receiving full-time education at a school, college or university. Supplementary assistance of 10s. a week is available to pensioners receiving the full standard rate pension if they pay rent and are considered to depend entirely on the pension. At 30th June, 1963, 533,833 age pensioners (88 per cent. of all age pensioners) and 95,364 invalid pensioners (92 per cent. of all invalid pensioners) were receiving the maximum pension.

If the pensioner is an inmate of a benevolent home, the maximum payable to him is £2 a week if he is eligible for the standard rate pension, or £1 17s. a week otherwise. The rest is paid to the home for his maintenance. The balance is not paid to the home if the pensioner is in an infirmary ward, as payments under the Commonwealth Hospital Benefits Scheme are made in that case.

(iii) *Means Test.* Age and invalid pensions (other than invalid pensions paid to blind persons) and allowances paid to wives of invalid pensioners (but not a child's allowance of 15s. a week) are subject to a means test which applies to income and property. From

March, 1961, the means tests previously applied separately on income and property were merged into one composite means test. The rate of pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to £1 for each complete £10 of his net property above £200. A person's *means as assessed* may consist entirely of income, entirely of the property component or of various combinations of income and property component. The pension payable is calculated by deducting from the applicable maximum annual rate of pension the amount by which *means as assessed* exceed £182. Where the standard rate applies, no pension is payable where the value of property is £5,010 or more. Where the married rate applies, no pension is payable where the value of property is £4,750 or more. The wife's allowance is affected by income and property on the same basis as the pension, i.e., it is reduced by the amount of *means as assessed* over £182.

Certain types of income are excepted. The main exceptions are:—income from property; gifts or allowances from children, parents, brothers or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organizations.

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to £750) of life insurance policies, the capital value of annuities or contingent interests and the value of any reversionary interests.

For the purposes of the means test, the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances.

(iv) *Rates of Pension since 1909.* The following statement shows the rates of pension at 1st July, 1909, and the rates as they have been varied since that date, subject in all cases to income and property qualifications.

				Married Rate ..	105 0	273 0	455 0

(a) Excludes amounts payable for wives and children of invalid pensioners and supplementary assistance.

(b) Additional pension of £6 10s. per annum (2s. 6d. a week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. a week were paid additional pension of 2s. 6d. less the amount of income.

(c) Variation according to change in retail price index number.

(d) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942.

NOTE.—Provision for variations according to retail price index numbers was repealed on 6th April, 1944.

(v) *Number and Characteristics of Pensioners, 1962-63.* The number of age pensioners at 30th June, 1963, was 607,350 of whom 187,212 (31 per cent.) were males and 420,138 (69 per cent.) were females. This was an increase of 13,338 for the year.

The number of invalid pensioners at 30th June, 1963, was 104,038 of whom 56,203 (54 per cent.) were males and 47,835 (46 per cent.) were females.

The following table shows the number of pensions in force at 30th June, 1963, in each State and Territory.

#### AGE AND INVALID PENSIONS, 30th JUNE, 1963

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Age pensions in force—</b>									
Males .. .. .	73,962	45,754	32,079	16,799	12,190	5,572	600	256	187,212

	Number	Rate (a)									
			No.	No.	£'000	s.	d.	s.	d.	s.	d.
1959 ..	513,789	490	83,853	597,642	129,571	83	4	86	8	83	10
1960 ..	(c) 538,022	501	80,816	618,838	147,005	90	3	94	8	90	10
1961 ..	562,790	510	88,642	651,432	157,926	97	10	100	6	98	2
1962 ..	594,012	529	97,246	691,258	180,245	101	11	105	3	102	5
1963 ..	607,350	534	104,038	711,388	187,754	101	7	105	3	102	2

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Year ended 30th June. Includes allowances and supplementary assistance. (c) On 30th June, 1960, a number of invalid pensioners were transferred to their correct designation of age pensioners as follows:—Victoria, 4,843; Queensland, 4,908; and Western Australia, 486.

The sum paid in age and invalid pensions in 1962–63, including the amount paid to homes for the maintenance of pensioners and allowances to wives of invalid pensioners, represented an expenditure of £17.4 per head of population, compared with £17.0 in 1961–62.

3. **Child Endowment.**—(i) *General.* A person who is resident in Australia and has the custody, care and control of one or more children under the age of 16 years or of a student child over 16 but under 21 years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each such child. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia.

Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas. Endowment is payable to Aborigines unless they are nomadic or primitive.

(ii) *Rates of Endowment.* From 1st July, 1941, the rate of endowment was 5s. a week for each child under 16 in excess of one in a family, and for each child under 16 in an approved institution. The rate was increased to 7s. 6d. a week in June, 1945, and to 10s. a week in November, 1948. From June, 1950, 5s. a week has been paid for the first child under 16 in a family, 10s. a week for each other child under 16 in a family, and 10s. a week for each child under 16 in an institution.

Since January, 1964, the rate has been increased to 15s. a week for the third and subsequent children under 16 years in families, and for full-time students between 16 and 21 years. Full-time student children are those receiving full-time education at a school, college or university and who are not in employment or engaged in work on their own account.

(iii) *Number of Claims and Endowed Children, 30th June, 1963.* The number of families receiving child endowment at 30th June, 1963, was 1,535,388, an increase of 12,314 or 0.8 per cent. during the year. The following table shows, for each State and Territory, the number of claims for child endowment in force and the number of endowed children at 30th June, 1963.

**CHILD ENDOWMENT: CLAIMS AND ENDOWED CHILDREN, 30th JUNE, 1963**

The following table shows, as at 30th June, 1963, the number of claims in force and the number of endowed children in family groups, classified according to the number of endowed children in the family group. The families included in the table are not necessarily made up entirely of the children of one marriage, but may include step-children, foster children, adopted children, and any other children under the custody, care and control of the claimant.

**CHILD ENDOWMENT: ENDOWED CHILDREN IN FAMILY GROUPS, 30th JUNE, 1963**

	Number of endowed children in family group	Claims in force	Endowed children	Number of endowed children in family group	Claims in force	Endowed children

<b>Total .. ..</b>	<b>69,276,272</b>	<b>661,804</b>	<b>69,938,076</b>	<b>67,710,463</b>

(v) *Child Endowment, 1958-59 to 1962-63.* The following table shows, for Australia, the number of claims, the number of endowed children and the annual liability at 30th June for each of the years from 1959 to 1963 and the actual expenditure for the years 1958-59 to 1962-63.

## CHILD ENDOWMENT: SUMMARY, AUSTRALIA

At 30th June—	Family group claims in force	Institutions	Endowed children	Annual liability for endowment (a)	Total payments (a)(b)
				£	£
1959 .. ..	1,451,516	421	3,171,823	63,597,690	(c) 67,539,615
1960 .. ..	1,476,835	443	3,252,413	65,363,883	62,531,977
1961 .. ..	1,501,180	465	3,340,302	67,332,512	(d) 74,302,614
1962 .. ..	1,523,074	479	3,420,134	69,123,522	66,377,628
1963 .. ..	1,535,388	497	3,457,620	69,938,076	67,710,463

(a) A number of endowments are paid every twelve weeks. During two years out of every three, there are four such payments, but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments.  
 (b) Year ended 30th June. (c) Expenditure for this year includes five twelve-weekly payments.  
 (d) Endowment payable on 4th July, 1961, to the credit of bank accounts and in cash at post offices was brought to account in 1960-61.

4. Commonwealth Rehabilitation Service.—(i) *General.* The Commonwealth Rehabilitation Service has been set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances and persons aged 14 or 15 who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of 16 years. During treatment, payment of pension or benefit continues. When vocational training begins, the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of £1 10s. a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, this is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner, the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing up to £40. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves, or they may be sponsored by government or private organizations. Rehabilitation allowances, training allowances, living-away-from-home allowances and other allowances are not payable in these cases. Books, tools, etc., are available on a repayment basis.

(ii) *Numbers dealt with by the Service, 1962-63.* The numbers of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1962-63 are shown in the following table.

## COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1962-63

Type	Examined	Accepted	Completed training	Placed in employment	
				After training	Without training
Invalid pensioners .. ..	9,436	259	108	80	101
Widow pensioners .. ..	8	..	..	..	..
Unemployment and sickness beneficiaries .. ..	10,052	1,095	197	203	611
Special beneficiaries .. ..	5	1	..	..	..
Recipients of tuberculosis allowance	145	53	23	26	27
Persons aged 14-15 years	187	75	26	3	41
Persons provided with rehabilitation on payment of the cost ..	76	70	2	22	62
<b>Total .. ..</b>	<b>19,909</b>	<b>1,553</b>	<b>356</b>	<b>334</b>	<b>842</b>

There were 1,553 persons accepted during the year, 235 more than during the previous year. Of those, 72 per cent. were under 40 years of age. The average number receiving rehabilitation training during the year was 1,118.

5. **Funeral Benefits.**—(i) *General.* A funeral benefit of up to £10 is payable to the person who has paid, or is liable to pay the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund.

(ii) *Number of Benefits, 1958-59 to 1962-63.* The following table shows the number of funeral benefits which were granted in each State and Territory in the years 1958-59 to 1962-63.

## FUNERAL BENEFITS GRANTED: AUSTRALIA

<b>Australia .. ..</b>	<b>34,961</b>	<b>35,465</b>	<b>36,749</b>	<b>37,88</b>	<b>40,624</b>

6. **Maternity Allowances.**—(i) *General.* Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth hospital benefits scheme. They are not subject to a means test.

A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia, is temporarily abroad, or is on board a ship proceeding from a port in Australia or an Australian Territory to another port in Australia or another Australian Territory, or on board a ship proceeding to Australia, provided she receives no maternity benefit from the country from which she came. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia permanently. Aboriginals, other than those who are nomadic or primitive, are eligible for maternity allowances on the same conditions as other members of the community.

(ii) *Rates of Allowance.* The allowance is £15 if the mother has no other children, £16 if she has one or two children under 16, and £17 10s. if she has three or more other children under 16. The amount is increased by £5 for each additional child born at a birth. An advance payment of £10 may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least 5½ months.

(iii) *Claims Paid, 1962-63.* The following table shows the number of claims paid in each State at the several rates of maternity allowances during the year 1962-63.

**MATERNITY ALLOWANCES: CLAIMS PAID AT EACH RATE, 1962-63**

1962-63.. ..	82,700	66,021	35,659	21,357	17,152	8,560	1,516	1,789	310	235,064

7. Unemployment, Sickness and Special Benefits.—(i) *General.* Unemployment and sickness benefits are paid to men over 16 and under 65 years of age, and women over 16 and under 60 years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act 1920-1962*, or a tuberculosis allowance, is ineligible to receive a benefit.

To qualify for an unemployment benefit, a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary.

To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases, a married woman may qualify for an unemployment benefit in her own right.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, if because of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Recipients of special benefits include, among others, persons caring for invalid parents, deserted wives, and naturalized persons ineligible for age, invalid or widows' pensions.

Special benefits are also paid to migrants who are in reception centres and are awaiting their first placement in employment in Australia. During this time, they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

Aboriginals, other than those who are nomadic or primitive, are eligible for these benefits on the same conditions as other members of the community.

(ii) *Rates of Benefit.* The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 1st March, 1962, are as follows.

Age and marital status of claimant	Maximum weekly rate	Permissible weekly income
	£ s. d.	£ s. d.
Unmarried person under 18 years of age .. ..	1 15 0	1 0 0
Unmarried person 18 to 20 years of age .. ..	2 7 6	1 0 0
All others .. ..	4 2 6	2 0 0

An additional benefit of £3 a week may be paid for a dependent spouse and 15s. a week for each dependent child under 16 years of age if resident in Australia. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under 16 years of age in his care. It may be granted only if no such benefit is payable for his wife and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the table above. For unemployment benefit purposes, the income of the spouse is also taken into account, unless the claimant and his spouse are permanently separated. For sickness benefit purposes, the income from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. "Income" does not include child endowment, or other payments for children, Commonwealth hospital and pharmaceutical benefits, a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable.

(iii) *Benefits, 1962-63.* The following table shows the number admitted to unemployment, sickness, and special benefit during 1962-63, the number of persons on benefit at 30th June, 1963, and the amount paid for each benefit during 1962-63.

(a) Includes migrants in reception and training centres.

(b) Includes payments to migrants in reception and training centres.

**8. Widows' Pensions.—(i) Rates and Conditions.** Widows' pensions are payable according to the following classes. The rates shown have been in operation since 8th October, 1963.

*Class "A".* A widow who has the custody, care and control of one or more children under the age of 16 years—£403 per annum (£7 15s. a week). This includes the standard rate pension at £299 per annum (£5 15s. a week) and a mother's allowance of £104 per annum (£2 a week). In addition, a flat rate allowance of £39 per annum (15s. a week) for one child and, subject to the means test, extra pension of £39 per annum (15s. a week) for each other child under sixteen years are payable. Payment may be made for a child over sixteen years until the end of the calendar year in which he reaches eighteen years, if he is wholly or substantially dependent on the widow and is receiving full-time education at a school, college, or university.

*Class "B".* A widow who has no children under 16 years of age, or eligible full-time student children, in her custody, care and control, and who is not less than 50 years of age or who, after having attained the age of 45 years, ceased to receive a Class "A" widows' pension because she no longer had the custody, care and control of a child—£266 10s. per annum (£5 2s. 6d. a week).

*Class "C".* A widow who is under 50 years of age and has no children under the age of 16 years, or eligible full-time student children, in her custody, care and control, but is in necessitous circumstances within the 26 weeks after the death of her husband—£5 2s. 6d. a week for not more than 26 weeks after the death of her husband. If the widow is pregnant, this period may be extended until the child's birth. She may then become eligible for a Class "A" widow's pension.

Widow pensioners may receive supplementary assistance of £26 per annum (10s. a week) if they pay rent and are considered to be dependent entirely on their pensions.

For classes "A" and "B", the term "widow" includes a wife who has been deserted by her husband without just cause for a period of at least six months, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for "A", "B" or "C" Class pensions.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences are ignored.

A widow's pension is not payable to an alien, a woman receiving an age or invalid pension, a tuberculosis allowance, a war widow's pension, or a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband. Aborigines, other than those who are nomadic or primitive, are eligible for widows' pensions on the same conditions as other members of the community.

(ii) *Means Test.* Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to £1 for every complete £10 by which the value of her property is in excess of a stipulated sum. In the case of a Class "B" widow, £200 of property is exempt. A Class "A" widow has a basic exemption of £1,000 when the value of her property exceeds £2,250, but no property component is calculated where she has property of no more than £2,250 in value. A Class "A" pension is not payable where a widow has property valued at £6,850 or more; no Class "B" pension is payable where property is £4,690 or more. There is no specific means test for the Class "C" pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions.

(iii) *Pensions 1962-63.* The following table shows details of widows' pensions paid in each State and Territory in the year 1962-63.

## WIDOWS' PENSIONS AT 30th JUNE, 1963

(a) Included in figures for State in which pensioner is permanently domiciled.

9. *Reciprocal Agreements with Other Countries.*—(i) *New Zealand.* An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country may be treated as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

(ii) *Britain.* A new reciprocal agreement on social services between Britain and Australia came into operation on 1st April, 1958, replacing the original agreement which operated from 7th January, 1954.

Under this agreement, residence in one country may be treated as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to Britain for permanent residence are treated in Britain as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

**10. Commonwealth Assistance to Aged Persons Homes and Sheltered Work Shops.—**  
(i) *The Aged Persons Homes Act.* *The Aged Persons Homes Act 1954–1957* is designed to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under this Act an organization must be—

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of £2 for each £1 raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the money expended and the money presently available for expenditure by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home. Expenditure by the Commonwealth Government was £837,895 in 1957–58, £1,767,470 in 1958–59, £1,871,748 in 1959–60, £2,153,551 in 1960–61, £3,472,514 in 1961–62, and £3,186,201 in 1962–63.

(ii) *Disabled Persons Accommodation Act.* *The Disabled Persons Accommodation Act 1963* which came into operation on 25th November, 1963, provides that grants may be made to eligible organizations towards the capital cost of approved buildings which will provide residential accommodation for disabled persons engaged, or likely to be engaged, in paid employment in a sheltered workshop.

The Act covers both the erection of buildings to be used for accommodation and the purchase of existing premises for conversion into accommodation. In both cases the cost of the necessary land may be included.

To be eligible for assistance under this Act an organization must be—

- (a) carried on otherwise than for purposes of profit or gain to its individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

An organization conducted or controlled by the Commonwealth or a State Government, by a local Government authority, or by persons appointed by these authorities, is not eligible for assistance under this Act.

For the purposes of the Act, a disabled person is a person who is qualified by age (sixteen years or over) and on medical grounds for an invalid pension under the Social Services Act. A sheltered workshop is a factory or workshop, or part thereof, in which all or a substantial number of employees are disabled persons who receive payment for their work.

**11. Protection of Aborigines.—**For the protection of the Aboriginal race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually

carried on at mission stations, but many of the natives are nomadic and receive food and clothing when they call, while others only rarely come near the stations. The Aboriginal race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1962-63 was as follows (figures in brackets are for the year 1961-62):—New South Wales, £344,545 (£280,838); Victoria, £60,000 (£50,000); Queensland, £805,136 (£803,529); South Australia, £512,552 (£524,038); Western Australia, £1,658,862 (£1,300,443); Northern Territory, £1,297,387 (£1,011,983); Australian Capital Territory, £5,340 (£4,372); Australia, £4,683,822 (£3,975,203).

### § 3. Other Welfare

1. **Children Under Government Authority.**—(i) *General.* The methods of caring for orphans and neglected children differ extensively, some being placed in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to general education, some craft training. In all cases, employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

(ii) *Cost of Maintenance.* The following table shows the expenditure by State Departments during 1961-62 in connexion with children under their control or supervision. The figures refer, in addition to neglected children, to uncontrollable and convicted children who are wards of a government authority, as well as children whose parents obtain assistance from the government without giving up the legal right of custody.

#### CHILDREN UNDER GOVERNMENT AUTHORITY: COST OF MAINTENANCE, 1961-62.

(£)

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Gross cost of children's relief .. ..	2,701,015	1,705,713	675,287	553,769	271,508	104,625	6,011,917
Receipts from parents' contributions, etc. . .	136,801	53,220	35,319	63,086	33,891	9,389	331,706
<i>Net Cost to State</i>	<i>2,564,214</i>	<i>1,652,493</i>	<i>639,968</i>	<i>490,683</i>	<i>237,617</i>	<i>95,236</i>	<i>5,680,211</i>

The expenditure on children's relief in the foregoing table shows considerable variation between the States owing to different methods of treating assistance to mothers with dependent children. In South Australia and Tasmania, large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate particulars for allowances made in respect of the dependent children only. The New South Wales figures include some expenditure for relief to parents as well as children, and some other minor social services of a general nature not necessarily connected with children. Western Australian figures include an amount for unemployment relief, but exclude costs such as administration. Victoria includes an amount for child endowment.

2. **Lifesaving.**—There are two life saving organizations in Australia, the Royal Life Saving Society—Australia, and the Surf Life Saving Association of Australia.

The objects of these organizations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organizations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and lifesaving.

The Royal Life Saving Society operates at lakes, rivers, bay and harbour beaches, and gives instruction to school pupils and members of other bodies throughout Australia except on surf beaches. The Surf Life Saving Association patrols surf beaches.

Numerous certificates and medallions of proficiency in various grades are awarded.

**3. Royal Humane Society.**—The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age.

**4. The Order of St. John.**—The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories. In October, 1963, at Canberra, the Priory for the first time held its meetings in Australia under the chairmanship of the Governor-General and Prior.

Members of the St. John Ambulance Association teach first aid, home nursing, hygiene and child welfare.

Members of the St. John Ambulance Brigade provide first aid at public functions.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of the order.

The Order of St. John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Lifesaving Medal is awarded by the Order as warranted.

**5. Other Charitable Institutions.**—Owing to the variety of names and functions of other charitable institutions, it has been found impracticable to give detailed particulars. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bushfire, flood and mining accident relief funds.

## CHAPTER XVII

### PUBLIC JUSTICE

NOTE.—In interpreting statistics of public justice, it should be realized that a number of factors affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) Differences in the methods of compiling the figures (e.g. in respect of persons convicted for more than one offence);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

#### § 1. The Australian Legal System

1. **Development of the System.**—The two major factors in the development of the Australian legal system have been its British origin and the Federal Constitution of 1900. When the various parts of Australia were first settled by British colonists, the common law and statutes of England were brought with them by the settlers. When local law-making bodies were established, the law so brought in was gradually modified and augmented by local legislation, but the Imperial Parliament in London also continued to legislate (to a lesser and lesser extent) in respect of Australia. The Federal Constitution of 1900, which is itself an Imperial Act, limited the legislative power of State Parliaments in some respects and created a federal legislature. Since the *Statute of Westminster Adoption Act 1942*, the Imperial Parliament can legislate for Australia only at Australia's request. The sources of Australian law of today are, therefore, found in Commonwealth and State legislation, in some Imperial legislation and in the common law. No significant attempt has been made at codification of the law, but three of the States (Queensland, Western Australia, and Tasmania) have Criminal Codes. However, separate consolidations of the statutes of the Commonwealth and of all States except Western Australia (which has adopted a system of reprinting of individual statutes at intervals) have been brought out from time to time.

There are few constitutional or other legislative guarantees of individual rights and liberties in Australia. These rights are nevertheless protected, because a basic feature of the Australian system is the "rule of law": no act, official or unofficial, however *bona fide* and apparently reasonable, which infringes the liberty or rights of an individual is justifiable unless it is authorized by law, and for any such unlawful act, by whatever authority commanded, the official or other person is personally liable in an action in the ordinary courts. In the case of subordinate legislation, and even in the case of Federal or State Acts, the validity of the law itself may be challenged in the courts. The remedy for the protection of the personal liberty of the individual is the writ of habeas corpus, which requires the person named therein to be produced in the court.

Australian law adheres to the principle that judicial control must in general be exercised by ordinary courts. There is no integrated system of administrative tribunals, but there is a great variety of such tribunals of various descriptions. The ordinary courts exercise supervision over administrative tribunals either by way of statutory appeal or by the use of prerogative writs of *mandamus*, *prohibition*, or *certiorari*, by which the administrative tribunals can be enjoined to perform a duty or to abstain from excess of jurisdiction, or can have their decisions set aside.

Independence of the judiciary is an essential part of the Australian legal system. Security of tenure of superior court judges is guaranteed, mostly by the Constitutions of the Commonwealth and the States, and they can be removed from office only by resolution of both Houses of Parliament of the Commonwealth or the States, as the case may be, for proven misbehaviour or incapacity. Their independence is further secured by relatively high salaries which, in the case of High Court judges, cannot be reduced during their tenure of office, and liberal (mostly non-contributory) pensions for the judges or their widows.

Civil judgments given in the courts of any part of Australia can be enforced in any other part of Australia under the *Service and Execution of Process Act* 1901-1963 of the Commonwealth. Since 1st January, 1964, this applies also to fines imposed by courts of summary jurisdiction.

**2. State and Territory Courts.**—(i) *Civil jurisdiction.* Lower civil courts (which term includes, for the purposes of this chapter, Magistrates' Courts, Courts of Petty Sessions, Local Courts, Small Debts Courts, Courts of Request and Courts of General Sessions) are usually constituted or presided over by a stipendiary or special magistrate or a commissioner. In some limited instances, justices of the peace may exercise the jurisdiction of the court. Local Courts are sometimes constituted by a Judge. The powers of the magistrates in the various States and Territories are set out in § 2, pages 645-7. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case, the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction.

In the higher courts (which term includes, for the purposes of this chapter, District Courts, County Courts, and the Supreme Courts), actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases, the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are referred to on page 645.

(ii) *Criminal jurisdiction.* Criminal courts are of two kinds, namely, courts of summary jurisdiction and higher courts. Courts of summary jurisdiction, usually called Courts of Petty Sessions, may deal summarily with minor offences; higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions (not to be confused with the lower court of civil jurisdiction of that name) and the Supreme Court, hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace; a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case and the judge determines the applicable law and, within the limits of the law, the punishment of the convicted person.

In the case of other than minor offences, a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail.

There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

**3. Federal Courts.**—(i) *General.* The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. Further particulars regarding the judicial power of the Commonwealth will be found in Chapter III. (§§ 71-80) of the Commonwealth Constitution (*see* p. 16 of this Year Book).

Particulars concerning the Federal Court of Bankruptcy will be found in § 8 of this chapter. Information regarding the Commonwealth Industrial Court, which was established under the *Conciliation and Arbitration Act* 1904-1961, will be found in Chapter XIII. Labour, Wages and Prices (pp. 446-8).

(ii) *High Court of Australia.* The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices.

The Constitution itself confers original jurisdiction on the High Court in all matters (i) arising under any treaty, (ii) affecting consuls or other representatives of other countries, (iii) in which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party, (iv) between States, or between residents of different States, or between a State and a resident of another State, (v) in which a writ of *mandamus* or prohibition or an injunction is sought against an officer of the Commonwealth. In addition, Parliament may, under the Constitution, confer additional original jurisdiction on the High Court in certain classes of matters, and has in fact conferred original jurisdiction on the High Court in all matters arising under the Constitution or involving its interpretation and in trials of indictable offences against the laws of the Commonwealth. In matters (i) and (v) and in suits between the Commonwealth and a State or between States, the jurisdiction of the High Court is exclusive of that of the State Courts, and in matters (other than trials of indictable offences) involving any question as to the limits *inter se* of the constitutional powers of the Commonwealth and those of the States, the jurisdiction of the High Court is exclusive of that of the Supreme Courts of the States.

Under the Constitution, the High Court has jurisdiction, with such exceptions and subject to such regulations as the Parliament permits, to hear and determine appeals from all judgments, decrees, orders and sentences of (i) any Justice or Justices exercising the original jurisdiction of the High Court, (ii) any other Federal court or court exercising Federal jurisdiction and (iii) from the Supreme Court or other court of any State from which appeal lay to Privy Council at the establishment of the Commonwealth. In respect of (iii), the Parliament has prescribed that, generally, appeal can be brought only by special leave of the High Court. However, in the case of judgments affecting the status of any person under the laws relating to aliens, marriage, bankruptcy or insolvency, or in respect of any sum or matter at issue, or involving any claim, demand, or question, to or regarding any property or civil right, amounting to or of the value of £1,500, appeal may be brought as of right from final judgments, and by leave of the High Court or the Supreme Court from interlocutory judgments.

By Acts of Parliament and by subordinate legislation, the High Court has also been given appellate jurisdiction in respect of the courts of the Territories under the control of the Commonwealth. Provision is also made in various enactments for appeal to the High Court on points of law from administrative determinations, such as decisions of the Commissioner of Taxation, Taxation Boards of Review, the Commissioner of Patents, or the Registrar of Trade Marks. Such proceedings, although called appeals, are in reality proceedings in the original jurisdiction of the High Court.

Transactions of the High Court are shown in § 6. p. 653).

4. **Appeal to the Privy Council.**—There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-a-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

## § 2. Lower (Magistrates') Courts

1. **Powers of the Magistrates.**—(i) *New South Wales.* There is no general limit to the powers of the magistrates with regard to offences punishable summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated the amount is limited to £150 before a court constituted by a stipendiary magistrate. Where the amount claimed exceeds £50, the Court must transfer the action to the District Court when the defendant gives notice that he objects to the action being heard and determined by a Court of Petty Sessions. Magistrates have power to entertain claims of up to £500 under the *Money Lenders and Infants Loans Act* 1941–1961. The amount

in actions of debt before two or more justices of the peace is limited to £30 and in actions of damages it is limited to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts, one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage, up to £5 or to £30 by consent of parties.

(ii) *Victoria*. The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £100, and to actions arising out of torts or contracts to the extent of £250. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences, sentences of up to two years imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

(iii) *Queensland*. Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the Criminal Code (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice not more than one sentence is generally made cumulative on a previous sentence.

(iv) *South Australia*. The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of £100 fine or two years imprisonment is fixed by the *Justices Act* 1921-1960. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £1,250.

(v) *Western Australia*. The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of Local Courts is restricted in general to £500. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Session Courts. They may be appointed as Commissioners of the Supreme Court. On the goldfields, the magistrate is also the warden.

(vi) *Tasmania*. Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In addition, stealing and analogous crimes may be heard and determined summarily on the election of the person charged, when the amount involved does not exceed £100.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the *Contravention of Statutes Act* 1889 provides that a fine of £50 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts and damages not exceeding £250. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court, that at Currie, King Island, has the maximum jurisdiction, the others being limited to £30.

(vii) *Northern Territory*. Stipendiary and special magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available, the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a

magistrate or a justice of the peace. Certain indictable offences under the Territory law may be tried summarily by a magistrate or two justices of the peace, who may impose a fine of up to £100 or imprisonment for up to two years.

A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than £1,000. A local court constituted by two justices of the peace (every special magistrate is also a justice of the peace) has a civil jurisdiction to hear claims up to £50.

(viii) *Australian Capital Territory.* Stipendiary and special magistrates have general jurisdiction to try offences punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends on the law which creates the offence. In addition to jurisdiction (possessed by stipendiary and special magistrates throughout Australia) to try summarily with the consent of the defendant offences indictable under the *Crimes Act 1914-1960* (in which case the magistrate cannot impose a fine exceeding £100 or imprisonment exceeding one year), under Territory law, certain indictable offences may also be tried summarily by a magistrate, who may impose a fine not exceeding £50 or imprisonment for up to one year. Magistrates also hear proceedings for committal on indictable offences. In civil proceedings, magistrates try actions for amounts up to £200. Justices of the peace have no judicial functions.

2. **First Offenders.**—In all States and Territories, statutes are in force for dealing with first offenders. For particulars of the relevant legislation, see Year Book, No. 46, page 632. Provisions are incorporated in the various Acts whereby courts may extend leniency to the offender by means such as: (i) dismissal of the charge without proceeding to a conviction; (ii) freeing the offender or suspending sentence with the requirement of a recognizance for good behaviour for a specified period; and (iii) by placing the offender under the supervision of a probation officer for a specified period. The provisions existing in the individual States and Territories are set out in Year Book No. 46.

3. **Children's Courts.**—Special provisions exist in all States and Territories for dealing with juvenile offenders in special courts. Particulars of the relevant legislation and the constitution and powers of these courts are given in Year Book No. 49, pages 665-6.

4. **Proceedings at Lower (Magistrates') Courts.**—Particulars of the differences in the jurisdiction of Lower Courts in the various States are given in § 2. 1 Powers of Magistrates, pages 645-7. The proceedings of these courts are summarized in this paragraph. In interpreting the statistics in the tables, the factors affecting comparability listed at the beginning of this chapter should be borne in mind.

(i) *Criminal.* (a) *Total Cases.* The total numbers of cases dealt with at magistrates' courts in each State and Territory for the years 1958 to 1962 are shown in the following table.

CASES AT MAGISTRATES' COURTS: OFFENCES CHARGED

State or Territory	1958	1959	1960	1961	1962
New South Wales(a) ..	323,097	331,195	332,728	345,730	322,848
Victoria ..	270,017	287,622	(a)268,104	(a)259,268	(a)270,275
Queensland(a)(b) ..	62,468	65,773	73,804	79,448	79,772
South Australia(a)(b) ..	36,305	38,003	47,427	59,534	61,276
Western Australia(a) ..	49,945	50,696	50,107	48,220	52,764
Tasmania(a) ..	20,009	21,355	24,047	27,227	30,415
Northern Territory ..	3,103	3,617	2,958	3,091	4,350
Australian Capital Territory ..	2,197	2,539	3,168	3,305	4,795
<b>Australia ..</b>	<b>767,141</b>	<b>800,800</b>	<b>802,343</b>	<b>825,823</b>	<b>826,495</b>

(a) Excludes minor traffic offences settled without court appearance. (b) Year ended 30th June.

Differences in the figures in the table above between States, and within a State over a period of time, are influenced by the large number of traffic offences and the arrangements which have been introduced at various times for dealing with them. Provision exists in the States for settlement of parking and minor traffic offences by payment of fines without court appearance. The following table shows the number of such offences for the years 1958 to 1962.

#### MINOR TRAFFIC OFFENCES SETTLED WITHOUT COURT APPEARANCES

State	1958	1959	1960	1961	1962
New South Wales ..	315,058	321,157	351,685	370,688	443,689

Australian Capital Territory ..	1,910	1,787	2,280	2,613	4,089
<b>Australia ..</b>	<b>707,696</b>	<b>734,805</b>	<b>734,884</b>	<b>748,095</b>	<b>747,693</b>

(a) Excludes minor traffic offences settled without court appearance.

(b) Year ended 30th June.

(c) A person convicted on several counts at the one hearing is included only once.

(c) *Cases in which Convictions were made for Drunkenness.* The numbers of cases in which convictions were recorded during each of the years 1958 to 1962 are given in the following table.

**DRUNKENNESS: CASES IN WHICH CONVICTIONS WERE MADE**

State or Territory	1958	1959	1960	1961	1962
New South Wales .. ..	68,354	69,201	68,591	67,809	68,546
Victoria .. ..	29,434	29,334	29,116	27,212	28,529
Queensland(a) .. ..	28,196	26,918	28,538	26,136	26,293
South Australia(a) .. ..	4,299	4,439	5,273	5,438	6,178
Western Australia .. ..	4,821	5,587	5,144	5,333	5,320
Tasmania .. ..	718	660	512	534	575
Northern Territory .. ..	926	1,010	822	1,037	1,388
Australian Capital Territory .. ..	380	255	298	307	252
<b>Australia .. ..</b>	<b>137,128</b>	<b>137,404</b>	<b>138,294</b>	<b>133,806</b>	<b>137,081</b>

(a) Year ended 30th June.

The term "drunkenness" includes "drunkenness and disorderliness", and "habitual drunkenness".

The rate of convictions for drunkenness since 1901 is shown below.

**RATE OF CONVICTIONS FOR DRUNKENNESS: AUSTRALIA**

Year .. .. .	1901	1911	1921	1931	1941	1951	1961	1962
Convictions per 10,000 persons ..	133	133	97	57	91	175	129	128

For particulars of legislation relevant to the remedial treatment of drunkenness and some details of the various institutions established for the treatment of inebriates, see Official Year Book, No. 46, p. 632.

(ii) *Civil Proceedings.* Civil proceedings in the lower courts refer to those in the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Local Courts in the Northern Territory and the Court of Petty Sessions in the Australian Capital Territory. Statistics of civil proceedings in the Lower Courts are given in § 5.

**§ 3. Higher (Judges') Courts**

1. **General.**—Higher courts are presided over by a judge, sometimes with a jury (see para. 2, page 644. Jurisdiction of the Higher Courts, which include District, County and Supreme Courts, includes appeals from the lower courts, cases of serious crime committed from lower courts and civil cases involving Common Law, Commercial Causes, Equity, etc.

Under powers vested by the Commonwealth under the *Matrimonial Causes Act 1960* and the *Bankruptcy Act 1924-1955*, separate courts within the jurisdiction of the Supreme Courts of the various States and Territories deal exclusively with matrimonial cases and bankruptcy cases respectively.

2. **Habitual Offenders.**—An account of the methods adopted in each jurisdiction in connexion with habitual offenders is given in Year Book No. 49, pages 668-9.

3. **Capital Punishment.**—There were four executions in Australia during the period 1954 to 1963. Two took place in South Australia (in 1956 and 1958), and two in Western Australia (in 1960 and 1961). In each case the offence was murder.

Under the *Criminal Code Amendment Act* of 1922, capital punishment was abolished in Queensland, and in New South Wales the *Crimes Act* was amended in 1955, abolishing capital punishment for all offences except treason and piracy with violence. In the Australian Capital Territory, the *Child Welfare Ordinance* 1957–1962 now provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years.

In the early days of the history of Australia, the penalty of death was attached to a large number of offences, many of which would now be dealt with in a Magistrate's Court. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; from 1941 to 1950, 0.5; and from 1951 to 1960, 1.0.

4. **Proceedings at Higher (Judges') Courts.**—Proceedings at higher courts comprise criminal, civil, divorce and bankruptcy proceedings. Separate details of each are given in § 4, paragraph 2, § 5, § 7, and § 8, respectively.

#### § 4. Serious Crime.

NOTE.—In interpreting the statistics in this section, the factors affecting comparability listed at the beginning of the chapter should be borne in mind.

1. **Lower Courts.**—(i) *Convictions for Serious Crime at Magistrates' Courts.* The figures given in the tables in § 2.4 refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at Magistrates' Courts for what may be regarded as the more serious offences, i.e., offences against the person, offences against property, forgery and offences against the currency.

The following table shows the number of convictions for serious crime at Magistrates' Courts for the years 1958 to 1962.

#### CONVICTIONS FOR SERIOUS CRIME<sup>(a)</sup> AT MAGISTRATES' COURTS

State or Territory	1958	1959	1960	1961	1962
New South Wales .. ..	27,960	30,769	31,529	31,696	32,302

<b>Australia</b> .. .. .	<b>6,005</b>	<b>6,153</b>	<b>6,800</b>	<b>7,552</b>	<b>7,364</b>

(a) Year ended 30th June. (b) A person convicted on several counts at the one hearing is included only once. (c) Convictions.

The numbers of persons convicted at higher courts in Australia per 10,000 of population for the years 1958 to 1962 were:—1958, 6.1; 1959, 6.1; 1960, 6.6; 1961, 7.0; 1962, 6.9.

### § 5. Civil Cases

In interpreting the statistics in the two tables in this section, it should be borne in mind that there are factors which affect comparability between States and between courts.

The total number of plaints entered and amounts awarded plaintiffs in the lower courts, during 1962, are shown in the following table.

#### CIVIL CASES AT LOWER COURTS, 1962

Particulars	N.S.W.	Vic.	Qld (a)	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aus- tralia
Plaints entered No.	159,473	192,656	47,113	94,566	49,832	38,673	2,744	8,437	593,494
Amount awarded to plaintiffs £	2,120,496	4,340,179	1,290,943	2,065,832	899,590	591,566	42,265	97,398	11,448,269

(a) Year ended 30th June.

The following table shows the civil judgments (excluding those for divorce and bankruptcy) in the higher courts during 1962. The particulars given below include the number and amount of judgments entered by default or confession or agreement.

#### CIVIL CASES AT HIGHER COURTS, 1962

Particulars	N.S.W.	Vic.	Qld (a)	S.A.	W.A. (b)	Tas.	N.T.	A.C.T.	Total
Judgments No. Amount awarded £	48,672 n.a.	21,602 6,567,790	1,474 1,302,654	206 487,536	388 595,807	867 n.a.	n.a. n.a.	321 147,485	n.a. n.a.

(a) Year ended 30th June, 1962.

(b) Judgments signed and entered.

### § 6. Transactions of the High Court

The following table shows the transactions of the High Court for 1962 and 1963.

#### TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA

Original jurisdiction(a)	1962		1963		Appellate jurisdiction	1962		1963	
Number of writs issued ..		92		84	Number of appeals set down for hearing ..		132		118
Number of cases entered for trial ..		51		42	Number allowed ..		36		33
Judgments for plaintiffs ..		30		18	Number dismissed ..		52		62
Judgments for defendants ..		2		4	Otherwise disposed of ..		20		23
Otherwise disposed of ..		36		15					
Amount of judgments ..		£96,588		£125,823					

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as cases.

During 1962 and 1963, respectively, the High Court dealt also with the following:— appeals from assessments under the Taxation Assessment Act, 49, 22; special cases stated for the opinion of the Full Court, 8, 13; applications for prohibition, etc., 23, 31. The fees collected amounted to £3,239 in 1962, and £3,289 in 1963.

### § 7. Divorce and Other Matrimonial Relief

1. **Separation and Maintenance Orders of Courts of Summary Jurisdiction.**—In all States and Territories, there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and in the Northern Territory, courts of summary jurisdiction also have power to make separation orders. A separation order is intended primarily for the protection of the person of the wife.

2. **Divorce and Other Matrimonial Relief Granted by Higher Courts.**—A marriage may be terminated by a Supreme Court of a State or Territory in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties.

Until recently, each State was primarily responsible for the provision of matrimonial relief. The law varied from State to State; for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage.

In 1959, however, the Commonwealth Parliament passed the *Matrimonial Causes Act 1959* which came into force on 1st February, 1961. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

Nearly all decrees granted in 1963 were for petitions filed since the operation of the Commonwealth Act.

3. **Matrimonial Causes Act 1959.**—Under the *Matrimonial Causes Act 1959*, a decree for the dissolution of marriage may be granted on fourteen grounds, which include adultery, desertion, insanity, separation for five years in certain circumstances, and failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all, and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds, as, for example, where at the time of the marriage either party was a mental defective. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people, and transactions concluded on the basis of the existence of that status cannot be undone or re-opened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may remarry.

The death of either husband or wife terminates any proceedings for matrimonial relief. A decree for dissolution or annulment of a voidable marriage is first a decree *nisi*. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot remarry until a decree *nisi* has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage, but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife, except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot remarry, but a divorce may be obtained on the same facts as those on which the decree of judicial separation was based.

The new Commonwealth Act provides for financial grants to approved marriage guidance organizations, and the courts are enjoined to consider at all times the possibility of reconciliation and they may take certain steps to endeavour to effect a reconciliation.

In the following tables, the term "divorce" is used to cover dissolution of marriage, nullity of marriage and judicial separation.

4. **Number of Petitions Filed.**—The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State during 1963.

PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE AND JUDICIAL SEPARATION, 1963

(a) This table refers to children, under 21 years at time of petition, of marriages for which decree absolute for dissolution have been granted in 1961 and 1962. See also footnote (a) to table preceding.

13. Number of Divorced Persons at each Census, 1911 to 1961.—The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1911 to 1961. A classification of divorced persons by age, for the censuses from 1891 to 1947, appeared in earlier issues of the Year Book (see No. 39, p. 269). Prior to 1911, no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

**DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA**

Sex	Number						Proportion per 10,000 of males or females, 15 years of age and over

**§ 8. Bankruptcy**

1. General.—Particulars of bankruptcy in each State to the end of 1927 were incorporated in issues of the Year Book prior to No. 23. On 1st August, 1928, the Bankruptcy Act of the Commonwealth which is now the *Bankruptcy Act 1924-1960*, came into operation.

Under the *Bankruptcy Act 1924-1960*, the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia, but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may apply voluntarily for the sequestration of his estate, or his creditors may apply for a compulsory sequestration, if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt, or satisfy the Court that he has a counter claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor, provided that—the debt or debts amount to £50; the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition; and the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order, the property of the bankrupt vests in the official receiver named in the order, and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI. of the *Bankruptcy Act 1924–1960*, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act, a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The *Bankruptcy Act 1924–1960* provides for an Inspector-General in Bankruptcy. It also provides for a Registrar and an Official Receiver to be appointed for each bankruptcy district.

A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorized by the Court. He may examine a bankrupt or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor, and to realize and administer the estate of the debtor. In respect of these activities, the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition, or assignment (Parts XI and XII of the *Bankruptcy Act*) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

**2. Bankruptcy Proceedings.**—The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during the twelve months ended 30th June, 1963.

## BANKRUPTCY PROCEEDINGS, 1962-63

(a) Includes the Australian Capital Territory.

## § 9. Police

1. General.—The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens and inspectors under the fisheries and various other Acts. In metropolitan and large country areas, they also regulate the street traffic. With the exception of the Commonwealth Police Force (see next page) and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State Governments, but their members perform certain functions for the Commonwealth Government, such as acting as aliens registration officers and policing various acts and regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings, and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of persons to each police officer are shown in the following table for the years 1959 to 1963. The figures include traffic and water police, probationers, cadets, special constables and women police, but exclude parking police, native trackers (Aboriginals employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses and interpreters.

## STRENGTH OF POLICE FORCES

30th June—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aus- ralia
<b>TOTAL STRENGTH</b>

1962 .. ..	5	1	16	(c)	4	..	34	..	60
1963 .. ..	5	1	14	(c)	4	..	30	..	54

(a) Included in total strength shown above. (b) Not included in total strength shown above.  
(c) One native tracker, who is paid a small weekly retainer and is supplied with rations, is continually on call.

2. The Commonwealth Police Force.—The Commonwealth Police Force commenced operations on 21st April, 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth. This force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organization for the suppressing of traffic in women and the suppression of obscene literature.

Under the control of the force is the Australian Police College at Manly, N.S.W., which provides training for officers of various police forces and other agencies in Australia and New Zealand.

The force has District Offices in each Capital City and its Head Office in Canberra. The strength of the force at 30th June, 1963, was 563 policemen and 3 policewomen. Twenty-eight guard dogs were available for use by the force and by State police forces as required.

## § 10. Prisons

1. Prisons and Prison Accommodation.—The table below shows the number of prisons in each State and the Northern Territory and the accommodation therein at 30th June, 1962.

## PRISONS AND PRISON ACCOMMODATION, 1962

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Australia
Prisons .. ..	18	12	7	15	19	1	2	74
Accommodation .. ..	3,100	2,346	925	1,018	906	381	87	8,763

There is no gaol in the Australian Capital Territory, but there is a lock-up attached to the police station at Canberra, and another lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a Magistrate's Court.

2. **Convicted Prisoners.**—The number of convicted prisoners at 30th June of each of the years 1958 to 1962 and the proportion per 10,000 of the population are shown in the following table.

**CONVICTED PRISONERS**

30th June—	N.S.W. (a)	Vic.	Q'land (b)	S. Aust. (b)	W. Aust. (b)	Tas. (b)	N.T. (b)	Aus- tralia
NUMBER								
1958 .. ..	3,126	1,397	799	526	527	196	32	6,603
1959 .. ..	2,895	1,539	868	577	477	223	28	6,607
1960 .. ..	2,903	1,678	865	570	526	195	26	6,763
1961 .. ..	3,090	1,827	877	592	526	237	41	7,190
1962 .. ..	3,052	1,844	843	658	573	207	49	7,226

**NUMBER PER 10,000 OF POPULATION**

1958 .. ..	8.5	5.1	5.6	5.9	7.5	5.9	14.5	6.7
1959 .. ..	7.7	5.5	5.9	6.3	6.7	6.6	11.6	6.6
1960 .. ..	7.6	5.9	5.8	6.0	7.3	5.7	10.2	6.6
1961 .. ..	7.9	6.2	5.8	6.1	7.1	6.8	15.1	6.8
1962 .. ..	7.6	6.1	5.4	6.6	7.6	5.7	17.6	6.7

(a) Includes the Australian Capital Territory. Includes short-term prisoners held in lock-ups at police stations.  
(b) Excludes Aborigines.

**§ 11. Patents, Trade Marks and Designs**

1. **Patents.**—Patents for inventions are granted under the *Patents Act 1952-1960*, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £19 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1959 to 1963 are shown in the following table.

**PATENTS: AUSTRALIA**

Particulars	1959	1960	1961	1962	1963
Applications .. ..	11,430	11,828	12,901	13,026	13,051
Applications accompanied by provisional specifications ..	4,063	3,772	3,919	3,710	3,557
Letters patent sealed ..	5,488	4,857	4,940	3,866	5,361

2. **Trade Marks and Designs.**—Under the *Trade Marks Act 1955-1958* the Commissioner of Patents is also Registrar of Trade Marks. Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned. A new classification of goods was adopted in 1958, and trade marks registered under repealed Acts are reclassified on renewal.

Under the *Designs Act* 1906–1950, the Commissioner of Patents is also Registrar of Designs.

The following table shows the applications for trade marks and designs received and registered during the years 1959 to 1963.

#### TRADE MARKS AND DESIGNS: AUSTRALIA

Particulars	1959	1960	1961	1962	1963
Trade marks—					
Received .. ..	5,436	6,083	6,209	5,920	6,411
Registered .. ..	3,792	3,203	4,592	3,558	4,224
Designs—					
Received .. ..	1,366	1,283	1,413	1,392	1,425
Registered .. ..	819	1,507	1,522	1,064	1,251

### § 12. Copyright

1. **Legislation.**—Copyright is regulated by the *Commonwealth Copyright Act* 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British *Copyright Act* of 1911 has been adopted and scheduled to the Australian law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order-in-Council which came into operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. **Applications and Registrations.**—The following table shows under the various headings the number of applications for copyright lodged and registered for the years 1959 to 1963.

#### COPYRIGHT: AUSTRALIA

Particulars	1959	1960	1961	1962	1963
Applications lodged—

Artistic .. ..	47	61	37	52	18
International .. ..	..	..	..	..	..

### § 13. Cost of Administration of Law and Order

1. **Expenditure by the States.**—The tables below show the net expenditure (i.e., gross expenditure less receipts from fees, fines, recoups for services rendered, etc.) from Consolidated Revenue during 1962–63 in connexion with the administration of justice, police and prisons in each State.

In South Australia, the receipts for legal fees and registrations exceed the expenditure under "Justice". Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

## NET EXPENDITURE ON LAW AND ORDER, 1962-63

State	Net expenditure			Per head of population		
	Justice	Police	Prisons	Justice	Police	Prisons
	£	£	£	s. d.	s. d.	s. d.
New South Wales ..	1,558,114	9,330,127	1,525,394	7 9	46 6	7 7
Victoria ..	830,634	7,739,027	1,149,871	5 6	51 2	7 7
Queensland ..	438,380	4,866,813	495,011	5 8	62 8	6 5

Western Australia ..	218,533	2,000,709	289,053	5 9	52 4	7 7
Tasmania ..	230,254	985,720	222,240	12 9	54 5	12 3
<b>Total ..</b>	<b>2,922,392</b>	<b>27,725,386</b>	<b>4,123,961</b>	<b>5 5</b>	<b>51 9</b>	<b>7 8</b>

2. *Commonwealth Expenditure.*—(i) *Attorney-General's Department.* The expenditure shown in the previous table is that incurred by the State Governments. Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following table, however, shows the gross expenditure by the Commonwealth Attorney-General's Department during the year 1962-63 on the main services it performs.

## EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT, 1962-63

(£ )

Particulars	Gross expenditure
Administration ..	386,538
Australian Police College ..	27,809
Bankruptcy ..	254,005
Commonwealth Police Force ..	347,744
Conciliation and arbitration ..	248,556
Crown Solicitor's Office ..	479,806
High Court ..	104,860
Judges' salaries and pensions ..	215,426
Legal Service Bureau ..	65,856
Matrimonial causes—Grants to organizations ..	51,750
Patents, trade marks and designs ..	588,759
Rent ..	89,808
Repairs and maintenance ..	32,625
Court Reporting Branch ..	204,505
Territory courts ..	151,202
<b>Total ..</b>	<b>3,249,249</b>

In addition, £89,103 was spent by the Attorney-General's Department on capital works and services.

The items of expenditure shown in the table above are gross. Receipts of the Attorney-General's Department for 1962-63 aggregated £1,039,207, of which revenue on account of Patents, Trade Marks and Designs, and Copyright amounted to £605,732, Bankruptcy £181,013, Court Reporting Branch £182,395, Fees, Fines and Costs of Court £41,022, and Miscellaneous £29,045.

Expenditure and receipts of the Attorney-General's Department for the five years 1958-59 to 1962-63 are shown in the following table.

**EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S  
DEPARTMENT**

(£)

Year	Gross expenditure	Receipts	Net expenditure
1958-59 .. .. .	2,184,038	572,771	1,611,267
1959-60 .. .. .	2,534,609	670,048	1,864,561
1960-61 .. .. .	2,699,095	812,493	1,886,602
1961-62 .. .. .	2,913,966	946,934	1,967,032
1962-63 .. .. .	3,249,249	1,039,207	2,210,042

(ii) *Police and Prisons.* Expenditure (other than capital) by the Commonwealth Government on police in the Australian Capital Territory (excluding the Commonwealth Police Force shown above) and police and prisons in the Northern Territory for the five years 1958-59 to 1962-63 is shown in the following table.

**EXPENDITURE ON POLICE AND PRISONS IN THE NORTHERN TERRITORY  
AND THE AUSTRALIAN CAPITAL TERRITORY**

(£)

Year	Northern Territory	Australian Capital Territory <sup>(a)</sup>
1958-59 .. .. .	227,031	137,894
1959-60 .. .. .	262,261	168,952
1960-61 .. .. .	322,763	197,275
1961-62 .. .. .	335,485	215,921
1962-63 .. .. .	394,984	263,148

<sup>(a)</sup> Expenditure on police only. There is no prison in the Australian Capital Territory.

## CHAPTER XVIII

## PUBLIC HEALTH

## STATE GOVERNMENT ACTIVITIES

(Including activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

## § 1. Public Health Legislation and Administration

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department.

There is a Director-General of Public Health and Psychiatric Services who is Chief Medical Adviser to the Government, *ex officio* President of the Board of Health and Chairman of the Nurses Registration Board. He is responsible for the administration of the part of the *Mental Health Act* 1958–1962 relating to the care and treatment of mental patients.

The Department's activities embrace all matters relating to public health and the greater part of the general medical work of the Government. These include:—(a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—*Public Health Act* 1902–1961, *Noxious Trades Act* 1902–1957 and *Pure Foods Act* 1908–1958; (b) Scientific divisions (Government Analyst, Microbiological Laboratory, Institute of Clinical Pathology and Medical Research, Division of Occupational Health), and Division of Forensic Medicine; (c) Tuberculosis and Epidemiological Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst, Tamworth and Lismore; (e) State hospitals and homes and State sanatoria; (f) Mental hospitals; (g) Maternal and baby welfare (baby health centres); (h) School medical and dental services; and (i) Publicity, nutrition and library services.

Public hospitals, other than State hospitals, are administered by the Hospitals Commission of New South Wales in terms of the *Public Hospitals Act* 1929–1959. The Hospitals Commission of New South Wales is a statutory corporation under the jurisdiction of the Minister for Health.

2. **Victoria.**—(i) *General.* The Ministry of Health combines under the control of one Minister all the health, hospital and associated services either administered directly or supported financially by the Government. The central administration of the Department of Health assists the Minister with the task of co-ordinating the work of a variety of associated bodies as well as carrying out the functions of a headquarters of a Department consisting of four branches—the General Health Branch, the Maternal and Child Welfare Branch, the Tuberculosis Branch and the Mental Hygiene Branch. The functions of these branches are described below.

(ii) *The General Health Branch.* This branch, which, *inter alia*, is the administrative branch for the Commission of Public Health, protects or promotes the health of the community in the following ways.

The Engineering Division scrutinizes from a public health point of view the plans of all public buildings and provincial sewerage installations and makes periodical inspections. Other activities include prevention of air pollution from industrial sources, prevention of stream pollution and supervision of abattoirs and cattle sale yards.

The Poliomyelitis Division provides a comprehensive orthopaedic, physiotherapy, and respirator service for all eligible patients and carries out rehabilitation in conjunction with the Commonwealth Government. Facilities developed for poliomyelitis are now being used for other neurological disorders. The Division is also concerned with the Salk immunization campaign being undertaken in Victoria. Through the municipalities, immunization against poliomyelitis, diphtheria, smallpox, whooping cough, and tetanus is encouraged and supervised.

Prevention and control of infectious diseases are functions of this Branch, which also sponsors original research into virus diseases and epidemiological investigations throughout Victoria.

The Venereal Diseases Division provides a centrally situated headquarters where the use of modern remedies is effecting a general improvement in the standard of treatment.

Standards of quality and purity of foods and drugs are fixed by the Food Standards Committee and are administered and enforced by both departmental and municipal health inspectors.

Investigations into occupational hazards to the health of workers, the treatment and incidence of occupational diseases, and research into the effects of toxic substances used in industry are conducted by the Industrial Hygiene Division.

Subsidies are granted to municipalities to provide meals for pensioners, to clubs for elderly citizens, and to emergency housekeeper services.

Other services operated by the Branch are:—registering plumbers and gasfitters; providing free travel to hospital for people with limited incomes; analysing food, drink, water and sewerage effluents; registering cinematograph operators; administering the Cemeteries Acts; and advising industry on health hazards associated with handling radioactive substances.

(iii) *The Maternal and Child Welfare Branch.* This branch is concerned with pre-natal hygiene, the development of pre-school services, and the school medical and dental services.

(iv) *The Tuberculosis Branch.* The Tuberculosis Branch is concerned with the prevention of tuberculosis and the treatment and rehabilitation of tubercular patients.

(v) *The Mental Hygiene Branch.* This Branch is controlled by the Mental Health Authority and consists of institutions for in-patient care and out-patients' clinics and other services necessary for a comprehensive community mental health programme. Since the appointment of the Authority in 1951, existing buildings have been remodelled and new ones provided. Services have been re-organized to conform with modern requirements.

3. Queensland.—(i) *General.* The *Health Acts 1937 to 1962* are administered by the Director-General of Health and Medical Services subject to the Minister for Health. A central staff controls the following divisions.

(a) *Division of Public Health Supervision.* This Division is controlled by the Deputy Director-General of Health and Medical Services, and comprises separate sections of communicable disease control, environmental sanitation, food and drug control, enthetic (venereal) diseases, hookworm control and Hansen's disease (leprosy) control. Free treatment of venereal diseases is offered at the Department's clinics in Brisbane and at any public hospital. Free immunization against poliomyelitis, diphtheria, whooping cough and tetanus is offered by most of the local authorities. The majority of school children have been immunized against diphtheria, whooping cough, tetanus and poliomyelitis.

(b) *Division of Tuberculosis.* A central chest clinic in Brisbane offers Mantoux tests, X-ray examinations, and inoculations of Mantoux negative reactors free of charge. Similar clinics are situated at the Cairns, Rockhampton, Thursday Island, Toowoomba, and Townsville district hospitals. Children in the final grade of primary schools are Mantoux tested and given B.C.G. vaccine. The compulsory X-ray examination of all persons over the age of 14 years is proceeding. The survey of residents of the metropolitan area is one-third completed, and a survey of country areas has commenced again in the north.

(c) *Division of Industrial Medicine.* The services of this Division are available for the prevention of industrial hazards both to industry and to the trade union movement. The Division is particularly interested in occupational diseases, such as silicosis and lead and other poisoning, and advises on industrial problems such as lighting, ventilation, fatigue, air pollution and the use of radio-active isotopes.

(d) *Division of Maternal and Child Welfare.* This Division offers supervision and advice on the rearing and health of infants and pre-school children at 258 infant welfare centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services.* This Division comprises the Chief Medical Officer, School Health Services, and a staff of doctors, dentists and visiting school nurses. The dental officers inspect school children and carry out essential treatment at schools or in the rail dental clinics. The medical examinations are made every one to two years.

(f) *Division of Mental Health.* The Director of Psychiatric Services is responsible for the care and treatment of mentally ill patients in the State's four special hospitals at Brisbane, Toowoomba, Ipswich and Charters Towers. In addition to a separate clinic at Brisbane, psychiatric services are available at Brisbane, Townsville, Rockhampton and Toowoomba Public Hospitals. There is also an epileptic home at Toowoomba.

(g) *Division of Welfare and Guidance.* Clinics for the diagnosis and management of behaviour disorders in children have been set up in the Greater Brisbane Area, and further clinics are planned for Townsville and Toowoomba. This service is extensively used. The Wilson Youth Hospital has been opened for the social and psychiatric rehabilitation of boys convicted in the Children's Court. About 40 boys can be accommodated.

A Child Guidance Unit for out-patients, day-hospital patients, and 30 in-patients is about to be constructed in the grounds of the Brisbane Children's Hospital. A similar unit is planned for Townsville.

(h) *Division of Social Work.* A Division of Social Services has been established to study and advise on social problems and the extension of social work services, and to co-ordinate social work developments in the health and medical services.

(i) *Division of Geriatrics.* A geriatric unit is established at Princess Alexandra Hospital. The unit consists of two wards with accommodation for 102 in-patients, administration section, day hospital, physio-therapy and occupational therapy departments.

(j) *Division of Laboratory Services.* Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to institutions, country hospitals and private doctors, and provides a medico-legal service for the whole State. The Institute of Forensic Pathology is controlled by the medical staff of the Laboratory of Microbiology and Pathology, and coroners' autopsies are conducted there.

(ii) *Hospitals.* All public hospitals operate under the district system, which provides for the constitution of hospitals regions and hospitals districts, and a hospitals board for each district. The State is divided into 12 hospitals regions with a base hospital for each region. Each region comprises a number of hospitals districts, the purpose of the regional scheme being to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospital services, including public dental services, in each hospitals district is vested in the hospitals board, which comprises not less than four members or more than eight members appointed by the Governor-in-Council, and one member elected by the component local authorities. During the year 1961-62, there were 60 hospitals boards controlling 137 public hospitals, 13 of which treated out-patients only. In addition, 22 other hospitals, six of which are treated as public hospitals, received aid from the Government, and an institution for the treatment of Hansen's disease in Aborigines was maintained at Fantome Island near Townsville. Other persons suffering from this disease are treated at an annexe of the Princess Alexandra Hospital, South Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the Food Drugs Advisory Committee, the Radiological Advisory Committee, the School Health Services (comprising School Medical and Dental Services and Deafness Guidance Clinic), Poliomyelitis Services and the public health aspects of the control of tuberculosis, including the State X-ray Health Survey and the Chest Clinic.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor, while one is elected by metropolitan local boards and one by all other local boards. The Central Board of Health administers the *Health Act 1935-1963*, *Food and Drugs Act 1908-1962*, *Dangerous Drugs Act 1934-1955*, *Noxious Trades Act 1943-1955*, *Bakehouses Registrations Act 1945-1947* and *Notification of Birth Act 1926-1936*. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The *Health Act 1935-1963* constitutes every municipal council and every district council a local board of health for its municipality or district. There are 142 local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act each local board is constituted the local authority for its respective district except in the metropolitan area, for which the Metropolitan County Board is the local authority.

5. *Western Australia.*—Health services are provided under the *Health Act 1911–1962*. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is divided into local government areas, each administered by a municipal council. All local government authorities have health administration powers.

In any emergency, the Commissioner may exercise all the powers of a health authority in any part of the State.

Features of legislation since 1957 are as follows:—(a) Act No. 30 of 1958 provides for the establishment of the Health Education Council with the object of promoting and improving the health of the people of Western Australia; (b) Act No. 43 of 1958 provides for the establishment of the Cancer Council of Western Australia with the objects of co-ordinating, promoting and subsidizing cancer research; (c) Act No. 23 of 1960 established a Maternal Mortality Committee to investigate each maternal death and to recommend preventive measures; and (d) Act No. 33 of 1962 empowers medical practitioners to give blood transfusions to minors despite parental objections, where life is endangered.

6. *Tasmania.*—The Department of Health Services is under the jurisdiction of the Minister for Health. The Department consists of a Headquarters and three Divisions. The Director-General of Health Services is the permanent head of the Department, and he administers the Department through Directors of each of the three divisions (Division of Public Health, Division of Psychiatric Services, and Division of Tuberculosis) and through several other clinical directors and other senior officers attached to the headquarters of the Department, including the Directors of Orthopaedics, Pathology and Anaesthetics, and the Government Analyst and Chemist.

In addition to his responsibility for the functioning of the Department as a whole, the Director-General of Health Services administers directly the various branches of the work performed by headquarters. They are concerned particularly with the following:— (a) the administration of the hospital services throughout the State, (b) the District Medical Service, (c) the Hospital and Government Nursing Service, which includes the administration of 24 district nursing centres throughout the State, (d) legislation concerned with health and allied matters, the Nurses' Registration Board and the Dental Mechanics' Registration Board, (e) the National Fitness Council and Handicapped Children's Advisory Council, (f) specialist medical services, (g) statistical classification of diseases and injuries, (h) liaison with other States and the Commonwealth Health Department; and (i) all matters dealing with the maintenance of departmental property and the appointments and salaries of departmental staff.

The Division of Public Health is responsible for the oversight of those services (except those specifically related to tuberculosis) which aim at the attainment and maintenance of good physical health in the community. It controls the school health services (both medical and dental) and the child health service. It supervises the immunization campaigns conducted by local health authorities and is responsible for custody of poliomyelitis vaccine and maintenance of records of its use. The Division also sets standards of food quality and of environmental sanitation, which are policed in detail by local health authorities. The Division administers laws relating to standards of food, drugs, and food premises, and to environmental sanitation, public buildings, infectious disease (other than tuberculosis), and cremation.

The Division of Psychiatric Services provides a community psychiatric service. This includes a mental hospital and a neurosis hospital; institutional care for mental defectives, alcoholics, and sexual offenders; and a community psychiatric service on a regional basis covering the whole State. In addition, the Division administers the *Mental Hospitals Act 1885–1960*, and the *Mental Deficiency Act 1920–1956* and provides a State-wide service for the supervision of mental defectives in the community.

The Tuberculosis Division is concerned with the prevention (including B.C.G. vaccination), detection, notification, examination and treatment of all forms of tuberculosis and the maintenance of chest hospitals and diagnostic clinics.

7. *Northern Territory.*—The Commonwealth Department of Health provides health services in the Northern Territory which include hospital, medical and dental services.

Four general hospitals have been established and at 31st December, 1963, the available accommodation for in-patients was as follows:—Darwin Hospital, 309; Alice Springs Hospital, 134; Katherine Hospital, 36 and Tennant Creek Hospital, 34. The treatment of

Hansen's disease (leprosy) is carried out at East Arm Settlement. A full range of ancillary services is available at the Darwin hospital, which serves as a base hospital for the Territory. Dental clinics have been set up at Darwin and Alice Springs.

Medical and dental services to outback areas are provided by road and air. The Department of Health has two De Havilland Dove aircraft stationed at Darwin, and one at Alice Springs. They are staffed and serviced by Trans-Australia Airlines and are extensively used in ambulance and survey medical work. At Alice Springs, medical officers of the Department of Health provide the medical services to the Royal Flying Doctor Service (South Australian) base.

Public health services are provided, and health inspectors visit all settlements periodically.

A section of the Department of Health undertakes continuous investigation into native health.

8. Australian Capital Territory.—The *Public Health Ordinance* 1928–1951 places under the control of the Minister for Health matters relating to public health and hygiene in the Australian Capital Territory. In addition to the public health activities normally undertaken by the State Governments, the Commonwealth Department of Health undertakes certain duties which in the States would be the responsibility of local government instrumentalities.

A medical officer of health and a staff of four health inspectors have been appointed to administer the Public Health Ordinance and ancillary regulations. During 1963, 754 licences were issued under various public health regulations, while legal action was taken in 25 cases for offences against these regulations. The inspection staff is also responsible for the quarantine inspection of parcels arriving under bond at the Canberra Post Office.

In the campaign to control the incidence of poliomyelitis the Department of Health gave 3,100 anti-poliomyelitis injections of Salk vaccine to adult residents of the Australian Capital Territory in 1963.

The Commonwealth Health Laboratory in Canberra provides full clinical laboratory services to the Canberra Community Hospital and to private medical practitioners in the Australian Capital Territory. In 1963, 258,797 pathological services were carried out, including more than 3,000 chemical and bacterial analyses of water, milk, other foods, and sewage.

The Canberra Community Hospital is administered, subject to the Minister for Health, by a board consisting of five elected members and three members appointed by the Minister. At 31st December, 1963, the hospital had accommodation for 380 in-patients.

The Director of the Tuberculosis Division of the Commonwealth Department of Health, in addition to the responsibility of co-ordinating the activities of the States in the national campaign against tuberculosis, is concerned with the prevention, detection, examination and treatment of tuberculosis in the Australian Capital Territory. In 1963, 14 cases of tuberculosis were notified in the Australian Capital Territory.

The supervision of the hygiene of dairies and piggeries and the control of the Canberra Abattoir is the responsibility of the veterinary service of the Department of Health. The duties of this service also include the prevention and control of disease in stock and advice to district stock owners with field diagnosis on a herd or flock basis supported by laboratory confirmation.

A district nursing service, administered by the Commonwealth Department of Health, was established in 1950 to provide a home-nursing service for the sick and aged. This service, available at the request of a registered medical practitioner, is provided by six sisters, who, in 1963, made 19,554 visits. Throughout the year liaison was maintained by the sisters with agencies engaged in social welfare work.

## § 2. Supervision and Care of Infant Life

1. General.—Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government, local government, and private organizations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by infant welfare centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out of

the wards of the State to suitable persons. Wherever possible, the child is boarded out to its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of the *Social Services Act 1947-1963* maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children. A sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under 16 years of age. Where there are one or two other children under 16, the amount payable is £16, and where there are three or more other children under 16, the amount payable is £17 10s. Where more than one child is born at a birth, the amount of the allowance is increased by £5 in respect of each additional child born at that birth. More detailed information concerning maternity allowances is given in Chapter XVI. Welfare Services.

Information regarding infant mortality will be found in Chapter X. Vital Statistics (see pages 336-40).

2. *Nursing Activities.*—Several State Governments maintain institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(i) *Infant Welfare Centres.* The following table gives particulars of the activities of infant welfare centres for the year 1963. The figures relate to all centres, whether permanently staffed or on a temporary or part-time basis. Centres may be located at accommodation specially provided for this purpose or at halls, schools, etc.

INFANT WELFARE CENTRES, 1963

Particulars	N.S.W.	Vic.	Q'land (a)	S. Aust. (a)	W. Aust.	Tas.	N.T.	A.C.T.	Aus- tralia
Number of centres	402	663	259	257	71	102	15	27	1,796
Attendances at centres ..	1,136,655	1,387,306	432,793	255,452	244,956	134,431	17,193	35,845	3,644,631
Visits by nurses to homes ..	n.a.	169,882	n.a.	33,567	23,381	75,551	6,638	6,800	n.a.

(a) Year ended 30th June, 1963.

Mobile units are used as centres in some States. The numbers of these in 1963, included in the above table, were as follows:—Victoria, 5; Queensland, 1; South Australia, 3; Western Australia, 4; and Tasmania, 10.

In the last thirty years, the number of attendances at the infant welfare centres has quadrupled. The numbers of attendances, at five-year intervals, since 1930 were as follows:—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; 1955, 3,099,233; and 1960, 3,480,203. During the year 1963, the number of attendances was 3,644,631.

(ii) *Bush Nursing Associations.* Treatment for mothers and children is also provided by the Bush Nursing Associations.

The number of centres maintained by the Associations in 1963 were:—New South Wales, 21; Victoria, 56; Queensland, 6; South Australia, 32; Western Australia, 12; and Tasmania, 24.

(iii) *Canberra Mothercraft Society.* This society, which is subsidized by the Commonwealth Department of Health, administers the Infant Welfare Service in Canberra with a staff of nine certificated nurses.

(iv) *Queen Elizabeth II. Coronation Home for Mothers and Babies.* This home, which is under the management of the Canberra Mothercraft Society, was opened on 7th January, 1963. It is staffed by qualified nursing staff and provides post-natal care for mothers and problem babies. The Home, which is an approved public hospital for Hospital Benefits purposes, has accommodation for two mothers and nine babies. The daily occupied bed average for 1963 was 5.2.

### § 3. Medical Inspection of School Children

1. **General.**—Medical and dental inspection of school children is carried out in all States, in the Northern Territory, and in the Australian Capital Territory. In some States, travelling clinics have been established to deal with dental defects.

2. **New South Wales.**—(i) *School Medical Service.* Doctors of the School Medical Service examine children attending all schools administered by the Department of Education and the majority of other schools in the State. They make annual visits to schools in the metropolitan, Newcastle and Wollongong areas, and in Armidale, Bathurst, Lismore and district, Grafton and district, and Cootamundra, and examine children in kindergarten or 1st grade in primary schools and 2nd year in secondary schools. Children in 4th grade in primary schools and 4th year in secondary schools are reviewed. Children in other classes are examined or reviewed as necessary.

In country areas, school children are examined by local medical practitioners according to the normal practice of the School Medical Service and under the supervision of local municipal and shire councils. During the first examination, all children at these schools are examined, and following that, the same procedure is adopted as in the metropolitan area. This scheme is growing and the majority of Councils in New South Wales have expressed interest and are endeavouring to arrange with local medical practitioners to have the scheme introduced. If treatment is necessary, the parent is informed and, if possible, is called in for interview. In the metropolitan, Newcastle, Wollongong, Lismore and Grafton areas, school nurses follow up these cases with the object of persuading parents to seek medical advice for the children.

In each of four circumscribed areas in the Sydney metropolitan area a Child Health Centre has been established. Each centre offers full-time diagnostic and advisory service to approximately 45,000 children in 100 schools, and provides treatment for emotional problems and speech defects. Additional centres are in process of construction. Eleven centres are planned for the Sydney area, one in Newcastle and one in Wollongong.

As well as examining school children, the medical officer examines the sanitary arrangements at each school. Bush nurses act as school nurses in schools at or near the bush nursing centres. Medical officers of this service examined 276,385 children in 1962. Notifiable defects in the children examined were found in 33.0 per cent.

Various surveys of school children are undertaken from time to time, e.g. hearing surveys, hookworm surveys, height-weight surveys, nutrition surveys, and investigations to determine the incidence of enlargement of the thyroid gland, defective vision, and postural defects.

Six child guidance clinics in the metropolitan area and one at Newcastle operate under the administration of the School Medical Service. One clinic functions at the Yasmars Boys' Shelter and deals exclusively with cases which come before the Children's Courts. Each clinic is staffed by a psychiatrist, a psychologist and social workers.

(ii) *School Dental Service.* There are 33 dental officers and 28 dental assistants on the staff of the School Dental Service, Division of Dental Services, Department of Public Health, providing a dental service for New South Wales school children. At the beginning of the 1963 school year, fourteen fully-equipped mobile dental clinics were in service in country areas. The clinics are staffed by a dentist and assistant. They visit country schools and provide treatment free of charge.

There are five fixed clinics, each of two surgeries, a waiting room, office and separate washrooms for patients and staff. These are located at Newcastle and Wollongong, and at Hurstville, Parramatta and Naremburn in the Sydney metropolitan area. Free treatment may be obtained for those school children whose parents desire it. It is necessary to restrict the treatment to children of 6, 7 and 8 years of age in the metropolitan area and 6 to 9 years in the country, although children of any age may obtain free treatment of an emergency nature. A system involving examination only was commenced in September, 1960, whereby as many primary school children as possible are encouraged to seek private treatment by means of notification charts, or children within the age groups are referred to the fixed clinics.

A well-equipped dental surgery is in continuous operation at the Stewart House Preventorium, staffed by officers of the Division, and there is a modern dental clinic at Glenfield Park school which receives regular visits from a school dental officer. A free dental service is provided, in co-operation with the Royal Flying Doctor Service, for children living in far western areas. In country areas where no adequate dental facilities exist, school children of all ages are eligible for treatment in the mobile clinics.

In 1963, 107,595 school children were examined and 14,202 were treated in 55,423 visits; 21,715 extractions, 59,429 fillings and 58,317 other treatments were completed. The parents of a further 62,484 children were notified of dental defects requiring treatment.

3. **Victoria.**—School medical services are conducted in close association with the Education Department. All children between the ages of 5 and 14 years attending State and registered schools are examined regularly, and any disabilities found in the children are brought to the notice of their parents. School nurses, under medical direction, visit the homes and schools. Children suffering from physical and mental disabilities are recommended to attend appropriate schools or classes by the medical officers. Some special training for the handicapped is given.

The School Dental Service has an establishment of 40 dental officers and provides dental attention for children in parts of the metropolitan area at one of three dental centres, and for a number of country districts by means of 15 mobile units, including 6 twin-surgery units. It also provides dental services for children's institutions in and around Melbourne and certain provincial centres. The service is now providing dental attention for some 60,000 primary school children.

4. **Queensland.**—During 1962–63, medical officers and nurses examined 112,483 school children, and of these, 5,002 children had disabilities of which parents were notified and advised to seek attention. In western Queensland, local doctors act as part-time ophthalmic surgeons. Advice is given on school sanitation, infectious diseases in schools, and health education.

During 1962, school dentists gave treatment to 11,358 school children who reside in areas beyond easy reach of hospital dental clinics. The treatment was carried out at four rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

5. **South Australia.**—The metropolitan State schools are visited annually and the children are examined while in Grades 1, 4 and 7 in the primary schools and in their second and fourth years in secondary schools. Efforts are made to visit country schools every three years, when all the children are examined. Students who wish to become teachers are examined on appointment as Leaving Teaching Scholars while still attending secondary schools, again immediately prior to entering the Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in health education are given to all College students and, in addition, domestic art students are lectured on home nursing.

During 1963, 77,443 children were examined by medical officers in 205 country and 128 metropolitan schools. Of these, 5,696 required treatment for defective vision, 2,387 for defective hearing, and 11,707 for dental disorders.

Dentists using mobile vans examined 9,685 school children in country areas where a private dental service was not readily available; 5,325 children were offered treatment; 4,157 accepted and were treated free of charge.

There were 1,904 children examined at the Deafness Guidance Clinic during 1963. Of the 1,168 new patients, 593 were referred to doctors or hospitals for treatment.

Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

6. **Western Australia.**—The School Medical Service of the State Health Department employs seven full-time medical officers for schools. During 1962, these officers examined 56,519 children (metropolitan 32,882, country 23,637). The 416 schools visited comprised metropolitan, 258 (State schools 186, non-government schools 72), and country, 158 (State schools 128, non-government schools 30). The aim is to examine each school child three times in his school career.

During 1962, the twelve full-time dentists employed by the School Dental Service visited 11 metropolitan schools, 99 country schools, 8 orphanages and 11 native missions. The number of children examined was 8,911. With the consent of their parents, 5,359 of these were treated. The number of dental vans operating was 12. The cost of the School Medical Service and the School Dental Service for 1961-62 was £87,310.

7. *Tasmania*.—During 1963, two full-time and three part-time medical officers examined school children in State and non-government schools. In addition, four specialist medical officers also examined school children. Seventeen full-time and six part-time sisters visited homes and schools. Of the 22,689 children examined by medical officers, 6,781 were found to have defects.

Eleven school dental officers were employed during 1962-63, operating from surgeries at Hobart, Launceston, Burnie, Devonport, Ulverstone, Currie and Flinders Island, and from mobile clinics in other districts. A full-time dental surgeon is in charge of each surgery or clinic. During the year, there were 18,293 new visits to the school dentists and 21,762 repeat visits.

The cost of school medical and school dental services for the year ended 30th June, 1963, was £85,804.

8. *Northern Territory*.—The Schools Medical Officer makes routine physical examinations of all children attending both pre-school centres and the schools which come under the supervision of the Assistant Supervisor of Education in the Northern Territory. The only children not so examined by him are those at the Native Welfare Settlement School, i.e. full-blood Aboriginals, who are examined during native health surveys.

An immunization clinic and a paediatric clinic are held each week at the Darwin Hospital.

A special dental service for school and pre-school children is available in Darwin and Alice Springs. School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment.

9. *Australian Capital Territory*.—The Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include a school medical service carried out by three medical officers and two trained nurses and a school dental service, staffed by 11 dentists and 11 dental nurses.

Medical examinations are carried out at all schools, public and private, within the Territory. During 1963, the total number of children examined was 6,873. The majority of the examinations were of children in the six, eight, 12 and 15 year age groups, but another large group of children were referred for examination of special conditions. In addition, examination of children attending Pre-School Centres was made according to the time available, 487 pre-school children being examined.

Defects notified during the year were:—460 eyesight, 179 ear, nose and throat, and 497 miscellaneous; while 300 cases of hearing loss not requiring further treatment were also found. Triple antigen injections, totalling 8,233 in 1963, were given at regular sessions held throughout the year, while 1,354 anti-poliomyelitis injections were given to school children, and 7,748 at Baby Health Clinics.

Free dental treatment from the School Dental Service is available to infants' and primary schools. During 1963, 7,058 children were examined and treated. Emphasis is placed on preventive dentistry and an extensive campaign of applying stannous fluoride to children's teeth was pursued in 1963, when approximately 2,000 treatments were given.

#### § 4. Disposal of Dead by Cremation

The first crematorium in Australia was opened in South Australia in 1903. At 31st December, 1963, there were eighteen crematoria in Australia, situated as follows:—New South Wales, 7; Victoria, 4; Queensland, 2; South Australia, 1; Western Australia, 2; Tasmania, 2.

There is no crematorium in the Northern Territory or in the Australian Capital Territory at present, but a site has been allocated for one in the Australian Capital Territory and it is expected that construction will begin during 1964.

The following table shows the number of cremations and total deaths in each State for each of the years 1959 to 1963.

### CREMATIONS AND TOTAL DEATHS

State or Territory	1959		1960		1961		1962		1963	
	Cremations	Total deaths	Cremations	Total deaths	Cremations	Total deaths	Cremations	Total deaths	Cremations	Total deaths

<b>Australia ..</b>	<b>27,457</b>	<b>89,212</b>	<b>28,490</b>	<b>88,464</b>	<b>29,127</b>	<b>88,961</b>	<b>31,397</b>	<b>93,163</b>	<b>32,470</b>	<b>94,894</b>

### COMMONWEALTH GOVERNMENT ACTIVITIES

NOTE.—The Commonwealth services outlined in this chapter are those provided under the National Health Services or otherwise administered by the Commonwealth Department of Health. For particulars of services administered by the Commonwealth Department of Social Services and of Commonwealth expenditure from the National Welfare Fund on all forms of social and health services see Chapter XVI. Welfare Services.

#### § 1. General

At the time of federation, the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. Following on the passing of the *Quarantine Act* 1908, a branch of the Department of Trade and Customs under the control of a Director of Quarantine was created on 1st July, 1909. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health.

#### § 2. National Health Benefits

1. **Pharmaceutical Benefits.**—A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital.

The patient pays the first 5s. of the cost of the prescription, but pensioners who are eligible for treatment under the Pensioner Medical Service (see para. 5, p. 683) receive all benefits without any contribution being made.

Total Commonwealth expenditure on pharmaceutical benefits in the year 1962–63 was £38,455,079.

2. **Hospital and Nursing Home Benefits.**—(i) *General.* Part V. of the *National Health Act* 1953–1963 which provides for the payment of Commonwealth hospital and nursing home benefits was amended by Act No. 82 of 1962 which received Royal Assent on 12th December, 1962 and came into effect on 1st January, 1963.

Commonwealth benefits are only payable in respect of treatment received in approved hospitals and approved nursing homes. For the purposes of the National Health Act, premises which provide medical treatment, care and accommodation for sick persons are

approved either as hospitals or as nursing homes depending mainly on their clinical standards and the type of patients accommodated. Usually premises are approved as hospitals if their general standards are substantially equivalent to those of a public hospital, and hospital treatment as defined in the National Health Act is provided. Premises are approved as nursing homes where their general standards are similar to those prevailing in benevolent homes, convalescent homes, rest homes or homes for the aged, and nursing home treatment as defined in the Act is provided.

(ii) *Patients in Approved Hospitals.* A basic principle of the provision of benefits for patients in approved hospitals is the Commonwealth support of voluntary insurance against the costs involved. Insured patients in approved hospitals receive a Commonwealth hospital benefit of 20s. a day which is paid through the contributors' registered hospital benefits organizations. Total payments by contributors to organizations range from 1s. to 4s. a week for single persons and from 2s. to 8s. a week for families. Examples of contributions and benefits payable, including Commonwealth benefits of £1 a day, are:—

Weekly contribution		Total benefits	
Single person	Family	Daily	Weekly
<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	£ <i>s. d.</i>
1 0	2 0	44 0	15 8 0
1 6	3 0	56 0	19 12 0
2 0	4 0	68 0	23 16 0
2 6	5 0	80 0	28 0 0
4 0	8 0	116 0	40 12 0

A contribution of 4s. a week covers a family for benefits greater than the public ward charge in any State.

*Contributions are allowable deductions for income tax purposes.*

During the waiting period of two months after joining an organization, the Commonwealth benefit is payable at the rate of 8s. a day, unless the organization pays fund benefits, in which case Commonwealth benefit is payable at the higher rate of 20s. a day. While a member is in arrears with his contributions and fund benefits are not payable, the Commonwealth benefit is payable at the rate of 8s. a day unless the member was in receipt of unemployment or sickness benefits under the *Social Services Act 1947-1963*.

Contributors who would have been excluded from fund benefits because of organizations' rules covering pre-existing ailments, chronic illnesses or maximum benefits are assured of hospital fund benefits by the provisions of the special account plan. The hospital fund benefit usually payable in such cases is 16s. a day and is paid either from special accounts, guaranteed by the Commonwealth, or from the ordinary accounts of the organization. One condition of payment is that the treatment in respect of which the fund benefit was paid was given in an approved hospital, although fund benefit is paid in certain circumstances in respect of treatment given in approved nursing homes. If the payments from the special accounts exceed contributions credited to the account, the amount of deficit is reimbursed by the Commonwealth.

A person who joins a registered hospital benefits organization within two months of being discharged from an approved nursing home is entitled to immediate Commonwealth benefit of 20s. per day and to fund benefits without having to serve a waiting period.

If a qualified patient in an approved hospital is not insured (i.e., not a member of a hospital benefits organization), a Commonwealth benefit of 8s. a day is deducted from his account by the hospital. The Commonwealth subsequently reimburses the hospital.

Under arrangements made with the States, pensioners who are enrolled in the Pensioner Medical Service and are treated in public wards of public hospitals are entitled (with a few exceptions) to free public ward treatment. For this the Commonwealth pays the hospitals a benefit of 36s. a day for each pensioner.

(iii) *Patients in Approved Nursing Homes.* The Commonwealth nursing home benefit of 20s. a day is payable to all qualified patients in approved nursing homes whether the

patients are insured or not. This benefit is deducted from the patient's account and subsequently paid by the Commonwealth to the nursing home. If no charge is made by the nursing home, the Commonwealth nursing home benefit of 20s. a day is still payable to the nursing home in respect of qualified patients.

There is no need for patients in approved nursing homes to be insured with a registered hospital benefits organization. Fund benefits are generally not payable. However, section 82E (2) of the National Health Act provides that where an insured special account patient is treated in an approved nursing home for an acute illness or condition, and is given treatment equivalent to that which he would have received in an approved hospital, approval may be given to the payment of special account fund benefits.

(iv) *Australians Overseas.* Australian residents who receive hospital treatment in recognized hospitals in overseas countries, while temporarily absent from Australia, are eligible to receive the Commonwealth and fund benefits to which they are entitled.

(v) *Expenditure on Hospital and Nursing Home Benefits.* Expenditure on hospital and nursing home benefits for 1962-63 was £21,540,213. In addition, Commonwealth payments towards special account deficits totalled £2,122,836. This does not include expenditure on mental hospitals (see p.p. 681-2).

The following table shows the amount of Commonwealth hospital benefits paid during the year 1962-63 giving the payments under the old arrangements for the six months ended 31st December, 1962, and under the new arrangements for the six months ended 30th June, 1963.

(a) Does not include payments of £2,122,836 towards Special Accounts Deficits in 1962-63. (b) No hospital benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of these Territories, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organization registered in one of the States and payments to them are included in the respective States.

(vi) *Registered Hospital Benefit Organizations.* The following table shows the number of registered hospital benefit organizations, the membership at 30th June, 1963, and fund benefit paid during the year 1962-63. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members.

**HOSPITAL BENEFITS: ORGANIZATIONS AND FUND BENEFITS, 1962-63**

(a) Ordinary benefits were payable in respect of:—(i) beds occupied by pensioners in public hospitals (12s. a day); (ii) beds occupied in certain South Australian hospitals (12s. a day); and (iii) other occupied beds in public hospitals and approved private hospitals (8s. a day). (b) Arrangements under which payment of ordinary benefit at 8s. per day were made ceased on 31st December, 1962. Payments shown for 1962-63 relate only to hospital bed days prior to 1st January, 1963.

3. **Mental Hospitals.**—In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals, the Commonwealth Parliament passed the *Mental Institutions Benefits Act* 1948. This Act ratified agreements with the States, whereunder it was provided that the States would cease making charges for the maintenance of mental patients and that the Commonwealth would pay the States a benefit based on the amount which had been collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance.

These agreements operated for five years, and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling a day for each patient. When the agreements terminated, Dr. Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey of mental health facilities and needs in Australia. His report, released in May, 1955, stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of £10 million to the States as part of a capital expenditure programme of £30 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer.

The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government from 1955-56 to 1962-63.

**EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH GOVERNMENT**

<b>Total, 1955-56 to 1962-63</b>	<b>3,201,441</b>	<b>2,740,000</b>	<b>667,837</b>	<b>632,611</b>	<b>295,277</b>	<b>355,000</b>	<b>7,892,166</b>

Amounts shown in the foregoing table represent payments made during the years shown under the *States Grants (Mental Institutions) Act 1955*. The total amounts payable to each State under this Act are in aggregate £10,000,000, to be distributed as follows:—New South Wales, £3,830,000; Victoria, £2,740,000; Queensland, £1,460,000; South Australia, £895,000; Western Australia, £720,000; and Tasmania, £355,000. Victoria and Tasmania have received their full entitlement under the Act.

There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

4. **Medical Benefits.**—(i) *General.* A medical benefits scheme has operated since July, 1953, being authorized firstly by the National Health (Medical Benefits) Regulations and then by the *National Health Act 1953–1963*.

The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits provided by the Commonwealth are paid either on a fee for service basis in respect of the items set out in the first and second schedules to the National Health Act or in the form of a subsidy not exceeding half of the payments made to doctors by registered organizations under contract arrangements.

In order to qualify for the Commonwealth benefit, a person is required to be insured with a registered medical benefits organization. The organization pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organization by the Commonwealth.

Commonwealth benefit ranging from 6s. for ordinary general practitioner visits to £22 10s. for major operations is payable to members of registered medical benefits organizations. The fund benefit payable varies according to the weekly contributions paid by the member and the particular medical service.

Examples of the range of benefits are as follows.

Type of service	Combined Commonwealth and fund benefits <sup>(a)</sup>
	£ s. d.
Certain major operations .. .. .	60 0 0
Appendix operation .. .. .	20 0 0
Midwifery .. .. .	12 0 0
Tonsils—	
Under 12 years .. .. .	5 0 0
12 years and over .. .. .	8 0 0
Surgery consultation—general practitioner .. .. .	0 16 0
	(13s. 6d. in some States)

(a) The total benefit varies according to the weekly contribution rate. The most common contribution rates are 2s. a week for single persons and 4s. a week for a family.

Provision is made for the payment of fund benefit from special accounts for claims lodged by contributors who have reached maximum benefits or who make claims in respect of pre-existing ailments. The medical special accounts are operated along the same principles as the hospital special accounts (*see p. 679*) and the special account fund benefit paid usually matches the Commonwealth benefit for the particular service.

(ii) *Australians Overseas.* Australian residents temporarily absent from Australia, who receive medical attention by registered medical practitioners in the country they are visiting, are entitled, if insured, to the Commonwealth benefit and the medical fund benefit to which they would be entitled if the service were rendered in Australia.

(iii) *Expenditure on Medical Benefits.* In 1962–63, Commonwealth expenditure on medical benefits was £11,490,936. In addition, Commonwealth payments towards special account deficits totalled £246,225.

The following table shows the number of registered medical benefit organizations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organizations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors.

MEDICAL BENEFITS: SUMMARY, 1962-63.

(a) No medical benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of those territories, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organization registered in one of the States.

5. Pensioner Medical Service.—The Pensioner Medical Service, which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the *National Health Services Act 1948-1949*. The service has been continued under the provisions of the *National Health Act 1953-1963*.

The service provided to eligible pensioners consists of medicine provided free of charge and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the service are those who satisfy a means test and are receiving an age, invalid or widow's pension under the *Social Services Act 1947-1963* or a service pension under the *Repatriation Act 1920-1963*, persons receiving a tuberculosis allowance under the *Tuberculosis Act 1948*, and dependants of persons eligible for the service.

Since 1st November, 1955, the means test which has applied to new enrolments in the service is the income test that had to be satisfied in order to qualify for a full rate pension as at 31st December, 1953.

The means test does not apply to persons who had applied for and were eligible to receive a pension prior to 1st November, 1955, or to persons receiving a tuberculosis allowance.

At 30th June, 1963, the total number of pensioners and dependants enrolled in the Pensioner Medical Service was 830,950, while the number of doctors participating in the scheme at that date was 6,025.

During the year ended 30th June, 1963, doctors in the scheme performed 7,389,117 services—visits and surgery consultations—for persons enrolled in the scheme. For these services, they were paid £4,572,898. The average number of services rendered by doctors to each person was 9.0.

6. Anti-Tuberculosis Campaign.—(i) *General*. The main provisions of the *Tuberculosis Act 1948* are as follows:—(a) Section 5 authorizes the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment

and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and to their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947-48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health. Other members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and an Administrative Officer of the Commonwealth Department of Health.

To help reduce the spread of infection, the Commonwealth Government pays living allowances to persons suffering from tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13th July, 1950. The rates now payable are:—married sufferer with a dependent wife, £12 2s. 6d. a week; dependent child or children under sixteen years of age, 15s. a week for each dependent child (additional to child endowment); sufferer without dependants, £7 7s. 6d. a week (reducible to £5 15s. a week if a person is maintained free of charge in an institution).

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a married person, £7 a week, and in the case of a person without a dependent wife, £3 10s. a week.

(ii) *New Tuberculosis Cases Notified.* The following table gives particulars of the number of new cases of tuberculosis notified in Australia for the year 1963.

TUBERCULOSIS: NEW CASES NOTIFIED(a), 1963

State or Territory	Age group (years)					Total

(a) Includes administrative costs.

**7. Anti-poliomyelitis Campaign.—(i) General.** Information concerning the initial production by the Commonwealth Government of anti-polio vaccine in Australia in 1955, and of the testing procedures which were carried out, is contained in Year Book No. 49 and earlier issues.

Distribution of the Salk poliomyelitis vaccine, which was supplied free of charge to the States, began in July, 1956. The States were responsible for the organization and running of their own campaigns and for the distribution of the vaccine in accordance with priority groups established by the National Health and Medical Research Council. Up to 1958, priority was given to children in the 0-14 age group, expectant mothers, and persons subjected to special risk. During 1958, this priority was extended to persons in the 15-44 age group. No child can be vaccinated without the consent of parents or guardian.

Vaccination against poliomyelitis takes the form of four injections of the vaccine. The second injection is given approximately four weeks after the first, the third injection is given not less than 32 weeks after the first and the fourth injection a minimum of one year after the third dose. Where the incidence of the disease in certain areas approaches epidemic proportions, special efforts have been made to vaccinate as soon as possible all persons in the area who give their consent.

One million doses of each of the three types of monovalent Sabin vaccine were imported by the Commonwealth in October, 1962, for use in a possible emergency. The decision whether to use the Sabin vaccine rests with the individual State Health Authorities.

It is difficult to give a completely accurate estimate of the vaccination coverage for the whole of Australia because methods of recording vaccination data differ from State to State. The proportion of children who had received three injections by 12 months of age is considered to be very small; by the recommended dosage schedule the third injection is given at 14 months or later. More than 60 per cent. of children from 15 months to 4 years have received 3 injections. In the age group 5 to 14 years, 90 per cent. have had 3 injections, as also have the 15 to 19 years group. Only 40 per cent. of persons 20 to 45 years old have received 3 or more injections.

Australia-wide information is not available regarding the proportion of the population which has now received a fourth injection, but if information from South Australia can be taken as a guide, it would appear that approximately 16 per cent. of those persons who have already received 3 injections have also received a fourth dose.

(ii) *New Cases of Poliomyelitis Notified.* The numbers of new cases of poliomyelitis notified in each State are shown for each year from 1956 to 1963 in the following table.

#### POLIOMYELITIS: NEW CASES NOTIFIED

8. *Free Milk for School Children Scheme.*—The *States Grants (Milk for School Children) Act* 1950 was passed with the object of improving the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending government or non-government primary schools, including nursery schools, kindergartens, crèches and missions for Aborigines, are eligible to receive free milk. The cost of the milk and half the capital or incidental costs, including administrative expenses of the scheme, are reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30th June, 1963, approximately 1,663,000 children were entitled to receive free milk under this scheme.

Expenditure by the Commonwealth Government under the scheme since its inception has been as follows.

**COMMONWEALTH EXPENDITURE ON MILK FOR  
SCHOOL CHILDREN SCHEME**

(£)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia
1958-59 ..	1,190,048	782,623	474,909	235,879	182,249	181,025	2,799	19,104	3,068,636
1959-60 ..	1,286,672	910,000	480,246	275,000	229,872	156,358	10,493	22,874	3,371,515
1960-61 ..	1,279,460	1,020,000	518,244	282,000	225,377	200,075	21,994	24,064	3,571,214
1961-62 ..	1,329,363	1,036,165	565,000	332,258	264,392	175,256	23,271	27,734	3,753,439
1962-63 ..	1,317,903	950,407	572,762	356,910	293,069	192,093	26,595	30,014	3,739,753
Total, 1950-51 to 1962-63..	12,719,236	8,017,862	4,290,100	2,640,089	2,039,058	1,922,180	90,215	199,163	31,917,903

The figures in the foregoing table differ slightly from those in the table shown in Chapter XVI. Welfare Services, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund (i.e., the cost of the milk).

### § 3. Commonwealth Organizations concerned with Health

1. National Health and Medical Research Council.—In 1926, the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between the Commonwealth and State Health Authorities". In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions:—to advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research; to advise the Commonwealth Government on the expenditure of money specifically appropriated to be spent on the advice of this Council; to advise the Commonwealth Government on the expenditure of money on medical research and on projects of medical research generally; and to advise Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The council consists of the Commonwealth Director-General of Health (as chairman), two other officers of the Commonwealth Department of Health, the official head of each State Health Department, the Director of Public Health for Papua and New Guinea, a representative of the Commonwealth Serum Laboratories Commission, and ten other members, one each being nominated by the Australian Medical Association, the Australian Dental Association, the Australian Paediatric Association, the Australian College of General Practitioners, the Royal Australasian College of Physicians, the Royal Australasian College of Surgeons, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the College of Pathologists of Australia, the College of Radiologists of Australasia, and the Australian universities having medical schools. An eminent layman and laywoman, appointed by the Commonwealth Minister for Health, also serve on the council.

The first session of the National Health and Medical Research Council was held at Hobart in February, 1937. The fifty-sixth session was held at Canberra in October, 1963.

Under the *Medical Research Endowment Act 1937*, the Commonwealth Government has made an annual appropriation of funds to assist:—(a) departments of the Commonwealth or of a State engaged in medical research; (b) universities for the purpose of medical research; (c) institutions and persons engaged in medical research; and (d) in the training of persons in medical research. In 1962-63, this appropriation was £298,500

Most of the detailed work of the Council is delegated to a number of specialized standing committees, on such subjects as medical research, public health, veterinary public health, occupational health, tropical health, dental health, epidemiology, maternal and child welfare, nutrition, nursing, food standards, food additives, radio-therapy and radio-isotopes. Applications for research grants are considered by the Medical Research Advisory Committee before being submitted to the Council, which then advises the Minister for Health.

**2. The National Biological Standards Laboratory.**—The *Therapeutic Substances Act* 1953–1959 provides the Commonwealth with powers to ensure that therapeutic substances used for the prevention, diagnosis and treatment of disease in man and animals are safe, pure and potent.

The Director-General of Health is authorized under this Act to set up laboratories to test such substances. In 1958, the first steps were taken to establish an Australian National Biological Standards Laboratory in Canberra.

The laboratory is divided into two main divisions, a Biological Division and a Pharmaceutical Division. The Biological Division consists of the Bacterial Products Laboratory, the Viral Products Laboratory, an Endocrine Products Laboratory and an Antibiotic Products Laboratory. The Pharmaceutical Division consists of an Analytical Chemistry Laboratory and a Pharmacology Laboratory.

All these laboratories have now been established and have commenced work.

Samples of therapeutic agents available in Australia are taken and tested for compliance with legal standards. A major function of the laboratories is the establishment of such standards where none at present exist or present standards are unsatisfactory.

The laboratories receive international reference standards of biological substances from stocks maintained by the World Health Organization, and will on request issue Australian reference standards which have been assayed against international standards.

**3. Commonwealth Serum Laboratories.**—The laboratories were established in 1916 under the administration of the Department of Trade and Customs and from 1921 to 1961 were operated under the Department of Health. By Act No. 38 of 1961, control of the laboratories passed to the Commonwealth Serum Laboratories Commission on 2nd November, 1961.

The laboratories' basic function is to ensure the supply of essential biological products in accordance with national health needs. This includes:—production and supply of essential biological products; research and development relating to biological products and allied fields; and the maintenance of potential production capacity for use in emergencies.

Since their foundation, the laboratories have greatly extended in size and scope. They now produce some 450 regular products and many special products for use in the diagnosis, prevention and treatment of human and animal diseases. Professional, technical and other staff total over 900.

Products comprise a full range of human bacterial and virus vaccines, veterinary bacterial and virus vaccines, serum products such as blood fractions, a wide variety of antibacterial and antitoxic sera, antivenenes, penicillin, endocrines, including insulin, A.C.T.H., pituitary and thyroid extracts, allergy testing materials and desensitizing preparations, culture media and diagnostic agents for clinical and laboratory work. More recently, tissue culture materials have been prepared and supplied to virus research workers throughout Australia.

Continuous research is conducted into the relevant aspects of microbiology and immunology, and related fields. As the growth of medical and scientific knowledge in Australia and overseas reveals new methods of diagnosis, prevention and treatment of diseases, this information is applied to the preparation of new biological products at the laboratories.

Facilities are maintained for investigations into public health matters which are inconvenient or impracticable to handle at the Commonwealth Health Laboratories or the School of Public Health and Tropical Medicine.

The laboratories serve as a national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization). They act as a regional reference centre for W.H.O. in collating reports of the prevalence of certain infectious diseases, and provide facilities for the identification of these diseases.

Veterinary biological products produced at the laboratories have given the lead to other producers in Australia, resulting in the diminution of incidence of a number of serious infectious stock diseases.

4. **The Commonwealth Health Laboratories.**—Health laboratories, of which there are fifteen, are situated in the following towns: Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. They were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide doctors of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner, with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other, is essential to the investigation and control of disease.

From this standpoint, the laboratories have proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems in Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations, close co-operation exists with State and local health and hospital services, especially in Queensland, where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers previously unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the School of Public Health and Tropical Medicine, Sydney.

The laboratories are unique in that, with the exception of the use of X-rays, they cover all the fields of diagnostic requirements, namely, pathology, public health, haematology, parasitology, mycology, bacteriology, biochemistry and blood group serology.

5. **Commonwealth Acoustic Laboratories.**—Sponsored by the National Health and Medical Research Council, the Acoustic Research Laboratory, Sydney, investigated inter-communication difficulties and noise problems in aircraft and tanks (1942–46). It then investigated the problem of congenital deafness in children resulting from maternal rubella. The Department of Health took over the laboratory in January, 1947, and subsequently established branch laboratories in all other State capitals.

The *Acoustic Laboratories Act* 1948 gave the Minister for Health the right to establish, maintain and operate, within the Commonwealth, acoustic laboratories for scientific investigations, including tests in respect of hearing aids and their application to the needs of individuals, and in respect of problems associated with noise as it affects individuals. Scientific investigations are carried out in the Central Laboratories in Sydney by specialized scientific groups in psychology and audiology, acoustics and electroacoustics, medical ultrasonics, and psychoacoustics. The results of this research are published in scientific literature and Commonwealth Acoustic Laboratories reports. In 1949, the Government approved the provision and maintenance of hearing aids, without charge, to deaf school and pre-school children. This service has since been extended to those whose hearing loss is discovered after leaving school, but who are still under 21 years of age. The laboratories' functions also include:—provision and maintenance of hearing aids on behalf of Repatriation and other Commonwealth Departments; assistance to the State Education Departments in measuring deafness by providing and maintaining portable audiometers; the making of hearing tests of Civil Aviation aircrew as required by international agreement; and the making of independent tests on behalf of State and other authorities.

The Central Laboratories located in Sydney are responsible for staff training, production of equipment, calibration of hearing-aids and audiometers, and the technical administration of branch laboratories.

**6. Commonwealth X-ray and Radium Laboratory.**—In 1928, the Commonwealth Government purchased ten grammes of radium for use in medical treatment and research in Australia. The use of this radium was to be co-ordinated by the Department of Health, and in 1929 the Department established the Commonwealth Radium Laboratory to act as custodian of the radium and to ensure its equitable distribution and efficient use.

The radium is distributed on loan to treatment centres throughout Australia. Under the terms of these loans, treatment at well-equipped clinics is available to all persons requiring it, irrespective of their ability to pay. Portions of the original stock of radium have been remounted from time to time, reflecting changes in techniques of treatment.

In 1935, the work of the laboratory was extended to include physical aspects of X-ray therapy and the name of the laboratory was changed at this time to its present form.

Since 1939, the functions of the laboratory have included investigations of the physical aspects of the diagnostic use of X-rays with particular emphasis on miniature radiography and high-kilovoltage techniques.

In 1946, the laboratory imported the first artificially-produced radioactive isotopes used in Australia and established a system for the procurement and distribution of these substances.

A radiochemical laboratory and associated facilities were set up in the laboratory to permit the assay of radioactive materials present in minute amounts in the environment—in air, water, soil, and foods such as milk, grain and vegetables. A programme of monitoring the fall-out in Australia arising from the testing of nuclear weapons is continuing.

The laboratory co-operates with the physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of the exposure to radiation of those who work with X-rays and radioactive materials. The services of the laboratory are available to all who work with ionizing radiations.

A radon service has been operated by the laboratory since its inception. During the year ended 30th June, 1963, 33,701 millicuries of radon were issued by the laboratory in the form of implants, needles and tubes for use in Victoria, Tasmania, South Australia and Western Australia. A further 20,483 millicuries were issued by the associated centres in Sydney and Brisbane. The corresponding figures for 1961–62 were 32,724 millicuries and 24,825 millicuries, respectively. The issue of radon from a few centres to serve hospitals all over the continent is an Australian development which enables very efficient use to be made of the radium available.

Since 1935, the laboratory has maintained the Australian (free-air) standard for the precise measurement of X-ray dose. Sub-standard clinical dosimeters used by the laboratory and by centres in other States are calibrated in terms of this standard.

Through the development of atomic energy programmes overseas, supplies of radio-isotopes have been available for use in Australia since 1946. Some of the radio-isotopes required in Australia are prepared by the Australian Atomic Energy Commission in its reactor at Lucas Heights. At the present time, the procurement and distribution of radio-isotopes to be used in medicine and medical research are the responsibility of the Department of Health, and these isotopes are procured by the laboratory, as a central procurement agency, principally from Great Britain, Canada and the United States of America. The procurement and distribution of radio-isotopes for industrial and non-medical uses are the responsibility of the Australian Atomic Energy Commission.

The importation of radio-isotopes is restricted under the Customs (Prohibited Imports) Regulations. Approval for importation is given either by the Director-General of Health or by the Australian Atomic Energy Commission, depending on the category of use, after it has been established that the isotope will be used safely and usefully.

During 1962-63, 28 different isotopes were procured for use in medicine and medical research. They represented 1,329 separate deliveries, of which 68 (including five different isotopes) were from the Australian Atomic Energy Commission. Of the 28 isotopes, sixteen were for use in medical diagnosis or treatment, as distinct from medical research. Bulk supplies of radio-isotopes used for diagnosis or treatment are obtained regularly, and these are distributed by the laboratory as individual doses for use on patients throughout Australia in accordance with a policy developed by the Committee on Radio-isotopes of the National Health and Medical Research Council. These radio-isotopes are issued free of charge. In the year ended 30th June, 1963, 14,327 individual doses of these materials were issued for use on patients.

Investigations of the degree of protection necessary in particular applications of X-rays and radioactive materials continue to be an important activity of the laboratory. It prepares specifications of the protection facilities necessary in departments and laboratories employing ionizing radiations in medicine, research, and industry, and carries out measurements of radiation levels in existing departments and laboratories. A film-badge service to measure the radiation dose received by those exposed to ionizing radiations is maintained. In 1962-63, 46,370 film-badges were processed, assessed and reported on; the corresponding figure for the previous year was 31,118.

The laboratory maintains a library of radiological literature and issues library bulletins at appropriate intervals. Technical communications on topics related to its functions are issued from time to time.

**7. The School of Public Health and Tropical Medicine.**—In March, 1930, the Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The School comprises sections of Preventive Medicine, Tropical Medicine, Occupational Health, Environmental Health, Biochemistry, Bacteriology and Pathology, Parasitology, Medical Entomology, and Medical Statistics. The Child Welfare section of the Institute of Child Health is located at the School, with which it is closely associated. The Occupational Health Section undertakes surveillance of the health of persons employed at the Small Arms Factory, Lithgow, and at the Munitions Filling Factory, St. Mary's. The Library, which includes approximately 17,000 bound volumes and a large collection of official and institutional papers and reports, forms an important information centre in the subjects of public health and tropical medicine.

The work of the school comprises both teaching and investigation. Courses are held for the university post-graduate diploma in public health and the diploma in tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Courses are provided also in hygiene and social medicine for students of architecture and social studies; in tropical medicine for lay officers, nurses in tropical service, and missionaries; and in industrial health for engineering students. Training is also provided for certain personnel of the armed services, for laboratory workers from various services and institutions, and for post-graduate nursing diploma students.

Investigations cover a wide range of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out in Australia and in Papua, New Guinea, Norfolk Island, and Nauru in co-operation with the local administrations and the South Pacific Commission. Limited accommodation and other facilities for investigation can be made available at the school for independent research workers.

**8. Institute of Child Health.**—Associated with the School of Public Health is the Institute of Child Health, part of which is located in the School of Public Health and Tropical Medicine in the grounds of the University of Sydney, and part at the Royal Alexandra Hospital for Children, Camperdown. The activities of the Institute are concerned with research into medical and social problems of childhood, undergraduate teaching of students

of the Faculty of Medicine in the University of Sydney, post-graduate teaching of doctors and members of associated professions, and collaboration with other bodies concerned with the general field of child health.

The establishment of the Institute at present consists of the director, two senior medical officers, one child psychiatrist, five other medical officers, a psychologist, two social workers, and clerical staff.

The director of the Institute is the Professor of Child Health in the University of Sydney. He is also a senior honorary paediatrician on the staff of the Children's Hospital. The child psychiatrist is also Associate Professor of Child Psychiatry in the University of Sydney.

The director is required to co-ordinate and control undergraduate and post-graduate teaching in paediatrics and child health. Each group of medical students attends the Children's Hospital for 10 weeks tuition in paediatrics and child health.

The particular research activities of the Institute vary with the immediate and long-term problems which present themselves. Fields of study have included rheumatic fever, scurvy, accidents, prematurity, hypothyroidism and mental deficiency. Studies are undertaken into the problems of infants and children deprived of a normal home life.

Members of the Institute staff are available for consultation by Commonwealth and State authorities and voluntary agencies.

**9. Commonwealth Bureau of Dental Standards.**—This Bureau is concerned with research, standards, and testing related to dental and allied materials and processes. It became part of the Department of Health in January, 1947, but for the preceding eight years it was sponsored by the National Health and Medical Research Council. During that time, the then Dental Materials Research Laboratory established itself as a recognized authority in its special field and proved to be of value to the defence services, government departments, the dental profession and manufacturers of dental products. By maintaining the quality of dental materials and improving techniques for their use, the Bureau continues to assist the dentist in his service to the community—a service that calls for restorations and appliances of a high degree of precision and permanence under very exacting conditions.

The functions of the Bureau are:—original research into dental equipment, materials, techniques and processes; regular reporting of the results of these investigations in recognized Australian scientific journals; the development of specifications for dental materials and equipment, through the Standards Association of Australia, in consultation with a committee representing the Commonwealth Department of Health, the Australian Dental Association, and manufacturers and distributors; and the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials with a view to assisting them in the improvement of existing products and the development of new materials.

**10. The Australian Institute of Anatomy.**—The Australian Institute of Anatomy is situated in a building erected in Canberra by the Commonwealth Government under the *Zoological Museum Agreement Act 1924*. Prior to the passing of this Act, the Commonwealth Government had expressed regret that the Australian nation possessed neither a collection of specimens of the unique and fast disappearing fauna of Australia, nor a museum in which such specimens could be preserved for future generations. Sir Colin MacKenzie, the first Director of the Institute of Anatomy, presented his entire private collection of Australian fauna to the Commonwealth Government. This gift was housed in the Institute. The Institute became part of the Commonwealth Department of Health in 1931.

The original collection has been greatly augmented. In addition to donations of material, there have been several endowments for orations and lectures.

The Institute consists of a museum section and a laboratory section. In the museum section, which is open to the public, a portion of the original collection of anatomical specimens assembled by Sir Colin MacKenzie is displayed, together with ethnological collections

which have been added since the foundation of the Institute. The material has been arranged to present simple lessons in human hygiene, to display the anatomical features and peculiarities of Australian fauna, and to display aspects of the character of Australian Aborigines and indigenes of Papua and New Guinea.

A number of Health Department sections are now situated in the Institute. These include the Museum and Medical Artistry Section, the Nutrition Section, the Commonwealth Health Laboratory for the Australian Capital Territory, and a Veterinary Laboratory.

The scientific research work of the Institute is now concentrated on problems of nutrition. It takes the form of field surveys of the dietary status of the Australian population and laboratory investigations into the biochemistry of nutrition and metabolism.

#### § 4. Control of Infectious and Contagious Diseases

1. **General.**—The provisions of the various Acts with regard to the compulsory notification of infectious diseases and the precautions to be taken against their spread are dealt with under the headings of quarantine and notifiable diseases (including venereal diseases).

2. **Quarantine.**—The *Quarantine Act* 1908–1961 is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) human quarantine, which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

(i) *Human Quarantine.* All passengers and crews arriving in Australia from overseas, whether by air or sea, are subject to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports, full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague and typhus fever. These diseases are not endemic to Australia, and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever and measles are directed to appropriate care and placed in isolation where necessary.

The increasing use of air travel has created particular quarantine problems. Before the use of air transport, persons suffering from an infectious disease would show symptoms on arrival and before disembarkation. Passengers travelling by air, however, can arrive well within the incubation period, and they are, therefore, required to be vaccinated against smallpox before departure. Those from an area infected with cholera or yellow fever are required to be inoculated, in addition, against the particular disease prevalent in that area. Children under one year of age are exempt from inoculation against smallpox and cholera but there is no age exemption from yellow fever inoculation. Passengers are also required to report any sickness which they might suffer within fourteen days after arrival.

Passengers arriving in Australia by sea are also required to be vaccinated against smallpox, but exemption is granted to infants under twelve months of age, and to those who hold religious convictions against vaccination or who are suffering from a medical condition

which makes vaccination undesirable. All passengers, whether they arrive by sea or air, are required to give their intended place of residence, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

The number of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during the year ended 30th June, 1963, and during the preceding four years, are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES ON OVERSEA VESSELS AND AIRCRAFT CALLING AT AUSTRALIAN PORTS, 1962-63**

Disease	Number of overseas vessels and aircraft on which cases were found	Number of cases of infectious disease	
		Passengers	Crew
Chicken pox .. .. .	35	74	6
Gastro enteritis .. .. .	1	1	..
Gonorrhoea .. .. .	9	..	20
Infectious diarrhoea .. .. .	1	2	..
Infectious hepatitis .. .. .	3	1	2
Influenza .. .. .	2	18	2
Measles .. .. .	45	323	1
Mumps .. .. .	9	12	..
Pulmonary tuberculosis .. .. .	4	2	2
Rubella .. .. .	4	5	..
Syphilis .. .. .	2	..	2
<b>Total .. .. .</b>	<b>(a) 91</b>	<b>438</b>	<b>35</b>

(a) On some vessels there were cases of more than one disease.

**HUMAN QUARANTINE: OVERSEA VESSELS AND AIRCRAFT ARRIVING IN AUSTRALIA AND CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASE FOUND**

Year	Number of overseas vessels and aircraft cleared		Number of overseas vessels and aircraft on which cases were found	Number of cases of infectious disease	
	Ships	Aircraft		Passengers	Crew
1958-59 .. .. .	2,826	1,938	63	344	9
1959-60 .. .. .	3,046	2,063	61	234	12
1960-61 .. .. .	3,481	2,354	55	296	4
1961-62 .. .. .	3,761	2,417	67	221	15
1962-63 .. .. .	2,943	3,414	91	438	35

(ii) *Animal Quarantine.* Animal quarantine, authorized by the provisions of the *Quarantine Act 1908-1961*, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats and poultry are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention.

Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, types of wool, skins and hides, are specially treated under quarantine control. Such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items, such as harness fittings, fodder, and ship's refuse, are treated to destroy any possible infection.

The Animal Quarantine Service is also responsible for the health certification of animals for export overseas in accordance with requirements of the various countries.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. The central administration is situated within the Health Department at Canberra, with a director, an assistant director, and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of that State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the quarantine control of imports, there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the General and Plant divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason animal and general quarantine administration are in some respects inseparable. Similarly the interests of animal and plant divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

Every two years the director of the Division convenes the Biennial Conference of Principal Commonwealth and State Veterinarians, which meets under the auspices of the Australian Agricultural Council to discuss problems of animal health and disease control and animal quarantine.

(iii) *Plant Quarantine.* Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the *Quarantine Act 1908-1961*, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921, the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created, under a director who is responsible for policy and legislation and for co-ordinating the work of the State officers, who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or, if treatment is impracticable, may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles. (a) The importation

of plants likely to be infected with plant diseases, noxious fungi or poison plants is prohibited. (b) Agricultural seed must conform to standards of purity, insect pest and disease freedom. Some seeds are prohibited except with special permission of the Director of Quarantine, who specifies conditions of importation. (c) Many commodities such as hops, cotton, peanuts in shell, potatoes, certain crop seeds, vines and specified plants may be imported only by approved importers under special conditions. (d) Certain plant products such as bulbs and timber (in logs or sawn) from specified areas may be imported only if accompanied by certificates showing that prescribed treatment has been given in the country of origin. (e) All nursery stock, including bulbs, must be grown in post-entry quarantine. Propagating material for commercial fruits, vines and berries is permitted importation only after being specially screened for virus diseases. Such material may be imported only by approved importers who are registered for this purpose. The numbers of plants which may be imported in any one year are limited.

3. Notifiable Diseases.—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the Health Acts of all States for the compulsory notification of certain infectious and other diseases and for the application of preventive measures. When any such disease occurs, the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts, and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from, or to be carriers of, infectious disease must submit to clinical and laboratory examination. Persons suffering from certain communicable diseases, for example, smallpox and leprosy, are detained in isolation.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following tables show, for each State and Territory, the diseases notifiable in 1963, and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

Factors such as the following affect both the completeness of the figures and the comparability from State to State and from year to year:—availability of medical aid; diagnostic practices of doctors—e.g., infectious hepatitis may not be diagnosed as such unless jaundice is also present; enforcement and follow-up of notifications by Health Departments; differences in sources of notifications; differences in definitions of notifiable diseases in Health Acts—e.g., puerperal fever and encephalitis; and varying degrees of attention to notification of diseases of minor importance.

(a) No cases of cholera, plague, smallpox, epidemic typhus or yellow fever were notified. (b) There are popular names for various diseases mentioned in the table above. While these names may not be clearly defined or acceptable for diagnostic purposes, the most common ones are listed here for the information of the lay reader:—hookworm (ankylostomiasis); undulant fever (brucellosis); St. Vitus dance (chorea); Weil's disease or seven-day fever or swamp fever (leptospirosis); parrot fever (ornithosis); childbed fever (puerperal fever); German measles (rubella). (c) Chorea is included with acute rheumatism (rheumatic fever). (d) Included with typhoid fever. (e) These are figures supplied by the Directors of Tuberculosis in each State. (f) Under the Queensland Health Acts notifications of tuberculosis include erythema nodosum and pleural effusion. (g) Included with infectious hepatitis. \* Not notifiable.

(ii) *Specific Diseases.* (a) *Tuberculosis and Poliomyelitis.* The number of new cases of tuberculosis notified in each State and Territory by age groups for the year 1963 is shown on page 684. Some data regarding deaths from tuberculosis are shown on page 347 of Chapter X. Vital Statistics.

Cases of poliomyelitis notified in each State and Territory for the years 1956 to 1963 are shown on page 686.

(b) *Infectious Hepatitis.* The following table shows the number of cases of infectious hepatitis notified in each State and Territory during the years 1959 to 1963.

## INFECTIOUS HEPATITIS: CASES NOTIFIED.

(c) *Venereal Diseases.* The prevention and control of venereal diseases are the responsibility of State Health Departments. The necessary powers for the purpose are provided either by a special Venereal Diseases Act or by a special section of the Health Act. Venereal diseases are notifiable in all States except in South Australia, where however, the Director-General of Public Health is empowered to compel a venereal disease suspect to submit to medical examination and, if found infected, to medical treatment. While the provisions of the legislation differ from State to State, the Acts usually make it obligatory upon the patient to report for and continue under treatment until certified as cured. Treatment of venereal disease must be by a registered medical practitioner. Facilities for treatment of venereal disease free of charge may be arranged at subsidized hospitals or at special clinics. Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person, or the employment of an infected person in the manufacture or distribution of foodstuffs.

## § 5. Commonwealth Grants to Organizations Associated with Public Health

1. *General.*—In addition to providing the services mentioned in §§ 2-4 above, the Commonwealth Government gives financial assistance to certain organizations associated with public health. Examples of organizations included in this category are the National Fitness Organizations, the Royal Flying Doctor Service of Australia, the Red Cross Blood Transfusion Service, the Lady Gowrie Child Centres, and the National Heart Foundation of Australia.

2. *National Fitness.*—In 1938, arising from a recommendation of the National Health and Medical Research Council, the Commonwealth Government appointed a National Co-ordinating Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and local government authorities in the National Fitness Movement. Following the recommendations of the first Co-ordinating Council meeting in 1939, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years, and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education.

The movement was placed on a statutory basis with the passing of the *National Fitness Act* 1941. The Act provides for a Commonwealth Council for National Fitness to advise the Minister for Health concerning the promotion of national fitness. It provides also for the establishment of a Trust Account, known as the *National Fitness Fund*, to assist in financing the movement. In June, 1942, the annual appropriation from revenue to the National Fitness Fund was increased to £72,500 to include grants to the State Education Departments and for the work in the Australian Capital Territory. The annual appropriation was increased to £100,000 in 1962, the increase of £27,500 being made available to the National Fitness Councils in the States. The £100,000 is disbursed as follows:—State National Fitness Councils, £64,454; Universities, £12,400; State Education Departments, £17,000; central administration, £3,396; and Australian Capital Territory, £2,750.

The annual grant of £2,750 allocated in the Australian Capital Territory is distributed mainly on a £1 for £1 basis to youth and sports organizations for the purchase of equipment, the development of coaching schemes, and the extension of club and camp facilities.

3. **Royal Flying Doctor Service of Australia.**—The purpose of the Royal Flying Doctor Service of Australia is to provide medical and dental services to persons in isolated areas. Most remote homesteads are equipped with two-way radio sets which they use for receiving ordinary radio programmes, participating in the School of the Air, and for contacting each other. In cases of minor illness or injury, they also use these sets to seek medical advice. If the illness or injury is serious, a doctor flies to the homestead and, if necessary, flies the patient to the nearest hospital. Standard medicine chests are supplied by the service. Each chest contains a first-aid book and instructions on the use of the various drugs and medical supplies. Further instructions are given by doctors over the air.

From time to time, special purpose work is undertaken in connexion with flood relief, searching for lost parties and co-ordinating cattle movements.

The service is not conducted for profit. In some sections, small charges are made for particular services or a fixed annual charge is levied on graziers. Other sections rely on voluntary contributions from those who use their services. Donations and government contributions help to provide much of the overhead and capital expenditure incurred each year.

The Commonwealth has made an annual grant to the service for operational expenses since 1936. The Commonwealth annual grant to the Royal Flying Doctor Service of Australia towards maintenance was increased from £40,000 to £55,000 per annum for three years from 1st July, 1962. The Commonwealth grant towards capital expenditure was increased from £27,500 to £40,000 per annum for the same period. This capital expenditure grant is made on a £1 for £1 basis, in respect of approved projects.

The Royal Flying Doctor Service of Australia is conducted by a federal council comprising representatives of six sections, namely Queensland, New South Wales, Victoria, South Australia, Western Australia and the Eastern Goldfields of Western Australia. The Queensland, New South Wales and South Australian sections are centred in their own States, but in Western Australia there are three centres, that in the far north being under the control of the Victorian section, and that in the south-east under the control of the Eastern Goldfields section. The third, which has bases at Port Hedland and Meekatharra, is sponsored by the Western Australian section.

4. **Red Cross Blood Transfusion Service.**—The Australian Red Cross Society conducts a blood transfusion service in all States.

Before 1952–53, the cost of the Red Cross Blood Transfusion Service was borne by the Red Cross Society with assistance from the State Governments. In 1952, the Commonwealth made an amount of £50,000 available to the Red Cross Society through the State Governments. The States were to continue to assist the society at the same level as previously and make arrangements with the society to share any deficit still remaining.

The Commonwealth recognized that the proper maintenance of a blood transfusion service was of the utmost importance to the welfare of the community and that the service was one eminently suited for operation by the Australian Red Cross Society. In March, 1954, therefore, the Commonwealth offered each State Government a grant equal to 30 per cent. of the certifiable operating expenses incurred by the Society in the conduct of the blood transfusion service in that State. The grant was to be made subject to the condition that the Government of the State concerned agreed to meet 60 per cent. of the cost of operating the service in that State, leaving the society to meet the remaining 10 per cent. of the cost. All States accepted this proposal. The payments made by the Commonwealth government to the State governments in 1962–63 were as follows:—New South Wales, £47,996; Victoria, £55,846; Queensland, £36,953; South Australia, £21,008; Western Australia, £17,427; Tasmania, £5,385; total, £184,615.

5. **Lady Gowrie Child Centres.**—In 1940, the Commonwealth Government established a pre-school demonstration centre in each of the six capital cities. These centres are known as the Lady Gowrie Child Centres and are administered by the Australian Pre-school Association. A grant of £50,000 per annum is made available by the Commonwealth towards the operation of the centres.

The specialized function of the centres is that of demonstration and research, and the programmes are carried out under the supervision of the Federal Pre-school Officer. Each centre is concerned with a study of the factors promoting and retarding physical and mental health in young children, and in demonstrating an educational health programme based on the developing needs of children aged 3 to 6 years.

The centres are used for observation by students of medicine, psychology, education, social studies, architecture, nursing, domestic science, and by student teachers.

6. **Home Nursing Subsidy Scheme.**—The Home Nursing subsidy scheme provides payments to assist the expansion of home nursing activities. To be eligible for a subsidy, an organization must be non-profit making and must receive assistance from a State Government, local government body, or other authority established by or under a State Act. It must employ registered nurses. It is provided that Commonwealth subsidy must not exceed the amount of State assistance received by the organization concerned. Eligible organizations established prior to November, 1956, now receive £1,000 a year in respect of each additional qualified nurse employed, and new organizations established since November, 1956, receive £500 a year in respect of each qualified nurse employed.

Expenditure during the year on the promotion of the Home Nursing Service was £144,388. The Commonwealth subsidy paid to various district nursing organizations has led to the employment of 192 trained nurses.

7. **National Heart Foundation of Australia.**—The National Heart Foundation of Australia is a national organization established to promote research in cardiovascular disease, to rehabilitate heart sufferers and to foster the dissemination of information about heart diseases.

Formed in 1960, as a result of a public appeal yielding £2,500,000 to which the Commonwealth Government contributed £10,000, the Foundation has its headquarters in Canberra.

The organization is controlled by a Board of Directors assisted by various Committees. State Divisions with their own administrations deal especially with rehabilitation and education.

From its inception to the end of 1963, the Foundation has allocated over £640,000 for grants-in-aid towards research in university departments, hospitals and research institutes, research fellowships tenable in Australia and overseas, and oversea travel grants. Most of the annual expenditure of about £300,000 is devoted to supporting research in cardiovascular disease.

## INSTITUTIONS

NOTE.—Institutions referred to under this heading are classified into the following groups:—(i) Public (other than mental); (ii) Mental; (iii) Private; (iv) Repatriation; (v) Isolation (leper).

### § 1. Public Hospitals (other than Mental Hospitals)

1. **General.**—The statistics shown in this section refer to all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals, leper hospitals, and private hospitals conducted commercially. They include hospitals wholly provided for by the State, hospitals partially subsidized by the State or by State endowments but receiving also private aid, and hospitals established and endowed by individuals for the benefit of the needy generally. All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are special hospitals for infectious diseases, tubercular patients, women, children, and patients suffering from chronic diseases.

2. **Number, Staff and Accommodation.**—Details regarding the number of public hospitals, staff, and accommodation for the year 1961–62 are given in the following table.

**PUBLIC HOSPITALS: NUMBER, STAFF AND ACCOMMODATION, 1961-62**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides and nursing aide trainees.

3. **In-patients Treated.**—The following table gives particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital after their mothers' discharge.

## PUBLIC HOSPITALS: IN-PATIENTS TREATED, 1961-62

In addition to those admitted to the hospitals, there are large numbers of out-patients treated. During 1961-62, there were 1,233,225 out-patients treated in New South Wales, 626,397 in Victoria, 655,463 in Queensland, 112,445 in South Australia, 132,000 (estimated) in Western Australia, 92,929 in Tasmania, 78,210 in the Northern Territory and 16,120 in the Australian Capital Territory, making an estimated total for Australia of 2,946,800. The figures quoted refer to cases, as distinct from persons and attendances.

4. Revenue and Expenditure.—Details of the revenue and expenditure for the year 1961-62 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme.

5. **Summary.**—A summary, for the years 1957–58 to 1961–62, of the number of public hospitals in Australia, medical and nursing staffs, beds, admissions, in-patients treated, out-patients, deaths, average daily number resident, revenue and expenditure is given in the following table.

## PUBLIC HOSPITALS: AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Hospitals .. .. .	735	733	736	736	743
Medical staff(a) .. .. .	9,098	9,354	9,954	10,386	10,535
Nursing staff(b) .. .. .	32,436	34,372	36,023	37,607	39,082
Beds and cots .. .. .	56,618	58,544	60,203	61,039	61,642
Admissions during year .. .. .	1,085,503	1,133,172	1,153,690	1,182,198	1,235,665
Total in-patients (cases) treated .. .. .	1,123,799	1,172,861	1,196,111	1,225,060	1,278,417
Out-patients (cases)(c) .. .. .	2,641,000	2,665,700	2,754,400	2,794,400	2,946,800
Deaths .. .. .	33,689	35,848	35,407	36,619	37,569
Average daily number resident .. .. .	38,470	40,021	40,672	41,009	42,105
Revenue .. .. . £'000	87,692	90,512	98,976	109,399	119,456
Expenditure .. .. . £'000	86,817	90,157	97,987	108,556	119,336

(a) Honorary and salaried. (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides and nursing aide trainees. (c) Partly estimated.

## § 2. Mental Hospitals

1. **General.**—Statistics of mental hospitals presented in the following tables, with the exception of those relating to revenue and expenditure, include particulars of the two authorized hospitals conducted by religious organizations in New South Wales. The figures exclude reception houses and observation wards in gaols. There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

2. **Hospitals, Staff and Accommodation.**—Particulars regarding the number of hospitals, the medical and nursing staff, and accommodation are given in the following table for the year 1962. Figures for Victoria and Western Australia relate to 31st December, 1962. Figures for the other States relate to 30th June, 1962.

## MENTAL HOSPITALS: NUMBER, STAFF, ACCOMMODATION, 1962

Particulars	N.S.W.	Vic.(a)	Q'land (b)	S. Aust.	W. Aust. (a)	Tas.	Aust.
Number of Hospitals .. .. .	15	(c) 9	5	2	(d) 6	1	38
Medical Staff—							
Males .. .. .	93	107	17	13	16	5	251
Females .. .. .	14	18	3	3	..	..	38
Persons .. .. .	(e) 107	125	20	16	16	5	289
Nursing Staff and Attendants—							
Males .. .. .	1,288	1,196	639	247	242	114	3,726
Females .. .. .	1,378	1,403	489	290	201	100	3,861
Persons .. .. .	2,666	2,599	1,128	537	443	214	7,587
Accommodation—							
Number of beds and cots .. .. .	13,494	8,891	4,267	2,696	1,915	850	32,113

(a) 31st December, 1962. (b) Includes the Epileptic Home. (c) Excludes two institutions previously listed as mental hospitals which were re-classified in 1962 as Intellectual Deficiency Training Centres. (d) Includes two mental institutions not included in years previous to 1962. (e) In addition, there are in New South Wales 57 visiting specialists who are paid for their services.

3. **Patients.**—Information regarding patients treated during 1961–62 is given in the following table. The figures include voluntary patients in all States with the exception of South Australia, but they are included in the average daily resident shown for that State. They were excluded from figures for New South Wales published for years previous to 1962.

Persons who are well advanced towards recovery are allowed to leave the hospitals and live with their relatives or friends, but they are under supervision and their names are kept in the records. These persons have been included in the table below as patients at the end of the year.

MENTAL HOSPITALS: PATIENTS, DEATHS, ETC., 1961-62

Particulars	N.S.W.	Vic. (a)(b)	Q'land (c)	S. Aust. (d)	W. Aust. (a)(e)	Tas.	Aust.
Number of patients at beginning of year—

Number of patients at end of year—							
Males .. .. .	7,136	4,154	2,427	1,342	1,218	347	16,624
Females .. .. .	7,097	4,286	1,845	1,067	916	421	15,632
Persons .. .. .	14,233	8,440	4,272	2,409	2,134	768	32,256
Average daily number of patients resident—							
Males .. .. .	6,252	3,745	2,261	1,340	1,057	349	15,004
Females .. .. .	5,912	3,862	1,689	1,052	773	414	13,702
Persons .. .. .	12,164	7,607	3,950	2,392	1,830	763	28,706
Average number of patients resident in mental hospitals per 1,000 of population—							
Males .. .. .	2.68	2.49	2.90	2.71	2.75	1.93	2.61
Females .. .. .	2.59	2.60	2.26	2.17	2.08	2.35	2.44
Persons .. .. .	2.64	2.54	2.59	2.44	2.42	2.14	2.53

(a) Year ended 31st December, 1962. (b) Excludes patients at two institutions listed as mental hospitals in previous years which were re-classified in 1962 as Intellectual Deficiency Training Centres. (c) Includes persons treated at the Epileptic Home. (d) Includes voluntary patients average daily resident only. (e) Includes patients at two mental institutions excluded in years previous to 1962.

4. Revenue and Expenditure, 1961-62.—Mental hospitals are maintained by the State governments. They derive a small proportion of their revenue from other sources (chiefly patients' fees, pharmaceutical benefits and sale of farm produce), but in 1961-62 these sources provided less than six per cent. of all their revenue. For a statement on the funds provided by the Commonwealth Government for mental hospitals, see para. 3, Mental Hospitals, pages 681-2.

In New South Wales, the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals.

## MENTAL HOSPITALS: FINANCES, 1961-62

(£'000)

Particulars	N.S.W. (a)	Vic. (b)	Q'land (c)	S. Aust.	W. Aust.	Tas.	Australia
Revenue (excluding Government Grants)—							
Fees of patients	569	288	107	75	71	20	1,130
Other ..	59	338	10	30	31	4	472
Total ..	628	626	117	105	102	24	1,602
Expenditure—							
Salaries and wages	4,142	4,896	1,538	727	869	343	12,515

Total ..	9,485	8,655	2,771	1,296	1,477	663	24,347

(a) Excludes the two authorized hospitals conducted by religious organizations. (b) Includes institutions in addition to the nine hospitals. (c) Includes the Epileptic Home. (d) Capital expenditure includes purchases of land, cost of new buildings and additions to buildings.

5. Summary for Australia.—The following table gives a summary relating to mental hospitals in Australia for each of the years 1957-58 to 1961-62.

## MENTAL HOSPITALS: SUMMARY, AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Hospitals .. .. .	37	38	38	38	38
Medical staff .. .. .	206	219	232	250	289
Nursing staff and attendants ..	6,761	6,895	7,027	7,335	7,587
Beds .. .. .	31,587	32,025	32,068	31,996	32,113
Admissions .. .. .	9,244	9,477	8,854	9,001 (a)	14,637
Discharged as recovered, relieved, etc.	6,288	6,797	8,052	7,320 (a)	13,278
Deaths .. .. .	2,468	2,658	2,394	2,139 (a)	2,327
Patients at end of year .. .. .	33,521	33,543	31,951	31,493 (a)	32,256
Average daily number of patients resident .. .. .	29,323	29,553	29,209	28,204 (a)	28,706
Revenue (excluding Government grants) .. .. . £'000	1,027	1,071	1,139	1,505	1,602
Total expenditure .. .. . £'000	18,236	18,196	20,073	21,786	24,347

(a) Voluntary patients for New South Wales were excluded for earlier years (see para. 3, p. 702).

6. Patients in Mental Hospitals.—The total number of inmates of mental hospitals and patients on trial leave at the end of each year from 1958 to 1962 is shown in the following table. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, would not necessarily imply an increase in mental diseases. The numbers of patients in mental hospitals in the several States is affected to some extent by differences in practice. For instance, in some States there is a greater tendency to treat certain mental diseases in clinics attached to general hospitals. Figures for Victoria and Western Australia relate to 31st December of the year shown; figures for the other States relate to 30th June of the year shown.

## PATIENTS IN MENTAL HOSPITALS

State	1958	1959	1960	1961	1962
New South Wales .. .. .	13,761	13,792	12,665	12,213	(a) 14,233

(b) Excludes patients in two institutions listed as mental hospitals in previous years but re-classified in 1962 as mental deficiency training centres. (c) Includes persons treated at the Epileptic Home. (d) Includes patients in two institutions excluded in years previous to 1962.

## § 3. Private Hospitals

In addition to the other hospitals referred to in previous sections, there are private hospitals in each State. The figures shown in the following table refer to those private hospitals which have been approved for the payment of hospital benefits under the Commonwealth *National Health Act* 1953-1963.

## § 4. Repatriation Hospitals

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department (*see* Chapter XXVIII. Repatriation), which provides a comprehensive service.

In-patient treatment is provided at Repatriation General Hospitals in each capital city and at auxiliary hospitals in all States except Tasmania. "Anzac Hostels" are maintained in Queensland and Victoria for long-term patients. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

The average daily number of patients resident in Repatriation General Hospitals during the year ended 30th June, 1963, was 3,334.

## § 5. Isolation (Leper) Hospitals

Isolation hospitals for the care and treatment of persons suffering from Hansen's disease (leprosy) are located at Little Bay, New South Wales; Fantome Island, North Queensland; Derby, Western Australia; and East Arm Settlement, Northern Territory. Special wards for the isolation of leprosy patients have been provided at Fairfield (Victoria) and Wooroloo (Western Australia). At the end of 1963, there were 11 cases at Little Bay, 18 at Fantome Island, five at South Brisbane Hospital, 166 at Derby, two at Wooroloo, 118 at East Arm Settlement and nine at Fairfield. Of the 329 cases, 259 were full-blood Aborigines, 41 were half-caste Aborigines, two were Pacific Islanders, two were Asians and 25 were Europeans.

## CHAPTER XIX

## EDUCATION, CULTURAL ACTIVITIES AND RESEARCH

NOTE.—For the most recent statistics available on subjects dealt with in this Chapter, reference should be made to the series of mimeographed bulletins *Social Statistics* issued by this Bureau. The *Quarterly Summary of Australian Statistics* contains summarized information on these subjects, and financial aspects are dealt with in the annual bulletins *Commonwealth Finance and State, Territories and Local Government Authorities' Finance and Government Securities*.

## EDUCATION

NOTE.—An account of the development of the Australian school system up to 1929 may be found in Year Books Nos. 1, 2, 17 and 22. In Year Book No. 40, a review of changes which occurred up to 1951 and of the practices then current was presented from material furnished by the Commonwealth Office of Education, which contributed much of the textual matter in the following sections. The information relating to the educational programme applies mainly to the year 1963. The statistics given in the tables relate to 1962 and 1963.

## § 1. Education in Australian Schools

1. Administration and Organization.—(i) *General*. In Australia, the provision of schools is mainly a responsibility of the governments of the States. During the nineteenth century, all six Australian colonies had established systems of compulsory education, beginning with the *Education Act* 1872 in Victoria, and followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), Tasmania (1893), and Western Australia (1893). These Acts, with subsequent amendments, constitute the legal basis of compulsory education in the Australian States to-day.

School attendance is compulsory throughout Australia between the ages of 6 and 14 at least. The minimum leaving age is 15 years in New South Wales, Victoria and South Australia; 14 years in Queensland; until the end of the year in which the child turns 14 years in Western Australia; and 16 years in Tasmania.

The Education Acts require that all children between the prescribed ages must attend either a government school or some other recognized educational institution. Children may be exempted from the requirement of compulsory attendance if they live too far from a school or suffer a physical disability. These children usually receive correspondence tuition.

The school year in Australia begins at the end of January or early in February; it ends in mid-December. The long vacation is taken over the summer months (December to February) and two short vacations divide the school year into three terms.

At government primary schools, it is usual for both boys and girls to attend the same school; at the secondary level, practices vary, but the trend is towards mixed schools. Non-government schools cater mainly for boys and girls separately.

(ii) *Government School Systems*. Government schools are a responsibility of the six State Governments, except in the Commonwealth Territories. Although the educational systems are not identical, they have many similar features. Responsibility for framing educational policy and having it put into effect rests with a Minister for Education, who is a member of the State Cabinet.

The administrative authority in each State is an Education Department headed by a Director-General, or Director of Education. Separate divisions of the Education Department in each State administer primary, secondary and technical education (in New South Wales there is a separate Department of Technical Education). Other divisions look after such matters as the recruitment and training of teachers, pupil guidance, research and the education of atypical children.

In some States, administration has been decentralized to a degree by the appointment of "Area" or "Regional" directors, who are responsible for policy in the area which they control.

Tuition at government primary and secondary schools is free in all States. Parents usually are expected to bear the cost of text-books, prescribed uniforms, and charges for such things as the use of sports materials. However, income tax concessions exist in respect of these expenditures.

(iii) *Non-government Schools System.* More than three-quarters of the children at non-government primary and secondary schools attend Roman Catholic schools, which form a highly developed but not centralized system. At the primary level, these children normally attend mixed parish schools, but at the secondary level there are boys' schools, approximately half taking boarders, and girls' schools. Some of the small convent schools in country districts enrol young boys as well as girls. The organization of Roman Catholic schools is primarily on a diocesan basis under the general direction of the bishop, although many of the religious orders which conduct schools are Australia-wide, and have their own internal organization.

The majority of other non-government schools, sometimes known as "private" or "independent" schools, are conducted by, or are under the auspices of, various religious denominations, particularly the Church of England, Presbyterian, and Methodist Churches. Others are conducted by the Baptist, Lutheran, Congregational and Seventh-day Adventist Churches and by smaller religious groups. There are Jewish schools in several capital cities. A few non-government schools, including some of the foremost, are undenominational and conducted under the auspices of corporate bodies.

