## PREFACE

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, 'to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . Census and statistics.' In the exercise of the power so conferred, a Census and Statistics Act was passed in 1905, and in the year following the Commonwealth Bureau of Census and Statistics was created. The first *Official Year Book* was published early in 1908. The publication here presented is the fifty-third *Official Year Book* issued under the authority of the Commonwealth Government.

The special index (preceding the general index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, in order to conserve space, have been omitted or abbreviated in the present volume. Where, in the general index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Among new material added the following items may be especially mentioned.

Chapter 7. The Territories of Australia: Description of the first census (1966) of Papua and New Guinea covering both indigenous and non-indigenous populations (pages 141-2).

Chapter 8. Population. Summarised historical account of Australian population census activity from 'musters' of 1788-1825 to 1966 census, together with tables showing information required at Commonwealth censuses from 1911 and a description of current census organisation (pages 163-70).

Chapter 13. Transport, Communication and Travel. Special article 'Standardisation of railway gauges' prepared by the Commonwealth Department of Shipping and Transport, dealing with the history of the subject and the development to date (pages 440-5). New sections, dealing with Australian transport co-ordinating authorities (pages 421-4) and road research (pages 464-5).

*Australian Books.* The re-inclusion of the reprint of this publication of the National Library of Australia (pages 1231-77) which last appeared in the *Year Book* in issue No. 48.

*Seasonally Adjusted Indicators 1967.* A brief description of this recent addition to the Bureau's publications, its purpose, and the method of publication of subsequent figures and further seasonally adjusted series is provided in Chapter 30, Miscellaneous (page 1220).

Appendix. Particulars of the characteristics of the population as obtained at the 1966 census. Further detail is being issued in a series of mimeographed statements.

A re-arrangement in chapter order has made it possible to advance the statistics in the chapter Manufacturing Industry by one year to 1965-66.

The material in the *Year Book* has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

The statistics contained in the majority of the chapters of this volume relate to the years ended June or December 1966. More detailed statistics on subjects dealt with in the *Year Book* are available in the various annual printed reports published by this Bureau, and more recent statistics are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in other publications issued monthly, quarterly, half-yearly, or yearly. These publications are listed in Statistical Publications of Australia (see Chapter 30, Miscellaneous), and the last pages of this volume contain a list of current and recent printed publications, showing issue numbers, dates and prices.

In June 1967 the Deputy Commonwealth Statistician and Government Statistician of Tasmania published *Tasmania Year Book No. 1-1967*, thereby renewing a series initiated for the year 1890 by R. M. Johnston, Government Statistician, under the title of *Tasmanian Official Record*, but which lapsed through lack of adequate resources after two subsequent issues. A State *Year Book* is now published by the Deputy Commonwealth Statistician of each State. These publications contain greater statistical detail and additional supplementary material concerning the individual States which cannot be accommodated in the Commonwealth *Year Book*.

Apart from *Year Books*, the Deputy Commonwealth Statisticians of all States issue *Pocket Year Books* and a number of printed and mimeographed publications dealing with their respective States. These publications are listed on pages 1163-5 of the 1962 issue of the *Year Book*, and, together with publications of the Central Bureau, in *Publications of the Commonwealth Bureau of Census and Statistics* issued annually by this Bureau.

My thanks are tendered to the Deputy Commonwealth Statisticians of the several States, who have collected and compiled the data on which a great part of the information given in the Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments and to others who have kindly, and often at considerable trouble, supplied information, and to the Government Printer and his staff for their services in printing this Year Book and in assisting and advising throughout its preparation.

K. M. ARCHER

Commonwealth Statistician

Commonwealth Bureau of Census and Statistics

Canberra, A.C.T., September 1967

## CONTENTS

	PAGE
<b>CHAPTER 1. DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA</b> . . . . .	<b>1</b>
Early knowledge and discovery of Australia (1); The annexation of Australia (2); The creation of the several Colonies (3); The establishment of the Commonwealth of Australia (4); The Constitution of the Commonwealth (5); The External Territories of Australia (22).	
<i>Plate—1, Map of Australia (Frontispiece)</i>	
<b>CHAPTER 2. PHYSICAL GEOGRAPHY AND METEOROLOGY</b> . . . . .	<b>25</b>
General description of Australia (25); Climate and meteorology of Australia—precipitation (28), temperature (35), humidity, evaporation (37), sunshine and cloud (38), wind (38), storms (39), climatological tables (40), weather of 1966 (51)	
<i>Plates—2-4, Rainfall; 5-8, Temperatures; 9, Frost free period; 10, Evaporation; 11-12, Hours of sunshine; 13-14, Wind roses; 15, Thunderdays (between pages 32 and 33).</i>	
<b>CHAPTER 3. GENERAL GOVERNMENT</b> . . . . .	<b>53</b>
Parliamentary government—Governors-General, Governors, Ministries (53); Parliaments and elections (60); Commonwealth referendums (66); Commonwealth legislation (68); Cost of parliamentary government (73).	
<b>CHAPTER 4. DEFENCE</b> . . . . .	<b>75</b>
Department of Defence (75); Naval defence (80); Military defence (82); Air defence (84); Department of Supply (86).	
<b>CHAPTER 5. REPATRIATION</b> . . . . .	<b>91</b>
War pensions (91); Service pensions (98); Medical treatment for ex-servicemen and dependants of ex-servicemen (101); General Repatriation benefits and miscellaneous (103); The Services Canteens Trust Fund (106).	
<b>CHAPTER 6. INTERNATIONAL RELATIONS</b> . . . . .	<b>107</b>
Relations with Commonwealth and other countries (107); The Colombo Plan (108); Participation in the United Nations (110); Diplomatic representation (111); Overseas trade representation (114); Commonwealth Migration Offices (115).	
<b>CHAPTER 7. THE TERRITORIES OF AUSTRALIA</b> . . . . .	<b>117</b>
The Northern Territory—General description (117), population (118), production (118), trade, transport and communication (122), education (123), Aboriginal welfare (124), finance (124); The Australian Capital Territory—General description (125), National Capital Development Commission (126), works and services (126), production (127), transport and communication (128), social (129), finance (129); Norfolk Island (130); Papua and New Guinea—Administration (132), judiciary (133), agriculture and animal industry (133), indigenous labour (138), secondary industries (139), finance (140), census of Papua and New Guinea, 1966 (141); Papua—General description (143), population (143), land tenure (143), production (144), trade, transport and communication (145), education and health (146), finance (147); New Guinea—General description (149), population (149), land tenure (149), production (150), trade, transport and communication (151), education and health (153), finance (153); Nauru (154); Heard and McDonald Islands (157); Australian Antarctic Territory (158); Cocos (Keeling) Islands (158); Christmas Island (159).	

	PAGE
<b>CHAPTER 8. POPULATION</b>	<b>161</b>
Population statistics (161); The census (163); Censuses of the Commonwealth (164); Population recorded at censuses (171); Growth and distribution (172); Mean population (178); Elements of increase (178); Density (181); General characteristics (181); Overseas arrivals and departures (186); Assisted migration (194); Regulation of immigration (199); Passports, citizenship and naturalisation (201); Population of External Territories (205); Aboriginal population (206); International population statistics (206).	
<i>Plates—16, Population of Australia (162); 17, Overseas arrivals and departures (187).</i>	
<b>CHAPTER 9. VITAL STATISTICS</b>	<b>211</b>
Provisions for registration and compilation of statistics (211); Marriages (212); Fertility and reproduction—births and confinements (217), fertility (219), masculinity of births (224), ex-nuptiality (224), multiple births (226), characteristics of parents (226), still-births (230); Mortality—deaths (231), rates (232), life tables (234), ages at death (237), infant mortality (238), causes of death (243); Vital statistics of External Territories (253); International vital statistics (253).	
<i>Plates—18, Births, deaths and marriages (213); 19, Rates of births, deaths and natural increase (220); 20, Age-specific birth rates (222); 21, Infant mortality rates (241).</i>	
<b>CHAPTER 10. HOUSING AND BUILDING</b>	<b>257</b>
Census dwellings (257); Building (264); Government activities in the housing field (276); Advances to home purchasers (288).	
<i>Plates—22, New houses (269); 23, New flats (270).</i>	
<b>CHAPTER 11. LABOUR, WAGES AND PRICES</b>	<b>297</b>
Retail prices and price indexes (297); Consumer Price Index (298); Tabular statements (300); International comparisons (303); Wholesale prices and price indexes (304); Export prices and price indexes (308); Arbitration and Wages Boards Acts and associated legislation (312); Rates of wage and hours of work (315); Average weekly earnings (324); Surveys of wage rates, earnings and hours (326); Basic wages in Australia—Commonwealth judgments, inquiries, cases (339), rates (344); Wage margins (350); Annual leave (353); Long service leave (355); Industrial disputes (358); Labour organisations (364).	
<i>Plates—24, Average weekly earnings (325); 25, Industrial disputes (359).</i>	
<b>CHAPTER 12. OVERSEAS TRANSACTIONS</b>	<b>369</b>
Overseas trade, constitutional provisions and legislation (369); Government trade authorities (372); Trade agreements (373); Trade services (375); Export Payments Insurance Corporation (376); Collection and presentation of trade statistics (376); Total overseas trade (379); Classified summary of overseas trade (382); Imports, by economic class (386); Exports, by industry (389); Trade of Australia and other countries (390); Direction of overseas trade (390); Trade with the United Kingdom (398); Trade with eastern countries (402); Trade at principal ports (404); Ships and aircraft stores (405); Movement of bullion and specie (405); Ratios of customs revenue to value of imports (406); Imports and exports of various countries (407); Trade in calendar years (407); Excise (408); Overseas investment by private investors (408); Balance of payments—explanatory notes (414), tables (416), international reserves (419); Indexes of value of imports and exports at constant prices (420).	
<i>Plates—26, Overseas trade (381); 27, Exports of principal commodities (384); 28, Overseas trade, major groups of countries; 29, Exports and imports to United Kingdom (between pages 384 and 385); 30, Imports, by economic class (387); 31 Values of imports and exports, by country (391).</i>	

**CHAPTER 13. TRANSPORT, COMMUNICATION AND TRAVEL . . . . . 421**

The Australian Transport Advisory Council and its standing committees (421); Control of shipping (424); System of record (426); Overseas shipping (426); Interstate shipping (428); Shipping at principal ports (431); Shipping cargo (432); World shipping tonnage (434); Vessels registered (434); Shipping freight rates (435); Shipping casualties (438); Government railways—standardisation of gauges (440), operations (445), finances (447), traffic (449), rolling stock (453), accidents (454), fuel used (454), employees (455); Tramway, trolley-bus, omnibus, and ferry services (455); Motor vehicles on register, licences (458); Registrations of new motor vehicles (460); Road traffic accidents (461); Roads (463); Civil Aviation—international activity (465), regular air services within Australia (466), pilots, aerodromes, facilities, registrations, accidents (469–71); Postmaster-General's Department, facilities, employees, finances (471–4); Postal services (475); Internal telecommunication services (477); Overseas telecommunication services (479); Radio-communication stations authorised (481); Broadcasting services (482); Television services (483); Broadcast listeners' and television viewers' licences (484); Travel—overseas movement (486), interstate and other internal movement (492), tourist organisation (493).

*Plates—32, Government railways, route mileage and traffic (441); 33, Civil aviation, passengers and freight (468).*

**CHAPTER 14. WELFARE SERVICES . . . . . 495**

Expenditure (495); Commonwealth social services—benefits provided (498), age and invalid pensions (499), child endowment (501), Commonwealth Rehabilitation Service (505), funeral benefits (506), maternity allowances (507), unemployment, sickness and special benefits (508), widows' pensions (510), reciprocal agreements with other countries (511), assistance to homes for aged and disabled persons (512); Non-government welfare organisations (513).

**CHAPTER 15. PUBLIC JUSTICE . . . . . 515**

The Australian legal system (515); Lower (magistrates') courts (517); Higher (judges') courts (521); Serious crime (521); Civil cases (527); Transactions of the High Court (527); Divorce (528); Bankruptcy (534); Police (536); Prisons (538); Patents, trade marks and designs (538); Copyright (539); Cost of administration of law and order (539).

**CHAPTER 16. PUBLIC HEALTH . . . . . 543**

State public health legislation and administration (543); Supervision and care of infant life (550); Medical and dental inspection of school children (551); Cremations (554); National health benefits (554); Commonwealth organisations concerned with health (561); Control of infectious and contagious diseases (566); Commonwealth grants to organisations associated with public health (570); Public hospitals and nursing homes (574); Mental health services (576); Private hospitals and nursing homes (580); Repatriation hospitals (580); Hansen's disease hospitals (581).

*Plates—34, Royal Flying Doctor network (571); 35, Equipment used in Royal Flying Doctor Service (photographs) facing page 576.*

**CHAPTER 17. EDUCATION, CULTURAL ACTIVITIES AND RESEARCH . . . . . 583**

Education in Australian schools (583); Numbers of schools, teachers and pupils (586); Teacher training and recruitment (594); Other aspects of school education (596); Pre-school education (599); Technical education (599); Government expenditure on schools and technical education (602); Non-government schools' finance (604); Universities (604), staff (606), students (607), degrees conferred, etc. (611), finance (613); Other tertiary institutions (620); Commonwealth activities in education (622); Adult education (625); Overseas students (627); Organisations associated with education (627); Commonwealth libraries (628); State libraries (631); University libraries (634); Children's libraries and school libraries (637); Museums and art galleries (638); Botanical and zoological gardens (643); Book publishing (644); Film production and censorship (646); Arts Council of Australia (648); Australian Elizabethan Theatre Trust (649); The Australian Council of National Trusts (649); Historic Memorials Committee (650); Commonwealth Art Advisory Board (650); Outline of research in Australia (650); Commonwealth Scientific and Industrial Research Organization (653); Mount Stromlo and Siding Spring Observatories (655); Australian Atomic Energy Commission (655); Scientific societies (657); State Government expenditure on education, etc. (658).

*Plates—36, Schools, ages of pupils (591); 37, University students enrolled (608).*

	PAGE
<b>CHAPTER 18. NATIONAL ACCOUNTS . . . . .</b>	<b>659</b>
Description of National Accounts (659); National Accounts and tables (663); Description of items in National Accounts (671).	
<i>Plate—38, Articulation of Australian National Accounts (660).</i>	
<b>CHAPTER 19. PRIVATE FINANCE. . . . .</b>	<b>675</b>
Currency (675); Australian coinage (675); Australian note issue (677); Rates of exchange (680); Volume of money (680); Banking (680); Reserve Bank of Australia (683); Commonwealth Development Bank of Australia (686); Cheque-paying banks (687); Savings banks (707); Finance companies (716); Life insurance (717); Fire, marine and general insurance (732); Export Payments Insurance Corporation (734); Instalment credit for retail sales (734); New capital raisings by companies in Australia (738); Unit trusts, land trusts and mutual funds (740); Pastoral finance companies (742); Rural debt (743); Short-term money market (744); Friendly societies (746); Building societies (746); Co-operative societies (748); Lotteries (749); Betting (750); Pension and superannuation schemes (750); Probates and letters of administration (755).	
<i>Plates—39, Banking (696); 40, Insurance (719).</i>	
<b>CHAPTER 20. PUBLIC FINANCE . . . . .</b>	<b>757</b>
Financial provisions of the Constitution (757); Commonwealth Public Account (757); All Commonwealth funds—receipts and expenditure (758), expenditure by function (759), main components of expenditure (763), receipts (776); Commonwealth Consolidated Revenue Fund—expenditure (782), receipts (787); Commonwealth trust funds (788); Commonwealth Loan Fund (788); State finance (790); State Consolidated Revenue Fund—expenditure (791), receipts (793); State receipts—taxation (796), business undertakings (798), other (800); State surplus revenue (801); State Loan Funds (801); Advances to settlers (804); Commonwealth and State finance (807); Government securities on issue (808); Commonwealth loan raisings (816); National Debt Sinking Fund (821); Taxes on income—system (823), assessable income (824), concessional deductions (825), exemptions (826), rates, individuals (826), taxes on specified incomes (827), company income taxes (829), income tax assessments (831), yield of income taxes (833).	
<i>Plates—41, All Commonwealth funds, receipts and expenditure (760); 42, State consolidated revenue funds (794).</i>	
<b>CHAPTER 21. LOCAL GOVERNMENT . . . . .</b>	<b>835</b>
Local government authorities (835); Semi-governmental authorities (835); Local government—areas, population, dwellings, valuations, etc. (836), finances (838); Local and semi-governmental authorities' debt (842); Roads and bridges (844); Water supply, sewerage and drainage (854); Harbour boards and trusts (867); Fire brigades (873).	
<b>CHAPTER 22. RURAL INDUSTRY . . . . .</b>	<b>875</b>
Disposal of crown lands (875); Closer settlement and war service settlement (877); Alienation and occupation of crown lands (878); Number and area of rural holdings (882); Employment on rural holdings (883); Technical aspects of rural industry (885); The soils of Australia (888); Soil improvement and conservation (888); Agricultural production—progress, assistance and control (891), distribution, production and value of crops (893), wheat (900), other cereal crops (914), fodder crops (923), industrial crops (925), vegetables, fruit and vineyards (936); Pastoral production—livestock numbers (948), value of production (950), indexes of quantum and price (951); sheep (952), cattle (953), horses (957), wool (957), meat (969), other pastoral products (974); The dairying industry (975); The poultry industry (987); The bee-farming industry (991); Value of dairy, poultry and bee production and indexes of price and quantum of farm production (993).	
<i>Plates—43, Area of crops (894); 44, Wheat for grain (907); 45, Exports of wheat and flour (912); 46, Livestock (949); 47, Sheep numbers and wool production (961); 48, Value of wool exports (966).</i>	

	PAGE
<b>CHAPTER 23. WATER CONSERVATION AND IRRIGATION . . . . .</b>	<b>997</b>
Water resources and their utilisation (997); National and interstate aspects (1002); International aspects (1005); New South Wales (1006); Victoria (1010); Queensland (1014); South Australia (1018); Western Australia (1021); Tasmania (1023); Northern Territory (1025); Papua and New Guinea (1027).	
<b>CHAPTER 24. FORESTRY . . . . .</b>	<b>1029</b>
Source of statistics (1029); Forestry in Australia (1029); Employment in forestry (1036); Forest production (1037); Timber and timber products (1039); Overseas trade in forest products, etc. (1041).	
<b>CHAPTER 25. FISHERIES . . . . .</b>	<b>1043</b>
Fisheries resources and their commercial exploitation (1043); History of the development of Australian fisheries (1044); Fisheries administration and research (1045); Collection and presentation of fisheries statistics (1046); Boats and equipment used in fisheries (1047); Employment in fisheries (1048); Production, processing and domestic marketing of fisheries products (1049); Consumption of edible fisheries products (1057); Overseas trade in fisheries products (1057).	
<i>Plates—49, Tuna fishing (photographs); 50, Cray fishing (photographs) (between pages 1056 and 1057).</i>	
<b>CHAPTER 26. MINERAL INDUSTRY . . . . .</b>	<b>1061</b>
Geology (1061); Mineral resources (1063); History (1065); Administration (1066); Government assistance (1071); Research (1076); International relations (1077); Scope and sources of statistics (1079); Mineral exploration (1080); Mining and quarrying (1082); Mineral processing and treatment (1096); Overseas trade (1097); Review of recent developments (1100).	
<i>Plates—51, Iron ore mining and loading facilities (photographs); 52, Offshore oil drilling and refining operations (photographs) (between pages 1088 and 1089); 53, Mine production of principal metals (1094); 54, Mine production of principal metals and coal (1095).</i>	
<b>CHAPTER 27. MANUFACTURING INDUSTRY . . . . .</b>	<b>1105</b>
Definitions in factory statistics (1107); Classification of factories (1108); Factory development since 1901 (1109); Number of factories (1110); Number of persons employed (1111); Employment in factories (1113); (Distribution of sexes in factories (1119); Children employed (1121); Power equipment (1122); Value of production, materials used, salaries and wages (1125); Value of land, buildings, plant and machinery (1132); Principal factory products (1136); Individual industries (1142).	
<i>Plates—55, Employment in factories by class of industry (1114); 56, Value of production, by class of industry (1131).</i>	
<b>CHAPTER 28. ELECTRIC POWER GENERATION AND DISTRIBUTION . . . . .</b>	<b>1161</b>
Snowy Mountains Hydro-electric Scheme (1162); New South Wales (1164); Victoria (1167); Queensland (1169); South Australia (1171); Western Australia (1172); Tasmania (1173); Statistical Summary (1175); Commonwealth Territories (1176).	
<b>CHAPTER 29. EMPLOYMENT AND UNEMPLOYMENT . . . . .</b>	<b>1179</b>
Population censuses (1179); The work force survey (1187); Surveys of multiple jobholding (1192); Surveys of leavers from schools, etc. (1194); Wage and salary earners in employment (1197); Commonwealth Employment Service (1203).	
<i>Plates—57, Wage and salary earners in civilian employment (1200); 58, Registered unemployed and number on unemployment benefit (1205).</i>	
<b>CHAPTER 30. MISCELLANEOUS . . . . .</b>	<b>1207</b>
Valuation of Australian production (1207); Indexes of farm production (1210); Consumption of foodstuffs and beverages (1212); Retail trade (1217); Interstate trade (1219); Statistical organisation in Australia (1219); Statistical and other official publications of Australia (1221); 36th Session of International Statistical Institute (1225).	
<i>Plates—59, 60, 36th Session of International Statistical Institute; 61, Expo 67 (between pages 1216 and 1217).</i>

## SYMBOLS AND OTHER FORMS OF USAGE IN THIS YEAR BOOK

The following symbols, where shown in columns of figures, mean:

- n.a. —not available.
- .. —nil or less than half the final digit shown, or not applicable.
- p —preliminary—figure or series subject to revision.
- r —figure or series revised since previous issue.
- n.e.i. —not elsewhere included.
- n.e.c.—not elsewhere classified.
- n.s. —not stated.

A blank space in a column of figures means that the figure concerned is not yet available.

The following abbreviations are used for the titles of the Australian States and Territories and the Commonwealth of Australia: N.S.W. (New South Wales), Vic. (Victoria), Qld (Queensland), S.A. (South Australia), W.A. (Western Australia), Tas. (Tasmania), N.T. (Northern Territory), A.C.T. (Australian Capital Territory), T.P.N.G. (Territory of Papua and New Guinea), Aust. (Australia), Cwlth (Commonwealth).

In general, the statistics in this volume relate to the States and Territories of the Commonwealth of Australia, i.e. they exclude particulars of the External Territories of Australia, which, however, are specifically dealt with in Chapter 7. The Territories of Australia. A few series elsewhere include particulars of the Territory of Papua and New Guinea because of the nature of the subject-matter—these series are indicated.

Yearly periods shown as e.g. 1966 refer to the year ended 31 December 1966; those shown as e.g. 1965–66 refer to the year ended 30 June 1966. Other yearly periods are specifically indicated. The range of years shown in table headings, e.g. 1901 to 1965–66, indicates the period covered, but does not necessarily imply that each intervening year is included.

Unless otherwise indicated, the British system of weights and measures is used. One short ton equals 2,000 lb.

Values are expressed in dollars (\$) or cents (c) Australian, with or without the letter A, unless another currency is specifically stated.

Any discrepancies between totals and sums of components in tables are due to rounding.

## CORRIGENDA

36-7—last line page 36, first two lines page 37—*for* Regions subject to frost . . . south-western Western Australia. *read* Regions in which frosts may occur at any time of the year comprise most of Tasmania, large areas of the tablelands of New South Wales, much of inland Victoria, particularly the north-east, and a small part in the extreme south-west of Western Australia.

765—*Total, welfare* Queensland, for 10,900 *read* 110,900

## CHAPTER 1

# DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA

### Early knowledge and discovery of Australia

The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Year Book No. 39 (see page 1) and earlier issues.

#### Terra Australis

Although references to an Austral land are found in the works of writers in the early centuries after Christ, and evidence appeared in maps, globes and manuscripts from the Middle Ages onward, there is no definite evidence connecting this so-called *Terra Australis* with Australia. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria.

#### Early discoverers of Australia

The Portuguese may have discovered part of the Australian coast before 1542, and it has been suggested that the Arabs may have come to Australia even earlier, though there is no evidence to support this theory. For all practical purposes, however, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606 the Spaniard Quiros, on reaching the island that has retained the name of *Espiritu Santo* (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian continent but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the island of New Guinea. During March 1606 the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years there were nine visits of Dutch navigators to Australian waters: by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642 Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

#### Discoveries by the English

In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnar*, a trading vessel whose crew had turned buccaneers. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

At the end of the seventeenth century it was uncertain whether Tasmania and New Zealand were parts of Australia or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though undertaken primarily for the purpose of observing the transit of Venus from Tahiti, had also the objective of ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, and accompanied by Sir Joseph Banks, the botanist, Dr. Solander the naturalist, Green the

astronomer, draughtsmen, and servants, Cook, after observing the transit of Venus at Tahiti, turned towards New Zealand, sighting that land on 7 October 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20 April 1770 Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, on 29 April 1770 he discovered Botany Bay, where he landed. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11 June 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13 July 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure* with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14 February 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance, the existence of a channel between Tasmania and Australia, was made by Bass and Flinders in 1798.

### The annexation of Australia

#### Annexation of the eastern part of Australia, 1770

Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23 August 1770 that the history of Australia was brought into definite political connection with western civilization. It was on that date that Captain Cook took possession 'of the whole eastern coast, from latitude 38° S. to this place, latitude 10½° S., in right of His Majesty King George the Third'. Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26 January 1788, when Captain Phillip's Commission, first issued to him on 12 October 1786 and amplified on 2 April 1787, was read to the people whom he had brought with him in the 'First Fleet'.

The commission appointed Phillip 'Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south'.

Although Captain Cook had taken possession of the North Island of New Zealand in November 1769, and of the South Island in January 1770, it is doubtful whether at the time when Captain Phillip's commission was drawn up New Zealand was considered as one of the 'islands adjacent in the Pacific Ocean'. The fact that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, leaves this an open question, as nothing more than extra territorial jurisdiction may have been intended. New Zealand does not appear to have become British territory unequivocally until 1840, when Captain Hobson arrived at the Bay of Islands, and on 30 January read his commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5 February the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21 May British sovereignty over the islands of New Zealand was explicitly proclaimed.

#### Extension of New South Wales westward, 1825

On 17 February 1824 Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20 September 1824 of the coast from the 135th to the 129th degree of east longitude. On 16 July 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

### Annexation of Western Australia, 1827

An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9 November 1826, landed at the Sound on 26 December following, and on 21 January 1827 hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17 January 1827, and on his return in the following April submitted a glowing report on what he described as a 'rich and romantic country', urging its occupation for the purpose of settlement. He left for England in July 1827, continuing his advocacy, notwithstanding much discouragement, with unabated enthusiasm. He was at last successful, the result being due mainly to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June 1829. On the second of the preceding month, Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of 'all that part of New Holland which is not included within the territory of New South Wales'. Thus before the middle of 1829 the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

## The creation of the several Colonies

### New South Wales

In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825 when the western boundary was extended to the 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles. Following the transfer of the Australian Capital Territory to the Commonwealth in 1911 the area was further reduced to 309,433 square miles.

Lord Howe Island, which is a dependency of New South Wales, and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 436 miles north-east of Sydney, and has an area of 3,220 acres.

### Tasmania

Van Diemen's Land, first settled in 1803, was politically separated from New South Wales in 1825, being constituted a separate colony on 14 June. The area of the colony was 26,215 square miles. The name of the colony was officially changed to Tasmania in 1856 when responsible government was established. Following a resurvey of local government areas the area of Tasmania was determined at 26,383 square miles at the end of 1964.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a dependency of Tasmania since the nineteenth century. In December 1911 five members of the Australasian Antarctic Expedition landed on the island and remained there until 1915. On 3 March 1948 another party was landed to man a new station which has since been maintained as a scientific base. The island is about twenty-one miles long and two miles wide.

### Western Australia

The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (see above), which remained under the jurisdiction of New South Wales until 1831.

### South Australia

On 15 August 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a 'province', and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28 December 1836 and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st and 132nd meridians of east longitude. On 10 December 1861, by authority of the Imperial Act 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern

boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6 July 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles. The Territory was transferred to the Commonwealth on 1 January 1911 (see below).

#### New Zealand

New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales by letters patent of 16 November of that year, was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7 August 1840. Proclamation of the separation was made on 3 May 1841. The area of the colony was 103,862 square miles.

#### Victoria

In 1851 the 'Port Phillip District' of New South Wales was constituted the colony of Victoria, 'bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia'. The area of the new colony was 87,884 square miles, and its separate existence took effect from 1 July 1851.

#### Queensland

The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6 June 1859, although separation from New South Wales was not completed until 10 December of the same year. The territory comprised by the new colony was 'so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean'. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13 March 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12 April 1862, the area of Queensland was increased by the annexation of 'so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria'. With this addition the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each local government area of Queensland, based on the most recent maps available, the Surveyor-General, in 1958, determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

### The establishment of the Commonwealth of Australia

#### Federation

On 1 January 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the 'Commonwealth of Australia', the designation of 'Colonies'—except in the case of the Northern Territory, to which the designation 'Territory' applied—being at the same time changed to that of 'States'.

#### Transfer of the Northern Territory to the Commonwealth

On 7 December 1907 the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under The Northern Territory Surrender Act, 1907 (assented to on 14 May 1908) and by the Commonwealth Parliament under the *Northern Territory Acceptance Act* 1910 (assented to on 16 November 1910). The Territory was formally transferred to the Commonwealth on 1 January 1911, and became the Northern Territory of Australia.

By Imperial Order in Council dated 23 July 1931 Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth on 10 May 1934, in the *Ashmore and Cartier Islands Acceptance Act* 1933, under the name of the Territory of Ashmore and Cartier Islands. The Act authorised the Governor

of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July 1938 annexed the islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

The area of Ashmore Reef is approximately 60 square miles (to the limit of the reef), and it is situated 220 statute miles off the western coast of Australia and 520 statute miles west of Darwin. Cartier Islands are approximately 17 square miles in area (to the limit of the reef), and are situated 184 statute miles off the western coast of Australia and 490 statute miles west of Darwin.

#### Transfer of the Australian Capital Territory to the Commonwealth

On 18 October 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5 December 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1 January 1911. By the *Jervis Bay Territory Acceptance Act* 1915 an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4 September 1915.

#### Present composition of the Commonwealth

Following revision of the area of Queensland and Tasmania as mentioned on pages 3 and 4, and of the area of the Northern Territory during 1964, the total area of the Commonwealth of Australia has been determined as 2,967,909 square miles. The dates of creation and the areas of its component States and Territories are shown below.

#### THE COMMONWEALTH OF AUSTRALIA: YEAR OF FORMATION AND AREA OF COMPONENT STATES AND TERRITORIES

State or Territory	Year of formation into separate Colony or Territory	Present area in square miles	State or Territory	Year of formation into separate Colony or Territory	Present area in square miles
New South Wales	1786	309,433	Northern Territory	1863	520,280
Victoria . . .	1851	87,884	Australian Capital Territory . . .	1911	939
Queensland . . .	1859	667,000			
South Australia . .	1834	380,070			
Western Australia .	1829	975,920	Commonwealth of Australia . . .	..	2,967,909
Tasmania . . .	1825	26,383			

#### The Constitution of the Commonwealth

Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the federal movement in Australia, was embodied in this chapter in issues of the Year Book up to and including No. 22.

#### Commonwealth Constitution Act

The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: 'An Act to constitute the Commonwealth of Australia', as amended by the *Constitution Alteration (Senate Elections)* 1906, the *Constitution Alteration (State Debts)* 1909, the *Constitution Alteration (State Debts)* 1928, and the *Constitution Alteration (Social Services)* 1946, is given in *extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31 December 1966.

#### THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT. . 63 & 64 VICT., CHAPTER 12.

*An Act to Constitute the Commonwealth of Australia. (9th July, 1900.)*

**W**HEREAS the people of New South Wales, Victoria, South Australia, Queensland and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State: and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.  
 "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."  
 "Original States" shall mean such States as are parts of the Commonwealth at its establishment.
7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.  
 Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.
8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.
9. The Constitution of the Commonwealth shall be as follows:—

#### THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
  - Part I.—General:
  - Part II.—The Senate:
  - Part III.—The House of Representatives:
  - Part IV.—Both Houses of the Parliament:
  - Part V.—Powers of the Parliament:
- Chapter II.—The Executive Government:
- Chapter III.—The Judicature:
- Chapter IV.—Finance and Trade:
- Chapter V.—The States:
- Chapter VI.—New States:
- Chapter VII.—Miscellaneous:
- Chapter VIII.—Alteration of the Constitution.
- The Schedule.

## CHAPTER I.—THE PARLIAMENT.

## PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament", or "The Parliament of the Commonwealth".

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

## PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.\* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

\* The Parliament has otherwise provided, by means of the *Representation Act* 1948, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18 May 1948).

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,\* and the places of those of the second class at the expiration of [the sixth year] *six years*,\* from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*\* the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*\* following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*\* preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate: and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

\* As amended by Section 2 of the *Constitution Alteration (Senate Elections) 1906*. The words in square brackets have been repealed: amendments are shown in italics.

22. Until the Parliament otherwise provides, the presence of at least one third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

### PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales . . . . .	twenty-three;	South Australia . . . . .	six;
Victoria . . . . .	twenty;	Tasmania . . . . .	five;
Queensland . . . . .	eight;		

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales . . . . .	twenty-six;	South Australia . . . . .	seven;
Victoria . . . . .	twenty-three;	Western Australia . . . . .	five;
Queensland . . . . .	nine;	Tasmania . . . . .	five.

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.\*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

\* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1965*, Sections 39 and 39A (repealing an earlier provision made by the *Commonwealth Franchise Act 1902*). For present qualifications see Chapter 3, General Government.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.\*

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

#### PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or

---

\* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1965*, Section 69. For present qualifications see Chapter 3, General Government.

- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section (iv) does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.\*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

#### PART V.—POWERS OF THE PARLIAMENT.†

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i) Trade and commerce with other countries, and among the States:
- (ii) Taxation; but so as not to discriminate between States or parts of States:
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:

\* The Parliamentary allowance has been varied from time to time (see Chapter 3, General Government). In 1964 it was increased to £3,500 (\$7,000), while additional allowances of £2,000 (\$4,000) and £4,250 (\$8,500), respectively, were granted to the Leaders of the Opposition in the Senate and the House of Representatives, and an additional allowance of £1,000 (\$2,000) to the Leader in the House of Representatives (other than the Leader of the Opposition) of a recognised political party which has not less than ten members in the House of Representatives and of which no member is a Minister.

† Particulars of proposed laws which were submitted to referendums are referred to in Chapter 3, General Government, of this Year Book.

- (iv) Borrowing money on the public credit of the Commonwealth:
- (v) Postal, telegraphic, telephonic, and other like services:
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii) Lighthouses, lightships, beacons and buoys:
- (viii) Astronomical and meteorological observations:
- (ix) Quarantine:
- (x) Fisheries in Australian waters beyond territorial limits:
- (xi) Census and statistics:
- (xii) Currency, coinage, and legal tender:
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned:
- (xv) Weights and measures:
- (xvi) Bills of exchange and promissory notes:
- (xvii) Bankruptcy and insolvency:
- (xviii) Copyrights, patents of inventions and designs, and trade marks:
- (xix) Naturalization and aliens:
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth:
- (xxi) Marriage:
- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) *\*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific:
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:
- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:

---

\* Under Section 2 of the *Constitution Alteration (Social Services)* 1946, the Constitution was amended by the insertion of this paragraph.

(xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:

(xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of

the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and the House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

## CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.\*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.\*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

---

\* The number of Ministers of State has been increased from time to time and has been 26 since 1967. the annual appropriation for Ministers' salaries has been correspondingly increased and has been \$197,300 since February 1967.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:	Lighthouses, lightships, beacons, and buoys:
Naval and military defence:	Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

### CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.\*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.†

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
- (ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
- (iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

\* The *Judiciary Act* 1903 provided for a Chief Justice and two other Justices, increased by subsequent amendments to six.

† The *Judiciary Act* 1903 provided for the payment of a salary of £3,500 (\$7,000) a year to the Chief Justice and of £3,000 (\$6,000) a year to each other Justice, increased by subsequent amendments to £12,000 (\$24,000) and £10,500 (\$21,000) a year, respectively.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i) Arising under any treaty:
- (ii) Affecting consuls or other representatives of other countries:
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
- (iv) Between States, or between residents of different States, or between a State and a resident of another State:
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court:
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary;
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth;
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament;
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
  - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
  - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council;
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],\* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

\* Under Section 2 of the *Constitution Alteration (State Debts) 1909*, the words in square brackets were omitted.

† Under Section 2 of the *Constitution Alteration (State Debts) 1928*, the Constitution was amended by the insertion of this section.

## CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State: and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

## CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

#### CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

#### CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

#### SCHEDULE.

##### OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

##### AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

#### The Royal Proclamation

The preceding Act received the Royal assent on 9 July 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17 September 1900, constituted the Commonwealth as from 1 January 1901; it read as follows.

#### BY THE QUEEN.

#### A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales, Victoria, South Australia, Queensland, and Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

### The External Territories of Australia

#### Norfolk Island

In 1856 Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony, and finally by the passage of the *Norfolk Island Act* 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area of approximately 14 square miles.

#### Papua

Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1 September 1906, under the authority of the *Papua Act* 1905. The area of Papua is about 86,100 square miles.

### Trust Territory of New Guinea

In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued by the League of Nations on 17 December 1920. The Governor-General of the Commonwealth was authorised to accept the mandate by the *New Guinea Act* 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 92,160 square miles, and the administration under the mandate dated from 9 May 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13 December 1946.

### Trust Territory of Nauru

In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude 0° 32' S., and longitude 166° 55' E. and is about 8½ square miles in area. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the *Nauru Island Agreement Act* 1919, and a supplementary agreement of 30 May 1923, which gave the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. So far, the administrators have been appointed by the Commonwealth Government. The administration under the mandate operated from 17 December 1920 to 1 November 1947, since when Nauru has been administered under a Trusteeship Agreement with the United Nations.

### Australian Antarctic Territory

An Imperial Order in Council of 7 February 1933 placed under Australian authority 'all the islands and territories other than Adelie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude'.

The Order came into force with a proclamation issued by the Governor-General on 24 August 1936, after the passing of the *Australian Antarctic Territory Acceptance Act* 1933 by the Commonwealth Parliament. The boundaries of Adelie Land were definitely fixed by a decree of 1 April 1938, as latitude 60° S., longitude 135° E. and longitude 142° E.

### Heard and McDonald Islands

Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26 December 1947. Heard Island is approximately 27 miles long and 13 miles wide, and McDonald Islands, about 26 miles to the west of Heard Island, are small, rocky and precipitous.

### Cocos (Keeling) Islands

The *Cocos (Keeling) Islands Act* 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23 November 1955 as the date of transfer. From that date the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands. Their approximate area is about 5½ square miles.

### Christmas Island

The *Christmas Island Act* 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1 October 1958, and an Official Representative was appointed to administer the Territory. The area of the island is about 52 square miles.

## CHAPTER 2

# PHYSICAL GEOGRAPHY AND METEOROLOGY

### General description of Australia

#### Geographical position

The Australian Commonwealth, which includes the island continent of Australia and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,967,909 square miles, the mainland alone containing 2,941,526 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean\*. The extreme points are Steep Point on the west, Cape Byron on the east, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south. The difference in latitude between Cape York and Wilson's Promontory is 1,959 miles, and in longitude between Steep Point and Cape Byron 2,489 miles.

#### Tropical and temperate regions

Of the total area of Australia, nearly 39 per cent lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows.

#### AREAS OF TROPICAL AND TEMPERATE REGIONS: STATES AND TERRITORIES (Square miles)

Area	N.S.W. (a)	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Total
Within tropical zone			360,642		364,000		422,980	1,147,622
„ temperate zone	310,372	87,884	306,358	380,070	611,920	26,383	97,300	1,820,287
Total area	310,372	87,884	667,000	380,070	975,920	26,383	520,280	2,967,909

(a) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent of Queensland lies within the tropical zone and 46 per cent in the temperate zone; 37 per cent of Western Australia is tropical and 63 per cent temperate; while 81 per cent of the Northern Territory is tropical and 19 per cent temperate. All the remaining States lie within the temperate zone. The tropical part of Australia thus comprises about 39 per cent of the whole of the continent.

#### Area of Australia compared with areas of other countries

The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about twenty-five times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page. The areas shown are in the main obtained from the *Demographic Yearbook*, 1965, published by the Statistical Office of the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

\* The Southern Ocean is a local designation for that part of the Indian Ocean lying between the southern shores of Australia and Antarctica.

**Geographical features of Australia**

The following description is a broad summary of the main physical characteristics of the Australian continent.

A section through the Australian continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole east coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range, which extends from the north of Queensland to the south of New South Wales, and thence one branch sweeps westwards towards the boundary of Victoria and South Australia, and the other, the main branch, terminates in Tasmania. This range, which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain. The mountains of Australia are relatively low, the highest peak, Mount Kosciusko, in New South Wales, being only about 7,300 feet. Three-quarters of the land-mass of Australia lies between the 600 and 1,500 feet contours in the form of a huge plateau, constituting the most distinctive feature of the Australian continent, to which the peculiarities of Australia's climate can probably be largely ascribed.

The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall and those of the central plains with very slight fall. Of the former not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The two longest rivers of the northern part of the east coast are the Burdekin and the Fitzroy in Queensland. The Hunter is the largest coastal river of New South Wales, and the Murray River, with its great tributary the Darling, drains part of Queensland, the major part of New South Wales, and a large part of Victoria, finally flowing into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. The rivers of the north-west coast of

Australia (Western Australia), e.g. the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale and Ord are of considerable size. So also are those in the Northern Territory, e.g. the Victoria and Daly, and those on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert and Mitchell. The rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

The 'lakes' of Australia may be divided into three classes: true permanent lakes: lakes which, being very shallow, become mere morasses in dry seasons or even dry up and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse. The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre, and Frome, are of considerable extent.

For further information on the geographical features of Australia earlier issues of the Year Book should be consulted. The list of special articles, etc. at the end of this volume indicates the nature of the information available and its position in the various issues.

### Climate and meteorology of Australia

This section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau. The section concludes with a brief summary of the weather of 1966.

#### Introduction

Australia extends from about latitude 10° S. to latitude 44° S., but owing largely to the moderating effects of the surrounding oceans and the absence of very pronounced and extensive mountain masses it is less subject to extremes of climate than are regions of similar size in other parts of the world. The average elevation of the land surface is low—probably close to 900 feet above the sea; while the maximum altitude is just above 7,300 feet. Latitude for latitude the Australian climate is generally more temperate than that of the other large land masses of the earth, although it varies considerably from the tropical to the alpine.

The Australian meteorological seasons are: Summer—December, January, February; Autumn—March, April, May; Winter—June, July, August; Spring—September, October, November.

The following general discussion of the climate of Australia is necessarily brief. However, extensive records of Australian climatic data are held and published in various forms by the Bureau of Meteorology. A programme of regional climatic survey has been in progress for some years, and a large number of studies have been published by the Bureau of Meteorology by the Department of National Development and by State Development Authorities. The Bureau of Meteorology welcomes inquiries for climatic information, which may be made at its Central Office in Melbourne or through the Regional Offices which are situated in each of the State capital cities and in Darwin. Reference may also be made to various bulletins and research papers mentioned in this text for more detailed information on particular topics.

#### Precipitation

Precipitation of moisture from the atmosphere may take various forms depending chiefly on the thermal conditions existing at the time. Within the Australian region precipitation occurs chiefly as rain because of the generally mild temperatures, but may also occur as snow or hail. Broadly, the immediate physical cause of rainfall may be said to be the lifting of moist air with resultant cooling, condensation into cloud, and eventual precipitation of the heavy water droplets as rain. This process may be achieved by three different means each of which may be combined with either or both of the others:

- (a) Orographic lifting caused by winds blowing onto rising terrain;
- (b) convectional lifting resulting in the development of individual rain clouds of the cumulus or cumulonimbus type producing showers and thunderstorms;
- (c) lifting of a warm air mass as it rises over cooler air—known as a 'frontal' process.

*Average annual rainfall.* The distribution of the average annual rainfall over Australia is shown in plate 2 (between pages 32 and 33), while plate 3 shows the distribution in 1966.

While Australia is a continent of comparatively low relief, the orographic processes in rain production are very marked in the chain of the Great Dividing Range bordering the whole east coast of the continent, in the ranges of the south-western corner of Western Australia, and in Tasmania. Thus on the east coast the higher rainfall areas lie between the ranges and the Pacific Ocean in the region of prevailing south-east wind circulation. In Tasmania and the south-west of Western Australia the region of high rainfall lies between the ranges and the ocean to the west, these areas lying in a region of predominantly westerly wind flow.

The north-western part of the continent and to some extent the whole region of the Northern Territory and inland north Queensland comes under the influence of the Australian-Asian monsoon. This results in high rainfalls in a summer wet season with the inflow of moist air from the north-west, and a winter dry season with predominantly south-east winds blowing across the dry regions of the interior and producing little rainfall. Tropical cyclones affect the waters adjacent to the north-east and north-west of Australia between December and April. Their frequency varies greatly from season to season, but on the average about three of these disturbances occur in the Coral Sea each season and about two in the eastern Indian Ocean adjacent to the west coast of the continent. When tropical cyclones move close to the tropical coast of the continent they cause very heavy rainfalls over the coastal regions. On occasions these cyclones move over the land and lose intensity, but may still continue to be accompanied by heavy rainfall along their path.

Southern Australia lies in the region of the mid-latitude westerlies for the winter half of the year and is subject to the rain-producing influences of the great depressions of the Southern Ocean and their associated frontal systems. The combined effects of these systems and the topography lead to high winter rainfalls in south-western and south-eastern Australia and in Tasmania, with the highest falls occurring on the windward side of the mountains. The rainfall generally decreases inland with distance from the coast, although the 10-inch isohyet reaches the shore of the Great Australian Bight and the central western coast of Western Australia in regions which are of very flat relief and which because of their position and the orientation of the coastline are only rarely exposed to moist winds.

#### AREA DISTRIBUTION OF AVERAGE ANNUAL RAINFALL STATES AND TERRITORIES (Per cent)

Average annual rainfall	W.A.	N.T.	S.A.	Qld	N.S.W. (a)	Vic.	Tas.	Total
Under 10 inches	58.0	24.7	82.8	13.0	19.7	Nil	Nil	39.0
10 and under 15 inches	22.4	32.4	9.4	14.4	23.5	22.4	Nil	20.6
15 " " 20 "	6.8	9.7	4.5	19.7	17.5	15.2	0.7	11.2
20 " " 25 "	3.7	6.6	2.2	18.8	14.2	17.9	11.0	9.0
25 " " 30 "	3.7	9.3	0.8	11.6	9.1	18.0	11.4	7.2
30 " " 40 "	3.3	4.7	0.3	11.1	9.9	16.1	20.4	6.1
40 inches and over	2.1	12.6	Nil	11.4	6.1	10.4	56.5	6.9
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

(a) Includes Australian Capital Territory.

The region with the highest average annual rainfall is the east coast of Queensland between Port Douglas and Cardwell, where Tully has an annual average of 177 inches. A further very high rainfall region is the mountainous west coast of Tasmania, where Lake Margaret has the highest average annual total of 145 inches. The area of lowest average annual rainfall is that of some 180,000 square miles surrounding Lake Eyre in South Australia, where on the average only 4 to 6 inches are received annually. The lowest average over a long period of record is at Troudaninna—4.13 inches. Rain occurs very irregularly, averaging only about one or two days a month in this region.

Of all the continents (excluding Antarctica), Australia receives the least average depth of rainfall and has the least run-off from its rivers into the oceans. Only in relatively small areas of the continent could the rainfall be described as abundant.

*Seasonal distribution of rainfall.* The average monthly distribution of rainfall in the various Australian rainfall districts is shown by the histograms of plate 4.

The following are the most marked features.

- (a) The clearly defined wet summer and dry winter of the monsoon region of northern Australia.
- (b) The more regular distribution of rainfall throughout the year in south-eastern Australia. In the region to the south and west of the Great Dividing Range a less pronounced maximum of rainfall is noticeable in the winter or early spring. On the Gippsland (eastern Victoria) coast the rainfall is fairly evenly distributed throughout the year but further along the east coast of the continent the rainfall minimum in late winter and early spring begins to appear and becomes more marked as the tropical regions are approached.
- (c) The marked maximum of rainfall in the south-western districts of Western Australia in winter—the period of the most active southern depressions and frontal systems in this region.

For further information on monthly rainfalls reference may be made to the various Australian rainfall bulletins, to the Climatological Surveys of particular districts and to the annual rain maps and books of normals (standard 30 year periods), all published by the Bureau of Meteorology.

*Variability of rainfall.* For most agricultural pursuits a more important criterion of the value of rainfall is its variability or reliability. The adequate description of rainfall variability over an extensive geographical area is a matter of some difficulty. Probably the best available measures are to be found in the tables which have been calculated for a number of individual stations in some of the Climatological Survey districts. These tables show the percentage chances of receiving specified amounts of rainfall in monthly seasonal or annual time spans. Statistical indexes of rainfall variation based on a number of different techniques have been used to produce maps which show the main features of the variability of annual rainfall over Australia. A discussion of these methods and the maps is given by F. Loewe in *Some Considerations Regarding the Variability of Annual Rainfall in Australia*, Bureau of Meteorology Bulletin No. 39 (1948).

In general it may be stated that the regions of most reliable rainfall are the south-west of Western Australia, western Tasmania, and western and southern Victoria south of the divide. These areas have one of the most reliable rainfalls in the world. Elsewhere in Australia the degree of variability, in general, increases inland but the region of the highest variability for low average annual rainfalls extends across the central part of the continent from south-western Queensland to the central coast of Western Australia. Some outstanding examples of the numerous instances of high rainfall variability throughout Australia are given below.

At Onslow (Western Australia) annual totals vary from 0.05 inches to 28 inches, and in the four consecutive years 1921 to 1924 the annual totals were 22.25, 2.71, 26.82, and 2.18 inches respectively. At Whim Creek, where 29.41 inches have been recorded in a single day, only 17 points (0.17 inches) were received in the whole of 1924. Great variability can also occur in the heavy rainfall areas, e.g. at Tully the annual rainfalls have varied from 310.92 inches in 1950 to 104.98 inches in 1943.

The following table of annual rainfall for the Australian capital cities for the past thirty years indicates the variation in rainfall at these sites.

RAINFALL: AUSTRALIAN CAPITAL CITIES, 1936 TO 1965

Year	Perth		Adelaide		Brisbane		Sydney		Canberra(a)		Melbourne		Hobart(b)

(a) Commonwealth Forestry Bureau; records in issues of the Year Book prior to No. 36 were for the station at Acton which closed down in 1939. (b) Records taken from present site commenced 1883. (c) 1911-1940. (d) Thirty years to 1957 inclusive.

Prolonged dry spells are fairly common in much of Australia, particularly in inland areas. A detailed discussion of the history of droughts and the frequency in particular areas may be found in Foley, J. C., *Droughts in Australia*, Bureau of Meteorology Bulletin No. 43 (1957). A shorter account of droughts in Australia will be found in a special article in Year Book No. 45, pages 51-6.

**Rainfall and vegetation.** In general, the three main climatic zones of the continent exert a particular controlling influence on the general vegetation. These are the northern third of the continent where rainfall is almost always restricted to the warmer months of the year, the southern third where rainfall is predominantly a winter and spring event, and a transitional zone which experiences rainfall from both sources, although in greatly reduced quantity over the interior, which is subject to frequent drought.

The length of the growing season, or conversely the extent of dry periods during the year, decides the type of vegetation which establishes in a region. The climatic influence on vegetative response is primarily through soil moisture and temperature. Thus in colder south-eastern areas the growing season is mainly temperature dependent, but elsewhere the availability of soil

moisture is the prime factor. All rainfall is not equally effective in increasing the soil moisture, its availability from the soil storage to plants depending on the extent of surface run-off, seepage beyond the root zone, and loss by surface evaporation. Furthermore, the effectiveness of available soil moisture depends on the evaporative demand of the local climate; for example, an inch of stored moisture may maintain vigorous plant growth for twice as long in Tasmania as in the warmer, drier atmosphere of inland New South Wales. Thus it is not a sound practice to assess the agricultural potential of different areas simply by reference to average rainfall.

Generally speaking, the length of the growing season exceeds nine months over the far south-west of Western Australia and in all eastern coastal districts from Cape York Peninsula to Western Victoria, and within this region humid and semi-humid plant formations thrive. Soil types, of course, also play a part in the distribution of vegetation, but they too are, to a considerable extent, the result of climate and weather.

The climate of Arnhem Land (Northern Territory) is such that there is a considerable surplus of moisture for about five months of the warm season, followed regularly by a virtual drought which frequently reaches severe intensity, and this special combination of meteorological conditions results in annual and perennial vegetation adapted to this cycle.

Over the interior the position is more complex because of the lower levels of the rainfall, its greater variability, and the high evaporative power of the drier, warmer atmosphere. In this vast section of the continent the climatic demands are so severe that the vegetative formations of the moister zones (i.e. the mesophytes, requiring about five months or longer growing season) are unable to exist. Thus a plant species adapted to these very dry and variable conditions (xerophytes), e.g. spinifex, salt bush, blue bush and stunted eucalypts, capable of maintaining a cattle population, predominates over the arid interior.

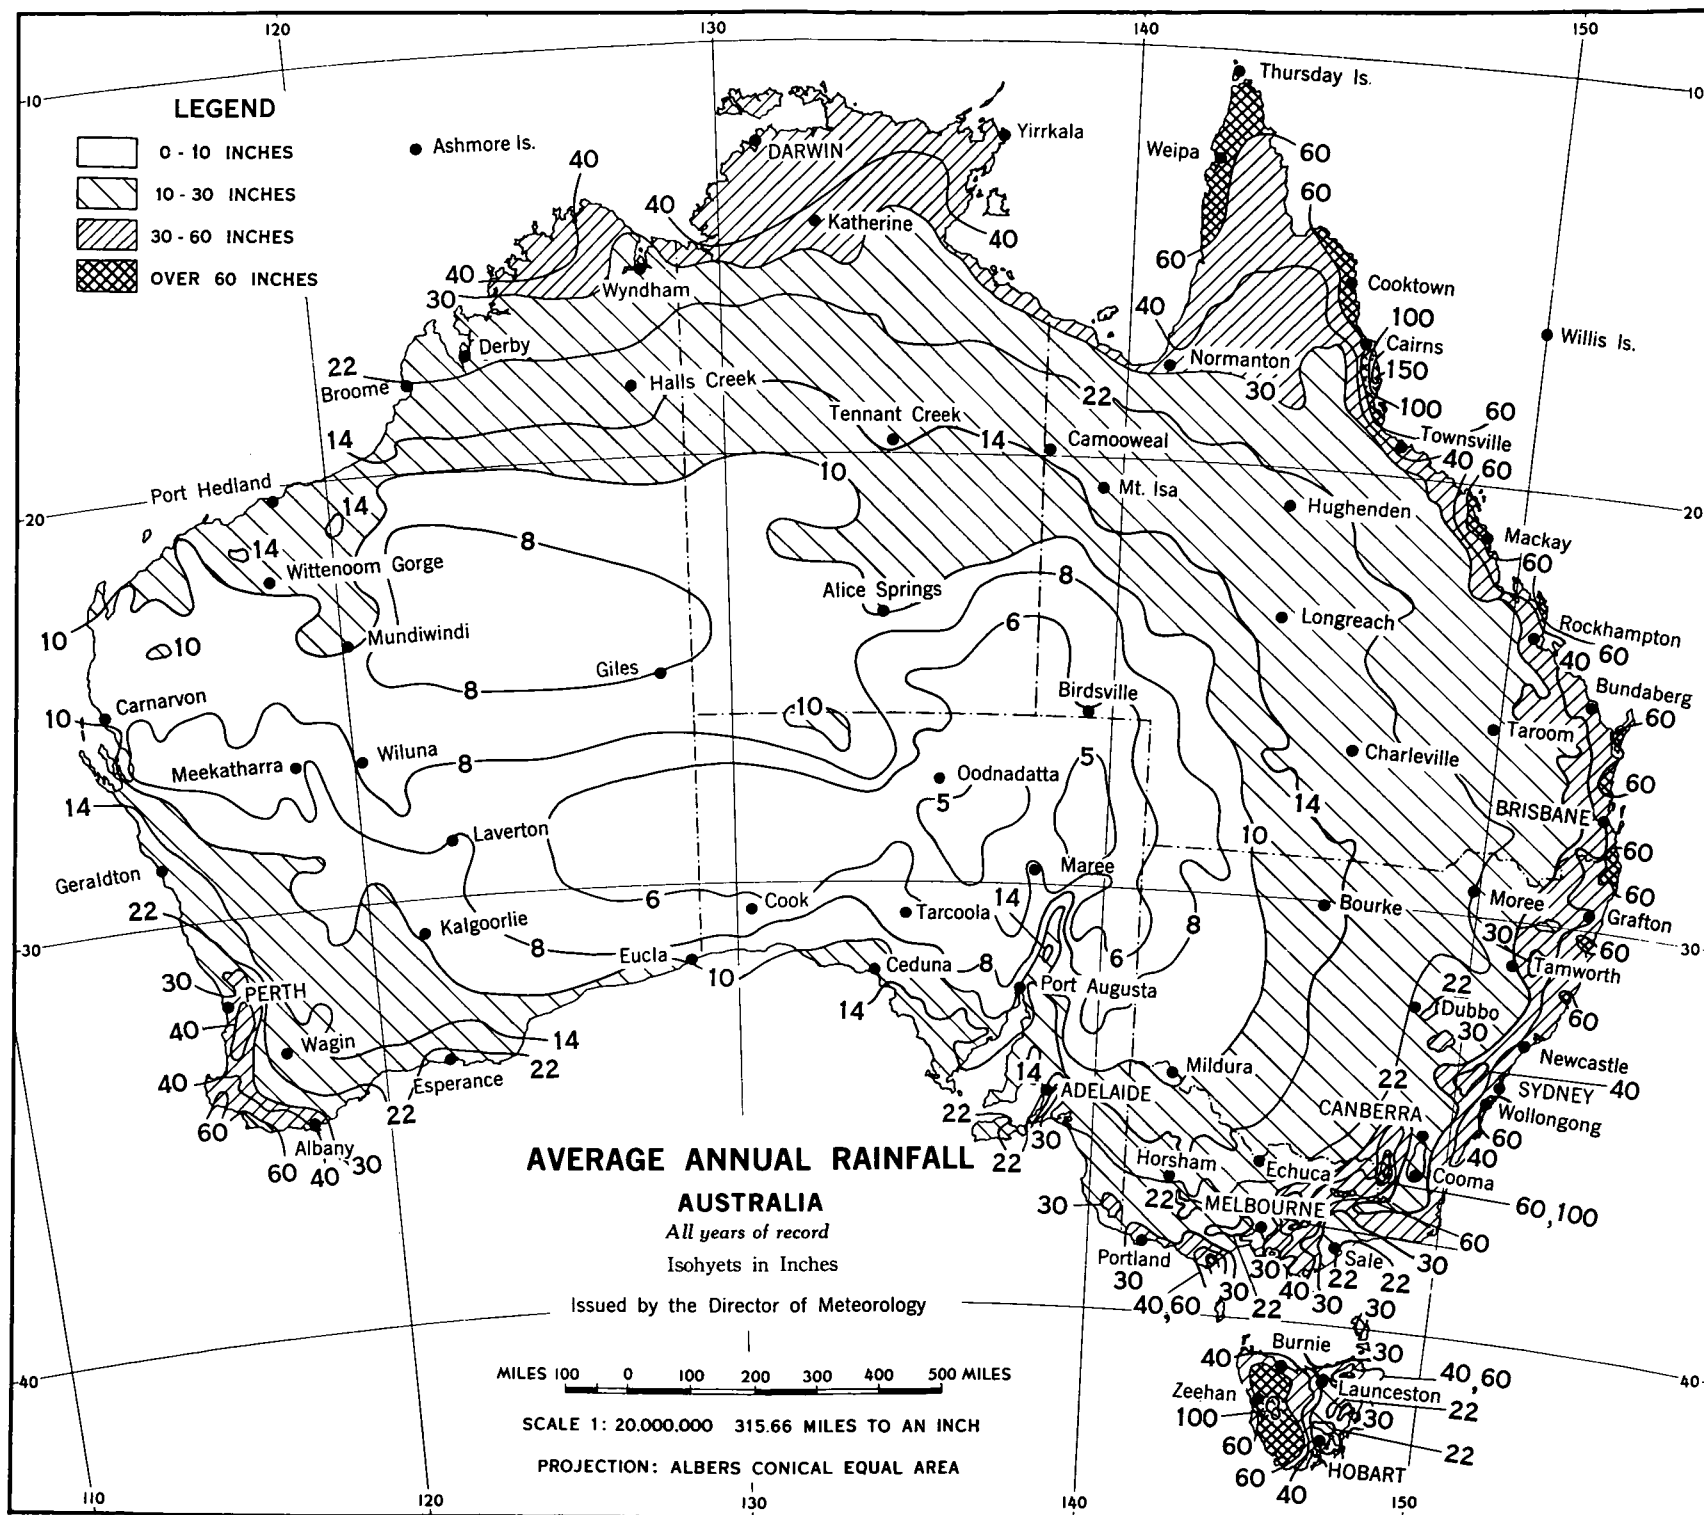

The arid and semi-arid lands of Western Australia and inland New South Wales which border the desert carry the majority of the sheep in these States. In New South Wales the most important vegetative formations in these areas are savannah (treeless plains), savannah woodland, mulga scrub, and mallee scrub. In Western Australia sclerophyllous grass steppe and mulga scrub border the deserts and are succeeded to the south by zones of mallee scrub and mallee heath.