The methods adopted by the educational authorities to ensure an acceptable standard of education at non-government schools vary from State to State. In New South Wales, Victoria, Western Australia, and Tasmania, these schools are regularly inspected. In Victoria and Tasmania, schools and teachers must be registered. In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. Other non-government schools in Queensland, and also those in South Australia, are not subject to inspection.

The principals of a number of the larger non-government schools have formed organizations with both State and Australia-wide coverage, namely, the Headmasters' Conference of Australia, and the Headmistresses' Association of Australia.

2. *Schools and Courses.*—(i) *Primary Education in Government Schools.* Though school attendance is not compulsory until the age of six, most Australian children begin school when they are five, attending infants' schools or infants' classes attached to a primary school. In some States, the first year in the infants' department is known as "kindergarten".

The emphasis in infants' classes, which occupy two or three years, is on general development, play activities and the informal aspects of education, with a gradual shift towards more formal activities in the second and third years. Creative expression through drawing, dancing, handiwork, dramatization, painting and similar activities is encouraged. Attention is given to speech training and to activities with music.

At the end of their infants' school training, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and write in pencil. In addition, they have acquired elementary skills in art, music and the like.

At about the age of eight, most children pass into the primary school proper, where they usually spend four or five years. Primary schools are normally provided when and where there is sufficient population to justify them. Irrespective of the size or the location of the school, standards of tuition do not vary appreciably, because teachers within a State follow similar courses of training and transfer freely between metropolitan and country areas.

The Education Departments prescribe syllabuses of instruction, which are drawn up with the assistance of expert committees. The primary syllabuses have an emphasis on basic subjects like reading, writing and arithmetic, social studies and oral language, but the teacher has some freedom to modify courses to suit local circumstances and the varying abilities of his students.

Children attend primary schools in their own districts, usually within walking distance of their homes, on five days each week. The school day is broken up into three or four sessions by a lunch break and by a morning and sometimes an afternoon recess. The total period of instruction is  $4\frac{1}{2}$  to 5 hours' daily with individual subject lessons lasting 20 to 30 minutes. Periods are set aside for physical education and sport. One teacher generally has charge of a class and teaches it all the subjects set out in the curriculum for the particular grade.

Pupils do not, as a rule, sit for a public examination during or at the end of their primary course, and progression from primary to secondary school is automatic. Allocation to particular schools or particular courses is based on the recommendations of the headmaster, general ability tests, tests of achievement in the basic subjects and parents' wishes. In South Australia, pupils may proceed to secondary school on receiving the Progress Certificate, which is awarded on satisfactory completion of the seventh grade, the highest grade at primary level.

(ii) *Secondary Education in Government Schools.* The age of transfer from a government primary to secondary school is usually between 12 and 13. Most secondary schools in the country are co-educational; in the cities the practice varies according to the State and the type of school concerned.

In the cities and larger country centres, secondary courses are provided in separate schools from primary courses, but in less populous areas secondary classes sometimes share buildings with primary classes.

The secondary student takes up new studies such as foreign languages and technical or commercial subjects, and moves on to more specialized studies in natural and social sciences and mathematics. The study of basic subjects begun in primary school is continued. The actual subjects studied depend on the ability of the pupil and the type of school. A school day is divided into "periods", and the children are taught by a number of teachers, each specializing in a particular subject or group of subjects.

To meet the varying abilities and needs of students, various kinds of secondary schools have been established in which different types of education are provided, although in country areas secondary schools tend necessarily to be comprehensive and offer a full range of secondary courses. But, following the re-examination by expert committees in all States of the problems associated with the provision of appropriate secondary education for all, significant changes in the structure and curricula of secondary schools are taking place. In New South Wales, for example, following a committee's recommendation that the secondary curriculum should offer a core of common basic education to all students, an increasing number of secondary schools are becoming comprehensive; in future, pupils of different aptitudes and interests in a given locality will attend the same secondary school, undertake this core of common basic studies, and in addition specialize according to their proven abilities and interests.

The main types of government secondary schools are described below.

*High Schools.* Until recently, high schools were organized on traditionally academic lines, offering courses of four to six years' duration which prepared students for public examinations qualifying them for entry to universities, teachers' colleges, other tertiary institutions and the public service. Curricula varied, but usually included English language and literature, foreign languages, mathematics, physics, chemistry, biology, history, and social sciences. In the comprehensive or multi-purpose high schools, which are becoming more common, a broader range of subjects is offered. There are high schools specializing in technical and commercial subjects, and as mentioned below, in agricultural subjects.

*Junior Secondary Schools.* Junior secondary schools operate under various names. These schools provide general education, but also give pupils preparatory vocational training in trade, technical, commercial or agricultural courses, and assist them to determine the work for which they are best suited. Courses cover three to four years' study.

*Home Science Schools.* Home science schools offer two to five year courses in home science and commercial subjects. These courses prepare girls for the responsibilities of home-making and also for occupations in business, commerce, the public service and nursing.

*Agricultural Schools.* In each State, there are a few separate agricultural high schools, many of them residential. The curriculum consists of general educational subjects and practical farm training. There are also "area" and "rural" schools offering up to three years of secondary study, and in some States courses in agriculture are also given at high schools.

(iii) *Primary and Secondary Education in non-government Schools.* Non-government schools follow curricula similar to those laid down by Education Departments, and prepare their students for examinations conducted by public examining authorities. There are similarities between non-government and government schools in the courses they provide, but, in denominational schools, more emphasis is given to the religious training of pupils. Non-government schools at the secondary level, although usually organized along traditional academic lines, also cater for students who may wish to take commercial, junior technical or domestic science subjects. A few schools, mostly Roman Catholic secondary schools, specialize in agricultural and technical courses. Non-government schools offer some facilities additional to those normally found in government schools, such as personal tuition in music, ballet, etc. A few are organized on "experimental" lines.

3. *Examinations.*—During the course of secondary education, State-wide examinations are taken at two levels. The earlier examination, usually called the Intermediate or Junior Examination, qualifies pupils for entry to trade courses at technical colleges and agricultural colleges, to junior commercial positions in, for instance, insurance and banking, to nursing

and secretarial courses, to lower grades of the public service and to industry. The examination at the end of the secondary school course is usually called the Leaving Examination and qualifies students for entry to teacher's colleges, the higher grades of the public service, and commercial occupations. In the majority of States, the Leaving Examination is also the qualification for entry to the university, certain subjects and combinations of subjects being set down as the matriculation requirements by the respective universities.

In most States, the Leaving Examination is controlled by a Board consisting of representatives of the Department of Education, the universities, and non-government schools, and sometimes of other bodies such as teachers' organizations. In Victoria and Tasmania, the final secondary examination is under university control and designed specifically for matriculation.

A brief description of the examinations in each State follows.

*New South Wales.* The Intermediate Certificate examination has been taken internally after three years secondary study, at about the age of 15, and the Leaving Certificate examination after five years, at about 17. The structure of secondary education is being changed so that children entering secondary schools in 1962 and subsequent years are to follow a six-year course. The Intermediate Certificate examination will be taken as at present by those who wish to leave school at that stage. A School Certificate examination will be taken at the end of four years and a Higher School Certificate examination (Matriculation) after a further two years.

At present, a student presenting himself for the Leaving Certificate examination qualifies for matriculation by obtaining passes in prescribed subjects. In addition, the University of Sydney conducts its own matriculation examination, for which students may sit in place of the Leaving Certificate examination.

*Victoria.* The Intermediate Examination is taken at the end of the fourth secondary year, at about the age of 16, the School Leaving Examination at the end of fifth year, at 17, and the matriculation examination conducted by the University of Melbourne at the end of sixth year, at the age of 18. Pupils at approved non-government schools may be accredited for the Intermediate and Leaving Certificate by passing the examinations set by their own schools.

*Queensland.* The Junior Public Examination is taken at the end of second year, at about the age of 16. The Senior Public Examination conducted by the University of Queensland is taken at the end of fourth year, at the age of 18, and matriculation is obtained on results in this examination. At the beginning of the 1964 school year, a five-year secondary course was introduced. Pupils enter secondary school one year earlier than formerly, and the Junior Public Examination will be taken at the end of the third year and the Senior Public Examination at the end of the fifth year.

*South Australia.* The Intermediate Examination is taken at the end of the third year, at about the age of 15½. The Leaving Examination is taken at the end of the fourth year and matriculation is gained on results in this examination. A further year may be taken, leading to the Leaving Honours Examination. The Leaving Honours year is designed primarily as additional preparation for university work, though it is not compulsory for intending students of the University of Adelaide.

*Western Australia.* The Junior Certificate examination is taken at the end of third year, at about the age of 15½. Students who pursue a less academic course may take the High School Certificate examination at this level. The Leaving Certificate examination is taken at the end of fifth year, at an average age of 17½, and matriculation is gained on results in this examination.

*Tasmania.* The Secondary School Certificate examination is taken at the end of third year, at about the age of 15½; the Schools Board Certificate examination at the end of fourth year, at 16½; and the matriculation examination conducted by the University of Tasmania at the end of sixth year.

## § 2. Numbers of Schools, Teachers and Pupils.

1. *General.*—The statistics which follow relate generally to schools providing education according to the primary and secondary school curricula of the various State Education Departments, whether provided in government or non-government schools. Junior technical schools, correspondence schools and schools in institutional homes, hospitals and similar establishments are included. Institutions providing only pre-school education, senior technical colleges, evening schools, continuation classes and various unregistered schools such as coaching establishments are excluded.

"School Censuses" are conducted annually, at or about the beginning of August, throughout all States and Territories of Australia. The numbers of pupils refer to the position at the school census date. The numbers of schools and teachers refer to the position at dates which vary from State to State and in some instances from year to year.

It has not been possible to present all figures on a uniform basis between States. However, continuity of the figures for any one State over the period of years shown has been maintained as far as possible.

Particulars relating to senior technical colleges are given in § 6, pages 723-5.

2. Statistical Summary.—The numbers of schools, teachers and pupils for 1962 and 1963 are shown in the following tables.

(a) Excludes 54 boys at subsidized schools for Aborigines in South Australia. (b) Excludes 49 girls at subsidized schools for Aborigines in South Australia.

5. Grades of Pupils.—The numbers of pupils enrolled in grades in each State and Territory are shown in the following table. The grading of pupils differs for the various school systems in Australia because of the differences in curricula set by Education Departments. In addition, the methods of allocating classes to grades vary from State to State, and there are also differences in the administrative methods of aggregating grades of a more or less similar nature. The figures presented in these tables are therefore not comparable between States.

(a) In Victoria, children are admitted at the beginning of the school year if they will turn five years of age by 1st July of that year. The younger children may not reach grade 2 until they have been at school for two years.

(b) Excludes 54 boys and 49 girls at subsidized schools for Aborigines.

## § 3. Teacher Training and Recruitment

1. Teachers for Government Schools.—(i) *Recruitment.* The teacher shortage evident in past years has now to a certain extent been overcome. Some States have no difficulty in recruiting and training sufficient staff to meet the present needs of primary schools. Despite expanded training programmes, the shortage of secondary school teachers has proved a greater problem, especially in mathematics and science.

State Education Departments recruit most prospective teachers for government service from students leaving schools after a secondary course. Each Department offers training awards annually on the basis of academic merit and personal suitability. The traineeships cover the cost of a teacher training course (which may include university studies) and provide a living allowance. Students are usually required to enter into a bond to serve for a specified number of years in the government schools of the State where they have trained. In some States, intending teachers can obtain a scholarship at Intermediate Certificate level to enable them to complete teachers' college entrance requirements. Such an award entails a bond of service for a longer period.

(ii) *Training of Primary School Teachers.* In most States, teachers for government primary schools are trained in teachers' training colleges controlled and administered by the State Education Departments. These colleges are described in para. 2, p. 743. Generally, the duration of courses for primary teachers is two years. The basic subjects taken in the various courses are history and principles of education, general and special methods of teaching in the primary school, school organization, and educational psychology. In addition, students undertake courses in English (including speech training), mathematics, handicrafts, music, art, social studies, natural science, physical and health education. Optional subjects may include dramatic art, visual aids, and so on. Supervised practice teaching in schools, and the observation of demonstration lessons form part of all training courses. Since primary teachers in Australia may be called upon at some time to teach grouped classes in a small school or a "one-teacher" school, special training for this kind of work is included in their course.

(iii) *Training of Secondary School Teachers.* Secondary teachers are normally specialists in a combination of subjects, such as English and history, modern languages, or mathematics and science. Intending secondary school teachers are required to complete a university degree, followed by a year of professional training qualifying for a Diploma in Education.

The degree courses followed are usually in arts, science or economics, with the major studies providing the essential background for future subject teaching. During the post-graduate or professional year, the student takes such subjects as the history and principles of education, comparative education, educational psychology, and special teaching methods. Training also includes practice teaching under the supervision of teachers' college and university staff, and the observation of demonstration lessons.

At several Australian universities, students wishing to take up teaching as a profession can receive their professional training along with the study of their teaching subjects as part of a first degree course in Education. The time taken to complete such a Bachelor of Education degree course is four years.

(iv) *Training for Specialist Teaching.* Teachers of specialist subjects, such as music, art, manual arts, domestic science and commercial subjects, receive from two to five years training which varies according to the institution concerned and the type of secondary school in which the teacher is to serve. In several States the shorter courses are provided wholly by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education, and in some cases the specialist course is followed by a year of professional training. In four States, teachers of music receive their specialist training at conservatoria of music.

Courses designed to train physical education teachers are offered in universities in all States, and in three States at a teachers' college as well.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows on the normal two-year primary teachers' course.

Teachers of technical subjects in secondary schools may be trained in manual or industrial arts courses of two to four years' duration, at teachers' colleges, technical colleges, or, in one State, at a university. These courses include basic training in such subjects as wood and metal work, and geometrical drawing. In Victoria, there is a separate Technical Teachers' College. Some teachers of trade subjects in technical schools are recruited from the ranks of qualified tradesmen engaged in industry or commerce. These teachers usually receive instruction in classroom teaching techniques and procedures upon appointment.

(v) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges or universities, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

In-service training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evening. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts, and physical education. In some States, there are also in-service courses for special groups of teachers such as headmasters or teachers in one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers, where professional topics are discussed. Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

In 1963, a group of Australian teachers attended a refresher course in New Caledonia for teachers of French. The course was made available by the French Government for Australian and New Zealand teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. Magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(vi) *Status.* Most teachers in government schools are permanent public servants and have security of tenure, superannuation rights, and the right of appeal in matters of promotion. The centralized education systems and the general policy of providing fully trained teachers for both city and country areas mean that teachers are subject to transfer to any part of the State in which they serve. It is common for a teacher's first appointment to be to a country school.

In each State there is a federation or union of State school teachers and these together form a federal body, the Australian Teachers' Federation. Their aim is to advance the teacher's status and conditions and to stimulate community interest in educational problems.

2. **Training of Non-government School Teachers.**—Teachers for non-government schools receive their training in a number of ways. The Roman Catholic Church staffs both its primary and secondary schools mainly with members of religious orders whose training has been obtained in conformity with the requirements of the particular order concerned. In recent years, there has been a growth in the number of lay teachers being employed in Catholic schools, and some training of students to become lay primary teachers has now been instituted. Secondary teachers receive their academic training mostly through courses provided by Australian universities.

Other non-government schools tend to recruit their staffs from teachers who have already obtained qualifications in Australia or overseas. There are two training institutions—one each in New South Wales and Victoria—which offer courses designed principally for teaching in non-government schools. Non-government schools recruit also university graduates who are then given some guidance by senior members of the school staff.

Private students may enrol at government teachers' colleges on payment of a fee, but the number of places available is limited. Some teachers destined for non-government schools are trained in this way.

In-service training to provide the basic training for teachers is used only to a limited extent by non-government schools, mainly in the case of the graduate recruits mentioned above. Recently vacation courses have been provided by bodies other than Education Departments for teachers from both government and non-government schools. For example, an independent body—the Nuclear Research Foundation—has provided such courses for teachers of science in secondary schools in New South Wales.

The training of pre-school teachers is carried out in five States in Kindergarten Training Colleges, set up by the Kindergarten Unions. These are described in § 10, para. 3, p. 743.

#### § 4. Other Aspects of School Education

NOTE.—Information relating to school medical and dental services is given in Chapter XVIII. Public Health, and particulars of School Savings Banks in Chapter XXI. Private Finance.

1. **Provisions for Isolated Areas.**—(i) *General.* Although the task of bringing education to isolated areas in Australia presents problems, all education authorities have aimed at providing opportunities for country children comparable to those available to city children. Country children follow the same curricula (with local adaptation, if desirable) and are under the guidance of teachers who are trained for service in country and city schools alike.

In areas where there are sufficient children of school age, a "one-teacher" school may be formed with all primary grades in a single classroom under the control of the one teacher. Special training is given to teachers undertaking work of this kind. Children who complete a primary course in a one-teacher school and cannot attend a secondary school may do secondary correspondence lessons under the teacher's supervision.

In districts where a number of small centres are scattered around a larger centre or country town, the tendency is to close the one-teacher schools and transport pupils each day by buses to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted is usually directed towards practical activities and training in subjects bearing on the primary industries of the locality.

Where a group of children is too small to warrant the establishment of a one-teacher school at public expense, a "subsidized" school may be opened. The Education Department pays part of the cost and in some States appoints a teacher. Some States also administer "provisional" schools, which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(ii) *Correspondence Schools.* These have been established in each State capital city to meet the needs of children whose daily attendance at school is prevented by distance between home and school, by illness or by physical disability. The correspondence schools also cater for inmates of penal institutions, Australian children overseas, pupils of other schools in which particular courses are not available, student teachers, members of the Defence Forces and other adults completing their secondary education. Lessons are done with the help of a supervisor, usually a member of the child's family, and posted back to the correspondence school in the capital city, where they are corrected and returned with helpful comments. Every endeavour is made to maintain a personal link between teacher and pupil. Correspondence schools began with primary grades only, but were soon extended to cater for secondary pupils, and it is now possible to do a complete secondary course to matriculation standard by correspondence. Some 25,000 students, including adults, are receiving primary and secondary instruction through correspondence courses.

(iii) *Schools of the Air.* These are intended to give the outback child of school age some of the benefits of school life and to supplement correspondence education. Using the two-way wireless equipment developed first by the Royal Flying Doctor Service, children hundreds of miles apart participate in the same lesson, and teacher and pupils can talk directly with each other. The first School of the Air was established in 1950 at Alice Springs in the Northern Territory; it has been followed by similar schools at Broken Hill in the far west of New South Wales; at Ceduna and Port Augusta in South Australia; Cloncurry and Charters Towers in Queensland; and Meekatharra, Derby and Kalgoorlie in Western Australia. These nine schools serve children in an area of a million square miles.

2. *Handicapped Children.*—Special provision is made for the education of physically and mentally handicapped children, both by the State authorities and by church and voluntary organizations, often working in conjunction. In many cases where residential schools are necessary for particular groups, educational facilities and teaching staff are provided by a State Education Department, while a voluntary organization provides accommodation and accepts responsibility for the general welfare of the children. Among the facilities available are:—hospital schools for sick and crippled children; "spastic centres" for cerebral palsied children; special schools and special classes for deaf children; schools for blind children; and special schools and classes for mentally retarded children. Special schools and classes have involved the appointment of departmental specialists, the provision of special training courses, and close liaison with school health services. In some States, clinics attached to hospitals, or functioning as an independent child welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

3. *Educational Guidance.*—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of individual pupil record cards. The functions of these services are the selection of pupils for courses at secondary level, diagnosis and guidance of atypical children, preliminary guidance and, in some States, research. The weight given to each of these functions varies from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service co-operate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the State Department of Labour and Industry.

4. *Research.*—All State Education Departments have set up branches undertaking research directed towards departmental activities. The work of the research branches is concerned with such matters as curriculum content, new teaching methods, evaluation procedures, wastage rates and educational statistics.

5. *School Broadcasting and Television.*—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The Australian Broadcasting Commission's Education Department is responsible for preparing and broadcasting programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison with State Education Departments. It is estimated that in 1963 over 90 per cent. of Australian schools were equipped to receive radio lessons.

School broadcasts are presented as part of the regular Australian Broadcasting Commission programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcasts to school work by the extensive distribution of booklets, giving details of programmes in advance, and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons.

The year 1963 saw a big increase in the number of schools receiving television broadcasts and in the number of programmes produced. Even though the use of television in education is still in its early stages in Australia, more than 600 schools made use of the telecasts provided for schools by the Australian Broadcasting Commission during 1963. In 1963, over 2,400 programmes were broadcast to schools, mostly for primary pupils.

**6. Scholarships and Bursaries.**—All States have schemes of financial assistance to school pupils, mostly at the secondary level, through scholarships or bursaries. As tuition in government schools is free, this assistance is usually in the form of maintenance allowances, both for children living with their parents and for those living away from home. These may be paid in a lump sum or in instalments throughout the year. Awards are usually made on the results of a competitive examination, and sometimes a means test is applied. Other government and private authorities, such as the Repatriation Department and the Legacy War Orphans Fund, assist special categories of pupils with their school education. Many non-government schools also award scholarships on a competitive basis which enable students to attend the particular schools without payment of fees.

The Commonwealth Government has announced plans to provide some new forms of financial assistance for education. Arrangements have begun for the provision annually, from the beginning of the 1965 school year, of 10,000 competitive secondary school scholarships for students enrolled in the final two years of secondary school.

**7. School Transport.**—All States have systems of subsidies whereby transport is made available free or at concession rates for children travelling to and from school. In some States allowances are paid if private transport has to be used.

**8. School Buildings.**—The great increase in the school population in the last decade led to an expansion in school building, first for infants' and primary classes and later for secondary pupils. To cope with this growth in population, it was necessary at first to make use of temporary and emergency structures, but the period of resorting to this expedient is now giving way to one of consolidation and development in school building programmes. Quite large schools may be built in stages to match increase in local population in new and rapidly developing suburbs in metropolitan areas. Authorities are giving much attention to the use of new materials and especially to the planning of sites. An increasing number of schools are planned with playing fields and tennis courts. Gymnasiums which may also serve as assembly halls are included, and lighting, heating and ventilation to meet different climatic conditions are carefully planned.

An amount of £5,000,000 annually, beginning with 1964-65, is to be provided by the Commonwealth Government for the building and equipping of science laboratories in both government and non-government schools.

**9. Textbooks, Materials and Other Equipment.**—The State Education Departments supply government schools, free of charge, with essential equipment, including scientific apparatus, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are also supplied in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools, and several Education Departments produce monthly school magazines which are supplied free or cheaply. In primary schools (except in one State) and in all secondary schools, textbooks must, however, be purchased by students. In several States, schools own stocks of textbooks which are hired to students, and in one State secondary textbooks are sold at reduced prices.

Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books is ordinarily purchased for individual schools by the parent and citizen organizations associated with them, with the assistance of subsidies from the Departments.

The design of school furniture is undergoing considerable change following research on posture and the physical measurement of children. Dual desks are now being replaced

in many schools by individual tables and chairs, provided in a range of sizes suitable to each class. The new type of furniture is more suitable for flexible arrangement of the class in line with modern educational practice.

10. **Visual Aids.**—Visual aids are widely used in Australian education. Each of the State Education Departments has a visual education branch to handle the production and distribution of such materials. Film strips and posters are distributed free or at low cost. Films are held in central libraries and are requisitioned by schools as required for teaching purposes.

### § 5. Pre-school Education

Pre-school centres of various kinds are conducted by private individuals, church bodies and voluntary organizations such as the Kindergarten Unions. Over recent years, the Commonwealth Government, State Governments, and some municipal councils have provided an increasing amount of financial assistance and themselves maintain centres in certain areas.

The Australian Pre-School Association is a federal body composed of the Kindergarten Unions and several other organizations. Its aim is to promote the development of pre-school education throughout Australia. It is also responsible for the administration of six Lady Gowrie Child Centres which were established in capital cities by the Commonwealth Government as model pre-school centres.

Centres are located in city and country areas. Programmes are adapted to suit the areas in which centres are situated. Types of pre-school centres are nursery kindergartens, crèches with full-day care for children in closely settled industrial areas, play groups and play centres, occasional care centres and residential holiday homes.

Pre-school centres can cater only for a small proportion of children in the three to five or six year age group, but radio and television have brought a form of education within the reach of practically every pre-school child in Australia. "Kindergarten of the Air", the first programme of its kind in the world, is a session of 25 minutes broadcast every week-day over the national radio network of the Australian Broadcasting Commission. Through it, young children in hospitals, in homes in city and country towns, and in bush homesteads in the outback, perhaps many miles from any school, receive some of the advantages of pre-school training.

"Kindergarten Playtime" is a 15-minute television programme transmitted each week-day. It is based on the interests of children from three to five years and is now broadcast in all State capital cities and many country regions by the Australian Broadcasting Commission.

### § 6. Technical Education

1. **General.**—The following description of technical education refers to training in technical fields given by institutions other than secondary schools and universities. Students may proceed to this kind of training after completing three to five years at secondary school.

Each State has developed a system of technical education based on institutions set up in all the State capital cities and in many country areas. These institutions are known variously as technical colleges, technical schools, institutes of technology and schools of mines. The earliest began as local and even private ventures in the second half of the nineteenth century, but almost all of them have now come under the control of the State governments.

The technical colleges in Queensland, South Australia, Western Australia and Tasmania are administered by branches of the State Education Departments and are financed from the budget of the State Minister for Education. New South Wales has a separate State Department of Technical Education. In Victoria there is a dual system with a number of the older colleges controlled by their own "councils" in addition to government-controlled colleges administered by the Technical Education Branch of the Education Department. The Council-controlled colleges receive government grants-in-aid and their teachers' salaries are paid by the State government.

Australian technical colleges offer training in all the major industrial skills and in a wide variety of commercial, artistic and domestic occupations. The three main types of courses are described below.

**2. Trade Courses.**—These offer part-time training for apprentices. In developing a system of technical education, the Australian authorities were influenced by the British tradition which regards practical experience on the job as the fundamental training procedure, to be supplemented by theoretical and practical training at an appropriate school. In each of the Australian States there is an apprenticeship authority which supervises the administration of apprenticeships and an education authority which provides technical education through its technical colleges.

The time spent on training varies from three to five years in different trades and States. Between four and eight hours' instruction a week are required. Most of this takes place in the employer's time, and it is unusual for more than two hours a week to be spent in attending classes outside working hours.

**3. Certificate Courses.**—There is considerable variation between the States in the aims and organization of certificate courses. In New South Wales, they provide training of a semi-professional nature in occupations for which no apprenticeship awards exist. Some of the courses are open to qualified tradesmen only. For others, no occupational entry qualifications are demanded, but it is necessary to hold an Intermediate Certificate or its equivalent. The courses are usually for four years, most of them being part-time.

The Victorian certificate course is designed to develop specialized skills in a particular phase of an occupation. In the building field, for instance, there is a certificate course in architectural drafting. The courses are offered at three levels—professional certificate courses which include diploma subject matter and can be counted towards a diploma; special short courses which are designed to increase the efficiency of people in their chosen field; and technicians' courses which give a standard of training between trade and professional courses. In general, they consist of part-time day and/or evening instruction concurrent with employment in the field, and entrance requirements are of approximately Intermediate Certificate standard.

Courses in other States are mostly part-time, and of two to seven years' duration. They provide a wide range of training for skilled technical and semi-professional workers, and, in most cases, entrance is at the level of the Intermediate Certificate or equivalent.

**4. Diploma Courses.**—Diploma courses are designed to provide professional training in fields such as architecture, art, building, commerce, management, public administration, manual arts, the various branches of engineering and metallurgy, and pure and applied science. They usually follow completion of a full secondary school course.

The courses consist of complete progressive units of study in which the lecture room, laboratory and workshop are closely associated. They vary from three to five years' full-time and from three to seven years' part-time study. At least one full year's employment in an appropriate occupation is usually required.

The aim of the courses is to develop highly trained technologists with the qualifications and experience required for membership of a professional institution.

**5. Other Courses.**—Most colleges provide short post-diploma and refresher courses to keep students in touch with new developments in their fields, as well as courses of general interest such as women's handicrafts and motor mechanics. Training in certain technical aspects of agriculture such as farm mechanics and wool classing is often given in the technical colleges. Some also offer general secondary courses to enable adults to prepare for matriculation and other public examinations.

**6. Correspondence Teaching.**—Each State has a well developed system of technical education by correspondence to extend the facilities of a metropolitan college to rural students. Entrance qualifications are identical with those for the regular classes. A major problem of correspondence work is the linking of theory with practice. This is overcome to a certain extent by holding practical sessions at appropriate training centres once or twice a year at the technical college where the correspondence school is based or at a mobile workshop stationed for the time at a focal point within the district. In New South Wales, these mobile workshops are rail cars equipped with machinery and fittings to make them self-contained training schools for engineering and other trades. Among practical courses offered by correspondence are trade drawing, fitting and machinery, welding, diesel engine operation, automotive engineering and workshop practice, and farm mechanics.

7. Colleges, Teachers and Students.—The number of colleges, teachers and enrolments of individual students during the years 1958 to 1962 is given in the following table.

TECHNICAL EDUCATION: COLLEGES, TEACHERS, AND ENROLMENTS

State	Colleges	Teachers			Students enrolled		
		Full-time	Part-time	Total	Males	Females	Persons
<b>New South Wales(a)(b)—</b>

(a) Excludes correspondence students. (b) Includes A.C.T. (c) Number enrolled at Census. (d) Student figures are enrolments at end of year. (e) Student figures are individual enrolments. (f) Number of teaching positions. (g) In 1961 there was a transfer of classes in the hobby category to the Adult Education Board.

8. Training of Technical Instructors.—Prior to the 1939–45 War, technical colleges were staffed chiefly by trained teachers in the employment of the Education Departments or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers.

To preserve links with industry and trade practice, schemes have been developed which continue the recruitment of specialist tradesmen as instructors but provide also for their training in educational method and teaching techniques. In Victoria, the Technical Teachers' College provides training for students with appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in general educational theory and teaching method, while correspondence courses and visiting lecturers assist the newly appointed tradesman-instructor in country colleges. Variations of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teacher's certificates from teachers' colleges.

### § 7. Government Expenditure on Schools and Technical Education

1. **General.**—The following tables show particulars of the total net expenditure (i.e., gross expenditure less receipts for services rendered) from certain funds on government schools, education departments and technical education. The data have been compiled on the same basis as far as differences in organization and accounting methods between States and Territories will permit.

The tables include only expenditure from the consolidated revenue funds and certain trust or special funds. They exclude loan fund expenditure; expenditure on debt charges, payroll tax and superannuation payments, in so far as it is possible to identify these items; and some items for which information cannot be obtained from the public accounts of all States.

2. **Government Schools' and Education Departments' Expenditure.**—(i) *Total Net Expenditure.* The figures relate throughout to years ended 30th June. Net expenditure per pupil relates the total net expenditure to the mean of the numbers of pupils enrolled at two subsequent school censuses. Net expenditure per head of population relates the total net expenditure to the mean population.

#### GOVERNMENT SCHOOLS AND EDUCATION DEPARTMENTS: NET EXPENDITURE

(ii) *Classification of Expenditure.* The following table shows, for the six States, the net expenditure on government schools and education departments classified into the following headings:—(i) Primary Education, (ii) Secondary Education, (iii) Administration, (iv) Transportation of School Children and Students, and (v) Training of Teachers. Expenditure on technical and agricultural education is excluded from the tables.

It has been necessary to estimate some items of expenditure, largely because the meanings of "primary" and "secondary" differ between States, and because elementary and higher education are sometimes given in the same school by the same teachers.

Expenditure on government schools in the Northern Territory and Australian Capital Territory is not included in the following table because the detail is not available.

GOVERNMENT EXPENDITURE ON SCHOOLS AND TECHNICAL EDUCATION 727

### § 8. Non-government Schools Finance

Most Roman Catholic parochial schools charge fees, but payment is not insisted on in the case of families who cannot afford it. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers, and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school. With these exceptions, pupils of non-government schools must pay fees.

Certain State scholarships and bursaries are tenable at approved non-government secondary schools. Since the establishment of educational systems by the State governments, official policy has been largely against the provision of direct financial assistance to non-government schools. The eight undenominational grammar schools in Queensland, however, receive a State subsidy under the *Grammar Schools Acts* 1860-1900. In 1956, the Commonwealth Government undertook to contribute to the interest payments on loans raised in order to build non-government secondary school accommodation in the Australian Capital Territory. This contribution is now available for both primary and secondary school buildings extensions and additions.

As from 1964-65 the Commonwealth Government will also provide assistance to non-government schools for the building and equipping of science laboratories. (See § 4, para. 8, p. 722.)

### § 9. Universities

1. **General.**—Students qualify for entrance to Australian universities by passing a matriculation examination in one of the States after 5 or 6 years of secondary education. Each university has its own regulations for matriculation, specifying the number and combination of subjects to be passed for admission. Students entering the universities have the choice of undergraduate study in various faculties. All universities provide also post-graduate courses of study.

The Australian universities, with their faculties, are listed below in the order of their foundation.

*University of Sydney*, 1850, Sydney, New South Wales: Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

*University of Melbourne*, 1853, Melbourne, Victoria: Agriculture, Applied Science, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.

*University of Adelaide*, 1874, Adelaide, South Australia: Agricultural Science, Architecture and Town Planning, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.

*University of Tasmania*, 1890, Hobart, Tasmania: Agricultural Science, Arts, Commerce, Education, Engineering, Law, Science.

*University of Queensland*, 1909, Brisbane, Queensland: Agriculture, Architecture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Science, Veterinary Science.

*University of Western Australia*, 1912, Perth, Western Australia: Agriculture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Science.

*Australian National University*, 1946, Canberra, Australian Capital Territory.—Institute of Advanced Studies: John Curtin School of Medical Research, Research School of Physical Sciences, Research School of Social Sciences, Research School of Pacific Studies. School of General Studies: Arts, Economics, Law, Oriental Studies, Science.

*University of New England*, 1954 (formerly New England University College, established in 1938), Armidale, New South Wales: Agricultural Economics, Arts, Economics, Rural Science, Science.

*University of New South Wales*, 1958 (formerly the New South Wales University of Technology, established in 1948), Sydney, New South Wales: Applied Science, Architecture, Arts, Commerce, Engineering, Medicine, Science.

*Monash University*, 1958, Melbourne, Victoria: Arts, Economics and Politics, Engineering, Medicine, Science.

Each of the universities was established by a parliamentary Act as an autonomous institution, with its own Governing Council or Senate. Nevertheless, the Australian universities receive substantial government support from both State and Commonwealth sources, only part of their income being derived from students' fees, private donations and bequests.

There are also three university colleges. Newcastle University College, founded in 1951, is affiliated with the University of New South Wales, and has degree courses in the faculties of Applied Science, Architecture, Arts, Commerce, Engineering, and Science. Townsville University College, founded in 1961, is a constituent part of the University of Queensland. It offers some courses in the faculties of Agriculture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Science, and Veterinary Science. Wollongong University College was opened in 1962, and is affiliated with the University of New South Wales. It offers some courses in the faculties of Arts, Commerce, Engineering, and Science. In 1966, the University of Adelaide plans to open additional facilities at Bedford Park, where four schools will be established initially in Biological Sciences, Language and Literature, Physical Sciences and Social Science.

**2. Organization of Courses.**—Bachelor degree courses are from three to six years in length, depending on the faculty, and for the majority full-time attendance is required. Certain courses, however, may also be undertaken by part-time or evening students. The university academic year begins in March and finishes in early December. At most universities, two short vacation periods divide the year into three terms, but there are four terms in some universities.

Several universities make provision for external tuition, whereby students living away from university towns may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea, adjacent Pacific islands and Asian countries. External students living in Queensland receive tutorial assistance at university centres in the principal country towns.

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degrees of Bachelor of Arts and Bachelor of Letters, and to the Diploma of Education and the Diploma in Educational Administration. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

Post-graduate courses leading either to a Master's degree or to a Doctorate are available at all universities. Facilities cover the humanities, social sciences, pure and applied sciences.

Additional courses are constantly being introduced by the universities at both the undergraduate and the post-graduate level, to cover new fields of knowledge and specialization. Announcements of the following new courses were made in 1963 and 1964: at the University of New South Wales, Master of Librarianship, Bachelor of Engineering in Fuel Engineering, Bachelor of Science (Medical), and Bachelor of Science in Sheep and Wool Technology; at the University of New England, a course towards an Economics degree, and a Diploma in Farm Economics; at the University of Melbourne, Master of Business Administration; at Monash University, Master of Arts (Sociology); at the University of Queensland, Bachelor of Applied Science in Geophysics, Bachelor of Divinity, Bachelor of Medical Science, Diploma in Computing, and a Certificate in Education for oversea students; and at the University of Western Australia, Bachelor of Psychology.

**3. Research.**—A wide range of research work and training in research techniques is carried out by the universities as part of their normal functions. Post-graduate students and members of university staff are engaged in research, both as part of their work for post-graduate degrees and also as part of group and departmental research programmes. Support for research in universities is derived from public and private sources, including funds and foundations established to encourage research in a particular field.

**4. University Expansion and Development.**—Since the 1939–45 War, the Australian universities have had to face greatly increased demands on their facilities, firstly from large numbers of ex-service personnel in the immediate post-war years, and later from greatly increased numbers of students leaving secondary schools each year. By 1962, the total enrolments in Australian universities had reached a figure of 63,317 compared with an early post-war peak of 32,453 in 1948.

To assist the universities to cope with these demands, increasing co-operation between the Commonwealth Government and the State Governments in university finance became necessary. The Commonwealth Government set up a Committee on Australian Universities, whose 1957 report ("The Murray Report") led to more finance becoming available to universities and to the setting up of a permanent body, the Australian Universities Commission, to advise the Commonwealth Government on university development. In the years since the Murray Report, the following major developments have taken place in the Australian university structure:—the University of New South Wales was created from the earlier University of Technology in 1958; in the same year, Monash University was established in Victoria; in 1960, the Australian National University was reconstituted, combining both

undergraduate and post-graduate facilities, and now consists of the Institute of Advanced Studies and the School of General Studies created from the Canberra University College; the University of Queensland set up the University College of Townsville in 1961; and the University of New South Wales established the Wollongong University College in 1962.

The New South Wales Government is proceeding with plans for the construction of a fourth university on a site at North Ryde. It is intended that the new university should be opened not later than 1967.

Despite rapid expansion, the Australian universities are still faced with a problem in providing tuition for all students who reach matriculation standard. As a result, several universities have found it necessary to impose quotas on enrolments in their courses.

The Commonwealth Government has set up a committee to examine the problems of tertiary education. Committees set up in Victoria and New South Wales to examine the same problems have reported in favour of a large increase in places at universities and the establishment of additional university institutions.

5. Teaching and Research Staff.—The following table shows particulars of the teaching and research staff of the universities during 1962 and 1963.

UNIVERSITIES: TEACHING AND RESEARCH STAFF

University	Teaching and research staff(a)					Research only staff(a)				
	Full-time					Part-time (b)	Full-time			Part-time (c)

Melbourne .. .. .	8,276	4,243	615	13,134
Monash .. .. .	1,398	189	..	1,587
Queensland .. .. .	4,920	4,049	2,497	11,466
Adelaide .. .. .	4,250	2,662	504	7,416
Western Australia .. .. .	2,346	1,389	353	4,088
Tasmania .. .. .	928	577	186	1,691
<b>Total .. .. .</b>	<b>38,900</b>	<b>23,783</b>	<b>6,391</b>	<b>69,074</b>

The next table shows full-time, part-time and external students enrolled at Australian universities during each of the years from 1959 to 1963.

**UNIVERSITIES: FULL-TIME, PART-TIME AND EXTERNAL STUDENTS, AUSTRALIA**

Year	Full-time	Part-time	External	Total
1959 .. .. .	28,394	13,893	4,864	47,151
1960 .. .. .	31,590	16,304	5,497	53,391
1961(a) .. .. .	30,811	21,071	5,790	57,672
1962 .. .. .	34,698	22,455	6,164	63,317
1963 .. .. .	38,900	23,783	6,391	69,074

(a) The figures of full-time and part-time students for 1961 and following years are not comparable with those shown for previous years, as from 1961 all universities used a uniform classification of students which differed from that used previously by some universities.

(iv) *Assistance to Students.* The Commonwealth Government, through the Commonwealth Scholarships Board, grants undergraduate and post-graduate scholarships to university students. (Details of the Commonwealth Scholarship Scheme are given on page 745.) Commonwealth, State and local governments also award cadetships and other assistance to their employees. Foreign students are assisted by the Commonwealth Government under arrangements such as the Colombo Plan. The Universities themselves grant exhibitions and scholarships as well as special assistance to teachers, etc.

The following table gives details of students assisted at each university in 1962 and 1963.

## UNIVERSITIES: ASSISTED STUDENTS

University	Source of assistance					Type of course	
	Commonwealth Government	State Governments	Universities	Other	Adjusted total (a)	Higher degrees	Other
1962							
Australian National University ..	325	..	437	25	725	232	493

(a) Adjustment made for students assisted from more than one source. (b) Assisted students have been classified on a new basis more comparable with other universities.

The next table shows the numbers of assisted students at Australian universities in the years 1959 to 1963.

## UNIVERSITIES: ASSISTED STUDENTS, AUSTRALIA

Particulars	1959	1960	1961	1962	1963
Government assistance ..	18,756	20,345	20,937	23,020	26,670
University assistance ..	5,958	6,649	9,025	10,710	12,063
Other assistance ..	2,278	2,648	2,726	1,553	1,620
<b>Adjusted Total(a) ..</b>	<b>23,342</b>	<b>26,061</b>	<b>28,953</b>	<b>31,041</b>	<b>33,678</b>

(a) Adjustment made for students assisted from more than one source.

(v) *Resident Students.* In 1963, 5,279 full-time and 314 part-time students were in residence at affiliated colleges, halls of residence and university hostels. The 5,593 students in residence were distributed as follows:—Australian National University, 291; Sydney, 803; New South Wales, 209; New England, 827; Melbourne, 1,332; Monash, 76; Queensland, 1,021; Adelaide, 363; Western Australia, 451; and Tasmania, 220. There were 4,227 male students and 1,366 female students in residence.

7. *Degrees Conferred, etc.*—The following table shows the number of degrees conferred and diplomas and certificates granted for males and females separately at each university during the years ended 31st July, 1962 and 1963.

## UNIVERSITIES: DEGREES CONFERRED, AND DIPLOMAS AND CERTIFICATES GRANTED

(a) Figures for 1962 and 1963 refer to degrees conferred during the 12 months ended July. Figures for 1961 and previous years refer to degrees conferred during the calendar year. Details of degrees conferred during the five months ended December, 1961, which are included in both 1961 and 1962 figures shown in the table, are as follows: Arts, 129; Music, 10; Law, 59; Commerce and Economics, 45; Education, 18; Science, 97; Architecture and Town Planning, 9; Engineering, 56; Dentistry, 8; Medicine, 207; Physiotherapy, 1; Agriculture and Agricultural Science, 15; Forestry, 3; Veterinary Science, 25; total degrees, 682, including 10 Higher Doctorates, 34 Ph.D.'s, 86 Master's Degrees and 552 Bachelor's Degrees.

8. Finance.—(i) *General.* Australian universities are incorporated by statute. Since their establishment, they have come to depend greatly on government grants for their income. In recent years, large amounts have been required for new buildings, as well as for current expenditure to provide staff and equipment to cope with increased student enrolments. In 1962, income other than from State and Commonwealth grants, including student fees, amounted to only about one-fifth of the total income. Income from non-government sources includes grants, mainly for research purposes, from businesses, international foundations, and private individuals. Some income is also received from endowments.

(ii) *Financial Assistance from the Commonwealth Government.* (a) *General.* Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939-45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment.

Following a report submitted by a committee of inquiry appointed to report on university finances and requirements, the Commonwealth, since 1951, has made matched grants to the States for recurrent expenditure on university purposes. Since 1958 the Commonwealth has also assisted with the capital needs of the universities for building projects and for equipment, and provided unmatched recurrent grants and grants for the building programmes of residential colleges affiliated with universities. In the 1961-63 triennium the Commonwealth matched State grants for buildings at teaching hospitals and in 1964 instituted grants for special research projects at universities. As well as making grants available for State universities, the Commonwealth has continued to support the university institutions for which it is responsible.

In 1959, following the Report of the Committee on Australian Universities, the Commonwealth Government established the Australian Universities Commission under the *Australian Universities Commission Act 1959*. The Commission's principal functions are to advise the Prime Minister on financial assistance to Commonwealth universities and to States in relation to their universities and also on the balanced development of Australian universities. The Commission commenced its work in July, 1959. Since its establishment, the Commission has produced two reports; the first, presented in October, 1960, and covering the years 1961 to 1963, recommended Commonwealth grants totalling £110 million for State universities. The Commission's second report was presented in August, 1963, and recommended Commonwealth grants totalling more than £151 million for State universities for the period 1964 to 1966. The *Universities (Financial Assistance) Act 1963*, gave effect to the major financial recommendations contained in the Commission's second report.

(b) *Commonwealth Grant for Recurrent Expenditure in Universities*. This is a continuation of matched grants provided since 1951. The maximum amount available in 1964 is shown in the following table.

**STATE UNIVERSITIES, ETC.: COMMONWEALTH GRANT FOR RECURRENT EXPENDITURE, 1964**

University, etc.	Amount
	£'000
Sydney .. .. .	2,074
New South Wales(a) .. .. .	1,995
New England .. .. .	613
Melbourne .. .. .	1,694

Adelaide .. .. .	1,142
Western Australia .. .. .	799
Tasmania .. .. .	324
South Australian Institute of Technology .. .. .	100
<b>Total .. .. .</b>	<b>11,003</b>

(a) Includes grants for the University Colleges at Newcastle and Wollongong. For the University College at Townsville.

(b) Includes grant

Since 1961, matched grants have been made on a basis of £1 of Commonwealth money for every £1. 85 of income received by a university from fees and State grants. From 1951 to 1960, the matching ratio was, in general, £1 to £3.

(c) *Commonwealth Grants for the Teaching and Administrative Costs of Residential Colleges*. From 1964, the grants consist of unmatched Commonwealth payments each year of £2,500 (previously £2,000) to each college affiliated with or administered by a university, plus the sum of £15 for each resident student, and a further £5 for each non-resident student-receiving tutorial assistance. The Commonwealth total grant paid in 1963 was £177,500.

(d) *Commonwealth Grants for Selected Building Projects in Universities*. Those grants, for the period 1964-66, are shown in detail in the Second Schedule to the 1963 Act. Payments are made up to a given maximum for each project, on the basis of £1 from the Commonwealth for every £1 of State grants. From 1964 there is a change in this grant in that, where appropriate, an allowance for furnishings and equipment is included in the building grants for each project. Previously, separate grants were provided for these items. Also, from 1964, the schedule showing grants for university building projects includes grants for university computing facilities, but grants for the erection and alteration of buildings for halls of residence administered by universities are shown elsewhere. The total Commonwealth grant for each University is shown in the following table.

**STATE UNIVERSITIES, ETC.: COMMONWEALTH GRANTS FOR BUILDING  
PROJECTS, ETC.. 1964-1966**

University, etc.	Amount
	£'000

Latrobe, Victoria .. .. .	550
 South Australian Institute of Technology .. .. .	 331
 <b>Total .. .. .</b>	 <b>16,058</b>

(e) *Commonwealth Grants for Special Research Projects in Universities.* Under the 1963 Act, special provision is made to assist universities to develop and extend their research programmes, including the purchase of equipment. Under the 1961-1963 legislation, grants were provided for equipment only. The grants are available on the basis of £1 from the Commonwealth for every £1 of State grants. The maximum amount available to each university is shown in the following table.

**STATE UNIVERSITIES: COMMONWEALTH GRANTS FOR SPECIAL  
RESEARCH PURPOSES, 1964-1966**

University	Amount
	£'000
Sydney .. .. .	80

Queensland .. .. .	55
Adelaide .. .. .	55
Western Australia .. .. .	55
Tasmania .. .. .	37
 <b>Total .. .. .</b>	 <b>500</b>

(f) *Commonwealth Grants for Buildings for Halls of Residence and Affiliated Residential Colleges.* Under the 1963 Act, an amount representing the grant available to each university for both types of student residence is shown in the Fourth Schedule. Previously, grants for buildings for university-administered halls of residence were included in the Schedule showing university building projects. Payments are made up to a given maximum for each project. For halls of residence the grant comprises £1 from the Commonwealth for every £1 of State grants. For affiliated residential colleges Commonwealth grants are up to one-half of the cost of a project, the other half being met from college or State Government sources. The maximum Commonwealth grants available for each State university in the 1964-66 triennium are shown in the following table.

**STATE UNIVERSITIES: MAXIMUM COMMONWEALTH GRANTS FOR BUILDINGS FOR HALLS OF RESIDENCE AND AFFILIATED RESIDENTIAL COLLEGES, 1964-66**

<i>Total</i> .. ..	<i>20,195</i>	<i>19,021</i>	<i>3,657</i>	<i>4,080</i>	<i>1,848</i>	<i>48,801</i>

(a) Includes funds expended by various government departments and other bodies in respect of universities but not controlled by the universities. (b) In the case of endowments, only income from property and other investment of these endowments is included. The treatment of donations depends on the terms of the gift, etc. When the capital sum is specified to be expended over several years, only the portion of the capital sum allocated to each year is shown as income in that year, but if the capital sum is available for spending without limitation as to time, the full amount is recorded as income in the year it is received, irrespective of whether it is spent in that year or not. The capital value of land and buildings donated to the universities is not recorded as income, unless these properties are sold, in which case the amounts realized are included. (c) Excludes fees collected on behalf of student unions. (d) Income received specifically for new buildings, major alterations and additions to buildings, installation of services, purchase of land and buildings and major equipment.

(iv) *University Expenditure.* The following table summarizes the expenditure of each university in 1962. The statistics are compiled on a different basis from those published in previous years.

**UNIVERSITIES: EXPENDITURE, 1962**  
(£'000)

University	Teaching and research	Administration and general overhead	Libraries	Buildings, premises, grounds	Sundry auxiliary expenditure	Total expenditure

(a) Figures for 1961 and 1962 were compiled on a new basis and totals for individual universities are not necessarily comparable with previous years.

## § 10. Other Tertiary Institutions

1. **General.**—In addition to the degree-granting universities, there is a variety of institutions offering courses at tertiary level; the courses may lead to a certificate, diploma, or similar qualification. Included among the institutions are technical colleges, which have been described in § 6.

2. **Teachers' Colleges.**—The State Education Departments conduct teachers' colleges to train teachers for government schools. There are eight colleges in New South Wales, twelve in Victoria, three in South Australia, and two each in Queensland, Western Australia and Tasmania, making a total of 29 colleges. Two of these opened for the first time in 1962 (Wollongong Teachers' College in New South Wales and Western Teachers' College in South Australia), and one in 1963 (Hobart Teachers' College in Tasmania).

A variety of teacher training courses is provided in these colleges, including those for primary teachers, secondary teachers, and those specializing in teaching infants, handicapped children, art, music, and handicrafts. A description of these courses is given in § 3.

Teachers' colleges are co-educational, and, in the larger States, have been established in country areas as well as in cities. Students entering them have completed their secondary schooling and are usually about 17 years of age. The principal and staff of the colleges are responsible to the Director of Education in the State concerned.

3. **Kindergarten Training Colleges.**—The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three-year courses. The minimum entrance age is usually 17 years, and the Leaving Certificate is required for admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college.

The pre-school teacher training courses in these colleges are all full-time diploma courses and are similar in content and standards. Teachers are trained for work with children between the ages of 2 and 7 years, and the training courses include the study of general educational theory, the theory of pre-school education, general cultural subjects, and art and crafts (including music). In addition, training is given in practical pre-school teaching.

4. **Agricultural Colleges.**—There are seven State agricultural colleges—Hawkesbury and Wagga (New South Wales), Longerenong and Dookie (Victoria), Gatton (Queensland), Roseworthy (South Australia), and Muresk (Western Australia), offering a comprehensive course of two or three years leading to the award of a Diploma in Agriculture, or in a specialized field such as animal husbandry, dairy manufactures, and horticulture. The School of Horticulture, Burnley, Victoria, also offers a three-year diploma course.

Agricultural colleges are government institutions administered by the State Departments of Agriculture in New South Wales, Victoria, South Australia and Western Australia and by the State Department of Education in Queensland. Their purpose is to teach the principles and practices of agriculture and its specialized branches to those intending to take up farming as a career and to those who propose to enter such occupations as agricultural field officer or technical officer in food processing industries.

The minimum entrance standard is the Intermediate Certificate or Junior Public examination in all cases except Western Australia where it is Sub-leaving. As entry is competitive, there is a tendency for students to hold better than the minimum qualifications. All the colleges are fully residential, and the age at which students may enter them varies from 15 to 17 years, depending on the college and the type of course.

In addition to their formal courses of training, agricultural colleges offer short courses of from three days to one month to farmers and teachers in country districts.

5. **Schools of Forestry.**—Training in Forestry is carried out at the Australian Forestry School, Canberra, and at the Creswick School of Forestry in Victoria. Reference to these institutions is made in Chapter XXIV. Forestry.

6. **Conservatoria of Music.**—There are conservatoria of music in four States. Those in Victoria and South Australia are attached to the Universities of Melbourne and Adelaide respectively. The New South Wales State Conservatorium and the Queensland Conservatorium are controlled by the Department of Education in each State.

All four conservatoria offer diploma courses for which matriculation status is not required; at Melbourne and Adelaide, degree courses are also available to matriculated students.

7. *Service and Administrative Colleges.*—Each of the three Armed Services maintains institutions for the training of officers. Descriptions of these can be found in Chapter XXVII. Defence. Two of the institutions, the Royal Military College, Duntroon, Australian Capital Territory, and the Royal Australian Air Force College, Point Cook, Victoria, have arrangements with universities whereby their graduates may enter university courses at an advanced stage.

The Australian School of Pacific Administration, controlled by the Department of Territories, trains students in the various aspects of service and administration in Commonwealth Territories, including teaching.

8. *The Australian Administrative Staff College.*—The Australian Administrative Staff College was opened in 1957, following discussions among prominent leaders in business and government on the need to raise the standards of administration in all walks of Australian life.

The College is a private body, working in close co-operation with governments and other public bodies, the armed services and the Trade Union movement. It was founded and is owned by a large group of the leading Australian companies. It has as its permanent premises a nineteenth century mansion at Mt. Eliza, thirty miles from Melbourne.

The College is based on the model of the Administrative Staff College at Henley-on-Thames, England, but incorporates features drawn from comparable activities in other parts of the world. Its courses are conducted by a Principal, a small permanent directing staff, and by extensive use of visits by practising senior administrators.

The College conducts a ten-week advanced course in administration designed to enable mature administrators to exchange their views and experiences and further their study of the problems which arise in any managerial work. There is also an intermediate course designed to offer a similar opportunity to men and women at a much earlier stage of their careers. The advanced course is offered thrice annually and the intermediate course twice; both courses are fully residential. Each session of each course comprises forty diversely selected candidates. Certain scholarships are available for the advanced course.

The College has a library and facilities for research in administrative fields.

## § 11. Commonwealth Activities in Education

1. *General.*—(i) *Fields of Activity.* Although education is primarily the responsibility of the States, the Commonwealth is engaged in educational activities incidental to its responsibilities in such areas as defence, external relations, immigration and social services. It is also responsible for public education in its own Territories. Activities of the Commonwealth in education are not administered by a single authority but are divided among a number of departments and instrumentalities. Education in Commonwealth Territories is described in Chapter V. The Territories of Australia; various schools and colleges for the defence services are treated in Chapter XXVII. Defence; the Australian Forestry School is mentioned in Chapter XXIV. Forestry; and other activities which may be considered broadly as educational are described in the section on Broadcasting and Television and elsewhere in Chapter XV. Transport and Communication.

(ii) *The Commonwealth Office of Education.* The Commonwealth Office of Education was set up under the *Education Act 1945* to provide advice to the Commonwealth Government on educational matters and to serve as a channel for liaison between Commonwealth and State educational authorities. Among its major commitments are those which arise from international relations in education, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization (UNESCO), and the planning and supervision of training for oversea students given awards by the Australian Government to attend Australian universities and similar institutions.

The Office also acts as the administering authority for Australian participation in the Scheme of Commonwealth Co-operation in Education and concerns itself with the techniques of teaching English as a second language in connexion with the assimilation of immigrants and tuition for sponsored foreign students.

(iii) *The Commonwealth Scholarships Board.* The Office of Education also provides the secretariat for the Commonwealth Scholarships Board. This Board under its former title of the Universities Commission was also established by the *Education Act* 1945. Prior to 1945, the Commission had functioned under wartime National Security Regulations. The Board consists of a chairman, who is the Director of the Office of Education, and three other members. The main responsibilities of the Board at present are advising the Government on the policy and co-ordinating the administration of the Commonwealth Scholarship Scheme and of Commonwealth Post-Graduate Awards. The Board is responsible for arranging and supervising the training of ex-service personnel and war widows at university and university type institutions under the Commonwealth Reconstruction Training Scheme, the Korea and Malaya Training Scheme, and the Disabled Members' and Widows' Training Scheme.

**2. Assistance to Students.**—The Commonwealth Government provides financial assistance to students who are undergoing tertiary training through a number of scholarship schemes, all of which are administered by the Commonwealth Scholarships Board. The most extensive of these is the Commonwealth Scholarship Scheme, under which 5,000 scholarships are offered annually to undergraduates at universities and other approved institutions.

The majority of the undergraduate scholarships are Open Entrance awards allocated amongst the States on a population basis and awarded competitively on the results of examinations accepted for matriculation in each State. In addition, 1,280 Later Year awards are available to students who have completed one or more years of a course, and Mature Age awards are available to older persons in the 25 to 30 years age group. All successful applicants have their fees paid. Scholarship holders may also be paid a living allowance subject to a means test. As from 1st April, 1962, the maximum rates of allowance have been £383 10s. per annum for a scholar living away from home and £247 per annum when living at home.

At 30th June, 1963, 14,686 Commonwealth scholars were enrolled in undergraduate courses including 4,064 new award holders. Up to the end of 1963, 21,848 scholars had completed undergraduate courses under the scheme.

In 1959, a scheme of Commonwealth Post-Graduate awards tenable at Australian universities was introduced under which 100 awards were made available each year. The benefits comprise a living allowance without means test, and payment of university fees. From 1963, the possible number of Post-Graduate awards was increased to 225. The Commonwealth Government contribution towards the stipend in respect of each award was raised to £900 per annum from 1st January, 1964. Awards may be renewed annually up to a maximum period of four years; in 1963, 340 students were holding awards.

During 1963, the Commonwealth Scholarships Board also continued to arrange and supervise the training of ex-service personnel and war widows at university and university-type institutions. Training of this kind under the Commonwealth Reconstruction Training Scheme was completed at the end of 1961, a total of 21,424 students having completed training. At the end of 1963, 31 students were in training under the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme, 14 of them following full-time courses and 17 studying part-time.

**3. International Relations.**—The Commonwealth has been actively involved in the considerable extension which has recently taken place in relations and exchanges with other countries in the field of education. A significant encouragement to this growth has been membership in UNESCO, to which Australia has belonged since 1946 when the organization was founded.

Twelve specialist UNESCO committees in Australia are responsible for a wide and varied programme of activities and have helped to make Australia's contribution to many international conferences and seminars highly effective. The Committees' projects include the organization of Australian and regional seminars, information programmes, and the preparation and circulation of travelling exhibitions which deal with subjects forming part

of UNESCO's programme. The Australian National Advisory Committee for UNESCO co-ordinates the work of the specialist committees and advises the Commonwealth Government on Australian participation in UNESCO.

With the co-operation of educational institutions, State Education Departments and other bodies, the Commonwealth has accepted increasing commitments in schemes of international assistance and co-operation. The Colombo Plan Technical Co-operation Scheme, the United Nations Expanded Programme of Technical Assistance, the Australian International Awards Scheme, and the Special Commonwealth African Assistance Plan are some of the programmes through which the Commonwealth Government is providing training for overseas students in Australia and is sending Australian experts and equipment to many of the newly developing countries, especially in Asia and Africa. Australia is also actively sharing with other Commonwealth countries in the Scheme of Commonwealth Co-operation in Education which includes the Commonwealth Scholarship and Fellowship Plan. There were some 1,370 sponsored foreign students in Australian institutions in 1963, compared with about 800 in 1956. About 400 of these were Colombo plan trainees enrolled in science, applied science, engineering and technology courses.

Support is given to Australian participation in many international governmental and non-governmental organizations. For example, Australian educationists have attended yearly meetings of the International Bureau of Education, and regular contributions are made to the Bureau's international surveys into various aspects of education. Assistance has been given to bodies such as the Australian Teachers' Federation in sending delegates to meetings of the World Confederation of Organizations of the Teaching Profession.

4. **Grants for other Educational Purposes.**—The Commonwealth gives assistance to various educational schemes and institutions. Grants are made each year by the Commonwealth to the Australian Pre-school Association for the development of kindergarten education, to the Commonwealth National Fitness Council, to the Australian Council for Educational Research, to the Department of Tutorial Classes at the University of Sydney for the publication of the *Current Affairs Bulletin*, and to assist in the provision of training in Occupational Therapy, Physiotherapy and Nursing. The cost of the Departments of Indonesian and Malayan Studies at the University of Melbourne and the University of Sydney is also met by the Commonwealth Government.

5. **Migrant Education.**—The Commonwealth Government's post-war immigration policy has brought to Australia a large number of immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia. This service is provided free of charge to immigrants above school leaving age.

Before arriving in Australia, migrants who do not speak English are given some instruction in English by shipboard education officers. Some may have attended classes in Europe organized by the Inter-governmental Committee for European Migration with which the Australian Government co-operates.

In Australia, evening classes are arranged by State Education Departments wherever nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. There is also available through State Education Departments a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials, while responsibility for the overall supervision of the programme rests with the Department of Immigration, which also meets the costs.

In March, 1963, 16,872 migrants were enrolled in classes and 7,632 were taking correspondence lessons. At the same time, 14,941 were receiving the monthly booklet accompanying the radio lessons. Since the inception of the programme in 1948, close to 500,000 migrants have been enrolled for English tuition.

6. **Technical Training by Government Departments.**—Although most needs of departments for trained staff are met by apprenticeship schemes and other technical college courses and by the universities, some departments provide training which is not available elsewhere. The most important field for which such training is provided is the training of telephone, telegraph, radio and television technicians by the Postmaster-General's Department.

## § 12. Adult Education

1. **General.**—The term "adult education" as used in Australia refers mainly to non-vocational educational and cultural activities for adults. While the nature of the recognized adult education authorities varies from State to State, their major activities have many common features. Regular courses of lectures are organized on such topics as literature, music, drama, international affairs, languages and crafts. Some authorities also organize discussion groups, festivals and summer schools, and provide special services for groups in remote areas. In 1960, an Australian Association of Adult Education was formed, and its first Annual Conference was held in Adelaide in 1961. The Association handles matters pertaining to adult education at a national level and arranges liaison with similar bodies in other countries.

One of the first bodies active in the field of adult education in Australia was the Workers' Educational Association, which formed associations in all States in 1913. Its aims are to bring the universities into closer relationship with the community in general and to provide for higher education in civic and cultural subjects. These associations have been superseded by Adult Education Boards or Councils set up by the State Governments in Victoria, Queensland and Tasmania and by the University in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

The organization of adult education, and some of the activities in each State are described below.

2. **New South Wales.**—State Government grants for adult education are allocated on the advice of the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of New South Wales (Adult Education Section), and the Arts Council of Australia (New South Wales Division).

(i) *University of Sydney.* At the University of Sydney, there are two separate authorities concerned with adult education, the Extension Board and the Department of Tutorial Classes. Plans are being made to create a new Department of Adult Education under a Director of Adult Education, which will take over the work of these authorities.

The Extension Board provides two forms of education—the extension of existing university education to the public in the form of lectures, or to graduates in the form of refresher courses; and the extension of academic education beyond the existing university curriculum, for example by special courses or classes in subjects such as scientific Russian and scientific German.

The Department of Tutorial Classes works in conjunction with the Workers' Educational Association through the Joint Committee for Tutorial Classes appointed by the university senate, and its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and "kits" to serve the needs of country districts and people who cannot be catered for by tutorial classes. It also publishes the fortnightly *Current Affairs Bulletin*.

In 1962, there were 439 tutorial classes and discussion groups with a total enrolment of 8,575 at the University of Sydney.

(ii) *University of New England.* The Department of University Extension at the University of New England brings university extension activities especially to the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area. Vacation schools attract participants from many other areas as well.

(iii) *Workers' Educational Association.* In addition to co-operating with the Sydney University Department of Tutorial Classes, the Workers' Educational Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education, and maintains a property near Sydney where short residential schools are held throughout the year. In 1962, the Association ran 74 classes, for which there were 3,563 enrolments.

(iv) *Public Library of New South Wales.* The Public Library of New South Wales Adult Education section provides an adult education library service for all classes and groups conducted by the bodies mentioned above.

(v) *New South Wales Department of Education.* The New South Wales Department of Education has established evening colleges consisting of classes held in school buildings and staffed largely by departmental teachers. Such colleges provide a wide range of educational, cultural and leisure activities for adolescents and adults, and at some there are facilities enabling adults to prepare for Intermediate and Leaving Certificate examinations. In 1962, there were about 40,000 enrolments for classes at evening colleges.

(vi) *Arts Council of Australia.* Adult education of a more informal kind is provided by the New South Wales Division of the Arts Council of Australia which maintains a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns.

3. *Victoria.*—The Council of Adult Education is a government instrumentality established by the *Adult Education Act 1946*. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes, usually lasting from 10 to 20 weeks, on topics ranging from social studies, psychology, language and literature, to crafts, music and drama. An annual 10-day summer school is another important activity. The Council publishes every two months a bulletin, *C.A.E. Newsletter*, and a quarterly journal, *Adult Education*. Its group service assists, and provides programme material for, discussion groups formed by organizations and individuals throughout the State. In 1961–62, there were 8,386 enrolments for classes and 3,448 individual enrolments in 312 discussion groups.

An important development is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its Community Arts Service, the Council organizes tours by musicians and by theatrical and other companies to country towns which otherwise would have no opportunity of seeing such performances.

The Council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

4. *Queensland.*—The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board are six district officers, one based in Brisbane and five in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some extending over a full year, and film screenings. Library and film services are provided.

In 1962, there was a total attendance of 146,825 at 7,546 lectures and class meetings.

5. *South Australia.*—Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, in co-operation with the Workers' Educational Association of South Australia.

In 1957, a Department of Adult Education was established in the University and a full-time Director appointed. A wide range of university extension courses and educational conferences, summer schools and seminars, including a number dealing with subjects at post-graduate level, are organized directly by the University. In 1962, enrolments for tutorial and university extension classes totalled 2,246, for special schools and seminars 1,250, and for discussion groups 208.

The Workers' Educational Association of South Australia, in addition, carries on an independent educational programme of classes, schools, exhibitions, and film festivals.

The State Education Department also arranges an extensive programme of educational activities for adults.

6. *Western Australia.*—Adult education in Western Australia is organized by the Adult Education Board established in 1928 under the terms of the statutes of the University of Western Australia. The Board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The Board in the metropolitan areas conducts classes, refresher courses and short schools, conferences, seminars and public lectures, and maintains a library. Classes were held in 1962 with a total enrolment of 3,835. The Board's country work operates mainly through a box library scheme for discussion groups, of which there were 74 in 1962. Lecture tours and week-end schools are held, and local adult education is encouraged through local committees. Metropolitan work and country work are drawn together in an annual summer school. The Board also operates a community arts service and arranges screenings of foreign films. Regional drama festivals and music festivals are arranged, culminating in the annual Festival of Perth, inaugurated and administered by the Board.

7. *Tasmania*.—Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had a Director of Tutorial Classes. Later, the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. The Adult Education Board, established under the *Adult Education Act* of 1948, organizes classes of ten weeks' duration on a wide range of subjects. In 1962, 490 courses were held with a total enrolment of 5,258. The Board sponsors special lectures, film screenings and art exhibitions, recitals of music, and dramatic performances in both city and country areas. Its income is derived from a State Government grant and from students' fees.

The executive officer of the Board is the Director of Adult Education. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

### § 13. Oversea Students in Australian Educational Institutions

The development of closer ties in education between Australia and other countries, and the demand for education in many countries in Asia, Africa and the Pacific has brought about a remarkable growth in the number of oversea students who come to Australia to further their education. Part of the growth and much of the awareness of the facilities available may be attributed directly to the schemes mentioned in § 11, para. 3. Since 1955, when there were about 3,500 oversea students in Australia, the number has increased to about 12,500 in 1963. Some attend institutions of higher education such as universities and technical colleges, and Australian qualifications are receiving increasing acceptance and recognition as students return home on the completion of their courses. Between 1955 and 1963, the numbers of foreign students in institutions of higher education have risen from about 1,500 to 6,600, most of whom came from Asian countries. Australian institutions have shown a readiness to accept oversea students, and in many cases special provisions have been made to suit their needs. Nevertheless, population growth and the demand for education, especially for higher education, within Australia have forced many institutions to restrict the admission of oversea students in common with Australian students.

### § 14. Organizations Associated with Education

1. *Australian Council for Educational Research*.—The Australian Council for Educational Research, a non-governmental body, is engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State governments contribute substantial financial support.

2. *The New Education Fellowship*.—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly. A major conference of the New Education Fellowship was held in Australia in 1962, during which prominent educationists from Australia and overseas met in all States.

3. **Australian College of Education.**—The Australian College of Education was formed in 1959. Its aim is to bring together leading teachers and administrators in every field of education, to raise the standard of the profession of education in Australia, to establish and proclaim fundamental educational values, and to recognize outstanding contributions to educational practice. Chapters of the College have been set up in all States, and several of the addresses and papers delivered at meetings of the College have been issued in published form.

4. **Parent and Citizen Organizations.**—In Australia, where all government schools are administered by central departments, there is limited opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide supplementary teaching aids and recreation materials, to foster the regular attendance of children at school, and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils or federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

## CULTURAL ACTIVITIES

### § 1. Libraries

1. **General.**—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia and incorporated by Royal Charter in 1963, and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne. In 1960, the first library school to be attached to an Australian University was opened in the University of New South Wales, and the Royal Melbourne Institute of Technology set up a library school in 1963.

2. **Commonwealth.**—(i) *National Library of Australia.* This Library grew directly from the Library of the Commonwealth Parliament established in Melbourne in 1901, the Committee of which soon afterwards announced its intention of developing a library patterned on the Library of Congress at Washington, U.S.A., capable of serving purposes beyond those essential to the Parliament itself, appropriate to a national library and on a national scale. This policy was steadily pursued, so that, in addition to its primary function of serving Parliament, it gradually became a central source of information for the Government and its departments and other agencies, and assumed increasing reference and bibliographical responsibilities in relation to scholarship and research in Australia and abroad. It was also influenced by the basic elements of the national library concept of the older countries of Europe: namely, that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries. For these growing extra-Parliamentary activities, the Parliamentary Library Committee, in 1923, adopted the title of Commonwealth National Library.

A committee appointed to examine the future control and functions of the Commonwealth National Library recommended, in 1957, its establishment as the National Library of Australia, separate from the Parliamentary Library, with wide functions and controlled by a board subject to a Minister; the transfer, as a separate agency to an appropriate department, of its Archives Division, which constituted the Commonwealth's agency for the custody and organization of departmental records of permanent value which need no longer be held within departmental offices; and that the Parliamentary Library be a separate library under separate Parliamentary control. Continuing co-operation, where possible, between the two libraries was also proposed.

Effect was given to these recommendations by the *National Library Act 1960*, which created the National Library of Australia as a body corporate under the control of a Council of nine members, of whom one is a Senator elected by the Senate, one a member of the House of Representatives elected by that House, and seven appointed by the Governor-General. Its functions are:—to maintain and develop a national collection of library material, including a comprehensive collection relating to Australia and the Australian people; to make the national collection available to such persons and institutions in such manner and subject to such conditions as the Council determines with a view to its most advantageous use in the national interest; to make available such other services in relation to library matters and material, including bibliographical services, as the Council thinks fit, particularly for the purposes of the library of the Parliament, the Departments and authorities of the Commonwealth, and the Territories of the Commonwealth; and to co-operate in library matters (including the advancement of library science) with authorities or persons, whether in Australia or elsewhere.

The National Library comprehensively collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving picture films and sound recordings. It has been assisted in this by the deposit provisions of the *Copyright Act 1912–1950* and has also been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews Ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts and printed material in 1959, and the Ferguson Sociological collection which is still under transfer. A feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including over three million pages in the Public Record Office in London.

The Library maintains a permanent exhibition of selected paintings, prints and other historical material from its collections. This exhibition is displayed in Parliament House, Canberra.

The Library publicizes Australian publications, both at home and abroad, through select lists which include *Australian Books* (annual) and *Australian Public Affairs Information Service* (a monthly subject index with an annual cumulation), and by collections of Australian books maintained by it at all posts at which Australia is officially represented abroad. In London and New York, the National Library maintains and staffs Australian Reference Libraries supervised by its own Liaison Officers in those centres.

In the discharge of its wider bibliographical responsibilities, the Library publishes the *Australian National Bibliography* (monthly with an annual cumulation), which lists books, pamphlets, maps, prints, sheet music, government publications, the first issue of each new periodical or newspaper, and moving picture films produced in or relating to Australia. Commonwealth and State official documents, both monographic and serial, are listed in *Australian Government Publications* (annual). The Library is also building up union catalogues of serials in the social sciences and humanities, and of monographs in Australian libraries.

In 1956, the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State libraries and library boards, the Commonwealth Scientific and Industrial Research Organization, each of the universities, and the Library Association of Australia, plans the further development and co-ordination of bibliographical services and co-operates with UNESCO and

its committees. The Centre organizes bibliographical projects recommended by the Council, and operates as a centre for bibliographical information in Australia and overseas. It has published a *Union List of Newspapers in Australian Libraries; Part 1: Newspapers published outside Australia* (1959); and *Part 2: Newspapers published in Australia* (1960).

The Library acts as a central library of documentary and educational films, its film collection containing over 6,000 titles, together with Australian historical films and a great number of film strips. It published *Australian Films: a Catalogue of Scientific, Educational and Cultural Films, 1940-58* in 1959 and annual supplements in succeeding years. A revised edition of the *Catalogue of 16-mm. Films*, which lists all films available for loan, was also published in 1960 and has been supplemented by annual accession lists. Special efforts are being made to discover and preserve samples of early Australian film production.

Through its Extension Division, the Library conducts the Canberra Public Library Service for residents of the Australian Capital Territory, to whom 590,000 books were loaned during 1962-63. It also assists in the provision of similar services in the Northern Territory, the Territory of Papua and New Guinea, and Norfolk Island.

The National Library's collections contain approximately 730,000 volumes, 34,000 pictures, prints, drawings and other graphic materials, one million feet of microfilm, 102,000 maps, and nine million feet of moving picture films. Special features of the book collection are its strong holdings of Australiana, materials relating to the Pacific area and east and south-east Asia, the publications of foreign governments and international organizations, and works in the social sciences, particularly in political theory and economics.

(ii) *Patent Office Library.* The Library of the Commonwealth Patent Office, Canberra, contains approximately 10,000 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 9,000,000. Indexes include a microfilm of a classified index to 3,000,000 U.S.A. patents and translations of abstracts of U.S.S.R. patents.

(iii) *The Commonwealth Archives Office.* In 1943, following a report by an Inter-departmental Committee, the Prime Minister directed the formation of a War Archives Committee to arrange for the preservation of war records. This Committee recognized that war archives could not be separated from peace-time archives and in 1946 the name was changed to the Commonwealth Archives Committee. In 1952, the National Library became the sole Archival Authority for the Commonwealth and the Chief Archives Officer became the Executive Officer for the Committee. In March, 1961, in accordance with a recommendation of the National Library Inquiry Committee, the Archives Division of the National Library was re-constituted as the Commonwealth Archives Office within the Prime Minister's Department.

The Archives Office is primarily a central agency for the control of those records created by the Commonwealth Government which are no longer required for frequent use in the day-to-day business of government. This function is carried out through the following three basic activities.

*Control of Destruction.* No Commonwealth records may be destroyed without the concurrence of the Chief Archivist whose responsibility it is to safeguard reference interests other than those of the department which compiled the records. This concurrence is given as far as practicable through continuing disposal authorities which enable Commonwealth departments to destroy certain routine classes of records automatically, but records not covered by such continuing authorities are checked before destruction is authorized.

*Provision of Accommodation.* Any records which are no longer in active use but which are considered, either by the originating department or by the Archives Office, to warrant preservation, either permanently or for a further period, may be transferred to an archives repository. While in archival custody, they are arranged and described so that the best use can be made of them.

*Provision of Information.* Records in the custody of the Archives Office are available for use by the depositing and other departments of the Commonwealth Public Service. The Office also provides departments with a service for the provision of information from the records in its custody.

As a complementary function, the Office also provides a service to persons engaged in academic and other forms of research. The headquarters of the Commonwealth Archives Office is in Canberra, for the time being in the National Library Annexe. There are also branches in Sydney, Melbourne, Brisbane, Adelaide and Perth.

(iv) *Commonwealth Scientific and Industrial Research Organization.* The library holdings of the Organization cover the pure and applied sciences. In addition to the Head Office Library in East Melbourne, each of the Divisions and Sections has a specialized collection covering such subjects as food preservation, forest products, chemistry, physics, animal health and fisheries. The collections are particularly strong in the publications of oversea scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Head Office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and is responsible for the following publications:—*Scientific Serials in Australian Libraries*; *Australian Science Index*, an index of articles published in Australian scientific and technical periodicals; and *C.S.I.R.O. Abstracts*, which include abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organizations and additions to the British Commonwealth Index of Scientific Translations.

The larger libraries in the Organization have photocopying facilities which, while normally for internal use, will provide a service for the public when a publication is not held elsewhere in Australia.

(v) *The Australian War Memorial Library.* In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914–18 and 1939–45 Wars, together with collections covering the war in Korea, 1950–53, and earlier wars in which Australian troops participated—Sudan, 1885; South Africa, 1899–1902; and the Boxer Rebellion in China, 1900–01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both World Wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914–18, 1939–45, and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but requests for information are met where practicable.

(vi) *Other Commonwealth Government Libraries.* Most Commonwealth authorities have specialized collections in their own fields, and in addition draw largely on the National Library.

(vii) *Northern Territory Library Service.* The Northern Territory Library Service maintains four centres in the Territory. At 30th June, 1963, stocks totalled 48,661 volumes which were held at the following centres:—Darwin, 25,901; Alice Springs, 15,421; Tennant Creek, 4,074; Katherine, 3,265.

3. States (Other than University Libraries, for which see pp. 757–60).—(i) *State Public Libraries.* In each of the capital cities, there is a well-equipped public library, the libraries in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1962. Later figures for some of the libraries are given in the text relating to the respective libraries.

## STATE PUBLIC LIBRARIES, 30th JUNE, 1962

City	Number of volumes in—			Total
	Reference branch	Ordinary lending branch	Country lending branch	
Sydney .. .. .	(a) 625,784	..	(b) 111,473	737,257
Melbourne .. .. .	800,000	130,000	48,000	978,000
Brisbane .. .. .	153,055	..	73,208	226,263
Adelaide .. .. .	206,581	(c) 79,093	152,990	438,664
Perth (d)(g) .. .. .	203,861	(e) 327,134	..	530,995
Hobart .. .. .	90,065	(f) 150,831	145,428	386,324

(a) Includes 179,776 volumes in the Mitchell Library and 19,928 volumes in the Dixon Library.  
 (b) Includes 1,941 volumes in the model school library. (c) Includes 26,824 volumes in the children's branch and 11,953 volumes in the youth lending branch. (d) Figures for Library Board of Western Australia; separate details for Perth are not available.  
 (e) Public libraries and circulation stock. (f) Includes 117,850 volumes in the children's branch. (g) 30th June, 1963.

(ii) *New South Wales.* The Free Library movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the *Library Act* 1939, which was fully proclaimed as from 1st January, 1944. Of the 178 councils which have adopted the Library Act, 163 have put their adoption into effect. During 1963, they spent on their libraries £1,536,174, including £442,859 received in subsidy. There are 205 libraries, of which 58 are in the metropolitan area and 147 in the country. There are also 19 bookmobiles, of which two are in Sydney, eight in the suburbs of Sydney and nine in country municipalities and shires. These libraries contain 2,652,863 volumes.

New South Wales departmental libraries are staffed by officers attached for duty from the State Library, which also provides a central cataloguing service for municipal and shire libraries constituted under the 1939-1959 Act. The State Library maintains an adult education section servicing adult education activities for the universities of Sydney and New England and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1962-63, 95,270 books were lent to small State schools, and 3,278 to country libraries, while 49,324 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library, known as the Public Library of New South Wales, includes a general reference department of 440,525 volumes, together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixon Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 180,663 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixon gave a collection of historical pictures then valued at £25,000. These were subsequently added to, and at his death in 1952 Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material, together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The total number of volumes in the State Library now exceeds 750,000, apart from manuscripts, historical pictures and other material.

The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council to become the City of Sydney Public Library.

The State Library, which had previously been the repository for State archives, transferred this responsibility to an Archives Authority in June, 1961. The Authority consists of nine members, one of whom the Trustees of the Public Library have a right to nominate.

Other important libraries in New South Wales are:—Teachers' Colleges, 246,388 volumes; the Sydney Public Library, 224,433; Railway Institute, 168,183; Technical Education Branch, 101,058; Australian Museum, 34,099; Government Transport Institute, 31,038; New South Wales Public School Teachers' Federation Library, 21,500; Workers' Educational Association, 14,000; and the Library at the National Herbarium, 10,250 volumes. At 30th June, 1963, the Parliamentary Library contained 147,249 volumes.

(iii) *Victoria*. Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 116 municipalities have established libraries. Of these, 26 are in the city and 90 in the country. An amount of £377,000 was paid to the Councils in library subsidy for the year 1962-63 and £810,000 was expended in municipal library services for the same year. More than 1,500,000 books are available to the communities in which libraries are established.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are 18, comprising a total of 72 councils, consist of groups of councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities. Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1962-63, 49 of them shared a grant of £2,000.

The Public Library of Victoria was established in 1856. It is controlled by a board of seven trustees and receives its finance from the State Government. The reference collections now total about 800,000 volumes, and the lending library has another 178,000 volumes. In addition, the library files 2,500 current periodicals and 500 newspapers, in all about 35,000 volumes. Special collections include the J. K. Moir Collection of Australiana, the M. V. Anderson Chess Collection and the Green and Brodie Shipping Collections. The Victorian Historical Collection contains nearly 20,000 pictures, drawings, prints and objects of historical interest. The Archives Division is responsible for the preservation of government records.

(iv) *Queensland*. The Library Board of Queensland was established in 1945 under the provisions of the *Libraries Act* 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of eight members including the State Librarian as *ex officio* member and secretary. A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library as the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946, and the collection has been kept separate. It contains books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia, and of Queensland in particular, and provides facilities for research students in Queensland literature and history.

In 1958, the section of the Libraries Act dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist appointed.

Since 1948, a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the examinations of the Library Association of Australia, up to 1961 for its Preliminary Examination, from 1962 for subjects 1-3 of its re-organized

**Registration Examination.** In 1959, a course covering some compulsory subjects of the Association's Registration Examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1962-63 were:—main reference collection, 140,121 volumes and 7,688 maps and pamphlets; country extension service, 75,170 volumes; Oxley Memorial Library, 22,123 volumes and 12,664 maps, pamphlets and miscellaneous items.

Local authorities are empowered by the Libraries Act to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1962-63, 69 local authorities were conducting 110 library services. The Brisbane City Council has established 12 of these libraries. There were 88 libraries in Queensland free to adults.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1963, four regional library services had been established:—the South Western (seven shires), the Central Western (eight shires), the North Western (eight shires), and the Central Highlands (five shires), with head-quarters at Charleville, Barcardine, Mt. Isa and Emerald respectively. Other regional services are being planned.

During 1962-63, the Board received a grant of £196,440 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies of fifty per cent. on the purchase of books and the acquisition or improvement of library buildings and equipment. Subsidies were paid to four regional library service boards, 49 local authorities, 36 schools of arts and five other bodies.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1963, the library held 91,650 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature.

The *Libraries Act Amendment Act* 1949 provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 213,000 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 42,000 volumes in the lending department available to persons living in the metropolitan area, and the country lending service has 173,000 volumes, of which more than half are suitable for children. The library has an active programme for the publishing of facsimile editions of early Australian texts.

The Research Service specializes in scientific and technical inquiries and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1963.

There are thirteen local public libraries in South Australia provided by ten local government authorities. The libraries are subsidized on a £1 for £1 basis by the State Government. The Library Board of South Australia, through the Public Library of South Australia, provides various central services. Book-stocks are pooled in the Public Library of South Australia and are interchanged between the libraries.

At the end of June, 1963, these local public libraries contained 80,000 books. There were 52,000 registered borrowers. In the year 1962-63, 702,000 books were lent.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds.

The Board has the following major functions:—to encourage local authorities throughout the State to establish public libraries and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established; to administer the State Library; to advise the Government on all matters relating to libraries; and to provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing, and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1963, 63 libraries had been established.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:—J. S. Batty Library of West Australian History; Library of Business, Science and Technology; Library of Social Sciences, Philosophy and Religion; Library of Literature and the Arts.

The State bibliographical centre is housed at the State Library and there is also a commercial information centre. The State archives are maintained by the State Library and managed by the staff of the Batty Library. The State Library is fully equipped with microfilm and photocopy apparatus.

The book-stock of the Board at 30th June, 1963, was:—lending library services (including books in public libraries), 327,134 volumes; State Library, 203,861 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 17,000 volumes of general reading and fiction. Books are sent to country readers each month.

There are some 100 special libraries in government departments and industrial firms. Union catalogues of periodicals and books received in the libraries in Western Australia are maintained by the Library Board of Western Australia in the bibliographical centre of the State Library.

(vii) *Tasmania.* The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library headquarters in Hobart, for the extension of library services throughout the State, for the control of State aid to libraries and for the State Archives. The first stage of a new State Library headquarters building in Hobart was completed in 1962. The State Government provided £175,568 towards the cost of library services in 1962-63.

Municipal libraries are assisted with the purchase of books and participate in a book exchange scheme. In 1963, 45 municipalities took part in the service, leaving only four outside the scheme. In Hobart, the Board operates the Hobart Lending Library on behalf of the City Council. Two bookmobiles operate in Hobart and country districts, catering for areas without library premises, for children, old people's homes, etc.

The Board also operates a Reference Library in Hobart from which reference services are available to people throughout the State. There is also a documentary film library and a recorded music library. The Board arranges screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during sessions.

4. *University Libraries.*—(i) *General.* These libraries provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professorial staff.

The following table shows the volumes held, accessions during the year, and expenditure of the Australian university libraries.

## UNIVERSITY LIBRARIES, 1963

University	Volumes	Accessions during year	Expenditure (a)
			£'000
Australian National University .. .. .	304,308	31,080	195
Sydney .. .. .	815,975	54,953	199
New South Wales .. .. .	258,085	36,615	227
New England .. .. .	152,726	22,340	87
Melbourne .. .. .	347,880	24,842	225
Monash .. .. .	120,000	25,000	80
Queensland(b) .. .. .	307,042	34,093	143
Adelaide(b) .. .. .	316,455	27,634	145

(a) 1962.

(b) Excludes pamphlets.

(ii) *Australian National University.* This library consists of two main collections; the former Australian National University Library, founded in 1948, which serves primarily the Institute of Advanced Studies, and the former Canberra University College library, founded in 1938, which serves primarily the School of General Studies. At the end of 1963, the stock included some 60,000 volumes in oriental languages. The collection serving the Institute of Advanced Studies specializes in the fields of the physical and medical sciences, excluding clinical works. In the social sciences, the library endeavours to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics. The collection serving the School of General Studies has been built up to meet the needs primarily of undergraduates studying arts, economics, law, oriental studies and science.

(iii) *University of Sydney.* The library consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkitt Library for pre-clinical medicine, and some fifty-two departmental libraries. The University Library, together with departmental libraries and associated libraries in the University grounds, holds a total of more than one million volumes.

The first books were acquired in 1851, and shortly afterwards the library of Sydney College was added. The collection of Nichol D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885, Thomas Fisher bequeathed the sum of £30,000, the income from which is used as a book fund. The Fisher Fund was matched in 1961 by establishment of the W. H. and Elizabeth M. Deane Library Fund. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library. In 1961, the University acquired the English literature collection of the late Hugh Macdonald. Sydney University Library has an extensive collection of mediaeval manuscripts and early printed books.

(iv) *University of New South Wales.* The libraries of this University consist of the Central Library and a Bio-medical Library at Kensington. There are also libraries at Newcastle and Wollongong University Colleges. The Broadway campus is serviced by the Sydney Technical College Library, where about 37,000 books from the University's library are placed. Service to the university division at Broken Hill is also provided by the Department of Technical Education. In December, 1963, the university had approximately 270,000 volumes in its libraries and in Department of Technical Education libraries.

(v) *University of New England.* The Library was founded in 1938, when the New England University College was established. Sir William Dixson was its first benefactor. The library is now housed in a three-storied building, air-conditioned and containing all facilities. The library receives about 3,000 current periodical titles annually. The library is able to accommodate 200 readers and 278,000 volumes. The building also houses a bindery, photographic and archives division. A further wing is to be built later to house a library of post-graduate and research volumes which, at the present time, are on the library's main shelves. The library has its own training officer and conducts formal courses in librarianship.

(vi) *University of Melbourne.* Early in 1854, the first allocation for books was made, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State Governments, and a new building costing £700,000 was occupied at the beginning of 1959, the first in the University to be designed specifically for library purposes. It provides space for 1,300 readers and 300,000 books. During the academic year, admissions of readers to the building average 8,000 a day. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of textbooks and certain valuable volumes, is made as easy as possible. The resources of the library are also used extensively on inter-library loan by industries and other organizations throughout Australia. The University Library, including 12 branch libraries in various departments, is administered from the centrally situated Baillieu Library. The large medical branch library is specially rich in periodicals.

(vii) *Monash University.* The library started to acquire books in 1960 and subscribes to some 2,500 journals. It has been decided that the library organization will develop into four large units—the main library, a bio-medical library, a law library, and a library for the physical sciences and technology. The physical sciences and technology library has been named the Hargrave Library after Lawrence Hargrave (1880–1915) and was opened in December, 1962. The main library, catering mainly for the humanities, was occupied in November, 1963.

(viii) *University of Queensland.* The library was founded in 1911. The main library is in its own building in the University at St. Lucia, and there are a considerable number of departmental libraries. All books are open to access and most are available for borrowing. Among the more important possessions of the library are its large holdings of periodicals, its geology collection, and its material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

(ix) *University of Adelaide.* This library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over £50,000 for the library. Although readers have access to all parts of the library, the book collection is in two divisions, a collection of some 25,000 of the most frequently used books being kept in the main reading room, and the remainder, consisting of older or more specialized books, being shelved on the four levels of the extensions. Bound periodicals are shelved in steel stacks under the main reading room. Borrowing facilities are available to all matriculated students, to country students, and to graduates. There are branch libraries for medicine, law and music. The South Australian branches of the Australian Medical Association, the Australian Physiotherapy Association and the Australian Dental Association make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of publications in agriculture.

(x) *University of Western Australia.* The first full-time library staff was appointed in 1927. Provision for a permanent library building was not possible when the University moved to its present site, and space and facilities were inadequate for many years. A new four-storey building was completed at the end of 1963. The building, which is fully air-conditioned, provides seats for over 800 readers and accommodation for over 300,000 volumes, together with facilities for microfilm readers, type-writing booths and photo-copying facilities. The University Library developed very slowly in the early years, but recently has been adding about 12,000 volumes a year to its stock. In addition to the main library, there are a number of departmental libraries of which the more important are engineering, agriculture, pre-clinical and law. There is also a medical library, in accommodation provided by the Royal Perth Hospital, for the use of the medical school.

(xi) *University of Tasmania.* Although this library was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the University Library, thus providing a major reference tool for all bibliographic inquiries in the State. The library receives currently about 3,400 periodicals. The University Library also collects private and business archives and it has some important classical manuscripts as well as a collection of early printed books.

5. *Children's Libraries and School Libraries.*—(i) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools, and an increasing number of primary schools, have teacher librarians.

(ii) *Victoria.* Under the auspices of the Free Library Service Board, 116 municipal children's libraries have been, or are being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern children's book collections which are constantly being augmented. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, nine independently controlled children's libraries shared in this grant in 1962.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the Government subsidizes the purchase of books. In June, 1963, 370 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. One hundred and sixty-two schools benefited from this scheme in 1963.

The Education Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 25 teachers are trained each year.

(iii) *Queensland.* The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 107 libraries free to children, of which 10 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba, and Townsville are particularly active. Country children who are not catered for locally may borrow from the Country Extension Service which possesses a separate children's collection. The purchase of books for State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Trainees at the Teachers' Colleges are instructed in school library organization and management.

(iv) *South Australia.* A children's library of 33,000 volumes is used by school classes and individual children living in the metropolitan area. There is a large collection of historical children's books assembled for the use of research workers. Except for works of reference, all books are available for loan. In August, 1957, a youth lending service was opened for young people from 13 to 18 years of age. It has a stock of 13,000 volumes.

(v) *Western Australia.* The Education Department provides library services and makes library subsidies and grants to schools. Advisory, central cataloguing and central repair and binding services are provided by the Library Services Branch. The Teachers' Colleges provide courses in school library organization and library service.

The Perth Technical College and Technical Schools are equipped with libraries, and an allocation for books is provided annually for each school and college department. A librarian at the College provides central ordering and cataloguing services throughout the Technical Division.

All high schools are provided with a library room and furniture, and trained teacher-librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley Travelling Library and the Small Schools Fixed Library Schemes. Under the Fixed Library Scheme, grants are made once every three years to each school to provide additional books for the

permanent libraries of reference books. The Hadley library provides recreational reading and operates 360 boxes which are exchanged each school term in over 249 schools. Boxes are sent to small schools, mission schools and special classes. Finance is provided from a government grant and contributions from the participating schools of commission received from the Commonwealth Savings Bank for school savings bank activities.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania*. The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania. At 30th June, 1963, 162 children's libraries and depots had been established.

The Education Department provides library quarters in all high schools and in some of the larger primary schools. The purchase of books is financed by parents' associations and by departmental subsidies. Teacher-librarians are appointed in high schools. The Schools Library Service issues loan collections of books to schools and gives advice on the setting up of school libraries.

6. **Special Libraries.**—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being administered increasingly by trained librarians.

7. **Microfilms.**—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), National Library of Australia (PM), C.S.I.R.O. (M), Australian National University (M), Patent Office (P); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

## § 2. Museums

1. **General.**—Museums have been established in all capital cities and in many provincial cities and towns. The most important are maintained by government grants. Others are supported by municipal councils, the Universities, and private organizations or individuals. Many museums have art galleries which are housed in the same building. However, art galleries are described separately in § 3, pages 763–4.

2. **Commonwealth.**—(i) *The Australian War Memorial, Canberra*. The Memorial comprises the national collection of war relics, and the building in which these are preserved. The building was opened in 1941. There is a collection of 4,000 art works, and a museum collection of more than 40,000 war relics, the gathering of which began on the battlefields of the 1914–18 War and was continued during the subsequent wars in which Australian Forces have participated. The collection has been enhanced by gifts of relics from the governments of Great Britain, the sister dominions, and of allied countries, and also by presentations made by ex-servicemen and relatives of those who died. The collection consists of items such as tank, aeroplanes, submarines, field-guns and boats, and the widest possible range of war trophies down to the smallest items, nails, pieces of wire, wristlet watches and the like, each relic dependent for its value on its historical background. The works of art, all by Australian artists, depict battle scenes, individual officers and men, etc., and include oil and water colour paintings, drawings, statuary, bronzes, dioramas and mosaics. There is also a library, which is described in § 1, page 753.

(ii) *The Institute of Anatomy*. The museum of this institution is described in Chapter XVIII. Public Health, pages 692–3.

3. States.—(i) *New South Wales*. The Australian Museum in Sydney, founded in 1836, is the oldest in Australia. It is incorporated under the control of trustees, and receives its finance from the State Government. Expenditure in 1962–63 was £279,532. The museum has very fine collections of Australian fauna, and important anthropological and mineral collections. The museum has a valuable library, which contained 34,099 volumes in 1962. The number of visitors to the institution during 1961–62 was 307,177, with average attendances of 795 on weekdays and 1,139 on Sundays. Courses of evening lectures are delivered and lecturers also visit suburbs and country centres. Gallery demonstrations are also given. Screenings of natural history films were attended by 9,803 persons in 1962–63. Day lectures are given for school children, and 19,021 children attended in 1962–63.

The Museum of Applied Arts and Sciences in Sydney is also financed by the State Government, and has collections illustrating manufacturing processes and natural products. The scientific staff conducts research work on the development of natural resources. There is a library of more than 9,000 volumes. Visitors exceeded 206,000 in 1963 and expenditure in 1962–63 was £81,472. There are branch technological museums at Goulburn, Bathurst and Broken Hill.

Representative collections illustrating the natural wealth of the country are displayed by the Forestry Commission and in the Mining and Geological Museum controlled by the Department of Mines. The Mining Museum prepares collections of specimens for use as teaching aids in country schools. The National Herbarium and Botanical Museum is situated at the Sydney Botanic Gardens.

Three museums at the Sydney University are open to the public; these are the Nicholson Museum of Antiquities, the Macleay Museum of Natural History, and the Haswell Zoological Museum. The University also has a Museum of Morbid Anatomy.

Among historic homes which have been converted to historical museums is Vacluse House, Sydney, the home of W. C. Wentworth.

(ii) *Victoria*. The National Museum of Victoria, Melbourne, was founded in 1854. It is devoted to natural history, geology and ethnology, and there are special Australian collections of birds, butterflies, molluscs and ethnology.

The Institute of Applied Science was founded in 1870 and has been enlarged recently by the addition of three new floors. Exhibits cover applied and economic aspects of all branches of science, with emphasis on recent scientific developments. A planetarium, seating 116, was delivered in 1962.

There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens, and a Geological Museum controlled by the Mines Department. Well-equipped museums of mining and geological specimens have also been established at Schools of Mines in several country towns.

Small museums are associated with art galleries in Castlemaine, Warrnambool, Mildura and Beechworth, in each case conducted by the local council. There are a few private museums in country areas. Several historic homes of the 19th century are also maintained and exhibited to the public.

(iii) *Queensland*. The Queensland Museum, founded in 1855, is the State museum of natural science. It is a Government sub-department and is maintained by the State. The collections comprise extensive exhibited and reference series, mainly in the fields of zoology, geology and ethnology, and some mechanical and historical material is held with a view to future museum development. Lessons supported by film displays are arranged for school children. The museum is now the recognized State depository for valuable material in natural science, and the collections are constantly being augmented. In addition, the Museum contains the outstanding library of the State in the fields of zoology, geology and anthropology. The annual number of visitors is about 200,000. Expenditure during 1961–62 was £42,234 and £44,330 for 1962–63.

There is a Botanical Museum and Herbarium at the Brisbane Botanic Gardens, and the Royal Historical Society of Queensland has an historical museum at Newstead House, Brisbane, which has about 12,000 visitors each year. The University of Queensland has recently established an Anthropology Museum.

(iv) *South Australia*. The South Australian Museum has large collections of most branches of natural history and has especially rich collections of Aboriginal artifacts. In 1962–63, there were at least 200,000 visitors. Total expenditure was £80,035, met from State Government grants and bequest funds.

In addition, there is a Municipal Museum possessing records and mementoes of the State and city, and a Botanical Museum, situated in the Botanic Gardens, with a carpological collection and displays of economic plant products. Some town councils have special museums housing relics from earlier times of their districts (an excellent example can be seen at Lobethal), and several cottages once belonging to early pioneers have been restored as historical museums. These include Adam Lindsay Gordon's Cottage at Port MacDonnell and Captain Charles Sturt's Cottage, Grange.

(v) *Western Australia.* The Western Australian Museum was established in 1895. It is under the statutory management of a board of five members appointed by the State Government, but operates under its own director and staff. Expenditure in 1962-63 was £73,941. It is primarily a museum of natural history, with active departments of vertebrate and invertebrate zoology, palaeontology, entomology, archaeology and anthropology. Principal research interests are in the fauna of Western Australia and the ethnology of the Western Australian Aboriginal.

The Education Department of Western Australia provides a teacher to the Museum who instructs visiting classes and who is in charge of a children's centre during school holidays. Members of the Museum staff also take part in the teaching of undergraduates at the University of Western Australia.

There is also a Geological Museum at the School of Mines, Kalgoorlie.

The "Old Mill" Museum at South Perth, which exhibits historical objects of public interest including the old mill itself, is directed and maintained by a private business firm. A similar institution based on the Old Gaol at Toodyay is run by the local authority. Several other local bodies maintain small historical collections.

(vi) *Tasmania.* There are two main museums in Tasmania—the Tasmanian Museum in Hobart and the Queen Victoria Museum in Launceston. Both museums contain collections of botanical, mineral and miscellaneous exhibits, including valuable material illustrating the life of the now extinct Tasmanian Aboriginal race. Fauna collections include many specimens of birds and marsupial animals not found in other parts of Australia. Art galleries are attached to each museum. State Government grants amounted to £37,000 in 1962-63. The Tasmanian Museum and Art Gallery is controlled by a board, which receives some assistance from the Hobart City Council, in addition to State Government grants. Expenditure in 1962-63 totalled £32,479. The Queen Victoria Museum and Art Gallery is controlled by the Launceston City Council, which met about half the total expenditure of £20,848 in 1962-63.

Several colonial houses have been converted into historical museums and there is also a privately owned museum near Burnie.

### § 3. Art Galleries

1. *New South Wales.*—The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871, and is controlled by the State Government. At the end of 1962, its contents comprised 1,562 oil paintings, 1,033 water colours, 2,750 prints and drawings, 147 sculptures and casts, and 1,466 ceramics, work in metal, and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns. Annual exhibitions include entries for the Archibald, Wynne and Sulman competitions. In 1963, 160 conducted lectures were given to 4,800 school children. The expenditure for 1962-63 was £72,896.

In 1959, a War Memorial Gallery of Fine Art was established at the University of Sydney.

2. *Victoria.*—At 30th June, 1962, the National Gallery in Melbourne contained 1,317 oil paintings, 8,101 water colour drawings, engravings and other prints, and 9,319 objects of statuary, bronzes, ceramics, etc. The gallery is situated in the same building as the museum and public library. Expenditure by the National Gallery in 1961-62 was £125,738 including £44,266 for purchases of works of art. Several bequests were made to the institution by private citizens. There are provincial art galleries at Ballarat, Bendigo, Castlemaine, Geelong, Hamilton, Mildura, Shepparton and Warrnambool, which also display works loaned by the National Gallery.

There are many small private art galleries in Melbourne. While some of these are commercial establishments, others exhibit the works of groups of artists or of individual artists. These works are generally for sale, but the purpose of the galleries is largely cultural. In addition, there is the annual *Herald* outdoor exhibition, an open-air exhibition of paintings and sculpture which is visited by many thousands of people each year.

3. **Queensland.**—The Queensland Art Gallery, maintained by the State Government, was established in 1895. Expenditure totalled £18,116 in 1961–62 and £20,600 in 1962–63. During 1959, the Government passed a new *Queensland Art Gallery Act* reorganizing the art gallery, appointing a new Board of Trustees and granting a site for the building of a new gallery. The collection has been enriched by numerous bequests. In 1959, an anonymous gift of £126,000 was devoted to the purchase of an important collection of modern French paintings. The collection as a whole comprises 777 oils and watercolours, 489 prints and drawings, 72 sculptures, and 205 art objects. During 1962, the first of what is hoped to be a regular series of travelling exhibitions to country districts was organized.

The University of Queensland Fine Arts Committee controls the Darnell Collection, the result of a bequest by John Darnell who died in 1930. Income from the bequest is augmented by grants from the University Senate and is devoted to the purchase of works of art. The collection is exhibited at the University and includes 500 art books, 300 paintings in various media and some sculpture.

Two collections are exhibited at Toowoomba. The Gould collection, which includes paintings, pottery, ceramics, antique furniture and other art works, is displayed at the City Hall. The Sir Lionel Lindsay Art Gallery and Library was donated to the city by William Bolton and contains works of Australian artists and authors.

Other local authorities also maintain art galleries in provincial towns and there are several privately owned galleries.

4. **South Australia.**—The National Gallery in Adelaide originated in an exhibition of pictures in the public library building in 1881. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1963, there were in the gallery 1,978 paintings in oil, water colours and pastels, 111 items of statuary, and large collections of drawings, prints, furniture, ceramics and coins. Special exhibitions are held from time to time. The expenditure during 1962–63 was £73,337. This included payments by the State from loan funds for alterations and additions to buildings amounting to £10,297.

Exhibitions of paintings are held regularly in private art galleries and are usually well-attended. In particular, the Royal South Australian Society of Arts presents five special exhibitions during the year, Spring, Autumn, Associate and Lay Members, Print and Drawing, and the Wholohan Prize Exhibition.

The Hahndorf Art Gallery was established in 1956, and since 1959 has operated in historic premises—the first Lutheran school built in Australia.

5. **Western Australia.**—The Western Australian Art Gallery was established in 1895. Although under the statutory management of a board of five members appointed by the State Government, it functions under its own director and staff. At 30th June, 1963, the collection included 416 oil paintings, 220 water colours, 10 pastels, 1,440 prints and drawings, 1,260 reproductions, 9 miniatures and 32 pieces of sculpture. International and interstate exhibitions are frequently held, and travelling exhibitions are sent to country centres.

There are no major private art galleries, but some municipalities maintain collections.

6. **Tasmania.**—In Tasmania, the Art Gallery in Hobart was opened in 1887. In June, 1963, it contained 257 oil paintings, 202 water colours, 127 black and white, 3 statuary and 159 etchings, engravings, etc.

The Art Gallery in Launceston was opened in 1891. In June, 1963, there were on view 258 oil paintings, 382 water colours, 146 black and white, and 280 miscellaneous exhibits.

Both galleries operate in conjunction with the museums in each city, occupy the same buildings, and are controlled by the museum authorities.

#### § 4. Botanical and Zoological Gardens\*

1. **New South Wales.**—The Sydney Botanic Gardens are situated on the shores of Farm Cove, Sydney Harbour, close to the heart of the city and on the site of the first farm established in 1788 by Governor Phillip. Now occupying 66 acres with extensive lawns and flower beds, they contain a large and varied collection of flowering plants, shrubs and trees as well as hothouses of orchids and ferns.

\* In addition to the zoological gardens referred to, there are numerous privately owned zoos and sanctuaries, many of them at tourist resorts, which maintain collections of Australian flora and fauna. There are also various national parks, forests, reserves, etc. dedicated for public use, which are preserved largely in their natural condition.

The Zoological Gardens at Taronga Park, on the northern side of Sydney Harbour, were opened in 1916. The area is about 70 acres. The natural formation has been retained as far as practicable, with the object of displaying the animals in natural surroundings, and an aquarium has been built within the gardens. In 1962-63, admissions to the grounds were 790,498 and to the aquarium 279,108. The receipts of the zoological department of the Taronga Park Trust amounted to £180,729 in 1962-63, excluding an annual State grant of £3,250, and expenditure amounted to £186,720. Exhibits at 30th June, 1963, comprised 1,089 mammals, 2,559 birds, 120 reptiles, and 1,160 fish.

2. **Victoria.**—The main botanical gardens in the State are the Royal Botanic Gardens, an area of 88 acres situated within one mile of the centre of the City of Melbourne, and containing over 12,000 species of plants, of which there are some 30,000 individual specimens. Many species of native birds breed on islands in lakes within the gardens.

The Zoological Gardens are situated in Royal Park and contain a wide selection of animals, birds and reptiles. Wild life sanctuaries are also maintained at Healesville and North Balwyn and contain specimens of indigenous fauna.

3. **Queensland.**—Botanical gardens have been established in Brisbane and in several other cities. The Brisbane Botanic Gardens were established in 1855 by the Government of New South Wales. In 1925, the Queensland Government transferred them to the Brisbane City Council. They occupy approximately 46 acres on the banks of the Brisbane River in the central city area and are noted for their collections of palms, tropical trees and shrubs, and succulents; they contain over 7,500 plants.

4. **South Australia.**—The Botanic Gardens, begun in 1854, occupy 45 acres planted with many tropical and sub-tropical trees, shrubs and plants.

The Zoological Gardens, opened in 1883, have an area of approximately 19 acres set among lawns and gardens and contain a fine collection of animals, reptiles and birds. There were 303,000 visitors in 1962-63.

5. **Western Australia.**—A botanic garden for the native plants of Western Australia was officially inaugurated in March, 1963, and planting of the garden began in May. The site of 25 acres which has been selected for garden development during the first five years is in King's Park, a reserve of almost 1,000 acres close to the centre of Perth. An arboretum of 35 acres for the collection of native trees was founded in June, 1962. It is now almost fully planted, and nearly all trees native to the southern part of the State are represented.

The Zoological Gardens, which were opened in 1898 at South Perth, have an area of 44 acres and are under the control of the Acclimatisation Committee. Animals, birds and reptiles are exhibited, and sporting and recreational facilities are available to the public. During the year 1962-63, 139,761 adults and 131,028 children visited the zoo.

6. **Tasmania.**—The Hobart Botanical Gardens adjoin Government House on the Queen's Domain. The gardens contain a fine collection of exotic trees and shrubs and are controlled by a Board appointed by the State Government, which supports the gardens by annual grants.

There is no zoo in Tasmania, but a small collection of animals and birds is maintained by the Launceston City Council at the City Park.

7. **Northern Territory.**—The Darwin Botanical Gardens were established in 1873, and were planted with imported exotic plants and trees. The gardens now occupy 80 acres and feature tropical plants of both native and overseas origin. They are controlled by the Darwin City Council.

## § 5. Book Publishing

1. **Australian Book Publishing.**—Some statistics relating to Australian book publishing are compiled by the National Library of Australia as part of its bibliographical responsibilities (see p. 751). Through the deposit provisions of the *Copyright Act* 1912-1950, its overseas collection agents, and its own efforts, the library receives practically all Australian publications although not necessarily in the year of publication. Because the statistics compiled and shown hereunder are classified according to the year of publication, all figures are subject to revision as publications not yet received in the National Library come to hand.

For books published in 1961 and thereafter, the method of counting conforms with international practice. Each title is counted as one unit. The figures cover all non-periodical publications (i.e. those published at irregular intervals or regularly at intervals of

one year or longer) published in Australia. They refer to all publications of five pages or more and include pamphlets, new translations and re-editions. They include government publications, educational textbooks, university theses, etc., but exclude publications not available to the general public, advertising material, publications of transitory interest, off-prints, musical works, children's picture books, maps and charts.

Figures for 1960 and previous years are less comprehensive, excluding most government publications and certain paper-backs.

2. Number of Publications.—The following table shows the number of books, etc., published in Australia and received by the National Library during the years 1959 to 1963. For 1959 and 1960 the figures are on the "old" basis of compilation and exclude most government publications.

**NUMBER OF PUBLICATIONS RECEIVED BY THE NATIONAL LIBRARY:  
AUSTRALIA**

Received by the National Library up to the end of—	Published during—				
	1959	1960	1961	1962	1963
1959 .. .. .	580	..	..	..	..
1960 .. .. .	765	531	..	..	..
1961 .. .. .	814	839	1,840	..	..
1962 .. .. .	873	984	2,848	1,793	..
1963 .. .. .	873	1,039	2,963	2,501	1,416

The next table shows the 1962 and 1963 publications received up to the end of 1963, classified by subject matter.

**NUMBER OF 1962 AND 1963 PUBLICATIONS RECEIVED BY THE NATIONAL LIBRARY, BY SUBJECT(a): AUSTRALIA, TO 1963**

Subject	Published during—	
	1962	1963
Bibliography, libraries, general .. .. .	61	40

<b>Grand Total</b> .. .. .	<b>2,501</b>	<b>1,416</b>

(a) The classification is based on the divisions of the Dewey Decimal Classification.

3. **The Commonwealth Literary Fund.**—In 1908, the Commonwealth Government, under Alfred Deakin, first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty, and for writers who were unable for financial reasons to continue their activities.

In 1939, in an endeavour to encourage the development of Australian literature and to foster appreciation of it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards Fellowships each year, assists in the publication of manuscripts of high literary merit, makes annual grants for lectures in Australian literature, and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity in the field of creative literature, to enable them to devote their time to working on a literary project they specify. A Fellowship carries a maximum value of £2,000 per annum. The Fund does not seek out people on whom to bestow Fellowships, but considers only those who submit applications.

The Fund also assists in the publication of manuscripts which have outstanding literary merit, but which, in the opinion of publishers, may constitute a commercial risk. This assistance takes the form of a guarantee of assistance to the publisher. The Fund does not itself enter the field of publishing, nor does it make outright grants to authors to enable them to arrange publication.

Since 1940, annual grants for special lectures in Australian literature have been made to all universities. In 1956, the Fund initiated a scheme of lectures to the general public and to schools mainly in country areas, with the co-operation of State adult education authorities and Education Departments. Annual grants are now made to the States for this purpose.

The Fund also assists certain literary magazines of long standing and recognized literary value.

The Fund is administered by a Committee consisting of the Prime Minister (Chairman) the Leader of the Country Party, and the Leader of the Opposition in the House of Representatives. The Committee is advised on all literary matters by an Advisory Board of six persons with literary qualifications.

4. **The Literature Censorship Board.**—In 1937, the Commonwealth Government introduced legislation to provide for a Literature Censorship Board to advise the Minister for Customs and Excise on imported literature. At the same time, an Appeal Censor was appointed to afford appellants an avenue of appeal which did not make expensive court proceedings necessary. The Appeal Censor was replaced by an Appeal Board in 1960.

The Boards were set up to deal with that part of the problem which provides the greatest amount of controversy—restriction on books which have a real place in the field of literature. In practice, no imported publication having literary merit is prohibited without prior reference to the Literature Censorship Board. Should the Minister decide to prohibit the importation of a book on the recommendation of the Board, an appeal against the decision may be made for reference to the Literature Censorship Appeal Board. A decision to prohibit the importation of a book may be challenged through the normal processes of the law.

The Literature Censorship Board consists of a Chairman, a Deputy Chairman and two other members, while the Appeal Board is made up of a Chairman and two other members.

The foregoing refers to imported literature. Control of indigenous matter comes under the jurisdiction of the State Governments.

## § 6. Film Production

1. **Australian Film Production.**—Australia was one of the pioneers in the history of film-making, a short story film, *John Vane, Bushranger*, having been made in 1904, only a year after America's *The Great Train Robbery*, which is generally considered to be the first genuine story-film. It has been claimed that *The Kelly Gang*, made in 1905–6, was the first full-length feature film produced in the world.

Following the outbreak of the 1914-18 War, a series of short patriotic films were produced. In 1917, the first of a successful series of rural comedies was made, featuring a family called the Hayseeds. In the same year, *The Kelly Gang* was remade and the first film version of *For the Term of his Natural Life* appeared. A first film version of C. J. Dennis's *The Sentimental Bloke* was made in 1919.

The year 1920 was notable for a number of productions with an authentic Australian flavour:—*On our Selection*, a first version of *Robbery Under Arms*, another remake of *The Kelly Gang*, and C. J. Dennis's *Ginger Mick*. Production continued at about the same level until the coming of sound in 1928. Altogether, approximately 160 theatrical films were produced by Australian units in the silent period (1900-1930).

Lack of equipment hampered the commencement of production of sound films in Australia, but during the 1930's nearly 60 sound films were produced.

During the 1939-45 War, commercial film production combined with the Commonwealth Government in making films. Since the war, a number of British and American companies have made films in Australia. Altogether, between 1930 and 1960, about 115 feature films were produced in Australia.

**2. The Australian National Film Board.**—The Australian National Film Board was inaugurated in April, 1945, on the recommendation of a Commonwealth Government inter-departmental committee. It was attached, for administrative purposes, to the Department of Information. With the abolition of that Department in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration; and for dissemination abroad to expand trade and commerce with other countries, to encourage tourist traffic with Australia, to improve Australia's relations with other countries and, where necessary, to explain Australia's national policies and encourage immigration.

The constitution provides for a membership of eleven, with the Director of the News and Information Bureau, Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities, and organizations interested in the production, distribution or utilization of films for national publicity.

**3. The Film Division of the News and Information Bureau.**—The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939-45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit. Production and distribution of all films required by Commonwealth departments are now undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical and television distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its oversea representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

Since 1946, the Film Division has produced 409 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 50 oversea centres, where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain, there is regular distribution through more than a thousand theatres and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. Selected films have been recorded in French, Dutch, German, Italian, Japanese, Malay, Thai, and Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division produces films under the sponsorship of, or with the co-operation of, Commonwealth departments and many other bodies such as the Commonwealth Banking Corporation, the Road Safety Council, the Overseas Telecommunications Commission, the Snowy Mountains Hydro-electric Authority, the Australian Wine Board, the Australian National University, and the Australian Broadcasting Commission.

The Australian motion picture industry co-operates with the Commonwealth, and special films for urgent national appeals are planned, produced and distributed with the assistance of the National Film Council of the motion picture industry and its Film Production Advisory Committee.

**4. Film Censorship.**—(i) *Legislation.* The Commonwealth Government's powers over censorship of films extend only to imported films and imported advertising matter and stem from the Customs Act. Under that Act, the Customs (Cinematograph Films) Regulations provide for the appointment of a Film Censorship Board whose function is to ensure that films and related advertising material coming within certain defined categories are not admitted into Australia. Under those regulations, the Film Censorship Board may pass films in their original form, reject them, or pass them after eliminations have been made. Legislation passed by the State Governments of Victoria, Queensland, Western Australia and Tasmania names the Commonwealth Film Censorship Board as the censorship authority and vests in it the power to classify films as suitable for general exhibition or otherwise. The State Acts give the Commonwealth Board the authority to censor films made in Australia for commercial exhibition and advertising matter made in Australia.

The Censorship organization comprises a Censorship Board of seven persons and an Appeal Censor, the headquarters being in Sydney. Importers have a right of appeal to the Minister against decisions of the Board and the Appeal Censor.

(ii) (a) *Thirty-five mm. Films for Exhibition in Motion Picture Theatres.* In 1963, 1,238 films comprising approximately 5 million feet were censored. This represents approximately 885 hours screening time. Of these films, 405 originated in the United Kingdom, 370 in the United States of America and 463 in other countries. The principal suppliers among the last mentioned were: U.S.S.R., 94; Italy, 60; France and Greece, 56 each; Germany, 27; Poland, 17; and Japan, 15. Included in these figures were 475 full-length feature films which constituted the main theatrical attractions. This was an increase of 35 compared with the imports for 1962. Feature films came from: The United States of America, 143; the United Kingdom, 90; U.S.S.R., 66; Greece, 46; Italy, 41; France, 34; and Germany, 16. Twelve feature films were rejected and cuts were made from 128. There were seven appeals, five against rejection and two against cuts. Five were disallowed and two allowed. Feature films classified as suitable for general exhibition numbered 275, and 200 were not suitable for children. Of the latter, 34 carried the special condition that all advertising should indicate that they were suitable only for adults. These classifications are advisory only and are designed to enable picture-goers and particularly parents to obtain a general idea of the nature of any particular film. In addition to these imported films—134 35 mm. films of 120,714 feet produced in Australia were cleared. These were mainly newsreels and documentaries intended for commercial exhibition or export.

(b) *Sixteen mm. Films.* Excluding those imported for television use, 5,999 16mm. films of approximately 4 million feet were examined. There were no rejections. These were films commercially produced for screening in theatres used by business undertakings for advertising and instructional purposes and for screening in churches, schools and universities, and on home movies.

(c) *Eight mm. and 9.5mm. Films.* Approximately 32,000 feet of these small dimension type films were examined.

(d) *Television Films.* 8,240 films, predominantly 16mm., of approximately 11 million feet, for use on television, were censored. The number of films is not a true indication of volume because many of these were of short duration. In terms of screening time, the films censored for television amounted to approximately 5,000 hours. On a footage basis, the United States of America supplied approximately 80 per cent. of the total imports and the United Kingdom 19 per cent. Seventeen television films were rejected outright and an additional two were classified as unsuitable for televising. Eliminations were made from 1,103. There was one appeal against rejection which was disallowed.

(e) *Foreign Language Films.* Countries other than the United Kingdom and the United States of America supplied 463 of the 35mm. films imported for theatrical exhibition. Of these, 242 were feature films. Generally, the dialogue is in a foreign language with explanatory English captions. A few have an English commentary, and in some cases English "dubbed" dialogue. Of 5,999 16mm. commercial films censored, 1,210 originated from non-English-speaking countries. The chief supplying countries were: Germany, 342; France, 135; Japan, 116; Italy, 67; India, 57; U.S.S.R., 54; Sweden, 44; Switzerland, 40; Malaya, 39; Israel, 32; and China, 32.

(iii) *Export of Films.* The quantity of films exported for the year was approximately 2.5 million feet, consisting mainly of newsreels, advertising films and documentaries. This footage included in many cases several prints of the one film. It also included large quantities of exposed negatives sent overseas for processing.

### § 7. The Arts Council of Australia

Patterned on the Council for the Encouragement of Music and Arts which operated in the United Kingdom during the Second World War, an Australian organization was brought into being in 1943. In 1945, it became The Arts Council of Australia. Originating in New South Wales, Divisions are active now in the Australian Capital Territory, New South Wales, Queensland, South Australia and Tasmania. The centre of activity has been in New South Wales, which has a country branch network of over fifty centres. Rapid development in Queensland has resulted in the formation of over 24 branches in this State. A Federal Council will become effective in 1964.

The Arts Council receives State government grants through the Departments of Education in New South Wales and Queensland. In 1963, for the first time, a substantial contribution was received from a private organization. Some activities of the council are supported financially by non-metropolitan local government bodies and a grant has been offered by the Gulbenkian Foundation for 1964 to help in re-establishment of the Federal Council.

The New South Wales Division is a member of the Adult Education Advisory Board in that State, representing the "live art" section of adult education. The Tasmanian Division is represented on, and works closely with, the Adult Education Board of that State.

In 1950, the New South Wales Division arranged and presented the world première of the ballet *Corroboree* and in 1951, in connexion with the celebrations of the Commonwealth Jubilee, the Federal Council arranged a tour of all States of the ballet, performed by the Victorian National Theatre Ballet Company. Seasons of *Let's Make An Opera* followed later in 1951 at Sydney, Brisbane, and Canberra.

Activities of the Arts Council are directed towards decentralization of the arts for the benefit of country centres and metropolitan and country schools. It is greatly concerned with taking the arts to children as a basic cultural development. Tours of high standard companies in opera, ballet, drama, puppets, etc., are operating throughout the year.

The Young Elizabethan Players Company was formed jointly by the Arts Council and the Australian Elizabethan Theatre Trust in 1958 to take Shakespeare to schools in New South Wales and Queensland, and is still operating.

The Council handles a wide range of art exhibitions, both for city and country areas. Summer schools for drama, painting, pottery, music and other arts are an established annual feature of the work of the New South Wales and Queensland Divisions.

Yearly drama festivals are conducted for the Little Theatre movement. In 1963, the New South Wales Division sponsored the first arts festival for Sydney (North Side Arts Festival), with a wide range of cultural activities concentrated on the north side of Sydney Harbour. It is intended to make the festival a biennial event with the second festival being planned for August, 1965. Local government bodies in six municipalities in the festival area gave active support in the planning of the festival.

### § 8. The Australian Elizabethan Theatre Trust

Inaugurated in 1954 to commemorate the first visit to the Commonwealth of Her Majesty The Queen, the Australian Elizabethan Theatre Trust has since presented drama, opera and ballet throughout the entire Commonwealth. The Trust receives annual grants from the Federal Government, the State Governments and city councils. Its income also includes subscriptions from members and donations from business houses.

In the field of drama it has presented, *inter alia*, the works of Australian playwrights, including plays which were subsequently presented overseas.

The Elizabethan Trust Opera Company has given seasons of opera and has presented overseas guest artists, conductors and producers. The Australian Ballet, which commenced its inaugural season in November, 1962, visited all mainland capitals and New Zealand during 1963 and will present world premiere productions of three commissioned ballets during 1964. This company also features guest appearances by renowned overseas performers. The activities of the Trust in opera and ballet are providing employment for Australian singers, dancers, musicians, designers, choreographers and composers. The Trust has also been associated with commercial managements in the presentation of overseas attractions and large-scale musicals.

Country areas have been visited by Trust companies presenting opera, drama and puppets in association with the Council of Adult Education in Victoria and The Arts Council of Australia in New South Wales. During 1964, three companies of Young Elizabethan Players will again present Shakespeare for schools in five States. To date, almost one million children have attended a performance by these players which for many of them represents their introduction to "live" theatre.

In Victoria, the Trust is associated with the University of Melbourne in the Union Theatre Repertory Company. It is also associated with the University of New South Wales in the Old Tote Theatre Company which had its inaugural season during 1963. During 1963, a season of lunch-hour short plays with a low admission price were begun experimentally in Sydney. Assistance is given to the Perth Playhouse, the Festival of Perth, the National Theatre and Fine Arts Society of Tasmania and other companies. The Trust contributes productions to the biennial Adelaide Festival of Arts.

One of the most important activities undertaken by the Trust is its association with the University of New South Wales and the Australian Broadcasting Commission in the establishment and maintenance of the National Institute of Dramatic Art. This provides a training ground for young Australian actors, producers and technicians.

### SCIENTIFIC RESEARCH

NOTE.—This section outlines first the role and organization of scientific and technological research in Australia and then refers specifically to various organizations, etc., associated with scientific research. Particulars regarding Commonwealth medical research organizations are given in Chapter XVIII. Public Health.

A special article on Science and Technology in Australia, prepared by the Commonwealth Scientific and Industrial Research Organization of Australia, was included in Year Book No. 49 (*see p. 781*).

## § 1. Commonwealth Scientific and Industrial Research Organization

1. General.—By the *Science and Industry Research Act 1949*, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (*See No. 14, p. 1061 and No. 37, p. 1183.*)

2. *Science and Industry Research Act 1949-1959*.—This Act provides for an Executive of the Organization consisting of nine members, to be appointed by the Governor-General, at least five of whom shall be persons possessing scientific qualifications; and an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) to initiate and carry out scientific research in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance to persons engaged in scientific research and in the training of students in scientific research. Provision is made for gifts or bequests to the fund, which is controlled by a trust consisting of the Executive of the Organization.

4. **Work of the Organization.**—(i) *General.* The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Centralization has been avoided, in the first place by establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found, and secondly by the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. In 1937, however, the Commonwealth Government decided to extend the activities of the C.S.I.R.O. so as to provide assistance to secondary industries and several laboratories were established for work in that field; it was thus able to render to these industries assistance almost immediately after the outbreak of war.

C.S.I.R.O. has devoted part of its effort to basic research, and has achieved world leadership in certain fields. In applied research, some notable successes have been achieved. Particular attention has been directed to the potentialities of Australian raw materials, and to the improvement of the industrial processes concerned with processing these resources into finished products.

The basis has been provided for the establishment of a flourishing pulp and paper industry based upon indigenous hardwoods as raw material. Wool research, supported by a statutory contribution by the industry, has been able to show the way to notable advances in manufacturing techniques, and, in particular, new moth-proofing and shrink-proofing processes have been developed. Recent outstanding successes include processes for permanently pleating woollen fabrics and for endowing woollen fabrics with "wash-and-wear" properties.

The C.S.I.R.O. Division of Chemical Physics has pioneered the development of methods of chemical analysis based on atomic absorption spectroscopy. The method and apparatus have been patented, and licences to manufacture granted to firms in the U.K., U.S.A., Italy, France and Australia. The atomic absorption method of chemical analysis is now used in more than 70 Australian laboratories engaged in mining, metallurgy, agriculture, medical research, electro-plating, brewing, wine making and oil analysis.

(ii) *Establishments.* For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now thirty-one, comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations extend over the whole Commonwealth, and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

#### *Divisions.*

- Plant Industry, with main laboratories at Canberra and field stations.
- Entomology, with main laboratories at Canberra and field stations.
- Animal Health (laboratories in Melbourne, Sydney and Brisbane), Animal Genetics (main laboratory in Sydney) and Animal Physiology (main laboratory in Sydney), which together comprise the Animal Research Laboratories.
- Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- Soils, with main laboratories at Adelaide and extensive operations in the field.
- Forest Products, with main laboratories in Melbourne and field experiments.

Food Preservation, with main laboratories at North Ryde (New South Wales), and a subsidiary laboratory in Brisbane.

Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), and experimental work in coastal waters of Australia.

Mechanical Engineering, with laboratories in Melbourne.

Physics and Applied Physics, comprising the National Standards Laboratory at Sydney.

Radiophysics, with main laboratory at Sydney and Observatory at Parkes, New South Wales.

Physical Chemistry, Chemical Physics, Mineral Chemistry, Applied Mineralogy, Chemical Engineering, and Organic Chemistry, comprising the Chemical Research Laboratories in Melbourne.

Tribophysics, with laboratories in Melbourne.

Building Research, with laboratories in Melbourne.

Mathematical Statistics, with main laboratory in Adelaide.

Meteorological Physics, with main laboratory and field station in Melbourne.

Land Research and Regional Survey, with headquarters in Canberra, and field stations in the Northern Territory and Western Australia.

Protein Chemistry (Melbourne), Textile Industry (Geelong, Victoria) and Textile Physics (Sydney), which together comprise the Wool Research Laboratories.

Coal Research, Sydney.

Tropical Pastures, with main laboratories in Brisbane and field stations.

Dairy Research, Melbourne.

Wildlife Research, with main laboratories at Canberra.

#### *Sections.*

Horticultural Research Sections, Adelaide (South Australia) and Merbein (Victoria).

Irrigation Research Laboratory, Griffith (New South Wales).

Upper Atmosphere, with laboratory at Camden (New South Wales).

Mineragraphic Investigations, Melbourne.

Ore-dressing Investigations, Melbourne and Kalgoorlie.

Fodder Conservation, Melbourne.

Physical Metallurgy, Melbourne.

Soil Mechanics, Melbourne.

Industrial Research Liaison, Melbourne.

Editorial and Publications, Melbourne.

Wheat Research Unit, Sydney.

Sugar Research Unit, Melbourne.

Computing Research Section, Canberra.

An Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section, Industrial Research Liaison Section and Editorial and Publications Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. It has more than 1,600 professional officers in its total staff of 5,400, and has an annual budget of £16 million.

The C.S.I.R.O. maintains liaison offices in London and Washington, in each case as part of the British Commonwealth Scientific Office. These offices keep in close touch with developments throughout Europe and North America, and through them Australia receives advice of significant advances. These offices also play an important role in assisting scientists who are studying in the regions concerned. Numerous overseas studentships are maintained by the C.S.I.R.O. as a means of raising the standard of training among its professional staff.

## § 2. Mount Stromlo Observatory

Mount Stromlo Observatory—since 1957 incorporated into the Australian National University—is the largest observatory in the southern hemisphere. It is in effect the Department of Astronomy of the Australian National University, and its staff members assist in the training of the future astronomers of Australia. In its instrumental resources, it is second only to some of the great observatories of America. Since it is located south of the Equator, it is placed especially advantageously for the conduct of research into

the structure of the Milky Way System and of the Star Clouds of Magellan. The telescopes and auxiliary equipment at the Observatory provide access to parts of the sky that are forever hidden from the view of northern hemisphere astronomers. Mount Stromlo astronomers have therefore a special responsibility to do research on stars and other celestial objects at far southern declinations.

Mount Stromlo itself is a ridge of hills, approximately one mile long, situated at 35° 19' 16" South Latitude and 149° 0' 20" East Longitude, seven miles west of the city of Canberra. Its highest point is about 2,560 feet above sea level, and telescopes can be situated so as to be well screened from the lights of the city.

The first permanent installation on the site was established in 1911, but, because of the war and other circumstances, the development of the Observatory was delayed. It was not until 1925 that regular astronomical work could be undertaken. Since then, the Observatory has developed steadily, and under its third Director, the scientific staff now consists of fifteen astronomers. This does not include twelve scholars and a number of oversea astronomers visiting Mount Stromlo for periods of a year or so. With technical, clerical and maintenance personnel, the total staff amounts to about 65 persons.

Mount Stromlo Observatory possesses eight mounted telescopes with apertures ranging from five inches to 74 inches. The 74-inch reflector is of the largest size of telescope in the southern hemisphere. There are also special telescopes for the Time Service, and the University of Uppsala, Sweden, has a 26-inch Schmidt telescope on Mount Stromlo.

The principal fields of research at Mount Stromlo are as follows.

Studies of the structure and dynamics of the Milky Way system.

Investigation of the Large and Small Magellanic Clouds.

Studies of the physical properties of the interstellar medium of gas and dust, and its relation to the spiral structure of our galaxy.

Studies of the physics of the stars of the southern hemisphere by spectrographic means and by photoelectric techniques.

Maintenance of the National Time Service leading to studies of the variable rotation of the earth and polar motion.

Published accounts of the researches have a world-wide distribution.

The Observatory is at present engaged in a major expansion of equipment and staff. A permanent Field Station is nearing completion on Siding Spring Mountain (Latitude 31° 16' South; Longitude 148° 41' East; altitude, 3,820 feet) near Coonabarabran, New South Wales. This is an area having less cloud than Mount Stromlo. The principal instrument is a modern 40-inch reflector, alongside of which is a 16-inch telescope. Both telescopes were built in the United States and are now in operation. Other sites are being examined for the future development of astronomy in Australia.

At certain times, Mount Stromlo is open for inspection by members of the public when arrangements can be made so that the scientific work of the Observatory is not interrupted. A more detailed description of the Observatory's work is given in Official Year Book No. 46, pages 1142-4.

### § 3. Australian Atomic Energy Commission

1. **Establishment and Functions of the Commission.**—In November, 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the *Atomic Energy Act 1953*, the Commission was established as a statutory authority, with powers and functions as defined in the Act. Under amending legislation, the number of Commissioners was increased to five in April, 1958. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology.

2. **Uranium Prospecting and Mining.**—Uranium prospecting and mining in the Territories of the Commonwealth are freely open to private enterprise, subject to the *Atomic Energy Act 1953* and the Ordinances of the Territories. In the past, the Bureau of Mineral Resources, Geology and Geophysics, of the Department of National Development has carried out, on behalf of the Commission, widespread aerial and ground surveys aimed at ascertaining the uranium resources of the Territories and delineating areas in which further search for uranium by private prospectors was considered worthwhile. Although rewards are no longer paid for discoveries of uranium, tax concessions are still allowed in respect of income earned from uranium mining. The Bureau of Mineral Resources provides prospectors and mining companies in the Territories with a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth assistance, in the form of aerial, geological and geophysical services, is available to the States, and State Mines Departments inspect uranium prospects and test samples submitted by prospectors.

Interest in the search for deposits of uranium has, however, declined in recent years because of world-wide over-supply.

Uranium oxide was produced in Australia from ore deposits at Rum Jungle and South Alligator River, in the Northern Territory, and Mary Kathleen in Queensland. The Rum Jungle deposits were originally worked under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. Since 1953, mining and treatment operations have been conducted for the Commonwealth by a mining company. The treatment plant was commissioned in September, 1954, and the total production from that date to the 6th January, 1963, was sold to the Agency for defence purposes. As a result of sustained exploration in the area, a major new ore body—Rum Jungle Creek South—was discovered. This ore body was mined during the period April, 1961, to January, 1963. The Commonwealth Government has decided that treatment operations will continue at Rum Jungle, using ore stockpiled from the Rum Jungle Creek South mine. Apart from being successful financially, operations at Rum Jungle have made a significant contribution to the development of the Northern Territory. The Government decided therefore that the profits would be re-invested in the Northern Territory. The oxide produced will be available for sale at competitive prices. Exploration is continuing to determine whether or not further ore bodies exist in the area. A recently discovered copper deposit is now under investigation for mining and treatment at Rum Jungle.

Uranium deposits at Radium Hill in South Australia were worked by the State Government, which built an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. Production of uranium oxide began in 1955, the output being sold to the Combined Development Agency. Operations ceased at the end of 1961, when the contract expired.

The Mary Kathleen ore body in the Mount Isa-Cloncurry district in Queensland has proved to contain Australia's largest reserve of uranium ore. A mine and treatment plant which cost over £10 million were established in the area by a large mining company. Production from the plant was sold to the United Kingdom Atomic Energy Authority for the British nuclear power programme under arrangements approved by the Commonwealth Government. Operations ceased late in 1963 on completion of the operating company's sales contract. The mine, treatment plant, and township have been placed on a care and maintenance basis. Two other companies in the South Alligator region in the Northern Territory also had contracts with the Authority for the British nuclear power programme. These contracts were for relatively small tonnage and one has now been completed. Both companies began production in 1959.

3. **Research.**—The Commission's Lucas Heights Establishment is the major Australian centre for atomic energy research and information. It has a programme of research in the development of nuclear power, the utilization of radio-isotopes, and in other associated fields, directed towards the long-term development of the resources of the country.

The major research effort of the Lucas Heights establishment is the evaluation of a high-temperature gas-cooled reactor system in which the fuel is dispersed in the moderator. This is an advanced reactor concept which is considered to have considerable promise in the long term in relation to the present generation of power reactors now operating or under development overseas.

For various reasons, including the avoidance of duplication of effort, the Commission decided to investigate the feasibility of using beryllium metal or beryllium oxide as the moderator, and carbon dioxide as the coolant. Much work has been done on the metal system but effort is now being concentrated on the oxide or ceramic system, as applied to a specific reactor concept, namely a pebble-bed core cooled with carbon dioxide.

With all-ceramic fuel, higher operating temperatures can be achieved. This permits a reduction in the size and cost of heat exchangers and associated civil works and an improvement in steam conditions and overall efficiency.

The development of a new power reactor concept to a commercially economic stage generally takes 15 to 20 years and involves considerable expense. Since a number of different types of reactors have already been developed to a commercial stage, a new concept faces strong competition, and its development can in general be justified only if it offers promise of some long-term advantages. The beryllium oxide moderated all-ceramic fuel reactor holds such promise.

Provided certain design problems can be satisfactorily solved, a dispersed fuel beryllium oxide based high-temperature gas-cooled reactor should yield lower plant and equipment costs than most other gas-cooled systems. The use of a diffusion fuel capable of a high burnup gives promise of low fuel cycle costs.

The maximum gas temperature will be limited by the ability of materials used in parts of the heat exchangers and for duct work to withstand it. Nevertheless it should be possible to achieve steam conditions equal to those likely to be used in any future conventional plants. At present, using available steels which are economically practicable, the maximum temperature of the carbon dioxide coolant would appear to be 750° C., a considerable advance on British gas-cooled stations of current design. There is no obvious reason why this temperature should not be raised as better structural materials are developed. Then gas-turbines or other plant could be used as topping sets, as has been proposed for future development in the conventional power field.

Thus there is plenty of scope for development, and the general concept is unlikely to become prematurely obsolete.

The Commission is also seeking to extend the use of radioisotopes in Australia in scientific research and development, in the treatment of disease, in raising production and lowering costs in agriculture and in manufacturing industry. New applications are being continually devised. In Australia, these new processes are being used only in a small fraction of the possible fields. The use of isotopes is fostered by providing an advisory service which is a ready source of information on established uses, and by investigation of other projected applications. Radioisotopes, including short-lived isotopes which cannot be economically imported, are being produced in the high flux research reactor HIFAR, and some are being exported.

Research and development work on technical and scientific applications of radiation is also being carried out. The possibilities of radiation for such purposes as industrial sterilization, food preservation, and the control of insect pests are being investigated. Scientists at Lucas Heights are also studying the biological effects and questions of health and safety involved in the use of radioactive materials.

Lucas Heights is a centre of specialized equipment and information. In addition to the research reactor HIFAR, used for testing materials and producing radioisotopes, there is much other equipment unique in Australia. All these facilities are available to universities and other institutions under suitable conditions. In these endeavours, the Atomic Energy Commission is working in close co-operation with the British Atomic Energy Authority, under arrangements which give Australia access to results of British research on peaceful atomic energy uses. Results of research in Australia are in like manner available to Britain. Work in Australia, though constituting a self-contained programme, is co-ordinated with the British programme to avoid overlapping of research objectives and duplication of investigations. Australia also has bilateral arrangements with the United States and Canada, and is taking part in the promotion of the peaceful uses of atomic energy through the International Atomic Energy Agency. For the year 1962-63 the Commission placed £50,000 worth of research contracts within Australian universities on matters related to the research programme at Lucas Heights.

The Australian Institute of Nuclear Science and Engineering comprises the Australian Atomic Energy Commission and all Australian universities. One important field of atomic energy research in Australian universities to which the Institute makes substantial contributions is in the field of thermonuclear reactions.

#### § 4. The Standards Association of Australia

The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice. Its functions are linked with those of the National Association of Testing Authorities, in that whereas the Standards Association establishes and publishes standards, the Association of Testing Authorities works to ensure that the certified testing laboratories maintain their level of competence.

The Standards Association was established in July, 1929, by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemicals, timber, transportation, aircraft materials, ferrous and non-ferrous metallurgy, plastics, textiles, mining, ceramics, medical and dental materials, domestic economy, agriculture and dairying, safety, packaging, and water supply and sewerage.

These committees are composed of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality, and dimension, and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications. The Association publishes standards of many kinds for the benefit of industry and commerce. It creates its own standards and endorses also certain British standards for Australian use with or without modification. So far it has issued about 1,000 standard specifications. It has nearly 500 more projects in hand.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations, and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committee of the International Electrotechnical Commission.

The Association is also the Australian agent of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

### § 5. The National Association of Testing Authorities

The National Association of Testing Authorities organizes testing facilities throughout Australia to serve private and governmental needs. Laboratories may register voluntarily in respect of tests within their competence, and the Association ensures the maintenance of their standards of testing. Certificates of tests issued in the name of the Association by the registered laboratories are generally accepted by governmental, industrial and commercial interests.

The National Association of Testing Authorities is the recognized organization for the co-ordination of testing facilities. It is an independent body whose objective is the organization of a comprehensive testing service to meet the needs of government, industry and commerce by registration, on a voluntary basis, of testing laboratories throughout Australia. The technical work of the Association is performed by Registration Advisory Committees, each composed of experts in the field of testing entrusted to it. Members of the committees are appointed solely on the basis of specialist qualification and experience.

Laboratories may be registered for the performance of specified tests within such fields as metrology, mechanical testing, electrical testing, heat and temperature measurement, chemical testing, biological testing, industrial radiography and crack detection, photometry, and acoustic and vibration measurement.