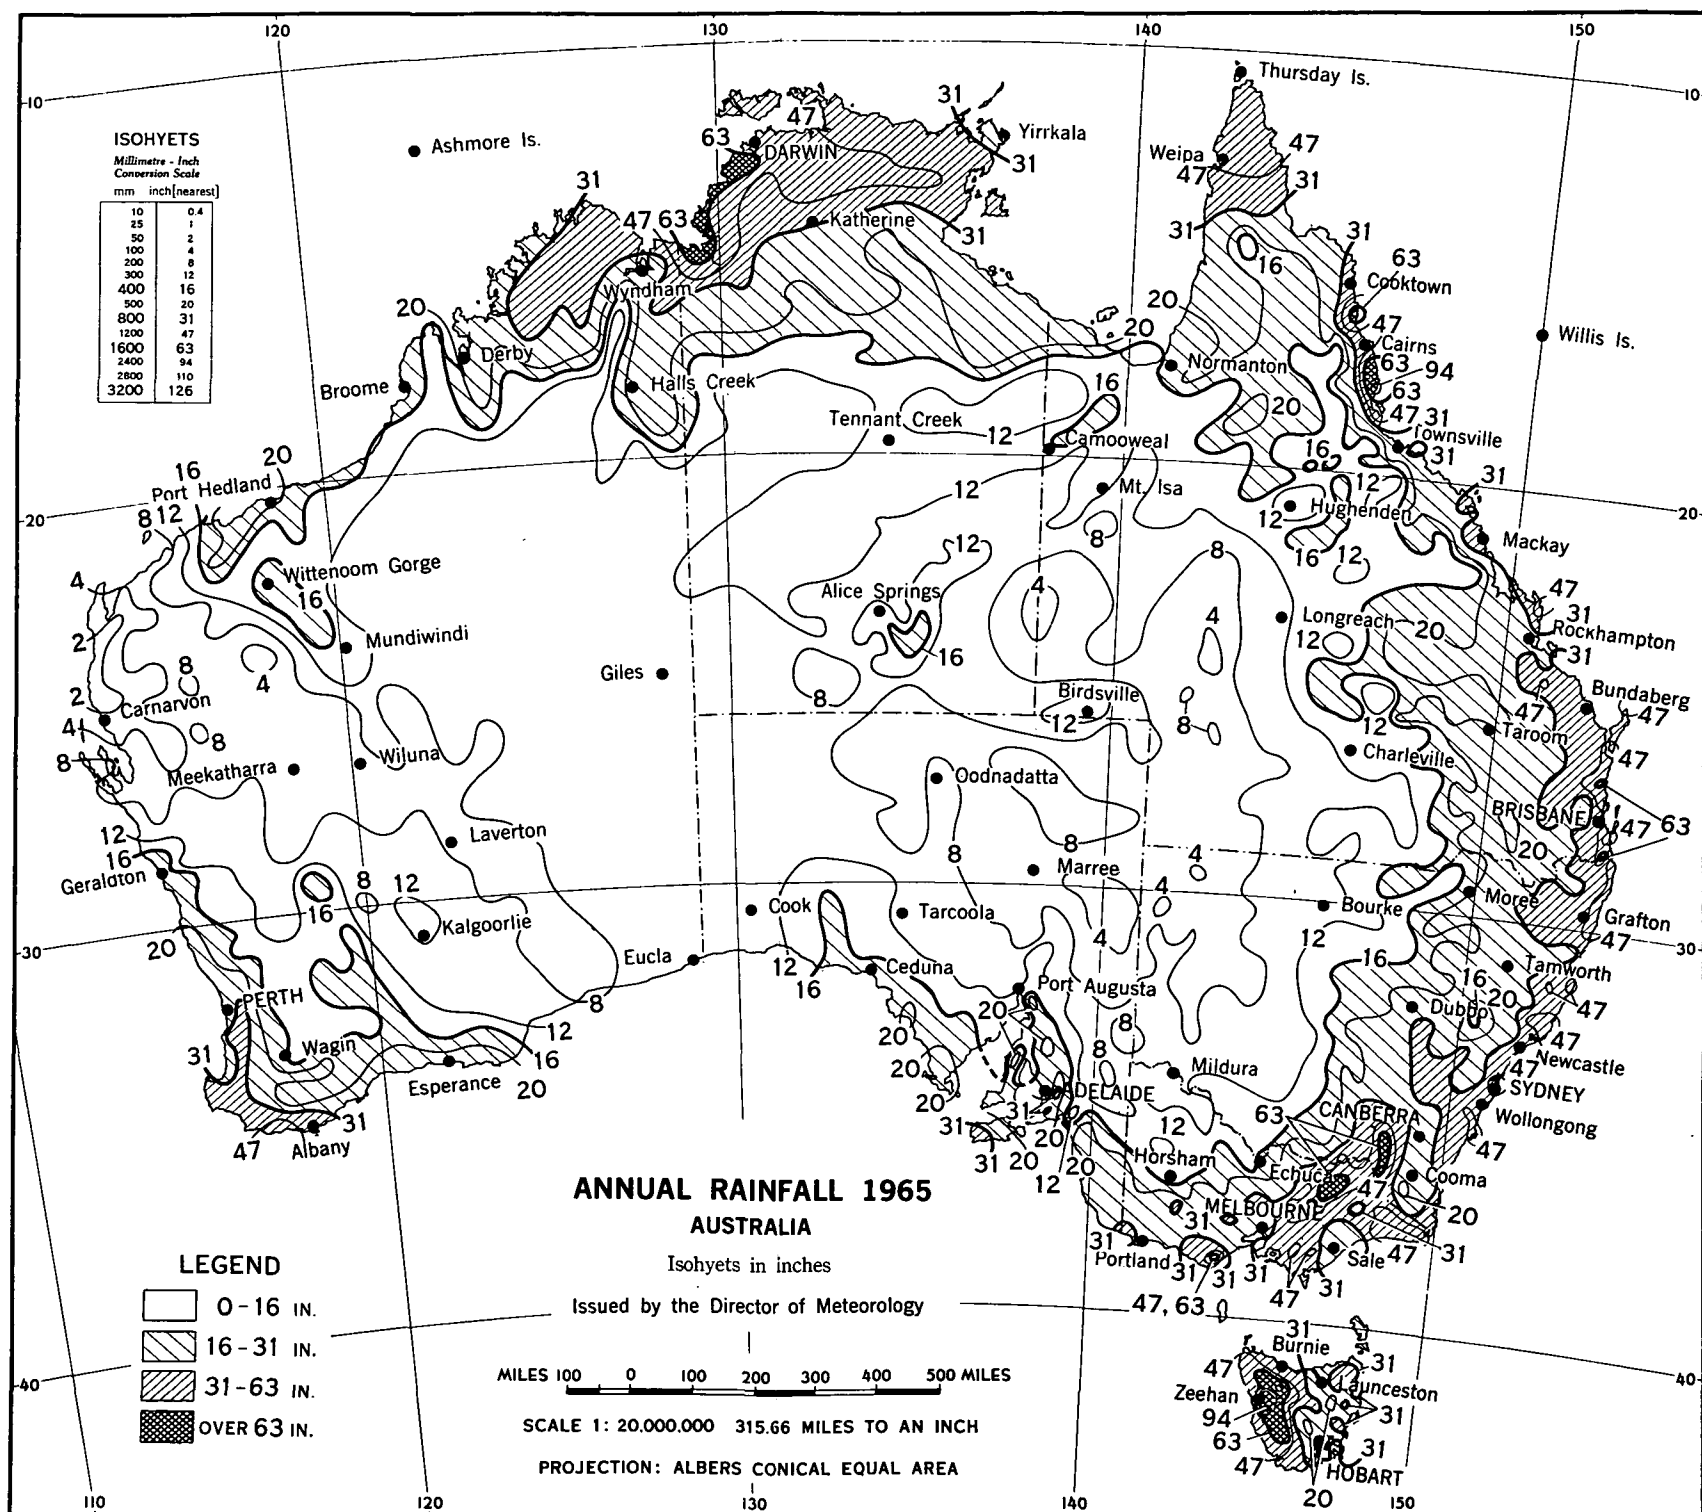

*Rainfall intensity.* The study of extremely high rainfall intensities is important in the investigation of the flow characteristics of river systems and flood prevention measures, the design of irrigation works and hydro-electric schemes. Some of the more notable falls in a period of 24 hours are listed for the various States in the following tables. Most of the very high intensities have occurred in the coastal strip of Queensland, where the combination of a tropical cyclone moving close to mountainous terrain provides ideal conditions for spectacular falls. The highest fall recorded in 24 hours, 35.71 inches, occurred at Crohamhurst, Queensland, on 3 February 1893.

Rainfall at most reporting stations in Australia is recorded only for the 24-hour period from 9 a.m. to 9 a.m. The data in this table are based on these records. Where automatic recording gauges are installed, more detailed intensity data are available for shorter and exactly measured time intervals. For other very heavy falls at various localities, reference may be made to Year Books, No. 14, pages 60-4, No. 22, pages 46-8 and No. 29, pages 43, 44 and 51.

*Snow and hail.* For varying periods from late autumn to early spring snow usually covers the ground to a great extent on the Australian Alps above a level of about 4,500 to 5,000 feet, where in both New South Wales and Victoria ski-ing resorts operate throughout the season.

In Tasmania also the highlands are frequently covered above the 3,500 feet level for extended periods of the winter. There are, however, some years when snowfalls are much lighter than normal and even fail completely. Light snow has been known to fall occasionally as far north as the New England plateau in New South Wales (latitude 31° S.), and in exceptional seasons much of the dividing range from Victoria to Toowoomba (Queensland) has been covered above a level of about 4,000 feet. In ravines around Mount Kosciusko small areas of snow may persist throughout the summer after a heavy winter fall. This winter snowfall of south-eastern Australia is important in aiding the reliable flow of many streams which are utilised in the hydro-electric schemes of the Snowy Mountains, northern Victoria, and Tasmania. Snowfall at low terrain elevations occurs from time to time, particularly in Tasmania and Victoria, but falls are usually light and rarely lie more than a few days.

Hail is most frequent in winter and spring along the south-eastern coastal region of the continent and in Tasmania, where it is usually of a relatively small size. Summer storms, however, which are quite frequent, particularly in the highland plateau regions of eastern Australia, often produce stones of large size and of destructive intensity. Very large stones capable of piercing light gauge galvanised iron are reported from time to time, and damage to fruit crops in south-eastern Australia from large hail stones is quite frequent.

*Floods.* In general, flooding in Australia is most pronounced on the shorter streams flowing from the Great Dividing Range into the Pacific Ocean along the seaboard of Queensland and New South Wales. These floods are particularly destructive on the more densely populated coast of New South Wales. The chief rivers in this area are the Tweed, Richmond, Clarence, McLeay, Nepean, Hawkesbury, Hunter, and Shoalhaven, all of which experience quite frequent and considerable flooding. These floods occur chiefly in summer but may occur at any time of the year.

The great Fitzroy and Burdekin river systems in Queensland are also subject to floods during the summer wet season, while much of the heavy monsoon rain in northern Queensland flows southward through the normally dry channels of the network of rivers draining into Lake Eyre. This water may cause extensive floods over a vast area, but it is soon lost by seepage and evaporation and rarely reaches the lake in any quantity. The Condamine and the other tributaries of the Darling also carry considerable volumes of water south through western New South Wales to the Murray, and flooding along their courses occurs from time to time.

Flooding also occurs from time to time, usually in autumn, winter and spring, in the Murray-Murrumbidgee system of New South Wales and Victoria and on the smaller coastal streams of southern Victoria. In Tasmania, flooding of the north coast streams, particularly the South Esk system, is common in the same seasons. In South Australia some flooding has occurred in the lower reaches of the Murray owing to rainfall as far away as Queensland and south-eastern New South Wales. In the north of Western Australia and the Northern Territory, flooding of the coastal streams occurs frequently in summer but is not of such economic importance as the flooding of the eastern coastal streams of the continent, where many localities are more vulnerable to damage.

### Temperature

The accurate measurement of the temperature of the air is not easy, as temperature sensitive devices also absorb radiant heat or can lose heat by radiation. Following international practice, air temperature measurements in Australia are made by thermometers freely exposed in a double louvered box (the Stevenson screen). Maximum and minimum air temperatures during each day are measured by means of special thermometers exposed in the Stevenson screen. The minimum air temperature at the surface of the earth as the ground cools at night by outgoing radiation (the terrestrial or grass minimum) is also measured at many stations. Such temperature recordings measure a theoretical physical quantity which bears only an indirect relation to the comfort or discomfort a person feels. Temperature measurements alone may be regarded only as a first approximation to a measurement of personal comfort. The actual degree of personal comfort is related to a number of meteorological factors such as air temperature, wind speed, humidity, exposure to the sun's rays, and the temperature of surrounding surfaces (i.e. the radiation balance of the body).

In addition to these quantities, which are all physically measurable, a number of personal quantities are involved which vary greatly from person to person and which cannot be precisely expressed, e.g. race and acclimatisation, age and state of health, type of clothing, and degree of physical activity in work and recreation. Conditions thus vary greatly for a particular individual even in a fixed location, so that it is difficult to describe general comfort variability uniquely throughout a region as varied climatically as Australia. A number of indexes which attempt to incorporate some of the factors described above have been used experimentally from time to time, and further research continues on this very difficult problem. Generally speaking, there is an increase in discomfort northwards within the tropical regions of Australia in summer, owing to the heat and high absolute humidity which reach a maximum in the extreme north of the continent. Such conditions are, however, ameliorated to a large extent in highland areas such as the Atherton Tableland in Queensland. No part of Australia is uncomfortably hot in winter, and only in a small area of the Australian Alps and highland Tasmania does bodily strain due to cold exist in winter. The history of the settlement of the northern regions of Queensland and the Northern Territory indicates that with accelerating development of studies and experience in the arrangement of living and working accommodation, clothing, and general way of life, the effects of extremes of climate can be minimised.

For some further discussion of the problems of temperature and comfort conditions reference may be made to Ashton, H. T., *Meteorological Data for Air Conditioning in Australia*, Bureau of Meteorology Bulletin No. 47 (1964).

*Average seasonal temperature distribution.* Plates 5 to 8 show the normal daily maximum and minimum temperatures for January and July, which may be taken as indicative respectively of the summer and winter seasons in Australia. Further detailed temperature data are presented on pages 41-50 for the capital cities and more important country towns of the Commonwealth.

On the basis of average annual mean temperatures, and latitude for latitude, Australia is somewhat cooler than the other land masses of the southern hemisphere and considerably cooler than the same latitudes in the large continental areas of the northern hemisphere. This is due to the insular nature of Australia and the stronger general circulation of the atmosphere in the southern hemisphere resulting in the transport of higher latitude (cooler) air into the subtropical regions.

July is the month with the lowest mean temperature in all parts of the continent, while the month with the highest mean temperature varies from February in Tasmania and southern Victoria to December in the northern part of the continent and November in Darwin. The

lateness of the month of highest average temperature in the extreme south of the continent is due in part to the effect of the Southern Ocean, where the sea surface temperature reaches its maximum in February. The cooler period of the late summer in the north is due largely to increased cloudiness associated with the inflow of north-west winds with the onset of the monsoon season.

In January average maximum temperatures exceed 95° F. over a vast area of the interior of the continent, and over large areas exceed 100° F. The hottest part of Australia is situated in the north of Western Australia around the Marble Bar and Nullagine area, where the daily maximum screen temperature during the summer frequently exceeds 100° F. for weeks at a time.

The marked change of maximum temperature in summer with distance from the sea, in areas close to the coasts, particularly along the Great Australian Bight and the Indian Ocean coast of Western Australia, is due to the penetration inland of the vigorous sea breezes which are initiated by the considerable temperature contrast between land and sea surface temperatures. The 75° F. isotherm of January mean maximum temperature skirts the southern coast of the continent from south-western Western Australia to Gippsland.

In January the mean minimum temperatures in the tropics, except for some highland regions, exceed 72° F., with a gradual decrease southward to values of 55° F. in Victoria and 50° F. in Tasmania. Highland regions in the south have mean values of 45° F. and lower. In July a more regular latitudinal distribution of mean maximum temperature is evident, only the extreme north of the continent having mean maxima higher than 80° F. Values lower than 60° F. are general over the south-eastern part of the continent, with mean maxima falling below 40° F. in small alpine areas. Average night minimum temperatures in July fall below 45° F. in areas south of the tropics and away from the coast. Alpine regions again record the lowest temperatures with some areas experiencing means lower than 25° F.

*Extreme variation and daily range.* Only at a few inland places in Australia does the absolute range of temperature (i.e. the range from the highest maximum to the lowest minimum) exceed 100° F. Generally it is in the range 70° F. to 90° F. in the inland areas and somewhat less on the coasts. The highest temperature recorded in Australia was 127.5° F. at Cloncurry (Queensland) on 16 January 1889 and the lowest -8° F. at Charlotte Pass in the southern Alps on 14 July 1945 and again on 22 August 1947. The world record maximum temperature is 136° F. at Azizia (Tripoli) on 13 August 1922 and the world record minimum temperature -126.9° F. at Vostok on the Antarctic plateau on 24 August 1960.

*High temperatures.* Heat waves with a number of successive days higher than 100° F. are relatively common in many parts of Australia. With the exception of the north-western coast of Western Australia, however, most coastal areas do not usually experience more than a few days in succession of such conditions. The frequency of such conditions increases inland, and periods of up to twenty days have been recorded over most of the settled areas. This figure increases in western Queensland and north-western Western Australia to more than sixty days in places. The central part of the Northern Territory and the Marble Bar-Nullagine area of Western Australia have recorded the most prolonged heat waves for the Australian region. The longest consecutive period of daily maxima greater than 100° F. was 160 consecutive days recorded in Marble Bar during the summer of 1923-24.

*Frosts.* Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.), and a ground frost is regarded as having occurred when the grass thermometer has fallen below 30.4° F. However, as terrestrial minima are not recorded at all stations, it is usual for statistical purposes to regard the registration of a screen thermometer of 36° F. as indicating a 'light' frost. A map showing frequency of days with screen minima higher than 36° F. (i.e. the frost free period) is reproduced in plate 9. A 'heavy' frost is taken as a screen reading of less than 32° F. A 'black' frost occurs with a combination of low temperature and low humidity, and, although frost crystals are not observed on the ground, damage takes place to the plant cells by the freezing and expansion of the moisture they contain.

The frequency of frost depends largely on altitude, latitude, and proximity to the sea, and locally, to a very large extent, on even minor variations in contour of the land. The parts of Australia which are most subject to frost are the eastern highlands from north-eastern Victoria to the western Darling Downs in southern Queensland. Most stations in this region experience more than ten nights a month with readings of 32° F. or under for three to five months of the year. On Tasmania's Central Plateau similar conditions occur for three to six months of the year. Heavy frosts are comparatively infrequent in Western Australia, except in parts of the south and south-west. In South Australia frosts are most frequent in the agricultural areas of the south-east.

Frosts may occur within a few miles of the coast over the whole continent except the Northern Territory and most of north Queensland. Regions subject to frost at all times of the year comprise

the whole of Tasmania, the tablelands of New South Wales, much of inland Victoria, particularly the north-east, and a small part of south-western Western Australia. Over most of the interior of the continent, and on the highlands of Queensland as far north as the Atherton Plateau, frosts commence in April and end in September, but they are infrequent in these months. Minimum temperatures below 32° F. are experienced in most of the sub-tropical interior in June and July.

For further details of frost conditions in Australia reference should be made to Foley, J. C., *Frost in the Australian Region*, Bureau of Meteorology Bulletin No. 32 (1945).

#### Humidity and saturation deficit

The amount of water vapour in the atmosphere is determined mainly by the temperature. The higher the temperature the more water vapour may be contained in a given mass of air. Vapour pressure is the pressure exerted by the water vapour of the atmosphere. At any given temperature there is a definite upper limit to the amount of water that can exist as vapour in the air. When this limit is reached the air is said to be saturated and the pressure of the water vapour is the saturation vapour pressure. Both these quantities may be expressed in millibars or in inches of mercury. The usual measure of humidity or moistness of the air is the relative humidity (which is measured by means of wet and dry bulb screen thermometers). This term is applied to the ratio of the existing vapour pressure to the saturated vapour pressure at the existing temperature and expressed as a percentage. However, from the point of view of physical comfort and in many industrial and agricultural problems, the more important measure of atmospheric water vapour is the absolute humidity or the actual mass of moisture contained in a fixed mass of air.

The annual variation of vapour pressure for regions outside the tropics closely follows that of temperature. However, the mean relative humidity in the temperate regions is generally highest in winter and lowest during the summer. In northern Australia the highest relative humidity occurs during the rainy summer season. The relative humidity variation during the day closely follows the diurnal variation of temperature, being highest with low temperatures and lowest with high temperatures. The relative humidity at 9 a.m. for Australian conditions may be considered as a close approximation to the mean for the whole day. In the tables for the capital cities, pages 41-8, the mean monthly vapour pressure and relative humidity for 9 a.m., together with the monthly extremes, are listed. The order of the stations in descending values of mean annual vapour pressure at 9 a.m. is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, and Hobart, while the annual mean of the 9 a.m. relative humidities diminishes in the order Darwin, Sydney, Hobart, Melbourne, Brisbane, Canberra, Perth, and Adelaide.

Another method of humidity measurement which may be employed is the saturation vapour deficit. This may be defined as the difference between the saturation vapour pressure and the actual vapour pressure both referred to the dry bulb temperature. It is thus a measure of the drying power of the air and like vapour pressure may be expressed in millibars or inches of mercury.

In January the mean saturation deficit at the mean temperature for the month has a maximum value of over 0.90 inches in the central parts of Western Australia and in south-eastern Queensland. Gradual decreases occur towards the coast, where values close to the north, east, and south coastlines are around 0.20 inches. On the western coast values are somewhat higher, and a strong gradient exists in the saturation deficit in the narrow region bordering the Indian Ocean. In July the variation is less, with maxima of 0.40 inches in the dry north of the Northern Territory and Western Australia, slowly decreasing generally to the south, with values over most of the south-east and extreme south-west of the continent being less than 0.10 inches. Extremely low values (less than 0.025 inches) exist in July over the highlands of south-eastern Australia and Tasmania.

#### Evaporation

Evaporation is a process which results in the transfer of water vapour from the surface of the earth into the atmosphere and takes place from free water surfaces, from moist soil, and by the process of transpiration from plants. The figures quoted in this section, however, refer to evaporation as measured from an Australian standard evaporation tank. This instrument consists of a copper tank surrounded by a 6-inch water jacket sunk in the ground to a depth of 36 inches and exposing at ground level a water surface 36 inches in diameter from which the evaporation loss of water is measured. Earlier estimates of Australian evaporation data were supplemented by calculations based on an empirical formula dependent on saturation deficit, but more recent measurements have enabled charts of monthly and annual evaporation to be constructed wholly from observational records. Such a map is plate 10. The rate and quantity of evaporation in any territory are influenced by the net radiation, prevailing temperature, vapour pressure, and turbulent diffusion by wind.

In Australia the study of evaporation is of great importance, since in its drier regions water conservation must be practised by the use of tanks and dams. The magnitude of the economic loss by evaporation may be appreciated from plate 10, which shows that the yearly amount varies from 20 inches over the highland areas of central Tasmania to more than 130 inches in the northern and north-western part of South Australia.

Over an area of some 70 per cent of the continent, comprising most inland districts and extending to the coast in the north-west of Western Australia and to the head of the Great Australian Bight, the rainfall does not exceed the evaporation loss in any month of the year. The central and north-western portions of the continent experience evaporation far in excess of their rainfall. Vegetation over these areas is characterised by acacia, scrub steppe, and arid scrub, while many areas are merely sand hills and stony desert. Over many of the drier areas, however, particularly in the inland areas of south-eastern Australia, the loss of rainfall by evaporation is made good to some extent by the development of irrigation schemes. Some of these schemes, such as those at the Murrumbidgee Irrigation Area in New South Wales and at Mildura in Victoria and Renmark in South Australia, have been very successful. The Snowy Mountains Hydro-electric Scheme will also result in the large-scale supply of water from the south-eastern highlands of Australia for use in the drier areas to the west of the ranges in New South Wales and Victoria. The future development of such schemes as these holds promise for the reclamation of many marginal areas in Australia, which because of low rainfall and high evaporation are at present of little economic value.

Since the loss by evaporation depends largely on the net radiation absorbed and consequently on the extent of the exposed area, tanks and dams so designed that the surface area shall be a minimum are advantageous. Further, the more protected they are from the direct rays of the sun and from winds by means of suitable tree planting the less will be the evaporation loss. The Mansfield process for the treatment of tanks and dams by a mono-molecular chemical film which materially reduces evaporation is a recent development which is already giving beneficial results, particularly on large water storage areas. Such improvements are of considerable importance to the pastoralists of the drier regions of Australia and to water supply authorities.

Further information on evaporation may be found in Hounam, C. E., *Evaporation in Australia*, Bureau of Meteorology Bulletin No. 44 (1961).

### Sunshine and cloud

The proportion of the sky covered by cloud is of considerable meteorological and climatological importance. A cloud cover inhibits both incoming and outgoing radiation and thus profoundly affects the temperature distribution and other factors at the earth's surface. Cloud amount is measured in eighths of the sky covered.

In Australia the seasonal changes in cloudiness correspond closely to that of rainfall. In the southern or more temperate parts of the continent, particularly in the coastal and low lying areas, the winter months are generally more cloudy than the summer. This is due to the formation of extensive areas of stratiform cloud and fog during the colder months, when the structure of the lower layers of the atmosphere favours the physical processes resulting in this type of cloud. A particularly strong annual periodicity exists in the monsoonal regions of northern Australia, where it is heavily clouded during the summer wet season and practically cloudless during the winter 'dry'. Cloudiness is higher near coasts and on the windward slopes of the mountains of eastern Australia and is least over the dry interior parts of the continent.

A close relationship exists between cloud amount and number of sunshine hours, and it is possible to estimate from cloud data the equivalent number of sunshine hours over a given period. These data can be incorporated with records of direct measurement of sunshine hours, and approximate distribution maps produced for Australia. Maps of the mean sunshine distribution for January and July are reproduced in plates 11 and 12 and indicate the main features of the variation over Australia in these months.

Except for Tasmania and a narrow fringe bordering the southern, eastern and northern coasts, the greater part of the continent receives more than 3,000 hours of sunshine each year, and in Central Australia and the mid-western coast of Western Australia totals in excess of 3,500 hours occur. The extreme south coast receives in the main 2,000 to 2,500 hours annually, while the east coast regions of New South Wales and Queensland receive 2,500 to 3,000 hours. A minimum of less than 1,750 hours occurs on the west coast and highlands of Tasmania.

Mean amounts of cloud for each month at the capital cities are included in the tables on pages 41-8 as are the mean daily hours of sunshine. The latter figure is a good single measure of the relative climatic characteristics of the individual cities for different months of the year.

### Wind

Australia lies in those latitudes of the southern hemisphere where it is influenced largely by two wind systems:

- (a) the south-east trade winds blowing on the equatorial side of the mid-latitude anticyclones; and
- (b) the westerlies south of the mid-latitude anticyclones in which successive low pressure systems move eastward over the Southern Ocean.

The only pronounced seasonal variations of atmospheric pressure in the middle and high latitudes of the southern hemisphere are related to the latitudinal shift in the axes of the sub-tropical high pressure systems and to the change in the tracks of the migratory anticyclones. The latter systems move generally from west to east in the Australian region between the semi-permanent oceanic anticyclones of the Indian and Pacific Oceans. The mean path of these systems lies over southern Australia during the summer but moves northwards during the winter with the thermal equator. The movement is only of a few degrees of latitude but it is of very great importance to the climate of the Australian continent. During the summer months, when the anticyclones move on a more southerly track, the south-east trades affect the whole coast of eastern Australia north of around latitude  $30^{\circ}$  S., the westerlies retreating to higher latitudes, and conditions are more settled over southern Australia which then lies close to the axis of the anticyclones. In winter the anticyclones move further north, the trades affect only the northern parts of the continent, and southern Australia is exposed to the westerlies of the Southern Ocean.

In summer, with the retreat of the anticyclones to the south, the whole of northern and north-western Australia is exposed initially to light wind systems, and then during the period from December to April to the effects of the north-west monsoon. This process, which is associated with an inflow of north-west winds and intensive rains, is not as regular or persistent as the south-west monsoon of south-east Asia. However, it is a sufficiently regular feature of the climate of northern Australia to be designated as the north-west season, or, as it is best known in the area, 'the wet'. Its influence affects areas as far south as central Queensland, but southern Queensland and the area east of the Great Dividing Range are largely still under the influence of the south-east trades. Fringe or marginal areas on the southern limits of the monsoonal penetration over the continent have a shorter and more uncertain 'wet' season, which in some years fails to appear at all. With the northward advance of the anticyclones in autumn, the monsoon gives way again to the trades, and 'the dry' of northern and north-western Australia commences.

The general features of these wind patterns may be seen in the wind rose diagrams of plates 13 and 14. It is important, however, to note the dynamic nature of the atmosphere, and that the continual growth, decay and motion of the pressure systems result in a wide diversity of wind-flow types. Descriptions of wind conditions for particular geographical areas and seasons can thus be only of a very generalised kind. Further, local features can also be imposed on the overall wind pattern — channelling of winds due to topography (e.g. the high frequency of north-west winds in Hobart) and the marked summer sea breeze characteristics of most of the Australian coast, particularly near the Great Australian Bight as shown in the diagrams of 3 p.m. wind frequencies.

### Storms and tropical cyclones

In general there are two types of weather systems in Australia which produce very strong winds and heavy rainfalls over large areas of the continent:

- (a) the active depressions which move westwards over the Southern Ocean; and
- (b) the tropical cyclones or hurricanes of north-eastern and north-western Australia.

During the winter the southern shores of the continent are subject to the deep depressions of the southern low pressure belt. They are felt most severely over the south-west of Western Australia, the south-east of South Australia, southern Victoria, and Tasmania, and may move inland in all these regions bringing strong winds and heavy rainfall. Further extensions of this type of system frequently develop close to the coast of New South Wales, often bringing severe weather to this region and to southern Queensland. These are generally known as 'east coast lows'.

The frontal systems (i.e. the narrow zones characterised by cloud and bad weather separating two air masses of different density) which are associated with these depressions vary widely in character. A common type in south-east Australia is a cold front located in a  $\wedge$  shaped trough. Such a system usually brings very strong north to north-west winds in advance of the front with a very abrupt backing of the wind to colder west to south-westerly winds after the frontal passage. Such frontal passages are, in their most severe form, associated with thunderstorms and line squalls, heavy rain, and a change to cold winds and showers. These violent changes with the passage of a cold front and strong southerly winds frequently affect the New South Wales coast as far north as Newcastle during the winter, and are popularly known as 'southerly busters'.

The most extensive rains of inland Australia occur when moist tropical air which has moved inland is lifted by convergence ahead of a slow moving colder air mass moving from the southern Ocean. The coast of Queensland, particularly the section from Cooktown to Mackay and

the adjacent waters, is subject to visitations by tropical cyclones (the 'hurricanes' of the Caribbean and 'typhoons' of the China Sea). These destructive systems can affect this region from December to April, normally forming in the Coral Sea, moving south-west close to the coast and then passing away to the south-east into the Pacific. They may, however, cross the coast from time to time and bring torrential rain and violent winds (often more than 100 mph) to the coastal regions.

Similar systems affect the north-west coast of Western Australia where they bear the local name of 'willy willies', a name which is, however, often used generally in Australia for minor local whirlwinds or dust devils. The season in this region generally lasts from November to April, the storms originating in the Timor or Arafura Seas travelling usually south-west and approaching the coast most commonly between latitudes 20° S. and 22° S. Thence the systems may move southward following the coast, or sometimes cross inland bringing high rainfalls to the otherwise dry interior of the continent. A further region which is affected somewhat less frequently by tropical cyclones is the coast of Arnhem Land in the Northern Territory and the waters and coasts of the Gulf of Carpentaria.

Tropical cyclones, in general, soon lose their intensity on crossing from sea to land, but although the wind force rapidly abates, they are still capable of producing the heavy rainfall which leads to flooding of coastal rivers, damage to stock and property, and general disruption of transport.

Thunderstorms which bring local heavy rain and strong winds are common to most of Australia. They are also of particular importance because of the lightning damage which they cause to power transmission lines, and have been extensively studied for the purpose of siting electrical installations as far as possible in areas of low thunderstorm occurrence. Plate 15 shows the number of days annually on which thunder is heard, which is a better observational criterion than lightning observed. The region of maximum thunderstorm activity is the extreme north-west of the continent and the region south-east of the Gulf of Carpentaria. In the more settled areas maximum thunderstorm occurrence is in central western and south-eastern Queensland and the highland areas of New South Wales. The minimum number of storms occur over the interior of South Australia, western New South Wales, and eastern Tasmania.

#### **Climatological tables**

The averages and extremes for a number of elements which have been determined from long series of observations at the Australian capitals up to and including the year 1965 are given in the following pages, together with more limited data for the larger country towns of the Commonwealth. The following points apply throughout.

- (a) Where records are available, prevailing winds have been determined over a standard period of thirty years from 1911 to 1940.
- (b) Other averages and extremes, including evaporation, temperature and rainfall records for which thirty years normals have been published for a number of years past, have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

**Rainfall and temperatures, various cities**

Year Book No. 34, page 28, shows rainfall and temperature, and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

**Climatological data for selected Australian country towns**

The following table shows some of the more important climatological data for selected Australian country towns, based on standard thirty years normals (1911-1940).

**CLIMATOLOGICAL DATA FOR SELECTED AUSTRALIAN COUNTRY TOWNS**

Town	Rainfall		Temperature				Relative humidity			
	Average annual rainfall	Average number of wet days	Mean maximum, January (°F.)	Mean maximum, July (°F.)	Mean minimum, January (°F.)	Mean minimum, July (°F.)	Average index of mean relative humidity, (a) January	Average index of mean relative humidity, (a) July	Mean 3 p.m., January (%)	Mean 3 p.m., July (%)

## TASMANIA

Burnie . . . . .	38.99	170	67.6	53.7	51.9	41.7	70	82	65	74
Launceston . . . . .	28.56	149	75.8	53.7	52.1	36.9	60	77	..	..
Zeehan . . . . .	94.06	246	66.3	51.6	48.0	38.2	73	81	61	74

(a) The average index of mean relative humidity has been derived from the ratio of the average 9 a.m. vapour pressure to the saturation vapour pressure at the average mean temperature of the month. Being thus related to the mean temperature this value of relative humidity is a good approximation to the daily mean.

The table on the next page gives the latitude, longitude, and altitude of the weather recording station at each of the above towns.

## The weather of 1966 (December 1965 to November 1966)

The following is a brief summary of weather experienced during the four seasons ended in November 1966. Plate 3 (between pages 32 and 33) shows the rainfall distribution for 1966.

*Summer 1965-66.* Summer commenced with a broad tract from the Kimberleys to New England and the Hunter River in the grip of a drought and ended with the drought stricken area reduced mainly to south-western Queensland, the northern part of New South Wales on and west of the Divide and the Hunter Valley.

Tropical cyclones were absent from the east coast of Australia, but three affected the Northern Territory and Western Australia, giving beneficial rains; one decaying cyclone caused a swathe of rain to the coast of the Great Australian Bight. The monsoon low was active, and generally the north had a good 'wet', except for the base of Cape York Peninsula and the adjacent Gulf of Carpentaria coastal districts, which were outside the area. In the south of the continent easterly winds had been general. The humidity had not been low nor had temperatures been markedly above normal for lengthy periods; therefore conditions for serious bushfires did not continue for many days at a time.

The total summer rainfall in the eastern States was mainly below normal, and in New South Wales and southern Queensland was largely confined to December. Water storages in New South Wales west of the Great Dividing Range and in the Hunter Valley were low, and there was concern that the supplies would become completely exhausted.

By the end of summer the pastoral situation was good in all States except New South Wales and south-western Queensland. Agriculture in southern areas, except for much of New South Wales, had good harvests, and prospects for preparation for sowing were satisfactory. In the Murray River districts the vine crops suffered from rain on the ripe fruit.

There were floods on the Clarence River in New South Wales and in southern central Western Australia, but the greater part of the flooding that occurred was in the north, and this was consistent with a good wet season.

*Autumn of 1966.* There were no tropical cyclones near Queensland, and rainfall there and in northern New South Wales was below normal, so that hopes at the end of summer of a break in the drought in south-western Queensland and northern inland New South Wales were not

realised. One cyclone crossed the coast of Western Australia and brought heavy rain to the De Grey and Fortescue districts. Elsewhere the rainfall was adequate in the better watered areas, but the lower rainfall areas remained dry.

Early in autumn conditions fluctuated markedly from hot to cool. On the average Queensland was the only State where temperatures were much above normal for autumn.

In parts of the south there were bushfires early in March, but rain later in the month reduced the hazard and the fire season ended in March or early April. An aftermath of the drought conditions in New South Wales was that fuel for bushfire occurrence was lacking.

Thunderstorms early in autumn gave many places in the east useful rain. With the advance of the season there were a few fogs and frosts. In Tasmania and on the Australian Alps there were light falls of snow.

Away from the drought areas stock were in fair to good condition. In many places farmers were waiting for rain before sowing wheat. In Queensland summer grain and seed crops were good but the sugar crop was adversely affected by dry conditions.

In New South Wales irrigation water storages were low. In Victoria and Western Australia they were satisfactory for the season.

*Winter of 1966.* The winter commenced with a considerable portion of all mainland States except Western Australia and Victoria suffering from drought. The season ended with the drought-affected areas in the inland reduced to sections of far western Queensland and western New South Wales. By the end of winter cereal crop prospects were good.

There was an absence of marked extremes during winter. Inland, except for a few areas, rainfall ranged from adequate to abundant. Daily maximum and minimum temperatures were variable, owing largely to the periods of considerable cloud cover. In the eastern States and South Australia there were a few periods of cold conditions, but they were not as numerous as in many winters. Snow in Tasmania and on the Alps was slightly above average.

The only bushfire was in the Sydney metropolitan area, and fire restrictions were applied in some coastal districts north of Sydney.

In Central Australia there was widespread flooding following the drought-breaking rains; the only other floods were minor and of short duration.

Except in Queensland and New South Wales, stock were in good condition and only in these two States were storages of irrigation water low.

*Spring of 1966.* Spring rainfall in the temperate parts of Australia was adequate and in many places was well above normal. North of the tropic, rainfall was scattered and the general dry conditions of spring prevailed.

The circulation during the season had many periods of south-north or north-south movements of air producing periods of colder or warmer weather than normal in southern and south-eastern regions.

Pasture and other growth in temperate areas was very good, and in warm, dry periods during November there were outbreaks of grass and scrub fires. The abundance of vegetation was causing fire prevention authorities to warn of danger ahead.

Minor flooding occurred in all States except Western Australia and the Northern Territory; there were drownings in swollen streams. Although there were strong winds at times, no State was affected by prolonged periods of such winds.

The numbers of occurrences of meteorological phenomena—frost, snow, hail, thunderstorms and fog—were near usual for the season; none of the phenomena was of unusual severity.

Pastoral conditions deteriorated in many places in the tropics; elsewhere there was improvement and prospects were generally good. The cereal harvest in almost every area promised to be good. Other crops were in good condition.

The water held in dams for irrigation purposes increased markedly during spring, but the dams in the northern half of New South Wales held less water than desirable at the end of spring.

## CHAPTER 3

### GENERAL GOVERNMENT

#### Parliamentary government

##### **Scheme of parliamentary government**

Under section 1 of the Commonwealth of Australia Constitution the legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which detail the manner in which his duties are to be fulfilled. The Legislature in each State was bicameral until 1922, when the Queensland Upper House was abolished and the Parliament became unicameral. In the bicameral Parliaments, the Upper House is known in the Commonwealth Parliament as the Senate, and in the State Parliaments as the Legislative Council, while the Lower House is known in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. In Queensland the sole legislative chamber is known as the Legislative Assembly. The extent of the legislative powers of the Parliaments is defined by the Commonwealth and State Constitutions. In those States that have a bi-cameral legislature the Legislative Assembly or House of Assembly is the larger House. The members of the Legislative Assembly or House of Assembly, as the case may be, of each State are elected by the people, the franchise extending to adult British subjects with certain residential qualifications. With the exception of the New South Wales Legislative Council, the members of State Legislative Councils are, in common with members of the Lower Houses, elected by the people of the respective States. In New South Wales a quarter of the members of the Legislative Council retire each three years and the continuing members of the Council and the members of the Legislative Assembly, voting as an electoral body, elect members to fill the vacant positions. In Victoria and Western Australia members of the Legislative Council are elected by adult suffrage, while the franchise is limited in South Australia to the holders of certain property or service qualifications, and in Tasmania to the holders of certain property, service or educational qualifications. In the Commonwealth Parliament the qualifications for the franchise are identical for both Houses, extending to adult British subjects who have lived in Australia for six months continuously.

##### **The Sovereign**

On 7 February 1952 the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2 June 1953.

##### **The Governor-General**

*Powers and functions.* As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen. Other powers and functions are conferred on him by the Constitution. Powers which have been so assigned or conferred include, among others, the power to grant pardons and to remit fines for offences against the laws of the Commonwealth; to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth; to appoint times for holding the sessions of the Parliament, prorogue Parliament and dissolve the House of Representatives; to cause writs to be issued for general elections of members of the House of Representatives; to assent in the Queen's name to a proposed law passed by both Houses of the Parliament or withhold assent, or to reserve the law for the Queen's pleasure, or to return the proposed law to the House in which it originated and transmit therewith any amendments which he may recommend; to exercise the executive power of the Commonwealth; to choose and summon Executive Councillors, who hold office during his pleasure; and to appoint Ministers of State for the Commonwealth. In addition, the command-in-chief of the defence forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Most Acts of the Commonwealth Parliament provide that the Governor-General may make regulations to give effect to the Act. The Governor-General may also be authorised by statute to issue proclamations—for example, to declare an Act in force or a state of things to exist, e.g. the calling out of the Citizen Military Forces in time of war or defence emergency. He has been given power by statute to legislate for certain Territories of the Commonwealth. Under the conventions of responsible government obtaining in British Commonwealth countries, the Governor-General's functions are exercised generally on the advice of Ministers of State.

*Holders of office.* The following list shows the names of the Governors-General since the inception of the Commonwealth.

#### GOVERNORS-GENERAL

- Rt Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O. From 1 January 1901 to 9 January 1903.
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17 July 1902 to 9 January 1903, (Acting).
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9 January 1903 to 21 January 1904.
- Rt Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21 January 1904 to 9 September 1908.
- Rt Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9 September 1908 to 31 July 1911.
- Rt Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31 July 1911 to 18 May 1914.
- Rt Hon. SIR RONALD CRAUFURD MUNRO FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18 May 1914 to 6 October 1920.
- Rt Hon. HENRY WILLIAM, BARON FORSTER OF LEPE, P.C., G.C.M.G. From 6 October 1920 to 8 October 1925.
- Rt Hon. JOHN LAWRENCE, BARON STONEHAVEN, (afterwards 1ST VISCOUNT STONEHAVEN), P.C., G.C.M.G., D.S.O. From 8 October 1925 to 22 January 1931.
- Rt Hon. SIR ISAAC ALFRED ISAACS, G.C.B., G.C.M.G., K.C. From 22 January 1931 to 23 January 1936.
- Brigadier-General the Rt Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE (afterwards 1ST EARL OF GOWRIE), V.C., P.C., G.C.M.G., C.B., D.S.O., K.St.J. From 23 January 1936 to 30 January 1945.
- His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., P.C., K.T., K.P., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30 January 1945 to 11 March 1947.
- Rt Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G., Q.C. From 11 March 1947 to 8 May 1953.
- Field Marshal SIR WILLIAM JOSEPH SLIM (afterwards VISCOUNT SLIM OF YARRALUMLA), K.G., G.C.B., G.C.M.G., G.C.V.O., G.B.E., D.S.O., M.C., K.St.J. From 8 May 1953 to 2 February 1960.
- Rt Hon. WILLIAM SHEPHERD, VISCOUNT DUNROSSIL, P.C., G.C.M.G., M.C., K.St.J., Q.C. From 2 February 1960 to 3 February 1961.
- Rt Hon. WILLIAM PHILIP, VISCOUNT DE L'ISLE, V.C., P.C., G.C.M.G., G.C.V.O., K.St.J. From 3 August 1961 to 22 September 1965.
- Rt Hon. RICHARD GARDINER, BARON CASEY, P.C. G.C.M.G., C.H., D.S.O., M.C., K.St.J. From 22 September 1965.

*Administrators.* In addition to the holders of the office of Governor-General listed above, certain persons have, from time to time, been appointed as Administrator of the Government of the Commonwealth. Administrators are appointed in the event of the death, illness or absence from Australia of the Governor-General, or for the period between the departure of a Governor-General and the arrival of his successor. The following is a list of such appointments.

#### ADMINISTRATORS

- Rt Hon. FREDERIC JOHN NAPIER, BARON CHELMSFORD (afterwards 1ST VISCOUNT CHELMSFORD), K.C.M.G. From 21 December 1909 to 27 January 1910.
- Lieut.-Colonel the Rt Hon. ARTHUR HERBERT TENNYSON, BARON SOMERS, K.C.M.G., D.S.O., M.C. From 3 October 1930 to 22 January 1931.
- Captain the Rt Hon. WILLIAM CHARLES ARCEDECKNE, BARON HUNTINGFIELD, K.C.M.G., K.St.J. From 29 March 1938 to 24 September 1938.
- Major-General SIR WINSTON JOSEPH DUGAN (afterwards 1ST BARON DUGAN OF VICTORIA), G.C.M.G., C.B., D.S.O. From 5 September 1944 to 30 January 1945; 19 January 1947 to 11 March 1947.
- General\* SIR JOHN NORTHCOTT, K.C.M.G., C.B., M.V.O.† From 19 July 1951 to 14 December 1951; 30 July 1956 to 22 October 1956.

\* Lieutenant-General Sir John Northcott was granted honorary rank of General while administering the Government of the Commonwealth. † K.C.V.O., 1954.

ADMINISTRATORS—*continued*

General SIR REGINALD ALEXANDER DALLAS BROOKS, K.C.B., K.C.M.G.,\* K.C.V.O., D.S.O., K.St.J. From 8 January 1959 to 16 January 1959; 4 February 1961 to 3 August 1961; 5 June 1962 to 3 October 1962; 21 November 1962 to 18 December 1962.

General SIR ERIC WINSLOW WOODWARD, K.C.M.G., K.C.V.O., C.B., C.B.E., D.S.O., K.St.J. From 16 June 1964 to 30 August 1964

Colonel SIR HENRY ABEL SMITH, K.C.M.G., K.C.V.O., D.S.O., K.St.J. From 7 May 1965 to 22 September 1965.

**Governors of the States**

*Powers and functions.* The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates. The Governors of the States exercise prerogative powers conferred on them by these Letters Patent, their Commissions of appointment, and the Governor's Instructions given them under the Royal Sign Manual and Signet or other instrument as specified in the Letters Patent. In addition, they have been invested with various statutory functions, either under the State Constitutions, conferred by Imperial Act, or by Act of the Parliament of the State.

A Governor of a State assents in the Queen's name to Bills passed by the Parliament of the State, except those reserved for the Royal assent. The latter include certain classes of Bills which are regulated by the Constitution Acts and by the Governor's Instructions. He administers the prerogative of mercy by the reprieve or pardon of criminal offenders within his jurisdiction, and may remit fines and penalties due to the Crown. In the performance of his functions generally, particularly those conferred by Statute, the Governor of a State acts on the advice of Ministers of State for the State.

*Holders of office.* The names of the present (December 1966) State Governors are as follows.

STATE GOVERNORS, DECEMBER 1966

*New South Wales*—SIR ARTHUR RODEN CUTLER, V.C., K.C.M.G., C.B.E., K.St.J.

*Victoria*—MAJOR-GENERAL SIR ROHAN DELACOMBE, K.C.M.G., K.B.E., C.B., D.S.O., K.St.J.

*Queensland*—SIR ALAN JAMES MANSFIELD, K.C.M.G.

*South Australia*—LIEUT.-GENERAL SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B.

*Western Australia*—MAJOR-GENERAL SIR DOUGLAS ANTHONY KENDREW, K.C.M.G., C.B., C.B.E., D.S.O.

*Tasmania*—LIEUT.-GENERAL SIR CHARLES HENRY GAIRDNER, K.C.M.G., K.C.V.O., K.B.E., C.B.

**The Cabinet and executive government**

Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as 'Cabinet' or 'responsible' government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The Constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained on page 56. The whole policy of a Ministry is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

*The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, until January 1956, all Ministers were members of the Cabinet. Since then, however, although in the States all Ministers are members of the Cabinet, the Commonwealth ministry is made up of twelve senior Ministers, who constitute the Cabinet, and other Ministers† of non-Cabinet rank

\* G.C.M.G., 1963.

† Fourteen, as from 28 February 1967.

who attend meetings of the Cabinet only when required, as, for example, when the business of the Cabinet concerns their departments. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

*The Executive Council.* This body is usually presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings the decisions of the Cabinet are, where necessary, given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

*The appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. When a Ministry resigns the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to 'form a Ministry'—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

*Ministers in Upper and Lower Houses.* The following table shows the distribution of Ministers in the Houses of each Parliament in December 1966.

**AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER  
HOUSES, DECEMBER 1966**

Ministers with seats in—	Cwlth (a)	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Total
The Upper House .	5	2	4	(b)	3	3	1	18
The Lower House .	20	14	11	13	6	9	8	81
<b>Total . . . . .</b>	<b>25</b>	<b>16</b>	<b>15</b>	<b>13</b>	<b>9</b>	<b>12</b>	<b>9</b>	<b>99</b>

(a) By the *Ministers of State Act 1967* the number of Ministers was increased to twenty-six from 28 February 1967.  
(b) Abolished in 1922.

#### **Commonwealth Ministries**

*Names and tenure of office, 1901 to 1966.* The following list shows the name of each Commonwealth Ministry to hold office since 1 January 1901, and the limits of its term of office.

#### **COMMONWEALTH MINISTRIES, 1901 TO 1966**

- (i) BARTON MINISTRY, 1 January 1901 to 24 September 1903.
- (ii) DEAKIN MINISTRY, 24 September 1903 to 27 April 1904.
- (iii) WATSON MINISTRY, 27 April 1904 to 17 August 1904.
- (iv) REID-MCLEAN MINISTRY, 18 August 1904 to 5 July 1905.
- (v) DEAKIN MINISTRY, 5 July 1905 to 13 November 1908.
- (vi) FISHER MINISTRY, 13 November 1908 to 1 June 1909.
- (vii) DEAKIN MINISTRY, 2 June 1909 to 29 April 1910.
- (viii) FISHER MINISTRY, 29 April 1910 to 24 June 1913.
- (ix) COOK MINISTRY, 24 June 1913 to 17 September 1914.
- (x) FISHER MINISTRY, 17 September 1914 to 27 October 1915.
- (xi) HUGHES MINISTRY, 27 October 1915 to 14 November 1916.
- (xii) HUGHES MINISTRY, 14 November 1916 to 17 February 1917.
- (xiii) HUGHES MINISTRY, 17 February 1917 to 10 January 1918.
- (xiv) HUGHES MINISTRY, 10 January 1918 to 9 February 1923.
- (xv) BRUCE-PAGE MINISTRY, 9 February 1923 to 22 October 1929.
- (xvi) SCULLIN MINISTRY, 22 October 1929 to 6 January 1932.
- (xvii) LYONS MINISTRY, 6 January 1932 to 7 November 1938.
- (xviii) LYONS MINISTRY, 7 November 1938 to 7 April 1939.

COMMONWEALTH MINISTRIES, 1901 TO 1966—*continued*

- (xix) PAGE MINISTRY, 7 April 1939 to 26 April 1939.
- (xx) MENZIES MINISTRY, 26 April 1939 to 14 March 1940.
- (xxi) MENZIES MINISTRY, 14 March 1940 to 28 October 1940.
- (xxii) MENZIES MINISTRY, 28 October 1940 to 29 August 1941.
- (xxiii) FADDEN MINISTRY, 29 August 1941 to 7 October 1941.
- (xxiv) CURTIN MINISTRY, 7 October 1941 to 21 September 1943.
- (xxv) CURTIN MINISTRY, 21 September 1943 to 6 July 1945.
- (xxvi) FORDE MINISTRY, 6 July 1945 to 13 July 1945.
- (xxvii) CHIFLEY MINISTRY, 13 July 1945 to 1 November 1946.
- (xxviii) CHIFLEY MINISTRY, 1 November 1946 to 19 December 1949.
- (xxix) MENZIES MINISTRY, 19 December 1949 to 11 May 1951.
- (xxx) MENZIES MINISTRY, 11 May 1951 to 11 January 1956.
- (xxxi) MENZIES MINISTRY, 11 January 1956 to 10 December 1958.
- (xxxii) MENZIES MINISTRY, 10 December 1958 to 18 December 1963.
- (xxxiii) MENZIES MINISTRY, 18 December 1963 to 26 January 1966.
- (xxxiv) HOLT MINISTRY, 26 January 1966 to 14 December 1966.
- (xxxv) HOLT MINISTRY, 14 December 1966.

*Names of holders of Commonwealth Ministerial office, to 31 December 1966.* In Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9 February 1923 to 22 October 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9 February 1923, and 31 July 1951, showing the names of all persons who held office in each Ministry during that period.

This issue shows only particulars of the latest Holt Ministry, as constituted on 14 December 1966. For subsequent changes, *see* Appendix.

HOLT MINISTRY—FROM 14 DECEMBER 1966

(The State in which each Minister's electorate is situated is shown in parenthesis)

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

<i>Minister for Agriculture and Tourists—</i> THE HON. A. C. ATKINS, M.H.A.	

**Leaders of the Opposition, Commonwealth and State Parliaments, December 1966**

The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in December 1966

**LEADERS OF THE OPPOSITION, DECEMBER 1966**

<i>Commonwealth—</i> The Hon. A. A. Calwell, M.P.(a)
<i>New South Wales—</i> J. B. Renshaw, M.L.A.
<i>Victoria—</i> The Hon. C. P. Stoneham, M.P.
<i>Queensland—</i> J. W. Houston, M.L.A.
<i>South Australia—</i> R. S. Hall, M.P.
<i>Western Australia—</i> The Hon. A. R. G. Hawke, M.L.A.
<i>Tasmania—</i> The Hon. W. A. Bethune, M.H.A.
(a) E. G. Whitlam, Q.C., M.P., from 8 February 1967.

**Numbers and salaries of Commonwealth Ministers**

Under sections 65 and 66, respectively, of the Constitution of the Commonwealth the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000 (\$24,000), each provision to operate, however, 'until the Parliament otherwise provides'.

Subsequently the number and salaries have been increased from time to time, and from 1967 the annual sum payable for salaries has been fixed at \$197,300 and the number of Ministers at twenty-six. An additional ministerial allowance of \$8,000 a year has been payable to the Prime Minister since 1964, and an additional ministerial allowance of \$3,600 a year for senior Ministers and \$3,000 a year for junior Ministers.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (see page 68).

**Parliaments and elections**

**The Commonwealth Parliaments**

The first Parliament of the Commonwealth was convened by proclamation dated 29 April 1901 by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9 May 1901 by H.R.H. the Duke of Cornwall and York. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since federation.

COMMONWEALTH PARLIAMENTS

Number of Parliament	Date of opening	Date of dissolution
First . . . . .	9 May 1901 . . . . .	23 November 1903
Second . . . . .	2 March 1904 . . . . .	5 November 1906
Third . . . . .	20 February 1907 . . . . .	19 February 1910
Fourth . . . . .	1 July 1910 . . . . .	23 April 1913
Fifth . . . . .	9 July 1913 . . . . .	30 July 1914(a)
Sixth . . . . .	8 October 1914 . . . . .	26 March 1917
Seventh . . . . .	14 June 1917 . . . . .	3 November 1919
Eighth . . . . .	26 February 1920 . . . . .	6 November 1922
Ninth . . . . .	28 February 1923 . . . . .	3 October 1925
Tenth . . . . .	13 January 1926 . . . . .	9 October 1928
Eleventh . . . . .	6 February 1929 . . . . .	16 September 1929
Twelfth . . . . .	20 November 1929 . . . . .	27 November 1931
Thirteenth . . . . .	17 February 1932 . . . . .	7 August 1934
Fourteenth . . . . .	23 October 1934 . . . . .	21 September 1937
Fifteenth . . . . .	30 November 1937 . . . . .	27 August 1940
Sixteenth . . . . .	20 November 1940 . . . . .	7 July 1943
Seventeenth . . . . .	23 September 1943 . . . . .	16 August 1946
Eighteenth . . . . .	6 November 1946 . . . . .	31 October 1949
Nineteenth . . . . .	22 February 1950 . . . . .	19 March 1951(a)

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

There have been twenty-five complete Parliaments since Federation. Until 1927 the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the Duke of York on 9 May 1927.

The twenty-fifth Parliament opened on 25 February 1964 and ended on 31 October 1966 when the House of Representatives was dissolved. Elections for the House of Representatives were held on 26 November 1966. Elections were also held on the same date to fill casual vacancies in the Senate for each of the States of New South Wales, Victoria, Queensland, and Western Australia. Particulars of electors and voting are given in the Appendix. For particulars of electors enrolled and of electors who voted in the several States and Territories at previous Commonwealth elections, see Year Book No. 52 and earlier issues.

A special article describing the Commonwealth Parliament, its functions and procedure, prepared by the Clerk of the Senate and the Clerk of the House of Representatives, appears in Year Book No. 49, pages 65-71.

**Qualifications for membership and for franchise—Commonwealth Parliament**

Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disentitled on other grounds, who has lived in Australia for six months continuously. Residence in a subdivision for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory except that the compulsory enrolment provisions do not relate to an Aboriginal native of Australia. A member of the Defence Forces on service outside Australia who is a British subject not less than 21 years of age and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections, whether enrolled or not. In 1956 the franchise was extended to entitle a person who is less than twenty-one years of age, who has lived in Australia for six months continuously and who is, or has been, on 'special service' outside Australia as a member of the Defence Forces, to vote at elections as if his name appeared on the roll. 'Special service'

takes the same meaning as that term in the Repatriation (Special Overseas Service) Act and means, in relation to a person, service during a period when he is outside Australia and he or his unit is allotted for special duty in a special area.

The principal reasons for disqualification of persons otherwise eligible as members of either Commonwealth House are: membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than twenty-five persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the *Migration Act 1958-1966* or are prohibited immigrants under that Act, are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise. Aborigines are entitled to vote at both Commonwealth and State elections in all States.

#### **Commonwealth Parliaments and elections**

From the establishment of the Commonwealth until 1949 the Senate consisted of thirty-six members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament passed the *Representation Act 1948* which provided that there should be ten Senators from each State instead of six, increasing the total to sixty Senators, thus enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation.

In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Consequently, in terms of the Constitution and the Representation Act, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows: New South Wales—from 28 to 47; Victoria—from 20 to 33; Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 and the total was increased from 74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by distribution commissioners in each State on a quota basis, but taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and subdivisions, and State electoral boundaries.

The population as disclosed by the Census taken on 30 June 1954 necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10 December 1955 has been: New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 121 to 122. A redistribution of the States into electoral divisions was effected by distribution commissioners appointed for each State.

The population as disclosed by the Census taken on 30 June 1961 revealed that, under the provisions of the Representation Act, New South Wales, Queensland, and Western Australia would each lose one member in the House of Representatives, while Victoria would gain a member. The distribution commissioners' reports were duly laid before both Houses of Parliament, but the Government decided not to proceed with the proposals and announced that it would amend the Representation Act. In November 1964 the formula provided by Section 10 of the Representation Act for determining the number of members of the House of Representatives was amended so as to give a State an additional member for 'any portion of a quota'. The effect of that amendment would have been that at the next redistribution, Victoria and South Australia would each gain one member while all other States would retain their existing representation. However, no fresh redistribution was effected prior to the 1966 Census. When the population as at the 1966 Census has been ascertained, the Chief Electoral Officer will determine afresh the number of members of the House of Representatives to be chosen for the several States, based on that Census. This new representation will then become effective at the next general election of members of the House of Representatives following the next redistribution.

Since the general election of 1922 the Northern Territory has been represented by one member in the House of Representatives, and the Australian Capital Territory has had similar representation since the elections of 1949. The member for the Australian Capital Territory has had full voting rights since the first sitting of the twenty-sixth Parliament. However, while the member for the Northern Territory may join in the debates he is not entitled to vote except on any pro-

posed law which relates solely to the Territory or on a motion for the disallowance of a regulation made under an Ordinance of the Territory and on any amendment of such a motion.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators the whole State constitutes the electorate. For the purpose of elections for the House of Representatives the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Year Book.

The *Commonwealth Electoral Act* 1948, introduced with the *Representation Act* 1948 to enlarge the Commonwealth Parliament (see page 62), changed the system of scrutiny and counting of votes in Senate elections from the alternative vote to that of proportional representation. For a description of the system, see Year Book No. 38, pages 82–3. The system of voting for both the Senate and the House of Representatives is preferential.

Particulars of voting at Senate elections and elections for the House of Representatives up to 1964 appear in earlier issues of the Year Book, and additional information is available in the *Statistical Returns* issued by the Chief Electoral Officer following each election. Particulars of the voting at the 1966 elections are given in the Appendix.

The state of the parties in each House following the elections at the end of 1966 was: *Senate*—Liberal Party 22; Country Party, 7; Australian Labor Party, 28; Australian Democratic Labor Party, 2; Independent, 1; *House of Representatives*—Liberal Party, 61; Country Party 21 (including the Northern Territory member with restricted voting rights); Australian Labor Party, 41; Independent, 1.

#### Members of the Commonwealth Parliament

The following is a list of Senators and Members of the House of Representatives of the Commonwealth Parliament as at 1 January 1967. Changes since that date are set out in the Appendix to this volume. Party affiliation is indicated by the use of the following abbreviations:

A.D.L.P.—Australian Democratic Labor Party.

A.L.P.—Australian Labor Party.

C.P.—Australian Country Party.

Ind.—Independent.

Lib.—Liberal Party of Australia.

### MEMBERS OF THE COMMONWEALTH PARLIAMENT, 1 JANUARY 1967(a)

#### THE SENATE

##### *President:*

SENATOR THE HON. SIR ALISTER McMULLIN,  
K.C.M.G.

##### *Chairman of Committees:*

SENATOR T. C. DRAKE-BROCKMAN, D.F.C.

##### *Leader of the Government in the Senate:*

SENATOR THE HON. N. H. D. HENTY

##### *Leader of the Opposition in the Senate:*

SENATOR D. R. WILLESEE (b)

(a) For later changes see Appendix.