In 1963, there were 405 laboratories registered with the Association, which had a further 105 applications for registration before it. Membership of the Association is open to all laboratories which conform to the standards of staff and laboratory practice required by the Association.

Laboratories registered by the Association are entitled to endorse test documents in the name of the Association. The Association reassesses its registered laboratories from time to time, and investigates discrepancies in results between the different laboratories.

### § 6. Scientific Societies

1. *Royal Societies.*—The following table contains the latest available statistical information regarding the Royal Society in each State, the headquarters of which are in the capital cities.

ROYAL SOCIETIES, DECEMBER, 1963

Particulars	Sydney	Mel- bourne	Bris- bane	Ade- laide	Perth	Hobart	Can- berra
Year of charter . . . . .	1866	1859	1884	1880	1913	1844	1930
Number of members . . . . .	370	415	287	210	220	616	192
Volumes of transactions issued . . . . .	97	(a) 950	73	86	49	97	..
Number of books in library . . . . .	35,000	25,000	62,840	22,000	6,000	34,300	..
Societies on exchange list . . . . .	390	335	290	307	225	316	..

(a) Volumes of proceedings.

2. *Australian Academy of Science.*—The Australian Academy of Science is the national institution representing science in Australia. Constituted by Royal Charter presented personally by Her Majesty, Queen Elizabeth II, in Canberra on 16th February, 1954, the Academy promotes scientific knowledge and research, maintains standards of scientific endeavour and achievement in the natural sciences in Australia, and recognizes outstanding contributions to the advancement of science.

The Academy represents Australian science and scientists at the national and international level, organizes meetings of scientists, holds symposia, and arranges for visits of scientists from other countries to Australia.

In its functions, the Australian Academy is comparable with the Royal Society of London and national academies of science of many other countries. Its 106 Fellows (designated F.A.A.) are eminent in some branch of the physical or biological sciences in Australia, occupying professional positions in universities, the Commonwealth Scientific and Industrial Research Organization, other research organizations, and industry. A very few places are reserved for Fellows who have rendered conspicuous service in the cause of science.

No more than six new Fellows are elected in any one year. His Royal Highness, Prince Philip, Duke of Edinburgh, was admitted as a Royal Fellow during his visit to Canberra on 20th November, 1962.

The Australian Academy contributed substantially to the work of the International Geophysical Year and has developed plans for Australian participation in the International Year of the Quiet Sun, from April, 1964, to December, 1965, and the International Biological Programme.

Representation is provided at the General Assemblies of the International Scientific Unions and similar bodies relating to astronomy, geophysics, geology, physics, crystallography, mathematics, biochemistry, physiology, geography, biological sciences, chemistry, Antarctic research, space research and oceanic research.

On certain national scientific projects and matters with scientific implications, the Commonwealth Government has sought the Academy's advice.

As the Australian Academy of Science is too young a body to be financially self-sufficient, the Commonwealth Government makes annual grants of general purpose funds without affecting the autonomy of the Academy. These grants, together with substantial private benefactions, enable the Academy to continue its work. Research fellowships provided by industry are administered.

The Academy's £250,000 copper-domed circular conference centre was opened in 1959. It was paid for by donations from companies and individuals.

The Academy is managed by an elected council comprising a President, Treasurer, two secretaries, and eight ordinary members who are drawn equally from the physical sciences and biological sciences. Chief administrative officer is the Executive Secretary, who is not a Fellow.

3. **The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months in the various States and in the Dominion of New Zealand. The latest congress was held in Canberra in January, 1964; and the 38th Congress is to be held in Hobart in August, 1965.

4. **Other Scientific Societies.**—The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney, who are members of the Society and resident in New South Wales, research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship was awarded for 1964. The library has some 19,000 volumes. Eighty-eight volumes of proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1963 was 279.

The British Astronomical Society has a branch in Sydney, and in each of the States there is a branch of the Australian Medical Association.

There are over 200 other learned societies devoted to the study of particular sciences. Some of these, including the Royal Australian Chemical Institute and the Institute of Engineers, Australia, are qualifying bodies, admission to which is by qualification only. Others, such as the Institute of Food Technologists, are open to any interested person. Some societies, such as the Australian Biochemical Society, have annual symposia of a very high standard. A great many of these bodies publish appropriate journals.

## STATE GOVERNMENT EXPENDITURE ON EDUCATION, ETC.

*Estimates of the expenditure by each State Government on education and related items are shown in the following tables.*

(i) *Expenditure from Revenue and Special Funds.* Details shown below relate to net expenditure from Consolidated Revenue and the following special funds: Opera House Account, Maintenance and Repairs to Schools and Police Buildings Account and the Joint Coal Board Welfare Fund (New South Wales); Forestry Fund (Victoria); and Lotteries Commission Fund (Western Australia). Details exclude expenditure from the Commonwealth university grants, and expenditure on debt charges, payroll tax and superannuation

payments. The cost of medical and dental inspection of school children is also excluded, as this service is considered to be more appropriately classified under public health. For these reasons, the figures do not represent total current government expenditure on education in each State. Furthermore, because of differences in organization and accounting methods, the information shown is not on exactly the same basis for all States, and consequently comparisons of State expenditures are approximate only.

**STATE NET EXPENDITURE ON EDUCATION, ETC. (a) FROM REVENUE AND SPECIAL FUNDS**

(£'000)

Year	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
1957-58 ..	40,022	28,640	12,094	9,156	8,819	4,276	103,007
1958-59 ..	44,624	31,256	13,624	10,812	9,217	4,636	114,169
1959-60 ..	50,286	35,429	14,789	12,363	10,019	5,300	128,186
1960-61 ..	58,135	40,193	16,947	14,127	11,378	5,756	146,536
1961-62 ..	62,987	44,632	18,008	16,267	12,508	6,361	160,763

(a) Includes expenditure on administration, transport of school children, teacher training, primary, secondary, technical, agricultural and university education; and expenditure on libraries, museums, etc.

(ii) *State Loan Fund Expenditure on Educational Buildings.* Details in the following table show gross Loan Fund expenditure in each State on educational buildings.

**STATE GROSS LOAN FUND EXPENDITURE ON EDUCATIONAL BUILDINGS**

(£'000)

Year	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
1957-58 ..	9,234	7,858	2,068	2,662	1,656	1,247	24,725
1958-59 ..	11,620	9,039	3,021	3,489	1,782	2,000	30,951
1959-60 ..	15,194	11,305	3,400	3,997	2,111	1,775	37,782
1960-61 ..	15,749	12,750	3,539	4,836	2,734	2,009	41,617
1961-62 ..	16,178	14,160	3,417	5,944	2,907	1,885	44,491

## CHAPTER XX

### LOCAL GOVERNMENT

**NOTE.**—This chapter includes, in addition to information on the operation of local government authorities, information on the operation of certain semi-governmental authorities. The latter information is not comprehensive for this type of authority, and is included partly because of the association of the functions performed with those of local government authorities, and partly for convenience in preparation. Particulars of the activities of other semi-governmental authorities, e.g. transport, electricity and gas, and banking undertakings, for which only some financial statistics are given in this chapter, are included in the chapters relevant to those subjects.

#### § 1. Introduction

**1. Local Government Authorities.**—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the construction and maintenance of roads, streets and bridges, water, sewerage and drainage systems, and health and sanitary services, the supervision of building, and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas, and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 899, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, towns and shires; and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g. the county councils. Within shires, there are also some municipal units known as urban areas. Apart from the more thinly populated parts of New South Wales and South Australia, and the Commonwealth Territories (except for the City of Darwin), practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

**2. Semi-governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g. roads and bridges, water and sewerage, electricity and irrigation, harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, harbours, and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a government department whose duties relate to the construction, reconstruction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Owing to difficulty in obtaining complete particulars of receipts and expenditure of the various local governing bodies in respect of roads under their control, the details of receipts and expenditure given in § 4 are those of central governments only, relating either to the supervisory board or commission in the State or to direct activities of a department. However, estimates of the aggregate net expenditure of all public authorities concerned with roads and bridges in Australia are given in paragraph 10 of that section. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special boards, while in Adelaide and Perth these services are under the direct supervision of government departments. In most of the other cities and towns, the municipal councils or, in some cases, water trusts, are the controlling bodies, which either construct the works out of their own resources or take them over after they have been constructed by the government.

5. **Harbours.**—The majority of the harbours in Australia are managed by boards, the members of which are either elected by persons interested, or appointed by the government. In some instances, however, they are directly controlled by the government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by boards. These boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the government. Occasionally, volunteer or country fire brigades are represented.

## § 2. Local Government Authorities

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which include important towns). At the end of 1962, the area incorporated was 272,000 square miles, or nearly nine-tenths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g. electricity, water, sewerage. At 31st December, 1962, there were 57 county councils, including the Sydney County Council.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (41,600 acres) in Westernport Bay, Lady Julia Percy Island (652 acres) off Port Fairy, Bass Strait Islands (966 acres), part of Gippsland Lakes (81,920 acres), and Tower Hill (1,460 acres) adjacent to the Borough of Koroit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the *Local Authorities Act 1902* and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—Local government is established throughout the State, the divisions being cities, towns and shires.

6. Tasmania.—The whole State is divided into municipal districts, Hobart and Launceston being incorporated as cities under separate Acts.

7. Area, Population, Dwellings and Value of Ratable Property.—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown for the year 1961-62 in the following table. The valuations relate to ratable property only and exclude government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1961 Census, and are compiled from information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include vacant dwellings available for sale and renting, "week-end" and holiday dwellings, and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

LOCAL GOVERNMENT AUTHORITIES: AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1961-62

(a) Particulars of dwellings as at Census 30th June, 1961. (b) Year ended 31st December, 1961.  
(c) Year ended 30th September, 1962. (d) Excludes Yallourn Works Area under the jurisdiction of the State Electricity Commission. (e) Year ended 30th June, 1962. (f) Includes City of Redcliffe and that part of Pine Rivers Shire within the Metropolitan Area of Brisbane but outside the Brisbane City Area.

8. *Finances.*—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the year 1961-62 except for New South Wales, where they relate to the year 1961. For further detail on local government finances, see *State, Territories and Local Government Authorities Finance and Government Securities*, Bulletin No. 1, 1961-62 and 1962-63, issued by this Bureau.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1961-62 in the following tables, the proceeds from loans and expenditure thereof have been excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

### § 3. Local Government and Semi-Governmental Authorities' Debt

1. **General.**—Statistics of local government and semi-governmental debt for 1957-58 to 1961-62 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services.

*New South Wales.* Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

*Victoria.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

*Queensland.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Fire Brigades, University, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

*South Australia.* Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

*Western Australia.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Transport, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Housing, University of Western Australia, and Miscellaneous.

*Tasmania.* Harbours, Electricity Supply, Fire Brigades, Transport, Housing, and Water Supply.

A detailed list of the authorities included is shown in *State, Territories and Local Government Authorities Finance and Government Securities*, Bulletin No. 1, 1961-62 and 1962-63.

2. **Local Government and Semi-Governmental Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local government and semi-governmental authorities for the year 1961-62. For greater detail, see *State, Territories and Local Government Authorities Finance and Government Securities*.

Annual interest payable(a) ..	n.a.	36,326	5,577	7,914	3,396	5,251	n.a.

(a) Includes debt or interest payable in London and New York. Debt in London is payable in £ sterling which have been converted at the I.M.F. rate of £Stg.100 to £A.125; New York debt is payable in U.S. dollars which have been converted at the I.M.F. rate of \$2.24 to £A.1. (b) Included in debt figures above.

In the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered

which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised from the public to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts, and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1957-58 to 1961-62.

## § 4. Roads and Bridges

1. **Commonwealth Government Grants.**—The following table shows the allocation to the States under the several Commonwealth Aid Roads Acts for road construction, maintenance, repair and other works connected with transport for each of the years 1958–59 to 1962–63, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for the year 1958–59. After 1st July, 1959, when the *Commonwealth Aid Roads Act 1959* came into operation, the Commonwealth made separate provision for expenditure on strategic roads and the promotion of road safety practices. See also Chapter XXII. Public Finance, and Finance bulletins.

## ROAD CONSTRUCTION, MAINTENANCE, ETC.: GRANTS UNDER THE COMMONWEALTH AID ROADS ACTS

(£'000)

Year ended 30th June—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	C'wealth (a)	Total
1959 ..	9,930	6,543	6,890	4,056	6,967	1,813	1,000	37,199
1960 ..	12,172	8,660	8,021	4,922	7,964	2,184	..	43,923
1961 ..	12,870	9,184	8,428	5,128	8,090	2,300	..	46,000
1962 ..	13,811	10,080	9,093	5,752	8,764	2,500	..	50,000
1963 ..	14,940	10,877	9,796	6,200	9,487	2,700	..	54,000

(a) Prior to 1959–60, allocations under the *Commonwealth Aid Roads Act 1954–1956* for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practice.

2. **New South Wales.**—(i) *General.* A central road authority, known as the Main Roads Board, was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads of the State and to administer government subsidies for works on those roads. In 1932, the Main Roads administration was reorganized as a separate department under the control of a Commissioner. The activities of the Department of Main Roads include works on main, developmental and tourist roads throughout the State, all roads in the unincorporated portion of the Western Division, and certain associated works, principally bridges and vehicular ferries, constructed from government funds. The Department of Main Roads co-operates with the municipal and shire councils in the work of constructing and maintaining the main roads system.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration the representations made by the councils concerned, availability of funds for construction and maintenance purposes, and the value of the roads as connecting links between centres of population or business. The classes of main roads are (i) the State highways, which form the principal avenues of road communication throughout the State and connect with similar avenues in other States; (ii) trunk roads, which, with the State highways, form the framework of a general system of intercommunication throughout the State; (iii) ordinary main roads, which provide a network of roads connecting towns and important centres of population with the State highways and trunk roads and with each other. In addition to the main roads, there are also (i) secondary roads (in the County of Cumberland), which carry a substantial volume of through traffic and thereby relieve neighbouring main roads of traffic, (ii) developmental roads, which help to develop country districts, and (iii) tourist roads, which serve to make accessible areas or districts used by tourists.

In the County of Cumberland, which for the purposes of the Main Roads Act is deemed to include the City of Blue Mountains and small sections of other councils' areas on the boundary of the County of Cumberland, the full cost of road and bridge construction is paid from the funds of the Department of Main Roads. The Councils contribute towards the cost at the rate of ¼d. in the £ on the unimproved value of ratable property. The rate payable in respect of lands used principally for primary production is one-half the rate levied on other lands. In country districts, the Department meets the full cost of road and bridge works on State highways, the full cost of bridge works and three-quarters of the cost

of road works on trunk roads, and three-quarters of the cost of bridge works and two-thirds of the cost of road works on ordinary main roads. The cost of constructing developmental roads and works is borne in full by the Department of Main Roads, but local Councils are required to maintain them in a satisfactory condition. The Department of Main Roads meets half the cost of works on secondary roads and on tourist roads.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The total length of proclaimed roads in New South Wales at 30th June, 1963, was 25,523 miles classified as:—State highways, 6,532 miles; trunk roads, 4,116 miles; ordinary main roads, 11,633 miles; secondary roads, 115 miles; developmental roads, 3,057 miles; and tourist roads, 70 miles.

The length of main roads maintained by the Department of Main Roads at 30th June, 1963, was 5,586 miles (25 per cent.), while the length maintained by Councils was 16,695 miles (75 per cent.). These figures exclude secondary, developmental and tourist roads, and unclassified roads in the Western Division of the State. In the area outside the County of Cumberland (the metropolis and adjoining areas), the proportions of main roads maintained by the Department and Councils respectively were:—State highways, 68 per cent., 32 per cent.; and trunk and ordinary main roads, 5 per cent., 95 per cent. Unclassified roads in the Western Division of the State, totalling 1,030 miles, were maintained by the Department, while developmental roads, totalling 3,057 miles, were maintained by Councils. In the County of Cumberland, the proportions of main roads maintained by the Department and Councils respectively were:—State highways, 99 per cent., 1 per cent.; and ordinary main roads, 54 per cent., 46 per cent. Secondary roads totalling 115 miles were maintained by Councils. The 70 miles of tourist roads throughout the State were maintained by Councils.

(b) *Surface of Roads.* In 1963, the total length of all roads in New South Wales was estimated at 131,140 miles. The lengths of roads, according to their surface, were as follows:—bitumen or concrete, 23,468 miles; gravel or stone, 45,513 miles; formed only, 28,660 miles; cleared only, 33,499 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Department's plan for main roads development in the County of Cumberland. Most of the Department's proposals have been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the *Local Government (Amendment) Act 1951*.

The Department's proposals for the development of the main roads system in Newcastle and the surrounding districts have been largely incorporated in the Northumberland County District Planning Scheme, and some sections of the system have been constructed.

With some modifications, the Department's proposals for the planning of the main roads in the Wollongong-Port Kembla district have been incorporated in the planning scheme prepared by the Illawarra Planning Authority.

During 1962-63, 47 new bridges were constructed. In addition, 29 concrete box culverts each having a waterway width of 20 feet or more were completed. Major bridge works under construction included steel and/or concrete bridges over the Richmond River at Wardell on the Pacific Highway (length 736 feet); over the Richmond River at Ballina Street, Lismore, on the Bruxner Highway (length, 688 feet); over the Clyde River at Nelligen (length, 827 feet); over the Hunter River at Maitland (Belmore Bridge, length, 643 feet); over the Parramatta River at Gladesville (length, 1,900 feet); over the Lane Cove River connecting Hunter's Hill and Lane Cove (length, 749 feet); over the Darling River at Tilpa (length, 407 feet); over the George's River at Taren Point (length, 1,662 feet); over the south arm of the Hunter River at Tourle Street, Newcastle (length 978 feet); and over Salt Pan Creek connecting Peakhurst and Padstow (length 600 feet). Also under construction was an overpass (627 feet long) at Huntley's Point, Gladesville.

(b) *Revenue and Expenditure.* The funds of the Department of Main Roads are derived principally from motor vehicle taxation, charges on heavy commercial goods vehicles under the *Road Maintenance (Contribution) Act 1958*, grants under Commonwealth Aid Roads Acts (see para. 1, p. 791 and Chapter XXII. Public Finance), other grants from the State or Commonwealth Governments, and proceeds of a levy on municipal and shire councils in the County of Cumberland in accordance with the *Main Roads Act 1924-1960*. The State Government also makes repayable advances for Main Roads Department works.

Revenue and expenditure for the five years 1958-59 to 1962-63 are shown below.

(a) Excludes repayable advances by the State Government (£800,000 in 1959-60, £575,000 in 1960-61, £635,000 in 1961-62, and £890,000 in 1962-63), and transfers from Sydney Harbour Bridge Account for Expressway construction (£100,000 in 1958-59, £362,000 in 1959-60, £768,000 in 1960-61, £1,822,000 in 1961-62, and £2,081,000 in 1962-63). Expenditure from these amounts is fully reflected in Expenditure.

(b) Excludes debt redemption (£42,717 in 1958-59, £45,981 in 1959-60, £48,816 in 1960-61, £53,075 in 1961-62, and £57,088 in 1962-63) and repayment of government advances (£298,073 in 1958-59, £400,000 in 1960-61, and £60,000 in 1962-63).

(c) Mainly purchase of assets not subject to annual depreciation charge. The purchase of other assets is omitted here because the depreciation charge for them is reflected each year in "Roads and Bridges".

The figures shown above represent the aggregate revenue and expenditure of five funds—the County of Cumberland Main Roads General and Special Purposes Funds, the Country Main Roads General and Special Purposes Funds, and the Developmental Roads Fund.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway of eight traffic lanes and two railway tracks, and there is also a footway on each side. The capital cost of the bridge and associated roadways to 30th June, 1963, was £11,786,864, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £10,100,000, is repayable from toll income. Income for 1962-63 amounted to £1,933,000, including road tolls, £1,692,000, railway passenger tolls, £139,000, and omnibus passenger tolls, £15,000. Expenditure amounted to £1,085,000, including interest, exchange, floatation expenses, etc., £426,660, sinking fund, £140,330, maintenance, £278,528. The accumulated surpluses of the Bridge Account have been used to finance conversion of tram tracks to roadway and construction of city expressways. From 1958-59 to 1962-63 a total of £920,379 was expended on tram track conversion and £5,133,000 on city expressways. The account showed a deficiency of £852,917 at 30th June, 1963. During 1962-63, 33,153,166 road vehicles (excluding omnibuses and exempt vehicles), 25,136,000 rail travellers and 14,040,000 omnibus travellers crossed the bridge, contributing respectively 91 per cent., 8 per cent., and 1 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State, the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine which roads should be declared in the various classifications; to supervise the construction, reconstruction and maintenance of these roads; to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance; and to recommend deviations in existing roads or the construction of new roads in order to facilitate communications or to improve the conditions of traffic.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of roads in Victoria declared by the Country Roads Board at 30th June, 1963, was 14,525 miles, classified as follows:—State highways, 4,474 miles; main roads, 9,118 miles; by-pass roads, 28 miles; tourist roads, 444 miles; forest roads, 461 miles. The length of the surface sealed (bitumen or concrete) included in the foregoing mileage was 11,817 miles or 81 per cent. of the total.

(b) *Surface of Roads.* It is estimated that, in addition to the 14,525 miles of classified roads, there were approximately 87,000 miles of unclassified roads at 30th June, 1963. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1963) provides the following information:—bitumen or concrete, 23,721 miles; gravel or stone, 31,501 miles; formed only, 21,319 miles; cleared only, 23,540 miles; total, 100,081 miles.

(iii) *Country Roads Board.* (a) *General.* During 1962–63, 1,801 miles of declared roads under the Board's control were treated with bitumen. In addition, 845 miles of undeclared roads, for which the Board contributed funds, were similarly treated. The total length of bitumen treatment carried out in 1962–63 was 2,744 miles (including 98 miles for other authorities). Of the work on the roads under the Board's control in 1962–63, 651 miles related to State highways and by-pass roads.

During 1962–63, 197 bridge projects of an estimated total value of £2,126,000 were initiated. Of these, 128, estimated to cost £833,000, were under municipal supervision.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two-thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the Commonwealth Aid Roads Acts, road charges under the Commercial Goods Vehicles Act and repayments by municipalities. In addition, loans have been authorized from time to time under the Country Roads Acts for permanent works on main and developmental roads, State highways, tourists' roads and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1963, loan receipts and payments each amounted to £301,000. The total loan expenditure to 30th June, 1963, was £15,749,087. This figure does not include loan expenditure from the Developmental Roads Loan Account, a fund which was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

<b>Total .. .. .</b>	<b>17,746,472</b>	<b>20,948,755</b>	<b>22,579,541</b>	<b>24,040,847</b>	<b>23,689,118</b>

(a) After costs of collection. Since 1950, one half of the drivers' licence fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (b) Excludes portion of Commonwealth Aid Roads Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc.. (c) Includes £500,000 Special Grant from Commonwealth Government.

(iv) *Melbourne and Metropolitan Board of Works.* Since assuming responsibility for carrying-out planning scheme proposals relating to metropolitan highways and bridges, a tentative £20,000,000 construction programme of urgent highway works throughout the metropolitan area of Melbourne has been adopted and is being progressively implemented by the Board of Works. Expenditure on these projects up to 30th June, 1963, was £2,986,392.

(v) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the *Country Roads and Level Crossings Funds' Act 1954* to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings; (b) the provision of lights, signs, and lighting at, and the improvement of approaches to, level crossings; and (c) generally, the reduction of danger at level crossings. The Act provides for the payment into the Fund of one-third of all moneys received by way of additional motor registration fees (owner's certificates) and money provided under any other Act. The amount available for expenditure in 1962-63 was £353,763, consisting entirely of receipts from owners' certificates. Expenditure from the Fund amounted to £264,555, of which £231,336 was incurred by the Railways Department and £33,219 by the Country Roads Board, leaving a balance carried forward of £89,208.

4. Queensland.—(i) *General.* Under the *Main Roads Act 1920*, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads, and tourist tracks; and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads may be built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1963, was 24,120 miles; comprising State highways, 6,262 miles; main roads, 5,130 miles; developmental roads, 4,263 miles; and secondary roads, 8,465 miles. By the amendments to the Main Roads Acts published in the Government Gazette of 6th April, 1959, mining access, farmers' and tourists roads became secondary roads, and the provisions relating to the declaration of tourist tracks were repealed.

(b) *Surface of Roads.* The total length of roads and streets in Queensland at 30th June, 1963 was:—bitumen or concrete, 11,935 miles; gravel or stone, 19,232 miles; formed only, 40,498 miles; cleared only, 46,617 miles; total, 118,282 miles.

(iii) *Department of Main Roads.* (a) *General.* During 1961–62, the Department completed 1,108 miles of roads, including new construction and stage construction. Bridges of all types to a length of 5,783 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1962, to 222,585 feet. In addition, at 30th June, 1962, 6,952 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc. under the Transport Acts, contributions under the Commonwealth Aid Roads Acts, and loans, grants and advances from the State Government. The total receipts and payments during each of the years 1957–58 to 1961–62 are shown below.

DEPARTMENT OF MAIN ROADS, QUEENSLAND: RECEIPTS AND PAYMENTS

<b>Total . . . . .</b>	<b>13,349,505</b>	<b>14,157,485</b>	<b>17,373,734</b>	<b>16,625,057</b>	<b>19,777,236</b>

(a) Includes grants to local authorities for road purposes.

5. South Australia.—(i) *General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads, to undertake the construction, maintenance and protection of the principal roads of the State, allocate grants to councils for roadworks and supervise the expenditure of these grants, and assist Councils to purchase road-making plant and to defray the cost of roadworks. In addition, the Commissioner advises Councils on technical questions concerning the construction, maintenance or repair of roads.

(ii) *Source of Funds.* Funds of the Department are derived mainly from the Highways Fund, into which are paid the proceeds from motor vehicle registration and drivers' licences (less cost of collection), appropriations from loan funds, repayments of advances made to Councils and contributions by the Municipal Tramways Trust, and from contributions under the Commonwealth Aid Roads Acts.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are main roads proclaimed under the provisions of the Highways Act and all other roads, commonly designated district roads. At 30th June, 1963, there were 8,156 miles of proclaimed main roads and 79,160 miles of district roads, totalling 87,316 miles. Lengths of road classified by surface were as follows:—bitumen or concrete, 6,402 miles; gravel or stone, 12,457 miles; formed only, 10,380 miles; cleared only, 58,077 miles.

Decreases since last year in the lengths of proclaimed main roads and "formed only" roads have been caused by the reclassification of portions of these roads. The figure of 79,160 miles of district roads includes approximately 24,500 miles of tracks outside local government areas, including tracks on leasehold properties, not previously included in road mileage figures.

(iv) *State Highways and Local Government Department, Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1958-59 to 1962-63, of funds controlled by the Highways and local Government Department.

(a) Includes reimbursement works for Commonwealth Government. (b) Includes administration expenses. (c) Represents gross repayments less recoveries by charges to works on account of depreciation and materials used.

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1958-59 to 1961-62 was, respectively, £10,556,000, £12,277,000, £13,517,646, and £14,370,714.

6. Western Australia.—(i) *General.* Work connected with road construction and maintenance and associated projects in Western Australia is undertaken by the State Government, through the Main Roads Department, and by local government authorities throughout the State.

Under the provisions of the Main Roads Act, the Main Roads Department was established in 1930 to replace the Main Roads Board originally constituted as a central road authority in 1926. The Department operates under the *Main Roads Act, 1930–1961*, and is administered by a Commissioner of Main Roads responsible to the Minister for Works. The Act makes provision for public roads in the categories of main roads, controlled-access roads and developmental roads. An additional category, that of important secondary roads, is used by the Department in determining its works programme.

Main roads are those which provide communication between a large producing area, either actual or potential, and its market or nearest port or railway station, between two or more such areas, between large centres of population, or between the capital city and a large producing area or a large centre of population. Controlled-access roads do not permit direct access from abutting property and may be entered and departed from only at certain selected road connexions located at points which are considered to serve best the traffic for which the controlled-access roads were designed. Developmental roads are those which serve to initiate or increase the development of an area. Important secondary roads are those which, though originally classified as developmental, have come to be used consistently by through traffic and therefore warrant a special allocation of funds by the Main Roads Department. The Act provides that, on the recommendation of the Commissioner, any road may be proclaimed a main road and any main road may cease to be a main road.

The construction and maintenance of main roads and controlled-access roads are the responsibility of the Main Roads Department. The Department also makes substantial financial provision for the construction and maintenance of important secondary roads and for the construction of developmental roads.

Within its own district, each local government authority is responsible for the provision and upkeep of roads other than those provided by the Main Roads Department. In addition, the local authority is required by the Main Roads Act to maintain any developmental road situated in its district.

(ii) *Length and Surface of Roads.* (a) *General.* The total length of roads and streets in Western Australia at 30th June, 1963, was made up as follows:—bitumen or concrete, 10,582 miles; gravel or stone, 21,137 miles; formed only, 43,112 miles; natural state (cleared only), 28,586 miles; total, 103,417 miles.

(b) *Roads under Main Roads Act.* The total length of constructed roads for which financial provision was made by the Main Roads Department, at 30th June, 1963, was:—main roads, 3,471 miles, including 5 miles of controlled-access roads; important secondary roads, 7,647 miles; and developmental roads, 24,412 miles. In addition, there were 71 miles gazetted as controlled-access roadway as yet not constructed.

(iii) *Main Roads Department.* (a) *General.* During the year 1962–63 the activities of the Department included clearing, 2,219 miles; forming, 3,174 miles; gravelling, 1,896 miles; reconditioning, 6,092 miles; and stabilizing, 247 miles. In addition, 1,667 miles were primed and sealed (including widening) and 24 bridges constructed.

(b) *Receipts and Payments.* The funds of the Main Roads Department are derived principally from allocations made under the *Commonwealth Aid Roads Act 1959*. In addition, financial assistance was given by the Commonwealth Government to the extent of £500,000 in 1961–62 and £700,000 in 1962–63 for the improvement of roads used for the transport of beef cattle in the Kimberley District. Legislation during 1962 provided for an extension of this special assistance for a total of five years, involving in all £3,450,000, subject to the expenditure by the State of the same amount on such projects during this period. Other sources of income include one-half of the net amount of traffic fees collected in the Metropolitan Traffic Area and an allocation of Department of Transport funds. (Outside the Metropolitan Traffic Area, motor vehicle licence fees are collected and retained by the local authorities.) Receipts and payments for the years 1958–59 to 1962–63 are shown in the following table.

(a) Includes amounts to be distributed to metropolitan and country local authorities early in the following year. (b) Excludes £700,000 advance from State Treasury. (c) Includes administration and expenditure on hire and maintenance of road construction plant, etc., and on purchase of materials.

7. Tasmania.—(i) *General.* Under the *Road Construction (Transfer of Functions) Act 1951*, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands and Works. Works authorized by the Minister in respect of roads classified as State highways, tourist, and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund, into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licence fees for drivers and public transport, and other moneys made available by Parliament. In addition, provision was made under the *Road Construction (Transfer of Functions) Act* for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1962-63 on the construction and maintenance of roads, tracks and bridges amounted to £6,199,000, of which £3,933,000 was charged to road funds, £30,000 to revenue, £1,937,000 to loan and £299,000 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1963, were as follows:—State highways, 1,171 miles; main roads, 662 miles; secondary roads, 196 miles; tourist roads, 46 miles; and other roads, 138 miles. The total length of State roads in Tasmania was 2,213 miles and the length of all other roads, 9,827 miles. The mileages of sealed roads, and their proportions to the respective totals were:—State highways, 799 miles (68 per cent.); main roads, 393 miles (59 per cent.); and other roads, 74 miles (19 per cent.). The total length of sealed State roads was 1,266 miles (57 per cent.). The total length of non-State sealed roads was 994 miles (10 per cent.). The total length of all sealed roads in the State was 2,260 miles (19 per cent.).

(b) *Surface of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1963, was as follows:—bitumen or concrete, 2,260 miles; gravel or stone, 8,292 miles; formed only and cleared only, 1,488 miles; total, 12,040 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table below shows particulars of the receipts and payments of the combined Road Funds for the years 1958–59 to 1962–63.

## ROAD FUNDS, TASMANIA: RECEIPTS AND PAYMENTS

<b>Total .. .. .</b>	<b>5,080,969</b>	<b>6,107,405</b>	<b>7,816,475</b>	<b>7,531,915</b>	<b>7,840,796</b>

(a) Includes Commonwealth Employment Stimulation Grant (£366,956 in 1961–62, and £253,777 in 1962–63). (b) Include grants under Commonwealth Employment Stimulation Grant (£103,456 in 1961–62, and £11,130 in 1962–63).

8. *Northern Territory.*—Information relating to the length of roads in the Northern Territory may be found in Chapter V. Territories, of this Year Book (*see* p. 102).

9. *Summary of Roads used for General Traffic.*—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1963. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS: LENGTHS, 30th JUNE, 1963  
(Miles)

Class of road	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total

(a) 30th September, 1963.

10. *Aggregate Net Expenditure on Roads and Bridges in Australia.*—In most States, there are three classes of authorities concerned with roads and bridges, the State Government, the central road authority and numerous local government bodies. The Commonwealth Government, in addition to the grants it makes to the States for road purposes, is concerned with roads in the Northern Territory and the Australian Capital Territory and roads of access to Commonwealth property in the various States. Some information relating to Commonwealth grants to the States for road purposes and particulars of the expenditure on roads and bridges by local government bodies and the central road authorities are given in preceding sections of this chapter.

Most of these authorities may expend money directly on road construction or indirectly by means of grants and payments to other authorities. These indirect payments, if included in an aggregate, would duplicate expenditure; this, together with the fact that some authorities are unable to supply separate information concerning their road expenditure, makes it difficult to compile precise statistics of aggregate expenditure on roads and bridges.

The information in the following table, which is partly estimated and which excludes the main indirect payments, provides an approximate measure of the aggregate net expenditure by all public authorities on roads and bridges in Australia during each of the years ended 30th June, 1959 to 1963. The figures cover expenditure from revenue and loan funds on the construction, reconstruction and maintenance of roads and bridges, and direct administration but not debt charges. Because of the difficulties associated with the indirect payments mentioned above, it is not possible to give separate net details for each authority.

**PUBLIC AUTHORITY NET EXPENDITURE ON ROADS AND BRIDGES**

### § 5. Water Supply, Sewerage and Drainage

NOTE.—The information in this section relates primarily to the metropolitan areas and provincial cities and towns. For information on water supply and irrigation in rural areas see Chapter VIII. Water Conservation and Irrigation.

1. New South Wales.—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards, each consisting of a president and a vice-president appointed by the State Government, and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e. in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra and Shellharbour, and (b) the Hunter District Water Board serving the Newcastle-Maitland-Cessnock areas. At Broken Hill, a similar board includes two representatives of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply—to 30th June, 1963.* (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 577,122 million gallons, drain catchment areas of 3,856 square miles (Warragamba, 3,480 square miles, Upper Nepean, 347 square miles, and Woronora, 29 square miles). The development of a water supply system on the Warragamba River was completed with the official opening of the Warragamba Dam in October, 1960. This dam, constructed in concrete, has a storage capacity of 452,505 million gallons. Its safe net draught is estimated to be 285 million gallons a day. A hydro-electric power station at the dam generated 306 million kWh in 1962-63. At 30th June, 1963, there were 161 service reservoirs in use with a combined capacity of 632 million gallons. Rating for water for 1962-63 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 2s. 9d. per 1,000 gallons.

(b) *Hunter District.* The water supply is drawn principally from two sources:—the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Two other sources of supply are being developed. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 117 million gallons. Water rating for 1962–63 was 1s. 5½d. in the £1 on assessed annual value for occupied properties and 1s. 2½d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. 9d. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Metropolitan and Hunter District systems, the number of properties, the estimated population supplied, and other details.

## WATER SUPPLY, METROPOLITAN(a): SERVICES

Year	Improved properties for which water mains available	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of mains	Number of meters
					Per property	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1958–59 ..	579,900	2,212	198.9	72,624	348	91.3	6,246	362,130
1959–60 ..	598,893	2,264	200.9	73,529	335	88.7	6,450	382,180
1960–61 ..	620,944	2,341	219.1	79,988	353	93.6	6,664	411,731
1961–62 ..	634,139	2,481	220.7	80,556	348	89.0	6,945	430,588
1962–63 ..	653,674	2,544	233.6	85,282	357	91.8	7,173	438,585

(a) County of Cumberland, City of Greater Wollongong and Shellharbour Municipality.

## WATER SUPPLY, HUNTER DISTRICT(a): SERVICES

Year	Properties supplied	Estimated population supplied	Average daily consumption	Total consumption for year	Average daily consumption		Length of mains
					Per property	Per head of estimated population	
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles
1958–59 ..	81,398	274,881	28.2	10,281	346	102.5	1,439
1959–60 ..	84,437	285,346	28.6	10,474	339	100.3	1,460
1960–61 ..	86,032	290,530	29.7	10,854	346	102.4	1,483
1961–62 ..	87,792	296,502	31.7	11,555	361	106.8	1,512
1962–63 ..	89,283	301,580	36.6	13,352	410	121.3	1,551

(a) Newcastle, Maitland and Cessnock areas.

(iii) *Sewerage and Drainage—*to 30th June, 1963. (a) *Metropolitan.* Sydney and suburbs are served by three major sewerage systems and seven minor systems, consisting of six outfalls discharging directly into the Pacific Ocean and four treatment works. In addition, seven centres outside the metropolitan area (Camden, Campbelltown, St. Mary's, Port Kembla, Richmond, Warragamba township and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1963, were 179 miles long. Sewerage rating for 1962–63 was 9½d. in the £1 of assessed annual value, and drainage rating 1½d. in the £1.

(b) *Hunter District.* The main sewerage system serves the City of Newcastle and discharges into the Pacific Ocean at Merewether Gulf. There are also local treatment works at Maitland, Cessnock and some of the outlying districts.

Sewerage rates for 1962–63 were 1s. 0½d. in the £1 of assessed annual value of occupied lands and 9½d. in the £1 for unoccupied lands, and drainage rates (on certain areas served) 1½d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains.

**SEWERAGE AND DRAINAGE, METROPOLITAN(a): SERVICES**

At 30th June—				Improved properties for which sewerage available	Estimated population served	Lengths of sewers	Length of stormwater channels
					'000	Miles	Miles
1959..	..	..	..	379,069	1,520	3,791	180
1960..	..	..	..	395,869	1,560	4,021	180
1961..	..	..	..	412,034	1,620	4,231	180
1962..	..	..	..	426,333	1,710	4,489	178
1963..	..	..	..	451,997	1,780	4,763	179

(a) County of Cumberland, City of Greater Wollongong and Shellharbour Municipality.

At 30th June, 1963, 63,707 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle-Maitland-Cessnock areas). The total length of sewers under the Board's control was 897 miles, and the length of drains was 50 miles.

(iv) *Finances, Metropolitan and Hunter District Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1962-63, and for the three services combined for the years 1958-59 to 1961-62.

**WATER SUPPLY, SEWERAGE AND DRAINAGE, METROPOLITAN AND HUNTER DISTRICT: FINANCES**

(£)

(a) Includes provision for renewals, long service leave, etc. (b) County of Cumberland, City of Greater Wollongong, Shellharbour Municipality. (c) Newcastle-Maitland-Cessnock areas.

(v) *Country Water Supply and Sewerage Systems.* (a) *Local Government.* At 31st December, 1961, country water supply services were conducted or under construction by 51 municipalities, 82 shires and 5 county councils, and country sewerage services by 50 municipalities and 36 shires. The capital indebtedness of these schemes was £31,987,129 at 31st December, 1961, namely, £21,787,982 for water and £10,199,147 for sewerage. Debt of the municipalities amounted to £17,151,590, shires to £10,388,381 and county councils to £4,447,158. Government advances amounting to £470,813 are included in these figures. Aggregate income and expenditure amounted to £5,377,746 and £4,205,997, respectively, in 1961.

(b) *Other.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1962, was £3,482,459. In 1962, income (excluding subsidies, State Government, £86,510 and mining companies, £257,472) amounted to £280,452 and expenditure (excluding debt redemption, £207,969) amounted to £413,560.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers. Only a small quantity is sold direct to private consumers. The capital indebtedness of these systems was £6,950,274 at 31st December, 1962.

The Mulwala Water Supply and Sewerage Service was constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System is administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board consists of a Chairman and 51 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board are:—to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage system; to deal with main drains and main drainage works; to control and manage the rivers, creeks and watercourses within the metropolitan area, and to carry out the functions of a permanent planning authority.

(b) *Water Supply.* There are six storage reservoirs serving the metropolitan area—Yan Yean, 7,233 million gallons (available for consumption, 6,649 million gallons); Toorourong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 930 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); and Upper Yarra, 45,400 million gallons (44,120 million gallons); total 68,765 million gallons (65,452 million gallons). Service reservoirs number 37, with a total capacity of 366 million gallons.

The water rate levied by the Board in 1962–63 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which, at 2s. 0d. per 1,000 gallons, would equal the assessed water rates on each property, was 2s. 0d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1958–59 to 1962–63.

WATER SUPPLY, MELBOURNE: SERVICES

Year	Number of houses supplied	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of aqueducts, etc., mains and reticulation	Number of meters
					Per house	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1958–59 ..	483,410	1,740	134.0	48,917	277	77.0	4,942	344,702
1959–60 ..	496,841	1,789	145.3	53,169	292	81.2	5,109	366,905
1960–61 ..	510,078	1,836	152.9	55,822	300	83.3	5,245	392,396
1961–62 ..	519,216	1,869	157.6	57,521	304	84.3	5,477	422,318
1962–63 ..	547,123	1,981	151.3	55,225	277	76.4	5,622	460,866

(c) *Sewerage and Drainage.* Particulars of sewerage and drainage services for 1958-59 to 1962-63 are shown below. The rate levied in 1962-63 in respect of sewerage was 1s. 2d. in the £1 on the net annual value of the property served. The drainage rate was 2d. in the £1.

## SEWERAGE AND DRAINAGE, MELBOURNE: SERVICES

Year	Number of houses for which sewers are provided	Estimated population for which sewers are provided	Average daily pumping	Total sewage pumped for the year	Average daily pumping		Length of sewers, etc.	Length of main drains
					Per house	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	Miles
1958-59 ..	378,738	1,292	78.7	28,716	207.8	60.9	3,350	176
1959-60 ..	384,844	1,308	83.2	30,459	216.2	63.6	3,458	181
1960-61 ..	395,109	1,331	88.1	32,159	223.0	66.2	3,550	193
1961-62 ..	399,890	1,361	83.0	30,308	207.6	61.0	3,665	198
1962-63 ..	422,899	1,402	84.9	30,997	200.8	60.6	3,769	205

The metropolitan sewerage system consists of the main system (serving an area of 87,947 acres) and five subsidiary systems—the Sunshine system (serving an area of 2,354 acres), the Laverton system (serving an area of 108 acres), the Kew system (serving an area of 112 acres), the South-eastern system (serving an area of 3,500 acres in Cheltenham, Parkdale, Mentone and Mordialloc), and the Maribyrnong system (serving an area of 167 acres). The Metropolitan Sewage Farm, 26,809 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 98 per cent. of the sewage flow of the metropolis before its discharge into Port Philip Bay. The total capital cost (less depreciation) of the farm to 30th June, 1963, was £4,356,172. Revenue during 1962-63 amounted to £213,326, cost of sewage disposal to £260,022, trading expenses to £135,085, interest to £226,974, and net cost of sewerage purification to £408,755. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides for the year 1962-63 a summary of the financial operations of the water supply, sewerage and drainage services conducted by the Melbourne and Metropolitan Board of Works, and of the combined services for the years 1958-59 to 1961-62.

## MELBOURNE AND METROPOLITAN BOARD OF WORKS: FINANCES

(£ )

Service, etc.	Capital cost of works and buildings at 30th June(a)	Revenue	Expenditure				Surplus(+) or deficit(-)

(a) Total loan indebtedness—1962-63, £121,371,928.

(b) Statutory and general expenditure not distributed over services.

(ii) *State Rivers and Water Supply Commission. (a) General.* Water supply and conservation throughout Victoria (except for the area controlled by the Melbourne and Metropolitan Board of Works) is the responsibility of the State Rivers and Water Supply Commission. The events leading to the establishment of the Commission, and its works in the spheres of irrigation, domestic and stock water supply to farms, drainage, flood protection and river improvement, have already been described in Chapter VIII.; this section is therefore confined to the Commission's functions in connexion with urban water supply and sewerage.

(b) *Water Supply.* At 30th June, 1963, the Commission provided a reticulated water supply from its own works to 136 cities and towns having a combined population of 200,000 persons.

The principal systems operated by the Commission serve part of the Mornington Peninsula—Dandenong area (about 93,000 people supplied); Bendigo, Castlemaine, etc. (56,000); and about 8,000 people in the Western District. In addition, 10,000 persons in a number of towns in the Bellarine Peninsula receive supply through a Commission-operated distributary system from headworks controlled by the Geelong Waterworks and Sewerage Trust. The Bendigo-Castlemaine supply also provides for the irrigation of 11,000 acres as well as urban requirements in the area.

Outside these areas, the Commission supplies mainly small towns in the north of the State, in areas where it also supplies farms with water for irrigation or domestic and stock purposes.

Capital expenditure by the Commission on urban water supply at 30th June, 1963, was divided between the several systems as follows:—Mornington Peninsula, £9,200,000; Bendigo-Castlemaine, £4,300,000; Bellarine Peninsula, £975,000; Otway System (Western District), £975,000; other, £1,850,000; total, £17,300,000.

In addition to the towns supplied by the Commission, there are approximately 550,000 people in 202 cities and towns throughout the State who get a reticulated water supply from works operated by local authorities.

All these authorities operate under the supervision of the State Rivers and Water Supply Commission, largely because the Government subsidizes their capital expenditure. Most new works are financed from Government loan funds, but in recent years the Geelong Trust and some other local authorities borrowed money privately. In most cases, the local authority controls both headworks and distribution system, but a few large towns—serving about 50,000 people—draw their water from the State Rivers and Water Supply Commission and are concerned only with reticulation of the water. Together, therefore, the Commission and local authorities supply 338 urban centres containing more than 750,000 people. Very few towns of any importance are now without reticulated water supply.

The following table presents the financial position in respect of town water supply at 30th June, 1963.

**TOWN WATER SUPPLY, VICTORIA: CAPITAL LIABILITY, 30TH JUNE, 1963**  
(£'000)

Particulars	Water supply provided by—		
	Local authorities	State Rivers and Water Supply Commission	Total
Government advances .. .. .	23,475	17,300	40,775
Less redemption .. .. .	1,675	175	1,850
<i>Government Advances Outstanding</i> ..	<i>21,800</i>	<i>17,125</i>	<i>38,925</i>
Borne by State .. .. .	4,775	8,975	13,750
Borne locally .. .. .	17,025	8,150	25,175

In addition, about £8,250,000 has been borrowed locally, the Geelong Waterworks and Sewerage Trust having an outstanding liability of £7,089,000 at 30th June, 1963.

The proportion of loan capital borne by the State is much higher in the case of Commission undertakings than for towns supplied by local authorities. This is because most Commission undertakings have been developmental in nature. Besides meeting interest on capital borne by it, the State pays the difference between three per cent. and the actual rate paid on practically all the capital carried locally. The total annual subsidy on country town water supply is currently about £1,250,000.

(c) *Sewerage.* With the exception of the town of Eildon whose sewerage system is controlled directly by the State Rivers and Water Supply Commission, the construction and management of sewerage works in Victoria's country cities and towns are the responsibility of local authorities supervised by the Commission. Except for the Geelong Waterworks and Sewerage Trust and the Latrobe Valley Water and Sewerage Board which have special Acts dealing with their activities, all sewerage authorities operate under the *Sewerage Districts Acts*.

At 30th June, 1963, there were 54 cities and towns with sewerage systems in operation. These contained about 512,000 persons, approximately a third of the total number of residents outside the metropolitan area.

Expenditure on sewerage in Victorian country towns at 30th June, 1963, was approximately £22,220,000, of which some £18,000,000 had been advanced by private lenders. The annual State subsidy on country sewerage in Victoria is currently about £300,000, provided mainly in the form of subsidies on interest rates paid along the same lines as for town water supply. Comparatively little capital is borne directly by the State.

(iii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the *Geelong Waterworks and Sewerage Act* in 1910. It was further reconstituted in September, 1950, to include a government nominee (Chairman), and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners. The amount of loan money which may be raised is limited to £12,000,000 for water supply undertakings, and £5,000,000 for sewerage undertakings. The population supplied is estimated by the Trust at 101,657 persons. This and other general information relates to 30th June, 1963.

(b) *Water Supply.* The Trust operates two systems for gathering and storing water, the water in both systems being brought over fifty miles to Geelong. There are seven storage reservoirs and eleven service basins whose total storage capacity is 8,623 million gallons. The length of water mains and reticulation is 534.5 miles. The total expenditure on water supply to 30th June, 1963, was £6,225,537. General fund expenditure for 1962-63 comprised £147,405 for working expenses and £384,666 for interest, redemption and reserves, while revenue amounted to £548,298. The sinking fund appropriations at June, 1963, amounted to £340,758. The replacement and contingencies reserve amounted to £369,866. There is a water rate of 1s. 7d. in the £1 (with minima of 10s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean and 277 miles of main and reticulation sewers. The sewerage area is 11,851 acres, and the number of buildings connected within the sewered areas is 22,625. The total expenditure on sewerage works to 30th June, 1963, was £2,551,982. The revenue in 1962-63 amounted to £276,998, and the general fund expenditure comprised £102,946 on working expenses and £169,504 on interest, redemption and reserves. Sinking fund appropriations at June, 1963, were £208,805. Replacement and contingencies reserve amounted to £389,843. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iv) *The Ballarat Water Commissioners and the Ballarat Sewerage Authority.* (a) *General.* The body known as the Ballarat Water Commissioners was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commissioners constitute the Sewerage Authority. The Commissioners number nine, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat, one being elected by the Councils of the Borough of Sebastopol and the Shires of Buninyong and Grenville and one being elected by the Councils of the Shires of Bungaree and Ballarat. General and financial information given herein relates to the year ended 31st December, 1963.

(b) *Water Supply.* The water supply district comprises an area of about 65 square miles, containing a population of about 59,000. The total storage capacity of the seven reservoirs is 5,606 million gallons and the catchment area is 24,182 acres.

The capital cost on construction of the waterworks was £2,776,073 to 31st December, 1963. The liabilities amounted to £1,719,110 at 31st December, 1963, including loans due to the Government totalling £1,587,516. The revenue for the year 1963 was £188,854. Working expenses during 1963 amounted to £103,264 and interest and other charges to £85,001. A water rate of 1s. 0d. in the £1 on the net annual valuation is levied, with a minimum charge of £1 10s. per annum on any ratable property.

(c) *Sewerage.* The Ballarat sewerage district comprises the City of Ballarat and parts of the Shires of Ballarat, Bungaree and Grenville and the Borough of Sebastopol. There are more than 173 miles of sewers. The capital cost of sewerage construction works to 31st December, 1963, was £1,805,960. Two hundred and thirty-two sewerage areas had been declared as at 31st December, 1963. Assessments in the sewerage district numbered 19,727, while those in sewerage areas numbered 15,777. There were 13,358 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1963, amounted to £1,643,358; redemption payments at that date totalled £355,216. House connexions financed by the Authority numbered 3,955. Revenue during 1963 amounted to £173,359, and expenditure, which included £106,942 for interest and redemption, was £172,319.

A sewerage rate of 1s. 4d. in the £1 on the net annual valuation is levied, with a minimum charge of £3 on any ratable property.

(v) *Latrobe Valley Water and Sewerage Board.* (a) *General.* The Latrobe Valley Water and Sewerage Board was constituted on 1st July, 1954. The Board consists of seven members, namely:—two Government nominees (one of whom is Manager and also Board Chairman), three members elected by water supply, sewerage and river improvement authorities within the Latrobe Valley, and one representative each of the State Electricity Commission of Victoria and the Gas and Fuel Corporation of Victoria.

(b) *Water Supply.* The Board is empowered to construct water supply works within the Latrobe Valley, but at present its main construction activities are confined to the central industrialized areas, particularly around the towns of Morwell and Traralgon. With the completion of the Moondarra reservoir and pipeline, construction activities during 1962–63 showed a marked decrease, capital expenditure totalling £384,583 compared with £1,045,000 in 1961–62. The capital cost of construction of the waterworks was £4,784,510 to 30th June, 1963. Liabilities amounted to £5,297,889, including loans due to the Government totalling £5,121,272. Revenue for the year was £278,620. Working expenses during 1962–63 amounted to £51,592 and interest (including capitalized interest) and other charges to £160,370. The Board does not strike a rate, but supplies consumers, including local water supply authorities, by measure. The quantity supplied during the year ended 30th June, 1963, was 11,352 million gallons.

(c) *Sewerage.* The sewerage system consists of a main outfall sewer, about 52 miles in length. Wastes conveyed consist mainly of industrial wastes, such as paper wastes and gasification wastes, together with small quantities of domestic sewage. The capital cost of the sewerage construction works to 30th June, 1963, was £2,545,881. Liabilities amounted to £2,953,044, including loans due to the Government totalling £2,642,296. Revenue in 1962–63 was £116,033 and expenditure comprised £38,816 working expenses and £76,281 interest and other charges. No sewerage rate is levied, but a charge is made by measure for wastes both from industries and public authorities.

(vi) *Other Sewerage Authorities.* At 30th June, 1963, 71 other sewerage authorities had been constituted under the provisions of the *Sewerage Districts Acts* and systems were in operation in 50 districts.

3. Queensland.—(i) *Brisbane City Council—to 30th June, 1963.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane, and also supplies, in bulk, the whole of the water used by the City of Ipswich and the major portion of that used by the City of Redcliffe. Redcliffe also supplements its supply from that of the Pine Rivers Shire Council.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,720 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are 17 service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating for the year ended 30th June, 1963, was 4½d. in the £1 on the unimproved valuation of all ratable land, with a minimum charge of £8 for the year for each assessment. The following table is a summary of operations of the complete Brisbane City Council system (Brisbane, Ipswich and Redcliffe) for the years 1958–59 to 1962–63.

#### WATER SUPPLY, BRISBANE(a): SERVICES

Year	Services connected	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of trunk and reticulation mains
					Per service	Per head of estimated population	
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles
1958–59	163,336	594,124	41.4	15,127	254	69.7	2,059
1959–60	168,687	615,293	44.3	16,214	272	73.1	2,137
1960–61	171,820	626,470	46.8	17,100	273	74.8	2,196
1961–62	178,279	649,970	45.3	16,538	254	69.7	2,284
1962–63	182,804	665,479	48.3	17,644	264	72.6	2,378

(a) Includes Ipswich and Redcliffe.

(c) *Sewerage.* The sewage treatment works is situated at Luggage Point at the entrance to the Brisbane River. Sewerage rating for the year ended 30th June, 1963, was 3½d. in the £1 on the unimproved valuation of each portion of land with a minimum charge of £8 10s. for the year. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1958–59 to 1962–63.

#### SEWERAGE, BRISBANE: SERVICES

Year	Premises connected	Estimated population served	Total sewage pumped for the year	Length of main, branch, reticulation, etc., sewers
			Mill. gals.	Miles
1958–59	58,616	216,879	6,043	757
1959–60	58,942	218,185	5,626	803
1960–61	62,781	232,290	5,222	853
1961–62	67,407	249,406	5,808	906
1962–63	71,754	265,490	6,673	944

(d) *Finances.* The following table shows particulars of the finances of the water supply and sewerage undertakings of the Brisbane City Council for the years 1958-59 to 1962-63.

## WATER SUPPLY AND SEWERAGE, BRISBANE: FINANCES

1962-63 ..	19,926,939	1,262,379	296,083	651,779	1,167,970	+ 94,409

(a) Total, including other expenditure.

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were at 30th June, 1962, 168 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1962, there were 30 cities or towns in addition to Brisbane with sewerage systems, and sewerage schemes were in course of construction at 11 other cities or towns.

(c) *Finances.* The receipts (other than loan and loan subsidy) of water undertakings controlled by the cities and towns referred to above amounted to £2,682,494 in 1961-62. Expenditure amounted to £2,658,318, including £1,155,261 for debt charges. In addition, expenditure from loans and loan subsidy amounted to £2,530,569. Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. *South Australia.*—(i) *General.* The water supply and sewerage systems in this State were constructed mainly, and are maintained, by the Engineering and Water Supply Department, under the control of the Minister of Works. Works controlled by the Department are the Adelaide, Barossa, Beetaloo, Bundaleer, Moorook, Tod River, Warren, Yorke Peninsula and other country water districts systems, the Morgan-Whyalla water supply system, the metropolitan and country sewerage systems, the Metropolitan Flood Waters Scheme and works on the River Murray constructed under the River Murray Waters Agreement. Several water supply schemes on the Murray River are operated by the Department of Lands in conjunction with its irrigation works, and supplies to Woomera and Leigh Creek coalfield are controlled by the operating authorities. The following tables show particulars of metropolitan and country waterworks combined.

## WATERWORKS, SOUTH AUSTRALIA: SERVICES

Year	Assessments(a)		Area of districts supplied (a)	Capacity of reservoirs, tanks, etc.	Length of mains	Number of meters
	Number	Annual value				
		£	Acres	Mill. gals.	Miles	
1958-59.. ..	269,825	28,361,294	13,003,305	33,954	8,537	197,914
1959-60.. ..	289,235	31,617,930	13,037,312	33,957	9,016	213,024
1960-61.. ..	319,108	40,593,447	13,118,635	35,405	9,292	232,072
1961-62.. ..	338,636	42,702,029	13,153,869	45,106	9,634	247,972
1962-63.. ..	357,342	46,368,327	13,286,817	45,062	9,996	262,571

(a) Excludes Morgan-Whyalla Water Supply—water sold by measure.

## WATERWORKS, SOUTH AUSTRALIA: FINANCES

(£)

Year	Invested capital to 30th June	Revenue	Expenditure			Deficit
			Working expenses (a)	Interest	Total	
1958-59.. ..	54,301,234	3,106,348	2,768,406	1,933,850	4,702,256	1,595,908
1959-60.. ..	59,636,914	3,386,221	3,391,892	2,205,764	5,597,656	2,211,435
1960-61.. ..	65,183,386	4,284,394	3,188,385	2,373,567	5,561,952	1,277,558
1961-62.. ..	73,115,312	4,532,577	4,194,970	2,694,196	6,889,166	2,356,589
1962-63.. ..	80,908,668	4,951,534	3,987,673	3,197,520	7,185,193	2,233,659

(a) Includes debt redemption.

(ii) *Adelaide Waterworks.* At 30th June, 1963, the Adelaide waterworks supplied a district of 215,093 acres. The capacity of reservoirs and storage tanks was 24,211 million gallons and there were 2,729 miles of mains. Water is also drawn from the 11,300 million gallon reservoir at South Para in the Barossa Water District.

The Mannum-Adelaide pipeline conveys water from the River Murray to Adelaide at a rate of up to 66 million gallons a day. Water is delivered to the River Torrens or, by further pumping, to the River Onkaparinga. With further development, the main will operate as a closed system connected to the metropolitan reticulation. The pipeline supplements the Warren system and other country areas.

## ADELAIDE WATERWORKS: FINANCES

(£)

Year	Invested capital to 30th June	Revenue	Expenditure			Surplus (+) or Deficit (-)
			Working expenses (a)	Interest	Total	
1958-59.. ..	28,719,570	2,101,768	1,437,861	1,032,464	2,470,325	- 368,557
1959-60.. ..	32,074,743	2,311,402	1,919,538	1,136,373	3,055,911	- 744,509
1960-61.. ..	35,078,981	2,958,675	1,731,561	1,218,096	2,949,657	+ 9,018
1961-62.. ..	38,627,084	3,151,125	2,377,181	1,368,822	3,746,003	- 594,878
1962-63.. ..	41,730,576	3,436,759	2,071,396	1,689,793	3,761,189	- 324,430

(a) Includes debt redemption.

(iii) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg, Port Adelaide and Salisbury-Elizabeth areas of 153 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. Construction of a large treatment works at Bolivar is in progress to supersede the sewage farm and carry the increased load due to metropolitan expansion. Financial and other particulars for 1958-59 to 1962-63 are shown hereunder.

## ADELAIDE METROPOLITAN SEWERAGE: SUMMARY

Year	Length of sewers	Number of connexions	Invested capital to 30th June	Revenue	Expenditure			Surplus
					Working expenses (a)	Interest	Total	
	miles		£	£	£	£	£	£
1958-59 ..	1,444	154,636	10,437,696	1,471,067	685,104	349,312	1,034,416	436,651
1959-60 ..	1,471	160,407	11,305,495	1,576,769	676,660	401,009	1,077,669	499,100
1960-61 ..	(b) 1,598	173,753	13,376,362	2,060,534	887,921	479,011	1,366,932	693,602
1961-62 ..	(b) 1,659	179,918	14,544,885	2,211,011	913,724	524,376	1,438,100	772,911
1962-63 ..	(b) 1,714	186,143	16,755,220	2,344,706	1,001,053	575,617	1,576,670	768,036

(a) Includes debt redemption. (b) Includes sewers in the Salisbury-Elizabeth area (93 miles in 1960-61, 115 miles in 1961-62 and 127 miles in 1962-63).

(iv) *Country Sewerage Schemes.* Sewerage schemes are operating at Port Lincoln, Naracoorte, Nangwarry, Mount Burr, Myponga and Angaston. At Port Lincoln the sewers discharge to an ocean outfall, and treatment works are used on the other systems. There are 75 miles of sewers and 2,528 connexions in the country systems. A sewerage scheme for Mount Gambier is under construction.

(v) *Country Water Supply.* Water districts systems at 30th June, 1963, comprised an area of 13,072,000 acres. Supply came from reservoirs having a total capacity of 20,851 million gallons, from the River Murray, and from underground sources.

Apart from local supplies, water from the River Murray comes from branches of the Mannum-Adelaide main and from the Morgan-Whyalla main.

The principal areas of underground supplies are in the south-east of the State, where water from the Murray Basin can be had at moderate depths or from lakes, and from sand beds on Eyre Peninsula. In the year 1962-63, supplies made to Mount Gambier, Naracoorte and other towns amounted to 944 million gallons, and the Uley-Wanilla, Lincoln and Poldia Basins contributed 1,132 million gallons to the Tod River Water District.

## COUNTRY WATERWORKS, SOUTH AUSTRALIA: FINANCES

(£ )

Year	Invested capital to 30th June	Revenue	Expenditure			Deficit
			Working expenses (a)	Interest	Total	
1958-59 ..	25,581,664	1,004,580	1,330,545	901,386	2,231,931	1,227,351
1959-60 ..	27,562,171	1,074,819	1,472,354	1,069,391	2,541,745	1,466,926
1960-61 ..	30,104,405	1,325,719	1,456,824	1,155,471	2,612,295	1,286,576
1961-62 ..	34,488,228	1,381,452	1,817,789	1,325,374	3,143,163	1,761,711
1962-63 ..	39,178,092	1,514,775	1,916,277	1,507,727	3,424,004	1,909,229

(a) Includes debt redemption.

(vi) *Morgan-Whyalla Water Supply Scheme.* This scheme, which has 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1961, being £2,687,707. Particulars of the scheme, where applicable, are included in the tables of the combined waterworks in (i) above. Apart from supplying Whyalla, the main has been used to allow expansion of reservoir supplies in the northern agricultural area of the State, and to meet new demands caused by industrial growth at Whyalla, duplication of the main is under way. During 1962-63, water used from the scheme amounted to 3,192 million gallons. Revenue was £559,068, working expenses £372,599, interest charges £210,717, and deficit £24,248.

5. Western Australia.—(i) *General.* The water supply, sewerage and drainage systems of Western Australia are principally under the management of two State Government Departments, namely, the Metropolitan Water Supply, Sewerage and Drainage Department, having as its territory the metropolitan area centred on Perth and extending to Kwinana and Serpentine in the south, Sorrento in the north and Swan View on the east, and the Public Works Department, which controls the Goldfields and Agricultural Water Supply and the Great Southern Towns Water Supply as well as supplies, from local sources, to 79 country towns not included in these schemes. Both Departments are administered under the portfolio of the Minister for Works and Water Supplies. (See also Chapter VIII. Water Conservation and Irrigation, of this Year Book, p. 260.)

(ii) *Metropolitan Water Supply, Sewerage and Drainage. (a) General.* The sources of the metropolitan water supply are the Serpentine Dam, the Canning Dam, the Serpentine Pipehead Dam, the Churchman Brook Dam, the Victoria Reservoir and the Wungong Brook Diversion Weir. The supply from these sources is supplemented as necessary from a number of artesian bores and from a pipeline link with Mundaring Weir. The largest reservoir, the Serpentine Dam, has a capacity of 39,000 million gallons. There are three treatment works included in the Department's sewerage system. The largest of these, Subiaco treatment works, services Perth and suburbs.

(b) *Water Supply.* The following table shows particulars of water supply services for 1958-59 to 1962-63.

#### METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA: SERVICES

Year	Number of services (a)	Estimated population supplied (a)	Average daily consumption	Total consumption for year	Average daily consumption		Length of mains	Number of meters
					Per service (b)	Per head of estimated population (b)		
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1958-59 ..	125,761	417,770	49.5	18,061	399	120.2	1,991	92,495
1959-60 ..	129,956	431,600	(c) 33.7	(c) 12,335	(c) 263	(c) 79.5	2,072	97,002
1960-61 ..	133,647	446,000	49.3	18,015	374	112.3	2,137	103,969
1961-62 ..	137,960	460,730	50.6	18,492	373	111.6	2,179	116,610
1962-63 ..	142,246	469,000	47.1	17,214	336	100.5	2,278	123,364

(a) Figures relate to 30th June.  
restrictions in force for 180 days.

(b) Calculated from averages for the year.

(c) Water

Water rating for 1962-63 was 1s. in the £1 on annual valuation on land used for residential purposes and 1s. 6d. in the £1 on annual valuation on land not so used.

(c) *Sewerage and Main Drainage.* Some particulars of the metropolitan sewerage and main drainage services for 1958-59 to 1962-63 are shown on the next page.

METROPOLITAN SEWERAGE AND MAIN DRAINAGE, WESTERN AUSTRALIA: SERVICES

Year	Houses connected	Estimated population served	Length of sewers	Length of main drains
			Miles	Miles
1958-59 .. .. .	64,944	257,500	714	67
1959-60 .. .. .	65,781	260,600	719	69
1960-61 .. .. .	66,664	264,000	724	72
1961-62 .. .. .	67,378	239,110	736	77
1962-63 .. .. .	68,223	240,700	751	81

Sewerage rating for 1962-63 was 1s. 9d. in the £1 on annual valuation, while metropolitan main drainage rating was 4d. in the £1.

(d) *Finances.* The following table shows particulars of the finances of the Western Australian Metropolitan Water Supply, Sewerage and Drainage Department.

METROPOLITAN WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE, WESTERN AUSTRALIA: FINANCES

(£)

Service and year	Capital cost to 30th June	Revenue	Expenditure			Surplus (+) or deficit (-)
			Working expenses	Interest and debt redemption	Total	
<b>Water supply—</b>

1962-63 ..	2,191,431	148,215	75,362	99,929	175,291	- 27,076

(iii) *Country Water Supplies.* Information concerning country water supplies is included in Chapter VIII. Water Conservation and Irrigation, of this Year Book (see p. 260).

6. Tasmania.—(i) *Waterworks.* At the end of 1962-63 there were 96 municipally operated waterworks in Tasmania. The capacity of the reservoirs was 2,225 million gallons, the estimated population served was 281,000 and the number of properties served was 88,900. A regional scheme is operated as a State concern, supplying bulk water to the Municipalities of George Town, Lilydale and St. Leonards. In addition, this same scheme supplies water direct to industry situated near the Tamar River.

The overall control of water supply in the greater Hobart area, comprising the Municipalities of Hobart, Clarence, Glenorchy and Kingborough, is now vested in the Metropolitan Water Board, but the Municipalities retain primary responsibility for

reticulation. The Board has undertaken the construction of a new bulk supply, with an ultimate daily capacity of 20 million gallons, at an estimated cost of £2,500,000. This will be completed before the end of 1963.

(ii) *Sewerage.* At the end of 1962-63, there were 21 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 190,000 and the number of tenements served was 51,000.

7. Northern Territory.—Information relating to water supply in the Northern Territory may be found in Chapter VIII. Water Conservation and Irrigation (*see pp. 262-4*).

8. Australian Capital Territory.—The water supply, sewerage and drainage systems in the Australian Capital Territory are under the control of the Commonwealth Department of Works. The sources of the water supply are:—Cotter Dam (capacity 967 million gallons) and Bendora Dam (2,360 million gallons). Six pumps are capable of pumping approximately 20 million gallons daily.

The total population served in the Australian Capital Territory, which during 1962-63 consumed 3,078 million gallons of water was 72,750. In addition, the Canberra water supply system supplied 251 million gallons of water to Queanbeyan, New South Wales.

The total number of water meters at 30th June, 1963, was 15,690 and the total length of water lines was 307 miles.

The sewerage system for Canberra and suburbs consists of a treatment works and 243 miles of sewerage line (30th June, 1963). There were also 231 miles of stormwater lines.

## § 6. Harbour Boards and Trusts

NOTE.—The number and net tonnage of vessels which entered the major ports in each State during the years 1961-62 and 1962-63 are shown in Chapter XV. Transport and Communication (*see p. 562*). Particulars of oversea and interstate cargo discharged and shipped during 1962-63 are shown on page 564 of the same chapter.

1. New South Wales.—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of seven Commissioners comprising three full-time members and four part-time members representing shipping and other maritime interests. The Board was constituted on 1st February, 1936, under the *Maritime Services Act, 1935*, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels, and is vested with the general control and management of the navigable waters and ports within the State.

At the ports of Sydney, Newcastle, and Botany Bay, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Finances.* The implementation of the *Maritime Services (Amendment) Act 1960*, as from 1st May, 1961, resulted in some marked changes in the Board's accounting system. The amendment to the Act provided for a new fund known as the Maritime Services Board Fund to be established to replace the Sydney Harbour Trust Fund. All revenue earned by the Board at the ports of Sydney, Newcastle and Botany Bay, with the exception of that earned from pilotage and navigational services, is now credited to the Maritime Services Board Fund, and all revenue expenditure incurred at the three ports is drawn from that Fund.

The following table shows particulars of the finances of the Board in respect of the ports of Sydney, Newcastle and Botany Bay.

**MARITIME SERVICES BOARD FUND: FINANCES OF THE PORTS OF SYDNEY, NEWCASTLE AND BOTANY BAY**

(£)

Year	Revenue				Expenditure			Surplus
	Wharfage and transhipment rates	Tonnage rates and berthing charges	Other charges	Total	Administration and maintenance	Interest, debt redemption, exchange, etc.	Total (a)	
1960-61	3,130,441	631,432	927,729	4,689,602	2,565,141	2,081,110	4,646,251	43,351
1961-62	4,654,234	699,557	1,292,632	6,646,423	3,756,694	2,857,210	6,613,904	32,519
1962-63	4,846,617	790,676	1,218,885	6,856,178	3,771,424	3,028,183	6,799,607	56,571

(a) Excludes capital expenditure but includes transfer to the Renewals Fund Reserve Account (£1,025,000 in 1960-61, £1,375,000 in 1961-62, and £1,545,500 in 1962-63).

(c) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of four miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tide) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length, and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated close to the business centre of the city, about four or five miles from the Heads. At present, there are two dolphin berths each 550 feet long, and 96 effective commercial cargo berths with a total length of 46,007 feet controlled by the Board. Accommodation for harbour craft amounts to 2,820 feet, while the length of other berths, including oil and private wharves, totals 28,851 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of products such as wheat, wool, coal, etc., are provided, and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock ranks among the largest graving docks in the world, being 1,139 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

(d) *Port of Newcastle.* As from 1st May, 1961, the Maritime Services Board of New South Wales became the single authority for the port of Newcastle. This was brought about by the implementation of the *Maritime Services (Amendment) Act 1960*, which resulted in the Board's jurisdiction being extended to include the operation of the coal loading equipment formerly vested in the Department of Railways and the dredging, together with the maintenance and construction of wharves and other port facilities, which had been the responsibility of the Department of Public Works.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,200 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfage accommodation amounts to approximately 15,000 feet, including about 2,600 feet of privately owned wharfage. There are also several dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell, near Sydney, and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately  $1\frac{1}{4}$  miles wide, with a minimum depth of about 36 feet in the dredged swinging basin.

(f) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members, appointed by the Governor, has been formed to assist the Board in the operation of the port. It has an area of approximately 340 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfage accommodation totalling 8,000 feet has been provided for large ocean-going vessels. No cargo sheds are available, as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfage for the steelworks in addition to a modern fast-loading coal berth and general cargo berths.

The first stage of the inner harbour basin was opened to shipping on 28th November, 1960. Present accommodation is 1,175 feet of wharfage, with 36 feet (low water ordinary spring tide) of water alongside. Width in the entrance to the inner harbour basin is 400 feet.

(g) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 29 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Lighthouses Act and the Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £9,076,243 in 1962-63. This figure includes the revenue for the ports of Sydney, Newcastle and Botany Bay (see table on p. 817) and State navigation service collections, £2,220,065 (1962-63). Commonwealth Government revenue from light dues and navigation receipts for the whole of Australia amounted to £862,120 in 1962-63.

2. *Victoria.*—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the port of Melbourne, appears in Official Year Book No. 12, pages 970-2. The port of Melbourne comes under the control of the Melbourne Harbor Trust-Commissioners, an independent autonomous statutory organization, with a full-time Chairman and five part-time Commissioners with specialized knowledge of the requirements of exporters, primary producers, shipowners, importers and all aspects of port labour. The area of water and land under the control of the Trust is  $10\frac{1}{2}$  square miles, with sheds available for cargo in transit totalling 25,505 feet in length and covering an area of 46½ acres.

Two of the largest transit sheds on the Australian coast are now in operation at Appleton Dock. The sheds are 600 feet long by 150 feet wide, with a cargo stacking area of 81,000 square feet. The berths are used for the general cargo trade and have both rail and crane facilities, and modern amenities for port workers. The total length of wharves, piers and jetties in the port is 61,550 feet, covering an area of  $58\frac{1}{2}$  acres with 58,466 feet of effective berthing space.

The only major construction work commenced during 1962 was the first stage of a £1,780,000 five-stage project to rebuild and modernize the first four berths in the Victorian Dock system.

The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is 31 to 39 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust.

MELBOURNE HARBOR TRUST: FINANCES

(£)

Year	Gross loan indebtedness at 31st December	Revenue		Expenditure				Surplus (+) or deficit (-)
		Wharfage and tonnage rates	Total	Administration and maintenance	Interest, debt redemption, exchange, etc.	Depreciation, renewals and insurance account	Total (a)	
1958 ..	12,907,279	2,043,848	3,020,913	1,310,119	603,899	631,988	2,958,686	+ 62,227
1959 ..	13,833,011	2,100,924	3,292,329	1,634,513	766,909	376,397	3,201,943	+ 90,386
1960 ..	14,199,060	2,492,139	3,948,187	1,962,110	766,532	641,175	3,872,264	+ 75,923
1961 ..	14,240,702	2,303,586	3,791,495	2,246,657	910,713	203,909	3,826,008	- 34,513
1962 ..	14,875,017	2,441,432	3,978,831	2,095,470	893,765	484,292	3,965,845	+ 12,986

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust (£412,680 in 1958, £424,124 in 1959, £502,447 in 1960, £464,729 in 1961, and £492,318 in 1962). Excludes capital expenditure (£1,658,589 in 1958, £1,458,499 in 1959, £1,280,529 in 1960, £1,348,846 in 1961, and £1,309,072 in 1962).

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust, constituted in 1905, is under the control of three Commissioners appointed from time to time by the Governor-in-Council. One of these, the chairman, is on a full time basis.

At the end of 1962, there were 19 effective berths in the port, plus two berths at the Commonwealth Explosives Pier, Pt. Wilson, owned and operated by the Commonwealth. Three major wharf projects are in course of planning, the first of which is expected to be under construction early in 1963. Eight berths have a depth of 36 feet at low water, while all other berths, except Yarra Pier, 29 feet, and Commonwealth Explosives Pier, Pt. Wilson, 30 feet, have a depth of 32 feet at low water.

Revenue for the year 1962 was £1,289,378 and expenditure from revenue totalled £745,204. At 31st December, 1962, the value of the Trust's fixed assets was £8,778,321 and loans outstanding amounted to £3,067,407.

(iii) *Portland Harbour Trust.* Construction of an all weather deep-sea port of three berths with a low water depth of 36 feet was completed to operational standards in 1960. A new oil tanker berth was brought into commission during 1963, from which petroleum products will be pumped to bulk terminals at North Portland.

Operating revenue for the year ended 30th June, 1962, was £101,798 and revenue expenditure was £101,647. The value of the Trust's fixed assets, less depreciation, was £6,785,329 at 30th June, 1962, and loans and advances outstanding amounted to £6,943,869.

3. Queensland.—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly because of the increasing size of vessels, are still within easy access of the city. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1957-58 to 1961-62 are shown below.

**BRISBANE HARBOUR: FINANCES**  
(£'000)

Year	Loan indebtedness at 30th June	Receipts		Payments	
		Harbour dues	Total	Working expenses(a)	Total
1957-58 .. ..	3,042	696	938	731	944
1958-59 .. ..	2,702	709	1,097	664	883
1959-60 .. ..	2,512	772	1,059	731	953
1960-61 .. ..	2,813	763	1,164	679	901
1961-62 .. ..	2,716	742	1,084	628	849

(a) Excludes interest and redemption included in total.

In addition to Brisbane harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, and nine smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. Finances for each port for the year ended 30th June, 1962, are shown below, together with a summary for the years ended 30th June, 1958 to 1962.

**HARBOUR BOARDS, QUEENSLAND: FINANCES**  
(£)

Harbour board	Loan indebtedness at 30th June	Revenue		Expenditure (excluding loan)		Surplus(+) or deficit(-)
		Wharfage and harbour dues	Total	Working expenses	Total (including interest and redemption)(a)	
Bowen .. ..	270,576	7,941	49,635	13,770	58,916	- 9,281
Bundaberg .. ..	2,747,467	136,627	267,131	7,489	266,276	+ 855
Cairns .. ..	229,425	192,160	289,630	148,471	222,678	+ 66,952
Gladstone .. ..	859,418	70,889	117,344	17,860	73,306	+ 44,038

1957-58 .. ..	5,435,172	775,436	1,226,581	603,081	1,190,356	+ 36,225

(a) Includes expenditure on capital works from accumulated revenue.

4. *South Australia.*—The *South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide,

Port Pirie, Wallaroo, Port Lincoln and Thevenard. At a few ports, the wharves or jetties are privately controlled, the principal of these being at Whyalla, Ardrossan and Rapid Bay, all of which are controlled by the Broken Hill Pty. Co. Ltd. Port Augusta is controlled by the Commonwealth Railways on behalf of the Commonwealth Government. Maximum depths of water (low water) at the wharves of the main ports range from 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1958-59 to 1962-63.

## THE SOUTH AUSTRALIAN HARBORS BOARD: FINANCES

(£ )

Year	Capital at 30th June (a)	Revenue	Expenditure from revenue			Surplus
			Working expenses	Interest	Total	
1958-59.. ..	15,325,443	2,156,669	1,464,006	550,364	2,014,370	142,299

(a) State Treasurer's funds and reserve employed.

5. *Western Australia.*—(i) *Fremantle Harbour Trust.* The Port of Fremantle is operated and controlled by the Fremantle Harbour Trust, a body corporate administered by a Board of five Commissioners appointed triennially by the Governor. The port covers an extensive water area of some 180 square miles and comprises an inner and an outer harbour. The inner harbour includes 18 deep water land-backed berths, providing more than 690,000 sq. ft. of covered storage space and 11,148 feet of wharf berth accommodation. All inner harbour berths are dredged to a depth of 36 feet. The outer harbour includes three main anchorages, Gage Roads, Owen Anchorage and Cockburn Sound. Deep water jetties, including the oil refinery jetties in Cockburn Sound, are available in the outer harbour. Ocean going deep draft ships enter the Sound by means of channels dredged through Success and Parmelia Banks to a low water depth of 38 feet and a bottom width of 500 feet. In the outer harbour there are three tanker berths, each with a low water depth of 44 feet, at the Kwinana oil refinery, and one berth at the nearby steelworks jetty with a low water depth of 30 feet. There are also special berths for the off-loading of cattle and the handling of high explosives.

Gross earnings for the year 1962-63 amounted to £3,109,082, working expenses to £2,506,994, interest charges to £320,525, debt redemption to £84,429, and renewals fund to £2,000. Special loan redemptions were £274,681, and net capital totalled £8,198,637.

(ii) *Albany Harbour Board.* The Albany Harbour is controlled by a board of five members appointed by the Government. The depth of water in the entrance channel is 33 feet, at one arm of the jetty 31 feet and at the other arm 33 feet. In the approaches to wharf berths, the depth is 33 feet. Wharf accommodation consists of 1,115 feet, and in addition the Deepwater Jetty has 2,500 feet of accommodation. Gross earnings for the year 1962-63 amounted to £146,562, working expenses £75,659, interest and sinking fund charges, £99,464, and amounts debited to loan capital account, £1,906,170.

(iii) *Bunbury Harbour Board.* The Bunbury Harbour is controlled by a board of five members appointed by the Government. The depth of water in the harbour is 30 feet and berthing accommodation is 3,700 feet. Gross earnings for the year 1962-63 amounted to £162,260, working expenses £56,800, interest and sinking fund charges £110,325, and amounts debited to loan capital account, £2,631,118.

(iv) *Other Ports.* The following ports are controlled by the State Government Harbour and Light Department:—Broome, Busselton, Carnarvon, Derby, Esperance, Geraldton Onslow, Point Samson, Port Hedland, Wyndham and Yampi. The port of Esperance was under the control of the Railways Commission until 22nd January, 1962.

6. Tasmania.—There are eight marine boards and one harbour trust in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport and Ulverstone, Strahan, Currie (King Island), and Whitemark (Flinders Island), and the harbour trust controls the port of Smithton. Aggregate receipts of revenue accounts of all these authorities during the year 1962–63 were £1,857,362, and expenditures £1,446,219, including loan charges £469,704. All amounts referred to in this section exclude transfers between accounts of the same authority.

The total receipts of the Hobart Marine Board on revenue account during 1962–63 were £637,130, and total expenditure on revenue account was £498,959, of which £122,732 was spent on loan charges. Launceston Marine Board receipts on revenue account during 1962–63 amounted to £431,066, and expenditure on revenue account was £422,399, of which £73,913 was spent on loan charges. Devonport Marine Board (which is now responsible for running the facilities formerly provided by the former Ulverstone Harbour Trust) had receipts of £354,309 on revenue accounts and spent £249,927 on revenue account, including £125,891 on loan charges (these figures include the accounts in respect of Ulverstone Harbour Trust for the whole fiscal year including the period 1st June, 1962, to 31st December, 1963, prior to its incorporation with the Marine Board). The total receipts on revenue account for Burnie Marine Board were £381,601 and expenditure on revenue account items totalled £219,745, of which loan charges accounted for £134,207.

The total loan indebtedness of all marine boards and the harbour trust at 30th June, 1963, amounted to £6,335,538. Of this sum, £1,383,842 was in respect of Hobart (including Port Huon), £841,765 in respect of Launceston, £2,524,842 in respect of Burnie, and £1,464,023 in respect of Devonport (including Ulverstone). The total of new loans raised during 1962–63 by the harbour trust and all the marine boards was £1,083,300, of which Hobart raised £250,000, Burnie £573,800 and Devonport £150,000.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable overseas shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

## § 7. Fire Brigades

1. New South Wales.—A Board of Fire Commissioners, consisting of five members, one appointed by the State Government (President) and one each representing insurance companies, local government authorities, volunteer firemen, and permanent firemen, operates under the *Fire Brigades Act, 1909–1958*, and 157 fire districts had been constituted at the end of 1963. The cost of maintenance of fire brigades is borne in proportions of local councils and the Government each one-eighth, and the insurance companies three-quarters. The Board's borrowing power is limited to £1,000,000.

At 31st December, 1963, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 417 officers and 1,262 permanent and 2,669 volunteer firemen. Corresponding figures for the Sydney Fire District were 342, 1,116 and 285. The revenue for the year 1963 was £3,605,600, made up as follows:—from the Government, £446,596; municipal and shires, £446,596; fire insurance companies and firms, £2,679,577; and from other sources, £32,831. The disbursements for the year were £3,540,268. The Board of Fire Commissioners provides the fire protection services for Canberra, in the Australian Capital Territory, and the cost of these services is reimbursed by the Commonwealth Government.

Under the *Bush Fires Act, 1949–1963*, a Bush Fire Fighting Fund exists from which finance is provided for the prevention and fighting of bush fires. Contributions to the Fund by the Government, councils and insurance companies are in the proportion of one quarter, one quarter and one-half, respectively. At 30th June, 1963, Volunteer Brigades equipped by means of this fund numbered 2,500 with an active membership of about 100,000 persons. The approved expenditure from the Fund for equipment, up to 30th June, 1964, amounted to £2,424,201.

2. *Victoria.*—(i) *General.* In Victoria, fire brigades are controlled by the Metropolitan Fire Brigades Board consisting of ten members, including an employees' representative, and the Country Fire Authority also consisting of ten members.

(ii) *Metropolitan Fire Brigades Board.* The Metropolitan Fire Brigades Board receives contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. On 30th June, 1963, the Board had under its control 45 stations, 1,055 permanent staff, 227 special service and clerical, etc., staff, and 13 part-time firemen. The total receipts for 1962–63 were £2,106,501, comprising contributions, £1,770,014, receipts for services, £211,903, and interest and sundries, £124,584. The expenditure was £2,288,660.

(iii) *Country Fire Authority.* This authority is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority receives contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury. At 30th June, 1963, the *Country Fire Authority Act* applied to 209 insurance companies, and 206 urban and 1,041 rural fire brigades. The effective registered strength of the brigades was 107,581 members.

Income for the year 1962–63 amounted to £767,932. Total expenditure other than loan amounted to £674,327.

3. *Queensland.*—(i) *General.* Fire Districts are constituted under the Acts of 1920–1956. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows:—Treasury one-seventh, insurance companies five-sevenths, and local authorities one-seventh. The insurance companies' contribution is paid to the State Government and thence to fire brigades.

(ii) *Fire Brigade Boards.* At 30th June, 1962, there were 80 Fire Brigade Boards. The total number of stations was 146 and full-time staff numbered 863, including 25 administrative, 185 officers and 653 firemen. Volunteers numbered 77. Part-time staff numbered 1,104, including 78 administrative, 111 officers, and 915 firemen. The total revenue for the year 1961–62 was £1,400,993, received mainly from the following sources:—Government £192,455, local authorities £192,455, insurance companies £946,525. Loan receipts (Government and other) were £247,052. The total expenditure for the year was £1,391,170, the chief items being salaries and wages £1,030,057, and interest and redemption of loans £110,392.

4. *South Australia.*—The *Fire Brigades Act, 1936–1958* provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury, five-ninths by insurance companies, and two-ninths by the municipalities concerned. When the Treasury proportion exceeds £10,000, the excess is borne five-sevenths by insurance companies and two-sevenths by the municipalities. At 30th June, 1963, there were altogether 36 fire brigade stations, of which 12 were metropolitan and 24 country.

The strength of the permanent staff at 31st December, 1963, was 409, including 278 officers and men, 97 country auxiliary firemen and 34 other employees (including maintenance workers). The total revenue for the year 1962–63 was £559,571, including contributions of £469,792 made up as follows:—insurance companies £282,539, Treasury £74,044 and municipalities £113,209. The treasury contribution includes an additional grant of £61,244.

5. *Western Australia.*—By the provisions of the *Fire Brigades Act, 1942–1961*, certain local government areas and parts of local government areas are constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 45 fire districts at 30th September, 1963. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 64 and 170 respectively. The brigades, throughout the State, controlled by the Western Australian Fire Brigades Board at 30th September, 1963, numbered 63, with a staff of 1,423, including 279 permanent officers and firemen and 1,144 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1963, was £622,042 and the expenditure £620,895.

Under the *Bush Fires Act, 1954-1958*, a Bush Fires Board, consisting of 13 members, 6 of whom are nominated by the Country Shire Councils Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,783 at 30th June, 1963, and the establishment of bush fire brigades, 818 at 30th June, 1963. Many individual brigades are large organizations with numerous self-contained sections.

6. Tasmania.—The *Fire Brigades Act 1945* provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigade boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of two persons nominated by the Minister, one person elected by the City or Municipal Councils representatives and three persons elected by the insurance representatives of the Fire Brigades Boards. Contributions towards the cost of operations are on the basis of one quarter each from the Treasury and the municipalities and one half from the insurance companies concerned. The cost for the year 1962-63 amounted to £212,454. There were, at 30th June, 1963, 23 boards controlling 37 stations, and their aggregate staffs numbered 562, including 109 permanent officers, 371 part-time firemen, including officers, and 82 volunteers.

## CHAPTER XXI

### PRIVATE FINANCE

NOTE.—Further information on the subjects dealt with in this chapter is contained in the annual bulletins *Banking and Currency* and *Insurance and Other Private Finance* published by this Bureau. Current information is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the monthly mimeographed statements *Australian Banking Statistics* (bulletin and preliminary statement), *Australian Savings Bank Statistics* (bulletin and preliminary statement) and *Australian Life Insurance Statistics* (bulletin). The annual mimeographed bulletin *Australian Fire, Marine and General Insurance Statistics* contains the most recent information available on this subject. Other relevant mimeographed statements are:—*Instalment Credit for Retail Sales*; *Unit Trusts, Land Trusts, and Mutual Funds*; *New Capital Raisings by Companies in Australia*; and *Capital and Maintenance Expenditure by Private Business in Australia* (quarterly); *Oversea Investment: Australia* (annual); *Survey of Private Pension and Retiring Allowance Schemes, 1961–62*; and *Survey of Selected Large Private Pension Funds, 1962–63*. Preliminary monthly statements *Instalment Credit for Retail Sales* and preliminary estimates of *New Capital Raisings* and of *Oversea Investment* are issued also.

### CURRENCY

#### § 1. General

1. **Decimal Currency.**—The Decimal Currency Committee was appointed by the Commonwealth Government in February, 1959, to investigate the advantages and disadvantages of a decimal currency, and, if a decimal currency was favoured, the unit of account and denominations of subsidiary currency most appropriate for Australia, the method of introduction, and the cost involved. The Committee presented its report in August, 1960, and the Summary of Conclusions and Recommendations contained therein appears in Year Book No. 49, pages 835–7.

In July, 1961, the Commonwealth Government confirmed its support of decimal currency systems and in April, 1963, announced that a system of decimal currency was to be introduced into Australia at the earliest practicable date. February, 1966, was given as the tentative change-over date, subject to confirmation that all the necessary arrangements could be completed by that date so that the currency reform could be introduced with the minimum amount of inconvenience. The Government emphasized that the tentative target of February, 1966, would depend to a large extent upon the completion on schedule of the new National Mint in Canberra, since it would be essential to have an adequate supply of the new decimal coins available for distribution to the public at the change-over date. The new mint was expected to be completed late in 1964, and this would allow full production of new coins for at least one year before February, 1966, supplemented if possible by assistance from the existing Melbourne and Perth Mints. The Melbourne and Perth Mints would, however, be primarily concerned with the production of the present coins, which would probably remain in circulation until late in 1967.

The new system would be based on a major unit equal to the present ten shillings. The minor unit of the new system would be one hundredth part of the major unit, and would thus be equal in value to 1.2d. in the existing coinage system. No fractions of the minor unit would be introduced.

The Government also announced that it would pay reasonable compensation to owners of a large proportion of monetary machines which would require conversion in order to be used under the new decimal system. While the general principles on which the compensation would be paid had already been determined, a vast number of points of detail would have to be negotiated with the machine companies concerned, and this would be one of the principal duties of a statutory authority which would be established to plan and administer preparations for the change-over. The appointment of a Decimal Currency Board of seven members to supervise certain important aspects of the arrangements for the change-over to the decimal currency system was announced on 4th June, 1963.

On 5th June, 1963, the Government announced that the major unit in the new Australian decimal currency system was to be called the "Royal". However, on 18th September, 1963, it was announced that the Government had revised its earlier decision and that the new major unit would be the "Dollar" and not the "Royal", and that the dollar and cent would be the only units with specified names. The dollar will be a banknote and will consist of 100 "units" each equivalent in value to 1.2d. under the present £ s. d. system.

On 20th December, 1963, the Government published the following details of the dimensions and composition of the proposed new decimal coins to be introduced in February, 1966.

Coin	Diameter	Weight	Composition
	inches	grains	per cent.
<b>Silver—</b>			
50 cents (5s.) .. .. .	1.240	200	$\left\{ \begin{array}{l} 80 \text{ silver} \\ 20 \text{ copper} \end{array} \right.$
<b>Cupro-nickel—</b>			
20 cents (2s.) .. .. .	1.122	174.6	$\left\{ \begin{array}{l} 75 \text{ copper} \\ 25 \text{ nickel} \end{array} \right.$
10 cents (1s.) .. .. .	0.929	87.3	
5 cents (6d.) .. .. .	0.764	43.6	
<b>Bronze—</b>			
2 cents (2.4d.) .. .. .	0.850	80	$\left\{ \begin{array}{l} 97 \text{ copper} \\ 2\frac{1}{2} \text{ zinc} \\ \frac{1}{4} \text{ tin} \end{array} \right.$
1 cent (1.2d.) .. .. .	0.690	40	

2. **The Present Australian Monetary System.**—The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909, the Australian pound was specified as equivalent to 123.27447 grains of gold  $\frac{11}{12}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 18th September, 1949, this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the *Coinage Act 1909* and the *Australian Notes Act 1910*.

Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

## § 2. Coinage

1. **Coins in Circulation.**—Brief historical notes relating to the Australian coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation see Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947 (dated 1946 and later), have a millesimal fineness of 500 (one-half silver and one-half other metals).

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916, 1917 and 1918 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916, and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926, and at the Perth branch in 1922 and from 1940 to the present time.

During the 1939-45 War, the two Australian mints were unable to meet the demand for Australian coins, and some coins were minted in the United States of America and India. In 1951-52 and 1952-53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1963, are as follows:—Melbourne, £56,091,000; Perth, £2,037,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; total, £67,801,000.

2. *Net Issues of Australian Coins.*—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1963, were:—Crown (5s.), £276,000; Florin (2s.), £22,753,000; Shilling (1s.), £10,469,000; Sixpence (6d.), £6,735,000; Threepence (3d.), £7,141,000; total silver coin, £47,433,000; Penny (1d.), £2,835,000; Half-penny (2d.), £822,000; total bronze coin, £3,657,000. Except in the total, no allowance has been made for £59,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. *Profits on Coinage of Silver and Bronze.*—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1958-59 to 1962-63.

**AUSTRALIAN SILVER AND BRONZE COINS: PROFITS FROM ISSUE**  
(£)

Year	Face value of coin issued (a)	Cost of bullion	Gross profit	Cost of minting and sundry charges	Net profit
<b>SILVER COIN</b>					
1958-59 .. ..	1,304,682	933,065	371,617	139,948	231,669
1959-60 .. ..	2,157,682	1,505,128	652,554	182,558	469,996
1960-61 .. ..	2,262,622	1,591,878	670,744	258,002	412,742
1961-62 .. ..	3,672,543	2,658,758	1,013,785	267,921	745,864

1962-63 .. ..	2,927,705	2,389,039	538,666	432,792	105,874

(a) Includes selected and proof pieces.

NOTE.—Minus sign (-) denotes a loss.

4. *Australian Mints.*—(i) *General.* Soon after the discovery of gold in Australia a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

A new mint, the Australian National Mint, is being built in Canberra. It is expected to be completed by the end of 1964, and will then be engaged in the production of coins of the new decimal currency (see §1, p. 825).

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1962 and 1963 amounted to 981,592 and 909,993 fine ounces respectively (Melbourne, 114,838 and 110,960 fine ounces respectively, Perth, 866,754 and 799,033 fine ounces respectively).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Reserve Bank, and the export and use of gold have been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted. The issues from Australian mints during 1962 and 1963 amounted to 982,143 and 910,377 fine ounces respectively (Melbourne, 115,045 and 111,035 fine ounces respectively, Perth, 867,098 and 799,342 fine ounces respectively).

5. *Price of Gold.*—The following table shows the average prices of gold, the average values of the sovereign's gold content in London, and the sovereign's Reserve Bank buying price in Australia for the years 1958-59 to 1962-63. The average price of gold in Australia is based on the Reserve Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA

Period	London		Australia		
	Average price per fine oz.	Average value of sovereign's gold content	Average price per fine oz.	Sovereign	
				Reserve Bank buying price	Equivalent to a premium on mint par value of—
	£Stg. s. d.	£Stg. s. d.	£A. s. d.	£A. s. d.	%
1958-59.. ..	12 9 11	2 18 10	15 12 6	3 12 6	267.8
1959-60.. ..	12 10 3	2 18 11	15 12 6	3 12 6	267.8
1960-61.. ..	12 11 9	2 19 3	15 12 6	3 12 6	267.8
1961-62.. ..	12 10 1	2 18 10	15 12 6	3 12 6	267.8
1962-63.. ..	12 10 6	2 19 0	15 12 6	3 12 6	267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements, gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ( $\frac{11}{16}$ ths).

The average prices per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for each month during 1962-63 for which there were sales were:—August, September, April and June, £15 13s. 1d.; October, £15 13s. 3d.; November, £15 13s. 5d.; December, £15 12s. 10d.; March, £15 12s. 10½d.; May, £15 13s. 2d.

## § 3. Notes

1. *General*.—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Reserve Bank of Australia is prohibited.

2. *The Australian Note Issue*.—(i) *General*. Notes in circulation in Australia are issued by the Reserve Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Reserve Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth, or a State. Under the *Reserve Bank Act 1959*, the profits of the Note Issue Department are paid to the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation*. Particulars of the average values of notes in circulation for the years 1958–59 to 1962–63 are given in the following table.

**AUSTRALIAN NOTE ISSUE**  
(£'000)

Denomination	Average of monthly statements(a) for year—				
	1958–59	1959–60	1960–61	1961–62	1962–63

(a) Notes of a denomination not exceeding one pound which have been on issue for more than 20 years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item Notes on issue but are included in the item Other liabilities.

In 1962–63, the net profits of the Note Issue Department amounted to £12,780,000 and were paid to the Commonwealth of Australia.

## BANKING

## § 1. Cheque-Paying Banks

1. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

2. **Banking Legislation.**—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." The principal Commonwealth Acts at present in force relating to banking are—

- (a) The *Reserve Bank Act 1959*, which provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue;
- (b) The *Commonwealth Banks Act 1959–1961*, which provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia and Commonwealth Development Bank of Australia; and
- (c) The *Banking Act 1959*, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The *Banking Act 1959*, which replaced the *Banking Act 1945–1953*, was assented to on 23rd April, 1959, and came into operation on 14th January, 1960. It applies to all banks, except State banks trading in their own State, operating in Australia or the Territories of the Commonwealth. The objects of the Act are:—(a) to provide a legal framework uniform throughout Australia for regulating the banking system; (b) to safeguard depositors of the banks from loss; (c) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (d) to control the volume of credit in circulation and bank interest rates; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 46, pages 759 and 760.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g. the Bank of New South Wales by Act of Council 1817, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business, are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into the following five groups and a separate series is presented for each.

- (a) *The Reserve Bank of Australia.* Formerly the Commonwealth Bank, this bank is the Central Bank. It also provides special banking facilities through the Rural Credits Department. Statistics of the Central Banking Business (including the Note Issue Department) and of the Rural Credits Department are presented in separate series.
- (b) *The Commonwealth Development Bank of Australia.* This bank, which commenced operations on 14th January, 1960, under the control of the Commonwealth Banking Corporation, was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Its prime purpose is to assist in the development of worth-while enterprises in the field of both primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions.

- (c) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the *Commonwealth Bank Act 1953*, it took over the business of the General Banking Division of the Commonwealth Bank. On 14th January, 1960, under the provisions of the *Commonwealth Banks Act 1959*, it came under the control of the Commonwealth Banking Corporation.
- (d) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks, but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Australia and New Zealand Bank Ltd. (an amalgamation of the Bank of Australasia Ltd. and the Union Bank of Australia Ltd.), The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd., The Commercial Banking Company of Sydney Ltd., The English, Scottish and Australian Bank Ltd. and The National Bank of Australasia Ltd. (which has absorbed The Queensland National Bank Ltd. and The Ballarat Banking Co. Ltd.).
- (e) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three oversea banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and oversea countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks, and the other cheque-paying banks included in the fifth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. *Banks Transacting Business in Australia.*—(i) *Number of Branches.* At 30th June, 1963, the 15 banks operating in Australia transacted all classes of banking business at 4,118 branches and 1,661 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout Australia. The Rural Bank of New South Wales, the State Bank of South Australia, and The Rural and Industries Bank of Western Australia, being State Government banks, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd. transacts business only in Brisbane. The remaining three banks are branches of oversea banks.

(a) At various balance sheet dates during 1963. (b) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the *Commonwealth Banks Act 1959*. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the bank for capital purposes. (c) Includes dividends declared but not paid at date of balance-sheet. (d) For the Commonwealth Trading Bank and the State banks, the amount shown in this column is total capital and reserves. (See footnote (b).) (e) For the State Government banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other banks, the net profit is the profit before writing off bank premises. (f) Dividends paid and payable out of profits earned during 1962-63. (g) Reserve liability of shareholders, £1,750,000. (h) Uncalled capital £2,700,000. (i) This Bank was in process of liquidation consequent upon the amalgamation of its business with the National Bank of Australasia Ltd.

5. The Reserve Bank of Australia.—(i) *General.* The Reserve Bank of Australia, established under the *Reserve Bank Act 1959*, which came into operation on 14th January, 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that bank is given in earlier issues of the Official Year Book (see No. 37, pp. 570 to 572, and No. 45, pp. 735 to 737).

The general functions of the Reserve Bank are set out in Section 10 of the *Reserve Bank Act 1959*, which states:—

“ It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia and that the powers of the Bank under this Act, the *Banking Act 1959*, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

- (a) the stability of the currency of Australia;
- (b) the maintenance of full employment in Australia; and
- (c) the economic prosperity and welfare of the people of Australia.”

In addition to its functions as a Central Bank, the bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as banker to the Commonwealth and some of the States.

Prior to its reconstitution as the Reserve Bank, the Commonwealth Bank also provided general banking facilities through a General Banking Division up to 3rd December, 1953, when that business was taken over by the Commonwealth Trading Bank, and special banking facilities through the Mortgage Bank and Industrial Finance Departments. In addition, the Board of the Commonwealth Bank was responsible for the policy and administration of the Commonwealth Trading Bank and Commonwealth Savings Bank. On 14th January, 1960, on its reconstitution as the Reserve Bank, the Mortgage Bank and Industrial Finance Departments were amalgamated to form the Commonwealth Development Bank, and that institution, together with the Commonwealth Trading Bank and the Commonwealth Savings Bank, was placed under the control of the Commonwealth Banking Corporation, an organization established under the *Commonwealth Banks Act 1959* and entirely separate from the Reserve Bank.

(ii) *Management.* The Commonwealth Bank was managed between 1911 and 1924 by a Governor, from 1924 to August, 1945, by a Board of Directors, from August, 1945, to August, 1951, by a Governor, assisted by an Advisory Council, and since August, 1951, by a Board of Directors.

Under the provisions of the *Reserve Bank Act 1959*, the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The Bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

(iii) *Central Banking Business.* Under the powers it possessed under the *Commonwealth Bank Act 1911-1943* and under its war-time powers under the National Security Regulations, the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III. of the *Commonwealth Bank Act 1945* formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the *Reserve Bank Act 1959*, the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14th January, 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

(iv) *Note Issue Department.* The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the *Reserve Bank Act 1959*. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the *Reserve Bank Act 1959*, the profits of the Note Issue Department are paid to the Commonwealth.

(v) *Rural Credits Department.* The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the *Reserve Bank Act 1959*. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the *Reserve Bank Act 1959*, the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14th January, 1960, and £2,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one half shall be placed to the credit of the Rural Credits Department Reserve Fund and (b) one half shall be placed to the credit of the Rural Credits Development Fund.

(vi) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Reserve Bank at 30th June, 1963, are shown in the following table.

(a) Prior to 14th January, 1960, Commonwealth Bank of Australia.

6. The Commonwealth Banking Corporation.—(i) *General.* The Commonwealth Banking Corporation was established under the *Commonwealth Banks Act 1959* and came into being on the 14th January, 1960. The Corporation is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. The general functions of the corporation are set out in Section 9 of the *Commonwealth Banks Act 1959* which states:

“ It is the duty of the Board, within the limits of its powers, to ensure that the policy of the Trading Bank, of the Savings Bank and of the Development Bank are directed to the greatest advantage of the people of Australia and have due regard to the stability and balanced development of the Australian economy.”

Under the *Banking Act 1959*, the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

(ii) *Management.* The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board, the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

In paras. 7 and 8 following, details are given of the assets and liabilities of the Commonwealth Development Bank and the Commonwealth Trading Bank. Details for the Commonwealth Savings Bank are shown in § 2 of this division, pages 856-8.

7. Commonwealth Development Bank of Australia.—(i) *General.* The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act 1959* and commenced operations on 14th January, 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act, the Bank is authorized to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation, and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14th January, 1960, £5,000,000 provided by the Reserve Bank, £10,000,000 provided by the Commonwealth Government in the 1961–62 Budget and £5,000,000 in the 1963–64 Budget, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Development Bank at 30th June, 1963, are shown in the following table.

(a) Prior to 14th January, 1960, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank of Australia.

(iv) *Profits.* The net profit of the Commonwealth Development Bank for the year ended 30th June, 1963, was £890,675. The net profit was appropriated to the Commonwealth Development Bank Reserve Fund.

8. **The Commonwealth Trading Bank of Australia.**—(i) *General.* The Commonwealth Trading Bank of Australia was established by the *Commonwealth Bank Act 1953* and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. It was managed by a General Manager under the Governor of the Commonwealth Bank and its policy was determined by the Board of that Bank. Under the provisions of the *Commonwealth Banks Act 1959*, which came into operation on 14th January, 1960, the Commonwealth Trading Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation. The Commonwealth Trading Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation. The capital of the Commonwealth Trading Bank is the capital of the Commonwealth Trading Bank immediately prior to 14th January, 1960, £2,000,000 provided by the Reserve Bank, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund. Under the Act, the Bank is liable for income taxes. The net profits of the Bank, after provision for taxation, are divided as follows:— (a) one-half shall be placed to the credit of the Commonwealth Trading Bank Reserve Fund and (b) one-half shall be paid to the Commonwealth.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1963, are shown in the following table.

**COMMONWEALTH TRADING BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE, 1963**

(a) Includes Territories of Papua and New Guinea. (b) Prior to July, 1962, seasonal securities. (c) Prior to 14th January, 1960, special account with Commonwealth Bank. (d) Includes notes, cheques and bills of other banks. (e) Excludes loans to authorized dealers in short-term money market. (f) Includes local government and semi-governmental securities.

(iv) *Profits.* The net profits (after writing off bank premises, £131,390 in 1962 and £146,580 in 1963) of the Commonwealth Trading Bank for the years ended 30th June, 1962 and 1963, were £726,418 and £917,820 respectively. These net profits were distributed one half to the Commonwealth and one half to the Commonwealth Trading Bank Reserve Fund.

9. *Private Trading Banks—Average Liabilities and Assets in Australia.*—The average liabilities and assets within Australia (excluding capital and contingencies) of the Private Trading Banks (see p. 831 for list of banks) for the years 1958-59 to 1962-63 are shown in the following tables.

14. Classification of Bank Deposits within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—A classification of bank deposits (excluding deposits of Commonwealth and State Governments) of the Commonwealth and Private Trading Banks for June, 1960, to July, 1963, is given in the following table. The classification is similar to that used for advances (for details see page 843).

**COMMONWEALTH TRADING BANK OF AUSTRALIA AND PRIVATE TRADING BANKS (MAJOR TRADING BANKS): CLASSIFICATION OF DEPOSITS(a) WITHIN AUSTRALIA(b): AMOUNT AND PROPORTION OF EACH CLASS TO TOTAL**

1962–63 .. ..	3.6	1.8	19.7	11.1	55.7	62.7	37.3

(a) Includes Territories of Papua and New Guinea. (b) Based on averages of assets and liabilities for the years shown. (c) Coin, bullion, notes and cash with Reserve Bank on current account. (d) Prior to July, 1962, seasonal securities.

13. Classification of Advances within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—(i) *States, July, 1963.* A classification of bank advances of the Commonwealth and Private Trading Banks outstanding at 10th July, 1963, is shown in the following table.

Resident borrowers cover institutions (including branches of overseas institutions) engaged in business in Australia and persons permanently residing in Australia. Non-resident borrowers cover all other persons and institutions incorporated abroad, which, though represented, do not carry on business in Australia. Advances to resident borrowers have been classified as business advances, advances to public authorities, personal advances and advances to non-profit organizations. Business advances have been further classified to the main industry of the borrower and include advances to partnerships, companies and other institutions engaged in business in Australia, advances to persons actively engaged in business on their own behalf if the advance is mainly for business purposes, advances to mutual, co-operative and benefit societies which distribute their profits or surpluses (if any) to members by way of dividends, rebates on charges for goods and services, or increased benefits. Advances to public authorities cover advances to local and semi-governmental authorities including separately constituted government business undertakings but not the Commonwealth or State Governments. Personal advances cover advances to persons for purposes other than carrying on a business. Advances to non-profit organizations cover advances to organizations which are not carried on for the purpose of making a profit or gain to individual members, any income of the organization being used for the purposes of the organization or for the benefit of the community.

-----------------------	----------------	--------------	----------------	--------------	----------------	--------------	----------------	--------------	--

(a) Excludes deposits of Commonwealth and State Governments. (b) Includes Territories of Papua and New Guinea. (c) Information for July, 1961, to 1963, was compiled uniformly by all banks as at the second Wednesday of these months. Information for earlier periods was not compiled at a uniform point of time but at various dates centring around the end of the month shown. (d) The combined deposits of these two groups are distributed over the industries above.

**DESIGNS FOR AUSTRALIAN DECIMAL COINS**

The following three pages (848-850) show the designs of the new coins which will be introduced in Australia when the decimal currency system comes into operation in February, 1966:—

Page 848 shows the effigy of Her Majesty the Queen which forms the obverse side of the new coins.

Page 849 shows the reverse side of the new coins.

Page 850 shows the actual size of the new coins and contains notes on designs and characteristics of the new coins.

Photographs by courtesy of Australian News  
and Information Bureau.

# DESIGNS FOR AUSTRALIAN DECIMAL COINS

OBVERSE DESIGN FOR ALL COINS  
(Mr. Arnold Machin, R.A. of London designed the Queen's effigy)

REVERSE DESIGNS. (Designer Mr. Stuart Devlin of Melbourne, who also prepared the lettering on the obverse inscription)

<i>Notes on designs and characteristics of new coins</i>	<i>Composition</i>	<i>Diameter (inches)</i>	<i>Weight (grains)</i>
Fifty-cents .. .. .	80% Silver 20% Copper	1.240	200
Twenty-cents .. .. .	Cupro-nickel (75% copper and 25% nickel)	1.122	174.6
Ten-cents .. .. .		0.929	87.3
Five-cents .. .. .		0.764	43.6
Two-cents .. .. .	97% copper 3% zinc and tin	0.850	80
One-cent .. .. .		0.690	40

*Reverse design*

The Australian Coat-of-Arms, which is supported by the kangaroo and the emu. The kangaroo is Australia's biggest marsupial, and one or other of the species are found in every part of the Continent; the doe, which can be four or five feet tall, gives birth to a "joey" which is only an inch or so long, and which completes its development in its mother's pouch. The emu is the second largest bird in the world—only the ostrich is bigger; before pushed back by settlement, the emu ranged all over Australia; the male bird incubates the eggs and takes care of the chickens when they hatch.

The platypus is one of the only two egg-laying mammals (the other is the echidna) and is found in the rivers and creeks of the Eastern side of the Continent; it is about the same size as the echidna and has webbed feet and rich short fur; it swims with the skill and dash of a seal.

The lyrebird on the 10-cent is the male of the species as it appears when dancing and singing, with its magnificent tail expanded and thrown forward over its head; it is a famous mimic; it is about the size of a pheasant, and inhabits dense damp forests from Southern Queensland to Victoria.

The echidna or spiny ant-eater is Australia's other egg-layer which suckles its young; like the hedgehog, it depends on its spines for protection, and rolls up into a tight ball when frightened; it is about 18 inches long and thrives in every part of Australia. A related species is found in New Guinea.

The frilled lizard is found only in the tropical north of Australia; it grows to about three feet in length—most of it tail; it is harmless but when cornered it presents a gaping hissing mouth in the middle of its brightly-coloured neck frill.

The feather-tail glider is the smallest of our gliding marsupials and glides by means of membranes along its sides; it is strictly nocturnal and is quite common in the forests of Eastern Australia; one of its bush nicknames—the "flying mouse"—gives an idea of its size.

The twenty-cent, ten-cent and five-cent coins will have the same weight and almost exactly the same diameter as the present florin, shilling and sixpence. The fifty-cent coin will be slightly larger than a penny (which has a diameter of 1.215 inches and a weight of 145.8 grains). The two-cent coin will have a diameter midway between those of the shilling (ten-cents) and sixpence (five-cents) and the one-cent coin a diameter between those of the sixpence and the threepence (which has a diameter of 0.635 inches and a weight of 21.8 grains).

(NOTE: The photograph above depicting the obverse design is an enlargement to 50-cent size of a photograph of an actual one-cent coin. The photographs of the reverse designs are at actual coin size and were taken from plaster models prepared by the designer.)

15. Advances and Fixed Deposits classified by Rate of Interest—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—(i) *Classification of Advances by Rate of Interest.* The following table shows the proportions of total advances at each rate of interest at the end of June, 1960, to June, 1963.

(a) Excludes term loans.

NOTE.—Up to 16th November, 1960, the maximum rate chargeable on advances, except advances against wool shipped from Australia, was 6 per cent. per annum, with the average rate of interest on all advances not exceeding 5½ per cent. per annum. On 17th November, 1960, the maximum rate chargeable on advances was increased to 7 per cent., but the average rate of interest on all advances was not to exceed 6 per cent. The maximum average rate requirement was discontinued on 13th April, 1962. The maximum rate chargeable on advances was reduced from 7 per cent. per annum to 6½ per cent. per annum on 1st April, 1963.

(ii) *Classification of Fixed Deposits by Rate of Interest.* The following table shows the proportions of total fixed deposits at each rate of interest at the end of June, 1961, to June, 1963.

16. **New and Increased Lending Commitments and Overdraft Limits—Commonwealth and Private Trading Banks (Major Trading Banks).**—Particulars of new and increased lending commitments and overdraft limits of the Commonwealth and Private Trading Banks are shown hereunder.

This series has been compiled from information supplied by the major trading banks as at the second Wednesday of each month. Prior to July, 1962, the series covered all new and increased lending commitments, entered into by banks, which required the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans were excluded. As from July, 1962, the series has been extended to include new commitments in respect of the term lending arrangements established in mid-April, 1962. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be obtained from this series (after deducting term loan component and adjusting the weekly averages to a monthly basis) in conjunction with that of overdraft limits shown in the following table. However, these derived figures should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series.

1962–63 ..	223,991	217,516	49,051	45,749	27,703	8,078	572,088

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

19. Debits to Customers' Accounts—Cheque-paying Banks.—Statistics of debits to customers' accounts have been collected since September, 1945. Generally, they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks (including the Rural Credits Department of the Reserve Bank and the Commonwealth Development Bank) are shown for each State for the years 1958–59 to 1962–63. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

**CHEQUE-PAYING BANKS: AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS**

20. Rates of Exchange.—(i) *Oversea Exchange Rates.* In the following table, the par of exchange (based on par values agreed with the International Monetary Fund) and average telegraphic transfer selling rates of exchange for Sydney on a number of oversea countries are shown. Generally, the averages, which are averages of daily quotations, are based on rates quoted by the Commonwealth Trading Bank. Where these were not available, rates used by the Department of Customs and Excise in converting import values to £A for purposes of calculating customs duty are shown.

(a) As at 30th June, 1963, established under International Monetary Fund Agreement. (b) On 1st January, 1963, the Markka was revalued on basis of 1 new Markka = 100 old Markkas. (c) No par value established. (d) Not a member of International Monetary Fund.

(ii) *Trading Bank Charges* As from October, 1962, the trading banks instituted a system of charges on current accounts, and abolished the interstate exchange rates obtaining prior to this date. Details of interstate exchange rates prior to October, 1962, may be found in Official Year Book No. 48, page 785.

Charges on current account comprise a basic maintenance fee, a ledger activity fee and a cheque collection fee, each calculated on a quarterly basis and debited as a composite item to accounts four times a year. Details of these charges are shown below.

**Quarterly Charge.**

(a) *Basic maintenance current account fee, 5s. quarterly (non-rebatable).*

(b) *Ledger activity fee.* Up to ½ folio (20 entries), 2s. 6d.; over ½ folio to 1 folio, 7s. 6d.; over 1 folio to 2 folios, £1; over 2 folios to 3 folios, £2 5s.; over 3 folios to 4 folios, £3 10s.; over 4 folios to 5 folios, £4 15s.; over 5 folios to 6 folios, £6; over 6 folios to 7 folios, £7; over 7 folios to 15 folios, £7 plus 17s. 6d. per folio or part thereof exceeding 7; over 15 folios to 35 folios, £14 plus 15s. per folio or part thereof exceeding 15; over 35 folios, £29 plus 10s. per folio or part thereof exceeding 35. Rebates will be allowed for minimum quarterly credit balances as follows:—£300, 1 free folio; £600, 2 free folios; £1,000, 3 free folios; £1,600, 4 free folios; £2,500, 5 free folios; thereafter 1 additional free folio for each £500 minimum credit balance. Where rebates are applicable, the number of free folios will be deducted before the activity fee is calculated.

(c) *Collection fee on cheques, etc., deposited.* Up to 20 cheques per quarter, free; 21 to 100, 5s. plus 2s. 6d. per ten cheques or part thereof exceeding 20; 101 to 500, £1 5s. plus 12s. 6d. per each 50 or part thereof exceeding 100; 501 to 1,000, £6 5s. plus £1 5s. for each 100 or part thereof exceeding 500; 1,001 to 10,000, £12 10s. plus £6 per each 500 or part thereof exceeding 1,000; 10,001 to 50,000, £120 plus £7 10s. per each 1,000 or part thereof exceeding 10,000; 50,001 to 100,000, £425 plus £25 per each 5,000 or part thereof exceeding 50,000; 100,001 to 150,000, £675 plus £40 per each 10,000 or part thereof exceeding 100,000; over 150,000, £875 plus £30 per each 20,000 or part thereof exceeding 150,000.

## § 2. Savings Banks

1. **General.**—For information as to the origin of savings banks in Australia and the facilities currently available, see Official Year Book No. 46, page 779 and earlier issues.

During 1962-63, a new savings bank, the Commercial Savings Bank of Australia Ltd., was established. This bank is associated with and operates from the same premises as the existing private trading bank. Savings banks operating at 30th June, 1963, were—the Commonwealth Savings Bank and the Australian and New Zealand Savings Bank Ltd. (in all

States and Territories within and without Australia), the Bank of Adelaide Savings Bank Ltd. (all States except Tasmania), the Commercial Savings Bank of Australia Ltd. and the E.S. and A. Savings Bank Ltd. (in all States and Territories within Australia), the C.B.C. Savings Bank Ltd. (in all States and in the Australian Capital Territory), The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Hobart Savings Bank and Launceston Bank for Savings.

All savings banks, including trustee savings banks, but not State savings banks, are subject to the *Banking Act* 1959. Details of this Act and the special provisions applying to savings banks are given in Official Year Book No. 46, pages 759–60.

2. **Commonwealth Savings Bank of Australia.**—The Commonwealth Savings Bank of Australia was established as a separate institution on 9th June, 1928, having functioned previously as a department of the Commonwealth Bank (for particulars of the origin of the Savings Bank Department and the extension of its services see Year Book No. 46, page 782, and earlier issues). It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The *Commonwealth Bank Act* 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the savings bank. This Commission was never appointed, and the *Commonwealth Bank Act* 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank. Under the provisions of the *Commonwealth Banks Act* 1959, which came into operation on 14th January, 1960, the Commonwealth Savings Bank was maintained in the same form, but was placed under the control of the Commonwealth Banking Corporation (see also para. 6, p. 836).

3. **State, Trustee and Private Savings Banks.**—(i) *State.* State savings banks at present operating (with date of establishment shown in parentheses) are: The State Savings Bank of Victoria (1841); The Savings Bank of South Australia (1848); The Rural and Industries Bank of Western Australia (1956).

(ii) *Trustee.* Two trustee savings banks, The Hobart Savings Bank and Launceston Bank for Savings, operate within Tasmania. These banks commenced business in 1845 and 1835 respectively.

(iii) *Private.* The Bank of New South Wales Savings Bank Ltd. and the Australia and New Zealand Savings Bank Ltd. commenced business on 19th January, 1956, the C.B.C. Savings Bank Ltd. on 16th July, 1956, the National Bank Savings Bank Ltd. on 29th September, 1961, the E.S. and A. Savings Bank Ltd. and the Bank of Adelaide Savings Bank Ltd. on 31st May, 1962, and The Commercial Savings Bank of Australia Ltd. on 25th July, 1962.

4. **Branches and Agencies.**—The number of branches and agencies in Australia of the various savings banks at 30th June, 1963, are given in the following table.

**ALL SAVINGS BANKS: NUMBER OF BRANCHES AND AGENCIES AT 30th JUNE, 1963**

Bank	Branches	Agencies
Commonwealth Savings Bank .. .. .	825	7,594
Australia and New Zealand Savings Bank Ltd. .. .. .	517	669
The Bank of Adelaide Savings Bank Ltd. .. .. .	85	90
Bank of New South Wales Savings Bank Ltd. .. .. .	788	2,985

(a) Excludes accumulated profits and profit and loss accounts. (b) Provisions for settlements under Savings Bank Amalgamation Agreements, £679,000 and Commonwealth of Australia, £686,000. Under the terms of the Savings Bank Amalgamation Agreements relating to the absorption of the State savings banks by the Commonwealth Bank, the profits of a Commonwealth Savings Bank in New South Wales, Queensland, Western Australia and Tasmania are equally divided between the Bank and the former controlling authorities in those States. (c) Includes Crédit Foncier Department. (d) Included in expenses. (e) Calculated at the net rate of United Kingdom income tax payable by the bank (after taking double taxation relief into account) on the gross amount of dividends, viz.:—Australia and New Zealand Savings Bank Ltd., 4s. 7d. in the £ on £201,000; United Kingdom income tax relief to shareholders is limited to this net rate. In addition to the taxes stated above, the Australia and New Zealand Savings Bank Ltd. deducted £32,000 of United Kingdom income tax in accordance with the provisions of the Finance (No. 2) Act 1945, which authorizes deduction of tax from dividends at the full standard rate of United Kingdom income tax (7s. 9d. in the £). (f) Gross dividend before deduction of United Kingdom income tax at the standard rate 7s. 9d. in the £. The gross return to shareholders based on the sum of United Kingdom income tax payable by the bank and recouped from shareholders and the net dividend was 8.417 per cent. The net return to shareholders based on the net dividend was 6.125 per cent. (g) Balancing dates as in 1963. (h) Dividends paid or payable out of profits earned during year.

7. Number of Operative Accounts.—The following table shows the number of operative savings bank accounts in existence at the end of June, 1962 and 1963. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

## ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS(a)

State or Territory	End of June—(b)	
	1962	1963
New South Wales .. .. .	3,323,975	3,562,105
Victoria .. .. .	2,984,223	3,202,956

1963..	173.9	212.4	150.2	206.2	135.2	156.2	118.8	125.7	180.5

(a) See footnote (b) to table in para. 7, p. 861.

10. **Cheque Accounts.**—At most savings banks, cheque accounts are available to non-profit organizations such as friendly, co-operative and charitable societies. Similar facilities are also available to other depositors at the State Savings Bank of Victoria and the Savings Bank of South Australia. Details of the transactions on these accounts during the year ended June, 1963 (excluding the Savings Bank of South Australia), together with the number of operative accounts and the amount on deposit at the end of June, 1963, were as follows:—deposits during the year, £505.9 million; withdrawals during the year £502.0 million; interest added during the year, £1.1 million; amount on deposit at end of year, £55.4 million; number of operative accounts at the end of year, 245,775. These figures are included in the statistics in previous paragraphs.

11. **School Banking.**—With the object of encouraging principles of thrift among children, agencies of the savings banks have been established at most of the schools throughout Australia. Particulars of operative accounts within Australia at the end of June, 1959 to 1963 appear below.

**SCHOOL SAVINGS BANKS: AUSTRALIA**

End of June—(a)	Number of school agencies	Number of operative accounts	Deposits	Deposits per operative account
			£	£
1959 .. .. .	8,856	1,050,742	7,479,254	7.1
1960 .. .. .	9,042	1,118,101	8,154,973	7.3
1961 .. .. .	9,225	1,165,516	8,658,753	7.4
1962 .. .. .	9,444	1,219,113	9,224,645	7.6
1963 .. .. .	9,551	1,254,632	9,665,287	7.7

(a) See footnote (b) to table in para. 7, p. 861.

12. **Assets.**—The assets within Australia of all savings banks at the end of June, 1962 and 1963 are shown in the following table. In the table in paragraph 5, pages 857-8, assets are shown at balance sheet dates which are not in June for some banks. In addition, the table on pages 857-8 excludes statistics for the Savings Bank Division of the Rural and Industries Bank of Western Australia, which are included in the table below.

**ALL SAVINGS BANKS: ASSETS WITHIN AUSTRALIA(a)**

<b>Friendly and other society accounts—</b>					
£1 to £2,000 .. .. .	3	3	3½	3½	3
£2,001 to £2,500 .. .. .	1½	1½	3½	3½	3
£2,501 to £3,000 .. .. .	1½	1½	1½	3½	3
£3,001 and over .. .. .	1½	1½	1½	2	1½

(a) Rates allowed by the Commonwealth Savings Bank, private savings banks and The State Savings Bank of Victoria. Trustee savings banks and The Savings Bank of South Australia allow slightly higher rates of interest. (b) No interest is payable on amounts in excess of the maximum amount shown.

15. War Savings and Savings Certificates.—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Year Book (see No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. The total value of war savings and savings certificates outstanding at 30th June in each of the last five years was:—1959, £10,633,000; 1960, £8,205,000; 1961, £5,989,000; 1962, £2,529,000; 1963, £1,796,000.

**REGISTERED BUILDING AND CO-OPERATIVE SOCIETIES**

**§ 1. Registered Building Societies**

1. Summary.—During 1960–61 and 1961–62, returns were received from 2,331 and 2,598 societies respectively, but the information was not exhaustive, as particulars regarding a number of organizations were not included. In the following table, general information is given relating to the societies in each State for the year 1961–62 and to the combined States for 1960–61.

**REGISTERED BUILDING SOCIETIES: SUMMARY**

<b>Total .. .. .</b>	<b>334,168</b>	<b>10,604</b>	<b>344,772</b>	<b>309,946</b>

(a) See footnote (a) to table above. (b) Includes advances on mortgages of terminating societies which are on a gross basis. Net advances may be derived by subtracting borrowing members' funds. See table above. (c) Includes statistics for Co-operative Housing Societies in Victoria.

## § 2. Co-operative Societies

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the *Co-operation Act, 1923-1954*. A summary of the business of all co-operative societies for the years 1961-62 or 1962 for all States except Western Australia is given in the following tables. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Insurance and Other Private Finance*, and issue No. 1, 1961-62 and 1962-63 contains details for 1960-61 or 1961.

## INSURANCE

## § 1. Introductory

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the *Marine Insurance Act 1909* defining the limits of marine insurance and regulating the terms of contracts, etc., the *Insurance Act 1932–1960* requiring the lodgment of deposits by insurance companies, and the *Life Insurance Act 1945–1961* generally regulating life insurance business in Australia. The *Marine Insurance Act 1909* and the *Insurance Act 1932–1960* have limited application, and, except for life insurance business, which is regulated by the *Life Insurance Act 1945–1961*, insurance business is conducted almost entirely under State laws.

2. **Insurance Act 1932–1960.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the *Life Insurance Act 1945–1961*, ceased to apply to life insurance business.

3. **Life Insurance Act 1945–1961.**—The objects of this Act are:—(a) to replace all State legislation on the subject of life insurance, except that relating to the life insurance operations of State insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945, and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Year Book No. 37, pages 595–7.

The provisions of the Act relating to the establishment of a Commonwealth Government Insurance Office were repealed under the *Life Insurance Act No. 94 of 1953*.

4. **Export Payments Insurance Corporation Act 1956.**—Details of the operations of the Export Payments Insurance Corporation set up under this Act may be found in § 5 of Chapter XIV. Oversea Trade (*see p. 518*).

5. **Deposits under Insurance Acts.**—Deposits lodged under the Insurance Acts at 30th June, 1963, totalled £14,814,708, comprising £1,812,950 held by the Commonwealth in respect of life insurance, and £12,983,738 held by the Commonwealth and £18,020 held by the State of New South Wales in respect of other forms of insurance. The deposits consisted of Commonwealth Government securities £8,318,703, United Kingdom Government securities £676,800, fixed deposits £21,120, bank guarantees and undertakings £3,805,000, corporation debentures and stock £1,077,310, titles and mortgages £863,775, and cash £52,000.

## § 2. Life Insurance

1. **General.**—Since 1947, returns lodged under the *Life Insurance Act 1945–1961* have been used to compile life insurance statistics. Except where otherwise indicated, the figures in the succeeding paragraphs refer only to Australian business. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

The information shown has been compiled from returns of life insurance business submitted in the financial years which ended during the year stated.

2. **Offices Transacting Business.**—The number of offices which transacted life insurance business in Australia during 1963 was 43, including 12 oversea companies. Of the 31 Australian offices, 6 are purely mutual, including one which transacts general business in respect of which share capital is used, 23 are public companies, and 2 are State Government institutions. Of the total offices, 30 transacted ordinary business only and the remainder both ordinary and industrial business. Where possible, ordinary, industrial and superannuation business have been kept separate in the following tables.

3. **Australian Business—Policies in Existence.**—In the following table, details of policies on the registers in each State and in the Australian Capital Territory are given for the year 1962.

LIFE INSURANCE: POLICIES EXISTING IN AUSTRALIA, 1962

(a) Prior to 1962, includes superannuation business.

(b) See footnote (a).

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their insurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life insurance business of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand), and the Australian business only of the other eleven overseas companies operating in Australia. For various reasons, several offices do not attempt the dissection of liabilities and assets according to type of business, and, therefore, the figures in the following tables relate to all types of business combined. Details of the total liabilities of life insurance offices for the year 1962 are given in the following table.

**ORDINARY, INDUSTRIAL AND SUPERANNUATION LIFE INSURANCE:

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.  
 (b) Includes Papua and New Guinea. (c) Includes the Northern Territory.

### § 3. Fire, Marine and General Insurance

1. **General.**—The following statistics, which are in respect of the Australian business of companies operating in Australia and State government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to fire brigades, commission and agents' charges, and expenses of management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The figures relate to selected items of statistics and are not construable as "Profit and Loss" statements or "Revenue Accounts".

In cases where the business is underwritten in one State and the risk is situated in another, the business is included in the State in which the policy was issued.

During 1962-63, revenue from premiums amounted to £225.6 million, and that from net interest on investments, etc., to £13.5 million, a total of £239.1 million. Expenditure on claims amounted to £139.7 million, contributions to fire brigades £5.8 million, commission and agents' charges £20.6 million, expenses of management £38.2 million, and taxation £6.9 million, a total of £211.2 million.

2. **States.**—The following table shows, for each State, the aggregate premium income less returns, rebates and bonuses, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1958-59 to 1962-63.

**FIRE, MARINE AND GENERAL INSURANCE: PREMIUMS AND CLAIMS**  
(£'000)

(a) Excludes workers' compensation insurance in coal-mining industry in New South Wales.

**NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA**

1. General.—Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Insurance and Other Private Finance* and in quarterly bulletins dealing with capital raisings (see NOTE at beginning of this chapter).

The statistics (the collection of which commenced in July, 1954) relate to capital raised by companies through issues of shares, and in the case of companies listed on stock exchanges, through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included. Totally unsecured loans are included in the case of listed companies, but are excluded in the case of unlisted companies.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of oversea companies, if incorporated in Australia, are included. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by Australian companies, capital raised in this way from Australian sources by oversea public companies through their Australian offices.

The following are explanatory notes relating to some of the items shown in the tables.

**New Money.** This is the net amount of cash transferred from the investing public to the companies. For this purpose, the "investing public" includes banks and life insurance companies (except when subscribing to issues by associated companies), and government and private superannuation funds, but excludes other government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow, the amount of new money is obtained by deducting from the total cash raised the "amount not involving a net transfer of funds from the investing public".

**Amounts not involving new money.** These amounts include cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the "investing public". Also included are amounts which, although subscribed by the "investing public" (i.e. subscribers other than "associated companies"), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the "investing public", and do not represent a net transfer of cash from the "investing public" to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

2. Companies Listed on Stock Exchanges.—Details of new capital raised through issues of shares, debentures, or registered notes, or through accepting deposits, are given in the following table for each of the years 1958–59 to 1962–63.

**LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c)**

(£ million)

(a) Includes preference shares. (b) Excludes deposits accepted by banks, insurance companies, pastoral companies and building societies, and loans to authorized dealers in the short-term money market. (c) Includes only loans which are secured by charges over the companies' entire assets. (d) Not available for publication. (e) Small share issues of less than £1,000 for which returns have not been collected have not been included in the industrial classification but are included in Total, All Industries.

## OVERSEA INVESTMENT BY PRIVATE INVESTORS

1. *General.*—A survey of Oversea Investment has been conducted since 1947-48 to obtain particulars of certain types of private capital flows to and from Australia. The survey, when supplemented by other information, provides statistics of oversea investment in companies in Australia and in Australian public authority securities domiciled in Australia, and statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the survey.

Certain types of private oversea investment are not included in the statistics which follow. Investment in real estate (except when made through companies), investment by means of bank deposits and advances, and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices—in this case, they are included in the figures of investment in branches or subsidiaries.

In some cases, the capital invested in a company in Australia may be received from a company in one oversea country even though the ultimate ownership and control of that capital may rest with a parent company in a second oversea country. In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital rather than from the country in which the parent company with ultimate ownership and control is domiciled. Income payable overseas is classified on a similar basis, i.e., it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in oversea countries into line with commitments in those countries, and are shown as a flow of investment between Australia and overseas in the table in para. 4, pp. 889-90. Similar considerations apply to oversea life insurance companies with branches in Australia.

The following are some explanatory notes relating to terms used in the tables.

*Overseas.* For the purpose of these statistics, "overseas" includes Papua and New Guinea.

*Companies.* In these statistics, the term "companies" relates to both incorporated and unincorporated businesses.

*Subsidiary.* For the purpose of these statistics, this term is applied to all companies in which there is a "direct" holding, irrespective of the degree of control, if any, which is actually exercised. A holding is treated as "direct" when there is ownership of 25 per cent. or more of a company's ordinary shares (or voting stock) by one company or a number of companies incorporated in one country, or ownership of 50 per cent. or more of a company's ordinary shares (or voting stock) by individuals or companies in one country.

*Portfolio Investment.* Investment in company shares, debentures, etc., other than direct investment in such securities of a subsidiary company.

*Unremitted profits.* For these statistics, this represents the net earnings of branches during the year after tax, less remittances by the branches to their home offices during the year of net earnings and interest (irrespective of the period to which the earnings and interest relate). "Net earnings" of Australian branches of oversea companies is, in general, based on the value of their income for taxation purposes.

*Undistributed profits.* This term refers, in the case of Australian "subsidiaries", to the equity of the oversea parent in the net earnings of the Australian company, less tax (or tax provision) and less dividends declared. "Net earnings" of Australian subsidiaries of oversea companies is, in general, based on the value of their income for taxation purposes. In the case of oversea subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

The annual bulletin *Insurance and Other Private Finance* and the *Annual Bulletin of Oversea Investment: Australia* contain additional figures relating to oversea investment, including a longer range of years covered, and also more detailed description of the figures.

2. Private Oversea Investment in Companies in Australia and Investment Income Payable Overseas by Companies in Australia.—The inflow of private overseas investment in companies in Australia since 1957-58, and a classification by country of origin, are shown in the following two tables.

**ANNUAL INFLOW OF PRIVATE OVERSEA INVESTMENT IN COMPANIES IN AUSTRALIA, BY TYPE OF COMPANY IN WHICH CAPITAL INVESTED(a)**  
(£A. million)

Year	Direct investment				Total direct investment	Portfolio investment (b)	Annual inflow of overseas investment in companies
	Australian branches		Australian subsidiaries				
	Unremitted profits	Other investment	Undistributed profits	Other investment			
1957-58 ..	4.6	5.8	38.8	47.4	96.6	7.9	104.5
1958-59 ..	11.6	9.5	51.7	32.8	105.6	19.7	125.3
1959-60 ..	9.5	21.7	59.2	69.3	159.7	33.6	193.3
1960-61 ..	2.8	24.7	54.8	105.4	187.7	48.4	236.1
1961-62 ..	2.2	25.5	27.6	48.0	103.3	37.1	140.4

(a) Increases in investment by some overseas investors are offset against withdrawals of investment by other overseas investors. (b) Partly estimated.

**ANNUAL INFLOW OF PRIVATE OVERSEA INVESTMENT IN COMPANIES IN AUSTRALIA, BY DOMICILE OF INVESTOR AND CATEGORY OF INVESTMENT(a)**  
(£A. million)

Year	United Kingdom	New Zealand	U.S.A. and Canada	Other	Annual inflow of overseas investment in companies

(a) Unremitted profits of Australian branches plus undistributed profits of Australian subsidiaries.

4. Net Annual Flow of Investment.—The net annual flow of investment between Australia and overseas, and its classification by country, are shown in the following two tables. Changes in classifications have been made to these tables in order to conform with the presentation in *The Australian Balance of Payments*, 1958-59 to 1962-63. The annual inflow of investment in Australian public authority debt domiciled overseas and net overseas remittances by the insurance companies have been incorporated into both tables.

NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEA COUNTRIES(a)

(£A. million)

Year	Annual inflow of investment	Annual outflow of investment	Net annual flow of investment to Australia
1957-58 .. .. .	115.0	11.3	103.7
1958-59 .. .. .	155.6	15.8	139.8
1959-60 .. .. .	225.8	5.8	220.0
1960-61 .. .. .	245.6	4.6	241.0
1961-62 .. .. .	145.3	7.1	138.2

(a) Increases in investment by some investors are offset against withdrawals of investment by other investors.

## NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEA COUNTRIES, BY REGION

(£A. million)

Year	United Kingdom	New Zealand	U.S.A. and Canada	I.B.R.D. (a)	Other	Net annual flow of investment to Australia
1957-58 ..	47.2	2.5	36.0	13.2	4.8	103.7
1958-59 ..	79.2	-11.5	62.8	2.2	7.1	139.8
1959-60 ..	118.5	3.0	85.7	-7.2	20.0	220.0
1960-61 ..	110.5	0.1	102.1	-7.5	35.8	241.0
1961-62 ..	56.2	0.3	81.8	-7.9	7.8	138.2

(a) No particulars are available of the domicile of securities issued to the International Bank of Reconstruction and Development.

NOTE.—Minus sign (-) denotes outflow.

## UNIT TRUSTS, LAND TRUSTS, AND MUTUAL FUNDS

1. General.—Statistics relating to operations in Australia of unit trusts, land trusts and mutual funds have been collected quarterly since March, 1961, and are shown in the following tables. The figures do not include details of superannuation funds conducted by unit trusts management companies.

2. Transactions of Trusts and Funds.—Particulars of cash transactions in trust units and fund shares and of purchases and sales of investments by trusts and funds are given below.

## TRANSACTIONS OF TRUSTS AND FUNDS

(£ million)

Period	Cash transactions in respect of trust units and fund shares		Purchases and sales of investments(a)	
	Total amount received for trust units and fund shares issued (b)	Total amount paid for trust units and fund shares repurchased (c)	Purchases (d)	Sales (e)
Year ended—				
June, 1962 .. .. .	17.5	6.9	11.7	3.5
June, 1963 .. .. .	15.9	6.9	13.7	4.8
Quarter ended—				
September, 1962 .. .. .	4.1	1.3	3.8	0.8
December, 1962 .. .. .	3.7	1.8	4.1	1.7
March, 1963 .. .. .	3.3	2.1	2.9	1.3
June, 1963 .. .. .	4.8	1.7	2.9	1.0
September, 1963 .. .. .	4.2	2.0	4.1	1.3
December, 1963 .. .. .	6.3	2.6	4.1	1.2

(a) Commonwealth Government, local authority and semi-governmental securities, shares, debentures, unsecured notes, loans, deposits on term or notice of three months or longer, land and buildings, etc. (b) Includes re-issues and new issues. Includes fees and expenses. (c) Includes those units and fund shares intended for re-issue. (d) Payments for assets acquired during period. Includes brokerage and stamp duty. (e) Receipts for assets sold or redeemed during period. Excludes brokerage and stamp duty.

3. Analysis of Purchases and Sales of Investments.—Details of purchases and sales of investments by trusts and funds during 1961–62 and 1962–63 are given in the following table.

**ANALYSIS OF PURCHASES AND SALES OF INVESTMENTS BY TRUSTS AND FUNDS**

(£ million)

Year	Shares (including preference shares)	Debentures, unsecured notes, deposits (a)	Common- wealth Government, local authority, and semi- governmental securities	Other (b)	Total
<b>PURCHASES</b>					
1961–62 .. .. .	9.1	1.4	0.1	1.1	11.7
1962–63 .. .. .	9.5	2.6	0.1	1.5	13.7
<b>SALES</b>					
1961–62 .. .. .	2.7	0.2	0.2	0.4	3.5
1962–63 .. .. .	3.2	0.3	0.3	1.0	4.8

(a) Excludes cash on hand and at bank, loans to authorized dealers in the short-term money market, and other deposits under three months term or notice. (b) Includes land and buildings, mortgages on land and buildings, and other investments.