(b) Senator L. K. Murphy, Q.C. from 21 February 1967.

**Commonwealth referendums**

In accordance with section 128 of the Constitution any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved also by a majority of the electors in a majority of the States and by a majority of all the electors who voted, before it can be presented for Royal Assent. Twenty-four such proposals have so far been submitted to referendums and the consent of the electors has been received in four cases, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referendums and the voting thereon are given in Year Book No. 52, pages 66–7.

In addition to referendums for alteration of the Constitution, other Commonwealth referendums have been held, the first occasion being in 1898, when a proposed Constitution, embodied in the *Federal Constitution Bill*, was submitted to the popular vote but failed to receive the statutory vote of 80,000 in New South Wales. On modification of the Bill in the following year the necessary consent was obtained. In 1916 a question was submitted in terms of section 5 of the *Military Service Referendum Act 1916* as to whether the people of Australia were in favour of compulsory overseas military service for the term of the war. The proposal was favoured by a majority of voters in Victoria, Western Australia and Tasmania, and in the Federal Territories, which also participated in this Referendum, but the necessary majority of all voters was not obtained. Affirmative votes cast amounted to 48.39 per cent of all formal votes. Of the electors on the roll, 82.75 per cent voted. In 1917 another question was submitted. This was prescribed by Regulation 6 of the War Precautions (Military Service Referendum) Regulations 1917 and asked whether the Commonwealth should have power to call up by ballot compulsory reinforcements for the Australian Imperial Force overseas, up to 7,000 per month. Only Western Australia, Tasmania and the Federal Territories voted for the proposal, and, inclusive of those of members of the Forces and crews of transports who voted on this occasion, affirmative votes amounted to only 46.21 per cent of all formal votes. The percentage of electors who voted was 81.34.

Two Bills for alteration of the Constitution were passed during 1965, one to amend the provisions that the number of members of the House of Representatives shall be as nearly as practicable twice the number of Senators (section 24), and the other to repeal section 127—'In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.' In accordance with the provisions of section 128 of the Constitution the proposals were to have been submitted to the electors within six months after the passage of the Bills. The Government, however, decided in February 1966 to defer the holding of the referendums until after the House of Representatives election of 26 November 1966.\*

\* For later developments see Appendix.

### The Parliaments of the States and State elections

Pages 53, 62 and 68 of this chapter contain summarised information on the Parliaments of each State, the qualifications for members, the numbers of Houses and members, and salaries payable. For greater detail, including some historical material, reference should be made to Year Books No. 50, pages 69-72, No. 51, page 73, No. 52, page 68, and earlier issues.

Pursuant to the *Electoral Provinces and Districts Act 1965*, a new redivision of Victoria for electoral purposes was carried out at the end of 1965 on the following basis:

- (1) The so-called 'Port Phillip Area', which consists of thirty-eight existing metropolitan and semi-metropolitan districts and six parts of other districts, was redivided into forty-four electoral districts for the Assembly, each containing approximately 25,000 electors;
- (2) the remaining area of the State, i.e. 'Country Area', was divided into twenty-nine electoral districts for the Legislative Assembly, consisting of eight Provincial Centre electorates each containing approximately 22,250 electors and twenty-one other electorates of a rural nature each containing approximately 18,200 electors; and
- (3) the 'Southern Area' containing the nine existing Electoral Provinces of Dootta Galla, East Yarra, Higinbotham, Melbourne, Melbourne North, Melbourne West, Monash, Southern, and South Eastern was redivided into ten new provinces for the Legislative Council; the remaining eight Country Provinces are unchanged.

In Western Australia provision has been made by the *Constitution Acts Amendment Act (No. 2), 1965*, which came into operation by proclamation on 12 November 1965, for the Legislative Assembly to be increased to fifty-one members. This increase in numbers will not become effective until the next State election in 1968. The increased membership followed on the passing of the *Electoral Districts Amendment Act, 1965*, which became operative as from the same date as the Constitution Acts Amendment Act (No. 2). The Electoral Districts Amendment Act required the Commissioners to adjust the boundaries of the fifteen Electoral Provinces having regard to the proposed division of the State into fifty-one Electoral Districts. The final recommendations for the redivision and adjustment of the boundaries of the Electoral Provinces were published in the Government Gazette of Western Australia dated 21 July 1966.

**State Upper House elections.** The following table shows particulars of the voting at the most recent elections for the Upper Houses or Legislative Councils in the States of Victoria, South Australia, Western Australia, and Tasmania. In New South Wales members of the Legislative Council are elected at simultaneous sittings of the members of both Houses, in Queensland there has been no Legislative Council since 1922, and in Tasmania three members of the Council are elected annually (but four in each sixth year) and the Council cannot be dissolved as a whole.

#### STATE UPPER HOUSE ELECTIONS

State	Year of latest election	Electors enrolled—whole State			Contested electorates					
					Electors who voted			Percentage of electors who voted		
		Males	Females	Total	Males	Females	Total	Males	Females	Total
Victoria	1964	800,620	834,691	1,635,311	758,124	785,654	1,543,778	94.7	94.1	94.4
South Australia	1965	n.a.	n.a.	213,377	n.a.	n.a.	149,910	n.a.	n.a.	80.2

(a) Abolished in 1922. (b) Plus expense allowances—Senators, \$2,100; Members of the House of Representatives, city electorates, \$2,200, country electorates, \$2,600. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) In addition, members who live outside the metropolitan area also receive a living away from home allowance of \$10 a day. (d) Plus allowances from \$1,700 for metropolitan to \$2,100 for urban, \$2,300 for inner country, and \$2,400 for outer country electorates. (e) Plus allowance of \$1,200 where electorate is less than 50 miles from Adelaide or if a Minister, \$1,600 if more than 50 miles but less than 200 miles, \$1,900 if more than 200 miles. (f) Plus expense reimbursement ranging from \$1,400 for a metropolitan member to \$2,800 for a north province member. (g) Plus allowance according to area of electorate and distance from the capital varying from \$500 to \$1,100 in the case of the Legislative Council, and from \$1,100 to \$1,850 in the case of the House of Assembly. (h) Plus allowance varying from \$1,620 to \$2,400 according to location of electorate. (i) Plus individual electoral allowances ranging from \$1,100 to \$2,630.

### Enactments of the Parliaments

In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania laws are enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. Generally, assent to Bills passed by the legislatures is given by the Governor-General or State Governor acting on behalf of, and in the name of, the Sovereign. In certain special cases Bills are reserved for the Royal assent. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is to the extent of the inconsistency invalid.

#### The course of Commonwealth legislation

The actual legislation by the Commonwealth Parliament during 1966 is indicated in alphabetical order in *The Acts of the Parliament of the Commonwealth of Australia passed during the year 1966 in the First Session of the Twenty-fifth Parliament of the Commonwealth, with Appendix, Tables and Index*. A chronological table of Acts passed from 1901 to 1966 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1966 in relation to the several provisions of the Constitution is furnished in the same volume. Reference should be made to these for complete information.

The Acts passed by the Commonwealth Parliament during the year 1966 are listed hereunder. In many cases the title of the Act indicates the general scope of the Act, but brief explanatory notes have been added where necessary. Appropriate chapters of this Year Book should be referred to for further information which may be available there.

The total enactments of the Commonwealth Parliament for a number of years at fairly even intervals since 1901 show a general increase. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939, 109 in 1952, and 93 in 1966.

*Commonwealth legislation passed during 1966*

*Agricultural Tractors Bounty Act* 1966 (No. 82) provided for the payment of a bounty on the production of agricultural tractors during the period from 26 October 1966 to 30 June 1971.

*Air Navigation (Charges) Act* 1966 (No. 48) increased air navigation charges by ten per cent.

*Aliens Act* 1966 (No. 9) gave full legal status to collection of particulars of aliens in their own country when visas are applied for and varied need for registration of aliens staying in Australia for less than one year.

*Appropriation Act* (No. 3) 1965–66 (No. 18); *Appropriation Act* (No. 4) 1965–66 (No. 19); *Appropriation Act* (No. 1) 1966–67 (No. 45); *Appropriation Act* (No. 2) 1966–67 (No. 46).

*Asian Development Bank Act* 1966 (No. 25) gave parliamentary authority for the payment of a subscription of \$US 85 million by Australia to join the Asian Development Bank.

*Australian Capital Territory Representation Act* 1966 (No. 3) provided for the repeal of the section of the *Australian Capital Territory Representation Act* 1948–1959 which limited the voting power of the member representing the Australian Capital Territory in the House of Representatives.

*Australian Capital Territory Supreme Court Act* 1966 (No. 8) laid down rules governing the right of barristers and solicitors to practise in the Supreme Court of the Australian Capital Territory.

*Australian Coastal Shipping Commission Act* 1966 (No. 4) gave the Commission greater borrowing powers and gave it the same freedom to vary the ratio between loan borrowings and equity capital as is available to private shipowners.

*Bankruptcy Act* 1966 (No. 33) amended the law relating to Bankruptcy in a number of important respects, completing the first full-scale review of the law of bankruptcy since the original Federal Bankruptcy Act was passed in 1924. The principal changes were: the amount of indebtedness necessary to found a bankruptcy petition by a creditor has been increased to \$500; the existing provisions relating to arrangements between debtor and creditors outside bankruptcy have been repealed and new procedures set up under which a meeting of creditors shall be called and all creditors afforded an opportunity of taking part and of determining whether the debtor's affairs are to be administered outside of strict bankruptcy, and, if so, whether by deed of assignment, deed of arrangement, or composition; the obtaining of credit by an undischarged bankrupt is now an offence where the amount is \$200 or over; the penalty for all offences against the Act has been increased to a maximum of imprisonment for three years; a system of discharge by operation of law, subject to the necessary safeguards in the interests of creditors and the community, has been introduced; priority in interest of the Crown in respect of outstanding income tax has been limited to tax assessed before the date of bankruptcy; creditors are discouraged from bringing about a sale of a debtor's assets by the process of execution, which would tend to diminish the value of the estate available to the trustee in bankruptcy; and some adjustments have been made between the competing interests of private creditors.

*Broadcasting and Television Act* 1966 (No. 57) amended the *Broadcasting and Television Act*, 1942–1965 to provide for the issue of concessional broadcast listeners' and television viewers' licences to persons in receipt of a tuberculosis allowance who would otherwise have been eligible for a pension under the Social Services Act.

*Canned Fruits Export Charges Act* 1966 (No. 73) allowed for one payment being made instead of a series as provided under the principal Act and simplified the expression of the maximum rate of charge.

*Cellulose Acetate Flake Bounty Act* 1966 (No. 80) extended the operation of the *Cellulose Acetate Flake Bounty Act* 1956–1965 until 31 December 1969.

*Commonwealth Banks Act* 1966 (No. 58) amended the *Commonwealth Banks Act* 1959–1965 to provide that membership of the Papua and New Guinea Development Bank Board will not disqualify a person from being a member of the Commonwealth Banking Corporation Board.

*Commonwealth Electoral Act* 1966 (No. 32) made provision for the franchise to be extended to persons under the age of 21 years who are or have been on special service outside Australia as members of the defence forces (see page 61).

*Commonwealth legislation passed during 1966—continued*

*Conciliation and Arbitration Act 1966* (No. 64) increased the number of Judges of the Commonwealth Industrial Court to seven.

*Customs Act 1966* (No. 28); *Customs Tariff Act (No. 2) 1966* (No. 27); *Customs Tariff Act (No. 3) 1966* (No. 34); *Customs Tariff Validation Act 1966* (No. 1); *Customs Tariff Validation Act (No. 2) 1966* (No. 88).

*Defence Forces Retirement Benefits Act 1966* (No. 70).\*

*Defence (Parliamentary Candidates) Act 1966* (No. 87) provided for the discharge of National Servicemen wishing to stand as candidates at Federal parliamentary elections.

*Dried Vine Fruits Stabilization Act 1966* (No. 74) provided for a new method based on sample techniques for the ascertainment of average return as prescribed in the Act and for a new procedure of payment of bounty and refunds of contributory charge to growers.

*Estate Duty Assessment Act 1966* (No. 53), exempted gifts to the National Trusts of Queensland, Western Australia and Tasmania from estate duty.

*Extradition (Commonwealth Countries) Act 1966* (No. 75) *Extradition (Foreign States) Act 1966* (No. 76). These Acts provided restrictions on the surrender of political fugitives, provided that trial could take place on any charge proved by the facts on which the extradition was granted, and provided that the offence for which extradition is sought must be an offence not only in the country seeking extradition, but also in the country in which the fugitive is apprehended. The Acts also laid down the procedure to be followed for the extradition of fugitives.

*Financial Agreement Act 1966* (No. 30) ratified an Agreement between the Commonwealth and the States amending the Financial Agreement to permit it to operate in decimal currency.

*High Commissioner (United Kingdom) Act 1966* (No. 56) gave the High Commissioner in London authority to delegate powers in relation to the appointment of staff and the engagement of employees, to validate such appointments and engagements made otherwise than by the High Commissioner, and to validate certain salary increases paid by way of ministerial approval to locally engaged staff.

*Housing Agreement Act 1966* (No. 24) provided for the making of a new five-year agreement with the States in respect of housing advances when the existing agreement expired on 30 June 1966.

*Income Tax Act 1966* (No. 51); *Income Tax Assessment Act 1966* (No. 50); *Income Tax Assessment Act (No. 2) 1966* (No. 83); *Income Tax (International Agreements) Act 1966* (No. 17); *Income Tax (Partnerships and Trusts) Act 1966* (No. 52).

*International Finance Corporation Act 1966* (No. 36) amended the *International Finance Corporation Act 1955–1963* to take account of recent amendments to the articles of Association of the International Finance Corporation enabling it to supplement its existing resources by borrowing from the International Bank for Reconstruction and Development.

*International Monetary Agreements Act 1966* (No. 37) provided for the Schedules to the *International Monetary Agreements Act 1947–1963* to be brought into line with the amended Articles of Agreement for the International Bank for Reconstruction and Development.

*International Wheat Agreement (Extension) Act 1966* (No. 16) approved the signature and acceptance by Australia of the Protocol extending the International Wheat Agreement 1962 for a further year.

*Judiciary Act 1966* (No. 55) laid down who may practise as barristers or solicitors in the High Court and other Federal courts and in courts of the Territories and dealt with subsidiary matters such as discipline of persons so practising.

*Loan Act 1966* (No. 13) authorised the raising and expending of a sum not exceeding \$150 million for defence purposes.

*Loan Act (No. 2) 1966* (No. 49) authorised the raising and expending of a sum not exceeding \$300 million for defence purposes.

*Loan (Housing) Act 1966* (No. 6) authorised the raising and expending of a sum not exceeding \$15 million for housing purposes.

*Loan (Housing) Act 1966* (No. 2) 1966 (No. 35) authorised the raising and expending of a sum not exceeding \$120 million for housing purposes.

*Loan (Airlines Equipment) Act 1966* (No. 2) approved the raising in the United States of \$US 54 million to be lent to the Australian National Airlines Commission and Qantas Empire Airways Limited for the purchase of jet aircraft.

*Loan (Defence) Act 1966* (No. 22) authorised the borrowing in the United States of \$US 450 million for defence purposes.

\* Provided for a new basis of pensions for orphan children by relating these pensions to the fathers' former salary and pension entitlements.

*Commonwealth legislation passed during 1966—continued*

*Maintenance Orders (Commonwealth Officers) Act 1966* (No. 59) provided for the enforcement of maintenance orders against Commonwealth employees by attachment of earnings orders directed to the Commonwealth and authorities of the Commonwealth.

*Matrimonial Causes Act 1966* (No. 60) amended the Third Schedule of the Act, which deals with attachment of earnings as a means of enforcement of maintenance orders, so as to make all attachments of earnings legislation fairly uniform.

*Migration Act 1966* (No. 10) provided that seamen's discharge books may be accepted as identification cards for ships crews, and revised sections of the Act relating to penalties consequent on the introduction of decimal currency.

*Nationality and Citizenship Act 1966* (No. 11) provided that where one partner to a marriage becomes eligible for naturalisation the other party may be granted naturalisation and they may also be naturalised together, and that the words by which applicants renounce allegiance to their former countries shall be incorporated as part of the oath of allegiance to the Queen.

*National Debt Sinking Fund Act 1966* (No. 65) provided for debt redemption by contributions of four per cent in respect of appropriate outstanding and newly created Commonwealth Debt from the new base date 30 June 1966.

*National Health Act 1966* (No. 44) altered the definition of a pensioner in the National Health Act to permit the enrolment in the pensioner medical service of persons becoming entitled to pensions under the new provisions of the Social Services Act and the Repatriation Act (see below, and p. 72). It also provided for an increase in the rate of hospital benefit payable to public hospitals for the free treatment of public ward pensioners, and for an increase in the special rate of hospital benefit paid to patients with long-term or chronic illnesses.

*Nitrogenous Fertilizers Subsidy Act 1966* (No. 78) provided for payment of a subsidy of \$80 per ton of nitrogenous fertilisers used in Australia payable, *pro rata* on the nitrogen content of the particular material, from 17 August 1966 until 31 October 1969.

*Papua-New Guinea Act 1966* (No. 84) amended the Papua and New Guinea Act to make changes in the composition of the House of Assembly and in the Territory Judicial system. The number of members of the House of Assembly was increased to ninety-four, sixty-nine ordinary seats and fifteen regional seats open to candidates with a minimum educational qualification. To provide for an appeal within the Territory from a decision of the Supreme Court the Act constituted a Full Court of the Supreme Court to hear and determine appeals from, or cases stated by, single judges of that Court.

*Parliamentary Retiring Allowances Act 1966* (No. 71).\*

*Payroll Tax Assessment Act 1966* (No. 54).

*Phosphate Fertilizers Bounty Act 1966* (No. 40) extended the operation of the Act from 14 August 1966 to 31 October 1969.

*Post and Telegraph Act 1966* (No. 7) provided for the issue of postal orders in lieu of postal notes and for the fixing of upper limits to the value of postal orders and money orders issued by regulation instead of by the Act as was formerly the case.

*Poultry Industry Assistant Act 1966* (No. 66) provided that money in the Poultry Industry Trust Fund might be expended on research with a \$1 for \$1 contribution by the Commonwealth.

*Poultry Industry Levy Act 1966* (No. 68); *Poultry Industry Levy Collection Act 1966* (No. 67).

*Public Service Act 1966* (No. 47) amended the *Public Service Act 1922-1964* to make special provision to insure that staff employed under the Act are appropriately covered and protected during absences on compulsory defence service, to provide for payment in lieu of furlough in certain circumstances to officers ceasing duty after ten years but less than fifteen years continuous service and for other additional furlough entitlements, and to include other amendments mainly of a machinery nature.

*Public Service Act (No. 2) 1966* (No. 85) provided for the employment of married women as permanent officers of the Commonwealth Public Service.

*Quarantine Act 1966* (No. 12) provided that new arrivals in Australia who cannot satisfy the quarantine officer that they are not suffering from active pulmonary tuberculosis may be required to undergo medical examination.

*Queensland Beef Cattle Roads Agreement Act 1966* (No. 38) increased the limit of financial assistance available for beef roads in Queensland from \$16.6 million to \$20.5 million.

*Repatriation Act 1966* (No. 42) provided for increases of \$2 per week in the special rate of pension—totally and permanently incapacitated—and in the amounts paid to certain amputees, and of \$1 per week in the rate of pension for war widows.

---

\* Provided for a new basis of pensions for orphan children by relating these pensions to the father's former salary and pension entitlement.

*Commonwealth legislation passed during 1966—continued*

*Sales Tax (Exemptions and Classifications) Act 1966 (No. 26); Sales Tax (Exemptions and Classifications) Act (No. 2) 1966 (No. 62).*

*Seamen's War Pensions and Allowances Act 1966 (No. 43)* provided for an increase of \$2 per fortnight in the rate of pension payable to widows and intermediate rate pensioners under the Act and an increase of \$4 per fortnight in the total and permanent incapacity rate.

*Senate Elections Act 1966 (No. 63)* provided that where there are two or more casual Senate vacancies to be filled at a general election of members of the House of Representatives, the election to fill those vacancies shall be conducted as one election.

*Social Services Act 1966 (No. 41)* increased the standard rate of pensions payable under the Act by \$1 a week.

*States Grants (Advanced Education) Act 1966 (No. 89)* appropriated \$24 million for capital expenditure and \$11.18 million for recurrent expenditure in colleges of advanced education.

*States Grants (Drought Assistance) Act 1966 (No. 31)* authorised the payment of up to \$26 million to the States of New South Wales and Queensland for the alleviation of the effects of drought.

*States Grants (Drought Assistance) Act (No. 2) 1966 (No. 61)* authorised the payment of an amount of \$10.75 million to the States of New South Wales and Queensland to assist them in meeting the adverse effects of drought on their revenues.

*States Grants (Research) Act 1966 (No. 92)* amended the requirement for States to match Commonwealth contributions so that the Minister may require an equal matching amount or a lesser amount or no contribution at all from the State towards special research projects in a State university.

*States Grants (Special Assistance) Act 1966 (No. 72)* authorised the payment of special grants totalling \$40,072,000 to the States of Western Australia and Tasmania.

*Statute Law Revision (Decimal Currency) Act 1966 (No. 93)* provided for textual revisions consequent on the *Currency Act 1965*, to be incorporated in Acts when they are reprinted.

*Stevedoring Industry Act 1966 (No. 77)* provided for increased entitlement to long service for waterside workers with over fifteen years service.

*Sulphate of Ammonia Bounty Act 1966 (No. 5).*

*Sulphate of Ammonia Bounty Act (No. 2) 1966 (No. 79)* provided for continuation of the payment of bounty on sulphate of ammonia until 31 December 1969 and raised the maximum payment limit to \$1 million as from 26 October 1966.

*Superannuation Act 1966 (No. 69).*

*Superannuation Act (No. 2) 1966 (No. 86)* enabled married women to contribute to the Commonwealth Superannuation Fund.

*Supply Act (No. 1) 1966–67 (No. 20); Supply Act (No. 2) 1966–67 (No. 21).*

*Tractor Bounty Act 1966 (No. 15)* extended the operation of the Act to 31 December 1966 or such earlier date as proclaimed.

*Trade Practices Act 1966 (No. 39)* amended the *Trade Practices Act 1965* for the purpose of controlling the operations of Shipping Conferences in relation to the carriage of goods by sea from Australia to other countries.

*Therapeutic Goods Act 1966 (No. 29)* repealed the *Therapeutic Substances Act* and provided for the determination of specific standards for individual products, general standards for all therapeutic goods or certain classes of goods, methods of testing for compliance with standards, and requirements with respect to labelling, packaging and containers and empowered the Minister to prohibit the importation into Australia of dangerous substances.

*Universities (Financial Assistance) Act 1966 (No. 90)* authorised grants totalling approximately \$175 million for the Commonwealth share of the agreed programme of development of State universities for the years 1967 to 1969.

*Universities (Financial Assistance) Act (No. 2) 1966 (No. 91)* amended the *Universities (Financial Assistance) Act* to clarify the definition of capital expenditure and to make formal record of the changed title of the Flinders University of South Australia.

*Urea Bounty Act 1966 (No. 81)* provided for the payment of a bounty on urea produced and sold in Australia as a fertiliser during the period 26 October 1966 to 31 December 1969.

*Vinyl Resin Bounty Act 1966 (No. 14)* extended by a maximum period of six months the operation of the *Vinyl Resin Bounty Act 1963*.

*Western Australia Grant (Beef Cattle Roads) Act 1966 (No. 23)* extended the operation of the *Western Australia Grant (Beef Cattle Roads) Act 1962* to 30 June 1967 and provided for the payment of a grant in respect of 1966–67 of not more than \$1.5 million.

### Cost of parliamentary government

The table below shows, in broad groups, the expenditure incurred in the operation of the parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; *they do not attempt to cover the expenditure on Commonwealth and State administration generally.* Only broad groups are shown, but even these are not entirely comparable because of differences in accounting procedures and in the presentation of accounts. A very large part of the expenditure under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, carried out at the request of the Government. The item includes salaries of Government House staffs and maintenance of residences, official establishments, grounds, etc., and expenditure on capital works and services.

#### COST OF PARLIAMENTARY GOVERNMENT, 1965-66 (\$'000)

### Commonwealth Government Departments

In Year Book No. 49 (pages 87-98) a list appears of the Commonwealth Government Departments, giving particulars for each Department of the principal matters dealt with and the Acts administered by the Minister concerned as at the end of 1962, and changes made during 1963 are shown on page 83 of Year Book No. 50. For a list of current Acts administered see the *Commonwealth Directory* and pages 1357-66 of *Commonwealth of Australia Gazette* No. 22 of 1967.

On 13 December 1966, the establishment of the Department of Education and Science was notified in *Commonwealth of Australia Gazette* No. 103A of 1966. This Department took over from the Prime Minister's Department the administration of the following Acts:

*Australian Institute of Aboriginal Studies Act* 1964-1966  
*Australian National University Act* 1946-1966  
*Australian Universities Commission Act* 1959-1965  
*Education Act* 1945-1966  
*Re-establishment and Employment Act* 1945-1966: Part III, in relation to university and university-type training; and Part XII, to the extent to which it applied or may be applied in relation to the foregoing  
*Science and Industry Endowment Act* 1926-1949  
*Science and Industry Research Act* 1949-1966  
States Grants (Advanced Education) Acts  
*States Grants (Research) Act* 1965-1966  
*States Grants (Science Laboratories and Technical Training) Act* 1964  
*States Grants (Science Laboratories) Act* 1965-1966  
*States Grants (Technical Training) Act* 1965-1966  
States Grants (Universities) Acts  
Universities (Financial Assistance) Acts  
*Weights and Measures (National Standards) Act* 1960-1966

The Prime Minister's Department now administers the following Acts:

*Commonwealth Grants Commission Act* 1933-1966  
*Commonwealth Salaries Act* 1907  
*Flags Act* 1953-1954  
*High Commissioner (United Kingdom) Act* 1909-1966  
*Ministers of State Act* 1952-1967  
*National Library Act* 1960-1966  
*Officers' Rights Declaration Act* 1928-1959  
*Parliamentary Allowances Act* 1952-1966  
*Parliamentary Presiding Officers Act* 1965  
*Public Accounts Committee Act* 1951-1966  
*Public Service Act* 1922-1967  
*Public Works Committee Act* 1913-1966  
*Royal Commissions Act* 1902-1966  
*Royal Powers Act* 1953  
*Royal Style and Titles Act* 1953  
Special Annuity Acts

## CHAPTER 4

### DEFENCE

#### Department of Defence

##### Functions of Department of Defence

The functions of the Department of Defence include: defence policy; joint Service matters and matters having an inter-departmental defence aspect; the financial requirements of defence policy and the allocation of the funds made available; the supply aspect of defence policy including the review of production programmes and capacity; important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organisation and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

##### Organisation, higher defence machinery and the control of the joint Service machinery

The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee, and the Joint War Production Committee.

The *Defence Committee* is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on: the defence policy as a whole and the co-ordination of military, strategic, economic, financial, and external affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The *Chiefs of Staff Committee* meets regularly for the discussion of technical military matters on a joint service basis, and is responsible in peace for the preparation of military appreciations and plans. The functions of the *Defence Administration Committee* are the regular review of the progress of the Defence Programme, the co-ordination or integration of Service activities where appropriate in the interests of improved efficiency and economy, and the improvement of methods and organisation. The function of the *Joint War Production Committee* is, briefly, to examine the Services' requirements for war *matériel* and to recommend whether industrial capacity is adequate to meet them. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee are the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee, and the Joint Administrative Planning Committee.

In addition, the *Defence Business Board* furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

##### Basis of current defence policy

The primary aim of Australia's defence policy is to ensure the security of the Australian mainland and island Territories and to protect Australian national interests. Serious communist aggression and subversion continues to occur in south-east Asia, which is Australia's area of primary strategic interest. In these circumstances greater assurance of the preservation of our own security is gained from Australia's participation with allies in SEATO, ANZUS and British Commonwealth defence arrangements. This assurance is strengthened by the demonstration of Australian support for allied policies in areas of national interest and of our willingness and capability to take effective military action in defence of south-east Asia commensurate with our national interests and resources as well as our own defence. Australian forces must have adequate capacity, mobility and flexibility for a fast and effective response to meet a wide range of situations.

### The defence programme

The defence programme must be maintained at a level that will enable Australia to meet its regional and home defence responsibilities. These aims are pursued through a series of defence programmes which are designed to give progressive effect to the objectives of policy approved by the Government and are capable of adjustment in the light of strategic developments and changes in the international situation. To achieve this, emphasis is placed on progressively increasing our military capability and preparedness through the availability of highly trained regular forces, backed by appropriate reserve and citizen forces. The forces are being extensively re-equipped with modern conventional weapons, standard or compatible, as far as possible, with those used by United States forces, with whom Australia is associated in defence arrangements.

*Navy.* The naval programme provides for the continuing modernisation and development of the Royal Australian Navy into a well-balanced fleet with emphasis on anti-submarine capabilities. Details of ships in commission and in reserve and of the current ship-building programme are shown on pages 80-1. In addition a wide range of naval projects is being provided. These include support facilities for the Charles F. Adams destroyers, a missile firing range, development of a submarine base and of construction and support facilities, replacement of harbour support craft and fleet boats, modernisation of Wessex helicopters, development of Manus Island base, and provision of training equipments. The Navy personnel requirement by June 1967 is 16,130. The Navy Emergency Reserve has been raised with a planned strength of 2,000 and enlistment is proceeding.

*Army.* The strength of the Regular Army is to be increased to 41,000 by 30 June 1967. This strength will be achieved by voluntary recruiting supplemented by national servicemen called up under the selective national service scheme. Under this scheme all young men are required to register for service in their twentieth year. Selection is by ballot based on birthdays and each year 8,400 are called up to render two years full-time service in the Army, followed by three years service in the Reserve. As an alternative to national service, enlistment for, and completion of, six years part-time service in the Citizen Military Forces is acceptable. Members of the C.M.F. who have served for more than twelve months at the time of registration for national service, and who are balloted in for service, are granted deferment on application, subject to the completion of a total of five years satisfactory service in the C.M.F. Aliens who have resided in Australia for more than two years and who intend to reside permanently in Australia are liable to render service under the national service scheme, although if balloted in and selected, they will not be called up until they have turned twenty-one years of age. National servicemen are liable for service overseas. A volunteer Regular Army Emergency Reserve with a target strength of about 4,000 ex-regulars is being formed and can be called out when the Governor-General considers it desirable to do so.

The reorganisation of the field force on a new tropical warfare organisation has proceeded. Eight regular battalions of the Royal Australian Regiment have now been raised and other elements of the field force have been reorganised and raised within the planned limits of available manpower. The new organisation provides a substantial increase in the combat element and high priority logistic units and has been adapted to provide more infantry battalions in a division. This gives greater flexibility to meet requirements for cold and limited war situations. The new divisional reorganisation will also further improve the Army's air ability and ensure maximum value for the increased availability of air transport support.

The Australian Support Area, which provides the command, administrative, training and maintenance organisation for the Army as a whole, has also been expanded to absorb the effects of the introduction of national service, the general expansion of the Army and the deployment of additional forces overseas.

The approved ceiling strength of the Citizen Military Forces is 35,000 by 30 June 1967. Substantial changes have been made in the C.M.F. organisation to create additional battalions (of which twenty are now raised) and the reorganisation of additional C.M.F. elements is in hand. Special arrangements are also being made to provide an opportunity for service by persons whose place of residence or type of occupation precludes them from undertaking normal C.M.F. service. The Pacific Islands Regiment is being increased to three battalions with a total strength of some 3,600 by June 1968.

About \$150 million will be spent from 1965 to 1968 in buying additional equipment similar to that already in service or on order throughout the whole range of modern conventional weapons, ammunition, vehicles, light aircraft, engineering and signal stores, etc., and new equipment which the Army is investigating such as low level anti-aircraft weapons, air portable armoured fighting vehicles, new artillery weapons, combat surveillance equipment, and various other items.

In addition to the large works programme for the Pacific Islands Regiment in Papua and New Guinea costing about \$37 million a greatly increased Army works programme is being undertaken in Australia to provide the accommodation, training and support requirements for the increase in Army strength to 41,000.

**Air Force.** The operational units of the Royal Australian Air Force comprise three bomber squadrons, five fighter squadrons, two maritime reconnaissance squadrons, four transport squadrons, one surface-to-air missile squadron, two utility helicopter squadrons, and two control and reporting radar units. The fighter squadrons are being re-equipped with the supersonic Mirage 111-O jet fighter, of which 100 have been ordered. Deliveries from combined Australian-French production have been coming forward since early 1964 at the scheduled rate. Twenty-four F111C strike reconnaissance aircraft have been ordered from the United States of America to replace the Canberra bombers, and deliveries are scheduled to commence in 1968. Twenty-five Caribou short take-off and landing transport aircraft have been delivered. Twelve C130E Hercules aircraft have been ordered from the United States for an additional medium range transport squadron and six had been delivered by the end of November 1966. Ten Orion P3B aircraft have been ordered to replace the squadron of P2E Neptune maritime reconnaissance aircraft. Seventy-five Macchi all-through jet trainers have been ordered. The initial batch of the aircraft are to be imported from Italy and the balance assembled in Australia. A further order for thirty-three aircraft is to be placed in later years. Ten dual Mirage training aircraft have been ordered, and eight HS748 aircraft are being obtained from the United Kingdom for navigational and radio training purposes. Seven new V.I.P. aircraft have been ordered, comprising two HS748 and two BAC 111 aircraft from the United Kingdom and three Mystere 20 aircraft from France. Contracts have been arranged for the supply of two new control and reporting units from the United Kingdom. The modernisation of a third unit is in the planning stages. The network of modern operational airfields is being further improved, including major works for the F111C at Amberley, and a second airfield in the Northern Territory at Tindal is nearing completion, while a satellite aerodrome and other facilities at Pearce, Western Australia, are being provided for operation of the Macchi aircraft. The old wartime airfield at Nadzab in Papua-New Guinea has been rehabilitated and the airfield at Daru and other smaller airstrips located between Daru and Boram have been up-graded or constructed. The airfield at Cocos Island has been improved. In addition, considerable modern accommodation for personnel is being built at a number of bases. The number of personnel required for the operation of the R.A.A.F. by June 1967 is 20,150. In addition, the Air Force Emergency Force with a planned strength of 1,300 has been raised, and enlistment is proceeding.

**Research and development.** In this field Australia is making its principal contribution through the Long Range Weapons Project which is a joint effort with the United Kingdom. Australia also participates in the European Launcher Development Organization and is associated with the United States in many space and defence projects. The Australian executive authority in these matters is the Department of Supply.

#### Defence expenditure

Details of defence expenditure for 1965-66 and the allocation of the defence vote for 1966-67 are set out in the following table.

#### DEFENCE EXPENDITURE, 1965-66 AND DEFENCE VOTE, 1966-67 (\$'000)

Service or department	Main-tenance, aid programmes, etc.	Capital material requirements, machinery, plant and equipment	Capital buildings, works and acquisition of sites	Total expenditure
-----------------------	------------------------------------	---------------------------------------------------------------	---------------------------------------------------	-------------------

#### DEFENCE EXPENDITURE, 1965-66

Defence . . .	6,921	1,890	197	9,008
Navy . . .	102,775	59,843	8,004	170,622
Army . . .	181,346	37,526	42,880	261,752

Other . . .	22,245	329	83	22,657
<b>Total . . .</b>	<b>578,781</b>	<b>214,753</b>	<b>92,688</b>	<b>886,222</b>

**Logistic arrangement with United States Government**

A logistic arrangement has been agreed with the United States Government in respect of Australian equipment purchases during the programme period up to 30 June 1968. This arrangement is in effect a 'package deal' covering all the items required instead of negotiating each separate purchase as it arises, and by this method Australia has obtained more advantageous financial terms together with assurances of better delivery dates to meet our requirements. Under this arrangement, instead of paying for the equipment roughly in line with deliveries, the Government is enabled to spread payments over an extended period. Deferment of payments to later years will cause a reduction in the currently approved programme of defence expenditure in 1966-67.

**Personnel strengths**

The personnel strengths of the Services at 30 November 1966 are shown in the following table.

**PERSONNEL STRENGTHS: SERVICES, 30 NOVEMBER 1966**

Category	Navy	Army	Air Force	Total
Permanent Forces . . .	15,325	(a) 36,806	19,516	71,647
Emergency Reserves . . .	722	763	212	1,697
Citizen Forces . . .	3,797	32,926	1,025	37,748
<b>Total Forces . . .</b>	<b>19,844</b>	<b>70,495</b>	<b>20,753</b>	<b>111,092</b>

(a) Excludes 1,821 Pacific Islanders.

**Changes in defence legislation**

Under amendments made to defence legislation in 1964\* the Citizen and Reserve Forces may be called out by proclamation for continuous full-time service in a 'Time of Defence Emergency'. The particular circumstances giving rise to the proclamation of a time of defence emergency could be varied, but would occur in a situation where the Regular Forces needed the full-time support of the Citizen and Reserve Forces in hostilities short of general war.

The legislation also provided for the establishment of volunteer Emergency Reserves for the three Services. These Reserves provide a ready means of supplementing and reinforcing operational units and may be called out for continuous full-time service when the Governor-General considers it desirable to do so.

\* *Air Force Act 1964, Defence Act 1964, National Service Act 1964, and Naval Defence Act 1964.*

Provision was made in new defence legislation enacted in 1965 for the inclusion in the Permanent Military Forces of national servicemen who are obliged under the National Service Act as amended in 1964 and 1965 to render two years continuous full-time service in the Regular Army Supplement and three years part-time service in the Regular Army Reserve. The amendment also provided for extension of the liability to render continuous full-time service in time of defence emergency and in time of war. National Servicemen in common with all members of the Defence Force may be required to serve either within or beyond the territorial limits of Australia.

The amending legislation repealed the former provisions of the Defence Act under which persons called up for compulsory service in the Citizen Military Forces in time of war were not required to serve beyond the territorial limits of Australia unless they volunteered to do so. Liability for overseas service became mandatory for all persons called up for service in the Defence Force in time of war. The war-time powers of call-up for compulsory service were extended to apply to service in the Navy and Air Force as well as in the Army. New provisions dealing with registration, allotment and exemption from compulsory service in time of war were also enacted.

#### **Australian forces serving overseas**

Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve since it was first established in Malaya in 1955, and has continued to station forces in the Reserve following the formation of Malaysia and the independence of Singapore. During the period of Indonesian confrontation, Australian ships, aircraft and ground forces additional to the normal Strategic Reserve forces were deployed to assist in the defence of Malaysia's territorial and political independence. Of the Australian forces serving with the Reserve during this period, two Australian battalions, two Special Air Services squadrons, engineer squadrons, and a number of R.A.N. ships participated in Borneo operations; R.A.A.F. Sabre aircraft were also deployed there for a brief period. As a result of the cessation of confrontation several changes to Australian forces serving with the Strategic Reserve were announced during 1966. Of the elements which had been temporarily attached to the Reserve, four R.A.A.F. Iroquois helicopters were withdrawn in May, two R.A.N. minesweepers were withdrawn in November, and an Army engineer squadron was withdrawn in December. It was announced in December 1966 that a squadron of R.A.A.F. Canberra aircraft was to be withdrawn from the normal Australian contribution and deployed to Vietnam, and that in mid-1967 a squadron of Sabre fighter aircraft would be replaced by a squadron of the new R.A.A.F. Mirage aircraft. The strength of the Australian component serving with the Strategic Reserve will be as follows:

Navy—two destroyers or frigates, two minesweepers, with an annual visit by an aircraft carrier;

Army—one infantry battalion group, one L.A.A. battery;

Air Force—two fighter squadrons and supporting units.

In pursuance of our obligations under the SEATO Treaty, at the invitation of the Government of Thailand, a squadron of R.A.A.F. Sabre fighter aircraft is deployed in Thailand as an integral part of the air defence system of that country.

In response to an invitation of the Government of South Vietnam a team of Australian Army advisers has been provided since 1962 to assist in training Vietnamese in jungle warfare, village defence and related activities. A detachment of six Caribou transport aircraft, together with the R.A.A.F. personnel required to fly and maintain them, was provided in 1964. In April 1965 the Australian Government also agreed to a request from the South Vietnamese Government to deploy an Australian battalion and supporting elements for combat service. A further 350 support troops were contributed in August 1965 to bring the Army combat force up to a battalion group.

In March 1966 the Government announced its decision to treble the Australian contribution with the establishment of the Australian Force Vietnam of some 4,500 men. The force contains, in addition to its headquarters, two infantry battalions, a special air services squadron, substantial combat support elements, a squadron of R.A.A.F. Caribou aircraft, and a squadron of R.A.A.F. Iroquois helicopters grouped as a Task Force; a logistic support group; and the 100-man Australian Army Training Team Vietnam. It was further announced in December 1966 that the Australian Force Vietnam would be increased in early 1967 by one third to a new level of about 6,300. The ground force units of the Task Force would be expanded by 900 men, and the new R.A.N. guided missile destroyer, H.M.A.S. *Hobart*, a R.A.N. clearance diving team, and a squadron of eight R.A.A.F. Canberra bombers would be deployed to South Vietnam.

#### **Defence support aid**

In support of Australia's strategic policy of contributing to the common defence of South-east Asia the Government provides substantial financial aid to our Asian allies in the form both of direct defence assistance to support the armed forces of these countries and to increase their defence capability and of civil aid and technical assistance.

Under this programme assistance to the extent of \$2,000,000 will be provided for South Vietnam, Thailand, Pakistan, and the Philippines during 1966-67. This will include material assistance, the training of service and civilian personnel both in their home countries and in Australia and, in the case of South Vietnam, special aid in the form of the provision of surgical teams to staff surgical blocks at the Long Xuyen, Bien Hoa and Vung Tau hospitals, an engineering team to carry out a water supply project at Bien Hoa, the printing of school text books, and civic action by the Australian Force Vietnam.

Malaysia is also being further assisted to strengthen its defence capability by the extension of the \$6 million aid programme commenced in 1965. The Australian Government announced the provision of some \$19 million for Malaysia and Singapore up to 31 December 1967. The aid to Malaysia includes ammunition, military vehicles, weapons, small craft, engineer equipment, and general stores. Malaysian servicemen will continue to be trained in Australia and the seconding of Australian servicemen to the Malaysian armed forces will also be continued. The Australian Government is providing defence aid, totalling \$1,319,000, to Singapore in response to specific requests by Singapore. The aid consists of electronic radio and electro-mechanical range AustFire targets, lightweight sleeping equipment, and a large quantity of 2½ ton four-wheel-drive trucks. Army training courses will also be provided in Australia for Singapore army personnel.

### Naval defence

Prior to 1901, naval defence systems were organised under the State Governments. Information regarding these systems is given in Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Year Books No. 3, page 1060, and No. 12, page 1012. An account appears in Year Book No. 15, pages 921-3, of the building of the Australian Navy, its costs, the compact with the Imperial Government, and other details. The growth and the activities of the Royal Australian Navy during the 1939-45 War are shown in Year Book No. 36, pages 1023-7.

Under the provisions of the Commonwealth of Australia Constitution Act the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act 1910-1966* the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members and the Secretary to the Department of the Navy.

Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers. A liaison staff is also maintained by the Royal Australian Navy in Washington, and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

### Ships of the Royal Australian Navy

*In commission, March 1967: Melbourne*—aircraft carrier; *Sydney*—fast troop transport; *Supply*—fast fleet replenishment tanker; *Vampire*, *Vendetta*, *Duchess*, and *Anzac*—destroyers; *Perth* and *Hobart*—guided missile destroyers; *Stuart*, *Parramatta*, *Derwent*, and *Yarra*—escort ships; *Queenborough*—training ship; *Diamantina*—training and oceanographic ship; *Hawk*, *Gull*, *Ibis*, and *Teal*—minesweepers; *Kimbla*—trials ship and boom defence vessel; *Moresby* and *Paluma*—survey vessels; *Oxley*—submarine.

*In reserve, March 1967: Tobruk*—destroyer; *Quickmatch* and *Quiberon*—escort ships; *Gascoyne*—oceanographic ship; *Barcoo*—hydrographic vessel; *Koala*—boom working vessel; *Sprightly*—fleet tug; *Culgoa*—accommodation ship; *Castlemaine*—training vessel; *Curlew* and *Snipe*—minesweepers; *Bass* and *Banks*—general purpose vessels.

*On service overseas.* During the year ended March 1967 the following ships served in south-east Asian waters as units of the Commonwealth Strategic Reserve with Headquarters in Singapore: *Melbourne*, *Supply*, *Vampire*, *Diamantina*, *Duchess*, *Parramatta*, *Derwent*, *Stuart*, *Yarra*, *Hawk*, *Gull*, *Curlew*, and *Snipe*. H.M.A. Ship *Sydney* also made a visit overseas.

### Fleet Air Arm

The Fleet Air Arm of the Royal Australian Navy is maintaining two front line squadrons embarked in the operational carrier H.M.A.S. *Melbourne*. These squadrons currently consist of Sea Venom jet all-weather fighters, Gannet turbo-prop anti-submarine aircraft and Wessex anti-submarine helicopters. Three training and support squadrons are based at the Naval Air Station

H.M.A.S. *Albatross* at Nowra, New South Wales. During 1967 the Fleet Air Arm will undergo a change with the introduction of the Grumman Tracker and the Douglas Skyhawk as replacements for the Gannet and the Sea Venom. The Wessex is also being modernised by the addition of new and updated equipments. Other aircraft operated by the Navy are the Scout helicopter (survey ships), Iroquois helicopter (Reserve and training), Dakota, and Vampire jet.

#### Ship construction and repairs

There are two naval dockyards, at Garden Island, New South Wales, and at Williamstown, Victoria. Also, the dockyard at Cockatoo Island, which is operated by the Cockatoo Docks and Engineering Company Pty. Ltd. by agreement with the Commonwealth, carries out considerable naval work. All three dockyards carry out ship refitting for the Navy.

Included in the present ship construction plan is the building of two destroyer escorts, one each at Cockatoo Island and Williamstown Dockyards, and a 15,000 ton escort maintenance ship at Cockatoo Island. Four submarines of the Oberon class are under construction in the United Kingdom. In the United States a guided missile destroyer is being built for the Royal Australian Navy at the DeFoe Ship Building Yard. Twenty 100-foot patrol vessels are being built by Evans Deakin and Co. Pty. Ltd., Brisbane, Queensland, and Walkers Ltd., Maryborough, Queensland (ten by each contractor). The escort maintenance ship is expected to be completed in 1967. H.M.A.S. *Melbourne* is to undergo an extended refit in 1967. The Daring class destroyers *Vendetta* and *Vampire* are to be modernised, commencing in 1968. The anti-submarine guided weapon Ikara, which has been designed and developed in Australia, is to be fitted into the guided missile destroyers and escorts.

#### Personnel, entry, training, women's services, reserves

*Personnel.* The authorised established strength of the Royal Australian Navy for 1966-67 is 16,900. At 30 November 1966 the actual strength of the Permanent Naval Forces was 1,643 officers and 13,682 sailors, while there were 3,797 in the Citizen Naval Forces.

*Naval college.* The Royal Australian Naval College, H.M.A.S. *Creswell*, is at Jervis Bay. The College was established to provide trained officers for the R.A.N. Junior entry to the College is at the age of fifteen to seventeen years, and senior entry at a maximum age of nineteen and a half years. Subsequent training as midshipmen and sub-lieutenants is in ships of the fleet, at universities or technical colleges, and at Royal Navy training establishments in the United Kingdom. In November 1966 there were 85 cadet midshipmen under training.

*Direct entry into Navy.* To meet increasing requirements for officers direct entries are accepted into the Royal Australian Navy. Short service commissions of seven years are granted on completion of training as seamen, supply and secretariat or aircrew officers to suitable applicants who have completed their secondary schooling and who are over seventeen years of age and under twenty-three years of age for seamen and supply and secretariat applicants, and under twenty-four years for aircrew applicants. Other direct entries may be approved outside these age limits from persons with appropriate qualifications and experience.

Opportunities exist for university undergraduates studying medicine, dentistry or engineering to enter the R.A.N. and on successful completion of their studies to commence full-time service in the Navy. Fully qualified doctors, dentists, mechanical or electrical engineers, and instructors may also enter the R.A.N. directly if they are of the appropriate age.

*Training establishments.* H.M.A.S. *Cerberus* at Westernport, Victoria, is the main training establishment for adult sailors in the permanent naval forces, while several advanced training schools are established in New South Wales. The period of initial engagement for sailors varies from six years for tradesmen entry to nine or twelve years, and on completion sailors may re-engage for shorter periods up to the age of fifty.

H.M.A.S. *Nirimba* at Quakers Hill, New South Wales, is the naval school for apprentices. It provides secondary education, as well as technical training in trades, to boys aged fifteen to seventeen years. The school was established in 1956 to meet the R.A.N.'s increasing demand for highly skilled tradesmen. In November 1966 there were 667 naval artificer apprentices under training. H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruit training establishment. Entrants must be aged between fifteen and a half and sixteen and a half years. Training lasts one year and instruction is mainly academic, the remaining time being devoted to basic naval and disciplinary training. On completion of the course sailors are posted for a period of sea training, after which they proceed to technical and specialist courses. In November 1966 there were 599 junior recruits undergoing training.

*Women's Services.* The present Women's Royal Australian Naval Service was inaugurated in January 1951. The numbers serving in shore establishments in November 1966 were 22 officers and 611 Wrans. The Royal Australian Naval Nursing Service was reconstituted in November 1964, and its strength in November 1966 was 20 officers.

*Emergency Reserve.* In November 1964 approval was given to form the Royal Australian Naval Emergency Reserve to provide a readily available source of trained manpower which may be called on for continuous full-time service. The authorised establishment of this force is 2,000 officers and sailors. Members are required to complete thirteen days training annually and are paid an annual bounty.

*Citizen Naval Forces.* The Citizen Naval Forces consist of the Royal Australian Naval Reserve, Royal Australian Naval Reserve (Seagoing), R.A.N. Emergency List, Royal Australian Fleet Reserve, and Royal Australian Naval Volunteer Reserve. Members of the R.A.N.R. are the training reserve of the Citizen Naval Forces. They do weekly training and thirteen days annual continuous training. Officers are commissioned and may serve until retiring age is reached. Sailors engage for periods of three years. Other reserves do not carry out part-time training, but members may volunteer for periods of annual continuous training. Special courses and service for long periods are available to selected reservists.

### Military defence

A detailed historical account of the Australian defence forces prior to federation appears in Year Book No. 2, pages 1075–80. *See also* Year Book No. 12, page 999.

### Commonwealth systems

Under the terms of the Commonwealth of Australia Constitution Act the Commonwealth took over control of defence matters in March 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organisation of Commands after the 1939–45 War *see* Year Book No. 46 and earlier issues.

National Service Training was introduced in 1951 and suspended in 1959–60. In November 1964 the Government announced that National Service Training was to be re-introduced as from June 1965. The scheme provides for a period of two years full-time duty in the Regular Army followed by three years in the reserve. National Service registrants who are members of the Citizen Military Forces or who join prior to the ballot may elect to serve in the C.M.F. for a total of five or six years, depending on length of previous service, as an alternative to full-time continuous National Service Training. Special C.M.F. units have been formed to provide for those persons who wish to serve in the C.M.F., but who are unable to do so in normal units, because of remote location, etc.

### Organisation

Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939–45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the capital cities of Australia and Papua-New Guinea. The geographic extent of Commands is as follows.

*Northern Command*—the State of Queensland.

*Eastern Command*—the State of New South Wales, less those parts included in Southern and Central Commands.

*Southern Command*—the State of Victoria and part of southern New South Wales.

*Central Command*—the State of South Australia, plus a portion of south-western New South Wales.

*Western Command*—the State of Western Australia.

*Tasmania Command*—the State of Tasmania.

*Northern Territory Command*—the Northern Territory.

*Papua-New Guinea Command*—the Territory of Papua-New Guinea.

The Army is divided into the Field Force, Forces in Papua-New Guinea and the Australian Support Area, with both Regular and Citizen Military Forces elements in each. The basic formation of the Field Force is the division, which consists of nine infantry battalions with supporting arms and services units. Within the division three task force headquarters can command varying combinations of divisional units. The substantial parts of the combat elements of one Regular and two C.M.F. divisions have been raised, together with logistic support units. The Regular element of the Forces in Papua-New Guinea consists of two battalions of the

Pacific Islands Regiment with a number of supporting units. It is intended to raise a third battalion of the Pacific Islands Regiment. An infantry battalion forms the major C.M.F. element. The Australian Support Area provides the training, administrative and command structure on the mainland.

As at 30 November 1966, units of the Regular Force were deployed overseas as follows. In Malaysia a battalion group was serving as part of the British Commonwealth Far East Strategic Reserve, while an anti-aircraft battery was serving at the invitation of the Malaysian Government. In Vietnam a Task Force of two battalions with supporting units, including aircraft support provided by the Royal Australian Air Force, was serving at the invitation of the Government of that country.

#### **Personnel, training, women's services, cadets**

*Personnel.* The effective strength at 30 November 1966 was: Australian Regular Army (including 1,821 Pacific Islanders and 879 Women's Services), 38,627; Citizen Military Forces, 32,926.

*Staff College.* Until 1938 the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938 an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945 the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946 the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. The course is held annually and is of twelve months duration. The normal intake is sixty-six students, and on successfully completing the course an officer is awarded the symbol 'psc'. The course is designed to train selected officers for appointments in all branches of the staff in peace and war and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1967 course will be students from the United Kingdom, Canada, New Zealand, India, United States of America, Thailand, Malaysia, the Philippines, Ghana, and Pakistan. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is also provided by New Zealand.

*Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The length of the normal course is four years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organised into military and civil departments, and instruction is given by officers of the Army and academic staff. On graduation cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces. In 1967 one Thai cadet commenced training at the College.

*Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces and civilians between the ages of eighteen and a half and twenty-two and a half years are eligible to apply for entrance. A special entry provides for candidates up to twenty-four and a half years. The course lasts for forty-four weeks, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted before being posted to regimental duties. The Officer Cadet School also trains officers on occasions for Malaysia, New Zealand, Thailand, the Philippines, and Brunei.

*Officer Training Unit.* An Officer Training Unit has been established at Scheyville, New South Wales, which is responsible for the training of National Service officers.

*Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training

wing. The officer cadets are selected from eligible applicants, who may be serving members between nineteen and a half and thirty-two years of age, or civilians between twenty-one and thirty years of age. The course is of six months' duration and on graduation cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

*Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of fifteen and seventeen years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year boys are given their Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training the Apprentices' School provides general educational facilities up to the School Leaving Standard.

*Other schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Army and the Citizen Military Forces.

The following Army Schools have been established: Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Centre, School of Military Survey, School of Signals, Infantry Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps Centre, Royal Australian Electrical and Mechanical Engineers' Training Centre, School of Music, Air Support Unit (Army Component), and Air Movement Training and Development Unit (Army Component).

*Women's Services.* In July 1950 approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment commenced into the Royal Australian Army Nursing Service in November 1950 and into the Australian Women's Army Corps early in 1951. In February 1951 the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June 1951 the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command and Papua-New Guinea Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command and Papua-New Guinea Command.

*Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organisation. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, however, does not form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of fourteen years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorised establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units. The establishment of the Corps is 43,700 all ranks, and at 30 September 1966 comprised 345 School Cadet units with a posted strength of 41,128, all ranks.

### Air defence

A statement regarding the preliminary steps taken in connection with the development of air defence appears in Year Book No. 18, page 610, and one on the expansion and development and type of operations of the Royal Australian Air Force during the 1939-45 War in Year Book No. 36, page 1027. Details of the current defence expansion as it affects the R.A.A.F. were outlined by the Prime Minister in his speech in the House of Representatives on 8 November 1965.

### Higher organisation

The Air Board is responsible to the Minister for Air for the control, organisation and administration of the Royal Australian Air Force and is constituted as follows: Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Equipment, Air Member for Technical Services, and the Secretary, Department of Air.

The Air Board exercises command and control over R.A.A.F. units in Australia through two commands, Operational Command and Support Command. The guiding principles of the command organisation within Australia are to decentralise day-to-day operating activities as far as possible and to streamline the force and make it as efficient as possible. The operational units overseas, working within the broad directives issued by the Air Board, comprise the R.A.A.F. component of the British Commonwealth Strategic Reserve located at Butterworth in Malaysia, a unit in Thailand and the R.A.A.F. component of the Australian task force in South Vietnam.

The members of the Air Board and their staffs are located at the Department of Air in Canberra. An R.A.A.F. representative is located in London and air attachés are located in Djakarta, Saigon, Paris, and Washington. *Operational Command* is responsible for the command of operational units and the conduct of their operations within Australia and its territories. *Support Command* is responsible for the recruitment and training of personnel, and the supply and maintenance of service equipment.

### Organisation of units

**Bases.** Each command is established with the units necessary to carry out its allotted function. There is no fixed rule in relation to the number and types of units within each command as this depends upon the nature of its present and future responsibilities. Where possible, units having similar functions or requiring similar facilities are located together and the geographical locations are known as bases. While in general only units belonging to one command will be located on a particular base, it is sometimes necessary to locate units of both commands at one base.

**Formations**—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

**Flying squadrons**—bomber, fighter, transport, helicopter, and maritime reconnaissance squadrons which undertake the operational flying and, in conjunction with operational conversion units, the operational flying training commitments of the R.A.A.F.

**Operational conversion units**—specialising in operational conversion training of aircrew for the bomber and fighter squadrons.

**Aircraft depots**—specialising in major overhaul, etc., of aircraft and equipment and relieving flying units of these commitments.

**Stores depots**—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

**Flying, ground training, navigation, and radio training units**—schools specialising in the aircrew and ground staff training required by the R.A.A.F.

**Airfield construction squadron**—specialising in the construction of R.A.A.F. aerodromes and associated buildings and works services.

**Royal Australian Air Force Academy**—the training college for officer cadet entrants to the R.A.A.F.

**Telecommunications units**—responsible for the communications services of the R.A.A.F.

**R.A.A.F. Staff College**—trains specially selected R.A.A.F. officers for higher staff and command posts.

### Aircraft

The R.A.A.F.'s strike force of Canberra aircraft will be replaced in 1968 by the F111C, and by this stage the Avon-Sabre fighter squadrons will have completed conversion to the Mirage 111-O aircraft. Transport aircraft currently flown are Caribou, Dakota, Hercules, Metropolitan, and Viscount, with BAC 111, Mystere 20 and HS 748 on order. Both maritime reconnaissance squadrons operate Neptune aircraft at present, but the older aircraft are to be phased out of service with the introduction of the Orion in the near future. Two helicopter squadrons operate the Iroquois. Aircraft used for training are the Winjeel, Vampire, Dakota, Sabre, Canberra, and Mirage. Macchi and HS748 training aircraft are on order.

### Personnel, reserve, women's services

At 1 December 1966 the authorised Permanent Air Force establishment was 20,978, and the Citizen Air Force, 1,081; the enlisted strength was Permanent Air Force 19,516 and Citizen Air Force 1,025; while the strength of the General Reserve was 6,889. The preceding Permanent Air Force figures include the Women's Royal Australian Air Force, which has an establishment of 1,028 and strength of 883, and the R.A.A.F. Nursing Service with an establishment of 91 and strength of 87.

### Department of Supply

For information relating to the creation of the Department of Supply and its development up to 1959 see Year Book No. 51, page 1204, and earlier issues. On 18 December 1959 the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration. On 29 March 1962 Australia became a foundation member of the European Launcher Development Organization, and the Department accepted responsibility for the test firing of the launching rocket for that Organization's experimental satellite, using the facilities of the Woomera Rocket Range.

### Functions of Department

The functions of the Department of Supply include the following.

Defence research and development, including the operation of the Joint United Kingdom—Australia Weapons Research Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories, and associated establishments.

Manufacture, acquisition, provision, and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware, and other defence goods.

Operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration.

Test firing of the launching rocket for the European Launcher Development Organization's experimental satellite, using the facilities of the Woomera Rocket Range.

Acquisition, maintenance and disposal of strategic materials.

Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.

Investigation and development of Australian sources of supply in connection with defence.

Sale or disposal of surplus Commonwealth property other than land or buildings.

Provision of Commonwealth transport facilities outside the Australian Capital Territory and the Northern Territory.

Provision and control of stores required for or in connection with matters administered by the Department of Supply and general storage for other Departments as required.

Provision of security services within the Department.

Arrangements for ascertaining costs and the control and limitation of profits in connection with the production of munitions and other defence goods.

The Minister for Supply administers the *Supply and Development Act* 1939–1966, except in so far as it concerns the building (see also the chapter Transport and Communication), repair and maintenance of merchant ships and the building, extension, alteration, repair, and maintenance of shipyards, drydocking, and repair facilities for merchant ships.

### Research and Development Division

The Research and Development Division, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom—Australia Weapons Research Project. The Chief Scientist is also the Chairman of the Joint Project Board, which is responsible for the administration of the Joint Project undertaking. The headquarters of the Division is situated in Melbourne, and the following establishments are included in the Division: (a) Weapons Research Establishment, Salisbury, South Australia; (b) Defence Standards Laboratories, Maribyrnong, Victoria; Finsbury, South Australia; and Alexandria, New South Wales; (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

### **Weapons Research Establishment, Salisbury, South Australia**

This establishment, which occupies an area of about six square miles, includes Edinburgh Airfield, where accommodation is provided for a unit of the R.A.A.F. which carries out the experimental and other flying required. Extensive facilities have been provided for branches of British firms which have contracted with the British Ministry of Aviation to develop weapons systems or components.

The Establishment has four main sections, namely the Trials Wing, the Space Physics Wing, the Weapons Research and Development Wing, and the Engineering Wing. The Trials Wing is concerned with the operation, development and instrumentation of the Woomera Range, also the planning, execution and assessment of trials. The Space Physics Wing undertakes the operation of United States satellite and space tracking stations throughout Australia and conducts research and development in support of the Range, including investigations into the characteristics of the upper atmosphere using sounding rockets. The Weapons Research and Development Wing is concerned primarily with Australian-initiated defence research, but assistance is also given with some phases of the Joint Project programme. The Engineering Wing provides the design and manufacturing effort required to support the work of the Establishment and the Range.

Testing ranges have been established at Woomera, which is approximately 280 miles north-west of Adelaide. A township, together with modern amenities such as hospital, school, kindergarten, community store, swimming pool, and all sporting facilities, has been built at Woomera to accommodate the staff and their families. The population is approximately 5,300.