4. Market Value of Trusts and Funds, and Cash and Short-term Deposits of Trusts and Funds.—The total market value of trusts and funds and the cash and short-term deposits of trusts and funds are shown in the following table.

**TOTAL MARKET VALUE OF TRUSTS AND FUNDS, AND CASH AND SHORT-TERM DEPOSITS OF TRUSTS AND FUNDS**

(£ million)

At—	Total market value of trusts and funds(a)	Cash and short-term deposits		
		Cash(b)	Short-term deposits(c)	Total
30th June, 1961 .. .. .	84.0	0.6	3.2	3.8
30th June, 1962 .. .. .	91.8	0.6	3.6	4.2
30th September, 1962 .. .. .	93.6	1.1	2.6	3.7

## SHORT-TERM MONEY MARKET

1. **General.**—For some years prior to 1959, leading stockbrokers had been actively engaged in the acceptance of short-term funds against the security of government securities, but their operations were limited by the absence of suitable short-term securities and their liquidity requirements,

In February, 1959, the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorized dealers in the short-term money market.

The form of organization so far developed consists of several companies authorized to act as dealers in the market. These dealers accept loans overnight, at call or for fixed periods in amounts of at least £25,000, and invest the funds in "money market securities", which have been defined as Commonwealth Government securities with currencies not exceeding three years.

Dealers are required to provide for a minimum capitalization and, in addition, to lodge with the Bank part of their capital in the form of money market securities as general backing for their operations. These lodgments, which are referred to as "margins", are required to be equivalent on market values to at least:—(a) one per cent. of the total holdings by the dealer of securities maturing in one year; (b) two per cent. of the total holdings by the dealer of securities maturing within one to two years; and (c) four per cent. of the total holdings by the dealer of securities maturing within two to three years.

The Bank approves for each dealer the maximum portfolio of money market securities which may be carried and establishes a line of credit in favour of the dealer to the extent of that approved maximum portfolio. Under the line of credit, which is subject to renewal from time to time, the dealer may in the last resort borrow from the Bank against lodgment of security.

Any discrepancies between totals and sums of components in the tables on page 894 are due to rounding.

2. **Selected Assets and Liabilities of Authorized Dealers and Rates of Interest on Loans Accepted.**—In the following table, details of selected assets and liabilities of authorized dealers and the interest rates on loans accepted by dealers are given for June, 1959 to 1962, and for each month January to December, 1963.

**SHORT-TERM MONEY MARKET: SELECTED ASSETS AND  
LIABILITIES OF AUTHORIZED DEALERS**

(a) Compiled from returns supplied by authorized dealers in the short-term money market. Liabilities to Reserve Bank as lender of last resort are excluded.

FRIENDLY SOCIETIES

1. General.—The total membership of friendly societies in Australia is about 430,000, but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowance is made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. Societies, Members and Revenue.—The following table sets out the number of societies, members, etc., revenue and expenditure, and funds of registered societies for the year. More detailed information is available in the bulletin *Insurance and Other Private Finance*, and issue No. 1, 1961-62 and 1962-63, contained particulars for the years 1960-61 and 1961-62.

## LOTTERIES AND BETTING

## § 1. Lotteries

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersall Lotteries are operated under government licence in Victoria. Tasmanian Lotteries were operated under government licence until 30th September, 1961, when they surrendered their licence. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc. For information as to the origin, purpose and method of payment of proceeds or taxes to State revenues *see* Year Book No. 46, page 808 and earlier issues.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State Government revenues, relating to lotteries drawn during each of the years 1958-59 to 1962-1963, are given in the following table.

**LOTTERIES: VALUE OF TICKET SALES, PRIZES ALLOTTED, TAXES PAID

## PENSION AND SUPERANNUATION SCHEMES

### § 1. Government, Local Government and Semi-governmental Pension and Superannuation Schemes

1. General.—The Commonwealth and all State Governments have established pension and superannuation schemes for their employees. These schemes are operated through funds to which both the Governments and the employees make contributions.

Employees of local government and semi-governmental authorities are covered either by the Commonwealth and State Government schemes or by a separate scheme of the authority which is operated either through a separately constituted fund or through a life insurance office.

2. Schemes operated through Separately Constituted Funds.—In the table on page 898, particulars cover the following funds and authorities.

- (i) *Commonwealth.* The Superannuation Fund; Defence Forces Retirement Benefits Fund; Cable Pension Funds (Various); Commonwealth Hostels Provident Fund.
- (ii) *New South Wales.* The State Superannuation Fund; Government Railways Superannuation Fund; Police Superannuation and Reward Fund; State Government Non-contributory Pensions and Gratuities; Metropolitan Meat Industry Board—Officers' Endowment Fund and Wage Employees' Provident Fund; Local Government Provident Fund; Local Government Superannuation Board—Management Fund.
- (iii) *Victoria.* The State Superannuation Fund; Police Pensions and Police Superannuation Fund; Melbourne Harbor Trust Superannuation Fund; Geelong Harbor Trust Superannuation Fund; Melbourne and Metropolitan Board of Works Superannuation Fund; State Electricity Commission Provident Fund; Country Fire Authority Superannuation Fund; Gas and Fuel Corporation Superannuation Fund; Melbourne University Provident Fund; Port Phillip Pilots Sick and Superannuation Fund; Married Women Teachers Pensions Fund; Local Authorities Superannuation Fund; Metropolitan Fire Brigades Board Superannuation Fund; City of Melbourne Officers Superannuation Fund; Samuel Gillott Provident Fund; State Savings Bank Provident Fund.
- (iv) *Queensland.* The Public Service Superannuation Fund; The Public Service Superannuation Additional Benefits Fund; Railways Superannuation Fund; Police Superannuation Fund.

- (v) *South Australia.* The State Superannuation Fund; Police Pensions Fund; Electricity Trust of South Australia—Superannuation Scheme and Retiring Gratuities for Wages Employees Scheme; University of Adelaide—Personal Superannuation Recumulation Account, Ancillary Staff Superannuation Fund and Invalidity Scheme Fund; Mount Barker Soldiers Memorial Hospital Fund; St. Margaret's Convalescent Hospital Fund; Whyalla Hospital Fund; and Schemes operated by Adelaide City Council, District Council of Yorke Peninsula, Walkerville City Council, and Mitcham City Council.
- (vi) *Western Australia.* The State Superannuation Fund, Provident Fund and Non-contributory Funds; Metropolitan (Perth) Passenger Transport Trust Provident Fund; State Electricity Commission—Electricity and Gas Department—Superannuation Fund; Western Australian Fire Brigades Board Superannuation Fund; University of Western Australia Superannuation Scheme; City of Nedlands Superannuation Fund; The City of Perth Superannuation Fund.
- (vii) *Tasmania.* The State Public Service Fund; Public Service "Old" Fund; State Teachers Superannuation Fund; Police Provident Fund; Hobart and Launceston Marine Boards Superannuation Funds; Metropolitan Transport Trust (Hobart) Employees Retiring Allowance Fund; University of Tasmania Superannuation Fund and Invalidity Pensions Fund.

For details of approved authorities contributing to the State Superannuation Funds see annual *Insurance and Other Private Finance* Bulletin, 1961-62 and 1962-63.

## § 2. Parliamentary Pension and Superannuation Schemes

Pensions and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pages 91 to 99 of Year Book No. 38. Details of the Tasmanian scheme are given on page 72 of Year Book No. 44. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or State Governments contribute.

#### § 4. Private Superannuation, Pension and Retiring Allowance Schemes

1. General.—In this section, details are given of the results of a survey of private superannuation, pension and retiring allowance schemes conducted by private businesses, for the benefit of their employees, during the year ended June, 1962, or the accounting period nearest to that year. Similar surveys were conducted in 1955-56 and 1960-61.

Separate information was requested for the following:—

- (a) Schemes operated through life insurance offices, friendly societies, unit trusts, etc.;
- (b) Superannuation, pension and retiring allowance funds; and
- (c) Direct payments by the employer of pensions and/or retiring allowances.

The survey was based upon a sample of all businesses with a payroll of over approximately £860 a month. Commonwealth Government airlines and banks were included, if contributing to their own separate funds rather than to State or Commonwealth superannuation funds, but other government businesses were excluded. Also excluded were rural industries, private and domestic services and statutory coal miners' pension funds.

The figures shown in this statement are estimates for the whole field from which the sample was drawn. Some indication of the extent of the field surveyed is given by the fact that the figures relate to approximately 78 per cent. of all employees in private employment, excluding those employed in rural industries and private and domestic services.

2. **Types of Private Superannuation, Pension and Retiring Allowance Schemes.**—The survey showed that some type of scheme was operated by 54 per cent. of businesses (State branches and subsidiary companies being treated as separate businesses). Ninety-three per cent. of large businesses (monthly pay-roll over £20,000) operated schemes; 72 per cent. of medium businesses (monthly pay-roll £3,000 to £20,000); and 44 per cent. of small businesses (monthly pay-roll £860 to £3,000). Of the businesses which operated schemes, 62 per cent. operated a life insurance scheme but no superannuation, etc., fund; 18 per cent. operated both a life insurance scheme and superannuation, etc., fund; 19 per cent. operated a superannuation, etc., fund but no life insurance scheme; and one per cent. operated only direct payments. The percentage of businesses using a life insurance scheme without a superannuation, etc., scheme was greater among small businesses than among large.

3. **Financial Operations of Private Superannuation, Pension and Retiring Allowance Schemes.**—(i) *Operated through Life Insurance Offices, etc.* The following table shows details of the contributions to these schemes during 1961–62, together with comparative information for previous surveys.

**PRIVATE SUPERANNUATION, ETC. SCHEMES OPERATED THROUGH LIFE INSURANCE OFFICES, ETC.(a): AMOUNTS CONTRIBUTED**

(£ million)

Year	Contributions		
	Employee	Employer	Total
1955–56 .. .. .	6.4	9.9	16.3
1960–61 .. .. .	10.1	16.7	26.8
1961–62 .. .. .	10.7	17.4	28.1

(a) Includes schemes operated partly through life insurance offices, etc.

In 1961–62 the average contributions per employee covered by these schemes were:—by employees £43.3; by employers, £70.8; total, £114.1. Of the amounts contributed, employees paid 38 per cent. in 1961–62 (38 per cent. in 1960–61 and 39 per cent. in 1955–56), and employers 62 per cent. in 1961–62 (62 per cent. in 1960–61 and 61 per cent. in 1955–56).

(ii) *Superannuation, Pension and Retiring Allowance Funds.* (a) *Income and Expenditure.* The following table shows particulars of the income and expenditure of these funds during 1961–62 together with comparative information for previous surveys.

**SUPERANNUATION, PENSION AND RETIRING ALLOWANCE FUNDS:  
INCOME AND EXPENDITURE**

(£ million)

Year	Income				Expenditure			
	Contributions		Other	Total	Pensions paid	Lump sum payments	Other (a)	Total
	Em- ployee	Em- ployer						
1955–56 .. .. .	5.8	13.2	7.5	26.5	2.6	n.a.	n.a.	7.0
1960–61 .. .. .	10.2	20.8	17.8	48.8	4.4	7.7	1.9	14.0
1961–62 .. .. .	12.0	24.3	21.6	57.9	5.2	9.4	2.6	17.2

(a) Includes administrative expenses payable from funds, loss on sale of investments, life insurance premiums paid, etc.

In 1961-62, the average contributions per employee covered by these schemes were:— by employees, £47.1; by employers, £95.5; total, £142.6. Of the total income in 1961-62, employee contributions constituted 21 per cent., employer contributions 42 per cent., and other income 37 per cent. Corresponding percentages were 21, 43 and 36 in 1960-61; and 22, 50 and 28 in 1955-56.

(b) *Assets of Funds.* In 1961-62, the assets of superannuation, pension and retiring allowance funds totalled £334.7 million. Liabilities to sundry creditors amounted to £2.5 million, leaving £332.2 million as the amount of funds in existence at the end of 1961-62. The composition of the assets is shown below, together with comparative information for previous surveys.

**BOOK VALUE OF SUPERANNUATION, PENSION AND RETIRING ALLOWANCE FUNDS, BY TYPE OF ASSET**

(Per cent.)

Survey	Cash and bank balances	Commonwealth Government securities	Local government and semi-governmental securities	Shares in companies, debentures, loans, etc.	Other	Total
1955-56.. ..	8	30	25	24	13	100
1960-61.. ..	3	r 16	r 25	46	10	100
1961-62.. ..	2	16	25	47	10	100

(iii) *Direct Payments of Pensions and, or, Retiring Allowances by the Employer.* Some businesses make direct payments of pensions and retiring allowances, either instead of, or in addition to, operating a scheme through a life insurance office, or a superannuation, pension and retiring allowance fund. In 1961-62, 10,400 direct payments of pensions were made, totalling £2.9 million, and 4,000 retiring allowances were paid, totalling £2.3 million. Payments per head of recipient in 1961-62 were:—Pensions, £278; retiring allowances, £565. Corresponding figures in 1960-61 were £275 and £657, and in 1955-56, £221 and £632.

4. *Self-employed and Other Superannuation and Retirement Schemes.*—A survey of self-employed and other superannuation and retirement schemes carried out in respect of 1960-61 was not repeated for 1961-62. Details of the 1960-61 results may be found in Year Book No. 49, page 912.

**INSTALMENT CREDIT FOR RETAIL SALES**

1. *General.*—Information relating to instalment credit for retail sales in Australia is given in the following tables. Information in more detail may be found in the annual bulletin *Insurance and Other Private Finance* and in the monthly and quarterly statements relating to instalment credit for retail sales issued by this Bureau (*see NOTE* at beginning of this chapter).

The statistics cover operations of all types of instalment credit schemes which relate primarily to the financing of retail sales of goods, whether the credit is advanced by a retail business or by a non-retail finance business. In general, the term "instalment credit" is defined as relating to schemes in which repayment is made by regular pre-determined instalments. Types of schemes covered include hire purchase, time payment, budget account, and personal loan schemes which relate primarily to the financing of retail sales of goods. In these statistics, the term "retail sales" relates not only to retail sales by retail establishments coming within the scope of the Censuses of Retail Establishments conducted periodically by this Bureau, but includes also other sales of goods to final purchasers (e.g. plant and machinery).

Since the previous issue of this Year Book, as a result of the Census of Retail Establishments and Other Services, 1961-62, revisions have been made to the statistics relating to the financing of retail sales of goods by retail businesses. In addition, revisions to data for both non-retail finance businesses and retail businesses have been necessary as a result of the reclassification of certain businesses formerly classified as retail businesses but now classified as non-retail finance businesses. The figures in the tables in the following paragraphs incorporate these revisions.

Any discrepancies between totals and sums of components in the tables on pages 904-6 are due to rounding.

2. New Retail Agreements.—Details of amount financed on new retail agreements in the years 1958-59 to 1962-63 are given in the following tables.

**INSTALMENT CREDIT FOR RETAIL SALES: AMOUNT FINANCED<sup>(a)</sup> ON NEW AGREEMENTS BY RETAIL BUSINESSES AND NON-RETAIL FINANCE BUSINESSES**

## CHAPTER XXII

### PUBLIC FINANCE

**NOTE.**—The subject of Public Finance is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States' Securities existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of such securities. In view of this, it is convenient to deal with the Commonwealth and State Government Securities on Issue in a separate division of this chapter (p. 951).

The subject of income taxes is also dealt with in a separate division at the end of this chapter.

For further detailed information on the subjects covered by this chapter, *see* the annual bulletins *Commonwealth Finance; State, Territories, and Local Government Authorities' Finance and Government Securities;* and *Commonwealth Taxation* published by this Bureau. Current information in summarized form is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*.

#### COMMONWEALTH FINANCE

##### § 1. Financial Provisions of the Constitution

The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Year Book, and on pages 924–32 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The *Audit Act 1901–1961* lays down the procedure which must be followed in accounting for the receipt and disbursement of public funds. The general administration of Commonwealth finances is the responsibility of the Treasurer of the Commonwealth.

##### § 2. Commonwealth Public Account

1. **Nature of Account.**—The Commonwealth Public Account includes the Consolidated Revenue Fund, the Trust Fund and the Loan Fund. Ordinary revenues from taxation and other sources are paid into the Consolidated Revenue Fund, from which the main expenditures are for defence, war and repatriation services, social services, payments to the States, Commonwealth business undertakings (mostly postal, telephone and telegraph) and administration. The Trust Fund covers special transactions outside the ordinary operations of departmental expenditures, such as pension funds and moneys held for expenditure by the Commonwealth at some future time. The Loan Fund receives its funds from the sale of Commonwealth securities, and expenditures from the Fund are made in accordance with the purpose of issue of each loan. The main disbursements from the Loan Fund are to the States, either by way of distribution of the proceeds of loans raised by the Commonwealth on their behalf or in accordance with the provisions of the Commonwealth and State Housing Agreements, and the remaining disbursements are for Commonwealth purposes such as defence or war service land settlement.

2. **Summary of Receipts and Expenditure.**—A summary of transactions on the Commonwealth Public Account for 1962–63 and the four preceding years is given in the table which follows.

**COMMONWEALTH PUBLIC ACCOUNT: SUMMARY OF TRANSACTIONS**

### § 3. Commonwealth Consolidated Revenue Fund

#### REVENUE

1. Sources of Revenue.—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1958-59 to 1962-63. Taxation constitutes the main sources of Commonwealth revenue, accounting for 85.5 per cent. in 1962-63.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: SOURCES OF REVENUE (£'000)

<b>Total .. ..</b>	<b>236,254</b>	<b>252,111</b>	<b>257,409</b>	<b>265,645</b>	<b>274,402</b>

(iv) *Other Taxation.* (a) *General.* Taxes other than customs and excise and the various export charges are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises a Head Office in Canberra, an office in each State assessing the returns of taxpayers whose interests are restricted to that State, and a Central Office situated in Melbourne assessing taxpayers whose interests are in more than one State.

For detailed statistics relating to Commonwealth income taxes, estate duty, gift duty and sales tax, see the annual bulletin *Commonwealth Taxation* issued by this Bureau.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or those for use in primary production. The most recent exemptions were those granted from 14th August, 1963.

A general rate of tax is levied on all goods other than those specified in the schedules to the *Sales Tax (Exemptions and Classifications) Act 1935-1963*. These schedules set out details of goods exempt from sales tax and those subject to special rates. The following are the general and special rates which operated from 7th August, 1952.

Period	General rate	Special rates
7th August, 1952, to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953, to 18th August, 1954 ..	12½ per cent. ..	16½ per cent.
19th August, 1954, to 14th March, 1956 ..	12½ per cent. ..	10 and 16½ per cent.
15th March, 1956, to 3rd September, 1957 ..	12½ per cent. ..	10, 16½, 25 and 30 per cent.
4th September, 1957, to 15th November, 1960 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
16th November, 1960, to 21st February, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 40 per cent.
22nd February, 1961, to 15th August, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
16th August, 1961, to 6th February, 1962 ..	12½ per cent. ..	2½, 16½, 25 and 30 per cent.
From 7th February, 1962 .. ..	12½ per cent. ..	2½, 22½ and 25 per cent.

Particulars of the net amount of sales tax payable and the sales of taxable and exempt goods in each State for 1962-63 are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on page 909 because the latter include some adjustments in respect of earlier tax years and relate to tax payable on returns lodged during the year, which in general cover sales for the period June to May.

(a) Includes Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole are shown in the following table for the years 1958-59 to 1962-63.

### SALES TAX AND AMOUNT OF SALES

(£'000)

Year				Net sales on which sales tax was payable	Sales of exempt goods by registered persons	Total sales of taxable and exempt goods	Sales tax payable
1958-59	..	..	..	890,293	2,152,026	3,042,319	143,296
1959-60	..	..	..	1,020,033	2,354,204	3,374,237	167,839
1960-61	..	..	..	1,040,552	2,447,126	3,487,678	171,584
1961-62	..	..	..	1,049,841	2,415,896	3,465,737	148,565
1962-63	..	..	..	1,151,338	2,627,091	3,778,429	157,132

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the *Sales Tax (Exemptions and Classifications) Act 1935-1963*. The figures shown do not represent the total sales of all commodities, as vendors trading only in exempt goods are not required to be registered, and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e., goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910-11 to 1951-52 on the unimproved value of land. It was abolished from 1st July, 1952.

(d) *Pay-roll Tax.* The *Pay-roll Tax Act 1941* and the *Pay-roll Tax Assessment Act 1941-1942* imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 a week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. However, the collections now form part of the general revenues of the Commonwealth. For particulars of the present method of financing the National Welfare Fund, out of which Child Endowment is paid, see para. 5, page 922. The exemption was increased to £80 a week (£4,160 per annum) from 1st October, 1953, to £120 a week (£6,240 per annum) from 1st September, 1954, and to £200 a week (£10,400 per annum) from 1st September, 1957. Employers whose export sales have increased above the annual average of export sales effected during a base period of two years ended 30th June, 1960, are entitled under the Commonwealth Government's export incentive scheme to a rebate of pay-roll tax of twelve and one half times the percentage increase in export sales.

(e) *Income Taxes.* Details of taxes on income are given in the division, Taxes on Income, at the end of this chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction scheme operated from 2nd December, 1950, until 17th November, 1951. For particulars, see Year Book No. 46, page 819.

(g) *Estate Duty.* Commonwealth Estate Duty was first levied in 1914. Under the *Estate Duty Assessment Act 1914-1963*, Estate Duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:— (a) where the whole of the estate passes to the widow, children (including adopted children, step-children and ex-nuptial children), or grand-children of the deceased, the sum of £10,000 decreasing by £1 for every £4 by which the value exceeds £10,000 and ceasing to apply at £50,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £5,000 decreasing by £1 for every £4 by which the value exceeds £5,000 and ceasing to apply at £25,000; and (c) where only part of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

An amendment to this Act, assented to on 20th November, 1957, provided for rebates of duty on estates which become liable for duty on two or more occasions within a period of five years.

The rates of duty levied under the *Estate Duty Act 1914-1941* increase as the value of the estate increases, as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over 27.9 per cent.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1957-58 to 1961-62, are given in the following table.

## ESTATE DUTY ASSESSMENTS

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Number of estates .. ..	13,599	11,794	13,978	14,196	16,449
Gross value assessed .. .. £'000	227,310	202,899	233,560	244,976	279,382
Deductions .. .. .. £'000	39,707	35,589	40,453	45,683	47,725
Statutory exemption .. .. £'000	30,492	26,555	31,597	33,051	37,180
Dutiable value .. .. .. £'000	157,111	140,755	161,510	166,241	194,477
Duty payable .. .. .. £'000	13,967	13,013	14,116	15,589	17,164
Average dutiable value .. .. £	11,553	11,934	11,555	11,710	11,823
Average duty per estate .. .. £	1,027	1,103	1,010	1,098	1,043

(h) *Gift Duty.* The *Gift Duty Act 1941-1947* and the *Gift Duty Assessment Act 1941-1957* impose a gift duty on all gifts made after 29th October, 1941. A gift has been defined as any disposition of property which is made otherwise than by will without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the *Gift Duty Act 1941-1947* and relate to the value of all gifts made by the donor within a period of eighteen months:—not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947, provides that gift duty shall not exceed one-half of the amount by which the value of the gift exceeds £2,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942, to 30th September, 1953. Details of rates are given in earlier issues of the Year Book (*see No. 40, pp. 672-3*).

(j) *Wool Levy.* The *Wool Tax Act 1936* and *Wool Tax Assessment Act 1936* provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Year Book. This levy was suspended from 1st July, 1946, until 30th June, 1952, while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The *Wool Tax Acts (Nos. 1 and 2)* of 1952 provided for the payment of a levy of four shillings a bale until 30th June, 1953, after which date the rate of tax could be varied within prescribed limits. There was no variation until 1st July, 1957, when the rate was increased to six shillings a bale. On 1st August, 1960, the rate prescribed was raised to seven shillings a bale which was retained until 28th August, 1961, when a rate of twelve shillings a bale was introduced. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1958-59, 1959-60, 1960-61, 1961-62 and 1962-63 were £1,389,000, £1,542,000, £1,655,000, £2,854,000 and £2,955,000 respectively.

(k) *Wool Contributory Charge.* The *Wool (Contributory Charge) Act 1945* and the *Wool (Contributory Charge) Assessment Act 1945* imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge and collections made were given in earlier issues of the Year Book (see No. 40, p. 675).

The various *Wool (Contributory Charge) Acts* were repealed by the *Wool Tax Assessment Act 1952* and the charge superseded by the wool levy.

(l) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the *Wheat Export Charge Acts 1946, 1948, 1952 and 1954* is contained in previous issues of the Year Book (see No. 40, p. 676, No. 41, p. 604 and No. 46, p. 820).

The *Wheat Export Charge Act 1958* repealed the *Wheat Export Charge Act 1954* and provided for an export charge on wheat and wheat products for the seasons 1958-59 to 1963-64 inclusive. The charge levied is the excess of the export price over the cost of production or 1s. 6d. per bushel whichever is the less. Under the *Wheat Industry Stabilization Act 1958*, to which the Wheat Export Charge is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production of up to 100 million bushels of wheat harvested each season exported from Australia. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £1,211,000 in 1958-59 and £1,000 in 1959-60, and were nil in the years 1960-61 to 1962-63.

The *Wheat Tax Act 1957* imposed a tax of  $\frac{1}{4}$ d. for each bushel of wheat—

- (a) which has been delivered to the Wheat Board on or after the first day of October, 1956, and before the date of commencement of the Act; or
- (b) which is delivered to the Wheat Board on or after that date.

The Act also provided that where, before the commencement of the Act, a person delivering to the Board wheat upon which tax is imposed by the Act authorized the Board to deduct an amount from the moneys payable to him and to pay the amounts so deducted to a person, authority or association for the purposes of soil fertility research or other research likely to benefit the wheat industry, and the Board did so, the tax otherwise payable upon that wheat is to be reduced by the amount so deducted.

The *Wheat Research Act 1957* provided for the establishment of a Wheat Research Trust Account to receive moneys payable under the *Wheat Act 1957*, and for the setting up of a Wheat Industry Research Council to direct the expenditure of moneys from that Trust Account for research, etc., to benefit the wheat industry.

Collections of Wheat Tax amounted to £207,000 in 1958–59, £187,000 in 1959–60, £261,000 in 1960–61, £234,000 in 1961–62 and £297,000 in 1962–63, and were paid to the Wheat Research Trust Account.

(m) *Miscellaneous Export Charges*. These consist of charges levied on exports of apples and pears (*Apple and Pear Export Charges Act 1938–1960*), canned fruits (*Canned Fruits Export Charges Act 1962–1963*), dairy produce (*Dairy Produce Export Charge Act 1924–1962*), dried fruits (*Dried Fruits Export Charges Act 1924–1929*), eggs (*Eggs Export Charges Act 1947*) and meat (*Meat Export Charges Act 1935–1954*), and on grapes used in the manufacture of wine (*Wine Grapes Charges Act 1929–1954*). The collections are paid into special funds to be applied, for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1958–59, £566,000; 1959–60, £540,000; 1960–61, £529,000; 1961–62, £618,000, and 1962–63, £826,000.

(n) *Stevedoring Industry Charge*. The *Stevedoring Industry Charge Act 1947* and the *Stevedoring Industry Charge Assessment Act 1947* imposed a charge of 4½d. a man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows:—11th October, 1949, a reduction to 2½d. a man-hour; 11th December, 1951, an increase to 4d. a man-hour; 28th October, 1952, an increase to 11d. a man-hour; 4th May, 1954, a reduction to 6d. a man-hour; 30th October, 1956, an increase to 1s. 7d. a man-hour; and from 21st May, 1957, an increase to 2s. a man-hour.

Further amendments under the Stevedoring Industry Charge Acts of 1958 and 1962 provided for an increase of the charge to 3s. a man-hour from 1st April, 1958 until 1st July, 1959, a reduction to 2s. 6d. a man-hour between 1st July, 1959 and 1st April, 1962, and an increase to 3s. 4d. a man-hour on or after 1st April, 1962.

Collections during the years 1958–59 to 1962–63 were as follows:—1958–59, £4,572,000; 1959–60, £3,717,000; 1960–61, £3,844,000; 1961–62, £3,433,000; and 1962–63, £4,493,000.

(o) *Tobacco Charge*. The *Tobacco Charge Acts* (Nos. 1, 2 and 3) 1955 and the *Tobacco Charges Assessment Act 1955*, which came into operation on 1st January, 1956, provided for charges on tobacco leaf grown in Australia.

The *Tobacco Charge Act* (No. 1) 1955 imposed a maximum charge of ½d. a pound on all Australian tobacco leaf sold to a manufacturer.

The *Tobacco Charge Act* (No. 2) 1955 imposed a charge at twice the rate to be levied under the *Tobacco Charge Act* (No. 1) on all Australian tobacco leaf purchased by a manufacturer.

The *Tobacco Charge Act* (No. 3) 1955 imposed a charge on all Australian tobacco leaf grown by a manufacturer and appropriated by him for manufacturing purposes. Where the manufacturer grew, in Australia, not less than nine-tenths of the tobacco leaf used by him in manufacturing, the charge was at the rate imposed by the *Tobacco Charge Act* (No. 1). In other cases, the charge was at twice that rate.

The charges collected under the *Tobacco Charges Assessment Act 1955* were paid into the Tobacco Industry Trust Account which was established by the *Tobacco Industry Act 1955*. Moneys in this account are used for the promotion of the tobacco industry.

Collections in 1958–59, 1959–60, 1960–61, 1961–62 and 1962–63 amounted to £72,000, £112,000, £136,000, £164,000 and £120,000 respectively.

(p) *Dairy Produce Levy*. The *Dairy Produce Levy Act 1958* imposed a levy on the manufacture of butter and cheese for the purpose of financing a research and sales promotion scheme for the dairy industry. The maximum rates of the levy are fixed at three-sixteenths of a penny a pound on butter and three-thirty-seconds of a penny on cheese. In 1958–59, 1959–60, 1960–61, 1961–62 and 1962–63, collections amounted to £151,000, £334,000, £350,000, £390,000 and £395,000, respectively.

(q) *Canning Fruit Charge*. The *Canning Fruit Charge Act 1959* imposed a levy on apricots, peaches and pears accepted by canneries as of canning quality or for use in the production of canned fruit, for the purpose of promoting the sale of Australian canned fruits both overseas and in Australia. The rate of the charge was ten shillings per ton of

fruit delivered to canneries or such lesser rate as may be prescribed from time to time. In 1959-60, 1960-61, 1961-62 and 1962-63, collections amounted to £35,000, £30,000, £45,000 and £71,000 respectively.

(r) *Cattle Slaughter Levy.* The *Cattle Slaughter Levy Act 1960* imposed a levy upon the slaughter of cattle for human consumption at rates to be prescribed from time to time but not exceeding two shillings per head of cattle slaughtered. The proceeds of this levy may be expended on purposes associated with scientific, economic, or technical research related to the raising of cattle or the production or distribution of beef and other products of the slaughter of cattle. In 1960-61, 1961-62 and 1962-63, collections amounted to £84,000, £210,000 and £406,000.

(s) *Honey Levy.* The *Honey Levy Act 1962* imposed a levy on honey sold for domestic consumption in Australia at the initial operative rate of one halfpenny a pound and provided for a maximum rate of one penny a pound. The proceeds of this levy may be expended on the regulation of Australian exports of honey and on associated promotional and research activities. In 1962-63, collections amounted to £3,000.

3. *Business Undertakings.*—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1958-59 to 1962-63 are given in the following table.

<b>Total .. .. .</b>	<b>4,811</b>	<b>5,147</b>	<b>6,149</b>	<b>6,222</b>	<b>6,937</b>

Further particulars to 1962-63 are given in Chapter XV. Transport and Communication (see pp. 573-4 and 576-7).

4. **Other Sources of Revenue.**—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1962-63 amounted to £7,732,000 (Australian Capital Territory, £5,625,000; Northern Territory, £2,105,000; Cocos (Keeling) Islands, £2,000). Of other sources of revenue, amounting to £65,995,000, the following are noteworthy:—interest, £22,153,000; defence, £4,409,000; net profit on Australian note issue, £12,780,000.

For details of the revenue of the Territories see Chapter V. of this Year Book.

## EXPENDITURE

1. **Details of Expenditure from Consolidated Revenue.**—The following table shows details of expenditure from the Consolidated Revenue Fund during the years 1958-59 to 1962-63.

COMMONWEALTH CONSOLIDATED REVENUE FUND: EXPENDITURE  
(£'000)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
<b>Debt charges(a)—</b>

<b>Per head of population .. .. .</b>	<b>£130.27</b>	<b>£141.50</b>	<b>£157.67</b>	<b>£154.78</b>	<b>£155.90</b>

(a) Excludes payments to or for the States under the Financial Agreement (see pp. 925-7).  
 (b) Redemption, conversion and loan management, etc., expenses. (c) Excludes Tuberculosis Benefits maintenance grants, included in Payments to or for the States—1958-59, £4,767,000; 1959-60, £4,299,000; 1960-61, £4,157,000; 1961-62, £4,314,000; 1962-63, £4,869,000.

Further details of the expenditure in each section are given in paragraphs 2 to 12 following.

2. Defence Services.—Details of the expenditure on defence services, including works and services, but excluding debt charges, etc., by the Departments of Defence, Navy, Army, Air and Supply are shown in the following table. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in overseas posts.

The figures represent the combined expenditures from Consolidated Revenue and Loan Funds for the years 1958–59 to 1962–63. In earlier issues of the Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure from this source on defence services in recent years.

**DEFENCE SERVICES(a): COMMONWEALTH EXPENDITURE FROM REVENUE AND LOAN FUNDS**

(a) Munitions stores, etc., supplied to the British Government and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations.

NOTE.—Minus sign (–) indicates excess of credits or repayments over expenditure.

4. Subsidies and Bounties.—The following table shows details of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers for the years 1958-59 to 1962-63. Expenditure on special relief such as drought, frost, flood and bush fire, etc., is not included here (included under items in tables, pp. 925-7), nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (see paragraph 11, p. 932). Payments to the States for Cattle Tick Control, Dairy Industry Extension and Agricultural Advisory Services are also not included under this heading, but under the heading Payments to or for the States (see para. 10, pp. 925-7).

Further information relating to assistance to primary producers is given in Chapter XXIII. Rural Industry. Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15, respectively, of Year Book No. 38.

**SUBSIDIES AND BOUNTIES: COMMONWEALTH EXPENDITURE**  
(£'000)

(a) Dairy products.

5. **National Welfare Fund.**—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax, and it became necessary to base the contribution on another formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the *National Welfare Fund Act 1943-1950*, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1958-59 to 1962-63. For a detailed account of the establishment of the National Welfare Fund, the services provided and the numbers and amounts of benefits paid, see Chapter XVI. Welfare Services.

**NATIONAL WELFARE FUND: RECEIPTS, EXPENDITURE AND BALANCES**  
(£'000)

Year	Income			Expenditure (a)	Balance in fund at end of year
	Contribution from Consolidated Revenue (a)	Interest on investments	Total (a)		
1958-59 .. .. .	278,227	1,977	280,204	278,227	198,997
1959-60 .. .. .	299,363	2,002	301,365	299,363	200,999
1960-61 .. .. .	330,604	2,017	332,621	330,604	203,016
1961-62 .. .. .	365,191	2,037	367,228	365,191	205,053
1962-63 .. .. .	379,295	2,059	381,354	379,294	207,113

(a) Includes Tuberculosis Benefits maintenance grants elsewhere included in Payments to or for the States—1958-59, £4,767,000; 1959-60, £4,299,000; 1960-61, £4,157,000; 1961-62, £4,314,000; 1962-63, £4 869 000

6. **Loan Consolidation and Investment Reserve Trust Account.**—The *Loan Consolidation and Investment Reserve Act 1955* established the Loan Consolidation and Investment Reserve Trust Account for the purpose of repurchase or redemption of securities on issue on account of the Commonwealth.

Payments from the Consolidated Revenue Fund were made as follows:—1958–59, £27,947,000; 1959–60, £41,382,000; 1960–61, £142,561,000; 1961–62, £22,155,000; and 1962–63, £26,378,000. Expenditure from the Trust Account on repurchase of securities was £100,046,000 in 1958–59; £79,885,000 in 1959–60; £30,899,000 in 1960–61; £67,847,000 in 1961–62; and £103,782,000 in 1962–63. The major portion of the balance of the Trust Account at 30th June, 1963, was invested in Commonwealth securities in special loans to finance Commonwealth and State works programmes.

7. **Business Undertakings.**—(i) *Postmaster-General's Department.* Details of the expenditure of this Department for the years 1958–59 to 1962–63 are given in the following table.

**POSTMASTER-GENERAL'S DEPARTMENT: EXPENDITURE**  
(£'000)

Additional details of the financial operations of the Commonwealth Railways to 1962–63 are given in Chapter XV. Transport and Communications (see p. 573–7).

8. Territories.—The following table shows the expenditure on account of Commonwealth Territories for the years 1958–59 to 1962–63. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the Northern Territory and the external territories. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in Chapter V. The Territories of Australia, of this Year Book.

**COMMONWEALTH TERRITORIES: EXPENDITURE**  
(£'000)

Territory	1958–59	1959–60	1960–61	1961–62	1962–63
Administration and maintenance of services—

(a) Excludes Railways, see para. 7 (iii), page 923.

9. Works and Services.—In the following table, details are given of Commonwealth expenditure on works and services during each of the years 1958–59 to 1962–63. The table covers expenditure on works and services made from the Consolidated Revenue Fund. In earlier issues of the Year Book, this table also covered expenditure from Trust and Loan Funds.

**COMMONWEALTH EXPENDITURE ON WORKS AND SERVICES FROM  
CONSOLIDATED REVENUE**  
(£'000)

(a) In addition, an amount of £13,100,000 was provided from Loan Fund

10. Payments to or for the States.—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Year Book (see No. 37, pp. 633 to 638). The following paragraphs refer to the existing arrangements.

(ii) *Amounts Paid.* (a) Year 1962-63. The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs.

## COMMONWEALTH PAYMENTS TO OR FOR THE STATES, 1962-63(a)

(£'000)

(a) Includes non-recurring grants from excess receipts, but excludes payments on account of the Morgan-Whyalla Waterworks, amounts provided for relief of wheat-growers and other primary producers, and other payments for medical research, social services, etc. (b) Under various States Grants Acts. (c) Under States Grants (Income Tax Reimbursement) Act 1942. (d) Under States Grants (Entertainments Tax Reimbursement) Act 1942. (e) Under States Grants (Tax Reimbursement) Act 1946-1948. (f) Under States Grants (Additional Tax Reimbursement) Act 1950. (g) Under States Grants (Special Financial Assistance) Acts 1951 and 1952. (h) Under States Grants (Additional Assistance) Act 1958. (i) Under States Grants Act 1959. (j) Under States Grants (Additional Assistance) Act 1962. (k) Includes natural disaster (flood, cyclone, bush fire, drought, etc.) payments, unemployment relief, metalliferous mining, forestry, local public works, grants for price control reimbursement, coal strike emergency grant, grants for imported houses, Port Augusta-Port Pirie railway, Western Australian waterworks, cattle tick control, dairy industry extension, agricultural advisory services, cattle roads, coal-loading works, eradication of house borers, brigalow lands, cattle dip chemicals, tobacco industry extension services, etc. (l) Under Main Roads Development, Federal Aid Roads, Federal Aid Roads and Works and Commonwealth Aid Roads Acts. (m) Expenditure not allocable between States. (n) Under the Railway Standardization (South Australia) Agreement Act 1949 and the Railway Standardization (New South Wales and Victoria) Agreement Act 1958. Includes repayable advances.

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Year Book No. 37, pages 685-90. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State loan securities for a period of 58 years from 1st July, 1927. This amount is distributed among the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926-27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910, as compensation for the States relinquishing, after federation, the right to levy customs and excise duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State loan securities. Details of these are given on pages 952-3 of this chapter.

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Year Book (see No. 40, p. 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards, and the recommendations of the Commission in respect of the years 1959-60 to 1963-64 are shown in the following table. Commencing with 1949-50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1963-64 include an estimate of the indispensable need of the claimant State for 1963-64 and an adjustment to the estimated grant for 1961-62. South Australia agreed with the Commonwealth not to apply for special grants in other than exceptional circumstances after 1st July, 1959, when the new financial arrangements under the *States Grants Act 1959* came into operation (see sub-para. (v) below).

**COMMONWEALTH GRANTS COMMISSION: GRANTS RECOMMENDED**  
(£'000)

Particulars	1959-60	1960-61	1961-62	1962-63	1963-64

(a) Adjustment to estimated grant paid two years previously. (b) Includes the final adjusting payment of £1,027,000 in 1959-60.

(v) *Financial Assistance Grants.* The *States Grants Act 1959* repealed the *States Grants (Tax Reimbursement) Acts* of 1946, 1947 and 1948 and provided for payment of financial assistance to the States in 1959-60 amounting to £244,500,000 to be distributed among the States as follows:—New South Wales, £83,450,000; Victoria, £60,625,000; Queensland, £36,375,000; South Australia, £27,675,000; Western Australia, £25,462,000; Tasmania, £10,913,000. In subsequent years, the financial assistance grant payable to each State has been determined by increasing its grant for 1959-60 in accordance with a formula which takes into account movements in population in each State and the increases (if any) in the level of average wages per person employed as shown in returns submitted under the *Pay-roll Tax Assessment Act 1941-1961*. In 1962-63, the grants determined according to this formula were as follows:—New South Wales, £103,321,000; Victoria, £76,134,000; Queensland, £45,541,000; South Australia, £34,776,000; Western Australia, £31,240,000; Tasmania, £13,308,000.

Details of the *States Grants (Income Tax Reimbursement) Act 1942* and the *States Grants (Entertainments Tax Reimbursement) Act 1942* are given in earlier issues of the Year Book (see No. 37, pp. 635–7). These Acts provided for grants to the States as compensation for vacating the fields of income tax and entertainments tax. Grants under these Acts ceased after 1945–46 and were replaced by grants under the *States Grants (Tax Reimbursement) Act 1946–1948* which expired after 1958–59. See Year Book No. 46, pages 837–8.

(vi) *Special Financial Assistance Grants*. During the years 1954–55 to 1958–59, special assistance grants amounting to £19,902,000, £15,348,000, £19,405,000, £24,145,000 and £30,437,000, respectively, were made to assist the States in meeting their increasing financial needs. For details of amounts paid to each State see earlier issues of the Year Book or the annual bulletin *Commonwealth Finance*.

(vii) *Additional Financial Assistance*. The *States Grants (Additional Assistance) Act 1958* provided for the payment of £5,000,000 from the Consolidated Revenue Fund for financial assistance to the States.

During 1961–62 and 1962–63 additional assistance grants of £10,000,000 and £17,500,000, respectively were provided for the States on a non-repayable basis under the authority of the *States Grants (Additional Assistance) Acts 1962* and 1963 for expenditure on employment-giving activities, mainly in the works field.

(viii) *Grants for Road Construction*. (a) *Main Roads Development Act 1923–1925, Federal Aid Roads Acts 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947–1949, Commonwealth Aid Roads Act 1950, Commonwealth Aid Roads Act 1954, and Commonwealth Aid Roads (Special Assistance) Act 1957*. Details of these Acts are given in earlier issues of the Year Book (see No. 38, pp. 787–8, No. 41, p. 62, and No. 46, p. 838) and in the annual bulletin *Commonwealth Finance*.

(b) *Commonwealth Aid Roads Act 1959*. A new scheme of Commonwealth assistance to the States for roads was established by the *Commonwealth Aid Roads Act 1959*. Under this Act, which is to operate for a period of five years from 1st July, 1959, the Commonwealth has undertaken to make available up to £250,000,000 to the States for the construction, reconstruction, maintenance and repair of roads.

Of this amount, a total of £220,000,000 will be paid to the States as basic grants for roads over five years. The basic grants are fixed annual amounts which rise progressively by £2,000,000 a year from £40,000,000 in 1959–60 to £48,000,000 in 1963–64. In each year, the grants will be distributed between the States on the basis of 5 per cent. of the total to Tasmania and the balance shared between the other five States, one-third in proportion to their respective populations at the date of the last preceding Census, one-third in proportion to their respective areas, and one-third in proportion to the respective number of motor vehicles registered in these States at 31st December preceding the year of payment.

The balance of up to £30,000,000 over the five years will be made available to the States as matching assistance for roads. The total amounts of matching assistance will increase by £2,000,000 a year from £2,000,000 in 1959–60 to £10,000,000 in 1963–64. Up to the limit of its share of the total matching assistance available in any year, each State qualifies for £1 of matching assistance from the Commonwealth for each £1 by which the amount it allocates in that year from its own resources for expenditure on roads exceeds the amount so allocated in 1958–59. The share of each State in the total matching assistance available in any year is determined by the same formula as is used to determine its share of the basic grant in that year.

The full amount of the matching assistance available to each State in any year is being paid during that year on the understanding that the road grants to the State in the following year will be adjusted if it is subsequently found that the State did not qualify in full for the matching assistance paid to it in that year.

The legislation relating to the years 1947–48 to 1958–59 provided for annual allocations to the Commonwealth for expenditure on strategic roads and the promotion of road safety practices. No such provisions are contained in the present legislation, the Commonwealth making separate provision for these purposes.

(ix) *Tuberculosis Act 1948*. The *Tuberculosis Act 1948* provided for the reimbursement by the Commonwealth of capital and maintenance expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis.

Re-imbursments from the National Welfare Fund of maintenance expenditure on tuberculosis hospitals equal the amounts by which such expenditures of the States in any financial year exceed those for the year 1947-48. As from 1st July, 1948, the States have also been reimbursed from annual appropriations of the Department of Health for all their capital expenditure on buildings, furnishings, equipment and plant.

(x) *States Grants (Mental Institutions) Act 1955*. This Act provides for financial assistance to the States for capital expenditure on mental institutions to a maximum amount of £10,000,000. Each State is entitled to one-third of expenditure made on or after 1st July, 1955, on buildings or equipment of a mental institution.

(xi) *Other Payments*. (a) *Western Australian Waterworks*. The *Western Australia Grant (Water Supply) Act 1948-1957* provides for grants to Western Australia not exceeding an aggregate of £5,000,000 for the development of the Agricultural Areas, Great Southern Towns and Goldfields Water Supply schemes. The amount provided by the Commonwealth was limited to half the total expenditure on the scheme. (see also pp. 681-2)

(b) *Coal Mining Industry—Long Service Leave*. To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty on coal produced of 6d. a ton between 1st November, 1949, and 26th August, 1951; 7½d. a ton from 26th August, 1951, and 30th May, 1952; 8d. a ton from 30th May, 1952, to 1st September, 1959; and 5d. a ton from 1st September, 1959, to 1st June, 1961. The rate of excise was fixed at 4d. a ton from 1st June, 1961, when the excise was removed from coal produced for export. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(c) *Encouragement of Meat Production*. To develop meat production in Queensland and Western Australia, grants are made to these States for the provision and improvement of roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £150,000 in Queensland and £50,000 in Western Australia.

(d) *Grants to Universities*. Payments to the States for universities were first introduced in 1951-52 under the *States Grants (Universities) Act 1951*, and were continued under similar legislation passed in 1953, 1955, 1956 and 1957. Following on the Government's acceptance of the main recommendations of the Committee on Australian Universities, the provisions of the 1957 Act relating to financial assistance for 1958 were superseded by the *States Grants (Universities) Act 1958*, which operated from 1st January, 1958.

This legislation authorized the Commonwealth to make payments to the States for universities of up to £21,400,000 over the three calendar years 1958 to 1960, inclusive, where certain conditions have been satisfied. These payments include increased contributions towards the running expenses of universities, new grants for capital works and equipment and new emergency grants.

Under the *States Grants (Universities) Act 1960*, which carried on the principle of grants for capital works and equipment introduced in the 1958 legislation, payments of up to £42,000,000 over the three calendar years 1961, 1962 and 1963 are to be made to the States. (See also Chapter XIX. Education, Cultural Activities, and Research, pp. 737-741.)

(e) *Cattle Tick Control*. Since 1926-27, the Commonwealth has subsidized the cost of eradication and control of cattle tick in New South Wales. From 1950-51, the subsidy was increased on a £1 for £1 basis up to an agreed maximum. The payments are charged to the departmental expenditure of the Department of Health.

(f) *Western Australia Northern Development*. The Commonwealth provides financial assistance of up to £5,000,000 to the State of Western Australia under the *Western Australia Grant (Northern Development) Act 1958-1959* in respect of developmental expenditure by the State in the area of Western Australia north of the twentieth parallel of latitude during the period of five years commencing on 1st July, 1958. Under the scheme, Commonwealth

assistance is provided in respect of projects, nominated by the State, which the Commonwealth is satisfied will contribute to the development of the area and which could not reasonably be expected to be carried out during the period of five years without the grant of Commonwealth assistance.

Payments to the State during 1962-63 amounted to £1,432,000, bringing total payments by the Commonwealth in respect of the scheme to £5,000,000.

(g) *Dairy Industry Extension Grant.* The Commonwealth provides financial assistance, with a maximum annual limit of £250,000, to promote improved farm practices in the dairy industry. The grants are charged to the departmental expenditure of the Department of Primary Industry.

(h) *Expansion of Agricultural Advisory Services.* These payments were introduced in 1952-53 to encourage expansion of agricultural advisory services by the State Departments of Agriculture and to promote increased farm efficiency. The payments are charged to the departmental expenditure of the Department of Primary Industry.

(i) *Grants for Railway Projects.* Under the *Railway Standardization (South Australia) Agreement Act 1949*, the Commonwealth is providing funds for the conversion of lines in the south-eastern division of the State as an initial step towards eventual standardization of 4' 8½" gauge. The State is to repay three-tenths of the cost of this work over a period of 50 years and is to bear the full cost of subsequent conversion from broad to standard gauge.

Under the *Railway Standardization (New South Wales and Victoria) Agreement Act 1958*, the Commonwealth provided funds for the construction of the standard gauge rail link between Albury and Melbourne on the basis that the States of Victoria and New South Wales will each bear 15 per cent. of the cost by instalments over a period of 50 years.

The total expenditure on railway standardization (the 30 per cent. advances to the States and the 70 per cent. grants to the States) is charged to the capital works and services vote of the Department of Shipping and Transport.

(j) *Cattle Roads Grants.* The *Queensland Grant (Beef Cattle Roads) Act 1961* provides for a grant of £5,000,000 to be paid to Queensland over the five-year period commencing 1st July, 1961, for expenditure on approved roads for the transport of beef cattle. In 1962-63, an amount of £1,000,000 was paid to the State.

Under the *Western Australia Grant (Beef Cattle Roads) Act 1961*, a special grant of £700,000 was made to Western Australia in 1962-63 for certain work on roads and bridges in the north of the State.

(k) *Coal Loading Works—New South Wales.* Under the *Coal Loading Works Agreement (New South Wales) Act 1961*, the Commonwealth is providing financial assistance to New South Wales of up to £2,650,000, partly by way of repayable advances from the Consolidated Revenue Fund and partly by grants from the Coal Industry Fund of the Joint Coal Board, for improvements to coal loading facilities at Newcastle, Port Kembla and Balmain. In 1962-63, repayable advances amounted to £498,000 and grants to £302,000.

(l) *Natural Disaster Payments.* Special Commonwealth payments are provided from time to time to assist State schemes for the relief of personal hardship and distress caused by serious floods, cyclones or bush fires in the States and for restoration of damaged public assets such as roads and bridges.

(m) *Brigalow Lands.* Under the *Brigalow Lands Agreement Act 1962*, Commonwealth advances to the State of Queensland for specified works associated with the production of beef cattle and other primary products in the Fitzroy River Basin and the supply of beef for export were limited to £7,250,000 during the period of five years ending 30th June, 1967. Repayments over a twenty year period are to commence in 1968. Advances amounted to £600,000 in 1962-63.

(n) *Cattle Dip Chemicals.* In 1962-63, special payments of £48,000 to New South Wales and £5,000 to Queensland were made by the Commonwealth towards the cost of changing the chemicals in cattle dips.

(o) *Tobacco Industry Extension Services.* In 1962-63, the Commonwealth provided £24,000 for additional extension services for tobacco growers in New South Wales, Victoria and Queensland.

11. **Primary Production Research and Sales Promotion, Export Funds, etc.—** Expenditure under this item includes the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Information relating to the taxes levied is given in sub-section Revenue of this section (*see pp. 914-18*). Details of expenditure from the trust funds are included in § 4, Commonwealth Trust Funds. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

**PRIMARY PRODUCTION—RESEARCH AND SALES PROMOTION, EXPORT FUNDS, ETC.: EXPENDITURE FROM COMMONWEALTH CONSOLIDATED REVENUE FUND**

### § 5. Commonwealth Loan Fund

1. **General.**—Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Year Book (see No. 37, p. 640). The following tables show details for the years 1958–59 to 1962–63 of receipts by, and expenditure from, Commonwealth Loan Fund in respect of loans raised for both Commonwealth and State Governments. Information relating to the Commonwealth Government securities on issue is given in the Division, Government Securities on Issue, Commonwealth and States, of this chapter.

2. **Loans raised for the Commonwealth.**—The following table shows the receipts by, and expenditure from, Commonwealth Loan Fund in respect of loans raised for the Commonwealth Government during the years 1958–59 to 1962–63.

#### COMMONWEALTH LOAN FUND: LOANS RAISED FOR THE COMMONWEALTH (£'000)

## STATE FINANCE

## § 1. General

1. Functions of State Governments.—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure, and debt of the individual States are difficult, owing to the fact that functions which in one State are assumed by the central government are in another delegated to local government or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the central government.

Care is needed, therefore, in making comparisons, and the particulars contained in this chapter should be read with those contained in Chapter XX. Local Government. In many respects, moreover, the budgets of the Australian governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned with rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

**2. Accounts of State Governments.**—The various financial transactions of the States are in each case concerned mainly with one or other of three funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by a State is paid into its Consolidated Revenue Fund, from which payments are made under authority of an annual Appropriation Act passed by the legislature, or by a permanent appropriation under a special Act.

Figures in § 2 below relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These undertakings are:—railways, tramways and omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

**3. Inter-relation of Commonwealth and State Finances.**—A statement in some detail, covering the inter-relation of Commonwealth and State finances during the period from the inception of federation to the passing of the *Financial Agreement Act 1928*, was published in Year Book No. 22, pages 379–80. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Year Book from year to year (*see also* pp. 952–3).

## § 2. State Consolidated Revenue Funds

### REVENUE

**1. General.**—The principal sources of State revenue are:—(a) taxation; (b) the business undertakings controlled by the State Governments; (c) sale of and rental from crown lands; (d) interest on advances; (e) payments by the Commonwealth Government under the Financial Agreements, Special Grants and Financial Assistance Acts, etc.; (f) Commonwealth National Welfare Fund payments; and (g) miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue to the Consolidated Revenue Funds for the States as a whole in the year 1962–63 was Commonwealth payments under financial assistance and other grants (40.2 per cent. of the total revenue). Next in magnitude was the group of business undertakings (29.4 per cent.), the principal contributors being the Government railways and tramways, followed by taxation receipts (16.6 per cent.). More than one-quarter of the total State taxation collections are not paid into Consolidated Revenue Funds, however, but into special funds (*see* para. 3 (ii) (b) following). Of the remaining sources of revenue, interest (n.e.i.) constituted 4.0 per cent., land revenue 1.9 per cent., and National Welfare Fund payments 1.1 per cent.

**2. Revenue Received.**—The following table shows particulars of the total amounts, and the amounts per head of population, of Consolidated Revenue received by the several States during the years 1958–59 to 1962–63.

## STATE CONSOLIDATED REVENUE

Year	N.S.W.(a)	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
<b>TOTAL REVENUE</b> (£'000)

<b>Total .. ..</b>	<b>77.86</b>	<b>68.53</b>	<b>79.60</b>	<b>93.78</b>	<b>102.81</b>	<b>87.43</b>	<b>79.07</b>

(a) See § 1, para. 2, p. 938.

(b) Tasmanian transport services are under the separate control of semi-governmental authorities.

(c) In all States, certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page.

(d) Excludes Commonwealth payments paid to trust funds.

(e) Includes payments under Financial Agreement, special grants, additional financial assistance, grants to universities, etc.

(f) Consolidated Revenue Fund receipts only. Excludes payments to Trust Funds.

(ii) *Revenue from Taxation.* (a) *General.* In the tables on taxation collections in these paragraphs, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under Racing instead of under Stamp duties and Licences respectively.

Prior to federation, customs and excise duties were the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the highest yields from the State taxation were drawn from the various income taxes which, in 1941-42, included unemployment relief, State development, and hospital taxes. From 1942-43 to 1958-59, the States were reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Commencing with 1959-60, however, a new scheme for the payment of financial assistance to the States was instituted (for details *see* para. 10 (v), p. 928). Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Year Book.

(b) *Net Collections, 1962-63.* The following tables show, for the year 1962-63, details of the collections in each State from the various types of tax in operation, irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and present a comprehensive statement of all taxation collections by the Government in each State.

(iii) *Business Undertakings.* (a) 1962-63. A considerable proportion of State gross revenue is made up of receipts from business undertakings under the control of the Governments. The most important of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply, and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1962-63 the revenue from these sources was £248,912,000 or 29.4 per cent. of the revenue from all sources. Details of revenue are as follows.

**STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1962-63**

For further information on the finances of the various types of business undertakings in the States, see Chapters XV. Transport and Communication and XX. Local Government of this Year Book.

(iv) *Lands.* The revenue from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of Crown lands for the year 1962-63.

STATE LAND REVENUE, 1962-63  
(£'000)

Source	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
Sales ..	1,068	336	..	175	95	28	1,702

Other ..	111	173	491	364	..	5	1,144
<b>Total ..</b>	<b>5,563</b>	<b>3,369</b>	<b>4,211</b>	<b>842</b>	<b>1,751</b>	<b>627</b>	<b>16,363</b>

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1958-59 to 1962-63 respectively was:—£12,890,000, £14,324,000, £15,269,000, £15,785,000 and £16,363,000.

(v) *Commonwealth Grants.* Commonwealth grants to the States represent a very large proportion of the States' revenue. In 1962-63, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £340,877,000 (40.2 per cent.). Details were as follows:—contribution towards interest on States' debts under the Financial Agreement, £7,585,000; special grants to the States of Western Australia and Tasmania, £11,251,000; financial assistance, £304,320,000; additional assistance, £14,616,000; grants to universities, £2,706,000; and other grants, £399,000.

In addition to these, the States receive a number of other grants which are paid to trust funds. The main items in this class are the contribution to the sinking fund on States' debts (£7,248,000 in 1962-63) paid to the National Debt Sinking Fund, grants for Commonwealth Aid Roads (£54,000,000 in 1962-63), and grants for universities (£13,003,000 in 1962-63) paid to State trust funds.

More detailed information concerning Commonwealth grants to the States is given on pages 928-32.

(vi) *Commonwealth National Welfare Fund Payments.* The States also receive payments from the Commonwealth in respect of hospital and pharmaceutical benefits, nutrition of children and reimbursement of maintenance expenditure on tuberculosis sanatoria. These receipts are paid into Consolidated Revenue Funds or trust funds according to the varying accounting procedures in the States. In 1962-63, the total amount paid to State Consolidated Revenue Funds was £9,559,000 (1.1 per cent.). This amount was made up of hospital benefits, £2,062,000; pharmaceutical benefits, £2,117,000; milk for school children, £1,318,000; tuberculosis—reimbursement of maintenance expenditure, £4,014,000; other, £48,000.

(vii) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. Interest, mainly from loans to local governing bodies, on public account balances, and for soldier land settlement amounted to £33,530,000 in 1962-63, while miscellaneous revenue, which includes fines of the courts and fees for services, amounted to £56,990,000 in 1962-63.

## EXPENDITURE

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—(a) interest, exchange and debt redemption charges in connexion with debt; (b) working expenses of business undertakings; (c) education; (d) health and charitable expenditure; (e) justice; (f) police; (g) penal establishments; and (h) all other expenditure, including expenditure on public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions, and miscellaneous.

The working expenses of railways and tramways are the largest item of State Government expenditure. In 1962–63, the working expenses of the railways, tramways and omnibuses were 23.5 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in magnitude were education, 21.2 per cent.; debt charges, 17.8 per cent.; charitable, public health and hospitals, 13.6 per cent.; and law, order and public safety, 5.8 per cent.

As stated at the beginning of this division, figures relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These undertakings are:—railways, tramways and omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

2. *Total Expenditure.*—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1958–59 to 1962–63 are shown in the following table.

## STATE EXPENDITURE: CONSOLIDATED REVENUE FUNDS

NOTE.—Minus sign (—) indicates deficit.

## § 3. State Loan Funds

1. **General.**—State public borrowing is due mainly to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions, such as the construction and operation of the railway systems, which in other countries are usually entrusted to local authorities or left to private enterprise. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State debt thus consists chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and is to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds, may be found in the annual bulletin *State, Territories and Local Government Authorities' Finance and Government Securities*. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made.

2. **Gross Loan Expenditure.**—(i) 1962–63. Particulars of gross loan expenditure on works, services, etc., are shown in the following table.

## STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1962-63

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.  
(b) From Consolidated Revenue Fund.

NOTE.—Minus sign (—) indicates excess of repayments to loan fund.

Information relating to the government securities on issue on behalf of the States is given in the division on Government Securities on Issue: Commonwealth and States (see p. 951).

COMMONWEALTH AND STATE FINANCE

1. Consolidated Revenue Fund Revenue and Expenditure.—The following table shows the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1958-59 to 1962-63. In the table the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this chapter. The items excluded from the total figures are:—payments made by the Commonwealth to the States and included in the State Consolidated Revenue Funds on account of tax reimbursements up to 1958-59, and financial assistance grants in 1959-60 to 1962-63, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements, grants to universities, cattle tick control, Tuberculosis Act capital expenditure, National Welfare Fund payments, and estimated payments of pay-roll tax by the States to the Commonwealth. There are other relatively minor payments for which adjustments have not been made, and the adjusted figures are therefore still slightly overstated.

COMMONWEALTH AND STATES: REVENUE AND EXPENDITURE

Year ended 30th June—	Revenue			Expenditure		
	Commonwealth	States	Total	Commonwealth	States	Total
	£'000	£'000	£m.	£'000	£'000	£m.

**GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES**

NOTE.—For the following reasons, Government Securities on Issue, as set out in the tables in this division, may not be aggregated without adjustment to indicate what is sometimes described as the “public debt” or “net public debt” of the Commonwealth and State Governments.

There are forms of debt not evidenced by the issue of securities. Again, some of the securities included in the tables are held by the Governments themselves. For example, a State Government may hold temporarily, or even for long periods, securities issued by the Commonwealth Government. The Commonwealth Government itself, through such institutions as the National Debt Commission, or through the Trust Funds, holds large investments in securities issued, either directly by itself or on behalf of the States. In addition, some of the securities issued on behalf of the States and held by the Commonwealth

Government represent the proceeds of oversea loans, securities for which were issued directly by the Commonwealth Government. From the point of view of the aggregate net debt of the Commonwealth and the States, it would thus involve duplication if the sum of the securities on issue were to be regarded as representing the "net public debt".

### § 1. General

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth Government accepted responsibility for the securities of the State Governments then on issue, and was empowered to arrange for all future borrowings on behalf of the Commonwealth and the States and to issue Commonwealth securities for all money borrowed. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf, and the securities are redeemed from the National Debt Sinking Fund to which both the Commonwealth and State Governments make contributions.

In the statistical tables relating to Government securities, details of securities on issue, annual interest liability and average rate of interest liability, except in § 3, paras. 3 and 4, are shown in the currencies in which they are repayable or payable respectively. Australian currency equivalents for oversea loans have been calculated using International Monetary Fund par rates of exchange (and the calculated equivalent for Swiss francs) ruling at 30th June in each year shown. Rates of exchange to £A. at 30th June, 1963, were as follows:—£Sterling, 0.8000; United States dollars, 2.2400; Canadian dollars, 2.4216; Swiss francs, 9.7955; Netherlands guilders, 8.1088; German Deutsche marks, 8.9600.

### § 2. The Financial Agreement between the Commonwealth and the States

1. **General.**—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Year Book (*see* No. 37, pp. 685–90). In this issue, a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the State Premiers, or Ministers nominated by them in writing. Each year, the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the securities issued on behalf of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in its own name, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed, and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including savings banks) constituted or established under Commonwealth or State law or practice; borrow from the public by means of counter sales of securities; and use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Government Securities.**—The Commonwealth on 1st July, 1929, took over securities issued by each State existing on 30th June, 1927; and all other securities of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State; and in respect of these securities assumed, as between the Commonwealth and the States, the liabilities of the States to bond-holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States, as from 1st July, 1929, were discharged from any liability in respect of principal, interest or redemption on so much of the securities bearing interest at 5 per cent. per annum taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State securities. The balance of the interest payable on the State securities is paid to the Commonwealth by the States.

7. **Sinking Fund.**—(i) *State Securities existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the securities of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per £100 on the securities of the States existing at 30th June, 1927, and each State contributes annually 5s. per £100 on its securities at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927 (except those for redemptions or conversions, or funding a State deficit), a sinking fund at the rate of 10s. per £100 per annum was established, and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in sub-para. (iv) below) raised by a State after 30th June, 1927, to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927, and 1st July, 1935.* Special contributions are payable in respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit which accrued after 30th June, 1927, and before 1st July, 1935. Details of these contributions are given in Year Book No. 37, pages 688–9.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond-holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the securities of a State, and funds of that State transferred to the National Debt Commission, are not accumulated, but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security for the balance of the period during which the original contribution is payable in respect of that debt.

(vii) *Oversea Securities on Issue.* Sinking fund contributions in respect of oversea securities shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8. **Borrowing by Semi-governmental Authorities.**—It was realized from the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of the borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

### § 3. Government Securities on Issue: Commonwealth and States

1. Government Securities on Issue, Annual Interest Payable and Average Rate of Interest, 30th June, 1963.—In the following tables, details are given of government securities on issue on account of the Commonwealth and States, annual interest payable and average rate of interest at 30th June, 1963.

7. **Short-term Securities on Issue.**—Particulars of the short-term securities (Treasury bills, Treasury notes and seasonal securities) of the Commonwealth and States in Australia at intervals from 30th June, 1959, to 30th June, 1963, are shown in the following table. These securities are included in the government securities on issue as shown elsewhere. No short-term securities have been raised overseas since September, 1956, when all such securities held in London were expatriated to Australia.

(a) Excludes overdrafts and internal Treasury bills.  
1962. (c) Treasury bills.

(b) Seasonal securities before 30th June,

The Treasury bill discount rate in Australia has remained at 1 per cent. since 29th July, 1952.

In 1962-63, daily issues of Treasury notes replaced those of seasonal securities which had, during the three previous financial years, all matured in the course of the same financial year in which they were issued. Treasury notes with a currency of thirteen weeks were issued in multiples of £1,000 over the minimum subscription of £5,000 and increases in value were subject to the usual income tax rebate of two shillings in the pound. In April, 1963, the terms of issue of these notes were altered from the price of £99.10 per cent. yielding £3.64 per cent. per annum to a price of £99.15 yielding £3.44 per cent. per annum.

8. **Government Securities on Issue on Account of the States; Local Government and Semi-governmental Authority Securities on Issue.**—In some States, certain public utilities, such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which in addition to receiving advances from the central government, raise loans by borrowing on their own behalf, while in other States these services are controlled by the central government. Direct comparisons between States of the securities on issue on account of the several States should therefore be made with caution. The table following shows for 1957-58 to 1961-62 particulars of the securities on issue on account of the States, the securities on issue by local government and semi-governmental authorities, and the aggregates of these.

(a) Excludes amounts due to the central government. Includes bank overdrafts. (b) Oversea holdings have been converted to Australian currency at the rates of exchange current at 30th June of each year shown.

#### § 4. Commonwealth Loan Raisings

1. **General.**—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required either by the Commonwealth or by the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States.

2. **New Loans Raised, 1960-61 to 1962-63.**—(i) *Australia.* The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1960-61 to 1962-63.

## COMMONWEALTH NEW LOANS(a) RAISED IN AUSTRALIA

July-June (Special bonds) (c) ..	..	31,233	4-5	{ 1969 1970 }	100	3,590	12,318	15,325

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see p. 971).  
 (b) Special issue. For details see following paragraph. (c) Special bonds open for continuous subscription, redeemable at prices commencing at par and increasing to a premium of £3 per cent. if held until maturity in 1966-69. Interest increases from 4 per cent. to 5 per cent. over period of currency.

The loans of £90,000,000 and £7,000,000, raised in June, 1961 and 1962, respectively, were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £230,000,000 in 1960-61, £247,500,000 in 1961-62 and £255,000,000 in 1962-63. Subscriptions to these special loans for the two years covered came from the Loan Consolidation and Investment Reserve Trust Account.

Finance for the approved Loan Council programmes from 1960-61 to 1962-63 was provided from the following sources.

**LOAN COUNCIL PROGRAMME: SOURCE OF FINANCE**  
(£'000)

Source	1960-61	1961-62	1962-63
Public loans, domestic raisings, etc. . . . .	117,900	225,100	203,147
Oversea loans and special Commonwealth assistance	112,100	22,400	51,853
<b>Total . . . . .</b>	<b>230,000</b>	<b>247,500</b>	<b>255,000</b>

In addition to the new loans raised as shown in the table on the previous page and the redemption and conversion loans shown in paragraph 3 below, there were other miscellaneous loan operations in Australia (*see* p. 971).

(ii) *London.* The only new loan raised in London during the three years ended 1962-63 was for £Stg.12,000,000, 5½ per cent. interest, price of issue £Stg.98 per £Stg.100, maturing 1978, raised during 1962-63.

(iii) *New York.* The following table gives details of the loans raised during the period 1960-61 to 1962-63.

**COMMONWEALTH NEW LOANS RAISED IN NEW YORK**

Month of raising	Amount of loan	Rate of interest per annum	Price of issue	Year of maturity	Allocation of loan

(a) Special bonds.

NOTE.—Minus sign (-) indicates reduction in liability for interest.

(ii) *London.* The following table shows particulars of loans raised in London during the years 1958-59, 1960-61 and 1962-63 for the purpose of redeeming and converting London loans. None was raised during 1961-62.

## COMMONWEALTH LOANS RAISED FOR THE CONVERSION AND REDEMPTION OF LOANS MATURING IN LONDON

Month of raising	Old loan		New loan				Increase in annual liability for interest and exchange		
	Amount	Rate of interest per annum	Amount raised in—		Rate of interest per annum	Price of issue	Year of maturity		
			Australia	London					
	£Stg. '000	Per cent.	£A.'000	£Stg. '000	Per cent.	Per cent.	£Stg. '000	£A.'000 (a)	
1958-59—									
March ..	20,675	3½	..	20,000	5½	99	{ 1973 1979	400	500
1960-61—									
July ..	13,925	3	..	13,925	6	98	{ 1977-80 1975	418	523
January ..	20,579	3½	..	20,000	6	97½	{ 1981-83	531	664
1962-63—									
July ..	11,790	4	..	10,000	6	97	1972	128	160

(a) No account has been taken of the cost of issuing the conversion loans at a discount. Exchange calculated at £A.125 = £Stg. 100 (the International Monetary Fund par rate of exchange in the years shown).

(iii) *New York*. During 1946-47, four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose until December, 1954. The loan raised in New York for this purpose in March, 1957, amounted to \$17,114,000, at 5 per cent. interest, issued at par, maturing in 1972. No loans were raised for the purpose of redeeming loans which became due for redemption or which the Commonwealth had the option of redeeming during 1957-58 to 1960-61 or in 1962-63. In 1961-62, a re-financing loan of \$30,000,000 was raised at 5½ per cent. interest, issued at £98½, maturing in 1982.

4. **International Bank for Reconstruction and Development Loans.**—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America or Canada, the Commonwealth Government arranged five loans from the International Bank for Reconstruction and Development between August, 1950, and December, 1956, amounting to \$308,500,000, repayable over periods of from 10 to 25 years, at rates of interest of from 4½ to 4¾ per cent. The proceeds of the latest of these loans were finally drawn in March, 1959.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. The goods are imported and distributed through normal channels and payment made through the Australian banking system.

The loan on behalf of Qantas Empire Airways of \$9,230,000 at 4½ per cent. maturing in 1966-87 was finally drawn at the end of July, 1958, and in 1962-63 drawings of \$31,851,000 were made from the loan (at 5½ per cent. maturing in 1966-87) raised for the purposes of the Snowy Mountains Hydro-electric Authority.

5. **Swiss Loans.**—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, February, 1955, March, 1960, and March, 1961, of four public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Crédit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loans were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Commonwealth Government to repay the loan in full or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was 3¾ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs. The third loan was for a period of fifteen years with an option to redeem after 10 years. The rate of interest was 4½ per cent. and the issue price £99. The fourth loan was issued at par in March, 1961, at the rate of 4½ per cent. maturing in April, 1976. Payments of interest and repayments of principal are to be made only in Swiss francs.

The loans were fully subscribed, and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Reserve Bank in return for an equivalent amount of Australian currency.

6. **Canadian Loans.**—In October, 1955, the Commonwealth Government arranged for the issue in Canada of a public loan of 15,000,000 Canadian dollars raised to assist Australia's development programme. The loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part at any time prior to 1st November, 1970. The rate of interest was 4 per cent., payable half-yearly, and the issue price \$98.50. A second loan, of 20,000,000 Canadian dollars, was raised in March, 1961, on the security of the Commonwealth of Australia, 5½ per cent. twenty-year bonds being issued at the rate of \$98½ per cent. Bonds and interest are payable in Canadian dollars in each case.

The loans were fully subscribed, and the net Canadian dollar proceeds were sold to the Reserve Bank for Australian currency.

7. Netherlands Loan.—In 1961, the Commonwealth arranged for a public flotation in the Netherlands of a loan of 40,000,000 Netherlands guilders at par, with an interest rate of 5 per cent. per annum. The proceeds were used to assist the loan programmes of the Commonwealth and States.

The loan is to be repaid in fifteen annual instalments from 1967 to 1981, but, at the Commonwealth's option, an earlier redemption date may be negotiated on and after 15th December, 1971.

8. Summary of Loan Transactions, 1958-59 to 1962-63.—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1958-59 to 1962-63.

## COMMONWEALTH LOAN TRANSACTIONS: SUMMARY

TAXES ON INCOME

1. *General.*—A description of the development of income taxes in Australia appeared in Year Book No. 35, page 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the *Income Tax and Social Services Contribution Assessment Act 1936-1963* and the *Income Tax and Social Services Contribution Act 1963*. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year, and in the case of companies, on the income of the preceding year. Thus tax for the financial year 1963-64 is levied on the income of individuals in 1963-64 and on the income of companies in 1962-63.

2. *Present Taxes.*—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and, in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income (other than dividends) derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the *Social Services Act 1947–1963* and the *Tuberculosis Act 1948*, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, and (v) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation, and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are:—Zone A, £270 plus an amount equal to one half of the total deductions allowable to the taxpayer for the maintenance of dependants; and Zone B, £45 plus an amount equal to one twelfth of the deductions allowable to the taxpayer for the maintenance of dependants. A deduction equal to the deduction allowed to residents of Zone A is also allowed to members of the defence forces serving for more than one half of the year of income at declared localities outside Australia. The boundaries of Zones A and B are as defined in the Second Schedule, *Income Tax and Social Services Assessment Act 1936–1963*.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in the following paragraph.

4. **Concessional Deductions.**—Concessional allowances for dependants, medical expenses, life insurance and superannuation contribution, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant or for a housekeeper employed by the taxpayer, for the financial year 1963–64, is shown in the following table.

#### CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.(a)

(£)

Dependant, etc. (resident)	Maximum deduction
Spouse .. .. .	143
Daughter-housekeeper (b) .. .. .	143
Housekeeper(c) .. .. .	143
Parent or parent-in-law .. .. .	143
One child under 16 years of age .. .. .	91
Other children under 16 years of age .. .. .	65
Invalid relative (d) .. .. .	91
Child 16 to 21 years receiving full-time education .. .. .	91

(a) These deductions are allowed only if the dependant is a resident of Australia. If the dependant is maintained for part only of the year, a partial deduction is allowed. (b) Of a widower or widow.

(c) Caring for a spouse in receipt of an invalid pension, or caring for children under 16 years of age of a widower or widow. (d) Child, step-child, brother or sister over 16 years of age.

When the dependant maintained derives separate income, the amount of the concessional deduction is reduced by £1 for every £1 by which the separate net income exceeds £65. Separate net income includes age and invalid pensions but not child endowment. Scholarships are excluded except insofar as they relate to maintenance.

For the 1963-64 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or to a hospital, in respect of an illness or operation, payments for dental services, payments for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, the remuneration of an attendant of a person who is blind or confined to bed or invalid chair, and payments for the maintenance of a trained dog used for the guidance of a blind person.

Other concessional deductions allowed to resident taxpayers include (i) payments of life insurance premiums and contributions to superannuation funds and friendly societies, not exceeding an aggregate of £400, (ii) payments to medical or hospital benefits funds, (iii) funeral expenses of a dependant not exceeding £30 and (iv) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £150 per child or dependant).

In addition to concessional deductions, all taxpayers (resident and non-resident) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies. Resident taxpayers only are allowed a deduction from income of the full amount paid as calls and as application and allotment moneys to certain companies engaged in the search for oil in Australia and New Guinea.

5. **Effective Exemption from Tax.**—For the financial years 1950-51 to 1962-63, taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. For 1963-64 this exemption was £208. The effect of the deductions for dependants was to exempt resident taxpayers up to the incomes shown hereunder.

#### RESIDENT TAXPAYERS: EFFECTIVE EXEMPTIONS FROM TAX

(£)

Taxpayer with—	Financial years 1953-54 to 1956-57	Financial years 1957-58 to 1962-63	Financial year 1963-64
No dependants .. .. .	104	104	208
Wife .. .. .	234	247	351
Wife and one child .. .. .	312	338	442
"  "  two children .. .. .	364	403	507
"  "  three children .. .. .	416	468	572
"  "  four children .. .. .	468	533	637

For the 1963-64 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £481. An aged person who contributes to the maintenance of his spouse is exempt from tax if the combined net incomes of the taxpayer and his spouse do not exceed £910.

6. **Rates of Income Tax and Social Services Contribution on Individuals.**—The following table shows the rates of income tax and social services contribution for the financial years 1953-54 to 1963-64.

**INCOME TAX AND SOCIAL SERVICES CONTRIBUTION—INDIVIDUALS: RATES

16,000	upwards	9,157 5 10	168	8,417 18 4	160

(a) For the 1959-60, 1961-62, 1962-63 and 1963-64 financial years a rebate of 5 per cent. was allowable on the tax and contribution calculated from this schedule.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election, once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at the ordinary rates applicable to that part. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax are subject to a rebate of 2s. for each £1 included in the taxable income.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953-1960.**—This Act provided relief from double taxation of income flowing between Australia and the United Kingdom, the United States of America, Canada and New Zealand.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1954-55 to 1963-64.

(a) Income remaining after allowing all deductions other than deductions for dependants.

**9. Pay-as-you-earn.**—(i) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages or salary to an employee at the appropriate rate, in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate, a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate, the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks, the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(ii) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year are made at the same time as collection and assessment for the previous year are adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged), but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment, the taxpayer may elect to substitute his own estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

An employee with income of £100 or more from sources other than salaries or wages is required to pay provisional tax in respect of that income.

**10. Lodgment of Returns and Assessment of Tax.**—All persons with assessable income in excess of £208 are required to lodge returns by 31st July each year (31st August for business incomes). The Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amounts payable are issued during the year following the year of income. The approximate amount payable, however, has already been collected during the income year from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already paid and any difference either collected or refunded.

**11. Company Income Taxes.**—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained on the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1956-57 to 1963-64 are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details, see Year Book No. 39, page 846 and No. 40, page 743.

Interest paid to a non-resident(e) .. .. .	96	96	90	90	96	96	..

(a) Incomes not exceeding £104 (1956-57 to 1962-63) or £208 (1963-64) are exempt from tax.  
 (b) Where the taxable income does not exceed £228 (1956-57), £231 (1957-58 to 1959-60), £260 (1960-61 to 1962-63), or £520 (1963-64) the tax may not exceed eleven-twentieths (1956-57) or one-half (1957-58 to 1963-64) of the amount by which the taxable income exceeds £104 (1956-57 to 1962-63) or £208 (1963-64).  
 (c) The rate of 84d. (1956-57, 1960-61 to 1963-64) or 78d. (1957-58 to 1959-60) is levied on the amount of £5,000 less the mutual income.  
 (d) For non-resident companies, dividends included in this part of taxable income are taxed at 72d. (1956-57, 1960-61 to 1963-64) or 66d. per £1 (1957-58 to 1959-60). (A resident company is allowed a rebate of tax in respect of dividends received.)  
 (e) If the non-resident is not a company, tax is paid only on income in excess of £104 (1956-57 to 1962-63) or £208 (1963-64).

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—(a) primary income tax and social services contribution payable; (b) retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and (c) certain dividends paid by the company.

For the financial years 1953-54 to 1958-59, the retention allowance was the following proportion of the reduced distributable income:—on the first £1,000 or part, 50 per cent.; on the next £1,000 or part, 40 per cent.; on the next £1,000 or part, 35 per cent.; on the next £1,000 or part, 30 per cent.; on the balance, 25 per cent.; and 10 per cent. of distributable income from property, except dividends from other private companies.

For 1959-60 to 1962-63, the minimum retention allowance from business profits was 35 per cent. The rates were:—on the first £1,000 or part, 50 per cent.; on the next £1,000 or part, 40 per cent.; on the balance, 35 per cent.; and 10 per cent. of distributable income from property, except dividends from other private companies.

For 1963-64, the minimum retention allowance from business profits is 40 per cent. The rates are:—on the first £5,000 or part, 50 per cent.; on the next £5,000 or part, 45 per cent.; on the balance 40 per cent.; and 10 per cent. of distributable income from property, except dividends from other private companies.

For the financial years 1953-54 to 1963-64, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1958-59 to 1962-63.

**INCOME TAX COLLECTIONS**  
(£'000)

Year	Total		
	Commonwealth	State(a)	Total
1958-59 .. .. .	608,660	15	608,675
1959-60 .. .. .	671,294	8	671,302
1960-61 .. .. .	807,266	7	807,273
1961-62 .. .. .	828,150	..	828,150
1962-63 .. .. .	810,590	..	810,590

(a) Amounts shown are arrears of State income taxes existing prior to the introduction of the uniform tax arrangement.

(ii) *Commonwealth Income Tax Assessed.* The amounts of Commonwealth taxes assessed on the income of recent years are shown in the following table. The amounts are shown under the year in which most of the assessments were made, i.e., the year following the income year. Income taxes assessed on income for past years and for the years shown after the close of the normal assessing period are not included.

## CHAPTER XXIII

### RURAL INDUSTRY

**NOTE.**—This chapter is divided into four major parts:—

- Introduction, dealing with general rural activity in Australia;
- Agricultural Production;
- Pastoral Production; and
- Other Rural Industries, which includes the dairying, poultry and bee industries.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries, Part II.—Non-Rural Industries and Value of Production*, and *Secondary Industries* (butter, cheese, etc., factories) issued by this Bureau. Current information on commodities produced is obtainable in the *Quarterly Summary of Australian Statistics, Monthly Review of Business Statistics, Monthly Bulletin of Production Statistics* and *Digest of Current Economic Statistics* (monthly). The series of bulletins *Classification of Rural Holdings by Size and Type of Activity, 1959–60*, shows particulars of rural holdings classified by size, nature and area of crops, and numbers of livestock, and also according to main type of activity. The mimeographed annual *Report on Food Production and the Apparent Consumption of Foodstuffs in Australia* contains details of the production and utilization of foodstuffs. The following mimeographed publications also contain considerable detail on the particular subjects dealt with.

**General.**—*Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Value of Primary Production (Preliminary Statement)* (annual), *Farm Machinery on Rural Holdings* (annual), *Tractors on Rural Holdings, 31st March, 1960* (detailed information), *New Tractors: Receipts, Sales and Stocks* (quarterly), and *New Agricultural Machinery* (quarterly).

**Agricultural Production.**—*Rural Land Use and Crop Production* (annual), *Agricultural Statistics (Preliminary Statement)* (annual), *The Wheat Industry* (two a year), *The Fruit Growing Industry* (annual), and *Fruit Statistics (Preliminary Statement)* (annual).

**Pastoral Production.**—*Livestock Statistics* (annual), *Livestock Numbers* (annual), *The Meat Industry* (monthly), *Wool Production* (annual), and *Wool Production and Utilization* (annual).

**Other Rural Production.**—*The Dairying Industry* (monthly and half-yearly), *Livestock Statistics* (annual), *Livestock Numbers* (annual), *Manufacturing Industries No. 20.—Bacon Curing and No. 21.—Butter, Cheese and Condensed, Concentrated, etc., Milk* (annual), *Production Summaries No. 36.—Preserved Milk Products and No. 55.—Butter and Cheese* (monthly), and *Bee-farming* (annual).

Values of Australian overseas trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment.

#### INTRODUCTION: RURAL ACTIVITY.

##### § 1. Number and Area of Rural Holdings.

**1. Number and Area.**—A holding in Australia has been defined by statisticians on a more or less uniform basis, and discrepancies which exist are not of sufficient importance to prevent comparisons. For the purpose of these statistics, a holding has been defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of livestock or the products of livestock.

There are considerable fluctuations from time to time in the numbers of very small holdings, and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition, in the very dry parts, such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia, there are large areas of marginal lands sporadically occupied for extensive grazing under short-term lease or other arrangement, and the areas so occupied tend to fluctuate with the seasons. Similarly, there are rugged areas in the mountain country of some States which are also occasionally occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1958–59 to 1962–63.

## RURAL HOLDINGS: NUMBER AND AREA

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NUMBER OF RURAL HOLDINGS									
1958-59	77,857	69,770	43,290	28,105	21,563	11,374	243	221	252,423
1959-60	77,499	69,778	42,912	28,527	21,832	11,202	269	224	252,243
1960-61	76,871	69,623	43,155	28,711	21,922	11,201	275	224	251,982
1961-62	76,949	69,866	43,287	28,886	22,082	11,117	284	217	252,688
1962-63	76,294	69,700	43,284	28,922	22,554	10,974	281	217	252,226

TOTAL AREA OF RURAL HOLDINGS ( <sup>0</sup> 000 acres)									
1958-59	172,978	37,755	370,240	152,312	238,264	6,573	156,897	381	1,135,400
1959-60	172,721	37,737	371,794	155,437	244,619	6,511	158,806	382	1,148,007
1960-61	172,697	37,934	373,995	156,456	247,737	6,510	161,099	374	1,156,802
1961-62	172,327	37,754	374,501	156,897	252,783	6,551	171,245	377	1,172,435
1962-63	172,038	37,709	376,788	156,697	262,660	6,422	164,955	376	1,177,645

2. *Classification by Size and Type of Activity.*—Some of the information obtained from the 1959-60 Agricultural and Pastoral Census was classified by size of principal characteristics (area of holdings, area of sown grasses and clovers, area of selected crops and numbers of livestock). In addition, all holdings were classified according to type of activity. Tables showing this information, for statistical divisions and States, and an outline of the methods used have been published in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity, 1959-60*. Similar information on size classification for each State was published in a series of bulletins for the year 1955-56.

## § 2. Employment on Rural Holdings

1. *Persons Engaged.*—The following table shows, for each State except Victoria, the recorded number of males working on rural holdings. Particulars for females are not available except for New South Wales. Additional particulars relating to the number of males employed in agriculture up to 1941-42 are shown in Year Book No. 36, page 852, and previous issues. Similar details for later years are not available.

MALES<sup>(a)</sup> ENGAGED ON RURAL HOLDINGS AT 31st MARCH, 1963

### § 3. Technical Aspects of Rural Industry

1. Farm Machinery on Rural Holdings.—The history of the development of large-scale field crops and sown pastures in Australia is essentially also the history of the mechanization of the rural industries. This may be divided into four phases.

The first phase extended from initial settlement to the mid-nineteenth century, when agriculture was primarily local and non-commercial, and confined by hand methods to small areas and low production per farm worker.

The invention of an effective wheat stripper in South Australia in 1843, and the extension of its use into Victoria and New South Wales, however, greatly increased the area which could be harvested in a season. This initiated the second phase, which continued with the development of stump-jump implements in the 1870's, and the scrub roller and mullenizer in the 1890's. These later developments made possible an extension of the wheat belt into the drier mallee lands of Victoria and South Australia. By the turn of the century, machinery had thus been developed to conduct all cropping operations on an extensive basis.

The third major change in farm machinery followed the 1914-18 War, when tractor power became increasingly available in a variety of models and sizes. The increase in numbers of tractors on rural holdings and higher operating speeds led in turn to new and improved types of farm machinery drawn by tractors. These trends were interrupted by the economic depression of the 1930's.

After the 1939-45 War, there was a widespread expansion of labour-saving machinery and devices in all sectors of rural industry. Clearing methods were extended with the bulldozer, log, chain and hi-ball units, and cultivation was improved by means of large disc ploughs and disc harrows, and seeding and harvesting machinery. These methods were extended to crops for which methods involving greater use of manpower (manual labour) had previously been employed. Milking machines almost entirely replaced hand milking on dairy farms, and labour-saving machinery was introduced into farm and station development and maintenance operations. These operations included fencing, bulk transport of grain and fodder, pasture treatments, fodder conservation and pasture improvement.

The table below shows data for the principal types of farm machinery on rural holdings in the several States and Territories at 31st March, 1963. A more detailed analysis of tractors on rural holdings according to horse-power, type of fuel used and age of tractor was published in the Statistical Bulletin: *Tractors on Rural Holdings—Australia, 31st March, 1960*, issued on 8th September, 1961.

(a) Details for all States are collected at triennial intervals only. (b) Not available. (c) Incomplete; particulars for Victoria are not available. (d) Details of pick-up balers and forage harvesters for each State classified according to type, mode of operation and age were published in the bulletin *Primary Industries* No. 53, 1958-59, Part I.—*Rural Industries*.

2. Fertilizers.—(i) *General*. In the early days of settlement in Australia, the principles of scientific cultivation were little understood. It was common for the land to be cropped continuously until the natural fertility was almost exhausted. More scientific methods have been adopted in recent decades, much of the improvement in this regard being due to the assistance and guidance offered to farmers by various State and Commonwealth departments and authorities.

Fertilizer is generally applied to pastures at the time of sowing, and periodical (usually annual) top-dressings are carried out afterwards to keep the pastures in good condition. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures, and much land formerly regarded as useless for cultivation has now been brought into production. With the rapid increase in the area of sown pastures, particularly since the 1939-45 War, large quantities of artificial fertilizers

have been used. In addition, increasing areas of native pastures have been top-dressed. The utilization of aircraft, in particular, has enabled the fertilizing of some areas which would otherwise be inaccessible. In 1962-63, pastures (sown and native) accounted for nearly 60 per cent. of both the total area fertilized and the total quantity of fertilizer used.

(ii) *Local Production.* The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate. Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1962-63 was 48, made up as follows:—New South Wales, 11; Victoria, 6; Queensland, 4; South Australia, 11; Western Australia, 8; and Tasmania, 8. The production of superphosphate in Australia during 1962-63 amounted to 2,861,580 tons.

(iii) *Quantities Used Locally.* Information regarding the area treated with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1962-63 season is given in the following table.

**AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1962-63**

State or Territory	Crops			Pastures			Total		
	Area fertilized	Super-phosphate used	Other artificial fertilizers used	Area fertilized	Super-phosphate used	Other artificial fertilizers used	Area fertilized	Super-phosphate used	Other artificial fertilizers used

(iv) *Imports and Exports.* The chief sources of Australia's supplies of rock phosphate are Nauru, Christmas Island (Indian Ocean) and the Gilbert and Ellice Islands. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1962-63 are shown in the following table.

## ARTIFICIAL FERTILIZERS: IMPORTS INTO AUSTRALIA

Fertilizer	1958-59	1959-60	1960-61	1961-62	1962-63
QUANTITY (Tons)					
Ammonium sulphate ..	19,979	11	110	18,636	37,458
Potassium fertilizers ..	43,912	36,204	52,212	74,789	58,327
Rock phosphate ..	1,353,739	1,322,173	1,647,928	1,950,834	1,694,916
Sodium nitrate ..	7,505	6,837	5,670	7,709	7,193
Other ..	16,951	17,282	26,361	37,888	35,001
VALUE (£A.'000 f.o.b.)					
Ammonium sulphate ..	497	(a)	3	381	622

Other ..	496	519	745	1,048	921
<b>Total ..</b>	<b>5,605</b>	<b>4,811</b>	<b>5,953</b>	<b>7,836</b>	<b>7,572</b>

(a) Less than £500.

Exports of fertilizers (practically all of which were manufactured locally) amounted to 7,345 tons valued at £150,942 in 1962-63 compared with 1,955 tons valued at £56,054 in 1961-62.

3. Aerial Agriculture.—During recent years, an increasing use has been made of aircraft for top-dressing and seeding, for spraying and dusting of crops and pastures, and for pest and vermin extermination. For 1956-57 (the first year for which data are available), the total area treated was 1,466,000 acres; in 1962-63 the total area treated was 8,763,000 acres; almost six times as great.

The following table shows details of area treated and materials used for each State for the year ended 31st March, 1963.

## AERIAL AGRICULTURE: OPERATIONS DURING 1962-63

(a) Areas treated with more than one type of material in one operation are counted once only.  
 (b) Includes 2,400 acres baited for rabbit destruction. (c) Includes 57,090 acres baited for rabbit destruction. (d) Includes 59,490 acres baited for rabbit destruction. See footnotes (b) and (c).

NOTE.—The information contained in this table was collected by the Department of Civil Aviation.

4. **Pasture Improvement.**—An article on pasture improvement, which includes notes on indigenous and introduced species of grasses, and which traced the development of pasture research in Australia, appears on pp. 1001–2 of Year Book No. 49.

5. **Soil Conservation.**—Year Book No. 49 contained an article (pp.1003–4) on soil conservation which dealt with the following matters: land use and soil erosion, agents of erosion, prevention and control, and the activities of various Commonwealth and State authorities which promote and co-ordinate research into the problems of soil erosion and the initiation of preventive measures.

## AGRICULTURAL PRODUCTION

**NOTE.**—In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes. The latest figures available are those for the year 1962–63. The returns are collected on a substantially uniform basis in all States at 31st March each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes), provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this chapter are therefore shown in "agricultural" years. For most purposes, there will be little error involved in considering them as applying to years ending 30th June.

Details of the weights and measures used in recording production of agricultural commodities appear in the introduction to the bulletin *Primary Industries, Part I.—Rural Industries*.

### § 1. Progress, Assistance and Control

1. **Early Development.**—The coastal districts of southern Australia are characterized to a large degree by leached soils of low fertility, with limited areas suitable for intensive crop cultivation. This, combined with an unfamiliar climate and problems associated with the clearance of scrub-land, severely checked early attempts to establish crops.

A brief reference to these attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Year Book. (See No. 22, p. 670.)

In an *Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797*, Governor Hunter gives the acreage of crops as follows:—wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres. The bulk of the arable land in this part of the colony was devoted to the extensive grazing of sheep.

The gold discoveries of 1851 (at Bathurst in New South Wales and later at Ballarat and Bendigo in Victoria) had at first a very disturbing effect on agricultural progress. The area of crops declined from 491,000 acres in 1850 to 458,000 acres in 1854, as landowners and rural labourers joined in the various gold rushes. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres. There was still a shortage of rural labour, and the increased acreage was due largely to the increasing mechanization of crop operations.

2. **Progress of Cultivation.**—The following table shows the area of crops in each of the States and Territories of Australia at ten-yearly intervals since 1860-61 and during each of the ten seasons 1953-54 to 1962-63. On page 993 of Year Book No. 49. there is a graph showing the area of crops in Australia from 1900-01 onward.

**AREA OF CROPS**  
(<sup>'000 acres</sup>)

1960-61	8,044	5,838	3,057	5,399	6,871	357	2	8	29,576
1961-62	8,288	5,626	3,216	5,024	7,112	364	2	7	29,639
1962-63	8,903	6,318	3,490	5,495	7,482	395	2	7	32,092

The progress of agriculture was practically uninterrupted from 1860-61 to 1915-16, when, as the result of a special effort to increase wheat production during the 1914-18 War, 18.5 million acres were cultivated in Australia. There was a temporary setback in later war years, but after the end of the war the area continued to expand, and increased steadily to the record area of 25.2 million acres in 1930-31. In the following years, the slump in wheat prices seriously depressed incomes in the agricultural industry, and the area of crops decreased to just under 20 million acres in 1935-36.

By 1938-39, the industry was recovering from the depression, and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943-44. After that year, production gradually increased again until, in 1947-48, 22.5 million acres were sown to crops. This upward trend was reversed after 1948-49, largely because many primary producers transferred from wheat to wool production as a result of the high prices of wool. Since 1951-52, however, when the area sown was 20.0 million acres, the area under crops has increased steadily, except for 1956-57, when excessively wet conditions caused reductions in the area sown to wheat. Since that year, the area of all crops has shown an upward trend in each year, reaching a record level of 32.1 million acres in 1962-63. As the area under wheat in Australia constitutes a large proportion of the total area cropped (47 per cent. during the five years ended 1962-63), fluctuations in the former have in the past been largely responsible for year to year variation in total crop area.

3. **Control and Assistance by Governmental Authorities.**—(i) *General.* The influence of governmental and semi-governmental authorities on Australian rural industry is most apparent in the fields of guaranteed prices, subsidies and controlled marketing. Many of these aspects of intervention at the national level take place indirectly through the Australian Agricultural Council.

(ii) *Australian Agricultural Council.* Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and Territories and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council

are:—the promotion of the welfare and development of agricultural industries generally; the exchange of information on agricultural production and marketing; the improvement of the quality of agricultural products and the maintenance of high grade standards; to ensure, as far as possible, balance between production and available markets; and organized marketing.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council, to secure co-operation and co-ordination in agricultural research, to advise State and Commonwealth Governments on the initiation and development of agricultural research, and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

(iii) *Bounties paid to Producers.* Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below.

(a) *Cotton Bounty.* The *Cotton Bounty Act 1951–1958* providing for payment of a bounty on seed cotton of a grade higher than “strict good ordinary” expired on 31st December, 1963. Under the *Raw Cotton Bounty Act 1963* which came into effect from 1st January, 1964, to operate for a period of five years, the Commonwealth will pay a bounty on raw cotton produced and sold for use in Australia. The level of bounty is 16.125d. per lb. for Middling 1” White raw cotton with premiums and discounts for grades and staple lengths above and below Middling 1” White. There is a ceiling on bounty payments of £2,000,000 in any one year.

(b) *Flax Fibre Bounty.* The period covered by the bounty terminated on 31st October, 1960. (See Year Book No. 47, p. 939, and previous issues, for details of the bounty.)

(iv) *Other Financial Assistance.* Other forms of assistance to producers include payments for cattle tick control, the Commonwealth Dairy Industry Extension Grant, Commonwealth Extension Service Grant, flood, drought and bush fire relief, fisheries research and farm mechanization research.

Over recent years, legislative research schemes, financed by matching contributions from the Commonwealth and industry and/or States, have been initiated in regard to wheat, wool, tobacco, dairy produce, beef cattle and wine. Non-legislative schemes, on a similar financial basis, have been operative in relation to brown rot, Australian plague locusts, tractor testing, peanut drying, sugar-cane harvesting mechanization, barley research, banana research and fruit fly research.

For further information on these matters, see Chapter XXII. Public Finance, pages 921–2 and 925–32.

(v) *Agricultural Training and Research.* Agricultural colleges have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agriculture and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days which are held at regular intervals, through publication in various agricultural or scientific journals, and through the agricultural extension services of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations in many parts of Australia, and sometimes undertakes research jointly with the appropriate State authorities. It also has regional laboratories in several States, conducting research into agronomic and livestock problems as they occur in each particular region (see also Chapter XIX. Education, Cultural Activities and Research). The State Departments of Agriculture study problems of particular significance within their own boundaries. In addition, the universities carry out valuable work in their laboratories and on their experimental farms.

## § 2. Distribution, Production and Value of Crops

1. **Distribution.**—(i) *General.* The wide range of climatic and soil conditions over the agricultural regions of Australia has resulted in a diversity of crops being grown throughout the Commonwealth. Generally, cereal crops (excluding rice and sorghum) are grown in all States over wide areas, while industrial crops are confined to specific locations in a few States.

(ii) *Area of Crops in States and Territories.* The following table shows the areas in the several States and Territories of each of the crops for the season 1962-63.

## AREA OF CROPS, 1962-63

<b>Total ..</b>	<b>25,631</b>	<b>26,105</b>	<b>29,576</b>	<b>29,639</b>	<b>32,092</b>

(v) *Size Classification of Principal Crops.* In Australia there is, in many cases, a close correlation between the type of crop and the size of holdings upon which it is usually grown. A special series of tabulations relating to rural holdings in Australia was compiled for 1959-60 and has been published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity, 1959-60.* Tables in these bulletins show a classification by area of holding and area of crop for wheat, oats and barley by States and statistical divisions. These tables thus provide a guide to the regional distribution of the holdings growing the major crops, sown grasses and clovers. Classifications of holdings according to major crops grown, livestock carried and type of activity are also shown.

2. *Production.*—(i) *Production of Crops in States and Territories.* The following table shows production of crops in the various States and Territories for the season 1962-63.

PRODUCTION OF CROPS, 1962-63

<b>Australia .. .. .</b>	<b>568,313</b>	<b>86,175</b>	<b>482,138</b>	<b>66,931</b>	<b>415,207</b>

(a) No deduction has been made for depreciation and maintenance.

(b) No allowance has been made for costs of power, power kerosene, petrol and other oils.

(iii) *Net Values of Agricultural Production, 1958-59 to 1962-63.* In the following table, the net value of agricultural production and the net value per head of population are shown by States for the years 1958-59 to 1962-63.

## NET VALUE OF AGRICULTURAL PRODUCTION(a)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE (£'000)									
1958-59	82,472	73,661	68,716	50,571	42,746	10,496	59	222	328,943
1959-60	78,518	68,912	65,357	24,246	44,044	10,645	79	150	291,951
1960-61	98,171	104,031	73,471	58,323	46,708	10,939	80	138	391,861
1961-62	93,858	88,245	75,076	45,467	51,325	12,345	75	112	366,503
1962-63	113,036	96,986	92,864	46,679	54,253	11,156	84	149	415,207

## NET VALUE PER HEAD OF POPULATION (£)

1958-59	22.1	26.8	47.4	55.7	60.6	31.0	2.6	5.1	33.1
1959-60	20.7	24.4	44.2	26.0	61.4	30.9	3.2	3.0	28.7
1960-61	25.4	36.0	48.9	60.9	64.0	31.2	3.1	2.5	37.7
1961-62	23.8	29.8	49.1	46.4	68.8	34.6	2.8	1.8	34.6
1962-63	28.2	32.1	59.9	46.7	71.0	30.8	3.0	2.2	38.4

(a) No deduction has been made for depreciation and maintenance.

4. *Indexes of Quantum and Price of Agricultural Production.*—Indexes of quantum and price of agricultural production are shown in the following table. The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized at the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. Further details on weights used, etc., are to be found in Chapter XXX. Miscellaneous.

## INDEXES OF QUANTUM(a) AND PRICE OF AGRICULTURAL PRODUCTION

(Base: Average 3 years ended June, 1939 = 100)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
<b>Quantum Produced—</b>					
Wheat .. .. .	131	121	166	150	186
Other crops .. .. .	187	152	184	171	194
<i>Total, All Crops</i> .. .. .	<i>165</i>	<i>140</i>	<i>177</i>	<i>163</i>	<i>191</i>
<i>Per head of population</i>	<i>114</i>	<i>95</i>	<i>117</i>	<i>106</i>	<i>121</i>
<b>Price—</b>					
Wheat .. .. .	337	350	355	380	366
Other crops .. .. .	310	313	344	323	309
<i>Total, All Crops</i> .. .. .	<i>322</i>	<i>329</i>	<i>349</i>	<i>348</i>	<i>334</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of the base years (1936-37 to 1938-39).

### § 3. Cereal Crops

1. **Wheat.**—(i) *General.* Wheat is grown on a large scale in all States except Tasmania, and is the most important crop in Australia in terms of area, production and exports. The present limits of the wheat belt have been established after considerable fluctuation over the last four decades.

In January, 1934, a Royal Commission was appointed to inquire into and report upon the economic condition of the growing, handling and marketing of wheat, and the manufacturing, distributing and selling of flour and bread. The Report of this Royal Commission provides an authoritative description of all aspects of the industry up to that time.

Two of the aspects of governmental and semi-governmental assistance and control which have contributed to the development of the industry are the organization of oversea marketing and of research.

(ii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939, under National Security (Wheat Acquisition) Regulations, to purchase, sell, or dispose of, wheat or wheat products, and to manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

Details of the operations of the Wheat Stabilization Board in licensing wheat grown during the seasons 1941–42 to 1948–49 will be found in Year Book No. 38, pages 940–1. The Board ceased to function on 31st December, 1948.

The Board was reconstituted for five years, with similar powers, under the *Wheat Stabilization Act 1948*, to administer the stabilization plan. The new Board commenced to function on 18th December, 1948. The Board has been continued in existence by the *Wheat Industry Stabilization Acts 1954, 1958 and 1963* for the purpose of administering the second, third and fourth five-year stabilization plans.

(iii) *Marketing of Wheat.* (a) *Stabilized Marketing.* As a large proportion of the Australian wheat crop is normally exported, the marketing of wheat occupies an important part in the industry. A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, is given in the Appendix to Year Book No. 37, pages 1295–9.

Details of more recent plans were published in Year Book No. 40, pages 841 and 842 (1947–48 to 1952–53 Plan), No. 44, page 861 (1953–54 to 1957–58), and No. 48, pages 903 and 904 (1958–59 to 1962–63).

(b) *Fourth Post-war Wheat Industry Stabilization Plan.* Following negotiations during 1962 and 1963, the fourth post-war Wheat Industry Stabilization Plan was enacted by the Commonwealth and States towards the end of 1963. The new plan will operate on very much the same lines as the previous ones. However, there are some important changes in detail to which reference is made in the main features of the plan set out below.

*Period of the Plan.* The plan will operate for five years. It commenced with the 1963–64 wheat crop and will end with the marketing of the 1967–68 crop.

*Commonwealth Guarantee.* The Commonwealth will guarantee a return of 14s. 5d. per bushel bulk basis f.o.r. ports to growers on up to 150 million bushels (previously 100 million bushels) of wheat exported from the crop in the first year of the plan. The guaranteed return of 14s. 5d. is based on the findings of a survey of the economic structure of the wheat industry conducted by the Bureau of Agricultural Economics. It will be adjusted in each of the following years of the plan in accordance with the movements in costs based on a cost index established from the survey.

*Australian Wheat Board.* The Australian Wheat Board will be maintained as the sole constituted authority for the marketing of wheat within Australia and for the marketing of wheat and flour for export from Australia for the period of the plan.

*Stabilization Fund.*

*Export Tax.* A tax will be collected on wheat exported which will be equivalent to the excess of the returns from export sales over the guaranteed return. However, the maximum rate of export tax will be 1s. 6d. per bushel.

*Size of Fund.* The ceiling of the Stabilization Fund is established at £30 million (previously £20 million); any excess beyond this figure will be returned to growers on the "first-in-first-out" principle.

*Use of the Stabilization Fund.* When the average export realizations fall below the guaranteed return, the deficiency will be made up, first by drawing upon the stabilization fund, in respect of up to 150 million bushels of wheat from each crop. When the fund is exhausted, the Commonwealth will meet its obligations under the guarantee.

*Home Consumption Price.* The home consumption base price for 1963-64, the first year of the new plan, was established at 14s. 5d. per bushel, bulk basis, f.o.r. ports plus 2d. per bushel loading to cover the cost of transporting wheat to Tasmania as outlined below. There is provision in the plan for annual adjustments in the following years in accordance with the guaranteed price as outlined above.

*Freight on Wheat to Tasmania.* Provision is made for a loading on the price of all wheat sold for consumption in Australia to the extent necessary to cover the cost of transporting wheat from the mainland to Tasmania in each season of the plan.

*Premium on Western Australian Wheat.* A premium will be paid from export realizations on wheat grown in Western Australia and exported from that State in recognition of the natural freight advantage enjoyed by Western Australia owing to its proximity to the principal overseas markets for wheat. In accordance with the terms of the new plan the premium has been altered from the previous flat rate of 3d. per bushel to the amount of the actual freight advantage enjoyed by Western Australia up to a maximum of 3d. per bushel.

(c) *Cost of Production.* The cost of production of wheat for the first season of the current Wheat Stabilization Plan, 1963-64, was fixed at 14s. 5d. a bushel by the legislation. The guaranteed price for the season 1963-64 was therefore 14s. 5d. per bushel, while the home consumption price was 14s. 7d. a bushel (see above). The guaranteed price for 1963-64 was a reduction of 1s. 5d. per bushel compared with the guaranteed price of 15s. 10d. for the 1962-63 season, the last year of the previous wheat stabilization plan.

(d) *F.A.Q. Standard of Wheat.* Sales and shipments of grain in bulk overseas are made on a "fair average quality" (f.a.q.) basis. Samples of wheat are obtained each year from the different wheat districts, and mixed to give a representative sample of the whole crop in each State. From this representative sample, the f.a.q. weight for each State is determined by the use of the Schopper 1-litre scale chondrometer. This standard is used as a basis for sales of each crop and it varies from year to year and from State to State. F.a.q. is an Australian term, and the method of selling differs from that of other countries, which sell according to sample, or (as in Canada) according to grades, which are fixed and do not vary from year to year. The f.a.q. method does not, however, take protein quantity and quality into account, and it gives no indication therefore of the baking strength of the resulting flour.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1962-63 season's crop was as follows:—New South Wales, north (predominantly semi-hard), 64½ lb., south and west (predominantly soft), 63½ lb.; Victoria, 64½ lb.; South Australia, semi-hard, 63½ lb., soft, 62½ lb.; and Western Australia, 65½ lb.

(e) *Bulk Handling and Storage of Wheat.* A detailed description of the bulk handling system, including its advantages and disadvantages compared with other methods of handling, appears on pages 954-8 of Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, and in more recent years other States have also introduced bulk systems. The bodies concerned with the administration of bulk handling in the various States are:—Grain Elevators Board of New South Wales, Victorian Grain Elevators Board, State Wheat Board (Queensland), South Australian Co-operative Bulk Handling Ltd., Co-operative Bulk Handling Ltd. (Western Australia), and the Tasmanian Government.

The table below sets out the bulk handling capacities of the several States for the years 1959-60 to 1963-64.

**WHEAT: TOTAL CAPACITY OF BULK HANDLING FACILITIES<sup>(a)</sup>**  
(<sup>'000</sup> bushels)

State	1959-60	1960-61	1961-62	1962-63	1963-64
New South Wales .. ..	73,420	73,440	75,270	79,486	85,246
Victoria .. ..	71,870	72,206	72,808	78,219	84,761

(a) Includes terminals, sub-terminals and country installations.

Particulars of the operation of the bulk handling and storage systems in each State are set out on pages 916 and 917 of Year Book No. 48.

(f) *International Wheat Agreements.* Details of the first and second International Wheat Agreements operative from 1st August, 1949, to 31st July, 1953, and from 1st August, 1953, to 31st July, 1956, respectively, were published in Year Book No. 42 (see pp. 840-1) and previous issues. Details of the third and fourth International Wheat Agreements which covered the period from 1st August, 1956, to 31st July, 1959, and 1st August, 1959, to 31st July, 1962, were published in Year Books Nos. 43 (p. 836) and 48 (p. 906), respectively.

A fifth International Wheat Agreement, ratified by the required number of wheat exporting and importing countries, came into force on 1st August, 1962. The new Agreement covers the three-year period from 1st August, 1962, to 31st July, 1965.

The new Agreement, negotiated at an international conference convened by the United Nations, continues the basic arrangements covered by previous Agreements. The Agreement seeks to obtain an element of stability in world wheat marketing by providing that a significant proportion of wheat entering international trade will be bought and sold at prices within a prescribed price range. The maximum and minimum prices fixed under the Agreement are expressed in terms of "Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund as at 1st March, 1949". Member exporting countries compete to supply at prices within the prescribed range, which is from 202.5 cents or about 18s. 3½d. Australian currency to 162.5 cents, or about 14s. 6d. per bushel. The maximum of the range is based on the price of Canada's No. 1 Northern Manitoba wheat in bulk in store at Fort William/Port Arthur. The minimum f.o.b. price for each exporter is the equivalent of the c. and f. price in the United Kingdom of the minimum price of Canada's No. 1 Northern Manitoba wheat in bulk in store at Fort William/Port Arthur, using currently prevailing transportation costs and exchange rates. In determining these prices, allowance is made for such differences in quality as may be agreed between the exporting and importing countries concerned.

Member importing countries have undertaken to buy each year from member exporting countries a stated percentage of their total commercial requirements at prices within the agreed range. For their part, exporting countries are obliged to make wheat available for purchase by importing countries in any crop year at prices within the price range in quantities sufficient to satisfy the commercial requirements of those countries; if the price goes to the maximum, exporters have undertaken to make available, at that maximum price, specified (datum) quantities based on their past trading record with member importers.

The new Agreement empowers the International Wheat Council to make an annual review of the world wheat situation, including the international implications of national policies in respect of wheat production, stocks and marketing, and the disposal of wheat surpluses on non-commercial terms.

Provision has also been made for the right of appeal against excessive discounts from the minimum price on the basis of differences in quality between the basic wheat—Canada's No. 1 Northern Manitoba wheat—and the wheat supplied by other member importing countries.

Member countries of the fifth International Wheat Agreement are as follows.

*Exporters.* Argentina, Australia, Canada, France, Italy, Mexico, Spain, Sweden, Union of Soviet Socialist Republics, and the United States of America.

*Importers.* Austria, Belgium and Luxembourg, Brazil, Costa Rica, Cuba, Dominican Republic, El Salvador, Federal Republic of Germany, Finland, Greece, Iceland, India, Indonesia, Ireland, Israel, Japan, Liberia, Libya, the Netherlands, New Zealand, Nigeria, Norway, Peru, Philippines, Portugal, Republic of Korea, Saudi Arabia, Sierra Leone, South Africa, Switzerland, Tunisia, United Arab Republic, United Kingdom, Vatican City, Venezuela, and Western Samoa.

(iv) *Research into the Wheat Industry.* The extension and growth of the wheat industry in the past has been made possible to a large extent through research into new varieties of seed, crop rotation and fertilizer treatments by governmental, university and private research organizations. In recent years, there has been a growing awareness of the value of this research, and funds are being raised by a direct levy on the growers' returns.

In 1957, the Commonwealth Parliament passed legislation providing for a levy of a farthing a bushel on wheat handled by the Australian Wheat Board. This money, contributed by the growers, is being spent by the Wheat Industry Research Committees set up in the wheat-growing States. These Committees, which consist of representatives of wheatgrowers, universities and State Departments of Agriculture, also received a total of £284,000 under the provisions of the *Wheat Acquisition (Undistributed Moneys) Act 1958*.

The Commonwealth Government has undertaken to supply additional funds for research (with a maximum of £1 for £1 against the growers' contribution) and has set up the Wheat Industry Research Council to make recommendations on the appropriate expenditure of the Commonwealth contribution.

The Council, at its inaugural meeting in February, 1958, considered that possible avenues of research would include the breeding of better varieties, cereal chemistry, soil fertility, mechanization, the industry's cost structure and marketing problems.

Up to the end of June, 1963, the Council and the State Committees have spent £1,852,446 including grants to the Commonwealth Scientific and Industrial Research Organization, State Departments of Agriculture, universities and agricultural colleges.

(v) *Wheat Farms: Number and Classification by Activity.* (a) *Number.* Particulars of the number of farms growing 20 acres and upwards of wheat for grain during each of the years 1958-59 to 1962-63, are shown in the following table. A farm worked on the share system or as a partnership is included as one holding only.

**NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN**

State or Territory	1958-59	1959-60	1960-61	1961-62	1962-63
New South Wales .. ..	14,997	16,798	16,959	17,489	18,286
Victoria .. ..	9,074	10,555	10,625	11,648	12,166

Australian Capital Territory	19	23	14	25	27
<b>Australia .. ..</b>	<b>44,819</b>	<b>48,395</b>	<b>49,503</b>	<b>52,023</b>	<b>54,664</b>

(b) *Size Classification of Wheat Holdings.* There is in Australia a widespread combination of wheat growing with other rural activities. This is illustrated, for the 1959-60 season, by a table on pages 1016 and 1017 of Year Book No. 49. The table, which provides a classification of rural holdings by the area of wheat grown and by type of activity, was derived from information published in the bulletin *Classification of Rural Holdings by Size and Type of Activity, 1959-60, No. 7*.

(vi) *Varieties of Wheat Sown.* (a) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field, and the results of his labour and the continued efforts of those who have followed him have proved of immense benefit to the industry. Their efforts have resulted in the development of disease-resistant varieties, better average yields, and a greater uniformity of sample, with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown in any one season is restricted to about 45.

(b) *States, 1962-63.* The principal varieties of wheat sown and the percentage of each to the total area sown in the five main wheat-producing States of Australia in 1962-63 were as follows:—New South Wales, Glenwari (13.1), Olympic (9.2), Heron (9.1); Victoria, Insignia (48.0), Pinnacle (24.2), Olympic (14.8); Queensland, Mengavi (30.7), Spica (24.5); South Australia, Insignia (35.0), Gabo (18.9), Sabre (13.4); and Western Australia, Gabo (38.9), Insignia (16.0), Insignia 49 (11.2). A detailed table of wheat varieties sown appears in the annual bulletin: *The Wheat Industry*, No. 104, January, 1964.

(vii) *Area, Production and Yield per Acre. (a) Summary.* Prominent factors in the early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties of wheat for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1958-59 to 1962-63 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

#### WHEAT FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

(a) 60 lb. per bushel.

A graph showing the area sown to wheat for grain in Australia since 1900-1 appears in Year Book No. 49, and a map showing the distribution of areas growing wheat for grain throughout Australia in 1962-63 appears on page 1013. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39, 1947-48 and 1954-55 appeared respectively in Year Books No. 22, page 695, No. 34, page 451, No. 39, pages 977-8, and No. 43, page 883.

(b) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season, resulting in considerable year-to-year fluctuations in production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it exports flour made from local wheat which is particularly suitable for biscuits.

Production of wheat in 1962-63, 306,912,000 bushels, was a record, exceeding the previous record harvest of 1960-61 by 33,196,000 bushels (12 per cent.) and the production in 1961-62 by 59,734,000 bushels (24 per cent.). Compared with the previous season, the highest absolute increases were recorded in New South Wales, 30,652,000 bushels (39 per cent.) and Victoria, 11,020,000 bushels (19 per cent.). All States except South Australia and Tasmania had record harvests.

(c) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to seasonal influences. High yields per acre for Australia for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels; in 1955-56, 19.2 bushels; in 1958-59, 20.7 bushels (a record); in 1959-60, 16.3 bushels; in 1960-61, 20.4 bushels; and in 1961-62, 16.8 bushels. The yield per acre in 1962-63 was 18.6 bushels.

(d) *Decennial Averages, 1861-70 to 1951-60.* The following table shows the average area, production and yield per acre for decennial periods since 1861 together with similar details for the latest season, 1962-63. Repeated cropping and short rotations (mainly in the eastern States) are believed to have led to the decline in yield to 1900, while fallowing and the widespread use of artificial fertilizers contributed to the increased yields in the decade following. The increase in yield since 1950 has been generally ascribed to the impact of improved pastures and ley-farming (broadly, the alternation of crops and pastures) upon soil fertility in wheat-growing areas.

#### WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA

Period	Area	Production	Yield per acre
	'000 acres	'000 bushels	bushels

1962-63 .. .. .	16,469	306,912	18.6

(viii) *Price of Wheat.* (a) *Home Consumption.* The prices charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed were as follows:—year ended 30th November, 1960, 15s. 0d.; 1961, 15s. 4d.; 1962, 15s. 10d.; 1963, 15s. 11½d.; and 1964, 14s. 7d. These prices include a loading to meet freight charges incurred on wheat shipped to Tasmania (2d. in 1960 and 1961; 1d. in 1962; 1½d. in 1963; and 2d. in 1964).

(b) *Export Wheat Prices.* The Wheat Board's monthly basic export selling prices for f.a.q. bulk wheat f.o.b. basis, both for wheat sold under the International Wheat Agreement and for "free" wheat sold on the open market, fell in the following ranges:—season ended 31st July, 1960, 13s. 3d. to 13s. 6d.; 1961, 13s. 5d. to 13s. 9d.; 1962, 13s. 10½d. to 14s. 10½d.; 1963, 14s. 2d. to 14s. 10½d. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The 1959 International Wheat Agreement set the maximum price at 200 cents a bushel and the minimum at 150 cents for f.a.q. wheat sold under the Agreement. Under the current 1962 Agreement operative from 1st August, 1962 (see paragraph 1 (iii) (f), p. 1004), the agreed price range is between 202.5 cents and 162.5 cents. Directly converted into Australian currency these limits are approximately 18s. 3½d. and 14s. 6d. a bushel respectively

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949-1953 International Wheat Agreement, are given in Year Book No. 40, pages 849-50, and statistical bulletin: *The Wheat Industry, Australia*, No. 99, March, 1961, and in previous issues of these publications.

(ix) *Value of the Wheat Crop.* The estimated gross value of the wheat crop in each State and in Australia during the season 1962-63 and the value per acre are shown below.

#### WHEAT FOR GRAIN: VALUE OF CROPS(a), 1962-63

Particulars		N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value	£'000	79,290	49,455	13,775	28,143	53,512	308	49	224,532
Value per acre	£	15.8	15.8	15.0	10.8	11.1	20.1	20.4	13.6

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms. Also includes payment of £11,317,000 by the Commonwealth Government.

(x) *Production and Disposal of Wheat in Australia.* In the following tables, details are given of Australian Wheat Board transactions and of total production and disposal of wheat during each of the years ended 30th November, 1959 to 1963. (For particulars of production and yield from 1935-36 see graphs, p. 994 of Year Book No. 49.)

(a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1958-59 to 1962-63 harvests are shown in the following table.

#### AUSTRALIAN WHEAT BOARD: WHEAT ACQUIRED

(\*000 bushels)

Pool	Harvest	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Australia
22 .. ..	1958-59	59,990	41,216	15,206	29,548	53,348	82	199,390
23 .. ..	1959-60	67,073	37,099	11,832	9,112	54,132	91	179,339
24 .. ..	1960-61	72,984	66,881	8,821	43,706	59,012	63	251,467

(b) *Stocks of Wheat and Flour.* Stocks of wheat (including flour in terms of wheat) held by the Australian Wheat Board in each State at 30th November for the years 1959 to 1963 are shown in the following table. These data relate to stocks held at mills, sidings, ports and depots as recorded by the Australian Wheat Board.

#### AUSTRALIAN WHEAT BOARD: STOCKS(a) OF WHEAT (INCLUDING FLOUR IN TERMS OF WHEAT), 30th NOVEMBER

(\*000 bushels)

Year	N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	Australia
1959 .. ..	19,934	16,390	987	5,951	21,657	447	65,366
1960 .. ..	19,878	16,639	451	2,203	20,995	535	60,701
1961 .. ..	7,701	8,780	965	3,122	3,338	452	24,358
1962 .. ..	5,574	6,021	1,333	1,831	2,449	491	17,699
1963 .. ..	10,879	6,999	775	1,775	2,221	625	23,274

(a) Held at mills, sidings, ports and depots.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

(c) *Wheat Disposal.* Particulars of the disposal of wheat during the years ended 30th November, 1959 to 1963, as recorded by the Australian Wheat Board, are shown in the following table.

**AUSTRALIAN WHEAT BOARD: DISPOSAL OF WHEAT**

('000 bushels)

Particulars	Year ended 30th November—				
	1959	1960	1961	1962	1963
Exported as wheat .. .. .	70,940	97,645	202,027	152,818	203,707
Exported as flour(a) .. .. .	25,248	26,147	29,438	25,123	24,907
Sold for local consumption as flour .. .. .	40,174	42,713	39,814	40,736	40,389
Sold for other purposes .. .. .	13,484	16,635	15,107	11,635	10,791

(a) Includes wheat equivalent of manufactured wheat products exported.

(d) *Production and Disposal.* A summary of all transactions in wheat for Australia, as distinct from those recorded for the Wheat Board above, appears in the following table. The particulars for local consumption are based on sales made by the Australian Wheat Board, whilst those relating to exports represent actual shipments.

**WHEAT: PRODUCTION AND DISPOSAL, AUSTRALIA**

(Million bushels)

(a) In terms of wheat. (b) Includes allowance for unrecorded movements in stocks, gain or loss in out-turn, etc.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

(e) *Finance.* The *Wheat Industry Stabilization Act 1948* empowered the Minister to arrange with the Commonwealth Bank for advances to the Board, the advances being guaranteed by the Commonwealth Government. These provisions have been continued in the subsequent legislation, with the exception that advances are now arranged through the Reserve Bank.

(c) Subject to additional £8,024,000 (of which the Commonwealth Government provided £3,022,000) withdrawn from Wheat Prices Stabilization Fund and payment of £187,000 to Wheat Industry Research Fund. (d) Subject to additional £8,884,000 provided by the Commonwealth Government and payment of £261,000 to Wheat Industry Research Fund. (e) Subject to additional £7,288,000 provided by the Commonwealth Government and payment of £233,000 to Wheat Industry Research Fund. (f) Subject to additional £11,317,000 provided by the Commonwealth Government and payment of £220,000 to Wheat Industry Research Fund.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(xi) *Imports of Wheat.* Wheat and flour have been imported in substantial quantities on three occasions since 1900; in 1902-3, the wheat harvest was only 12,378,000 bushels, and wheat and flour equivalent to 12,468,000 bushels of wheat were imported. An equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season. Owing to drought conditions in 1957-58, wheat supplies were insufficient for local requirements and, as a result, 1,485,000 bushels were imported from Canada in 1958. No wheat has since been imported.

(xii) *Exports of Wheat and Flour.* Statistics in this sub-paragraph relate to years ended 30th June. Export figures relate to the exports of Australian produce only.

(a) *Quantity and Value.* The following table shows particulars of the exports of wheat and flour and the total of both, in terms of wheat, for each of the years 1958-59 to 1962-63.

**WHEAT AND FLOUR: EXPORTS FROM AUSTRALIA**

Year	Quantity				Value		
	Wheat	Flour		Total (in terms of wheat)	Wheat	Flour(a)	Total
		As flour (a)	In terms of wheat				
	'000 bushels	short tons	'000 bushels	'000 bushels	£A.'000 f.o.b.	£A.'000 f.o.b.	£A.'000 f.o.b.
1958-59 .. ..	54,626	467,697	21,654	76,280	38,381	14,001	52,382
1959-60 .. ..	91,244	557,999	25,835	117,079	61,680	15,811	77,491

(xiii) *World Area and Production of Wheat.* The figures in the following table of the world area and production of wheat by principal countries and by continents have been compiled from the statistics published by the Foreign Agricultural Service of the United States Department of Agriculture. Years shown refer to years of harvest in the northern hemisphere. Harvests of the northern hemisphere countries are combined with those of the southern hemisphere which immediately follow; thus, the crop harvested in the northern hemisphere in 1962 is combined with preliminary forecasts for the southern hemisphere harvests which began late in 1962 and ended early in 1963.

(a) Figures refer to harvested areas as far as possible. For Australia, area sown is shown.  
 (b) Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. (c) Estimated.

(xiv) *Principal Exporting and Importing Countries.* The following table shows the quantities of wheat traded by the chief exporting and importing countries for the years 1960-61 to 1962-63, based on statistics recently published by the Food and Agriculture Organization of the United Nations.

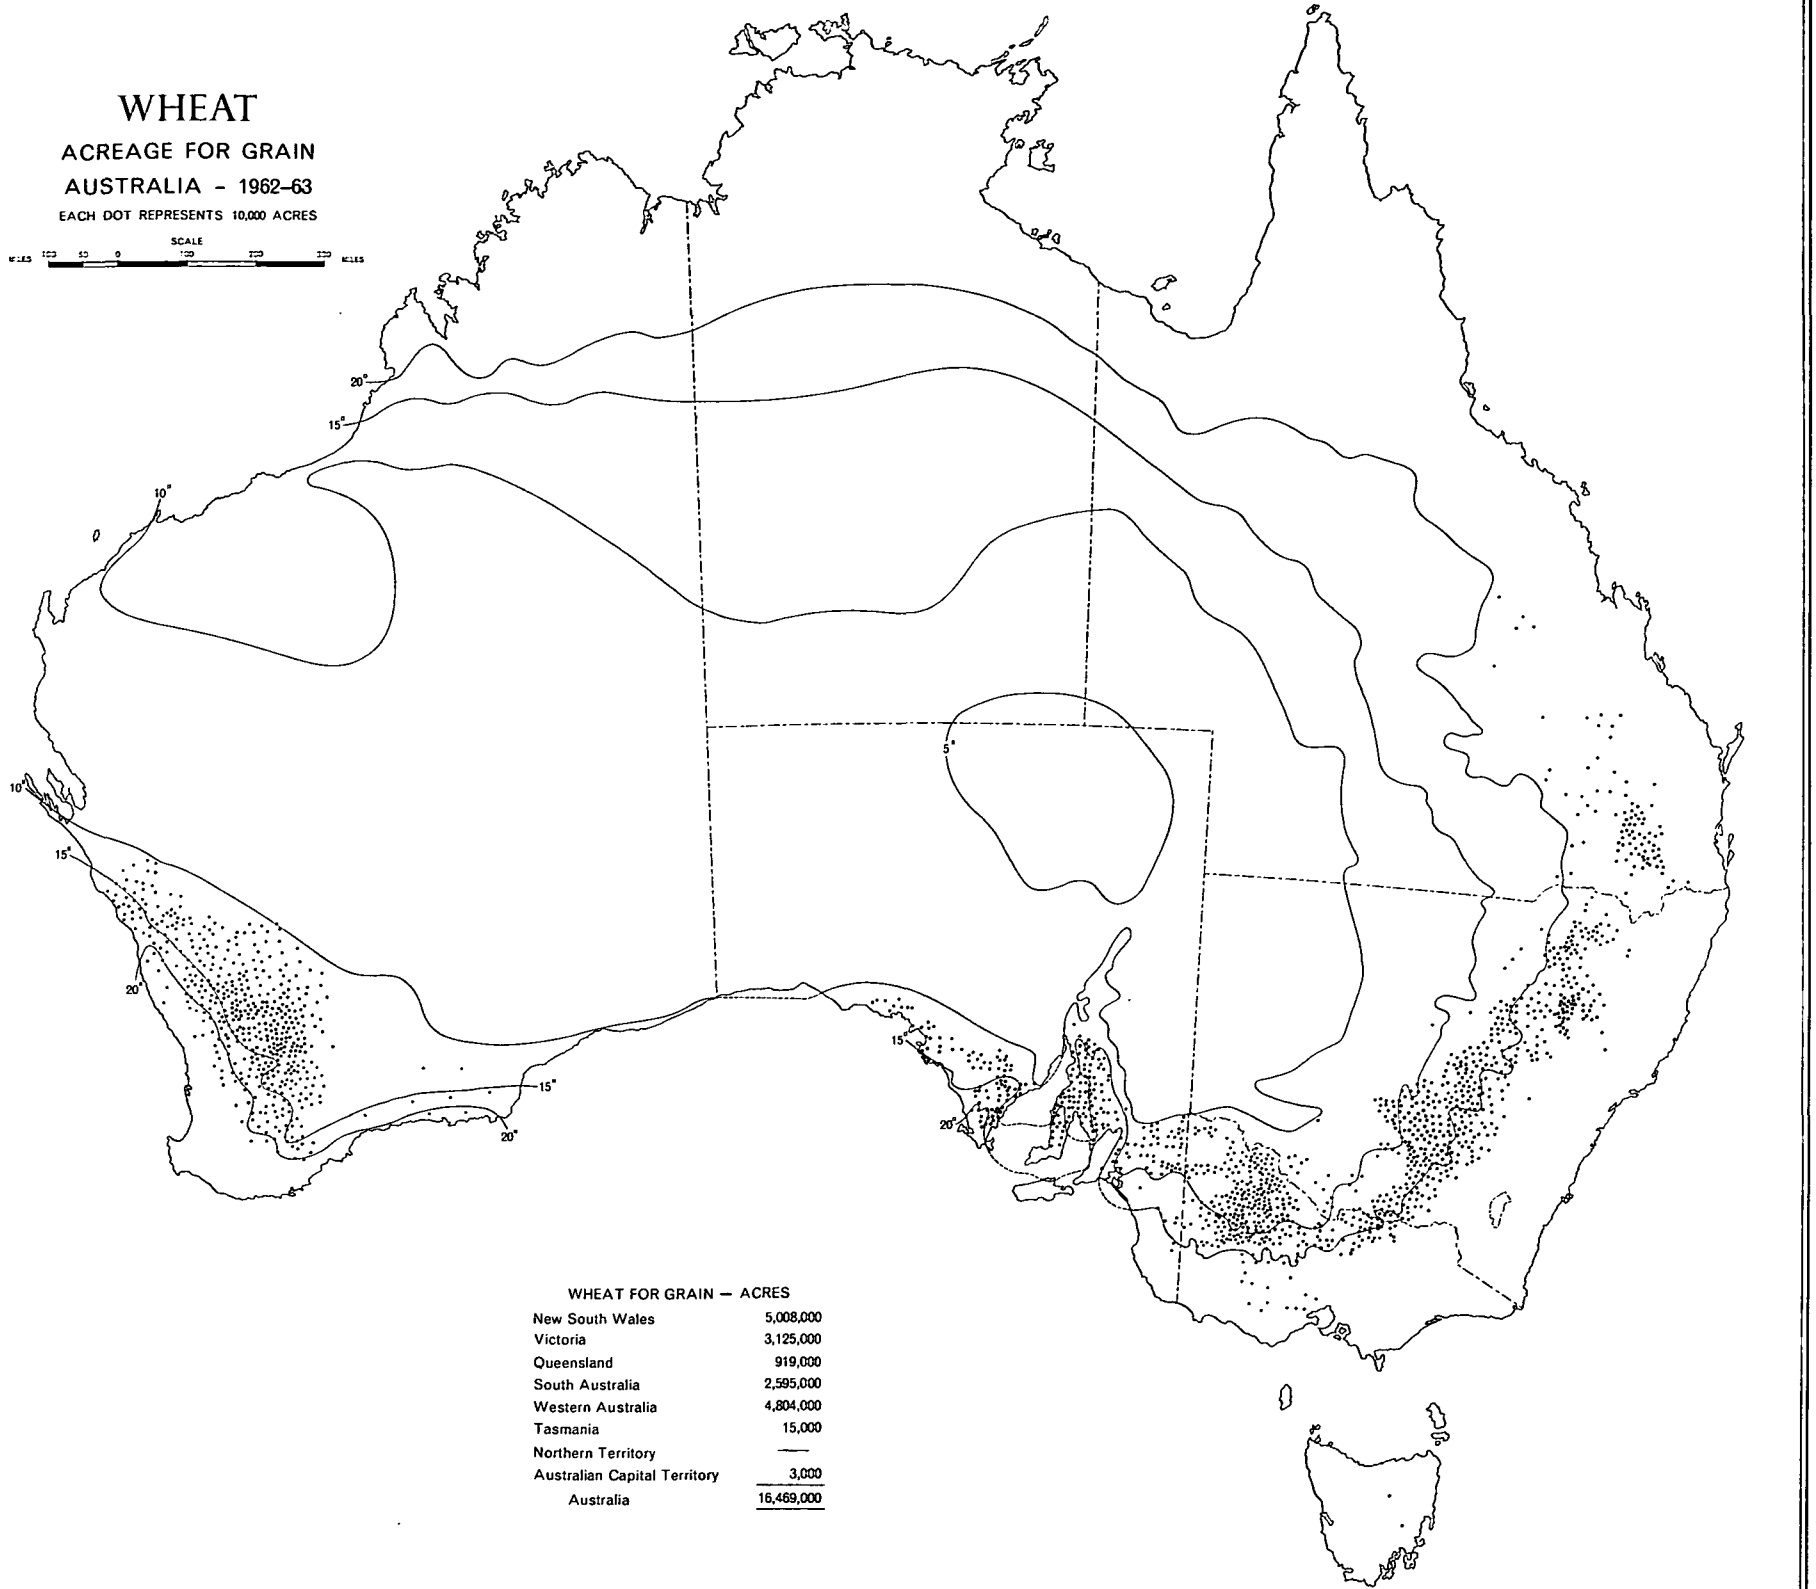

While Australia's production of wheat averages about 3 per cent. of the world' total, its exports account for a much higher proportion of the total quantities shipped. In 1962-63, for example, Australia's share of world wheat exports amounted to 12.0 per cent.

(a) Preliminary. (b) Unofficial estimate. (c) Total exports do not necessarily agree with total imports because of the time lag between shipments and arrivals.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

Estimates of exports to, and imports from, the U.S.S.R. and Mainland China in the table above are based entirely on available trade returns of the trading partners outside the Sino-Soviet bloc. No account is taken of trade within this bloc because of the incomplete nature of the data.

2. Oats.—(i) *General.* This cereal is widely grown in all agricultural areas which have autumn, winter and spring rainfall, and is tolerant of wet conditions and heavy soils. It has excellent feed value, and produces a higher yielding crop than other winter cereals. It needs less cultivation, but requires ample fertilizer. Oats has a variety of uses—as a pasture plant when rough sown into stubble or heavy clover pastures, as silage if cut before maturity, as a hay crop when mown and baled or cut for chaff, or as a grain when stripped (the stubble then being grazed off). The grain is sold on a “fair average quality” basis through voluntary pools in Victoria, South Australia and Western Australia. Excessive bulk in the husk and a fluctuating export price limit the extent of oversea trade.

(ii) *Area, Production and Yield per Acre.* Oats is usually next in importance to wheat among the grain crops cultivated in Australia. However, while wheat grown for grain in 1962-63 accounted for 51 per cent. of the area of all crops, oats grown for grain represented only 10 per cent. The area, production and yield per acre of oats in each State are shown below for the years 1958-59 to 1962-63 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

### OATS FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

1962-63 .. ..	22.7	29.0	20.0	13.9	15.8	26.6	25.6	20.9

(a) Less than 500 acres.

(b) 40 lb. per bushel.

Graphs showing the area sown to oats and production of oats in Australia appear on pages 993 and 995 of Year Book No. 49, and a map showing the distribution of areas growing oats for grain throughout Australia in 1962-63 appears on page 1015.

In 1962-63, the production of oats was 68,809,000 bushels, 18,096,000 bushels (21 per cent.) below the record harvest of 86,905,000 bushels in 1958-59.

The yield per acre in 1962-63 was 20.9 bushels, compared with the record yield of 21.9 bushels per acre established in 1958-59. The lowest yield recorded was 4.4 bushels per acre in the abnormally dry season of 1944-45.

(iii) *Price of Oats.* The average wholesale price in the Melbourne market for oats of good milling quality was 7s. 4d. a bushel in 1962-63, compared with 7s. 0½d. in 1961-62.

(iv) *Value of Oat Crop.* The estimated gross value of the oat crop in each State for the 1962-63 season and the value per acre were as follows.

#### OATS: VALUE OF CROP, 1962-63

Particulars	N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	6,882	9,205	279	1,969	6,976	313	5	25,629
Value per acre .. £	9.7	9.9	10.2	4.7	5.9	10.1	7.5	7.8

(v) *Exports.* The production of oats in Australia is sufficient to allow for an export trade which fluctuates with the incentive offered by overseas prices. The quantities and values of Australian-produced oats exported from Australia during the years 1958-59 to 1962-63 are shown below.

#### OATS: EXPORTS, AUSTRALIA

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Quantity .. .. '000 bus.	17,557	11,969	19,005	19,064	17,744
Value .. .. £A.'000 f.o.b.	6,512	5,031	6,854	7,479	7,076

In 1962-63, the principal countries of destination were the Federal Republic of Germany (8,525,000 bushels), the Netherlands (3,153,000 bushels), China (Mainland) (1,481,000 bushels), and the United Kingdom (1,235,000 bushels). Imports of oats into Australia are not recorded separately.

(vi) *Oatmeal and Other Oat Products.* In 1962-63, the production of oatmeal was 15,098 tons for porridge and 21,442 tons for other purposes. This was equivalent to about 4,092,000 bushels of oats.

(vii) *World Production.* The world's production of oats for the year 1962, according to figures issued by the United States Department of Agriculture, amounted to 3,435 million bushels, harvested from 86.4 million acres, resulting in an average yield of 39.8 bushels an acre. This compared with an estimated production in the previous year of 3,410 million bushels from an area of 95.8 million acres and an average yield of 35.6 bushels an acre.

3. **Barley.**—(i) *General.* This cereal contains two main groups of varieties: 2-row and 6-row. The former is generally, but not exclusively, preferred for malting purposes.

Barley was formerly stubble-sown, but is now grown principally on pasture land worked up early in the year of sowing. In this way, it forms an important phase in the rotation of the land. Like oats, it may also be sown for fodder production or for grain. When sown for fodder, sowing may take place either early or late in the season, as it has a short growing period. It may thus provide grazing or fodder supplies when other sources are not available. Barley grain may be crushed to meal for stock (especially pigs) or sold for malting. Crops sown for malting purposes require well-worked, weed-free paddocks of even soil, and are thus restricted to specific districts.

The main barley-growing areas in Australia are situated in Victoria (Mallee, North Wimmera, Mt. Gambier region and Geelong) and South Australia (Eyre and Yorke Peninsulas). In Western Australia, it is grown in the higher rainfall areas on the western edge of the wheat belt.

(ii) *Barley Boards.* The bulk of the barley crop in the various States is acquired and marketed by grower-controlled boards. Pooled returns from sales are distributed to growers at standard rates for the individual grades and varieties delivered. The Victorian and South Australian crops are marketed by the Australian Barley Board (a joint board established by the two State Governments), and the Queensland and Western Australian Barley Boards, handle the crops of their respective States.

(iii) *Australian Barley Board Operations.* Particulars of the proportion of barley production which was received by the Australian Barley Board (for Victoria and South Australia), together with details of quantity sold, advances and total payments to growers, are presented below.

#### AUSTRALIAN BARLEY BOARD: BARLEY RECEIVED, SOLD, ETC.

Pool		Quantity received	Quantity sold(a)	Total advances made per bushel on 2-row No. 1 Grade less freight	Total net payments to growers
		'000 bushels	'000 bushels	s. d.	£'000
No. 20 (1958-59 Crop)	.. ..	42,550	42,560	10 10.1	19,617
„ 21 (1959-60 „ )	.. ..	11,773	11,797	10 0.51	4,904
„ 22 (1960-61 „ )	.. ..	44,624	44,680	9 3.26	16,989
„ 23 (1961-62 „ )	.. ..	20,081	20,059	11 7.28	9,707
„ 24 (1962-63 „ )	.. ..	17,195	17,285	11 6.76	8,333

(a) Includes surplus or shortage in out-turn.

(iv) *Area, Production and Yield per Acre.* There was a substantial increase in the area of barley sown for grain (particularly in Western Australia and Queensland) in the years up to 1960-61, and in that year the area sown reached the record level of 2,830,000 acres. However, the area sown in 1962-63, 2,027,000 acres, was 15 per cent. less than the area in 1961-62, and 28 per cent. less than the area in 1960-61. The production of barley for grain in 1962-63, 39,579,000 bushels, was 5 per cent. less than production in 1961-62, and 42 per cent. less than the record production of 67,970,000 bushels in 1960-61. The area, production and yield per acre of barley for grain in the several States for the years 1958-59 to 1962-63, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

BARLEY FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

(a) Less than 500 acres.

(b) 50 lb. per bushel.

(c) Less than 500 bushels.

For Australia, 77 per cent. of the area of barley for grain in 1962-63 was sown with 2-row barley, while the remainder consisted of 6-row varieties. The proportion, however, varied considerably in the several States. The utilization of barley during the season ended November, 1963, was as follows:—exports, 12,069,000 bushels; malting and distilling, 9,500,000 bushels; pearl barley, 150,000 bushels; seed and stock feed, 16,089,000 bushels.

The following table sets out the acreage and production of 2- and 6-row barley in Australia during the seasons 1958-59 to 1962-63 and the averages for the three years ended 1938-39, 1948-49 and 1958-59.

## BARLEY, 2- AND 6-ROW: AREA AND PRODUCTION, AUSTRALIA

Period	Area ('000 acres)			Production ('000 bushels)(a)			Yield per acre (bushels)(a)		
	2-row	6-row	Total	2-row	6-row	Total	2-row	6-row	Total

1938-39 ..	523	90	613	8,963	1,271	10,234	17.1	14.1	16.7
1948-49 ..	769	97	866	15,142	1,604	16,746	19.7	16.5	19.3
1958-59 ..	1,809	389	2,198	41,633	5,941	47,574	23.0	15.3	20.7
<b>Year—</b>									
1958-59 ..	1,965	416	2,381	54,624	8,352	62,976	27.8	20.1	26.5
1959-60 ..	(b)1,868	(b) 499	2,379	b 25,676	(b)8,085	34,179	(b) 13.7	(b) 16.2	14.3
1960-61 ..	(b)2,157	(b) 658	2,830	b 55,691	b 11,935	67,970	(b) 25.8	(b) 18.1	24.0
1961-62 ..	(b)1,777	(b) 587	2,383	b 31,739	(b)9,158	41,504	(b) 17.9	(b) 15.6	17.4
1962-63 ..	1,553	474	2,027	31,370	8,209	39,579	20.2	17.3	19.5

(a) 50 lb. per bushel.

(b) Excludes Tasmania.

A graph showing the production of barley in Australia since 1935-36 appears on page 995 of Year Book No. 49, and a map showing the distribution of barley growing areas throughout Australia in 1962-63 appears on page 1014.

(v) *Prices.* The average wholesale price for 2-row English malting barley in the Melbourne market during 1962-63 was 15s. 1d. compared with 14s. 9d. in 1961-62.

(vi) *Value of Barley Crop.* The estimated gross value of the barley crop in each State for the 1962-63 season and the value per acre are shown in the following table.

## BARLEY FOR GRAIN: VALUE OF CROP, 1962-63

Particulars		N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value ..	£'000	3,236	2,655	2,385	9,576	3,038	438	21,328
Value per acre ..	£	14.7	13.7	15.9	9.1	7.8	22.2	10.5

(vii) *Exports.* South Australia was the principal exporting State in 1962-63, while the United Kingdom, Italy, the Netherlands and Greece were the principal countries to which barley was shipped. There was a substantial fall in exports in 1962-63 compared with 1961-62. Exports to China (Mainland) fell to zero, while there were also significant decreases in exports to the Federal Republic of Germany and the United Kingdom. Particulars of exports of Australian produced barley for the years 1958-59 to 1962-63 are shown in the following table.

## BARLEY: EXPORTS, AUSTRALIA

Particulars		1958-59	1959-60	1960-61	1961-62	1962-63
Quantity ..	'000 bus.	29,924	25,013	33,900	31,435	10,322
Value ..	£A.'000 f.o.b.	16,898	11,541	14,329	14,954	5,229

Imports of barley into Australia are not recorded separately, but are considered to be negligible.

In addition to exports of barley grain, there are also exports of Australian pearl and Scotch barley, the total for 1962-63 amounting to 283,286 lb., valued at £9,951, consigned mainly to Malaya.

(viii) *Malt.* (a) *Production.* Details of the quantity of grain used and the production of barley malt in the years 1958-59 to 1962-63 are given in the following table.

## BARLEY MALT: GRAIN USED AND MALT PRODUCED, AUSTRALIA

Particulars		1958-59	1959-60	1960-61	1961-62	1962-63
Grain used ..	'000 bus.(a)	8,198	8,539	9,020	10,312	10,338
Malt produced ..	'000 bus.(b)	8,108	8,435	9,015	10,207	10,209

(a) 50 lb. per bushel.

(b) 40 lb. per bushel.

(b) *Exports.* Since 1952-53, the production of malt in Australia has been sufficient to meet local requirements and to provide a margin for export. Exports of Australian produce amounting to 2,871,668 bushels (value £2,712,157) and 2,980,125 bushels (value £2,882,936) were recorded in 1961-62 and 1962-63 respectively.

(ix) *World Production.* In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1962 were the United States of America, France, and the United Kingdom. China is also normally a major producer, but details for 1962 are not available. Australian production in that year was approximately one per cent. of the world total.

According to estimates made by the United States Department of Agriculture, world production of barley in the year 1962 amounted to 3,875 million bushels harvested from 149.0 million acres, equivalent to a yield per acre of 26.0 bushels. This compared with the production of 3,455 million bushels in the previous year from 141.8 million acres, and a yield per acre of 24.4 bushels.

4. *Sorghum for Grain.*—Grain sorghum is a summer-growing annual palatable to stock, and more drought- and frost-resistant than maize. It requires a summer rainfall. The growing of this crop for grain on an extensive scale is a comparatively recent development in Australia and, as with other cereals, operations are highly mechanized.

The climatic conditions of Queensland and northern New South Wales are particularly suited to the growing of sorghum, and development has so far been restricted mainly to these areas, more particularly to Queensland. The grain produced is fed to livestock and has become an important source for supplementing other coarse grains for this purpose. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet).

In Queensland, the growing of grain sorghum is concentrated in the Burnett, Dawson-Callide areas and in the central highlands. In New South Wales, the north western slopes and Murrumbidgee Irrigation Area are the main areas. This crop is also suitable for the semi-tropical areas of the Northern Territory and the Kimberleys.

Particulars of the area and production of sorghum grown for grain in recent years are given in the following table.

GRAIN SORGHUM: AREA, PRODUCTION AND YIELD PER ACRE

Season	Area			Production(a)			Yield per acre(a)		
	N.S.W.	Q'land	Aust. (b)	N.S.W.	Q'land	Aust. (b)	N.S.W.	Q'land	Aust. (b)

(a) 60 lb. per bushel.

(b) Includes small areas sown and quantities produced in other States.

5. *Maize for Grain.*—(i) *General.* Like sorghum, maize is a summer cereal demanding specific soil and climatic conditions. It is grown for grain, chiefly in the south-east and Atherton Tablelands of Queensland and the north coast and northern tablelands of New South Wales. The area so cropped in these States during the 1962-63 season was 98 per cent. of the total for Australia. On the Atherton Tablelands in Queensland, and generally in New South Wales and Victoria, it provides a stock feed for dairy cattle, fat stock and pigs. In times of drought, it is also used as a sheep feed. In all States, except South Australia, however, this crop is grown to some extent for green fodder and silage, particularly in connexion with the dairying industry. There is practically no difference between grain and fodder varieties.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize has led to a parallel development in the specialized industry of growing hybrid strains for seed.

(ii) *Area, Production and Yield per Acre.* The area, production and yield per acre of maize for grain in each State for the years 1958-59 to 1962-63 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are given in the following table. Separate details for hybrid and other varieties are shown for all States except Western Australia for 1962-63.

(a) Not available for publication. (b) Incomplete. See footnote (a). (c) 56 lb. per bushel. (d) Less than 500 bushels.

The average yield for Australia for the five-year period ended 1962-63 was 35.5 bushels per acre. Among principal producing countries, the United States of America averaged 64.2 bushels per acre and Italy 43.2 bushels for 1962.

(iii) *Price of Maize.* The average wholesale price of maize in the Melbourne market in 1962-63 was 16s. 10½d. a bushel compared with 18s. 1½d. in 1961-62.

(iv) *Value of Crop.* The estimated gross value of the crop in each State for the 1962-63 season and the value per acre were as follows.

## MAIZE FOR GRAIN: VALUE OF CROP, 1962-63

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	1,600	143	3,018	(a)	1	..	4,762
Value per acre .. £	34.4	39.4	18.9	(a)	15.6	..	22.7

(a) Not available for publication.

(v) *Exports of Maize and Maize Products.* Details of exports of Australian-produced maize for the five years ended 1962-63 are shown on the next page.

## MAIZE: EXPORTS, AUSTRALIA

Particulars			1958-59	1959-60	1960-61	1961-62	1962-63
Quantity	..	.. '000 bus.	15	22	3	2	552
Value..	..	.. £A.'000 f.o.b.	10	15	4	3	240

The increase in exports of maize in 1962-63 was due principally to the shipment of 474,000 bushels to Japan, a country to which there had been no previous exports.

Imports of maize into Australia are not recorded separately, but are considered to be negligible.

Exports of cornflour in 1962-63 were 130,100 lb., valued at £2,686, compared with 16,100 lb. valued at £1,033 in 1961-62. These figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are not recorded separately.

(vi) *World Production.* According to figures issued by the United States Department of Agriculture, world production of maize in the year 1962 amounted to 7,485 million bushels, harvested from 241 million acres, giving an average yield per acre of 31.1 bushels. This compared with production in the previous year of 7,460 million bushels from 240 million acres, and an average yield of 31.1 bushels per acre.

The United States of America is the most important maize-producing country in the world, and during the three years ended 1962 the area sown to maize in that country averaged 62 million acres or 26 per cent. of the world total. During the same period, production averaged 3,723 million bushels or about 50 per cent. of the world total.

6. Rice.—(i) *General.* The principal rice-growing areas of the world are confined almost entirely to Asia, although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25, when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a surplus became available for export. The acreage sown in this area is controlled, as the quantity of water available is limited.

Until recent years, rice-growing in Australia was practically confined to the Murrumbidgee Irrigation Area in New South Wales. However, there is now some experimental rice-growing in Western Australia and the Northern Territory, but particulars are not available for publication. Small quantities have also been produced in Queensland in some years.

(ii) *Area, Production and Exports.* Details relating to area, production, and Australian-produced exports for the years 1958-59 to 1962-63 are shown in the following table.

## RICE: AREA, PRODUCTION AND EXPORTS, AUSTRALIA(a)

Season	No. of holdings growing rice(b)	Area	Production (paddy rice)		Average yield (paddy) per acre	Exports(c)	
			Quantity	Gross value(d)		Un-cleaned	Cleaned
			Acres	'000 bushels (e)	£'000	Bushels (e)	Cwt.
1958-59 .. ..	775	47,054	6,619	4,731	140.7	182,583	704,360
1959-60 .. ..	852	48,950	6,732	4,450	137.5	265,449	1,055,821
1960-61 .. ..	787	46,117	6,001	4,125	130.1	359,441	876,175
1961-62 .. ..	878	50,185	7,045	3,832	140.4	280,540	748,920
1962-63 .. ..	956	54,929	7,129	3,838	129.8	239,820	905,580

(a) Particulars of area and production for Western Australia and Northern Territory are not available for publication, and are excluded. (b) Twenty acres or more in area. (c) Imports into Australia are not recorded separately, but are considered to be negligible. (d) Excludes the value of straw. (e) 42 lb. per bushel.

The bulk of Australia's exports of rice in 1962-63 was shipped to Papua and New Guinea, the Pacific Islands and the United Kingdom.

### § 4. Fodder Crops

1. Hay.—(i) *General.* Because of the comparatively unreliable nature of rainfall in Australian agricultural and pastoral areas, hay as a fodder crop occupies a position of importance. In 1962-63, hay represented 8 per cent. of the total area of crops.

Up to 1946-47, hay, in terms of area, was second only to wheat for grain, but in more recent years it has been supplanted by green fodder (for feeding-off) and oats for grain.

Hay is generally considered to include cereal hay, meadow hay and lucerne hay. Cereal crops cut early for hay contain a higher level of protein than those cut late.

In most European countries, hay is made almost entirely from meadow pastures, but in Australia a very large proportion is made from cereals and lucerne, the hay being stored loose, in sheaves or baled. Because of its bulk, hay is usually produced for individual or local use, except in times of drought, when large inter-regional transfers may take place.

Meadow hay requires greater care in preparation than cereal hay. Baling must be spaced carefully behind mowing to ensure that the bales are dry enough to prevent moulding, but not so dry as to result in excessive leaf loss. The leaves contain the bulk of the protein. Lucerne hay requires similar attention.

(ii) *Area and Production.* For a number of reasons, particularly the variations in the relative prices of grain and hay and whether the season is favourable or not for a grain crop, the area of hay is apt to fluctuate considerably. The area, production and yield per acre of hay of all kinds in the several States during the years 1958-59 to 1962-63 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown below.

Australian Capital Territory ..	35	464	1,552	467	2,518
<b>Australia .. ..</b>	<b>218,705</b>	<b>587,354</b>	<b>386,815</b>	<b>1,527,384</b>	<b>2,720,258</b>

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1962-63 were 21.6 per cent. for oaten, 14.2 per cent. for lucerne, 8.0 per cent. for wheaten, and 56.2 per cent. for other hay.

(iv) *Value of Hay Crop.* The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1962-63 season.

**HAY: VALUE OF CROP, 1962-63**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value .. £'000	10,197	22,434	3,395	3,518	4,647	2,216	60	46,479
Value per acre .. £	17.4	17.9	39.2	12.2	13.7	13.4	23.8	17.1

(a) Includes £12,000 in the Northern Territory.

(v) *Farm Stocks of Hay.* Particulars of stocks of hay held on farms at 31st March in each year 1959 to 1963 are given in the table below.

**STOCKS OF HAY HELD ON FARMS**  
(Tons)

31st March—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust. (a)
1959 ..	1,463,334	2,464,050	166,657	679,003	290,988	311,825	9,323	5,385,180
1960 ..	1,535,252	1,766,857	203,675	304,227	292,086	255,471	10,778	4,368,346
1961 ..	1,704,486	2,640,249	155,209	648,267	258,859	327,696	12,338	5,747,104
1962 ..	1,775,977	1,847,725	231,335	496,564	254,377	305,108	12,241	4,923,327
1963 ..	1,609,639	2,197,725	194,948	470,202	273,500	333,650	6,896	5,086,560

(a) Excludes the Northern Territory, for which particulars are not available.

(vi) *Exports.* Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for overseas trade, and consequently does not figure largely among Australian exports. During 1962-63, exports amounting to 2,386 tons, valued at £48,596, were made principally to Singapore, the Federation of Malaya, and Hong Kong. There were no imports of hay in 1962-63.

2. Green Fodder.—(i) *General.* Considerable areas are devoted to the growing of green fodder, usually as an adjunct to cereal operations or as a minor crop in irrigation areas. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder or ensilage, together with areas fed off to stock as green forage.

Statistics of green fodder exclude areas which may have been sown with the intention of harvesting for grain, but which, owing to adverse conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities of barley, sorghum, maize, rye and sugar cane are also used in this way. In 1962-63, the area under green fodder (4,951,637 acres) consisted of oats (2,072,287 acres), lucerne (1,915,126 acres), wheat (220,681 acres), barley (158,180 acres), sorghum (124,372 acres), maize (39,146 acres), rye (22,124 acres), sugar cane (1,249 acres) and other crops (398,472 acres). Particulars concerning the area of green fodder in the several States during each of the years 1958-59 to 1962-63 are given in the following table.

**GREEN FODDER: AREA**  
(Acres)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Not comparable with statistics for earlier years.

In the 1962-63 season, green fodder ranked second to wheat in area of crops throughout Australia. A graph showing the area sown to green fodder appears on page 993 of Year Book No. 49.

(ii) *Value of Green Fodder Crops.* The value of these crops is variously estimated in the several States, but the Australian total, excluding Western Australia, may be taken as approximately £8,700,000 for the 1961-62 season and £9,600,000 for the 1962-63 season.

3. *Ensilage.*—(i) *General.* Ensilage is produced from herbage compacted tightly to exclude air and kept from contact with air and extraneous moisture to avoid moulding. Fermentation results in a dark mass of high protein and lactic acid content. Molasses may be added to hasten fermentation. Ensilage may be stored in pits or stacks or in constructed silos. In recent years, production of ensilage has increased substantially.

(ii) *Government Assistance.* The several State Governments devote a considerable amount of attention to the education of the farming community with regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

(iii) *Production and Stocks.* Information regarding production and farm stocks of ensilage for the years ended 31st March, 1959 to 1963, is given in the following table.

**ENSILAGE: PRODUCTION AND FARM STOCKS**  
(Tons)

## § 5. Industrial Crops

1. **Sugar Cane.**—(i) *General.* The growing of sugar cane is restricted to those coastal areas in Queensland and northern New South Wales which have suitable climatic and soil conditions. Considerable areas in more southern coastal districts of New South Wales previously devoted to this crop are now used for dairying owing to the uncertainty of rainfall.

The Bureau of Sugar Experiment Stations in Queensland renders useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

(ii) *Sugar Agreements and Marketing Arrangements.* (a) *In Australia.* Reference was made in Year Book No. 37, pages 940–1, to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. The current agreement is for the period from 1st September, 1961 to 31st August, 1967. The Commonwealth Government appointed a Committee of Enquiry in 1960 to investigate all facets of the sugar and canned fruits industries. The Committee presented its report, publication of which was restricted to a summary of conclusions and recommendations, in 1961. There was no variation of the consequent Agreement.

Production is regulated by the limited export quotas allocated under the International Sugar Agreement (*see (b) below*). At the mill level, this is established by means of mill peaks. The central collecting system used considerably assists in controlling the industry.

The Queensland Government acquires the whole of the sugar production of that State and of New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

(b) *International Sugar Agreement.* The International Sugar Agreement of 1937 was superseded by the International Sugar Agreements of 1953 and 1958. Details of the 1937 and 1953 Agreements were given in Year Books No. 40, pages 881–2, and No. 48, page 936, respectively.

The 1958 Agreement, which came into operation on 1st January, 1959, establishes basic export quotas for exporting countries. The British Commonwealth is allocated a total quota, the distribution of which remains a matter for internal arrangement by the countries and territories concerned (*see (c) below*). The Australian quota for 1960 and 1961 was approximately 651,000 tons.

The quota and price provisions of the International Sugar Agreement cover only the first three years to 31st December, 1961. A conference in Geneva in 1961 failed to reach agreement on quota provisions for 1962 and 1963. The conference adjourned with a resolution that it be reconvened if circumstances became favourable for an agreement on quotas.

The principal practical effect of the adjournment of the 1961 conference is that former export limitations on participating exporting countries, including Australia, do not apply until such time as agreement on this question is again reached at a resumed session of that conference, or at a newly convened conference.

The question of convening a United Nations conference to consider re-introduction of an Agreement with quota provisions was deferred at a meeting of the International Sugar Council in April, 1963. A preparatory committee is now studying the bases and possible framework of a new Agreement.

(c) *British Commonwealth Sugar Agreement.* On 1st January, 1953, the British Commonwealth Sugar Agreement became effective. This agreement, which has been extended to 1971, provides for Australia to export a maximum of 600,000 tons per annum, subject to annual review. Of the 600,000 tons, 315,000 tons are purchased by the United Kingdom Government at an annually negotiated price and the balance is sold at world market prices plus tariff preferences where applicable. The negotiated prices for 1962 and 1963 were £Stg.45 15s. 3d. and £Stg.46 0s. 10d. In 1960 and 1961, Australia had an additional quota of 51,000 tons as its share of the increased allocation to Commonwealth exporters under the current International Sugar Agreement. This tonnage was not to receive the benefit of tariff preferences. Export limitations under the International Sugar Agreement are not applicable from 1962 onwards (*see (b) above*).

(iii) *Fruit Industry Sugar Concession Committee and Sugar Rebates.* The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund contributed by the Queensland Government on behalf of the sugar industry.

Until 15th May, 1960, a rebate of £2 4s. per ton of refined sugar used in processing approved fruit products was paid to Australian manufacturers, provided they bought the fresh fruit at prices not lower than those declared by the Committee as reasonable. This was increased to £5 per ton from 16th May, 1960.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Under the Sugar Agreement for 1961-67, the Queensland Government contributes to the fund £264,000 annually and also reimburses the Committee for the actual expenditure on export sugar rebates. Any money remaining in the fund after the payment of rebates and administrative expenses may be used by the Committee for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruit.

(iv) *Bulk Handling of Sugar.* The conversion of the Australian sugar industry to bulk handling and mechanized loading and unloading of raw sugar is well advanced. About 95 per cent. of raw sugar in Australia is now handled in bulk without being bagged at any stage.

Terminals for the bulk loading of sugar were opened at Mackay in 1957, at Lucinda and Bundaberg in 1958, at Townsville in 1959, and at Mourilyan in 1960. A second storage shed has been completed at Mackay, and additions have been commenced at Bundaberg. At Cairns, a new terminal was brought into operation in June, 1964. Approval has been given for the erection of a third storage shed at Mackay and second sheds at Townsville and Bundaberg.

Bulk receiving facilities are in operation at all Australian refineries.

(v) *Area.* A brief outline of the development of the industry was included in earlier issues of the Year Book (*see* No. 38, p. 985). The area of sugar cane in Australia for the seasons 1958-59 to 1962-63 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

SUGAR CANE: AREA(a)  
(Acres)

Season	New South Wales			Queensland			Australia			Total
	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	
Average for three years ended—										
1938-39	10,468	10,366	n.a.	247,632	89,690	n.a.	258,100	100,056	n.a.	n.a.
1948-49	7,687	8,666	338	230,905	90,448	12,891	238,592	99,114	13,229	350,935
1958-59	11,094	9,462	619	360,709	110,786	12,596	371,803	120,248	13,215	505,266
Year—										
1958-59	13,368	9,727	616	356,210	118,200	12,391	369,578	127,927	13,007	510,512
1959-60	14,248	10,510	392	299,732	151,114	11,039	313,980	161,624	11,431	487,035
1960-61	13,657	11,385	568	327,246	110,704	11,574	340,903	122,089	12,142	475,134
1961-62	14,655	11,299	482	372,223	87,831	12,339	386,878	99,130	12,821	498,829
1962-63	14,109	12,656	495	387,477	80,438	11,313	401,586	93,094	11,808	506,488

(a) Excludes areas cut for green fodder.

The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1962-63 amounted to 1,249 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants.

(vi) *Production of Cane and Sugar.* The production of sugar cane in 1962-63 was at the record level of 12.7 million tons, which was 33 per cent. higher than production in 1961-62, and 25 per cent. higher than the previous record production, that for the 1958-59 season. A graph showing the production of sugar appears on page 995 of Year Book No. 49.

In the following table, production data relating to cane and raw sugar are shown for the seasons 1958-59 to 1962-63 together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**SUGAR CANE: PRODUCTION OF CANE AND RAW SUGAR**  
(Tons)

Season	New South Wales		Queensland		Australia	
	Cane	Sugar(a)	Cane	Sugar(a)	Cane	Sugar(a)
Average for three years ended—						
1938-39 .. ..	324,531	43,419	5,215,217	760,994	5,539,748	804,413
1948-49 .. ..	283,613	35,444	4,767,291	700,053	5,050,904	735,497
1958-59 .. ..	356,324	43,881	9,221,497	1,260,564	9,577,821	1,304,445
Year—						
1958-59 .. ..	471,798	58,870	9,740,795	1,353,543	10,212,593	1,412,413

1961-62 .. ..	555,858	67,448	9,020,734	1,315,393	9,576,592	1,382,841
1962-63 .. ..	637,310	79,733	12,098,582	1,770,084	12,735,892	1,849,817

(a) Raw sugar at 94 net titre.

(vii) *Average Production of Cane Sugar.* Owing to climatic variations, the crop in New South Wales matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 16 months is sufficient. The average yields of cane and sugar per acre for the years 1958-59 to 1962-63 and for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown below. Allowance should be made in interpreting these figures for the disparity in maturing periods noted above.

**SUGAR CANE AND SUGAR: YIELD PER ACRE**  
(Tons)

Season	New South Wales			Queensland			Australia		
	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar
Average for three years ended—

(viii) *Production and Utilization.* Details of the production and utilization of sugar for the years 1958-59 to 1962-63 are shown below. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

### SUGAR: PRODUCTION AND UTILIZATION, AUSTRALIA

Year	Changes in stocks (a)	Pro-duction (raw)	Exports (b)	Miscel-laneous uses(c)	Consumption in Australia(d)	
					Total	Per head
	'000 tons	'000 tons	'000 tons	'000 tons	'000 tons	lb.
1958-59 .. ..	+10.3	1,353.4	827.4	18.4	497.3	112.0
1959-60 .. ..	+25.6	1,270.6	725.2	18.6	501.2	110.4
1960-61 .. ..	-10.3	1,324.8	815.6	21.0	498.5	107.4
1961-62 .. ..	-2.4	1,404.2	862.5	18.0	526.1	111.1
1962-63 .. ..	+110.4	1,831.6	1,175.8	17.8	527.6	109.3

(a) Includes allowance for estimated sugar content of imported foodstuffs. (b) Includes sugar content of manufactured products exported. (c) Includes refining losses and quantities used in golden syrup and treacle. (d) Includes sugar content of manufactured products consumed.

(ix) *Consumption in Factories.* The quantity of refined sugar used in factories in 1962-63 amounted to 308,665 tons compared with 309,577 tons in 1961-62 and 307,000 tons in 1960-61. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1962-63, consumption by factories engaged in the production of jams, jellies and preserved fruit amounted to 99,307 tons, by those producing confectionery, ice cream, etc., to 34,368 tons, by breweries to 46,361 tons, and by factories producing aerated waters, cordials, etc., to 47,819 tons.

(x) *Sugar By-products.* Industrial chemicals, together with large quantities of molasses, are produced as by-products in sugar mills. Further, during the period 1939 to 1960, building boards were made from the residue of crushed fibre after removal of the sugar content from sugar cane. These boards possessed high insulating and sound absorbing properties which made them particularly suitable for use in walls and ceilings. Early in the period referred to, the boards were manufactured almost entirely from crushed fibre residue, the remaining component being non-millable pine, but gradually the pine content was increased until by 1960 fibre residue was no longer being used. The main purpose for which crushed cane fibre residue is now used is furnace fuel in sugar mills.

(xi) *Sugar Prices and Returns.* The prices of sugar in Australia, from 1958 to 1962 in the case of raw sugar, and from 1956 to 1963 in the case of refined sugar (as determined under the Sugar Agreement in Australia—see para. ii (a), p. 1029), are shown in the following table.

### SUGAR: PRICES IN AUSTRALIA

Year	Raw sugar, 94 net titre			Refined sugar		
	Average return per ton received by millers and growers for—			Date of determination	Wholesale price to retailer per ton	Retail price, capital cities per lb.
	Home consumption	Exports(a)	Whole crop (a)			
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	d.	
1958 ..	54 15 0	39 8 2	45 9 11	14.5.56 to 15.5.60	82 1 0	10
1959 ..	56 8 6	40 6 2	47 9 11	16.5.60 to 31.12.63	90 5 2	11
1960 ..	62 10 6	39 19 6	49 2 1			
1961 ..	62 9 6	37 15 0	48 4 4			
1962 ..	62 11 0	41 1 10	47 19 10			

(a) Includes "excess" sugar.

Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1958-59 to 1962-63 are shown in the following table.

**RAW SUGAR(a): NET RETURNS, AUSTRALIA**  
(Source: The Queensland Sugar Board.)

Year	Proportion exported	Net value of exports per ton	Average price per ton for whole crop	Estimated value of crop
	Per cent.	£ s. d.	£ s. d.	£'000
1958-59 .. ..	60.53	39 8 2	45 9 11	64,263
1959-60 .. ..	55.42	40 6 2	47 9 11	61,131
1960-61 .. ..	59.53	39 19 6	49 2 1	67,869
1961-62 .. ..	57.66	37 15 0	48 4 4	66,653
1962-63 .. ..	67.85	41 1 10	47 19 10	88,748

(a) 94 net titre.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated comprise the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1962-63 amounted to £1,280,000. The value thus obtained represents the net market value of all raw sugar sold, which, less the rebates, is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

(xii) *Exports of Sugar.* Particulars of the exports of Australian-produced cane sugar (raw and refined) for each year from 1958-59 to 1962-63 are as follows.

**SUGAR: EXPORTS, AUSTRALIA**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Quantity .. .. tons	802,971	701,319	796,496	843,528	1,145,958
Value .. .. £A.'000 f.o.b.	32,163	26,671	35,071	33,894	45,520

2. Peanuts.—(i) *General.* Peanuts, or groundnuts, are a sub-tropical legume (and hence summer growers), the pods of which mature beneath the surface of the soil. They thus require well drained, light textured soils. At harvest, the plant is pulled, wind-rowed, field-cured for two to four weeks and then threshed to recover the pods. The main products of the industry are nuts, peanut oil, oil cake and synthetic protein fibre.

The production of peanuts in Australia is confined mainly to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory.

(ii) *Area and Production.* Details of the area and production of peanuts are given in the table below for the years 1958-59 to 1962-63.

**PEANUTS: AREA AND PRODUCTION**

Season	Area (acres)				Production (cwt.)			
	N.S.W.	Q'land	N.T.	Aust.(a)	N.S.W.	Q'land	N.T.	Aust.(a)
1958-59 .. ..	867	59,279	211	60,357	11,623	621,687	2,412	635,722
1959-60 .. ..	837	41,547	388	42,772	10,639	360,314	4,306	375,259
1960-61 .. ..	788	41,659	335	42,782	9,578	446,215	1,215	457,008
1961-62 .. ..	573	33,131	307	34,011	6,003	292,267	1,343	299,613
1962-63 .. ..	395	35,552	(b)	c 35,947	4,258	315,144	(b)	c 319,402

(a) Excludes Western Australia, for which details are not available for publication.

(b) Not available for publication.

(c) Incomplete; excludes Northern Territory.

(iii) *Value, Consumption and Trade.* The gross value of the 1962-63 crop was £1,557,000 which was approximately £216,000 more than in 1961-62. All production is consumed in Australia.

In recent years, considerable quantities of peanut kernels have been imported, chiefly from India, for the extraction of oil. Total supplies available for consumption in Australia in 1962-63 were 513,100 cwt. (shell equivalent), after allowing for a decrease of 296,420 cwt. in stocks held by the Peanut Marketing Board. Supplies were made up of 139,500 cwt. from Australian production received into store by the Board and 77,180 cwt. imported.

3. **Hops.**—(i) *General.* Hops are grown from perennial rootstocks over deep, well-drained soils in localities sheltered from the wind. The hop-bearing vine shoots are carried upon wire and coir trellises, from which they are later harvested, principally by hand. The green hops are kiln-dried and bleached with sulphur dioxide fumes, following which the cured hops are pressed into bales.

Hop growing in Australia is confined to the Derwent, Huon and Channel areas of Tasmania and the Ovens and King Valleys in Victoria. A small area is also under hops in Western Australia, near Manjimup, but the details are not available for publication.

(ii) *Production and Imports.* The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table, details of the production and imports of hops and the quantity of hops used in breweries are shown for each of the years 1958-59 to 1962-63. Exports of hops are not recorded separately, but are negligible.

#### HOPS: PRODUCTION AND DISPOSAL, AUSTRALIA

Year	Production(a)		Imports	Net available supplies (b)	Quantity used in breweries
	Quantity	Gross value			
	Cwt.	£'000	Cwt.	Cwt.	Cwt.
1958-59 .. .. .	36,499	1,273	8,471	44,970	38,664
1959-60 .. .. .	31,790	1,159	..	31,790	40,357
1960-61 .. .. .	33,099	1,179	991	34,090	40,018
1961-62 .. .. .	32,936	1,242	5,569	38,505	39,000
1962-63 .. .. .	33,629	1,285	1,337	34,966	38,202

(a) Excludes production in Western Australia, for which details are not available for publication.  
 (b) Disregards movements in stocks.

4. **Flax.**—(i) *Flax for Fibre.* This crop has a winter-growing season in Australia. The whole plant, after harvesting, is retted and scutched at local mills to recover the linen fibre and tow. The seeds may be sold to oil mills and the refuse used for stock feed.

Details of the area under flax and the production of fibre are given in the following table.

#### FLAX FOR FIBRE: AREA AND PRODUCTION

Season	Victoria	W. Aust.	Australia
AREA (ACRES)			
1958-59 .. .. .	..	2,015	2,015
1959-60 .. .. .	..	1,307	1,307
1960-61 .. .. .	430	736	1,166
1961-62 .. .. .	323	91	414
1962-63 .. .. .	419	871	1,290

FLAX FOR FIBRE: AREA AND PRODUCTION—*continued*

Season	Victoria	W. Aust.	Australia
PRODUCTION (TONS OF FIBRE)

1961-62 .. .. .	514	183	697
1962-63 .. .. .	648	2,152	2,800

(ii) *Flax for Linseed.* Fibre varieties are uneconomic for seed production, and prior to 1948-49, the growing of flax for linseed oil had not been developed extensively in Australia. Since then, however, action has been taken to develop this industry, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953, and its conclusions are contained in its Report on *Linseed and Linseed Products* dated 23rd October, 1953.

The main producing areas are the Darling Downs in Queensland, the wheat belt of New South Wales, and the western and north-eastern districts of Victoria.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1958-59 to 1962-63.

## FLAX FOR LINSEED: AREA AND PRODUCTION

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Aust.
AREA (ACRES)

1961-62 .. .. .	856	6,093	5,187	275	178	12,589
1962-63 .. .. .	2,634	8,108	14,577	290	136	25,745

5. *Cotton.*—(i) *General.* This annual shrub requires a hot climate and inter-row weed control. Lint (long fibres) is extracted from the seed cotton in the ginneries, and is used for yarn. The residue, consisting of *linters* (short fibres), kernels and hulls (outer seed coat), is treated in oil mills. From linters and kernels are produced such items as short-fibred cotton, cotton-seed oil for human consumption and industrial purposes, and meal cakes for stock feed. The hulls may be used as fuel.

The production of cotton in Australia has, until recently, been restricted mainly to the coastal river valleys of Queensland. In recent years, however, it has been grown in some other States, namely along the Murray river in New South Wales and Victoria, at Narrabri in New South Wales, and in the Kimberleys in Western Australia.

Cotton spinning and weaving industries are referred to in Chapter VI. Manufacturing Industry.

(ii) *Cotton Bounty.* For particulars of the *Cotton Bounty Act* 1951, and amendments of 1952, 1955 and 1957, see page 1044 of Year Book No. 49.

Under the *Raw Cotton Bounty Act* 1963, the Commonwealth pays a bounty on raw cotton produced and sold for use in Australia at the rate of 16.125d. per lb. for Middling 1" white, with premiums and discounts on grades and staples above and below. The bounty is for a period of five years from 1st January, 1964.

(iii) *Area and Production.* In the five seasons 1958-59 to 1962-63, the area sown and quantity of unginned cotton produced have increased more than threefold. The yield per acre in the same period has risen by 9 per cent.

The area under cultivation and the production in Australia for the years 1958-59 to 1962-63 are shown hereunder.

#### COTTON: AREA AND PRODUCTION, AUSTRALIA(a)

Season	Area sown	Production of cotton			Average yield per acre sown	
		Unginned		Ginned(b)	Unginned	Ginned
		Quantity	Gross value			
	Acres	'000 lb.	£'000	'000 lb.	lb.	lb.
1958-59.. ..	10,493	4,004	249	1,492	382	142

1961-62.. ..	28,844	10,948	647	3,830	380	133
1962-63.. ..	37,689	15,762	938	5,403	418	143

(a) Incomplete; excludes Victoria, Western Australia and Northern Territory, for which particulars are not available for publication. (b) Source: Queensland Cotton Marketing Board.

(iv) *Consumption of Raw Cotton.* The following table shows details of the availability and actual consumption of raw cotton in Australian factories during each of the five years ended 1962-63.

#### RAW COTTON: PRODUCTION, IMPORTS AND CONSUMPTION, AUSTRALIA ('000 lb.)

Year	Production(a)	Imports	Total	Consumption of raw cotton
1958-59 .. ..	1,492	43,984	45,476	47,323
1959-60 .. ..	3,592	41,519	45,111	51,689
1960-61 .. ..	5,540	41,842	47,382	45,432
1961-62 .. ..	3,830	37,735	41,565	44,543
1962-63 .. ..	5,403	42,543	47,946	47,930

(a) Source: Queensland Cotton Marketing Board.

6. *Tobacco.*—(i) *General.* This summer-growing annual requires a temperate to tropical climate, adequate soil moisture and a frost-free period of approximately five months. These requirements necessarily restrict its growth to particular areas. These include the Mareeba area (northern Queensland), the neighbourhood of Texas (Queensland and New South Wales border), and near Myrtleford (Victoria). Smaller quantities are grown also near Manjimup in Western Australia. The best quality Australian tobaccos are grown in Queensland.

In Australia, flue-curing is the main method of drying used.

(ii) *Marketing.* Between 9th May, 1941, and 24th September, 1948, all leaf was under the direct control of the Australian Tobacco Board, and prices were paid on leaf appraisal. Subsequently, sales have been by open auction through the Tobacco Leaf Marketing Board (Queensland and northern New South Wales) and the Victorian Tobacco Growers Association Ltd. (southern New South Wales and Victoria). The 1962-63 Western Australian crop was also marketed through the Victorian Association.

(iii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and the Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53. The terms of reference of this committee are given in Year Book No. 47, page 935.

In 1955, the Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme were estimated at £168,000, of which the Commonwealth Government and tobacco manufacturers each agreed to contribute half. Annual contributions are made to the fund by the Commonwealth and State Governments, tobacco growers and manufacturers. A Tobacco Industry Trust Account was established to receive these contributions. This programme commenced in 1956. During the first seven years of the operation of the Trust Account, £1,229,139 was paid to State and Commonwealth Departments. The allocation for 1963-64 was £237,158.

A sub-committee on curing was formed in 1960 to investigate new curing methods. A grant of up to £10,000 was made available for initial investigations. In 1961, a Research Sub-Committee was established to review annually scientific programmes and finance in relation to the Tobacco Industry Trust Account and make recommendations to the Central Tobacco Advisory Committee.

(iv) *Other Assistance and Research.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, are given in Year Book No. 40, pages 895-6, and in previous issues. In 1962, the Commonwealth Government agreed to make available a further annual grant of £24,000 for additional tobacco extension services by State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development in the mid-1930's of a technique to control blue mould in the seed bed. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices.

(v) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf, provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages were increased from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946, to 43 per cent. and 40 per cent. respectively from 1st July, 1962. The percentage to apply to both cigarettes and tobacco from 1st July, 1963, is 40 per cent. and from 1st July, 1964 to 30th June, 1966, is 41.5 per cent. In 1962-63, the quantity of cured leaf used in tobacco factories in Australia amounted to 51.0 million lb., of which 20.3 million lb. was of local origin. The balance was imported, chiefly from the United States of America and Rhodesia.

(vi) *Area and Production.* Both area and production of tobacco in 1962-63 were considerably higher than those in the previous year. Area, at 29,381 acres, was a record, exceeding by 0.6 per cent. the previous record established in 1960-61.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1958-59 to 1962-63, together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## TOBACCO: AREA AND PRODUCTION

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
AREA (ACRES)

1962-63 ..	3,163	9,844	16,346	..	28	..	..	29,381

## PRODUCTION OF DRIED LEAF ('000 lb.)

Average for three years ended—								
1938-39 ..	471	1,603	2,173	17	741	104	(b)	5,109
1948-49 ..	380	670	1,725	..	523	..	..	3,298
1958-59 ..	1,066	3,770	5,563	..	1,016	..	(b)	11,415
Year—								
1958-59 ..	1,158	4,885	6,729	..	1,198	..	..	13,970
1959-60 ..	1,437	7,401	9,149	..	1,370	..	..	19,357
1960-61 ..	3,538	9,728	15,308	..	1,288	..	..	29,862
1961-62 ..	3,116	6,515	12,751	..	196	..	..	22,578
1962-63 ..	2,885	9,447	14,787	..	29	..	..	27,148

(a) Less than half an acre.

(b) Less than 500 lb.

(vii) *Oversea Trade.* Imports of tobacco and tobacco manufactures into Australia during 1962-63 were valued at £12.1 million. This included 27.4 million lb. of unmanufactured tobacco valued at £9.7 million. Exports of tobacco and tobacco manufactures, including the re-exports of imported tobacco, during 1962-63 were valued at £801,906.

## § 6. Vegetables for Human Consumption

1. *Area, Production and Trade.*—(i) *General.* Vegetables were initially grown on a large scale near the main cities, where there was ready access to reliable water supplies and to markets. More recently, the expansion of irrigation areas and improvement in transport services have resulted in their production being extended into many other areas. At present, because of the wide diversity of climatic conditions across Australia, supplies for main city markets are drawn from widely different areas, depending upon the times of maturity of the various crops. Apart from potatoes and onions, which are sold in some States through marketing boards, the bulk of vegetable trading takes place at the metropolitan markets of the cities concerned.

(ii) *Area and Production of Fresh Vegetables.* Details of the areas planted and production of individual kinds of vegetables are shown below for the seasons 1960-61 to 1962-63. Certain particulars shown are incomplete in that details for specific vegetables in some States are either not available, or are not available for publication. For further information, see the bulletin *Primary Industries, Part I.—Rural Industries.*

## FRESH VEGETABLES FOR HUMAN CONSUMPTION: AUSTRALIA

Vegetable	1960-61		1961-62		1962-63	
	Area sown	Production	Area sown	Production	Area sown	Production

Turnips, swede and white	1,759	8,701	1,859	12,269	1,268	9,116
All other .. ..	30,939	..	30,734	..	34,804	..
<b>Total .. ..</b>	<b>256,153</b>	<b>..</b>	<b>267,150</b>	<b>..</b>	<b>288,496</b>	<b>..</b>

(iii) *Processed Vegetables.* Total production of canned vegetables in 1962-63 amounted to 129,236,000 lb., the principal types produced being green peas (including mint-pro peas), 30,780,000 lb.; green beans, 8,561,000 lb.; baked beans (including pork and bean), 27,350,000 lb.; asparagus, 9,146,000 lb.; beetroot, 18,026,000 lb.; and mushrooms, 5,456,000 lb.

The production of dehydrated vegetables during 1962-63 amounted to 612,000 lb., while the production of potato crisps, chips and flakes was 10,827,000 lb.

There has been rapid development in the quick-frozen vegetable industry. Data were collected for the first time in 1957-58, when 13,846,000 lb. of frozen vegetables were produced, made up primarily of 10,131,000 lb. of peas and 2,540,000 lb. of beans. In 1962-63, production had risen to 47,234,000 lb., of which 33,116,000 lb. were peas and 9,920,000 lb. were beans.

(iv) *Consumption of Vegetables.* Details of the estimated consumption of vegetables for a series of years ending 1962-63 are shown in Chapter XXX. Miscellaneous.

(v) *Imports and Exports of Vegetables (values in £A. f.o.b.).* The quantity and value of oversea exports of pulse and fresh vegetables during 1962-63 were respectively:—pulse, 12,452 tons, £462,454; onions, 7,097 tons, £208,328; potatoes, 15,819 tons, £424,523; other vegetables, 3,486 tons, £292,618. Imports of pulse amounted to 7,496 tons, valued at £539,760, while imports of fresh vegetables in total were 1,175 tons, valued at £212,944.

In 1962-63, exports of vegetables preserved in liquid consisted of:—asparagus, 2,056,295 lb., £273,157; beans (including baked), 166,113 lb., £12,476; peas, 227,312 lb., £17,550; tomatoes, 131,374 lb., £9,316; other vegetables, 544,606 lb., £51,091.

2. *Potatoes.*—(i) *General.* This crop requires deep friable soils, which in Australia are usually basaltic, alluvial, or swampy in origin. Fertilizer requirements, which are generally high, vary with the type of soil. Potatoes are killed by heavy frost, but require only moderate temperatures for growth. Mechanical planters and diggers are used to a variable extent depending upon a variety of factors including terrain, state of the soil and scale of operations.

Seed certification schemes, which operate in all States except Queensland, provide a supply of seed which is free from viral, fungal and bacterial diseases.

In Australia, potatoes are used almost entirely for human consumption and not for the production of starch or alcohol. They are rarely used as stock feed.

(ii) *Marketing.* Potato marketing boards were established in all States except Tasmania under separate State legislation after Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948. The life of the Queensland Board was not extended when its term ended in 1954. The New South Wales Board was voted out by growers in 1956, and the Victorian Board also ceased functioning in that year. The boards in South Australia and Western Australia are the only statutory boards still in operation.

(iii) *Area, Production, and Yield per Acre.* Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands and the south-western and Gippsland districts. Until 1958-59, Tasmania (where production is mainly in the north-west) came next in order of acreage sown, although production exceeded that of Victoria in some of the war years. Since 1958-59, however, New South Wales, which had previously occupied third position, has supplanted Tasmania as the second most important State in area sown. New South Wales production is chiefly in the tablelands districts.

The area sown, production, and yield per acre of potatoes in each State during the years 1958-59 to 1962-63 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown hereunder. A graph showing production since 1935-36 appears on page 996 of Year Book No. 49.

(a) Not available for publication.

(b) Incomplete; excludes Northern Territory.

(iv) *Gross Value.* The estimated gross value of the potato crop of each State for the 1962-63 season and the value per acre are shown in the following table.

#### POTATOES: VALUE OF CROP, 1962-63

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	4,614	3,306	2,027	1,195	1,795	1,039	4	13,980
Value per acre £	168	77	119	202	276	75	103	123

(v) *Consumption.* The annual consumption of potatoes in Australia during each of the three years 1960-61 to 1962-63 amounted to 400,713 tons, 459,572 tons and 590,511 tons respectively, or 86.4 lb., 97.1 lb. and 122.4 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 53,000 tons annually over this period.

(vi) *Exports.* Details showing exports for the years 1958-59 to 1962-63 are given in the following table.

## POTATOES: EXPORTS, AUSTRALIA

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Quantity .. .. tons	4,470	4,742	5,219	4,121	15,819
Value .. .. £A.'000 f.o.b.	151	134	195	160	425

The increase in exports in 1962-63 was due principally to an increase in shipments to Singapore and Ceylon. There were no imports of potatoes into Australia in 1962-63.

3. *Onions.*—(i) *Area, Production, and Yield.* Until recently Australia's onion supply came chiefly from Victoria. However, during the last five years, Victorian production has decreased until in one season, 1960-61, it was exceeded by that of Queensland. The Victorian crop consists almost entirely of brown onions, and the bulk of the crop is grown in a small section of the Western Division of the State, where the volcanic ash soils have been found to be particularly suitable for onion growing on a commercial scale. Most of Queensland's onion production is grown in the Lockyer Valley, and consists mainly of brown varieties. Details of the area, production and yield per acre are given in the following table for the years 1958-59 to 1962-63 together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59. A graph showing production since 1935-36 appears on page 996 of Year Book No. 49.

(a) Not available for publication.

(b) Includes a small area and production in Northern Territory but excludes Australian Capital Territory.

(ii) *Gross Value.* The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1962-63 season.

**ONIONS: VALUE OF CROP, 1962-63**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Aggregate value £'000	205	695	456	263	169	25	1	(a)	(b)1,814
Value per acre £	256	150	120	279	332	316	223	(a)	(b) 169

(a) Not available for publication.

(b) Incomplete; excludes Australian Capital Territory.

(iii) *Consumption.* The annual consumption of onions in Australia averaged 57,840 tons or 12.1 lb. per head of population during the three years ended 1962-63.

(iv) *Exports.* Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1962-63, exports amounted to 7,097 tons, valued at £208,328, and were shipped mainly to Singapore, Hong Kong and Japan. The quantity of exports in 1961-62 was 2,370 tons, valued at £108,660. Imports of onions amounted to 260 tons, valued at £7,866 in 1961-62, and 59 tons, valued at £2,276 in 1962-63.

## § 7. Fruit and Vineyards

1. *Fruit.*—(i) *General.* The varieties of fruit grown differ in various parts of the States, ranging from pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruit (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are grown extensively. The principal varieties grown in Victoria are apples, pears, peaches, oranges and apricots. In Queensland, apples, pineapples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to oranges, apples, peaches, apricots and pears, almonds and olives are grown extensively. In Western Australia, apples, oranges, plums and pears are the chief varieties. In Tasmania, apples occupy over three-quarters of the fruit-growing area, but small fruit, such as currants, raspberries and gooseberries, are grown extensively, the balance of the area being mainly taken up with pears and apricots.

(ii) *Overseas Marketing of Fruit.* (a) *Apples and Pears.* The *Apple and Pear Organization Act 1938-1960* provides for the establishment of an Australian Apple and Pear Board comprising representatives of growers, exporters, employees and the Commonwealth Government. A representative in London has also been appointed by the Board. An export levy to meet the expenses of the Board is provided for in the *Apple and Pear Export Charges Act 1938-1960*.

The function of the Board is the organization and control of exports of fresh apples and pears, and it has the power to regulate shipments, determine export quotas, allocate consignments from each State and recommend the licensing of exporters. The Board contributes to apple and pear publicity activities overseas.

(b) *Canned Fruit.* The *Canned Fruits Marketing Act 1963*, which was introduced in January, 1964, replaced the *Canned Fruits Export Control Act 1926-1959* under which the overseas marketing of canned fruit was initially organized (see Year Book No. 49, p. 1050). The Australian Canned Fruits Board, which is constituted under the Act, determines the terms and conditions for overseas sales. The Board exercises this control through a system of export licences. The Board, whose membership was increased from five to eleven members and which was granted greater powers under the 1963 Act, comprises representatives of the Commonwealth Government (one), canners of deciduous fruit (six), growers of deciduous fruit (three), and pineapple interests (one). The Board maintains a London office. The *Canned Fruits Export Charges Act 1926-1956* provides for a levy on exports to meet the Board's expenses, which include contributions to overseas publicity connected with the canned fruit industry. In 1963, an excise duty was imposed by the *Canned Fruits Excise Act 1963* on canned deciduous fruit entered for domestic consumption, and the proceeds of the duty are made available to the Board to assist in the promotion of overseas sales of deciduous fruit.

In 1959, the Australian Canned Fruits Sales Promotion Committee was established to promote the sale of canned deciduous fruits on the home market and overseas. The operations of the Committee are financed by a levy on fruit accepted by the canneries for the production of canned fruit. The Committee comprises representatives of growers and processors of canning fruit and a representative of the Commonwealth Government.

(iii) *Area and Production of Fruit.* The area under fruit in Australia has been increasing steadily in recent years, until record levels were reached in 1961-62 and again in 1962-63. Increases were recorded in all States in 1962-63. The following table sets out the area under fruit in the several States for the seasons 1958-59 to 1962-63.

## FRUIT: AREA

(Acres)

(v) *Production of Jams and Jellies and Preserved Fruit.* In Australia, considerable quantities of fruit are used in the production of jams and jellies and for preserving. During 1962-63, output of jams, conserves, fruit spreads, etc., amounted to 92,175,000 lb., while output of preserved fruit amounted to 430,639,000 lb. Of the latter figure, pears accounted for 122,313,000 lb., peaches 154,262,000 lb. and pineapples 41,063,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 287,000 tons in 1962-63.

(vi) *Consumption of Fruit and Fruit Products.* Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1962-63 are shown in Chapter XXX. Miscellaneous.

(vii) *Imports and Exports of Fruit.* (a) *General.* The imports of fresh fruit into Australia are negligible, while those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values (£A. f.o.b.) of the shipments in 1962-63 amounted to £14,985,000 and £9,552,000 respectively. Apples constitute the bulk of the fresh fruit exported, although exports of pears and citrus fruit are considerable.

(b) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1958-59 to 1962-63 are shown in the following table.

## FRESH AND FROZEN FRUIT: EXPORTS, AUSTRALIA

(a) Includes exports of all other fresh and frozen fruit.

(c) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1958-59 to 1962-63 are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq and Iran. The export figures include particulars of some re-exported dried fruit.

## DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA

Year	Imports(b)		Exports	
	Quantity	Value	Quantity	Value
	'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.
1958-59 .. ..	8,411	203	3,352	482
1959-60 .. ..	10,791	310	6,221	703
1960-61 .. ..	9,178	303	8,199	932
1961-62 .. ..	8,266	314	5,961	782
1962-63 .. ..	8,939	296	6,611	952

(a) Excludes raisins and currants dealt with separately under Vineyards (see p. 1048). (b) Dates and figs only.

(d) *James and Jellies.* Exports of jams and jellies in 1962-63 were 10,160,000 lb., valued at £A.705,000 f.o.b., compared with 6,671,000 lb., valued at £A.473,000 f.o.b. in 1961-62. Imports of jams and jellies in 1962-63 were 1,581,000 lb., valued at £A.138,000, compared with 1,617,000 lb. valued at £A.133,000 in 1961-62.

(e) *Preserved Fruit (values in £A. f.o.b.).* The total value of fruit preserved in tins or other airtight containers, or pulped, imported into Australia during 1962-63 was £141,652. Large quantities of fruit preserved in tins or other airtight containers are normally exported from Australia, the quantity recorded in 1962-63 being 76,830 tons valued at £10,632,932. Exports in 1962-63 were made up principally of pears (34,221 tons), peaches (24,098 tons), pineapples (7,012 tons) and apricots (4,039 tons). In addition, the exports of pulped fruits during 1962-63 amounted to 1,782 tons valued at £309,607.

2. *Vineyards.*—(i) *General.* Grapes require a warm to hot climate and a predominantly winter rainfall of seventeen inches or more. Freedom from late spring frosts is essential.

Grapes are grown for wine-making, table use and drying. In Australia, wine is generally produced from non-irrigated crops, and dried fruits from the inland irrigation areas, but table grapes and grapes for fortified wines may be produced in both areas. The main wine producing areas are the Barossa valley (South Australia), Hunter valley (New South Wales), Rutherglen and Stawell districts in Victoria, and the Swan valley (Western Australia). Nearly all the dried fruit is produced along the River Murray and its tributaries, with small localized areas in the other States.

(ii) *Area of Vineyards.* The area under vineyards in the 1962-63 season in Victoria and South Australia constituted 78 per cent. of the total area of vineyards. The total area of vines in the several States during each of the years 1958-59 to 1962-63 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

## VINEYARDS: AREA

<b>Total .. ..</b>	<b>17,704</b>	<b>45,662</b>	<b>3,237</b>	<b>58,266</b>	<b>8,685</b>	<b>133,554</b>

(a) Excludes particulars for Northern Territory and Australian Capital Territory, which are not available for publication.

NOTE.—There are no vineyards in Tasmania.

(iii) *Wine Industry.* (a) *General.* A large proportion of the wines produced in Australia are of the sweet fortified Spanish and Portuguese types, the remainder including Burgundy type wines and the light table wines, such as clarets and hocks.

Details of the Wine Research Trust Fund are given in Year Book No. 47, page 927.

(b) *Overseas Marketing of Wine.* The *Wine Overseas Marketing Act* 1929-1963 was introduced to place the overseas marketing of surplus wine on an orderly basis. The Australian Wine Board, consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board also engages in wine publicity and trade promotion activities both in Australia and overseas. In London, the Board maintains an office and an Australian Wine Centre, which is both a retail outlet for Australian wines and brandy and a medium for promoting interest in these products. The *Wine Grapes Charges Act* 1929-1961 provides for the imposition of a levy on all grapes used in Australia for the manufacture of wine, brandy and spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

(c) *Production and Consumption.* In 1962-63, the total production of wine (beverage and distillation) in Australia was 29.9 million gallons, while total consumption of beverage wine was 12.6 million gallons (1.16 gallons per head of population). Similar particulars for 1961-62 are 41.7 million gallons and 12.0 million gallons (1.13 gallons per head of population) respectively.

The quantity of wine produced in the several States during the 1958-59 to 1962-63 seasons, together with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, are shown in the following table.

**WINE: PRODUCTION<sup>(a)</sup>**  
(\*000 gallons)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Aust.
Average for three years ended—

1962-63 .. ..	5,858	2,433	28	20,785	789	29,893

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallonage of spirits added in wine fortifying.

(d) *Exports and Imports of Wine (values in £A. f.o.b.)*. Imports for 1962-63 amounted to 90,598 gallons valued at £189,968 compared with 82,153 gallons valued at £176,013 in the previous year. During 1962-63, Italy supplied 39,964 gallons valued at £50,212, France supplied 19,588 gallons valued at £74,902, and the Federal Republic of Germany supplied 9,119 gallons valued at £25,168.

Exports in 1962-63 totalled 1,614,132 gallons, of which the United Kingdom received 1,102,169 gallons, Canada 287,489 gallons, New Zealand 79,060 gallons, Hong Kong 18,123 gallons, and other countries 127,291 gallons. Exports of Australian-produced wine for the five years ended 1962-63 are shown in the following table.

**WINE: EXPORTS FROM AUSTRALIA**

Year	Quantity (gallons)			Value (£A. f.o.b.)		
	Sparkling	Other	Total	Sparkling	Other	Total
1958-59 .. ..	5,185	1,740,280	1,745,465	10,861	1,139,840	1,150,701
1959-60 .. ..	6,436	1,738,616	1,745,052	19,625	1,245,241	1,264,866
1960-61 .. ..	11,441	1,884,978	1,896,419	29,786	1,273,079	1,302,865
1961-62 .. ..	5,145	1,664,984	1,670,129	17,100	1,368,930	1,386,030
1962-63 .. ..	17,245	1,596,887	1,614,132	46,222	1,328,526	1,374,748

(iv) *Dried Vine Fruit Industry. (a) General.* The dry, frost-free November to March period of the lower Murray valley makes this an ideal area for dried vine fruit. Harvesting for drying takes place at the end of summer. The sun-drying process is often accelerated by using a dip of cold potash.

(b) *Overseas Marketing of Dried Vine Fruit. The Dried Fruits Export Control Act 1924-1953* was passed to organize overseas marketing of Australian dried vine fruit. The Dried Fruits Control Board, consisting of growers' representatives, members with commercial experience in marketing dried fruits, and a Government representative, controls the sale and distribution of dried fruit exports, recommends the licensing of exporters, and contributes to dried vine fruit publicity activity overseas. In conjunction with its London office, the Board has improved dried fruit marketing overseas by its system of appraisalment, regulation of shipments and advertising.

*The Dried Fruits Export Charges Act 1924-1929* provides for a levy on exports of dried fruit to defray costs and expenses incurred by the Board.

For details of the agreements which were negotiated between the Governments of the United Kingdom and Australia during the period 1946-1953, see Year Book No. 40, page 888. From 1st December, 1953, exports have been made on a trader to trader basis.

(c) *Production and Disposal of Dried Vine Fruit.* As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. Total production during the 1962-63 season amounted to 70,508 tons, while exports for the year ended December, 1963, were 54,729 tons, leaving an estimated 15,779 tons available for Australian consumption from that season's production. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The production of dried vine fruit during each of the seasons 1958-59 to 1962-63 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

**DRIED VINE FRUIT: PRODUCTION**

(a) Includes sultanas and lexias.

(d) *Exports.* The following table shows the exports of dried vine fruit during each of the years 1958-59 to 1962-63.

**DRIED VINE FRUIT(a): EXPORTS, AUSTRALIA**

Year	Raisins, sultanas and lexias		Currants		Total	
	Quantity	Value	Quantity	Value	Quantity	Value
	Tons	£A.'000 f.o.b.	Tons	£A.'000 f.o.b.	Tons	£A.'000 f.o.b.
1958-59 ..	68,240	11,213	7,580	1,050	75,820	12,263
1959-60 ..	45,634	7,726	4,540	637	50,174	8,363
1960-61 ..	48,805	7,133	7,838	1,032	56,643	8,165
1961-62 ..	60,169	8,955	4,564	620	64,733	9,575
1962-63 ..	56,696	8,029	4,208	571	60,904	8,600

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian dried vine fruit are the United Kingdom, Canada, New Zealand, and Japan. The quantities exported to these countries in 1962-63 were 29,145 tons, 18,806 tons, 5,203 tons, and 3,584 tons respectively.

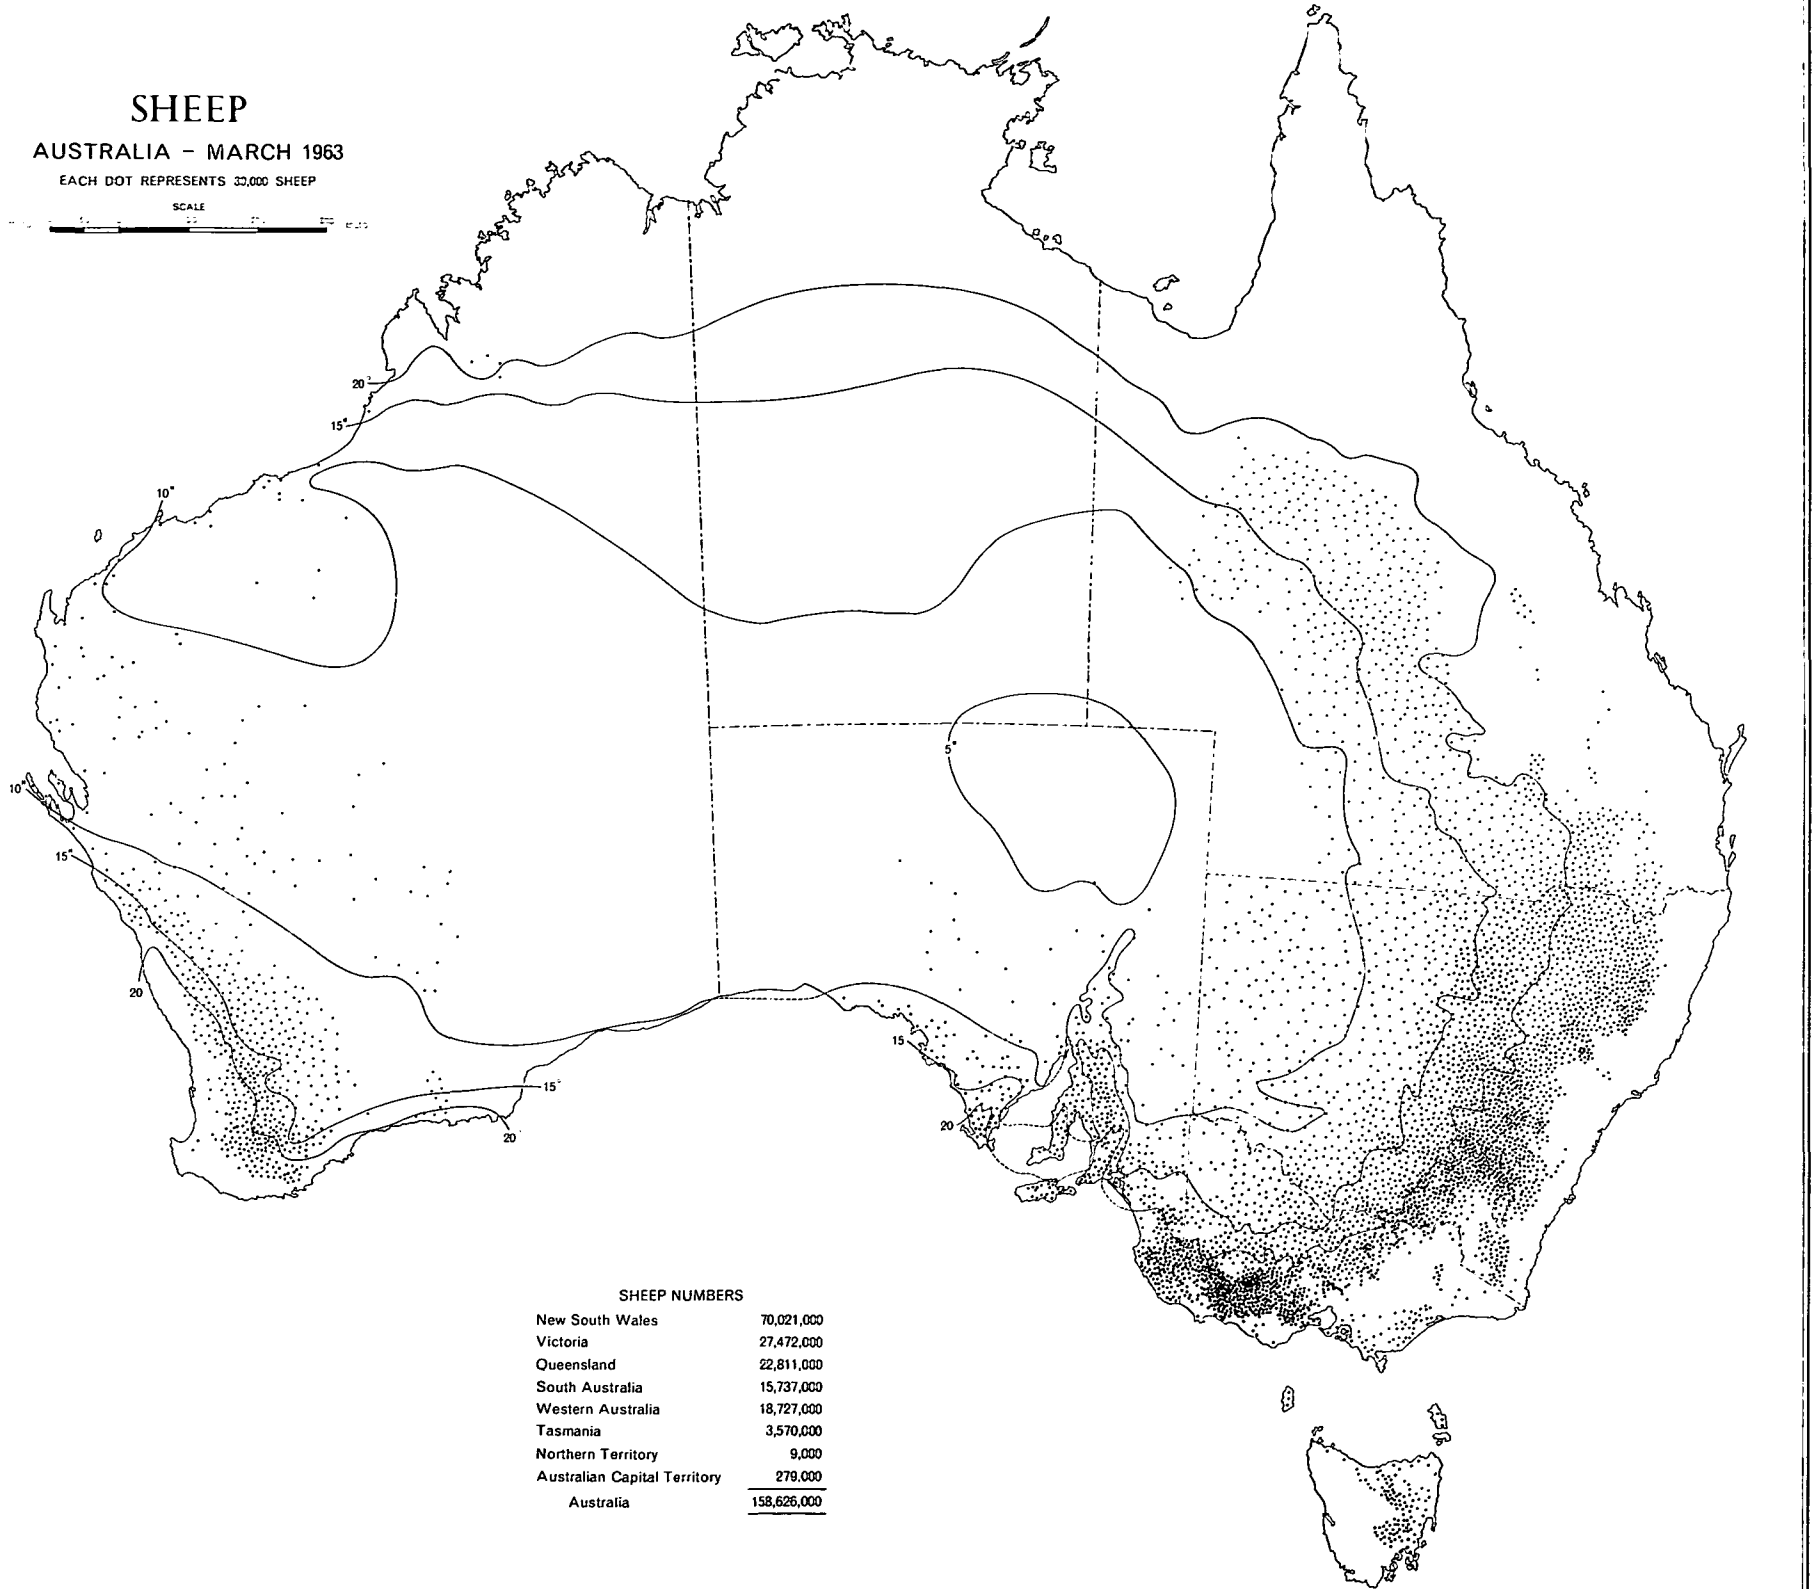

(v) *Table Grapes.* Grapes for table use are grown in all States except Tasmania, but the area of this type was only about 7 per cent. of the productive area of vines in 1962-63. The quantities of table grapes produced during the season 1962-63 in each State are shown in § 2, paragraph 2 (see p. 998).

## PASTORAL PRODUCTION

## § 1. Introduction

1. **Livestock Numbers.**—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given on page 748 of Year Book No. 35. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from 1860 to 1950, and from 1959 onwards in single years, are given in the following table, and are shown continuously since 1870 on the graph on page 1061 of Year Book No. 49.

LIVESTOCK: AUSTRALIA  
(’000)

Year	Horses	Cattle	Sheep	Pigs	Year	Horses	Cattle	Sheep	Pigs
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123
1880 ..	1,069	7,527	62,184	816					
1890 ..	1,522	10,300	97,881	891	1959 ..	671	16,257	152,685	1,289
1900 ..	1,610	8,640	70,603	950	1960 ..	640	16,503	155,174	1,424
1910 ..	2,166	11,745	98,066	1,026	1961 ..	598	17,332	152,679	1,615
1920 ..	2,416	13,500	81,796	764	1962 ..	562	18,033	157,712	1,652
1930 ..	1,793	11,721	110,568	1,072	1963 ..	547	18,549	158,626	1,440

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of widespread droughts which have from time to time left their impressions on the pastoral history of Australia. These occurred in 1868, 1877, 1883–84, 1892, 1893, 1895, 1901–02, 1912, 1914, 1918, 1919, 1922–23, 1925–26, 1927–28, 1929–30, 1940–41 and 1944–45 to 1946–47.

The years in which the numbers of livestock attained their peaks are as follows:—horses, 1919 (2,527,000); cattle, 1963 (18,549,000); sheep, 1963 (158,626,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of sheep, beef cattle, dairy cattle and pigs at 31st March, 1963, is shown in the maps on pages 1049, 1050 and facing pages 1082 and 1083.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in the division Other Rural Industries of this chapter.

2. **Carrying Capacity of Pastoral Holdings.**—The carrying capacity of pastoral holdings has been increased in recent years, owing in some measure to the succession of good seasons experienced since 1946 (with the exception of the 1957–58 season, when prevailing dry conditions caused a slight decline in cattle and sheep numbers). Other important factors contributing to the progressive increase over this period have been the increased attention given to pasture improvement and the reduction of rabbit infestation, principally due to the introduction, in 1950, of the disease myxomatosis. Some information on pasture improvement in Australia was given on pages 1001–2 of Year Book No. 49.

3. **Size Classification of Cattle Herds and Sheep Flocks.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1959–60 and has been published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity, 1959–60*. Tables in these bulletins relating to beef, dairy cattle, and sheep, show classifications according to size of herd or flock, area of holding, area of wheat for grain, area of sown pastures, and type of activity. These data are presented by statistical division. An earlier series, prepared for the year 1955–56, presents similar data, but only by State.

4. **Value of Pastoral Production.**—(i) *Gross, Local and Net Values, 1962–63.* Values of pastoral production for each State are shown for 1962–63 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXX. Miscellaneous. Maintenance costs and depreciation have not been deducted; consequently the net values are inflated to the extent of these amounts.

(£)

1958-59 ..	43.5	40.1	62.6	42.3	43.3	19.6	44.6
1959-60 ..	52.3	48.1	67.6	53.6	55.3	22.8	52.8
1960-61 ..	41.3	40.2	62.7	37.7	54.8	18.3	44.1
1961-62 ..	46.4	39.1	56.6	46.6	55.4	16.4	45.4
1962-63 ..	50.3	43.9	64.7	52.1	54.0	20.9	49.9

(a) No deduction has been made for depreciation and maintenance. Payments to woolgrowers of profits from the war-time wool disposal plan, which were virtually completed by 30th June, 1959, have been excluded. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

5. *Indexes of Quantum and Price of Pastoral Production, 1958-59 to 1962-63.*—The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1939. The price indexes relate to average "prices"

of farm products realized in the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. For further details of the methods of calculating these indexes and of the weights used, see Chapter XXX. Miscellaneous.

### INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION: AUSTRALIA

(Base: Average 3 years ended June, 1939 = 100)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
<b>QUANTUM(a) PRODUCED</b>					
Wool .. .. .	164	172	165	174	170
Other products .. .. .	152	153	136	144	154
<i>Total, Pastoral</i> .. .. .	<i>159</i>	<i>163</i>	<i>152</i>	<i>160</i>	<i>163</i>
Per head of population	110	110	100	104	104
<b>PRICE</b>					
Wool .. .. .	370	440	397	412	449
Other products .. .. .	435	500	513	433	451
<i>Total, Pastoral</i> .. .. .	<i>396</i>	<i>464</i>	<i>443</i>	<i>421</i>	<i>450</i>

(a) Index of value at constant prices, i.e. quantities revalued at average unit values of base years, 1936-37 to 1938-39.

## § 2. Sheep

1. *Distribution throughout Australia.*—With the exception of a short period in the early eighteen-sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing nearly one-half of the sheep of Australia.

A map showing the distribution of sheep in Australia at 31st March, 1963, appears on page 1049. Maps showing distribution in earlier years were published in previous issues of the Year Book (see No. 43, p. 911, for 1955; No. 39, p. 907, for 1948; No. 34, p. 452, for 1938-39; and No. 22, p. 659, for 1924-25). Graphs showing the number of sheep in Australia from 1870 onwards appear on pages 1061-2 of Year Book No. 49.

The numbers of sheep in the several States and Territories at 31st March of each year 1959 to 1963 compared with average numbers for the three-year periods ended 1939, 1949 and 1959 are shown in the following table.

### SHEEP: NUMBER (‘000)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
<i>Average for three years ended—</i>									
1939 ..	51,202	17,845	21,889	8,916	8,972	2,460	23	251	111,558
1949 ..	46,525	17,900	16,442	8,793	10,368	2,060	24	227	102,339
1959 ..	67,006	26,615	22,537	15,285	15,609	3,259	25	265	150,601
<i>Year—</i>									
1959 ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685
1960 ..	71,000	26,597	23,332	14,025	16,412	3,494	15	299	155,174
1961 ..	68,087	26,620	22,135	14,952	17,152	3,439	16	278	152,679
1962 ..	69,498	27,533	22,125	16,415	18,314	3,531	10	286	157,712
1963 ..	70,021	27,472	22,811	15,737	18,727	3,570	9	279	158,626

Except when affected by drought, the relative numbers of sheep in the different States have remained fairly constant in recent years. The percentage distribution in 1963 was:— New South Wales, 44; Victoria, 18; Queensland, 14; South Australia, 10; Western Australia, 12; and Tasmania, 2.

2. Numbers of Sheep on Rural Holdings.—(i) *Size of Sheep Flocks.* Details of the size of sheep flocks on rural holdings in Australia for 1959–60 have been published in a series of publications entitled *Classification of Rural Holdings by Size and Type of Activity, 1959–60.*

(ii) *Sheep Numbers.* A record level of 158.6 million sheep was reached at 31st March, 1963. This figure is 0.9 million more than the previous maximum in 1962.

The following table shows the approximate movement in sheep numbers in Australia in each year 1958–59 to 1962–63.

#### SHEEP AND LAMBS: ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA

('000)

Season	Lambs marked	Excess of exports	Sheep and lambs slaughtered	Estimated number of deaths from disease, drought, etc.(a)	Number at 31st March (end of season)	Annual net increase (+) or decrease(—)
1958–59.. ..	38,748	136	26,963	8,279	152,685	+ 3,370
1959–60.. ..	44,150	(b) 226	32,088	9,347	155,174	+ 2,489
1960–61.. ..	39,792	(b) 148	32,582	9,557	152,679	— 2,495
1961–62.. ..	45,596	(b) 201	33,317	7,045	157,712	+ 5,033
1962–63.. ..	45,146	(b) 263	33,944	10,025	158,626	+ 914

(a) Balance figure.

(b) No imports in this year.

3. Classification of Sheep According to Age, Sex and Breed.—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March.

#### SHEEP: AGE AND SEX, AUSTRALIA

('000)

Description	1959	1960	1961	1962	1963
Rams, 1 year and over ..	1,919	1,898	1,934	1,956	1,979
Breeding ewes (including ewes intended for mating) ..	69,470	68,455	69,662	70,693	70,936
Other ewes, 1 year and over ..	8,295	9,276	8,951	8,729	8,878
Wethers, 1 year and over ..	43,578	43,046	42,912	43,021	44,267
Lambs and hoggets, under 1 year .. .. .	29,423	32,499	29,220	33,313	32,566
<b>Total, Sheep and Lambs</b>	<b>152,685</b>	<b>155,174</b>	<b>152,679</b>	<b>157,712</b>	<b>158,626</b>

Particulars of the principal breeds of sheep at 31st March, 1962, the latest date for which these data are available (details are collected on a triennial basis), are shown in the following table.

**SHEEP: PRINCIPAL BREEDS, 31st MARCH, 1962**  
( '000)

Breed	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Merino ..	54,096	12,116	21,754	13,772	16,902	337	10	247	119,234
Other recognized breeds ..	7,203	6,990	48	1,149	587	1,959	..	11	17,947
Merino come-backs(a) ..	1,865	2,570	74	307	215	429	..	7	5,467
Crossbreds(b) ..	6,334	5,857	249	1,187	610	806	..	21	15,064
<b>Total ..</b>	<b>69,498</b>	<b>27,533</b>	<b>22,125</b>	<b>16,415</b>	<b>18,314</b>	<b>3,531</b>	<b>10</b>	<b>286</b>	<b>157,712</b>

(a) Merino comeback is the progeny of a crossbred Merino ewe and a Merino ram, i.e. finer than half-bred. (b) Half-bred and coarser.

4. Imports and Exports of Sheep.—The oversea exports of live sheep from Australia are of comparatively minor importance. On 27th November, 1929, the export of stud Merino sheep was prohibited, except with the approval of the Minister for Primary Industry. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly from Western Australia to Singapore. Since June, 1958, an embargo has been imposed on the import of sheep in order to prevent the introduction of the disease blue-tongue. The following table shows the imports and exports of all sheep for the years 1958–59 to 1962–63.

**SHEEP: IMPORTS AND EXPORTS, AUSTRALIA**

Year	Imports		Exports	
	No.	Value	No.	Value
		£A. '000 f.o.b.		£A. '000 f.o.b.
1958–59 .. ..	5	1	135,720	393
1959–60 .. ..	(a)	(a)	225,757	805
1960–61 .. ..	(a)	(a)	147,592	461
1961–62 .. ..	(a)	(a)	200,883	697
1962–63 .. ..	(a)	(a)	263,145	892

(a) An embargo was placed on the import of sheep in June, 1958; see text above.

5. Comparison with other Countries.—In 1962–63, Australian flocks numbered 159 million sheep, compared with an estimate of 243 million for the U.S.S.R., China, and eastern Europe combined, about 50 million in New Zealand, and about 45 million in Argentina. World sheep numbers were estimated at about 912 million in 1962–63. These figures relate only to woolled sheep, non-woolled sheep accounting for about 5 per cent. of the world total of all types of sheep. Further details of sheep numbers in the principal wool producing countries of the world are given in the table on page 1067.

### § 3. Cattle

1. Objects of Cattle-raising.—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. While dairy cattle are restricted mainly to coastal districts, beef cattle are more widely distributed, particularly in the eastern States, and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. Distribution throughout Australia.—Although cattle numbers declined after 1957 because of drought conditions and heavy slaughterings, they began to rise again in 1960, and in 1963 reached a record level of 18,549,000.

A graph showing the number of cattle in Australia from 1870 onwards appears on page 1061 of Year Book No. 49.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1959 to 1963, compared with averages for the three-year periods ended 1939, 1949 and 1959, are shown below.

**CATTLE: NUMBER**  
(\*000)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Average for three years ended—									
1939 ..	3,040	1,861	6,002	324	767	260	882	8	13,144
1949 ..	3,122	2,153	5,971	443	830	244	1,006	9	13,778
1959 ..	3,770	2,722	7,177	598	985	367	1,173	10	16,802
Year—									
1959 ..	3,664	2,651	6,884	576	1,000	374	1,099	9	16,257
1960 ..	3,840	2,624	7,012	500	1,030	375	1,111	11	16,503
1961 ..	4,242	2,864	7,004	561	1,100	394	1,154	13	17,332
1962 ..	4,399	3,156	7,098	659	1,218	425	1,064	14	18,033
1963 ..	4,569	3,225	7,233	679	1,298	444	1,087	14	18,549

Although the proportion was not as high as it has been in some previous years, Queensland was carrying 39 per cent. of the cattle in Australia in 1963. The percentage in each State and Territory during that year was:—New South Wales, 25; Victoria, 17; Queensland, 39; South Australia, 4; Western Australia, 7; Tasmania, 2; and Northern Territory, 6.

Maps showing the distribution of beef and dairy cattle in Australia appear on pp. 1050 and 1082. Maps showing distribution in earlier years were published in previous issues of the Year Book (see No. 43, pp. 909–10, for 1955; No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. Classification of Cattle.—(i) *According to Purpose.* Of the total number of cattle in Australia in 1963, 13,473,000 (73 per cent.) were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories during the years 1959 to 1963, compared with averages for the three-year periods ended 1949 and 1959, are shown in the following table.

**BEEF CATTLE: NUMBER**  
(\*000)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Average for three years ended—									
1949 ..	1,832	686	4,592	171	604	100	1,006	6	8,997
1959 ..	2,462	1,023	5,882	341	763	165	1,173	7	11,816
Year—									
1959 ..	2,382	998	5,643	328	784	171	1,099	6	11,411
1960 ..	2,562	946	5,757	260	814	168	1,111	8	11,626
1961 ..	2,961	1,147	5,790	313	876	180	1,155	9	12,431
1962 ..	3,127	1,332	5,890	385	983	196	1,063	11	12,987
1963 ..	3,307	1,367	6,041	398	1,057	206	1,086	11	13,473

Particulars relating to dairy cattle numbers will be found in the division Other Rural Industries of this chapter. (See pp. 1078–9.)

(ii) *According to Size of Cattle Herds.* Details of size of cattle herds on rural holdings in Australia for 1959–60 have been published in a series of publications entitled *Classification of Rural Holdings by Size and Type of Activity*.

4. *Cattle and Beef Research Schemes.*—In May, 1960, legislation was enacted to provide for a Commonwealth scheme for an expanded programme of research into the scientific, technical and economic problems connected with the Australian beef industry.

Funds are raised by a levy on all cattle weighing over 200 lb. dressed which are slaughtered for human consumption, and the Commonwealth provides a matching contribution on a £1 for £1 basis to meet expenditure on new research. The scheme is administered by the Australian Cattle and Beef Research Committee, whose main function is to formulate plans for projects on which the funds may be expended. The research is undertaken by existing bodies such as the universities, C.S.I.R.O. and State Departments of Agriculture.

The Minister for Primary Industry has approved a research programme of just over £1,000,000 for 1964-65.

At its first meeting in June, 1960, the Committee agreed to recommend to the Minister for Primary Industry that the levy be fixed at the maximum provided in the Act, namely 2s. a head. The levy was operative from 1st July, 1960. It was suspended in October, 1960, as a result of a High Court writ being issued by certain meat operators challenging the validity of the Act. Amending legislation was enacted in October, 1961, and the levy again became operative from the 14th October, 1961. The three Acts covering the research arrangements and collection of the levy are the *Cattle and Beef Research Act 1960-1961*, the *Cattle Slaughter Levy Collection Act 1960-1961*, and the *Cattle Slaughter Levy Act 1960*. The *Cattle Slaughter Levy (Suspension) Act 1961* covers the suspension of levy from 14th October, 1960, to 13th October, 1961.

5. **Imports and Exports of Cattle.**—In 1962-63, most of the cattle exported from Australia were sent to Hong Kong for slaughtering, the number exported thereto being 6,656 head valued at £138,515. The number of cattle imported is small and consists mainly of valuable animals for stud purposes. Since June, 1958, an embargo has been imposed on the import of cattle in order to prevent the introduction of the disease blue-tongue. Details for the years 1958-59 to 1962-63 are shown in the following table.

#### CATTLE: IMPORTS AND EXPORTS, AUSTRALIA

Year	Imports		Exports	
	No.	Value	No.	Value
1958-59 .. .. .	37	£A.'000 f.o.b. 62	13,900	£A.'000 f.o.b. 493
1959-60 .. .. .	(a)	(a)	13,602	456
1960-61 .. .. .	(a)	(a)	10,159	404
1961-62 .. .. .	(a)	(a)	7,304	303
1962-63 .. .. .	(a)	(a)	8,969	283

(a) An embargo was placed on the import of cattle in June, 1958; see text above.

6. **Comparison with Other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world at the latest available date.

#### CATTLE: NUMBER IN VARIOUS COUNTRIES

(Source: (for countries other than Australia) *World Agricultural Production and Trade*, United States Department of Agriculture)

('000)

Country	Year and Month	Number(a)
India(b) .. .. .	1962 (May) .. .. .	236,000
United States of America .. .. .	1964 (January) .. .. .	106,488
U.S.S.R. .. .. .	1964 (January) .. .. .	85,000
Brazil .. .. .	1963 (December) .. .. .	81,115
China (Mainland)(b) .. .. .	1960 (December) .. .. .	65,400
Argentina .. .. .	1964 (June) .. .. .	41,500
Pakistan(b) .. .. .	1961 (Estimate) .. .. .	30,300

South Africa .. .. .	1959 (August) .. .. .	11,300

(a) Subject to revision.

(b) Includes buffaloes.

### § 4. Horses

1. **Distribution throughout Australia.**—About 80 per cent. of the horses in Australia are in the States of New South Wales, Victoria and Queensland. In the following table, figures are shown for each State and Territory for the years 1959 to 1963.

**HORSES: NUMBER**  
(’000)

Year	N.S.W.	Vic.	Q’land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1959 ..	214	91	240	33	41	12	39	1	671
1960 ..	204	81	234	30	41	11	38	1	640
1961 ..	192	65	224	27	40	9	40	1	598
1962 ..	168	61	217	25	40	9	41	1	562
1963 ..	166	58	212	25	39	8	38	1	547

The number of horses in Australia reached a peak of 2,527,000 in 1919. Since then, it has declined, because of mechanization of transport and farming, at an average rate of 45,000 a year. A graph showing the number of horses in Australia since 1870 appears in Year Book No. 49.

The percentage distribution of the number of horses in each State and Territory for 1963 was:—New South Wales, 30; Victoria, 11; Queensland, 39; South Australia, 5; Western Australia, 7; Tasmania, 1; and Northern Territory, 7.

2. **Oversea Trade in Horses.**—Exports of horses in 1962–63 numbered 452, valued at £319,530 (Australian produce 394 for £219,309; re-exports 58 for £100,221), made up of horses for breeding (58 valued at £59,052), horses for racing (285 valued at £243,645, shipped principally to Singapore) and horses for other purposes (109 valued at £16,833).

The few horses imported into Australia are mainly stud animals from the United Kingdom and racehorses from New Zealand. The total number imported in 1962–63 was 537 valued at 599,248.

### § 5. Pastoral Products: Wool

1. **General.**—With about one-sixth of the world’s woolled sheep, Australia produces more than one-quarter of the world’s wool and more than half of the world’s fine-quality Merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool, wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, has amounted to only about 7 per cent. of the total production (greasy basis) in recent years.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on page 1067.

2. **Earlier Wool Marketing Schemes.**—Details of past marketing schemes and agreements, including the 1914–18 War Imperial Purchase Scheme, the British Australian Wool Realization Association Ltd., the 1939–45 War Acquisition Scheme, Joint Organization and Minimum Reserve Price Plan, are given in previous issues of the Year Book.

3. **Auction System.**—More than ninety per cent. of the Australian wool clip is disposed of at auction. (During both world wars, however, auction selling was suspended and replaced by bulk purchase schemes.)

There are fourteen recognized wool-selling centres, namely Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Portland, Brisbane, Adelaide, Perth, Albany, Hobart and Launceston. At these centres, wool-selling brokers operate large stores where wool received from growers is held awaiting sale.

Each year a wool-selling programme is drawn up jointly by the selling brokers and wool-buyers on the basis of the expected clip. Selling dates and the quantities to be offered are then determined for each centre.

Before each sale, the selling brokers, who act as agents for the woolgrowers, display a representative portion of the wool to be sold on show floors for buyers' inspection and valuation. Auction sales are attended by buyers purchasing on behalf of wool users in over fifty countries.

4. **Wool Marketing Committee of Inquiry.**—In 1961, the Commonwealth Government appointed an independent committee to inquire into the marketing and promotion of Australian wool and related matters (*see* Year Book No. 48, page 977, for further details). The Committee presented its report to the Government in 1962. Its most important recommendation was that wool promotion, research and testing should be brought under the control of a single body, which should also act as an advisory authority on wool marketing. This recommendation was implemented under the *Wool Industry Act* 1962, which set up the Australian Wool Board.

5. **Australian Wool Board.**—This Board consists of a chairman, six woolgrower representatives, three members with special qualifications and a representative of the Commonwealth Government. The first chairman of the Board was appointed by the Minister for Primary Industry after consultation with the Australian Wool Industry Conference (*see* p. 1060) but subsequent chairmen are to be appointed on the nomination of the Board. The six woolgrower representatives are appointed by the Minister on the nomination of the Wool Industry Conference, and the three members with special qualifications are appointed from a panel of names submitted by the Conference. The Act provides that the latter members must be experienced in one of the following fields: wool marketing and manufacturing, research, finance and commerce.

When the Board came into being on 1st May, 1963, it took over the functions of the Australian Wool Bureau. On 1st July, 1963, the Australian Wool Testing Authority became part of the Board, and on 1st January, 1964, the Board took over the functions of the Wool Research Committee. Information on these three former instrumentalities appears in Year Book No. 48, pages 977–81.

Following the organizational changes carried out under the Wool Industry Act, the functions of the Board embrace the following activities.

- (i) *Wool promotion in Australia and overseas by publicity and other means.* Promotion overseas is carried out through the International Wool Secretariat, which is maintained jointly by the Wool Boards of Australia, New Zealand and South Africa.
- (ii) *Provision of a testing service for wool and wool products.* This service is administered by a subsidiary board retaining the name Australian Wool Testing Authority.
- (iii) *Administration of wool research.* The Board is responsible for preparing annual programmes of research expenditure which are subject to the approval of the Minister for Primary Industry. Two committees established by the Board, the Wool Production Research Advisory Committee and the Wool Textile Research Advisory Committee, assist in this task.
- (iv) *Investigation into all aspects of wool marketing on a continuing basis.* The Wool Marketing Committee, an ancillary body appointed by the Board, assists in carrying out this function. The Board is required to report to the Australian Wool Industry Conference on its findings and advise it on measures which should be adopted to meet changing marketing conditions. However, the Board has no executive powers over marketing.
- (v) *Maintenance and administration of the wool stores which were entrusted to the Board by the Commonwealth Government.* Further details concerning these stores appear in Year Book No. 48, page 978.
- (vi) *Other activities approved by the Minister for the benefit of the wool industry, including the operation of the Wool Statistical Service and the registration of wool classers.* The Wool Statistical Service (described in more detail in Year Book No. 48, pp. 977–8) provides comprehensive statistics on the Australian wool clip, while the registration of wool classers is designed to improve the standards of wool classing in Australia.

At present the main source of finance for the various activities of the Board is a levy paid by woolgrowers (*see* para. 7 below).

**6. The Australian Wool Industry Conference.**—This body was formed by woolgrowers in October, 1962, to meet the need for an organization with sufficient authority to speak on behalf of the woolgrowing industry as a whole. It is not a statutory body and consists at present of 50 members and an independent chairman, 25 of the members being appointed by the Australian Woolgrowers' and Graziers' Council and 25 by the Australian Wool and Meat Producers' Federation.

The Conference makes recommendations to the Commonwealth Government on policy matters concerning the wool industry. Under the Wool Industry Act, it is the responsibility of the Conference to nominate woolgrower representatives for appointment to the Australian Wool Board and to prepare panels of names from which the three Board members with special qualifications are selected. Under the Wool Tax Acts (*see* para. 7) the Conference is also responsible for recommending to the Commonwealth Government what rates of levy should be paid by woolgrowers to finance the activities of the Wool Board.

**7. Wool Levy.**—Since 1936, a statutory levy has been collected from woolgrowers to finance wool promotion activities. The initial rate was 6d. a bale and this was increased at the request of woolgrowers to 2s. a bale in 1945 and 4s. a bale in 1952, the latter rate continuing until 1960. Further details regarding the operation of this levy prior to 1957 appear in Year Book No. 48, page 978.

Under legislation passed in 1957, provision was also made for the payment by woolgrowers of a contribution for wool research which was fixed at 2s. a bale.

In 1960, the wool promotion levy was raised to 5s. a bale, and the following year it was increased further to 10s. a bale. The operation of this rate was subsequently extended for 1962-63 and 1963-64. The wool research levy has remained unchanged at 2s. a bale since 1957.

The collection of the two levies from woolgrowers is governed by three complementary Acts, the *Wool Tax Acts* (No. 1 and No. 2) 1957-1963 and the *Wool Tax Assessment Act* 1936-1963.

Since 1945, the Commonwealth Government has contributed to wool research on a statutory basis. Originally the contribution was equivalent to 2s. a bale. This was increased to 4s. a bale in 1957.

**8. Wool Production.**—(i) *General.* Wool as shorn from the sheep contains an appreciable amount of grease, dirt and other extraneous matter, and is termed "greasy wool". The quantity of grease and other matter in a fleece differs not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

To allow for this factor, the weight of greasy wool is sometimes given on a "clean" basis, i.e. minus the estimated amount of impurities. The net wool fibre content of greasy wool, expressed as a percentage, is termed "clean yield".

From 1946-47 to 1952-53, the Australian Wool Realization Commission, and from 1953-54, the Wool Statistical Service, have assessed annually the clean yield of the Australian wool clip. During the period of assessment, the clean yield has shown a continuous rise up to 1951-52, when it reached 57.5 per cent. It has since fluctuated between 55.8 per cent. and 57.7 per cent.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 54 per cent. The quantity of this wool exported during 1962-63 was about 12 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

For the clean yield of Australian scoured wools, a standard factor of 93 per cent. is taken.

(ii) *Production.* The production of wool in the States and Territories varies broadly in accordance with the number of sheep depastured and with seasonal conditions which affect clip per head (see para. 8 (iii), p. 1062). In general, however, South Australia obtains from its large-framed Merinos a much heavier fleece per sheep than the Australian average, while Tasmania generally obtains from its predominantly non-Merino flocks a lighter fleece per sheep. In addition, as a result of better management (improved pastures, fodder conservation, better breeding, control of diseases, etc.), the long-term trend has been towards higher fleece weights.

The following table shows details of total wool (i.e. shorn, dead and fellmongered, and exported on skins) produced by each of the States and Territories during the years 1958-59 to 1962-63 compared with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59. A graph showing the production of wool in relation to sheep numbers from 1870 onwards appears on page 1062 of Year Book No. 49.

### PRODUCTION OF WOOL (GREASY BASIS)

('000 lb.)

The bulk of the Australian wool production (about 91 per cent. in recent years) is shorn from live sheep. The remainder is obtained by fellmongering (about 2 per cent.), or is exported on skins (about 7 per cent.). The following table shows details of total wool production according to method of obtaining wool, and also the gross value of wool produced. Gross value is based, for shorn wool, upon the average price realized for greasy wool sold at auction, and, for skin wools, on prices recorded by fellmongers and skin exporters.

### QUANTITY (GREASY BASIS) AND VALUE OF WOOL PRODUCED: AUSTRALIA

Period	Shorn (incl. crutchings)	Dead and fell- mongered	Exported on skins	Total production	
				Quantity	Value

(iv) *Classification of Wool According to Quality.* The following table provides a detailed analysis of wool sold at auction, according to quality, for the years 1958-59 to 1962-63. These data are compiled by the Wool Statistical Service on the basis of catalogues of auction sales. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

CLASSIFICATION OF GREASY WOOL SOLD AT AUCTION<sup>(a)</sup>: AUSTRALIA

(Bales of approximately 300 lb.)

Pre-dominating quality	1958-59		1959-60		1960-61		1961-62		1962-63	
	Quantity	Per cent.	Quantity	Per cent.	Quantity	Per cent.	Quantity	Per cent.	Quantity	Per cent.

(a) All greasy wool sold at auction except "wool re-offered account buyer".

9. *Price and Value.*—(i) *Price.* During 1962-63, the price of greasy wool sold in the selling centres of Australia averaged 59.0d. per lb. compared with the average price of 54.1d. per lb. in 1961-62 and 52.1d. in 1960-61.

The prices quoted above are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

(ii) *Value.* Fluctuation in Australian wool prices has a marked effect on the nation's rural and national income. In 1945-46, the gross value of wool production was £58,597,000, representing 17.4 per cent. of the gross value of production of all rural industries, while in 1950-51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total value of production for all rural industries. The value of wool production fell in subsequent years even though the quantity produced increased substantially, and in 1962-63 was £400,262,000. This figure represented 26.6 per cent. of the gross value of production of rural industries.

Details of the value of wool production for the years 1958-59 to 1962-63 are shown in the following table.

**ESTIMATED GROSS VALUE OF TOTAL WOOL PRODUCTION(a)**  
(£'000)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.(b)	A.C.T.	Aust.
1958-59 ..	134,764	59,471	45,075	33,797	30,915	6,844	36	513	311,415
1959-60 ..	168,112	75,952	54,573	42,691	39,334	8,254	35	810	389,761
1960-61 ..	138,881	69,265	50,859	35,242	38,312	7,229	28	614	340,430
1961-62 ..	154,920	74,219	50,637	42,900	41,260	7,876	18	724	372,554
1962-63 ..	166,170	79,006	57,731	46,257	41,494	8,886	20	698	400,262

(a) Includes shorn, dead and fellmongered wool and wool exported on skins.

(b) Estimated.

10. *Stocks of Wool.*—Stocks of raw wool held in Australia at 30th June, 1963, amounted to 222.4 million lb. (greasy basis), of which 54.4 million lb. (35.0 million lb. as greasy and 19.4 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers, and 168.0 million lb., assumed to be all greasy, were held by brokers. Of the wool held by brokers, 50.5 million lb. were unsold wool and 117.5 million lb. were sold wool held awaiting shipment. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

11. *Consumption of Wool.*—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption), plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects, as they disregard overseas trade in semi-processed wool (e.g. tops and yarns) as well as woollen goods. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia are shown in the following table for the years 1958-59 to 1962-63.

**ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA**  
(<sup>0</sup>000 lb.)

Year	Greasy basis			Clean equivalent		
	Used on woollen and worsted systems	Used for felt manufacture (including hats)	Total	Used on woollen and worsted systems	Used for felt manufacture (including hats)	Total
1958-59 ..	103,180	3,992	107,172	62,834	1,896	64,730
1959-60 ..	123,529	5,092	128,621	75,226	2,419	77,645
1960-61 ..	104,801	3,896	108,697	63,414	1,851	65,265
1961-62 ..	117,555	4,328	121,883	70,682	2,056	72,738
1962-63 ..	124,525	2,346	126,871	74,872	1,376	76,248

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Estimated Consumption of Locally Processed Wool in Australia" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown in the following table for the years 1958-59 to 1962-63. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for oversea trade in woollen piece goods, clothing, etc., because of the obvious difficulties of estimating accurately the wool content of these products.

**ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA**  
(<sup>000</sup> lb.)

Year	Greasy basis				Clean equivalent			
	Worsted yarn used (a)(b)	Woollen yarn used (b)	Scoured wool used for felt manufacture (including hats)	Total	Worsted yarn used (a)(b)	Woollen yarn used (b)	Scoured wool used for felt manufacture (including hats)	Total

(ii) *Total Value of Exports.* The value of wool (other than wool on sheepskins) exported from Australia during 1962-63 was 36 per cent. of the total value of exports of merchandise of Australian origin, while the proportion for the five years ended 1962-63 averaged 38 per cent. The value for the five years ended 1962-63, together with the principal countries to which wool was exported, is shown in the following table.

(a) Excludes wool exported on sheepskins.

13. *World Sheep Numbers, Wool Production and Trade.*—(i) *Numbers and Production.* The following table shows particulars of the woolled sheep numbers and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of Merino, crossbred, and carpet type wool for the latest available years.

In 1962-63, Australia produced 29 per cent. of the world total of all types of wool, the share of all British Commonwealth countries combined representing approximately 45 per cent. The principal wool producers, other than Australia, were New Zealand with 11 per cent. of the world total, Argentina, 7 per cent., Republic of South Africa, 6 per cent., and United States of America, 5 per cent. Production in the U.S.S.R., China and eastern European countries together amounted to 20 per cent. World production of wool (all types) in 1962-63 exceeded the pre-war average for the years 1934 to 1938 by approximately 1,862 million lb. or 49 per cent.

Australia's wool clip is predominantly Merino. New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of Merino wool in 1962-63 was 42 per cent. above the average for the years 1934 to 1938, and the production of crossbred types has risen by about 72 per cent. Carpet wool production has risen by about 31 per cent.

Germany, Federal Republic of ..	(c)	73.7	32.6	37.6	22.8	56.0	222.7

(a) Greasy basis, 1961-62. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 362.0 million lb.

As a considerable transit trade exists between European countries, it must not be assumed that the whole of the imports recorded by these countries is retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom and Belgium.

## § 6. Pastoral Products: Meat

1. General.—(i) *Australian Meat Board*. The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the *Meat Export Control Act 1935–1960* is given on page 801 of Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements*. Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952, and of the Fifteen Year Meat Agreement (1952–67) are given on page 710 of Year Book No. 41 and in earlier issues.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia, enabling increased exports to be made to the United Kingdom, and the provision of a satisfactory market in the United Kingdom for such meat. It covers beef and veal, and mutton and lamb.

(iii) *Reversion to Private Trading*. Following the announcement in September, 1953, that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements were given in previous issues of the Year Book (*see* No. 47, p. 960).

Details of the minimum prices operating in recent years under private trading agreements, and an outline of the Acts relevant to the administration of the scheme, appear in Year Book No. 48, page 973.

(iv) *Minimum Prices and Deficiency Payments*. From 1st October, 1955, until April, 1958, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia "earned" deficiency payments which enabled the Australian Meat Board to make substantial bounty payments on beef exported to the United Kingdom. The rates of payment made during the 1954–55 and 1955–56 seasons are given on pages 888–9 of Year Book No. 43 and those for 1956–57 on pages 920–1 of Year Book No. 44. No deficiency payments have been received for beef since 1956–57, but a deficiency payment was earned on lamb for the first time during the 1960–61 season, and as a result a bounty was paid at the rate of 2s. per carcass and  $\frac{3}{4}$ d. per lb. for piece lamb entered into cold stores for export to the United Kingdom during the period 1st August, 1961, to 28th April, 1962. A further deficiency payment was earned during the 1961–62 season.

During the 1962–63 and 1963–64 lamb export seasons, the Australian Meat Board guaranteed exporters a minimum price of 18d. per lb. f.o.b. on all lambs 36 lb. and under shipped to the United Kingdom during the period September to November; and 16.5d. per lb. for the following three months, December to February. The higher guaranteed price for the initial period was aimed at stimulating early shipments, because normally the most opportune time for selling Australian lamb on the United Kingdom market is early in the export season. Any commitment by the Board is payable from moneys accrued in the Lamb Deficiency Payments Account under the Fifteen Year Meat Agreement.

(v) *United States-Australia Meat Agreement*. In February, 1964, the Governments of Australia and the United States concluded an agreement for the regulation of beef, veal and mutton exports from Australia to the United States with the object of promoting the orderly development of the trade in these classes of meat between the two countries. The agreement seeks to preserve approximately the present pattern of trade in beef and mutton and permits Australia to obtain a reasonable share of the expected market growth. Under the agreement Australia is to limit its exports of beef, veal and mutton to the United States to 242,000 tons in 1964, 251,000 tons in 1965 and 260,000 tons in 1966.

The agreement is subject to review every three years and, as appropriate, the established annual rate of increase will be adjusted to apply to the succeeding three years.

2. Beef and Veal.—(i) *Cattle Slaughtered.* The numbers of cattle slaughtered during each of the years ended June, 1959 to 1963, compared with averages for the three-year periods ended June, 1939, 1949 and 1959, are shown in the following table.

**CATTLE (INCLUDING CALVES) SLAUGHTERED**

1960–61..	168	125	247	27	42	17	6	1	633
1961–62..	234	176	278	30	47	20	4	2	791
1962–63..	263	214	314	36	56	24	5	2	914

(iii) *Consumption of Beef and Veal.* The highest post-war consumption of beef and veal was 132.7 lb. per head in 1956–57. With the buoyant overseas market for beef and the high prices ruling in Australia during the following four years, consumption per head fell substantially, and in 1960–61 amounted to only 88.3 lb. In 1962–63 there was a considerable rise in consumption per head to 104.3 lb., consisting of 100.5 lb. carcass weight and 3.8 lb. (carcass equivalent) of canned meat. There has been a marked substitution of mutton and lamb for beef in Australia since 1956–57.

The figures quoted in the preceding paragraph include the consumption of canned beef and veal, and differ on that account from the figures shown in the last column of the next table.

In the following table, details of the production and disposal of beef and veal are shown for the years 1958-59 to 1962-63, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

**PRODUCTION AND DISPOSAL OF BEEF AND VEAL (CARCASS WEIGHT):  
AUSTRALIA**

Period	Net change in stocks	Production	Exports (a)	For canning	Apparent consumption in Australia	
					Total	Per head per annum
	'000 tons	'000 tons	'000 tons	'000 tons	'000 tons	lb.
Average for three years ended—						
1938-39 .. ..	n.a.	569	121	18	430	140.3
1948-49 .. ..	+ 1	542	101	67	373	109.1
1958-59 .. ..	+ 5	837	209	85	538	123.8
Year—						
1958-59 .. ..	+ 8	906	296	80	522	117.6
1959-60 .. ..	- 11	752	262	55	446	98.4
1960-61 .. ..	+ 4	633	190	43	396	85.4
1961-62 .. ..	+ 6	791	299	45	441	93.1
1962-63 .. ..	(b)	914	385	44	485	100.5

(a) Includes carcass equivalent of boneless beef exported and all fresh and frozen meat shipped as ships' stores. (b) Less than 500 tons.

(iv) *Exports of Beef and Veal.* In 1962-63, chilled beef exports were 2,543,000 lb. valued at £247,000, while frozen beef exports amounted to 573,961,000 lb. valued at £77,981,000.

While beef and veal were previously shipped largely in carcass form, there has been in recent years a substantial increase in the amount of boneless beef exported. From 1958-59 to 1962-63, the quantity of boneless beef shipped exceeded that exported in carcass form. The trade in boneless beef has been developed principally with the United States of America.

Since 1958-59, the United States has surpassed the United Kingdom as the principal market for Australian beef exports, the United Kingdom now occupying second place. The total value of beef and veal shipped to these two countries during 1962-63 was £67,032,000 and £5,623,000 respectively.

The quantity and value of Australian frozen beef and veal exported from Australia in each year 1958-59 to 1962-63 are shown in the following table. Figures in this table represent actual weight shipped, not carcass equivalent.

**EXPORTS OF FROZEN AND CHILLED BEEF AND VEAL: AUSTRALIA**

Year	Exports of frozen and chilled beef		Exports of frozen veal	
	Quantity	Value	Quantity	Value
	'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.

(iii) *Consumption of Mutton and Lamb.* In 1959-60, consumption of mutton and lamb, at 105 lb. per head of population, exceeded that of beef and veal for the first time on record. A small decline followed in 1960-61, when the amount of mutton and lamb consumed per head was estimated as 103 lb. There was a further decline in 1962-63 when the estimated consumption per head was 95 lb. This figure is about nine lb. per head less than the consumption per head of beef and veal in 1962-63. Figures quoted in this paragraph include the consumption of canned mutton, and differ on that account from the figures in the last column of the table following.

The following table gives details of the production and disposal of mutton and lamb for the years 1958-59 to 1962-63, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

(a) Includes carcass equivalent of boneless mutton exported.

(iv) *Exports of Frozen Mutton and Lamb.* The quantities and values of exports of Australian frozen mutton and lamb in each year from 1958-59 to 1962-63 are shown in the following table.

**EXPORTS OF FROZEN MUTTON AND LAMB: AUSTRALIA**

Year	Exports of frozen mutton		Exports of frozen lamb		Exports of frozen mutton and lamb	
	Quantity	Value	Quantity	Value	Quantity	Value
	<sup>'000</sup> lb.	£A. <sup>'000</sup> f.o.b.	<sup>'000</sup> lb.	£A. <sup>'000</sup> f.o.b.	<sup>'000</sup> lb.	£A. <sup>'000</sup> f.o.b.
1958-59	74,650	5,851	91,192	8,151	165,842	14,002
1959-60	71,763	4,719	59,264	4,389	131,027	9,108
1960-61	83,075	7,437	64,430	5,790	147,505	13,227
1961-62	109,113	8,156	37,399	2,624	146,512	10,780
1962-63	136,741	11,652	56,615	5,181	193,356	16,833

The principal customer for Australian frozen mutton and lamb was formerly the United Kingdom, although the United States of America has become a major buyer of mutton in recent years. In 1962-63, exports of mutton and lamb to the United Kingdom represented 11 per cent. and 66 per cent., respectively, of the total quantities exported. Fifty-two per cent. of the mutton exported went to the United States of America, largely in the form of boneless meat, and the proportion of lamb exported to that country was 15 per cent.

4. Consumption of Meat and Meat Products.—The apparent consumption of meat (including cured and canned meat) and edible offal per head of population in Australia is shown in the table below for the years 1958-59 to 1962-63 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**MEAT (INCLUDING CURED AND CANNED) AND EDIBLE OFFAL AVAILABLE FOR CONSUMPTION: AUSTRALIA**

(lb. per head per year)

## § 7. Other Pastoral Products

1. Tallow.—(i) *Marketing.* Reference is made in Year Book, No. 47, page 976, to the now inoperative contracts relating to the sale of tallow to the United Kingdom.

(ii) *Consumption in Factories.* Details of consumption are collected from the principal factories using tallow. Consumption of inedible tallow in these factories (soap and candle, chemical and woolscouring works) for the five years 1958-59 to 1962-63 was as follows:—1958-59, 1,216,668 cwt.; 1959-60, 1,278,546 cwt.; 1960-61, 1,196,137 cwt.; 1961-62, 1,007,627 cwt.; 1962-63, 874,128 cwt. These figures are, however, deficient to the extent that no allowance has been made for small unrecorded amounts used in other types of establishments. Details of edible tallow consumed in factories are not available.

(iii) *Exports.* Particulars of exports of edible and inedible tallow of Australian produce are shown in the following table for the five years 1958-59 to 1962-63.

## TALLOW: EXPORTS, AUSTRALIA

(cwt.)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Edible .. .. .	73,056	118,848	50,436	130,015	120,944
Inedible .. .. .	1,022,844	1,533,734	1,079,191	1,853,161	2,229,230
<b>Total .. .. .</b>	<b>1,095,900</b>	<b>1,652,582</b>	<b>1,129,627</b>	<b>1,983,176</b>	<b>2,350,174</b>

2. **Oversea Trade in Hides and Skins.**—(i) *Values.* The value of cattle and horse hides, sheep and other skins, and skin pieces, sent overseas during 1962-63 amounted to £36,710,000, compared with a total of £32,044,000 in 1961-62 and £27,077,000 in 1960-61.

(ii) *Sheepskins with Wool.* Of the total exports of sheepskins with wool during 1962-63, amounting to 183,045,000 lb. valued at £27,742,000, 113,595,000 lb. valued at £16,987,000 (61 per cent. of total value) were shipped to France, 25,081,000 lb. valued at £4,361,000 (16 per cent.) to Italy, and 13,148,000 lb. valued at £1,783,000 (6 per cent.) to the United Kingdom. In the previous year, France received about 66 per cent. (by value) of all sheepskins with wool exported, Italy 15 per cent. and the United Kingdom 7 per cent. The exports of sheepskins with wool during each of the years 1958-59 to 1962-63 were as follows.

## EXPORTS OF SHEEPSKINS WITH WOOL: AUSTRALIA

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Number .. .. '000	20,180	25,560	25,883	26,237	26,796
Value .. .. £'000	14,768	23,238	21,429	24,208	27,742

(iii) *Sheepskins without Wool.* Up to 1943-44, sheepskins without wool were exported chiefly to the United States of America which, during 1943-44, accounted for 97 per cent. of the total shipments. In subsequent years, however, this proportion has declined markedly. In 1962-63, skins to the value of £87,684 (32 per cent.) were shipped to Spain; £65,975 (24 per cent.) to France; £46,215 (17 per cent.) to the United States of America; £31,876 (12 per cent.) to United Kingdom; and £10,614 (4 per cent.) to Italy. In 1962-63, a total of 1,341,000 sheepskins without wool were exported, valued at £274,000. Since 1954-55, the number exported has exceeded two million once only (in 1958-59), and the value has averaged about £350,000.

(iv) *Hides.* The export trade in cattle hides and calfskins during 1962-63 was distributed amongst the main importing countries as follows:—Japan, £4,518,000; Netherlands, £339,000; Italy, £232,000; Germany (Federal Republic), £226,000; and United Kingdom, £103,000. The total quantity exported was 91,071,000 lb., valued at £6,103,000.

(v) *Furred Skins.* The exports of furred skins in 1962-63 were valued at £1,345,000, of which rabbit and hare skins constituted £819,000. This is considerably less than the highest total value of £2,013,000, recorded in 1955-56, when rabbit and hare skins accounted for £1,711,000. In 1961-62, they accounted for £900,000 out of a total of £1,342,000.

Skins were shipped principally to the United States of America, the United Kingdom, Italy, Belgium and Luxembourg, the values shipped to each in 1962-63 being:—United States of America, £1,077,000; United Kingdom, £92,800; Italy, £73,400; and Belgium-Luxembourg, £11,300.

Imports of cattle hides and calfskins are fairly substantial, the chief sources of supply being New Zealand and the Pacific Islands. The quantity of cattle hides, including calfskins, imported into Australia during the year 1962-63 amounted to 5,883,000 lb. valued at £548,000.

## OTHER RURAL INDUSTRIES: DAIRYING, POULTRY AND BEE-FARMING

## § 1. The Dairying Industry

1. **Introduction.**—(i) *General.* The introduction of cattle into Australia and the early history of the dairying industry are treated in some detail in earlier issues of this Year Book.

Australian dairy cattle have shown steady improvement in quality, as demonstrated by yield, over the years. This is attributable to improved breeding, associated with herd recording and better feeding, resulting from the use of improved pastures. Better farming methods, arising from the development of modern farm machinery and the application of the results of research, have also played a part in the increased yields.

The Australian dairying industry is conducted under conditions ranging from tropical to temperate and Mediterranean type climates, and nowhere is it necessary to house cattle in the winter months. Most Australian dairy cattle are fed only on pasture and pasture products, and this accounts for average yields being somewhat lower than in those countries where stock are fed heavily on concentrated feed.

In general, dairy farming is confined to the coastal and near coastal regions where rainfall and topography are favourable. These conditions are found in parts of the eastern, southern and south-western coasts. Inland districts include the lower north-east of Victoria, the south-western slopes of New South Wales, the fertile Darling Downs in Queensland, and the irrigated districts of the Riverina in New South Wales and northern Victoria.

The manufacturing and processing sections of the industry are highly organized and are well advanced technologically. Certain techniques and equipment, developed in Australia, are being adopted overseas.

(ii) *Official Supervision.* Dairy experts of the various State agricultural departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce, with the result that a high standard of cleanliness and technology prevails in the industry.

The export trade is regulated by the terms of the Commonwealth *Customs Act* 1901–1954 and the Commonwealth *Commerce (Trade Descriptions) Act* 1905–1950, and regulations thereunder. This legislation requires that the true trade description, etc., be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

(iii) *Marketing of Dairy Products.* (a) *Dairy Produce Export Control Act* 1924–1962. Details of this Act, and of the Australian Dairy Produce Board constituted under it, were given in earlier issues of the Year Book (see No. 48, pp. 999–1000).

(b) *Dairy Produce Export Charges Act*, 1962. This Act provides for the imposition of a levy on all butter, cheese and other specified dairy produce exported from Australia to cover the administrative expenses of the Australian Dairy Produce Board and for advertising and other purposes. The rate of the levy is fixed by the Act.

(iv) *Equalization Schemes.* (a) *Butter and Cheese.* Reference is made to these schemes in Year Book No. 48, pp. 998–9.

Para. 2 (ix) on page 1085 gives particulars of the returns realized on local and oversea sales and of the average equalization rate for the years ended June, 1959 to 1963. Details are also given in para. 2 (vii) of the wholesale prices of butter and cheese for home consumption as determined by the Commonwealth Dairy Produce Equalization Committee Ltd.

(b) *Casein.* An equalization scheme for casein similar to that for butter and cheese has been operated since 1952 by the Commonwealth Dairy Produce Equalization Committee Ltd. Average realizations per cwt. under the scheme were 171s. 7.9d. in 1958-59, 175s. 7.5d. in 1959-60, 174s. 10.9d. in 1960-61 and 163s. 3.4d. in 1961-62. The interim equalization value for 1962-63 has been fixed at 159s. and for 1963-64 at 156s. per cwt.

(v) *Commonwealth Subsidies and Stabilization Plans.* (a) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter and cheese. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Ltd. through factories to milk producers by payments on butter and cheese manufactured. Subsidy on milk supplied for the manufacture of processed milk products was also payable from 1942 until 30th June, 1948, and again from 1st July, 1949, to 30th June, 1952. The Commonwealth Government provided, under the *Processed Milk Products Bounty Act* 1962, for the payment of a maximum amount of £350,000 as a bounty on exports of processed milk products in 1962-63. The bounty was continued for the year ended 30th June, 1964, the maximum amount being increased to £500,000.

Details of the three five-year stabilization plans which operated up to 30th June, 1962, will be found in Year Book No. 49, page 1084.

Under the five-year stabilization plan which came into operation on 1st July, 1962, a fixed bounty of £13,500,000 has been provided for each year of the plan. The bounty is payable on butter, cheese and butterfat products containing 40 per cent. or more of butterfat. Bounty is payable on the production of these commodities provided they are taken into equalization.

The Commonwealth Government extended for the full period of the plan the provision whereby it underwrites the final minimum equalized return to butter and cheese factories each year. The actual level at which returns are to be underwritten is to be decided prior to the commencement of each year of the plan. Returns to producers have been underwritten at 40d. per lb. on commercial butter each year since the inception of the underwriting arrangement in 1958. The principal value underlying this guarantee is that it enables the Commonwealth Dairy Produce Equalization Committee Ltd. to make a higher initial payment to factories than would otherwise be possible without risk of overpayment.

Under the current plan the Dairy Industry Investigation Committee has been disbanded. This Committee was responsible, during the last five-year plan, for the determination of the cost of efficient production of butterfat. However, this determination is not required for the current plan.

The Australian Dairy Industry Council assumes responsibility for determining domestic wholesale prices of butter and cheese. Under the previous plan it was the responsibility of the Minister for Primary Industry to determine local prices, after consultation with the Council.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948, for the purpose of stabilizing returns from exports. During 1951-52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. From 1st July, 1952, to 30th June, 1957, it was available to the industry to be used, in whatever manner it considered desirable, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan.

The Act was amended in 1957 to enable the Board to use the fund for such other purposes as are approved by the Minister for Primary Industry. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1963, totalled approximately £1,800,000.

(b) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44 to 1948-49. Details of the amounts distributed during each year will be found in Year Book No. 38, page 1031.

(vi) *Extension, Research and Promotion.* (a) *Dairy Industry Extension Grant.* An annual grant of £250,000, to be expended by State Governments for the purpose of promoting improved farming practices in the dairying industry, was first made by the Commonwealth Government for the five years from 1st July, 1948. This assistance was continued for further periods of five years from 1st July, 1953, and from 1st July, 1958, at the same rate. For the five years from 1st July, 1963, the amount of the annual grant has been increased to £350,000.

(b) *Dairy Industry Research and Sales Promotion.* At the request of the Australian Dairy Industry Council, legislation was enacted in 1958 to provide for a sales promotion campaign for butter and cheese in Australia and also for research into industry problems. The legislation provides for a statutory levy (the Dairy Produce Levy) to be imposed on all butter and cheese manufactured in Australia. The maximum rates of levy are  $\frac{3}{8}$ d. per lb. on butter and  $\frac{3}{8}$ d. per lb. on cheese, but the initial rates which commenced in November, 1958, were  $\frac{1}{4}$ d. per lb. on butter and  $\frac{1}{8}$ d. per lb. on cheese. Until November, 1959, the proceeds from the levy were divided equally between research and sales promotion, but after that date one-third was allocated to research and two-thirds to sales promotion. The rates of levy operative from November, 1959, were increased to the maximum provided under the Act, the increase being utilized solely for the purposes of intensifying the sales promotion campaign.

The Commonwealth Government agreed to contribute one half of the costs incurred on approved projects included in the programme of research, with a maximum contribution of £1 for £1 against funds raised by way of levy and allocated to research. The sales promotion programme is financed solely by the levy. The following table lists the amounts of levies collected, and the amounts allocated to research and sales promotion, during the four years 1959-60 to 1962-63.

DAIRY PRODUCE LEVY: AMOUNTS COLLECTED AND ALLOCATED  
(£)

Particulars	1959-60	1960-61	1961-62	1962-63
Allocated to—				
Research(a) .. ..	126,519	116,591	130,000	131,750
Sales promotion .. ..	206,918	233,181	260,000	263,500
<b>Total Collected(a) ..</b>	<b>333,437</b>	<b>349,772</b>	<b>390,000</b>	<b>395,250</b>

(a) Excludes amounts contributed by the Commonwealth Government.

The scheme is administered by the Australian Dairy Produce Board, which, in respect of research, is advised by a statutory committee, the Dairy Produce Research Committee.

2. **Dairy Cattle and Dairy Products.**—(i) *Dairy Herds.* Lack of uniformity in the forms used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a much longer period of years. The number of dairy cows in Australia at 31st March, 1963, was 3,263,000, compared with 3,230,000 in the previous year. A record level of 3,451,000 was attained in 1957.

There is a preponderance of dairy cattle in Victoria and Tasmania, while in New South Wales and South Australia the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, other cattle predominate, the main use of cattle in these areas being for the production of beef. The numbers of dairy cattle in Australia are shown in the following tables.

#### NUMBER OF DAIRY CATTLE: AUSTRALIA

At 31st March	Dairy cows (in milk and dry)	Dairy heifers 1 year and over	Dairy calves under 1 year	Dairy bulls	Total dairy cattle
Average for three years ended—					
1939 .. .. .	3,210,324	n.a.	n.a.	n.a.	n.a.
1949 .. .. .	3,133,266	827,609	712,688	107,708	4,781,271

1960-61..		3,162,449		1,339.3	181,654	46,924	223,814
1961-62..		3,229,587		1,443.6	198,621	55,306	228,228
1962-63..		3,263,289		1,471.0	c 202,420	(c) 58,022	229,270

(a) Particulars are at 31st March of second year shown. (b) "Number of units" indicates the number of cows that can be milked simultaneously—i.e. the cow capacity of installed milking machines. (c) Subject to revision.

(iii) *Size of Dairy Herds.* Information on the size of dairy herds is published in a series of bulletins *Classification of Rural Holdings by Size and Type of Activity*, 1959-60.

(iv) *Production of Milk.* (a) *Production per Cow.* The quantity of milk produced by a dairy cow can be as high as 1,000 gallons a year, and varies greatly with breed, locality and season. For all dairy cows and for all seasons for the whole of Australia prior to 1916, production averaged considerably less than 300 gallons per annum. Largely owing to an improvement in the quality of the cattle, and the increased application of scientific methods, the 300-gallon average was exceeded in each year since 1924. In the last five years, an average of 433 gallons per cow per annum has been obtained. In 1962-63, the average yield was 453 gallons. The annual average yields per cow shown in the following table are obtained by dividing the total production of whole milk for the year ended June by the mean of the number of dairy cows (in milk and dry) at 31st March of that year and of the preceding year. They are, in effect, based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year, but it may be accepted as sufficiently reliable to show the general trend.

AVERAGE MILK PRODUCTION PER DAIRY COW  
(Gallons)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.(a)
Average for three years ended—

1962-63 .. ..	364	589	312	586	442	570	479	453

(a) Excludes Northern Territory, for which particulars are not available.

(b) *Total Production of Whole Milk.* In the following table, particulars of the production of whole milk in the various States are shown for the years 1958-59 to 1962-63 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59. Victoria is the principal milk-producing State, and in 1962-63 the output from that State, 670.8 million gallons, represented 46 per cent. of total production. Output from New South Wales in 1962-63 was 324.1 million gallons (22 per cent. of the total) and that of Queensland 245.1 million gallons (17 per cent.). Production in the remaining States accounted for 15 per cent.

(a) Excludes Northern Territory, for which particulars are not available. (b) Includes 7,107,000 gallons of milk, the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (c) Includes 187,000 gallons of milk, the produce of Victoria, sent as cream to New South Wales. (d) Includes 180,000 gallons of milk, the produce of Queensland, sent as cream to New South Wales. (e) Subject to revision. (f) Includes butter made from cream, the produce of Victoria and Queensland. (g) Includes butter made from cream, the produce of New South Wales.

There has been a gradual decline over the years in the proportion of milk used for butter-making. In 1962-63, 63 per cent. of the total milk supply was used for butter, 9 per cent. for cheese, 6 per cent. for preserved milk products and 22 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each of the years 1958-59 to 1962-63 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

### PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA

('000 Gallons)

Year—					
1958-59 .. .. .	1,370,197	893,626	94,900	81,074	300,597
1959-60 .. .. .	1,406,501	912,271	100,856	82,636	310,738
1960-61 .. .. .	1,339,302	839,596	104,470	76,619	318,617
1961-62 .. .. .	1,443,562	919,301	122,340	78,028	323,893
1962-63 .. .. .	1,470,983	935,267	130,503	83,167	322,046

(a) Principally fluid milk for domestic purposes.

(vi) *Production of Butter, Cheese and Preserved Milk Products.* (a) *General.* The establishment of large central butter factories, either on a co-operative or independent basis, has resulted in a considerable reduction in the cost of manufacture. The product is also of a more uniform quality, and whereas formerly the average quantity of milk used per pound of hand-made butter was about three gallons, factory butter requires only about two gallons. In addition, subsidy payments by the Commonwealth Government are made only on factory-produced butter. As a result, the production of farm-made butter has declined substantially, and in 1962-63 represented only about 0.6 per cent. of all butter made. A similar position exists in the cheese-making industry where a negligible amount is now made on farms.

In 1962-63, factories in Australia engaged in the processing of milk into butter or cheese or the various preserved milk products numbered 348 and were distributed among the States as follows:—New South Wales, 72; Victoria, 126; Queensland, 70; South Australia, 41; Western Australia, 18; and Tasmania, 21. More details regarding numbers of factories, output, etc., are given in Chapter VI. Manufacturing Industry (*see* p. 201).

(b) *Production of Butter.* Production in 1962-63 at 202,420 tons was 3,799 tons (1.9 per cent.) more than the amount produced in 1961-62, but 6,491 tons (3.1 per cent.) less than the record post-war production of 1955-56. The foregoing figures include butter produced on farms, which has shown a steady decline from about 4,000 tons in the early 1950's to 1,148 tons in 1962-63.

The following table shows production of butter in factories and on farms in each State for the years 1958-59 to 1962-63 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**BUTTER PRODUCTION IN FACTORIES AND ON FARMS**

(a) Northern Territory and Australian Capital Territory: nil. (b) Subject to revision.

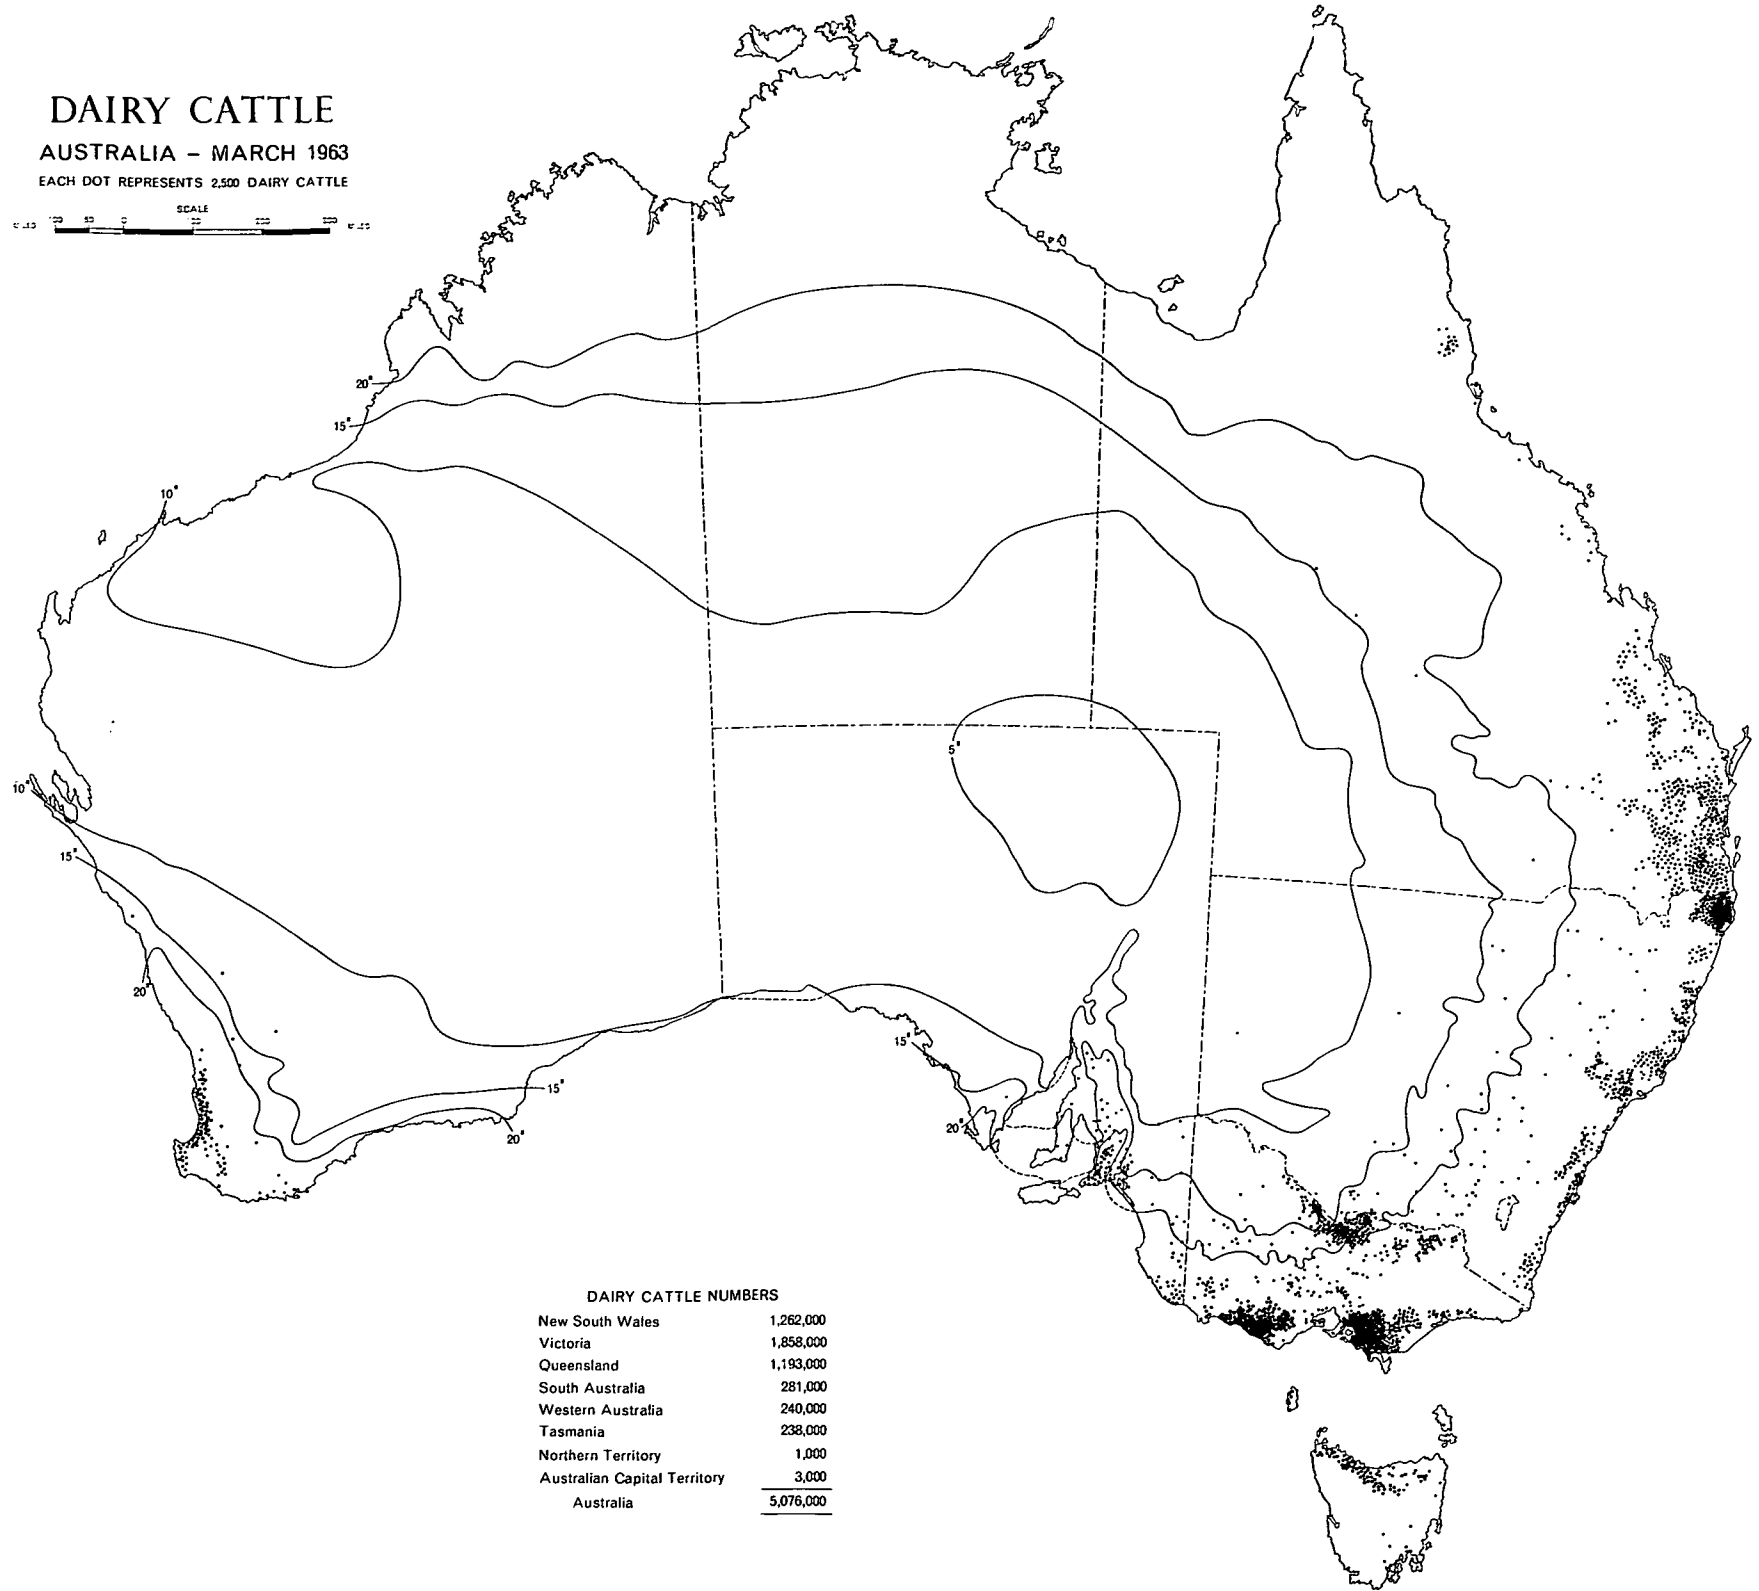

(d) *Production of Preserved Milk Products.* The production in 1962-63 of all full-cream milk products and milk by-products, with the exception of condensed, concentrated and evaporated unsweetened full-cream milk, and powdered full-cream milk, increased in comparison with 1961-62. Between the same years the quantity of whole milk used in the manufacture of preserved milk products increased from 78.0 million gallons in 1961-62 to 83.2 million gallons in 1962-63.

Preserved milk products are manufactured mainly in Victoria, which produced 63.8 per cent. of the total (in terms of whole milk equivalent) in 1962-63. New South Wales accounted for 17.7 per cent. and the remaining States for 18.5 per cent.

# DAIRY CATTLE

(viii) *Local Consumption of Butter and Cheese.* Following the cessation of butter rationing after the 1939-45 War, consumption per head rose to 31.2 lb. in 1951-52. However, in later years it gradually declined, and in 1961-62, and again in 1962-63, it reached its lowest level since the war. At 24.0 lb. per head in both of these years, it was 4 per cent. below the level of 1960-61.

Consumption of cheese per head in 1962-63 was 6.6 lb., the third highest figure recorded. The highest figure recorded was 6.8 lb. per head in 1957-58.

The following table shows details of the production and disposal of butter and cheese for each of the years 1958-59 to 1962-63 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

1962-63 .. ..	(a) 48.964	5.339	43.625

(a) Interim rates.

(x) *Oversea Trade in Dairy Products. (a) General.* The production of butter and cheese in Australia is considerably in excess of local requirements, and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon seasonal conditions.

Exports of butter in 1962-63 amounted to 77,413 tons, compared with 78,005 tons in 1961-62. Exports of cheese in these years were 25,939 tons and 22,378 tons respectively. As in previous years, the principal importing country for Australian butter and cheese was the United Kingdom. In 1962-63, 84 per cent. of butter and 53 per cent. of cheese exported was consigned to the United Kingdom.

Total quantities and values of exports of butter, cheese and preserved milk products of Australian origin are shown in the table at the foot of the page.

(b) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to supervision, inspection and examination by officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as follows:—flavour and aroma, 50 points; texture, 30 points; and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality; at 90 to 92 points, first quality; at 86 to 89 points, second quality; and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries, 1961-62, Bulletin No. 56.*

**BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA**  
(Per cent.)

Grade	Butter			Cheese

3. Pigs and Pig Products.—(i) *Pig Numbers.* At 31st March, 1963, 1,440,000 pigs were recorded, representing a decrease of 212,000 (12.9 per cent.) on numbers a year earlier. The number of pigs in each State and Territory at 31st March for each of the years 1959 to 1963 compared with the averages for the three-year periods ended 31st March, 1939, 1949 and 1959, are given in the following table.

## NUMBER OF PIGS

At 31st March	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

1963 ..	391,999	297,791	402,498	144,976	130,791	70,002	1,842	92	1,439,991

A long-term comparison of pig numbers is given in the division Pastoral Production of this chapter (see page 1051). A map showing the distribution of pigs in Australia at 31st March, 1963, faces p. 1083. Maps showing the distribution at 31st March, 1955 and 1948, appear on page 912 of Year Book No. 43 and on page 908 of Year Book No. 39, respectively.

(ii) *Size of Pig Herds.* Details of the size of pig herds have been published in a series of bulletins entitled *Classification of Rural Holdings by Size and Type of Activity, 1959-60.*

(iii) *Pigs Slaughtered.* The number of pigs slaughtered during each of the years 1958-59 to 1962-63, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, is shown in the following table. A graph showing the number of pigs in Australia from 1870 onwards appears on page 1061 of Year Book No. 49.

## PIGS SLAUGHTERED

('000)

Period	Slaughtering passed for human consumption									Total slaughtering (including boiled down)

(a) Pressed and canned bacon and ham have been converted to cured carcass weight for periods subsequent to 1948-49.

(b) Subject to revision.

(v) *Consumption.*(a) *Pork.* Apparent consumption of pork per head in 1962-63 was 11.8 lb., compared with 13.6 lb. per head in 1961-62. The 1961-62 level was the highest since the war. In recent years, annual consumption of pork per head has not fallen below 10 lb.

In the following table, details of the production and disposal of pigmeat are shown for the years 1958-59 to 1962-63 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## PRODUCTION AND DISPOSAL OF PIGMEAT (CARCASS WEIGHT): AUSTRALIA

(b) *Bacon and Ham.* Annual consumption of bacon and ham has been about 7 lb. per head in recent years. The 1962-63 consumption was 7.3 lb. per head.