### **European Launcher Development Organization (ELDO)**

By virtue of the major facilities at Woomera for launching space vehicles and the associated technical skills, Australia has become a member of ELDO, which has been established with the object of developing a launching vehicle for placing satellites in orbit for peaceful purposes. Other members of ELDO are Britain, Belgium, the Federal Republic of Germany, France, Italy, and the Netherlands. Test firings of the ELDO rocket will continue at Woomera until 1969.

### **United States space projects**

Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia of space vehicle tracking stations. The agencies for the Australian and American Governments are the Department of Supply and the National Aeronautics and Space Administration (NASA) respectively.

As part of the world-wide network supporting NASA's space programme the stations are designed to track spacecraft in their orbits around the earth or on their journey into space, to receive telemetered data from the vehicle, and to issue radio commands controlling the vehicle's manoeuvres. The Department of Supply is responsible for managing, staffing and operating the stations on behalf of NASA. The stations which are now in operation or under construction are at:

- Island Lagoon near Woomera (deep space probes and optical tracking of scientific satellites);
- Carnarvon in Western Australia (manned space flights and scientific satellites);
- Tidbinbilla in the A.C.T. (deep space probes);
- Orroral Valley in the A.C.T. (scientific satellites);
- Honeysuckle Creek in the A.C.T. (manned space flights, particularly the 'man on the moon' Apollo project);
- Cooby Creek near Toowoomba, Queensland (applications technology satellite).

An extensive communications system links the tracking stations with the control centres in the United States.

The orbits or courses of spacecraft determine the area in which tracking stations can be located. Within the area geographical and physical environment and protection from electrical noise determine the optimum location of the station. Being a large land mass in the Southern Hemisphere, diametrically opposite the United States, Australia is ideally situated for support of the United States space programme.

The initial stations near Woomera were managed by the Department of Supply's Weapons Research Establishment and manned by its personnel. With the new tracking stations industry has been brought into closer contact with space activities, contracts having been placed for their operation and maintenance by firms from industry. These contractors are SpaceTrack Pty Ltd (Tidbinbilla), Amalgamated Wireless (A'asia) Ltd (Carnarvon), E.M.I. Electronics (Australia) Pty Ltd (Orroral Valley), Standard Telephones and Cables Pty Ltd (Honeysuckle Creek), and Amalgamated Wireless (A'asia) Ltd (Cooby Creek). These firms are responsible for the operation and maintenance of the stations, subject to on-site directions of the Department of Supply Station Director.

NASA'S space projects requiring Australian participation are as follows.

*Manned space flights*

Project Mercury—initial manned satellites (now completed).

Project Gemini—extended orbits by two-man spacecraft; development of rendezvous techniques for two spacecraft.

Project Apollo—landing of men on moon and their return to earth.

*Scientific and applications satellites*

Smaller single experiment satellites (Explorers, etc.).

Large multiple experiment scientific satellites (Orbiting Geophysical Observatories; Orbiting Astronomical Observatories, etc.).

Applications satellites for communication (Echo), meteorology (Tiros, Nimbus), etc.

Flight testing of technological experiments for application in communications, gravity gradient, meteorology, navigation, radio propagation, etc.

*Deep space probes*

Ranger—hard landing on moon; T.V. pictures of moon's surface.

Surveyor—soft landing of instrumented package on moon including T.V. cameras.

Lunar Orbiter—orbiting of moon, with pictures of the surface.

Mariner—probes to Mars, Venus, etc.

### Defence Standards Laboratories

The broad function of these Laboratories is to provide a scientific service to the Armed Services, civilian defence and the factories, branches and establishments of the Department of Supply. It also provides trained groups in specialist fields for which there is no counterpart elsewhere in Australia. This service covers problems arising in the provision and use of defence *matériel* and is given generally within the fields of chemistry, physics, metallurgy, and engineering and, to a limited extent, in those of bio-chemistry and physiology.

### Aeronautical Research Laboratories

The work of these Laboratories lies in the fields of: (a) aeronautics; (b) guided missiles; and (c) branches of engineering appropriate to the special facilities, resources or experience resulting from (a) and (b). In particular it comprises aerodynamics, including wind tunnel, free flight model and actual flight testing; structures of aircraft and missiles; metals and other materials used in the construction of airframes and engines; engines of the air-breathing type used for the propulsion of aircraft or missiles; human engineering studies relating to the operation of aircraft and guided missiles; research and development related to Australian-initiated guided missiles; and operational assessment studies on devices and techniques employed or proposed for the defence of Australia.

### Production of munitions

The Department is responsible for the production of a wide range of munitions required by the Armed Services. Production is carried out substantially in Government factories, although some orders, mainly for components, are placed with private industry.

The following Government factories are currently in operation: Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St Marys, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne and Brunswick, Victoria.

The Ammunition Factory produces the complete round of small arms ammunition and also components for larger calibre gun ammunition, including empty cartridge cases, electronic and mechanical fuses, and primers. The Explosives Factories produce the various types of explosive compositions and propellants required for gun ammunition, rockets and guided missiles. The Filling Factory at St Marys fills and assembles into complete rounds of ammunition (other than small arms ammunition) the empty components and materials supplied by the other munitions factories and by private industry.

The Ordnance Factories at Maribyrnong and Bendigo are equipped to produce heavy ordnance equipment, such as naval guns and gun mountings; large turbine gears; steel shell bodies; empty rocket motors for guided missiles; trailers and tank transporters; and other items requiring heavy engineering capacity. As well as work for the Services, the Bendigo Factory is producing equipment for projects of national importance, e.g. control equipment for the Snowy Mountains Hydro-electric Authority, components for marine diesel engines for Australian shipping, large heavy engineering items for the coal, cement and steel industries, and coining presses for the Royal Australian Mint.

The Port Melbourne Factory builds large marine diesel engines for the Australian ship-building industry. Major forgings and fabrications for these engines are produced at the Ordnance Factories at Maribyrnong and Bendigo. The Small Arms Factory is equipped to produce the

rifles and other small arms required by the Services. Current production is the 7.62-mm automatic rifle, for which orders have also been received from overseas, and the 9-mm carbine, which replaces the Owen as the infantry light machine gun. The Clothing Factories make uniforms, clothing and canvas goods for the three Services and also for the Postmaster-General's Department and some other Commonwealth authorities.

#### **Production of aircraft and guided weapons**

Production both in Government factories and in industry of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is administered by the Department of Supply. Planning of capacity and the negotiations of contractual arrangements concerning aircraft modification, repair and overhaul, and for the supply of spare parts and airborne equipment for the R.A.A.F., the R.A.N. and the Army are also functions of the Department.

The following factories are operated by the Department: The Government Aircraft Factory at Fishermen's Bend and the Final Assembly Workshops and Test Airfield at Avalon, Victoria and the Airframe Repair Workshops at Parafield and Northfield, South Australia. The current aircraft production programme at the Government Aircraft Factory comprises the French Mirage supersonic fighter for the R.A.A.F. and the Jindivik radio-controlled target aircraft, which has been or is being supplied to Britain, Sweden and the United States, as well as to the Weapons Research Establishment and the Royal Australian Navy. Apart from the Government Aircraft Factory, the Commonwealth Aircraft Corporation Pty Ltd is the only major aircraft manufacturer in Victoria, and this company is currently producing the French Atar turbo-jet engine for the Mirage fighter and also some sections of the airframe. The corporation has also been appointed the prime contractor for the Australian production for the R.A.A.F. of the Italian Macchi jet trainer and for the production of the British Viper engine that will equip this aircraft.

Other major activities carried out in the Government factories or by various private contractors are the manufacture of airframe and engine spare parts; the overhaul, repair and modification of military aircraft and engines currently in service with the R.A.A.F., R.A.N. and Army; and the reconditioning and servicing of aircraft instruments and other ancillary equipment.

The production of the Ikara anti-submarine missile is continuing at the Government Aircraft Factory at Fishermen's Bend. Production of the complete Ikara system, covering broadly the missile, motor, propellants, guidance equipment, launcher, and magazine handling equipment, is a combined effort by departmental establishments and industry directed and co-ordinated by the Department.

The construction of a building to be equipped as a facility to repair and maintain the Tartar surface-to-air missile, supplied by the United States for Australia's new missile destroyers, is well advanced and will be in operation in 1967. Later, the facility will be expanded to cater for other Service missiles.

The Department is responsible for the technical aspects of production and procurement from local industry of telecommunications and electronic equipment for the Australian Forces and for certain other organisations such as Colombo Plan and SEATO. A wide range of these equipments is obtained from industry; some of the more important projects are the complete equipping of several major automatic telegraph relay centres for Army and Air; the local manufacture of ultra high-frequency ground station equipment for communication with high-speed aircraft, automatic direction finders for the Macchi aircraft, remote-controlled target ranges for the Army, electronic guidance equipment for the Ikara system, and the development and production of a transistorised field transceiver for the Army.

Contracts have also been arranged for the local development of a high stability quartz crystal oscillator, and of other high stability electronic components such as various types of fixed and variable resistors, mica and tantalum capacitors and matched crystals.

#### **Contract Board**

Under the *Supply and Development Act* 1939-1966 the Contract Board is the authority responsible for the arranging of contracts for the performance of services and the purchase of supplies for the Naval, Military and Air Forces of the Commonwealth, as well as for the Department of Supply. The Board is also responsible for the sale or disposal of all surplus or unserviceable Commonwealth goods approved for disposal. By arrangement, the Board also arranges purchases on behalf of other Commonwealth departments and authorities which desire to use its facilities.

The Contract Board meets in Melbourne and comprises representatives of the Departments of Supply, Navy, Army, and Air. The Board's administrative organisation is the Contracts and Disposals Branch. In each State other than Victoria there is a District Contract Board with an administrative organisation similar to that of the Contract Board. The table following shows, in respect of the Contract Board organisation, the purchases and realisations from disposals for the years 1964-65 and 1965-66.

**CONTRACT BOARD ORGANISATION: PURCHASES AND REALISATIONS  
FROM DISPOSALS, 1964-65 AND 1965-66  
(\$'000)**

#### Defence supply planning

The central planning authority of the Department is the Planning Branch, whose principal functions are:

- to study manufacturing capacity available for the Services' requirements in peace and war;
- to plan for and to assist in the development of additional production capacity;
- to prepare submissions on defence production preparedness to the Higher Defence Machinery;
- to plan the organisation of industrial resources for defence production in war;
- to provide and administer stocks of relevant materials and reserve pools of plant equipment and other requirements needed for rapid expansion of production in the event of war;
- to prepare advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- to provide advisory services in the field of materials, supply and utilisation to Government factories and contractors engaged in the production of munitions requirements;
- to administer the national stockpile;
- to administer overseas aid programmes allocated to the Department; and
- to undertake commercial sales.

A series of Industry Advisory Committees has been established to advise the Minister and the Department on the ability of industry to meet the Services' *matériel* requirements for mobilisation and war. The Committees are: Aircraft and Guided Weapons; Chemical; Electrical; Electronics and Telecommunications; Heavy Engineering; Light Engineering; Fibres, Textiles, Clothing and Cordage; Leather and Footwear; Machine Tools and Gauges; Materials; Rubber. Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

#### Stores and Transport Branch

This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the central storage authority and the central transport authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Northern Territory. It has agents in Darwin. It also operates a shipping and customs section and the England-Australia bulk air freight scheme for Commonwealth Departments.

On 30 June 1966 the Branch had under its control land, buildings and works, vehicles, plant and equipment valued at \$24,774,796 and 3,192,000 sq ft of storage space as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

#### Finance Branch

The total expenditure on Department of Supply activities during the year 1965-66 was \$146,311,000, comprising \$71,364,000 (net) from Parliamentary appropriations, and \$74,947,000 from Trust Fund Accounts. The latter included expenditure of \$13,976,000 for Stores and Transport and \$56,253,000 in Government Munitions and Aircraft Factories.

## CHAPTER 5

### REPATRIATION

The Repatriation Commission, established under the *Repatriation Act* 1920–1966, consists of three full-time members. It is responsible for the administration of the Repatriation Act and associated legislation, all matters of policy and the general administration and overall supervision of the Repatriation Department. The central office is in Melbourne and there is a branch office, under the control of a Deputy Commissioner, in each State.

The principal functions of the Department are: the payment of war and service pensions to eligible ex-servicemen and ex-servicewomen and their dependants; the provision of medical treatment to ex-servicemen and ex-servicewomen for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances to ex-servicemen and ex-servicewomen who are suffering from injuries and illnesses not caused or aggravated by war service; and the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Benefits are provided in respect of service, not only in the 1914–18 and 1939–45 Wars, but also in the Korea and Malaya operations and with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces.

Other functions of the Repatriation Department are outlined in a later section of this chapter.

For information on war service land settlement see Chapter 20, Public Finance; for statistics relating to war service homes see Chapter 10, Housing and Building and 20, Public Finance.

#### War pensions

The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act* 1914. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act* 1920 (amended from 31 December 1950 to the Repatriation Act). The main features relating to war pensions under repatriation legislation are set out in the following paragraphs.

#### Eligibility for pensions

Claims for eligibility for war pensions are determined in the first instance by Repatriation Boards, of which there is one in each State of the Commonwealth. Members of women's services are eligible for pensions and other benefits, as prescribed in the Act, on the same basis as male members of the forces. Amendments to the Act in 1943 considerably widened the eligibility provisions, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarised as follows.

A member of the forces who served (a) outside Australia, (b) in the Territories of Australia, such as Papua and New Guinea, or (c) within Australia in circumstances which can be regarded as combat against the enemy is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

There is a third ground applicable to all members except those with less than six months camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

If, at any time after discharge, an ex-serviceman who served in a theatre of war becomes incapacitated or dies from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also Service pensions, later.) Medical treatment may also be provided.

*Korea and Malaya operations.* The commencement of hostilities in Korea and Malaya in 1950 made necessary the insertion in the Repatriation Act of a new division, under the terms of which the pension provisions of the Act were extended to Australian ex-servicemen and ex-servicewomen who served or were allotted for duty in prescribed operational areas. A new Regulation was also made, in 1951, to make such service personnel eligible for almost all the benefits available under the existing Regulations applicable to members of the forces.

*Repatriation (Far East Strategic Reserve) Act 1956–1966.* Provision was made under this Act for Australian forces who served in South-east Asia as part of the British Commonwealth Strategic Reserve. This Act, together with Regulations made under it, gave members with Malayan service the right to many benefits available under the Repatriation Act.

*Repatriation (Special Overseas Service) Act 1962–1966.* This legislation provides repatriation benefits for serving members of the defence forces, the circumstances of whose service expose them to risks above the normal conditions of peace-time service. Regulations made under the Act prescribe special areas within which service qualifies for Repatriation benefits. These special areas now include the Malayan Peninsula and Singapore and fifty miles to seaward, but excluding the territories of Indonesia; South Vietnam; an area in Borneo comprising Sarawak, Brunei and Sabah and an area fifty miles to seaward but excluding any territories of the Philippines.

### Rates

The main classes of war pensions are the special (T.P.I.) rate, the intermediate rate, the general rate, and the war widows' pension. These are not subject to a means test except where stated for certain classes of dependants.

The *special rate* of war pension is payable to those who are totally and permanently incapacitated and are unable to earn more than a negligible percentage of a living wage. The weekly rate is \$30.50, plus \$4.05 wife's allowance and \$1.38 for each child under sixteen years.

The *intermediate rate* of war pension, which previously applied only to certain cases of tuberculosis, was extended from 6 October 1965 to include ex-servicemen who, because of the severity of a war-caused incapacity, can only work part-time or intermittently and in consequence are unable to earn a living wage. The weekly rate is \$21.25, plus \$4.05 wife's allowance and \$1.38 for each child under sixteen years.

The *general rate* of war pension is the rate payable to those who suffer war-caused disabilities but are not thereby prevented from working, although their earning capacity may be reduced. The actual pension payable is assessed in accordance with the degree of incapacity suffered. The maximum (100 per cent) rate is \$12 a week. A wife, and children under sixteen years, also receive pensions at rates according to the assessed degree of incapacity of the ex-serviceman, the maximum being \$4.05 for a wife and \$1.38 for each child.

The *war widows' pension* is paid to widows of ex-servicemen who died as a result of war service and to their children under the age of sixteen years. A war widow's pension may also be paid to the widow of an ex-serviceman who was receiving, at the time of his death, the special rate of war pension or the equivalent rate payable to double amputees. The weekly rates are: widow, \$13; first child, \$3.90; second and each subsequent child, \$2.75.

*Other dependants* of an ex-serviceman who is suffering from a disability due to war service may be granted pensions under certain circumstances. Such pensions are subject to a means test and are assessed in accordance with the degree of the ex-serviceman's incapacity. Except in the case of a widowed mother of an unmarried ex-serviceman, other dependants are required to prove dependence on the ex-serviceman.

### Allowances

The following allowances are provided in addition to pension.

*Domestic allowance* (\$7 a week). This is paid, in addition to pension, to a widow of an ex-serviceman whose death is due to war service; if she is fifty years of age, or is permanently unemployable, or has a dependent child under the age of sixteen years, or a dependent child over sixteen years being educated or trained and not in receipt of an adequate living wage.

*Attendant's allowance* (maximum rate \$10.50 a week). This allowance is paid, in addition to war pension, to certain classes of seriously disabled ex-servicemen, for example, war blinded, those who are paralysed, and certain double amputees.

*Clothing allowance.* A clothing allowance is paid at various rates (38c to 75c a week) to an ex-serviceman who, as a result of war service, has lost an arm or a leg or, because of an injury to a limb, is required to use a surgical aid or appliance. An amount not exceeding \$19.50 in any one year is also payable to certain other war disabled ex-servicemen.

*Sustenance allowance.* This allowance is paid where an ex-serviceman is prevented from following his normal occupation through treatment of a war-caused disability or while undergoing medical investigation. The rate payable, where out-patient treatment is being received for a period of up to four weeks, or in-patient medical investigation is being carried out, is the same as the general (100 per cent) rate pension, less the amount of any war pension being paid.

Where an ex-serviceman is receiving in-patient treatment for a war-caused disability, is undergoing periods of essential convalescence immediately following discharge from hospital, or is prevented from following his usual occupation because of the necessity of out-patient treatment for a war-caused disability for a continuous period in excess of four weeks, a higher rate to bring the sustenance allowance up to the equivalent of the special (T.P.I.) rate is paid.

The wife, and any children under sixteen years of age, of an ex-serviceman who is receiving a sustenance allowance, are paid an amount which, when added to any war pension being paid, is equal to the full general rate pension for a wife and such children.

*Recreation transport allowance.* This allowance provides transport for recreation purposes and may be paid to an ex-serviceman who, as a result of war service, suffers certain amputations of the arms or legs or is seriously disabled to the extent that his powers of locomotion are negligible.

*Other allowances and general assistance.* These include a guardian's allowance, re-establishment loans and allowances, funeral benefits, vocational training allowances for education and training of children, fares and allowances for loss of remunerative time in connection with medical or pension purposes, and motor vehicle allowances for seriously disabled ex-servicemen.

### Appeals tribunals

The principal Act was amended as from 1 June 1929 to create tribunals to hear appeals in respect of war pensions. War Pensions Entitlement Appeal Tribunals are empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against decisions of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a 'Nil' assessment of war pension made by a Repatriation Board or the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the tribunals to hear appeals by certain members whose applications for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

### Summary of war pensions

The following tables provide a summary of war pensions (excluding miscellaneous war pensions) for the 1914-18 War, the 1939-45 War, the Korea and Malaya operations, the Far East Strategic Reserve, and the Special Overseas Service. Statistics relating to miscellaneous war pensions are shown later in this chapter.

#### WAR PENSIONS: SUMMARY, AUSTRALIA, 1965-66

(a) Includes domestic allowances paid to widows. (b) Includes five 12-weekly payments.  
(c) Includes Australian Capital Territory. (d) Includes Northern Territory.

## Miscellaneous war pensions

The Commission is also responsible for the payment of pensions and allowances to beneficiaries under the *Seamen's War Pensions and Allowances Act* 1940-1966, the *Interim Forces Benefits Act* 1947-1966, the *Native Members of the Forces Benefits Act* 1957-1966, and Cabinet decisions granting eligibility to persons who were attached to the armed forces during war time.

The following table shows the number of pensions under the various Acts, and the annual liability at 30 June 1966, and the table thereafter shows the amounts paid during the years 1961-62 to 1965-66 and the place of payment.

**MISCELLANEOUS WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY, AUSTRALIA, 30 JUNE 1966**

Class	Number of pensions in force at 30 June 1966				Annual pension liability (\$'000)

(a) Includes five 12-weekly payments.

(b) Includes Australian Capital Territory.

(c) Includes Northern Territory.

**Service pensions**

The *Repatriation Act* 1920-1966 provides for a service pension to be paid, subject to a means test of income and property, to the following persons.

Ex-servicemen who served in a theatre of war and have attained the age of sixty years or are permanently unemployable;

Ex-servicemen who suffer from pulmonary tuberculosis, irrespective of the area of their service; and

Ex-servicewomen who suffer from tuberculosis, or who served in a theatre of war, or served abroad or embarked for service abroad and have attained the age of fifty-five years, or are permanently unemployable.

**Rates of pension**

The maximum rate of service pension is the same as that paid to an age or invalid pensioner by the Department of Social Services. A single or married ex-serviceman receives a pension of \$13.00 a week. If, however, an ex-serviceman's wife is receiving a social service pension, a tuberculosis allowance or a service pension as a member of the forces, the rate is \$11.75 a week. The service pension of an ex-serviceman is increased by \$1.50 a week for each eligible child other than the first and by \$4.00 a week if a guardian's allowance is payable.

The maximum weekly rates payable to a service pensioner's wife and eligible children are: wife, \$6.00; first child, \$1.50; other children up to three in number, 25c each. *Eligible child* means a child of a service pensioner, under the age of sixteen years, or a child over that age who

is wholly or substantially dependent on the pensioner and is undergoing full-time education, in which case pension may continue until the child's twenty-first birthday.

Supplementary assistance of \$2.00 a week is paid in addition to service pension to an ex-serviceman who is paying rent, or for lodging, or board and lodging, and whose *means as assessed* do not exceed \$1.00 a week or \$2.00 a week if he is married. (The allowance is reduced if the *means as assessed* exceed these amounts.)

A service pensioner who is unmarried, widowed, divorced, or married but separated, and who has care and control of one or more children, qualifies for a guardian's allowance of \$4.00 a week.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable depends upon the claimant's *means as assessed*, which consist of his annual rate of income plus a property component equal to \$2.00 for each complete unit of \$20 of net value of property above \$400. For married couples, except where they are separated or in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's *means as assessed* may consist entirely of income, entirely of property, or of both income and property components. If a single person's *means as assessed* do not exceed \$7 a week, he receives the maximum rate of pension. If his *means as assessed* exceed \$7 a week, the rate payable is the maximum rate less the amount by which *means as assessed* exceed \$7 a week. If his *means as assessed* are \$20 a week or more, no service pension is payable.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are: certain income derived from property, gifts or allowances from children, parents, brothers or sisters, benefits from friendly societies, child endowment, Commonwealth health benefits. The value of board and lodging received by a pensioner, either free or in return for services, is normally assessed as income at \$1.25 a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, and livestock. Property does not include an applicant's permanent home, furniture or personal effects, the surrender value of life insurance policies (up to \$1,500), the value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, or vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1 November 1941 to veterans of the South African War 1899–1902 and in 1943 to members of the Forces of the 1939–45 War. Members of the Forces who served in Korea and those who served in Malaya prior to the commencement of the *Repatriation (Far East Strategic Reserve) Act 1956–1966* are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment, and treatment in Repatriation General Hospitals.

### Operations

The following tables give a summary of service pensions.

**SERVICE PENSIONS: SUMMARY, AUSTRALIA, 1965–66**

	South African War	1914–18 War	1939–45 War	Korea- Malaya opera- tions	Miscell- aneous (a)	Total

1965-66	34,381	14,321	1,065	14,571	1,297	259	65,894	26,637

(a) Includes dependants of deceased service pensioners.

(b) Miscellaneous service pensions were not payable prior to 1963-64.

**SERVICE PENSIONS: AMOUNT PAID, STATES, ETC., 1961-62 TO 1965-66(a)**  
(\$'000)

Place of payment	1961-62	1962-63	1963-64	1964-65	1965-66
New South Wales(b) .	6,313	7,095	7,981	8,494	9,499
Victoria . . . . .	4,244	4,949	5,654	5,974	6,626
Queensland . . . . .	3,250	3,362	(c) 3,823	4,048	4,477
South Australia(d) .	2,193	2,487	2,689	2,766	3,025
Western Australia .	2,687	2,927	3,177	3,320	3,571
Tasmania . . . . .	736	837	874	904	964
Abroad . . . . .	..	..	..	2	10
<b>Australia . . . . .</b>	<b>19,423</b>	<b>21,657</b>	<b>(c) 24,198</b>	<b>25,508</b>	<b>28,172</b>

(a) Includes miscellaneous service pensions which first became payable in 1963-64. However, separate figures for the amounts payable in that year (all in Queensland) are not available. Therefore the amounts payable in 1963-64 are not included above but with miscellaneous war pensions (see page 98).

(b) Includes Australian Capital Territory. (c) See footnote (a).

(d) Includes Northern Territory.

**Medical treatment for ex-servicemen and dependants of ex-servicemen**

Medical treatment is provided for all disabilities which have been accepted as due to war service. In addition, and subject to certain conditions, treatment is provided for disabilities not due to war service for: ex-servicemen and ex-servicewomen receiving war pensions at or exceeding the maximum general (100 per cent) rate; ex-servicemen who have contracted pulmonary tuberculosis; nurses who served in the 1914-18 war; widows and certain dependants of ex-servicemen whose deaths have been accepted as due to war service and of deceased T.P.I. pensioners; and service pensioners, including service pensioners of the Boer War.

In-patient treatment for eligible patients is provided at the six Repatriation General Hospitals (one in each State) and eight auxiliary hospitals and sanatoriums as follows: *New South Wales*—Lady Davidson Hospital; *Victoria*—McLeod Hospital and Anzac Hostel; *Queensland*—Kenmore Hospital, Rosemount Hospital and Anzac Hostel; *South Australia*—Birlee Hospital; and *Western Australia*—The Edward Millen Hospital. The Anzac Hostels specialise in the care and treatment of long-term patients.

The total number of available beds for patients in open wards or parts of wards in all these institutions at 30 June 1966 was 4,168, and expenditure amounted to \$23,095,058. In addition, expenditure of \$27,773,215 was incurred on medical services outside these institutions.

**Repatriation hospitals and institutions**

Details of full-time staff in Repatriation General Hospitals and other Repatriation institutions are given in the following table.

**REPATRIATION HOSPITALS AND INSTITUTIONS: FULL-TIME STAFF  
STATES, 30 JUNE 1966**

In addition to the Repatriation institutions, eligible patients may be treated in other country and metropolitan hospitals and nursing homes at Repatriation expense. During 1965-66, 13,523 Repatriation in-patients were accommodated and treated in hospitals and 465 in nursing homes.

Repatriation psychiatric patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Repatriation Department in separate wings of psychiatric hospitals administered by the State authorities. At 30 June 1966 there were 845 Repatriation patients in these hospitals.

Out-patient treatment is provided throughout the Commonwealth at Repatriation hospitals and clinics and through the Repatriation Local Medical Officer Scheme. During 1965-66, 566,461 out-patients were treated at Repatriation institutions and visits to or by local medical officers totalled 2,708,088.

### General Repatriation benefits and miscellaneous

#### Other Repatriation Department activities

The activities of the Department in respect of general benefits for the welfare of ex-servicemen and dependants concern mainly education and training of children under the Soldiers' Children Education Scheme (*see* pages 104-5), medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

These and new benefits designed for the re-establishment of servicemen and servicewomen after discharge were extended and made available, by legislation passed in June 1940, to servicemen and servicewomen engaged in the 1939-45 War, and in November 1950 and May 1963 to those engaged in the Korea and Malaya operations and to those serving in such other areas as may be prescribed under the *Repatriation (Special Overseas Service) Act* 1962-1966, respectively. The re-establishment benefits generally administered by the Repatriation Commission are: payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where they are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplements to wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowances during the early stages of establishment in business; gifts up to \$150 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under sixteen years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949 the Department took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction and became responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now concluded, the prescribed time limits for eligibility having expired on 30 June 1950. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Department, and special means have to be found to overcome each problem.

Expenditure in 1965-66 on general Repatriation benefits for all wars was \$4,036,000, comprising: Soldiers' Children Education Scheme, \$2,534,000; recreation transport allowance, \$614,000; and other benefits \$888,000. In addition, \$34,000 was expended by other Commonwealth authorities on Repatriation employment and vocational training.

#### Expenditure by the Repatriation Department, 1965-66

The net expenditure by the Department for the year ended 30 June 1966 was \$266,837,330 distributed as follows.

	\$'000
Pensions, allowances and other benefits	202,698
Medical treatment	50,868
Administration	10,074
Works, rent and maintenance	3,197
<b>Total</b>	<b>266,837</b>

### Soldiers' Children Education Scheme

The Soldiers' Children Education Scheme was established in 1921 and operates with the assistance of voluntary Education Boards in each State. These boards consist of representatives of government and non-government education authorities and of ex-service and other organisations which have a general interest in the welfare of the children of ex-servicemen. The objects of the Scheme are to assist and encourage eligible children in acquiring a standard of education compatible with their aptitude and ability, and to prepare them to enter an agricultural, commercial, professional, or industrial calling of their own choice.

*Eligible children.* Eligible children are children of ex-servicemen whose deaths have been accepted as due to war service; or of ex-servicemen who died from causes not due to war service but who were receiving at the date of death a war pension at a special rate for blindness, total and permanent incapacity, pulmonary tuberculosis, or amputation of two or more limbs; or of ex-servicemen who, as a result of war service, are blinded, totally and permanently incapacitated, or receiving the special rate pension for pulmonary tuberculosis and are likely to receive such pension for a period of at least three years.

*General benefits.* From the commencement of primary education up to twelve years, school requisites and fares are provided. An education allowance is also payable for a child from commencement of secondary education or from the age of twelve years, whichever is the earlier, while the child is undertaking primary or secondary education. Further assistance beyond, or parallel with, the later years of secondary education is provided where an approved beneficiary continues with a course of specialised education or training necessary for a career. Specialised education covers a wide range and may include: professional degree or diploma courses at universities and technical colleges; theological training; cadet and pupilage training, i.e. training combined with employment, such as nursing, pharmacy and journalism; industrial, including apprenticeship training, and other courses of trade and business training approved by an Education Board; and agricultural training at an agricultural college. At this stage of training, in addition to the education allowance, fees are paid and text books, essential equipment and other minor benefits provided.

All education allowances are subject to an allowed income limit test, i.e. the amount of education allowance payable depends upon the amount of income a child receives over the allowed limit. The child's income for the purpose of determining the allowance payable means earnings from employment and other earnings from personal exertion and such portion of a scholarship, bursary or grant as the Education Board determines to be income. Income does not include war or service pensions paid for the child or any similar payment, income the child receives from private means, or income from casual employment during the entire period of a school or university vacation where the student is to continue as a full-time student under the scheme after the vacation. The parent's income does not affect the child's allowance. The scale of maximum allowances payable to eligible children at various stages of education is as follows.

### SOLDIERS' CHILDREN EDUCATION SCHEME WEEKLY RATES OF ALLOWANCES, JANUARY 1967 (\$)

Type of training	Living at home	Living away from home
At school—		
Aged 12 and under 14 years . . .	1.90	6.32

**Settlement of returned service personnel on the land**

Reference to the settlement of returned service personnel on the land will be found in the chapter Public Finance.

**Re-establishment benefits for national servicemen**

Subject to prescribed conditions, special re-establishment benefits are provided for national servicemen under the *Defence (Re-establishment) Act 1965-1966*. They apply to all national servicemen whether or not they have served on 'special service' and ensure that servicemen will not be at a disadvantage on their return to civil life. The scheme includes appropriate full or part-time training as a supplement to skills acquired in the Army, refresher training for specialists and training for those who, for various reasons, may not be able to return to their former employment. The assistance includes payment of tuition fees, other associated fees and fares, and provision of books and equipment as appropriate. A training allowance is also provided for trainees undertaking full-time studies.

Re-establishment loans may be granted, subject to certain conditions, to those national servicemen who, prior to call-up, were engaged in professional practice, business, or agricultural occupations, or who, because of their call-up, were prevented from engaging in these occupations, and who are in need of financial assistance for their re-establishment in civil life.

The maximum amounts of the loans are business and professional \$3,000, agricultural \$6,000.

### The Services Canteens Trust Fund

The Services Canteens Trust Fund was established under the *Services Trust Funds Act 1947*. Its funds are derived from the assets and profits of wartime services canteens, mess and regimental funds of disbanded units, and several other sources.

The total amount transferred to the Fund to 31 December 1966 was \$11,053,986. The Act prescribed that, of this, \$5 million and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and ex-servicewomen, and that the balance of the Fund should be used to provide relief for ex-servicemen and ex-servicewomen and their dependants in necessitous circumstances.

The Fund is administered by eleven honorary trustees appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939-45 War or are widows of men who served during the war. They serve in an honorary capacity.

#### Assistance from the Fund

Persons eligible for assistance from the Fund are those who, between 3 September 1939 and 30 June 1947, served in the Australian Naval, Military or Air Forces, including members of the canteens staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Forces who served in an official capacity on full-time paid duty, and their dependants. The trustees have introduced schemes for providing welfare relief for ex-servicemen and ex-servicewomen who are eligible for benefits and for their dependants; benefits for children of eligible ex-servicemen and ex-servicewomen who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-servicemen and ex-servicewomen. From its inauguration in 1947 the Fund is to be available for forty years for welfare relief and for thirty years for educational benefits.

*Welfare relief.* The trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts. To 31 December 1966, \$3,051,862 has been granted as welfare relief from the Fund. \$1,891,228 to ex-servicemen and their dependants, and \$1,160,634 to widows and orphans. The amount granted during 1966 was \$167,712. A total of 33,317 ex-servicemen and ex-servicewomen and 16,489 widows and orphans were granted welfare assistance from the Fund to 31 December 1966.

*Assistance under Afflicted Children's Scheme.* The Fund assists dependent children suffering from afflictions which permanently disable or seriously retard their progress or prevent the enjoyment of normal health and strength, and who face a prospect of dependence on others for all or part of their lives. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31 December 1966, 2,575 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of \$289,836. The amount granted during 1966 was \$12,054. The number of new children assisted in 1966 was 37.

*Educational Assistance Scheme.* Educational assistance is restricted to children who are fifteen years of age and over, thirteen years and over where there are exceptional circumstances, and twelve years in the case of orphans. The object is to assist eligible children to obtain the highest education within their capacity. Assistance is in the form of awards ranging up to \$400 a year depending on the nature of the course undertaken and the family circumstances. These awards are granted chiefly for children at secondary education level, but are also available for other types of education. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, uniforms in certain cases, and maintenance for the child while at school. Higher training awards are provided for selected students for post-graduate study, in Australia or overseas, in the ancillary services to medicine, welfare and science, and also for selected craftsmen to gain experience in their trade overseas. One post-graduate scholarship is provided each year for study overseas, valued at \$2,500 per annum for up to three years.

The number of children assisted under the educational assistance scheme to 31 December 1966 was 54,207, and the expenditure on educational awards, post-graduate scholarships and higher training awards to 31 December 1966 was \$6,266,638. The number granted in 1966 was 7,108 at a value of \$614,116.

*Total assistance.* The total assistance granted under the three schemes during 1966 was \$793,882 and from the inception of the Fund to 31 December 1966 totalled \$9,608,336.

## **CHAPTER 6**

### **INTERNATIONAL RELATIONS**

#### **Relations with Commonwealth and other countries**

##### **Commonwealth relations**

Australia's international relations have developed as a natural concomitant of Australia's growth from colonial status to independent nationhood. During this process Australia has remained on terms of close friendship and understanding with the United Kingdom. This intimate association, together with close co-operation with other countries of the Commonwealth of Nations, remains a basic principle of Australia's foreign policy.

Australia is represented at meetings of Commonwealth Prime Ministers, Finance Ministers and Ministers for External Affairs. It belongs to the sterling area, retains, with limitations, the system of judicial appeal to the Privy Council, maintains High Commissioners in twelve other Commonwealth countries, and is a member of the main Commonwealth organisations providing for co-operation in economic, scientific, educational, and other fields.

Between meetings of Commonwealth Prime Ministers the Australian Prime Minister consults with other Commonwealth Prime Ministers on matters of mutual interest. In addition, there is a constant flow of messages between the Australian Government and Governments of other Commonwealth countries. In defence matters Australia's armed services send representatives to discussions by Commonwealth Chiefs of Staff; Australian naval ships take part in combined exercises with the navies of other Commonwealth members, and Australian officers maintain liaison with the services of other Commonwealth countries.

##### **Relations with the United States of America**

An important feature of Australia's international relations is her relationship with the United States of America. This relationship is formally expressed in a treaty known as the ANZUS Treaty which was signed pursuant to Articles 51 and 52 of the United Nations Charter, and provides that in the event of armed attack on any one of them in the Pacific the U.S.A., Australia and New Zealand would each act to meet the common danger in accordance with its constitutional processes. The Treaty is designed to establish a closer working relationship between the three countries. The ANZUS partners, in their consultations, make no attempt to decide matters affecting the vital interest of other countries. The machinery of the ANZUS Treaty consists of a Council composed of the three Foreign Ministers or their deputies, which meets periodically to discuss matters of mutual concern.

##### **Australia and Asia**

Australia's geographical location to the south of Asia has become an increasingly important factor in Australia's foreign policy. Australia has sought to develop close relations and understanding with her Asian neighbours. This was evidenced by Australia's inclusion in 1963 as a full regional member of the Economic Commission for Asia and the Far East (ECAFE) and more recently by Australia's decision to join the Asian Development Bank. There has been increasing recognition by Asian leaders of Australia's concern with, and contribution to, the solution of the problems of the region.

##### **SEATO**

Following the cessation of fighting in Indo-China in 1954, Australia, with other countries situated in the south-east Asian region, or having responsibilities there, supported a proposal to form a collective defence alliance to guarantee the peace and security of the region from external aggression. On 8 September 1954 Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom, and the United States signed the South-East Asian Collective Defence Treaty at Manila. They also signed a Pacific Charter stating the principles on which they had acted. A Protocol to the Treaty extended its operation to Cambodia, Laos and the free territory under the jurisdiction of the State of Vietnam, although no action on these territories would be taken except at the invitation or with the consent of the government concerned.

While primary emphasis has been placed on the defence significance of the Treaty, an organisation has been established in Bangkok to co-ordinate activities to combat subversion both by counter-propaganda and security training and by the development of the economic and social welfare of the peoples of the Treaty Area. To facilitate this task the Australian Government in 1956 instituted a SEATO Aid Programme, under which by 30 June 1966 aid to the value of \$14.09 million had been given to member countries in Asia to help develop their capacity to resist aggression and subversion and to stimulate economic development. This programme is complementary to Australia's Colombo Plan contribution. Under the scheme Australia is providing two geodetic survey vessels to the Philippines; a military technical training school, a vehicle base

repair shop, and two 50 kW radio transmitters to Thailand; telecommunication and technical training equipment to Pakistan; and barbed wire, corrugated iron and blacksmith's tools for a town water supply system for Bien Hoa, two surgical teams, and primary school textbooks for Vietnam. Australia has also provided military training, and technical training in the fields of engineering, telecommunications, naval architecture and dockyard maintenance, security procedures, and surveying for more than 200 trainees from Asian member countries. In addition a number of senior service officers of other member countries have visited Australia to foster understanding and to develop co-operation between the armed forces.

### The Colombo Plan

The Colombo Plan originated at a meeting of Commonwealth Foreign Ministers in Colombo in January 1950. The meeting set up a consultative committee to review economic development in south and south-east Asia. The task of this committee was to devise the most effective means of tackling the problems of economic development in the area and of focusing world attention on them.

Membership of the consultative committee is now made up of Australia, Canada, Ceylon, India, New Zealand, Pakistan, the United Kingdom, Malaysia, the United States, Burma, Cambodia, Indonesia, Japan, Laos, Nepal, the Philippines, Thailand, Vietnam, Korea, Bhutan, the Maldives Islands, Afghanistan, Singapore, and Iran.

Australian assistance under the Colombo Plan to 30 June 1966 amounted to \$129,038,000. Of this, \$89,466,000 had been spent on economic development projects and \$39,572,000 had been spent under the Technical Co-operation Scheme. Australia has placed emphasis on the importance of technical assistance in providing a base for economic development. A summary of expenditure, by country and under different heads, is set out in the following table.

**AUSTRALIA'S EXPENDITURE ON THE COLOMBO PLAN TO 30 JUNE 1966**  
( '\$'000)

Country	Economic development	Technical assistance				Grand total

(a) Includes Miscellaneous.

**Economic development aid**

Most of Australia's contribution under the Colombo Plan has been spent on providing predominantly Australian-made equipment for developmental projects or on gifts of commodities such as wheat, flour, fertiliser, coal, copper, and condensed milk which have been sold in the recipient country to raise counterpart funds for agreed developmental projects.

The projects assisted by Australia cover a wide range, including irrigation and preparation of land for food crops, irrigation and electric power projects, secondary industries, municipal services, road building, transport and communications facilities, broadcasting equipment, and lignite mining.

A Technical Co-operation Scheme has been an integral part of the Colombo Plan since its inception in 1950. Co-ordination of technical assistance is provided by a Council for Technical Co-operation, which meets regularly in Colombo, served by a Colombo Plan Bureau.

**Technical assistance**

Australia had spent a total of \$22,827,000 on training awards under the Colombo Plan up to 30 June 1966. A total of 6,610 awards for training in Australia had been made. The main fields of study include engineering, public administration, education, nursing, science, medicine and health, and agriculture. Substantial numbers have also been trained in such fields as accountancy, arts, economics, food technology, social studies, and industry.

At 30 June 1966 a total of 4,260 awards had been granted under the correspondence scholarship scheme inaugurated by Australia in 1955. Main fields of study are accountancy, engineering, English, and trade courses.

Australia had spent a total of \$6 360,000 on experts and advisers up to 30 June 1966. This involved the services of experts and advisers on 999 assignments. Of these, 63 experts were in the field at 30 June 1966. The majority were in Malaysia and Thailand.

The following table shows the number of training awards and experts provided to Colombo Plan countries by Australia up to 30 June 1966.

**AUSTRALIA: TRAINING AWARDS AND EXPERTS PROVIDED  
UNDER COLOMBO PLAN TO 30 JUNE 1966**

<b>Total . . . . .</b>	<b>6,610</b>	<b>4,260</b>	<b>735</b>

At 30 June 1966 a total of 412 requests for technical equipment had been or were being met, at a total cost of \$7,944,000. The range of items supplied include text books and Australians reference books for schools, universities and technical training institutions; equipment and tools

for technical education; livestock and equipment for breeding programmes; radio receivers for use in remote areas; film projectors and visual aids for training centres; X-ray equipment for hospitals; and agricultural research equipment.

In addition to training awards, experts and equipment, technical assistance funds have been spent on contributions to the Colombo Plan Bureau, publications, International House, training centres, and the ECAFE Asian Economic Development Institute.

### Participation in the United Nations

#### Australia's contributions to the United Nations

Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organization in San Francisco in 1945 and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Australia's influence in the affairs of the United Nations has been exerted primarily through the annual debates in the General Assembly, through membership of the Security Council (1946-47 and 1956-57) and the Economic and Social Council (1948-50, 1953-55 and 1962-64), and through the Trusteeship Council. In virtue of responsibilities for administration of the Trust Territories of Nauru and New Guinea Australia has been a member of the Trusteeship Council since it was established.

In 1950 Australia joined fifteen other member States in answering the Security Council's call to help the Republic of Korea to repel Communist aggression from the north, and members of all three armed services took part in the three years of fighting which followed. Australia has also been directly involved in United Nations activities in many other parts of the world. Australia has contributed its share of the costs, both assessed and voluntary, of all United Nations peace-keeping operations, the largest of which have been the United Nations Emergency Force (UNEF) in the Middle East since 1956, the United Nations Operation in the Congo (ONUC) in 1960-64, and the United Nations Force in Cyprus (UNFICYP) since 1964. In addition to financial contributions, an element of forty Australian policemen has been made available for service with UNFICYP.

In the economic, social and cultural sphere Australia has contributed to the work of the United Nations through membership of its specialised agencies and of the Economic and Social Council. Australia is a foundation member of one of the four Regional Economic Commissions—the Economic Commission for Asia and the Far East, the 4th and 15th Sessions of which were held in Australia. In 1963 Australia became a regional member of ECAFE.

Australia has had varying periods of service as a member of the executive bodies of the principal specialised agencies. As a leading agricultural country, Australia played a large part in the establishment of the Food and Agriculture Organization (FAO). Australia is a member of the Board of Governors of the International Atomic Energy Agency. Australia served as a member of the governing body of the International Labour Organisation either as a Titular Government member or as a Deputy member from 1945 to 1960, and in 1963 was again elected to the Governing Body as a Titular Government member for a further three-year term. Australia has also been a prominent member of the International Civil Aviation Organization since its inception, and in 1962 was re-elected to the Council as one of the nine States of principal civil aviation importance. Australia was a member of the executive board of the United Nations Children's Fund (UNICEF) from 1947 to 1961 and was re-elected in 1966 for a three-year term.

#### Australia's contributions in international aid

Australia's contributions towards various forms of international aid through the United Nations and other international organisations to June 1966 amounted to about \$160,000,000. This is additional to the funds provided for the Colombo Plan and the cash grant for the development of Papua and New Guinea in 1965-66.

The Australian Government contributed \$7,527,000 to the United Nations Expanded Programme of Technical Assistance (EPTA) from the inception of the Programme in 1950 to December 1965. This was spent on the provision of experts, training, supplies, and equipment, and supplemented Australian aid under the Technical Co-operation Scheme of the Colombo Plan. Australia also contributed \$1,500,000 to the Special Fund to December 1965. EPTA and the Special Fund were merged on 1 January 1966 into the United Nations Development Programme (UNDP) and Australia's contribution to the Programme to 30 June 1966 was \$585,000.

Australian experts sent abroad under the United Nations aid programmes up to 31 December 1966 totalled 558. A total of 686 United Nations trainees had come to Australia up to 31 December 1966.

Other contributions by Australia (to June 1966) have included \$45,044,000 to the United Nations Relief and Rehabilitation Administration (UNRRA); \$6,594,000 to the International Refugee Organization; \$3 660 000 to Post-UNRRA Relief; \$13 576 000 for food and medical

supplies to the United Nations Children's Fund (UNICEF), which has been helping the underprivileged children of the world since its establishment in 1946; \$3,598,000 of essential supplies to the United Nations Korean Reconstruction Agency; \$3,140,000 of supplies to the United Nations Relief and Works Agency for Palestine refugees; \$1,308,000 for the programmes for the United Nations High Commissioner for Refugees; and \$96,000 for the WHO Malaria Eradication Special Account.

Australia has also contributed \$530,000 to the Intergovernmental Committee for European Migration's programme for providing transportation from Hong Kong to countries of resettlement for refugees of European origin coming out of mainland China.

In addition, Australia has made significant contributions to the development funds of international financial institutions: to June 1966 these amounted to \$47,590,000 to the International Bank for Reconstruction and Development, \$1,996,000 to the International Finance Corporation, and \$14,774,000 to the International Development Association.

In 1962 Australia supported the establishment of the UN/FAO World Food Programme and contributed \$1,187,000 in cash and kind for the three years of the Programme.

### Diplomatic representation

The Department of External Affairs is responsible for advising the Minister for External Affairs and the Australian Government on the conduct of foreign affairs and relations with foreign Governments. Its officers staff the Australian diplomatic service and the consular and administrative service.

#### Australian missions overseas

In December 1966 Australia maintained the following diplomatic and consular missions abroad.

### AUSTRALIAN MISSIONS OVERSEAS

#### Embassies (30)

- Argentina*—Calle Rivadavia 1829, Piso 5, Buenos Aires.
- Austria*—Concordia-platz 2/3, Vienna 1.
- Belgium*—4, boulevard Brand Whitlock, Woluwe-St-Pierre, Brussels-4.
- Brazil*—Caixa Postal 251-ZC-00, Rio de Janeiro.
- Burma*—88 Strand Road, Rangoon.
- Cambodia*—94 Moha Vithei Preah Bat Norodom, Phnom Penh.
- China*—C/o The Grand Hotel, Taipei.
- Ethiopia\**—C/o Australian High Commission, Nairobi, Kenya.
- France*—13 Rue Les Cases, Paris 7E.
- Germany, Federal Republic of†*—Kölner Strasse 157, Bad Godesburg, Bonn.
- Greece*—8 Makedonon Street, Athens.
- Indonesia*—Djalan Tharin, Gambin, Djakarta.
- Ireland*—33 Fitzwilliam Square, Dublin.
- Israel*—145 Hayarkon Street, Tel Aviv.
- Italy*—Via Sallustiana 26, Rome.
- Japan*—9 Mita Tsuna-machi, Shiba, Minato-ku, Tokyo.
- Korea*—32-10 Songwoldong, Suda Moon-Ku, Seoul.
- Laos*—Quartier Phone Xay, Boite Postale No. 292, Vientiane.
- Mexico*—Paseo de la Reforma 195, 5° Piso, Mexico 5D.F. Mexico City.
- Nepal‡*—C/o Australian High Commission, New Delhi, India.
- The Netherlands*—Lange Voorhout 18, The Hague.
- The Philippines*—L & S Building, 1414 Boxas Street, Manila.
- South Africa*—Standard Bank Building, Church Square, Pretoria.
- Sweden*—Sergelstorg 12, Stockholm 40.
- Thailand*—323 Silom Road, Bangkok.
- Union of Soviet Socialist Republics*—13 Kropotkinsky Pereulok, Moscow.
- United Arab Republic*—1097 Corniche el Nil, Garden City, Cairo.
- United States of America*—1700 Massachusetts Avenue, Washington, D.C.
- Vietnam*—Caravelle Building, Place Lam Son, Saigon.
- Yugoslavia*—Hotel Majestic, 28 Rue Obilicev Venac, Belgrade.

\* The Australian High Commissioner in Kenya is concurrently Ambassador to Ethiopia. † The Australian Ambassador is also head of the Australian Military Mission in Berlin. ‡ The Australian High Commissioner in India is concurrently Ambassador to Nepal.

**High Commissions (14)**

*Britain\**—Australia House, The Strand, London, W.C.2.  
*Canada*—Royal Bank Chambers, 90 Sparks Street, Ottawa, 4, Ontario.  
*Ceylon*—3 Cambridge Place, Colombo, 7.  
*Ghana*—6/26 Milne Avenue, Accra.  
*India†*—No. 1/50-G Shantipath, Chanakyapuri, New Delhi.  
*Kenya*—Jeevan Bharati Bldg, Harambee Ave, Nairobi.  
*Malaysia*—44 Jalan Ampang, Kuala Lumpur.  
*Malta*—Airways House, Gaiety Lane, Cnr High Street Sliema, Valletta.  
*New Zealand*—I.C.I. House, Molesworth Street, Wellington N1.  
*Nigeria*—Investment House, 21–25 Broad Street, Lagos.  
*Pakistan*—United Bank Bldg, 54 Haider Road, Rawalpindi.  
*Singapore*—MacDonald House, Orchard Road, Singapore 9.  
*Tanzania*—Bank House, Independence Avenue, Dar es Salaam.  
*Uganda‡*—Jeevan Bharati Bldg, Harambee Ave, Nairobi.

**Other (14)**

Military Mission in Berlin§—Olympia Stadium, Charlottenburg 9, Berlin.

**Mission to—**

*European Economic Community*—4, boulevard Brand Whitlock, Woluwe-St-Pierre, Brussels-4.  
*United Nations (New York)*—750 Third Avenue, New York 17, New York.  
*United Nations (Geneva)*—56–58 rue de Moillebeau, Petit Saconnex, 1211, Geneva 19.

**Consulate-General in—**

*Spain*—Calle General Sanjurjo 44, Madrid 3.  
*Switzerland*—56–58 rue de Moillebeau, Petit Saconnex, 1211, Geneva 19.  
*New York*—International Building, 636 Fifth Avenue, New York 20, New York.  
*San Francisco*—350 Post Street, Union Square, San Francisco, California.

**Consulate in—**

*Denmark*—Nørrevold 68, Copenhagen.  
*Germany, Federal Republic of*—2 Hamburg 39, Neuerwall 39, Hamburg.  
*New Caledonia*—45 Tce Rue de Verdun, Noumea.  
*Portuguese Timor*—Dili.  
*South Africa*—1001 Colonial Mutual Building, 106 Adderly Street, Cape Town.

**Commission in—**

*Fiji*—C.M.L.A. Building, 3 Central Street, Suva.

The Department of External Affairs is responsible for the control and administration of all the diplomatic and consular missions listed above with the exception of the High Commission, London, which is the responsibility of the Prime Minister's Department.

Specialist officers of the Trade Commissioner Service, other Commonwealth Government Departments and the Defence Services stationed abroad are attached to Australian diplomatic or consular missions. Senior attached officers are in some cases accredited to the missions with diplomatic or consular ranks approved by the Minister for External Affairs. In addition, the Department of Trade and Industry maintains Trade Commissioner posts which engage in trade promotion in a number of cities where Australia does not have diplomatic or consular representation (for complete list of Trade Commissioner posts, see page 114).

The Department of Immigration similarly maintains offices overseas which engage in recruitment of migrants. A complete list of these offices is given on page 115.

**Diplomatic representatives in Australia**

There are thirty-four non-Commonwealth and ten Commonwealth countries represented by diplomatic missions in Australia.

The following list shows the addresses of the overseas representatives in Australia. Full details of Commonwealth and foreign representation in Australia may be obtained from publications issued by the Department of External Affairs, Canberra. Consular representatives are not included. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and fifty-three countries are represented.

\* Administered by Prime Minister's Department. † The Australian High Commissioner in India is concurrently Ambassador to Nepal. ‡ The Australian High Commissioner in Kenya is concurrently High Commissioner to Uganda. § The Australian Ambassador to Germany is also head of the Australian Military Mission in Berlin.

## DIPLOMATIC REPRESENTATIVES IN AUSTRALIA

## Embassies (30)

*Argentina*—5a Arkana Street, Yarralumla, Canberra, A.C.T.

*Malta*—261 La Perouse Street, Red Hill, Canberra, A.C.T.  
*New Zealand*—M.L.C. Building, London Circuit, Civic Centre, Canberra, A.C.T.  
*Pakistan*—59 Franklin Street, Forrest, Canberra, A.C.T.  
*Singapore*—81 Mugga Way, Red Hill, Canberra, A.C.T.

## Legations (4)

*Denmark*—115 Pitt Street, Sydney, N.S.W.  
*Finland*—537 New South Head Road, Double Bay, Sydney, N.S.W.  
*Peru*—17 Canterbury Crescent, Deakin, Canberra, A.C.T.  
*Uruguay*—75 Flinders Way, Red Hill, Canberra, A.C.T.

## Agents-General for States

From early times the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High Commissioner for Australia at Australia House, The Strand, London. The addresses of the Agents-General are as follows: New South Wales—56-57 The Strand, London, W.C.2; Victoria—Victoria House, Melbourne Place, The Strand, London, W.C.2; Queensland—Marble Hall, 409-10 The Strand, London, W.C.2; South Australia—South Australia House, 50 The Strand, London, W.C.2; Western Australia—Western Australia House, 115 The Strand, London, W.C.2; Tasmania—457 The Strand, Charing Cross, London, W.C.2.

---

\* The Nepalese Ambassador to Japan is concurrently Ambassador to Australia and to New Zealand.

### Overseas trade representation

#### The Australian Trade Commissioner Service

The Department of Trade maintains Trade Commissioners in thirty-two countries. The first permanent Trade Commissioner Post was set up in Canada in 1929. Before that Australia's only official trade representatives abroad were in the High Commission Office in London and at the Office of the Commissioner-General for Australia in New York. By late 1966 Trade Commissioners were established at the following posts: United States of America—New York, Washington, Los Angeles, and San Francisco; Canada—Vancouver, Ottawa and Montreal; West Indies—Trinidad; Britain and Europe—London, The Hague, Vienna, Athens, Paris, Bonn, Hamburg, Geneva, Stockholm, and Rome; Persian Gulf—Bahrain; Africa—Lagos, Nairobi, Johannesburg, and Cairo; Lebanon—Beirut; India—New Delhi, Bombay and Calcutta; Ceylon—Colombo; South-east Asia—Singapore, Djakarta, Kuala Lumpur, Bangkok, and Hong Kong; Japan—Tokyo, Osaka; New Zealand—Wellington, Christchurch and Auckland; Philippines—Manila; Pakistan—Karachi; South America—Buenos Aires and Lima. Twenty-eight editions of the Department of Trade's promotion periodical *Austral News* now circulate in over 100 countries in four languages. (See also Australian Trade Missions in the chapter Overseas Transactions.)

The addresses of Australian Trade Commissioner Posts overseas are shown in the following list.

#### Trade Commissioner Service of the Commonwealth of Australia

*Argentina*—Australian Embassy, Seccion Comercial, Calle Rivadavia 1823-1° Piso-Dto. 'A', Buenos Aires.

*Austria*—Australian Embassy, Concordia-platz 2/3, Vienna 1.

*Bahrain*—Almoayyed Building, Government Road, Bahrain.

*Britain*—Australia House, The Strand, London, W.C.2.

*Canada*—1155 Dorchester Boulevard West, Montreal 2, P.Q.; Suite 608, Burrard Building, 1030 W. Georgia Street, Vancouver 5, B.C.; Australian High Commission, Royal Bank Chambers, 90 Sparks Street, Ottawa 4, Ontario.

*Ceylon*—Australian High Commission, 3 Cambridge Place, Colombo 7.

*France*—2nd Floor, 26 Rue de la Pépinière, Paris, 8E.

*Germany, Federal Republic of*—Australian Embassy, Kölnerstrasse 157, Bad Godesburg, Bonn; 2000 Hamburg 11, Postfach 2168.

*Greece*—Australian Embassy, 8 Makedonon Street, Athens.

*Hong Kong*—Union House, Chater Road, Hong Kong.

*India*—Mercantile Bank Building, 52 Mahatma Gandhi Road, Bombay 1; 2 Fairlie Place, Calcutta 1; 1/50G Shantipath Chanakyapuri, New Delhi.

*Indonesia*—C/o Australian Embassy, Djalan Thamrin, Djakarta.

*Italy*—Australian Embassy, Via Sallustiana 26, Rome.

*Japan*—9 Mita Tsuna-Machi, Shiba, Minato-ku, Tokyo; Asahi Seimei Building, 4th Floor, 50, 5 chome, Koraibashi-suji, Higashi-ku, Osaka.

*Kenya*—Silopark House, Queensway, Nairobi.

*Lebanon*—5th Floor, L'Union de Paris Building, Rue Maamari, Beirut.

*Malaysia*—44 Ampang Road, Kuala Lumpur.

*The Netherlands*—143 Koninginnegracht, The Hague.

*New Zealand*—ANZ Bank Building, Cnr Queen and Victoria Streets, Auckland C.1; Phoenix Building, 89-91 Worcester Street, Christchurch; Australian High Commission, Fourth Floor, I.C.I. House, Molesworth Street, Wellington.

*Nigeria*—Australian High Commission, Investment House, 21-25 Broad Street, Lagos.

*Pacific Islands*—c/o Department of Trade and Industry, A.N.Z. Bank Building, cnr Pitt and Hunter Streets, Sydney, N.S.W.

*Pakistan*—Australian High Commission, 9 Kutchery Road, Karachi 4.

*Peru*—Monterosa Buildings, Jiron Arica 837, Lima.

*The Philippines*—Australian Embassy, L & S Building, 1414 Roxas Street, Manila.

*Singapore*—Australian High Commission, MacDonald House, Orchard Road, Singapore, 9.

*South Africa*—10th Floor, Europa House, 32 Plein Street, Johannesburg.

*Sweden*—Australian Embassy, Sergelstorg 12, Stockholm 40.

*Switzerland*—Australian Consulate-General, 56-58 Rue De Moillebeau, Petit Saconnex 1211, Geneva 19.

*Thailand*—Australian Embassy, 40 Chartered Bank Lane, Bangkok.

*Trinidad*—Colonial Building, 72 South Quay, Port-of-Spain, Trinidad.

*United Arab Republic*—Australian Embassy, 1097 Corniche el Nil, Garden City, Cairo.

*United States of America*—Paramount Buildings, 1735 Eye Street, N.W. Washington, D.C.; Australian Consulate-General, International Building, 636 Fifth Avenue, New York 20, New York; Australian Consulate-General, 350 Post Street, Union Square, San Francisco, California; 3600 Wilshire Boulevard, Los Angeles 5, California.

**Australian Trade Correspondents and Marketing Officers**

Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner Service. Correspondents are located in Suva, Fiji; Valletta, Malta; Port Louis, Mauritius; Tel Aviv, Israel; and Istanbul, Turkey. Marketing Officers are located in Rangoon, Burma and Madrid, Spain.

**Trade Commissioners of overseas governments in Australia**

*Britain*—Senior British Trade Commissioner—Commonwealth Avenue, Canberra, A.C.T.

*British Trade Commissioners*—London Assurance House, 16–20 Bridge Street, Sydney, N.S.W.; 330 Collins Street, Melbourne, Vic.; M.L.C. Building, cnr Adelaide and Edward Streets, Brisbane, Qld; F.C.A. Building, Franklin Street, Adelaide, S.A.; Prudential Building, 189 St George's Terrace, Perth, W.A.

*Office of the Hong Kong Government Trade Representative*—Kembla Building, Margaret Street, Sydney, N.S.W.

*Office of the Fiji Government Representative*—38 Martin Place, Sydney, N.S.W.

*Canada*—Canadian Trade Commissioners—A.M.P. Building, Circular Quay, Sydney, N.S.W.; 2 City Road, South Melbourne, Vic.

*Ceylon*—Ceylon Trade Commissioner—The Wales House, 66 Pitt Street, Sydney, N.S.W.

*China*—Telford House, 300 George Street, Sydney, N.S.W.

*India*—Indian Trade Commissioner—Caltex House, 167–187 Kent Street, Sydney, N.S.W.