Details of production and disposal of bacon and ham for the years 1958-59 to 1962-63, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

## PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED CARCASS WEIGHT) (a): AUSTRALIA

Period	Change in stocks	Production	Exports	Canning	Apparent consumption in Australia	
					Total	Per head per annum
	'000 tons	'000 tons	'000 tons	'000 tons	'000 tons	lb.

## § 2. The Poultry Industry

1. **General.**—Originally the poultry industry was conducted in conjunction with other branches of rural activity, mainly dairying, but it is now a specialized and distinct industry. It is from this source that the bulk of the commercial production is obtained. Practically all farm households keep poultry for the purpose of supplying their own domestic requirements and some supplies from this source are also marketed. In addition, many private homes in both rural and suburban areas keep small numbers of fowls in back-yard runs to help satisfy domestic needs. Because of the incompleteness of data available on poultry throughout Australia, details of poultry numbers are not published.

2. **Marketing of Eggs.**—(i) *Markets.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 and of the results of trading under free market conditions in the four years following appear in previous issues of the Year Book.

Over the period 1952-53 to 1962-63, Australian exports of shell eggs fell by 81 per cent. The main outlets for Australian eggs in 1962-63 were Kuwait (1,258,000 dozen), Saudi Arabia (655,000 dozen) and the United States of America (467,000 dozen).

The United Kingdom remains virtually the only export market for egg pulp. Australian exports of pulp to that country were approximately 12,200 tons in 1961-62 and 7,755 tons in 1962-63.

(ii) *Egg Export Control Act 1947.* Details of this Act were given in previous issues of the Year Book (see No. 47, p. 997).

3. **Recorded Production of Eggs and Egg Products.**—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Australian Egg Board and the Egg Marketing Board of New South Wales. Details of production as recorded by these authorities are shown in the following table.

SHELL EGGS: PRODUCTION<sup>(a)</sup> RECORDED BY EGG BOARDS  
( '000 Dozen)

State	1958-59	1959-60	1960-61	1961-62	1962-63
New South Wales .. ..	45,221	53,495	62,156	61,657	54,609

Tasmania .. ..	(b)	(b)	(b)	(b)	(b)
<b>Total(c)</b> .. ..	<b>94,629</b>	<b>107,540</b>	<b>119,005</b>	<b>120,717</b>	<b>110,329</b>

(a) Receipts from consignors and sales by producer agents.  
Tasmania.

(b) Not available.

(c) Excludes

(ii) *Egg Pulp, etc. Production.* Particulars of the production of whole egg pulp as recorded by the Egg Marketing Board for the State of New South Wales and by the Australian Egg Board for the other States are shown in the following table.

### LIQUID WHOLE EGG PULP: PRODUCTION RECORDED BY EGG BOARDS

('000 lb.)

State	1958-59	1959-60	1960-61	1961-62	1962-63
New South Wales .. ..	9,808	17,791	21,446	20,916	11,499
Victoria .. ..	3,473	6,460	7,948	12,000	7,684
Queensland .. ..	2,011	2,767	3,716	3,321	3,864
South Australia .. ..	2,495	3,210	3,394	3,374	2,837
Western Australia .. ..	1,600	1,122	916	620	834
Tasmania .. ..	(a)	(a)	(a)	(a)	(a)
Total(b) .. ..	19,387	31,350	37,420	40,231	26,718

(a) Not available.

(b) Excludes Tasmania.

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1962-63 amounted to 2,029,000 lb. and 1,412,000 lb., respectively, compared with 2,416,000 lb. and 1,784,000 lb., respectively, in the previous year. These figures exclude small quantities produced in Tasmania for which details are not available.

4. *Consumption of Eggs and Egg Products.*—Because of the operations of producers in areas outside the control of the Egg Boards and the extent of "back-yard" poultry-keeping, for which no statistics are collected, figures relating to total egg production must be accepted with some reserve. The production shown in the following table, together with details of exports and consumption, is based upon the records of Egg Boards of production from areas under their control, plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

### ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL: AUSTRALIA

Period	Change in stocks	Estimated total production	Exports	For drying and pulping(a)	Apparent consumption in Australia	
					Total	Per head per annum
	Mill. doz.	Mill. doz.	Mill. doz.	Mill. doz.	Mill. doz.	Dozen
Average for three years ended—						
1938-39 .. ..	-0.1	152.7	13.0	5.5	134.3	19.5
1948-49 .. ..	+0.1	204.7	17.7	39.1	147.8	19.3

1960-61 .. .. .	195	15	210	(c) 26.3
1961-62 .. .. .	196	14	210	(c) 26.3
1962-63 .. .. .	198	12	210	(c) 26.3

(a) In terms of the number of shell eggs. (b) The average weight of an egg in Australia has been taken as 1.75 oz. for the years prior to 1960-61. From 1960-61, the average weight has been taken as 2 oz. (c) Not comparable with earlier years; see footnote (b).

5. **Oversea Trade in Poultry Products.**—Details of the exports of poultry products in each of the years 1960-61 to 1962-63 are shown below.

**EXPORTS OF POULTRY PRODUCTS: AUSTRALIA**

Particulars	Quantity			Value (£A.'000 f.o.b.)		
	1960-61	1961-62	1962-63	1960-61	1961-62	1962-63
Eggs in shell .. .. '000 doz.	5,443	5,007	3,943	847	831	603
Eggs not in shell—						
In liquid form .. .. '000 lb.	26,807	29,231	18,920	3,111	3,273	1,901
Drv .. .. .. '000 lb.	8	190	3	5	87	2
Frozen poultry .. .. '000 lb.	423	427	318	93	93	71
Poultry, live(a) .. .. number	283,365	555,908	550,362	41	75	73

(a) Includes day-old chicks.

There have been considerable imports of canned chicken from the United States of America in recent years. The quantities and values during 1960-61, 1961-62 and 1962-63, respectively, were: 2,016,000 lb., £227,000; 474,000 lb., £46,000; 293,000 lb., £28,000.

### § 3. The Bee-Farming Industry

1. **Production of Honey and Bees-wax.**—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming. In recent years, there has been considerable growth in the number of itinerant apiarists operating on a large scale with mobile equipment. Some of these apiarists move as far afield as from Victoria to Queensland in an endeavour to provide a continuous supply of nectar from flora suitable for their bees. The returns of honey from productive hives during 1962-63 shows an average of 108 lb. per hive and the average quantity of wax was 1.4 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1962-63 are shown in the following table.

BEEHIVES, HONEY AND BEES-WAX, 1962-63

State or Territory	Beehives (a)			Honey produced		Bees-wax produced	
	Pro- ductive	Unpro- ductive	Total	Quantity	Gross value	Quantity	Gross value
	'000	'000	'000	'000 lb.	£'000	'000 lb.	£'000
New South Wales ..	121	71	192	14,087	712	177	42

(a) At 30th June.

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora, particularly the eucalypts, which varies greatly from year to year.

The table below shows the production of honey and bees-wax for each of the years 1958-59 to 1962-63, compared with the averages for the three-year periods ended 1938-39, 1948-49, and 1958-59.

HONEY AND BEES-WAX PRODUCTION

1962-63 ..	177	64	44	56	79	6	(a)	426

(a) Less than 500 lb.

2. **Oversea Trade in Bee Products.**—The quantity of honey exported in 1962–63, 26.8 million lb., was 5 per cent. more than in 1961–62. The principal importers were the United Kingdom (51 per cent. of total exports) and the Federal Republic of Germany (40 per cent.).

The quantity of bees-wax exported in 1962–63 was 322.9 million lb.

Total quantities and values of exports of honey and bees-wax for the years 1960–61 to 1962–63 are shown below.

#### EXPORTS OF HONEY AND BEES-WAX: AUSTRALIA

Particulars	Quantity			Value (£A.'000 f.o.b.)

## CHAPTER XXIV

### FORESTRY

**NOTE.**—For further details on subjects dealt with in this chapter *see* the annual bulletins *Primary Industries, Part II.—Non-Rural Industries and Value of Production*, and *Secondary Industries* (for sawmills, etc., operations).

All values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b., port of shipment. The export table on page 1112 relates to exports of Australian produce, but quantities and values quoted in the text sometimes include *re-exports*, the amounts involved, however, being generally small.

#### § 1. Source of Statistics

Statistics relating to forestry are, in general, provided by the various authorities concerned with forestry administration. Particulars of forest reservations contained in this chapter have been collected by the Statisticians of the various States, mainly from information provided by the State forestry authorities. Other information on forested areas has been provided by the Commonwealth Forestry and Timber Bureau, which has also supplied certain other data.

Statistics of timber and by-products have been compiled from the annual factory collections undertaken by the Statisticians in the several States. Figures of production of gums, resins and tanning barks have been provided by the State forestry authorities.

Data of imports and exports of forest products and timber and timber products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the statistics of oversea trade.

The figures shown relate, in general, to years ended 30th June.

#### § 2. Forestry in Australia

**1. Objects of Forestry.**—The main object of forestry authorities is to manage the forests of the country in a manner that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins.

Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, provision of recreational facilities, and aesthetic effects. Forestry also aims at improving existing forests and woodlands by properly controlled exploitation, by protection from such destructive agencies as fire and insect attack, and by inducing regeneration where it is desirable. The provision of a partial tree cover on denuded lands where this cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other land use, are further aims of forestry.

2. **General Account of Forests and Timbers.**—(i) *General.* The area of land in Australia suitable for the production of commercial timber as a primary crop is very small in comparison with the size of the continent. Hardwoods cover 97 per cent. of the total forested area, and approximately 94 per cent. of the hardwood area is occupied by eucalypts.

(ii) *Eucalypts.* The genus *Eucalyptus* is remarkable in that it includes over 600 species ranging in size from the mighty forest giants, mountain ash (*E. regnans*) of Victoria and karri (*E. diversicolor*) of Western Australia, down to the small mallee species which inhabit vast areas of the inland. The habitats range from the dry inland areas to the high mountain areas in the Australian Alps, from areas with the annual rainfall as low as 10 inches to those where it is 150 inches. Of the 600 species, only about 100 are used for sawmilling, and not more than 40 of these are exploited extensively.

The better class of eucalypt forest is concentrated mainly in the higher rainfall areas such as the east coast, the highlands of southern New South Wales, Victoria and Tasmania and the south-western corner of Western Australia. The more important species include blackbutt (*E. pilularis*), tallowwood (*E. microcorys*), flooded gum (*E. grandis*) and red mahogany (*E. resinifera*) of New South Wales and Queensland, alpine ash (*E. delegatensis*) of New South Wales, Victoria and Tasmania, mountain ash (*E. regnans*), messmate (*E. obliqua*) and blue gum (*E. bicostata*) of Victoria and Tasmania, and karri (*E. diversicolor*) of Western Australia. For height and grandeur, mountain ash and karri are unequalled among the hardwoods of the world, and are excelled only by a few North American softwood species.

In the coastal regions with lower rainfall, the eucalypt forests contain many durable species such as the ironbarks, grey gums and bloodwoods of the east coast and jarrah (*E. marginata*) and tuart (*E. gomphocephala*) of Western Australia. The spotted gum (*E. maculata*) occurring in New South Wales and Queensland is another example.

Along most of the inland streams and adjacent flood-plains, there are riverain forests consisting mainly of river red gum (*E. camaldulensis*), a very durable hardwood which has supplied large quantities of sawn timber, railway sleepers and fence posts.

Eucalypts also occur in open forest and savannah woodland formations in areas receiving a reliable annual rainfall of about 10 to 20 inches per annum, as on the goldfields of Western Australia where salmon gum (*E. salmophloia*), brown mallet (*E. astringens*) and wandoo (*E. wandoo*) occur. These forests are of considerable value for firewood, as mining timbers and for fencing. Minor forest products such as sandalwood, tan bark, essential oils, etc., also come from isolated areas in this type of country, and in the more arid areas.

As a measure of the relative significance of the more important eucalypts sawn in Australia, the table following shows the quantities of timber sawn from them in 1961–62.

## SAWN TIMBER PRODUCED FROM EUCALYPTS(a): AUSTRALIA, 1961-62

(Source: Forestry and Timber Bureau)

('000 super. ft.)(b)

Species							Sawn timber
Messmate ( <i>E. obliqua</i> )	..	..	..	..	..	..	206,007
Blackbutt ( <i>E. pilularis</i> )	..	..	..	..	..	..	161,284
Jarrah ( <i>E. marginata</i> )	..	..	..	..	..	..	156,539
Alpine ash ( <i>E. delegatensis</i> )	..	..	..	..	..	..	135,801
Red gum ( <i>E. camaldulensis</i> )	..	..	..	..	..	..	35,125
Mountain ash ( <i>E. regnans</i> )	..	..	..	..	..	..	34,569
Karri ( <i>E. diversicolor</i> )	..	..	..	..	..	..	29,033
Other eucalypts(c)	..	..	..	..	..	..	198,595
<b>Total, Eucalypts</b>	..	..	..	..	..	..	<b>956,953</b>

(a) Includes the volume of sawn sleepers and the sawn equivalent of ply and veneer. (b) A super. or superficial foot (true measure) can be defined as the equivalent volume of a solid body, one foot long by one foot wide by one inch thick. (c) Separate figures are not available for the production of other species, but the probable order of importance of the next three eucalypt species is: spotted gum (*E. maculata*), tallowwood (*E. microcorys*) and silvertop ash (*E. sieberiana*).

(iii) *Other Hardwoods.* Hardwood genera other than *Eucalyptus* cover a comparatively small portion of the forested land in Australia (some 6 per cent.), but these areas provide a great variety of timbers suitable for a multitude of uses. There are two basic types of forest containing supplies of hardwoods other than eucalypts, namely, the tropical and subtropical rainforests of coastal New South Wales and Queensland, and the temperate rainforests of southern Victoria and Tasmania, both of which yield species known collectively as rainforest or brushwood species. The total volume of brushwood species produced in 1961-62 was 66,869,000 super. feet, i.e. less than seven per cent. of the total hardwood cut in Australia.

The tropical and subtropical rainforest along the eastern coast of Australia contains a large number of different species. Tropical rainforest occurs in northern Queensland in the vicinity of Cairns and on the Atherton Tableland, providing such well-known cabinet woods as Queensland maple (*Flindersia brayleana*), Queensland walnut (*Endiandra palmerstonii*) and the silky oaks. The subtropical rainforest found in southern Queensland and northern New South Wales yields the tulip oaks, crab apple (*Shizomeria ovata*) and white beech (*Gmelina leichhardtii*). Coachwood (*Ceratopetalum apetalum*) and sassafras (*Doryphora sassafras*) occur in regions to the south near Dorrigo and have yielded valuable timber produce for many years.

Turpentine (*Syncarpia glomulifera*), an excellent harbour pile timber resistant to marine borer attack, and brush box (*Tristania conferta*), a superior structural and decking timber, are found in association with some eucalypts in the wetter rainfall areas on the north coast of New South Wales and in southern Queensland.

Temperate rainforest which is to be seen in southern parts of Victoria and western Tasmania consists mainly of myrtle beech (*Nothofagus cunninghamii*), but produces also southern sassafras (*Atherosperma moschata*) and blackwood (*Acacia melanoxylon*).

(iv) *Softwoods.* One of the most important species of native softwood is white cypress pine (*Callitris hugelii*). The main cypress pine forests of commercial value occur in New South Wales and southern Queensland west of the Great Dividing Range. The trees are comparatively small, but the timber has particular value owing to its durability and resistance to termites. It is suitable for use as scantlings, flooring, linings, weatherboards, poles and posts. As much of the area originally covered by cypress pine has been cleared for wheat farming and grazing, the production from the remaining State forests is now strictly regulated to ensure a continuous supply. The volume of cypress pine cut in 1961-62 was approximately 66.5 million super. feet, and in 1962-63 this cut rose to approximately 69.3 million super. feet.

Another important native softwood is hoop pine (*Araucaria cunninghamii*), which occurs naturally in the sub-tropical rain forest of southern Queensland and northern New South Wales associated with tulip oaks, crab apple, white beech, coachwood and sassafras. The greater part of the original hoop pine forests has been exploited, but considerable areas have been replanted to this species in Queensland and, to a lesser extent, in New South Wales.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya and kauri pines (*Araucaria bidwillii* and *Agathis palmerstonii*) of Queensland, and celery top, Huon and King William pines (*Phyllocladus asplenifolius*, *Dacrydium franklinii* and *Athrotaxis selaginoides*) of Tasmania. Kauri pine is found in the tropical rainforest of northern Queensland in association with non-eucalypt hardwoods, while bunya pine occurs in the subtropical rainforests. In the temperate rainforests of Tasmania, celery top, Huon and King William pines are found in association with myrtle beech, southern sassafras and blackwood.

3. **Forested Areas.**—(i) *Extent of Forests.* Estimates prepared for the Eighth British Commonwealth Forestry Conference held in Kenya in 1962 show the total area of forest in Australia as 512.2 million acres, or about 27 per cent. of the total land area of the continent. In making these estimates, the F.A.O. definition of "forest" (published in *World Forest Inventory*, 1958, p. 123) was used. This definition includes areas of sparse or stunted tree growth, and in the case of Australia some four-fifths of the total forest area falls into this category.

### CLASSIFICATION OF FOREST AREA(a): AUSTRALIA

(Source: Forestry and Timber Bureau)

('000 acres)

Type of forest	Area
<b>LANDS</b>	
<b>Accessible forests—</b>	
<b>Productive forests in use—</b>	
Coniferous (softwood) .. .. .	492
Non-coniferous (broadleaved) .. .. .	24,352
Mixed woods .. .. .	5,636
Open areas .. .. .	245
<b>Total, Productive Forests in Use .. .. .</b>	<b>30,725</b>
Productive forests not in use .. .. .	(b) 31,961
Unproductive accessible forests .. .. .	(c) 257,687
<b>Total, Accessible Forests .. .. .</b>	<b>(d) 320,373</b>
<b>Inaccessible forests .. .. .</b>	<b>191,795</b>
<b>Total, Forested Area .. .. .</b>	<b>512,168</b>

(a) Based on the 1960 classification of forests. (b) Includes approximately 25 million acres capable of producing fuelwood only. (c) This area carries only sparse, stunted trees. (d) Includes approximately 258 million acres of land carrying only stunted trees.

CLASSIFICATION OF FOREST AREA(a): AUSTRALIA—*continued*

(Source: Forestry and Timber Bureau)

('000 acres)

Type of forest	Area
<b>OWNERSHIP OF ACCESSIBLE FORESTS</b>	
Publicly-owned forests—	
State forests .. .. .	23,534
Other forests .. .. .	150,329
<i>Total, Publicly-owned Forests</i> .. .. .	<i>173,863</i>
Privately-owned forests .. .. .	145,537
Ownership not yet determined .. .. .	973
<i>Total, Accessible Forests</i> .. .. .	<i>320,373</i>

(ii) *Forest Reservations.* Statements furnished by State and Commonwealth authorities show reservations of forest areas in Australia as at 30th June, 1963, totalling 39.1 million acres, of which 24.8 million acres were dedicated State forests and 14.3 million acres were timber and other reserves. The distribution of those areas is shown by States in the following table. Detailed comparisons between States are not possible because of the lack of uniform definitions.

## AREA OF FOREST RESERVATIONS, 30TH JUNE, 1963

('000 acres)

State or Territory	State forests	Timber reserves (Forest Acts)	Other reserves (a)	Total
New South Wales .. .. .	6,724	1,371	(b) 1,546	9,641
Victoria .. .. .	5,580	(b) 151	(b) 368	6,099
Queensland .. .. .	5,474	2,619	947	9,040
South Australia .. .. .	280	1	470	751
Western Australia .. .. .	4,454	(c) 2,617	324	7,395
Tasmania .. .. .	(d) 2,287	137	(e) 1,217	3,641
Northern Territory .. .. .	..	9	(f) 2,394	2,403
Australian Capital Territory .. .. .	..	..	(g) 131	131
<i>Australia</i> .. .. .	<i>24,799</i>	<i>6,905</i>	<i>7,397</i>	<i>39,101</i>

(a) Includes national parks and scenic reserves. (b) Reserved under Lands Acts. (c) Includes 775,000 acres reserved under Lands Acts. (d) Includes 465,000 acres of State forests under pulpwood concessions and 274,000 acres under exclusive and general forestry permits. (e) Includes 612,000 acres of Crown land under pulpwood concessions and 360,000 acres of Crown land under exclusive forestry permits. (f) Comprises a fauna and flora reserve on Coburg Peninsula (352,000 acres), land covered by pastoral leases (942,000 acres) and land within Welfare Reserves (1,100,000 acres). (g) Forest land not specifically reserved.

A considerable proportion of the permanently reserved areas is in inaccessible mountainous country, and many of the forests contain a mixture of species, only some of which are at present of commercial value. Much of the area consists of inferior forest, and a large proportion of the whole has been seriously degraded by recurrent fires.

(iii) *Plantations.* The indigenous forest of Australia does not contain adequate supplies of softwood, and Australia's requirements have had to be met largely by imports. As a result of the planned policy of the forest services and of several private commercial organizations, the area of softwood plantations, mainly of exotic species, is steadily increasing. It was natural that this aspect of forestry should receive earliest attention in South Australia, as this is the State most poorly endowed with natural forest. South Australia now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. Production is also increasing in the other States, and the thinnings from their plantations are already supplying a significant volume of timber.

The total production of roundwood from Australia's coniferous plantations is now almost 40 million cubic feet per annum and is expected to increase substantially during the next decade.

By 30th September, the planting season in the winter rainfall areas is completed, but that for the summer rainfall areas has not commenced. The following table shows the areas of softwood plantations at 30th September, 1963.

### SOFTWOOD PLANTATIONS, 30TH SEPTEMBER, 1963

(Source: Forestry and Timber Bureau)

(Acres)

State or Territory	Government			Private (mainly <i>P. radiata</i> )	Total
	<i>Pinus radiata</i>	Other species	Total		
New South Wales .. ..	79,458	(a) 20,091	99,549	25,448	124,997
Victoria .. ..	44,443	10,043	54,486	(b) 75,000	129,486
Queensland .. ..	2,237	101,125	103,362	7,970	111,332
South Australia(c) .. ..	112,704	9,904	122,608	39,750	162,358
Western Australia .. ..	14,828	24,434	39,262	1,370	40,632
Tasmania .. ..	17,917	431	18,348	7,108	25,456
Northern Territory .. ..	..	(d) 251	251	23	274
Australian Capital Territory..	24,130	2,238	26,368	..	26,368
<b>Australia .. ..</b>	<b>295,717</b>	<b>168,517</b>	<b>464,234</b>	<b>156,669</b>	<b>620,903</b>

(a) Includes 3,791 acres of hoop, bunya and kauri pine. (b) Estimated. (c) Excludes the 1963 plantations. (d) Cypress pine (*Callitris intratropica*).

A special article prepared by the Forestry and Timber Bureau giving a detailed account of the history and development of softwood plantations and of the characteristics of individual species, is included in Year Book No. 44, page 975.

Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area, and the total acreage at 30th June, 1963, was 36,000 acres, about two-thirds of which was mallet. Plantations of this species have been established in Western Australia for tan bark production.

4. *Forest Administration and Research.*—(i) *Forestry Activities of the Commonwealth Government.* (a) *Commonwealth Forestry and Timber Bureau.* The functions of the Commonwealth Forestry and Timber Bureau are laid down in the Forestry and Timber Bureau Act and include forestry research and education, the study of timber supply and advice to the Government on forestry matters. The administering department is the Department of National Development.

In 1961, the Commonwealth Government decided to expand its activities in forestry research in Australia. The existing Divisions of Silvicultural Research and Forest Management Research were combined to form the Forest Research Institute. The purpose of the Institute is to provide complete coverage in forestry research, ensuring that all problems of primary importance to the practice and development of forestry in Australia are investigated.

In developing a programme with this aim, the Institute takes account of the research activities and potential of the State forest services and other organizations. The research work carried out by the existing sections of the Forest Research Institute covers a wide range of studies, including the following: factors affecting tree growth, tree breeding, introduction of exotic species, forest nutrition, forest botany, forest entomology and pathology, fire protection, watershed management, forest mensuration, forest management and management economics, and aerial inventory. The Forest Research Institute maintains five regional establishments in the Commonwealth, two of which have an outstation in addition to the regional headquarters. These regional stations are run on a co-operative basis with State forest services and private forest companies or other government instrumentalities.

The Australian Forestry School, located in Canberra, trains professional foresters. Training at the school covers the third and fourth years of a four-year degree course in forestry. The first two years of the course are spent in a study of prescribed science subjects at one of the Australian universities. The third and fourth years are spent at the Forestry School studying specialized forestry subjects. Students who complete the course satisfactorily graduate in Forestry at their home university and are awarded the Commonwealth Diploma in Forestry. The Commonwealth Diploma in Forestry or the Diploma in Forest Technology may also be awarded to suitable graduates from Australia or overseas who complete a course at the Australian Forestry School.

Advice is currently made available to government departments and private enterprise on timber supply matters. Research is undertaken on logging methods and machines and on matters associated with the marketing of timber products.

(b) *Commonwealth Scientific and Industrial Research Organization, Division of Forest Products.* The Division of Forest Products was formed in 1928 to carry out investigations into Australian forest products, assist in the effective use of such products, reduce waste, reduce losses from decay and insect attack, and conduct research into the fundamental chemical, physical and mechanical properties of Australian timbers.

The research work of the Division is carried out by eight separate sections: wood and fibre structure, wood chemistry, timber physics, timber mechanics, timber preservation, timber seasoning, plywood and glueing, and timber utilization. In addition, the Division provides assistance to individuals and local industry, administers courses of instruction on timber properties and usage, and maintains co-operative projects with several overseas authorities operating in the same field.

(c) *Forestry in the Territories.* Forestry activities in the Territory of Papua and New Guinea are controlled by the Administration through its Department of Forests. The management of forests in the Australian Capital Territory is the responsibility of the Forestry Section of the Department of the Interior.

The Forestry and Timber Bureau advises the Administrations of the Australian External Territories on the management of the forests in those territories, while the Northern Regional Station of the Forest Research Institute advises the Northern Territory Administration on forestry matters affecting the Northern Territory.

(ii) *Forestry Activities of the States.* Forestry on State-owned lands in the various States is the responsibility of the respective State Governments, but they do not exercise any control over forestry activities on private property. The powers and functions of State forest authorities are laid down under forest Acts and Regulations. In each State, there is a department or commission to control and manage State forests, etc. Its functions include the introduction of proper measures for the control and management of forest land; the protection of forest land; the conversion, marketing and economic utilization of forest products; the securing of an adequate and permanent reservation of State forests; the establishment and maintenance of coniferous forests to remedy the existing deficiency of softwoods in Australia. All State forest services are actively engaged on research programmes, and the Forests Commission of Victoria maintains a Forestry School at Creswick where recruits are trained mainly for employment in the Commission. Annual reports are issued by each State forest authority.

In addition to developing permanent forest reserves in each State, foresters are surveying all forested crown lands with a view to obtaining dedications of new State forests to add to the permanent forest estate or to release areas unsuitable for forestry for other uses. State forest authorities also usually control all timber on unoccupied Crown lands as well as over 10 million acres of timber reserves, national parks, etc.

The universities in all States provide facilities for forestry graduates attending the universities or, in some cases, for forestry graduates working within, or outside, the States to proceed to advanced degrees. The University of Melbourne has established a School of Forestry to assist both undergraduate and post-graduate students.

(iii) *Private Forestry.* Privately owned lands contribute considerably to the total production from Australian forests. The most important areas of managed native forest in private ownership are the forests owned by pulp and paper companies.

The area of privately owned softwood plantations is rapidly increasing, and here again the pulp and paper companies are very active. In step with the increase in afforestation programs the number of professional foresters employed in private forestry enterprise is increasing, while several are engaged on research.

An estimate of the area of softwood plantations established by private companies and individuals is included in the table on pages 1100-1.

5. *Fire Protection.*—The provision of adequate fire protection is one of the main problems facing forest and rural authorities. Of some 52 million acres of forest land requiring protection, the forest services maintain a high degree of protection over a relatively accessible area of about 20 million acres; about 19 million acres, being more difficult of access, are not so highly protected; and about 13 million acres are, at present, not protected.

Very intensive fire protection is afforded the softwood plantation area of Australia. During the 1962-63 fire season, 475 acres were burnt from a total area of 492,000 acres for which fire statistics are available. This represents an annual burn percentage of 0.1 which compares very favourably with the 0.53 per cent. experienced in the eucalypt forest areas.

Protection of private property outside urban areas is undertaken by volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia, there are over 5,000 registered volunteer bush fire brigades with a membership approaching 250,000. Although forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-governmental bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

Over the five-year period 1959 to 1963, the annual cost of protecting from fire the 39 million acres of forest land for which State forest services provide protection is estimated at £2,200,000 or about 1s. 1½d. an acre. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy, because by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of one particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944, 1952 and 1957 account for a large proportion of the average annual burn. Over 80 per cent. of the area burnt carries little commercial timber, being mainly firewood and protection forest. The number of fires and the forest area burnt during the last five years is shown in the following table.

#### NUMBER OF FIRES AND FOREST AREAS BURNT: AUSTRALIA

(Source: Forestry and Timber Bureau)

Year	Number of fires	Forest areas burnt	Burnt areas as a proportion of total forest areas(a)
			Per cent.
	No.	'000 acres	
1958-59 .. .. .	1,175	456	1.10
1959-60 .. .. .	1,504	1,314	2.48
1960-61 .. .. .	2,667	1,294	2.47
1961-62 .. .. .	1,761	297	0.57
1962-63 .. .. .	1,299	275	0.53

(a) Forest areas requiring protection. See above.

Intensive research work is being undertaken on fire problems, and several governmental groups are working on such projects as the study of fire behaviour and associated fuel and meteorological conditions, the use of chemical aids in fire suppression, the development of protective clothing and devices to aid fire-fighters, and the development of more efficient fire-fighting equipment.

Since fire prevention is one of the most important aspects of the problem, intensive campaigns are being conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for approximately 90 per cent of all fires, and of this figure at least 80 per cent. are preventable. It is estimated that "burning-off" (much of which is started illegally) accounts for 30 per cent. of all fires. Lightning accounts for a little over 10 per cent. of all fires in Australia, although the incidence of fires caused by lightning is much higher in certain areas, especially the Southern Highlands region in New South Wales and Victoria. Although lightning is a relatively small numerical cause of fire, the percentage area burnt from this cause is estimated at about 20 per cent. This higher figure is due to the occurrence of multiple fire outbreaks which cause fire fighting difficulties and to the inaccessibility of the areas in which such fires generally occur.

§ 3. Employment in Forestry

1. Persons Engaged in Forestry Activities.—In the following table, which shows particulars collected in the Population Censuses of Australia of 30th June, 1947, 1954 and 1961, the numbers of persons whose industry statements were classified to "forestry (excluding sawmilling)" are shown, together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED IN FORESTRY: AUSTRALIA

Particulars	Census, 30th June—		
	1947	1954	1961
Persons engaged in—			
Forestry (excluding sawmilling) .. .. .	24,793	15,468	13,847
All primary industries .. .. .	563,607	560,100	513,286
Total work force .. .. .	3,196,431	3,702,022	4,225,096
Persons employed in forestry (excluding sawmilling) as a proportion of—			
All primary industries .. .. . %	4.4	2.8	2.7
Total work force .. .. . %	0.8	0.4	0.3

NOTE.—An adjustment was made to the 1947 and 1954 industry data by distributing over the range of recorded industry the number of persons whose industry was not stated. No such adjustment was made to the 1961 figures.

2. Employment by Forestry Departments.—In the table below, details are shown of the number of persons employed by State forestry departments, and by the Forestry and Timber Bureau in the Australian Capital Territory and the Northern Territory, at 30th June, 1963.

PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, 30th JUNE, 1963

Occupational group	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Professional staff	235	213	104	78	54	35	5	8	732
Non-professional field staff ..	236	263	91	8	158	96	11	1	864
Clerical staff ..	300	260	195	102	60	88	5	8	1,018
Extraction of timber ..	1,314	96	115	41	31	..	24	..	6,750
Milling of timber ..		19	..	714	19	..	..	..	
Labour (forest workers, etc.)		879	2,075	266	588	341	167	61	
Total ..	2,085	1,730	2,580	1,209	910	560	212	78	9,364

3. **Employment in Milling Operations.**—Details of the average number of persons employed, including working proprietors, in sawmills during the year 1962-63 are shown in the next table. Further details regarding the operations of sawmills in 1961-62 are shown in Chapter VI. Manufacturing Industry.

#### NUMBER OF SAWMILLS AND NUMBER OF PERSONS EMPLOYED, 1962-63

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas. (a)	Aust. (b)
Number of sawmills .. ..	822	457	544	85	207	324	2,439
Average number of persons employed during year—							
Males .. ..	7,965	5,870	5,289	2,145	3,393	2,625	27,287
Females .. ..	375	243	270	196	61	66	1,211
<b>Total .. ..</b>	<b>8,340</b>	<b>6,113</b>	<b>5,559</b>	<b>2,341</b>	<b>3,454</b>	<b>2,691</b>	<b>28,498</b>

(a) Includes plywood mills.

(b) Excludes Northern Territory and Australian Capital Territory.

### § 4. Forest Production

1. **Forest Products.**—The table below shows details of production of forest products in each State and Territory in 1962-63.

#### FOREST PRODUCTION, 1962-63

Product	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Logs for sawing, peeling, slicing or pulping—									
Forest hardwoods .. ..	'000 cub. ft. 48,640	66,910	20,751	458	46,178	47,325 (a)	25	114	b 230,401

Other forest products (h) (total value) .. ..	(i) 121	(i) 86	29	38 (j)	11	9	..	..	(b) 294
<b>Total Value of Forest Products .. ..</b>	<b>f14,339</b>	<b>f18,332</b>	<b>8,087 (f)</b>	<b>4,085 (k)</b>	<b>5,438</b>	<b>6,563 (a)</b>	<b>50 (f)</b>	<b>129 (b)</b>	<b>57,023</b>

(a) Incomplete; no details available of production from private land.

(b) Incomplete; see footnotes to individual State and Territory figures.

(c) Includes mill waste used as firewood.

(d) Includes sleepers, transoms, girders, bridge timbers, mining timber, poles, piles, timber used for tannin extract, etc.

(e) Excludes timber used for tanning extract, details of which are not available for publication.

(f) Incomplete; see footnotes to individual items.

(g) Includes an estimate of the value of timber taken from private land.

(h) Includes charcoal (forest production only), tanning bark, essential oils, sandalwood, eucalyptus leaves, crude rutin, etc.

(i) Incomplete, details of some production from private land not available.

(j) Excludes value of sandalwood and substitutes, details of which are not available for publication.

(k) Includes timber used for tannin extract and sandalwood and substitutes.

The following table gives particulars of the production of forest products in Australia.

## FOREST PRODUCTION(a): AUSTRALIA

Product		1958-59	1959-60	1960-61	1961-62	1962-63
Logs for sawing, peeling, slicing or pulping—						
Forest hardwoods .. ..	'000 cub. ft.	239,968	243,940	242,142	223,389	230,401
Brushwoods and scrubwoods .. ..	"	14,518	14,287	14,689	11,890	12,657
Softwoods—						
Indigenous forest " pines "—						
Cypress .. ..	"	13,861	14,457	13,483	12,351	12,489
Other .. ..	"	5,746	4,716	4,726	3,676	3,799
Plantation grown " pines " .. ..	"	38,858	42,859	39,850	42,245	49,569
Total logs .. ..	"	312,951	320,259	314,890	293,551	308,915
Value of logs .. ..	£'000	37,167	38,972	38,475	35,588	37,477
Hewn and other timber (not included above)—						
Firewood(b)(weight) .. ..	'000 tons	4,081	3,997	3,705	3,514	3,571
Other (value)(c) .. ..	£'000	8,191	8,066	8,320	7,779	6,802
Value of hewn and other timber(d) .. ..	"	20,489	20,337	20,544	19,741	19,086
Other forest products(e) (total value) .. ..	"	448	345	372	421	294
Total Value of Forest Products(f) .. ..	"	58,190	59,842	59,763	55,992	57,023

(a) Excludes some production from private land thought to be relatively small, details of which are not available. (b) See footnote (c) to previous table. (c) See footnotes (d) and (e) to previous table. (d) Incomplete, see footnote (e) to previous table. (e) See footnotes (h) and (j) to previous table. (f) Includes timber used for tannin extract and sandalwood and substitutes in Western Australia; but excludes timber other than logs and firewood in South Australia.

2. Value of Production.—(i) *General.* While statistics of both the gross value (at principal markets) and local value (at place of production) of the forestry industry are available, particulars of the value of materials used in the process of production are not available for all States. For this reason, values cannot be stated on a net basis, as has been done with most other industries.

(ii) *Gross and Local Values, 1962-63.* The following table shows gross and local values of forestry production for each State in 1962-63. A more detailed reference to the value of production of forestry and other industries in Australia, as well as a brief explanation of the terms used, will be found in Chapter XXX. Miscellaneous.

GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1962-63  
(£'000)

State or Territory	Gross value(a)	Marketing costs	Local value(b)
New South Wales .. ..	14,339	351	13,988
Victoria .. ..	18,332	1,521	16,811
Queensland .. ..	8,087	2,099	5,988
South Australia .. ..	4,085	27	4,058
Western Australia .. ..	5,438	357	5,081
Tasmania .. ..	6,563	906	5,657
Northern Territory .. ..	50	} n.a. {	50
Australian Capital Territory .. ..	129		129
<b>Australia .. ..</b>	<b>57,023</b>	<b>5,261</b>	<b>51,762</b>

(a) Gross production valued at principal markets. (b) Gross production valued at place of production.

(iii) *Local Values, 1958-59 to 1962-63.* In the following table, the local value of forestry production and the local value per head of population are shown by States for the years 1958-59 to 1962-63.

### LOCAL VALUE OF FORESTRY PRODUCTION

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.(a)
LOCAL VALUE (£'000)							
1958-59 .. ..	15,574	16,148	8,356	4,103	5,067	4,887	54,358
1959-60 .. ..	15,169	17,618	8,469	3,929	5,085	5,556	56,001
1960-61 .. ..	15,300	16,713	7,149	3,729	5,167	5,735	53,975
1961-62 .. ..	14,431	16,449	5,895	3,733	5,191	5,090	50,937
1962-63 .. ..	13,988	16,811	5,988	4,058	5,081	5,657	51,762

### LOCAL VALUE PER HEAD OF POPULATION (£)

1958-59 .. ..	4.2	5.9	5.8	4.5	7.2	14.4	5.5
1959-60 .. ..	4.0	6.2	5.7	4.2	7.1	16.1	5.5
1960-61 .. ..	3.9	5.8	4.8	3.9	7.1	16.4	5.2
1961-62 .. ..	3.7	5.6	3.9	3.8	7.0	14.3	4.8
1962-63 .. ..	3.5	5.6	3.9	4.1	6.7	15.6	4.8

(a) Includes Northern Territory and Australian Capital Territory.

## § 5. Timber and Timber Products

1. *Mill Production of Timber.*—Particulars of logs treated and the production of sawn, peeled and sliced timber by sawmills and other woodworking establishments are shown in the following table. These figures have been compiled from the annual factory collections in each State, which cover virtually all sawmills. The only omissions are some small portable mills operated by itinerants, e.g. sleeper cutters.

### OUTPUT OF AUSTRALIAN-GROWN TIMBER: ALL MILLS, 1962-63 (<sup>'000</sup> super. feet)

Particulars	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	Aust.(a)
LOGS TREATED (TRUE VOLUME)							
Hardwood ..	601,570	639,031	343,093	7,434	554,143	397,705	2,542,976
Softwood ..	159,415	80,191	142,935	362,574	18,422	15,568	779,105
<i>Total</i> ..	<i>760,985</i>	<i>719,222</i>	<i>486,028</i>	<i>370,008</i>	<i>572,565</i>	<i>413,273</i>	<i>3,322,081</i>

### SAWN, PEELLED OR SLICED TIMBER PRODUCED FROM LOGS ABOVE

Hardwood ..	301,888	288,244	161,803	4,434	178,072	153,756	1,088,197
Softwood ..	76,005	30,760	65,663	136,310	7,560	6,072	322,370
<i>Total</i> ..	<i>377,893</i>	<i>319,004</i>	<i>227,466</i>	<i>140,744</i>	<i>185,632</i>	<i>159,828</i>	<i>1,410,567</i>

(a) Excludes Australian Capital Territory and Northern Territory.

The following table shows logs used, and sawn, peeled, and sliced timber produced, in Australia.

**OUTPUT OF AUSTRALIAN-GROWN TIMBER, ALL MILLS: AUSTRALIA<sup>(a)</sup>**  
(\*000 super. feet)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
<b>LOGS TREATED (TRUE VOLUME)</b>					
Hardwood .. ..	2,728,183	2,793,399	2,672,080	2,519,617	2,542,976
Softwood .. ..	677,607	705,772	646,801	641,185	779,105
<b>Total .. ..</b>	<b>3,405,790</b>	<b>3,499,171</b>	<b>3,318,881</b>	<b>3,160,802</b>	<b>3,322,081</b>

**SAWN, PEELED OR SLICED TIMBER PRODUCED FROM LOGS ABOVE**

Hardwood .. ..	1,158,799	1,208,595	1,152,995	1,063,086	1,088,197
Softwood .. ..	301,175	312,450	264,838	289,116	322,370
<b>Total .. ..</b>	<b>1,459,974</b>	<b>1,521,045</b>	<b>1,417,833</b>	<b>1,352,202</b>	<b>1,410,567</b>

(a) Excludes Australian Capital Territory and Northern Territory.

In addition to the mill production of timber shown in the preceding tables, a large amount of hewn and round timber, e.g. sleepers, piles, poles, fencing timber, timber used in mining, and fuel, is obtained directly from forest and other areas. Complete information in respect of the volume of this output is not available.

2. Veneers, Plywood, etc.—Cutting of timber for the manufacture of veneers, plywood etc., has been carried out in most States for a number of years. In recent years, this has been considerably extended, since plywood manufacture has allowed the use of some species unsuitable for sawing. Special attention has been paid to ensure that logs suitable for peeling are diverted to ply factories. However, because of insufficient supplies of Australian-grown logs, 40 per cent. of the logs used in 1962-63 were imported.

The following table shows the production of plywood.

**PLYWOOD PRODUCED**

(\*000 square feet:  $\frac{3}{8}$ -in. basis)

State	1958-59	1959-60	1960-61	1961-62	1962-63
New South Wales .. ..	56,378	62,701	64,930	56,184	56,766
Queensland .. ..	139,743	134,825	112,414	98,086	85,746
Other States .. ..	39,892	44,574	46,045	48,537	52,751
<b>Australia .. ..</b>	<b>236,013</b>	<b>242,100</b>	<b>223,389</b>	<b>202,807</b>	<b>195,263</b>

Of the total plywood produced in 1962-63, 133,664,000 square feet ( $\frac{3}{8}$ -in. basis) were classed as "Commercial", 37,206,000 as "Waterproof", 1,899,000 as "Case", and 22,494,000 as "Sliced Fancy".

During 1962-63, 526.3 million square feet ( $\frac{1}{16}$ -in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 244.9 million square feet ( $\frac{1}{18}$ -in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 60.3 million square feet of sliced veneers were produced.

3. **Manufactured Boards.**—(i) *Hardboard.* There were five factories producing hardboard in Australia during 1962-63 (two in New South Wales, and one in each of Victoria, Queensland and Tasmania), and during the three years ended 30th June, 1963, the following quantities were produced:—1960-61, 31,085,000 square yards; 1961-62, 28,772,000 square yards; and 1962-63 33,317,000 square yards.

(ii) *Resin Bonded Boards.* Production of resin-bonded boards (made from wood chips, wood wool, sawdust, etc.) amounted to 2,123,399 square yards during 1962-63.

4. **Wood Pulp and Paper.**—(i) *Wood Pulp.* During 1962-63, seven wood pulp mills were operating in three States, and production was 190,782 tons of chemical pulp and 68,062 tons of mechanical pulp, a total of 258,844 tons. During the previous year, production was 152,175 tons of chemical pulp and 67,495 tons of mechanical pulp.

- (a) *Victoria.* In Victoria, wood pulp is produced at Maryvale in Gippsland by a chemical process known as the Kraft or Sulphate process. The pulpwood used at this mill consists mainly of eucalypt timber below sawmilling quality, chips from sawmill waste, and a quantity of plantation pine thinnings.
- (b) *South Australia.* Three wood pulp mills operate in the south-eastern part of South Australia, using raw material in the form of logs from the State forests.
- (c) *Tasmania.* In Tasmania, three mills are making pulp from indigenous hardwoods.

At Burnie, on the north-west coast, fine writing and printing paper, as well as parchment and other speciality papers, are produced together with hardboard. The company concerned, which produced 79,353 tons of paper in 1962-63, holds freehold and State concession forest areas which are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Pine plantations have been and are being established to provide softwoods for pulping. A particle board plant was erected by this company at Wesley Vale on the north-west coast, and this started commercial production in August, 1963. The factory uses plantation pine thinnings as a raw material to produce a particle board of resin bonded fine pine chippings.

The only newsprint mill in Australia is situated at Boyer, in the Derwent Valley, 20 miles from Hobart. Here wood pulp is produced from hardwoods drawn from State timber concession areas. A mechanical process was used until 1957, when additional plant was installed for the manufacture of semi-chemical pulp. This plant, which uses a cold soda process, can utilize additional species not suitable for ground-wood pulp. The components of Boyer newsprint average 60 per cent. of ground-wood pulp, 22 per cent. of cold soda pulp, both of which are made at Boyer from hardwoods, and 18 per cent. of imported long fibre kraft pulp made in New Zealand from *Pinus radiata*. Newsprint production capacity is 90,000 long tons per annum. To secure more complete bush utilization, the company has established sawmills to convert understorey species, principally myrtle and sassafras, to sawn timber. The forests are managed on a sustained yield basis. Forest utilization and management are designed to promote eucalypt regeneration. Experimental work into the problems involved is being carried out by the company and the Tasmanian Forestry Commission.

A semi-chemical pulp mill has recently been completed at Geeveston, 37 miles south of Hobart. This plant utilizes eucalypt timber, unsuitable for sawmilling, from southern forests. It has an installed capacity of 25,000 tons of pulp a year and will require some 25,000,000 super feet of timber in 1963-64. The pulp, produced in pellet form, is bulk loaded, shipped to Sydney and there converted to paper and paper board. The company has exclusive long-term rights to the pulpwood from the southern forests under the terms of a special licence. The Forestry Commission is responsible primarily for the planning and execution of forest management, including construction of access roads, and protection and regeneration of the forests. Planning provides for the integrated utilization of saw logs and pulpwood from the forests.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States, but the greater part of the industry is in New South Wales, Victoria and Tasmania. During 1962-63, twenty-four paper mills were operating, eleven in Victoria, four in New South Wales, four in Tasmania, two each in Queensland and South Australia and one in Western Australia. A wide variety of paper and paper board is produced in Australian mills. The table below gives details of the production of some of these items.

## PRODUCTION OF PAPER PRODUCTS: AUSTRALIA

Type of paper	Quantity (tons)			Value (£'000)		
	1960-61	1961-62	1962-63	1960-61	1961-62	1962-63

Paper boards .. ..	210,072	206,909	242,019	17,687	16,374	19,033

## § 6. Oversea Trade in Forest Products, Timber and Timber Products

1. *Imports.*—Quantities and values of forest products, timber and timber products imported into Australia during the years 1960-61 to 1962-63 are shown in the following table.

## IMPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS: AUSTRALIA

Particulars	Quantity			Value (£A.'000 f.o.b.)		
	1960-61	1961-62	1962-63	1960-61	1961-62	1962-63
Logs not sawn—						
Softwoods(a) .. '000 sup. ft.	2,008	2,024	3,226	63	68	119
Hardwoods(b) .. ..	58,313	33,650	47,312	1,710	985	1,357
Undressed timber—						
Dunnage .. ..	..	..	..	3	4	4
Softwoods(a), n.e.i.—						
Douglas fir .. '000 sup. ft.	183,126	168,436	154,457	8,498	6,606	6,759
Radiata pine .. ..	33,462	24,913	24,388	1,213	900	860
Other .. ..	35,152	17,702	26,465	2,705	1,006	1,542
Hardwoods(b), n.e.i. .. ..	85,262	53,450	64,300	5,157	2,669	3,419
Box shooks, n.e.i. .. ..	..	567	561	33	48	39
Dressed timber .. ..	13,178	7,250	8,997	887	532	634

Plywood .. ..	31,618	31,390	26,040	1,090	1,069	903
Tanning substances .. .. cwt.	164,596	145,329	161,209	402	380	370
Sandalwood oil .. .. lb.	1,540	1,508	2,516	9	14	9

(a) Non-pored woods.

(b) Pored woods.

Imports of softwood logs in recent years have come almost exclusively from the Solomon Islands and Sarawak, and more than two-thirds of the imports of hardwood logs have come from North Borneo. Imports of undressed softwood timber comprise mainly Douglas fir (Oregon pine) from Canada and the United States of America and Radiata pine from New Zealand. Imports of undressed hardwood timber come mainly from Malaya and Sarawak. Timbers from Scandinavian countries provide most of the dressed timber imports.

Imports of timber products are mainly veneers and plywoods. The Australian Trust Territory of New Guinea and Japan provide most of the plywood imports, and the United Kingdom and New Guinea supply about 47 per cent. of Australia's imports of veneer.

Tanning substances are the only other forest products imported in significant quantities. The most important of these is wattle bark produced in South Africa.

2. Exports.—Details of exports of Australian forest and timber products in the years 1960–61 to 1962–63 are given in the table below.

**EXPORTS OF AUSTRALIAN FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS(a)**

Particulars	Quantity			Value (£A.'000 f.o.b.)		
	1960–61	1961–62	1962–63	1960–61	1961–62	1962–63

(a) Excludes re-exports. (b) Excludes stumps and the like. (c) Non-pored woods. (d) Pored woods.

Of the exports of logs in 1962–63, 55 per cent. were consigned to New Zealand and 34 per cent. to Japan. In the same year, 37 per cent. of the sleepers exported were consigned to the United Kingdom and 13 per cent. to New Zealand, while of all undressed timber exported, 23 per cent. were consigned to New Zealand and 28 per cent. to the United Kingdom. Consignments to the United States of America accounted for 77 per cent. of the exports of tanning substances in 1962–63.

## CHAPTER XXV

## FISHERIES

NOTE.—Further information on subjects dealt with in this chapter is contained in the annual printed bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* and in the annual mimeographed statistical bulletin *Fishing and Whaling*, particularly as regards types of fish, etc., caught.

## § 1. Resources, Development and National Aspects

1. Natural Resources.—(i) *Edible Fauna.* (a) *Fish.* Australian fishery resources, in comparison with those of some other areas, are not large. It has been calculated that there are approximately 2,000 species of fish in Australia and the waters surrounding it (including freshwater species), but the stocks of each species are comparatively small. Australia lacks adequate resources of such highly productive species as the herrings, cods, halibuts and true salmon (except for the Tasmanian whitebait and acclimatized freshwater species) on which the major proportion of world fisheries production is based.

The marine life of northern Australia is similar to that of the south-east Asian region; for example, the giant perch (*Lates calcarifer*) of northern Australia is also taken in Thailand and Malaya, and the parrot fishes (*Labridae*) are also distributed over the region. Some similarities with the fishes of South Africa can also be noted. For instance, the barracouta (*Leionura atun*) of Australia is also caught in South African waters. Mulletts, which form the basis of Australia's largest single species catch, occur throughout the world, as do the tunas.

Fishing is carried out continuously in estuarine, coastal and off-shore Australian waters in the east and south from Port Douglas in Queensland to Ceduna in South Australia, in Western Australia from Esperance to Shark Bay, and sporadically in the Onslow, Broome, Darwin and Karumba areas in the north. Most fishing is done in waters over the continental shelf, which varies greatly in width around the continent, but tuna is sometimes fished beyond the shelf. As in other countries, fisheries in Australia may be divided into three types: the estuarine fisheries, located in the tidal waters of rivers and coastal lakes; the pelagic fisheries which exploit species inhabiting the surface layers of the open ocean; and the demersal fisheries, which fish the bottom layers of the sea. The estuarine fisheries produce considerable quantities of the table varieties, such as mullets (*Mugil cephalus* and associated species), breams (*Acanthopagrus spp.*), and some crustaceans. In addition to these, there is a small freshwater commercial fishery, principally in New South Wales and South Australia, exploiting Murray cod (*Maccullochella macquariensis*) and golden perch (*Plectroplites ambiguus*). The pelagic fisheries produce species exploited during their seasonal migration, such as Australian "Salmon" (*Arripis trutta*), which is a member of the order Perciformes, or perch-like fishes, tunas (*Fam. Thynnidae, Katsuwonidae, Sardidae*), barracouta (*Leionura atun*) and mackerels (*Cybiium spp.*). These fisheries, with the exception of some tuna, mackerel and reef fisheries, are concentrated in the temperate waters around the southern half of the continent. The offshore demersal fisheries include those pursued on the reefs which may be found virtually right around the continent, and which yield such species as snapper (*Chrysophrys auratus*), the so-called "cods" (*Epinephelus, Choerodon, Callyodon spp.*), and associated species; those pursued on the trawling grounds, which produce species such as flathead (*Neoplatycephalus, Trudis spp.*), morwong (*Nemadactylus spp.*), John dory (*Zeus faber*), etc.; and the important fishery for edible shark (school shark, *Galeorhinus australis*, and gummy shark, *Mustelus antarcticus*), in south-eastern Australia.

(b) *Crustaceans.* Crustaceans taken in Australia include crayfish, prawns, crabs and freshwater lobsters. Crayfish (southern, *Jasus lalandei*; western, *Panulirus cygnus*; and eastern, *Jasus verreauxi*) is the most important crustacean exploited in Australia, and various species occur on the reefs of the continental shelf in all States. The commercial fishery, for technological reasons and through lack of knowledge of numbers, has not extended to the tropical species (*P. ornatus*, etc.), but is concentrated on species found around the southern

part of Australia. Prawns (*Penaeus* and *Metapenaeus* spp.) are taken in the estuarine, coastal and offshore waters of New South Wales and Queensland, and in the Shark Bay region of Western Australia. Crabs (*Scylla* and *Portunus* spp.) are taken mainly in Queensland and Western Australia, but small quantities are also taken in the other States. Fresh-water lobsters (*Euastacus serratus*) are caught in inland streams in New South Wales, and one species, marron (*Cheraps tenuimanus*) forms the basis of an amateur fishery in the south-west of Western Australia.

(c) *Molluscs*. Edible molluscs produced in Australia include oysters (mainly *Crassostrea commercialis*), scallops, mussels and some of the cephalopods (squid, octopus, cuttlefish). Naturally-grown oysters are produced in all States except South Australia. In New South Wales and, to a lesser extent, in Queensland, edible oysters are cultured commercially. Scallops (*Pecten meridionalis* and *Equichlamys bifrons*) are taken in Tasmania. A new fishery exploiting the species *Pecten alda* has developed in Port Phillip Bay. The saucer scallop (*Amusium balloti*) is obtained in the Queensland fishery. The scallop resources in the Shark Bay area of Western Australia have not been developed, and are still the subject of scientific investigations. Mussels (*Mytilus planulatus*) are gathered mainly in Victoria. Small quantities of cephalopods, mainly squid (*Loligo* spp.), are produced in many localities. Increased interest in the abalone (*Haliotis* spp.) has resulted in the development of small fisheries off southern New South Wales and the east coast of Tasmania. Other edible molluscs taken from time to time include pipis (*Plebidonax deltooides*).

(ii) *Pearl-shell and Trochus-shell*. Pearl-shell (*Pinctada maxima*), which is used for the manufacture of buttons, knife handles, etc., is taken in the tropical waters of Australia from Onslow in Western Australia to Cairns in Queensland. Trochus-shell is found mainly on coral reefs off the Queensland coast, although very small quantities occur in Western Australia.

(iii) *Whales*. Baleen whales, particularly humpback (*Megaptera nodosa*), migrate during winter from their summer feeding grounds in Antarctic waters to their breeding and nursery grounds in warmer waters off the north-east and north-west coasts of Australia. Since the war, the Australian whaling industry has exploited humpback whales on both coasts during the winter migrations. However, the same stocks have been available to Antarctic whalers in the summer, and this, together with their slow reproduction rate, has resulted in the stocks of Antarctic humpback whales in the Southern Hemisphere being subjected to exploitation greater than they can sustain.

Sperm whales (*Physeter catodon*) have been taken in the southern waters of Western Australia since 1955.

(iv) *Marine Flora*. Seaweeds of possible commercial value occur in coastal waters of New South Wales, Tasmania and Western Australia. During 1962, a venture was launched to exploit seaweed (*Macrocystis pyrifera*) beds for their derivatives, principally alginates, in Tasmanian waters.

2. **Development of Fisheries in Australia.**—At the beginning of this century, Australian fisheries were principally estuarine and onshore, and the deeper offshore resources were comparatively unknown. Vessels were generally sail-powered, and catching and preservation methods were primitive.

From 1909 to 1914, a Commonwealth vessel was engaged in research into fisheries resources around Australia. As a result of this exploration, trawling in the south-eastern waters began in 1915. There have been several years of high production from this fishery, but in each case the peak year was followed by a period of low production. Danish seine trawlers entered this fishery in 1936. In 1958–59, steam trawling vessels used in this area were taken out of service, and a modern diesel trawler was introduced. This fishery is now stabilized at a relatively low level of production.

The tuna fishery began with the establishment in 1937 of a cannery at Narooma in New South Wales to exploit the occurrences, mainly of southern bluefin tuna (*Thunnus thynnus maccoyii*), which had been revealed by aerial surveys in 1936. However, landings were insignificant for over a decade. In 1950, the Commonwealth Government sponsored the visit of a Fijian tuna clipper and trained crew to instruct fishermen in the pole-and-live-bait method of catching tuna. Development of the South Australian tuna fishery followed the visit of two American tuna experts in 1954. Recent developments in tuna fishing include the use of gill netting and long-lining. Techniques of taking species of tuna other than southern bluefin are being investigated.

The crayfishery, which is pursued off south-eastern Australia and off the west coast of Western Australia, was for many decades on a small scale. It was not until 1944 that the major sector, the western crayfishery, began to develop into what is now Australia's most productive single fishery. Between 1944 and 1947, production from the shallow areas of Houtman's Abrolhos was used for canning for the armed forces. From 1948 to 1953, mechanization of the fleet was introduced progressively and deeper waters were worked. The United States market for frozen craytails was established during this period. The period 1954 to 1962 saw the introduction of larger and more powerful vessels, of conservation measures designed to maximize the sustainable yield, and of increased processing facilities. In the southern crayfishery, development has followed similar lines, but on a smaller scale because of the smaller crayfish population.

The prawn fishery was pursued for many decades on a small scale, but it was not until the discovery of the need for prawns to spawn at sea that interest developed in catching them during this phase of their life cycle. The discovery in 1947 of stocks of prawns in Stockton Bight and off Evans Head (both in New South Wales) initiated the development of deep-sea prawning in Australia. Since that time, the prawn fishery has expanded to the offshore grounds. In 1962, a commercial prawn fishery was commenced in Shark Bay, Western Australia.

Whaling has been undertaken from time to time in Australia since the early days of settlement. Humpback whaling has been carried out from stations on the west coast of Australia since 1949, and off the east coast since 1952. A station was established on Norfolk Island in 1956. Despite the introduction of catch quotas by the Commonwealth Government, the humpback whale stocks, like most other baleen whale stocks throughout the world, have been over exploited. By the end of the 1962 whaling season, whale stocks had been depleted to the extent that the stations on the east coast and Norfolk Island had either gone into liquidation or otherwise disposed of their assets. On the west coast, the station at Albany, by 1962, had almost completely changed its operations to sperm whaling, and the station at Carnarvon was extending its activities into other types of fisheries. As a result of a decision at the 15th Meeting of the International Whaling Commission in July, 1962, the taking of humpback whales in waters south of the Equator has been prohibited. The Commonwealth Government has accepted this decision.

**3. Government Administration of the Fishing Industry.**—The fisheries within territorial waters (that is, within three miles of the shore) are administered by State departments and Territory administrations. The Fisheries Branch of the Department of Primary Industry develops and administers fisheries in extra-territorial waters and co-ordinates fisheries administration.

The fisheries legislation of each State and Territory and of the Commonwealth provides for the licensing of boats used in commercial fishing operations and of commercial fishermen. The provisions are broadly similar in each State, the general requirement being that any person who takes fish for sale, and any boat used in such fishing operations, must be licensed in the State or Territory concerned. Some States extend the licensing requirements to amateur or part-time fishermen. Australian nationals who fish commercially outside the territorial waters of a State or Territory, but within Australian waters as proclaimed under the *Fisheries Act 1952-1959*, are required to take out licences and to register their boats under that Act.

Fish stocks inhabiting Australian waters are a common property resource. With the exception of the Western Australian crayfishery and the Shark Bay prawn fishery, there is no restriction on recruitment of men and vessels to any fishery. It has, therefore, been necessary for governmental action to be taken in an endeavour to provide rules of operation in certain fisheries which are vulnerable to depletion. The policy basic to the management of these fisheries is the greatest sustainable yield consistent with economic operations. Where a fishery, for economic reasons, is not producing its maximum yield, efforts to discover new methods of utilization of the catch are made.

The *Pearl Fisheries Act 1952-1953* aims at the management of the pearl-shell resources in accord with Australia's proclamation of sovereign rights over the natural resources of the sea bed and subsoil to the 100 fathom line. It requires that all pearlers, vessels, etc., must be licensed, and prohibits the removal of live shell from Australian waters except with the written permission of the Minister for Primary Industry.

The Commonwealth controls whaling from Australian stations in accordance with the conditions laid down by the International Whaling Commission. This Commission was established by the International Convention for the Regulation of Whaling, 1946, to organize world-wide conservation measures.

4. **Research.**—The aim of all fisheries research in Australia is to achieve the greatest sustainable yield of fish and to assist in the development of an efficient industry. To this end, much of the biological research already undertaken has been directed at formulating recommendations for conservation measures in various fisheries. Future work is expected to concentrate on the discovery, development and conservation of new fisheries, on the expansion of under-exploited fisheries, on the economics of the industry and on the improvement of equipment.

The organizations, committees, etc., in Australia at present engaged in research into fisheries matters are:—

- (i) Division of Fisheries and Oceanography, C.S.I.R.O. (biological and oceanographic research);
- (ii) Division of Food Preservation, C.S.I.R.O. (research into handling, storage, processing and transport of fish);
- (iii) the several State fisheries departments (general biological research);
- (iv) Fisheries Branch, Department of Primary Industry (economic and management research, gear technology, extension work to the industry);
- (v) Southern Pelagic Project Sub-committee and the Western Fisheries Sub-committee of the Commonwealth-State Fisheries Conference (co-ordination and planning of research); and
- (vi) Advisory Committee to the Minister for Primary Industry on the Fisheries Development Trust Account (consideration and recommendation to the Minister on projects to be subsidized from the Account, which was set up from the sale of the Commonwealth Government's whaling assets in 1956).

## § 2. Collection and Presentation of Statistics

Statistics presented in this chapter have been collected by a number of authorities. The various State fisheries authorities have supplied, through the Deputy Commonwealth Statisticians in the States, the details of employment, boats, equipment, and production of the general fisheries and the pearl and shell fisheries. The Fisheries Branch of the Department of Primary Industry has supplied particulars of the whaling industry. Statistics of the processing of general fisheries products and of oversea trade in the products of fishing and whaling have been compiled in the Commonwealth Bureau of Census and Statistics.

The statistics refer, in general, to financial years. However, pearl and shell fishing data refer to the season ended in the financial year shown. Whaling statistics are shown by calendar years, and refer to the season (from May to October) in the calendar year. All oversea trade information refers to financial years.

In the preparation of Australian fisheries production statistics, the quantities of individual products are generally in terms of the form in which they are taken from the water. For example, the statistics of fish production published in this chapter are in terms of "estimated live weights" which are calculated from landed weights by using conversion factors for each species in each State. These conversion factors allow for the fact that the quantities of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Crustaceans are reported on a "whole weight" basis, and molluscs (edible) on a "gross (in-shell) weight basis". The figures of pearl-shell and trochus-shell refer to the actual quantities of dry shell for sale and exclude the weight of the fish.

The catch is generally shown according to the State in whose waters it was taken. However, a quantity of sharks and crayfish taken by Victorian-based fishermen in Tasmanian waters, but marketed in Victoria, is included in the Victorian catch, since the economy of that State is most directly affected. Similarly, pearl-shell taken by Queensland luggers operating in Northern Territory waters is included in the Queensland take. Pearl-shell taken by Japanese fishermen operating in Australian waters is excluded from Australian production figures, although the quantities taken up until 1961-62 are shown as a footnote to the table on page 1123. The Japanese pearling fleet did not operate in Australian waters during 1962-63.

Details of production given in this chapter refer in most cases only to the recorded commercial production. In view of the importance of amateur fishermen in certain types of fishing, details shown cannot be taken as representing the total catch. In addition, it is likely that the figures shown understate to some extent the full commercial catch, because no information is available on fish taken for sale by persons not licensed as professional fishermen.

## § 3. The Fishing Industry

1. Persons Engaged in Fisheries.—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947, 1954 and 1961, the numbers of persons whose industry statements were classified to "fishing and whaling" are shown together with the numbers engaged in all primary industries and the total work force.

## PERSONS ENGAGED IN FISHERIES: AUSTRALIA

Particulars	Census, 30th June—		
	1947	1954	1961
Persons engaged in—			
Fishing and whaling .. .. .	10,656	8,637	8,252
All primary industries .. .. .	563,607	560,100	513,286
Total work force .. .. .	3,196,431	3,702,022	4,225,096
Persons engaged in fishing and whaling as a proportion of—			
All primary industries .. .. %	1.9	1.5	1.6
Total work force .. .. %	0.3	0.2	0.2

NOTE.—An adjustment was made to the 1947 and 1954 industry data by distributing over the range of recorded industry the number of persons whose industry was not stated. No such adjustment was made to the 1961 figures.

2. General Fisheries.—(i) *Employment, Boats and Equipment.* The boats used for the estuarine fisheries are mostly small vessels, propelled by diesel or petrol engines of low power. The offshore vessels range in length from 30 feet to 120 feet and are almost invariably powered by diesel engines. Many of them have insulated holds to carry fish in ice, and some of the crayfish boats are fitted with wells in which the catch is kept alive. Some vessels have dry refrigeration, and others, including some of the tuna live-bait pole-fishing vessels, are equipped with brine refrigeration.

Almost every type of fishing equipment is used. The following table sets out the main types of fish, crustaceans and molluscs and the equipment most commonly used.

## FISHING EQUIPMENT USED IN AUSTRALIA

Type of fish	Equipment used
Mullet .. .. .	Beach seine, gill net
Shark (edible) .. .. .	Long-lines
Australian salmon .. .. .	Beach seine
Barracouta .. .. .	Trolling lines
Flathead .. .. .	Danish seine, otter trawl
Snapper .. .. .	Long-lines, traps
Morwong .. .. .	Danish seine, otter trawl, traps
Whiting .. .. .	Handlines, Danish seine
Garfish .. .. .	Gill net, beach seine
Mackerel .. .. .	Trolling lines
Tuna(a) .. .. .	Pole and live-bait, trolling lines, gill netting
Prawns .. .. .	Otter trawl, beam trawl, seine net
Crayfish .. .. .	Pots, traps
Scallops .. .. .	Dredge, otter trawl

(a) Lampara nets and purse seines are used for taking live bait for tuna.

The following two tables show details of persons, boats and equipment employed in the taking of fish, crustaceans and edible molluscs, and data relating to oyster leases. These statistics are derived mainly from the licensing records of the various State fisheries authorities. Because the definitions and licensing procedures used by these authorities are not uniform, the statistics should not be used to compare the relative productivities of the fishing industries in the several States. Figures for 1962-63 are not comparable with those for previous years as persons engaged in fishing in South Australia included licensed part-time (non-commercial) fishermen prior to 1962-63. In 1962-63, an estimate of full-time (commercial) fishermen engaged has been recorded.

Boats and persons engaged in more than one type of fishing are classified according to their main activity, and so may be classified differently from one year to the next.

The table below gives details by States for 1962-63.

#### EDIBLE FISHERIES: BOATS AND EQUIPMENT IN USE, PERSONS ENGAGED, ETC., 1962-63

Particulars	Unit	N.S.W.	Vic.	Qld	S.A.	W.A. (a)	Tas.	N.T.	Aust.
General fisheries(b)—

(a) Excludes freshwater fish caught in Queensland, particulars of which are not available.

(b) *Crustaceans*. In terms of gross value of catch, the importance of crustaceans has increased in recent years, and in 1962-63 was greater than that of fish. The crayfish is the most important crustacean. The bulk of Australian production of crayfish is exported, nearly all going to the United States of America. Details of the production of crustaceans in each State and the Northern Territory in 1962-63 are shown in the following table.

**CRUSTACEANS: PRODUCTION BY TYPE, 1962-63**  
(\*000 lb. whole weight)

Type	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.

(a) Excludes pipis, particulars of which are not available for publication. (b) Excludes Western Australia. (c) Excludes Northern Territory. (d) Incomplete; see footnotes to individual types.

(iii) *Marketing.* The greater part of Australian fisheries production is marketed fresh or frozen. For practical purposes, the whole of the tuna and Australian "salmon" catches are canned, as is a large proportion of the barracouta catch.

Marketing arrangements for fresh fish vary from State to State. In New South Wales, fish marketing is controlled by the Chief Secretary's Department, which operates the Metropolitan and Wollongong fish markets. In other coastal centres of New South Wales, Fishermen's Co-operatives may become registered as local fish markets. Fish for industrial use does not pass through any of these markets. The Queensland Fish Board sells all production on behalf of fishermen in that State, and has branches in 18 centres, as well as depots at eight others. The Board also purchases fish on its own account to stabilize prices. In Victoria, Western Australia and Tasmania, the marketing of fish is undertaken through agents. In South Australia, the great majority of the fishermen are members of the South Australian Fishermen's Co-operative Ltd., which handles the whole of their production.

Quick-freezing is widely used at sea and ashore to preserve fisheries products before delivery to consumers. The main techniques employed in Australia are brine freezing, which is used in the tuna and salmon fisheries, and air blast freezing, which is used chiefly for crayfish and scallops. Cold preservation with ice is still widely used.

(iv) *Processing.* Fish canning in Australia on a modern scale dates from 1937, prior to which the only fish canning carried out was on an occasional basis in factories handling other foodstuffs. In 1962-63, there were 25 fish canneries operating in Australia. The main canneries handle tuna (Eden, Melbourne, Port Lincoln), Australian salmon (Eden, Melbourne, Margate, Port Lincoln, Adelaide, Albany), and barracouta (Melbourne, Margate, Portland). A long-established general cannery in Sydney handles a small quantity of tuna each year, as well as prawns and fish paste, and a general cannery in Melbourne produces paste and other fish products.

Apart from canning, other processes used on fish products include smoking and bottling. These processes take place only on a small scale.

There are few by-products derived from fish, crustaceans, and molluscs taken in Australia. Small quantities of fish meal are produced from scrap products. Oil from the livers of sharks was produced on a small scale until 1962, when cheaper substitutes became available.

The following table gives further details of fish processing in Australia during the years 1958-59 to 1962-63.

**FISH PROCESSING (EXCEPT FREEZING): AUSTRALIA**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63

Fish meal(e) .. .. .	1,442	1,718	2,041	2,640	2,076

(a) Fish used for canning (including fish loaf), smoking and the manufacture of fish paste, but excluding the weight of oysters, other shellfish and crustaceans used for canning. (b) The weight of headed and/or gutted fish is taken as 85 per cent. of live weight. (c) Excludes canned crayfish, lobsters, prawns, oysters and clams, details of which are not available for publication. (d) Includes fish loaf, fish cakes, etc. (e) Excludes whale meal.

3. Pearls, Pearl-shell and Trochus-shell.—NOTE.—Prior to the 1962-63 season, considerable quantities of pearl-shell were taken from Australian waters by Japanese pearling luggers. Details of this pearl-shell taken and boats and equipment employed are excluded from the following tables. Production data are, however, shown as a footnote to the table reporting production of pearl-shell and trochus-shell for the years 1958-59 to 1961-62. The Japanese fleet did not operate in Australian waters in 1962-63.

(i) *Employment, Boats and Equipment.* Ketch-rigged luggers about 55 feet long and with crews of 8 to 14 members are used for pearl and shell fishing around Australia. Divers using suits collect the shells from the sea bed, at depths ranging from 3 to 45 fathoms. Details of employment of persons and equipment in the shell fisheries in 1962-63 are contained in the following table.

**PEARL-SHELL AND TROCHUS-SHELL: BOATS AND EQUIPMENT IN USE, PERSONS ENGAGED, 1962-63**

Particulars	Unit	Q'land	W. Aust.	N.T.	Aust.
Boats engaged .. .. .	No.	42	16	2	60

Value of boats and equipment .. ..	£'000	647	515	467	254	275
Persons engaged .. ..	No.	1,419	1,120	995	724	727

(a) Excludes Japanese pearlers operating in Australian waters. See text p. 1122.

(ii) *Production.* The production of cultured pearls was introduced into Australia in 1956, when a station was established off the north coast of Western Australia. The industry has since expanded, and in 1963, there were eleven pearl culture farms in operation in Queensland and Western Australia. Particulars of cultured pearl production are not available for publication.

In recent years, plastics have replaced pearl-shell in many uses. However, since the introduction of pearl culture, live pearl-shell has been in demand for this purpose. The following table gives details of pearl-shell and trochus-shell production in Australia in the years 1958-59 to 1962-63.

**PEARL-SHELL AND TROCHUS-SHELL: PRODUCTION  
(\*000 lb.)**

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
<b>Pearl-shell—</b>					
Queensland(a) .. ..	889	1,082	1,821	860	788

<i>Australia</i> .. ..	<i>916</i>	<i>869</i>	<i>319</i>	<i>457</i>	<i>357</i>

(a) Season ended January of years shown. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland. (b) Season ended December of years shown. (c) Excludes pearl-shell taken by Japanese pearlers operating in Australian waters. The quantities taken were as follows:—1958-59, 1,064,000 lb.; 1959-60, 763,000 lb.; 1960-61, 860,000 lb.; 1961-62, 813,000 lb. The Japanese pearling fleet did not operate in Australian waters in 1962-63.

Particulars of the production of natural pearls in Australia are not available.

4. *Whaling.*—The whaling industry is highly mechanized. Standard equipment includes aircraft to locate whales, steam and diesel powered catchers of about 100 to 125 feet in length, and tow-boats.

Whale meat is marketed as pet food. Oil from baleen whales is used in the manufacture of margarine, soap and cosmetics. Oil from sperm whales is used in the manufacture of soap, plastics and watch lubricants, and in automatic transmission systems in motor cars.

Owing to the scarcity of whales during the 1962 season, catches fell far below quotas set. Consequently, the stations on the east coast and Norfolk Island ceased operations at the close of the 1962 season. The Western Australian stations operated during the 1963 season with poor results in humpback whaling. These stations caught a substantial number of sperm whales to compensate in part for the deficiency of humpbacks. The table below gives details of the whaling industry in Australia during the years 1959 to 1963.

Quotas set by the Department of Primary Industry are in terms of humpback whales, and for this purpose 1 blue whale is taken as the equivalent of 2 fin, 2½ humpback, 6 sei or 6 bryde whales.

1962-63 .. ..	0.9	0.6	1.2	1.5	7.2	2.5	1.4

(a) Includes Northern Territory.

#### § 4. Consumption of Fish

Particulars of the estimated supplies of fish, crustaceans and molluscs available for consumption per head of population, in terms of edible weight, are included in the table below. For the purpose of compiling this table, the non-commercial fish catch has been estimated at ten per cent. of the recorded catch.

#### FISHERIES PRODUCTS: ESTIMATED SUPPLIES AVAILABLE FOR CONSUMPTION, AUSTRALIA

(lb. edible weight per head per annum)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Fresh or frozen—

Australian origin .. ..	0.8	0.8	0.7	0.8	0.9
Imported .. .. .	1.7	2.0	2.6	2.0	1.9
<b>Total .. .. .</b>	<b>9.5</b>	<b>11.3</b>	<b>11.7</b>	<b>10.5</b>	<b>11.1</b>

#### § 5. Oversea Trade in Products of Fishing and Whaling

NOTE.—Values shown are expressed as £A. f.o.b. port of shipment. The tables of exports relate to Australian produce only, but quantities and values quoted in the text sometimes include re-exports, the amounts involved, however, generally being small.

1. **Edible Products.**—A large proportion of the fish consumed in Australia is imported. Of the edible products imported in 1962-63, those originating in Japan were valued at £2.1 million (24 per cent. of the total value), United Kingdom, £2 million (22 per cent.), and South Africa, £1.2 million (13 per cent.).

South Africa supplied 9 million lb. (27 per cent., valued at £0.7 million) of the fresh or frozen fish products imported in 1962-63, and the United Kingdom 8.8 million lb. (26 per cent., valued at £1.2 million). Of the smoked or dried fish products imported in 1962-63, South Africa supplied 6.8 million lb. (70 per cent., valued at £0.6 million). Japan supplied 9.4 million lb. (44 per cent., valued at £2.1 million) of the canned fish products imported in 1962-63.

The value of exports of edible products in 1962-63 was 3 per cent. less than that in 1961-62. The value of crayfish tails exported in 1962-63 was 82 per cent. of the value of all exports of edible products. Of all crayfish tails exported in 1962-63, 97 per cent. (8,745,000 lb., valued at £5,029,000) were consigned to the United States of America.

The table below gives further details of Australia's oversea trade in edible products in the years 1960-61, 1961-62 and 1962-63.

## OVERSEA TRADE IN EDIBLE FISHERIES PRODUCTS: AUSTRALIA

(a) Excludes frozen smoked, which is included with "Smoked and dried". (b) Includes extracts and caviare. (c) Excludes frozen smoked, which is included in item Products not elsewhere included. (d) Not available separately.

2. Pearls.—Cultured pearls valued at £245,000 were imported into Australia in 1962-63. This was 30 per cent. greater than the value imported in 1961-62 (£189,000). In 1962-63, imports of cultured pearls valued at £240,000 (98 per cent. of the total value of cultured pearl imports) originated in Japan.

Cultured pearls exported from Australia in 1962-63 were valued at £361,000, £308,000 more than 1961-62. In 1962-63, cultured pearl exports consigned for Japan were valued at £352,000, 98 per cent. of the value of all cultured pearls shipped in that year.

The value of natural pearls exported from Australia in 1962-63 was £6,000, 78 per cent. lower than that in 1961-62 (£27,000).

3. Unmanufactured Shells.—Of the pearl-shell exported in 1962-63, 595,000 lb. (33 per cent.) were consigned to the Federal Republic of Germany, 552,000 lb. (30 per cent.) to the United States of America, and 475,000 lb. (26 per cent.) to Japan. More than 57 per cent. (116,000 lb.) of the trochus-shell exported was consigned to Italy.

Imports of unmanufactured shells included quantities of pearl, trochus and green snail shell from New Guinea, Papua and the Pacific Islands, which were subsequently re-exported from Australia.

Further particulars of Australia's oversea trade in unmanufactured shells are shown in the table below.

OVERSEA TRADE IN UNMANUFACTURED SHELLS: AUSTRALIA

## CHAPTER XXVI MINERAL INDUSTRY

NOTE.—Further detailed information on the subjects dealt with in this chapter is contained in the annual printed Bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* issued by this Bureau, and in *The Australian Mineral Industry—Annual Review* and other publications issued by the Bureau of Mineral Resources, Geology and Geophysics, which also issues, in co-operation with this Bureau, a quarterly publication *The Australian Mineral Industry*, comprising two parts—Part I.—Quarterly Review, and Part II.—Quarterly Statistics. The mimeographed statistical bulletin *Mining and Quarrying* of this Bureau contains annual statistics of the industry prepared and published as soon as possible after the data have been compiled. A monthly statistical bulletin *The Gold Mining Industry, Australia* is issued also, and other current information on mining or mine products is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*.

Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated.

### § 1. Introduction

1. Occurrences of Minerals.—The greatest part of the area of outcropping rock on the Australian continent is Precambrian in age. These basement rocks form the western and central core of the continent and are flanked by younger Palaeozoic rocks which, along the eastern edge of the continent, form a belt several hundred miles wide extending from north Queensland to Tasmania. Smaller areas of Palaeozoic rocks occur in other States. Mesozoic sediments overlie large areas of the continent and reach their greatest development in central Queensland. Cainozoic rocks occur mainly in the southern parts of Victoria and South Australia and as residual basalt cappings over an extensive area of the Palaeozoic rocks of eastern Australia.

Minerals occur widely throughout the Precambrian and Palaeozoic rocks of the continent. Palaeozoic mineralization is perhaps more varied, but the deposits now being worked are in general smaller than those found in Precambrian rocks. Most of the larger deposits of minerals now being mined in Australia are shown in the following table according to the geological era in which they were formed.

#### PRINCIPAL AUSTRALIAN MINERAL DEPOSITS

Age of geological formation in which located	Metal or mineral	State or Territory	Locality
Precambrian (more than 520 million years old)	Copper .. ..	Queensland .. Northern Territory	Mount Isa Tennant Creek
	Gold .. ..	Western Australia	Kalgoorlie and other localities
	Iron .. ..	South Australia .. Western Australia	Middleback Ranges Yampi Sound and Pilbara
	Lead-silver-zinc	New South Wales	Broken Hill
	Uranium .. ..	Queensland .. Queensland .. South Australia .. Northern Territory	Mount Isa Mary Kathleen Radium Hill Rum Jungle and South Alligator River area
	Palaeozoic (between 200 and 520 million years old)	Black coal ..	New South Wales
		Queensland ..	Kianga-Moura, Baralaba, Bowen, etc.
		Western Australia	Collie
Copper-gold ..		Queensland .. Tasmania ..	Mount Morgan Mount Lyell
Lead-silver-zinc		Tasmania ..	Mount Read and Rosebery
Tin (lode) ..		Queensland .. Tasmania .. Tasmania ..	Herberton North-east of State King Island and north-east of State

PRINCIPAL AUSTRALIAN MINERAL DEPOSITS—*continued*

Age of geological formation in which located	Metal or mineral	State or Territory	Locality
Mesozoic (between 75 and 200 million years old)	Black coal ..	Queensland ..	Ipswich
		South Australia ..	Leigh Creek
	Mineral sands(a)	Tasmania ..	St. Marys
		New South Wales ..	North coast
Cainozoic (less than 75 million years old)	Brown coal ..	Queensland ..	South coast
		Victoria ..	Gippsland
	Tin (alluvial) ..	New South Wales ..	Tingha
		Queensland ..	Herberton
	Bauxite ..	Tasmania ..	North-east of State
		Queensland ..	Weipa
	Western Australia	Darling Range	

(a) The deposition of mineral sands, derived from Palaeozoic granites, continued throughout the Cainozoic era.

Of the non-metallic minerals, many, such as clay, sand and silica, etc., are not restricted to the rocks of any particular era. However, Precambrian rocks do contain important deposits of asbestos in Western Australia, limestone and dolomite in South Australia, and mica in the Northern Territory. All crude salt is produced by the evaporation of water from pans constructed along the sea coast or from inland lakes.

2. **Mineral Concentrates.**—Concentration is a physical process involving the removal of mineral impurity from the ore. Most mines now dispatch ore in concentrate form, as this considerably reduces the transport costs and produces a salable product in the form required by smelters. Most concentrates are nearly pure mineral, and the ore-dressing processes (with the exception of that for uranium) involve no chemical change to the mineral being won. Various methods are used in concentration. Sulphide ores, which now comprise the greatest tonnages treated, are, in most instances, separated from the gangue by flotation. In this method of concentration, the ore is ground finely enough to liberate the individual mineral particles, aerated, and agitated in tanks of water to which chemicals have been added. Under certain conditions, particles of one sulphide mineral adhere to the froth bubbles and are collected in the froth overflow, while gangue and even other sulphides are depressed. By treating the tailings of one flotation process with different chemicals and conditions, it is often possible to separate a further concentrate, as is done at Broken Hill where the zinc sulphide is recovered from the tailings of the lead sulphide concentration process.

Other methods of concentration used are gravity (alluvial tin, mineral sands), electromagnetic (wolfram, scheelite and mineral sands), and electrostatic (mineral sands).

3. **Government Aid to Mining, and Mineral Control.**—(i) *Aid to Mining—Commonwealth.* (a) *Income Taxation Concessions.* One-fifth of the net income derived from mining for prescribed minerals in Australia or the Territory of Papua and New Guinea is exempt from tax. The metals or minerals to which this concession applies are as follows:—asbestos, bauxite, chromite, emery, fluorspar, graphite, ilmenite, kyanite, magnesite, manganese oxides, mica, monazite, pyrite, quartz crystals (piezo-electric quality), radio-active ores, rutile, sillimanite, vermiculite and zircon; and ores of antimony, arsenic, beryllium, bismuth, cobalt, columbium, copper, lithium, mercury, molybdenum, nickel, osmiridium, platinum, selenium, strontium, tantalum, tellurium, tin, tungsten and vanadium.

Income derived from mining principally for gold in Australia or the Territory of Papua and New Guinea is exempt from tax. The exemption is also available in respect of income derived from mining principally for gold and copper if the value of the gold obtained is not less than 40 per cent. of the value of total output.

Income attributable to uranium obtained from working a mining property in Australia or the Territory of Papua and New Guinea, or from the treatment of ore in Australia or the Territory to recover uranium concentrates, is exempt from tax for residents of Australia and the Territory of Papua and New Guinea. The exemption is, however, conditional upon the uranium recovered being owned by the Commonwealth or disposed of to a person approved by the Commonwealth.

Dividends paid wholly and exclusively out of exempt mining income are also exempt from tax.

Further information is given in a booklet entitled *Income Tax for the Mining Industry*, issued by the Commissioner of Taxation.

(b) *Assistance to the Gold-Mining Industry.* The assistance to the gold-mining industry by subsidy was introduced at a time of rising costs in the industry and a fixed official world price for gold. Because many producers were faced with the likelihood of closing down, the Government decided to subsidize marginal producers in Australia and the Territories of Papua and New Guinea. Under the *Gold-Mining Industry Assistance Act 1954*, a producer the value of whose gold output exceeded 50 per cent. of the total value of his mine output was eligible for assistance, subject to certain conditions, on the production of gold from 1st July, 1954. The rate of subsidy payable under the original Act was increased under amendments enacted on 22nd October, 1957, and 22nd May, 1959. Under the Act as it now stands, the subsidy payable to small producers whose annual deliveries do not exceed 500 fine oz. is £2 8s. 0d. per fine oz., irrespective of cost of production or rate of profit. For large producers, subject to certain provisions, subsidy is paid at the rate of three-quarters of the excess of the average cost of production over £13 10s. per fine oz. with a maximum amount of subsidy of £3 5s. per fine oz. A producer whose deliveries during the year exceed 500 fine oz. may elect to be treated as a small producer. In this case, the subsidy rate payable per fine ounce on total deliveries is £2 8s. reduced by one penny for each fine ounce by which deliveries exceed 500 fine ounces. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of sales on overseas premium markets or otherwise, the subsidy payable is reduced by the amount of the excess. The subsidy is also limited, in the case of large producers, to the extent that the annual net profit of a producer shall not, with the addition of the subsidy, exceed 10 per cent. of the capital used in the production and sale of gold. The expenditure on development allowable in determining costs is subject to a limiting provision. A further condition of the Act is that the recovery rate of the mine shall not fall below nine-tenths of that for the year previous to the commencement of the Act. Payments under the Act are to apply to production until 30th June, 1965.

Payments under the Act commenced in March, 1955, and the amounts paid to gold producers in the various States and Territories of Australia in each of the years 1959 to 1963 are shown in the table on page 1152.

The purpose of the *Gold Mines Development Assistance Act 1962* is to provide assistance to gold producers in Australia and the Territories of Papua and New Guinea not receiving subsidy under the *Gold-Mining Industry Assistance Act 1954-1962*, in order to increase the rate of their development work and so to add to their proved reserves of gold-bearing minerals. In recent years, these reserves had declined to the extent that the long-term prospects of the industry were jeopardized. The Act, which applies to 1962-63 and the next two financial years, provides that a development allowance is payable to a mine approved for the purposes of the scheme equal to the amount by which its allowable expenditure on development in a year, as defined in the Act, exceeds a defined base amount, which normally will be the average annual amount spent by the mine on development during the three years preceding 1962-63. The payment of allowance is also subject to a number of other conditions and limits provided for in the Act.

(c) *Assistance to the Copper Mining Industry.* After a Tariff Board investigation, assistance was accorded to the industry in 1958, partly by import duty and partly by bounty. The assistance to the industry was reviewed in 1960 and 1963, and the present bounty assistance will continue until 31st December, 1965. Under the *Copper Bounty Act 1958-1963*, bounty is payable, subject to specified conditions, on refined copper sold for use in Australia. The rate of bounty is £35 a ton when the overseas price, as determined by the Minister for Customs and Excise, is £290 (£Stg.232) or less. When the overseas price rises above £290, the bounty falls by the same extent, so that no bounty is payable when the overseas price is £325 (£Stg.260) or more. A duty is imposed on imports of copper when the overseas price falls below £290 a ton, to the extent of £1 for each £1 that the price falls below £290. Including freight and other charges, the landed cost of imported copper is thus expected not to fall below about £305 a ton.

(d) *Search for Petroleum.* The Commonwealth Government has encouraged the search for petroleum in Australia, Papua and New Guinea, and considerable sums have been spent during recent years in geological and geophysical surveys and in drilling operations.

The Bureau of Mineral Resources, in close co-operation with the Mines Departments of the States, has continued regional geological and geophysical surveys throughout Australia. In 1957, the Commonwealth Government introduced the *Petroleum Search Subsidy Act 1957*, whereby stratigraphic drilling operations were subsidized to the extent of 50 per cent. of cost. The *Petroleum Search Subsidy Act 1959* widened the scope of operations for which subsidy was offered to include all types of geophysical surveys and off-structure drilling operations.

Another amendment in 1961 further widened the scope of the 1959 Act to provide subsidy for test drilling and detailed structure drilling operations. It also provided for the calculation of drilling subsidies on a footage basis as an alternative to the total cost basis. A sum of £5 million was allocated to the petroleum search subsidy scheme for 1962-63. This amount was almost double the allocation of £2.7 million provided in the previous year. In spite of the increased allocation, applications for subsidy increased to such an extent that the maximum rate of subsidy was reduced from 50 per cent. of the allowable cost of approved operations to 30 per cent. in 1962-63. A cash allocation of £5 million was made for subsidy in the 1963-64 financial year.

To the end of 1963, actual payments of subsidy totalling more than £11 million had been made in accordance with the terms of the subsidy Acts. Further particulars of government assistance in petroleum exploration will be found in Year Book No. 48, pages 1095-6.

(e) *Assistance to Producers of Sulphuric Acid and Iron Pyrites.* Following recommendations of the Tariff Board, the Sulphuric Acid Bounty Act was extended for a period of five years from 1st July, 1960. Arising from these same recommendations, the *Pyrites Bounty Act* 1960 was enacted on 15th December, 1960, to be operative for a period of four and a half years from 1st January, 1961. The Acts provide for bounties to be paid, subject to specified conditions, on sulphuric acid produced from prescribed materials of Australian origin and to producers of iron pyrites.

(f) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories, and makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(g) *Research Investigations.* Research investigations into mineral problems are undertaken by the Australian Mineral Development Laboratories in Adelaide. This organization is sponsored by the Commonwealth Government, the South Australian Government and the Australian Mineral Industries Research Association (an association of companies engaged in the mineral industry formed to foster and develop mineral research). Ore-dressing and mineragraphic investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out at the Ore-Dressing Laboratory, situated in the Department of Mining, University of Melbourne, and at the Ore-Dressing Laboratory, Kalgoorlie, situated at the School of Mines. The Mineragraphic Investigations Section is located in the Geology Department, University of Melbourne.

These two groups of laboratories perform complementary services—the Mineragraphic Investigations Section assesses microscopically the state of dispersion and the mineral association of ore bodies, while the Ore-Dressing Laboratories investigate the composition of ores and provide advice on suitable methods for their full-scale treatment.

(h) *Department of Territories.* For particulars of the Northern Territory Administration, see paragraph (h) under section (ii) *Aid to Mining—States*, page 1135.

(ii) *Aid to Mining—States.* (a) *General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining may consist of grants to assist the prospecting and/or mining for gold and minerals, and for the purchase, removal and installation of mining plant or equipment. A quantity of mechanical equipment is also available in several localities for hire at reasonable rentals to prospectors and small mine operators, and District Inspectors have geiger counters and scheelite detectors which are loaned to approved persons.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery for gold mining. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration. A survey of the State's underground water resources is in progress, in conjunction with the development of town water supplies from underground sources.

(d) *Queensland.* Various forms of assistance to mining are made available by the Queensland Department of Mines. Grants are made from the Consolidated Revenue Fund for use on construction and maintenance of roads in mining areas. Advances are made from the Gold Mining Encouragement Fund for mining development work. This assistance is restricted to gold mines, and advances are repayable from proceeds of the mine, if any. From the Assistance to Metalliferous Mining Fund, plant such as jackhammers, compressors and pumps is purchased and maintained. Such plant is made available on hire, the rental payments being credited back to the fund. Prospecting assistance is made available in approved cases, the rates being £2 10s. a week for a single man and £3 10s. a week for a married man with dependants. This is not repayable. From the Advances to Mining Fund, assistance by way of subsidy is advanced for mine development. This is repayable from proceeds of the mine. The department also maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry, and diamond-drilling plants in several parts of the State. The Venus State battery at Charters Towers is available for the treatment of gold-bearing ores.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) hire of boring plant and mining equipment, boring and testing of mineral deposits, financial subsidies in approved cases for prospecting and mining development, development of sub-surface water supplies for farming, pastoral, irrigation and mining purposes, and purchase of basic metal ores from prospectors; (ii) geological examination of mineral deposits, water supply, dam foundation and drainage problems, guidance on mining legislation, and publication and issue of geological bulletins and maps. It also provides, through the Australian Mineral Development Laboratories, chemical and metallurgical and analytical and assay investigation, testing and treatment of ores and minerals, and petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £5 a week south of the 26th parallel of latitude, and of £6 a week north of that parallel; also provision is made for the supply of some tools required for prospecting.

There are twenty State batteries operating intermittently throughout the goldfields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government also has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or de-watering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work, and for diamond and other types of drilling. The Department has available for hire percussion and diamond drills for exploration, as well as a complete plant for small shaft sinking and tunnelling. Other assistance is rendered to the industry by geological and engineering advice, through ore-dressing research into metallurgical recoveries, and the selection and design of treatment plant.

In consequence of a serious fall in world tungsten prices, the *King Island Scheelite Agreement Act 1963 (No. 1)* was passed. This Act permitted the Tasmanian Government to provide financial assistance until the end of August, 1963, so that production of scheelite on King Island could be continued. A second Act (*King Island Scheelite Agreement Act 1963 (No. 2)*) gave authority for advances in the period to 31st May, 1964.

(h) *Northern Territory.* To encourage the development of the mining industry, the Northern Territory Administration has erected four government batteries for the treatment of miners' ores. Only two of these, at Tennant Creek and Mount Wells near Burrundie, are now in operation. The re-opening of the other two batteries will depend on the revival of small scale wolfram and tin mining in Hatches Creek and Maranboy where these batteries are located.

The crushing charges are subsidized by government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out developmental work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

(iii) *Controls on Minerals and Metals.* Export controls are maintained over certain minerals and metals. These controls are enforced by means of the Customs (Prohibited Exports) Regulations as amended from time to time by Statutory Rules. To export these materials, it is necessary to obtain a clearance from the following Commonwealth authorities:—

Department of National Development—mineral sands in all forms (including concentrates) containing zircon, rutile or ilmenite; lithium ores and concentrates; beryllium ores and concentrates; manganese ores; iron ores, beneficiated iron ores and iron concentrates;

Department of Primary Industry—phosphate rock, phosphate and superphosphate, and fertilizers containing phosphate or superphosphate;

Australian Atomic Energy Commission—all radio-active minerals, metals and compounds, including uranium, thorium and monazite; lithium metal and alloys; beryllium metal, alloys and compounds; zirconium metal, alloys and compounds.

Further information concerning the Atomic Energy Commission appears in Chapter XIX. Education, Cultural Activities and Research.

## § 2. The Mineral Industry

1. *Sources and Scope of Statistics.*—In the main, the data contained in this chapter consist of official statistics of the Mines Departments of the several States and of the Northern Territory Mines Branch. The particulars shown have been compiled as far as practicable on the standardized basis which has been used in Australia since 1950, and this presentation has involved some rearrangement of official statistics published by the Mines Departments in some States. These statistics have been supplemented, as necessary, by data obtained from the Statisticians of the Several States, the Bureau of Mineral Resources, Geology and Geophysics, the Joint Coal Board, the Division of Minerals of the United States Bureau of Mines, and from several other sources.

The coverage of the collection in respect of construction materials is incomplete in most States. This deficiency is due primarily to the inherent difficulty of obtaining complete lists of quarries (including those operated by governmental authorities) many of which operate intermittently and in different locations. There is difficulty also in obtaining satisfactory returns from quarries operated in conjunction with some other activity, e.g. road-making, brickworks, etc., and quarries operated in conjunction with large construction projects, such as the Snowy Mountains Scheme, are excluded from these statistics. In some States, there have been deficiencies also in the collection of data for certain non-metal (excluding fuel) mining industries, mainly because these are outside the fields normally under the administrative control of Mines Departments. Products chiefly affected are clays, loam and silica.

2. *Presentation of Mineral Statistics.*—(i) *Mineral Industry Data.* The mineral industry includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. Ore-dressing and elementary smelting of metallic minerals (e.g. in the case of gold) and miscellaneous treatment of non-metallic minerals, where these are carried out in an associated plant at or near the mine, are included in the mineral industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mount Morgan and Mount Isa in Queensland and at Mount Lyell in Tasmania) are omitted and classified to the manufacturing industry.

For mines and quarries which produce more than one product, it is not possible to apportion some particulars relating to the operations of the mine (employment, salaries and wages paid, and costs incurred in production) to the minerals produced. It is, therefore, the practice to record these data only as a total for each mine and then to classify each mine to the industry of the most important mineral produced. Thus a mine producing, say, both tin and tungsten minerals, would be classified as a tin mine if tin were the more important product by value, and as tungsten if tungsten were the dominant product.

The mineral industries are classified into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining, and Construction Material Quarrying.

Mineral industry data have been obtained annually, since 1952, from the Mining and Quarrying Census. This census is carried out in collaboration with the several Mines Departments and involves the uniform collection of particulars from all establishments employing on the average four or more persons during the period worked by the mine. A representative specimen collection form is included in the bulletin *Primary Industries, Part II.*, No. 56, 1961-62, pages 47 and 48. For smaller mines, either simplified Census returns covering number of persons employed and value of output are collected, or these particulars are compiled from data made available by the Mines Departments.

Statistics of oil search operations have been excluded in accordance with the definition of the mining industry on page 1136, but a special article on developments in the search for oil, contributed by the Commonwealth Bureau of Mineral Resources, may be found in Year Book No. 48, pages 1094-9. More recent developments are outlined in § 13 of this chapter. Details of the activities of establishments engaged in the mining and treatment of uranium ore have been excluded because of the confidential nature of these operations.

(ii) *Mineral Product Data.* In the preparation of Australian mineral production statistics, the quantities and values of individual minerals produced are recorded in terms of the products in the form in which they are dispatched from the locality of each mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine, or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the contents of metallic minerals and contents or average grade of selected non-metallic minerals are recorded. Whenever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral. In general, other metallic contents which are not recovered are excluded.

Minerals are divided into four major groups, namely, Metals, Fuels, Non-metals (excluding Fuels) and Construction Materials. In this chapter, individual mineral products are arranged in these four groups. Particulars relating to uranium-bearing minerals are excluded.

3. Number of Mines and Quarries.—The following table shows the number of mines and quarries which operated in each State and Territory in 1962.

MINING AND QUARRYING: NUMBER OF MINES AND QUARRIES, 1962

(b) Not comparable

4. **Employment in Mining and Quarrying.**—(i) *Persons Engaged.* Statistics of persons employed in the mining and quarrying industry are derived mainly from the annual census of that industry.

Data on the work force employed in the industry are also obtained from the population censuses of Australia. The population census figure for mining and quarrying includes a number of persons excluded by definition from the mining and quarrying census employment figure, e.g. prospectors, head office employees, etc.

In the following table, which shows particulars collected in the population censuses of Australia at 30th June, 1947, 1954, and 1961, the numbers of persons whose industry statements were classified to "mining and quarrying" are shown together with the numbers engaged in all primary industries and the total work force.

**PERSONS ENGAGED IN MINING AND QUARRYING, AUSTRALIA**

Particulars	Census, 30th June—		
	1947	1954	1961
<b>Persons engaged in—</b>			
Mining and quarrying .. .. .	57,574	62,107	54,401
All primary industries .. .. .	563,697	560,100	513,286
<b>Total work force</b> .. .. .	<b>3,196,431</b>	<b>3,702,022</b>	<b>4,225,096</b>
<b>Persons engaged in mining and quarrying as a proportion of—</b>			
All primary industries .. .. . %	10.2	11.1	10.6
Total work force .. .. . %	1.8	1.7	1.3

NOTE.—An adjustment was made to the 1947 and 1954 industry data by distributing over the range of recorded industry the number of persons whose industry was not stated. No such adjustment was made to the 1961 figures.

The following table is derived from mining census data and shows the average numbers engaged in the various mining industries in each State or Territory in 1962.

## MINING AND QUARRYING: EMPLOYMENT(a), 1962

<b>Total, All Mining and Quarrying ..</b>	<b>50,139</b>	<b>47,544</b>	<b>47,758</b>	<b>b 46,125</b>	<b>b 45,225</b>

(a) Incomplete. See para. 1.—Sources and Scope of Statistics, p. 1136. (b) Not comparable with years prior to 1961 owing to extension of coverage in Victoria.

(ii) *Size Classification of Mines and Quarries.* Most of the mines and quarries worked during 1962 employed less than four persons, including working proprietors. However, more than half of the persons engaged in mining and quarrying were in the 48 mines each employing 200 persons or more. The following table shows the distribution of the total number of mines into various size groups according to the average number of persons employed during the period worked by each mine in 1962. For particulars of the method of compiling these industry statistics, see para. 2 (i), pages 1136-7.

#### MINING AND QUARRYING: SIZE CLASSIFICATION OF ESTABLISHMENTS, 1962

Mines and quarries employing on the average(a)—	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T. and A.C.T.	Aust.
Less than 4 persons—								
Establishments ..	709	144	413	270	243	91	87	1,957
Persons ..	1,114	265	660	407	575	169	126	3,316
From 4 to 20 persons—								
Establishments ..	168	174	92	96	82	46	13	671
Persons ..	1,288	1,377	1,019	773	680	307	99	5,543
From 21 to 200 persons—								
Establishments ..	87	29	71	13	17	12	3	232
Persons ..	6,623	1,101	(b)	(b)	1,346	661	142	13,924
More than 200 persons—								
Establishments ..	27	3	2	2	10	3	1	48
Persons ..	12,116	1,888	(b)	(b)	4,874	1,713	223	24,806
Total—								
Establishments ..	991	350	578	381	352	152	104	2,908
Persons ..	21,141	4,631	8,506	2,396	7,475	2,850	590	47,589

(a) Average during period worked. Includes working proprietors. (b) Not available for publication; included in total for Australia.

(iii) *Accidents in Mining.* Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis in all States, as varying criteria are used in determining what constitutes injury. In 1962, 40 persons were recorded as killed and 1,226 as injured in mining (excluding quarrying) accidents. Recorded deaths and injuries in that year were highest in black coal mines (20 and 352, respectively), gold mines (6 and 320), lead-silver-zinc mines (4 and 288), and copper-gold mines (1 and 80). Persons killed and injured in the construction material quarrying industry numbered 5 and 76, respectively, in 1962.

5. *Production Costs in Mining and Quarrying.*—(i) *Salaries and Wages Paid.* Salaries and wages paid in the mining and quarrying industries in Australia during each year 1958 to 1962 are shown in the following table. Information regarding rates of wages paid in the mining industry is shown in Chapter XIII. Labour, Wages and Prices (p. 451) and also in the *Labour Report*.

**MINING AND QUARRYING: SALARIES AND WAGES PAID(a), AUSTRALIA**

QUANTITIES OF PRINCIPAL MINERALS PRODUCED: AUSTRALIA—*continued*

Mineral	1958	1959	1960	1961	1962
CONSTRUCTION MATERIALS(g)					
Sand .. .. . '000 tons	4,118	4,623	5,934	7,427	7,535
River gravel and gravel boulders .. .. . "	2,265	2,524	2,932	6,018	5,912
Dimension stone .. .. . "	272	283	318	533	379
Crushed and broken stone .. .. . "	15,542	19,822	22,530	27,303	27,944
Other (decomposed rock, etc.) .. .. . "	12,722	13,699	15,586	16,482	17,310

(a) Includes cupreous ore for fertilizer. (b) Bullion, alluvial, retorted gold, etc. (c) Gross weight not available. (d) Iron oxide for metal extraction. (e) Includes lead-silver-zinc ore. (f) Excludes quantities used directly as a building or road material. (g) Incomplete owing to difficulties of coverage. See para. 1. Sources and Scope of Statistics, p. 1136. 1961 and later figures are not comparable with previous years owing to extension of coverage in Victoria.

NOTE.—Particulars of production of uranium oxide (U<sub>3</sub>O<sub>8</sub>) are not available for publication.

(iii) *Contents of Metallic Minerals Produced.* The following table shows the contents of metallic minerals produced in 1962 which were "pay metals" or which were recovered as "refiners' prizes". Further particulars for earlier years are shown in the following paragraph and in the sections later in this chapter covering principal contents.

## CONTENTS OF METALLIC MINERALS PRODUCED, 1962

Content of metallic minerals produced	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.

(f) Content of manganese ore of other than metallurgical grade. (g) Sulphur content of pyrite and other minerals from which sulphur is extracted.

NOTE.—Particulars of production of uranium oxide (U<sub>3</sub>O<sub>8</sub>) are not available for publication.

### § 3. Gold

1. **Historical.**—A brief history of gold-mining in Australia may be found in previous issues of the Year Book (*see* No. 48, p. 1059).

2. **Methods of Mining and Treatment.**—Gold ores can be divided into two types, namely, free-milling and refractory. Free-milling ores are those that, when finely ground, will yield their gold content to amalgamation and/or cyanidation, and these are found in most of the gold deposits of Australia.

MINE PRODUCTION OF PRINCIPAL METALS  
(METALLIC CONTENT OF MINERALS)

AUSTRALIA, 1935 TO 1963

MINE PRODUCTION OF PRINCIPAL METALS  
AND PRODUCTION OF COAL

(METALLIC CONTENT OF MINERALS)

AUSTRALIA, 1935 TO 1963

Some refractory ores, which are not amenable to amalgamation, allow their gold to be dissolved by cyanidation, from which solution the gold is then precipitated. However, on the Coolgardie field, where gold-bearing sulphide and telluride minerals occur, it is necessary first to recover these from gangue by flotation. This concentrate is then roasted, and the resulting calcine, an impure oxide containing free gold, is cyanided to yield gold. This is usually smelted as bullion, in which form it leaves the vicinity of the mine.

3. Mine Production.—The following table shows the mine production of gold (gold content of minerals produced) during 1962 according to the mineral in which it was contained and the State or Territory of origin. A small quantity of gold recovered from pyrite concentrate produced at Kalgoorlie, Western Australia, for sulphuric acid manufacture is included with gold ore, concentrate, etc.

GOLD: MINE PRODUCTION, 1962  
(Fine oz.)

Mineral in which contained	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	Aust.
Copper ore, concentrate, etc. ..	302	..	53,085	..	2,679	7,453	15,285	78,804

Lead concentrate ..	8,902	..	..	..	..	3,384	..	12,286
Lead-copper concentrate ..	..	..	..	..	..	18,021	..	18,021
Zinc concentrate ..	1,598	..	..	..	..	2,843	..	4,441
<b>Total Gold ..</b>	<b>11,234</b>	<b>28,262</b>	<b>67,729</b>	<b>48</b>	<b>860,039</b>	<b>32,115</b>	<b>69,410</b>	<b>1,068,837</b>

The principal sources of production during 1962 were as follows.

(i) *New South Wales.* Most of the gold produced during 1962 was contained in lead and zinc concentrates produced at Broken Hill.

(ii) *Victoria.* At Chewton, near Castlemaine, one mine produced almost half of the State's production. Two other gold mines located in eastern Victoria produced the bulk of the remainder.

(iii) *Queensland.* The copper concentrate produced at Mount Morgan contained more than three-quarters of the State's output of gold, nearly all the remaining production coming from a mine at Cracow.

(iv) *South Australia.* The only gold produced was won by prospectors.

(v) *Western Australia.* More than half the total production came from the East Coolgardie goldfield, while most of the remaining production came from the Dundas, Murchison and Yilgarn goldfields. A single mine at Fimiston maintained its position as the largest gold producer in Australia, mining 181,095 fine oz. during 1962, and three other mines each produced over 100,000 fine oz. in the same period.

(vi) *Tasmania.* Lead-copper, lead and zinc concentrates milled at Rosebery contained more than three-quarters of the gold produced in Tasmania during 1962, nearly all the remaining production being contained in copper concentrate produced at Mount Lyell.

(vii) *Northern Territory.* Gold production is centred around Tennant Creek.

The following table shows the recorded mine production of gold (i.e. gold content of minerals produced) in the several States and in Australia as a whole during each year 1959 to 1963 and total output since the first major discovery of gold in 1851. Owing to defective information in the earlier years, it is likely that the total production figures fall considerably short of the actual totals.

## GOLD: MINE PRODUCTION(a)

State or Territory	1959	1960	1961	1962	1963(b)	Total(b) 1851-1963
	f. oz.	f. oz.	f. oz.	f. oz.	f. oz.	'000 f. oz.

(a) Gold content of minerals produced.

(b) Subject to revision.

4. **Refinery Production.**—Amalgam and gold slimes from cyanide extraction are treated at the mines to produce gold bullion, which at some mines may be partly refined before dispatch to the Royal Mints, located in Melbourne and Perth. By-product gold from lead smelting is refined at Port Pirie in South Australia, while the gold contained in copper refinery sludges resulting from electrolytic copper refining at Mount Lyell and Port Kembla is recovered at Port Kembla. Gold bullion and other gold-bearing materials are also refined in Sydney.

Details of the refinery production of gold in Australia and the value of refined newly-won gold of Australian origin are shown in the following table for each of the years 1959 to 1963. The value of the refined newly-won gold is based on the price fixed by the Reserve Bank, but allowance is made for premiums on sales of gold overseas and for industrial purposes in Australia.

## PRODUCTION OF REFINED GOLD IN AUSTRALIA

(a) Based on the price fixed by the Reserve Bank. Includes allowance for premiums on sales of gold overseas and for industrial purposes in Australia.

5. Changes in Stocks of Gold held in Australia.—The following table shows particulars of production and consumption, imports and exports of gold and changes in stocks of gold held in Australia for each of the years 1959 to 1963.

CHANGES IN STOCKS OF GOLD HELD IN AUSTRALIA  
(fine oz.)

Particulars	1959	1960	1961	1962	1963 (a)
Mine production of gold(b) ..	1,085,104	1,086,709	1,076,292	1,068,837	1,022,677
Imports of gold(c)(d) ..	136,674	144,033	146,279	132,963	162,065
<i>Total</i> .. ..	<i>1,221,778</i>	<i>1,230,742</i>	<i>1,222,571</i>	<i>1,201,800</i>	<i>1,184,742</i>
Exports of gold(c) .. ..	128,052	2,513,906	1,099,701	314,996	472,132
Gold content of ores and concentrates exported ..	17,941	25,803	39,835	44,166	50,683
Net industrial consumption of gold .. ..	33,938	40,972	35,429	47,881	61,042
<i>Total</i> .. ..	<i>179,931</i>	<i>2,580,681</i>	<i>1,174,965</i>	<i>407,043</i>	<i>583,857</i>
Changes in stocks of gold held in Australia(e) .. ..	+1,041,847	-1,349,939	+ 47,606	+ 794,757	+ 600,885

(a) Subject to revision. (b) Gold content of minerals produced in Australia. (c) Includes gold contained in matte. Excludes specie, leaf and foil and gold in unrefined forms other than the gold content of unrefined gold and silver bullion. (d) Excludes gold imported in some minor minerals. (e) Includes changes in holdings in Australia by official and banking institutions both on their own behalf and that of non-residents, together with the gold content of change in stocks of minerals awaiting refining. The sign near the figure indicates increase (+) or decrease (-) in stocks during the period shown.

6. Prices of Gold.—Under existing legislation, all gold produced in Australia is sold to the Reserve Bank. The official price of gold is fixed by the Reserve Bank. On 1st May, 1954, it was raised from £15 9s. 10d. to £15 12s. 6d. per fine oz. and has remained unchanged since that date. The current price reflects the "parity" value of Australian currency established by the *International Monetary Agreement Act 1947*. Prior to 1947, the price of gold was based on the price for which it could be sold abroad in official markets, less cost of movement.

Average prices of gold per fine oz. at mints in Australia and on the London gold market are shown in the following table for the years 1959 to 1963.

PRICES OF GOLD: AUSTRALIA AND LONDON  
(per fine oz.)

Place of sale	1959	1960	1961	1962	1963
At mints in Australia £A. s. d.	15 12 6	15 12 6	15 12 6	15 12 6	15 12 6
London .. fstg. s. d.	12 9 10½	12 11 2½	12 11 0	12 10 1	12 10 6½

7. Sales of Gold on Oversea Premium Markets.—In November, 1951, the Commonwealth Government decided to allow Australian gold producers to benefit from the higher prices then being paid for gold on some overseas markets. To implement this decision, producers formed the Gold Producers' Association Limited in December, 1951, and the first sales were made in that month. By arrangement with the Reserve Bank of Australia, the total quantity of newly-won gold delivered to the Bank by members of the Association in any calendar month, less the quantity required for industrial purposes in Australia, is available to the Association for sale on overseas premium markets during the ensuing two calendar months. The net proceeds from premium sales are distributed to members in proportion to their production of gold.

The following table shows the quantity and value of gold sold on overseas premium markets and the average price realized for these sales during the years 1959 to 1963.

### GOLD SOLD ON OVERSEA PREMIUM MARKETS

Particulars	Unit	1959	1960	1961	1962	1963
Quantity ..	fine oz.	37,346	320,151	733,217	320,323	512,805

## § 4. Lead, Silver and Zinc

1. **Historical.**—A brief history of silver-lead-zinc mining in Australia may be found in previous issues of the Year Book (*see* No. 48, p. 1065).

2. **Methods of Mining and Treatment.**—All the lead-zinc production from the large mines is obtained by underground mining. The lead-zinc sulphides mined are concentrated by differential flotation to produce separate lead and zinc concentrates, with the lead concentrate containing most of the silver.

3. **Mine Production.**—The following table shows the mine production (metal content of ores and concentrates produced) of lead, silver and zinc in Australia, and the respective minerals in which these metals were contained.

LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1962

Mineral in which contained	N.S.W.	Vic.	Q'land	S.A.	W. Aust.	Tas.	N.T.	Aust.

(a) Includes lead-silver-zinc ore.

The principal sources of production of lead, silver and zinc during 1962, were as follows.

(i) *New South Wales.* Lead and zinc concentrates, produced at Broken Hill, contained nearly all the New South Wales production of lead, silver and zinc. During 1962, New South Wales mines produced (in terms of the content of all ores and concentrates produced) more than three-quarters of Australia's lead, more than two-thirds of the zinc and more than half of the silver.

(ii) *Victoria.* All the silver produced was obtained from gold mining operations. No lead or zinc-bearing minerals are mined in Victoria.

(iii) *Queensland.* Mount Isa produced all the lead and zinc concentrates in Queensland during 1962. These concentrates contained almost all of the State's production of lead and silver and all the zinc. Nearly all the remaining silver was contained in copper concentrates produced at Mount Isa and at Mount Morgan.

(iv) *South Australia.* A small quantity of zinc ore for fertilizer was mined during 1962; there was no mine production of lead or silver during the year.

(v) *Western Australia.* Nearly all the silver produced was obtained from gold bullion produced by the gold-mining industry. All the lead was contained in lead concentrate produced in the Northampton district. No zinc was produced during 1962.

(vi) *Tasmania.* All the lead, silver and zinc was produced from mines on the West Coast. All the zinc and most of the lead and silver were produced from mines at Rosebery and Williamsford and milled at Rosebery to produce separate lead, zinc, and lead-copper concentrates.

(vii) *Northern Territory.* Almost all the silver was contained in copper concentrates produced at Tennant Creek and Rum Jungle.

The table hereunder shows the quantities of lead, silver and zinc contained in minerals won in the several States and the Northern Territory during the years 1958 to 1962.

(a) Less than one half ton.

4. Smelter and Refinery Production.—(i) *Lead.* The bulk of lead concentrate produced at Broken Hill is railed to Port Pirie, in South Australia, for smelting and refining. Lead-silver bullion is produced from initial smelting, and lead, silver and gold are then extracted as refined products. Cadmium is contained in the smelter fumes and is extracted. The sulphur dioxide gas formed during pre-smelter sintering operations is used to manufacture sulphuric acid. The antimony contained in the concentrate is alloyed with lead to form marketable antimonial lead, while the copper is recovered in various products which are sent to copper refineries for copper extraction.

In 1961, a new smelter was commissioned at Cockle Creek, New South Wales. It draws its supplies of lead and zinc concentrates from Broken Hill. This plant is unique in Australia in that the zinc content of lead concentrate is recovered. Previously this zinc content had accumulated in lead smelter slags. The bullion produced at this plant is exported for treatment while most of the refined zinc is used domestically. Sulphuric acid and cadmium are recovered as by-products. Some of the Broken Hill concentrate not treated at Port Pirie and Cockle Creek is exported for treatment overseas.

Lead ore and concentrate produced at Mount Isa is smelted at the mine to derive a lead bullion which is rich in silver. All this bullion is exported to the United Kingdom for refining. A lead-copper dross is produced as a by-product of lead smelting and this is also exported.

Lead and lead-copper concentrates produced in Tasmania and lead concentrates produced in Western Australia are exported for smelting and refining overseas.

(ii) *Zinc.* A large proportion of the zinc concentrate produced at Broken Hill is exported, and the remainder is either shipped from Port Pirie to Risdon, near Hobart, or railed to Cockle Creek for smelting and refining. At Risdon, the Broken Hill concentrate, together with all zinc concentrate produced in Tasmania, is roasted to form zinc oxide or calcine. Sulphur dioxide formed during this roasting process is used for the manufacture of sulphuric acid. The calcine is leached with a weak solution of sulphuric acid to form a zinc sulphate solution which, after purification, is electrolysed. Zinc of high purity is deposited on the cathodes and this zinc is melted and cast into ingots. Cadmium metal and cobalt oxide are also recovered.

Zinc concentrate produced at Mount Isa is refined overseas.

The following table gives, for the years 1958 to 1962, particulars of the production and sales of refined primary lead, silver and zinc as recorded from data received from the Bureau of Mineral Resources.

## REFINED LEAD, SILVER AND ZINC: PRODUCTION, SALES AND EXPORTS, AUSTRALIA

## § 5. Copper

1. **Historical.**—A brief history of copper-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1070).

2. **Assistance to the Copper Mining Industry.**—For particulars, see para. 3(i)(c), page 1133.

3. **Methods of Mining and Treatment.**—Most of the large copper ore bodies contain the mineral chalcopyrite, an iron-copper sulphide. Copper ore is mined by open-cut methods at Mount Morgan, Mount Isa and Mount Lyell and by underground methods at Mount Isa and Ravensthorpe (Western Australia). Oxidized copper ore is mined at Mount Isa and at numerous other localities, mainly in Western Australia.

It is the practice for the sulphide ore to be finely ground and for the chalcopyrite contained in it to be recovered by flotation. At Mount Lyell and Mount Morgan, the tailings from the copper flotation are subjected to a further flotation and a pyrite concentrate is produced. The oxidized ore mined at Mount Isa has, in the past, been fed direct to the smelter for fluxing purposes, but in 1962 some was concentrated. As part of the programme to develop a new open-cut operation at Mount Isa, large amounts of this oxidized ore have been removed but only material actually smelted or concentrated is recorded as current production.

4. **Mine Production.**—The following table shows for 1962 the copper content of all minerals produced in the several States and the Northern Territory.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1962**  
(Tons)

Mineral in which contained	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Copper ore, concentrate, and precipitate ..	253	10	78,307	2	1,488	13,229	7,968	101,257
Lead concentrate ..	3,095	..	935	..	..	80	..	4,110
Lead-copper concentrate ..	..	..	..	..	..	961	..	961
Silver-copper concentrate ..	4	..	..	..	..	..	..	4
Zinc concentrate ..	395	..	..	..	..	245	..	640
<b>Total .. ..</b>	<b>3,747</b>	<b>10</b>	<b>79,242</b>	<b>2</b>	<b>1,488</b>	<b>14,515</b>	<b>7,968</b>	<b>106,972</b>

The following were the principal sources of copper during 1962.

- (i) *New South Wales.* Most of the copper produced was contained in lead and zinc concentrate milled at Broken Hill.
- (ii) *Victoria.* One mine produced a small quantity of copper ore during 1962.
- (iii) *Queensland.* Mount Isa was the most important copper producing centre in Australia, its 1962 output being almost 70 per cent. of the Australian total. The copper produced at Mount Isa is contained in copper sulphide concentrate, oxidized copper ore and lead concentrate. Copper concentrate produced at Mount Morgan contained most of the remainder of the State's production.
- (iv) *South Australia.* Only a small quantity of copper ore for fertilizer was produced during 1962.
- (v) *Western Australia.* Two-thirds of the copper mined was contained in copper concentrate produced at Ravensthorpe. The remainder was contained in copper ore won at various localities in the State for fertilizer manufacture.
- (vi) *Tasmania.* Most of the State's production was at Mount Lyell, where copper was contained in copper concentrate, ore and precipitate. Lead-copper concentrate and lead concentrate milled at Rosebery contained the remainder of Tasmania's production.
- (vii) *Northern Territory.* Copper concentrate from Tennant Creek and copper concentrate and precipitate from Rum Jungle contained almost all of the Territory's output of copper.

The table hereunder shows the quantities of copper contained in minerals produced in the several States and the Northern Territory during the years 1958 to 1962.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED**

<b>Australia .. ..</b>	<b>75,715</b>	<b>94,950</b>	<b>109,435</b>	<b>95,626</b>	<b>106,972</b>

5. **Smelter and Refinery Production of Copper.**—Most of the copper concentrate milled in Australia is smelted locally, blister copper being produced at Mount Isa, Mount Morgan, Mount Lyell and Port Kembla.

Blister copper smelted at Mount Isa is railed to Townsville for electrolytic refining. Mount Lyell blister copper is electrolytically refined at Mount Lyell and the bulk is re-melted and cast into primary shapes at Port Kembla. Mount Morgan blister copper is shipped to Port Kembla, where together with blister produced at Port Kembla, it is refined. All refined copper now produced in Australia is processed electrolytically.

At Port Kembla, gold and silver contained in electrolytic refining tank house slimes from Mount Lyell, Townsville, and Port Kembla are recovered.

In the following table, details are given of the production of blister copper, and the production and exports of refined copper for the years 1958 to 1962.

#### METALLIC COPPER: PRODUCTION AND EXPORTS, AUSTRALIA

(b) Smelter production.

## § 6. Tin

1. Historical.—A brief history of tin-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1073).

2. Methods of Mining and Treatment.—The greater proportion of tin concentrate production is obtained from alluvial workings as a gravity concentrate of cassiterite (tin oxide). The remainder is obtained from underground mining, where the tin mineralization is frequently associated with wolfram and sulphide minerals.

3. Mine Production.—The following table sets out the tin content of tin concentrate produced in Australia during the years 1958 to 1962. No tin is recorded from minerals other than tin concentrate.

## TIN: CONTENT OF TIN CONCENTRATES PRODUCED

(Tons)

State or Territory	1958	1959	1960	1961	1962
New South Wales .. ..	239	174	223	173	212
Victoria .. ..	..	..	..	..	7
Queensland .. ..	1,019	1,104	885	1,350	1,077
Western Australia .. ..	94	174	190	231	323
Tasmania .. ..	883	890	884	986	1,058
Northern Territory .. ..	2	9	20	5	38
<b>Australia .. ..</b>	<b>2,237</b>	<b>2,351</b>	<b>2,202</b>	<b>2,745</b>	<b>2,715</b>

The following were the principal sources of production in 1962.

- (i) *New South Wales.* All production was from alluvial deposits. The New England region, mainly around Tingha, Tenterfield and Deepwater produced over 70 per cent. of the total production.
- (ii) *Queensland.* Most of the tin concentrate produced was from the Herberton field, principally alluvial tin concentrate being produced. Tin concentrate was also produced in the Chillagoe, Kangaroo Hills, Cooktown and Mareeba districts.
- (iii) *Western Australia.* Nearly all the tin concentrate produced was alluvial tin won from the Pilbara field.
- (iv) *Tasmania.* Most of the tin concentrate produced was won in the north-east part of the State, from both lode and alluvial deposits. Wolfram concentrate, as well as tin concentrate, was produced.
- (v) *Northern Territory.* More than half of the output of tin came from mines in the Mount Masson area. Most of the remainder was produced at Boombera and Mount Harris.

4. *Smelter and Refinery Production.*—Except for occasional small parcels of concentrate shipped to oversea smelters, all local production is treated by the two tin smelters located in Sydney.

The production of refined tin in Australia from locally produced tin concentrate during recent years, as recorded by the Bureau of Mineral Resources, was as follows:—1959, 2,226 tons; 1960, 2,254 tons; 1961, 2,546 tons; 1962, 2,704 tons; and 1963, 2,636 tons.

Consumption of refined tin has increased substantially in recent years following the introduction of tin-plate production in Australia; hot-dip plating began in 1957 and the electrolytic plant at Port Kembla, New South Wales, commenced operations early in 1962.

5. *Prices.*—Details of the movement in average market prices of tin for the years 1959 to 1963 are given in terms of Australian currency and sterling in the following table.

**AVERAGE PRICE OF TIN IN AUSTRALIA AND THE UNITED KINGDOM**  
(£ per ton)

Country	1959	1960	1961	1962	1963
Australia — in Australian currency(a)	1,058	1,042	1,169	1,163	1,179
United Kingdom—in sterling(b)	786	794	895	898	909

(a) Delivered, Sydney.

(b) London Metal Exchange price.

6. *Production in Principal Countries.*—World production of tin reached its maximum in 1941, when 241,400 tons were recorded. Australia's contribution to the world's tin production is slightly above 1 per cent.

The mine production of tin for the principal producing countries and the estimated world totals in 1961 and 1962 were as follows.

## TIN: PRODUCTION IN PRINCIPAL COUNTRIES

(a) Estimated smelter production.

(b) Estimated.

## § 7. Iron

1. *Historical.*—Iron ore was first mined in New South Wales to supply raw material for the ironworks that were established near Mittagong in 1852. Iron ore for the ironworks established later at Lithgow was drawn from Carcoar, near Bathurst.

In South Australia, the iron ore deposits of the Middleback ranges, near Whyalla, were first mined by the Broken Hill Proprietary Co. Ltd. in 1900 to provide a flux for lead smelting operations at Port Pirie. When that company opened its Newcastle steelworks in 1915, it greatly expanded ore production from the Middleback Ranges and most of the Australian steel industry's requirements of iron ore still come from this source.

Regular shipments of iron ore from Yampi Sound, north of Derby in Western Australia, to the steelworks at Port Kembla commenced in 1951. Iron ore for the iron smelter at Wundowie, which commenced operations in 1948, has in recent years been provided entirely from the deposits at Koolyanobbing, near Southern Cross. The Koolyanobbing deposits will be worked on a very much larger scale eventually and will supply the ore for an iron and steel industry to be established at Kwinana, south of Perth. A blast furnace is expected to be in operation in 1968.

In December, 1960, the Commonwealth Government announced a partial relaxation of the embargo on the export of iron ore which had been in force since 1938. Permission has been granted for the export of iron ore from Tallering Peak-Koolanooka, Mount Goldsworthy, the Hamersley Range and the Scott River area in Western Australia, and from small deposits in New South Wales and Queensland.

Following the modification of the export embargo in 1960, known reserves of iron ore have greatly increased. The embargo was further relaxed in June, 1963.

Besides the large quantities of iron ore that are mined for metal extraction purposes, smaller quantities of iron oxide are mined for other purposes, such as gas purification, cement manufacture, coal washing and fluxing.

**2. Methods of Mining and Treatment.**—Currently all iron ore and iron oxide is won by open-cut mining. The ore is selectively mined, crushed and screened to provide a standard assay and size for blast furnace use. Some concentration of lower grade ore from the Iron Knob area in South Australia is now carried out. In August, 1962, a scree ore treatment plant began operating at Iron Knob. Concentrates produced have an iron content of over 60 per cent. and recovery is of the order of 85 per cent. Sintering is now carried out at both Newcastle and Port Kembla to provide an improved blast furnace feed.

**3. Mine Production of Iron Ore.**—Iron oxide deposits exist in all States and in the Northern Territory, but at present iron oxide for metal extraction purposes, termed iron ore in this chapter, is produced in two States only. The following table shows the estimated iron content of iron ore produced during the years 1958 to 1962.

**IRON: ESTIMATED IRON CONTENT OF IRON ORE PRODUCED**  
(Tons)

State	1958	1959	1960	1961	1962
South Australia .. ..	2,173,922	2,218,846	2,227,551	2,581,313	2,235,832
Western Australia .. ..	365,275	480,769	586,404	852,663	883,263
<b>Australia .. ..</b>	<b>2,539,197</b>	<b>2,699,615</b>	<b>2,813,955</b>	<b>3,433,976</b>	<b>3,119,095</b>

The producing centres during 1962, were as follows.

- (i) *South Australia.* 3,439,742 tons of iron ore were drawn from the Iron Monarch and Iron Prince quarries in the Middleback Ranges. Selected foundry grade ore was diverted as required to the Whyalla blast furnace, but the greater part was shipped to Newcastle and Port Kembla for smelting. Production of beneficiated iron ore commenced at Iron Knob in the latter part of 1962.
- (ii) *Western Australia.* Ore shipped from Yampi Sound, north of Derby, to New South Wales for sintering and smelting amounted to 1,320,355 tons. A quantity of 83,987 tons was mined at Koolyanobbing, near Southern Cross, for pig iron production at Wundowie.

**4. Mine Production of Iron Oxide.**—Production of iron oxide, excluding that used for metal extraction (iron ore) and mineral pigments, in the several States during 1962, according to end use, is shown in the following table.

**IRON OXIDE PRODUCTION, 1962**  
(Tons)

Use	New South Wales	Victoria	Queensland	South Australia	Tasmania	Australia
For gas purification ..	634	81	..	..	84	799
For cement manufacture	17,160	..	2,337	..	3,998	23,495
For coal washing ..	1,715	..	..	..	..	1,715
For fluxing .. ..	..	..	..	14,400	..	14,400
<b>Total .. ..</b>	<b>19,509</b>	<b>81</b>	<b>2,337</b>	<b>14,400</b>	<b>4,082</b>	<b>40,409</b>

The principal sources of iron oxide production during 1962 were as follows.

- (i) *New South Wales.* Quantities of iron oxide for gas purification were obtained from deposits near Port Macquarie, while that used for cement manufacture was mined from the Lithgow, Mudgee and Rylstone mining divisions. Magnetite, used in coal washing, was produced in the Copmanhurst mining division.
- (ii) *Victoria.* Limonite ore used for gas purification was mined at Buchan.
- (iii) *Queensland.* Iron oxide produced for cement manufacture was mined near Townsville.
- (iv) *South Australia.* A quantity of 14,400 tons drawn from the Middleback Ranges was dispatched to Port Pirie for use as a flux in lead smelting operations.
- (v) *Tasmania.* Iron oxide for gas purification and cement manufacture was mined in the vicinity of Penguin.

Particulars of Australian production of iron oxide according to end use are shown in the following table.

#### IRON OXIDE PRODUCTION: AUSTRALIA

(Tons)

Use	1958	1959	1960	1961	1962
For gas purification ..	2,864	4,355	2,970	1,446	799
For cement manufacture ..	6,093	9,485	15,776	21,786	23,495
For coal washing .. ..	25	30	386	1,260	1,715
For fluxing .. ..	8,100	9,600	9,600	8,850	14,400
<b>Total .. ..</b>	<b>17,082</b>	<b>23,470</b>	<b>28,732</b>	<b>33,342</b>	<b>40,409</b>

5. **Iron and Steel Production.**—The production of pig-iron and steel ingots in Australia, of which New South Wales is the main producing State, is shown in the following table. Figures shown below may differ from corresponding figures in Chapter V. Manufacturing Industry because of revisions since that chapter was prepared.

#### PIG-IRON AND INGOT STEEL: PRODUCTION, AUSTRALIA

(Tons)

Year ended 31st May		Pig-iron (a)	Steel ingots (b)	Year ended 31st May		Pig-iron (a)	Steel ingots (b)
1954	.. ..	1,826,711	2,116,813	1959	.. ..	2,293,709	3,203,584
1955	.. ..	1,868,841	2,208,708	1960	.. ..	2,655,237	3,519,719
1956	.. ..	1,910,521	2,320,289	1961	.. ..	3,001,800	3,748,037
1957	.. ..	2,098,352	2,773,995	1962	.. ..	3,380,334	4,075,699
1958	.. ..	2,283,925	3,037,705	1963	.. ..	3,400,302	4,259,909

(a) Includes pig-iron for castings; excludes ferro-alloys.

(b) Includes recovery from scrap.

In 1963, eleven blast furnaces were operating in Australia; four at Port Kembla and four at Newcastle, in New South Wales, two at Wundowie in Western Australia, and one at Whyalla, South Australia. Production of pig-iron throughout 1963 was at a record level. The fourth blast furnace at Newcastle, with a daily capacity of 1,400 tons of pig-iron, was commissioned in July, 1963.

During 1963, the bulk of Australia's ingot steel production was obtained from 17 open hearth furnaces (13 at Port Kembla and 4 at Newcastle). In addition, 3 other open hearth furnaces and 15 electric furnaces were in operation during 1963 for the production of special steels and ferro-alloys. The use of oxygen in steel-making assumed greater importance in Australia during 1963. All furnaces in the No. 2 open hearth shop at Port Kembla are now using oxygen lancing equipment and two basic oxygen steel-making units were in operation at Newcastle throughout the year. Annual steel-making capacity in Australia is now in excess of 5 million tons.

6. Production of Iron and Steel in Principal Countries.—Particulars of the production in the principal countries and the estimated world total production during the calendar years 1961 and 1962 are shown in the following table.

## § 8. Mineral Sands

1. **Historical.**—Since the war, the growing world demand for rutile as a coating for electric welding rods and as a source of titanium metal, and for ilmenite in the production of titanium pigments, has brought about a rapid expansion of Australian mineral sands mining. Australia is the largest producer of rutile and zircon in the world, and nearly all this production comes from the mineral sands deposits on the east coast. The ilmenite produced on the east coast has proved unsuitable for titanium oxide pigment manufacture, and most of the production is discarded. However, ilmenite produced from mineral sands mined in Western Australia since 1956 has a much lower chromic oxide content than east coast ilmenite and is therefore suitable for pigment production. Operators produce separate concentrates of rutile, zircon and ilmenite and, in addition, a few companies produce high-grade monazite concentrate.

Following the record post-war output of rutile in 1957, production was on a reduced scale during the period 1958–60, mainly because of greatly reduced prices offering on world markets. Commencing with the second half of 1961, however, the price of rutile improved and production increased, resulting in a record level of production being achieved in 1963.

2. **Methods of Mining and Treatment.**—Mining on the east coast of Australia is mainly by suction dredging. In Western Australia, ilmenite is mined hydraulically or by earth-moving equipment. Heavy mineral concentrates are recovered by wet gravity concentration, using a combination of concentrating spirals and shaking tables. The constituent minerals of the heavy-mineral concentrates, mainly rutile, zircon, ilmenite and monazite are separated by electromagnetic and electrostatic methods.

3. **Mine Production.**—(i) *Titanium Dioxide.* The following table shows the quantities of titanium dioxide contained in rutile and ilmenite concentrates produced during the years 1958 to 1962.

## TITANIUM DIOXIDE: CONTENT OF CONCENTRATES PRODUCED

(Tons)

State	1958	1959	1960	1961	1962
CONTAINED IN RUTILE CONCENTRATE					
New South Wales .. ..	44,915	44,792	52,262	64,284	77,227
Queensland .. ..	35,755	34,736	33,260	33,056	37,472
Western Australia .. ..	285	96	493	880	501
<i>Australia</i> .. ..	<i>80,955</i>	<i>79,624</i>	<i>86,015</i>	<i>98,220</i>	<i>115,200</i>
CONTAINED IN ILMENITE CONCENTRATE					
New South Wales .. ..	59	111	537	905	1,930
Queensland .. ..	..	..	21	2	..
Western Australia .. ..	38,219	45,566	58,171	92,838	98,364
<i>Australia</i> .. ..	<i>38,278</i>	<i>45,677</i>	<i>58,729</i>	<i>93,745</i>	<i>100,294</i>

(ii) *Zircon.* The quantities of zircon mineral contained in zircon concentrate produced during the years 1958 to 1962 are shown in the following table.

## ZIRCON: CONTENT OF ZIRCON CONCENTRATE PRODUCED

(Tons)

State	1958	1959	1960	1961	1962
New South Wales .. ..	32,230	71,156	65,764	98,421	89,947
Queensland .. ..	26,412	34,504	31,752	28,775	38,468
Western Australia .. ..	103	6,692	3,978	7,287	3,694
<b>Australia .. ..</b>	<b>58,745</b>	<b>112,352</b>	<b>101,494</b>	<b>134,483</b>	<b>132,109</b>

(iii) *Other Products.* During 1962, small quantities of monazite concentrate, magnetite and garnet concentrate were also recovered from mineral sands.

(iv) *Sources of Production.* The principal sources of mineral sands treated during 1962 were as follows.

(a) *New South Wales and Queensland.* The main deposits of mineral sands occur along the eastern Australian coast from Wyong in New South Wales to Curtis Island, Queensland. At present, the principal mining operations are located between Lake Munmorah and Newcastle in the south, between Laurieton and Crescent Head on the central coast, and between Byron Bay and North Stradbroke Island in the north. Most mining operations are now confined to dunes and swampy areas lying behind beaches where high-grade deposits are now exhausted.

(b) *Western Australia.* The chief deposits of mineral sands occur in the south-west corner of the State, between Bunbury and Wonnerup. During 1962, the bulk of production was from inland deposits in the Capel-Yoganup area.

## § 9. Aluminium

1. *Mine Production.*—The source of aluminium is bauxite. Until recent years, the only bauxite production in Australia was from small deposits in Queensland, New South Wales and Victoria. Production from these deposits has been used mainly by the chemical and steel industries.

Large deposits of bauxite exist at Weipa (North Queensland), Gove (Northern Territory) and Darling Range (Western Australia). The deposits at Weipa and the Darling Range are now being mined. Part of the bauxite from Weipa is shipped to Bell Bay (Tasmania) for treatment and part is exported to Japan. Bauxite from the Darling Range deposits is treated at Kwinana for the production of alumina. Part of the alumina from Kwinana is shipped to Point Henry (Victoria) for smelting to aluminium, and part is exported to Japan. Part of the deposits at Gove are being investigated under lease by an overseas company for the development of a bauxite exporting industry and possibly the establishment of an alumina plant. The remainder of the deposits at Gove are not held under lease at present, and the Commonwealth Government through the Department of Territories has called for proposals for the development of this remaining area. The alumina content of bauxite produced in Australia during the years 1958 to 1962 is shown in the following table.

## ALUMINA: CONTENT OF BAUXITE PRODUCED

(Tons)

State	1958	1959	1960	1961	1962
New South Wales .. ..	633	1,648	1,386	929	1,991
Victoria .. ..	2,304	1,991	2,306	2,035	2,300
Queensland(a) .. ..	596	..	14,442	4,500	8,959
Western Australia(a) ..	..	3,275	13,259	..	..
<b>Australia(b) .. ..</b>	<b>3,533</b>	<b>6,914</b>	<b>31,393</b>	<b>7,464</b>	<b>13,250</b>

(a) Estimated.

(b) Partly estimated.

2. **Refinery Production.**—There is a refinery for the production of alumina and refined aluminium at Bell Bay on the River Tamar in Northern Tasmania. The location of this refinery was determined by the availability of large supplies of hydro-electric power. Production of alumina commenced in February, 1955, and of refined aluminium in September, 1955. The capacity of the Bell Bay plant was increased to 35,000 tons in 1962 and was further increased to 52,000 tons in 1963. A new smelter with an ultimate capacity of 40,000 tons is under construction at Geelong (Victoria). The first section of the plant was commissioned in 1963. The following table shows the production of alumina and refined aluminium in Australia during the years 1958 to 1962.

## ALUMINA AND REFINED ALUMINIUM: PRODUCTION, AUSTRALIA

(Source: Bureau of Mineral Resources)

(Tons)

Refinery product	1958	1959	1960	1961	1962
Alumina .. ..	22,490	26,900	29,801	29,468	33,806
Refined aluminium ..	10,869	11,370	11,655	13,204	16,152

## § 10. Uranium

Uranium concentrate has been produced in Australia since 1954, but particulars of the quantity of  $U_3O_8$  concentrate produced and its value are not available for publication. All  $U_3O_8$  concentrate has been for export overseas. During 1963, the principal producing centres were as follows.

- (i) *Queensland.* Uranium ore was mined by opencut methods at Mary Kathleen, 33 miles east of Mount Isa. Mining ceased in September, 1963, and the treatment plant at Mary Kathleen closed in October, 1963, following the completion of the operating company's contract to supply uranium oxide to the United Kingdom Atomic Energy Agency.
- (ii) *Northern Territory.* At Rum Jungle, stockpiled uranium ores were treated to produce  $U_3O_8$  concentrate. Shipments of uranium oxide from the Rum Jungle plant to the Combined Development Agency were completed early in 1963.

In the South Alligator River area, the El Sherana mine was operated to supply ore to a concentrating plant at Moline.