*Malaysia*—Malaysian Trade Commissioner—71 State Circle, Yarralumla, A.C.T.

*New Zealand*—Senior New Zealand Trade Commissioner—280–288 George Street, Sydney, N.S.W.

*New Zealand Government Trade Commissioner*—330 Collins Street, Melbourne, Vic.

*Pakistan*—Bligh House, 4–6 Bligh Street, Sydney, N.S.W.

*South Africa*—South African Trade Commissioner—622 St Kilda Road, Melbourne, Vic.

**Commonwealth Migration Offices overseas**

The Department of Immigration has established offices overseas to handle migration matters and in some countries regional offices are provided. Inquiries and applications may also be made at any Australian diplomatic, consular or trade post overseas. Special facilities for migration business are available as follows.

*Austria*—Australian Embassy, Migration Office, Teinfaltstrasse 1, Vienna.

*Belgium*—Australian Embassy, Migration Office, 4, boulevard Brand Whitlock, Woluwe–St-Pierre, Brussels-4.

*Britain*—'Canberra House', Migration Office, 10–16 Maltravers Street, The Strand, London, W.C.2.

*Denmark*—Australian Consulate, Norrevold 68, Copenhagen.

*Fiji*—Australian Commission, C.M.L.A. Building, 3 Central Street, Suva.

*France*—Australian Embassy, Migration Office, 28 Rue de la Pépinière, Paris.

*Germany, Federal Republic of*—Australian Embassy, Migration Office, Victoria Haus, Hohenzollernring 103, Cologne.

*Greece*—Australian Embassy, Migration Office, 8 Makedonon Street, Athens.

*Hong Kong*—Australian Government Trade Commission, Union House, Chater Road, Hong Kong.

*Italy*—Australian Embassy, Migration Office, Via Magenta 5, Rome.

*Kenya*—Australian High Commission, Silopark House, Queensway, Nairobi.

*Lebanon*—Australian Migration Office, Al Ghanem Building, 211 Madame Curie Street, Sana'eh, Beirut.

*Malta*—Australian Migration Office, Airways House, Gaiety Lane, Cnr High Street, Sliema, Valletta, Malta.

*The Netherlands*—Australian Embassy, Migration Office, 1 Javastraat, The Hague.

*Spain*—Australian Consulate-General, Calle General Sanjurjo 44, Madrid 3.

*Sweden*—Australian Embassy, Migration Office, Sergelstorg 12, Stockholm 40.

*Switzerland*—Australian Consulate-General, Migration Section, 56–58 Rue de Moillebeau, Petit Saconnex, 1211, Geneva 19.

*United Arab Republic*—Australian Embassy, Migration Office, 12 Hassan Sabri Street, Zamalek, Cairo.

*United States of America*—Australian Consulate-General, International Building, 636 Fifth Avenue, New York 20, New York.

*Australian Consulate-General*, Qantas Building, 350 Post Street, Union Square, San Francisco, California.

*Yugoslavia*—Australian Embassy, Migration Office, Palmoticeva, 21/1 Belgrade.

## CHAPTER 7

### THE TERRITORIES OF AUSTRALIA

The internal Territories of Australia are the Northern Territory and the Australian Capital Territory. External Territories under the control of Australia are: Norfolk Island; the Territory of Papua (formerly British New Guinea); the Territory of New Guinea (under Trusteeship Agreement with the United Nations); Nauru (under Trusteeship Agreement with the United Nations); the Territory of Heard and McDonald Islands; the Australian Antarctic Territory; the Territory of Cocos (Keeling) Islands; and the Territory of Christmas Island. There is also the Territory of Ashmore and Cartier Islands deemed to form part of the Northern Territory.

Information on all except Ashmore and Cartier Islands is contained in the following pages, and details of the acquisition of all the Territories will be found on pages 4, 5, 22, and 23 of Chapter 1. More detailed statistics and additional descriptive matter are to be found in the Annual Reports of the Administrations of the various Territories and in the *Northern Territory Statistical Summary* and the *Australian Capital Territory Statistical Summary* issued by this Bureau. Statistics for the Northern Territory and the Australian Capital Territory are also included in chapters dealing with particular subjects.

Responsibility for the general administration of the Northern Territory and the Territories of Norfolk Island, Papua, New Guinea, Nauru, Cocos (Keeling) Islands, Christmas Island and Ashmore and Cartier Islands is vested with the Commonwealth Department of Territories; for the Australian Capital Territory with the Department of the Interior; and for Antarctica and Heard and McDonald Islands with the Department of External Affairs Matters excepted are defence and civil aviation, and, in the Northern Territory and the Australian Capital Territory, public health, justice and the provision of the basic physical services, which are the responsibility of the Department of Health, the Attorney-General's Department and the Department of Works respectively.

### THE NORTHERN TERRITORY

#### General description

##### Area

Upon the extension of New South Wales westward to the 129th east meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 it was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1 January 1911. The total area is 520,280 square miles.

##### Legislation and administration

On 1 January 1911 the Territory was transferred from South Australia to the Commonwealth. The terms were outlined in Year Book No. 15, page 940. For particulars of the administration up to the *Northern Territory (Administration) Act* 1931, by which it was, for the second time, placed in the hands of an Administrator, see Year Book No. 38 and earlier issues.

The *Northern Territory (Administration) Act* 1910-1966 provides for the constitution of a Legislative Council consisting of six official members, three nominated non-official members and eight elected members. A president is elected from among the non-official and elected members. The Council makes ordinances for the Territory, which must be submitted to the Administrator. The Administrator is obliged to reserve Ordinances relating to certain matters, including Crown lands and Aboriginal employment, for the Governor-General's pleasure, but in other cases has a discretionary power either to assent, withhold assent or to return the Ordinance to the Legislative Council with recommended amendments. The Governor-General also has power in respect of a reserved ordinance to recommend to the Administrator any amendments to the laws of the Territory he considers to be desirable arising out of his consideration of the Ordinance. Money votes may be proposed in the Council only on recommendation by message of the Administrator. The Territory elects a member to the House of Representatives, who has the right to take part in debates, but may vote only on matters that relate solely to the Northern Territory.

##### Physiography

The Territory is within the torrid zone, with the exception of a strip about 180 miles wide which lies south of the Tropic of Capricorn.

The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and laterite form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries. The only practicable deep-water port, however, is Darwin.

Inland the country generally is devoid of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the seventeenth or eighteenth parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply for the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

#### **Climata, fauna and flora**

There are two main climatic divisions, the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly all the rainfall occurs in the summer months. Further particulars appear in Year Book No. 6, page 1116.

The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous), and frogs abound. There are many varieties of fresh-water fish and littoral *Mollusca*. Butterflies and beetles are strongly represented. The termite is a pest which is capable of serious damage to wooden buildings unless special preventive measures are taken. A species of the ant builds anthills which sometimes attain great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Some types of native fauna are protected. Buffalo formerly existed in large herds, but their number has been reduced by indiscriminate shooting. Buffalo shooting is, however, now controlled by Ordinance.

The vegetation is north Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. In the coastal regions tropical vegetation grows luxuriantly to the water's edge. In the north, cypress pine, bloodwood and paper-bark timbers are now cut and milled for local building purposes. Cypress pine is resistant to termites. On the wide expanses of plain country in the interior there is little vegetation, the principal orders represented being: *Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Goodeniaceae*, *Leguminosae*, *Utricaceae*.

#### **Population**

*See also the chapters Population and Vital Statistics.*

At the census of 30 June 1966 the population of the Territory, excluding full-blood Aborigines, was 21,319 males, 15,847 females, 37,166 persons. Corresponding figures at the census of 30 June 1961 were 16,206, 10,889 and 27,095 respectively. The European population of the Territory increased slowly from 670 at the census of 1881 to 3,767 in 1918. By 1921 it had decreased to 2,458, and in 1933 was still only 3,306. It had risen to 9,116 at the census of 1947, to 14,031 at the census of 1954 and to 23,599 at the census of 1961.

For particulars relating to the Aboriginal population see the chapter Population. All Aborigines, by virtue of the *Nationality and Citizenship Act* 1948-1966, are British subjects and Australian citizens. Northern Territory Aborigines are equal at law with all other Northern Territory residents, although a few special privileges exclusive to Aborigines have been retained. The *Social Welfare Ordinance* 1964 which repealed the *Welfare Ordinance* 1953-1963 provides for assistance without control for any person who is socially or economically in need of assistance. Reserves for Aborigines comprise an area of 94,025 square miles.

#### **Production**

*See also the chapters dealing with particular subjects.*

#### **Land tenure**

Three-sevenths of the land in the Territory is reserved or unoccupied and unreserved, the remainder, apart from a very small proportion alienated, being held under various forms of lease or licence, which are described in Year Book No. 48, pages 111-12. The following changes should, however, be noted.

*Leases to Mission Organisations* are now granted under the *Special Purposes Leases Ordinance* 1953-1965 for fixed terms or in perpetuity.

*Miscellaneous Leases* are now granted in perpetuity for purposes such as a market garden, plantation, orchard, vineyard, poultry farm, piggery, or the like.

*Darwin Town Area Leases* are granted in perpetuity for business or residential purposes, or both, in the Darwin Town Area.

The chapter Rural Industry, of this issue contains statistical information concerning areas occupied under various forms of tenure.

### Agriculture

Up to the present, agriculture has made little progress in the Territory, although rice, peanuts, tobacco, grain sorghum, bananas, pineapples, citrus fruits, cashew nuts, mangoes, papaws, vegetables, fodder plants, and improved pastures can be grown in certain areas. At the present time commercial agricultural production is practically confined to vegetables and small-scale fruit production (mainly pineapple, citrus and bananas) for local consumption. A small industry is being developed in Townsville lucerne seed production and in the production of hay.

Information concerning scientific surveys (commenced in 1946) conducted by the Commonwealth Scientific and Industrial Research Organization to determine more accurately the potentialities of the Northern Territory and the resulting establishment of an agricultural research station at Katherine and experimental farms at Katherine and Berrimah (near Darwin) is given in Year Book No. 51, page 101, and in earlier issues. Information is given also on the establishment of rice research stations and investigational work carried out and on subsequent rice crop commercial scale operations. The appointment by the Minister for Territories in 1959 of an expert committee to carry out investigations relative to agricultural settlement in the Territory and subsequent developments are also referred to.

### NORTHERN TERRITORY: AREA AND PRODUCTION OF CROPS 1961-62 TO 1965-66

(a) Excludes rice; details are not available for publication. (b) Not available for publication, included in Other crops. (c) Principally fodder crops. (d) Not available for publication.

### Pastoral industry

The pastoral possibilities of certain parts of the Territory were recognised at an early date, and both cattle and sheep raising have been attempted. For various reasons sheep-raising has not been very successful, but the cattle industry has progressed steadily and is continuing to expand, except in the Alice Springs District, which has experienced persistent drought conditions. There is substantial potential for further expansion in the higher rainfall area of the Territory through the introduction of improved pastures and the use of superphosphate.

**NORTHERN TERRITORY: LIVESTOCK  
JUNE 1962 TO 1966**

30 June—	Horses	Cattle	Sheep	Pigs
1962 .	40,809	1,063,528	10,388	2,762
1963 .	38,191	1,086,627	9,469	1,842
1964 .	38,391	1,105,161	10,023	1,806
1965 .	35,997	1,067,327	9,099	2,182
1966 .	38,889	1,031,715	8,875	2,275

**Mining**

During 1965 the value of output of the mining and quarrying industry in the Territory, excluding uranium mining, particulars of which are not available for publication, was \$8,308,000.

The mining of copper ores and concentrates is the most important mining activity in terms of value of output, and accounts for more than half the Territory's total recorded production. Prior to 1956, gold minerals, first mined in 1869, accounted for most of the value of output, but from 1956 onwards gold production has remained relatively constant while copper production has increased. The bulk of the copper and gold is won at Tennant Creek, where the government battery was re-opened in 1958 to encourage gold mining by smaller operators. The government also operates a battery at Mount Wells, about 100 miles south-east of Darwin, for the treatment of cassiterite (tin) and gold ores from that locality.

Plans are now being put into operation to work several large mineral deposits in the Territory, bauxite at Gove Peninsula, manganese on Groote Eylandt, and iron at Frances Creek and Mount Bundy. Lead-zinc deposits at McArthur River and the Woodcutters prospect near Rum Jungle are also being investigated (*see also* the chapter Mineral Industry).

**NORTHERN TERRITORY: MINING AND QUARRYING OPERATIONS, 1962 TO 1965**  
(Excluding uranium mining)

	1962	1963	1964	1965
Number of mines and quarries . . . . .	94	65	84	67
Average number of persons employed during whole year (including working proprietors) . . . . .	424	457	585	688
Salaries and wages paid(a)(b) . . . \$'000 . . . . .	1,520	1,590	2,138	2,867
Total fuel, materials, etc., used . . . . .	1,220	1,394	1,727	2,571
Value of additions and replacements to fixed assets(a) . . . . . \$'000 . . . . .	672	388	2,866	5,677
Value of output (at mine or quarry) . . . . .	5,364	6,480	7,233	8,308
Value of production(c) . . . . .	4,144	5,086	5,506	5,736

(a) Excludes mines employing less than four persons. (b) Excludes drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees. (c) Value of output less cost of power, fuel and light and other materials and stores used; depreciation and maintenance costs have not been deducted.

Natural gas was discovered in the Amadeus Basin in 1964. Combined reserves at Mereenie and Palm Valley are estimated at 1,500,000 million cubic feet. Possible ways of utilisation are being investigated. Petroleum exploration is being carried out in the Northern Territory in permit areas covering some 286,000 square miles of which over one-third is off-shore. Drilling from floating rigs may commence within the next twelve months.

**Forestry**

In February 1966 the Commonwealth Government approved a four-year programme of forest improvement and development to preserve existing forest areas and increase possible timber resources. The programme includes increasing the rate of planting cypress pine from 350 acres a year to 1,000 acres a year by 1969-70 and also makes provision for the employment and training of Aborigines. The programme is being carried out by the Forestry and Timber Bureau but it is planned that the operational functions will be taken over by the Northern Territory Administration as soon as practicable after June 1967. Local production of log timber, mainly cypress pine, amounted to 1,425,757 super feet in 1964-65, but this was insufficient to meet local requirements, and about 3,360,465 super feet of sawn timber was imported from the States and overseas.

**Pearl fisheries**

In 1884 mother-of-pearl shell was discovered in Darwin harbour. Since then the areas fished have extended to the various banks to seaward and along the Northern Territory coast. Because of competition from plastic materials pearling has declined in recent years, but it is hoped that the commercial production of cultured pearls will succeed in replacing the old pearling industry.

**NORTHERN TERRITORY: FISHING AND PEARLING(a), 1961-62 TO 1965-66**

	1961-62	1962-63	1963-64	1964-65	1965-66
<b>General fisheries—</b>

(a) Excludes operations of Japanese pearling fleet. (b) Season ended January.

**Secondary industries**

The secondary industries that have so far been established in the Territory have been largely the service industries normally associated with a developing area, such as home building, electrical repairs, printing, motor and marine engineering, plumbing, welding, joinery, sheet metal work, and blue metal crushing. Major industrial investments by private interests in recent years include two breweries, a bitumen plant, and a factory for the manufacture of milk products, ice cream and aerated waters.

**NORTHERN TERRITORY: FACTORIES, 1961-62 TO 1965-66**

(a) Any factory, workshop or mill in which four or more persons are employed or power other than hand is used. (b) The aggregate of the average number of persons employed in each factory. Includes working proprietors. From 1962-63 figures represent average employment over the whole year; for 1961-62 figures are averages during period of operation. (c) Excludes drawings by working proprietors. (d) Includes water and lubricating oil. (e) Includes also containers, etc., tools replaced and repairs to plant. (f) Value added in process of manufacture (i.e. value of output less value of materials and fuel used). (g) Value of goods produced including amounts received for repair work and other work done. (h) Depreciated or book value at end of year, including estimated value of rented premises and machinery.

## Trade, transport and communication

## Trade

No comprehensive record is kept of the trade between the States and the Territory. The following table shows the values of the principal commodities imported into and exported from the Northern Territory from or to overseas countries during the years 1961-62 to 1965-66.

**NORTHERN TERRITORY: PRINCIPAL OVERSEAS

## Shipping

Shipping services to Darwin are provided from the eastern States by ships of the Australian National Line and from Western Australia by the Western Australian State Shipping Service. Oil tankers carrying supplies of aircraft fuel and other petroleum products, overseas cargo ships and other miscellaneous vessels also visit Darwin. During 1965-66 fifteen cargo and passenger ships from the eastern States and 54 from Western Australia visited Darwin. Fifteen tankers, 37 overseas cargo ships and 101 other vessels also visited the port. Approximately 240,000 tons of cargo were discharged and 30,000 tons loaded at Darwin during the year. A vessel operated from Brisbane serves settlements on the Gulf of Carpentaria, and some mission-owned boats carry cargo from Darwin to mission stations and government settlements along the coast.

## Air services

At 30 June 1966 there were nine government aerodromes and 126 licensed aerodromes in the Territory. The overseas passenger services using the Darwin international airport are Lufthansa (Sydney to Frankfurt); Qantas/B.O.A.C. (Sydney to London); B.O.A.C. (Sydney to Hong Kong); Union de Transports Aeriens (Paris to Los Angeles via Noumea); and T.A.A. on behalf of Transportes Aereos de Timor (Darwin to Baucau). Regular inland services to Darwin, with, in some cases, intermediate stops at Territory centres, are operated by Trans-Australia Airlines and

Ansett-A.N.A. (from Adelaide, Melbourne, Sydney and Brisbane), and MacRobertson-Miller Airways Ltd (from Perth and Derby). MacRobertson-Miller Airways Ltd and Connellan Airways Ltd operate a network of air services throughout the Territory, the latter company's base being at Alice Springs. The Royal Flying Doctor Service also operates aircraft, while charter services can be secured at Darwin and Alice Springs.

### Railways

The Commonwealth Railways Commissioner operates the Central Australia Railway from Port Augusta in South Australia to Alice Springs over a distance of 822 miles, of which about 200 are in the Northern Territory. The line is standard gauge from Port Augusta to Maree, a distance of 217 miles, and 3 ft 6 in from Maree to Alice Springs. The Commissioner also operates the North Australia Railway between Darwin and Birdum on a 3 ft 6 in gauge over a distance of 317 miles. The two inland terminals, Alice Springs and Birdum, are about 630 miles apart and are connected by road transport along the Stuart Highway. Larrimah, on the highway and 6 miles north of Birdum, is the point of trans-shipment for passengers and goods and is, at present, the effective terminal. A road-rail freight service operates between Adelaide and Darwin via Alice Springs.

### Roads

The Stuart Highway, 954 miles long, connects Alice Springs with Darwin and runs via Larrimah and Tennant Creek. The Barkly Highway, 403 miles long, connects Mount Isa (Queensland) with Tennant Creek and joins the Stuart Highway some 16 miles north of Tennant Creek. These highways are used for carrying various freights, including cattle, particularly to and from the railheads at Alice Springs, Larrimah and Mount Isa. The routes are used also for overland tourists and travellers from the southern States to Darwin. With the further development of the pastoral and mining industries in the Territory, road trains are now being used on both highways for the export of cattle and ore. Both roads have good water bores and communications. There are now approximately 11,600 miles of roads in the Territory of which 1,500 miles are sealed.

Work on a programme for reconstruction and development of beef cattle roads was commenced in 1961-62. To date \$10.6 million has been authorised for this work, and actual expenditure to 30 June 1966 was \$8.1 million. The transport of cattle by road is expected to increase the number, quality and value of cattle turned off.

### Posts, telegraph, telephones and wireless

Postal communication is maintained by road, rail and air transport between Darwin and the capital cities of Australia. In addition, vessels belonging to the Western Australian State Shipping Service provide a regular service between Fremantle and Darwin. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

The overland telegraph line, covering a length of 2,230 miles, runs from Adelaide to Darwin, and links Darwin in telegraphic communication with other parts of the world. Long-distance telephone communication is established between Darwin and the capital cities of Australia, and overseas telephone communication through Sydney or Perth is also available.

Regional national broadcasting stations are situated at Darwin, Alice Springs, Tennant Creek and Katherine, and there is a commercial station at Darwin. The majority of homesteads on pastoral leases are equipped with radio transceivers operated under licence from the Postmaster-General's Department. These stations are in daily communication with Flying Doctor bases situated at Alice Springs (Northern Territory), Wyndham (Western Australia), Broken Hill (New South Wales), and Cloncurry (Queensland), and are used for transmission of radio-telegrams and other communications.

## Education

*See also the chapter Education, Cultural Activities and Research.*

### European schools

Schools for European and part-European children in the Territory are conducted for the Commonwealth, on an agreed basis of reimbursement, by the South Australian Department of Education, which is represented in Darwin by an Assistant Supervisor of Education, Northern Territory Schools. In August 1966 there were twenty-three government schools in the Territory, with 5,989 pupils, and four non-government schools, with 898 pupils, providing instruction according to the South Australian curriculum. High schools have been established with classes to Leaving Certificate level at Alice Springs and Leaving Honours level at Darwin.

All children who live more than ten miles from an established school receive an allowance of up to \$320 (\$200 plus \$120 on a graduated scale according to family income) per annum plus fare concessions if they board away from home in order to attend school. Twelve Intermediate exhibitions or ten per cent of the number of candidates, whichever is the greater, are available annually, and carry benefits of \$10. There are also book allowances ranging from \$16 to \$20 per annum for secondary students. Approximately 300 children receive correspondence education under the South Australian Correspondence School system. The radio session 'School of the Air' supplements normal correspondence instruction for certain children in isolated areas.

Fourteen pre-school centres are in operation in the Territory, the staff of all except one being officers of the Northern Territory Administration. A number of scholarships are offered each year for Territory girls to qualify as pre-school teachers.

#### **Special Aborigines schools**

The social, cultural and educational background of the Aborigines has made necessary the establishment of special schools for them. This is regarded as an interim measure only, and policy is that children are transferred into general community schools as they are judged capable of handling the curriculum. From the beginning of the 1956 school year control of these schools passed from the Commonwealth Office of Education to the Welfare Branch of the Administration. Thirty-three schools had been established up to the middle of the year 1966. A special syllabus and series of readers have been prepared for use in these schools. Free mid-day meals, milk, and school clothes are supplied to the pupils. In addition to the thirty-three Administration schools, twelve schools for Aboriginal children were conducted by missions with the aid of Government subsidies. Also, five schools aided by Government subsidies had been established on pastoral properties, and the establishment of others along similar lines is planned. Five pre-school centres for Aboriginal children are operated by the Administration and four others are organised by the missions.

#### **Theoretical training of apprentices**

The recognition that technical school training is an extension of workshop training has led to the introduction of day-time classes which apprentices attend without loss of pay. Apprentices are directed by the Apprentices Board to undertake correspondence courses conducted by the Technical Correspondence School of the South Australian Education Department and the Sydney Technical College, these courses covering the work prescribed for the various trades in South Australia and New South Wales.

### **Aboriginal welfare**

The Commonwealth and State Governments have adopted a common policy of assimilation which seeks that all persons of Aboriginal descent will choose to attain a similar manner and standard of living to that of other Australians and live as members of a single Australian community enjoying the same rights and privileges, accepting the same responsibilities and influenced by the same hopes and loyalties as other Australians. Since the commencement of the *Social Welfare Ordinance* 1964 in September 1964, Aborigines in the Northern Territory have been equal at law with all other residents, although some special benefits have been retained for them. An intensive welfare programme to prepare Aborigines for the demands of modern living is being carried out, and fourteen Government settlements and thirteen mission stations have been established, where Aborigines are encouraged to adopt a settled way of life, and health services, particularly child welfare services, education, housing, vocational training, and employment are provided. Aborigines are also encouraged to take part in the social activities of the community.

### **Finance**

Details of receipts and expenditure of the Territory for the years 1961-62 to 1965-66 are shown in the table following. In this table the receipts and expenditure of the Northern Territory have been classified into a National Accounts form. The table covers transactions relating to the Northern Territory in the Commonwealth Consolidated Revenue Fund and the following trust funds: Northern Territory Government Settlements Canteens, Northern Territory Housing Commission, Northern Territory Housing Loans, and Northern Territory Transport. Details of the financial transactions of the Darwin City Council are also incorporated in the table. Revenue derived by the Commonwealth from income taxes, customs duties, etc., levied in the Northern Territory and expenditure by the Commonwealth in the Northern Territory on such items as defence, civil aviation, railways, etc., and payments to residents from the National Welfare Fund are not included.

THE AUSTRALIAN CAPITAL TERRITORY

General description

The Commonwealth Constitution provides that the Seat of Government of the Commonwealth shall be in the state of New South Wales but distant not less than 100 miles from Sydney. After a number of alternative sites were considered, an area of 911 square miles lying approximately 200 miles south-west of Sydney was transferred to the Commonwealth as from 1 January 1911. A further 28 square miles at Jervis Bay were transferred as from 4 September 1915 to serve as a port for the Territory.

The primary responsibility for administering the Australian Capital Territory lies with the Department of the Interior, whose functions include housing, education, police, and municipal services. Public health, justice and the provision of basic physical services, including water

supply, sewerage and roads, are the responsibility of the Departments of Health, Attorney-General's, and Works. The National Capital Development Commission has the responsibility for the planning and development of the Canberra city area.

The Australian Capital Territory Advisory Council was established in 1930. It has eight elected members and a representative from each of the Departments of Interior, Works, and Health, and the National Capital Development Commission. The Council advises the Minister for the Interior on matters affecting the Australian Capital Territory. Ordinances are submitted in draft form to the Council for advice and comment before being implemented.

From 1911 until 1921 the population of the Australian Capital Territory remained almost static at about 2,000 persons. In 1922 it commenced to rise and by 1927 was around 6,000. The following year, with the transfer of departments from Melbourne, the population passed 8,000, and at the outbreak of the 1939-45 War had reached just under 13,000 persons. During the war growth was again slow, and at the census of 30 June 1947 the population was 16,905 persons. In the post-war period the population increased more rapidly and at the census of 30 June 1954 was 30,315 persons. With further transfers of departments from Melbourne it reached 58,828 persons (including 527 in Jervis Bay) at the census of 30 June 1961. At 30 June 1966 the population was 95,913, made up of 93,197 in Canberra City and 2,716 in rural areas (including Jervis Bay). See also the chapters Population and Vital Statistics.

### National Capital Development Commission

The *National Capital Development Commission Act 1957-1960* provides for a Commission to undertake and carry out the planning, development and construction of the City of Canberra as the National Capital of the Commonwealth. The year 1965-66 was the eighth year of the Commission's operations. Construction work was carried out by means of agency arrangements with the Department of Works and private consultants. Details of expenditure by the Commission in each year from 1961-62 to 1965-66 are included in the table on page 130. Total expenditure in 1965-66 was \$35.1 million, comprising national works, \$1.8m; Commonwealth offices, \$5.3m; Territory works, \$18.4m; city works, \$1.7m; land development, \$6.4m; other \$1.5m.

The following major works were completed during 1966 by the Commission and its agents: Deakin High School; Watson High School, Stage II; Narrabundah High School extensions; North Curtin Primary School; Lyons Primary School; Chifley Primary School; Garran Primary School; Hackett Infants School and South Curtin Infants School; Administration and Library Building, Canberra Technical College; A.C.T. Police Head-quarters; Fyshwick sewage treatment works; Weston Creek sewage treatment works; Corin Dam access road and construction camp; duplication of Canberra Avenue to Fyshwick; construction of Carruthers Street-Yarra Glen interchange and Hughes-Curtin link; roads and parking areas at Curtin shopping centre; Botanic Gardens Herbarium; and Deakin Swimming Pool.

Works under construction at the beginning of 1967 included the following projects: National Library; Anzac Park West Office Building; The Treasury Building; Forestry Research Institute; Woden Valley High School; Pearce Primary School; Torrens Primary School; Telopea Park High School extensions; Corin Dam; Bendora gravity main; water treatment works, Mount Stromlo; Belconnen trunk sewer; Yarra Glen (Deakin-Curtin); Hindmarsh Drive; Paddy's River Road; Commonwealth Gardens.

### Works and services

#### Housing

In 1911 there were only 448 dwellings in the Australian Capital Territory, but by June 1965 the number had risen to almost 21,000. The following are the numbers recorded at successive censuses or surveys over the period: 1911, 448; 1921, 555; 1933, 2,098; 1947, 3,667; 1954, 7,444; 1961, 14,734; 1963, 16,689; 1965, 20,429. Figures for the last two years relate to occupied dwellings in Canberra only. Until the period following the 1939-45 War most houses and flats were built and rented by the Department of the Interior. More recently, particularly over the past four or five years, an increasing number of houses and flats have been built by private enterprise. Between 1961 and 1963 the proportion of privately owned homes and flats rose from 29 per cent to 38 per cent, and by 1965 it was 57 per cent. Public authorities will continue to provide the bulk of all rented accommodation in the foreseeable future. In June 1966, of the total of 23,091 occupied dwellings in Canberra, 9,132 were owned by the Commonwealth. To provide for additional home development six new suburbs have been opened in the Yarralumla Creek Valley, south-west of the former city area. In these suburbs, Hughes, Curtin, Lyons, Garran, Chifley, and Mawson, 3,150 homes were occupied by June 1966. In all parts of the Territory 2,143 houses and 285 flats were completed during 1966.

### Municipal services

Canberra has been developed as a garden city. More than three million trees and many acres of lawns have been planted since 1927. The development of new areas of parkland and the maintenance of existing tree and lawn areas is the responsibility of the Parks and Gardens Section of the Department of the Interior. Municipal services are also provided by the Department of the Interior.

At 30 June 1966, 22,116 meters were connected to the city water supply, drawn through nine service reservoirs from two storages on the Cotter River with a total capacity of nearly 3,500 million gallons. A third storage dam site is currently being developed. In 1965-66 some 4,804 million gallons of water were consumed in Canberra and in addition the system supplied 356 million gallons to Queanbeyan in New South Wales. Treatment works at Weston Creek dispose of Canberra sewage. At 30 June 1966, 345 miles of sewers, 6½ miles of rising sewerage mains and 361 miles of storm water drains were laid.

### Department of Works

Apart from the work it carries out for the National Capital Development Commission, the Department of Works acts as design and supervision agent for other Commonwealth departments and instrumentalities. Total expenditure during 1965-66 on all operations amounted to \$11.2 million (\$10.8 million in 1964-65), comprising: building works—housing, \$130,811; other building, \$5,485,771; engineering works, \$945,672; repairs and maintenance—building, \$2,218,681; engineering, \$2,033,646; purchase of plant, \$345,809. Major works completed during 1965-66 included: Cadets' Block No. 3 at the Royal Military College, Duntroon and the Apollo Tracking Station at Honeysuckle Creek together with a back-up wing at Tidbinbilla. The latter two projects are part of the Manned Space-flight Network. New major works under construction at the close of 1965-66 included Mawson and Belconnen telephone exchange buildings.

## Production

See also the chapters dealing with particular subjects.

### Lands

Reference has been made in earlier issues of the Year Book to the general conditions of land tenure in the Territory and to the area of alienated and leased land, and the chapter Rural Industry of this issue contains statistical information on the subject. (See also § 1. Canberra: Fifty Years of Development, page 123 of Year Book No. 49.)

Under the *Seat of Government (Administration) Act* 1910 Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of the Act. Leases of land in the city area are granted under the *City Area Leases Ordinance* 1936-1961, and leases of other lands under the *Leases Ordinance* 1918-1958. Land is also leased for various purposes in the city area under the *Church Lands Leases Ordinance* 1924-1932 and the *Leases (Special Purposes) Ordinance* 1925-1943, while one lease under the *Church of England Lands Ordinance* 1926 has been granted for church purposes. As considerable portions of the Territory lands are not immediately required in connection with the establishment of the city, large areas have been leased for agricultural or grazing purposes.

The Royal Australian Naval College is situated in the area of about 28 square miles at Jervis Bay acquired from New South Wales for possible use as a port in connection with the Territory. At the southern end of the Territory there are a limited number of holiday leases. Apart from some experimental planting and soil conservation activities, the area is being maintained for possible Commonwealth requirements.

### Forestry

Forestry operations in the Territory were begun on Mt Stromlo in 1915. Plantings up to 1925 were chiefly decorative, but since then a much wider programme has been undertaken. In 1926 a comprehensive review was made of the Territory's potential for forest development and a programme for the development of commercial forests was approved. Most of the better native forest has since been placed under management and following survey and assessment work, forestry operations, including fire-control, have been extended to 100,000 acres of eucalypt forest in the lower Cotter Catchment Area.

Afforestation work has also been undertaken and softwood plantations (mainly *Pinus radiata*) have been established at Uriarra, Stromlo-Green Hills, Pierce's Creek, Kowen, Tidbinbilla, Jervis Bay and Boboyan. Experimental plots have been established at Jervis Bay and in the Brindabella Ranges, and soil conservation plantings made at various locations throughout the Territory. The total area of softwood plantations within the Australian Capital Territory at 30 June 1966 was 28,270 acres of which 26,056 acres were *Pinus radiata*, the balance consisting chiefly of *Pinus ponderosa* and *Pinus nigra*, plus 548 acres at Jervis Bay, mainly *Pinus radiata* and *Pinus elliotii*.

Continued thinning operations have improved all Australian Capital Territory forests so that they now yield a wide variety of products. Poles, board-logs and case timber form the bulk of production, but increasing amounts of fencing timber and pulpwood are now being produced. The yearly output from pine plantations has increased from 2,500 cubic feet in 1930-31 to 1.5 million cubic feet in 1965-66, valued at \$404,000 delivered at purchasing mills in Canberra. Hardwood log production from Jervis Bay forests during 1965-66 was 68,000 cubic feet valued at approximately \$22,000 at the purchasers' mill. Only small quantities of hardwood remain unexploited.

Up to 30 June 1966 a total of 20.3 million cubic feet of pine logs had been cut from plantations, while hardwood production from the Australian Capital Territory, including Jervis Bay, totalled 4.2 million cubic feet.

#### Agricultural, pastoral and secondary industries

During 1965-66 the production of the more important items of the agricultural and pastoral industry was: wheat 27,855 bushels; wool 1,873,000 lb.; whole milk 1,026,000 gallons; meat (carcass weight, fresh), 3,740 tons. The numbers of livestock depastured at 31 March 1966 were: horses 622; cattle 13,361; sheep 258,179.

As in the Northern Territory, the secondary industries established in the Australian Capital Territory are largely the service industries associated with the growth of the Territory.

#### AUSTRALIAN CAPITAL TERRITORY: FACTORIES, 1961-62 TO 1965-66

	1961-62	1962-63	1963-64	1964-65	1965-66

„ „ land and buildings(h) . . . .	5,670	4,556	11,668	20,583	22,067
„ „ plant and machinery(h) . . .	3,214	4,694	5,104	9,682	10,156

(a) Any factory, workshop or mill in which four or more persons are employed or power other than hand is used. (b) The aggregate of the average number of persons employed in each factory. Includes working proprietors. From 1962-63 figures represent average employment over the whole year; for earlier years figures are averages during period of operation. (c) Excludes drawings by working proprietors. (d) Includes water and lubricating oil. (e) Includes also containers, etc., tools replaced and repairs to plant. (f) Value added in process of manufacture (i.e. value of output less value of materials and fuel used). (g) Value of goods produced including amounts received for repair work and other work done. (h) Depreciated or book values at end of year including estimated value of rented premises and machinery.

#### Transport and communication

Canberra is connected with the railway system of New South Wales at Queanbeyan by a line 4½ miles long. This line was opened for goods traffic on 25 May 1914 and for passenger traffic on 15 October 1923. Direct or linking services operate between Canberra and Sydney and Canberra and Melbourne. Two airlines provide several services daily each way on the Sydney-Canberra-Melbourne route. Regular motor-coach services link Canberra with towns in New South Wales, Victoria and South Australia. The total length of roads in the Territory at 30 June 1966 was: bitumen and concrete, 440 miles; gravel, 231 miles; other formed roads, 90 miles; total, 761 miles. There are three radio broadcasting stations in the Territory, 2CY and 2CN of the national broadcasting system and 2CA, a commercial station, and two television stations, ABC Channel 3 of the national broadcasting system and CTC Channel 7, a commercial station.

## Social

*See also* the chapter Education, Cultural Activities and Research.

### Education

The *Education Ordinance 1937-1966* provides for the compulsory attendance at school of children between the ages of six and fifteen years. The Commonwealth Department of the Interior is primarily responsible for the education of children in the Australian Capital Territory. By agreement, however, the New South Wales Department of Education arranges the teaching programme in accordance with its own curriculum and provides the teaching staff. It is reimbursed for expenses incurred.

At 31 December 1966 there were eight public secondary schools in Canberra providing courses proceeding to the Higher School Certificate. Twenty-four schools provided courses for children in infants and primary classes, including one in the Jervis Bay area and three in rural districts. There were also: a school for mentally handicapped children; a school for physically handicapped children, located at Canberra Community Hospital; a school for deaf children, located at the Ainslie Public School; a therapy clinic for children with speech defects; and a clinic for educational guidance. A further two primary schools were scheduled to commence at the beginning of the 1967 school year.

At 31 December 1966 there were seventeen private schools in Canberra. Of these, St Edmund's Christian Brothers' College, the Catholic Girls' High Schools at Braddon and at Griffith, the Daramalan College, the Canberra Grammar School (Boys), and the Canberra Church of England Girls' Grammar School provide courses leading to the Higher School Certificate.

Thirty-four pre-school centres, including two occasional care centres and a mobile unit which visits outlying areas, provide pre-school facilities for approximately 2,500 children between the ages of three and five years.

The Canberra Technical College, which follows generally the curriculum set by the New South Wales Department of Technical Education, provides trade, post-trade, certificate, and some hobby courses. In 1966 the Technical College provided instruction in ninety-nine courses in twenty schools. Student enrolments were 4,879.

An area of about 250 acres has been set aside at Acton for the Australian National University. Provision has been made for the University to establish such research schools as may be thought desirable, including a School of Medical Research and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. Provision for undergraduate studies and some post-graduate study is made by the School of General Studies.

### Health

The Canberra Community Hospital serves the population of Canberra and surrounding districts. At 30 June 1966 it had 481 beds, an honorary medical staff of 206, 12 salaried medical staff, and a nursing staff of 485. Extensions are being made to the hospital to enable it to cope better with the needs of Canberra's growing population. For further information *see* the chapter Public Health.

### Justice

The Australian Capital Territory has a Supreme Court and a Court of Petty Sessions. There is an Australian Capital Territory Police Force, which at the end of 1966 numbered 205, including 4 policewomen. Of the total, 91 were engaged on general duties, the traffic branch comprised 45, including the specialist water police and accident investigation squads, 28 were engaged in criminal investigation, 15 on prosecuting, 2 in caring for the Police Boys Club, 1 in the Jervis Bay area, and there were 23 recruits on full-time training. *See also* the chapter Public Justice.

## Finance

In the following table the receipts and expenditure of the Australian Capital Territory have been classified in a National Accounts form. The table covers transactions relating to the Australian Capital Territory in the Commonwealth Consolidated Revenue Fund and the following trust funds: Australian Capital Territory Electricity Supply (to 1962-63), Australian Capital Territory Forestry, Australian Capital Territory Housing, and Australian Capital Territory Transport. In addition, details of the financial transactions of the following semi-governmental authorities are also covered: Australian Capital Territory Electricity Authority (from 1963-64), Commonwealth Brickworks, and National Capital Development Commission. Revenue derived by the Commonwealth from income taxes, sales tax, etc. levied in the Australian Capital Territory and expenditure by the Commonwealth in the Australian Capital Territory on such items as defence, civil aviation, railways, etc., and payments to residents from the National Welfare Fund are not included.

### NORFOLK ISLAND

#### General description

Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° S. longitude 168° E. approximately. Its total area is approximately 14 square miles, the island being about 5 miles long and 3 miles wide. It is 1,035 miles from Sydney and 660 miles from Auckland. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side and the landing place at Cascade on the northern side, almost inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 45° and 81° F. with a mean of 68° F. The average annual rainfall is 56 inches.

After serving as a penal station from 1788 to 1813 and from 1825 to 1855 Norfolk Island in 1856 became the home of the remaining descendants of the *Bounty* mutineers. At the Census of 30 June 1966 the population was 1,152, consisting of 566 males and 586 females.

### Administration

In 1856 the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896 it was made a dependency under the Governor of that Colony, and finally, by the passage of the *Norfolk Island Act* 1913, it was accepted by the Commonwealth Parliament as a territory of Australia. It is controlled by the Minister for Territories through an Administrator. The Norfolk Island Council is established pursuant to the *Norfolk Island Act* 1957-1963 and is constituted in accordance with the provisions of the *Norfolk Island Council Ordinance* 1960-1964. The Council may consider and tender advice to the Administrator on any matter affecting the peace, order and good government of Norfolk Island, and must be consulted on certain legislative and financial matters. The Council comprises the Administrator as *ex officio* chairman and voting member and eight members elected biennially.

### Economic activity

The major economic activities of the island are the tourist trade, primary production and Government instrumentalities.

*Primary industries.* The soil on the island is particularly fertile, the climate equable and the rainfall fairly evenly distributed except for a pronounced dry period in November. This enables a wide range of temperate and semi-tropical products to be cultivated. However, the island's comparative isolation presents trading difficulties, and production of bean seed, formerly the major export, has declined rapidly since 1962-63.

Fish abound off the island. In the past a number of ventures have been formed to exploit this resource but they have been short-lived, mainly because of the lack of a sheltered harbour. A modern whaling station was started on the island in 1955, and production commenced during the second half of 1956. The quota of 150 humpback whales in 1956, 120 in 1957 and in 1958, 150 in 1959, and 170 in 1960 and in 1961, was caught and processed at the station. Owing to a marked scarcity of whales, however, only four were caught in 1962, and the station has been closed down.

An active forestry programme is being carried out to increase the resources of Norfolk Island pine and to introduce suitable types of eucalypts.

*Tourists.* The unique history and unusual beauty of the island have always attracted a number of tourists. Before the 1939-45 War the only means of transport to the island was by ship, but the building of the aerodrome in 1943 made the island far more accessible for tourists, and the number of tourists has increased steadily during recent years. There are at present three licensed residential hotels and five guest houses; additional accommodation is being planned.

*Government instrumentalities.* A large proportion of the population is employed by Commonwealth Government instrumentalities, namely: Department of Civil Aviation, Norfolk Island Administration, and Department of the Interior (Meteorological Branch). The bulk of the finance for the operation of these instrumentalities is supplied by the Commonwealth Government and this greatly increases the income of the island.

### Trade, transport and communication

Imports to Norfolk Island since the 1939-45 War have risen from \$65,000 in 1945-46 to \$2,142,000 in 1965-66. In 1965-66 the major proportion (\$1,243,000 or 58 per cent) came from Australia, while New Zealand and Pacific Islands supplied \$148,000 or 6.9 per cent. Exports rose from \$18,500 in 1945-46 to \$420,000 in 1960-61, but had declined to \$308,000 by 1965-66, after whaling had ceased in 1962-63. Exports to Australia, the principal market, amounted to \$205,000 in 1965-66, while exports to New Zealand and to Pacific Islands amounted to \$100,000. No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are the produce or manufacture of Norfolk Island, shipped direct to Australia, and not goods which if manufactured or produced in Australia would be subject to excise duty.

A shipping service to the island is maintained at approximately six-week intervals from Sydney via Norfolk Island to the New Hebrides, Solomon Islands and other island groups and thence back to Sydney, while other vessels plying between Sydney and Noumea call at Norfolk Island about every three weeks. Shipping between the island and New Zealand is infrequent.

A twice-weekly passenger and air freight service between Sydney and Norfolk Island, maintained by Qantas Empire Airways Ltd, extends to New Zealand under charter to Air New Zealand Ltd.

There are approximately fifty miles of usable road on the island. As a substantial section of the population possesses private motor cars, and taxi-cab and bus services are available, transport is almost exclusively by motor vehicle.

A limited telephone service is operated during business hours with 24-hour connections to emergency services. The Overseas Telecommunications Commission provides a radio telegram service to Sydney.

### Education

Education is free and compulsory up to the age of fifteen years. The school, which is conducted by the New South Wales Department of Education, conforms to the Australian standard of public education, ranging from kindergarten to the School Certificate examination. The teachers are provided by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30 June 1966 was 228.

### Judiciary

The judicial system of Norfolk Island consists of a Supreme Court and a Court of Petty Sessions. The Supreme Court is the highest judicial authority in the Territory and is a superior court of record with original criminal and civil jurisdiction. The jurisdiction of this Court is exercised by one judge sitting in Court or, to the extent and in the cases provided by or under ordinance, sitting in Chambers. The jurisdiction of the Court of Petty Sessions is exercised by a Chief Magistrate or any three magistrates other than the Chief Magistrate.

### Finance

The revenue of the Territory, together with an annual grant from the Commonwealth Government for administrative expenses, is paid to the credit of the Norfolk Island Trust Fund, and advances for administrative and developmental expenses are drawn from the account. The principal items of revenue and expenditure for the five years 1961-62 to 1965-66 were as follows.

#### NORFOLK ISLAND: REVENUE AND EXPENDITURE, 1961-62 TO 1965-66 (\$'000)

### PAPUA AND NEW GUINEA

The information under this heading is applicable to both the Territory of Papua and the Trust Territory of New Guinea. For details of the respective Territories *see* pages 143 (Papua) and 149 (New Guinea) and following pages.

### Administration

The *Papua-New Guinea Provisional Administration Act 1945-1946*, which provided for the transfer back of control from the military authorities to civil authorities after the 1939-45 War, was repealed by the *Papua and New Guinea Act 1949*, which came into force on 1 July 1949.

The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provided for an Administrative Union of the Territory of Papua and the Territory of New Guinea with one Administrator, a Legislative Council and an Executive Council, one Supreme Court, and one Public Service.

For an outline of the development of the Legislative and Executive (later Administrator's) Councils between 1949 and 1963, see Year Book No. 51, page 117.

In May 1963 the Commonwealth Government passed an amendment to the Papua and New Guinea Act, making provision for a House of Assembly of 64 members to replace the Legislative Council. The House now consists of 10 official members appointed by the Governor-General on the advice of the Administrator, 44 members elected by the people of the Territory on a common roll in 44 open electorates, and 10 non-indigenous persons elected on a common roll in 10 special electorates comprising one or more open electorates. The first elections for the House of Assembly were held in February-March 1964, and the inaugural meeting of the new House convened on 8 June 1964.

The 1963 Act also increased the membership of the Administrator's Council from 7 to 11, seven of whom must be elected members of the House of Assembly.

In October 1966 the Commonwealth Parliament passed a further amendment to the Papua and New Guinea Act, providing for an increase in the membership of the House of Assembly to 94. After the elections due to be held early in 1968 the House will comprise 69 members representing open electorates, 15 from regional electorates and 10 official members.

Local government was introduced in 1949 by the Native Village Councils Ordinance which was replaced by the *Local Government Ordinance* 1963. The Administrator may establish by proclamation local government councils with authority in defined areas. Provision is also made for the establishment of multi-racial local councils.

### Judiciary

The courts which exercise jurisdiction within the Territory are: the Supreme Court of the Territory of Papua and New Guinea, District Courts (Papua and New Guinea), Local Courts and Children's Courts (Papua and New Guinea), and Warden's Courts.

The Supreme Court is the highest judicial authority in the Territory and has unlimited criminal and civil jurisdiction. District Courts have criminal jurisdiction over the less serious offences which are punishable on summary conviction, but have no jurisdiction to try treason crimes, misdemeanours and other indictable offences. They also exercise a limited civil jurisdiction. The Local Courts exercise a substantially similar jurisdiction but at a more subordinate level. The Administrator has power to establish, in respect of each gold-field or mineral field, warden's courts with jurisdiction over civil cases respecting mining or mining lands held under the *Mining Ordinance* 1937-1966 and offences against the mining laws of the Territory.

In addition, there is the Land Titles Commission set up under the *Land Titles Commission Ordinance* 1962-1966 to inquire into and determine rights in land, particularly native land. The Commission has the particular function under the *New Guinea Land Titles Restoration Ordinance* 1951-1966 to inquire into and determine claims to interest in land where the official records have been lost or destroyed as a result of the Japanese invasion of New Guinea. For the purposes of the latter Ordinance the jurisdiction of the Commission is exercised by the Chief Commissioner or a Commissioner appointed under the *Land Titles Commission Ordinance* who is a qualified legal practitioner.

### Agriculture and animal industry

#### Soils

Although a large part of Papua and New Guinea is covered by skeletal soils unsuitable for agriculture, there are extensive areas in all districts where fertile soils occur suitable for growing a wide range of crops. Most of the agriculture of the Territory up to the present has been on soils on the coastal plains, which, apart from the swamp soils, consist mainly of alluvium and podsolised alluvium. So far these have been mostly under coconut plantations, although other crops such as rubber, coffee and cocoa have also been grown. The swamp soils, of which there are extensive areas in the delta plains and other parts of the Gulf of Papua and in smaller areas, are found intermittently around the coasts and along the lower reaches of the rivers, and are in general quite unsuited to any form of agricultural development.

Volcanic soils probably offer the greatest prospects for development. They are found mostly on the central plateau and southern foothills of the main island, but there are also areas in New Britain (particularly in the Gazelle and Willaumez Peninsulas), Bougainville and New Ireland, as

well as in numbers of smaller islands. Other rich soils are the alluvials of the river valleys. The largest single area of this type is in the trough occupied by the Ramu and Markham Rivers.

### **Climate**

The climate, particularly the rainfall, over so wide an area as Papua and New Guinea, with its numerous islands and varying elevations, naturally presents many variations. Generally speaking the climate is moist and tropical except at high altitudes. There are only small differences in both daily and seasonal extremes. The Territory has no winter and summer, and no great variation in day-length over the year. The two seasons which are experienced are generally described as the 'south-east' and the 'north-west', corresponding with the periods of the year when the south-east trade winds and the north-west monsoons direct the main Territory air-flow. The south-east season prevails approximately from May to October, the trade winds attaining maximum velocities during July and August. The north-west monsoon operates over a considerably shorter period, from the end of December to about March. During the periods between these seasons, November and early December and about March to April, there are two short spells of calm weather.

Rainfall varies considerably from an average annual rainfall of 245 inches at Gasmata in New Britain and 231 inches at Kikori in Papua to about 88 inches at Wewak in New Guinea and 40 inches at Port Moresby.

Although the Territory has no summer and winter it has a wide temperature range, due to differences in altitude, varying from an absolute highest temperature of about 100° F. along the coast to freezing point on its highest peak, Mt. Wilhelm (14,762 ft).

Humidity in the Territory is very high throughout the year. Some coastal stations register an average relative humidity of more than 90 per cent. Humidities below 60 per cent are rare at coastal stations, average figures varying from 80 per cent at 9 a.m. to 65 per cent at noon and 75 per cent at 3 p.m. Humidity in mid-mountain forests appears to be higher than in the lowlands, while in the mossy forests there are periods when the whole belt is saturated.

### **Land tenure**

The *Land Ordinance* 1962 of the Territory of Papua and New Guinea, which came into operation in 1963, replaced much land legislation previously in force separately in the two Territories. This simplification in legislation was a major step towards applying uniform principles to land tenure throughout the whole of the Territory of Papua and New Guinea. All land in the Territory other than native land or land subject to any estates, rights, titles, or interests in force from time to time is Administration land.

There is considerable variation throughout the Territory in the nature of customary ownership of land. In most areas some rights remain in the landholding group, and individuals within the group have limited rights of use, either for life or for a shorter period. Thus the normal system by which the rights of ownership in land use are acquired is by birth to a landholding group. Transfer of rights between individuals by sale and purchase appears to have been unusual in the past, but this practice is now an established custom in some localities and appears to be increasing. Inheritance may be based on either patrilineal or matrilineal descent, or both. In parts of the Territory, however, there is a tendency for the whole inheritance system to change, particularly in communities where it is based on matrilineal descent. Following a close study of the problems in relation to land holdings by indigenes, the Government has laid down the following broad principles of policy.

The ultimate and long-term objective in Papua and New Guinea is to introduce throughout the Territory a single system of land holding regulated by the central Administration by statute, administered by the Department of Lands of the central Administration and providing for secure individual registered titles after the pattern of the Australian system.

Only the Administration working through the Department of Lands, Surveys and Mines and through the Registrar of Titles may issue and register land titles.

Land subject to native custom remains subject only to native custom until it is taken out of custom either by acquisition by the Administration or by a process, provided for by the *Land (Tenure Conversion) Ordinance* 1963, of conversion of title to an individual registered title.

Upon either acquisition or conversion of title compensation is provided in respect of extinction of rights under native custom.

Land held under native custom may not be acquired outside of native custom by other than the Administration. Land may not be acquired by the Administration except for prescribed public purposes unless the native owners are willing to sell and the Administration is convinced, through its Department of District Administration, that the land is not required by them, and conversion of title from native custom to individual registered title may take place only if all those interested in the land under native custom consent to conversion and the method of conversion.

The services of Commissioners under the *Land Titles Commission Ordinance* 1962-1966 are used, as a first priority, on investigations into claims by the Administration that land is ownerless and may therefore be declared administration land, on investigation into the ownership under native custom of land proposed to be acquired by the Administration, on settlement of disputes about the ownership of land held under native custom, and on investigations into the rights held under native custom in land proposed to be converted to individual registered title. The Commissioners, as opportunity offers, continue investigations into the holding of land under native custom; the results of such investigations are recorded for use in connection with future acquisitions or conversions of title.

The legislation and administrative steps necessary to put the remainder of this policy into effect are well advanced.

#### Suitable crops

The crops which can be grown in Papua and New Guinea include coconuts, coffee, tea, rubber, cocoa, fibres, rice, pepper, tobacco, peanuts, kapok, cassava, pyrethrum, ginger, cinchona, nutmeg, vanilla, tropical fruits and vegetables, sago, and tung oil, but of these the only crops of any commercial importance are coconuts, cocoa, rubber, coffee, peanuts, pyrethrum and passion fruit. Major developments in the production of tea, pyrethrum and oil-palm are under way.

#### Non-indigenous rural production

In 1965-66 there were 1,218 holdings in use by non-indigenous persons, 348 being in Papua and 870 in New Guinea. The total area of these holdings was 1,020,854 acres, 277,121 in Papua and 743,733 in New Guinea. The following tables summarise the information available for principal activities.

**Livestock on non-indigenous holdings**

A number of British breeds of cattle are represented, but for best results the use of Zebu cross-bred types of cattle is necessary in virtually all beef cattle areas of the Territory. For dairying the Jersey seems to be the best breed and adapts admirably to tropical conditions. Sheep have not so far been successful in Papua and New Guinea.

Central abattoirs controlled by the Administration have been set up at Lae and Port Moresby and there are smaller private slaughterhouses at other centres.

The following table shows the numbers of the various kinds of livestock on non-indigenously occupied holdings in Papua and New Guinea at 31 March 1966.

### Native agriculture

Most of the indigenous inhabitants of Papua and New Guinea are agriculturalists producing fruit and vegetables for their own consumption. The crops grown vary according to environment and altitude and include yams, taro and sweet potatoes, coconuts, bananas, papaws, maize, sugar cane, cassava, beans, peanuts, rice, cucurbits, and tobacco. Sago is the staple food in the extensive semi-inundated areas which occur along the lower valleys of the major rivers. In these areas it is cut largely from naturally occurring stands. In other parts of the country small areas of sago are grown along stream banks and in swampy patches and are regarded as a reserve in times of poor harvest. In recent years the indigenes have taken up the production of introduced crops such as peanuts, rice, cucurbits, and maize for their own consumption, and cocoa, coffee and pyrethrum for export. Some small-scale rubber growing is now being undertaken. In coconut areas large quantities of copra are produced. In 1965-66 indigenous production of copra was 34,500 tons and that of cocoa and coffee, 6,800 tons and 4,000 tons respectively. In many localities the indigenes follow a farming system known as bush fallowing rotation, which is described in Year Book No. 48 and earlier issues.

The growing of food is done both by the men and the women. The division of work is usually clearly defined within the village itself, but this division is not necessarily the same in all areas. Generally the felling of forests is done by the men, and carrying the harvested food home to the village is done by the women. Other work, however, such as cultivating, planting and weeding may be done by either men or women according to the customs of the particular village or area.

The advancement of native agriculture for local food supply and improved land use in village gardens as well as for economic production of crops for sale have a high priority in Government policy for the Territory. A five-year (1962-63 to 1966-67) programme for intensification of agricultural work among the indigenous inhabitants is being implemented.

### Survey of indigenous agriculture and ancillary surveys, 1961-62

A survey of the agriculture of indigenes of Papua and New Guinea was carried out in 1961-62 by the Territory Bureau of Statistics in conjunction with the Commonwealth Bureau of Census and Statistics and the Territory Department of Agriculture, Stock and Fisheries. A comprehensive report on the surveys was published by the Territory Statistician in 1963, and reference should be made to this for further information. A summary of the principal results of the survey appears on pages 1104-10 of Year Book No. 52.

### Co-operative societies

Co-operatives are under the supervision and guidance of a Registry of Co-operatives within the Department of Trade and Industry, and trained staff are stationed in districts throughout the Territory. Societies fall into two main categories, primary and secondary. The primary consist of marketing and consumer retailing bodies dealing directly with individual members. A society which combines both these activities is termed a dual purpose primary. Secondary organisation is represented by associations of societies, formed to achieve an amalgamation of purchasing power in retail consumer store operation and marketing volume in relation to agricultural production, and to concentrate capital to facilitate the purchase of large assets such as shipping, land transport, agricultural machinery, etc.

For the year ended 31 March 1966 primary societies numbered 303, with a membership of 102,120, a total capital of \$1,823,091, and a turnover of \$5,109,805. Secondary organisations numbered 14, with 242 member societies, a total capital of \$623,011, and a turnover of \$1,306,471.

### Indigenous labour

At 31 March 1966 approximately 94,200 indigenes were engaged in wage employment, 66,300 of these being employed by private enterprise.

Minimum wages and conditions of employment for indigenous workers are prescribed under the *Native Employment Ordinance* 1958-1965. An employer is required to pay a minimum cash wage to every worker employed by him and provide the worker, and his family in appropriate cases, with food, clothing, cooking and eating utensils, towels, soap and other articles, medical attention, and, where necessary, accommodation. The estimated minimum cost of providing these entitlements, including accommodation, is \$173.00 a year per worker. The major portion of the workers employed under the conditions prescribed under the Ordinance are unskilled rural workers.

The legal minimum cash portion of the wage has been \$39.00 a year for the first year of employment and \$45.50 for subsequent years. Following the report of a board of inquiry which investigated rural wages and related matters, legislation is being introduced in 1966-67 to increase these rates to \$52.00 a year in the first year, \$58.50 in the second year, and \$65.00 in the third and subsequent years.

Industrial agreements negotiated between representatives of workers and employers in recent years have covered an increasing number of workers in urban areas. These agreements cover workers in the towns of Port Moresby, Rabaul, Lae, Madang, Wewak, Goroka, Popondetta,

Mount Hagen, Kavieng, and Samarai, providing for rates of payment of a total cash wage per week as follows: Port Moresby, Lae and Madang, unskilled adults and married male juniors \$6.50, unmarried juniors \$6.00; Rabaul, both rates \$6.50; elsewhere, both rates \$6.00.

The agreements at Rabaul, Port Moresby and Kavieng have been declared by the Administrator-in-Council to be common rules, i.e. they are binding on all employers in these towns.

Agreements entered into in various localities and which have been registered as awards under the Territory's Industrial Relations Ordinance relate to: annual leave and sick leave (two weeks leave on full pay and six days sick leave per annum); the employment of qualified tradesmen (weekly rates of pay \$14.00 to \$16.00 for second class tradesmen and \$18.00 to \$20.00 for first class tradesmen); rates of pay and conditions of employment of stevedoring workers and ships' crews; tradesmen who have not completed a formal approved apprenticeship (weekly rates of pay \$15.00 to \$17.00); and rates of pay and conditions of employment of workers in the timber industry.

There has been a continued expansion of the trade union movement since industrial legislation for the Territory was introduced in March 1963. In March 1967 fourteen associations with a membership of 17,314 had been registered as industrial organisations of workers under the Industrial Organizations Ordinance.

Provision is made in other legislation for the establishment and maintenance of modern standards of industrial safety and for the payment of compensation for injury or disease arising out of, or in the course of, employment.

A local apprenticeship scheme was inaugurated in 1955. An Apprenticeship Board, comprising representatives of private enterprise and government, advises the Administration on apprenticeship matters. At 31 March 1967, 239 apprentices had received trade certificates and 1,086 were in training.

### Secondary industries

Until recent years secondary industry, apart from several small service industries, was associated largely with the processing of local products for export. Initially this was confined to the processing of copra, fermenting of cocoa and coffee, and the curing of rubber, activities usually carried out on or near plantations. Then followed secondary industries in their own right with the establishment of a coconut oil plant, plywood factories, and a factory producing passion-fruit pulp and juice.

The emphasis has since tended to move to industries serving the growing internal market and using, in many cases, imported raw materials. These include the manufacture of cigarettes, twist tobacco, wire products, building materials, paints, concrete products, oil drums, and industrial gases; the assembly of electrical appliances; and boat building, brewing and furniture making. A wide variety of service industries has also been established, such as engineering workshops, plumbing establishments, motor repairs, and electrical services. Secondary industries processing primary products are still being established, a recent example being a plant to extract pyrethrum.

### TERRITORY OF PAPUA AND NEW GUINEA: SUMMARY OF FACTORY OPERATIONS, 1964-65 AND 1965-66

(Source: *Production Bulletin*, Part II: *Secondary Industries*, Bureau of Statistics, Papua)

	Papua		New Guinea		Total

### Finance

#### Revenue and expenditure

Information on the financial operations of each Territory will be found on pages 147-8 and 153-4.

#### Taxation

The main forms of taxation are income tax, personal tax and import duties.

*Income Tax* was imposed on 1 August 1959 to operate from 1 July 1959. The scale of taxation is about 50 per cent of the tax payable on the same taxable income in Australia. Deductions for dependants the taxpayer is maintaining and maximum deductions for medical, dental and educational expenses are considerably higher than those allowed in Australia. The tax on public companies is at a flat rate of 20c in the \$1, which is little more than half the predominant rate of company tax in Australia, while on private companies the rate is 12.5c in the \$1 for the first \$10,000 and 17.5c in the \$1 for the remainder, and generally comparable deductions are allowed. On 1 January 1958 a *Personal Tax* was introduced for all males (including non-indigenous) in Papua and New Guinea of 18 years of age and over. The maximum tax is \$4 per annum; the tax assessed is subject to the taxpayers' ability to pay, and consequently large areas have been exempted. Native Local Government Councils (which are formed voluntarily by the indigenes) are, however, empowered to levy taxes on villagers for the purpose of providing for local services carried out by the Councils. These taxes are set off against the indigene's Personal Taxation.

The present *Customs Tariff* provides high revenue rates on imports of ale, spirits, tobacco and cigarettes, timepieces, cigarette papers, fancy goods, and jewellery, but allows entry of most necessities affecting living and building costs duty free or at a low rate of duty. Under the Customs Tariff, plant, machinery and chemicals to be used mainly for industrial and developmental purposes are generally duty-free. A by-law covers goods imported by passengers. No preferential rates are specified in the schedule. Export duties imposed on copra, cocoa, rubber, mother-of-pearl, trochus and burgos shell, and gold were repealed in July 1959.

Provision is made in the *Australian Customs Tariff (Papua and New Guinea Preference) 1936* for the free entry into Australia of certain agricultural goods produced in and imported direct from the Territory (*see* the chapter Overseas Transactions). In addition, goods produced or manufactured in the Territory and imported directly into Australia are exempted from primage duty.

To encourage the development of secondary industry, complete exemption from Territory income tax for a period of five years may be granted to companies engaging in approved new pioneer industries. Exemptions from Australian income tax may also be granted on dividends paid out of the income of such companies to Australian residents.

### Banking

Average weekly deposits of cheque-paying banks in the Territory of Papua and New Guinea for the year 1965-66 were \$29,176,000 and loans, advances, etc., \$9,447,000. Average weekly debits to customers' accounts amounted to \$10,452,000. Savings banks depositors' balances at 30 June 1966 amounted to \$25,833,000, comprising indigenous \$9,182,000 and non-indigenous \$16,652,000, having increased since June 1957 from \$2,134,000 and \$5,802,000 respectively.

## Census of Papua and New Guinea, 1966

### Introduction

Censuses of the non-indigenous population of the Territory of Papua and New Guinea have been taken in conjunction with censuses of the Commonwealth of Australia. For the indigenous population of the Territory of Papua and New Guinea, estimates of size, geographic location, and the broad age distribution of the population were available from the results of the Department of District Affairs census (formerly known as the Tax Census). This was conducted over most of the Territory, but was continuous rather than conducted at a common date for all areas covered. No regular pattern of operations was adopted, although once the census had been taken in an area it was in general repeated fairly frequently. Although these estimates were of great value, the limitations of the information on population characteristics and the lack of simultaneous collection for all areas made them insufficient for many purposes. The 1966 Census was therefore planned to cover both indigenous and non-indigenous populations, and thus superseded the traditional census of non-indigenes.

Figures for the non-indigenous population as enumerated at censuses held in conjunction with Commonwealth censuses and estimates of the indigenous population based on the Department of District Affairs censuses are set out below.

### TERRITORY OF PAPUA AND NEW GUINEA POPULATION AT CENSUSES, 1921 TO 1961

Year	Indigenous					Non-Indigenous		
	Enumerated			Persons estimated	Total persons	Males	Females	Persons
	Males	Females	Persons					
PAPUA								
1921	59,825	52,687	112,512	..	..	1,408	670	2,078
1933	..	..	170,836	..	..	1,232	941	2,173
1941	..	..	..	..	..	..	..	..
1947	..	..	..	..	..	2,057	1,182	3,239
1950	117,455	104,474	221,929	146,630	368,559	..	..	..
1954	151,464	134,732	286,196	202,200	488,396	3,867	2,446	6,313
1961	236,676	209,632	446,308	67,340	513,648	5,490	4,304	9,794
NEW GUINEA								
1921	(a) 100,445	(a) 66,276	(a) 166,721	..	..	2,502	671	3,173
1933	218,218	182,911	401,129	..	..	3,709	1,507	5,216
1941	324,830	318,988	(b) 684,284	300,000	984,284	..	..	..
1947	..	..	..	..	..	4,369	1,831	6,200
1950	415,939	354,116	770,055	301,050	1,071,105	..	..	..
1954	538,113	472,480	1,010,593	184,714	1,195,307	7,201	4,241	11,442
1961	721,806	647,277	1,369,083	64,300	1,433,383	9,158	6,378	15,536

(a) 1920: figures for 1921 not available. (b) Includes 34,087 indentured labourers, 1,127 native constabulary, 4,823 attending approved mission schools, and 429 patients at Anelaua Leprosarium and Taskul Observation Colony (New Ireland), for which particulars of sex are not available.

It was envisaged that, because of lack of resources, the inhabitants of only about ten per cent of the rural villages would be included in the census together with the entire non-village population, both indigenous and non-indigenous, and that the collection of information would be by personal interviews, except in cases of householders wishing and able to fill in a census schedule.

### Development operations

In October and November 1965 a large scale pre-test was held in several village areas. This test proved the feasibility of census operations in villages, and provided information on which to decide the type of schedule, the size of interviewing team, and the required level of education of interviewers. The rate of enumeration achieved in the test confirmed the belief that sampling techniques would have to be used if the census was to be completed with the resources available.

A small pre-test held in an urban settlement in Port Moresby in November 1965 was followed by a full pre-test of urban operations in January 1966. It was not until the results of this test were available that it was definitely known that a census was possible and by what methods it could be carried out. The January field trials led to considerable changes in the wording of census forms, and to substantially complete drafts of instructions for collectors and interviewers.

As a final test of the suitability of the census forms and procedures, and as a test of the training programme, a further field trial was held in March. As a result of this field trial a few minor amendments were made to the census forms, and training methods were considerably improved.

### Census operations

The 1966 Census Ordinance provided for a Statistician, with responsibility for the census as a whole, to be appointed by the Administrator. The Statistician appointed for this purpose was Mr K. M. Archer, the Commonwealth Statistician. The Census Regulations provided also for a field organisation in the Territory, headed by a field supervisor, deputy field supervisor, and five assistant field supervisors appointed to assist in particular fields such as training and logistics.

The remainder of the supervisory field staff consisted of nineteen enumerators and more than seventy sub-enumerators appointed from the staff of the Department of District Administration. Each enumerator was responsible for the entire organisation of the census within a district of the Territory, while the sub-enumerators' task included training and assigning census teams, supervising them in the field, and checking their results for such factors as consistency, credibility, and completeness of coverage.

Approximately 500 collectors and 1,300 interviewers were supplied by various Departments of the Administration. The bulk of these were from the Department of Education, which reorganised its school year to provide a three-week school holiday in June-July. Training commenced in March 1966 with the Enumerators' Conference, which lasted nearly a fortnight. The sub-enumerators were trained in four schools, each lasting about a week and a half, during the second half of May and the first half of June. Collectors and interviewers for the remote areas were trained from 14 to 18 June, but the main training period was from 20 to 24 June.

The main enumeration period was the fortnight 27 June-9 July, and well over ninety per cent of the enumeration was carried out within this fortnight. A few remote areas, however, were enumerated by teams which set out on 20 June, returning on or after 9 July. The least permanently settled groups were enumerated as close to the night of 30 June as possible. Enumeration was, with minor exceptions, *de facto* (i.e. in respect of the population *actually resident* at a specific date) in all areas.

The results of the pre-test confirmed that it would be impracticable to enumerate much more than a ten per cent sample of rural villages within a reasonable length of time. It was decided to enumerate completely all non-village areas in view of their specialised character and small population, and the ease of interviewing. A sample of approximately ten per cent of rural villages was therefore selected to represent all rural villages, while all other areas were completely enumerated.

For ease of enumeration, rural villages were grouped together in small clusters of approximately 1,000 persons called 'neighbourhoods'. Neighbourhoods with similar geographical and social characteristics were grouped into 102 strata, each stratum generally containing around 20,000 persons. Two neighbourhoods were selected from each stratum with total probability of selection proportional to population size and without replacement. All persons living in the villages within the selected neighbourhoods were enumerated.

The questions asked in the census in the Territory followed the Australian census questions as closely as possible. This ensured as far as practicable the comparability of census statistics throughout the entire Commonwealth and its Territories and with those for previous censuses of the non-indigenous population of the Territory. Furthermore, this approach permitted certain economies in the planning and conduct of the census field work and processing. To meet the particular circumstances of the Territory, however, certain additional questions were asked—these included questions on language, literacy, subsistence occupation, and polygamous marriage, some questions were asked somewhat differently—for instance the questions on number of children, education, qualifications, and occupation, and the question on duration of existing marriage was omitted.

Responsibility for the processing of results was taken by the census processing staff of the Commonwealth Bureau of Census and Statistics. Preliminary field counts were issued during September and October 1966.

## TERRITORY OF PAPUA

## General description

## Area, etc.

Papua lies wholly within the tropics. The northernmost point touches 5° S. Latitude; its southernmost portion, comprising Tagula and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 930 miles; towards either end the breadth from north to south is about 320 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland and 1,936 on the islands. The total area is 86,100 square miles, of which 83,325 are on the mainland and 2,775 on the islands. A description of the physical characteristics of the Territory appears in earlier issues of the Year Book (*see* No. 18, p. 633).

## Administration

Particulars of the early administration of Papua are given in Year Book No. 19, page 576. The Territory was placed under the authority of the Commonwealth on 1 September 1906 by proclamation issued in pursuance of Letters Patent of 18 March 1902 and was accepted by the Commonwealth by the *Papua Act* 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is under the control of the Commonwealth, but not included within it, and is divided into seven administrative districts, Southern Highlands, Chimbu (part), Western, Gulf, Central, Milne Bay, and Northern.

## Population

## Non-indigenous population

At the Census of 30 June 1966 the non-indigenous population of Papua was 8,357 males, 6,093 females, 14,450 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947, 1954, and 1961 was, respectively, 2,078, 2,173, 3,239, 6,313, and 9,794 persons. The European population of Papua increased slowly, and with some reversals in trend, from less than 700 in 1906, the year in which the Territory came under Commonwealth control, to 1,343 at the Census of 1921. At the 1961 Census it amounted to 8,260 persons.

## Indigenous population

Within the major division, Melanesian, into which most indigenous inhabitants of the Territory are classified, a distinction may be made between a Melanesian type and a Papuan type, the former representative of the eastern mainland and the island archipelagos to the east and south-east, and the latter representative of the western third and the interior of the Territory. Some negrito traits have been noted in a few of the inland mountain groups. The total indigenous population of the Territory of Papua at the Census of 30 June 1966 totalled 586,147 persons of whom 307,979 were males and 278,168 were females. The total number was distributed through districts as follows: Southern Highlands, 183,939; Western, 60,843; Gulf, 55,358; Central, 130,443; Milne Bay, 99,050; and Northern, 56,514. The foregoing figures exclude the population of that part of the district of Chimbu within the Territory of Papua; the total population of that district is shown on page 149.

## Land tenure

The basic principles applying to land tenure in Papua are the same as those applying to the whole of the Territory of Papua and New Guinea described on pages 134-5. At 30 June 1966, of the total area of Papua, 55,104,000 acres, only 1,903,589 acres had been alienated. The distribution of alienated land at 30 June 1966 according to tenure was as follows: held by private non-indigenous inhabitants, freehold, 24,280 acres, leasehold, 367,414 acres; native reserves, 67,257 acres; other Administration land, including land reserved for public purposes, 1,444,638 acres.

Although a small amount of freehold land exists in Papua, present legislation does not provide for the granting of estates in freehold. Leases of various kinds may be granted by the Administration. The principal types of leases available are agricultural leases, pastoral leases, leases of town allotments, business leases and residence leases of other than town allotments, and various forms of special leases and licences over land. Leasehold terms are liberal, and, in general, leases may be granted for periods of up to ninety-nine years. Rent is based on the unimproved value of the land.

Leases of Crown land are granted by the Administrator following a land use examination, advertisement of leases available, and consideration of applications by the Land Board. Dealings in privately-owned land are a matter for private treaty. Native-owned land, however, cannot be acquired or leased from the native owners by private individuals. The Administration alone may purchase native-owned land, and then only if the owners are willing to sell and the Administration is satisfied that the owners do not require, and are not likely to require, the land.

The registration of titles, interests and dealings in alienated land is provided for under the *Real Property Ordinance 1913-1962* modelled on the Torrens system of land registration.

## Production

### Primary production

The products of the Territory are obtained principally from its agricultural, forestry, mining, and fishing industries. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the indigenous population. The main native agricultural products are taro, yams, sweet potatoes, bananas, and papaws. Peanuts are becoming of increasing importance in native diet. Non-indigenous enterprise produces most of the commodities exported. Indigenous, however, produce copra for export, while native enterprise in other fields of agricultural production for export purposes, e.g. cocoa and coffee, is undertaken. The principal agricultural products of Papua for the export trade are copra and rubber. Native production of copra is increasing. In 1965-66 nearly 1,351 million super. feet of logs were produced. The main products of fisheries exported from Papua are trochus shell and mother-of-pearl. Gold, manganese, zinc-lead, and copper ores have been mined in commercial quantities in the past, but current production is limited.

For information on the agricultural and animal industries, which for the sake of convenience covers the Territories of Papua and New Guinea singly and combined, see pages 133-8. The following paragraphs relate to forestry, mining, fisheries, and water-power resources in Papua.

### Forestry

A general description of the forest policy, which applies in Papua as well as in the Trust Territory of New Guinea, is given under the heading, Timber, on page 150.

Mixed species tropical rain forest covers most of Papua, although north-east of Port Moresby there is an area of monsoonal savannah country. Because of the mixed nature of the timbers in any one area, their utilisation on an economical basis is somewhat difficult. Mangroves occur in large areas fringing the Gulf of Papua. Forestry field work is carried out in Papua with a view to assessing the forest resources available and also to survey areas subsequently made available for cutting.

At 30 June 1966 twenty permits and seventeen licences were current. The total areas of forest involved were 387,472 acres and 64,328 acres respectively. The total number of logging mills was 33, and the total sawn-timber produced for the year was 10.2 million super feet, most of which was used locally.

### Mining

Although a large number of minerals have been found in Papua, including platinum, gold, silver, copper, tin, lead, zinc, cinnabar, iron, osmiridium, manganese, sulphur, chromite, gypsum, and lignite, current mineral production is not of economic importance. Before the 1939-45 War gold was an important item in Papuan production, but it has since dwindled to insignificance. Large quantities of copper ore were mined and exported up to 1940. Extensive deposits of magnetite sands exist along the Gulf of Papua coastline but these contain the undesirable impurity titanium and ways of separating this from magnetite are under investigation. The *Mining Ordinance 1937-1966* and the *Mining Development Ordinance 1955-1960* control mining in Papua.

Since the search for oil began in Papua in 1911 approximately \$73 million has been spent. The existence of petroleum has been proved at scattered locations over a large area, but commercial quantities have not been discovered. Natural gas has been found in several wells but its commercial use is not yet economically feasible. At 31 December 1966 fourteen prospecting permits and licences were effective under the provisions of the *Petroleum (Prospecting and Mining) Ordinance 1951-1965*. Oil prospecting is confined mainly to the Gulf and Western Districts, including off-shore areas in the Gulf of Papua.

### Fisheries

Surveys have been carried out of the fisheries resources of Papua. These have been demonstrated to be considerable, and efforts are being made to increase the present small degree of utilisation. Assistance is also being given by the Administration in improving the indigenous methods of fishing, and the use of improved gear is being encouraged by extension workers. Shell fishing, particularly trochus, provides the main cash return, exports being valued at \$17,116 in 1965-66.

**Water power**

Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that at least 1,850 MW could be developed.

The Rouna No. 1 hydro station on the Laloki River near Port Moresby has a capacity of 5.5 MW. A second hydro station at Rouna No. 2 is expected to come into operation in the first half of 1967 with an initial installed capacity of 18 MW. Total planned capacity of this station is 30 MW.

**Shipping**

In 1965-66 shipping entries at Territory ports totalled 460, and 279,426 tons of cargo were discharged and 86,278 were loaded.

Regular passenger and freight services operate between Australia, New Guinea and Papua. Vessels trading between Australia and the East also call at Territory ports, and there are services from continental and United Kingdom ports. Coastal and inter-island shipping services are maintained by vessels operating from the two principal ports of Port Moresby and Samarai.

**Other forms of transport and communication**

Scheduled flights provide a network of air transport throughout Papua, and regular air services link the Territory with Australia and neighbouring Territories. There were 93 aerodromes and seaplane alighting areas in Papua at 30 June 1966, and of these 2 were the responsibility of the Department of Civil Aviation, 47 were operated and maintained by the Administration, and 44 were owned and maintained by Missions. plantation and mining interests. Much of the internal traffic and freight is carried on a charter basis.

At 30 June 1966 there were 2,482 miles of road in Papua, of which 1,360 miles were suitable for medium and heavy traffic, the greater proportion being located in the Central, Milne Bay and Southern Highlands Districts. Total motor vehicle registrations (excluding defence force vehicles) at 31 December 1966 were 6,534.

Telephone services operate in the main centres. The radio station at Port Moresby for both transmission and reception is shared by the Overseas Telecommunications Commission and the Administration. The former provides all external radio-telephone and telex circuits, while the latter operates internal telephone and telegraph services. Local telephone services are provided from automatic exchanges at Port Moresby and Sogeri and from manual exchanges at Popondetta, Samarai and Daru. Services are also being connected at Kerema, Mendi and Tapini. Port Moresby is connected by direct radio-telephone trunk circuits with Popondetta and Samarai and with Lae, Rabaul and Wewak in New Guinea. Radio telegraph services are provided from Port Moresby, Samarai, Kerema, and Daru to over 200 outstations. Medium and short-wave programmes are broadcast from the Australian Broadcasting Commission stations 9PA, VLK3, VLT4, and VLT9 located at Port Moresby. Administration Broadcasting Stations VL8BK, Kerema and VL8BD, Daru also operate.

**Education and health****Education**

Education in the Territory is provided by the Administration and various Mission organisations. Schools for indigenes, also, have been established by Local Government Councils. The *Education Ordinance* 1952-1963 enables the Administration to establish an education advisory board, district education committees and European and native schools, and to grant financial aid for educational purposes. European teachers are recruited from Australia and overseas, and indigenous teachers are trained in the Territory by the Administration and Missions. During the year ended 30 June 1966, 172 schools were maintained by the Administration for 28,419 children, of whom 1,422 were Europeans, 171 Asian or of mixed race, and 26,826 indigenes. The total number of pupils in the various grades of mission schools was 48,157, of whom there

were 1,754 Europeans, and 219 of Asian or mixed race. To assist the educational work of the Missions the Administration provides expert advice, educational equipment and text-books. In addition, the sum of \$414,824 was distributed among the Missions as grants-in-aid during the year ended 30 June 1966.

### Health

The Department of Public Health of the Territory of Papua and New Guinea has the general oversight of all medical and dental services. The Department has the following seven functional divisions: medical services; preventive medicine; medical training; infant, child and maternal health; medical research; administration; and mental health. The services for the Territory of Papua are under the administrative control of a regional medical officer, with headquarters staff at Port Moresby.

The cases treated in hospital are mainly malaria, tropical ulcers, pneumonia, tubercular infections and tuberculosis, bronchitis, and confinements. At 30 June 1966 the Administration had established 29 general hospitals, 1 hospital for the treatment of Hansen's disease, 1 Hansenide-tuberculosis hospital, 2 tuberculosis hospitals, and 1 mental hospital; the Missions had established 47 general hospitals, 2 Hansenide hospitals, and 1 tuberculosis hospital. There were 495 village aid posts or medical centres (163 Mission), 70 maternal and child welfare clinics (60 Mission), and 535 mobile clinic centres (382 Mission). School medical examinations, immunisation, ante-natal, and post-natal care and pre-school services are also provided. The Missions employ their own doctors and nurses in their medical establishments.

For some years suitably qualified indigenes attended the Central Medical School at Suva, Fiji, to be trained as Assistant Medical Officers. In 1959 the Administration began training to a similar standard at the Papuan Medical College which is associated with the Port Moresby General Hospital. The College, planned to accommodate 600 students eventually, is being built in stages. The course consists of a preliminary year and five years further study. Training for nurses and medical auxiliaries in many categories is also being provided.

(i) Additional expenditure on this item included under 'Expenditure chargeable to Loan Fund'.

## TRUST TERRITORY OF NEW GUINEA

## General description

## Area, etc.

The Trust Territory of New Guinea extends from the equator to latitude 8° S., a distance of 400 nautical miles, and from longitude 141° E. to 160° E., a distance of 1,000 nautical miles. The land area is 92,160 square miles, that of the New Guinea mainland being 69,095 square miles and that of adjacent islands, including the Solomon Islands and the Bismarck Archipelago, 23,065 square miles. Information regarding physiography and climate will be found in Year Book No. 22, page 613, in the *Official Handbook of the Territory of New Guinea*, and in the Administration Annual Reports.

## Administration

The terms of the League of Nations mandate (1920) of the former German possession of New Guinea are given in Year Book No. 33 (*see* page 264). Particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration are given in Year Book No. 36 and earlier issues, and of events following the outbreak of the Pacific War in Year Book No. 37 and subsequent issues up to No. 48.

Following the 1939–45 War the Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13 December 1946. The terms of the Agreement are shown in Year Book No. 39, pages 355–7.

For administrative purposes the Territory is divided into the following twelve districts: East New Britain and West New Britain, comprising New Britain and the adjacent islands; Morobe, Madang, Eastern Highlands, Chimbu, Western Highlands, East Sepik and West Sepik on the mainland; New Ireland, comprising New Ireland, Lavongai and adjacent islands; Manus, comprising the Admiralty Group; and Bougainville in the Solomon Islands. Each district is administered by a District Commissioner.

## Population

## Non-indigenous population

At the Census of 30 June 1966 the non-indigenous population of the Territory was 11,732 males, 8,554 females, 20,286 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947, 1954, and 1961 was, respectively, 3,173, 5,216, 6,200, 11,442, and 15,536 persons. At the 1961 Census the European population numbered 11,702 persons.

## Indigenous population

The indigenous people of the Territory may in general be grouped with the Melanesians who occupy the greater part of the Western Pacific. They may be divided into two main types—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Some tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and, possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (*See* Year Book No. 16, page 670, and *Official Handbook of the Territory of New Guinea*, Part V.)

The indigenous population of the Territory at the census of 30 June 1966 numbered 1,562,153 persons, (813,174 males and 748,979 females). The total population was distributed throughout the several districts as follows: Eastern Highlands, 201,779 persons; Chimbu, 166,931; Western Highlands, 291,620; West Sepik, 99,112; East Sepik, 157,491; Madang, 150,306; Morobe, 204,887; West New Britain, 43,933; East New Britain, 104,884; New Ireland, 49,246; Bougainville, 71,762; Manus, 20,202. The figure for Chimbu includes particulars of population for that part of the district within the Territory of Papua.

## Land tenure

The principles governing the acquisition and ownership of land and types of tenure available in New Guinea are in general similar to those which obtain in Papua, and grants of estates are restricted to leasehold tenure. In New Guinea, however, the amount of freehold land of earlier

origin held by private non-indigenous owners amounts to more than half a million acres. Freehold titles to this land, which includes a good deal of plantation land, may be transferred by purchase, subject only to the general provision that dealings in land require the approval of the Administrator.

The area of the Territory of New Guinea is estimated at approximately 59,000,000 acres, of which at 30 June 1966 only 1,561,496 acres were alienated. The following was the distribution of alienated land according to tenure at 30 June 1966: held by private non-indigenous inhabitants—freehold, 528,098 acres, leasehold, 407,957 acres; native reserves, 27,150 acres; other Administration land, including land reserved for public purposes, 598,291 acres.

Under German law there was a system of registration of titles in a Ground Book, but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in the *Lands Registration Ordinance* 1924–1962. The land registers were lost during the 1939–1945 War, but provision for restoration of the lost titles is made in the *New Guinea Land Titles Restoration Ordinance* 1951–1966.

### Production

The products of the Territory are obtained principally from its agricultural, mining, fishing, and forestry industries. A copra crushing mill near Rabaul, established in 1952, commenced crushing at about 18,000 tons of copra per annum, and its capacity is now about 60,000 tons of copra per annum. At Bulolo a company is producing high quality moisture-proof plywood in a factory with an approximate annual plywood production of 28 million square feet (on a  $\frac{3}{8}$ -in basis). Native subsistence agriculture, fishing and hunting produce most of the food requirements of the indigenous population. The main native agricultural products are taro, yams, sweet potatoes, coconuts, bananas, and papaws. Non-indigenous enterprise produces most of the commodities exported. Indigenes, however, produce copra for export, and in recent years have taken up the production of introduced crops such as peanuts, rice, cucurbits, and maize for their own consumption and cocoa, coffee and pyrethrum for export. The principal agricultural products of New Guinea for the export trade are copra and coconut oil, cocoa, and coffee, but exports of timber and timber products are at a high level (*see below*). The main products of fisheries exported from New Guinea are trochus and green snail shell, including that collected by indigenes. Gold is the principal mineral mined. Indigenes are taking an increasing interest in mining for alluvial gold on their own account, and production from this source is continually rising, in contrast to falling European production.

For information on the agricultural and animal industries, which for the sake of convenience covers the Territories of Papua and New Guinea singly and combined, *see* pages 133–8. The following paragraphs relate to the timber, fishing and mining industries in the Territory of New Guinea alone.

### Timber

Various species of timber are found in the Territory, and one accessible pure stand is the valuable pine forests of the Bulolo Valley. This timber is used mainly for the production of plywood and veneer by Commonwealth-New Guinea Timbers Ltd., which has an annual cut of about 10 million super feet of logs. About 23.3 million square feet of plywood, on a  $\frac{3}{8}$ -in basis, were produced by the company in 1965–66 from these logs and from veneer produced by South Pacific Timbers Limited at Lae. In 1965–66, 17.8 million square feet of plywood, valued at \$1,902,953, and 5.8 million square feet of veneer, on a  $\frac{3}{8}$ -in basis, valued at \$83,190, were exported. During the year 26.5 million super feet of logs, valued at \$876,616, and 5.1 million super feet of sawn timber, valued at \$806,778, were also exported from the Territory. The Territory forests also provided fitches, battery veneer and egg-case parts for export. The Administration operates a training centre for forestry workers, nurseries and a herbarium, and is establishing a research institute in Port Moresby.

The Government intends to make available a number of large-scale permit areas containing from 2,000 to 5,000 million super feet of timber to help overcome the problems of multiplicity of species and continuity of supply of particular species. In opening up these major permit areas consultants are being employed to investigate the forest resources, assess the market potential and recommend working places and forms of processing for each area. Present policy calls for the orderly development of the timber industry on sound forestry principles to ensure no waste of the resources and no over-exploitation. Timber growing on native lands cannot be acquired by private purchasers direct from the native people, but must be obtained through the Administration. Royalty is payable on all forest produce taken under permit or licence. Reforestation of areas dedicated for forestry in perpetuity is carried out by the Administration. At 30 June 1966, 54 permits and 13 licences were current, the total area of forest involved being 575,101 acres and 27,409 acres respectively.

**Mining**

The production of gold and associated silver is the most important mining activity in New Guinea, although other minerals, such as osmiridium, platinum, copper, iron ore, sulphur, and brown coal, have been discovered. The production of gold in New Guinea since the 1939-45 War has been on a much smaller scale than before the war, decreasing from \$1,410,000 in 1959-60 to \$925,000 in 1965-66. The discovery of extensive low-grade copper deposits on Bougainville has given impetus to the copper industry in the Territory.

The laws in operation governing mining are the *Mining Ordinance* 1928-1966, the *Mines and Works Regulation Ordinance* 1935-1966 and the *Mining Development Ordinance* 1955-1960 and the regulations made thereunder.

The *Petroleum (Prospecting and Mining) Ordinance* 1951-1965 deals with the issue of permits and the granting of licences and leases for oil exploration. There are two prospecting permits for oil current at the present time.

**Water Power**

A proposal to establish a hydro-electric power station on the upper Ramu River near Kainantu is under consideration. The proposed scheme would supply Lae, Madang, Kainantu, Goroka, and Mount Hagen. The firm capacity of this station would be 60 MW (72 MW installed) with an initial capacity in the first stage of 24 MW.

**Shipping**

Regular passenger and freight services operate between Australia, Papua and the Territory of New Guinea. Vessels trading between the East and Australia and the Pacific Islands call at Territory ports, and there are monthly services from continental and United Kingdom ports. Coastal and inter-island shipping services are maintained by vessels operating from the principal ports of the Territory. Shipping within the Territory is regulated by the *Shipping Ordinance 1951-1960* and the Coastal Shipping, Ports and Harbours Regulations. Main ports of call for overseas vessels are Lae, Madang, Wewak (mainland), Rabaul (New Britain), and Kavieng (New Ireland). In 1965-66 shipping entries at Territory ports totalled 912, and 436,390 tons of cargo were discharged and 262,576 tons loaded. Corresponding figures for 1964-65 were 847, 401,416, and 247,490, respectively. There are no inland waterways, and the natural river system is not generally suitable for vessels except those of small tonnage.

**Other forms of transport and communication**

There are no railways in New Guinea, but a road construction programme is being undertaken progressively to assist the economic development of the Territory. Road transport services operate in the main towns and on the trunk roads linking Rabaul and Kokopo; Lae, Bulolo and Wau; Kavieng and Namatanai; and on the network in the Eastern and Western Highland Districts centred on Goroka and Mount Hagen. The total mileage of roads in the Territory of New Guinea at 30 June 1966 was 6,427, of which 3,864 were suitable for heavy and medium traffic. Total motor vehicle registrations (excluding defence force vehicles) at 31 December 1966 were 10,727.

Scheduled flights provide a network of air transport throughout New Guinea, and regular air services link the Territory with Australia and neighbouring territories. There were 230 aerodrome and seaplane alighting areas in New Guinea at 30 June 1966, and of these 10 were controlled by the Department of Civil Aviation, 73 by the Administration, and 147 by private interests.

Telephone services operate in the main centres. Radio telephone trunk circuits link Port Moresby with Lae, Rabaul, Wewak, and Madang, and the latter is connected via the SEACOM cable with Australia and south-east Asia. Nine zone or group centres for radio telegraph

communication with about 600 out-stations have been established at Lae, Rabaul, Kavieng, Lorengau, Madang, Mount Hagen, Wewak, Sohano, and Goroka. Medium wave broadcasting programmes are transmitted by the Australian Broadcasting Commission station 9RB Rabaul.

### Education and health

#### Education

Education in the Territory is provided by the Administration and various Mission organisations. Schools for indigenes have also been established by Local Government Councils. The *Education Ordinance* 1952-1965 enables the Administrator to establish an education advisory board, district education committees and schools for all sections of the community, and to grant financial aid for educational purposes. Expatriate teachers are recruited from Australia and overseas, and indigenous teachers are trained in the Territory by the Administration and the Missions. During the year ended 30 June 1966, 348 schools were maintained by the Administration for 49,840 children, of whom 1,670 were Europeans, 393 Asians, 310 of mixed race, and 47,467 indigenes. In addition, 4,324 indigenes were studying by correspondence. The total number of pupils in the various grades of mission schools, excluding exempt schools, was 96,985, of whom 1,895 were Europeans, 495 Asians and 506 of mixed race. To assist the educational work of the Missions the Administration provides expert advice, educational equipment and text-books. In addition, the sum of \$1,144,291 was distributed among the Missions as grants-in-aid during the year ended 30 June 1966.

#### Health

The cases treated in hospital are mainly malaria, pneumonia, tropical ulcers, bronchitis, tubercular infections and tuberculosis, skin infections, and confinements. At 30 June 1966 there were 70 Administration hospitals, including 3 Hansenide colonies, 2 tuberculosis hospitals, and 1 Hansenide and tuberculosis hospital. The Missions have established an additional 82 hospitals, including 6 Hansenide colonies and 1 Hansenide and tuberculosis hospital. There are 1,233 village aid posts or medical centres (163 conducted by Missions) and 1,813 maternity and child welfare centres (1,219 provided by Missions). The Missions staff their own medical establishments but receive financial assistance from the Administration, which also provides much of their medical stores and supplies.

(i) Additional expenditure on this item included under Expenditure chargeable to Loan Fund.

### TRUST TERRITORY OF NAURU

#### General description

Nauru is an oval-shaped atoll about twelve miles in circumference, having an area of about 8½ square miles, of which approximately two-thirds is phosphate-bearing. It is situated in latitude 0° 32' S. and longitude 166° 55' E. Portion of the island between the sandy beach and the coral cliffs is comparatively fertile, and it is there that most of the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate

deposits possesses few food plants and is uninhabited. The system of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners and the Missions, the whole of the island is owned by individual Nauruans. The temperature range is from 76° F. at night to 94° F. during the day, and the average humidity is about 80 per cent. Normally the rainfall is comparatively low for islands of the Pacific, the annual average for the twenty years from 1920 to 1940 being 80.5 inches. However, falls as high as 180 inches during 1930 and as low as 11 inches during 1950 have been recorded.

#### Administration

The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea. Following the 1914-18 War a League of Nations mandate for its administration was conferred upon His Britannic Majesty, and on 2 July 1919 the British, Australian and New Zealand Governments agreed that the administration should be vested in an Administrator. Following the 1939-45 War, the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand, and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand, and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement were given in Year Book No. 39, pages 370-1.

Until 31 January 1966 power to make laws for the Island was vested in the Administrator. On that date a Legislative Council was established, consisting of the Administrator, nine elected Nauruan members and five official members. The Legislative Council is empowered to make Ordinances for the peace, order and good government of the Territory, except in respect of the phosphate industry as such, defence and external affairs. Legislative powers in respect of these subjects are vested in the Governor-General. At the same time an Executive Council was established with power to advise the Administrator. The Executive Council consists of the Administrator, two elected members of the Legislative Council and two official members of that Council. The Nauru Local Government Council, established in 1951 to advise the Administrator on matters affecting the Nauruan community, to carry out works and supply certain services for that community and to direct the Nauru Co-operative Society, also continues to function for the time being. All administration expenses are met from local revenue and phosphate royalties.

#### Population

The Nauruan component of the population numbered about 1,100 in 1921, but had grown to more than 1,800 before the Japanese invasion in August 1942. In 1946 it numbered less than 1,400, but by 30 June 1966 was about 3,000. Chinese have, for many years, formed a considerable part of the population of Nauru, but their numbers are not as great as formerly; at 30 June 1966 they were about 1,100. The number of other Pacific Islanders in the early 1920's was almost 300, but they subsequently decreased, then rose again, and at 30 June 1966 were about 1,500. The European population after 1921 fluctuated, with a generally upward trend, between one and two hundred, and in recent years has gradually increased, being about 400 at 30 June 1966. The total population of Nauru at the Census of 30 June 1966 was 3,696 males, 2,360 females, 6,056 persons.

#### Future of Nauruans

*Resettlement.* Some years ago investigations were made to find a suitable home for the Nauruan people after the exhaustion of the phosphate deposits towards the end of this century. After inspection of several islands, Curtis Island off the Queensland coast was agreed upon as a suitable location for resettlement purposes. However, at subsequent discussions with representatives of the Australian Government the Nauruans made it clear that, although Curtis Island was regarded as a place which would be suitable for Nauruan resettlement, the powers reserved to Australia in that event should be only those which relate to defence, quarantine and possibly external affairs and civil aviation. The Australians informed the Nauruans that the Commonwealth Government could not accept the proposal that the Nauruan people be established on Curtis Island on such terms, but gave further expression to the sympathy of the Australian Government with the desire of the Nauruan people to retain their identity as a distinct community and said that the Government was prepared to see what else could be done to achieve this end.

The Nauruans informed the Australians that the Nauru Local Government Council considered that there were no prospects of an agreement on the proposal for resettlement at Curtis Island because of the differences in the Australian and Nauruan views on the political aspects of the proposal, and they considered, therefore, that there should be no further discussion of

resettlement on Curtis Island. The Council nevertheless expressed its willingness, if the Australian Government thought further talks would achieve a useful end, to take part in them. The Nauru Local Government Council then informed the Australian Government that the people of Nauru would elect to remain on Nauru.

At a later series of discussions held in May and June 1965 the Australian Government agreed to pursue any proposals that might give promise of enabling the Nauruan people to resettle on a basis acceptable to them and one which would preserve their national identity.

Further discussions were held with representatives of the Nauruans in June and July 1966, when the Nauruans were informed that if they asked the Administering Authority to consider the resettlement question further they should submit any new proposals in as specific a form as possible.

*Reclamation of worked-out lands.* At the conference in July and August 1964 the Nauruans raised the question of the possibility of reclaiming the worked-out phosphate land and suggested that if this land were covered with soil, it would be possible to use it for agriculture. Australia drew attention to the report made by the Commonwealth Scientific and Industrial Research Organization some years ago which said that there seemed to be little hope of widespread utilisation in the future of the worked-out lands. The question was further discussed during the second series of talks in May and June 1965 between Australian Government representatives and a delegation from the Nauru Local Government Council, particularly in connection with the decision of the Nauruans to pursue their future on the Island of Nauru. It was agreed to establish at the earliest practicable date an independent technical committee of experts to examine what would be involved in, and the practicability of the rehabilitation of, the worked-out phosphate lands. The committee, comprising an Australian engineering consultant, a Professor of Agricultural Economics from an Australian university, and a soils scientist from FAO, was appointed towards the end of 1965, and visited Nauru in February 1966. The committee's report is currently being considered by the Nauru Local Government Council and the Australian Government.

#### Phosphate deposits

From 1906 to 1919 the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island (about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity of phosphate remaining on Nauru has been estimated at 61,409,000 wet tons.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments on 25 June 1920 for £Stg3,500,000, the purchase money being contributed in the proportions of 42, 42 and 16 per cent respectively. The Agreement of 2 July 1919 provides for the working of the deposits by three British Phosphate Commissioners, one appointed by each Government, and the three countries are entitled to receive the output in the same proportions of 42, 42 and 16 per cent. In practice Britain has never taken its full entitlement of phosphate from Nauru. Consequently the bulk of the exports are to Australia and New Zealand.

Exports of phosphate from Nauru in 1965-66 amounted to 1,528,300 tons, of which approximately 816,000 tons went to Australia, 516,000 tons to New Zealand, and 196,000 tons to the United Kingdom. During the five years ended 30 June 1966, 8,026,600 tons of phosphate were exported.

Apart from a limited number of Europeans the employees of the Commissioners are Chinese and Pacific Islanders engaged under one year contracts. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

#### Royalties on phosphate

Dating from the establishment of the British Phosphate Commissioners in 1919 royalties have been payable for each ton of phosphate exported in amounts agreed upon between the Commissioners and the Nauru Local Government Council from time to time. Following the talks with the Nauruan delegation in May and June 1965, agreement was reached for royalties to be increased from 37c a ton to \$1.35 a ton for 1964-65 and to \$1.75 a ton for 1965-66.

In addition, payments are made, currently at \$240 per acre, for land leased for phosphate mining or for sites for permanent installations on phosphate land. Payments are also made for coconut and other trees removed or destroyed during the mining.

#### Trade, transport and communication

The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider, and perry. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt. The tariff rates apply to all countries alike. In 1965-66 imports were valued at \$6,366,248 and exports, 1,528,295 tons of phosphate, at \$8,659,472. Of the total imports in 1965-66, Australia supplied 82 per cent valued at \$5,221,445, the balance coming mainly from Hong Kong, New Zealand and the United Kingdom.

There is no regular air service to Nauru, but when the need arises charter flights are made to the island. There is relatively frequent communication by sea with the island. Most of the vessels are run or chartered by the British Phosphate Commissioners for the carriage of phosphate. Many of them also provide for the carriage of passengers and other cargo as required. The total calls by vessels were 157 in 1965-66.

Nauru is linked by telecommunications with Australia and, via Australia, other parts of the world. Regular radio schedules are operated with Sydney and with other Pacific island stations, and a daily radio teleprinter service with Australia has been in operation since November 1966.

### Education

The Administration assumed full responsibility for education on 1 October 1923. Prior to that date the education of Nauruan children was undertaken by the Missions, which were subsidised by the Administration. The Administration operates six infant schools, two primary schools and a secondary school, and there is a mission school which also provides instruction at these three levels. At 30 June 1966 there were 833 Nauruans, 278 other Pacific Islanders, 106 Chinese, and 81 Europeans enrolled in the infant and primary schools, and 317 at secondary level.

The curriculum is based generally on that used in Victorian schools, and the teaching is generally in English. Education is compulsory for Nauruan children from six to seventeen years of age. At 30 June 1966 ninety-two Nauruans were studying in Australia. Of these, 50 held Administration scholarships, 12 were Administration cadets, three were Administration sponsored apprentices, and 27 were privately sponsored. In addition to these there was one Administration sponsored student attending the Papuan Medical College and one privately sponsored student studying in Papua and New Guinea.

### Health

Cases of the usual diseases known in the Pacific occur, but the health of all sections of the population is generally satisfactory. An area has been set apart for the segregation of sufferers from Hansen's disease, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30 June 1966 was 43, of whom, however, only 3 were in segregation at the Hansenide colony. Three hospitals are maintained on the island, one by the Administration for Nauruans and two by the British Phosphate Commissioners. The Administration also conducts eleven maternity and child health centres. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo medical examination at intervals of three months.

### Judiciary

By virtue of the *Nauru Act 1965* there is a Central Court which is a superior court of record consisting of a judge appointed by the Governor-General and such magistrates as are appointed by the Administrator. A Court of Appeal, comprising a judge or judges appointed by the Governor-General, has also been constituted under the Act. The District Court established by the *Judiciary Ordinance 1957-1965* of the Territory is continued in existence by the same Act.

### Revenue and expenditure

The revenue of the Administration for the year 1965-66 amounted to \$1,940,704 and expenditure to \$1,778,214. Of the revenue, payments by the British Phosphate Commissioners amounted to \$1,724,272, post office and radio receipts, \$160,559, and import duties, \$8,736. Expenditure comprised salaries, \$684,091, general expenses, \$352,311, miscellaneous services, \$444,430, and capital works and services, \$297,382.

## HEARD ISLAND AND McDONALD ISLANDS

These islands, about 2,500 miles south-west of Fremantle, were transferred from the United Kingdom to Australia as from 26 December 1947. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard Island and McDonald Islands by the *Heard and McDonald Islands Act 1953*.

In December 1947 an Australian scientific station was established on Heard Island, and meteorological investigations were conducted until the station was closed in March 1955 following the establishment of Mawson station on the Antarctic mainland. Australian expeditions have since visited the island from time to time. Heard Island is about twenty-seven miles long and thirteen miles wide. The McDonald Islands are twenty-six miles to the west of Heard Island. They are small, rocky and precipitous.

## AUSTRALIAN ANTARCTIC TERRITORY

An Imperial Order in Council of 7 February 1933 placed under Australian authority all the islands and territories other than Adelie Land situated south of 60° S. latitude and lying between 160° E. longitude and 45° E. longitude. The Order came into force with a Proclamation issued by the Governor-General on 24 August 1936 after the passage of the *Australian Antarctic Territory Acceptance Act* 1933. The boundaries of Adelie Land were definitively fixed by a French Decree of 1 April 1938 as the islands and territories south of 60° S. latitude lying between 136° E. longitude and 142° E. longitude. The *Australian Antarctic Territory Act* 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory.

On 13 February 1954 the Australian National Antarctic Research Expeditions (ANARE) established a base on MacRobertson Land at latitude 67° 36' S. and longitude 62° 53' E. The base was named Mawson in honour of the late Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13 January 1957 at latitude 68° 34' 36" S. and longitude 77° 58' 36" E. The station was named Davis in honour of Captain John King Davis of Melbourne, who commanded a number of famous Antarctic ships. The station was temporarily closed down in January 1965. In February 1959 the Australian Government accepted from the United States Government custody of Wilkes Station, which was established by the United States on 16 January 1957 on Vincennes Bay, at latitude 66° 15' S. and longitude 110° 33' E. The station was named in honour of Lieut. Charles Wilkes, who commanded the 1838-40 United States expedition to the area. A new station of advanced design is being constructed close to Wilkes which it will eventually replace. ANARE have also operated a station, since the 1947-48 Antarctic season, at Macquarie Island, approximately 850 miles south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On 1 December 1959 Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the U.S.S.R., the United Kingdom, and the United States of America. Poland, Czechoslovakia and Denmark have subsequently acceded to the Treaty. The Treaty reserves the Antarctic area south of 60° S. latitude for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the *status quo* with regard to territorial sovereignty, rights and claims. The Treaty entered into force on 23 June 1961. Since then the Antarctic Treaty powers have held four consultative meetings under the Treaty, the first at Canberra in July 1961, the second at Buenos Aires in July 1962, the third at Brussels in June 1964, and the fourth at Santiago in 1966.

## COCOS (KEELING) ISLANDS

## General description

The Cocos (Keeling) Islands, two separate atolls comprising some twenty-seven small coral islands with a total area of about 5½ square miles, are situated in the Indian Ocean in latitude 12° 5' S. and longitude 96° 53' E. They lie some 1,720 miles north-west of Perth and 2,290 miles almost due west of Darwin, while Johannesburg is some 3,800 miles further distant to the south-west, and Colombo is 1,400 miles to the north-west of the group.

The main islands of the Territory are West Island, the largest, about six miles from north to south, on which are the aerodrome and most of the European community; Home Island, the head-quarters of the Clunies-Ross Estate; Direction Island, on which was situated (until August 1966) the Cable and Wireless Station operated by the Overseas Telecommunications Commission (Australia) and the Department of Civil Aviation's marine base; and Horsburgh Island. North Keeling Island, which forms part of the Territory, lies about fifteen miles to the north of the groups and has no inhabitants.

Main settlements are on West Island and Home Island. The group of atolls is low-lying, flat and thickly covered by coconut palms, and surrounds a lagoon which has a harbour in the northern part but which is extremely difficult for navigation.

The climate is equable and pleasant, usually being under the influence of the south-east trade winds for about three-quarters of the year. However, the winds vary at times, and meteorological reports from the Territory are particularly valuable to those engaged in forecasting for the eastern Indian Ocean. The temperature varies between 70° and 89° F., and the average rainfall is about 67 inches. There are occasional violent storms. The worst cyclone in the recorded history of the islands was in 1909, when about 400,000 coconut palms were uprooted or decapitated and the accompanying tidal wave left only five buildings standing.

The population at the Census of 30 June 1966 was 684.

### History and administration

Summarised particulars of the discovery of the islands and their history up to 1946, when they became a dependency of the Colony of Singapore, are given in Year Book No. 51, page 140, and in earlier issues. On 23 November 1955 the Cocos Islands ceased to form part of the Colony of Singapore and were placed under the authority of the Commonwealth of Australia. The transfer was effected by an Order in Council made by Her Majesty Queen Elizabeth the Second under the Imperial Act entitled the Cocos Islands Act 1955 and by the *Cocos (Keeling) Islands Act 1955* of the Commonwealth whereby the islands were declared to be accepted by the Commonwealth as a Territory under the authority of the Commonwealth to be known as the Territory of Cocos (Keeling) Islands.

Responsibility for the administration of the Territory rests with the Minister for Territories. The first Official Representative was appointed on 23 November 1955 to take charge of the local administration of the Territory. Under the *Official Representative Ordinance 1955-1961* of the Territory the Official Representative is given such powers and functions in relation to the Territory as are delegated to him by the Minister under the *Cocos (Keeling) Islands Act 1955-1966* or are otherwise conferred on him under that Act or by or under any other law of the Territory. The laws of the Colony of Singapore which were in force in the islands immediately before the date of the transfer were, with certain exceptions, continued in force by the *Cocos (Keeling) Islands Act 1955-1966*. They may be amended or repealed by Ordinances made under the provisions of that Act which empower the Governor-General to make Ordinances for the peace, order and good government of the Territory.

### Transport and communication

There is an international airport at West Island under the control of the Commonwealth Department of Civil Aviation. This is a re-fuelling point for aircraft of Qantas Empire Airways Ltd, South African Airways and British Eagle International Airways, which operate weekly services between Australia and South Africa. Although there is no regular shipping service, vessels from Australia and Singapore call at intervals. A telegraph station, operated and staffed by the Overseas Telecommunications Commission (Australia), on Direction Island, was closed down in August 1966. A teleprinter service has been inaugurated between West Island and Australia. It is operated by the Administration on behalf of the Commission.

## CHRISTMAS ISLAND

Christmas Island is an isolated bank situated in the Indian Ocean in latitude 10° 25' 22" S., longitude 105° 39' 59" E. It is approximately 220 miles south from Java Head at the south entrance to Sunda Strait, 815 miles from Singapore and 1,630 miles from Fremantle. Christmas Island covers an area of about fifty-two square miles. It consists of a central plateau of about 600 to 800 feet with several prominent rises up to 1,170 feet. The plateau descends to the sea in a series of steep slopes alternating with terraces, the last dropping in a cliff of 200 to 300 feet to a shore terrace, terminating in a sea cliff of 10 to 150 feet, which is continuous round the island except in a few places, the chief of which is Flying Fish Cove where the principal settlement is located and which is also the only known anchorage.

The climate is healthy and pleasant and the prevailing winds come from the south-east to east-south-east from May to December, but from then to April (the wet season) they occasionally shift round to between north and west. The average yearly rainfall is about 80 inches with a marked summer incidence. The porous nature of the ground prevents the formation of pools of water, but there are several good springs which maintain an adequate supply of fresh water for the small population and the installations. The mean average temperature is about 80° and does not vary greatly throughout the year.

The economy of the Territory is based almost entirely on the mining and extraction of phosphate. Because of the nature of the land there appears little prospect of establishing any other economic activity.

The population of Christmas Island at 30 June 1961 was 3,099 (1,963 males and 1,136 females). At the census of 30 June 1966 the total population was, 3,381 (2,151 males and 1,230 females).

### Education

At 30 June 1966 there were two school systems on the Island—the Christmas Island school system which serves the majority of the children and a European school which serves a small number of children. The Christmas Island school system follows the Singapore curriculum, with 27 teachers, mostly Singapore trained, and 840 pupils (667 primary and 173 secondary). The European school follows the Western Australian primary school syllabus, with one teacher seconded from the Western Australian Department of Education, and 37 pupils.

Four Administration scholarships are available each year for Asian students who have completed a three year secondary course to enable them to receive further secondary education at Singapore or Malaya up to University Matriculation level. An education allowance of \$290 per annum, plus annual return fare for the scholar, is paid to Europeans resident in the Territory who send their children to Australia for secondary education. The British Phosphate Commission awards scholarships from time to time.

#### **History and administration**

Summarised particulars of the history of Christmas Island up to its administration by the United Kingdom as a separate Crown Colony from 1 January 1958, pending transfer to Australia, are given in Year Book No. 51, page 141, and in earlier issues. On 1 October 1958 the Island was transferred to the Commonwealth of Australia by the *Christmas Island Act* 1958 and is now administered as a Territory under the authority of the Commonwealth. Responsibility for the administration and government of the Territory rests with the Minister for Territories, and day to day affairs on the island are administered by an Official Representative under delegation from the Minister. The laws which were in force in the island at 30 September 1958 were continued as the laws of the Territory after its transfer to Australia.

#### **Phosphate deposits**

The only commercial activity carried out is the mining of phosphate. The British Phosphate Commissioners act as managing agents for the Christmas Island Phosphate Commission. There are three principal phosphate deposits on the island of which the largest is that now being worked at South Point. This field is situated on the 600 feet to 800 feet level and is approximately 12 miles from the drying and shipping plant at Flying Fish Cove. During 1965-66 approximately 782,000 tons of phosphate were exported to Australia and New Zealand. In addition some 83,508 tons of phosphate dust were exported to Malaysia, Singapore and Australia.

#### **Transport and communication**

Transport to and from the island is maintained by vessels operated under charter by the Christmas Island Phosphate Commission. One vessel makes regular trips between Christmas Island and Singapore, and other vessels carry phosphate to Fremantle and other Australian ports.

An internal telephone system is operated by the British Phosphate Commissioners. It includes three major automatic exchanges and three small subscriber-attended exchanges. A radio station is also operated by the Commissioners for messages via Perth and Singapore and for communication with ships at sea, and installation of a radio teleprinter link with Perth is planned.

## CHAPTER 8

### POPULATION

Statistics in this chapter cover, in the main, the year 1966. More detailed figures will be found in the annual bulletin *Demography*, and current statistics are published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the mimeographed series *Australian Demographic Review* and *Overseas Arrivals and Departures*. All statistics in this chapter, except those on page 206, The Aboriginal Population of Australia, are exclusive of particulars of full-blood Aborigines\*.

The final detailed results of the various population censuses are published in a series of printed volumes and parts (see list at end of this Year Book, also the chapter Miscellaneous—Statistical and other official publications of Australia†, for earlier censuses). Pending publication of the 1966 printed volumes a series of mimeographed bulletins will be issued containing the census results in interim form (see reference† above for titles).

#### Types of population statistics

Statistics of the population and its characteristics for Australia or the component States and Territories or other constituent areas at specific dates are divided in three main ways.

- (i) *Those ascertained by census enumeration*. The population censuses result in comprehensive statistics of characteristics of the population, such as age, sex, birthplace, etc.
- (ii) *Those ascertained by "population counts"*. From time to time in specific areas there are additional enumerations of the population, which are known as population counts, because normally very little information other than number of persons and their sex is obtained.
- (iii) *Estimates of number and sex*. Estimates for dates subsequent to a census, for Australia as a whole, take account of natural increase and net overseas migration since the last census. Estimates for States and Territories are approximate, since complete records of interstate migration are not available. The population in each State and Territory is estimated by adding to the population ascertained at the census the natural increase and the recorded net gain to Australia from overseas migration for that State or Territory, gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures supplemented by results of any special count or sample survey. Holiday, business, or other similar short-term movements between the States and Territories subsequent to the census are omitted.

Estimates carried forward in this way eventually reach the point when another census is taken and the population so ascertained supersedes that resulting from the estimates. In the light of the census results the estimates for the newly completed intercensal period are revised to adjust for the differences between the new census result and the population at the census date estimated on the basis of the previous census. This is to bring intercensal estimates into line with the two census results and thus effect adjustment for unrecorded or inaccurately recorded movement of population in the intercensal period. Such a revision is made when the preliminary (field count) results of a census become available. A second revision may be necessary when the final results of a census become available.

Final revised estimates become the permanent population estimates. A mean population for twelve month periods is required for certain purposes, and is calculated by the method described on page 178. As populations at specific dates are used in these calculations, consequential revisions are made to mean populations when the estimates for specific dates are revised as described above.

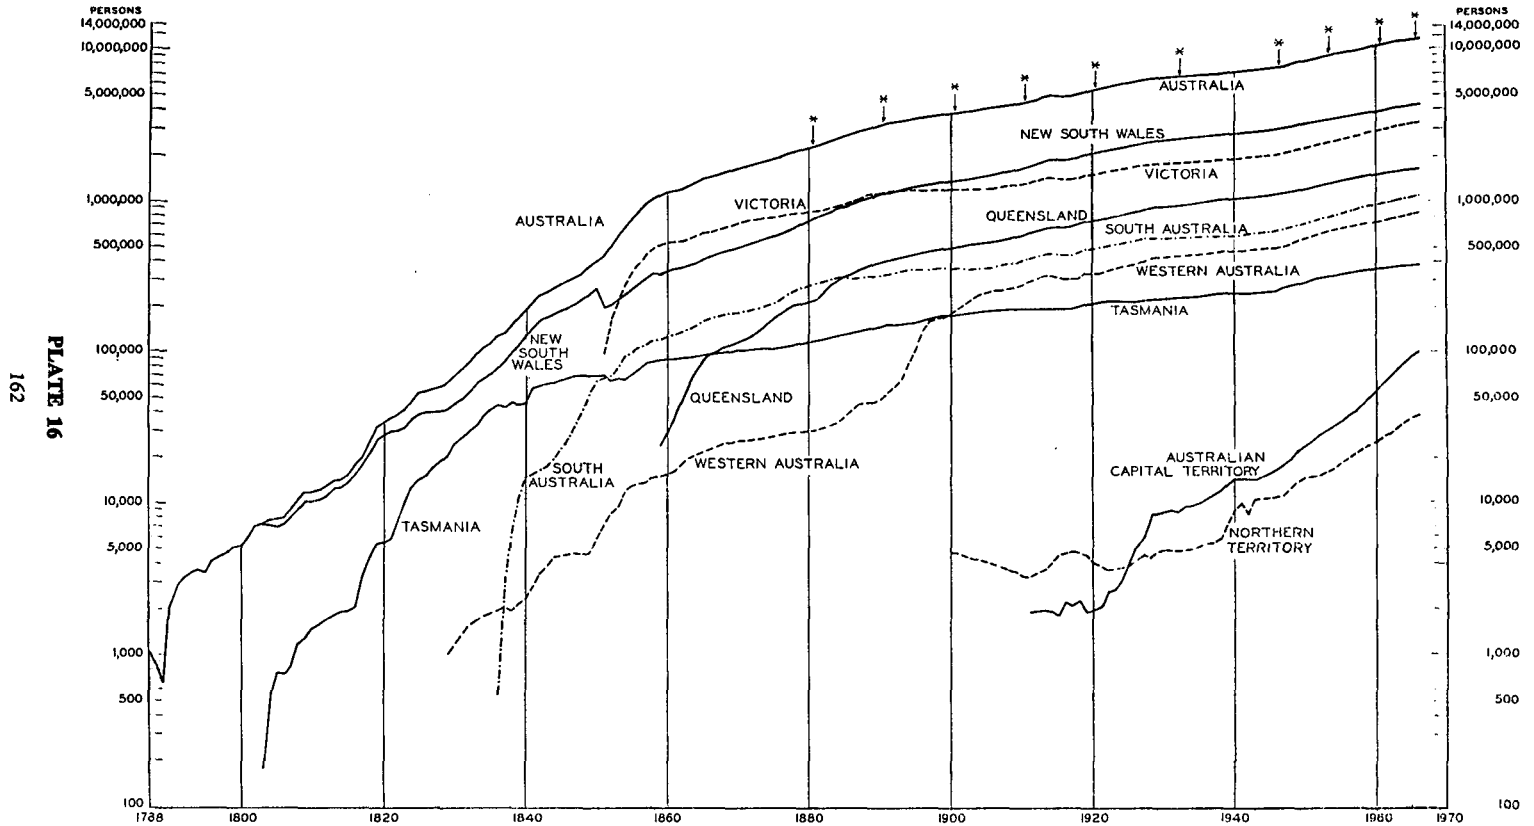

*The method used for estimating State and Territory populations, as described in (iii) above is different from that used prior to June 1961 (for particulars see earlier Year Books). Population estimates subsequent to the 1961 Census are based on a method which excludes holiday, business or other similar short-term movements, since the census, between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in population figures prior to 1961 but not for subsequent years. This has some effect on the continuity of the series of mean population figures and should be borne in mind when making calculations which use mean populations as a basis (see page 178).*

# POPULATION OF AUSTRALIA, 1788 TO 1966

## RATIO GRAPH

NOTE. THE VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO THE RATE OF INCREASE OR DECREASE; ACTUAL NUMBERS ARE INDICATED BY THE SCALE.

\* AUSTRALIAN CENSUS

All population statistics shown in this issue of the Year Book for dates up to and including June 1961, and all mean populations for calendar years up to 1960 and financial years up to 1960-61, are final. Population statistics for dates or years subsequent to these will be revised in accordance with the final results of the June 1966 census. The 1966 census figures quoted in this issue are preliminary only. They have been compiled by field personnel during the taking of the census and are subject to amendment. These 1966 figures are for total population only, and statistics of its characteristics are not yet available for later than the 1961 census.

## THE CENSUS

### Pre-federation activity

#### Early 'musters'

Although regular censuses were not instituted in the several colonies until the years specified in the table below, population returns in one form or another have existed from a very early period in the history of Australia. The earliest enumerations were known as 'musters', and although the actual results of very few of them have been preserved, it is probable that during the early days of colonisation they were of frequent occurrence. The first official 'muster' was taken in 1788, soon after the new settlement at Sydney Cove was formed, and in 1803 the first 'muster' of convicts in Van Dieman's Land (now Tasmania) was conducted. The location of 'mustering' stations from 1813 to 1825 indicates the growth of the infant colony of New South Wales. The material on the census on pages 164-70 has been derived in the main from Statistician's Reports for successive Commonwealth censuses. These provide a continuous record of census developments in Australia since 1911, and should be referred to for greater detail than can be included herein.

### CENSUSES IN AUSTRALIA, 1828 TO 1966

Date	Population enumerated (excluding full-blood Aborigines)

(a) Previously included with New South Wales. (b) Included with South Australia for the censuses of 1866, 1871 and 1876. Actually Northern Territory was not transferred to the Commonwealth until 1 January 1911.  
(c) Field count totals. Subject to revision on receipt of final figures.

### Development of the census

The first regular census in Australia was taken in New South Wales in November 1828, and included the population of Moreton Bay (now Queensland) but not Van Dieman's Land (Tasmania). Particulars were asked concerning the names, ages and civil conditions of the inhabitants. The next census was taken in 1833, and was followed by another in 1836, when arrangements were made for the enumeration of the population of the newly-established settlement at Port Phillip (Victoria). The first censuses taken in Tasmania, Victoria and Queensland as separate colonies were in 1841, 1854 and 1861 respectively. The first regular census in South Australia was taken in 1844 and in Western Australia in 1848. The 1881 census was the first simultaneous census taken in Australia and formed part of the first simultaneous census of the British Empire.