Domestic production in 1964 will be confined to Rum Jungle and Moline. Existing contracts with the U.K. Atomic Energy Authority are expected to keep the Moline plant operating until 1965. Operations at Rum Jungle will be maintained at about current levels and the uranium oxide produced and stockpiled will be available for sale overseas.

## § 11. Other Metallic Minerals

1. Tungsten.—In recent years, Tasmania has been the principal State producing tungsten ores, scheelite being mined on King Island in Bass Strait and wolfram being mined in association with tin ores in the north-east part of the State. Because of low world prices, scheelite production on King Island ceased in August, 1958, but production was recommenced in 1960. Low prices have persisted and production since then has been on a limited scale. During 1963, the State Government provided financial assistance to the company producing scheelite on King Island to forestall a threatened closure of the mine due to marketing difficulties.

Particulars of the production of tungstic oxide contained in scheelite and wolfram concentrates produced during the years 1958 to 1962 are shown in the following table.

**TUNGSTIC OXIDE (WO<sub>3</sub>): CONTENT OF CONCENTRATES PRODUCED**  
(Tons)

State	1958	1959	1960	1961	1962
<b>CONTAINED IN SCHEELITE CONCENTRATE</b>					
New South Wales .. ..	1	(a)	(a)	(a)	..
Western Australia .. ..	..	..	..	..	5
Tasmania .. ..	477	..	291	709	686
<i>Australia</i> .. ..	478	(a)	291	709	691
<b>CONTAINED IN WOLFRAM CONCENTRATE</b>					
New South Wales .. ..	..	..	..	(a)	..
Queensland .. ..	5	..	..	1	1
Tasmania .. ..	360	645	804	810	349
Northern Territory .. ..	7	8	16	16	1
<i>Australia</i> .. ..	372	653	820	827	351

(a) Less than one half ton.

2. Manganese.—In recent years, Western Australia has been the principal State producing manganese ore, mined mainly from the Pilbara goldfield.

The following table shows the manganese content of metallurgical grade and the manganese dioxide content of battery and other grades of manganese ore produced during the years 1958 to 1962.

**MANGANESE: CONTENT OF MANGANESE ORE PRODUCED**  
(Tons)

Year	Metallurgical grade In terms of manganese (Mn) content				Battery and other grades In terms of manganese dioxide (MnO <sub>2</sub> ) content				
	N.S.W.	Q'land	W. Aust.	Aust.	N.S.W.	S. Aust.	W. Aust.	N. Terr.	Aust.
1958 ..	516	3,181	21,926	25,623	511	..	195	2,113	2,819
1959 ..	620	4,350	35,996	40,966	907	..	162	1,406	2,475
1960 ..	342	1,670	26,561	28,585	623	45	9	940	1,617
1961 ..	..	1,109	39,880	40,989	632	192	204	76	1,104
1962 ..	..	1,296	32,862	34,158	424	..	152	188	764

(a) Includes Victoria (12 tons).

The quantity of manganese dioxide recovered at the Risdon, Tasmania, refinery during 1962 amounted to 3,602 tons, of which 346 tons were sold for chemical processing and trace element fertilizer.

3. **Other.**—Production in 1962 (1961 shown in parentheses) of other metallic minerals are listed in the following paragraphs.

(i) *Antimony.* The antimony content of antimony-bearing minerals produced was 874 tons (680 tons). Of this amount, 808 tons (563 tons) were in lead concentrate and 66 tons (117 tons) in 100 tons (190 tons) of antimony ore and concentrate.

(ii) *Beryllium.* Production of beryllium ore was 223 tons (306 tons), which came mainly from the Yalgoo and Pilbara fields in Western Australia. The beryllium oxide content of the ore was 2,586 units of 22.4 lb. (3,585 units).

(iii) *Chromite.* Production of chromite in 1962 amounted to 369 tons with an estimated chromic oxide content of 185 tons. This was all mined in the Rockhampton district in Queensland. There was no production in the previous year.

(iv) *Tantalite-columbite.* The production of tantalite-columbite concentrate was 43,097 lb. (31,808 lb.) and the whole of this output came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 18,879 lb. (13,814 lb.).

(v) *Other.* Other metallic minerals produced in 1962 were bismuth concentrate, 181 lb., from Western Australia; molybdenite concentrate, 2,800 lb., from Queensland; and platinum concentrate, 3 oz.

## § 12. Coal

1. **Historical.**—A brief history of coal-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1086).

2. **Joint Coal Board.**—For details of the powers and functions of this Board, which has functioned since 1947, see page 887 of Year Book No. 39.

3. **Coal Industry Tribunal.**—The Coal Industry Tribunal was established under the Commonwealth *Coal Industry Act* 1946 and the New South Wales *Coal Industry Act*, 1946 to consider and determine interstate disputes and, in respect of New South Wales only, intra-State disputes between the Australian Coal and Shale Employees' Federation and employers in the coal-mining industry. Following legislation in 1951, the Tribunal was vested with authority to deal with all interstate industrial disputes in the coal-mining industry, irrespective of the trade union involved, and, in the case of New South Wales, intra-State disputes also. The Tribunal consists of one person who may appoint two assessors nominated by the parties to advise him in matters relating to any dispute.

4. **Australia's Coal Reserves.**—The latest available estimates of the measured and indicated coal reserves of Australia are those prepared by the Mines Departments in the various States for the Coal Utilization Research Advisory Committee whose report was issued by the Department of National Development in 1962. This information is shown in the following table. It should be noted that reserves can only be included in the "measured and indicated" categories when sufficient exploratory and testing work has been completed.

### ESTIMATED COAL RESERVES OF AUSTRALIA

(Source: State Mines Departments)

(Million Tons)

State	Type of coal	Measured and indicated	Inferred
New South Wales .. ..	Bituminous .. ..	(a) 3,050	(b)
Victoria .. ..	" .. ..	20	10
" .. ..	Brown .. ..	54,700	43,000
Queensland .. ..	Bituminous, sub-bituminous .. ..	950	(c)
South Australia .. ..	Sub-bituminous .. ..	130	..
" .. ..	Lignite .. ..	530	..
Western Australia .. ..	Sub-bituminous .. ..	274	1,603
Tasmania .. ..	Bituminous .. ..	(d)	(e) 137

(a) Recoverable reserves. (b) In excess of 30,000 million tons. (c) In excess of 10,000 million tons. (d) Very small; measured reserves in Tasmania amount to only several thousand tons. (e) Includes both indicated and inferred reserves.

5. *Mine Production of Black Coal.*—Production of black coal according to rank in the several States during the years 1959 to 1963 is set out in the following table. The tonnages produced by underground mining and opencut mining are also shown.

## BLACK COAL: PRODUCTION

(Tons)

Particulars	1959	1960	1961	1962	1963
<b>NEW SOUTH WALES</b>

Opencut mines ..	1,705,374	2,161,016	2,845,174	3,161,927	3,229,287

(a) Bituminous coal from an opencut mine.

(b) Bituminous coal from underground mines.

(c) Sub-bituminous coal.

The principal producing centres during 1962 were as follows.

- (i) *New South Wales.* The principal deposits worked were in the vicinity of Newcastle, Cessnock and Singleton (northern field), Lithgow (western field), and Wollongong (southern field). Tonnages mined in 1962 were: northern field, 10,058,000 tons; southern field, 7,454,000 tons; and western field, 1,517,000 tons. All opencut coal was from the northern field.
- The coal fields of New South Wales, predominantly bituminous, are the most important in Australia, in respect of the magnitude, quality and accessibility of reserves and the extent to which the deposits are being worked. Coal from the various seams differs in properties, coal from the Greta seam worked in the vicinity of Cessnock being particularly suitable for gas-making, while coal from the Victoria Tunnel, Dudley, Young Wallsend and Borehole seams, all of which are mined near Newcastle, have coking properties and are used in the steelworks. Coking coal is also obtained from the Bulli seam which is mined near Wollongong and in the Burragorang Valley. A multi-purpose coal is available in the Singleton area, and steaming coals are mined around Newcastle, Lithgow, Cessnock and Wollongong.
- (ii) *Victoria.* Production of black coal was restricted to the Gippsland district. The State Coal Mine at Wonthaggi was the main producer, and the remaining production came from small privately-owned mines.
- (iii) *Queensland.* The principal producing centres were Ipswich, 1,657,733 tons; Bowen, 367,313 tons; Mount Morgan, 301,584 tons; and Maryborough, 155,680 tons. Opencut methods were used on the Bowen, Clermont and Mount Morgan fields, and the total coal won by this means was 21.6 per cent. of total production.

- (iv) *South Australia.* Coal was mined only at Leigh Creek, 377 miles north of Adelaide.
- (v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State, and all production during 1962 was from this source.
- (vi) *Tasmania.* Most of the coal produced was won in the north-east of the State, the principal producing centres in 1962 being Fingal, 108,959 tons; St. Mary's, 105,268 tons; and Avoca, 50,049 tons.

6. Production of Black Coal Per Man-shift.—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked, (a) at the coal face, and (b) by all employees, in respect of underground mines for each State concerned and for Australia for the years 1958 to 1962. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by opencut mining.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT: UNDERGROUND MINES**  
(Tons)

Year	N.S.W.	Vic.	Q'land	W. Aust.	Tas.	Australia
------	--------	------	--------	----------	------	-----------

**PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE**

1958	.. ..	14.48	2.04	7.28	6.67	8.01	11.96
1959	.. ..	18.07	2.10	7.53	7.60	7.34	14.13
1960	.. ..	20.64	2.16	8.37	8.12	7.64	16.08
1961	.. ..	24.61	2.15	8.69	8.09	8.77	19.04
1962	.. ..	25.92	1.94	9.25	8.90	11.04	20.13

**PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES**

1958	.. ..	4.35	0.89	2.90	3.02	3.91	3.95
1959	.. ..	4.90	0.93	2.95	3.35	3.72	4.37
1960	.. ..	5.39	0.94	3.19	3.62	3.87	4.81
1961	.. ..	6.23	0.83	3.46	4.00	4.09	5.55
1962	.. ..	6.57	0.78	0.36	4.32	4.71	5.84

(ii) *Opencut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in opencut mines are shown. There are no opencuts producing black coal in Victoria.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT: OPENCUT MINES**  
(Tons)

Year	N.S.W.	Q'land	S. Aust.	W. Aust.	Tas.	Australia	
1958	.. ..	11.31	13.63	11.46	6.78	10.42	11.47
1959	.. ..	12.47	12.50	10.36	7.64	10.47	11.08
1960	.. ..	22.15	10.96	12.46	8.01	9.38	13.79
1961	.. ..	22.29	11.43	14.91	9.63	10.79	14.60
1962	.. ..	22.42	10.42	19.78	10.32	10.89	15.97

7. **Mine Production of Brown Coal.**—Brown coal is mined only in Victoria, and production in recent years has been as follows:—1959, 13,034,605 tons; 1960, 14,967,202 tons; 1961, 16,279,168 tons; 1962, 17,137,436 tons; and 1963, 18,456,838 tons. In the past ten years, the output of brown coal has nearly doubled, and further increases are expected in the future as electricity generation projects proceed.

8. **Value at the Mine in New South Wales.**—Particulars of the average values at the mine (or at screens or mine washeries where these are at a distance from the mine) of salable coal for each district and for New South Wales as a whole are shown in the following table for the years 1958 to 1962. Salable coal excludes miners' coal, coal consumed at the mines, and refuse, etc., removed by the use of hand-picking belts or at mine washeries. In calculating these values, most coal won by producer consumers is also excluded, and in respect of stocks of coal held at grass by the Commonwealth Government, only actual sales have been taken into account. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALABLE COAL:  
NEW SOUTH WALES**

(s. d.)

Year	Northern District	Southern District	Western District	Average for State
1958.. .. .	56 1	55 0	47 5	54 10
1959.. .. .	52 5	54 4	47 6	52 7
1960.. .. .	51 11	55 11	48 1	52 8
1961.. .. .	51 5	55 1	46 9	52 3
1962.. .. .	51 3	52 9	44 4	51 2

9. **Values in New South Wales, United Kingdom and the United States of America.**—The following table shows for the years 1958 to 1962 average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country, but they do not necessarily show the relative levels as between the countries concerned.

**PRODUCTION VALUES OF COAL PER TON: NEW SOUTH WALES, UNITED KINGDOM AND UNITED STATES OF AMERICA**

Country	1958	1959	1960	1961	1962
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
New South Wales—bituminous(a)	54 10	52 7	52 8	52 3	51 2
United Kingdom—deep-mined(b)	85 1	83 5	86 1	90 10	91 9
United States of America— bituminous and lignite(c)	\$ 4.86	\$ 4.77	\$ 4.69	\$ 4.58	\$ 4.48

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to salable coal and include excise duty. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

10. **Consumption of Coal in Australia.**—(i) *Black Coal.* Details of the production of black coal in Australia and its disposal are shown in the following table for the years 1958–59 to 1962–63.

**BLACK COAL: PRODUCTION AND CONSUMPTION**  
(’000 Tons)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63
Production(a) .. ..	20,459	21,223	22,947	24,427	24,301
Imports .. ..	8	8	7	5	8
<b>Total</b> .. ..	<b>20,467</b>	<b>21,231</b>	<b>22,954</b>	<b>24,432</b>	<b>24,309</b>

<b>Grand Total</b> .. ..	<b>20,467</b>	<b>21,231</b>	<b>22,954</b>	<b>24,432</b>	<b>24,309</b>

(a) Includes miners' and colliery coal. (b) Government railways only. (c) Figures refer only to New South Wales consumption by oversea, interstate and intrastate vessels. (d) Prior to 1959-60, figures refer only to New South Wales. Later figures include Tasmania. (e) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but has since declined as production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1962-63, exports of black coal were 2,676,522 tons and imports were 7,929 tons. These imports were of black coal only for special purposes.

(ii) *Brown Coal.* The table following shows the production and consumption of brown coal and the production of briquettes in Victoria for the years 1958-59 to 1962-63.

**BROWN COAL: PRODUCTION AND CONSUMPTION, VICTORIA**  
(’000 Tons)

Particulars	1958-59	1959-60	1960-61	1961-62	1962-63	
Production .. ..	12,243	14,101	15,723	16,729	17,766	
Consumption as fuel—						
Electricity generation .. ..	} 9,289	10,498	9,970	10,981	{ 11,333	
Briquette factory .. ..						535
Other factories .. ..						894
<b>Total</b> .. ..	1,293	1,248	951	860		
Consumption as raw material—						
Briquette manufacture .. ..	1,639	2,396	4,764	4,862	4,980	
Balance(a) .. ..	+22	-41	+38	+26	+24	
Briquettes manufactured .. ..	643	975	1,807	1,820	1,805	

(a) The sign (+) indicates that the balance shown is available for other consumption and accumulation of stocks; the sign (-) indicates a reduction in stocks.

The State Electricity Commission of Victoria produces brown coal briquettes at Yallourn and Morwell, both situated on the brown coal deposits in Gippsland. The former commenced commercial production of briquettes in 1925, and initial output of the Morwell plant was in 1960. Output of briquettes (Yallourn and Morwell combined) was 1,819,954 tons in 1961-62, and 1,805,347 tons in 1962-63.

In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened by the Gas and Fuel Corporation of Victoria. This plant operates on briquettes supplied by belt conveyor from the State Electricity Commission's Morwell works, and produces town gas which is sent to Melbourne through 103 miles of pipeline.

11. Exports.—The quantities and values of the oversea exports of Australian coal and of bunker coal for oversea vessels for the five years 1958-59 to 1962-63 are shown in the following table. These shipments were made mainly from New South Wales.

**COAL: OVERSEA EXPORTS AND BUNKER, AUSTRALIA**

Year	Oversea exports(a)		Bunker coal for oversea vessels	
	Quantity	Value	Quantity	Value
	Tons	£	Tons	£
1958-59 .. .. .	645,249	2,676,042	8,187	37,808
1959-60 .. .. .	1,087,844	4,326,810	8,117	25,380
1960-61 .. .. .	1,888,415	7,682,223	179	1,716
1961-62 .. .. .	3,469,552	13,611,122	37	410
1962-63 .. .. .	2,676,522	11,170,712	1,703	17,578

(a) Excludes bunker coal.

New South Wales, in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas. Of the total of 18,725,000 tons produced in 1962-63, 1,223,000 tons (6.5 per cent.) were exported interstate and 2,431,000 tons (13.0 per cent.) were exported overseas. The demand for bunker coal continues to decline, and in 1962-63 a total of 115,000 tons (0.6 per cent.) of New South Wales production was supplied for interstate, intrastate and oversea vessels.

12. Production in Principal Countries.—The following table shows the production of coal in the principal countries and estimated world totals in 1961 and 1962.

**COAL: PRODUCTION IN PRINCIPAL COUNTRIES**

(a) Includes lignite.  
Department Report, 1962.

(b) Included with black coal.

(c) Source: New Zealand Mines

13. **Coke and Other By-products from Coal.**—(i) *Coke.* The production of metallurgical coke in Australia during 1962–63 was 2,759,060 tons, compared with 2,716,894 tons during 1961–62.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1962–63 was 694,575 tons. To date, there has been no production of petroleum coke at Australian oil refineries.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1958–59 to 1962–63. The figures exclude output of coke breeze, which amounted to 456,719 tons in 1961–62 and 379,183 tons in 1962–63.

#### COKE PRODUCTION: AUSTRALIA

(Tons)

Industry	1958–59	1959–60	1960–61	1961–62	1962–63
Coke works .. ..	2,210,621	2,376,097	2,738,505	2,716,894	2,759,060
Gas works .. ..	815,464	758,668	764,626	761,355	694,575
<b>Total .. ..</b>	<b>3,026,085</b>	<b>3,134,765</b>	<b>3,503,131</b>	<b>3,478,249</b>	<b>3,453,635</b>

(ii) *Other By-products from Coal.* In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Some of the main items produced, principally in coke and gas works, during 1962–63 (1961–62 in parentheses) were: crude tar, 53,886,802 gallons (56,883,264 gallons); refined tar, 38,514,896 gallons (24,070,783 gallons); and ammonium sulphate, 93,675 tons (103,918 tons).

NOTE.—Figures shown in this paragraph may differ from corresponding figures in Chapter V. Manufacturing Industry because of revisions since that chapter was prepared.

### § 13. Oil Exploration in Australia

1. **Introduction.**—A comprehensive survey of developments in the search for oil up to the end of 1961 and early 1962 was presented on pages 1094–8 of Year Book No. 48 and continued into 1962 in Year Book No. 49, pages 1185–6. A summary of developments in 1963 is given below.

2. **Developments in 1963.**—The search for petroleum continued with increasing effort throughout 1963, following earlier successes achieved in Queensland. To the end of 1963, seventeen wells had been drilled in the Moonie field, two of which proved dry. Commercial production from this field commenced early in 1964 at a daily rate of 7,000–10,000 barrels of oil. The oil is transported 200 miles to Brisbane through a 10-inch pipeline which was completed in October, 1963.

No new oil fields have been discovered since Moonie, but several important oil and gas strikes were made in the Bowen–Surat Basin in Queensland. Three wells in the Bony Creek area and two in the Westgrove area were completed as gas wells, while in the Richmond area two wells produced light oil with gas on tests.

During 1963, combined private and government expenditure on petroleum exploration is estimated at about £23.5 million. Total expenditure to date on the search for, and development of, petroleum is of the order of £125 million. Information regarding government assistance in the search for oil is given in para. 3 (i) (d) on pp. 1133-4.

3. Footage Drilled in the Search for Oil.—The following table shows details of footage drilled in the search for oil in Australia, Papua and New Guinea during the years 1959 to 1963.

#### FOOTAGE DRILLED IN THE SEARCH FOR AND DEVELOPMENT OF PETROLEUM

(Source: Bureau of Mineral Resources(a))

(a) Based on figures obtained from State Departments of Mines and the Northern Territory Mines Branch.

### § 14. Sulphur

1. Mine Production.—There is no production of elemental sulphur (brimstone) in Australia. However, while sulphur is itself non-metallic, considerable quantities are contained in certain metallic minerals produced. Large quantities of the lead and zinc concentrates produced are exported, and the sulphur they contain is not available for utilization in Australia.

The following table shows the sulphur content of the metallic minerals produced during 1962 from which sulphur was subsequently recovered.

#### SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED, 1962

(Tons)

Mineral in which contained	N.S.W.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
Lead concentrate ..	57,848	..	..	(a) 62	2,817	(b) 60,727
Lead-copper concentrate ..	..	..	..	..	2,926	2,926
Pyrite concentrate ..	2,012	6,681	(a) 29,092	23,147	4,131	(b) 65,063
Zinc concentrate ..	136,933	(a) 20,470	..	..	26,684	(b) 184,087
<b>Total ..</b>	<b>196,793</b>	<b>(b) 27,151</b>	<b>(a) 29,092</b>	<b>(b) 23,209</b>	<b>36,558</b>	<b>(b) 312,803</b>

(a) Estimated.

(b) Partly estimated.

The principal producing centres during 1962 were as follows.

(i) *New South Wales.* All the sulphur produced was contained in lead and zinc concentrates produced at Broken Hill and in lead, zinc and pyrite concentrates produced at Captain's Flat.

(ii) *Queensland.* Sulphur is contained in the copper, lead and zinc concentrates milled at Mount Isa and in the copper and pyrite concentrates produced at Mount Morgan. Zinc concentrate produced at Mount Isa was exported.

(iii) *South Australia.* A pyrite concentrate containing sulphur was produced from ore mined at Nairne, 22 miles east of Adelaide.

(iv) *Western Australia.* Sulphur was recovered from pyrite concentrates produced at Norseman and at Kalgoorlie.

(v) *Tasmania.* A pyrite concentrate was produced at Mount Lyell after the separation of the copper sulphide mineral. Recoverable sulphur was contained also in lead, lead-copper and zinc concentrates milled at Rosebery, but only that contained in zinc concentrate was recovered in Australia.

The following table shows for the years 1958 to 1962 the sulphur content of minerals from which sulphur was recovered.

#### SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED

(Tons)

State	1958	1959	1960	1961	1962
New South Wales .. ..	197,736	188,892	204,358	194,659	196,793

<b>Australia(a) .. ..</b>	<b>322,619</b>	<b>310,545</b>	<b>340,000</b>	<b>324,866</b>	<b>312,803</b>

(a) Partly estimated.

(b) Estimated.

2. *Production of Sulphuric Acid.*—The principal use of sulphur is in the manufacture of sulphuric acid, which is produced in all States and in the Northern Territory. Most of this is used for fertilizer manufacture, although small quantities are used in the rubber and chemical industries and in the preparation of uranium concentrates. Sulphur contained in lead concentrate is used for acid manufacture at Port Pirie and sulphur in zinc concentrate is used at Risdon. In June, 1961, acid production from lead-zinc sinter gases commenced at Cockle Creek, near Newcastle, New South Wales. Pyrite concentrate is used as a source of sulphur for acid manufacture at Cockle Creek and at Port Kembla in New South Wales, and at Melbourne, Brisbane, Adelaide, Perth and Fremantle. However, about half the sulphuric acid produced in Australia is made from imported elemental sulphur. The next table shows, for the years 1959 to 1963, the Australian production of sulphuric acid and the quantity of sulphur in the acid produced from various sources.

## SULPHUR USED IN SULPHURIC ACID PRODUCTION: AUSTRALIA

(Tons)

Item	1959	1960	1961	1962	1963
Production of sulphuric acid (mono) .. .. .	1,000,458	1,109,751	1,137,501	1,229,256	1,315,562

(a) All imported.

## § 15. Non-metallic Minerals

1. **Asbestos.**—Production of asbestos has been confined mainly to crocidolite in Western Australia, principally at Wittenoom Gorge in the north-western part of the State. Deposits of chrysotile, located mainly at Nunyerry in Western Australia and at Baryulgil in New South Wales, are relatively small and widely scattered.

The production of chrysotile and crocidolite in Australia during the five years 1958 to 1962 is shown in the following table.

## PRODUCTION OF ASBESTOS

(Short tons of 2,000 lb.)

Year	Chrysotile			Crocidolite
	New South Wales	Western Australia	Australia	Australia(a)
1958 .. .. .	712	1,543	2,255	13,313
1959 .. .. .	726	707	1,433	16,442
1960 .. .. .	1,072	69	1,141	14,472
1961 .. .. .	794	175	969	15,777
1962 .. .. .	866	59	925	17,491

(a) Wholly produced in Western Australia.

2. **Clays.**—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In addition, the statistics are incomplete, as some clays are outside the normal administrative control of some State Mines Departments. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1962.

## PRODUCTION OF CLAYS, 1962

(Tons)

Other clays ..	4,181	..	n.a.	..	n.a.	25,242	(a) 29,423

(a) Incomplete, see para. 1. Sources and Scope of Statistics, p. 1136.

3. Gypsum.—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) in the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of St. Vincent Gulf and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important, and more than half the total Australian production of gypsum in 1962 came from that State, where the main centres of production are Kangaroo Island, Stenhouse Bay and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia. The greatest part is used in the manufacture of plaster and most of the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry. Substantial quantities of gypsum are also exported to Japan, Malaya and the Philippines.

The production of gypsum in Australia is set out in the following table for the five years 1958 to 1962.

## PRODUCTION OF GYPSUM

(Tons)

Year	New South Wales	Victoria	South Australia	Western Australia	Australia
1958 .. ..	90,664	72,010	306,749	35,515	504,938
1959 .. ..	101,143	81,101	296,816	37,731	516,791
1960 .. ..	95,514	100,386	340,762	44,216	580,878
1961 .. ..	97,250	80,223	387,289	45,145	609,907
1962 .. ..	71,802	78,728	428,730	51,650	630,910

4. **Limestone.**—Limestone is quarried in all States, being used mainly for the manufacture of cement. Other uses are in the steel industry as a metallurgical flux, in the chemical industry and in agriculture.

The recorded statistics of limestone production in each State of Australia are shown in the following table. Details of limestone produced for use as building or road material are not included.

**PRODUCTION OF LIMESTONE(a)**  
(’000 Tons)

Year	N.S.W.	Vic.	Q’land	S.A.	W.A.	Tas.	Aust.
1958 .. ..	2,061	859	(b)	1,220	(b)	235	5,324
1959 .. ..	2,056	1,120	(b)	1,017	(b)	230	5,305
1960 .. ..	2,400	1,157	(b)	1,064	(b)	215	5,669
1961 .. ..	2,576	1,243	(b)	1,105	(b)	204	6,146
1962 .. ..	2,432	1,214	(b)	1,400	(b)	319	6,415

(a) Includes shell and coral. (b) Not available for publication, included in total for Australia.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield, Thuddungra and Lake Cargelligo in central New South Wales, and at Ravensthorpe in Western Australia. Most of the output of magnesite in Australia is used for refractory purposes, mainly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1958 to 1962 are set out in the table below.

**PRODUCTION OF MAGNESITE**  
(Tons)

Year	New South Wales	Queensland	South Australia	Western Australia	Australia
1958 .. ..	69,030	20	341	..	69,391
1959 .. ..	59,777	..	790	19	60,586
1960 .. ..	61,668	..	498	..	62,166
1961 .. ..	88,511	..	659	9,625	98,795
1962 .. ..	61,672	..	295	224	62,191

6. **Salt.**—Salt is obtained in Australia from solar evaporation pans and dry salt lakes. Production satisfies local requirements and provides a considerable surplus for export, mainly to Japan. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1958 to 1962. Estimates of total Australian production are also shown.

**SALT PRODUCTION**  
(’000 Tons)

Particulars	1958	1959	1960	1961	1962
South Australia .. ..	336	358	359	387	390
Estimated Australian total ..	430	468	463	509	536

7. **Other Non-metallic Minerals.**—(i) *General.* Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite.* The principal centre producing first-grade barite is at Orparinna in the North Flinders Range in South Australia. The production of barite in Australia during 1962 was 12,534 tons, of which 11,605 tons came from South Australia, 494 tons from Western Australia and 435 tons from New South Wales.

(iii) *Diatomite.* Production of diatomite is carried on mainly in the eastern States of Australia. In 1962, 7,312 tons were produced, of which New South Wales produced 4,318 tons, mainly at Coonabarabran and Barraba. The remaining 2,994 tons were produced in Queensland (2,209 tons), Victoria (770 tons) and Western Australia (15 tons).

(iv) *Dolomite.* In 1962, South Australia continued to supply the bulk of the requirements of the iron and steel industry from quarries at Ardrossan. During the year, production in the various States was South Australia, 169,853 tons; New South Wales, 4,919 tons; Queensland, 3,708 tons; and Tasmania, 2,217 tons; making an Australian total of 180,697 tons.

(v) *Felspar.* The main demand for felspar comes from the glass and ceramic industries. Most of the Australian production of felspar comes from New South Wales, which produced 5,925 tons of the Australian total of 8,513 tons in 1962. Of the remainder, 1,321 tons came from South Australia and 1,267 tons from Western Australia.

(vi) *Gemstones.* (a) *Opals.* Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia, which produced opals worth £949,000 in 1962. Other production in 1962 was from Lightning Ridge in New South Wales, valued at £100,000.

(b) *Sapphires.* In 1962, sapphires produced in the Glen Innes and Inverell Districts of New South Wales were valued at £31,000 and production from the Anakie field in Central Queensland was valued at £5,000.

(vii) *Phosphate Rock.* During 1962, 4,385 tons of phosphate rock were produced, of which 4,317 tons came from South Australia and the remaining 68 tons from Western Australia. Phosphate deposits at Rum Jungle were tested by the Bureau of Mineral Resources in 1962. Further testing is required but present indications are that the phosphate rock is not likely to be suitable for the production of superphosphate. A programme to test phosphate deposits in the Amadeus Basin, west of Alice Springs, is planned for 1963.

(viii) *Silica.* The production of silica is not recorded in Victoria and production recorded in all other States may not be complete. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, but does not include production for use as building or road material, was 158,619 tons in New South Wales; 25,614 tons in Queensland; 23,446 tons in South Australia; 10,351 tons in Western Australia; and 514 tons in Tasmania; making a total of 218,544 tons recorded for those States during 1962.

(ix) *Sillimanite.* In 1962, 2,637 tons of sillimanite were produced in Australia, 1,359 tons of which came from South Australia and 1,278 tons from New South Wales.

(x) *Talc.* The Australian output of talc (including steatite) was 14,060 tons in 1962. South Australia produced 8,008 tons, Western Australia 4,981 tons, and New South Wales 1,071 tons.

(xi) *Other.* Other non-metallic minerals produced in Australia in small quantities during 1962 were garnet concentrate, foundry loam, lithium ores, mineral pigments, pebbles for grinding, perlite, pyrophyllite, rhodonite and serpentine.

## § 16. Value of Production

1. **Local Value of Mining and Quarrying Production, 1962.**—The following table shows particulars of the local value of production for individual mining industry groups and quarrying for the year 1962. It should be stressed that these statistics are on an industry basis and not by product. For particulars of the method of compiling these industry statistics, see para. 2 (j), pages 1136-7. A more detailed reference to the value of production of mining and quarrying and other industries together with a brief explanation of terms used will be found in Chapter XXX. Miscellaneous.

## MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION(a), 1962

NOTE.—For footnotes see next page.

LOCAL VALUE OF MINERALS PRODUCED: AUSTRALIA—*continued*  
(£'000)

Mineral	1958	1959	1960	1961	1962
<b>CONSTRUCTION MATERIALS(c)</b>					
Total, Construction Materials .. ..	18,497	21,597	24,541	(d) 27,771	(d) 27,927
<b>TOTAL</b>					
Total, All Minerals and Construction Materials(e) .. ..	155,955	164,985	181,240	180,151	187,569

(a) Includes the value of iron oxide for fluxing. (b) Excludes Australian Capital Territory, details of which are included with construction materials. (c) Incomplete owing to difficulties of coverage. See para. 1. Sources and Scope of Statistics, p. 1136. (d) Not comparable with years prior to 1961 owing to extension of coverage in Victoria.

NOTE.—Particulars of the value of uranium concentrate produced are not available for publication and have been excluded from the table above.

Owing to the necessity of classifying individual mines according to the principal mineral produced, the values in the table on page 1184 for mining industry groups differ slightly in some cases from totals of the corresponding groups of mine products shown in the table above.

## § 17. Oversea Trade in Minerals and Mineral Products

Particulars of the quantity and value (£A. f.o.b. port of shipment) of the principal mineral and mineral product items imported into and exported from Australia during the years 1960 to 1962 are shown in the following table.

IMPORTS AND EXPORTS OF PRINCIPAL MINERALS AND MINERAL PRODUCTS:  
AUSTRALIA

Item	Quantity			Value (£A.'000 f.o.b.)		
	1960	1961	1962	1960	1961	1962

(a) Includes lead-copper concentrate.

## CHAPTER XXVII

## DEFENCE

## § 1. Department of Defence

1. **Functions and Organization.**—(i) *Functions.* The functions of the Department of Defence include:—defence policy; joint Service matters and matters having an inter-departmental defence aspect; the financial requirements of defence policy and the allocation of the funds made available; the supply aspect of defence policy including the review of production programmes and capacity; important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organization and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

(ii) *Organization, higher Defence machinery and the control of the joint Service machinery.* The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on—the defence policy as a whole and the co-ordination of military, strategic, economic, financial and external affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The Chiefs of Staff Committee meets regularly for the discussion of technical military matters on a joint service basis, and is responsible in peace for the preparation of military appreciations and plans. The functions of the Defence Administration Committee are the regular review of the progress of the Defence Programme, the co-ordination or integration of Service activities where appropriate in the interests of improved efficiency and economy, and the improvement of methods and organization. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

In addition, the Defence Business Board furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

2. **Basis of Current Defence Policy.**—The basic aim of Australia's defence policy is to ensure the security of this country and of its island territories. This aim is pursued through a series of defence programmes which are designed to give progressive effect to the objectives of policy approved by the Government, and are capable of adjustment to meet the requirements of the strategic situation as it may change from time to time. Because of the increased strength which comes from mutual security, Australia participates in a policy of collective defence in south-east Asia, which is the area of primary defence interest to Australia. The collective security arrangements in which Australia participates are—SEATO, ANZUS and British Commonwealth arrangements for defence co-operation (*see also* Chapter XXIX. International Relations).

General or global war as a deliberate act of policy is considered unlikely, and the main aim of Australia's defence preparations is the continual improvement of the capability of its forces to make a prompt and effective contribution to any allied effort required in a limited war or insurgency situation in south-east Asia, while at the same time having a capacity for independent action to meet the initial shock of an emergency. Should the situation change and Australia itself be directly threatened, our collective defence arrangements would be of great importance in maintaining the security of Australia and its territories.

**3. The Defence Programme.—(i) Objectives.** The defence programme must be maintained at a level that will enable Australia to meet its regional and home defence responsibilities. In the present strategic circumstances, emphasis is placed on progressively increasing our military capacity and preparedness by having both regular and citizen forces more readily available, and improving their means of strategic and tactical mobility. The forces are being extensively re-equipped with modern conventional weapons which are standard or compatible, as far as possible, with those used by United States forces with whom Australia is associated in defence arrangements.

The naval programme provides for the continuing modernization and development of the Royal Australian Navy into a well-balanced operational fleet with emphasis on anti-submarine capability. Three guided missile destroyers of the United States *Charles F. Adams* class are being obtained, the first two of which are scheduled for delivery in 1965 and the third in 1967. Four *Oberon* class submarines are being purchased to replace the submarines which have been maintained on the Australia station for some years by arrangement with the Royal Navy. The carrier H.M.A.S. *Melbourne* is now equipped with both Westland Wessex anti-submarine helicopters and Gannet and Sea Venom fixed wing aircraft. The two latter aircraft are expected to reach the end of their service life in about 1967. Four Type 12 anti-submarine frigates are in commission. One is already fitted with the Seacat close range anti-aircraft missile system and the others will also be fitted with it. The Australian anti-submarine missile *Ikara* will be added to the armament of the guided missile destroyers and the frigates. The R.A.N. also has in commission three *Daring* class destroyers, including one on loan from the United Kingdom, one *Battle* class destroyer, a fast transport, H.M.A.S. *Sydney*, a fast fleet replenishment tanker, H.M.A.S. *Supply*, six "Ton" class minesweepers, a recently built survey ship, and auxiliary vessels. There are also several ships in reserve. A 15,000-ton escort maintenance ship is under construction in Australia. The present target strength of the R.A.N. is over 14,000.

The Army is increasing the strength of the Regular operational force and of the Citizen Military Forces which are available for service anywhere. Regular Army strength is being increased to 28,000, including a third battle group which is being raised, and the target strength of the Citizen Military Forces has been increased to 35,000. The Pacific Island Regiment in Papua-New Guinea is being doubled in strength to 1,400 and further development is under consideration. The combat elements of the Army are based on the pentropic divisional organization. The approved objective is to provide material and reserves needed by the Regular and Citizen components of a complete pentropic division of five battle groups with appropriate support and logistic units. The tactical flexibility and mobility of the field force are being greatly improved by the acquisition of landing ships, amphibious and other vehicles, by light aircraft and helicopters for the Army light aircraft squadron, and also by utility helicopters and short take-off and landing fixed-wing aircraft in the R.A.A.F. programme.

The operational units of the Royal Australian Air Force comprise three bomber squadrons, four fighter squadrons, two maritime reconnaissance squadrons, three transport squadrons, one surface-to-air-missile squadron, one utility helicopter squadron and three control and reporting radar units. The fighter squadrons are to be re-equipped with the supersonic *Mirage III-O* jet fighter, of which 100 have been ordered. The airframes and engines are being manufactured to a substantial extent in Australia and deliveries have commenced. Deliveries are also being made of eighteen *Caribou* Mark I short take-off and landing aircraft and of additional *Iroquois* utility helicopters. Two radar units are being re-equipped. Approval has been given for the purchase of two squadrons of *F-111A* strike-reconnaissance aircraft to replace the *Canberra* and delivery is scheduled to commence in 1967. An additional airfield is being developed at *Tindal* in the Northern Territory. The present target strength of the Air Force is over 18,000.

In the field of research and development, Australia is making its principal contribution through the *Long Range Weapons* Project which is a joint effort with the United Kingdom. Australia also participates in the *European Launcher Development Organization* and is associated with the United States in many space and defence projects. The Australian executive authority in these matters is the *Department of Supply*.

(ii) *Financial.* Details of defence expenditure for 1962-63, and the allocation of the Defence Vote for 1963-64 are set out in the following table.

**DEFENCE EXPENDITURE**  
(£'000)

Service or Department	Maintenance, aid pro- grammes, etc.	Capital material requirements, machinery, plant and equipment	Capital buildings, works and acquisition of sites	Total expenditure
<b>DEFENCE EXPENDITURE, 1962-63</b>

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st March, 1964, are shown in the following table.

**PERSONNEL STRENGTHS: SERVICES, MARCH, 1964**

Category	Navy	Army	Air Force	Total
Permanent Forces .. .. .	12,317	23,492	16,387	52,279
Citizen Forces .. .. .	5,398	27,296	828	33,439
<b>Total Forces .. .. .</b>	<b>17,715</b>	<b>50,788</b>	<b>17,215</b>	<b>85,718</b>

4. *Australian Forces Serving Overseas.*—Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya since it was first established in 1955. The strength of the Australian component normally serving with the Reserve is as follows:—Navy—two destroyers or frigates, with an annual visit by an aircraft carrier; Army—one infantry battalion and supporting units; Air Force—one light bomber squadron, two fighter squadrons and supporting units. At the request of the Federation of Malaysia, the Strategic Reserve continues to be stationed in Malaya to assist in border security operations against the communist terrorists.

The Malaysian Government has recently requested the Australian Government, and it has agreed, to provide additional forces to the Strategic Reserve to assist Malaysian and British forces in the defence of the Federation's territorial integrity and political independence. Australian forces will provide assistance in countering the threat of seaborne infiltration of

insurgents along the coasts of Sarawak and Sabah, for engineering construction in the Borneo States, for helicopter support of the security operations against terrorists along the northern border of Malaya and some air transport and anti-aircraft defence support.

In pursuance of its obligations under the SEATO Treaty, Australia has also deployed to Thailand, at the invitation of the Government of Thailand, a contingent of Sabre fighter aircraft, and a party of Army engineers is also assisting in the construction of an airfield for medium range transport aircraft at Mukdahan. A small number of Army instructors has also been provided, at the invitation of the Government of South Vietnam, to assist that country in training for jungle warfare, village defence and other related activities.

## § 2. Naval Defence

1. **General.**—Prior to 1901, naval defence systems were organized under the State Governments. Information regarding these systems is given in Year Book No. 2, page 1084. An outline of the development of Australian Naval policy is given in Year Books No. 3, page 1060, and No. 12, page 1012. An account of the building of the Australian Navy, its cost, the compact with the Imperial Government, and other details appears in Year Book No. 15, pages 921–3. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Year Book No. 36, pages 1023–7.

Under the provisions of the Commonwealth of Australia Constitution Act, the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act* 1910–1952, the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members, and the Secretary, Department of the Navy.

Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty, and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London, and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers.

A liaison staff is also maintained by the Royal Australian Navy in Washington and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

The defined limits of the Australia Station are as follows.

*Eastern*—from 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south along this meridian.

*Northern*—from 3° 30' North, 169° East, west to 125° East, thence south to the coast of Celebes, thence west along the coast of Celebes to 120° East, thence south along this meridian to 10° South, thence west to 78° East.

*Western*—from 10° South, 78° East, south along this meridian.

2. **Ships of the Royal Australian Navy.**—The following ships were in commission or in reserve in March, 1964.

In commission:—*Melbourne*—aircraft carrier; *Sydney*—fast troop transport; *Supply*—fast fleet replenishment tanker; *Anzac*, *Vampire* and *Vendetta*—destroyers; *Stuart*, *Parramatta*, *Quiberon*, *Yarra*, *Diamantina* (training) and *Gascoyne* (training)—frigates; *Kimbla* (trials)—boom defence vessel; *Hawk*, *Gull*, *Ibis*, *Teal*, *Curlew* and *Snipe*—minesweepers; *Bass* and *Banks*—general purpose vessels; *Paluma* and *Moresby*—survey vessels.

In reserve:—*Arunta* and *Tobruk*—destroyers; *Culgoa*, *Queenborough*, *Quickmatch*, *Barcoo* and *Swan*—frigates; *Kangaroo*, *Karangi*, *Kookaburra* and *Koala*—boom working vessels; *Sprightly*—fleet tug.

Under dockyard control:—*Derwent*—frigate (completing).

3. **Ships' Service Outside Australian Waters.**—During the year ended March, 1964, H.M.A. Ships *Melbourne*, *Supply*, *Vampire*, *Vendetta*, *Voyager*, *Yarra*, *Parramatta* and *Quiberon* served on the Far East Station as units of the Commonwealth Strategic Reserve with headquarters at Singapore. H.M.A. Ships *Diamantina*, *Gascoyne*, *Hawk*, *Gull*, *Ibis*, *Teal*, *Curlew* and *Snipe* also made visits beyond the limits of the Australia Station.

4. **Personnel.**—The authorized establishment strength of the Royal Australian Navy for 1963–64 is 14,300 comprising 1,539 officers and 12,761 ratings. In March, 1964, the actual strength of the permanent Naval Forces was 1,218 officers and 10,385 ratings. One hundred and twenty-six cadet midshipmen, including 31 not on pay, were undergoing training at the Royal Australian Naval College. Sixteen officers and 487 ratings were serving in the Women's Royal Australian Naval Service. Eighty-five native ratings were serving in the Papua and New Guinea Division of the Royal Australian Navy. Reserve strength in March, 1964, comprised 963 officers and 4,435 ratings, of whom 53 officers and 36 ratings were serving full-time.

The established personnel strength of the W.R.A.N.S. is 17 officers and 500 ratings. They serve in the shore establishments in the following categories: radio-operators, regulating, writers, stores assistants, sick berth attendants, motor transport drivers, Wrans (radar plot), cooks and stewards.

Members of the Royal Australian Naval Reserve are the drilling reserve of the Citizen Naval Forces. They carry out weekly training and 13 days' annual continuous training. Officers are commissioned and may serve until retiring age is reached. Ratings engage for periods of three years. Other branches of the Citizen Naval Forces are the R.A.N. Emergency List, Royal Australian Fleet Reserve and Royal Australian Naval Volunteer Reserve. These are a non-drilling reserve, but members may volunteer for periods of annual continuous training. Pay for members of Reserve Forces is approximately that paid to members of the Permanent Naval Forces. Special courses and service for long periods are available to all selected Reservists.

The Papua and New Guinea Division of the Royal Australian Navy was inaugurated in 1951. It is based at H.M.A.S. *Tarangau*, Manus Island, and consists of indigenous ratings from all districts of Papua and New Guinea.

5. **Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy is maintaining two front line squadrons embarked in the operational carrier H.M.A.S. *Melbourne*. This ship is fitted with an angled deck, steam catapult and mirror deck-landing sights. Training and support squadrons for H.M.A.S. *Melbourne's* Sea Venom jet all-weather fighter and ground attack aircraft and Gannet turbo-prop anti-submarine aircraft are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales. Westland Wessex anti-submarine helicopters have been introduced into the Fleet Air Arm and are embarked in H.M.A.S. *Melbourne*. Training and support squadrons for the helicopters will also be based at the Naval Air Station.

6. **Ship Construction and Repair.**—There are two naval dockyards, at Garden Island, New South Wales, and at Williamstown, Victoria. Also the dockyard at Cockatoo Island which is operated by the Cockatoo Docks and Engineering Company Pty. Ltd., by agreement with the Commonwealth, carries out considerable naval work.

Two anti-submarine frigates have recently been completed, one at Cockatoo Island which commissioned in June, 1963, and the other at Williamstown which commissioned in April, 1964. All three dockyards are also engaged on ship refitting work for the Navy.

A new survey vessel, carrying special modern equipment including a helicopter, was built at the State Dockyard, Newcastle, New South Wales and commissioned in March, 1964.

Included in the present ship construction plan is the building of a 15,000 ton escort maintenance ship at Cockatoo Island. Four submarines of the *Oberon* class are being obtained in the United Kingdom. Of these, the first two are under construction, and tenders have been called for the remainder. In the United States, two *Charles F. Adams* class destroyers are being built for the Royal Australian Navy at the DeFoe Ship Building Yard and the construction of a third is to commence in 1964.

7. **Naval College.**—The Royal Australian Naval College, transferred in 1930 from Jervis Bay, A.C.T., to Flinders Naval Depot, was re-established at Jervis Bay in January, 1958, and was commissioned as H.M.A.S. *Creswell*.

8. **Training Establishments.**—H.M.A.S. *Cerberus* at Crib Point, Westernport, Victoria, is the basic training establishment for adult ratings in the permanent forces, while several advanced training schools are established in Sydney, New South Wales.

H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruits training establishment for the permanent forces. A large proportion of instructional hours is devoted to school subjects, and the remaining instructional time is basic naval training and disciplinary training, so that on completion of training ratings will be ready to undergo technical and specialist courses.

H.M.A.S. *Nirimba*, at Quakers Hill, New South Wales, is the Apprentice Training Establishment which provides secondary education as well as training in trades in which the lads will be employed during their service in the Royal Australian Navy.

### § 3. Military Defence

1. **General.**—(i) *State Systems.* A detailed historical account of the Australian defence forces prior to federation appears in Year Book No. 2, pages 1075–80. *See also* Year Book No. 12, page 999.

The strength of the military forces of the States at 31st December, 1900 (the eve of federation), exclusive of cadets, reservists, and rifle club members, was—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353.

(ii) *Commonwealth Systems.* Under the terms of the Commonwealth of Australia Constitution Act, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organization of Commands after the 1939–45 War, *see* Year Book No. 46 and earlier issues.

Members of the Commonwealth Military Forces have taken part in the following campaigns:—the South African War, 1902; the First World War, 1914–1918; the Second World War, 1939–1945; Korea, 1950–1954; Malaya, 1955–1960.

In 1960, a complete re-organization of the Australian Military Forces was undertaken. The re-organization involved the reshaping of the Army by:—the adoption of a pentropic divisional organization; increasing the Regular Field Force; reducing the command, training and administrative structure; and converting the Citizen Military Forces to a wholly volunteer force and eliminating national service training which was introduced in 1951 and suspended in 1959–60.

2. **Organization.**—Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939–45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the mainland capital cities of Australia. The geographic extent of Commands is as follows.

*Northern Command*—the State of Queensland, a small part of northern New South Wales, and the Territory of Papua and New Guinea.

*Eastern Command*—the State of New South Wales, less those parts included in Northern, Southern, and Central Commands.

*Southern Command*—the State of Victoria, the State of Tasmania, and part of southern New South Wales.

*Central Command*—the State of South Australia, plus a portion of south-western New South Wales.

*Western Command*—the State of Western Australia.

*Northern Territory Command*—the Northern Territory.

The basic formation in the re-organized Army is the pentropic division, which is designed to have improved tactical capabilities with increased mobility and flexibility under conditions of tropical warfare. The pentropic division consists of five battle groups, each under the direct command of the divisional headquarters. Each battle group has, as its basic component, an infantry battalion of larger size and greatly increased fire-power compared with the infantry battalion which existed prior to the re-organization. In addition to the strengthened infantry battalion, each battle group includes supporting elements such as armour, artillery, engineers, signals, etc.

The general structure of the Army is divided between Field Forces and the Australian Support Area organization (home defence, training and command, and administrative units). The main field force components are as follows.

- (a) In Australia, two Regular Army battle groups with a third in the process of being raised, and eight Citizen Military Forces battle groups. In addition, there are combat support and communication zone supporting units. Two pentropic division headquarters, one Regular Army/Citizen Military Force and one Citizen Military Force, enable grouping of battle groups as pentropic divisions.
- (b) A restricted Regular Army battalion in Malaysia as a part of the British Commonwealth Far East Strategic Reserve.
- (c) A Regular Army anti-aircraft battery and an engineer construction group in Malaysia at the request of the Malaysian Government.

Regular Army Forces in Papua-New Guinea consist of a battalion of the Pacific Islands Regiment with a number of small supporting units. Action is being taken to raise a second battalion.

3. **Strength of the Australian Military Forces.**—The effective strength at 31st March, 1964, was—Australian Regular Army (including 815 Pacific Islanders and 760 Women's Services), 23,492; Citizen Military Forces, 27,296.

4. **Military Training Systems.**—(i) *The Staff College.* Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. From 1965 the course will be held annually and will be of twelve months duration. The normal intake is 50 students, and, on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for appointments in all branches of the staff in peace and war, and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1965 course will be students from the United Kingdom, Canada, New Zealand, India, Pakistan, Ceylon, United States of America, Thailand, Malaysia and the Philippines. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is also provided by New Zealand.

(ii) *The Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The length of the normal course is four years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organized into military and civil departments, and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces.

(iii) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, and civilians between the ages of 18 and 23 years are eligible to apply for entrance. A special entry provides for candidates up to 25 years. The course is of 44 weeks' duration, and, on graduation, cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted, before being posted to regimental duties.

(iv) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(v) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(vi) *Other Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established:—Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Centre, School of Military Survey, School of Signals, Infantry Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps School, Royal Australian Electrical and Mechanical Engineers' Training Centre, School of Music, and Air Support Unit (Army Component).

5. *Women's Services.*—In July, 1950, approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment into the Royal Australian Army Nursing Service commenced in November, 1950, and into the Australian Women's Army Corps early in 1951. In February, 1951, the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June, 1951, the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command.

6. *The Australian Cadet Corps.*—The Australian Cadet Corps is a voluntary organization. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, however, does not form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units.

The establishment of the Corps is 39,000 all ranks, and at 25th March, 1964, comprised 315 School Cadet units with a posted strength of 38,294, all ranks.

#### § 4. Air Defence

1. **General.**—A statement regarding the preliminary steps taken in connexion with the development of air defence appears in Year Book No. 18, page 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War in Year Book No. 36, page 1027.

2. **Administration and Organization.**—(i) *General.* The Air Board is responsible, subject to approved policy, for the control, organization and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Technical Services, Air Member for Personnel, Air Member for Supply and Equipment, and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is in Canberra. A R.A.A.F. representative is located in London, and Air Attachés are located in Paris and Washington.

(ii) *Commands.* The units of the Royal Australian Air Force are organized into the following two functional Commands throughout Australia and its Territories.

*Operational Command*—responsible for the command of operational units and the conduct of their operations within Australia and its territories.

*Support Command*—responsible for the command of training units, supply and servicing units; recruitment and individual training in the R.A.A.F.; and supply and servicing, including technical servicing of the R.A.A.F. in Australia.

(iii) *Formations and Units.* The organization of the Royal Australian Air Force includes the following types of formations and units.

*Formations*—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

*Flying Squadrons*—bomber, fighter, transport, helicopter and maritime reconnaissance squadrons which undertake the operational and, in conjunction with operational conversion units, the operational training flying commitments of the R.A.A.F.

*Operational Conversion Units*—specializing in operational conversion training of aircrew for the bomber and fighter squadrons.

*Aircraft Depots*—specializing in major overhauls, etc., of aircraft and equipment and relieving flying unit ground staff of these commitments.

*Stores Depots*—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

*Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units*—specializing in the aircrew and ground staff training required by the R.A.A.F.

*Airfield Construction Squadrons*—specializing in the construction of R.A.A.F. aerodromes and associated buildings and works services.

*Royal Australian Air Force Academy*—the training college for officer cadet entrants to the R.A.A.F.

*Telecommunications Units*—responsible for the communications services of the R.A.A.F.

*R.A.A.F. Staff College*—trains specially selected R.A.A.F. officers for higher staff and command posts.

3. **Aircraft.**—The aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Canberra; fighter squadrons—Avon Sabre (the R.A.A.F. is currently re-equipping with Mirage III fighters); transport squadrons—Dakota, Hercules and Metropolitan (the R.A.A.F. is currently acquiring a squadron of Caribou aircraft); maritime reconnaissance squadrons—Neptune; utility helicopter squadron—Iroquois helicopters; training—Avon Sabre, Canberra, Dakota, Meteor, Vampire and Winjeel.

4. **Personnel.**—The Royal Australian Air Force comprises an operational element and a support element. At 1st April, 1964, establishment posts totalling 17,283 had been authorized. On the same date, the enlisted strength of the Royal Australian Air Force was as follows: Permanent Air Force, 16,387; Citizen Air Force, 828; and General Reserve, 16,731. The preceding figures include the Women's Royal Australian Air Force which was separately established at 854 posts on 1st April, 1964, and had reached an enlisted strength of 784 members by that date.

### § 5. Department of Supply

1. **General.**—On 17th March, 1950, the Department of Supply was created to take over the functions of the former Department of Supply and Development, except those relating to the Bureau of Mineral Resources, Geology and Geophysics, which were transferred to the Department of National Development on that date. The Department of Supply and Development had been formed in April, 1948, to take over the munitions and aircraft activities of the Department of Munitions and the supply activities of the Department of Supply and Shipping. To these were added the design and inspection activities of the Department of the Army in February, 1950.

On 11th May, 1951, the munitions and aircraft production and the defence production planning activities of the Department were transferred to a newly created Department of Defence Production. The Department of Supply continued to exercise the remaining functions except shipbuilding, which was transferred to the Department of Shipping and Transport. In April, 1953, the control of materials used in producing atomic energy was vested in a newly created Australian Atomic Energy Commission, which was administered by the Minister for Supply until October, 1956, when it became the responsibility of the Minister for National Development. In March, 1958, responsibility for the production of aluminium was transferred to the Department of National Development. The Australian Aluminium Production Commission, the executive body appointed to carry out this function, became responsible to the Minister for National Development as from that date.

On 24th April, 1958, the Department of Defence Production was abolished, and the functions of that Department were re-transferred to the Department of Supply. References to those functions and to the activities of the various branches and establishments of the former Department of Defence Production are contained in Year Book No. 44, pages 1059–61. On 11th March, 1959, the design and inspection functions were re-transferred to the Department of the Army.

On 18th December, 1959, the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration. On 29th March, 1962, Australia became a foundation member of the European Launcher Development Organisation, and the Department accepted responsibility for the test firing of the launching rocket for that Organisation's communications satellite, using the facilities of the Woomera Rocket Range.

2. **Functions of the Department.**—The functions of the Department of Supply include the following.

Defence research and development, including the operation of the Joint United Kingdom—Australia Weapons Research Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments.

Manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware and other defence goods.

Operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration.

Test firing of the launching rocket for the European Launcher Development Organisation's communications satellite, using the facilities of the Woomera Rocket Range.

- Acquisition, maintenance and disposal of strategic materials.
- Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.
- Investigation and development of Australian sources of supply in connexion with defence.
- Sale or disposal of surplus Commonwealth property other than land or buildings.
- Provision of Commonwealth transport facilities outside the Australian Capital Territory and the Northern Territory.
- Provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required.
- Provision of security services within the Department.
- Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions and other defence goods.

3. *Act Administered.*—The Minister for Supply administers the *Supply and Development Act 1939–1948*, except insofar as it concerns the building (*see also* Chapter XV., p. 554, of this volume), repair and maintenance of merchant ships and the building, extension, alteration, repair and maintenance of shipyards, drydocking and repair facilities for merchant ships.

4. *Research and Development Branch.*—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom—Australia Weapons Research Project. The Chief Scientist is also the Chairman of the Joint Project Board, which is responsible for the administration of the Joint Project undertaking. The headquarters of the Branch is situated in Melbourne, and the following establishments are included in the Branch:—(a) Weapons Research Establishment, Salisbury, South Australia; (b) Defence Standards Laboratories, Maribyrnong, Victoria, Finsbury, South Australia, and Alexandria, New South Wales; (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This establishment, which occupies an area of about six square miles, includes Edinburgh Airfield, where accommodation is provided for a unit of the R.A.A.F., which carries out the experimental and other flying required. Extensive facilities have been provided for branches of British firms which have contracted with the British Ministry of Aviation to develop weapons systems or components.

The Establishment has four main sections, namely the Trials Wing, the Space Physics Wing, the Weapons Research and Development Wing and the Engineering Wing. The Trials Wing is concerned with the operation, development and instrumentation of the Woomera Range, also the planning, execution and assessment of trials. The Space Physics Wing undertakes the operation of United States satellite and space tracking stations throughout Australia and conducts research and development in support of the Range, including investigations into the characteristics of the upper atmosphere using sounding rockets. The Weapons Research and Development Wing is concerned primarily with Australian-initiated defence research, but assistance is also given with some phases of the Joint Project programme. The Engineering Wing provides the design and manufacturing effort required to support the work of the Establishment and the Range.

Testing ranges have been established at Woomera, which is approximately 280 miles north-west of Adelaide. A township, together with modern amenities such as hospital, school, kindergarten, community store, swimming pool and all sporting facilities, has been built at Woomera to accommodate the range and allied service personnel and their families. The population is approximately 4,500.

(iii) *European Launcher Development Organisation (ELDO).* By virtue of the major facilities at Woomera for launching space vehicles, Australia has become a member of ELDO, which has been established with the object of developing a launching vehicle for placing satellites in orbit for peaceful purposes. Other members of ELDO are Britain, Belgium, the Federal Republic of Germany, France, Italy and the Netherlands.

(iv) *United States Space Projects.* Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia, for scientific purposes, of facilities for space vehicle tracking and data recording. Space tracking, telemetry and command stations have been established

at Island Lagoon, near Woomera, and at Carnarvon, Western Australia, while other stations are in course of construction near Canberra, at Tiddinbilla and Orroral Valley. A small mobile station is also being set up at Darwin. All these are an integral part of the world-wide network of tracking and data recording stations being established by the United States National Aeronautics and Space Administration to support its programme for manned space vehicles, scientific satellites and deep space probes.

(v) *Defence Standards Laboratories.* The broad function of these Laboratories is to provide a scientific service to the Armed Services, Civilian Defence and the factories, branches and establishments of the Department of Supply. It also provides trained groups in specialist fields for which there is no counterpart elsewhere in Australia. This service covers problems arising in the provision and use of defence *matériel* and is given generally within the fields of chemistry, physics, metallurgy and engineering and, to a limited extent, in those of bio-chemistry and physiology.

(vi) *Aeronautical Research Laboratories.* The work of these Laboratories lies in the fields of: (a) aeronautics; (b) guided missiles; and (c) branches of engineering appropriate to the special facilities, resources, or experience resulting from (a) and (b). In particular it comprises aerodynamics, including wind tunnel, free flight model and actual flight testing; structures of aircraft and missiles; metals and other materials used in the construction of airframes and engines; engines of the air-breathing type used for the propulsion of aircraft or missiles; human engineering studies relating to the operation of aircraft and guided missiles; research and development related to Australian-initiated guided missiles; and operational assessment studies on devices and techniques employed or proposed for the defence of Australia.

5. **Production.**—(i) *Munitions.* The Department is responsible for the production of a wide range of munitions required by the Armed Services. Production is carried out substantially in Government factories, although some orders, mainly for components, are placed with private industry.

The following Government factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Marys, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne and Brunswick, Victoria.

The Ammunition Factory produces the complete round of small arms ammunition and also components for larger calibre gun ammunition, including empty cartridge cases; electronic and mechanical fuses and primers. The Explosives Factories produce the various types of explosive compositions and propellants required for gun ammunition, rockets and guided missiles. The Filling Factory at St. Marys fills and assembles into complete rounds of ammunition (other than small arms ammunition) the empty components and materials supplied by the other munitions factories and by private industry.

The Ordnance Factories at Maribyrnong and Bendigo are equipped to produce heavy ordnance equipment, such as naval guns and gun mountings; large turbine gears; steel shell bodies; empty rocket motors for guided missiles; trailers and tank transporters; and other items requiring heavy engineering capacity. As well as work for the Services, the Bendigo Factory is producing equipment for projects of national importance, e.g. control equipment for the Snowy Mountains Hydro-electric Authority, components for marine diesel engines for Australian shipping and large heavy engineering items for the coal, cement and steel industries.

The Port Melbourne Factory builds large marine diesel engines for the Australian ship-building industry. Major forgings and fabrications for these engines are produced at the Ordnance Factories at Maribyrnong and Bendigo.

The Small Arms Factory is equipped to produce the rifles and other small arms required by the Army. Current production is the 7.62-mm. automatic rifle, for which orders have also been received from overseas, and the 9-mm. carbine, which replaces the Owen as the infantry light machine gun.

The Clothing Factories make uniforms, clothing and canvas goods for the three Services and also for the Postmaster-General's Department and some other Commonwealth authorities.

(ii) *Aircraft and Guided Weapons.* (a) *Aircraft and Engines.* Production both in Government factories and in industry of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is administered by the Department of Supply. Planning of capacity and the negotiations of contractual

arrangements concerning aircraft modification, repair and overhaul, and for the supply of spare parts and airborne equipment for the R.A.A.F., the R.A.N. and the Army are also functions of the Department.

The following factories are operated by the Department:—The Government Aircraft Factory at Fishermen's Bend, and the Final Assembly Workshops and Test Airfield at Avalon, Victoria; the Airframe Repair Workshops at Parafield and Northfield, South Australia.

The current aircraft production programme at the Government Aircraft Factory comprises the French Mirage supersonic fighter for the R.A.A.F. and the Jindivik radio-controlled target aircraft, which has been or is being supplied to Britain, Sweden and the United States, as well as to the Weapons Research Establishment, South Australia.

Apart from the Government Aircraft Factory, the Commonwealth Aircraft Corporation Pty. Ltd. is the only major aircraft manufacturer in Victoria, and this company is currently producing the French Atar turbo-jet engine for the Mirage fighter and also some sections of the airframe.

Other major activities carried out in the Government factories or by various private contractors are the manufacture of airframe and engine spare parts; the overhaul, repair and modification of military aircraft and engines currently in service with the R.A.A.F., R.A.N. and Army; and the reconditioning and servicing of aircraft instruments and other ancillary equipment.

(b) *Guided Weapons.* The Government Aircraft Factory at Fishermen's Bend has become increasingly engaged in recent years in guided weapons development and production. The first production task undertaken at the Factory in the guided weapons field was the supply of the Malkara anti-tank missile to the British Army. While the Factory is responsible for producing the missile body and control equipment and for final assembly of the completed weapon, the project involves other factories also, e.g. the Ordnance Factory, Maribyrnong, produces the hardware for the rocket motor; the Explosives Factory, Mulwala, supplies the propellant; and the Explosives Factory, Maribyrnong, fills and finally assembles the motor. Private industry has also contributed to the project by supplying vital electronic and other components.

Preparations are in hand for quantity production of the Ikara anti-submarine weapons system for the Royal Australian Navy; some missiles and associated equipment have already been produced for trials purposes.

(c) *Telecommunications.* The Department is responsible for the technical aspects of production of telecommunications and electronics equipment for the Armed Services and for certain other organizations such as S.E.A.T.O. and the Colombo Plan. All production is carried out by the electronics industry. Substantial orders have been placed on local industry for a wide range of telecommunications and electronics equipment. Some of the major projects are the development of pilot models of an improved man-pack transistorized receiver/transmitter for the Army; the manufacture of telegraph relay stations for the R.A.A.F.; the production of major sections of the Ikara weapons system for the R.A.N.; and wind-finding radar equipment for the Bureau of Meteorology. Development contracts are in progress for the local production of high-stability miniaturized electronic components such as sealed crystal holders, fixed and variable resistors, mica and tantalum capacitors and a quartz crystal oscillator.

6. *Contract Board.*—(i) *General.* Under the *Supply and Development Act 1939–1948*, the Contract Board is the authority responsible for the arranging of contracts for the performance of services and the purchase of supplies for the Naval, Military and Air Forces of the Commonwealth, as well as for the Department of Supply. The Board is also responsible for the sale or disposal of all surplus or unserviceable Commonwealth goods approved for disposal. By arrangement, the Board also arranges purchases on behalf of other Commonwealth departments and authorities which desire to use its facilities.

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board organization, the purchases and realizations from disposals for the years 1961–62 and 1962–63.

**CONTRACT BOARD ORGANIZATION: PURCHASES AND REALIZATIONS  
FROM DISPOSALS**  
(£)

State	Purchases		Realizations from disposals	
	1961-62	1962-63	1961-62	1962-63

<b>Total .. ..</b>	<b>49,646,331</b>	<b>44,509,385</b>	<b>4,001,797</b>	<b>3,577,045</b>

7. **Defence Supply Planning.**—The central planning authority of the Department is the Planning Branch, whose principal functions are:—

- to plan for and to assist in the development of additional production capacity to meet the Services' munitions requirements for peace and war;
- to provide and administer stockpiles of relevant materials and reserve pools of plant and equipment considered essential for expansion of production in the event of war;
- to prepare and advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- to provide advisory services in the field of instrumentation, machine tools, materials, and inspection to Government factories and contractors engaged in the production of munitions requirements; and
- to administer the national stockpile.

A series of Industry Advisory Committees has been established to advise the Minister and the Department in the development of industrial mobilization plans to meet the Services' *matériel* requirements for mobilization and war. The Committees are:—Ammunition; Electrical; Explosives and Chemicals; Machine Tools and Gauges and Munitions Factory Equipment; Materials; Military Vehicles; Radar and Telecommunications; Weapons and their Equipment; Hard Fibres; Raw Cotton; and Rubber and Allied Materials.

Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

8. **Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the central storage authority and the central transport authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Australian Capital Territory or the Northern Territory. It has agents in Canberra and Darwin. It also operates a shipping and customs section and the England-Australia bulk air freight scheme for Commonwealth Departments.

On 30th June, 1963, the Branch had under its control land, buildings and works, vehicles, plant and equipment valued at £11,184,528, and 3,302,000 sq. ft. of storage space, as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

9. **Finance Branch.**—The total expenditure on Department of Supply activities during the year 1962-63 was £48,690,000, comprising £23,055,000 (net) from Parliamentary appropriations, and £25,635,000 from Trust Fund Accounts. The latter included expenditure of £6,043,000 for Stores and Transport and £18,299,000 in Government Munitions and Aircraft Factories.

## CHAPTER XXVIII

## REPATRIATION

## § 1. General

The Repatriation Commission was established by the *Repatriation Act* 1920–1963, and consists of three full-time members. It is responsible for the administration of the *Repatriation Act* and associated legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The central office is in Melbourne and there is a branch office under the control of a Deputy Commissioner in each State.

The principal functions of the Department are:—the payment of war and service pensions to eligible ex-service men and women and their dependants; the provision of medical treatment to ex-service men and women for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances to ex-service men and women who are suffering from injuries and illnesses not caused or aggravated by war service; and the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Other functions of the Repatriation Department are outlined in a later section of this chapter (see § 5, General Benefits and Miscellaneous, pp. 1211–15).

Benefits are provided in respect of service, not only in the 1914–18 and 1939–45 Wars, but also in the Korea and Malaya operations, with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces.

## § 2. War Pensions

1. General.—The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act* 1914. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act* 1920 (amended from 31st December, 1950, to the *Repatriation Act*). The main features relating to war pensions under the *Repatriation Act* 1920–1963 are set out in the following paragraphs.

(i) *Eligibility for Pension.* Claims for eligibility for war pensions are determined in the first instance by a Repatriation Board in each State of the Commonwealth, and the *Repatriation Act* provides for a right of appeal from the determination of a Board. Members of women's services are eligible for pensions and other benefits, as prescribed in the Act, on the same basis as male members of the forces. Amendments to the Act in 1943 considerably widened the eligibility provisions, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarized as follows.

A member of the forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in circumstances which can be regarded as combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

There is a third ground applicable to all members except those with less than six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

If, at any time after discharge, an ex-serviceman who served in a theatre of war becomes incapacitated or dies from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also § 3. Service Pensions.) Medical treatment may also be provided.

(ii) *Rates.* The main classes of war pensions are the special (T.P.I.) rate, the general rate and the war widows' pension.

The *special rate* of war pension is payable to those who are totally and permanently incapacitated and are unable to earn more than a negligible percentage of a living wage. The weekly rate is £13 15s., plus £1 15s. 6d. wife's allowance and 13s. 9d. for each child under 16 years.

The *general rate* of war pension is the rate payable to those who suffer war-caused disabilities but are not thereby prevented from working, although their earning capacity may be reduced. The actual pension payable is assessed in accordance with the degree of incapacity suffered. The maximum (100 per cent.) rate is now £5 15s. a week. A wife and children under 16 years also receive pensions at rates according to the assessed degree of incapacity of the ex-serviceman, the maximum being £1 15s. 6d. for a wife and 13s. 9d. for each child.

The *war widows' pension* is paid to widows of ex-servicemen who died as a result of war service, and to their children under the age of 16 years. The weekly rates are: widow, £5 15s.; first child, £1 19s.; second and each subsequent child, £1 7s. 6d.

(iii) *Allowances.* The following allowances are provided in addition to pension.

*Domestic Allowance* (£3 10s. per week). This is paid, in addition to pension, to a widow of an ex-serviceman whose death is due to war service, if she is 50 years of age; or is permanently unemployable; or has a dependent child under the age of 16 years, or a dependent child over 16 years being educated and not in receipt of an adequate living wage.

*Attendant's Allowance* (maximum rate £5 5s. per week). This allowance is paid, in addition to war pension, to certain classes of seriously disabled ex-servicemen, for example, war blinded, those who are paralysed, and certain double amputees.

*Clothing Allowance.* A clothing allowance is paid at various rates (3s. 9d. to 7s. 6d. per week) to an ex-serviceman who, as a result of war service, has lost an arm or a leg or, because of an injury to a limb, is required to use a surgical aid or appliance. An amount not exceeding £9 15s. in any one year is also payable to certain other war disabled ex-servicemen.

*Sustenance Allowance.* This allowance is paid where an ex-serviceman is prevented from following his normal occupation through treatment of a war-caused disability or while undergoing medical investigation. The rate payable is the same as the general (100 per cent.) rate pension.

Where an ex-serviceman is receiving in-patient treatment for a war-caused disability or is undergoing periods of essential convalescence immediately following discharge from hospital, a higher rate to bring the sustenance allowance up to the equivalent of the special (T.P.I.) rate is paid.

A wife and children under 16 years also receive pensions at the current general or special rate.

During 1963, the regulation governing the payment of sustenance allowance was amended to abolish the limited means test hitherto applied to determine eligibility for the higher rate of sustenance allowance.

This amendment removed anomalies which operated prejudicially against certain classes of otherwise eligible ex-servicemen. It also eliminated delays and a considerable amount of administrative effort.

*Recreation Transport Allowance.* This allowance provides transport for recreation purposes and may be paid to an ex-serviceman who, as a result of war service, suffers certain amputations of the arms or legs or is seriously disabled to the extent that his powers of locomotion are negligible.

*Other Allowances and General Assistance.* These include re-establishment loans and allowances, funeral benefits, vocational training allowances for education and training of children, fares and allowances for loss of remunerative time in connexion with medical or pension purposes, and motor vehicle allowances for seriously disabled ex-servicemen.

**2. Appeals Tribunals.**—The principal Act was amended, as from 1st June, 1929, to create tribunals to hear appeals in respect of war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against a decision of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the tribunals to hear appeals by certain members whose applications for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

**3. Summary of War Pensions, 1962-63.**—The following table provides a summary of war pensions for the 1914-18 War, the 1939-45 War, the Korea and Malaya operations and the Far East Strategic Reserve.

## WAR PENSIONS: SUMMARY, AUSTRALIA, 1962-63

Particulars	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
New claims granted .. ..	2,394	32,496	1,035	193	36,118
Restorations .. ..	239	784	12	..	1,035
Claims rejected(a) .. ..	1,854	6,125	342	48	8,369
Pensions cancelled or discontinued ..	670	27,234	112	4	28,020
Deaths of pensioners .. ..	5,113	3,735	18	1	8,867
Number of pensions in force at 30th June, 1963 .. ..	115,384	546,231	8,320	466	670,401
Annual pension liability at 30th June, 1963 .. .. £'000	23,705	40,546	438	24	64,713
Amount paid in pensions during the year 1962-63 .. .. £'000	n.a.	n.a.	n.a.	n.a.	70,365

(a) Number of claimants who had their claims for all their disabilities rejected.

4. Classes of War Pensions, Australia, 1962-63.—(a) *New Claims Granted.* The following is an analysis of the total number of new claims granted during 1962-63.

## WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1962-63

Class	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
Ex-servicemen .. ..	1,045	7,731	209	63	9,048
Wives of ex-servicemen .. ..	1,138	7,536	200	43	8,917
Children .. ..	77	16,257	610	85	17,029
Other dependants .. ..	134	972	16	2	1,124
Total .. ..	2,394	32,496	1,035	193	36,118

(b) *Pensions in Force.* The following table shows the number of pensions in force at 30th June, 1963, for each war and for each class of pensioner.

## WAR PENSIONS IN FORCE: AUSTRALIA, 30th JUNE, 1963

Class	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
Ex-servicemen .. ..	46,606	170,594	2,412	166	219,778
Wives .. ..	43,735	144,505	1,798	100	190,138
Children .. ..	1,110	200,838	3,817	163	205,928
War widows .. ..	22,940	15,894	74	9	38,917
Children of deceased ex-servicemen	159	6,705	115	23	7,002
Orphans .. ..	15	140	..	1	156
Parents .. ..	546	7,239	101	3	7,889

(a) Excludes payments to Far East Strategic Reserve pensioners. (b) Includes £5,976,090 domestic allowances paid to widows. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory.

## § 3. Service Pensions

1. **General.**—The *Repatriation Act* 1920-1963 provides for a service pension to be paid, subject to a means test of income and property, to the following persons.

A male ex-serviceman aged 60 years or over who served in a theatre of war, or an ex-servicewoman aged 55 years or over who served abroad. No pension is payable to the wife or children under 16 years of age of an ex-serviceman granted a service pension on account of age.

An ex-serviceman who is permanently unemployable and who served in a theatre of war (or in the case of an ex-servicewoman, who served abroad). Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

An ex-serviceman suffering incapacity from pulmonary tuberculosis whether or not the person served in a theatre of war. (Only those persons who qualify in this group are entitled to receive both service and invalid pensions at the same time, subject to the maximum permissible income.) Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

2. **Rate of Pension.**—The maximum rate of service pension is the same as that for age and invalid pensions paid by the Department of Social Services, namely, single ex-serviceman, £5 15s.; married ex-serviceman, £5 5s.; wife, £3. The rate for eligible children is 15s. a week for the first child and 2s. 6d. for each other child up to and including the fourth child. Eligible child means a child under 16 years of age, or a child under the age of 18 years who is not receiving an invalid pension and is undergoing full-time education, in which case pension may continue up to the end of the calendar year in which the child reaches 18 years of age.

If an ex-serviceman is receiving a service pension on the ground of being permanently unemployable, his service pension may be increased by 15s. a week in respect of each child other than the first, whether or not such children are eligible for pension in their own right.

An allowance of 10s. a week may be paid as supplementary assistance under certain conditions, if an unmarried pensioner pays board or rent.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable depends upon the claimant's "means as assessed", which consist of his annual rate of income plus a property component equal to 9d. a fortnight for each complete unit of £10 of net value of property above £200. For married couples, except where they are separated or in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's "means as assessed" may consist entirely of income, entirely of property, or of both income and property components. If his "means as assessed" do not exceed £3 10s. a week, the claimant receives the maximum rate of pension. If his "means as assessed" exceed £3 10s. a week, the rate payable is the maximum rate less the amount by which "means as assessed" exceed £3 10s. a week. If his "means as assessed" are £9 5s. a week or more, or in the case of a married couple £18 10s. a week or more, no service pension is payable.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are—certain income derived from property, gifts or allowances from children, parents, brothers or sisters, benefits from friendly societies, child endowment, Commonwealth health benefits. The value of board and lodgings received by a pensioner is assessed as income at 12s. 6d. a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, livestock. Property does not include an applicant's home, furniture or personal effects, the surrender value of life insurance policies (up to £750), the value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, or vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1st November, 1941, to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War. Members of the Forces who served in Korea, and those who served in Malaya prior to the commencement of the *Repatriation (Far East Strategic Reserve) Act 1956–1963* are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment and treatment in Repatriation General Hospitals.

3. **Operations, 1962–63.**—The following table gives a summary of service pensions during 1962–63.

Claims granted during year—						
Ex-servicemen .. .. .	..	..	..	..	..	8,058
Wives .. .. .	..	..	..	..	..	1,978
Children .. .. .	..	..	..	..	..	1,449
<i>Total</i> .. .. .	..	..	..	..	..	<b>11,485</b>
Claims rejected during year (i.e. number of claimants who had their claims for all their disabilities rejected) .. .. .						
Service pensions cancelled or discontinued during year .. .. .	..	..	..	..	..	1,739
Deaths of pensioners during year .. .. .	..	..	..	..	..	4,595
Pensions in force at 30th June, 1963 .. .. .	..	..	..	..	..	3,274
Annual pension liability at 30th June, 1963 .. .. .	..	..	..	..	..	62,161
						£11,379,285

4. **Number of Service Pensions and Amount Paid.**—(i) *Summary, Australia.* The following table shows the number of service pensions in force and the annual liability for pensions for the five years 1958–59 to 1962–63.

**SERVICE PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY, AUSTRALIA**

Year	Number of service pensions at 30th June payable to—						Annual pension liability at 30th June
	Aged ex-servicemen	Ex-servicemen who are—		Dependants <sup>(a)</sup> of ex-servicemen where the ex-serviceman is—		Total

(b) Includes Northern Territory.

#### § 4. Medical Treatment for Ex-Servicemen and Dependants of Ex-Servicemen

1. **General.**—In-patient treatment for eligible patients is provided at the Repatriation General Hospitals in each State, at the auxiliary hospitals in New South Wales, Victoria and Western Australia, and at the sanatoria in Queensland and South Australia. For long-term patients, Anzac Hostels are maintained in Queensland and Victoria.

2. **Staff.**—Details regarding the number of full-time staff in Repatriation General Hospitals and other Repatriation institutions are given in the following table.

**REPATRIATION HOSPITALS AND INSTITUTIONS: FULL-TIME STAFF,**  
30th JUNE, 1963

In addition, during 1962-63, 12,101 repatriation in-patients were treated at other metropolitan and country hospitals, and there were 489,707 attendances for treatment as out-patients.

### § 5. General Benefits and Miscellaneous

1. **Other Departmental Activities.**—(i) *General.* During the 1939-45 War, the ordinary activities of the Department in respect of general benefits for the welfare of ex-servicemen and dependants were carried on without interruption. These activities concern mainly:—education and training of children under the Soldiers' Children Education Scheme (see 3, p. 1212), medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

These and new benefits designed for the re-establishment of servicemen and servicewomen after discharge were extended and made available by legislation passed in June, 1940, to servicemen and servicewomen engaged in the 1939-45 War, in November, 1950, to those engaged in the Korea and Malaya operations, and in May, 1963, to those serving in such other areas as may be prescribed under the "Special Overseas Service" amendment to the *Repatriation Act 1920-1963*. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where they are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplementing wages of apprentices whose apprenticeships were interrupted

by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to £75 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949, the Department took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction and became responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now concluded, the prescribed time limits for eligibility having expired. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Department, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during the five years 1958-59 to 1962-63 on the more important general repatriation benefits for all wars.

**EXPENDITURE ON GENERAL REPATRIATION BENEFITS: SUMMARY**  
(£'000)

Year ended 30th June—	Medical treatment	Employment and vocational training	Business loans and furniture	Soldiers' Children Education Scheme	Domestic allowances	Other benefits	Total
1959..	11,231	368	37	608	3,532	239	16,015
1960..	12,730	295	23	646	4,230	268	18,192
1961..	14,643	215	7	730	5,070	276	20,941
1962..	16,963	156	5	824	5,528	313	23,789
1963..	19,696	85	3	959	(a)	176	20,919

(a) Included in War Pensions.

2. *Expenditure by the Repatriation Department, 1962-63.*—The net expenditure by the Department for the year ended 30th June, 1963, was £107,748,227 distributed as follows.

	£'000
Pensions, allowances and other benefits .. .. .	82,484
Treatment .. .. .	19,696
Administration .. .. .	4,097
Works, rent and maintenance .. .. .	1,471
	107,748

3. *Soldiers' Children Education Scheme.*—(i) *General.* The Soldiers' Children Education Scheme was established in 1921 and operates with the assistance of voluntary Education Boards in each State. These Boards consist of representatives of government and non-government education authorities and of ex-service and other organizations which have a general interest in the welfare of the children of ex-servicemen. The objects of the scheme are to assist and encourage eligible children in acquiring a standard of education compatible with their aptitude and ability, and to prepare them to enter an agricultural, commercial, professional or industrial calling of their own choice.

(ii) *Eligible Children.* Eligible children are children of ex-servicemen whose deaths have been accepted as due to war service; or of ex-servicemen who died from causes not due to war service but who were receiving at the date of death a war pension at a special rate for blindness, total and permanent incapacity, or for pulmonary tuberculosis, or for amputation of two or more limbs; or of ex-servicemen who, as the result of war service, are blinded, totally and permanently incapacitated or receiving the special rate pension for pulmonary tuberculosis and are likely to receive such pension for a period of three years.

(iii) *General Benefits.* From the commencement of primary education up to twelve years, school requisites and fares are provided. From the age of 12 years, while the child continues with primary or secondary education, an education allowance is payable.

Further assistance beyond, or parallel with the later years of, secondary education is provided where an approved beneficiary continues with a course of specialized education or training necessary to fit the child for a career.

Specialized education covers a wide range and may include: professional degree or diploma courses at universities and technical colleges; theological training; cadet and pupilage training, i.e. training combined with employment, such as nursing, pharmacy and journalism; industrial, including apprenticeship, training, and other courses of trade and business training approved by an Education Board; and agricultural training at an agricultural college.

At this stage of training, in addition to the education allowance, fees are paid and text books, essential equipment, and other minor benefit provided.

The scale of allowances payable to eligible children at various stages of education is as follows.

**SOLDIERS' CHILDREN EDUCATION SCHEME: WEEKLY RATES OF ALLOWANCES, OCTOBER, 1963**

4. **Settlement of Returned Service Personnel on the Land.**—Reference to the settlement of returned service personnel on the land will be found in Chapter IV. Land Tenure and Settlement, pages 87–9 of this Year Book.

5. **The Services Canteens Trust Fund.**—(i) *General.* The Services Canteens Trust Fund was established under the *Services Trust Funds Act 1947*. Its funds are derived from the assets and profits of wartime Services canteens, mess and regimental funds of disbanded units, and several other sources.

The total amount transferred to the Fund to 31st December, 1963, was £5,526,974. The Act prescribed that, of this, £2,500,000 and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-service men and women, and that the balance of the Fund should be used to provide relief for ex-service men and women and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees, appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939–45 War or are widows of men who served during the war. They serve in an honorary capacity.

(ii) *Assistance from the Fund.* (a) *General.* Persons eligible for assistance from the Fund are those who, between 30th September, 1939, and 30th June, 1947, served in the Australian Naval, Military or Air Forces, including members of the Canteens Staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees have introduced schemes for providing welfare relief for ex-service men and women who are eligible for benefits, and for their dependants; benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-service men and women. From its inauguration in 1947, the Fund is to be available for 40 years for welfare relief and for 30 years for educational benefits.

(b) *Welfare Relief.* The trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts.

To 31st December, 1963, £1,401,473 had been granted as welfare relief from the Fund, £965,093 to ex-servicemen and their dependants, and £436,380 to widows and orphans. The amount granted during 1963 was £98,503. A total of 30,550 ex-service men and women and 12,950 widows and orphans were granted welfare assistance from the Fund to 31st December, 1963.

(c) *Assistance under Afflicted Children's Scheme.* The Fund assists dependent children suffering from afflictions which permanently disable or seriously retard their progress, or prevent the enjoyment of normal health and strength, and who face a prospect of dependence on others for all or part of their lives. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31st December, 1963, 2,411 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of £125,058. The number of new children granted assistance in 1963 was 89.

(d) *Educational Assistance Scheme.* Educational assistance is restricted to children who are 15 years of age and over, except in exceptional circumstances. In the case of orphans, assistance may commence from the age of 12 years. The object is to assist eligible children to obtain the highest education within their capacity. Assistance is in the form of awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances. These awards are granted for practically every type of course of education, whether secondary, tertiary or commercial. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain cases, and a maintenance allowance for the child while at school. Higher training education awards are provided for selected students for post-graduate study in Australia or overseas in the ancillary services to medicine, welfare and science. Provision also exists for one post-graduate scholarship each year for study overseas, valued at £1,000 per annum for up to three years.

The number of children assisted under the educational scheme to 31st December, 1963, was 41,063, and the expenditure on educational awards, post-graduate scholarships and higher training education awards to 31st December, 1963, was £2,234,290. The number granted in 1963 was 6,570 at a value of £246,917.

## § 6. Miscellaneous War Pensions

The Commission is responsible for the payment of pensions and allowances to beneficiaries under the Seamen's War Pensions and Allowances Act, the Interim Forces Benefits Act, the Native Members of the Forces Benefits Act, and Cabinet decisions granting eligibility to persons who were attached to the armed forces during war time.

Details of the pensions paid under the various Acts are shown in the following table.

**MISCELLANEOUS WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY, AUSTRALIA, 30th JUNE, 1963**

## CHAPTER XXIX

### INTERNATIONAL RELATIONS

#### § 1. Relations with Commonwealth and Other Countries

1. **Commonwealth Relations.**—Australia's international relations have developed as a natural concomitant of Australia's growth from colonial status to independent nationhood. During this process Australia has remained on terms of close friendship and understanding with the United Kingdom. This intimate association, together with close co-operation with other countries of the Commonwealth of Nations remains a basic principle of Australia's foreign policy.

Australia is represented at meetings of Commonwealth Prime Ministers and of Commonwealth Finance and Foreign Ministers. It is a member of the Commonwealth Economic Consultative Council, belongs to the Sterling Area, retains, with limitations, the system of judicial appeal to the Privy Council, and maintains High Commissioners in the majority of other Commonwealth countries.

Between meetings of Commonwealth Prime Ministers, the Australian Prime Minister has authority to consult with other Commonwealth Prime Ministers on any subject. In addition, there is a constant flow of messages between the Australian Government and governments of other Commonwealth countries. In defence matters, Australia's armed services send representatives to discussions by Commonwealth Chiefs of Staff; Australian naval ships take part in combined exercises with the navies of other Commonwealth members, and Australian officers maintain liaison with the Services of other Commonwealth countries.

2. **Relations with the United States of America.**—An important feature of Australia's international relations is her relationship with the United States of America. This relationship is formally expressed in a treaty known as the ANZUS Treaty which was signed pursuant to Articles 51 and 52 of the United Nations Charter, and provides that in the event of armed attack on any one of them in the Pacific, the U.S.A., Australia and New Zealand would act to meet the common danger in accordance with its constitutional processes. The Treaty is designed to establish a closer working relationship between the three countries concerned. The ANZUS partners, in their consultations, make no attempt to decide matters affecting the vital interest of other countries. The machinery of the ANZUS Treaty consists of a Council composed of the three Foreign Ministers or their deputies, which meets periodically to discuss matters of mutual concern.

3. **Australia and Asia.**—Australia's geographical location to the south of Asia has become an increasingly important factor in Australia's foreign policy. Australia has sought to develop close relations and understanding with her Asian neighbours. This was evidenced by Australia's inclusion in 1963 as a full regional member of the Economic Commission for Asia and the Far East (ECAFE), and an increasing recognition by Asian leaders of Australia's concern with, and contribution to, the solution of the problems of the region.

4. **SEATO.**—Following the cessation of fighting in Indo-China in 1954, Australia, with other countries situated in the South-East Asian region, or having responsibilities there, supported a proposal to form a collective defence alliance to guarantee the peace and security of the region from external aggression. On 8th September, 1954, Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States signed the South-East Asian Collective Defence Treaty at Manila. They also signed a Pacific Charter stating the principles on which they had acted. A Protocol to the Treaty extended its operation to Cambodia, Laos and the free territory under the jurisdiction of the State of Vietnam, although no action on their territories would be taken except at the invitation or with the consent of the government concerned.

While primary emphasis has been placed on the defence significance of the Treaty, an organization has been established in Bangkok to co-ordinate activities to combat subversion both by counter-propaganda and security training and by the development of the economic and social welfare of the peoples of the Treaty Area. To facilitate this task, the Australian Government in 1956 instituted a SEATO Aid Programme, under which by 30th June, 1964, aid to the value of £5½ millions had been given to member countries in Asia to help develop their capacity to resist aggression and subversion and to stimulate economic development.

A further £1,000,000 will be spent under the Programme during the financial year 1964-65. Under the scheme Australia is providing two geodetic survey vessels to the Philippines, a military technical training school, a vehicle base repair shop and two 50-kW. radio transmitters to Thailand, telecommunication and technical training equipment to Pakistan, and barbed wire, corrugated iron and blacksmith's tools for the strategic hamlet programme in Vietnam. Australia has also provided military training, and technical training in the fields of engineering, telecommunications, naval architecture and dockyard maintenance, security procedures, and surveying for nearly 200 trainees from Asian member countries. In addition, a number of senior service officers of other member countries have visited Australia to foster understanding and to develop co-operation between the armed forces.

## § 2. The Colombo Plan

1. General.—The Colombo Plan originated at a meeting of Commonwealth Foreign Ministers in Colombo in January, 1950. The meeting set up a Consultative Committee to review economic development in South and South-East Asia. The task of this Committee was to devise the most effective means of tackling the problems of economic development in the area and of focusing world attention on them.

Membership of the Consultative Committee is now made up of Australia, Canada, Ceylon, India, New Zealand, Pakistan, the United Kingdom, Malaysia, the United States, Burma, Cambodia, Indonesia, Japan, Laos, Nepal, the Philippines, Thailand, Vietnam, Korea, Bhutan, the Maldive Islands and Afghanistan.

Australian assistance under the Colombo Plan to 30th June, 1964, amounted to £53,425,067. Of this, £38,476,594 had been spent on economic development projects and £14,948,473 had been spent under the Technical Co-operation Scheme. Australia has placed emphasis on the importance of technical assistance in providing a base for economic development. A summary of expenditure, by country and under different heads, is set out in the following table.

### AUSTRALIA'S EXPENDITURE ON THE COLOMBO PLAN TO 30th JUNE, 1964 (£)

Particulars	Economic development	Technical assistance					Grand total

2. **Economic Development Aid.**—Most of Australia's contribution under the Colombo Plan has been spent on providing predominantly Australian-made equipment for development projects or on gifts of commodities such as wheat, flour, fertilizer, coal, copper and condensed milk which have been sold in the recipient country to raise counterpart funds for agreed developmental projects.

The projects assisted by Australia cover a wide range, including irrigation and preparation of land for food crops, irrigation and electric power projects, secondary industries, municipal services, road building, transport and communications facilities, broadcasting equipment and lignite mining.

A Technical Co-operation Scheme has been an integral part of the Colombo Plan since its inception in 1950. Co-ordination of technical assistance is provided by a Council for Technical Co-operation, which meets regularly in Colombo, served by a Colombo Plan Bureau. An Australian is currently Director of the Bureau.

3. **Technical Assistance.**—(i) *Training.* Australia had spent a total of £8,388,847 on training awards under the Colombo Plan up to 30th June, 1964. A total of 5,235 awards for training in Australia had been made. The main fields of study include engineering, public administration, education, nursing, science, medicine and health, and agriculture. Substantial numbers have also been trained in such fields as accountancy, arts, economics, food technology, social studies and industry.

At 30th June, 1964, a total of 3,797 awards had been granted under the correspondence scholarship scheme inaugurated by Australia in 1955. Main fields of study are accountancy, engineering, English, and trade courses. Burma, Ceylon, India, Indonesia, Malaysia, the Philippines and Thailand have joined the correspondence scheme. Malaysia has established a correspondence education scheme of its own, for which key personnel were trained in Australia under the Colombo Plan.

In February, 1963, the Colombo Plan English Teaching Centre was opened in North Sydney to provide intensive three-month courses in oral and written English for Colombo Plan students nominated by their governments. Up to 30th June, 1964, 118 students from Afghanistan, Burma, Cambodia, Korea, Laos, Malaysia, Malawi and Thailand have attended courses at the Centre.

(ii) *Experts.* Australia has spent a total of £2,590,008 on experts and advisers up to 30th June, 1964. This involved the services of 504 experts and 119 advisers on 831 assignments. Of these numbers, 60 experts and one adviser were in the field at 30th June, 1964. The majority were in Malaysia and Thailand.

The following table shows the number of training awards and experts provided to Colombo Plan countries by Australia up to 30th June, 1964.

**AUSTRALIA: TRAINING AWARDS AND EXPERTS PROVIDED UNDER COLOMBO PLAN TO 30th JUNE, 1964**

Regional (Mekong Project) .. .. .	..	..	25
<b>Total .. .. .</b>	<b>5,235</b>	<b>3,797</b>	<b>610</b>

(iii) *Equipment.* At 30th June, 1964, a total of 385 requests for technical equipment had been or were being met, at a total cost of £3,088,252. The range of items supplied includes text books and Australian reference books for schools, universities and technical training institutions; equipment and tools for technical education; livestock and equipment for breeding programmes; radio receivers for use in remote areas; film projectors and visual aids for training centres; X-ray equipment for hospitals; and agricultural research equipment.

(iv) *Miscellaneous.* In addition to training awards, experts and equipment, technical assistance funds have been spent on contributions to the Colombo Plan Bureau, publications, International House, training centres and the ECAFE Asian Economic Development Institute.

### § 3. Participation in the United Nations

1. *Australia's Contributions to United Nations.*—Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organization in San Francisco in 1945 and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Australia's influence in the affairs of the United Nations has been exerted primarily through the annual debates in the General Assembly, through membership of the Security Council (1946–47 and 1956–57), the Economic and Social Council (1948–50, 1953–55 and for a three-year term from January 1, 1962), and through the Trusteeship Council. In virtue of responsibilities for administration of the Trust Territories of Nauru and New Guinea, Australia has been a member of the Trusteeship Council since it was established. In 1961, Australia was appointed a member of the "Committee of Seventeen" subsequently expanded to the "Committee of Twenty-four"—a committee established by the General Assembly to implement Resolution 1514 (xv), the declaration on the granting of independence to colonial countries and peoples.

In 1950, Australia joined fifteen other member States in answering the Security Council's call to help the Republic of Korea to repel Communist aggression from the north. Australia has also been directly involved in United Nations activities in Greece (1947), Palestine (1947), Indonesia (1948–49), Kashmir (1947), the Arab States and Israel (1948), Hungary (1956–57), Cyprus (1964). Australia has contributed its share of the costs, both assessed and voluntary, of the United Nations military operation in the Congo which began in 1960. In addition, Australia has made a voluntary contribution of \$750,000 to the civil programme. Australia has also paid its share of the costs of the United Nations Emergency Force (UNEF) in the Middle East, and made a voluntary contribution of \$112,000 to the costs of maintaining the United Nations Force in Cyprus (UNFICYP) for the first three months of its operation and \$100,000 in respect of the second three months. To help meet the financial difficulties of the United Nations arising mainly from the costs of these operations and the failure of a number of member States to pay their share, Australia has bought four million dollars of United Nations bonds, the proceeds of which could be used to finance peace-keeping operations.

In the economic, social and cultural sphere, Australia has contributed to the work of the United Nations through membership of its specialized agencies and of the Economic and Social Council. Australia is a foundation member of one of the four Regional Economic Commissions—The Economic Commission for Asia and the Far East, the 4th and 15th Sessions of which were held in Australia. In 1963, Australia became a regional member of ECAFE.

Australia has had varying periods of service as a member of the executive bodies of the principal specialized agencies. As a leading agricultural country, Australia played a large part in the establishment of the Food and Agriculture Organization (FAO). Australia is a member of the Board of Governors of the International Atomic Energy Agency. Australia served as a member of the governing body of the International Labour Organisation either as a Titular Government member or as a Deputy member for 1945–60, and in 1963 was again elected to the Governing Body as a Titular Government member for a further three-year term. Australia has also been a prominent member of the International Civil Aviation Organization since its inception, and in 1962 was re-elected to the Council as one of the nine States of principal civil aviation importance.

2. *Australia's Contributions in International Aid.*—Australia's contributions towards various forms of international aid through the United Nations and other international organizations for 1963–64 will amount to over \$21,000,000. This is additional to the funds provided for the Colombo Plan and the cash grant of £25,250,000 for the development of Papua and New Guinea in 1963–64.

The Australian Government has contributed £3,315,921 to the United Nations Expanded Programme of Technical Assistance from the inception of the Programme in 1950 up to June, 1964. This was spent on the provision of experts, training, supplies, and equipment and supplemented Australian aid under the Technical Co-operation Scheme of the Colombo Plan.

Australian experts sent abroad under the United Nations Technical Assistance programme up to 30th June, 1963, totalled 309. A total of 573 United Nations trainees had come to Australia up to 30th June, 1964.

Other contributions by Australia (as at June, 1964) have included £22,522,000 to the United Nations Relief and Rehabilitation Administration (UNRRA), £3,297,056 to the International Refugee Organization, £1,830,000 to Post-UNRRA Relief, £6,307,993 for food and medical supplies to the United Nations Children's Fund (UNICEF), which has been helping the under-privileged children of the world since its establishment in 1946; £1,799,000 of essential supplies to the United Nations Korean Reconstruction Agency; £1,300,000 of supplies to the United Nations Relief and Works Agency for Palestine refugees; £553,950 for the programmes of the United Nations High Commissioner for Refugees; £155,000 for the relief of Hungarian refugees; £47,500 for the WHO Malaria Eradication Special Account; and £375,000 to the United Nations Special Fund. Australia's assistance to the United Nations Children's Fund was recognized by the election of an Australian as chairman of the Executive Board for 1959. Australia was a member of the Board from 1947 to 1961.

Australia has also contributed £264,985 to the Inter-Governmental Committee for European Migration's programme for providing transportation from Hong Kong to countries of resettlement for refugees of European origin coming out of Mainland China.

In addition, Australia has made significant contributions to the development funds of international financial institutions; to June, 1964, these amounted to £21,265,000 to the International Bank for Reconstruction and Development, £998,000 to the International Finance Corporation and £3,272,000 to the International Development Association.

In 1962, Australia supported the establishment of the UN/FAO World Food Programme and will contribute £669,000 in cash and kind for the three years of the Programme. Australia contributed £1.2 million by the end of 1963 to the Freedom from Hunger Campaign and this money will be used on projects in South and South-East Asia.

#### § 4. Diplomatic Representation

1. *General.*—The Department of External Affairs is responsible for advising the Minister for External Affairs and the Australian Government on the conduct of foreign Affairs and relations with foreign Governments. Its officers staff the Australian diplomatic service and the consular and administrative service.

2. *Australian Missions Overseas.*—At the beginning of 1964, Australia maintained the following diplomatic and consular missions abroad.

#### AUSTRALIAN MISSIONS OVERSEAS

##### Embassies (26)

*Argentina*—Calle Rivadavia 1829, Piso 5, Buenos Aires.

*Austria*—Tienfaltstrasse 1, Vienna 1.

*Belgium*—Boulevard Brand Whitlock, No. 4 Woluwe—St. Pierre, Brussels.

*Brazil*—Caixa Postal 251—ZC—00, Rio de Janeiro.

*Burma*—88 Strand Road, Rangoon.

*Cambodia*—94 Moha Vithei Preah Norodom, Phnom Penh.

*France*—13 Rue Las Cases, Paris 7E.

*Germany, Federal Republic of\**—Kolner Strasse 157, Bad Godesburg, Bonn.

*Greece*—15 Valaoritou Street, Athens.

*Indonesia*—Pegangsaan Barat 14, Djakarta.

*Ireland*—33 Fitzwilliam Square, Dublin.

---

\* The Australian Ambassador is also head of the Australian Military Mission in Berlin.

- Israel*—145 Hayarkon Street, Tel Aviv.  
*Italy*—Via Sallustiana 26, Rome.  
*Japan*—No. 9 Mita, Tsuna-Machi, Minato-ku, Tokyo.  
*Korea*—32-10 Songwol-dong, Sudaee Moon-Koo, Seoul.  
*Laos*—Quartier Phone Xay, Vientiane.  
*Nepal\**—C/o Australian High Commission, New Delhi, India.  
*The Netherlands*—Lange Voorhout 18, The Hague.  
*The Philippines*—L & S Building, 1414 Dewey Boulevard, Manila.  
*South Africa*—Standard Bank Building, Church Square, Pretoria.  
*Sweden*—Sergels Torg 12, Stockholm C.  
*Thailand*—323 Silom Road, Bangkok.  
*Union of Soviet Socialist Republics*—13 Kropotkinsky Pereulok, Moscow.  
*United Arab Republic*—1097 Corniche el Nil, Garden City, Cairo.  
*United States of America*—1700 Massachusetts Avenue, Washington, D.C.  
*Vietnam*—Caravelle Building, Place Lam Son, Saigon.

#### High Commissions (10)

- Britain†*—Australia House, The Strand, London, W.C.2.  
*Canada*—Royal Bank Chambers, 90 Sparks Street, Ottawa.  
*Ceylon*—3 Cambridge Place, Colombo, 1.  
*Ghana*—Ghana House, Accra.  
*India\**—9/48 Sardar Patel Road, Chanakyapuri.  
*Malaysia*—44 Ampang Road, Kuala Lumpur.  
*Singapore Office*—MacDonald House, Orchard Road, Singapore 9.  
*New Zealand*—Government Life Insurance Building, Customs House Quay, Wellington 4.  
*Nigeria*—Investment House, 21/25 Broad Street, Lagos.  
*Pakistan*—9 Kutchery Road, Karachi 4.  
*Tanganyika*—Bank House, Independence Avenue, P.O., Box 2996.

#### Other (12)—

- Military Mission in Berlin‡*—Olympia Stadium, Charlottenburg 9, Berlin.  
 Mission to—  
*European Economic Community*—Boulevard Brand Whitlock, No. 4 Woluwe, St. Pierre, Brussels.  
*United Nations (New York)*—750 Third Avenue, New York 17, N.Y.  
*United Nations (Geneva)*—254 route de Lausanne, Pregny, Geneva.  
 Consulate-General in—  
*Spain*—Calle de General, Sanjurjo, 44 Madrid 3.  
*Switzerland*—254 route de Lausanne, Pregny, Geneva.  
*New York*—International Building, 636 Fifth Avenue, New York 20, N.Y.  
*San Francisco*—Qantas Building, 350 Post Street, Union Square, San Francisco, California.  
 Consulate in—  
*Denmark*—Norrevold 68, Copenhagen.  
*New Caledonia*—45 Tce. Rue du Verdun, Noumea.  
*Portuguese Timor*—Dili.  
 Commission in—  
*Fiji*—Hotel Grand Pacific, 584-618, Victoria Parade, Suva.

\* The Australian High Commissioner in India is currently Ambassador to Nepal.

† Administered by Prime Minister's Department.

‡ The Australian Ambassador is also head of the Australian Military Mission in Berlin.

The Department of External Affairs is responsible for the control and administration of all the diplomatic and consular missions listed above with the exception of the High Commission, London, which is the responsibility of the Prime Minister's Department, and the Australian Consulate in Copenhagen, which is the responsibility of the Department of Immigration.

Specialist officers of the Trade Commissioner Service, other Commonwealth Government Departments and the Defence Services stationed abroad are attached to Australian diplomatic or consular missions. Senior attached officers are in some cases accredited to the missions with diplomatic or consular ranks approved by the Minister for External Affairs. In addition, the Department of Trade and Industry maintains Trade Commissioner posts which engage in trade promotion in a number of cities where Australia does not have diplomatic or consular representations (for complete list of Trade Commissioner posts, see p. 1225).

The Department of Immigration similarly maintains migration missions which engage in recruitment of migrants in the following cities where Australia does not have diplomatic or consular representation: Hong Kong, Nairobi, and Valletta (see p. 1226).

3. **Diplomatic Representatives in Australia.**—There are 32 non-Commonwealth and eight Commonwealth countries represented by diplomatic missions in Australia.

The following list shows the addresses of the overseas representatives in Australia. Full details of Commonwealth and foreign representation in Australia may be obtained from publications issued by the Department of External Affairs, Canberra. Consular representatives are not included. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

#### DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.

*Uruguay*—55 Mugga Way, Red Hill, Canberra, A.C.T.

**Other (1)**

Commissioner for—

*Malta*—31 Clowes Street, South Yarra, Melbourne, Vic.

4. **Agents-General for States.**—From early times, the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation, the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High Commissioner for Australia at Australia House, The Strand, London. The addresses of the Agents-General are as follows: New South Wales—56–57 The Strand, London, W.C.2; Victoria—Victoria House, Melbourne Place, The Strand, London, W.C.2; Queensland—Marble Hall, 409–10 The Strand, London, W.C.2; South Australia—South Australia House, 50 The Strand, London, W.C.2; Western Australia—Savoy House, 115 The Strand, London, W.C.2; Tasmania—457 The Strand, Charing Cross, London, W.C.2.

## § 5. Oversea Trade Representation

1. **The Australian Trade Commissioner Service.**—The Department of Trade maintains Trade Commissioners in 28 countries. The first permanent Trade Commissioner Post was set up in Canada in 1929. Before that, Australia's only official trade representatives abroad were in the High Commission Office in London and at the Office of the Commissioner General for Australia in New York. By May, 1964, Trade Commissioners were established at the following posts: United States of America—New York, Washington and San Francisco; Canada—Vancouver, Ottawa and Montreal; West Indies—Trinidad; Britain and Europe—London, Athens, Paris, Bonn, Stockholm and Rome; Persian Gulf—Bahrain; Africa—Accra, Nairobi, Salisbury and Johannesburg; United Arab Republic—Cairo; Lebanon—Beirut; India—New Delhi, Bombay and Calcutta; Ceylon—Colombo; South-East Asia—Singapore, Djakarta, Kuala Lumpur, Bangkok and Hong Kong; Japan—Tokyo; New Zealand—Wellington, Christchurch and Auckland; Philippines—Manila; Pakistan—Karachi; South America—Caracas and Lima. Twenty-eight editions of the Department of Trade's promotion periodical "Austral News" now circulate in 80 countries in three languages. (*See also* Australian Trade Missions, § 4 of Chapter XIV. Oversea Trade, p. 517.)

The addresses of Australian Trade Commissioner Posts overseas, and of Trade Commissioners of overseas governments in Australia, are shown in the following lists. The former include some recent additions to the posts mentioned above.

**Trade Commissioner Service of the Commonwealth of Australia**

*Britain*—Australia House, The Strand, London, W.C.2.

*Bahrain*—Almoayyed Buildings, Government Road, Bahrain.

*Canada*—1155 Dorchester Boulevard West, Montreal, P.Q.; Burrard Building, 1030 W. Georgia Street, Vancouver 5, B.C.; Royal Bank Chambers, 90 Sparks Street, Ottawa.

*Ceylon*—3 Cambridge Place, Colombo.

*France*—2nd Floor, 26 Rue de la Pepiniere, Paris, 8E.

*Germany, Federal Republic of*—Kolner Strasse 157, Bad Godesberg, Bonn; 2000 Hamburg 36, Neuer Wall 391, Hamburg.

*Ghana*—Ghana House, Church Street, Accra.

*Greece*—15 Valaoritu Street, Athens.

*Hong Kong*—Union House, Connaught Road Central, Hong Kong.

*India*—Mercantile Bank Building, 52 Mahatma Gandhi Road, Bombay 1; 2 Fairlie Place, Calcutta 1; 34 Golf Links Road, New Delhi.

*Indonesia*—Djalan Nusantara 39, Djakarta.

*Italy*—Via Sallustiana 26, Rome.

*Japan*—9 Mita Tsuna-Machi, Shiba, Minato-ku, Tokyo.

*Kenya*—Silo Park House, Queensway, Nairobi.

*Lebanon*—L'Union de Paris Building, Rue Maamari, Beirut.

*Malaysia*—44 Ampang Road, Kuala Lumpur; MacDonald House, Orchard Road, Singapore 9.

*Netherlands*—Lange Voorhout 18, The Hague.

*New Zealand*—London and Lancashire Building, 56 Shortland Street, Auckland; Phoenix Building, 91 Worcester Street, Christchurch; Government Life Insurance Building, Customs House Quay, Wellington.

*Pakistan*—9 Kutchery Road, Karachi 4.

*Peru*—Monterosa Buildings, Jiron Arica 837, Lima.

*Philippines*—L. & S. Building, 1414 Dewey Boulevard, Manila.

*Southern Rhodesia*—Central Africa House, Cnr. First Street and Gordon Avenue, Salisbury.

*South Africa*—Cavendish Chambers, Jeppe and Kruis Streets, Johannesburg.

*Sweden*—Sergels Torg 12, Stockholm 40.

*Thailand*—323 Silom Road, Bangkok.

*United Arab Republic*—1097 Corniche el Nil, Garden City, Cairo.

*United States of America*—3148 Cleveland Avenue, Washington, D.C.; International Building, 630 Fifth Avenue, New York 20, N.Y.; 350 Post Street, Union Square, San Francisco, Cal.; 3500 Wilshire Boulevard, Los Angeles 5, Cal.

*Venezuela*—Apartado 6481, Caracas.

*West Indies, Federation of*—72-74 South Quay, Port of Spain, Trinidad.

2. **Australian Trade Correspondents and Marketing Officers.**—Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner Service. Correspondents are located in Suva, Fiji; Taipei, Taiwan; Valletta, Malta; Port Louis, Mauritius; Mexico City, Mexico; Montevideo, Uruguay; Madrid, Spain; and Istanbul, Turkey. Marketing Officers are located in Rangoon, Burma; Port Louis, Mauritius; and Los Angeles, U.S.A.

**3. Trade Commissioners of Oversea Governments in Australia.**

*Britain*—Senior British Trade Commissioner—Commonwealth Avenue, Canberra, A.C.T.

British Trade Commissioners—Assurance House, 16–20 Bridge Street, Sydney, N.S.W.; 224 Queen Street, Melbourne, Vic.; M.L.C. Building, Cnr. Adelaide and Edward Streets, Brisbane, Qld.; F.C.A. Building, Franklin Street, Adelaide, S.A.; Prudential Building, 189 St. George's Terrace, Perth, W.A.

*Canada*—Canadian Trade Commissioners—A.M.P. Building, Circular Quay, Sydney, N.S.W.; 2 City Road, South Melbourne, Vic.

*Ceylon*—Ceylon Trade Commissioner—The Wales House, 66 Pitt Street, Sydney, N.S.W.

*India*—Indian Trade Commissioner—Caltex House, 167–187 Kent Street, Sydney, N.S.W.

*Malaya*—Malayan Trade Commissioner—71 State Circle, Acton, A.C.T.

*New Zealand*—Senior New Zealand Trade Commissioner—14 Martin Place, Sydney, N.S.W.

New Zealand Government Trade Commissioner—428 Collins Street, Melbourne, Vic.

**§ 6. Commonwealth Migration Offices**

The Australian diplomatic missions to Britain, the Netherlands, Germany, Italy, Greece, Austria, and Spain have Chief Migration Officers attached to them. Senior Migration Officers are attached to the missions to Denmark, Sweden, and the United Arab Republic, and Migration Officers to the missions to Switzerland, Belgium, and France.

A Migration Officer is attached to the office of the Australian Trade Commissioner in Hong Kong, and migration business in Kenya is handled by the Administrative Officer of the Trade Commission there. In Malta, the Migration Officer is located at the Australian Migration Office, Airways House, Gaiety Lane, Cnr. High Street, Sliema, Valletta.

In other countries where Australia has diplomatic representation, migration inquiries are handled by the diplomatic staff.

## CHAPTER XXX

## MISCELLANEOUS

NOTE.—This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Retail Trade; 5. Interstate Trade; 6. Statistical Organization in Australia; 7. Statistical Publications of Australia.

In issues of the Year Book prior to No. 49 (*see* No. 48, p. 1166), a list of *Australian Books* was included. This list, compiled by the Librarian of the Commonwealth National Library is available from the Library, but considerations of space preclude its publication in this issue.

## § 1. Valuation of Australian Production

1. General.—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published in the following tables have been compiled by the Statisticians in the various States from the latest and best data available, and are on a substantially uniform basis. However, marketing costs are not on a completely comparable basis between States and, in addition, accurate information is difficult to obtain for many items. In consequence, differences between States in the relationships of local to gross value should be treated with some reserve.

Attention is directed to the fact that the values shown in the tables herein refer only to the production of primary industries and factories, and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used.

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized at the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, cost of containers, commission, and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The net value of production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

For the years shown in the following tables, no allowance for power, power kerosene, petrol and other oils has been made in New South Wales. In the case of the mining and quarrying industry, however, this allowance has been made in all States. Marketing costs for mining and quarrying, and costs of materials used in the process of production in respect of bee-farming, trapping, forestry, and fishing and whaling, are not available for all States. Local values have been used for these industries, with consequent understatement in gross value for the mining and quarrying industry and overstatement in net value for the other industries.

2. Value of Production, Australia, 1962-63.—The following table shows particulars of the gross, local and net values of production in Australia by industry.

**GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES: AUSTRALIA, 1962-63**

(£'000)

Industry	Gross production valued at principal markets	Local value—gross production valued at place of production	Net value of production (without deduction of depreciation or maintenance)

(b) Local value.

In the chapters dealing with the respective industries, tables will be found showing the value of production and the value per head of population for the industry, by State.

## § 2. Indexes of Production

In the first two tables in this section, indexes of price and quantum (i.e., value at constant prices) of production are given for the following industrial groups:—Agriculture, Pastoral, Dairying, poultry and bee-farming, and All farming combined (including separate indexes for Wool and Products other than wool). In the third table, indexes of quantum (i.e., value at constant prices) of production, exports and consumption of farm products for food use are shown.

1. Farm Production Price Indexes.—The Farm Production Price Indexes shown in the following table relate to average "prices" of agricultural, pastoral, dairying, poultry and bee-farming products realized at the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year, and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. "Prices" for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities *produced* in the period 1923–24 to 1927–28 were used as fixed weights. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Year Book (see No. 43, p. 1050). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product *marketed* during the period 1946–47 to 1950–51 were used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

### FARM PRODUCTION: INDEXES OF PRICES AT PRINCIPAL MARKETS, AUSTRALIA

(Base: Average 1936–37 to 1938–39 = 100)

Year	Agri- culture	Pastoral	Dairying, poultry and bee- farming	All farming	Wool (shorn and dead)	Products other than wool
1948–49	234	313	197	260	366	225
1949–50	272	396	228	316	483	261
1950–51	291	818	258	505	1,098	308
1951–52	355	501	332	410	552	363
1952–53	364	531	387	440	623	379
1953–54	324	534	395	429	621	365
1954–55	316	489	371	401	540	355
1955–56	330	451	392	397	468	373
1956–57	336	536	386	432	607	374
1957–58	336	435	382	388	473	359
1958–59	322	396	386	369	370	369
1959–60	329	464	402	403	440	391
1960–61	349	443	402	401	397	403
1961–62	348	421	373	385	412	376
1962–63	334	450	387	396	449	378

2. **Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.**—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Year Book (*see* No. 43, p. 1051). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average unit values for the period 1936–37 to 1938–39 were used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to livestock in Australia.

### INDEXES OF QUANTUM<sup>(a)</sup> OF FARM PRODUCTION, AUSTRALIA

(Base: Average 1936–37 to 1938–39 = 100)

Year	Agriculture	Pastoral	Dairying, poultry and bee-farming	All farming	Wool (shorn and dead)	Products other than wool
1948–49 .. .. .	108	105	111	109	108	109

1962–63 .. .. .	191	163	129	166	170	165

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (*see* text preceding table).

3. **Farm Products for Food Use: Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.**—The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936–37 to 1938–39. The items included comprise products in the form in which they are sold from farms in all cases except livestock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas.

**FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM<sup>(a)</sup> OF  
PRODUCTION, EXPORTS AND CONSUMPTION**

*(Base: Average 1936-37 to 1938-39 = 100)*

Year	Production		Exports		Consumption in Australia	
	Total	Per head of total population	Total	Per head of total population	Total	Per head of total population
1948-49..	110	97	112	99	111	98
1949-50..	116	99	116	99	114	98

1962-63p	168	107	187	119	155	99

*(a)* Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (see text preceding table).

### § 3. Consumption of Foodstuffs and Beverages

1. **Quantities Consumed.**—The estimates of total consumption and consumption per head of population in Australia in the two tables which follow have been compiled by deducting net exports from the sum of production and imports and allowing for recorded movements in stocks of the respective commodities. While the estimates may be generally accepted as being reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of certain oils and fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at "producer" level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than previously because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by production by householders for their own requirements. In most cases, broad estimates of non-commercial (householders') production have been made. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made, it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second of the following tables have been derived by dividing the total apparent consumption of each commodity or commodity group in a given year by the mean population of Australia in the same period.

More detailed information on the consumption of foodstuffs and beverages is contained in the statistical bulletin: *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

The following tables show the average annual consumption during the three-year periods ended 1938-39, 1948-49, and 1958-59, together with the data for each of the years 1960-61, 1961-62 and 1962-63.

**ESTIMATED QUANTITY OF FOODSTUFFS AND BEVERAGES AVAILABLE FOR CONSUMPTION ANNUALLY: AUSTRALIA**

Commodity	Average three years ended—			1960-61	1961-62	1962-63 (a)
	1938-39	1948-49	1958-59

2. **Level of Nutrient Intake.**—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1960-61 in comparison with the annual averages for the three-year periods ended 1938-39, 1948-49 and 1958-59. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs available for consumption per head of population shown in the preceding table.

(a) Subject to revision. (b) The Vitamin A figures for all periods prior to 1960-61 have been revised on the new basis introduced in 1960-61 of estimating total Vitamin A activity, by summing the Vitamin A content and one-third of the carotene value.

## § 4. Retail Trade

1. General.—The statistics in this section relate to the number of retail establishments throughout Australia and the value of retail sales of goods by these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full census of all retail establishments. As this was the first census of its type in Australia, its scope and the data sought were the minima consistent with the objective of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods, and a simple commodity dissection, together with a record of the value of certain services provided. This census was followed by a second census of all retail establishments trading during the year ended 30th June, 1949.

Further censuses were taken in respect of the years ended 30th June, 1953 and 1957. In these censuses, retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups, and questions were asked about stocks of goods on hand, the number of persons engaged in retail activities, and credit sales. In addition, the 1956-57 census included questions relating to purchases, customers' indebtedness, and type of organization.

The most recent census was taken in respect of the year ended 30th June, 1962, and results have been published for all States and Australia. With the exception of some modifications to the scope of the collection (see p. 1238), the 1961-62 census followed the same general principles adopted for the previous census.

In general terms, the census covered the retail trading activities of establishments which normally sell goods by retail to the general public from fixed premises (i.e., shops, rooms, kiosks and yards). Retail activities of wholesalers and manufacturers were included if they sold regularly by retail to the general public. Sales by itinerant vendors (e.g., hawkers, street sellers, etc.) and sales from casual stalls or booths were excluded. Organizations such as clubs and societies making sales to their own members were excluded from the main census collection, but a supplementary collection was made, covering sales by licensed clubs, and separate details are included in this section.

In general, establishments with retail sales of goods amounting to less than £500 in the census year are not included in the census tabulations. However, some "service" establishments with retail sales of less than £500, but with takings of £500 or more from repairs, meals, or hairdressing, are included in tables relating to these items. The types of establishments in this category are boot repairers, repair-only garages, cafés and restaurants, and hairdressers.

The design of the census is such that particulars of retail sales relate principally to sales to the final consumer of new and second hand goods generally used for household and personal purposes. For this reason, sales of building materials, farm and industrial machinery and equipment, earth-moving equipment, etc., have been excluded from the censuses. For the same reason, and also because of difficulties in obtaining reliable and complete reporting, sales of builders' hardware and supplies, business machines and equipment, grain feed, fertilizer and agricultural supplies, and tractors were excluded from the 1961-62 census. Retail sales of motor vehicles, parts, etc., have been included, whether for industrial, commercial, farm or private use.

During the period between censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys, adjusted to a basis comparable in scope with the 1961-62 census, and some of the results of the 1961-62 census, are included in this section.

2. Value of Retail Sales in Each Commodity Group, Australia.—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1958-59 to 1963-64 on a comparable basis throughout. The figures for the year 1961-62 were obtained from the census, whereas figures for the other years shown are estimates based on sample surveys.

#### VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA(a)

(£ million)

Commodity group	1958-59	1959-60	1960-61	1961-62	1962-63	1963-64
Groceries .. .. .	368.8	391.1	416.4	429.2	442.8	465.6
Butchers' meat .. .. .	178.2	193.3	210.7	211.1	219.7	229.1
Other food (b) .. .. .	308.3	335.0	352.7	365.1	376.0	388.8
<i>Total, Food and Groceries</i> ..	<i>855.3</i>	<i>919.4</i>	<i>979.8</i>	<i>1,005.4</i>	<i>1,038.5</i>	<i>1,083.5</i>
Beer, wine and spirits (c) .. .. .	247.5	262.8	269.3	272.9	285.9	294.9
Clothing and drapery .. .. .	397.4	434.1	450.4	450.0	459.3	497.9
Footwear .. .. .	64.6	71.9	76.7	77.2	80.9	84.1
Hardware, china and glassware (d) ..	65.6	70.6	72.6	73.1	76.8	76.5
Electrical goods (e) .. .. .	154.9	187.0	177.3	174.0	179.9	190.1
Furniture and floor coverings .. .. .	97.7	114.6	117.0	115.0	118.0	129.4

<b>Grand Total(d)</b> ..	<b>46,209</b>	<b>37,268</b>	<b>17,065</b>	<b>11,812</b>	<b>8,559</b>	<b>4,270</b>	<b>309</b>	<b>432</b>	<b>125,924</b>

(a) Figures refer to establishments with total retail sales of £500 or more. (b) Excludes basic building materials, builders' hardware and supplies such as tools of trade, paint, etc. (c) Excludes tractors, farm machinery and implements, earth-moving equipment, etc. (d) Total number of individual establishments. Many establishments showed sales in more than one commodity group. Thus the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments.

<sup>(a)</sup> Includes sales of beer, wine and spirits, tobacco, cigars and cigarettes, confectionery and other goods.

### § 5. Interstate Trade

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the last published statements were for the year 1909. Later, the Governments of Western Australia and Tasmania revived the records, and relevant statistics are available again for those States. A detailed collection for Queensland was re-introduced from July, 1953.

At the Conference of Statisticians held in January, 1928, it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

Complete interstate trade statistics are now published in detail for Queensland, Western Australia and Tasmania by the Deputy Commonwealth Statisticians in those States, and incomplete statistics, relating mainly to trade with Western Australia and Tasmania, by the Deputy Commonwealth Statisticians in the remaining States.

## § 6. Statistical Organization in Australia.

1. **Early Development of Australian Statistics.**—(i) *Crown Colony "Blue Books"*. Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although intended primarily for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" formed the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers*. Following the advent of responsible government, which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of government administrative departments.

The first example of extensive government organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony regime. The growing need for quantitative data concerning the progress of the several young communities of Australia led eventually to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences*. To provide for the interchange of ideas between States and to obtain uniform State statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. **Creation of the Commonwealth Bureau of Census and Statistics.**—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the *Census and Statistics Act* 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. **Integration of Statistical Services.**—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liaison between officers dealing with the same subjects in the State and Commonwealth fields did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the 1914–18 War, when the economic problems that then arose drew attention to deficiencies in Australian statistical data. With a view to overcoming these weaknesses, the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the 1939–45 War, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the 1939–45 War of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals eased the situation to some extent—indeed, without their establishment, the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem and constituted only one of a number of improvisations devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new series of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major question of meeting growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939–45 War, and in 1949 discussions with the Premiers were initiated by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently all State Governments accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth.

The *Statistics (Arrangements with States) Act 1956* provided for parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. After passing through all stages of Parliament, it became law on 12th May, 1956. This legislation, permissive in nature, was designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The object of such an agreement was that, in each State accepting it, there would be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State Governments. Both Commonwealth and State were to be adequately served with statistics, and no State would be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into were provided for.

Integration of the Commonwealth and State statistical services was finally accomplished when the integration arrangement with Victoria came into effect on 15th September, 1958.

**4. Scope of the Commonwealth Bureau of Census and Statistics.**—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939–45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the War, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

For administrative purposes, the Commonwealth Bureau, Canberra, is divided into a number of Divisions and Branches dealing with specific fields of statistics or providing services for the Bureau as a whole. The organizational patterns of the State Offices are broadly similar, although local requirements have naturally given rise to differences in detail.

**5. Relation of the Bureau to other Commonwealth Departments.**—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound

statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as statistical developments require and as time and circumstances permit.

### § 7. Statistical Publications of Australia

1. **General.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

Commonwealth publications containing statistics may be grouped under two heads, namely:—(i) publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

2. **Publications issued by the Commonwealth Statistician.**—The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration.

*Australian Capital Territory Statistical Summary.*—Annually; 1963 and 1964.

*Balance of Payments, Australian.*—Statements Nos. 1 to 3, 1928–29 to 1951–52.

\**Banking and Currency.*—Annually; first issue, 1961–62 and 1962–63.

*Census (1911) Results.*—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix *Mathematical Theory of Population*.

*Census (1921) Results.*—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II. NOTE.—Part XXVII., Life Tables.

*Census (1933) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with the Statistician's Report and Australian Life Tables, 1932–1934, Vol. III.

*Census (1947) Results.*—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming with the Statistician's Report and Australian Life Tables, 1946–1948, Vol. III.

*Census (1954) Results.*—Bulletins, Nos. 1 to 3. Vols. I. to VI., comprising respectively Parts I. to V. for each State; Vol. VII., comprising Parts I. to V. for the Australian Territories; Vol. VIII., comprising Parts I. to III. for Australia, Australian Life Tables, 1953–1955, and the Statistician's Report.

*Census (1961) Results.*—Bulletins Nos. 1 to 36 (mimeographed, see p. 1251)†; Vols. I. to VI., comprising respectively Parts I. to V. for each State; Vol. VII., comprising Parts I. to V. for the Australian Territories; and Vol. VIII., comprising Parts I. to III. for Australia, Australian Life Tables, 1960–1962, and the Statistician's Report (printed). The complete series of printed publications has not yet been issued; for publications already issued see back pages of this volume.

†*Conference of British Commonwealth Statisticians, 1951, Report of Proceedings.*

†*Dairying Industry* (formerly *Summary of Dairying Industry*).—Statistical Bulletin, monthly; first issue, September, 1937.

*Demography.*—Bulletin, annually, 1911 to 1962.

†*Digest of Current Economic Statistics.*—August, 1959 onward.

*Exports, Australian.*—Annually, 1958–59 to 1963–64.

†*Factories, Principal Statistics, Summary.*—Annually, 1948–49 to 1962–63.

*Finance.*—Bulletin, 1907 to 1916–17 annually; 1917–18 and 1918–19 (one vol.); 1919–20 and 1920–21 (one vol.); 1922–23 to 1960–61 annually. From 1955–56 issued in two parts: Part I., Public and Private Finance; Part II., Commonwealth Taxation. From 1960–61, issued as five separate bulletins, see Banking, Finance, Insurance, and Taxation.

\**Finance, Commonwealth.*—Annually; first issue, 1961–62 and 1962–63.

\**Finance and Government Securities, State, Territories, and Local Government Authorities.*—Annually; first issue, 1961–62 and 1962–63.

\* Previously included in Finance, Part I.

† Distributed by Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume.

- \**Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia, Report on.*—Statistical Bulletin, half-yearly, 1946–47 to 1947–48; annually, 1948–49 to 1962–63.
- \**Fruit Growing Industry (formerly Summary of Fruit Growing Industry).*—Statistical Bulletin, annually, 1944–45 to 1962–63.
- Imports Cleared for Home Consumption.*—Annually, 1950–51 to 1963–64.
- \*\**Insurance and Other Private Finance (other than Banking and Currency).*—Annually; first issue, 1961 and 1962.
- Labour and Industrial Statistics, Memoranda and Reports, various, to 1922.*
- Labour Report.*—Annually, 1913 to 1962.
- Life Tables, Australian, 1901–1910.* *Australian Joint Life Tables, 1901–1910.*
- Life Tables, Australian, 1920–1922.*
- Life Tables, Australian, 1932–1934.* *Australian Joint Life Tables, 1932–1934.*
- Life Tables, Australian, 1946–1948.*
- Life Tables, Australian, 1953–1955.*
- \**Livestock Numbers (formerly Summary of Livestock Statistics).*—Statistical Bulletin, annually, 1943 to 1964.
- Local Government in Australia.*—July, 1919.
- \**Manufacturing Industries.*—Bulletins on Individual Industries, annually, 1936–37 to 1939–40, 1940–41 (issue incomplete) and 1944–45 to 1962–63.†
- ‡*Mineral Industry, The Australian (formerly Minerals and Metals Bulletin).*—Part 2—*Quarterly Statistics* of a quarterly bulletin issued jointly with the Bureau of Mineral Resources.
- Monthly Review of Business Statistics.*—October, 1937 onward.
- Motor Vehicles, Census of 31st December, 1955.* Bulletins Nos. 1 to 8.
- Motor Vehicles, Census of 31st December, 1962.* Preliminary Statements Nos. 1 to 9 (mimeographed, see p. 1252)\*; Bulletins Nos. 1 to 9 (printed).
- \**Motor Vehicles, Survey of (1947–48) Results.*—Bulletins Nos. 1 to 7.)
- National Accounts, Australian (National Income and Expenditure, 1948–49 to 1961–62 (mimeographed)\*; 1962–63 (printed).*
- Northern Territory Statistical Summary.*—Annually, 1960 to 1964.
- \**Occupation Survey (1945) Results.*—Detailed tables.
- Official Year Book of the Commonwealth of Australia.*—Annually, 1907 to present issue (No. 50). Issues Nos. 40 to 50 also published in parts.
- Pocket Compendium of Australian Statistics (formerly Statistical Digest).*—1913, 1914, 1916, and 1918 to 1964, annually.
- Population and Vital Statistics.*—Bulletins and Reports, various, 1906–1910.
- Primary Industries.*—Bulletins, annually, 1950–51 to 1961–62, in two parts—Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Primary Industries, Australian.*—Report prepared for the Empire Producers Conference, Sydney, March, 1938.
- Production.*—Bulletin, annually, 1906 to 1949–50. From 1936–37 to 1949–50 issued in two parts—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries and Secondary Industries*).
- Professional Papers.*—Various. A full list appears in Official Year Book No. 13, page 3.
- \**Publications of the Commonwealth Bureau of Census and Statistics.*—Annually (since 1964 in printed form).
- Quarterly Summary of Australian Statistics (replaced Monthly Summary of Australian Statistics).*—December, 1917 onward.
- \**Retail Establishments, Census of (1947–48) Results.*—Bulletins, Nos. 1 to 7.
- \**Retail Establishments, Census of (1948–49) Results.*—Bulletins, Nos. 1 to 7.
- \**Retail Establishments, Census of (1952–53) Results.*—Bulletins, Nos. 1 to 14.
- Retail Establishments, Census of (1956–57) Results.*—Bulletins, Nos. 1 to 8 (mimeographed)\* and 9 to 15 (printed).
- Retail Establishments, Census of (1961–62) Results.*—Bulletins Nos. 8 and 9; Preliminary Statements, Nos. 1 to 14; Supplementary Collections, Nos. 1 to 3; (all mimeographed, see pp. 1251–2)\*; Bulletins Nos. 1 to 7 (printed).
- Rural Holdings, Classification by Size and Type of Activity, 1959–60.*—Bulletins, Nos. 1 to 7.
- \**Rural Holdings, Size Classification of, 1955–56.*—Bulletins Nos. 1 to 7.

---

NOTE.—For footnotes see next page.

- \* *Rural Land Use and Crop Production* (formerly *Summary of Crop Statistics*).—Statistical Bulletin, annually, 1943–44 to 1962–63.
- Secondary Industries*.—Bulletin, annually, 1950–51 to 1961–62 (since 1960–61 in two parts—Part I. Factory and Building Operations; Part II. Materials Used and Articles Produced in Factories).
- Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.
- Social Statistics*.—Bulletin, 1907 to 1915 annually, and 1918.
- Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.
- § *Taxation, Commonwealth*.—Annually; first issue, 1961–62.
- Trade, Oversea*.—Bulletin, annually, 1906 to 1963–64.
- \* *Trade Oversea*.—Preliminary Bulletin. Annually, 1952–53 to 1963–64.  
(See also *Australian Exports and Imports Cleared for Home Consumption*.)
- Transport and Communication*.—Bulletin, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1962–63 annually.
- Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.
- \* *Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.
- \* *Wool Production and Utilization*.—Bulletin, annually, 1952–53 to 1962–63.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Minor changes in the titles of several publications have not been referred to above. Copies of a number of these publications, particularly earlier issues, are not available.

Other mimeographed statements are distributed by the Commonwealth Statistician and deal with a wide variety of subjects, as follows.

*Triennially*.—Tractors on Rural Holdings.

*Annually*.—Agricultural Statistics (Preliminary); Bee Farming; Consumption of Tea and Coffee; Factory Products (Principal); Factory Statistics (Preliminary); Farm Machinery on Rural Holdings; Fire, Marine and General Insurance; Fishing and Whaling; Fruit Statistics (Preliminary); Livestock Statistics (Preliminary); Milking Machines on Rural Holdings; Mining and Quarrying; Oversea Investment; Registrations of New Motor Vehicles; Rural Statistics of the Australian Capital Territory; Survey of Private Pension and Retiring Allowance Schemes; Survey of Selected Large Private Pension Funds; Taxation Collections; Trade of Australia with Eastern Countries; University Statistics; Value of Primary Production (Preliminary); Value of Production and Indexes of Price and Quantum of Farm Production; Wine and Brandy Statistics; Wool Production.

*Half-yearly*.—Australian Balance of Payments; Labour Turnover; Road Traffic Accidents; Trade of Australia with the United Kingdom.

*Quarterly*.—Aerial Agriculture; Australian Oversea Trade with Major Groups of Countries; Balance of Payments; Building; Building—Australian Capital Territory; Building—Northern Territory; Capital and Maintenance Expenditure; Consumer Price Index; Industrial Disputes; Instalment Credit for Retail Sales; National Income and Expenditure; New Agricultural Machinery; New Capital Raisings; New Tractors; Retail Sales of Goods; Unit Trusts, Land Trusts and Mutual Funds.

---

\* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume. † The series for 1962–63 comprises:—Nos. 1. Cement and Cement Goods, 2. Bricks, Tiles, Pottery and Earthenware, 3. Chemicals, Drugs and Medicines, 4. White Lead, Paints and Varnish, 5. Chemical Fertilizers, 6. Soap and Candles, 7. Basic Metal Industries, 8. Metal Fabricating Industries, 9. Motor Vehicles and Cycles, 10. Cotton Mills, 11. Woollen Mills, 12. Rope and Cordage, 13. Tanneries, 14. Boots and Shoes, 15. Clothing (including Hosiery and Knitted Goods), 16. Flour and Other Grain Mills, 17. Biscuits, 18. Confectionery, 19. Jam, Fruit, Vegetables, Pickles, Sauces, Condiments, etc., 20. Bacon Curing, 21. Butter, Cheese and Condensed, Concentrated, etc., Milk, 22. Aerated Waters and Cordials, 23. Meat and Fish Preserving, 24. Breweries, 25. Wineries and Distilleries, 26. Tobacco, Cigars and Cigarettes, 27. Sawmilling, 28. Pulp and Paper Making, 29. Rubber Works, 30. Brooms and Brushes, 31. Electric Light and Power Works, 32. Gas Works, 33. Plastic Moulding and Products, 34. Leather Goods (including Saddlery and Belting), 35. Printing and Stationery.

‡ Copies available from the Department of National Development in each capital city (6s. each).

§ Previously Finance, Part II.

\*\* Previously included in Finance, Part I.

*Monthly.*—Banking (General); Building Approvals; Employment and Unemployment; Exports of Wool; Export Price Index; Gold Mining Industry; Instalment Credit for Retail Sales; Life Insurance; Meat Industry; Oversea Trade; Production Statistics; Production Summaries\*; Registrations of New Motor Vehicles; Retail Sales of Goods (Total); Savings Banks; Wage and Salary Earners in Civilian Employment; Wage Rates and Earnings; Wholesale Price (Basic Materials and Foodstuffs) Index.

*Periodically.*—Demographic Review (separate issues cover population and vital statistics, births, deaths, marriages, and overseas arrivals and departures); Social Statistics, including Schools, Universities, Hospitals (all annual) and Divorces (quarterly).

Summarized results of the Population Census, 30th June, 1961, the Census of Retail Establishments and Other Services, year ended 30th June, 1962, and the Census of Motor Vehicles, 31st December, 1962, have been published in a series of preliminary mimeographed bulletins. Details are as follows:—

#### Population Census, 30th June, 1961—

##### Census Bulletins—

- Nos. 1, 3–18, 20, 21, 24. Summary of Population and Dwellings, individual States and Territories.
- No. 2. Population and Dwellings in Local Government Areas.
- No. 2. (Revised) Population and Dwellings in Local Government Areas (Final Figures).
- No. 19. Occupied Dwellings According to Class in Local Government Areas, etc.
- No. 22. Summary of Dwellings for Australia.
- No. 23. Summary of Population for Australia.
- No. 25. Ages of the Population (Single Years and Five-Year Groups).
- No. 26. Density of Population and Occupied Dwellings in Local Government Areas, etc.
- No. 27. Nationality (i.e. Allegiance) of the Population of Australia by States and Territories
- No. 28. Birthplaces of the Population of Australia by States and Territories.
- No. 29. Industry of the Population: Australia, States and Territories.
- No. 30. Summary of Population and Dwellings for Tropical Australia.
- No. 31. Conjugal Condition of the Population in conjunction with Age: Australia, States and Territories.
- No. 32. Occupations of the Population: Australia, States and Territories.
- No. 33. Occupational Status of the Population in conjunction with Age and Conjugal Condition: Australia, States and Territories.
- No. 34. Australia: Males and Females in the Work Force classified according to Industry in conjunction with Occupational Status.
- No. 35. Occupied Private Dwellings according to Facilities: Local Government Areas, etc.
- No. 36. Race of the Population: Australia, States and Territories.

#### Census of Retail Establishments and Other Services, year ended 30th June, 1962—

##### Preliminary Statements—

- No. 1. Australia, States and Territories.
- No. 2. Australian Summary.
- No. 3. New South Wales.
- No. 4. Victoria.
- No. 5. Queensland.

\* The current series comprises:—Nos. 2. Chemicals, etc., 3. Plastic and Synthetic Resins and Plasticisers, 4. Paints and Other Surface Coatings, 6. Soap, Detergents and Glycerine, 7. Internal Combustion Engines, 8. Lawn Mowers, 9. Electric Appliances, 10. Motor Bodies and Trailers, 11. Pedal Cycles, 12. Meters, 13. Building Fittings, 14. Cotton Goods, 15. Wool-scouring, Carbonizing and Fellmongering, 16. Woollen and Worsted Carding, Combing and Spinning, 17. Wool Weaving, 18. Hosiery, 19. Men's and Boys' Women's and Maids' Girls', Infants' and Babywear, Shirts, Cardigans, Pyjamas, Underclothing, etc., 20. Rayon and Synthetic Fibre Woven Fabrics and Spun Synthetic Yarns, 21. Paper and Paper Boards, 22. Floor Coverings, 23. Electric Motors, 24. Men's, Youths' and Boys' Outer Clothing, 25. Foundation Garments, 27. Gloves (other than Rubber), 28. Footwear (excluding Sandshoes, Goloshes, and Gum-boots, etc., of Rubber), 29. Biscuits, Ice Cream, Confectionery, 30. Storage Batteries, 31. Assembly of Motor Vehicle Chassis, 32. Perambulators (including Pushers and Strollers), 34. Radios, Television and Cabinets, 35. Mattresses, 36. Preserved Milk Products, 38. Canned Fish, 39. Jams and Preserved Fruit and Vegetables, 40. Cereal Breakfast Foods, Cereal Products and Flour Milling, 41. Margarine and Other Edible Processed Fats, 42. Malt and Beer, 43. Stock and Poultry Meals (Other than Cereal), 45. Gramophone Records, 47. Aerated and Carbonated Waters, Cordials and Syrups and Concentrated Cordial Extract, 48. Sports Goods, 49. Building Materials, 51. Hides and Skins used in Tanneries, 55. Butter and Cheese, 56. Canned Meat, 58. Steel Wire and Wire Products, 59. Non-ferrous Rolled, Extruded and Drawn Products.

- No. 6. South Australia.
- No. 7. Western Australia.
- No. 8. Tasmania.
- No. 9. New South Wales—Local Government Areas, etc.
- No. 10. Victoria—Local Government Areas, etc.
- No. 11. Queensland—Local Government Areas, etc.
- No. 12. Tasmania—Local Government Areas, etc.
- No. 13. South Australia—Local Government Areas, etc.
- No. 14. Western Australia—Local Government Areas, etc.

Census Bulletins—

- No. 8. Australian Capital Territory.
- No. 9. Northern Territory.