### Census conferences

Although the census methods adopted in the several Australian colonies, being based on a common prototype (i.e. the English methods), conducted towards general uniformity, nevertheless it appeared evident in the course of time that the methods of inquiry and tabulation were in certain respects ill-adapted to Australasian conditions. In 1890, therefore, a Conference of Statisticians was held at Hobart for the purpose of preparing a scheme by means of which the census information could be collected and tabulated throughout Australasia in a uniform and effective manner. The Conference resulted in considerable improvement in the degree of uniformity attained in the censuses of 1891 and in the increased fruitfulness of the inquiries. In 1900 another Conference of Australasian Statisticians was held in Sydney with the object of agreeing to such measures as would lead to uniformity in regard to: (a) the date of the census, (b) the subjects of the inquiry, and (c) the methods of compilation and tabulation. (New Zealand was represented at both these pre-Federation Conferences.) Briefly, the results of the Census Conferences of 1890 and 1900 were to bring about the adoption of a uniform procedure by which the census authorities throughout Australia agreed to institute the same inquiries on the same date, and to present the results in the various reports drawn up by them, as nearly as practicable, in the same manner. Although uniformity on the form of the schedule was attained, minor differences arose as to the interpretation of terms. Moreover, the method of presentation of the results differed considerably, the results of all the inquiries were not tabulated in all cases, and there was no co-ordinating authority to bring the results together to form a total for Australia. At the census of 1911, the first census taken under the aegis of the Commonwealth Government, the control of the census of the whole of Australia was centralised in the Commonwealth Statistician, thus enabling the attainment of (a) substantial identity in the method of collection, (b) identity of categories under which the returns are to be tabulated, and (c) uniformity in the interpretation of terms and in the scheme of presenting facts.

### Censuses of the Commonwealth

Under the Commonwealth of Australia Constitution Act of 1900, 'Census and Statistics' became Commonwealth functions. Provision for census-taking under Commonwealth law was not made until the *Census and Statistics Act 1905*. The census of the Commonwealth of Australia is taken under the authority of this Act (now *Census and Statistics Act 1905-1966*) and the regulations made thereunder. The first Australian census collected under the Act was that of 1911; subsequent censuses were taken in the years 1921, 1933, 1947, 1954, 1961, and 1966. The Act provided that the census should be taken by means of a householder's schedule delivered to every dwelling and that this schedule should contain particulars of the dwelling and its inmates.

### Periodicity and date of the census

The *Census and Statistics Act 1905* provided that the Census should be taken 'in the year one thousand nine hundred and eleven and in every tenth year thereafter'. But in 1930 this was amended by the addition of the words 'or at such other time as is prescribed'. Because of the economic depression prevailing in 1931 the third Australian census was not taken until 1933, and because of war conditions the fourth Australian census was not taken until 1947. Consideration was then given to the practicability of holding future censuses in the series of years originally envisaged. However, it was considered that the interval of years from 1947 to 1951 was too short; therefore it was decided to take the fifth census in 1954 at the mid-point of the period from 1947 to 1961. The sixth census was held in 1961. Because of the administrative demand for more frequent counts of the population the seventh census was held in 1966.

The Census and Statistics Act provides that 'the Census day shall be a day appointed for that purpose by proclamation', but the actual date is not specified. The census is conducted on a strictly *de facto* basis, i.e. it records the population actually in Australia at the place where residing on census day (as distinct from a *de jure* basis, which records the population according to place of usual residence). In the selection of census day every endeavour is made to choose a date when there is a minimum displacement of population. In 1911 and 1921, census day was near the beginning of April, but in 1933 and subsequently, census day has been at or near the end of June because this time has fulfilled the condition mentioned and is otherwise suitable, being the end of a fiscal year and of a quarterly period used extensively for statistical purposes.

**Scope of the census**

The census covers the population of the Commonwealth and the dwellings in which it lives. The only persons excluded from Census results are:

- (i) full-blood Aborigines, pursuant to Section 127 of the Constitution which specifically excludes them from the count of population (*see* page 206 for numbers of full-blood Aborigines enumerated at the census although not included in the population—plus an estimate of those not enumerated at the time of the census);
- (ii) diplomatic representatives of other Governments and their families and staffs having diplomatic immunity in accordance with international practice.

Instructions to field staff determine how various fringe categories of persons are to be treated for census purposes. Broadly the principle is to record at the census babies born at or before midnight of census day and to exclude persons dying before midnight of census day. Travellers on ships in or between Australian ports at midnight of census day are also included.

For census purposes the Act defines a dwelling thus: '“Dwelling” means a building, erection, or tenement, whether permanent or temporary, which is wholly or partly used for the purpose of human habitation and includes any ship or other vessel in any port of the Commonwealth or in any inland waters thereof, or any ship or vessel on a passage between any two Commonwealth ports'. Section 10 (2) provides that 'where a building is let, sub-let or held in different apartments and occupied by different persons or families, each part so let, sub-let, or held and used for the purpose of human habitation shall be deemed a dwelling'.

Measurable characteristics such as 'class' of dwelling, materials of outer walls, number of inmates in relation to number of rooms, facilities and rentals are recorded. At the 1966 census particulars were recorded for *ten* separate 'classes' of private dwellings and *sixteen* 'classes' of non-private dwellings.

The census data on occupied dwellings are obtained from the completed householder's schedules. However, census collectors are responsible for recording, from personal observations or inquiry, particulars also of dwellings which are unoccupied on census day, including those temporarily unoccupied or those used for 'holiday purposes'. Dwellings not recorded at the census are those occupied by accredited persons having diplomatic immunity and dwellings occupied solely by full-blood Aborigines.

The provisions of the Act place the responsibility for completing a householder's schedule upon the 'occupier of a dwelling'. The term 'occupier' is not defined beyond specifying certain officials in charge of public or charitable institutions who are to be included under this head. In practice, the responsibility, in the case of all private dwellings, is considered to rest with the head of the household occupying the dwelling.

Censuses have been taken in each of the External Territories of Australia concurrently with the Commonwealth census. These censuses, taken under the authority of the relevant Ordinances, cover the Territory of Papua and New Guinea, the Territory of Norfolk Island, the Territory of Nauru, the Territory of Cocos (Keeling) Islands, and the Territory of Christmas Island.

**Commonwealth Parliamentary representation and the census**

The *Representation Act 1905-1964* provides:

'2. For the purpose of determining the number of Members of the House of Representatives to be chosen from time to time in the several States, the Chief Electoral Officer of the Commonwealth shall at the times and in the manner prescribed by this Act ascertain the numbers of people of the Commonwealth, and the numbers of the people of the several States.

'3. The day on which any Census of the people of the Commonwealth is taken shall be an Enumeration Day within the meaning of this Act.

'4. The numbers of the people shall be ascertained as on Enumeration Day in accordance with the following provisions:—

- (a) The numbers of the people of each State, as shown by the Census, shall be taken.
- (b) There shall be excluded from the reckoning the number of persons, who, by Section twenty-five or Section one hundred and twenty-seven of the Constitution are required not to be counted.

'5. All Statistical Officers of the Commonwealth . . . . . are hereby authorised and required to furnish to the Chief Electoral Officer all such statistical information as he requires to enable him to ascertain the numbers of people in accordance with this Act.

'6. The Chief Electoral Officer shall forthwith, after he has ascertained the numbers of the people in accordance with this Act, make and forward to the Minister a certificate setting forth the numbers of the people of the Commonwealth and of the several States as on Enumeration Day.'

After each census the Chief Electoral Officer requests the Commonwealth Statistician to supply the information required for the purposes of the Representation Act. From such information the Chief Electoral Officer prepares the requisite certificate and this is published in the Commonwealth Gazette.

(a) The exact wording of questions has not remained constant from census to census. (b) Private house, flat, tenement, hotel, boarding house, institution, etc. (c) From 1947 includes 'Shared house', etc.—the householder to answer questions only for that part of the house occupied by him. (d) Also roof. (e) Includes kitchen, and from 1933 permanently enclosed sleep-out, but excludes bathroom, pantry, laundry, etc. (f) Owner, tenant, etc., and from 1954, where rented from a government authority. (g) Unfurnished or estimated unfurnished rental value. From 1947, furnished and unfurnished rentals were shown separately. (h) If shared, to be indicated. (i) Before 30 June 1933, or not. (j) Prior to preceding census and by years for intervening period.

**The census schedule**

The content of the householder's schedule used in the seven Commonwealth censuses 1911 to 1966 has not been subject to great variation. The questions asked have generally been those which are essential to provide a basic statistical framework of the characteristics of the population and dwellings of the Commonwealth of Australia. These questions have sought to serve both the general interest and the particular interests of those concerned in governmental policy making, in commerce and industry, and in demographic, social and economic research. While serving these local or national interests the need for international comparability has also been borne in mind when framing questions. The consistency in content of the householder's schedule is attributable in part to the mandatory questions included in accordance with the Census and Statistics Act and to the constitutional requirement to distinguish persons of Aboriginal race.

**Conduct of the census**

The arrangements made for the taking of a census of the Commonwealth resolve broadly into the following phases which, although apparently distinct, are in fact closely interrelated parts of a highly integrated system; determining the questionnaire and the form of the householder's schedule and personal slip and accompanying legislation and instructions; schematic

arrangement of census divisions and census subdivisions and collector's districts; mapping; selection, organisation and instruction of field staff; supply and transmission throughout Australia of census materials; publicity; distribution and collection of householder's schedules and personal slips by census collectors; establishment of processing and tabulating centres, the return and processing of completed census material, and the origination of punched cards; tabulation and summarisation; presentation, analysis and interpretation of results.

During the period between censuses experienced census staff are engaged in the research, development and planning of all aspects of the census. Of prime importance is the content of the householder's schedule and the statistical tabulations which it is desired to obtain in order to meet the needs of users in government, business and research. In conformity with these aims, field procedures and instructions, processing instructions, training methods, publicity, and staffing standards are developed. As far as possible, field pre-tests are conducted prior to the census to check the adequacy of proposed methods and procedures.

Some years before the taking of the census, the preparation of field maps is commenced. Other preparations follow as the census day approaches, involving the printing and distribution of forms, instructions and code lists; recruitment, training and equipment of field staff; the establishment of a processing centre; and the selection and training of processing staff. The success of the enumeration depends in large measure on the quality and training of staff and the development of effective supervision and control.

The operations outlined in the following paragraphs relate to the most recent census procedures.

### *Field organisation*

For the organisation and administration of census activities the States are divided into census divisions. Each internal Territory is also one division. Each division comprises a number of census subdivisions, further divided into collector's districts.

In the delineation of collector's district boundaries, the following criteria are relevant.

- (1) The area enclosed must not exceed the workload of one collector at the census period.
- (2) They must accommodate all State, Territorial and administrative boundaries.
- (3) Boundaries should be visible and easily followed by the collector.
- (4) They should preserve comparability with previous censuses.
- (5) They should conform to criteria currently in use in connection with the delimitation of urban boundaries.

For the census of 1921 and each subsequent census the organisation of the Commonwealth Electoral Office has been used as the basis of the census field organisation. The Chief Field Supervisor is appointed from the staff of the Census Division of the Commonwealth Bureau of Census and Statistics, but the Assistant Chief Field Supervisor and other senior supervisory field staff are appointed under the Census Regulations, in general from the staff of the Commonwealth Electoral Office.

Census divisions correspond closely with Commonwealth electoral divisions and each census division is controlled by an enumerator. Enumerators in each State are responsible to the Deputy Field Supervisor who is in charge of field operations in the particular State or Territory. Reporting to the enumerators are sub-enumerators, who are selected from a broad range of responsible public officials and private individuals, some four-fifths of whom were connected (at the 1966 Census) in some temporary or permanent way with the Electoral Office function.

The recruitment of census collectors is carried out by enumerators, often with the advice of sub-enumerators and in accordance with standards determined by the Bureau. Each collector enters into a contract of service and signs an undertaking of fidelity and secrecy. Special collectors for shipping, light-houses, certain public institutions, long-distance trains, coaches, and aircraft are also appointed.

The majority of persons connected with the field work of the census are employed temporarily and for very short periods, and, because of the long interval between censuses, many of them are without experience or knowledge of the work. It is necessary, therefore, that provision be made to enable census field staff to become acquainted with the objects and methods of the census. The basis of the instruction programme is a series of printed booklets, each containing instructions and general information for a particular level of the field staff, from collector to field supervisor. These booklets set out in detail the duties of the respective positions and contain instructions providing guidance for circumstances likely to arise. They may be supplemented by additional instructions for special circumstances, etc. Pre-census conferences at various levels are an established part of the preparations for the census. At these conferences the proposed householder's schedule and personal slip, the instructional booklets, administrative forms and all arrangements are discussed. Additionally, in 1966, an extensive collector training scheme was conducted using an instructional filmstrip. Post-census conferences are also held, and reports are made by various members of the field staff. From these emanate constructive and useful suggestions which are used in future census planning.

### *Mapping*

After approval of the scheme of sub-division the next most important phase in the organisation of the Census is the preparation of the maps required for the field staff and central office control. Basic material for the census maps, together with aerial photographs where required for special reference and guidance, are obtained from the relevant State and semi-governmental authorities and private map publishers. Difficulty has always been experienced in obtaining suitable base maps for this work, especially in rural areas, and difficulties are encountered in delineating boundaries on maps which have not been revised or re-drawn for many years.

The overall mapping programme comprises production of (a) a map of census divisions for Australia as a whole; (b) a diagram map for each census division showing sub-division boundaries and local government area boundaries; (c) a detailed base map for each census subdivision showing boundaries of local government areas and collector's districts; and (d) a map of each collector's district which, together with a typed description of the boundary, is inserted in the collector's record book for reference by the collector in the conduct of his work.

In addition to the maps for the organisation and the taking of the census, drawings and associated masks required for printing the coloured maps used in connection with the presentation of tabulated data in census publications are also prepared.

### *Census material*

The estimated number of householder's schedules and personal slips required for each census subdivision is based on the numbers of dwellings as estimated by the enumerators. An additional proportional allowance is incorporated as a safeguard against contingencies.

The quantities of other material required (e.g. instruction booklets, record books, compilation books, administrative forms, and equipment of various kinds) are also estimated by enumerators. Being closely related to known numbers of census divisions, subdivisions, or collector's districts, requirements can be assessed fairly accurately.

The printing and dispatch to the appropriate centres of householder's schedules, personal slips and envelopes for use with personal slips are organised and controlled by the Commonwealth Government Printer, Canberra. Other material, such as collectors' record books, collectors' compilation books, instruction booklets, administrative forms, posters, classifications and indexes of occupations and industries, labels, and tabulation forms, is printed by the Commonwealth Government Printer. Documents such as code lists and instructions for coding and checking are prepared on the Bureau's own reproduction equipment. Dispatch of this material is in general undertaken by the Census Office, Canberra.

### *Collectors' duties*

The census collector's duties are confined principally to distributing householder's schedules (and personal slips if required) to all dwellings in his district before census day and collecting completed forms after census day. Each collector is supplied with a collector's record book (which contains a map of his district and a description of its boundary) for door-to-door use and a collector's compilation book for purposes of compiling early field count figures. When collecting householder's schedules and personal slips the collector is expected to account for all forms issued and to examine them to ensure completeness. It is also the collector's duty to help those who for any reason were unable personally to fill in the schedule or slip. On satisfying himself as to completeness, the collector inserts in the appropriate place on each schedule the number of persons of each sex in the dwelling concerned. These details, together with other required details, are later transferred into the collector's compilation book. This book forms an integral part of the census records and is used as the basis for early field counts, for subsequent checking and balancing, and as a reference for other census purposes.

Each collector, upon completion of his duties, returns all material to his sub-enumerator. After checking the completed forms, record book and compilation book for each collector's district in his subdivision in accordance with standard instructions designed to ensure accuracy and completeness of coverage, the sub-enumerator forwards them to his enumerator, who is responsible for checking that the material is complete for all collector's districts in his division before transmission to the processing centre.

### *Processing, tabulation and publication of Census results*

For the purpose of processing the census schedules and other records for subsequent tabulation a census processing centre is established. To this is returned all the material from the field organisation after collection and checking. In the processing centre the completed schedules and slips are checked against collectors' records and then bound into book form to preserve their arrangement and to facilitate reference, handling and storage. From the bound books of schedules and slips, coding and the preparation of material for tabulating processes are carried out.

Tabulation of census data by means of punched card machines was first used at the 1921 census, and from that time there has been continuous technical improvement in the design, performance and range of application of the various types of equipment used at successive censuses. At the 1966 census, for the first time, computer equipment was used for an Australian

census. A basic requirement for tabulation purposes is that the replies given to the questions on the census schedule should be subsequently converted into numerical form. For the 1966 census, as in previous censuses, code lists were prepared to enable replies not already given in numerical form to be so converted. The code list for each characteristic (personal or dwelling) is, in essence, a predetermined optimum arrangement of how the replies in relation to that characteristic can be tabulated for presentation in the census publications. Each category in a code list is numbered. Where necessary, a code list is supplemented (for coding purposes) by an index showing the code number to be used for each anticipated possible answer to the particular census question.

The scheme of publication adopted for the census is designed to provide for the earliest possible publication of results progressively as they became available. Preliminary and summarised results are published in mimeographed form; the detailed final results are published in a series of volumes, each comprising a number of parts (*see below*).

Census Regulations provide for the division of each State and Territory of the Commonwealth into census divisions, census sub-divisions and collector's districts for the purpose of 'the taking and the collection of the Census'. Neither the Act nor the Regulations specify the extent to which data obtained at the census are to be geographically dissected for presentation, but in all censuses the need to produce detailed statistics for local areas has been recognised. Census information is being published for the following categories for the 1966 census.

- (i) local government areas;
- (ii) metropolitan urban, other urban, rural, and migratory divisions of each State and Territory and of Australia as a whole;
- (iii) statistical divisions, as used for many years in State statistical publications, and statistical districts, introduced for the first time in 1966 and representing stable regional boundaries of large towns with a regional population of over 100,000;
- (iv) urban centres, defined under new criteria for the 1966 Census (*see page 174*);
- (v) rural localities in which twenty or more dwellings or fifty or more persons were enumerated.

Detailed results of the censuses of the External Territories are published in a manner similar to those of the States and Internal Territories.

Final detailed results of the 1961 census of the Commonwealth were published in eight volumes, each comprising a number of parts which were published separately as soon as the relevant information became available. The parts and the volume for each State are uniform, but there is a different arrangement of the parts comprising the volume relating to the Territories and again in the volume relating to Australia. The order of volumes and parts is as follows.

- Volume I, New South Wales;
- Volume II, Victoria;
- Volume III, Queensland;
- Volume IV, South Australia;
- Volume V, Western Australia;
- Volume VI, Tasmania;
- Volume VII, Territories;
- Volume VIII, Australia.

#### *Order of parts of State volumes*

- Part I—Analysis of Population in Local Government Areas and in Non-municipal Towns of 1,000 Persons or more;
- Part II—Cross-classifications of the Characteristics of the Population;
- Part III—Analysis of Dwellings in Local Government Areas and in Non-municipal Towns of 1,000 Persons or more;
- Part IV—Cross classifications of the Characteristics of Dwellings and of Householders;
- Part V—Population and Dwellings in Localities.

#### *Order of parts of Volume VII—Territories*

- Part I—Northern Territory: Population;
- Part II—Northern Territory: Dwellings and Householders;
- Part III—Australian Capital Territory: Population;
- Part IV—Australian Capital Territory: Dwellings and Householders;
- Part V—External Territories: Population and Dwellings.

#### *Order of parts of Volume VIII—Australia*

- Part I—Cross-classifications of the Characteristics of the Population;
- Part II—Cross-classifications of the Characteristics of Dwellings and of Householders;
- Part III—Population and Dwellings in Localities (with Geographical Co-ordinates).

*Australian Life Tables 1960–1962*—forming part of Volume VIII—Australia.

*Statistician's Report*—forming part of Volume VIII—Australia.

In addition to the published information, the 1961 Census tabulation programme yielded a considerable amount of detailed statistics which could not be accommodated within the limits set by the publications programme, and which is available on application.

## Population recorded at censuses

State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1966 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in the chapter Discovery, Colonisation and Federation of Australia (page 5). The total populations recorded at the censuses taken in the Colonies from 1828 to 1881 are shown in the table on page 163.

## Increase since 1901 census

The increases in the populations of the several States and Territories and of Australia as a whole during the last seven intercensal periods are shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

**POPULATION: INTERCENSAL INCREASES, STATES AND TERRITORIES  
1901 TO 1966**

State or Territory	1901-1911 (10 years)	1911-1921 (10 years)	1921-1933 (12½ years)	1933-1947 (14 years)	1947-1954 (7 years)	1954-1961 (7 years)	1961-1966 (5 years)

(a) See text, page 161. (b) Part of New South Wales prior to 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movement subsequent to enlistment. (d) Revised in accordance with preliminary (field count) results of 1966 population census; subject to further revision in accordance with final census results. (e) Based on preliminary (field count) results of 1966 population census; subject to revision.

The estimated population at 31 December each year from 1788 to 1946 was shown in *Demography*, Bulletin No. 67, 1949, and for the period 1886 to 1965 in *Demography*, Bulletin No. 83, 1965. A graph illustrating the growth of the population of Australia and of each State and Territory appears on plate 16, page 162.

## Proportions of area and of population, density and masculinity

In the following table the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population. Additional information regarding density and masculinity of population appears later in this chapter (see pages 181–2).

## PROPORTIONS OF AREA AND OF POPULATION; DENSITY AND MASCULINITY OF POPULATION: STATES AND TERRITORIES, 30 JUNE 1966

State or Territory	Pro- portion of total area (per cent)	Proportion of census population, 30 June 1966(a) (per cent)			Density (b)	Masculi- nity(c)

(a) Based on preliminary 1966 census figures. (b) Number of persons per square mile. (c) Number of males per 100 females.

### Urban and rural distribution

In previous censuses *metropolitan and other urban* boundaries were delineated without common criteria, but for the 1966 census a new uniform concept of *urban*, based on a minimum population density of 500 persons per square mile, was introduced. Other new criteria concerned land use, continuity of dwellings, enclaves, and unoccupied dwellings in holiday areas. No account is taken of administrative boundaries in delineating these urban centres.

Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts and the absence of suitable topographic boundaries around small towns) the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts (see below), to other urban centres with a population of 30,000 or more, and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook, and urban centres in the Shires of Wyong and Gosford in New South Wales, Moe-Yallourn in Victoria, Cairns in Queensland, and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future censuses.

Briefly the new criteria are as follows.

- (1) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated '*urban*'. This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as '*urban*' on other grounds (e.g. holiday areas, industrial areas).
- (2) Around each principal urban centre with a population of 75,000 or more *two* boundaries shall be drawn. The *outer* boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong, and Geelong). The *inner* boundary shall delimit the principal urban centre itself. It shall be a *moving* boundary, which from census to census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities the principal urban centre encompassed by the inner boundary shall be designated the METROPOLITAN AREA.
- (3) Urban centres of less than 75,000 population shall be described by name as URBAN.

For urban centres *not* yet delimited by the new criteria, this procedure was used: urban centres were intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 enabled more meaningful boundaries to be delineated for many small urban centres.

Census field count statement No. 4, *Population, Principal Urban Centres of Australia* contains an appendix in which are expounded the full criteria now being applied.

*Rural* population comprises the inhabitants of the remaining portions of each State or Territory. The term *migratory* used in the following tables refers to persons not elsewhere enumerated who at midnight on 30 June 1966 were on ships in Australian waters or were travelling on long-distance trains, motor coaches or aircraft.

(e) Included in Canberra Statistical District—Remainder. (f) Includes part of urban centre in New South Wales. (g) Included in Adelaide Statistical Division—Remainder.

**Principal incorporated cities and towns**

The following table shows the population of the principal incorporated cities and towns with a population of 6,000 or more in each State and Territory of Australia at 30 June 1966. The figures relate to areas delimited for local government or other administrative purposes, and differ in some cases from figures shown in the table on page 175 which are based on the new census concept of 'urban' (see page 174).

(a) See table on page 175. The capital city (metropolitan area) population in each State comprises the populations of a number of separately incorporated local government areas and/or parts of local government areas.

A table showing the aggregate urban population at the 1961 census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more urban inhabitants was given in Year Book No. 51 page 267. A table showing similar data for the 1954 census was given in Year Book No. 47, page 295 and one for the 1947 census in Year Book No. 40, page 334. Comparisons between these various tables can be made only if allowance is made for changes in the status and structure of local government areas and for changes in the manner of determining urban population at each census.

**Principal cities of the world**

The following table shows the population of the world's largest cities at the latest available date. Since the way in which cities are delimited differs from country to country, the table shows data for the urban agglomeration, if such exists, as well as data for the so-called city proper. The urban agglomeration is defined in the United Nations *Demographic Yearbook* 1965 (page 20) from which most of the figures in the table have been taken, as the suburban fringe or thickly settled territory lying outside of, but adjacent to, city boundaries. (See also the Technical Notes on Statistical Tables and footnotes to the table in the *Demographic Yearbook*.)

(a) 'Standard metropolitan statistical area' as defined in 1965. (b) Provisional. (c) Statistical Division. Population of metropolitan areas are: Sydney, 2,144,735, Melbourne, 2,108,499. (d) Formerly Mukden. (e) East Berlin, year 1964, population of city proper, 1,071,462. (f) 1961.

## Mean population

Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods. From 1901 onwards the mean population for any year has been calculated by the formula:

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g. in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, and *e*.

The following tables show the mean populations for the calendar and financial years 1957 to 1966.

MEAN POPULATION(a): CALENDAR YEARS, STATES AND TERRITORIES

(a) Population estimates subsequent to the 1961 census are based on a method which omits holiday, business or other short-term movements between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in the mean population figures for the States prior to 1962 (and 1961-62) but not in those for 1962 (1961-62) and subsequent years. (b) The populations on which these mean populations are based are subject to further revision in accordance with the final results of the 1966 census.

## Elements of increase

The two factors which contribute to the growth of a population are 'natural increase', i.e. the excess of births over deaths, and 'net migration', i.e. the excess of arrivals over departures. The 'total increase' of the population is obtained by combining natural increase with the increase by net migration. However, comparison of the total increase so obtained with that derived by subtracting the population recorded at one census from that recorded at the next census reveals differences which can be attributed partly to differences in the coverage of the census enumerations, and partly to deficiencies in the records of the elements of increase.

## Elements of increase, 1941 to 1966

In the following table particulars are given of the elements of increase for each five-year period from 1941 to 1965 and for each of the years 1962 to 1966.

(a) Excess of births registered over deaths registered. For Sept. 1939 to June 1947 deaths of defence personnel whether overseas or in Australia, included.  
 (b) Excess of arrivals over departures. Excludes troop movements for the period September 1939 to June 1947. (c) Adjustment of population on the basis of the final results of the 1947, 1954 and 1961 censuses and the preliminary results of the 1966 census. (d) For periods subsequent to the census of 30 June 1966 the intercensal adjustment will not be known until after the next census has been taken.

## Analysis of intercensal increase, 30 June 1961 to 30 June 1966

As stated on page 161 of this chapter, complete records of interstate migration are not available. For this reason the differences between the estimated populations and those recorded at the census of 30 June 1966, i.e. the intercensal adjustments, were substantial for some States,

**POPULATION: ANALYSIS OF INTERCENSAL INCREASE, STATES AND TERRITORIES, 30 JUNE 1961 TO 30 JUNE 1966**

State or Territory	Population at 30 June 1961(a)	Natural increase(b)	Net migration (c)	Total recorded increase	Intercensal adjustment (d)	Population at 30 June 1966(a)

<b>Australia . . .</b>	<b>10,508,186</b>	<b>670,079</b>	<b>395,485</b>	<b>1,065,564</b>	<b>-32,986</b>	<b>11,540,764</b>

(a) Census. (b) Excess of births registered over deaths registered. (c) Excess of arrivals over departures for recorded interstate and overseas migration. (d) Adjustment of population on the basis of the preliminary results of the census of 30 June 1966.

**Rate of population growth**

In the following two tables natural increase refers to the excess of births over deaths (including deaths of Australian defence personnel), net migration refers to excess of overseas arrivals over departures excluding overseas movement of defence personnel for the period September 1939 to June 1947, and total increase is the sum of natural increase and net migration together with differences disclosed by results of population censuses up to 30 June 1966.

Annual rates of natural increase, net migration and total increase, for single years, represent the increase during the year expressed as a proportion (per cent) of the population at the beginning of the year. These rates are slightly higher than those calculated as a proportion (per cent) of the mean population for the year.

Average annual rates of increase for periods greater than one year have been calculated in the following manner.

The average annual rate of total increase is computed by the formula:

$$P_t = P_0 (1 + r)^t$$

where  $P_0$  and  $P_t$  are the populations at the beginning and end respectively of a  $t$ -year period and  $r$  is the average annual rate of growth.

The average annual rate of natural increase and net migration is computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. Differences between the sum of the rates of natural increase and of net migration and the rate of total increase are due to the intercensal adjustment.

**POPULATION: ANNUAL RATE OF GROWTH, AUSTRALIA  
1941 TO 1966  
(Per cent)**

Period	Natural increase	Net migration	Total increase
<b>Average annual rate—</b>			
1941-45 . . . . .	0.94	0.02	0.98
1946-50 . . . . .	1.36	0.91	2.26
1951-55 . . . . .	1.38	0.95	2.31
1956-60 . . . . .	1.40	0.83	2.22
1961-65 . . . . .	1.27	0.74	1.96
<b>Annual rate—</b>			
1962 . . . . .	1.36	0.59	1.89
1963 . . . . .	1.30	0.66	1.91
1964 . . . . .	1.17	0.90	2.01
1965 . . . . .	1.10	0.93	1.97
1966 . . . . .	1.04	0.76	1.77

The average annual rate of population growth during the present century has been 1.72 per cent, but the results from year to year have deviated widely from this figure. In the following table the period 1 January 1901 to 31 December 1966 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

**POPULATION: PERIODICAL RATES OF GROWTH, AUSTRALIA  
1901 TO 1966**

Period	Interval (years)	Total increase (‘000)	Average annual numerical increase (‘000)	Average annual rate of population growth (per cent)		
				Natural increase	Net migration	Total
1901 to 1913 . .	13	1,128	87	1.55	0.49	2.04
1914 to 1923 . .	10	862	86	1.49	0.15	1.64
1924 to 1929 . .	6	680	113	1.26	0.62	1.88
1930 to 1939 . .	10	569	57	0.82	0.02	0.85
1940 to 1946 . .	7	513	73	0.98	0.01	1.01
1947 to 1952 . .	6	1,222	204	1.37	1.19	2.54
1953 to 1960 . .	8	1,652	207	1.39	0.81	2.19
1961 to 1966 . .	6	1,259	210	1.23	0.74	1.92

Rates of population growth from 1886 are shown for each State and Territory of Australia in the annual bulletin, *Demography*. Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the years 1958–1963 are shown in the table on pages 208–9.

### Density

From certain aspects, population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,967,909 square miles and a population at the census of 30 June 1966 of 11,540,764, excluding full-blood Aborigines, has a density of only 3.89 persons to the square mile, and is, therefore, one of the most sparsely populated countries of the world. For other continents and sub-continents, the densities in 1964 were approximately as follows: Europe (excluding U.S.S.R.), 231; Asia (excluding U.S.S.R.), 168; Latin America, 31; U.S.S.R., 26; Africa, 26; and Northern America, 26. The population density of Australia in 1964 was 3.75, about one-seventh of that of Northern America, of Africa and of the U.S.S.R.; about one-eighth of that of Latin America; about one-forty-fourth of that of Asia (excluding U.S.S.R.); and about one sixty-third of that of Europe (excluding U.S.S.R.).

Because of the large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 3.89 in 1966. The rise in density from 1901 to 1966 in each State and Territory was: New South Wales 4.45 to 13.67, Victoria 13.77 to 36.61, Queensland 0.76 to 2.49, South Australia 0.95 to 2.87, Western Australia 0.20 to 0.86, Tasmania 6.68 to 14.07, Northern Territory 0.01 to 0.07, and Australian Capital Territory 2.05 (in 1911) to 102.14. When comparing the density of population of the several States, consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The proportion of the area of Australia receiving less than 10 inches of rainfall is 39 per cent; that of the various States is: New South Wales, 20 per cent; Victoria, nil; Queensland, 13 per cent; South Australia, 83 per cent; Western Australia, 58 per cent; and Tasmania, nil.

The number and density of population of the principal countries and continental groups of the world are shown in the tables on pages 207–9.

### General characteristics of the population

Particulars of the characteristics of the population of Australia at the 1961 census compared with the 1954 census are shown in this section, and for the individual States and Territories at the 1961 census in Year Book No. 49 (see pp. 317–35). Such figures as are available for the 1966 census are included in the Appendix. Information concerning the industry, occupational status and occupations of the population as recorded at the 1961 census is given in the chapter Employment and Unemployment, and on dwellings and householders in the chapter Housing and Building.

**Sex distribution**

The number of males to each hundred females has been adopted as a measure of the 'masculinity' of the population. The masculinity of the population of each of the States may be obtained for each year from 1796 to 1907 from the table on pages 163-5 of Year Book No. 2 and for the years 1900 to 1910 from the table on page 123 of Year Book No. 5.

With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth rate. At the 1947 census the numbers of the sexes were practically equal, but during the following decade there was an increase in masculinity owing to the greater number of males as compared with females in net overseas migration, and the recovery of the birth rate in the post-war period from the low levels of the 1930s. In more recent years, however, the trend has declined again.

(a) Interim revised age distribution based on the age distribution at the 1961 census adjusted for misstatement of age, and on subsequent births, recorded ages at death, and recorded ages of migrants. The estimates have been revised in accordance with the preliminary (field count) 1966 population census results.

**Marital status; country of birth; period of residence in Australia; nationality; race; religion**

The following tables show the population of Australia at the censuses of 30 June 1954 and 1961, classified according to marital status, country of birth, period of residence in Australia, nationality, race, and religion.

**POPULATION: MARITAL STATUS, BY SEX, AUSTRALIA  
CENSUSES, 30 JUNE 1954 AND 1961**

Marital status	Census, 30 June 1954			Census, 30 June 1961			Increase, 1954-61
	Males	Females	Persons	Males	Females	Persons	
<b>Never married—</b>							
Under 15 years of age	1,309,660	1,253,674	2,563,334	1,626,195	1,550,803	3,176,998	613,644
15 years of age and over	962,491	684,154	1,646,645	1,098,450	770,048	1,868,498	221,853

(a) Includes Pacific Islander, Polynesian and South Sea Islander, so described. (b) This category covers persons with European blood to the extent of one-half and blood of a non-European race to the extent of one-half.

The characteristic 'race' refers broadly to the ethnic origin of the person irrespective of where born or of what nationality. For this characteristic the basic data do not permit of scientific classification of ethnic origin, and the races are named with a geographical rather than a truly ethnological description.

Minus sign (—) denotes decrease.

### Overseas arrivals and departures

More detailed statistics of overseas arrivals and departures, covering country of residence, country of embarkation/intended disembarkation, mode of travel, month of arrival or departure, etc., are shown in the tables of Section II., Overseas Arrivals and Departures, of the annual bulletin *Demography*. Monthly and quarterly mimeographed bulletins, containing the latest available statistics of overseas arrivals and departures, are also issued.

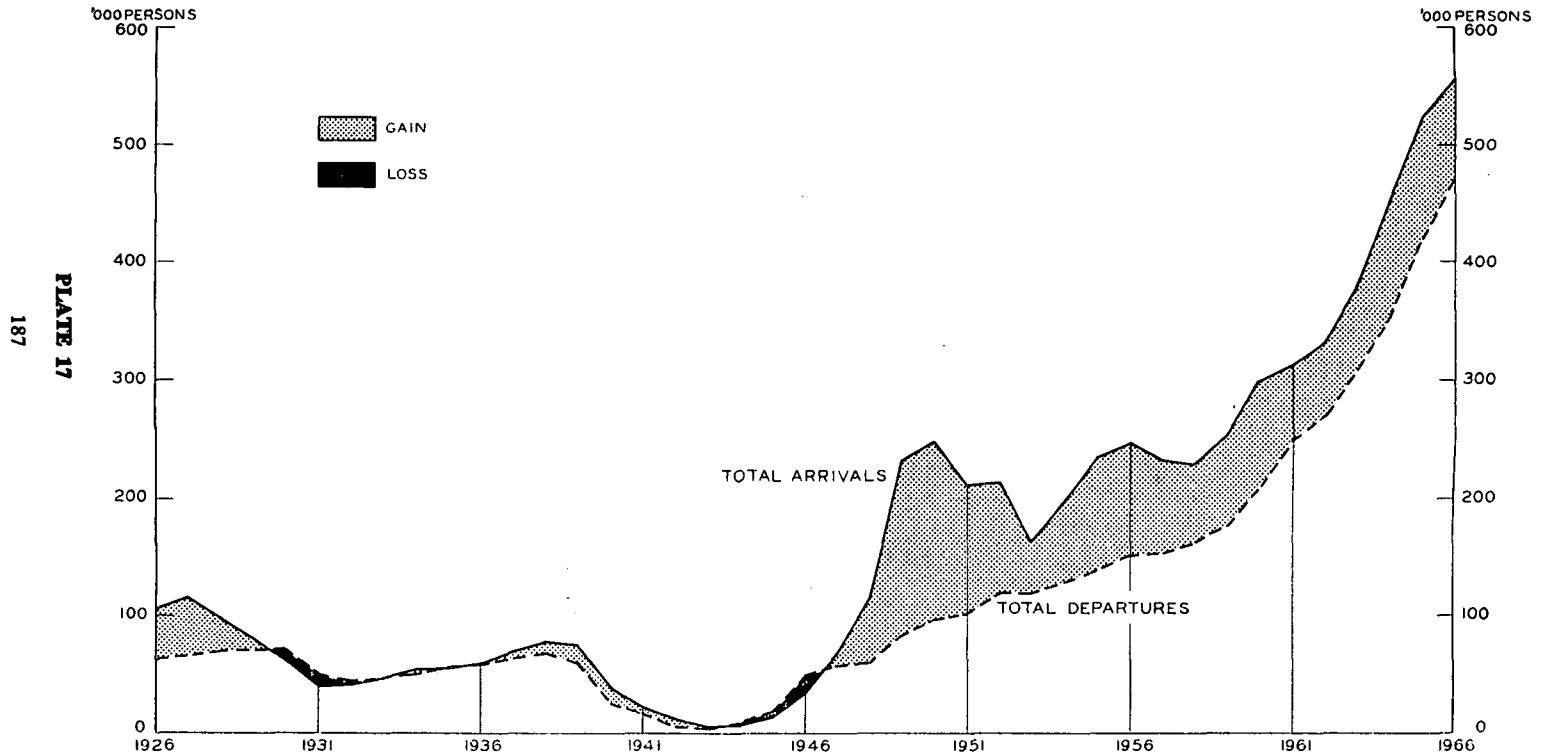

In this chapter summary figures are given of the total movement of overseas passengers and details in respect of permanent arrivals and departures. For further information on passengers classified to short-term movement, see Chapter 13, Transport, Communication and Travel.

#### Overseas arrivals and departures since 1936

Earlier issues of the Year Book contain, in summary form, tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1881 is published in the annual bulletin *Demography*. The following table shows, for Australia, arrivals and departures since 1936, and refers to total movement irrespective of length of stay. Air crews and ships' crews, persons passing through Australia on board the same ship or flight, and also persons on a short pleasure cruise in the south-west Pacific commencing and finishing in Australia on a ship not engaged in a regular voyage, are excluded from Australian statistics of overseas arrivals and departures. A graph showing arrivals and departures from 1925 to 1966 appears on plate 17 opposite.

(a) Excludes movements of defence personnel from September 1939 to June 1947.

## Excess of arrivals over departures

The excess of total overseas arrivals over departures is one of the elements of population increase taken into account in preparing the estimated population for other than census dates (see page 161 of this chapter). It is necessary to use statistics of total overseas arrivals and departures for this purpose, because Australian population statistics relate to the total population present in Australia at the date of the census or estimate, and not the population normally resident in Australia (which would include those temporarily overseas and exclude those temporarily visiting Australia). In the two following tables are set out particulars of the net gain or loss of population due to overseas migration, according to age and marital status and according to country of birth.

Minus sign (—) indicates excess of departures over arrivals.

### Classification of travellers

Since 1 July 1924 overseas travellers have been classified according to declared intention in regard to residence into two principal categories, distinguishing movements for short terms from movements for longer periods (including permanently). Prior to 1957 these categories were *temporary* and *permanent*. Thereafter the categories were entitled *short-term* and *permanent* and *long-term*, but the basis of classification was not changed and the figures are directly comparable for the whole period. For short-term movements overseas visitors and Australian residents were identified separately.

Revised questions for travellers were introduced in mid-1958, and these enabled the separation, from 1 January 1959, of permanent from other long-term movements and also the identification among the permanent departures of former settlers departing.

The principal categories of travellers are as follows.

**Permanent movement**—consists of persons arriving with stated intention of settling permanently in Australia (settlers), and Australian residents departing with stated intention of residing permanently abroad; the latter include *former settlers*, i.e. persons who, on departure from Australia, stated that they had come to Australia to settle, had stayed for a period of twelve months or more and were now departing permanently.

**Long-term movement**—consists of the arrival of visitors and the departure of residents with stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more; and the departure of visitors and the return of residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

**Short-term movement**—consists of all other movements, including the movement of Australian troops irrespective of period of stay.

This classification is based on statements made by the traveller on arrival in, or departure from, Australia. They represent the traveller's intention at that time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.

The numbers so classified since 1 January 1941, on the basis of declared intention as to residence, and since 1 January 1961, on this basis supplemented by additional particulars as to stated purpose of travel, are as follows.

*Settlers—State or Territory of intended residence.* The following table shows the number of settlers arriving in Australia, according to the State or Territory of intended residence. Persons are asked, on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. The statements represent the settlers' intentions at the time and may not be realised. The allocation to States and Territories in the table is based on these statements, except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, are allocated, as far as is practicable, to the State or Territory of their placement from the centre.

**OVERSEAS ARRIVALS—SETTLERS ARRIVING: STATE OR

**Assisted migration into Australia**

Immigration has always been a major factor in Australia's economic growth. Since the 1939-45 War immigration programmes have been pursued as a central feature of Government policies for national development. Since 1945 successive Australian governments have borne a substantial part of the passage costs of selected migrants from overseas countries. This assistance has in some cases been matched or partly matched by contributions from the government of the emigration country and from international funds. The basis of operation has varied from country to country—bilateral migration agreements have been negotiated with some countries, migration arrangements have been made through the Intergovernmental Committee for European Migration (ICEM) with other countries, and in other instances unilateral assistance has been given by the Australian Government. In the following table particulars are shown of the total numbers of persons who were assisted to come to Australia by the Australian Government under all assisted passage schemes during the period 1946 to 1966.

**ASSISTED MIGRATION: AUSTRALIA, 1946 TO 1966**

Period	Nominated and selected (assisted) arrivals
1946-50 . . . . .	273,195
1951-55 . . . . .	275,241
1956-60 . . . . .	305,517
1961-65 . . . . .	337,132
1961 . . . . .	55,685
1962 . . . . .	45,276
1963 . . . . .	62,914
1964 . . . . .	79,604
1965 . . . . .	93,653
1966 . . . . .	89,743

# Joint Commonwealth and States scheme

Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Year Book (*see* No. 38, page 576). After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

## Migration from Britain

At the conclusion of the 1939-45 War two migration agreements were negotiated between the Australian and British Governments and signed on 5 March 1946. These agreements came into operation on 31 March 1947, and provided respectively for granting free passages to British ex-servicemen and their dependants and assisted passages to other residents of Britain wishing to settle permanently in Australia. The free passage agreement was terminated on 28 February 1955, but the assisted passage agreement has continued in operation by renewal from time to time. The current assisted passage agreement formally expired on 31 March 1967, but action is in course to re-negotiate. In the meantime the provisions of the agreement are being continued by mutual consent of the two Governments.

*Assisted passages.* Under the present agreement the British Government contributes £Stg150,000 per annum towards the cost of the movement of migrants to Australia. Each migrant 19 years of age or over contributes £Stg10 towards his passage costs. Migrants under 19 years of age make no contribution. The Australian Government meets the balance of the overall transport costs.

Eligibility for consideration for assisted passages is confined generally to citizens of the United Kingdom and colonies, normally resident in Britain. Within those broad conditions of eligibility, there are six categories of applicants who may be granted assisted passages under current arrangements.

*Personal nominees*—persons sponsored by relatives or friends already established in Australia who provide accommodation for their nominees.

*Group nominees*—workers and their dependants sponsored or selected to meet labour requirements specifically notified by public and private employers.

*Commonwealth nominees*—workers and their dependants selected to meet labour requirements within industry generally in Australia.

*'Bring out a Briton' nominees*—persons sponsored by special voluntary committees formed throughout Australia to stimulate the flow of British migrants through community effort.

*Single men and women and married couples without children*—persons with a minimum capital of £Stg25 each, selected without specific nomination, who are prepared to make their own accommodation arrangements upon arrival.

*'Nest-egg families'*—families with a minimum capital of £Stg1,000 and prepared to make their own accommodation arrangements on arrival.

Hostels are operated by the Australian Government and also by the State Governments to provide transit or temporary accommodation for certain groups of newly arrived migrants.

*Number of arrivals.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the period January 1947 to June 1966 are given in the following table according to the State of proposed destination.

## UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT: NUMBER OF MIGRANTS(a), STATES AND TERRITORIES, JANUARY 1947 TO JUNE 1966

(a) Includes child migrants as shown on page 196.

(b) See text above for explanation.

### **Child migration from Britain**

The pre-war arrangements under which child migrants were brought to Australia under the sponsorship of various religious denominations and voluntary organisations were resumed in 1947. Under current arrangements these young migrants receive assisted passages and special maintenance provisions involving the British Government and the Australian and State Governments. From the beginning of 1947 to 30 June 1966 a total of 7,861 British child and youth migrants arrived under sponsorship, 5,449 to New South Wales, 1,374 to Western Australia, 583 to Victoria, and 455 to other States. These arrivals are included in the table on page 195.

### **Maltese migration**

The Australian Government and the Government of Malta entered into an agreement on 28 April 1965, under which financial assistance is granted jointly towards the movement to Australia of approved migrants from Malta. The agreement supersedes earlier ones signed in 1948 and 1956. ICEM (Intergovernmental Committee for European Migration—see page 198) is associated with the assisted migration arrangements under this agreement. Up to 30 June 1966 a total of 37,632 Maltese had arrived under the assisted passage scheme.

### **Netherlands migration**

On 1 April 1951 a migration agreement between the Netherlands and Australia came into operation under which selected Dutch workers and their dependants could receive assisted passages to Australia. This superseded an earlier arrangement made in 1946 between the Netherlands Emigration Foundation and Australia (see Year Book No. 39, page 56). The 1951 agreement continued in operation under extensions until the signing of the Australia-Netherlands Migration and Settlement Agreement on 1 June 1965. In accordance with Article II of that agreement an 'Australian-Netherlands Assisted Passage Migration Arrangement' was negotiated to come into force concurrently with the agreement. The agreement is for a basic period of five years but will then continue indefinitely subject to termination at one year's notice by either Party. The 'Arrangement' will normally run for the same period as the 'Agreement' but may be terminated at 180 days notice by either Party.

Contributions to passage costs under the arrangement are made by the migrant and the Netherlands and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM (see page 198) is associated with the assisted migration arrangements under this agreement. Up to 30 June 1966, 69,853 Dutch assisted migrants had arrived in Australia.

### **Italian migration**

On 1 August 1951 a migration agreement between Italy and Australia came into operation under which selected Italian workers and their dependants could receive assisted passages to Australia. The agreement was temporarily suspended at the end of 1952 but was resumed at the end of 1954. It continued in operation under extensions until 31 January 1964. Negotiations are in course for a revised agreement and, in the meantime, provision has been made for assisted migration on a limited scale to continue under the previous arrangements. Contributions to passage costs under the agreement are made by the migrant and the Italian and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM (see page 198) is associated with the assisted migration arrangements under this agreement. Up to 30 June 1966, 41,309 Italian assisted migrants had settled in Australia.

### **German migration**

On 29 August 1952 a migration agreement was signed between the Federal Republic of Germany and Australia under which selected German workers and their dependants could receive assisted passages to Australia. The agreement was renewed for five years from 29 August 1957, but assisted migration under the terms of the 1957 agreement continued until a new agreement was signed on 21 June 1965, to run indefinitely subject to one year's notice of termination by either party. Contributions to passage costs under the agreement are made by the migrant and the Governments of the Federal Republic of Germany and Australia. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM (see page 198) is associated with the assisted migration arrangements under this agreement. Up to 30 June 1966, 78,937 German assisted migrants had settled in Australia.

### **Austrian migration**

Late in 1952 arrangements were made between the Austrian Government, the Australian Government and ICEM (see page 198) under which selected Austrian workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to

passage costs are made by the migrant and the Australian Government. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1966, 19,309 Austrian assisted migrants had settled in Australia.

#### **Greek migration**

Late in 1952 arrangements were made between the Greek Government, the Australian Government and ICEM (see page 198) under which selected Greek workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to passage costs are made by the migrant and the Greek and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1966, 42,421 Greek assisted migrants had settled in Australia.

#### **Spanish migration**

In 1958 arrangements were made between the Spanish Government, the Australian Government and ICEM (see page 198) under which selected Spanish workers and their dependants could receive assisted passages to Australia. At the request of the Spanish authorities these arrangements, so far as workers are concerned, were temporarily suspended in March 1963. Since then certain female dependants nominated by Spanish assisted migrants already in Australia have continued to arrive in Australia as assisted migrants, and negotiations are in course with a view to restoring the previous assisted passage arrangements for workers and their dependants. Contributions to passage costs are made by the migrant and the Spanish and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1966, 8,077 Spanish assisted migrants had settled in Australia.

#### **Belgian migration**

On 1 February 1961 arrangements were made between the Belgian Government, the Australian Government and ICEM (see page 198) under which selected Belgian workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to passage costs are made by the migrant and the Belgian and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1966, 1,826 Belgian assisted migrants had settled in Australia.

#### **Refugee migration**

By agreement with the International Refugee Organization, Geneva, on 21 July 1947, Australia undertook to provide resettlement opportunities for Displaced Persons. A total of 170,700 Displaced Persons arrived in Australia under this agreement in the following years. The International Refugee Organization was terminated in 1951 and refugee problems became the responsibility of the United Nations High Commissioner for Refugees, whose office was created by the United Nations specifically for this purpose. At about the same time ICEM was established (see page 198) partly to provide arrangements for the actual resettlement overseas of refugees, particularly in regard to transport.

Australia has continued to provide resettlement opportunities for refugees from Europe and elsewhere. In the period from 1945 to 30 June 1966, 301,850 refugees had been resettled in Australia including the 170,700 Displaced Persons mentioned above. Of the total number of refugees received by Australia since the end of World War II up to 30 June 1966, 213,442 have received financial assistance from the Australian Government towards their passage costs.

#### **General Assisted Passage Scheme**

This scheme has operated since 10 September 1954, and provides for a contribution by Australia towards passage costs to be granted to selected British and non-British workers and their dependants from a number of countries. Australia provides for the reception of migrants accepted under this scheme and for general assistance towards their settlement in Australia. From 1 July 1966 a new assisted migration programme, the Special Passage Assistance Programme, has operated in Europe. As a result the General Assisted Passage Scheme now applies only to applicants resident outside Europe, e.g. the United States of America, South America and Africa. Up to 30 June 1966, 32,044 assisted migrants had settled in Australia under the General Assisted Passage Scheme.

#### **Special Passage Assistance Programme**

This programme has applied since 1 July 1966 to selected applicants residing in Britain, Ireland, continental Europe (excluding Luxembourg and communist countries), and Malta. Persons in those countries who are already eligible under existing assisted passage schemes are not

considered for the Special Passage Assistance Programme. Persons nineteen years of age and over are required to contribute \$A25 towards their passage costs and may receive assistance up to a maximum of \$A335. Persons under 19 years make no contribution and receive assistance up to a maximum of \$A360.

Australia provides for the reception of migrants accepted under this programme and for general assistance towards their resettlement.

#### The Intergovernmental Committee for European Migration (ICEM)

This Committee, like the office of the United Nations High Commissioner for Refugees, was established to perform functions that had formerly been carried out by the International Refugee Organization. In addition to assuming responsibility for the resettlement of refugees, ICEM has been concerned also with the movements of national migrants from Europe. Australia was one of the sixteen foundation members of the Committee; there are now thirty member countries including the British Commonwealth countries of Australia, New Zealand, the United Kingdom and Malta.

The three main functions of ICEM are:

- (a) the movement of national migrants and the provision of related services;
- (b) the resettlement of refugees and the provision of related services; and
- (c) developmental activities and technical co-operation (this includes activities such as language teaching, vocational and orientation training, and in particular measures to facilitate the acceptance of European migrants by Latin American countries).

Each member government is required to contribute an agreed percentage of the Committee's administrative expenditure. Contributions to its operational expenditure are voluntary and governments may stipulate the terms and conditions under which they are to be used.

Up to 30 June 1966 ICEM had moved 1,445,000 persons, of whom 453,000, 328,000 nationals and 125,000 refugees, had departed for Australia.

#### Summary of arrivals of assisted migrants

The following table shows the number of assisted migrants who arrived in Australia in each of the last five financial years and since January 1947.

#### ARRIVALS UNDER ASSISTED MIGRATION SCHEMES: AUSTRALIA, JANUARY 1947 TO JUNE 1966

Assisted migration scheme	January 1947 to June 1961	1961-62	1962-63	1963-64	1964-65	1965-66	January 1947 to June 1966
Austrian . . . .	16,523	227	372	594	769	824	19,309
Belgian . . . .	232	506	414	318	155	201	1,826

Other schemes . . .	28,682	..	..	..	..	..	28,682
<b>Total . . . . .</b>	<b>891,163</b>	<b>42,062</b>	<b>57,159</b>	<b>71,052</b>	<b>88,616</b>	<b>89,190</b>	<b>1,239,242</b>

(a) Mostly Scandinavians, U.S. Americans, and British nationals from countries other than the United Kingdom.

NOTE. (i) All arrivals included in this table have obtained some financial assistance from the Australian Government towards payment of their passage money. Transport to Australia for the migrants concerned has been arranged on (a) ships under charter to the Department of Immigration, (b) ships and aircraft under charter to the Intergovernmental Committee for European Migration, and (c) normal commercial shipping and airlines.

(ii) The arrivals under these schemes include a small number of nationals of countries other than those referred to, and stateless persons.

### Immigration Advisory Planning and Publicity Councils

Three bodies have been established to advise the Minister for Immigration on the social, economic and publicity aspects of the immigration programme.

The *Immigration Advisory Council*, established in 1947, consists of representatives of major national organisations (e.g. the Australian Council of Trade Unions, the Returned Servicemen's League of Australia, and the National Youth Council) and advises the Minister on the social aspects of immigration. The *Immigration Planning Council*, established in 1949, consists of eminent persons chosen in their own right: it advises the Minister on the economic considerations affecting the immigration programme. The *Immigration Publicity Council*, established in 1962, advises on publicity and publications used in Australia and overseas. Its members represent the press (including the foreign language newspapers), radio and television interests.

### Professional Migration

The Department of Immigration, working in close co-operation with the Department of Labour and National Service, provides a special service, including advisory staff in London, to encourage immigration of professionally qualified persons by giving advice and information on prospects in Australia and by placing such applicants in touch with Australian employers.

The number of professional applicants is growing (the majority come from the United Kingdom). Some difficulties being experienced in the recognition of foreign qualifications are yet to be resolved.

## The regulation of immigration into Australia

### Powers and legislation of the Commonwealth

Under section 51 (xix), (xxvii) and (xxviii) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens and the influx of criminals. Immigration into Australia is regulated by the *Migration Act 1958-1966* which came into force on 1 June 1959 and repealed the *Immigration Act 1901-1949* and the *Aliens Deportation Act 1948*.

Any immigrant entering Australia after the commencement of the Act without having been granted an 'entry permit' or who is not within an exempted class is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries, and seamen who enter on leave while their ships are in Australian ports. For the purposes of the Migration Act an immigrant includes a person entering for temporary stay.

An entry permit is normally granted at the port of entry by means of a stamp in the traveller's passport or equivalent travel document. There is no form of application involved. Temporary permits are granted to persons who have been authorised to enter for a limited period only. Otherwise, permits are issued without limitation as to stay. A person who is refused an entry permit must be kept on board the ship on which he arrives, otherwise the shipping company is liable to a fine of \$1,000.

The Act regulates the deportation of persons who enter Australia without an entry permit, who overstay their approved period of residence or who are convicted of crimes. It also contains provisions relating to the emigration of children and Aborigines.

The Act does *not* affect passport or visa requirements for entry to Australia. All persons who, prior to the 1958 Act, had been required before embarkation to obtain visas or other kinds of authority to proceed to Australia, are still required to obtain them. Likewise, persons who have not had to obtain prior authority to proceed to Australia are not now required to obtain such authority solely as a result of the Act. Persons previously allowed to enter without production of passports—notably British people arriving from New Zealand—are still able to do so.

The *Aliens Act 1947-1966* provides that a register of aliens shall be maintained for every State and mainland Territory of Australia. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify the Department of their address, occupation, or employment during the month of September each year. They are required to notify marriage within thirty days of marriage taking place. The Act provides also that the consent of the Department must be obtained before an alien may change his surname.

The *Immigration (Guardianship of Children) Act 1946-1966* provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia (except for certain groups exempted) other than in charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the Child Welfare authorities in each State and mainland Territory who, as the Minister's delegates under the Act, supervise the welfare of each 'immigrant child'.

### Conditions of immigration into Australia

**Admission of non-Europeans.** Australia's immigration policy is based on the need to maintain a predominantly homogeneous population. It is fundamental to the policy that those people coming to Australia for residence should be capable, both economically and socially, of ready integration into the community.

Australia does not exclude from residence persons of other than European origin. Immigration laws and policy permit the Minister to exercise discretion, taking into account the qualifications of persons wishing to settle here, their ability to integrate readily into the community, and other aspects including considerations of a humanitarian nature and broad national interest.

There are in Australia some 38,200 non-Europeans. Of these, 17,200 are Australian citizens (11,000 by birth and 6,200 by naturalisation or registration), while 3,500 have resident status but have not sought or qualified for citizenship. The remaining 17,500 comprise 4,100 non-Europeans who have been admitted, in some instances with their families, in a variety of categories with temporary residence status, 700 visitors, and an Asian and other non-European student population of 12,700 (including 1,800 government-sponsored students and 10,900 private students).

The present policy provides, *inter alia*, that:

non-Europeans, who are the spouses, unmarried minor children, aged parents or fiancées of Australian citizens, and of other British subjects already having resident status, or eligible to enter with such status, may be admitted for permanent residence. The non-European wife and unmarried minor children of a European alien in similar circumstances may also be admitted for residence;

non-Europeans who have already been admitted under temporary permit but with the expectation of indefinite stay may, after completing five years' residence, qualify to apply for resident status and subsequently for citizenship.

The following are examples of persons who may be considered for entry with a view to settlement, accompanied by their wives and children, on the basis of their general suitability, ability to integrate and qualifications positively useful to Australia. Those admitted are able, after five years' stay on temporary permit, to apply for resident status and citizenship:

persons with specialised technical skills for appointments for which local residents are not available;

persons of high attainment in the arts and sciences, or of prominent achievement in other ways;

persons nominated by responsible authorities or institutions for specific important professional appointments, which otherwise would remain unfilled;

executives, technicians, and other specialists who have spent substantial periods in Australia—for example, with the branches here of large Asian companies—and who have qualifications or experience in positive demand here;

businessmen who in their own countries have been engaged in substantial international trading and would be able to carry on such trade from Australia;

persons who have been of particular and lasting help to Australia's interest abroad in trade, or in other ways;

persons who by former residence in Australia or by association with us have demonstrated an interest in or identification with Australia that should make their future residence here feasible.

In addition to visitors and students, provision exists also for the entry on a limited temporary residence basis of staffs of companies, professional, technical and specialist personnel, and of persons coming for medical treatment, religious training, or as sportsmen and entertainers, and in other miscellaneous categories.

**Private students.** Young people may enter Australia for the purpose of study, irrespective of their countries of origin. The greater proportion of such private students in Australia are, however, from Asia, the Pacific area and, to a lesser extent, from the continent of Africa (there are at present some 11,000 Asian and other non-European private students in Australia). The objective is to provide the opportunity for young people in these areas to come to Australia for advanced secondary, tertiary and other post-secondary study and training which will result in qualifications in demand and of use in their countries. The student, as well as meeting other requirements of entry, must have the capacity to undertake the course of study proposed, and

produce evidence of enrolment and assurances as to maintenance and accommodation. The student is admitted with temporary residence status on the understanding that he will return to his own country when the course of approved study is completed. Extensions of stay are dependent normally upon satisfactory progress being made with his studies.

*Persons of European race.* Maltese, Cypriots and aliens of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration or an Australian overseas post. Their admission under the present policy is subject to clearance on health, character and security grounds, and to their suitability as settlers generally.

*General information.* General information about conditions of entry into Australia may be obtained from the following officers:

- (a) in Australia—the Secretary, Department of Immigration, Canberra, Australian Capital Territory, and Commonwealth Directors of Migration in the capital cities of the various States;
- (b) in overseas countries—from migration officers or from Australian diplomatic posts (a complete list of these is given in the chapter International Relations).

### Passports

Australian passports are issued, under the *Passports Act 1938–1966* and *Passport Regulations*, to Australian citizens. Diplomatic passports are issued to persons travelling on official missions of a diplomatic character. Official passports are granted to persons travelling on the official business of the Commonwealth or a State Government. Australian passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State and internal Territory of Australia or from overseas offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas. Applicants for passports must furnish evidence of their identity and nationality and pay a fee of four dollars. Approximately 95,000 Australian passports are issued each year in Australia and abroad.

### Citizenship and naturalisation

#### Commonwealth legislation

The *Nationality and Citizenship Act 1948* commenced on Australia Day (26 January) 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of 'Australian Citizen'. In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. The status of 'British subject' flows from the possession of citizenship of one of the Commonwealth countries. It could best be described as the connecting link between the citizenship of the countries of the British Commonwealth. Australian citizenship was automatically acquired as from 26 January 1949 by persons who were British subjects at that date and who either (a) were born in Australia or New Guinea; or (b) were naturalised in Australia; or (c) had been residing in Australia during the five years immediately preceding 26 January 1949; or (d) were born outside Australia of fathers to whom (a) or (b) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (e) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction). For the purposes of the Act, 'Australia' includes the Territories of the Commonwealth which are not Trust Territories. By an amendment of the Act in 1950 it was further provided that Nauru shall be treated in the same manner as New Guinea.