Supplementary Collections—

- No. 1. Licensed Clubs.
- No. 2. Laundries and Dry Cleaners.
- No. 3. Motion Picture Theatres.

Census of Motor Vehicles, 31st December, 1962—

Preliminary Statements—

- No. 1. Northern Territory.
- No. 2. Australian Capital Territory.
- No. 3. Tasmania.
- No. 4. South Australia.
- No. 5. Summary for Australia, States and Territories.
- No. 6. Queensland.
- No. 7. Victoria.
- No. 8. New South Wales.
- No. 9. Western Australia.

*Occasional Publications.*—In addition to the publications listed on pages 1248–51, most of which are issued regularly, there have been a number of statements issued by this Bureau which contain the results of special surveys or new statistical series and descriptions thereof. The more recent of these are listed below.

Special Business Survey No. 16. Incidence of Industrial Awards, Determinations and Agreements, May, 1963. Year Book No. 49 included a list of previous Surveys in this series, but they are now for the most part out of print or included in regular publications.

Survey of Retail Establishments, Australian Capital Territory, 1962–63; Canberra and Queanbeyan Population Count, 1st July, 1963; Gross National Product, Estimates at current and average 1959–60 Prices, 1962–63 (Preliminary); Survey of Retail Establishments, Australian Capital Territory, 1963–64; Population Count of Canberra, 30th June, 1964; Population Count of Darwin, Alice Springs, Tennant Creek, Katherine and Batchelor, 30th June, 1964; Minimum Wage Rates, January, 1960, to June, 1963; Wage and Salary Earners in Employment, June, 1954, to June, 1962; Wage and Salary Earners in Employment July, 1962 to June, 1964.

Further information on current publications of the Commonwealth Bureau of Census and Statistics is contained in *Publications of the Commonwealth Bureau of Census and Statistics*, February, 1964, available free, on request, from the Commonwealth Statistician, Canberra. This contains a list of all Bureau publications and also a subject index to show the publications in which information on the various subjects dealt with by the Bureau is to be found. Publications issued by the State Offices of the Commonwealth Bureau of Census and Statistics are also listed therein.

3. Publications issued by the Deputy Commonwealth Statisticians.—A list of the publications issued by the Deputy Commonwealth Statistician of each State appears in Year Book No. 48 (see p. 1163) and in *Publications of the Commonwealth Bureau of Census and Statistics*, February, 1964.

4. Commonwealth and State Parliamentary and Departmental Reports and Papers.—No comprehensive list of current publications of this nature is available, but the Commonwealth National Library issues an annual publication *Australian Government Publications*, a list of official publications of the Commonwealth, States and Territories, compiled from records of material received by the Library during the year.

# NATIONAL ACCOUNTS

## NATIONAL INCOME AND EXPENDITURE

National accounting aims at providing a systematic summary of the transactions taking place in the economy, especially of those that relate to the production and use of goods and services, and to transfers of income or capital between sectors of the economy.

Estimates of national income and expenditure have been compiled by the Bureau since 1944-45, and have been published annually as papers entitled *National Income and Expenditure* accompanying the Commonwealth Budgets. Detailed annual estimates of national income and expenditure on a revised basis are published in *Australian National Accounts, National Income and Expenditure, 1948-49 to 1962-63*. Preliminary estimates for 1963-64 were published in a Budget Paper. Quarterly estimates are published in *Quarterly Estimates of National Income and Expenditure*.

The following article is in three main Parts. Part I describes the conceptual framework and structure of the accounts; the tables are shown in Part II; and Part III contains definitions and explanatory notes on the items in the tables.

### PART I. THE CONCEPTS AND STRUCTURE OF THE AUSTRALIAN NATIONAL ACCOUNTS

#### § 1. The Concepts of National Product, Income and Expenditure

1. **The Concept of Gross National Product.**—The concept of production is fundamental to a system of national accounting. Production in this context is not confined to the production of goods by farms, mines, factories, etc. It includes also the provision of services of all kinds which either add to the value of goods (such as transport and merchandizing services), or are of monetary value in their own right (such as the services of doctors, teachers, entertainers, etc.). Production is the process whereby the labour, the natural resources, the accumulated capital assets and knowledge are applied to the provision of valuable goods and services.

Production is not, however, limited to the provision of goods and services with a monetary value. The existence of a monetary value is obvious in the case of goods and services which become the subject of a market transaction. However, it is not necessary for goods and services to be actually marketed for them to be regarded as possessing a monetary value and coming within the boundary of production. Most of the goods and services provided by public authorities (as distinct from public enterprises such as government railways) are not normally sold but are nevertheless regarded as part of production. Since these goods and services are not sold, the only practicable method of valuing them is at cost, that is, the total of the wages and salaries paid to public authority employees and the cost of purchased goods and services used. (In this valuation it is not usual to impute any income or depreciation to assets owned by public authorities.) The production of financial enterprises, which are described more fully later, is treated in a manner very similar to that of public authorities. These enterprises derive their incomes not from selling their services, but from the excess of their property income receipts over payments. The output of these enterprises is therefore also valued at cost, namely the wages and salaries of their employees

and the cost of goods and services used. Similarly with services provided by non-profit organizations which do not sell the services but are financed by gifts and property income: these services also are regarded as production and are valued at cost. Goods and services produced by persons in the course of their normal occupation and consumed by them are also included (e.g. farm production consumed on the farm). Another important exception is associated with owner-occupied dwellings. Rented dwellings provide a marketed service which is regarded as a part of production, and it is usual to impute a rent also to owner-occupied dwellings so that all dwellings are treated in a similar manner. This prevents any change in the scope of production from occurring as a result of the increasing proportion of owner-occupied houses in recent years. In effect, owner-occupiers (like other owners of dwellings) are regarded as operating businesses; they receive rents (from themselves as consumers), pay expenses, and make a net contribution to the value of production which accrues to them as owners.

In measuring the total value of all production in the community, there are various problems of valuation to be faced. Many goods and services are bought by enterprises for further use in their own productive activities. If the value of all goods and services actually sold (including the imputations mentioned above) were added together, there would be serious duplication, because some goods and services would, in effect, be added in several times at successive stages of production. It is therefore clear that the value of these so-called intermediate goods and services must be deducted and only the value added taken into account, if the resulting total is to be free of such duplication. *Gross National Product at Market Prices*, hereafter referred to simply as *Gross National Product*, is therefore defined as the total market value of goods and services produced in Australia after deducting the cost of goods and services (other than capital equipment) used in the process of production. In concept, it is the sum for all producers of the value of their sales (including any indirect taxes levied thereon), plus increases in their stocks, less their purchases of goods and services from other producers. For those producers, like public authorities and financial enterprises, who do not actually sell their output, it includes their output, instead of their sales, valued at cost. In addition to representing the total value added by production, gross national product is necessarily equal to the incomes (wages, profits, etc.) and other costs (depreciation and indirect taxes) appropriated out of it. In fact, in Australia, gross national product is in the main estimated by adding up estimates of these incomes and costs rather than by making direct estimates of values added, the major exception to this rule being a direct estimate of value added in farm enterprises.

The total market value of goods and services includes a substantial element of indirect taxation, and hence the contribution of an enterprise to gross national product defined as above does not accrue wholly to the factors of production employed in the enterprise. On the other hand, government payments to an enterprise in the form of subsidies accrue to the factors of production but are not part of market value. *Gross National Product at Factor Cost* is therefore equivalent to gross national product at market prices less indirect taxes, but with the addition of subsidies, and is the value added by the factors of production in the process of production. This concept corresponds to the value of production of an individual enterprise which excludes indirect taxation and which, by appropriate classification of enterprises, becomes the basis for estimates of gross national product at factor cost by industry of origin. It is the nearest equivalent in the national accounts to what is called value of production in factory statistics. This latter, however, still includes some purchased services (e.g. telephones, postage) and some elements of indirect taxation (e.g. rates, payroll tax).

Finally, there is the question of the cost of capital equipment. In the foregoing definition of gross national product, the cost of capital equipment is disregarded. The process of production, of course, requires the use of capital equipment, but it would be misleading to deduct the whole cost of this in the year of purchase. The cost of such equipment is normally charged against production by way of depreciation allowances, spread over the normal useful life of the equipment. If depreciation as well as indirect taxes be deducted from gross national product, the resulting aggregate is referred to as *Net National Product*. Thus *Net National Product* is that part of the value added by factors of production which accrues as income to their suppliers after allowing for depreciation. However, there are several possible concepts of depreciation, and whereas gross national product at market prices or factor cost is not affected by the concept of depreciation used, net national product and national income are dependent to some extent on the concept. (Gross national product would, however, be affected by any significant change in practice as between charging costs of purchases currently or by way of depreciation.) In these estimates, allowances for

depreciation are restricted to public and private enterprises, and no depreciation is attributed to assets used by public authorities, non-profit making organizations, etc. The concept of depreciation used is described in the notes in Part III.

2. **The Concept of National Income.**—Gross national product, as defined above on a geographical basis corresponds to what the Statistical Office of the United Nations in its *System of National Accounts*\* calls gross domestic product, and is not affected by changes in the extent of ownership of factors of production by non-residents. However, the value of net national product is the source of the income which accrues to the factors of production, and it is obviously of importance that some of this income accrues ultimately to persons overseas (and that Australian residents receive some income from overseas). To make allowance for this, therefore, the value of net national product less total income payable overseas in the form of interest, dividends, undistributed income, etc., and plus income receivable from overseas in these forms can be expressed as *National Income*. In principle, adjustments should also be made to deduct other factor incomes (wages and professional earnings, etc.) earned in Australia by non-residents and add similar incomes earned abroad by persons normally resident in Australia. (The earnings of Australian diplomatic representatives and of members of the Australian forces serving abroad are included in gross national product.) Subject to only minor conceptual difference, this aggregate is the same as national income as defined in the United Nations Statistical Office *System of National Accounts*.

The references above to factors of production call for some comments on the subject of factor incomes and transfer incomes. Net national product is the source of all factor incomes, and is therefore equal to the total factor income accruing to the factors of production employed. Enterprises are envisaged as paying out factor incomes to labour in the form of salaries and wages, and being left with a net operating surplus which is the factor income earned by the enterprise. Part of this surplus is transferred to the final recipients in the form of rent, interest, dividends, and direct taxes. Property incomes are thus classed as transfer incomes. Such incomes are therefore not included in tables showing the composition of gross national product, since these are shown in terms of the original factor incomes, namely wages and operating surpluses. This general treatment has the effect (which is desirable and important, for example, when considering gross national product by industry of origin) of making the contribution of an enterprise to gross national product independent of whether it owns or rents its buildings and equipment and of whether it finances its operations with borrowed money or with the owners' (shareholders') own funds. Wages and salaries paid by governments, financial enterprises and non-profit bodies are of course included in factor incomes, as services provided by these bodies have been defined as production.

It should be noted that national income is derived by deducting from net national product the whole of net income payable overseas, including interest on public debt paid to oversea holders of Australian government securities. As indicated above, the whole of (net) property income paid overseas is deducted in arriving at the estimate of national income. To the extent that this income accrues from the provision of capital for productive enterprises (including public enterprises), this is quite consistent with the treatment of property income payments as transfers. However, in this case no distinction is made between interest on public debt and other forms of property income. All are treated as though they were appropriations of part of the national product for payment to factors of production owned or supplied by non-residents, despite the fact that no product is attributed to the loan funds and capital assets employed by the government.

3. **Concept of Gross National Expenditure.**—As pointed out above, from the gross national product are appropriated three aggregates of funds available for use within Australia: national income, depreciation allowances, and indirect taxes less subsidies. Also available for use within Australia are the funds accruing during the period from our oversea capital transactions: net capital inflow, and any withdrawal of monetary reserves. The sum of these funds, after deduction of net donations overseas by persons or governments, is spent during the period on goods for use within Australia. The spending of the funds is not necessarily done by the original recipients, as they change hands through taxation and other transfers, and through the lending and borrowing of savings. These processes are set out in the sector accounts, described in §2. However, the funds are in fact all spent during the period, either on current purchases by consumers, public authorities or financial enterprises, or for capital purposes, in the form of gross fixed capital expenditure or additions to stocks. The sum of this expenditure is *Gross National Expenditure*, which is defined as the total expenditure on final goods and services bought for use in the Australian economy.

\* Studies in Methods, Series F No. 2 Rev. 1, *A System of National Accounts and Supporting Tables*: United Nations Statistical Office, 1960.

**4. The Concept of National Turnover of Goods and Services.**—Gross national product has been defined above as the total market value of goods and services produced in Australia, after deduction of the cost of goods and services (other than capital equipment) used in the process of production. For the economy as a whole, therefore, it is possible to describe the total annual flow of goods and services free of duplication, which is here referred to as the *National Turnover of Goods and Services*, as the sum of gross national product and the value of all goods and services imported. The value of imported raw materials, components of manufactures, etc., finished goods imported by Australian distributors, and the cost of imported services such as freight or insurance paid to non-residents, all become part of the value of the goods and services sold by these enterprises for final use in Australia. Goods imported directly by their final users (e.g. direct imports of capital equipment by enterprises, direct purchases overseas by governments or persons) are also included here, as though they were bought overseas and then sold in Australia, although the value added to these by productive activity in Australia is nil. The same is true of oversea tourist expenditure by Australian residents, which is part of the value of imported services.

In the study of gross national product, interest is centred on the production of goods and services as a result of economic activity in Australia and on the distribution to factors of production of rewards arising from that activity. In the study of gross national expenditure, on the other hand, interest is turned to the final uses to which the goods and services resulting from this productive activity are put during the period in question. In both cases, it is the same complex of goods and services which is being examined, namely the national turnover of goods and services as just defined.

The final uses to which the national turnover of goods and services are put are divided between exports (i.e. goods and services sold to oversea buyers) and *Gross National Expenditure*.

Thus Gross national product *plus* Imports of goods and services  
 = National turnover of goods and services  
 = Gross national expenditure *plus* Exports of goods and services.

**5. Definition and Relationship of Main Aggregates.**—The concepts discussed above may now be defined and expressed in equivalents as follows.

*Gross National Product* is the total market value of goods and services produced in Australia within a given period after deduction of the cost of goods and services, other than capital equipment, used in the process of production. Thus Gross National Product, as here defined, is "at market prices".

*Gross National Product at Factor Cost* is that part of the cost of producing the gross national product which consists of gross payments to factors of production (labour, land, capital or enterprise). It represents the value added by these factors in the process of production and is equivalent to gross national product less indirect taxes plus subsidies.

*Net National Product* is that part of the value added within a given period by factors of production (labour, land, capital or enterprise) which accrues as income to their suppliers after allowing for the depreciation of capital equipment. It is equivalent to gross national product at factor cost less allowance for depreciation.

*National Income* is the net income accruing within a given period to Australian residents from their services in supplying factors of production (labour, land, capital or enterprise) in Australia or overseas. It is equivalent to net national product plus income receivable from overseas less income payable overseas.

*National Turnover of Goods and Services* within a given period is the total flow of final goods and services in the Australian economy as a whole, derived from production in Australia and imports. This value is equivalent to gross national product plus imports of goods and services or, alternatively, to gross national expenditure plus exports of goods and services.

*Gross National Expenditure* is the total expenditure within a given period on final goods and services bought for use in the Australian economy. It is equivalent to the gross national product, plus imports of goods and services less exports of goods and services.

The relationship of these aggregates may be illustrated diagrammatically as follows:—

NATIONAL TURNOVER OF GOODS AND SERVICES

IMPORTS OF GOODS AND SERVICES	IMPORTS OF GOODS AND SERVICES	IMPORTS OF GOODS AND SERVICES	IMPORTS OF GOODS AND SERVICES	EXPORTS OF GOODS AND SERVICES	
GROSS NATIONAL PRODUCT	INDIRECT TAXES LESS SUBSIDIES	INDIRECT TAXES LESS SUBSIDIES	INDIRECT TAXES LESS SUBSIDIES	GROSS NATIONAL EXPENDITURE	
	GROSS NATIONAL PRODUCT AT FACTOR COST	DEPRECIATION ALLOWANCES	DEPRECIATION ALLOWANCES		
		NET NATIONAL PRODUCT	NET INCOME PAYABLE OVERSEAS		NET INCOME PAYABLE OVERSEAS
			NATIONAL INCOME		NATIONAL INCOME

6. Product and Expenditure in Terms of a "Production Account".—The commentary to this point has focussed attention on the nature of some of the principal aggregates used for the analysis of economic activity. However, the system of national accounts aims also at presenting the transactions taking place in the economy in the form of a set of balanced accounts, some of which are closely analogous to those used by business management to record their operations from period to period. It is therefore useful to consider the national production account for Australia as a whole as a consolidation of the production accounts of individual enterprises.

An enterprise engaged in trading (whether in production in the narrow sense, or distribution, or in the provision of other services) will have a "production or trading account" which in very simplified form will be something like the following:—

PRODUCTION ACCOUNT OF A TRADING ENTERPRISE

	£		£
Opening stock .. ..	..	Sales .. ..	..
Wages and salaries ..	..	Closing stock .. ..	..
Current purchases ..	..		
Indirect taxes .. ..	..		
Gross operating surplus ..	..		
	_____		_____
	_____		_____

The two sides balance, the balancing item being gross operating surplus.

This account can be simply re-arranged to show the "gross product" of the enterprise, that is, its contribution to gross national product. Instead of "opening stock" and "closing stock", the appropriate entry now becomes "increase in value of stock" (during

the accounting period). Each side now adds up to the total turnover of the business (additions to stock being treated as turnover for this purpose). The "gross product" of the enterprise is now the sum of wages and salaries paid, the gross operating surplus and indirect taxes paid, and can be written in as a sub-total. Re-arranged, the account now shows the following:—

**PRODUCTION ACCOUNT OF A TRADING ENTERPRISE—ALTERNATIVE FORM**

	£		£
Wages and salaries .. ..	..	Sales .. .. .	..
Indirect taxes .. ..	..	Increase in value of stocks ..	..
Gross operating surplus ..	..		
	_____		
Gross product .. ..	..		
Current purchases .. ..	..		
	_____		
Total turnover .. ..	..	Total turnover .. ..	..
	_____		_____

If production accounts in this form for all trading enterprises are consolidated, the following results are obtained. Current purchases by trading enterprises from other trading enterprises (that is, purchases other than for capital purposes) which appear as both current purchases and sales, cancel out on both sides, and purchases from overseas (imports of goods and services) remain on the left hand side, together with any charges paid for services of financial enterprises, e.g. bank service charges. On the right hand side, the only sales left are export sales, sales to buyers other than trading enterprises, that is, to consumers, public authorities and financial enterprises, and sales to trading enterprises for capital purposes, that is, purchases by these enterprises which are not currently charged to production account. (Problems associated with charges by financial enterprises are discussed below.)

**CONSOLIDATED PRODUCTION ACCOUNT FOR ALL TRADING ENTERPRISES**

	£		£
Wages and salaries .. ..	..	Sales to:	
Gross operating surplus ..	..	consumers .. ..	..
Indirect taxes .. ..	..	public authorities ..	..
	_____	financial enterprises ..	..
Gross product .. ..	..	trading enterprises for capi-	..
Charges for services by financial	..	tal purposes .. ..	..
enterprises .. ..	..	overseas (exports) ..	..
Imports of goods and services	..	Increase in value of stocks ..	..
	_____		
Total turnover .. ..	..	Total turnover .. ..	..
	_____		_____

The next stage is to develop a production account for the whole economy. The main additions needed are production accounts for public authorities and financial enterprises. (Public enterprises like railways, the Post Office, electricity and water supply undertakings, etc., are regarded as trading enterprises.) Financial enterprises are businesses whose main function is the borrowing and lending of money, rather than trading, and whose main source of income therefore is net interest receipts; they consist mainly of banks (cheque-paying and savings banks, and the Reserve Bank), life insurance and superannuation funds, and other money-lending companies (engaged in instalment credit, lending on mortgages, etc.).

The "production account" for public authorities and financial enterprises would be on the following lines.

**PRODUCTION ACCOUNT FOR PUBLIC AUTHORITIES (AND FINANCIAL ENTERPRISES)**

	£		£
Wages and salaries (= gross product) .. ..	..	Charges made for services to:	
Current purchases from trading enterprises .. ..	..	consumers .. ..	..
Imports of goods and services ..	..	trading enterprises ..	..
	_____	Balance .. ..	..
	_____		

business, persons and government, and this charge is balanced by imputed payments of interest of equal amount. If the charges are treated as part of the production account, the effect of this is to balance the receipts against expenses of the financial enterprises, or to produce an operating surplus if the imputation is enough to cover a "profit". Correspondingly, the operating surpluses of trading enterprises are reduced and the expenditure of persons and public authorities increased. A similar treatment whereby the cost of much government activity could be imputed as a cost to enterprises (or persons) is not normally applied, although it has at times been advocated on theoretical grounds. In this Year Book, neither of these categories of expenditure is allocated by means of such imputations. They are, instead, both treated as part of the final use of goods and services by the nation, that is, as part of communal consumption or capital expenditure. They are treated in this way because the services provided by these bodies (after deduction of charges actually made) are paid for by methods other than the use of the normal market price mechanism.

## § 2. The Structure of Sector Accounts

**1. General Framework.**—The previous section has demonstrated the significance of gross national production and expenditure as seen from the standpoint of a productive enterprise. It has shown the enterprise buying its materials and selling its own output of goods and services, the difference between its purchases and sales representing its own contribution to production, or value added, out of which it pays wages and appropriates its own profits. The obverse of these transactions could be seen by analysing the accounts of the groups who receive these incomes arising from production and in turn spend them on the goods and services produced.

When both sides of the transactions are looked at in this way there is in effect a closed circle. Materials and the services of factors of production are flowing into the enterprises and other productive units and final goods and services are flowing out into consumption, investment, etc. These flows of goods and services are matched by reverse flows of money. Producers are paying for their materials and also paying out factor incomes, and these (after a number of transfers, such as income taxes, and borrowing and lending transactions) are flowing back as payments from the final purchasers.

If it is realised that changes in stocks are allowed for in the pattern of final demand and that expenditure in excess of income is supported by an inflow of capital funds or withdrawal from overseas reserves, then these flows can be treated as a closed system which is completely balanced in any period of time. It is, therefore, usual to show these flows of goods and services within a wider framework of sector accounts which provide also a summary of many transactions in the economy other than those involving goods and services. In this way, it is possible to give a more comprehensive and useful picture of the main transactions and to indicate how the gross national product and expenditure aggregates are related to them.

It should be emphasized, however, that a great number of types of transactors can be distinguished, and each enters into many different types of transactions. Any system of accounts which can be presented in a convenient statistical summary form therefore involves a high degree of consolidation both of sectors and transactions. In the process of consolidation much detail is necessarily lost. This detail can be regained by a finer subdivision of the sectors and an elaboration of the accounts and transactions shown for each sector.

To understand the summary accounts, it is necessary to have an understanding of the general framework of the accounting structure which implicitly underlies them. In setting up such a framework, it is necessary to distinguish between a classification into sectors according to the nature of the transactors and a classification of transactions into accounts according to the nature of the activity with which they are concerned. In some cases, the distinction between these two classifications is quite clear-cut and obvious, but in other cases this is not so, and some compromise between the two is necessary. Thus it is clear that a production account records the transactions relevant to a particular type of activity, and that a number of different types of transactors can and do engage in production and so have production accounts. Companies would be one such group, and it is apparent that companies will, in addition to production accounts, have other accounts such as appropriation accounts to record the distribution of their operating surpluses, and capital accounts to record their purchases of capital assets and their borrowing and lending. Again, it is reasonable to regard persons or households as a sector in respect of their activities in receiving and spending incomes. But some of these persons also engage in operating unincorporated enterprises, an activity quite different from that of the majority in the group and one that

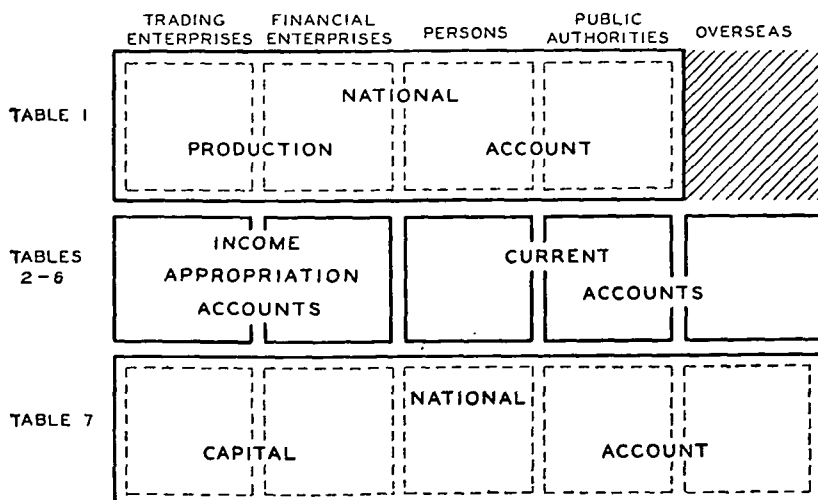

grades almost imperceptibly into that of the small family company. In this case, it is largely a matter of choice whether these productive activities should be recorded in a production account for a personal sector or divided off into a production account for an enterprises sector. Or again, if a public authority builds a school, it is appropriate to record this in a production account, the output of which can be transferred (sold) to a capital expenditure account, but if the school is built by contract, it is a matter of choice whether the transaction is passed through a public authority production account or shown as being sold direct from an enterprise production account to a public authority capital account.

In the summary accounts herein, four internal sectors are distinguished—persons, public authorities, financial enterprises and trading enterprises. In addition, there is an overseas sector which shows a summary of the transactions which overseas governments, persons and businesses enter into with Australian residents. All the sectors (except the overseas sector) engage in productive activity, but in the summary tables a national production account for the whole economy is shown instead of separate accounts for each sector. Similarly, the tables show only a national capital account for the economy, but a current (or income appropriation) account is shown for each sector. The system of accounts as thus envisaged is a completely articulated system in that a credit in any account involves a corresponding debit in some other account—or in the same account if a complete consolidation of the transactions appropriate to that account has not been carried through.

The framework of sectors and accounts underlying the form of social accounts shown in this Year Book is set out in the following diagram. As stated in the previous paragraph, each sector could be envisaged as having separate production, appropriation and capital accounts, but in the tables illustrated below the production and capital accounts have been combined. In the diagram, the solid rectangles depict the actual form of the summary tables, and the remaining rectangles show the full amount of detail which would be needed to provide the complete articulation of the accounts. The appropriate number of each table in Part II is shown on the left of the diagram.

ARTICULATION OF AUSTRALIAN NATIONAL ACCOUNTS

(THE TABLE NUMBERS REFER TO THE TABLES IN PART II)

The following paragraphs give a general account of the sectors and types of transactions, but details in regard to particular items are given in Part III in the notes on such individual items.

2. Definitions of the Sectors.—(i) The *personal sector* includes all persons and private non-profit organizations serving persons other than those included in the financial enterprises sector. Private non-profit organizations include bodies such as private schools, churches, trade unions and sporting and other clubs and societies, but exclude mutual life insurance societies and trustees of superannuation funds which are included in financial enterprises.

In the treatment of the activities of unincorporated enterprises, the convention is adopted here that current operations of these businesses are included in the trading enterprises sector, and the whole of the net income is regarded as transferred to the owners and included in the personal sector. All saving and investment activities of such owners, including capital expenditure in connexion with their businesses, are included in the national capital account. There is no item of saving corresponding to the undistributed income item of companies because of the practical and conceptual difficulties involved in separating the retained income of persons, as households, from that of the owners of the unincorporated enterprise.

The information available of the transactions of many non-profit organizations is inadequate, and in consequence of this, the actual statistical treatment may not be strictly in accord with the conceptual basis. However, most of these bodies are regarded as engaged in productive activity, and to this extent their transactions are included in the combined production account rather than in the personal current account. In principle, the current expenditure of these bodies is included as part of consumption expenditure and is recorded as a purchase by the personal current account from the national production account. Wages and salaries paid are included in the national production account. The wages of domestic servants, etc., are also recorded as purchases by the personal current account from the national production account.

(ii) The *public authority sector* excludes the current operations of public financial and trading enterprises, which are included in other sectors, but otherwise includes the whole of the activities of the Commonwealth Government, State and local governments and semi-governmental bodies set up or controlled by Commonwealth or State governments. *Local government authorities* are elected bodies set up under local government Acts to carry out government functions in defined areas. *Semi-governmental authorities* are other bodies created by or under legislation to carry out defined activities on behalf of a government, or bodies taken over and controlled by governments for the purpose of carrying on such activities. They are engaged mostly in running business enterprises, but not necessarily so; they include also universities, public hospitals, public libraries, parks, etc. *Public enterprises* (trading and financial) are defined as bodies which aim at covering the bulk of their expenses by revenue either from sales of goods and services (trading), or by charges for services and net interest receipts (financial). Their current operations are included in the two enterprise sectors whether their accounts are included in the government budgets (railways, Postmaster-General's Department, etc.), or whether they are semi-governmental authorities. However, the whole of their net income is regarded as transferred to the public authority sector.

(iii) The *financial enterprises sector* includes both private and public financial enterprises. These are organizations which are regarded as providing the financial mechanism for the functioning of the economy rather than producing or distributing goods and services. In one way or another, they are engaged mainly in the borrowing and lending of money. This borrowing and lending may be of the comparatively short-term and constantly changing type, as in the case of banks, instalment credit companies, and short-term money market companies, or it may be long-term, as in the case of co-operative building societies, life insurance companies and superannuation funds. It might be noted too, that this sector includes both profit-making bodies such as banks and instalment credit companies, non-profit making organizations such as co-operative housing societies and trustees of superannuation funds, and mutual life insurance societies in which the whole of the profits after tax, are distributed to the policy holders.

It is a feature of most of these enterprises that they do not charge directly, or at least not in full, for the services they render, and their expenditure is largely financed by net receipts of interest, etc. As already explained, the output of financial enterprises is, by the convention, adopted, valued at cost. Since the profits of these enterprises are attributable to their property income (which is treated as transfer income, not as factor income), no item of operating surplus is included in the national production account, nor therefore in gross national product, to which their contribution is measured by wages and salaries paid.

The wages and other expenses of life insurance companies are regarded as being met out of a charge on premium income and are included in personal consumption expenditure. (The same treatment could reasonably be applied to the expenses of separately constituted private superannuation funds, but in practice these are normally paid by the employer as part of his operating expenses.) For the other financial enterprises there appears no satisfactory way of apportioning these expenses between the borrowers and the lenders. The

expenses of these enterprises have therefore been treated as a final use of goods and services in the same way as government expenditure, and are shown as a purchase in the financial enterprises income appropriation account from the national production account.

Net premium income (after deduction of expenses) and benefits paid by life insurance and superannuation funds are treated as transfers between persons and financial enterprises on capital account. Life insurance and superannuation funds are therefore included in the financial enterprises appropriation account only in respect of their investment income, their net company income, and their saving (retained investment income of insurance funds).

Enterprises at present included in this sector include banks (including the Reserve Bank of Australia), short-term money market companies, life insurance companies, superannuation funds, instalment credit companies, building societies, and the mortgage lending departments of housing commissions and other public authorities. There are other groups primarily engaged in borrowing and lending activities but not included here mainly because there is inadequate information. These are development finance, factoring and investment companies. In the absence of specific analysis, these companies are included with trading enterprises. General insurance companies are not included in the financial enterprise sector as their main activity is not the borrowing and lending of money. Unit trusts are regarded as part of the personal sector.

(iv) The *trading enterprises sector* includes all business undertakings engaged in producing goods and services. Thus it includes undertakings engaged in primary production, mining, secondary industries, building and construction, and service industries (transport, trade, general insurance, entertainment, professional services, etc.). Enterprises include companies, public enterprises, partnerships and self-employed persons, including farmers. Owners of all dwellings are included for reasons given above.

(v) The *oversea sector* accounts record all transactions between Australian persons, businesses and governments, and oversea residents. Their scope is therefore the same as those of the balance of payments. However, within the framework of the national accounts this sector is treated differently from a normal balance of payments table, in that it records transactions from the oversea point of view. Thus Australian imports appear as credits to non-residents, and exports as debits to non-residents. The oversea balance on current account is the equivalent of an Australian deficit on current account, and is shown in the national capital account as representing a source of capital funds to Australia. (See also pp. 547-52 of this Year Book.)

3. Description of the Accounts.—(i) *National Production Account*. In this Year Book, as explained, the national production account is a consolidation of the production accounts of each sector. The production account is shown as receiving revenue from the sale of goods and services to final buyers; all intermediate goods and services are cancelled out, since, as pointed out above, they represent a cost to one producer to offset the revenue of the other. On the payments side are shown the payments of indirect taxes, and, since the accounts are presented from the point of view of the producing unit, the wages and salaries paid to employees. The balance is the gross operating surplus which is carried to the trading enterprises income appropriation account.

The inclusion in the production account of the gross operating surpluses of various types of business according to legal form of organization suggests the possibility of a division of the production account for these sub-sectors. However, any such division presents difficulties of data, because purchases and sales of intermediate products do not cancel out within a sub-sector and must therefore be identified and entered in the accounts. A dissection of the production account by industry is frequently made, and when fully carried through leads to an input-output type of presentation. This cuts across the sectors used here since all productive units are classified by industry in such a presentation, without regard to institutional form.

(ii) *The Trading Enterprises Income Appropriation Account* is shown as receiving the gross operating surpluses from the national production account, and dividends, non-dwelling rent and interest from other sectors. The allocation of this total to depreciation allowances, and to various transfer payments (taxes, dividends, interest, etc.) is shown on the appropriation side. As pointed out above, all net income of unincorporated enterprises is treated as being transferred to persons. Any income of trading companies not distributed but retained for use in the business is shown as undistributed income and transferred to the national capital account either directly or by way of the oversea current account (where accruing to non-residents).

As far as possible, interest, non-dwelling rent and dividends are recorded on a fully consolidated basis in this account. Dividend receipts are therefore only dividends received from financial enterprises and from overseas, since other inter-company payments cancel out. Similarly, rent and interest items include only receipts and payments between the trading enterprise sector and the other four sectors.

(iii) The *Financial Enterprises Income Appropriation Account* is in the main similar to the preceding account. There is, however, no operating surplus, as property income is the sole receipt. The net expenditure of these enterprises is shown on the outlay side, for reasons given above. The retained investment income (i.e., after payment of taxes, interest, etc.) of life insurance and superannuation funds is shown here as a transfer to the national capital account. Superannuation contributions and life insurance premiums (net of administrative costs) are treated as a capital transfer from persons to financial enterprises, and claims as a capital transfer to persons, and therefore do not appear in this account. Rent, interest, and dividends received by persons are assumed to be on personal account, and consequently there are no unincorporated financial enterprises and no net income of unincorporated enterprises in this sector.

(iv) The *Personal Current Account* records all the receipts on current account whether of factor incomes (wages and salaries) or transfer incomes (interest, etc., dividends, net business incomes, cash benefits from public authorities and remittances from overseas). On the payments side are shown current payments for goods and services and transfer payments (taxes, interest, etc., remittances to overseas). The balance is transferred to the national capital account under the heading of saving.

The treatment of life insurance and superannuation insofar as it affects the personal current account has been commented on above. Instalment credit companies are included in the financial enterprises sector, and their charges are treated as property income. Personal consumption expenditure is valued at the cash price, excluding these charges. The difference between the cash price and the deposit is treated as borrowing from financial enterprises which is subsequently repaid by instalments, and consequently is reflected in saving.

Since estate and gift duties are treated as current receipts by governments, they are for the sake of simplicity shown as current payments by persons even though the payers may regard them as of a capital nature. All personal gifts and similar transfers to or from overseas are also treated as current, so that the current account for the overseas sector in this publication is identical in concept with the corresponding accounts in the *Australian Balance of Payments*. Personal remittances to and from overseas include items such as legacies and migrants' funds and effects, which the persons concerned may think of as of a capital nature, but which do not result in the creation of any overseas assets or liabilities.

The current expenditure of non-profit organizations serving persons is included in personal consumption expenditure. Expenditure on buildings (e.g. churches, private schools, clubs, etc.) is treated as capital expenditure and excluded from this account.

(v) The *Public Authorities Current Account* reflects a distinction between current and capital expenditure, which is necessarily arbitrary in some measure, and has been made on the basis of excluding from the current account expenditure on public works and increase in stocks. Expenditure on public works is taken to include new buildings, construction, plant and machinery and any replacement of assets charged to loan funds or capital works votes. It includes capital expenditure of public enterprises, including replacements of assets charged to depreciation reserves but not those charged directly to working expenses. It includes all expenditure on roads, for which a satisfactory distinction between new works and maintenance cannot be made, but excludes all defence expenditure, which is included in the current account. As was indicated earlier, no attempt is made to attribute income or depreciation to assets acquired and used by public authorities.

The income of public enterprises shown in this account is derived by deducting from their operating surplus any depreciation shown by these enterprises in their published accounts except in the case of enterprises (e.g. railways and Postmaster-General's Department) whose accounts are included in the Commonwealth or State budgets and are for the present analysed on the basis of these cash accounts in which depreciation is not deducted. These depreciation provisions are included in the capital account. As in the case of persons, all overseas gifts are included in current account. These include gifts for international relief, technical assistance, etc., grants, and other expenditure in connexion with the administration of Papua and New Guinea.

(vi) The *Overseas Current Account* records all transactions of a current nature between Australian and overseas residents. Items in this account have for the most part been commented on in the sections dealing with the internal sectors and accounts, and are dealt with more fully in the Bureau's publications on balance of payments. It should be emphasized that this account is shown here from the point of view of overseas residents, i.e. receipts from Australia are shown as credits, and payments to Australia as debits. Australians temporarily overseas are regarded as residents, and visitors to Australia as non-residents.

(vii) Capital transactions of the four domestic sectors and the net deficit on current account with overseas are shown in the *National Capital Account*. On the receipts side are shown the savings of the various sectors—saving by enterprises (mainly depreciation allowances and undistributed income of companies), personal saving (including the excess of life insurance and superannuation contributions over claims and administrative expenses, and funds devoted to capital formation by private non-profit institutions), the retained investment income of insurance funds (life insurance and superannuation), and the public authority surplus on current account. This last item includes any retained income of public enterprises, since the whole of their income has been treated as transferred to public authorities and not to a separate capital account for these enterprises. Apparent net capital inflow from overseas and withdrawal from monetary reserves is also reflected in the item "deficit on current account with overseas". On the payments side are shown the purchases by all sectors of new buildings and capital equipment and the increase in the value of stocks. The private component of capital expenditure includes new dwellings and major alterations to dwellings and expenditure of a capital nature by private non-profit institutions (churches, schools, clubs, etc.), but excludes motor vehicles for personal use and other durable consumer goods, which are included in personal consumption expenditure.

4. **Statistical Discrepancy.**—Direct estimates of gross national expenditure have been compiled, and gross national product has been estimated, by adding estimates of factor incomes, depreciation and indirect taxes. However, when the best estimates have been made of all the income and expenditure items in the national income and expenditure accounts, and adjusted for the difference between imports and exports of goods and services, there remains a discrepancy between the two totals. This discrepancy is shown explicitly. Its inclusion on the expenditure side of the national production account implies nothing in regard to the relative accuracy of the estimates of gross national product or expenditure. Similarly, its inclusion in the capital account does not imply that the estimates in this table are less accurate than those in other tables, or that capital expenditure estimates are less accurate than the estimates on the receipts side of this account.

### § 3. Gross National Product and Expenditure, Estimates at Constant Prices

1. **General.**—Estimates of gross national expenditure at constant prices are shown for the main components. The table is included to meet the need for estimates of the principal aggregates in which the direct effects of the changes in prices which have occurred over the period have been removed. This amounts to an attempt to express every component item of expenditure as the product of a price and a quantity, instead of only as a value, and to substitute for the actual current prices the prices that ruled in the chosen base year. For various reasons this can only be done by means of approximations and assumptions, and this should be borne in mind in the interpretation and use of the results.

2. **Estimates of Gross National Expenditure at Constant Prices.**—Over a considerable part of personal consumption expenditure, it is possible to identify specific units of quantity and price, and revalue the quantities at base-year prices. For example, the value of personal expenditure on most items of food, drink and tobacco has been estimated as the product of quantities consumed and prices paid, and it is comparatively easy and straightforward to revalue at 1959–60 prices by multiplying the quantities throughout by the average prices of that year. For items where the value, but not quantities, of personal consumption expenditure was available (for example clothing), the method used was to divide the values by a price index relevant to the item. As the available price indexes were of the type in which the prices are weighted by consumption in a base period, the results of this division were an approximation only to the desired results. (It can be shown that for consistency with the direct revaluation, a price index should be weighted by consumption in the given year

rather than by that of the base year.) Further approximation is involved in the numerous cases where the composition of an item, or the quality of the goods and services which it comprises, had changed during the period. Difficult cases of this sort include expenditure on television, the advent of which changed the composition of the electrical goods item substantially. In addition, there were changes in the type and quality of television sets themselves, as there were also in motor cars and other consumer durable goods. For certain other items of personal consumption expenditure, the lack of homogeneous units of consumption prevented either quantity or relevant price series from being used (e.g. gambling, household insurance), and in these cases the values were divided by "implicit price indexes" for the remainder of personal consumption expenditure. The latter group, however, was a relatively small proportion of personal consumption expenditure, the great bulk of which was expressed at constant prices either by dividing values by price indexes or by revaluing quantities directly.

With the remaining components of gross national expenditure, a greater degree of approximation and assumption was involved. For many items of capital expenditure by public and private sectors, homogeneous and standard components of expenditure do not exist. In these cases, it is not possible to express the values in successive years as the products of prices and standard units of quantity at all. Major civil engineering projects such as dams do not form a homogeneous series, nor do power stations, public buildings, blast furnaces or steel mills. Even standard models of such items as aeroplanes and diesel locomotives are replaced in time by entirely new models. In these circumstances, it was possible to proceed only by making assumptions about the changes in prices which would have occurred had prices for the component in question existed. An example will serve to illustrate the various types of alternative assumptions possible, depending on the data available.

Expenditure on the construction of power stations might conceivably be measured by generating capacity installed, valued at the cost per unit of capacity in the base year; or it might be measured by the value of the expenditure divided by an index of the cost per unit of capacity; or it might be broken down into component operations, such as excavation, or the pouring of concrete, for each of which standard contract prices may be available; or it might be broken down into the cost of the component items of labour and materials, for each of which price indexes may be available. It is apparent that the results which follow from one assumption may be very different from those which follow from another. Costs in terms of labour and materials may have risen; but costs per unit of capacity may well have fallen because of the installation of larger and more efficient generators, or because profit margins or plant overheads in the construction industry have fallen, or because of increased efficiency of construction. For most items of public capital expenditure, and for private construction expenditure other than housing, lack of data made it necessary to adopt the assumption that the expenditure could be revalued in terms of the prices of labour and materials. The estimates resulting from such a method therefore have considerable limitations for many uses, for example, in studies of productivity.

With current expenditure by public authorities, it was necessary to decide whether the quantities and prices required were those for goods and services bought by public authorities (for example, stationery, schoolteachers' services, small arms) or for those supplied by them (e.g. education, defence). It was decided that it was impracticable to measure and revalue the goods and services supplied by public authorities, and the revaluation was applied to the goods and services bought by them, including the services of employees. Defence presented particularly difficult problems in this respect, for reasons similar to those discussed above.

There is a particular difficulty associated with estimation of changes in stocks at constant prices, because it involves dividing changes in the value of stocks between changes in the physical quantities of all component items and changes due to fluctuations in the prices at which stocks are valued. This second component may be due to a revaluation of existing stocks, or more commonly, to the replacement of stocks used or disposed of with new stocks at different prices. In either case, it has something of the nature of a capital gain or loss, but accounting methods, especially for taxation purposes, frequently have the effect of treating such gains and losses as income.

The information available on which to base an estimate of stock revaluation is very limited, and hence any estimate made is subject to an appreciable margin of error. Because of this and because of the difficulties of allocating any estimate of the revaluation component by industry and by type or organization, such a revaluation adjustment was not carried through in the current price estimates of gross national product and expenditure. Consequently, it was necessary to estimate and eliminate the total of such stock revaluation in the estimates at constant prices.

The method adopted was to revalue opening stocks at prices applicable to the closing stocks of the same year, using whatever available indexes were considered to be the most appropriate in each category. The difference between the revalued figure obtained in this manner and the book value of stocks at the beginning of the year was taken as an estimate of stock revaluation. These amounts were then deducted from the total change in the book value of stocks to arrive at a figure which was assumed to measure changes due to changes in quantities only, and an estimate based on this latter component alone was included in the constant price estimate.

The difficulties encountered in expressing at constant prices a considerable proportion of gross national expenditure, it will be seen, are due to reasons other than lack of data, as well as to data problems. The user of the resulting estimates should bear this in mind in assessing their precision in relation to the intended use. This precision, such as it is, rests mainly on the fact that, for a high proportion of the components of the estimates (principally components of personal consumption expenditure), reasonably homogeneous series are conceivable—and available—for the measurement of quantities of goods and services going into final use—or reasonably good price series for the revaluation of expenditure on them.

**3. Estimation of Gross National Product at Constant Prices.**—The aggregates at constant prices discussed above have all been essentially flows of goods and services taking place during the period in question, namely, those goods and services forming part of gross national expenditure, or, in other words, entering final use in the economy. The same is not true of gross national product. The essential nature of gross national product is that it is the value added to goods and services by productive activity in the economy. It is not in itself a flow of goods and services. The question then is how it can be expressed at constant prices, since it has no units of quantity to be revalued. Gross national product can be thought of in two senses. In the first, it is the source of the major forms of income, namely, wages and salaries and gross operating surplus, and in this sense it cannot be expressed at constant prices.

However, it can also be thought of as the difference between the value of output and the value of materials used in production, that is, as the difference between the values of two flows of goods and services. By revaluing each of these flows it is possible to revalue gross national product in this sense.

The nature of gross national product and its relationship to gross national expenditure were illustrated earlier by reference to simplified production accounts. The contribution to gross national product of a trading enterprise was shown to be the difference between the value of its sales (and stock change) and its current purchases. Consolidated for all trading enterprises, and supplemented by the contribution to gross national product of other sectors of the economy this relationship was shown to lead to the identity:—

Gross national product = Gross national expenditure *plus* Exports of goods and services *minus* Imports of goods and services.

This relationship has been used in the estimation of gross national product at constant prices in this Year Book. The identity holds for constant-price revaluations, as well as for the original values of the aggregates, apart from the approximations of measurement. If price and quantity data were available, each item of sales and purchases of trading enterprises could be revalued at the prices of a base year. Consolidated, and supplemented as above, this would lead to the same identity, with the items expressed at constant prices.

Availability of data at present makes it more practicable to take the aggregate estimates of gross national expenditure at constant prices supplemented by similar estimates for exports and imports of goods and services for the whole economy, than to attempt to revalue the sales and purchases of trading enterprises firm by firm or industry by industry. Hence the "aggregate" revaluation adopted in this Year Book.

Gross national product at constant prices as just described (and as shown in the table) varies with changes in the quantities of goods and services produced. There is, however, a way in which "gross national product" considered as a source of incomes, is sometimes expressed, not at constant prices, but "in real terms". Considered as a source of factor incomes, gross national product can be expressed in terms of the purchasing power of factor incomes over the types of goods and services on which they tend to be spent. This is an extension of the meaning underlying such terms as "real wages" or "real personal income", where these income items are expressed in terms of their purchasing power over consumable goods and services by being divided by an index of consumer prices. Extended to gross national product, this concept would require the use of an index of the prices of all the types

of goods and services on which the factor incomes derived from gross national product may ultimately be spent—in other words the whole range of goods and services entering final use in the economy, that is, all the components of gross national expenditure. An estimate of gross national product adjusted in this way, unlike the estimates at constant prices given in this Year Book, will increase or decrease with changes in the terms of international trade, since such changes affect the purchasing power of incomes without in themselves directly affecting the quantities of goods and services produced.

#### § 4. Reliability and Future Revisions

Estimates of national income and expenditure are necessarily prepared from a very wide range of statistical information, some of which is available quickly, some of it only with a delay of several years after the period to which it relates. Some of it is closely related to the desired national income concepts, but some of it is not completely satisfactory in various respects, including coverage, concepts and timing. Efforts are being made constantly to improve both the quality and quantity of the basic data. In addition, considerable efforts have been made in recent years to increase the speed with which statistics become available. This has tended to make some of the preliminary estimates of national income and expenditure items more reliable. However, not all data can be speeded up significantly and estimates for the most recent years are necessarily subject to revision.

This applies particularly to estimates based on taxation statistics—income of companies, non-farm unincorporated enterprises, depreciation and part of gross private fixed investment—which are subject to substantial revisions for the last two years, as taxation statistics tabulations are not available until about 22 months after the end of the financial year. Estimates relating to unincorporated enterprises are subject to further minor adjustments when results of late assessments are incorporated into the estimates another four years later.

It is not possible to put precise limits on the degree of revision likely in any particular series, nor to state degrees of reliability in any exact statistical sense. These depend in large part on the range and quality of the basic statistical data. The following are examples only of the sort of problems which can arise in relation to reliability and revisions, and are not intended as a comprehensive survey in any sense.

(i) Estimates of wages are based on pay-roll tax and other returns of employment and wages. These returns are considered to be reliable and year-to-year revisions in estimates of wages are normally small. The returns, however, cover only some 80 to 90 per cent. of total employment, and must be supplemented by estimates of the remainder. Where employment estimates are revised as a result of a census of population, or for other reasons, there will be a corresponding revision to wage estimates for past years.

(ii) Estimates of incomes of unincorporated enterprises are based largely on tax data. There is an inevitable delay of about two years in the availability of the main tax tabulations (and longer for the final tabulations), so that the estimates are subject to revision for several years. In addition, there are considerable uncertainties in regard to the total number of income earners in this category and on the degree of evasion and understatement in the returns, which means that even the final estimates are not exact.

(iii) Company income estimates are also based on tax data. Although these are thought to be much more complete and reliable than the corresponding data for unincorporated enterprises, they are subject to the limitation that they do not refer to a uniform year but to the various accounting years of individual companies. This must obviously have some effect on the reliability of year-to-year changes, and it is proposed to make a change in this respect as soon as data from alternative sources are available over a sufficient period to enable adjustments to be made.

(iv) Figures for the public authority sector are based mostly on published data for Commonwealth and State Governments and semi-governmental authorities and collected data for local government. The quality of the data is good, and the coverage in respect of semi-governmental bodies is satisfactory. However, Commonwealth and State accounts are on a cash basis, and this at times distorts movements from year to year, and involves some inconsistencies with data for other sectors which are generally on an accrual basis.

## PART II. TABLES

NOTE.—Items in these tables are consecutively numbered from 1 to 28, with or without the addition of a letter, and this system is used to identify the corresponding credit and debit entries in the accounts, and as a key to the notes on pages 1277–82. In some cases the items correspond exactly, while in other cases an entry in one table is the sum of two or more entries in other tables; here the total is given a number, and the components have a number and a letter. In the remaining type of case, all entries are given the same number and a distinguishing letter, because in this group one item is not the sum of one or more entries. The relationship between these items can still be traced through because the sum of all credit entries must equal the sum of all debit entries.

## PART III. EXPLANATORY NOTES

## Tables 1 to 7.

*Item 1. Wages, salaries and supplements.*—Payments in the nature of wages and salaries as defined for pay-roll tax, including allowances for income in kind (board and quarters, etc.), together with supplements to wages, and pay and allowances of members of the forces. In addition to wages and salaries paid by employers subject to pay-roll tax, it includes wages and salaries paid by employers not subject to pay-roll tax, based on estimates of employment and average earnings. Supplements consist of employers' contributions to pension and superannuation funds, direct payments of pensions and retiring allowances, and amounts paid as workers' compensation for injuries. Pay and allowances of members of the forces consist of active pay, field allowances, subsistence allowances, dependants' allowances and the value to the members of the forces of food, clothing, normal medical attention, etc., supplied in kind.

*Item 2. Gross operating surplus of trading enterprises.*—The operating surplus, before deduction of depreciation provisions or of dividends, interest, rent and royalties and direct taxes payable, of all trading enterprises operating in Australia. Trading enterprises include all companies, public enterprises, partnerships and self-employed persons engaged in the production of goods and services for sale, but exclude financial enterprises. Public trading enterprises are government undertakings which attempt to cover all, or a substantial part, of their costs through charges made to the public for the sale of goods and services. All owners of dwellings are included whether they let the dwellings or occupy them themselves. Trading enterprises' gross operating surplus is shown separately for companies (item 2a), unincorporated enterprises (item 2b), dwellings owned by persons (item 2c) and public enterprises (item 2d).

*Item 3. Indirect taxes less subsidies.*—Indirect taxes comprise taxes on purchases, sales or other transactions, or on the ownership of property, etc., paid by enterprises, public authorities and persons. Includes licence fees in respect of rights conferred, such as liquor licenses, etc. Subsidies are transfer payments made with the object of assisting certain industries. Such payments may take the form of bounties on goods produced, subsidies to producers to ensure a guaranteed price, payments to transport undertakings to permit a reduction of freights on certain classes of goods, assistance to producers, etc.

*Item 4. Imports of goods and services.*—The value of goods imported from overseas and amounts payable overseas for services. The item is shown sub-divided into the following.

*Item 4a. Imports f.o.b.* are the recorded trade figures adjusted for the purpose of balance of payments estimates. The principal adjustments are the addition of unrecorded imports, including ships and aircraft for use on overseas routes, the subtraction from the trade figures of films imported on a rental basis, imports of gold, goods for repair and goods intended for re-export, and the deduction of a "valuation adjustment" representing the excess of the recorded value of imports (based on value for duty) over the estimated "selling price" value to the importer as shown on invoices accompanying customs entries.

*Item 4b. Transportation* includes freight payable to foreign carriers and shipping companies on goods imported into Australia and transported between Australian ports, fares payable in Australia, the overseas expenditure of Australian ships, and premiums (less claims) on marine insurance payable overseas on imports into Australia, less the net earnings on marine insurance business undertaken by Australian firms in respect of both exports and imports.

*Item 4c. Travel* is the net remittances in the form of travellers' cheques, etc., by Australians visiting overseas for pleasure and for business.

*Item 4d. Government transactions* comprise defence expenditure overseas, including the pay and allowances of personnel serving overseas, etc., expenditure overseas on diplomatic, consular and trade representation, contributions to international organizations, government pensions paid abroad, overseas expenditure on immigration and miscellaneous payments for services.

*Item 4e. Other goods and services* include cinema and television film rentals payable overseas, business expenses of Australian firms transacting business overseas, commissions, brokerage, value of repairs on goods previously exported for repair and return, etc.

*Item 5. Net current expenditure on goods and services—personal consumption.*—Net expenditure on goods and services for purposes of consumption by persons and private non-profit-making bodies serving persons. Excludes purchase of dwellings and capital expenditure by non-profit-making bodies (included in item 8), and maintenance of dwellings (treated as expenses of private enterprises), but includes personal expenditure on motor vehicles and other durable goods and the imputed dwelling rent of owner-occupiers. Purchase of motor vehicles is the estimated expenditure by persons on new motor vehicles, secondhand motor vehicles purchased from business enterprises and public authorities, and the net dealers' margins on purchases and sales of motor vehicles within the personal sector. Motor vehicles include cars and station wagons, commercial vehicles bought by persons, motor cycles and motor scooters. The value of income in kind (e.g. food produced and consumed on farms, board and lodging provided to employees) is included in both personal income and personal consumption expenditure, but goods chargeable to business (expense) accounts are excluded.

*Item 6. Net current expenditure on goods and services—financial enterprises.*—The current expenditure of banks, instalment credit companies, short-term money market companies and building societies after deduction of bank charges to customers. Charges by instalment credit companies are treated as interest receipts and therefore not offset against expenditure. Includes wages, salaries and supplements, indirect taxes and other payments for goods and services. Public financial enterprises are government businesses (mainly banks, including the Reserve Bank) which operate in a manner analogous to other financial enterprises, in that their current expenditure is largely financed by the net receipt of interest. The interest received by government housing authorities is treated as a receipt by government financial enterprises, but their other receipts, including net profit on sale of houses, and all their expenditure, are included in those of government trading enterprises.

*Item 7. Net current expenditure on goods and services—public authorities.*—Expenditure by public authorities (not public enterprises) which does not result in the creation of fixed tangible assets or in the acquisition of land, buildings or secondhand goods (other than imported). It comprises expenditure on wages, salaries, and supplements, and on currently produced goods and services; fees, etc., charged by public authorities for goods sold and services rendered are offset against purchases. Net expenditure overseas by public authorities and purchases from public enterprises are included. All expenditure on defence is classified as current.

*Item 8. Gross fixed capital expenditure—private.*—Expenditure on fixed capital assets whether for replacement of, or addition to, existing assets. Includes expenditure on dwellings (item 8a), other building and construction (item 8b), and vehicles, plant, machinery, etc. (item 8c). Includes expenditure on secondhand assets (other than houses purchased from public authorities) as well as new assets, less sales of existing assets. Expenditure on ordinary repair and maintenance of fixed assets is excluded as being chargeable to current account. Major additions are, however, regarded as capital expenditure. New dwellings purchased by persons from public housing authorities are included in private capital expenditure.

*Item 9. Gross fixed capital expenditure—public enterprises.*—Expenditure on fixed capital assets, including wages and salaries paid by public enterprises in connexion with capital works.

*Item 10. Gross fixed capital expenditure—public authorities.*—Expenditure on durable fixed assets other than for defence purposes. All expenditure on roads, including maintenance, is classified as capital expenditure. Expenditure on housing, included in this item, includes the estimated expenditure on construction of dwellings for rental purposes, and hostels for migrants and others, but excludes houses built for sale, which are included in private capital expenditure. Also excludes advances by War Service Homes Division and other authorities for financing home purchase schemes.

*Item 11. Increase in value of stocks.*—The change in book value of non-farm stocks held by trading enterprises and public authorities (item 11b), and the change in the value of farm stocks (item 11a).

*Item 12. Statistical discrepancy.*—The difference between the sum of the estimates of gross national product and imports of goods and services on the one hand and the sum of the estimates of components of gross national expenditure and exports of goods and services on the other hand. Conceptually these two totals should be the same. Inclusion of the discrepancy on the expenditure side of the national production account implies nothing in regard to the relative accuracy of the estimates of gross national product and expenditure.

Similarly its inclusion in the capital account does not indicate that the estimates in this table are less accurate than those in other tables, or that capital expenditure estimates are less accurate than the estimates on the receipts side of this account.

*Item 13. Exports of goods and services.*—The value of goods exported to overseas, and receipts from overseas for other goods and services. The item is shown sub-divided into the following.

*Item 13a. Exports f.o.b.* are the recorded trade figures adjusted for balance of payments purposes. The adjustments made are similar to those made to the recorded import figures except that no change is made to the basis of valuation. The adjustment for non-recorded exports includes exports of uranium ores.

*Item 13b. Transportation* comprises the overseas earnings of ships owned or chartered by Australian operators, the overseas remittances to Australian domestic and international airline operators and the expenditure of overseas carriers in Australian ports.

*Item 13c. Travel* is net receipts of travellers' cheques, etc., from persons visiting Australia for pleasure and for business.

*Item 13d. Government transactions* include receipts for services rendered by the Australian Government to other governments, and other payments in Australia by foreign governments on diplomatic, consular and trade representation and for pensions paid in Australia.

*Item 13e. Other goods and services* include the value of Australian gold production less net industrial usage, business expenses of overseas firms in Australia and commissions, brokerage, etc.

*Item 14. Depreciation allowances.*—The financial provisions made for depreciation which are deducted to obtain net income. The estimates represent, in the main, amounts allowed under Income Tax legislation. Include the estimated depreciation on tenanted and owner-occupied dwellings owned by persons and provisions made by public enterprises. This item is divided into depreciation allowances of trading enterprises (item 14a) and of financial enterprises (item 14b).

*Item 15. Interest, etc.*—Comprises interest, non-dwelling rent and royalties. This item appears in most accounts as receipts and payments of interest, etc., but in the case of some entries the amounts are combined with dividends and overseas profits. The item is shown net of intra-sector receipts and payments. Payments of interest, etc., by public enterprises is included in item 15g. Payments of interest, etc., by trading enterprises (item 15a) include interest charged on borrowing for the purchase of houses by persons, which is treated as an appropriation from the gross operating surplus of dwellings owned by persons. Non-dwelling rent includes only actual payments. It is estimated net of the expenses of the owner of the premises on rates, maintenance, etc., which are treated as working expenses of the enterprises renting the building. Royalties include mining and forestry royalties paid to public authorities, and royalties and fees for use of trade marks, patents, etc., paid overseas.

*Item 16. Income tax, estate and gift duties.*—Income tax payable by trading and financial companies (item 16a and 16b) and persons (item 16c) are amounts payable at rates of taxation applicable in each year. Income tax payable by companies in respect of the most recent year's income has been estimated on the basis of rates of tax applicable in respect of the preceding year's income. The difference between the amounts of income tax payable and the cash receipts by public authorities (part of item 16e) is included in item 16f. Income taxes payable by persons (item 16c) include the total income taxes payable by individuals on all forms of income whether wages, business income or property income. Estate and gift duties (item 16d) are the amounts actually paid by persons in each year.

*Item 17. Dividends.*—All receipts and payments of dividends, including dividends payable overseas and the remitted profits of Australian branches of overseas enterprises. Dividends payable are the amount of dividends declared by trading and financial companies in respect of the current year. Receipts of dividends (other than dividends from overseas subsidiaries) are cash receipts, and the difference between the amount payable and received is included in item 17h. The items are shown net of intra-sector receipts and payments.

*Item 18. Undistributed income.*—The undistributed income of companies comprising trading enterprises (item 18a) and financial enterprises (item 18c) is the balance of total company income, including profits receivable from overseas (items 18b and 18d) after deducting income tax and dividends payable, and is equal to the sum of undistributed income accruing to oversea residents (item 18f) and undistributed company income accruing to residents (item 18g). Profits receivable from overseas are the unremitted part of profits earned by oversea branches of Australian companies and undistributed profits of oversea subsidiaries.

*Item 19. Unincorporated enterprises income.*—The gross operating surplus of unincorporated enterprises less interest, etc., paid, and depreciation allowances. It is divided into the income of farm unincorporated enterprises (item 19a), and the income of all other unincorporated enterprises (item 19b).

*Item 20. Personal income from dwelling rent.*—The gross operating surplus accruing to dwellings owned by persons less interest, etc., paid, and depreciation allowances.

*Item 21. Public enterprises income.*—Includes income of public trading enterprises (item 21a) and income of public financial enterprises (item 21b). For trading enterprises it is equal to gross operating surplus after the deduction of depreciation allowances; for financial enterprises it is the net income after depreciation allowances, interest paid, and net current expenditure on goods and services by government banks are deducted from total receipts of interest and non-dwelling rent. Depreciation allowances deducted in arriving at the income of public trading enterprises are those shown in their published accounts, except in the case of enterprises whose accounts are included in the Commonwealth or State budgets and are analysed on the basis of their cash accounts in which depreciation is not deducted. In particular, no amount is included for the Post Office, or most railways, since cash accounts for these enterprises have been used.

*Item 22. Retained investment income of life insurance funds, etc.*—Total dividends, interest, etc., received by life insurance offices and superannuation funds less depreciation allowances, income tax and dividends payable, and the undistributed income of non-mutual life insurance companies.

*Item 23. Oversea gifts.*—All transfers to or from overseas on public authority or private account which are not payments for goods and services or payments of dividends, interest, etc.

*Personal remittances overseas (item 23a)* include gifts of money by resident persons and private institutions, payments for sustenance and transfers of emigrants' funds and legacies from Australia to overseas, together with the value of goods exported as personal effects and gifts.

*Personal remittances from overseas (item 23b)* include gifts of money received from non-resident persons and private institutions, receipts for sustenance and transfers of immigrants' funds and legacies from overseas to Australia, together with the value of goods imported as personal effects and gifts.

*Public authority overseas grants (item 23c)* include grants to, and payments made on behalf of, the Territories of Papua and New Guinea, and expenditure overseas in respect of technical assistance and relief under the Colombo Plan and United Nations projects. Payments to United Nations and other organizations due by virtue of membership of these organizations are included in net current expenditure on goods and services.

*Item 24. Personal saving.*—The excess of personal income over personal consumption expenditure, interest paid, income tax payable and estate and gift duties paid and remittances overseas. It includes saving through life insurance and superannuation funds (defined as premiums, etc., paid less claims, etc., received and administrative expenses of life insurance offices) and the increase in assets of marketing authorities. It includes also changes in holdings of cash and securities, the net increase in bank deposits less advances, the reduction in the outstanding advances of instalment credit companies to persons and unincorporated enterprises, and the increase in the equity of persons in dwellings and in capital equipment, buildings and stocks of unincorporated enterprises. Personal saving is the balancing item in the personal current account.

*Item 25. Cash benefits.*—These are current transfers to persons from public authorities in return for which no services are rendered or goods supplied. Principal components are scholarships; hospital, medical, pharmaceutical, maternity, sickness and unemployment benefits; child endowment; widows', age, invalid and repatriation pensions; and attendance money for waterside workers.

*Item 26. Grants towards private capital expenditure.*—Grants to meet part of capital costs of e.g., homes for aged persons and property for War Service Land Settlement.

*Item 27. Public authorities surplus on current account.*—This is the excess of revenue, including income of public enterprises, over current outlay. Current outlay includes current expenditure on goods and services, as defined in item 7, and transfer payments (interest, cash benefits, subsidies, and overseas grants). The surplus is transferred to the capital account where it becomes part of total funds available for capital outlay.

*Item 28. Oversea balance on current account.*—The excess of payments to the rest of the world on current account over receipts from the rest of the world. In the National Capital Account it is shown divided into that part financed by drawing on Australia's overseas monetary reserves (item 28a) and net apparent capital inflow (item 28b).

**Table 8. Value of Main Aggregates at Current and Average 1959-60 Prices.**

This table shows estimates of gross national product and gross national expenditure and the principal components of the latter at current and average 1959-60 prices. Estimates at constant prices can be made only on the basis of approximations and assumptions, and this should be borne in mind in the interpretation and use of the results.

Where possible, the method adopted is to make a direct revaluation of each item at constant prices instead of the prices at which quantities are bought or consumed. However, particularly for many items of capital expenditure by public and private sectors, for which homogeneous and standard components of expenditure do not exist, it is not possible to express the values in successive years as the product of prices and standard units of quantity. Where this is not practicable, the method adopted is to divide the values by an appropriate price index, or by a substitute index of cost of production based on materials and wages. The estimates resulting from such a method therefore have considerable limitations for many uses, for example in studies of productivity. A broadly similar treatment was adopted in respect of current expenditure by public authorities, including expenditure on defence.

The information available on which to base an estimate of changes in stocks at constant prices is very limited and the estimate made is subject to an appreciable margin of error. It involves adjustment for stock revaluation, arising out of the replacement during the year of trading stocks with equivalent new stocks of a value different from that of the original stocks at the beginning of the year.

§ 3 of Part I (pp. 1265-8) contains a fuller discussion of the conceptual problems involved in making these estimates, and Appendix C of *Australian National Accounts, National Income and Expenditure, 1948-49 to 1962-63* contains a brief account of the sources and methods used in preparing the estimates.

**Table 9. Relationship of Main Aggregates.**

*Gross National Expenditure* is the total market value of all goods and services bought for use within the Australian economy. These goods and services are bought for current use by persons, financial enterprises and public authorities; for replacing or adding to capital equipment (gross fixed capital expenditure, public and private); and for adding to stocks.

*Gross National Product* is the total market value of goods and services produced in Australia after deducting the cost of goods and services (other than capital equipment) used in the process of production.

*Gross National Product at Factor Cost* is that part of the cost of producing the gross national product which consists of gross payments to factors of production (labour, land, capital or enterprise). It represents the value added by these factors in the process of production and is equivalent to gross national product less indirect taxes plus subsidies.

*Net National Product* is that part of the value added within a given period by factors of production (labour, land, capital or enterprise) which accrues as income to their suppliers after allowing for the depreciation of capital equipment. It is equivalent to gross national product at factor cost less depreciation allowances of trading enterprises.

*National Income* is the net income accruing to Australian residents from their services in supplying factors of production (labour, land, capital or enterprise) in Australia or overseas. It is equivalent to net national product less income payable overseas, plus income receivable from overseas.

*Personal Income* is the total income, whether in cash or kind, received by persons normally resident in Australia. It includes both income received in return for productive activity (such as wages, incomes of unincorporated enterprises, etc.) and transfer incomes (such as cash social service benefits, interest, etc.). Personal income also includes any property income received by non-taxable organizations such as private schools, churches, charitable organizations, etc.

## DIARY OF PRINCIPAL ECONOMIC EVENTS, 1963-64

The principal economic events in earlier years were shown in the following issues:—

YEARS	OFFICIAL YEAR BOOK No.				PAGES		
1931 to 1938 .. .. .	33	..	..	..	..	..	968-77
1939 to 1944 .. .. .	36	..	..	..	..	..	1129-41
1945 to 1948 .. .. .	37	..	..	..	..	..	1235-45
1949 to 1951 .. .. .	39	..	..	..	..	..	1331-40
1952 to 1955 .. .. .	42	..	..	..	..	..	1149-60
1956 to 1958 .. .. .	46	..	..	..	..	..	1185-92
1958-59 to 1961-62 .. .. .	48	..	..	..	..	..	1188-1200
1962-63 .. .. .	49	..	..	..	..	..	1253-56

To conserve space, information for years prior to 1963-64 has been omitted from this issue.

The events of 1963-64 took place in a climate of continued economic expansion. As in 1962-63, there were substantial increases in most components of national expenditure and product. Gross national expenditure increased by about 7 per cent. and exports of goods and services by 27 per cent., while gross national product and imports of goods and services both increased by about 9 per cent.

Civilian employment rose substantially during the year, and at June, 1964, was 148,000 (about 4.5 per cent.) higher than in June, 1963. Over the same period the number of persons receiving unemployment benefit fell from 38,200 to 18,100.

Production in many industries set up new output records. In rural industries production of wheat (328 million bushels), milk (1,494 million gallons), and wool (1,782 million lb.) were all at record levels while a small decrease in sugar cane production was more than offset by a large rise in export prices. Building and construction industries were operating at a high level at the beginning of the year, and kept on rising. Between 1962-63 and 1963-64, the number of new houses and flats commenced rose from 88,300 to 107,400, and the value of other new building approved rose from £256 million to £297 million. The motor vehicle industry was buoyant with registrations of new vehicles totalling 405,000, which was 55,000 more than in 1962-63. Production of steel, copper and zinc and most building materials and fittings increased.

Retail sales (excluding motor vehicles parts, petrol, &c.) increased by 5 per cent. over 1962-63.

Imports of merchandise rose again, but exports rose even more, reflecting the high levels of rural and mining production and increased prices for many exports. As adjusted for balance of payments estimates, exports exceeded imports by £250 million and the deficit on current account declined from £226 million to £19 million. International reserves rose by £228 million.

However, costs and prices were also tending to rise. By the end of June, the index of average minimum weekly wage rates was 5.3 per cent. higher than a year earlier (reflecting the recent increase in the basic wage), and the average weekly earnings per employed male unit were also about 5 per cent. higher in 1963-64 than in 1962-63. The consumer price index was nearly 2 per cent. higher in the June quarter, 1964, than the June quarter, 1963. The use of instalment credit to finance retail transactions also continued to increase and, despite a record level for bank deposits (trading and savings banks combined) of over £4,500 million, outstanding balances of transactions financed by non-retail finance businesses were £469 million at the end of June, an increase of £54 million during the year.

*10th July.*—Australia's membership of ECAFE formally confirmed. Commonwealth Treasurer announced increase in Australian trading banks' term loan funds from £57 million to £76 million.

*11th July.*—Victorian premier announced plans for a £37.5 million water conservation scheme.

*18th July.*—Interest rate on new housing loans made by State Government Authorities in South Australia reduced by  $\frac{1}{4}$  per cent. to 5 per cent.

*20th July.*—Pilot scheme for Ord River (Western Australia) development scheme opened by Prime Minister.

*23rd July.*—Commonwealth cash loan of £45 million opened, issued at £99 5s. with coupons at  $3\frac{1}{4}$  per cent. to  $4\frac{1}{2}$  per cent. and periods 3 to 23 years; oversubscribed £29.5 million.

*25th July.*—Queensland Main Roads Department announced details of Road Plan, to cost £200 million over 10 years.

*30th July.*—Western Australian Government signed £78 million contract for the establishment and development of a new iron and steel industry in the State.

*5th August.*—Australia signed a new three-year trade agreement with Japan. Export Payments Insurance Corporation announced a reduction of 10 per cent. on all premiums on capital goods as from 1st July, 1963. Queensland Minister for Mines and Development announced details of expansion to be made in alumina refinery at Gladstone. (Further expansion announced 26th November to total cost of £50 million.)

*12th August.*—Commonwealth Banking Corporation announced that unsecured advances up to £360 would be available to its savings bank depositors. A similar scheme was announced by the Bank of New South Wales.

*13th August.*—Commonwealth Budget for 1963–64 introduced into House of Representatives. In 1962–63, receipts of the Consolidated Revenue Fund were £1,685.4 million and expenditure (excluding the payment of £26.4 million to the Loan Consolidation and Investment Reserve) amounted to £1,659 million. The main items of revenue (1961–62 figures shown in parentheses) were: income taxes £810.6 million (£828.2 million); excise duties £274.4 million (£265.6 million); customs duties £105.1 million (£85.2 million); sales tax £156.5 million (£148.8 million); and pay-roll tax £63.3 million (£61.0 million). The main items of expenditure were:—payments to or for the States £423.2 million (£396.6 million); social and health services £379.3 million (£365.2 million); defence services (excluding £66.1 million provided from loan fund in 1962–63) £148 million (£179.4 million); war and repatriation services £111.2 million (£104.3 million); and works services £166.5 million (£161.6 million). The Budget for 1963–64 provided for an estimated expenditure of £2,190.7 million, of which £1,837.2 million would be provided from the Consolidated Revenue Fund and £353.5 million from the Loan Fund.

Commonwealth and New South Wales Governments reached agreement on Blowring Dam project.

*15th August.*—Treasurer announced amendments to Savings Bank Regulations reducing minimum proportion of depositors' balances required to be held in cash, deposits with Reserve Bank or government securities to 65 per cent. and allied amendments designed to insure steady increase in savings bank loans available for housing.

*20th August.*—C.B.C. Savings Bank announced increase in limit of home advances to £3,750.

*22nd August.*—Minister for Primary Industry announced new wheat stabilization plan which extended guaranteed price to 150 million bushels instead of previous limit of 100 million bushels.

*29th August.*—1963–64 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1962–63 resulted in a deficit of £0.5 million. Receipts of the Consolidated Revenue Fund totalled £31.5 million and expenditure £32 million. For 1963–64, it was estimated that expenditure would be £34.7 million and revenue £34.0 million, leaving a deficit of £0.7 million.

*3rd September.*—1963–64 Budget introduced into South Australian House of Assembly. In 1962–63, revenue amounted to £97.6 million and expenditure to £97.3 million, leaving a surplus of £0.3 million. For 1963–64, it was estimated that revenue would be £102.8 million and expenditure £103.3 million, leaving a deficit of £0.5 million.

**11th September.**—1963–64. Budget introduced into Victorian Legislative Assembly. In 1962–63 revenue and expenditure both amounted to £207.1 million. The Budget for 1963–64 provided for a total expenditure of £220.6 million and revenue of £218.2 million. Railway operating expenses and income were estimated at £44.8 million and £44.1 million respectively and it was anticipated that the Railway Equalization Account would have to provide the balance of £0.7 million.

Minister for Primary Industry announced details of new cotton bounty arrangements.

**18th September.**—Commonwealth Treasurer announced nomenclature and denominations of proposed decimal currency. Australian Wheat Board announced a cash sale of 58.5 million bushels of wheat to the U.S.S.R.

**24th September.**—Plans approved for construction of £15 million wool storage centre in Merrylands (Sydney) area to occupy approximately 300 acres. Centre, which is to be financed by eight wool selling companies, will replace existing stores at Pymont.

**25th September.**—1963–64 Budget introduced into New South Wales Legislative Assembly. During 1962–63, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services, and Maritime Services Board resulted in a surplus of £0.2 million. After providing for debt charges, there was a deficit of £2.4 million on the Metropolitan and Newcastle Transport Services and a surplus of £0.1 million from the operations of the Maritime Services Board. The 1963–64 Budget provided for an overall surplus of £17,000. After meeting debt charges, it was estimated that there would be a surplus of £700,000 on the transactions of the Consolidated Revenue Fund, a deficit of £25,000 on the Railways and a deficit of £2.2 million on the Metropolitan and Newcastle Transport Services.

**26th September.**—1963–64 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1962–63 resulted in a deficit of £0.8 million. For 1963–64, it was estimated that expenditure would be £83.8 million and revenue £83.1 million resulting in a deficit of £0.7 million.

1963–64 Budget introduced into Queensland Legislative Assembly. In 1962–63, receipts and expenditure of the Consolidated Revenue Fund were £122.8 million. For 1963–64, it was estimated that both revenue and expenditure would amount to £125.4 million.

**2nd October.**—Commonwealth negotiated 19 year loan in London of £Stg. 20 million, issued at 98½ per cent. with interest at 5½ per cent. per annum. Fully subscribed.

**10th October.**—Moura opencut coalfield (Queensland) commenced large-scale production at 80,000 tons a month. Commonwealth £60 million Cash Loan opened, issued at par, with coupons 3½ per cent. to 4½ per cent. and periods 2½ to 23 years; oversubscribed by £9.4 million.

**14th October.**—Completion of £35 million direct telephone link (Compac) between Australia and New Zealand, North America, Britain, and Europe. (Officially opened 3rd December.)

**16th October.**—Commonwealth Government approved plan submitted by Council of Egg Marketing Authorities for Commonwealth egg stabilization levy in place of existing State levies.

**17th October.**—*Currency Bill* 1963 introduced in House of Representatives. (Assented to 30th October but not yet proclaimed.)

**29th October.**—First trade mission from Israel arrived in Australia. South Australian House of Assembly passed bill ratifying Chowilla Dam agreement with New South Wales, Victoria, and the Commonwealth.

**4th November.**—Queensland Forestry Department signed a contract to supply 4.7 million super. ft. of timber per annum for new pulp wood industry to be established in Petrie-Glasshouse area. Operations were expected to begin early in 1964.

**10th November.**—Minister for National Development announced plans for commencement of second stage (Snowy-Murray section) of Snowy Mountains Hydro-electric Scheme; this stage is expected to cost £40 million.

**13th November.**—Cobalt lode discovered at Mount Isa (Queensland).

**21st November.**—Plans released for extension of inner harbour at Fremantle at a cost of £7.2 million.

**22nd November.**—£4.5 million to be spent at Port Kembla on installation of high-speed rolling mill.

*23rd November.*—Queensland Minister for Primary Industries announced plans for construction of new bulk stores, with total capacity of about 380,000 tons of sugar at Bundaberg, Mackay, and Townsville, the cost being estimated at £4 million. Australian Wheat Board sold further 41 million bushels of wheat to mainland China bringing total sales to China since 1960 to over 300 million bushels (valued at about £230 million).

*25th November.*—B.H.P. Co. installed a 140" plate mill as first part of £18 million project to increase production by 400,000 tons a year.

*13th December.*—Qantas Empire Airways signed contract for three new Boeing 707 jet aircraft worth £3 million each.

*14th December.*—Contract signed for export of 5.1 million tons of iron ore (valued at £29 million) from Western Australia to Japan.

*20th December.*—Treasurer issued details of dimensions and composition of decimal coins.

*21st December.*—First Commonwealth award covering officers employed by private banks approved by Arbitration Commission.

*23rd December.*—Australian Shipbuilding Board called tenders for four bulk carriers of a total deadweight tonnage of 47,000 tons, to be built in Australian shipyards.

*30th December.*—Plans announced by Queensland Minister for Industrial Development for construction of State's first synthetic ammonia plant, estimated to cost £3 million, at Pinkenba.

*5th January.*—United States signed £1 million contract for use of Jindivik pilotless aircraft.

*7th January.*—Reserve Bank called up additional £25 million from trading banks to reduce liquidity.

*8th January.*—£12.5 million to be spent on wool promotion and research in 1964–65 (£7.25 million from proceeds of wool levy, £5.25 million from government subsidy).

*13th January.*—Tariff on imported timber raised by 3s. a 100 super. ft.

*20th January.*—Large deposit of copper discovered near Rum Jungle (Northern Territory).

*24th January.*—Victorian Bill introduced to amend Companies Act as it affected note issuing companies.

*27th January.*—Minister for Primary Industry announced plans for levy on meat producers to assist search for new markets for meat.

*28th January.*—Work started on £3.25 million shopping centre at Miranda, largest single centre in New South Wales.

*30th January.*—New South Wales Housing Commission to build £28 million satellite town at Mount Druitt, New South Wales.

*3rd February.*—Reserve Bank called up additional £42 million from trading banks, the second call up of bank funds within a month.

*4th February.*—Orders placed with Australian Shipbuilding Board for construction of three tankers.

*5th February.*—£2 million plan announced to build new wheat silos in New South Wales.

*6th February.*—Commonwealth Special Bonds Series J issued at par with coupons rising from 3½ to 4½ per cent. and optimal redemption prices par to 103 per cent. at maturity.

*7th February.*—Agreement signed with India for shipment of 170,000 tons of wheat by June, 1964.

*13th February.*—£70 million Cash Loan opened, issued at from £99 12s. 6d. to par, with interest rates from 3½ to 4½ per cent. per annum. Oversubscribed by £7.5 million. General Motors Holden's announced £22 million expansion programme.

*18th February.*—New South Wales employees granted four weeks annual leave.

*19th February.*—New meat agreement signed with United States of America guaranteeing Australia and New Zealand access to United States market.

*20th February.*—Commonwealth Treasurer announced that Government would meet the whole cost of converting cash registers, accounting machines, etc., for decimal currency. Details of Commonwealth home subsidy scheme announced by Minister for Housing.

*21st February.*—Le Tourneau-Westinghouse contracted for supply of £1.6 million earth-moving plant to Egypt.

*24th February.*—First Indonesian Trade ship arrives from West Irian.

*26th February.*—Eight major Australian trading banks, supported by Reserve Bank, planned joint Export Re-finance Corporation to strengthen the banks' ability to extend medium and long-term export credit.

*28th February.*—Reserve Bank called up further £32 million from trading banks making total called up for year £99 million. Statutory Reserve Deposit Ratio increased to 15.5 per cent. as from 4th March.

*29th February.*—First shipment of alumina from Kwinana (Western Australia) reached Geelong refinery.

*2nd March.*—Australia represented as full regional member of ECAFE for the first time at 20th Conference in Teheran.

*6th March.*—Orders placed for building of two 19,000 d.w.t. tankers through Australian Shipbuilding Board.

*10th March.*—Child endowment increased for third and subsequent children and full-time student children.

*12th March.*—Commonwealth negotiated \$25 million loan with consortium of banks in the United States for Qantas Empire Airways Ltd. The loan is repayable in half-yearly instalments from 1966 to 1972, with interest from 4½ per cent. to 5½ per cent.

*13th March.*—General Motors Acceptance Corporation reduced interest rate from 7 per cent. to 6 per cent.

Premiers Conference met at Canberra.

Commonwealth Government decided to establish a Commonwealth Bureau of Roads to make a full and continuous study of the roads problem.

*16th March.*—£420 million to be spent on roads over next five years (£375 million by Commonwealth, £45 million by States).

*18th March.*—Reserve Bank reduced charges for forward exchange contracts.

*19th March.*—Malaysia-Australia air services agreement signed in Kuala Lumpur.

*20th March.*—Kembla Coal and Coke won contract to supply £9 million worth of coke to Japan in next three years.

*25th March.*—Moonie to Brisbane oil pipeline opened, and Australia's first commercial oil production started.

*3rd to 8th April.*—Industrial dispute involving 2,000 Sydney postal workers disrupted mail handling.

*4th April.*—Plans approved for £4 million shopping centre in Preston (Victoria).

*6th April.*—Sale reported of a further £16 million worth of wheat to Mainland China. Victorian Government to spend £1.6 million over next three years on development of Melbourne's third University (Latrobe University).

*8th April.*—Maximum rates of interest payable by trading banks on new fixed deposits increased by ½ per cent. per annum. Contracts worth £4 million let for supply of Nepean River-Prospect Reservoir water pipes.

*13th April.*—Issue price of Treasury notes reduced by 1s. to £99 3s.

*14th April.*—Qantas Empire Airways signed contract and paid deposit on four Concorde jet aircraft worth about £4 million each.

*15th April.*—Queensland Alumina Ltd. negotiated loan of £52 million from American banks.

*17th April.*—Commonwealth and State Ministers agreed to spend an additional £260,000 a year for coal utilization research. Minister for Primary Industry announced details of new U.K.—Australia cereals agreement to operate from 1st July, 1964.

*22nd April.*—Australian National Shipping Line to build two £3.75 million ships for the coastal service.

*27th April.*—Maximum trading bank overdraft rate rose by ½ per cent. (to 7 per cent.)

*30th April.*—£10 million Whyalla steel industry expansion programme announced.

1st May.—Plan announced to have 95 per cent. Australian content of Australian manufactured motor vehicles by 1970.

5th May.—Home Savings Grants bill introduced in House of Representatives. Ansett-A.N.A. and T.A.A. each to purchase third £3 million Boeing 727 for delivery in 1965.

14th May.—£40 million Cash Loan opened issued at from £99 per £100 to par with coupons  $4\frac{1}{4}$  per cent. to  $4\frac{3}{8}$  per cent. and periods 3 to 20 years. Undersubscribed £6.3 million.

27th May.—First shipment of oil from Moonie (Queensland) reached Sydney.

1st June.—Savings bank interest on deposits rose by  $\frac{1}{4}$  per cent. (to  $3\frac{1}{4}$  per cent.)

9th June.—Conciliation and Arbitration Commission announced Basic Wage increase of £1 a week. The *Musgrave Range*, 21,400 d.w.t., the largest bulk carrier ever to be built in an Australian shipyard, launched at the B.H.P. Coy. Ltd. shipyard at Whyalla (South Australia).

(NOTE.—Loan Council meeting was not held until 2nd July, 1964. Borrowing approved £290 million.)

## CHRONOLOGICAL TABLE

---

### CHRONOLOGICAL TABLE OF CHIEF EVENTS IN AUSTRALIA SINCE 1945

NORES.—In issues of the Year Book up to No. 48 (*see* No. 48, p. 1201), this table covered events back to the establishment of settlement in Australia in 1788. To conserve space, these details have been omitted from the present volume.

For each earlier year, this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items and for more information the reader should therefore consult earlier issues.

#### Year

- 1945 Captain Cook Dock opened, Sydney. *Re-establishment and Employment Act 1945* passed. Australia ratified United Nations Charter. Cessation of hostilities in Europe, 8th May. Cessation of hostilities against Japan, 15th August.
- 1946 Australian National University founded at Canberra. Constitution Alteration Referendum granted powers in respect of social services to Commonwealth.
- 1947 Census of Australia—first since 1933. Australian National Antarctic Research Expedition established scientific research station at Heard Island. First "displaced persons" reached Australia.
- 1948 Forty-hour week effective throughout Australia. Membership of Commonwealth Parliament increased.
- 1949 *Nationality and Citizenship Act 1948* operative. Broadcasting Control Board came into operation. Commencement of Snowy Mountains Hydro-electric Power Scheme. Australia's population reached 8,000,000.
- 1950 Australian forces in vicinity of Korea were placed at disposal of United Nations to assist South Korea. Adult franchise adopted for Victorian Legislative Council.
- 1951 Transfer of Heard Island and Macdonald Islands to Australia. Double dissolution of Commonwealth Parliament, second in history of the Commonwealth (first in 1914). Security Treaty between United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Opening of new Legislative Council of Papua and New Guinea, including representatives of the indigenes.
- 1952 High grade uranium deposits discovered in Northern Territory and South Australia. Severe restrictions imposed on imports and on oversea travel funds.
- 1953 Atomic Energy Commission established. Britain and Australia signed agreement for reciprocity in social services benefits. Commonwealth Court of Conciliation and Arbitration abandoned the system of automatic adjustment of the basic wage in accordance with retail price index numbers.
- 1954 Her Majesty Queen Elizabeth the Second, with H.R.H. the Duke of Edinburgh, made first tour of Australia by reigning sovereign. Australian National Antarctic Research Expedition established research station at Mawson. Australian population census taken. Australia signed Manila treaty pledging collective defence against aggression in South-East Asia and South-West Pacific.
- 1955 First power generated by Snowy Mountains Hydro-electric Authority. Australian population reached 9,000,000. Cocos (Keeling) Islands became Territory under authority of Commonwealth.
- 1956 Amendment to Conciliation and Arbitration Act separated judicial functions from conciliation and arbitration functions.

## Year

- 1957 High Court ruled that interstate vehicles could not be compelled to register, but upheld validity of tax on commercial vehicles, including those engaged in interstate trade, imposed solely for the maintenance of roads. National Capital Development Commission set up to co-ordinate development of Canberra as centre of government.
- 1958 Prime Minister officially opened Australia's first nuclear reactor at Lucas Heights, near Sydney. Christmas Island (Indian Ocean) transferred to Australian Administration. New South Wales Act passed providing for equal pay for male and female workers performing similar tasks.
- 1959 *Annual Holidays Act 1944-1958* provided for three weeks annual holiday for all New South Wales workers. Commonwealth plan for expenditure of £720,000,000 on roads and bridges accepted by Premiers' Conference. Population reached 10,000,000. First major station of Snowy Mountains Scheme commenced operation. Australian Universities Commission constituted. Australia signed Antarctic Treaty at Washington.
- 1960 Provision made for Social Service benefits to be paid to Australian Aborigines. *Commonwealth Banks Act 1959* and *Reserve Bank Act 1959* proclaimed (see p. 830). Goods comprising 90 per cent. of Australia's current imports exempted from licensing provisions. Australia joined International Development Association as foundation member. National Service training ended. Changes made in Constitution of Papua and New Guinea providing for an increase in number of native members of Legislative Council to eleven, including six elected by indigenes. Warragamba and Keepit Dams, New South Wales, opened. Commonwealth Government announced special economic measures designed to counter inflationary trend and safeguard overseas funds.
- 1961 Australia's first guided missile base established at Williamstown (New South Wales). Western Australia announced plans for £10,000,000 iron industry to produce iron for export. *Commonwealth Matrimonial Causes Act 1959* unifying State Acts, became operative (see p. 654). Bank interest rates rose by about 1 per cent. Monash University (Melbourne) opened. Commonwealth Government announced tax concessions to exporters for promotional expenses in developing overseas export markets. New radio telescope, second largest in world, brought into operation at Parkes (New South Wales). Oil discovered in south-west Queensland. Contract let for construction of dam in New Guinea, first to develop hydro-electric potential of the Laloki River. Australian population census taken. Reserve Bank reduced statutory reserve deposits by 1 per cent. to 12½ per cent. Australia sold interest in Tasman Empire Airways Ltd. to New Zealand. Iron ore deposits estimated at 1,800 million tons discovered at Pilbara (Western Australia).
- 1962 Regular services commenced on new standard gauge railway between Melbourne and Sydney. Five-day week for banks introduced in all States except Victoria. Minister for External Affairs announced that Australia would take up \$4 million of United Nations Bonds. Western Australian Premier signed agreement with American companies for 21-year lease to extract and export up to 15 million tons of iron ore from Pilbara deposits. Commonwealth Electoral Act amended to provide for votes for Aborigines. New South Wales Government announced details of £6 million plan for flood mitigation on coastal rivers. Work began on standardization of rail gauge from Kwinana to Kalgoorlie (Western Australia). Co-axial telephone link opened between Melbourne, Canberra and Sydney. Commonwealth Government abolished need for tax clearances for persons leaving Australia for travel overseas. Commonwealth provided £1,765,000 grants to States for assistance to universities in development of training facilities for medical students in teaching hospitals. First production of bauxite ore from Weipa deposits. Act passed by Western Australian parliament giving voting rights to Aborigines. New South Wales Government announced plans to spend £100 million on roads over six years. Foote report on political development of Papua and New Guinea published. Minister for Defence outlined proposals for new defence plan to cost £650 million, providing for increases in the strength of all services. H.R.H. the Duke of Edinburgh opened Seventh British Empire and Commonwealth Games at Perth. First major International Labour Office Conference held in Australia opened in Melbourne. Aborigines exercised voting rights in Northern Territory for first time.

Year

- 1963 Australia ordered four Oberon class submarines from United Kingdom and a third guided missile destroyer from United States. Negotiations between Britain and members of E.E.C. concerning Britain's entry into European Economic Community discontinued. Her Majesty, Queen Elizabeth II and His Royal Highness the Duke of Edinburgh made second Royal Tour of Australia and attended the jubilee celebrations of the founding of Canberra. Commonwealth Committee of Economic Enquiry appointed to investigate broad aspects of the Australian economy. Composition and objectives of commission to inquire into higher education in Papua and New Guinea announced. First meeting of recently formed Australian Water Resources Council. Large underground water supplies discovered near Alice Springs capable of irrigating large areas of farm land. South Australian school leaving age raised to 15 years. Minister for External Affairs attended S.E.A.T.O. Council in Paris. Approval given to agreement for United States to establish, maintain and operate a naval communications station at North West Cape, Western Australia. Commonwealth Treasurer announced details of new decimal currency (see p. 825). Prime Minister announced that Commonwealth would provide finance for standardization of rail link between Broken Hill and Port Pirie. Construction begun of Australian Mint in Canberra. Prime Minister left for talks with United Kingdom, Canada, and United States of America. Australian Consulate-General established in Madrid, Spain. Australia's membership of ECAFE formally confirmed. Prime Minister opened pilot scheme for the Ord River (Western Australia) development scheme. Construction of £15.5 million U.S. Radio Base begun in Western Australia. Contract let for construction of U.S. Space Tracking Station at Tidbinbilla, near Canberra. Australian Embassy established in Argentina. Queensland Main Roads Department announced details of Road Plan, to cost £200 million over 10 years. Western Australian Government signed £78 million contract for the establishment and development of a new iron and steel industry in the State. Minister for External Affairs announced signing of Nuclear Test Ban Treaty. Commonwealth and New South Wales Governments reached agreement on Blowering Dam project. Thai Parliamentary Delegation visited Australia. New South Wales Premier announced that an immediate start would be made on the construction of a fourth University at Ryde. *Uniform Marriage Act 1961* came into effect. Treasurer announced nomenclature and denominations of proposed decimal currency (see p. 826). Lake Burley Griffin (Canberra) dam gates closed. Minister for the Navy announced the placing of a contract for the construction of two submarines in Scotland. Minister for External Affairs left for New York to lead Australian delegation to United Nations Assembly. Prime Minister of Japan paid official visit to Australia. Secretary-General of ELDO made visit of inspection to Woomera rocket range. Treasurer introduced decimal currency legislation into House of Representatives. Prime Minister announced agreement to purchase first supersonic bombers for R.A.A.F. First Trade Mission arrived from Israel. South Australian House of Assembly passed bill ratifying Chowilla Dam agreement with New South Wales, Victoria and the Commonwealth. Minister for National Development announced plans for commencement of second stage (Snowy-Murray section) of Snowy Mountains Hydro-electric Scheme. Australian population reached 11 million. Qantas Empire Airways signed contract for three new 707 jet aircraft. Treasurer issued details of dimension and composition of decimal coins. First Commonwealth award covering officers employed by private banks approved by Arbitration Commission.
- 1964 Australia gave £179,000 to Laos Government to help stabilize economy. Agreement to concluded with United States of America on establishment of meteorological research station at Pearce (Western Australia) R.A.A.F. Base. United States signed £1 million contract for the use of Jindivik pilotless aircraft. Defence Minister announced arrangements for training of Malaysian Army personnel in Australia. Establishment of a new Division of Northern Development approved for Department of National Development. Sydney-Hobart vehicular ferry, *Empress of Australia*, launched by the Hon. Catherine Sidney. 37th ANZAAS Conference held in Canberra. Victorian Bill introduced to amend Companies Act as it affected note issuing companies. First two Australian assembled Mirages handed over to R.A.A.F. Order placed in United States for £7 million destroyer. New South Wales Housing Commission to build

June

## Year

1964  
*contd.*

£28 million satellite town at Mount Druitt, New South Wales. Carnarvon space tracking station had first assignment. Orders placed with Australian Shipbuilding Board for construction of five tankers for local companies. Australian Defence Mission sent to Malaysia. R.A.N. Destroyer *Voyager* sunk in collision off Jervis Bay with loss of 82 lives. Air pollution controls proclaimed for industry in New South Wales. First general election from common roll in Papua-New Guinea. New South Wales Government employees granted four weeks annual leave. Australian Water Resources Council to seek establishment of network of stream gauging stations throughout Australia. Britain lent destroyer to Australia as interim replacement for *Voyager*. Australia represented as full regional member of ECAFE for the first time at 20th Conference in Teheran. Australian Wool Board offered technical aid to Mainland China. Commonwealth Government announced programme of assistance for schools for teaching of science. Australian Mission to Greece raised to Embassy status. Minister for Supply announced that new Space Tracking and Data Acquisition Station would be built in Orroral Valley (Australian Capital Territory). Child endowment increased for third and subsequent children and full-time student children. Minister for External Affairs announced Australian contribution of £50,000 to Cyprus peace-keeping costs. Commonwealth Bureau of Roads to be set up to make a full and continuous study of the roads problem. First "Caribou" aircraft leave Toronto for delivery to R.A.A.F. Minister for Defence announced £3 million military aid grant to Malaysia. Malaysia-Australia air services agreement signed in Kuala Lumpur. New South Wales Premier officially opened £13 million oil refinery at Kurnell. Moonie to Brisbane oil pipeline opened and Australia's first commercial oil production started. Australian School of Nuclear Technology established at Lucas Heights, near Sydney. Strike by 2,000 Sydney postal workers disrupted mail handling. Third University planned for Melbourne. Australia granted £4.7 million to India-Pakistan Indus Basin Development Fund. Additional naval, army and air-force units made available for service in Malaysia. Australian National Shipping Line to build two £3.75 million ships for the coastal service. Russian whaling fleet paid five-day visit to Melbourne. Soviet Trade Mission stationed in Sydney. Australian Embassy opened in Vienna. Contract signed for £2.7 million Kingsford-Smith Airport runway extension. Advance party of army engineers left for Sabah (North Borneo). Australia purchased £3 million worth of Bloodhound missiles. Northern Territory Legislative Council passed legislation removing discrimination against Aborigines. Police contingent left for service with United Nations force in Cyprus. Minister for External Affairs visited Indonesia for talks with President Sukarno. Blue Streak rocket successfully launched at Woomera. New 64-member House of Assembly for Papua-New Guinea opened. Contract let for construction of jet-port at Tullamarine (Victoria).

# STATISTICAL SUMMARY: AUSTRALIA

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in Year Book No. 39, pp. xviii-xxix.

(2) The statistics in this summary relate in general to the periods shown in the table headings; where the statistics relate to other periods, this is indicated in the footnotes.

(l) Includes Northern Territory and Australian Capital Territory. (m) Teaching and research staff. Includes part-time until 1952, thereafter full-time only. (n) South Australia includes Adelaide Hospital only. (o) 1963. (p) Year ended previous 30th June.

## APPENDIX

NOTE.—Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, and for the latest available statistics, reference should be made to other publications issued by this Bureau, e.g., the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, the *Digest of Current Economic Statistics* and the various mimeographed statements issued on particular subjects.

### CHAPTER I. DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA

Areas of States and Territories.—Revised statistics for the areas of the Australian Territories have recently been made available by the Director of National Mapping. The only revision affecting the area of Australia is that relating to the Northern Territory, whose area has been revised from 523,620 square miles to 520,280 square miles, a decrease of 3,340 square miles. In consequence, the area of Australia has been reduced from 2,971,081 square miles to 2,967,741 square miles. *These revisions, which will affect rates based on areas which appear in various parts of this Year Book, have not been taken into account in this issue, but will be incorporated in the next issue.* The table following shows the latest figures available for the areas of the States and Territories of Australia.

AUSTRALIA: AREAS OF STATES AND TERRITORIES

State or Territory	Area	Percentage of total area	External Territories	Area
	Sq. miles			Sq. miles
New South Wales .. ..	309,433	10.43	Norfolk Island .. ..	(a) 14
Victoria .. ..	87,884	2.96	Papua—Mainland .. ..	83,325
Queensland .. ..	667,000	22.48	Islands .. ..	2,775
South Australia .. ..	380,070	12.80	Total .. ..	86,100
Western Australia .. ..	975,920	32.89	New Guinea (Trust Territory)—Mainland .. ..	69,095
Northern Territory .. ..	520,280	17.53	Islands .. ..	23,065
Australian Capital Territory .. ..	939	0.03	Total .. ..	92,160
<i>Mainland</i> .. ..	<i>2,941,526</i>	<i>99.12</i>	Nauru .. ..	(a) 8½
Tasmania .. ..	26,215	0.88	Cocos (Keeling) Islands .. ..	(a) 5½
			Christmas Island .. ..	(a) 52
<b>Australia</b> .. ..	<b>2,967,741</b>	<b>100.00</b>		

(a) Approximate.

In addition to the Territories listed above, there are: the Territory of Ashmore and Cartier Islands—Ashmore Reef, area approximately 60 square miles (to the limit of the reef), Cartier Islands, area approximately 17 square miles (to the limit of the reef); the Territory of Heard and McDonald Islands—Heard Island, approximately 27 miles long and 13 miles wide, McDonald Islands, small, rocky and precipitous; and the Australian Antarctic Territory.

## CHAPTER II. PHYSIOGRAPHY

## § 2. Climate and Meteorology of Australia

**Rainfall: Australian Capital Cities, p. 49.**—Rainfall recorded in Australian capital cities during 1963 was as follows:—Perth, 39.14 ins.; Darwin, 52.46 ins.; Adelaide, 24.43 ins.; Brisbane, 49.09 ins.; Sydney, 80.11 ins.; Canberra, 25.37 ins.; Melbourne, 29.04 ins.; Hobart, 15.51 ins. The corresponding numbers of rain days were, respectively, 140, 109, 118, 134, 169, 141, 149 and 129.

## CHAPTER III. GENERAL GOVERNMENT

## § 3. Administration and Legislation

**Commonwealth Ministries, p. 75.**

The Menzies Ministry was reconstituted as from 13th June, 1964, as follows.

- |   |  |
|---|--|
| * <i>Prime Minister</i> —<br>THE RT. HON. SIR ROBERT MENZIES,<br>K.T., C.H., Q.C., M.P. (Vic.).   | <i>Minister for Shipping and Transport</i> —<br>THE HON. G. FREETH, M.P. (W.A.).                               |
| * <i>Minister for Trade and Industry</i> —<br>THE RT. HON. J. McEWEN, M.P. (Vic.).  | <i>Minister for Immigration</i> —<br>THE HON. H. F. OPPERMAN, O.B.E., M.P.<br>(Vic.)                           |
| * <i>Treasurer</i> —<br>THE RT. HON. H. E. HOLT, M.P. (Vic.).   | <i>Minister for Social Services</i> —<br>THE HON. H. S. ROBERTON, M.P.<br>(N.S.W.).                            |
| * <i>Minister for External Affairs</i> —<br>THE HON. P. M. C. HASLUCK, M.P.<br>(W.A.).  | <i>Minister for Repatriation</i> —<br>THE HON. R. W. C. SWARTZ, M.B.E.,<br>E.D., M.P. (Qld.).                  |
| * <i>Minister for Labour and National Service<br/>and Vice-President of the Executive<br/>Council</i> —<br>THE HON. W. McMAHON, M.P. (N.S.W.).  | <i>Attorney-General</i> —<br>THE HON. B. M. SNEDDEN, M.P. (Vic.).  |
| * <i>Minister for Primary Industry</i> —<br>THE HON. C. F. ADERMANN, M.P. (Qld.).   | <i>Minister for Territories</i> —<br>THE HON. C. E. BARNES, M.P. (Qld.).                                       |
| * <i>Minister for Defence</i> —<br>SENATOR THE HON. S. D. PALTRIDGE<br>(W.A.).  | <i>Minister for Housing</i> —<br>THE HON. L. H. E. BURY, M.P. (N.S.W.).  |
| * <i>Minister for Health</i> —<br>SENATOR THE HON. H. W. WADE (Vic.).   | <i>Minister for the Army and Assisting the<br/>Treasurer</i> —<br>THE HON. A. J. FORBES, M.C., M.P.<br>(S.A.). |
| * <i>Minister for Supply</i> —<br>THE HON. A. FAIRHALL, M.P. (N.S.W.).  | <i>Minister for the Interior</i> —<br>THE HON. J. D. ANTHONY, M.P. (N.S.W.).                                   |
| * <i>Minister for Civil Aviation</i> —<br>SENATOR THE HON. N. H. D. HENTY (Tas.).   | <i>Minister for the Navy</i> —<br>THE HON. F. C. CHANEY, A.F.C., M.P.<br>(W.A.).                               |
| * <i>Postmaster-General</i> —<br>THE HON. A. S. HULME, M.P. (Qld.).   | <i>Minister for Air</i> —<br>THE HON. P. HOWSON, M.P. (Vic.).  |
| * <i>Minister for National Development</i> —<br>THE HON. D. E. FAIRBAIRN, D.F.C., M.P.<br>(N.S.W.).   | <i>Minister for Customs and Excise</i> —<br>SENATOR THE HON. K. M. ANDERSON<br>(N.S.W.).                       |
| <i>Minister for Works, and under the Prime<br/>Minister, Minister-in-Charge, Common-<br/>wealth Activities in Education and Re-<br/>search</i> —<br>SENATOR THE HON. J. G. GORTON (Vic.). |  |

\* Minister in the Cabinet.

## State Ministers, p. 76.

(i) *New South Wales*. As from 30th April, 1964, following the resignation of the Hon. R. J. Heffron, M.L.A., the Hon. J. B. Renshaw, M.L.A., became Premier, Treasurer, and Minister for Industrial Development and Decentralization. The Minister for Local Government and Highways, the Hon. P. D. Hills, M.L.A., became Deputy Premier, and the Hon. T. P. Murphy, M.L.A., was appointed as Assistant Minister.

(ii) *Victoria*. The Bolte Ministry, as from 31st July, 1964, was reconstituted as follows.

<i>Premier and Treasurer—</i> THE HON. H. E. BOLTE, M.P.	<i>Minister of Transport and a Vice-President of the Board of Land and Works—</i> THE HON. E. R. MEAGHER, M.B.E., E.D., M.P.
<i>Chief Secretary and Attorney-General—</i> THE HON. A. G. RYLAH, E.D., M.P.	<i>Minister for Local Government—</i> THE HON. R. J. HAMER, M.L.C.
<i>Minister for Agriculture and a Vice-President of the Board of Land and Works—</i> THE HON. G. L. CHANDLER, C.M.G., M.L.C.	<i>Commissioner of Crown Lands and Survey, Minister of Soldier Settlement, Minister for Conservation, and President of the Board of Land and Works—</i> THE HON. J. C. M. BALFOUR, M.P.
<i>Minister of Housing and Minister of Forests—</i> THE HON. L. H. S. THOMPSON, M.L.C.	<i>Minister of Water Supply and Minister of Mines—</i> THE HON. T. A. DARCY, M.P.
<i>Minister of Education—</i> THE HON. J. S. BLOOMFIELD, M.P.	<i>Assistant Minister of Education—</i> THE HON. J. F. ROSSITER, M.P.
<i>Minister of Labour and Industry and Minister of Electrical Undertakings—</i> THE HON. G. O. REID, M.P.	<i>Minister of Immigration—</i> THE HON. V. F. WILCOX, M.P.
<i>Commissioner of Public Works and a Vice-President of the Board of Land and Works—</i> THE HON. M. V. PORTER, M.P.	<i>Minister of State Development—</i> THE HON. V. O. DICKIE, M.L.C.
<i>Minister of Health—</i> THE HON. R. W. MACK, M.L.C.	

(iii) *Queensland*. Following on the death of the Hon. H. W. Noble, M.L.A., the Hon. S. D. Tooth was appointed as Minister for Health on 14th April, 1964.

(iv) *Tasmania*. Following the 1964 elections the ministry was reconstituted from 13th May, 1964, by the inclusion of the Hon. B. K. Miller, M.L.C., in place of the Hon. J. B. Connolly, M.L.C., and the Hon. M. G. Everett, Q.C., in place of the Hon. W. D. McNeil.

**Parliamentary Salaries, p. 66.**—As from October, 1964, basic annual salaries of members were increased to £2,300 in the Tasmanian Parliament and £3,500 in the Commonwealth Parliament. Electorate allowances were increased also to range from £300 to £925 for Tasmania and from £1,050 to £1,300 for the Commonwealth.

## CHAPTER IV. LAND TENURE AND SETTLEMENT

## § 3. Alienation and Occupation of Crown Lands

*Tasmania, p. 92 and Summary, p. 93.*—Revised land tenure figures for Tasmania as at 30th June, 1962, together with the figures for Australia incorporating the consequent adjustments, are shown below.

## ALIENATION AND OCCUPATION OF CROWN LANDS, 1962

State or Territory	Private lands				Crown lands				Total area '000 acres
	Alienated		In process of alienation		Leased or licensed		Other		
	'000 acres	Per cent.	'000 acres	Per cent.	'000 acres	Per cent.	'000 acres	Per cent.	
Tasmania (a)	6,417	38.2	197	1.2	1,497	8.9	8,667	51.7	16,778
Australia (b)	165,404	8.7	28,045	1.5	1,048,199	55.1	659,844	34.7	1,901,492

(a) 30th June, 1962.  
on page 1297.

(b) Takes no account of revision of Northern Territory area figures referred to

## CHAPTER VI. MANUFACTURING INDUSTRY

## § 1. General

Factory Development, p. 146.—The following table gives a summary of operations in manufacturing industries during 1962–63.

## FACTORIES: SUMMARY, 1962-63

Particulars		N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.

Value of power, fuel, light, etc., used . . . . .	"	98,755	51,761	17,599	16,036	10,860	7,218	202,229
" materials used . . . . .	"	1,314,824	988,885	356,864	251,430	139,878	78,038	3,129,919
" production(c) . . . . .	"	1,037,443	801,468	190,483	189,571	108,211	71,016	2,398,192
" output . . . . .	"	2,451,022	1,842,114	564,946	457,037	258,949	156,272	5,730,340
" land and buildings . . . . .	"	690,036	475,802	96,742	106,482	51,428	81,959	1,502,449
" plant and machinery . . . . .	"	719,361	500,344	140,292	146,804	66,318	69,079	1,642,198

(a) Average over whole year; includes working proprietors. (b) Excludes amounts drawn by working proprietors. (c) Value added in process of manufacture (i.e., value of output less value of materials and fuel used).

## § 8. Value of Production, etc.

Value of Production, p. 169.—The values of production (£'000) in Australia for the various classes of industry in 1962–63 were as follows:—

I., 64,953; II., 50,050; III., 205,688; IV., 978,945; V., 8,623; VI., 116,892; VII., 20,130; VIII., 133,168; IX., 318,458; X., 95,179; XI., 34,994; XII., 175,457; XIII., 41,339; XIV., 2,181; XV., 49,883; XVI., 102,252; Total, all classes, 2,398,192.

## § 10. Principal Factory Products, pp. 175-82

The following table provides an abbreviated list of commodities and the quantities produced in factories in Australia during 1962–63 and 1963–64 (preliminary figures). Figures for 1962–63 may include revisions of figures shown earlier in this Year Book.

**QUANTITY OF PRINCIPAL ARTICLES PRODUCED IN FACTORIES:  
AUSTRALIA**

Total European/Other Races(b) .. .. .	18,991	18,362	37,353	24,133	23,712	47,845
Total Non-European and European/Other Races	37,323	27,516	64,839	51,399	38,026	89,425
Grand Total .. .. .	4,546,118	4,440,412	8,986,530	5,312,252	5,195,934	10,508,186

(a) Includes Pacific Islander, Polynesian and South Sea Islander, so described. (b) This category covers persons with European blood to the extent of one-half and blood of a Non-European race to the extent of one-half.

NOTE.—The characteristic "Race" refers broadly to the ethnic origin of the person irrespective of where born or of what nationality. For this characteristic the basic data do not permit of scientific classification of ethnic origin and the races are named with a geographical rather than a truly ethnological description. Thus "Indian" refers to the ethnic types normally to be found in India. In other words, each racial group described in this fashion is a mixed group when viewed in the light of the hypothetical genetic types from which it is derived. The limitations imposed by the practical need to present the non-European races by their commonly recognized rather than their scientific groupings are further complicated by the necessity of combining as one group all persons of European origin. Census statistics of "Race", cannot, therefore, answer fully the questions which interest the anthropologist and ethnologist, but they do possess utility for governmental administration and other practical purposes. Particulars of full-blood Aboriginals are excluded from this table.

### § 8. Oversea Arrivals and Departures

Excess of Arrivals over Departures, pp. 290-1.—The following table shows the net gain to the population of Australia due to total migration movement for the year 1963, according to age and conjugal condition.

#### EXCESS OF ARRIVALS OVER DEPARTURES: AGE DISTRIBUTION AND CONJUGAL CONDITION, AUSTRALIA, 1963

## CHAPTER XI. HOUSING AND BUILDING

## § 2. Building

**New Houses, p. 371.**—The number of new houses approved, commenced, completed and under construction in each State and Territory during 1963–64 was as follows.

**NEW HOUSES: NUMBER, 1963-64**  
(INCLUDING OWNER-BUILT HOUSES)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	30,169	24,718	10,976	12,110	7,447	2,648	463	1,564	90,095
Commenced ..	27,957	23,648	10,181	11,564	7,320	2,550	430	1,624	85,274
Completed ..	25,954	22,799	10,012	10,488	7,276	2,511	310	1,764	81,114
Under construction at 30th June, 1964 ..	12,991	12,912	2,916	5,639	2,923	1,633	359	922	40,295

Of the 81,114 new houses completed during 1963–64, 47,754 had outer walls of brick, brick veneer, concrete or stone, 16,678 of wood (weatherboard, etc.), 16,358 of fibro-cement and 324 of other materials.

**New Flats, p. 374.**—The following table shows the number of new flats approved, commenced, completed and under construction in each State and Territory during 1963–64.

**NEW FLATS: NUMBER, 1963-64**  
(INDIVIDUAL LIVING UNITS)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	13,315	7,324	1,607	1,634	1,830	165	149	305	26,329
Commenced ..	10,210	7,089	1,311	1,386	1,743	120	128	290	22,277
Completed ..	7,776	4,270	949	989	1,295	164	26	150	15,619
Under construction at 30th June, 1964 ..	7,249	4,951	692	725	1,061	90	121	264	15,153

**Value of New Buildings, p. 376.**—The values of all new buildings approved, commenced, completed and under construction in each State and Territory are shown in the following table for the year 1963–64.

**NEW BUILDINGS: VALUE, 1963-64**  
(INCLUDING ESTIMATED VALUE OF OWNER-BUILT HOUSES)  
(£'000)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	234,972	196,464	83,621	77,687	57,860	15,949	5,494	21,688	693,735
Commenced ..	257,027	197,349	75,178	74,888	59,278	17,332	5,082	21,200	707,334
Completed ..	235,840	167,415	66,509	59,151	46,434	16,988	3,981	20,082	616,400
Under construction at 30th June, 1964 ..	206,601	153,139	43,944	55,757	35,924	14,547	4,885	26,024	540,821

The value of new buildings completed in Australia during 1963–64, according to type of building, was as follows:—*Houses*—Brick, brick veneer, concrete and stone, £199,332,000; wood (weatherboard, etc.), £55,601,000; fibro-cement, £45,165,000; other, £1,031,000; total, £301,129,000; *Flats*—£41,780,000; *Other Buildings*—Hotels, hostels, etc., £13,909,000;

shops, £25,745,000; factories, £64,213,000; offices, £45,038,000; other business premises, £27,002,000; educational, £40,286,000; religious, £6,999,000; health, £19,301,000; entertainment and recreation, £13,303,000; miscellaneous, £17,695,000; total other buildings, £273,491,000; grand total, new buildings, £616,400,000.

**Persons Working on Jobs Carried out by Builders of New Buildings, p. 379.**—The number of persons working on jobs *carried out by builders of new buildings* in Australia at 30th June, 1964, was as follows:—Carpenters, 52,551; bricklayers, 17,011; painters, 12,763; electricians, 8,036; plumbers, 12,656; builders' labourers, 20,801; other, 21,942; Total, 145,760. Of this total, contractors actually working on jobs numbered 11,491, sub-contractors actually working on jobs, 27,112, and wage earners, 107,157.

## CHAPTER XII. EMPLOYMENT AND UNEMPLOYMENT

### WAGE AND SALARY EARNERS IN EMPLOYMENT

**Civilian Employees, pp. 427-8.**—The following table shows particulars of the estimated numbers of wage and salary earners (excluding employees in rural industry, private domestic service and defence forces) in each State and Territory at June, 1964, with revised figures for June and December, 1963.

### WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT

(EXCLUDING EMPLOYEES IN RURAL INDUSTRY AND PRIVATE DOMESTIC SERVICE, AND DEFENCE FORCES)

('000)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T. (a)	Australia

Persons ..	1,339.8	1,004.5	432.8	316.0	222.3	104.2	11.9	31.8	3,463.3

(a) Includes persons employed in the Australian Capital Territory who reside in adjoining areas.

## CHAPTER XIII. LABOUR, WAGES AND PRICES

## RETAIL PRICES AND PRICE INDEXES

## § 4. Tabular Statements of Retail Price Index Numbers

Consumer Price Index, p. 434-6.—The following table shows Consumer Price Index numbers for June and September quarters, 1964, for each capital city and the six capital cities combined for each Group and all Groups combined.

CONSUMER PRICE INDEX NUMBERS<sup>(a)</sup>

(Base of each Index: Year 1952-53 = 100.0)

Period	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Six Capital Cities <sup>(b)</sup>
<b>FOOD</b>							
June quarter, 1964 ..	125.0	129.5	136.1	132.4	128.3	129.5	128.5
September quarter, 1964	127.5	131.6	138.0	133.6	130.3	131.6	130.7
<b>CLOTHING AND DRAPERY</b>							
June quarter, 1964 ..	113.1	115.8	118.4	113.6	113.2	115.7	114.6
September quarter, 1964	113.6	116.3	118.8	113.8	113.6	116.1	115.0
<b>HOUSING</b>							
June quarter, 1964 ..	163.3	166.0	145.4	160.3	157.8	175.9	161.7
September quarter, 1964	165.0	166.9	147.2	161.9	158.1	176.4	163.0
<b>HOUSEHOLD SUPPLIES AND EQUIPMENT</b>							
June quarter, 1964 ..	111.5	113.2	112.3	104.8	105.7	124.1	111.4
September quarter, 1964	110.3	112.6	112.3	104.7	105.8	124.4	110.7
<b>MISCELLANEOUS</b>							
June quarter, 1964 ..	130.4	131.2	135.3	122.9	129.3	128.8	130.3
September quarter, 1964	133.1	133.5	138.6	128.0	131.5	131.8	133.1
<b>ALL GROUPS</b>							
June quarter, 1964 ..	125.8	128.3	130.2	125.1	125.3	130.1	127.0
September quarter, 1964	127.3	129.6	131.9	126.9	126.6	131.7	128.5

(a) The index numbers measure price movements in each city individually and for the weighted average of the six capitals. They do not measure differences in price levels as between cities.

(b) Weighted average.

## WHOLESALE PRICES AND PRICE INDEXES

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index

Index Numbers, p. 440.—Index numbers for each group of commodities and for All Groups for the index of wholesale prices of basic materials and foodstuffs are shown below for the year 1963-64 and for the months April to August, 1964.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS

(Base of each Index: Average of 3 years ended June, 1939 = 100)

Period	Basic Materials						Food-stuffs and Tobacco (a)	Basic Materials and Foodstuffs			
	Metals and Coal	Oils, Fats and Waxes	Textiles	Chemicals	Rubber and Hides	Building Materials		Total	Goods principally imported (b)	Goods principally home produced (a)	Total All Groups (a)
1963-64	383	207	484	286	221	473	339	352	275	376	346
1964—											
April	385	207	488	284	223	486	342	355	276	380	349
May..	384	207	458	284	229	486	340	362	276	384	352
June..	382	205	463	284	230	486	340	365	275	386	353
July..	386	205	463	285	233	496	343	367	279	389	356
Aug.	389	206	464	285	236	498	345	367	278	390	357

(a) Excludes potatoes and onions. See para. 3, p. 439. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports.

## EXPORT PRICES AND PRICE INDEXES

## § 2. The Current Export Price Index

Index Numbers, p. 444.—Index numbers for each of the groups and "All Groups" for the year 1963-64 and for the months April to August, 1964, are shown in the table below.

## EXPORT PRICE INDEX NUMBERS

(Base of each Index: Year 1959-60 = 100)

Period	Wool	Meats	Dairy Produce	Cereals	Dried and Canned Fruits	Sugar	Hides and Tallow	Metals and Coal	Gold	All Groups
1963-64..	120	p 105	93	107	p 98	p 175	73	101	100	p 114
1964—										
April ..	121	p 111	92	109	p 99	p 165	78	106	100	p 115

## § 5. Basic Wages in Australia

State Basic Wages, p. 488.—The following table shows State basic wages operative in September, 1964.

## STATE BASIC WAGES: WEEKLY RATES

State and area	September, 1964		
	Date of operation <sup>(a)</sup>	Males	Females
		<i>s. d.</i>	<i>s. d.</i>
New South Wales .. .. .	19.6.64	315 0	236 0
Victoria <sup>(b)</sup> .. .. .	June, 1964 <sup>(c)</sup>	307 0	230 0
Queensland—			
Southern Division—			
Eastern District, including Brisbane ..	13.7.64	300 0	225 0
Western District .. .. .	13.7.64	310 6	233 0
Mackay Division .. .. .	13.7.64	309 0	231 9
Northern Division—			
Eastern District .. .. .	13.7.64	310 6	233 0
Western District .. .. .	13.7.64	332 6	249 6
South Australia <sup>(d)</sup> .. .. .	22.6.64	303 0	227 0
Western Australia—			
Metropolitan Area .. .. .	22.9.64	308 0	231 0
South-West Land Division .. .. .	22.9.64	308 0	231 0
Goldfields and other areas .. .. .	22.9.64	308 0	231 0
Tasmania <sup>(b)</sup> .. .. .	June, 1964 <sup>(c)</sup>	314 0	235 6

<sup>(a)</sup> Rates are operative from the beginning of the first pay-period commencing after the date shown, or during the month shown. <sup>(b)</sup> No basic wage declared. Rates shown are those adopted by most Wages Boards. <sup>(c)</sup> Wages Boards adopted the Commonwealth rate. <sup>(d)</sup> The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and nearby areas, where a loading of 5s. for adult males is generally payable.

The Commonwealth basic wage is still the same as that operative from 19th June, 1964 (p. 481).

## CHAPTER XIV. OVERSEA TRADE

## § 9. Direction of Oversea Trade

According to Countries, p. 528.—The following table shows particulars of the values of total imports and total exports of Australia, including bullion and specie, according to countries of origin or consignment, for the year 1963–64.

**VALUES OF AUSTRALIAN IMPORTS AND EXPORTS: COUNTRIES OF  
ORIGIN OR CONSIGNMENT, 1963-64 p**

Total Inflow of Investment .. .. .	153	264	(c)
Outflow of investment .. .. .	-7	-3	(c)
Net inflow of investment .. .. .	146	261	(c)
Other official capital movements .. .. .	..	-10	-40
Marketing authorities .. .. .	-33	5	15
Net identified capital inflow .. .. .	113	256	} (c) 249
Balancing item .. .. .	-25	44	
Net Apparent Capital Inflow .. .. .	88	300	249
Monetary movements—			
Change in net I.M.F. position .. .. .	79	12	..
Change in international reserves .. .. .	10	65	228
Other .. .. .	..	-3	2
Net Monetary Movements .. .. .	89	74	230

(a) For current account balances minus sign (-) denotes deficit; for capital items other than monetary movements minus sign (-) denotes outflow; for monetary movements minus sign (-) denotes decrease in international reserves or net I.M.F. position or an increase in foreign holdings of Australian currency.

(b) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation.

(c) Particulars of the Survey of Oversea Investment are not yet available for 1963-64. Relevant items for this period are therefore combined with the balancing item.

(d) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at £113,000,000 in 1961-62, £129,000,000 in 1962-63 and £140,000,000 in 1963-64.

**CHAPTER XV. TRANSPORT AND COMMUNICATION**  
**SHIPPING**

<b>Total Freight</b> ..	<b>2,478</b>	<b>25,880</b>	<b>12,132</b>		<b>5,213</b>	<b>5,187</b>	<b>1,155</b>	

(a) Excludes South Brisbane-Border section of the uniform gauge line (69 route miles). (b) Financial details include road motors. (c) Excludes government grants.

Minus sign (-) denotes loss.

NOTE.—The foregoing table is prepared from quarterly statements supplied by each government railway, and figures therein are not completely comparable with those shown in Chapter XV. Transport and Communication, which are derived, in the main, from the annual reports of the government railways.

## MOTOR VEHICLES

New Vehicles Registered, p. 590.—New motor vehicles registered during 1963-64 were as follows.

## NEW MOTOR VEHICLES REGISTERED, 1963-64(a)

State or Territory	Motor cars(b)	Other vehicles (c)	Motor cycles	Total
New South Wales .. ..	119,711	24,496	1,919	146,126
Victoria .. ..	90,437	16,455	715	107,607
Queensland .. ..	45,899	12,409	1,160	59,468
South Australia .. ..	33,518	6,714	942	41,174
Western Australia .. ..	24,949	6,999	633	32,581
Tasmania .. ..	10,268	2,343	53	12,664
Northern Territory .. ..	978	714	20	1,712
Australian Capital Territory ..	3,578	646	39	4,263
<b>Total .. ..</b>	<b>329,338</b>	<b>70,776</b>	<b>5,481</b>	<b>405,595</b>

(a) Excludes defence service vehicles, trailers, road tractors, etc., and dealers' plates. (b) Includes taxis, hire cars and station wagons. (c) Includes utilities, panel vans, lorries and omnibuses.

## CIVIL AVIATION

Statistical Summaries, p. 604.—The following table shows particulars of the operations of regular internal services and oversea services for the nine months ended 31st March, 1964.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES  
AND OVERSEA SERVICES, 1963-64**

Particulars	Regular internal services(a)	Oversea services(b)
Route miles (unduplicated)(c) .. .. .		
Hours flown .. .. .	185,385	39,426
Miles flown .. .. .	36,402	16,382
Paying passengers .. .. .	2,419,799	260,641
Paying passenger-miles .. .. .	1,047,454	871,794
Freight—		
Tons(d) .. .. .	46,845	5,874
Ton-miles(d) .. .. .	22,642	28,019
Mail—		
Tons(d) .. .. .	5,392	2,017
Ton-miles(d) .. .. .	2,843	12,228

(a) Includes only services operating within the Australian mainland and Tasmania. (b) Airlines wholly or partly owned by Australian interests. (c) At 30th June, 1964. (d) In terms of short tons (2,000 lb.).

## BROADCASTING AND TELEVISION

## § 4. Licences, etc.

(a) Includes the Epileptic Home. specialists who are paid for their services.

(b) In addition, there are in New South Wales 54 visiting

## CHAPTER XXI. PRIVATE FINANCE

## CURRENCY

## § 2. Coinage

**Issues of Australian Coins, p. 827.**—The net issues of Australian coins to 30th June, 1964, were:—silver, £49,261,000; bronze, £4,089,000; total, £53,350,000.

## § 3. Notes

**The Australian Note Issue, p. 829.**—The average value of notes in circulation for the year 1963-64 was £442,363,000. This amount was distributed in denominations as follows:—10s., £13,608,000; £1, £70,911,000; £5, £198,240,000; £10, £156,547,000; £20, £2,000; £50, £28,000; £100, £31,000; and £1,000, £2,996,000. The amount held by the banks was £65,549,000 and by the public £376,814,000.

## BANKING

## § 1. Cheque-Paying Banks

**The Reserve Bank of Australia, pp. 835-6.**—The average liabilities of the Central Banking Business (including Note Issue Department) of the Reserve Bank for the year ended June, 1964 amounted to £1,125,122,000. Capital and reserve funds amounted to £30,302,000; notes on issue to £438,361,000; statutory reserve deposit accounts of trading banks to £265,677,000; other deposits of trading banks to £7,012,000; term loan fund accounts of trading banks to £34,416,000; deposits of savings banks to £210,153,000; other liabilities to £139,201,000.

Particulars of the average assets were as follows:—gold and balances held abroad, £699,861,000; Australian notes and coin, £9,670,000; cheques and bills of other banks, £1,847,000; government and other securities (including treasury bills), £332,044,000; bills receivable and remittances in transit, £9,128,000; and other assets, £72,572,000.

**The Commonwealth Trading Bank of Australia, p. 839.**—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1964, were £349,748,000. Of this amount, deposits not bearing interest amounted to £208,926,000; deposits bearing interest to £135,740,000; balances due to other banks to £968,000; other liabilities to £4,114,000.

The average assets in Australia, £356,848,000, included cash and cash balances £11,960,000; treasury bills and seasonal securities, £5,403,000; other Commonwealth and State government securities, £82,185,000; loans to authorized dealers in the short-term money market, £4,552,000; statutory reserve deposits with Reserve Bank, £43,441,000; cheques, bills and balances with other banks, £13,390,000; loans (other than loans to authorized dealers in the short-term money market), advances and bills discounted, £179,341,000; other assets, £16,576,000.

**Private Trading Banks, p. 840.**—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1964, were £1,794,789,000. Deposits not bearing interest amounted to £1,085,729,000 and deposits bearing interest to £662,301,000; balances due to other banks to £10,016,000; other liabilities to £36,743,000.

The average assets in Australia, £1,787,279,000, included cash and cash balances, £56,607,000; treasury bills and seasonal securities, £49,387,000; other Commonwealth and State government securities, £350,916,000; loans to authorized dealers in the short-term money market, £27,655,000; statutory reserve deposits with Reserve Bank, £,221,726,000; cheques, bills and balances with other banks, £54,174,000; loans (other than loans to authorized dealers in the short-term money market), advances and bills discounted, £927,000,000; other assets, £99,814,000.

**Clearing House Returns—Average Weekly Clearings, p. 853.**—The average weekly bank clearings in each capital city for the year ended June, 1964, were as follows:—Sydney, £265,784,000; Melbourne, £255,787,000; Brisbane, £57,558,000; Adelaide, £55,460,000; Perth, £31,995,000; Hobart, £8,660,000; total, £675,244,000.

**Debits to Customers' Accounts—Cheque-paying Banks, p. 853.**—The average weekly debits to customers' accounts in each State for the year 1963–64 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £412,389,000; Victoria, £366,595,000; Queensland, £106,600,000; South Australia, £77,539,000; Western Australia, £48,192,000; Tasmania, £18,531,000; Northern Territory, £1,388,000; Australian Capital Territory, £5,731,000; total, £1,036,965,000.

## § 2. Savings Banks

**Number of Operative Accounts and Business Transacted, p. 861.**—The numbers of operative accounts in the several States at end of June, 1964, were:—New South Wales, 3,817,000; Victoria, 3,418,000; Queensland, 1,448,000; South Australia, 1,181,000; Western Australia, 736,000; Tasmania, 363,000; Northern Territory, 25,000; and Australian Capital Territory, 63,000; total, 11,051,000. The amounts on deposit in the several States at 30th June, 1964, were:—New South Wales, £791,606,000; Victoria, £739,484,000; Queensland, £271,176,000; South Australia, £237,902,000; Western Australia, £119,883,000; Tasmania, £62,385,000; Northern Territory, £4,044,000; and Australian Capital Territory, £11,644,000; total, £2,238,124,000. Total excess of deposits over withdrawals during 1963–64 was £210,875,000; and interest added was £57,403,000.

## INSURANCE

## § 2. Life Insurance

**New Policies Issued, Policies Discontinued, etc., Premiums and Claims, Australia, pp. 869-77.**—The following is a summary of the life insurance business transacted in Australia during 1963 (figures for 1962 in parentheses) compiled from monthly returns collected from the 42 (40) companies registered under the *Life Insurance Act 1945-1961*, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XXI., which are derived from annual returns and include business of the State Government Offices.

Ordinary, Industrial, and Superannuation Businesses, respectively:—*New policies issued in Australia*—numbers, 327,103 (315,574), 128,886 (155,593), 78,354 (75,283); sums insured, £674,677,000 (£631,541,000), £36,304,000 (£52,171,000), £286,433,000 (£242,711,000); *policies discontinued or reduced in Australia*—numbers, 230,779 (215,729), 250,180 (276,413) 69,074 (96,308); sums insured, £262,855,000 (£247,126,000), £36,231,000 (£33,991,000) £20,232,000 (£85,548,000). Particulars of annuities are excluded.

*Premium receipts in Australia* of Ordinary, Industrial, and Superannuation Businesses, respectively, amounted to £109,340,000 (£98,596,000); £16,381,000 (£15,906,000); £42,297,000 (£37,025,000); *claims, etc., paid* amounted to—£47,175,000 (£41,470,000); £12,263,000 (£12,827,000); £16,414,000 (£15,086,000). Particulars of annuities are included.

## NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

**Companies Listed on Stock Exchanges, p. 882.**—The following table shows particulars of new capital raised during the year 1963-64. Corresponding information is not yet available for unlisted companies.

## LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c)

(£ million)

Year	Share capital						Debentures, registered notes and deposits		
	Value of issues commenced	Non-cash issues commenced (d)	Cash issues commenced	Cash raised during period (e)	Amounts not involving new money	New money	Total amount raised (f)	Amounts not involving new money (f)	New money
1963-64(g)	118.5	50.9	67.6	83.8	20.8	63.0	454.9	376.0	78.9

<b>Adjusted(b)</b> .. .. .	<b>2,440,398</b>	<b>2,440,524</b>	<b>—126</b>

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.  
(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, financial assistance grants, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

## GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES

## § 3. Government Securities on Issue: Commonwealth and States

Securities on Issue and Annual Interest Payable, p. 954.—The following table shows details of the government securities on issue on account of the Commonwealth and States and the annual interest payable thereon at 30th June, 1964.

GOVERNMENT SECURITIES ON ISSUE AND ANNUAL INTEREST PAYABLE AT  
30th JUNE, 1964: COMMONWEALTH AND STATES

Particulars	Currency in which repayable							Australian currency equivalent(a)	
	Australian currency	Sterling	United States dollars	Canadian dollars	Swiss francs	Netherlands guilders	German Deutsche marks	Total amount on issue	Total interest liability

(a) Taxable income is the income remaining after deducting from assessable income all allowable deductions.

(b) Excludes additional tax levied on the undistributed income of private companies, £988,000.

(c) Net tax assessed is nil because of rebates, etc.

## CHAPTER XXIII. RURAL INDUSTRY

## AGRICULTURAL PRODUCTION

## § 2. Distribution, Production and Value of Crops

Distribution and Production, pp. 996-9.—The following table shows preliminary figures for the area and production of major crops in Australia during the season 1963-64.

## AREA AND PRODUCTION OF CROPS: AUSTRALIA, 1963-64 p

Crop	Area	Production	Crop	Area	Production
	'000 acres	'000		'000 acres	'000
<b>Cereals for grain—</b>			<b>Industrial crops—</b>		
Barley ..	2,013	43,395 bus.	Cotton ..	39	
Maize ..	215		Flax (for linseed) ..	118	30 tons
Oats ..	3,392	68,234 "	Peanuts ..	44	
Rice ..	59	7,454 "	Sugar cane (for crushing) ..	418	12,118 tons
Sorghum ..	366	7,887 "	Tobacco ..	28	
Wheat ..	16,474	327,912 "	Other ..	193	
Other ..	126				
<b>Total ..</b>	<b>22,645</b>	<b>..</b>	<b>Total ..</b>	<b>840</b>	<b>..</b>
			Potatoes ..	103	
Hay ..	2,602	4,269 tons	Vineyards, orchards, etc. ..	757	
Green fodder ..	4,877		<b>Grand Total ..</b>	<b>(a)32,043</b>	<b>..</b>
Grass seed ..	219				

(a) Includes an estimate for particulars not yet available.

Total area of crops in each State and Territory during 1963-64 was:—New South Wales, 8,994,000 acres; Victoria, 6,106,000 acres; Queensland, 3,663,000 acres; South Australia, 5,975,000 acres; Western Australia, 6,915,000 acres; Tasmania, 380,000 acres; Northern Territory, 2,000 acres; Australian Capital Territory, 8,000 acres.

## PASTORAL PRODUCTION

## § 1. Introduction

Livestock Numbers, p. 1051.—The following table shows, for each State and Territory, the numbers of livestock at 31st March, 1964.

## LIVESTOCK NUMBERS, 31st MARCH, 1964 p

('000)

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Horses ..	163	56	206	n.a.	39	8	39	1	(a) 512
Cattle ..	4,789	3,301	7,402	694	1,299	450	1,055	14	19,004
Sheep ..	71,764	28,413	24,337	16,403	20,165	3,600	9	289	164,980
Pigs ..	391	322	388	153	128	83	3	(b)	1,468

(a) Incomplete. Excludes South Australia.

(b) Less than 500.

### § 5. Pastoral Products: Wool

Wool Production, p. 1061.—The estimated production of wool (greasy basis) in Australia during 1963–64 was 1,781,700,000 lb.

### § 6. Pastoral Products: Meat

Production of Meat, pp. 1069 and 1071.—The following table shows, for each State and Territory, the production of meat during 1963–64.

PRODUCTION OF MEAT, 1963-64 p  
(Tons Carcass Weight)

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Beef and veal ..	281,879	219,140	328,126	38,798	64,471	25,672	9,414	2,230	969,730
Mutton and lamb	203,525	223,804	42,931	54,084	37,004	20,313	73	1,944	583,678
Total meat (incl. pigmeats) ..	514,222	468,104	400,332	104,044	111,420	51,919	9,579	4,482	1,664,102

## OTHER RURAL INDUSTRIES: DAIRYING, POULTRY AND BEE-FARMING

### § 1. The Dairying Industry

Principal Dairy Products, pp. 1079 and 1088.—Particulars of the total production of these commodities in each State and the Australian Capital Territory during 1963–64 are shown below.

PRINCIPAL DAIRY PRODUCTS, 1963-64 p

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.(a)
Total whole milk								
'000 gals.	328,411	688,937	239,368	96,016	56,797	83,152	1,153	1,493,910
Butter(b) .. tons	36,451	103,455	35,518	7,501	6,992	13,770	1	203,688
Cheese(b) .. tons	5,147	25,183	9,492	15,030	1,494	1,334	..	57,680
Pigmeats .. tons	28,818	25,160	29,275	11,162	9,945	5,934	308	110,694

(a) Includes Northern Territory.

(b) Factory and farm production.

## CHAPTER XXVI. MINERAL INDUSTRY

### § 2. The Mineral Industry

Quantity and Value of Production, pp. 1146 and 1184.—In the following table, particulars are given of the local value of production of metal and other mining for Australia in 1963, together with the quantities of the principal minerals produced during 1963.

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1963 p  
METALLIC MINERALS

Principal contents of metallic minerals produced								Local value of production—metal mining
Copper	Gold	Iron	Lead	Silver	Tin	Tungsten (a)	Zinc	
'000 tons	'000 fine oz.	'000 tons	'000 tons	'000 fine oz.	tons	tons	'000 tons	£'000
113	1,023	3,557	410	19,581	2,852	960	351	96,746

(a) In terms of WO<sub>3</sub> (tungstic oxide).

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1963 p  
—continued

## NON-METALLIC AND FUEL MINERALS

Quantities produced						Local value of production—non-metal and fuel mining £'000
Coal		Asbestos	Gypsum	Limestone(a)	Salt	
Black	Brown					
'000 tons	'000 tons	short tons	tons	'000 tons	tons	'000
24,857	18,457	13,374	687,319	6,761	582,787	80,937

(a) Excludes limestone used as a construction material.

§ 3. Gold, § 4. Lead, Silver and Zinc, § 5. Copper, § 6. Tin,  
pp. 1150, 1156, 1159 and 1161

Smelter and refinery production of the principal metals treated in Australia during the year 1963 is shown below.

SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS: AUSTRALIA,  
1963

Refined gold	Refined silver (a)	Refined lead (a)	Lead content of lead bullion produced for export (a)	Refined zinc (a)	Refined copper (a)	Refined tin (a)
'000 fine oz.	'000 fine oz.	tons	tons	tons	tons	tons
1,119	8,871	224,605	80,661	179,777	86,115	2,626

(a) Source: Bureau of Mineral Resources.

## CHAPTER XXVIII. REPATRIATION

## § 2. War Pensions, § 3. Service Pensions, pp. 1205-10

The following table gives a summary of war and service pensions current at 30th June, 1964, and of the amounts paid in pensions during the year 1963-64.

## WAR AND SERVICE PENSIONS: SUMMARY, 1963-64

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Abroad	Total
Number of Pensions in force at 30th June(a)—								
War pensions ..	225,971	189,583	98,327	65,601	57,010	27,904	4,457	668,853
Service pensions ..	20,360	15,874	11,118	6,822	7,754	2,660	..	64,588
Miscellaneous pensions ..	336	168	553	95	37	9	7	1,205
Amounts paid (£'000)—								
War pensions(b) ..	26,629	22,798	11,542	6,768	5,782	3,079	828	77,426
Service pensions(b) ..	3,990	2,827	1,912	1,345	1,588	437	..	12,099

(a) Includes dependants of eligible pensioners.

(b) Includes miscellaneous pensions.

## GENERAL INDEX\*

NOTE.—This index is preceded by a list of the special articles, etc., which have appeared in previous issues of the Official Year Book. A list of the illustrations contained in this issue will be found on page ix. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*

## Printed Publications issued by the Central Office of the Commonwealth Bureau of Census and Statistics

NOTE.—The publications listed below may be bought from the Government Printer, Canberra, and in each capital city from the Deputy Commonwealth Statistician and the Commonwealth Sub-Treasurer. They may also be ordered through the leading booksellers in the principal cities of Australia. In addition to printed publications, a number of mimeographed publications are available in limited numbers free of charge. Publications dealing with individual States only are produced by the Deputy Commonwealth Statistician in each State. A complete list of publications issued by the Bureau is given in *Publications of the Commonwealth Bureau of Census and Statistics* (with subject index) available from the Commonwealth Statistician, Canberra.