Citizenship may be acquired in the following ways: (a) by birth in Australia; (b) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (c) by registration—Certificates of Registration as Australian citizens may be granted by the Minister to British subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (d) by naturalisation—Certificates of Naturalisation as Australian citizens may be granted by the Minister to aliens and protected persons who make application and can comply with requirements somewhat

similar to those previously required under the *Nationality Act 1920-1946*. Requirements for naturalisation are: (i) as a rule five years residence in Australia is required, but residence in other British countries or service under a British government may be accepted (special concessions in the matter of residence qualifications in respect of persons who have voluntarily enlisted in the armed forces were made by an amending Act of 1952); (ii) the applicants must have an adequate knowledge of the responsibilities and privileges of citizenship. Certificates do not take effect until the applicant takes the oath of allegiance. The oath is now taken, and citizenship is conferred, at public ceremonies held in the locality of the applicant's place of residence, and presided over by the mayor or equivalent head of the local government authority.

The declaration of intention to apply for naturalisation, which was introduced by the original Act of 1948, is no longer compulsory, although it can still be made if an intending applicant so desires. This change was made by the amending Acts of 1955 and 1959 under the provisions of which aliens may lodge applications on completing 4½ years residence, but may not be granted naturalisation until five years residence has been completed.

Under the Act the independence of married women in nationality matters is recognised, and British nationality was restored to those women who had lost it through marriage to aliens prior to 26 January 1949. Such women automatically became Australian citizens if they were born in Australia or had lived here for the five years prior to the commencement of the Act. Marriage does not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalised under somewhat easier conditions than those which apply to other aliens.

#### Persons granted Australian citizenship by naturalisation and registration during 1965-66

The following tables show:

- (a) the number of persons who became Australian citizens by reason of the grant of certificates of naturalisation and the countries in which such persons were ordinarily resident immediately before entering Australia or New Guinea; and
- (b) the number of persons who became Australian citizens by reason of the grant of certificates of registration and the countries in which such persons were ordinarily resident immediately prior to entering Australia or New Guinea.

## Persons granted Australian citizenship by naturalisation, 1945 to 1966

The number of persons granted Australian citizenship by naturalisation, according to previous nationality, is shown for the period January 1945–December 1947, for each year from 1948 to 1955, for the period January–June 1956, and for each year 1956–57 to 1965–66 in *Australian Immigration: Consolidated Statistics*, No. 1, 1966 published by the Department of Immigration, and in previous issues of this Year Book. The following table, which is derived from the former publication, sets out the total number of persons of nationalities with greater representation who were granted Australian citizenship from January 1945 to June 1966.

**PERSONS GRANTED AUSTRALIAN CITIZENSHIP BY NATURALISATION  
JANUARY 1945 TO JUNE 1966**

Former nationality	Persons granted citizenship	Former nationality	Persons granted citizenship
Albanian . . . . .	1,079	Lebanese . . . . .	3,987
Austrian . . . . .	7,506	Lithuanian . . . . .	8,252

### **Migrant integration**

An integration programme operates to aid the social settlement of migrants into the Australian community. The programme includes:

English-language tuition arranged by the Department of Immigration to assist migrants to overcome their language problems. The services provided include instruction in Europe, English-language classes on board ships travelling to Australia, and adult education classes within Australia which are also supplemented by radio and correspondence courses. A course of instruction on gramophone records which has been developed from the radio course is also available. Approximately 580,000 migrants have taken advantage of the English-language facilities. By 30 June 1966, 14,182 migrants had enrolled in 902 language classes throughout Australia and 6,878 students had enrolled to receive instruction through the correspondence lessons.

Field surveys are undertaken which embrace sociological research studies of migrant integration and furnish information on such questions as the habits and behaviour of migrants within the community, the practical difficulties they experience during the process of integration, their ability to understand and accept their obligations and responsibilities as members of the Australian community, and the attitude of the native-born to the migrant.

Social worker service is available through a small staff of trained social workers by the Department of Immigration. Welfare officers are also employed in several branches and accommodation advisory officers are available to provide information to migrants resident in Sydney and Melbourne.

The Good Neighbour Movement operates as a voluntary organisation throughout Australia to assist in the integration of migrants. Membership of the movement is made up of hundreds of community organisations whose activities are co-ordinated by State Councils. The Commonwealth Government assists each Council financially through grants to cover administrative expenses.

*Citizenship Conventions.* The principal occasion for community and Government to meet together and discuss the major issues involved in the successful integration of the migrant population is provided by the Citizenship Conventions convened in Canberra from time to time by the Commonwealth Government. Delegates from a wide range of community organisations and from Commonwealth and State Governments participate. The subjects discussed relate not only to the integration of migrants but also to the concept of Australian citizenship and the role of immigration in Australia's development.

### **Population of External Territories**

Ordinances of the individual external territories under the control of Australia provide for a census of the population to be taken on the day prescribed for the taking of a census in the Commonwealth of Australia. The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua, the Trust Territory of New Guinea and the Trust Territory of Nauru at the censuses of 30 June 1961 and 30 June 1966.

## POPULATION: EXTERNAL TERRITORIES, 30 JUNE 1961 AND 1966

Territory	Census 30 June 1961			Census 30 June 1966(a)		
	Males	Females	Persons	Males	Females	Persons
Christmas Island . . .	1,963	1,136	3,099	2,151	1,230	3,381
Cocos (Keeling) Islands . .	333	273	606	375	309	684
Norfolk Island . . .	421	423	844	566	586	1,152
Papua . . .	(b) 5,490	(b) 4,304	(b) 9,794	(c) 8,357	(c) 6,093	(c) 14,450
Trust Territory of New Guinea	(b) 9,158	(b) 6,378	(b) 15,536	(c) 11,732	(c) 8,554	(c) 20,286
Trust Territory of Nauru . .	3,019	1,594	4,613	3,696	2,360	6,056

(a) Preliminary results. (b) Non-indigenous population only. The indigenous population was estimated to be—Papua, 513,648, Trust Territory of New Guinea, 1,433,383. (c) Non-indigenous population only. The indigenous population was estimated to be—Papua 586,147, Trust Territory of New Guinea, 1,562,153.

Further particulars concerning the indigenous populations of the territories are given in the chapter The Territories of Australia.

## The Aboriginal population of Australia

In Year Book No. 17, pages 951–61, a brief account was given of the Australian Aboriginal population, its origin, its numbers as estimated from time to time and the steps taken for its protection. On pages 914–16 of Year Book No. 22 particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687–96 of Year Book No. 23.

The Aborigines are scattered over the whole of the mainland, but are mostly in the Northern Territory, Queensland and Western Australia. Particulars of the number in each State and Territory at the census of 30 June 1961 are shown in the following table. Persons with Aboriginal blood to the extent of one-half and with European blood to the extent of one-half are included in the numbers of the population and are of course enumerated at the census.\*

## ABORIGINAL POPULATION, STATES AND TERRITORIES, 30 JUNE 1961

State or Territory	Full-blood					Other(a) (enumerated at the census)			Total full- blood and other
	Number enumerated at census, 30 June 1961			Estimated number out of contact at census	Total number as recorded or estimated at 30 June 1961				
	Males	Females	Persons			Males	Females	Persons	
New South Wales . .	791	697	1,488	..	1,488	6,703	6,525	13,228	14,716
Victoria . . .	141	112	253	..	253	758	785	1,543	1,796
Queensland . . .	4,686	4,000	8,686	..	8,686	5,460	5,550	11,010	19,696
South Australia . .	1,181	966	2,147	..	2,147	1,426	1,311	2,737	4,884
Western Australia . .	4,243	3,878	8,121	2,000	10,121	4,108	4,047	8,155	18,276
Tasmania . . .	..	..	..	..	..	24	14	38	38
Northern Territory . .	7,857	7,585	15,442	1,944	17,386	1,156	1,162	2,318	19,704
Aust. Cap. Territory . .	..	..	..	..	..	78	65	143	143
Australia . . .	18,899	17,238	36,137	3,944	40,081	19,713	19,459	39,172	79,253

(a) This category covers persons with European blood to the extent of one-half and blood of the Aboriginal race to the extent of one-half.

Torres Strait Islanders, both full-blood and half European blood, are not included as Aborigines, but are included in the populations shown on pages 163–86. At the 1961 census there were 4,972 full-blood and 245 half European blood Torres Strait Islanders, of whom 4,970 and 237 respectively were recorded in Queensland.

## International statistics of population

In the following tables the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least one million persons in 1964, plus Papua. The source of these figures is the 1965 *Demographic Yearbook* which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics as between countries, but this information has been shown to provide some form of guide as to the magnitude and trend of population movements in overseas countries.

\* See Appendix for results of Constitution Alteration (Aboriginals) 1967 Referendum.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistics rate (e.g. marriages), has been omitted from the tables, and this is indicated by a footnote. For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, reference should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (*see* particularly Technical Notes on Statistical Tables and footnotes to the tables).

#### Population, rate of growth and density: world, continents and regions

The following table shows for the world, continents, and regions, estimated population in 1930, 1940, 1950, 1958, 1960, and 1964. The annual rate of increase (per cent), together with the average annual increase, during the period 1958-64, is also shown. Population figures have been adjusted for under-enumeration and errors in estimation. In preparing these figures, the Population Branch of the United Nations revises, from time to time, the estimates for previous years as new data become available, for example, from a census. The figures are estimates only, and as such are subject to a substantial margin of error.

#### POPULATION, DENSITY, AND RATE OF INCREASE FOR THE WORLD AND CONTINENTS—SELECTED YEARS

(Source: United Nations *Demographic Yearbook*, 1965)

Continent and region	Population							Density (persons per square mile) 1964

#### Population, density, rate of growth, natural increase, and masculinity of selected countries

Certain details of the population of the more populous countries within continental groups are shown in the following table. As explained above, reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1965, regarding geographical units used, boundaries of areas, reliability of estimates, etc.

**POPULATION, DENSITY, RATE OF INCREASE, NATURAL INCREASE, AND  
MASCULINITY—SELECTED COUNTRIES**

## CHAPTER 9

### VITAL STATISTICS

The tables in this chapter are confined to the principal characteristics of vital statistics for Australia, and relate, in the main, to the year 1966 for marriages and 1965 for births, deaths and infant deaths. Comparisons have been restricted, in general, to the individual years 1962 to 1966 and the five-year periods 1941-45 to 1961-65, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, will be found in the annual bulletin, *Demography*. Commencing with the year 1963 a separate annual bulletin *Causes of Death* has been published. This contains the detailed tables based on the International Statistical Classification of Diseases, Injuries and Causes of Death which were formerly published in *Demography*. Current information is published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics* and the *Australian Demographic Review* (a mimeographed series issued at intervals throughout the year on population and vital statistics).

Figures of births and deaths for Australia are exclusive throughout of full-blood Aborigines.\*

Vital statistics for the principal countries of the world are set out in International Vital Statistics at the end of this chapter.

#### Provisions for registration and compilation of statistics

In Australia vital statistics are compiled from information supplied for the registration of births, deaths and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths, and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853, and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration having been taken over in respect of the Northern Territory from South Australia in 1911 and in respect of the Australian Capital Territory from New South Wales in 1930. The authority responsible for the registration of births, deaths and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

Information concerning a birth is required to be supplied within 28 days in the Australian Capital Territory and the Northern Territory, 42 days in South Australia, and 60 days in other States. For the registration of a death the period allowed is 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, Australian Capital Territory and Northern Territory, 21 days in Victoria, and 30 days in New South Wales and Queensland.

The *Marriage Act* 1961 came into operation on 1 September 1963, placing the marriage laws of all States, the mainland Territories and Norfolk Island on a uniform basis. Provision is made for the celebration of marriage by ministers of religion registered with the Registrar of Ministers of Religion appointed in each State and Territory by the Attorney-General, and by certain civil officers. In all cases the authorised celebrant is required to register particulars of the parties married with the appropriate registering authority in each State or Territory. The celebrant is requested to register a marriage as soon as practicable and in any case not later than fourteen days after the marriage.

The registration of stillbirths is compulsory in all the States and Territories except Tasmania. Western Australia in 1908 was the first State to introduce compulsory registration, followed by the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937, the Northern Territory in 1949, Victoria in 1953, and Queensland in 1959. Stillbirths are entered in both the birth and death registers in New South Wales and Western Australia, in the birth register in the Australian Capital Territory and the Northern Territory, and in separate stillbirth registers in Victoria, South Australia and Tasmania. Stillbirths are not entered in a register in Queensland but the papers are kept for a period of at least ten years. In this chapter stillbirths have been excluded from all tables of births and deaths and are shown only in those specially relating to stillbirths.

The data for the compilation of vital statistics are obtained from registry records and dispatched, through the Statistical Office in each State and Territory, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is one of the

---

\* See Appendix for results of *Constitution Alteration (Aboriginals)* 1967 Referendum.

functions of the Commonwealth Statistician. The Deputy Commonwealth Statisticians compile and publish statistics relating to their respective States.

### Marriages

#### Numbers of marriages and crude marriage rates

The numbers of marriages registered in each State and Territory in five-year periods from 1941-45 to 1961-65, and for each of the years 1962 to 1966, and crude marriage rates for the same periods are shown in the following tables. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 575. A graph showing the number of marriages in each year from 1870 to 1966 appears on plate 18 opposite.

1965(b) . . . . .	8.43	8.35	7.95	8.16	7.92	7.85	8.4	7.6	8.25
1966 . . . . .	8.40	8.42	8.02	8.30	8.37	7.93	8.4	7.7	8.32

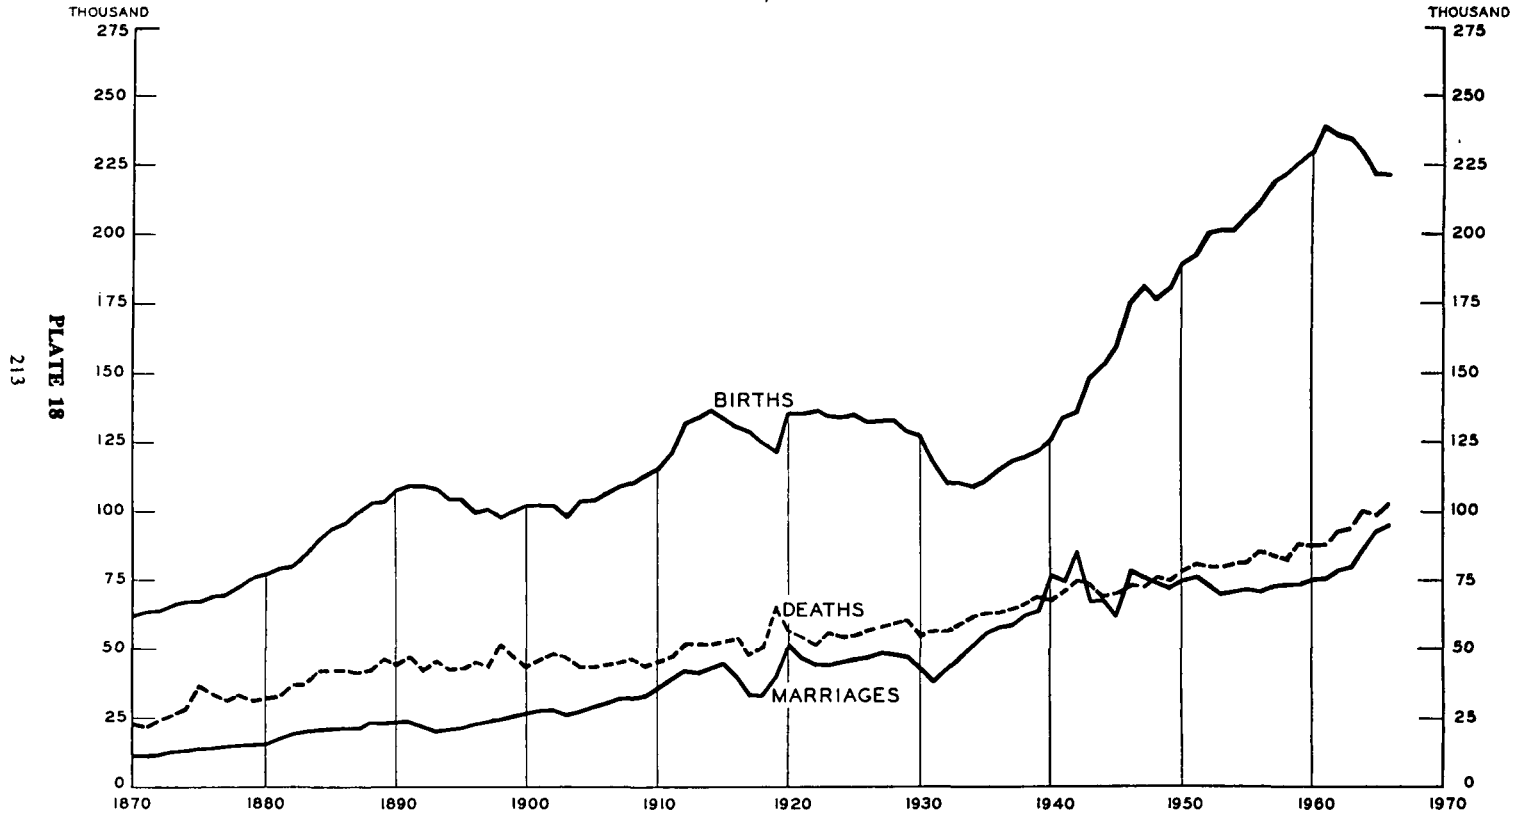

(a) Number of marriages per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with preliminary results of the census of 30 June 1966.

NOTE. In some instances rates are based on too few marriages to warrant calculation to the second decimal place.

The crude marriage rates for Australia and the more populous countries of the world are shown for the latest available year in International Vital Statistics at the end of this chapter.

# BIRTHS, DEATHS AND MARRIAGES

## AUSTRALIA, 1870 TO 1966

**Marriage rates based on marriageable population**

As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the nine census periods to 1960-62. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows.

**PERSONS MARRYING PER 1,000 OF  
UNMARRIED POPULATION: AUSTRALIA  
1880-82 TO 1960-62**

Period	Rate(a)	Period	Rate(a)
1880-82 .	48.63	1932-34 .	42.88
1890-92 .	44.04	1946-48 .	71.24
1900-02 .	42.14	1953-55 .	65.32
1910-12 .	50.12	1960-62 .	62.27
1920-22 .	55.97		

(a) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

**Age and marital status at marriage**

Particulars of age at marriage in age groups, and previous marital status, of bridegrooms and brides in 1966 are given hereunder. There were 14,148 males under 21 years of age married during 1966, while the corresponding number of females was 41,285. At the other extreme there were 1,073 bridegrooms and 576 brides in the age group 65 years and over.

**AGE AND MARITAL STATUS OF BRIDEGROOMS AND BRIDES  
AUSTRALIA, 1966(a)**

(a) Corresponding particulars for 1965 are published in *Demography*, Bulletin No. 83 1965 and in *Australian Demographic Review* No. 227, *Marriages 1965*.

The average age at marriage of brides and bridegrooms has declined during recent years. The average ages, in years, of brides for each of the five years to 1966 were: 1962, 24.68; 1963, 24.42; 1964, 24.31; 1965, 24.09; and 1966, 24.02. The average ages, in years, of bridegrooms were: 1962, 28.03; 1963, 27.76; 1964, 27.58; 1965, 27.24; and 1966, 27.10. The difference in the average age at marriage between brides and bridegrooms is generally just over three years, the difference in 1966 being 3.08 years.

## Previous marital status

The following table shows the relative marital status of bridegrooms and brides in 1966.

**MARITAL STATUS OF BRIDEGROOMS AND BRIDES  
AUSTRALIA, 1966**

Marital status of bridegrooms	Total bridegrooms	Marital status of brides		
		Spinsters	Widows	Divorced
Bachelors . . .	87,239	83,164	1,118	2,957
Widowers . . .	3,209	975	1,451	783
Divorced . . .	5,598	2,971	740	1,887
<b>Total brides .</b>	<b>96,046</b>	<b>87,110</b>	<b>3,309</b>	<b>5,627</b>

## Countries of birth of persons marrying

The following table shows the relative countries of birth of bridegrooms and brides married in 1966.

**RELATIVE COUNTRIES OF BIRTH OF BRIDEGROOMS AND BRIDES  
AUSTRALIA, 1966(a)**

Country of birth of bridegroom	Country of birth of bride											Total bridegrooms

(a) Corresponding particulars for 1965 are published *Demography*, Bulletin No. 83, 1965 and in *Australian Demographic Review* No. 227, *Marriages 1965*.

## Occupation of bridegrooms

The distribution of the 96,046 bridegrooms for 1966 among classes of occupations was as follows: craftsmen, 31,978; administrative and clerical workers, 13,006; labourers, 11,187; rural and mining workers, 8,186; professional and technical workers, 10,108; workers in transport and communication, 6,853; service, sport, and other workers, 7,009; sales workers, 5,930; persons not in the work force, 1,789.

## Celebration of marriages

Under the provisions of the *Marriage Act* 1961-1966 marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar of Ministers of Religion in each State or Territory, or by certain civil officers, in most cases district registrars. Most of the marriages are celebrated by ministers of religion. The registered ministers in 1964 belonged to more than fifty different denominations, some of which, however, have only very few adherents. The categories 'Ministers of Other recognised denominations' and 'Other

ministers' combine ministers of some of these denominations. The figures for 1966 are shown in the following table.

### MARRIAGES IN EACH DENOMINATION: STATES AND TERRITORIES, 1966(a)

### Divorce

The number of dissolutions of marriage, nullities of marriage and judicial separations was 8,534 in 1965 and 9,921 in 1966. Further information may be found in the chapter Public Justice.

### Fertility and reproduction

Natural increase has been a significant element of increase in the population of Australia for many years. The level of natural increase depends on the excess of births over deaths, and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

#### Number of live births and confinements

There are various methods of measuring the fertility of the population by relating the number of births to the numbers of the population. In each the basic data are, of course, the numbers of live births. The number of live births registered in Australia during 1965 is shown in the following table. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

## LIVE BIRTHS AND CONFINEMENTS: STATES AND TERRITORIES, 1965

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
LIVE BIRTHS									
Single births	76,324	62,248	32,817	20,432	15,845	7,403	904	2,136	218,109
Twins .	1,724	1,266	722	441	338	126	10	22	4,649
Triplets .	21	36	12	18	3	6	..	..	96
Males .	40,219	32,494	17,250	10,778	8,280	3,876	454	1,115	114,466
Females .	37,850	31,056	16,301	10,113	7,906	3,659	460	1,043	108,388
Total	78,069	63,550	33,551	20,891	16,186	7,535	914	2,158	222,854

## STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE

Twins .	46	12	14	5	14	2	..	..	93
---------	----	----	----	---	----	---	----	----	----

## CONFINEMENTS RESULTING IN BIRTHS SHOWN ABOVE

Nuptial .	71,574	59,681	30,029	19,365	14,594	7,003	807	2,085	205,138
Ex-nuptial .	5,642	3,218	3,160	1,296	1,428	466	102	62	15,374
Total	77,216	62,899	33,189	20,661	16,022	7,469	909	2,147	220,512

NOTE. Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was live-born, the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also page 226.

The average annual number of live births in each State and Territory for each five-year period from 1941 to 1965 and the total number of live births for each year from 1962 to 1966 are given in the following table. Corresponding figures for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 583.

## LIVE BIRTHS: STATES AND TERRITORIES, 1941 TO 1966

A graph showing the number of births in each year from 1870 to 1966 will be found on page 213.

**Crude birth rates**

The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 221, 223-4. Crude birth rates for each five-year period from 1941 to 1965 and for each year from 1962 to 1966 for each State and Territory are set out below.

**CRUDE BIRTH RATES(a): STATES AND TERRITORIES, 1941 TO 1966**

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Average annual rates—</b>									
1941-45 .	19.79	19.27	22.28	20.43	21.72	22.23	11.4	26.8	20.28
1946-50 .	22.60	22.51	24.69	24.41	25.24	26.71	23.8	37.9	23.39
1951-55 .	21.78	22.42	24.11	23.25	25.37	25.58	29.4	32.22	22.86
1956-60 .	21.55	22.52	23.80	22.27	24.20	25.45	31.49	30.10	22.59
1961-65(b)	20.52	21.45	22.53	21.16	21.76	23.44	29.70	26.57	21.38
<b>Annual rates—</b>									
1962(b) .	21.44	22.09	23.15	21.68	22.58	25.01	32.8	27.5	22.16
1963(b) .	20.77	21.59	22.92	21.21	22.24	23.66	28.5	27.2	21.62
1964(b) .	19.61	20.94	21.86	20.18	20.94	22.64	27.7	24.3	20.61
1965(b) .	18.72	20.09	20.56	19.65	19.87	20.49	26.0	24.4	19.66
1966 .	18.37	19.88	19.77	18.64	20.33	19.93	26.1	24.0	19.28

(a) Number of births per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with preliminary results of the census of 30 June 1966.

NOTE. In some instances rates are based on too few births to warrant calculation to the second decimal place.

The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders. The variations thus caused in the birth rates for the States and Territories by referring the birth registrations to the mother's usual residence are shown by the following corrected rates for 1965—New South Wales, 18.68; Victoria, 19.77; Queensland, 20.82; South Australia, 19.77; Western Australia, 20.42; Tasmania, 20.42; Northern Territory, 27.7; and Australian Capital Territory, 23.8. See Year Book No. 47 (p. 339) for the effect of the variations in the availability of hospital facilities on the birth rate in the Australian Capital Territory and in the neighbouring town of Queanbeyan in New South Wales.

A graph showing the birth rate for each year from 1870 to 1966 will be found over the page. The crude birth rates of Australia and the more populous countries of the world for the latest available year are shown in International Vital Statistics at the end of this chapter.

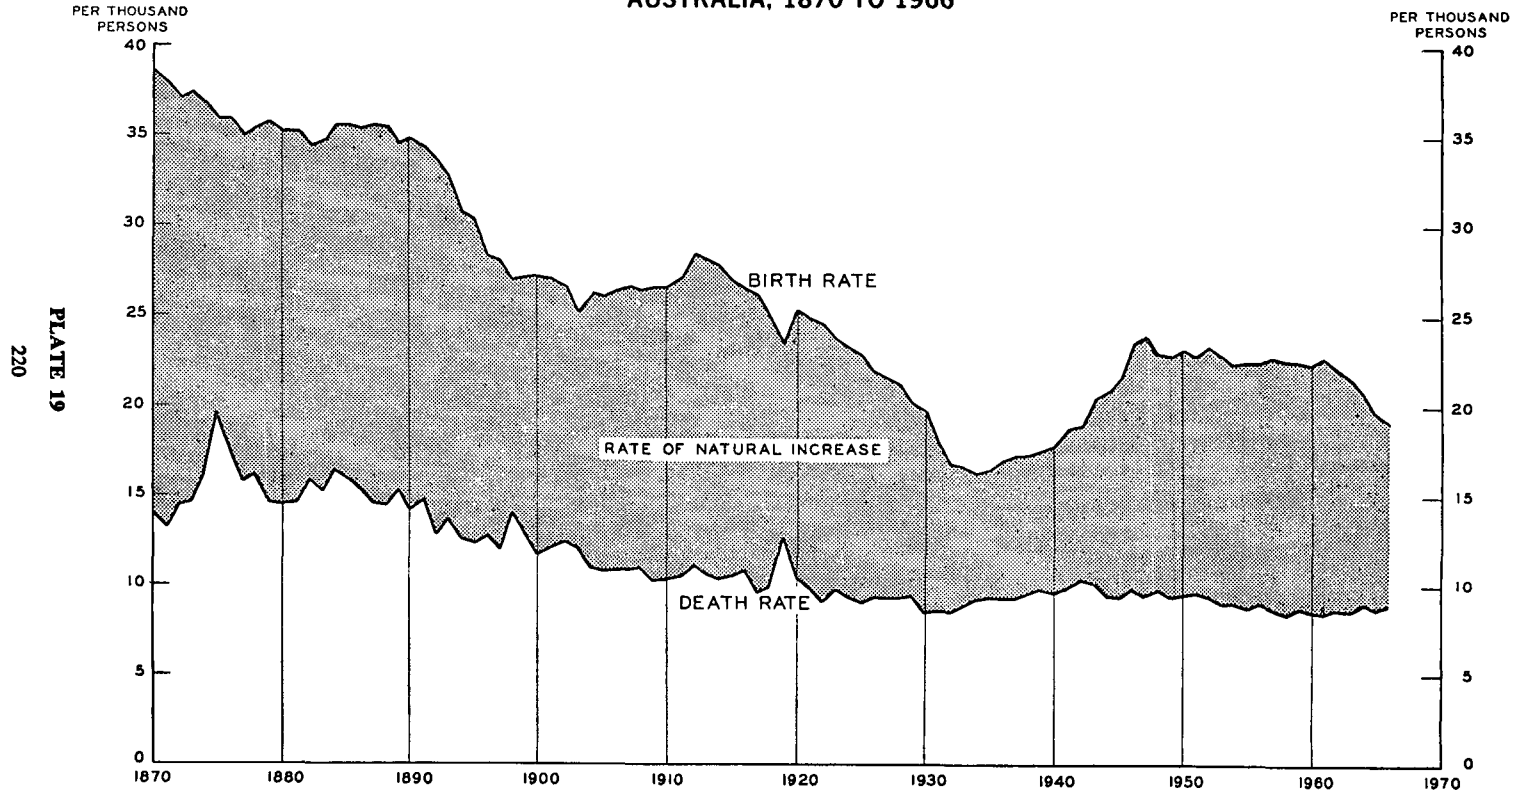

**Fertility rates**

The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a higher proportion of married women of child-bearing age will have a much higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical. In order to compare fertilities births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880-82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be fifteen to forty-four years inclusive, but births to mothers who were stated to be under fifteen or over forty-four years have been included in the compilations.

# RATES OF BIRTHS, DEATHS AND NATURAL INCREASE

AUSTRALIA, 1870 TO 1966

## CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA, 1880-82 TO 1960-62

Period	Average annual rates			Index nos. (Base: 1880-82 = 100)		
	Crude birth rate(a)	Fertility rates		Crude birth rate(a)	Fertility rates	
		Births per 1,000 women aged 15-44 years	Nuptial births per 1,000 married women aged 15-44 years		Births per 1,000 women aged 15-44 years	Nuptial births per 1,000 married women aged 15-44 years
1880-82 . . .	35.3	170	321	100	100	100
1890-92 . . .	34.5	159	332	98	94	103
1900-02 . . .	27.2	117	235	77	69	73
1910-12 . . .	27.2	117	236	77	69	74
1920-22 . . .	25.0	107	197	71	63	61
1932-34 . . .	16.7	71	131	47	42	41
1946-48 . . .	23.6	104	160	67	61	50
1953-55 . . .	22.7	109	149	64	64	46
1960-62 . . .	22.5	112	154	64	66	48

(a) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate for married women increased by only 22 per cent over the period 1932-34 to 1946-48, the crude birth rate rose by 41 per cent owing principally to the greatly increased number of marriages during that period.

## Age-specific birth rates

So long as customary ages at marriage do not change drastically the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific birth rates, that is the number of births to women of specified ages per thousand women of those particular ages.

Age-specific birth rates are more commonly expressed in age groups than in single ages. In the following table such rates are shown in five-year age groups for Australia for the period 1941 to 1965. A graph showing the age-specific birth rates for each year during the period 1941 to 1965 appears on the following page.

## AGE-SPECIFIC BIRTH RATES:(a) AUSTRALIA, 1941 TO 1965

Age group (years)	1941	1946	1951	1956	1961	1963	1964	1965
15-19 . . .	24.30	26.30	38.33	43.09	47.37	46.04	46.74	47.35
20-24 . . .	121.26	151.86	177.86	210.10	225.21	207.03	189.92	179.10
25-29 . . .	145.07	184.59	185.23	203.15	220.16	210.86	197.88	187.90
30-34 . . .	103.24	133.62	122.31	123.58	131.31	123.21	118.44	109.10
35-39 . . .	58.11	76.66	65.92	64.22	63.22	59.81	58.39	53.16
40-44 . . .	19.30	24.47	20.51	19.72	19.16	18.41	16.50	14.85
45-49 . . .	1.67	2.06	1.61	1.57	1.42	1.11	1.16	1.12

(a) Number of births per 1,000 women in each age group. Rates for dates subsequent to 1961 are based on the age distribution at the census of 30 June 1961 (adjusted only for 'not stated' ages) and on subsequent births, recorded ages at death and recorded ages of migrants.

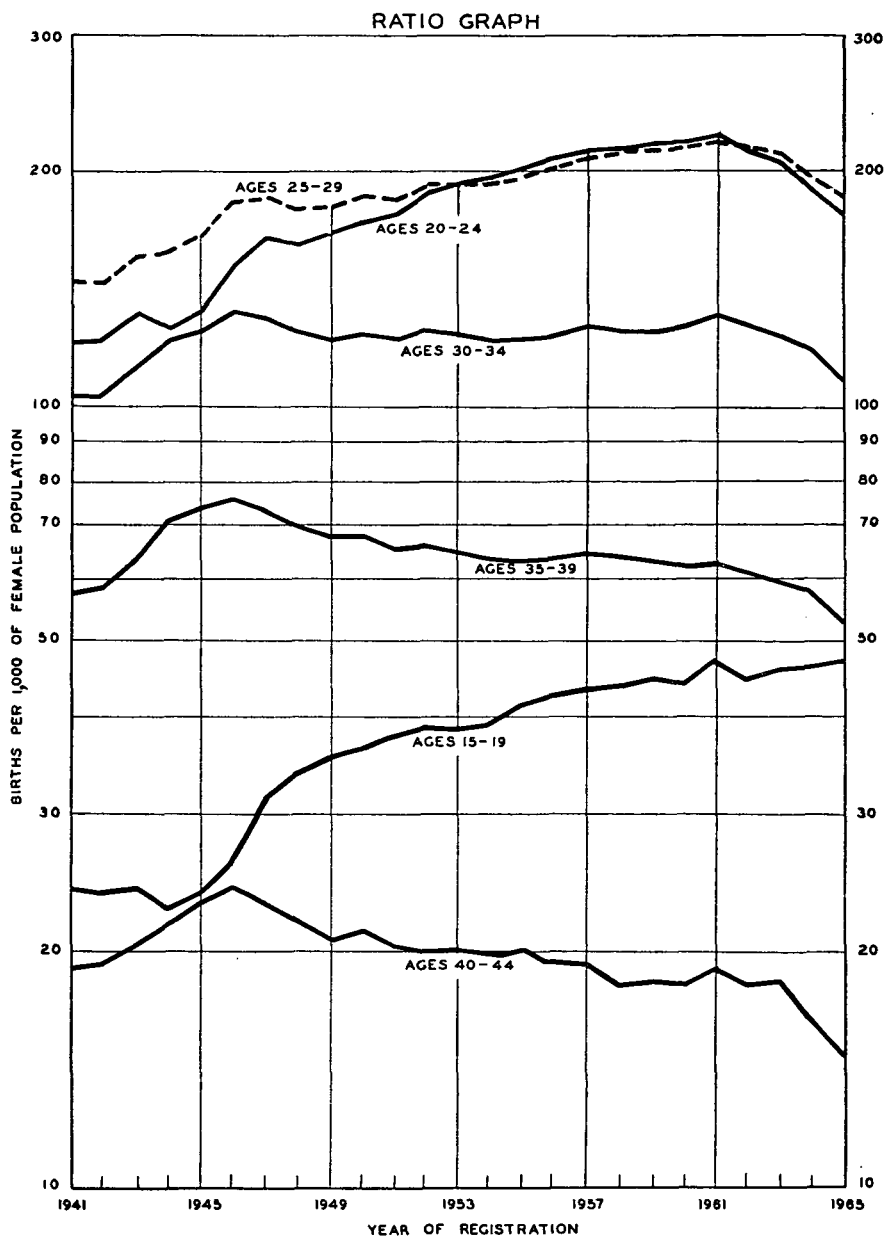

## Gross and net reproduction rates for females

A single measure of reproduction, known as the gross reproduction rate, is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on an average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly

# BIRTH RATES, BY AGE OF MOTHER

AUSTRALIA, 1941 TO 1965

(NUMBER OF BIRTHS PER 1,000 OF FEMALE POPULATION IN EACH AGE GROUP)

NOTE. THE VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO THE RATE OF INCREASE OR DECREASE; ACTUAL NUMBERS ARE INDICATED BY THE SCALE.

PLATE 20

than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality, and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility, page 224.

GROSS AND NET REPRODUCTION RATES: AUSTRALIA, 1881 TO 1965

Year	Gross reproduction rate	Net reproduction rate	Year	Gross reproduction rate	Net reproduction rate
1881(a)	2.65	(b) 1.88	1951	1.485	(g) 1.409

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-1948 mortality experience used. (h) 1953-1955 mortality experience used. (i) 1960-1962 mortality experience used.

It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking into account previous fertility and marriage experience. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1954 to 1965. These represent the latest available international comparisons. The registration of vital events has not been fully established in many countries and consequently details for the calculation of reproduction rates are not available. In order that the table should be as representative as possible some countries have been included even though the gross reproduction rate is the only figure available.

GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES

Country	Period	Reproduction rate		Country	Period	Reproduction rate	
		Gross	Net			Gross	Net
Venezuela	1963	3.04	..	Australia(a)	1965	1.44	1.40
Mauritius	1964	2.94	2.54	Norway	1963	1.42	1.38
Malaya	1960	2.9	..	France	1964	1.42	1.37
Ceylon	1961	2.5	..	England and Wales	1963	1.39	1.34
Thailand	1954	2.26	1.70	Belgium	1963	1.30	1.25
Chile	1964	2.16	1.83	Yugoslavia	1963	1.29	1.06
Ireland, Republic of	1963	1.90	1.74	Czechoslovakia	1963	1.22	1.18
New Zealand	1964	1.83	1.77	Germany—			
Canada	1964	1.72	1.66	Federal Rep.	1963	1.22	1.17
United States of America	1963	1.62	1.56	Democratic Rep.	1960	1.16	1.06
Netherlands	1964	1.55	1.50	Sweden	1964	1.21	1.18
Portugal	1960	1.52	1.33	Switzerland	1962	1.20	1.16
Scotland	1964	1.49	1.44	Japan	1963	0.96	0.92
				Hungary	1964	0.87	0.81

(a) Excludes full-blood Aborigines.

In comparing the reproduction rates of the countries shown allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage, as well as the stationary or life table population used.

### Fertility of marriages

More satisfactory estimates of the fertility of marriages may be made by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

**FERTILITY OF MARRIAGES: AUSTRALIA, 1951 TO 1965**

Year	Nuptial confinements per marriage	Year	Nuptial confinements per marriage	Year	Nuptial confinements per marriage
1951 .	2.55	1956 .	2.76	1961 .	3.05
1952 .	2.63	1957 .	2.87	1962 .	2.98
1953 .	2.66	1958 .	2.88	1963 .	2.92
1954 .	2.66	1959 .	2.93	1964 .	2.78
1955 .	2.71	1960 .	2.96	1965 .	2.62

See text following first table on page 223.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. The figures for 1949 and subsequent years present a somewhat inflated index, as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and consequently are not included in Australian marriage records. Partial investigation suggests that this factor probably overstated the index by very little in 1949, but that the overstatement in recent years has been about 8 per cent.

### Masculinity of live births

The masculinity of live births, i.e. the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, totals for smaller States) considerable variation is shown. The averages for the ten years 1951-60 were as follows: New South Wales, 105.38; Victoria, 105.50; Queensland, 105.80; South Australia, 104.89; Western Australia, 105.25; Tasmania, 104.96; Northern Territory, 107.16; Australian Capital Territory, 108.77; Australia, 105.43. The following table shows the figures for Australia for each ten-year period from 1901 to 1960 and for each of the years 1964 to 1966.

**MASCUILITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA, 1901 TO 1966**

	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60	1964	1965	1966
Total births .	105.22	105.27	105.55	105.12	105.38	105.43	106.28	105.61	105.95
Ex-nuptial births .	104.08	105.25	105.16	105.36	105.34	103.99	106.00	107.47	103.91

(a) Number of males born for every 100 female births.

### Ex-nuptial live births

The variations in the proportions of ex-nuptial live births as between the individual States and Territories for 1965 and for Australia at intervals from 1901 to 1965 are shown in the following table.

**EX-NUPTIAL LIVE BIRTHS**  
**NUMBER AND PROPORTION, STATES AND TERRITORIES, 1965**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number . . .	5,700	3,245	3,202	1,310	1,439	471	102	62	15,531
Proportion of total births %	7.30	5.11	9.54	6.27	8.89	6.25	11.16	2.87	6.97

**EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION**  
**AUSTRALIA, 1901 TO 1965**

	Annual average						1961	1962	1963	1964	1965
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60					
Number . . .	6,498	6,836	6,238	5,133	6,780	9,013	12,269	12,813	13,454	14,925	15,531
Proportion of total births % . . .	6.05	5.22	4.66	4.40	4.13	4.25	5.11	5.40	5.71	6.51	6.97

A further measure of ex-nuptiality is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows: 1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; 1946-48, 11.45; 1953-55, 14.45; and 1960-62, 18.49. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown. The following table shows the relative ratios of ex-nuptial and nuptial births to the total population for periods from 1901.

**CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES(a)**  
**AUSTRALIA, 1901 TO 1965**

Birth rate	Annual average						1963	1964	1965
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60			
Ex-nuptial. . .	1.60	1.39	1.04	0.76	0.90	0.97	1.23	1.34	1.37
Nuptial . . .	24.91	25.18	21.40	16.47	20.99	21.75	20.38	19.27	18.29
Total . . .	26.51	26.57	22.44	17.23	21.89	22.72	21.62	20.61	19.66

(a) Number of births per 1,000 of mean population.

**Legitimations**

Under the provisions of the Commonwealth *Marriage Act* 1961-1966, which came into operation on 1 September 1963, a child whose parents were not married to each other at the time of its birth becomes legitimised on the subsequent marriage of its parents. The legitimisation takes place whether or not there was a legal impediment to the marriage of the parents at the time of

the child's birth and whether or not the child was still living at the time of the marriage, or in the case of a child born before 1 September 1963, at that date. Prior to the introduction of this Act, legitimations took place under Acts passed in the several States to legitimise children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who came within the scope of their purposes, born before or after the passing thereof, was deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. The number of children legitimised in Australia during 1965 was 2,923.

### Multiple births

Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

Multiple births recorded on this basis during 1965 comprised 2,371 cases of twins and 32 cases of triplets, the resultant numbers of live-born and still-born children being respectively 4,649 and 93 for twins, 96 and 0 for triplets. This represents an average of 10.75 recorded cases of twins and 0.15 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 93 mothers and mothers of triplets 1 in every 6,891. Total cases of multiple births represented 10.90 per 1,000 confinements or 1 in every 92 mothers. The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

### Confinements—ages of parents

The relative ages of the parents of children whose births were registered in 1965 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 83. In the following table the relative ages of parents are shown in five-year groups.

CONFINEMENTS, BY RELATIVE AGES OF PARENTS: AUSTRALIA, 1965

Age of father (years) and type of birth	Total	Age of mother (years)								
		Under 15	15-19	20-24	25-29	30-34	35-39	40-44	45 and over	Not stated

(a) Includes two fathers, age 'Not stated'.

### Confinements—countries of birth of parents

The following table shows the countries of birth of parents of children whose births from nuptial confinements were registered during 1965.

**NUPTIAL CONFINEMENTS, BY RELATIVE COUNTRIES OF BIRTH OF PARENTS  
AUSTRALIA, 1965**

Country of birth of father	Country of birth of mother										Total fathers	
	Australia	New Zealand	United Kingdom and Ireland	Germany	Greece	Italy	Malta	Netherlands	Yugoslavia	Other European		Other and unspecified
Australia	141,864	531	5,379	657	124	282	211	791	88	476	1,027	151,430
New Zealand	534	201	70	3	..	3	..	3	1	4	14	833
United Kingdom and Ireland	6,722	83	6,870	115	9	21	57	92	7	132	273	14,381
Germany	929	15	157	1,071	11	19	16	69	26	147	45	2,505
Greece	354	2	25	22	6,026	11	3	7	16	19	87	6,572
Italy	1,825	10	129	69	31	9,065	40	61	82	87	87	11,486
Malta	440	1	79	17	2	10	1,684	23	5	8	24	2,293
Netherlands	1,417	11	154	59	7	3	13	1,861	2	37	96	3,660
Yugoslavia	466	8	62	120	87	111	18	51	1,463	114	26	2,526
Other European	1,657	24	264	342	67	60	24	85	102	2,229	154	5,008
Other and unspecified	1,619	29	307	53	184	54	31	96	11	75	1,985	4,444
Total mothers	157,827	915	13,496	2,528	6,548	9,639	2,097	3,139	1,803	3,328	3,818	205,138

**Confinements—occupations of fathers**

In the 205,138 cases where nuptial confinements resulted in one or more live births, the classes of occupations of the fathers were distributed as follows: craftsmen, 66,509; rural and mining workers, 24,959; administrative and clerical workers, 27,552; labourers, 22,227; workers in transport and communication, 18,130; professional and technical workers, 19,738; sales workers, 12,844; service, sport and other workers, 12,527; persons not in the work force, 652.

**Confinements—age, duration of marriage and issue of mothers**

The total number of nuptial confinements resulting in live births in 1965 was 205,138, comprising 202,894 single births, 2,214 cases of twins and 30 cases of triplets. The following tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

The following table shows that in 1965 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1965 was 2.48, compared with 2.56 in 1964, 2.60 in 1963, 2.61 in 1962 and 2.60 in 1961.

**NUPTIAL CONFINEMENTS, BY DURATION OF MARRIAGE  
AND ISSUE OF MOTHERS: AUSTRALIA, 1965**

Duration of marriage	Total married mothers	Total issue	Average issue	Duration of marriage	Total married mothers	Total issue	Average issue
Under 1 year	31,144	31,826	1.02	15 years	2,527	12,819	5.07

(a) Includes 1, age not stated.

(b) Includes 2, age not stated.

**Multiple births—previous issue of mothers**

Of married mothers of twins in 1965, 628 had no previous issue either living or deceased, 559 had one child previously, 428 had two previous issue, 264 three, 142 four, 89 five, 46 six, 16 seven, 19 eight, 9 nine, 4 ten, 5 eleven, 4 twelve, and 1 fourteen. Of the 30 cases of nuptial triplets registered during 1965, 6 mothers had no previous issue, 10 had one, 4 had two, 6 had three, 1 had four, 1 had five, and 2 had seven previous issue.

**Nuptial first births**

The following table shows the interval between marriage and first birth for periods since 1911. In cases of multiple births, the first live-born child only is enumerated.

**NUPTIAL FIRST BIRTHS, BY DURATION OF MARRIAGE  
AUSTRALIA, 1911 TO 1965**

Duration of marriage	Annual average					1964	1965

In 1965 the masculinity of nuptial first births was 105.58 and of total births 105.61.

A summary showing grouped ages and grouped durations of marriage of mothers of nuptial first-born children is given in the following table.

**NUPTIAL FIRST BIRTHS, BY AGE OF MOTHER AND DURATION OF MARRIAGE  
AUSTRALIA, 1965**

**Still-births**

Interstate comparisons of the figures and rates in the following tables are affected by the differences in the definitions of still-births adopted by the various States, and only the trends in the rates for the States should be compared. For various reasons, the registration of still-births is not as complete as for live births and deaths; particulars for the Territories and the smaller States are more affected by this than are those for the larger States. Still-birth registration is not compulsory in Tasmania. The figures shown represent those still-births voluntarily registered during the year.

## STILL-BIRTHS: STATES AND TERRITORIES, 1936 TO 1965

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—									
1936-40 . . .	1,409	854	(a)	(b) 274	234	144	(a)	5	(a)

1961-65 . . .	1,104	794	468	264	194	87	17	18	2,946
Annual total—									
1961 . . .	1,306	885	553	272	240	111	17	19	3,403
1962 . . .	1,099	775	520	278	203	102	9	20	3,006
1963 . . .	1,163	792	476	262	178	63	30	14	2,978
1964 . . .	1,003	771	402	252	170	69	13	15	2,695
1965 . . .	947	747	391	256	181	89	15	23	2,649

(a) Not available. (b) Three years 1938-40. (c) Four years 1942-45. (d) Excludes Queensland for 1941. (e) Excludes Northern Territory.

The incidence of still-births in each State and Territory as measured by the rate per 1,000 of all births, both live and still, is as follows.

## PROPORTION OF STILL-BIRTHS(a): STATES AND TERRITORIES, 1936 TO 1965

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average annual rate—									
1936-40 . . .	28.7	27.4	(b)	(c) 27.5	25.7	28.7	(b)	22.2	(b)
1941-45 . . .	25.5	24.8	d 26.8	25.2	23.3	25.7	(b)	22.9	ef 25.25
1946-50 . . .	20.0	19.6	21.9	22.1	20.5	22.3	(b)	16.3	f 20.46
1951-55 . . .	16.5	15.5	18.4	15.8	17.0	17.5	17.2	17.1	16.57
1956-60 . . .	15.5	13.5	16.1	13.5	13.7	12.6	8.6	14.3	14.59
1961-65 . . .	13.1	12.0	13.1	12.2	11.4	10.2	18.4	9.3	12.49
Annual rate—									
1961 . . .	14.9	13.3	14.9	12.0	13.9	12.2	(g)	(g)	13.98
1962 . . .	12.7	11.6	14.4	12.8	11.8	11.3	(g)	10.9	12.52
1963 . . .	13.6	11.9	13.1	12.1	10.2	7.3	33.7	(g)	12.48
1964 . . .	12.3	11.7	11.4	11.9	10.1	8.3	(g)	(g)	11.62
1965 . . .	12.0	11.6	11.5	12.1	11.1	11.7	(g)	10.5	11.75

(a) Numbers of still-births per 1,000 of all births (live and still). (b) Not available. (c) Three years 1938-40. (d) Four years 1942-45. (e) Excludes Queensland for 1941. (f) Excludes Northern Territory. (g) Less than twenty events: rates not calculated.

NOTE. Because of the smallness of the numbers of still-births occurring in the Australian Capital Territory and the Northern Territory the rates for these Territories (i.e. the number per thousand live births and still-births) are subject to considerable fluctuation.

## Mortality

## Number of deaths

The following tables show the number of deaths, male and female, registered in each State and Territory during 1966. Still-births, although registered as both births and deaths in some States, are excluded from the death statistics published herein.

## DEATHS, SEXES: STATES AND TERRITORIES, 1966

Sex	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Males . . .	22,454	15,569	8,531	5,215	3,922	1,726	114	265	57,796
Females . . .	18,092	13,104	6,330	4,108	2,850	1,433	40	176	46,133
Persons . . .	40,546	28,673	14,861	9,323	6,772	3,159	154	441	103,929

A summary of the number of deaths in each State and Territory from 1941 to 1966 is given in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 597.

### DEATHS: STATES AND TERRITORIES, 1941 TO 1966

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Annual average—</b>									
1941-45(a)	27,807	20,964	9,715	6,303	4,724	2,488	64	71	72,136
1946-50(a)	29,552	21,827	10,357	6,507	4,802	2,459	76	103	75,683
1951-55	32,135	22,900	11,187	7,182	5,263	2,576	109	131	81,483
1956-60	34,002	24,254	12,008	7,732	5,523	2,668	117	184	86,488
1961-65	37,514	26,569	13,570	8,388	6,043	2,939	152	290	95,465
<b>Annual total—</b>									
1962	36,861	25,847	13,182	8,232	5,810	2,870	144	217	93,163
1963	37,226	26,920	13,275	8,201	5,976	2,818	161	317	94,894
1964	39,487	27,548	14,523	8,906	6,429	3,174	164	363	100,594
1965	38,949	28,031	14,114	8,788	6,274	3,043	161	355	99,715
1966	40,546	28,673	14,861	9,323	6,772	3,159	154	441	103,929

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September 1939 to June 1947.

A graph showing the number of deaths in each year from 1870 to 1966 will be found on page 213.

### Crude death rates

The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period.

### CRUDE DEATH RATES(a): STATES AND TERRITORIES, 1941 TO 1966

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Average annual rate—</b>									
1941-45(b)	9.73	10.63	9.24	10.26	9.86	10.21	6.4	5.0	9.96
1946-50(b)	9.70	10.37	9.13	9.76	9.23	9.30	6.3	5.3	9.74
1951-55	9.49	9.55	8.71	9.25	8.49	8.48	6.9	4.58	9.25
1956-60	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78
1961-65(c)	9.27	8.72	8.63	8.29	7.78	8.15	4.98	3.89	8.75
<b>Annual rate—</b>									
1962(c)	9.25	8.66	8.55	8.35	7.69	8.07	5.1	3.3	8.71
1963(c)	9.20	8.85	8.47	8.14	7.69	7.82	5.3	4.3	8.70
1964(c)	9.62	8.87	9.08	8.61	8.07	8.71	5.0	4.5	9.05
1965(c)	9.34	8.86	8.65	8.27	7.70	8.27	4.6	4.0	8.80
<b>1966—</b>									
Males	10.57	9.65	10.13	9.52	9.20	9.21	5.3	5.3	9.94
Females	8.57	8.16	7.73	7.57	6.95	7.79	2.5	3.8	8.03
Persons	9.58	8.91	8.94	8.55	8.10	8.51	4.1	4.6	9.00

(a) Number of deaths per 1,000 of mean population. (b) Excludes deaths of defence personnel, etc., from September 1939 to June 1947. (c) Recalculated from population figures revised in accordance with preliminary results of the census of 30 June 1966.

NOTE. Crude death rates (i.e. the number of deaths per thousand of mean population) are affected by the particular age and sex composition of the population. In the Australian Capital Territory and the Northern Territory the population at risk in the higher ages is lower proportionately than in other States, largely as a result of the rapid increases of the population in the lower ages. In some instances rates are based on too few deaths to warrant calculation to the second decimal place.

A graph showing the crude death rate for each year from 1870 to 1966 will be found on page 220.

#### Standardised death rates

The death rates quoted on page 232 are crude rates, i.e. they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, 'standardised' death rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group had been as recorded, but the age and sex distribution had been the same as in the standard population. For the standardised rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900. An examination of the age distribution of deaths and the resultant age-specific death rates is made on pages 237-8.

#### Comparison of crude and standardised death rates

The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947, 1954, and 1961 is illustrated in the following statement of crude and 'standardised' death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

#### CRUDE AND STANDARDISED DEATH RATES: STATES, 1921 TO 1961

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Crude death rate(a)—							
1921 . . .	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 . . .	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 . . .	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954 . . .	9.46	9.20	8.63	9.01	8.38	8.67	9.10
1961 . . .	8.95	8.37	8.41	8.06	7.77	7.89	8.47
Standardised death rate(b)—							
1921 . . .	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 . . .	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 . . .	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954 . . .	7.24	6.63	6.80	6.52	6.71	7.02	6.90
1961 . . .	6.56	6.12	6.26	5.90	6.02	6.19	6.27

(a) Total deaths per 1,000 of mean population.

(b) See explanation of standardised death rates above.

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

#### True death rates

The main objections to standardised death rates are that the choice of a standard population is arbitrary and that the standardised rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. However, a correct measurement of the mortality of the population can be obtained from life tables. A life table represents the number of survivors at each age from a group of newly-born children

who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is fifty years, say, then each person will on the average die fifty years after birth, so that in a stationary population one person in fifty, or twenty per thousand, will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

COMPLETE EXPECTATION OF LIFE AT BIRTH AND  
TRUE DEATH RATES: AUSTRALIA, 1881-90 TO 1965

Period	Complete expectation of life at birth (years)		True death rate	
	Males	Females	Males(a)	Females(b)
1881-90 . .	47.20	50.84	21.19	19.67
1891-1900 . .	51.06	54.76	19.58	18.26
1901-10 . .	55.20	58.84	18.12	17.00
1920-22 . .	59.15	63.31	16.91	15.80
1932-34 . .	63.48	67.14	15.75	14.89
1946-48 . .	66.07	70.63	15.14	14.16
1953-55 . .	67.14	72.75	14.89	13.75
1960-62 . .	67.92	74.18	14.72	13.48
1963(c) . .	67.8	74.1	14.73	13.50
1964(c) . .	67.4	73.7	14.84	13.55
1965(c) . .	67.7	74.1	14.77	13.50

(a) Number of deaths per 1,000 males in stationary population. (b) Number of deaths per 1,000 females in stationary population. (c) Based on abridged life tables calculated by the Commonwealth Statistician. These tables are based on estimates of population by age brought forward from the 1961 census adjusted to take into account the 1966 census field count and are subject to revision when the 1966 census population by age results become available.

The crude death rates and the true death rates of Australia and the more populous countries of the world for the latest available year are shown in the table in International Vital Statistics at the end of this chapter.

#### Australian Life Tables

*Life Tables prior to 1961.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-90, 1891-1900 and 1901-10. These compilations furnished a comprehensive view of Australian mortality in respect of sex, time, and geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the ten years 1901-10 were prepared and published. At the census of 1921 Life Tables were prepared by the Commonwealth Statistician from the recorded census population and the deaths in the three years 1920 to 1922. In 1933, 1947 and 1954, Life Tables based on the census population and the deaths in the years 1932 to 1934, 1946 to 1948 and 1953 to 1955 respectively were compiled by the Commonwealth Actuary.

*Life Tables of census of 1961.* On the occasion of the 1961 Census the eighth Life Tables in the series were compiled by the Commonwealth Actuary. These were based on the population recorded at the census, adjusted to allow for variation in the net movement into Australia over the years 1960 to 1962, and deaths during these years. Full particulars of the data used, the method of construction and the tabulation of these Life Tables will be found in the report of the Commonwealth Actuary, which was published by the Commonwealth Statistician in 1966. This report will also appear in Volume VIII of the detailed tables of the 1961 census. The main features of the tables, including comparisons with earlier Australian tables, are set out in the following summary tables.

## AUSTRALIAN COMPARATIVE LIFE TABLES

RATES OF MORTALITY ( $q_x$ ) AT REPRESENTATIVE AGES

Age (x)	1901-10	1920-22	1932-34	1946-48	1953-55	1960-62

$l_x$  = number surviving at specified ages out of 100,000 births.  $e_x$  = complete expectation of life at specified ages.

As indicated in the foregoing tables, the progress towards lower mortality rates for both males and females has continued over the past sixty years or more. For example, the probability of a child born in 1961 dying in one year is less than one-quarter of the probability of death in one year attached to the child who was born sixty years ago. Even at advanced ages, the reductions which have occurred in mortality rates as compared with sixty years ago are very substantial. With the exception of males of ages forty to forty-seven and ages sixty-two to sixty-six lower mortality rates were experienced by males and females during 1960 to 1962 than for the period 1953 to 1955.

There is evidence that female longevity continues to improve at a faster rate than male longevity. It would seem that the risks associated with child-bearing for females are far outweighed by the greater accident propensity of younger males and the more rapid deterioration of health, presumably due to business and other pressures, of older males.

An improvement has occurred in male mortality from accidents of all types. Even though there is some indication that for females the accident rates have deteriorated slightly, the rates are, nevertheless, still substantially below the corresponding rates for males.

#### Age distribution at death

Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years, and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for the year 1965 is given for Australia in the following table.

#### DEATHS, BY AGE AT DEATH AND SEX: AUSTRALIA, 1965

Age at death	Males	Females	Persons	Age at death	Males	Females	Persons

				Age not stated . . . . .	16	4	20
				<i>Total all ages . . . . .</i>	<i>55,770</i>	<i>43,945</i>	<i>99,715</i>

There are different mortality rates at various stages of life, and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups. The combined effect of various influences, i.e. the steady decline in the rate of mortality, the long-term decline in the birth-rate, and the effects of past and present migration on the age distribution of the population, is shown in the following table, which shows the proportion of deaths in various age groups in ten-year periods from 1901 to 1960 and for the year 1965.

#### PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA, 1901 TO 1964 (Per cent)

Period	Age at death (years)								Total
	Under 1	1-4	5-19	20-39	40-59	60-64	65 and over	Unspecified	
1901-10 . . . . .	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 . . . . .	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 . . . . .	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 . . . . .	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 . . . . .	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1951-60 . . . . .	5.59	1.33	1.80	4.90	17.27	9.18	59.90	0.03	100.00
1965—									
Males . . . . .	4.23	0.92	2.17	5.05	20.53	10.31	56.76	0.03	100.00
Females . . . . .	4.00	0.92	1.37	3.23	13.87	6.59	70.01	0.01	100.00
Persons . . . . .	4.13	0.92	1.82	4.25	17.60	8.66	62.60	0.02	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Year Book No. 39, page 614.

**Age-specific death rates**

In previous issues of the Year Book, average annual age-specific death rates were given for each State and Australia for the periods 1932-1934, 1946-1948, 1953-1955, and 1960-1962 (*see* Year Books, No. 37, pp. 778-9, No. 39, pp. 615-6, No. 44, pp. 640-1, and No. 52, p. 253). These rates were based on the age distribution of the population at the relevant censuses.

Intercensal estimates of the age distribution of the population are available for Australia and for the larger States. The following table shows age-specific death rates, i.e. the average number of deaths per 1,000 of population in each age group, for Australia for the year 1965, for males and females.

**AGE-SPECIFIC DEATH RATES(a), BY SEX: AUSTRALIA, 1965**

Age group (years)	Males	Females	Age group (years)	Males	Females
Under 1(b)	20.6	16.2	45-49	6.1	4.0
1-4	1.1	0.9	50-54	10.8	5.6
5-9	0.4	0.3	55-59	16.8	8.5
10-14	0.5	0.3	60-64	27.6	13.5
15-19	1.3	0.5	65-69	42.9	21.7
20-24	1.6	0.6	70-74	66.2	37.3
25-29	1.5	0.8	75-79	99.0	62.1
30-34	1.7	1.0	80-84	143.0	109.4
35-39	2.5	1.6	85 and over	258.4	214.2
40-44	3.7	2.3			

(a) Average number of deaths per 1,000 of mid-year population in each age group estimated in respect of 30 June 1965. (b) Infant deaths per 1,000 live births registered.

**Infant deaths and death rates—States and Territories**

Compared with other countries, Australia occupies a favourable position in respect of infant mortality. In 1965, only a few countries recorded a lower rate than Australia. Rates for Australia and the more populous countries of the world for the latest available year are shown in the table in International Vital Statistics, pages 254-5. The next tables show, for each State and Territory for the period 1941 to 1966, the number of deaths under one year of age and the rates of infant mortality under one year, and for the period 1936 to 1965 the rates under four weeks, and four weeks and under one year.

**INFANT MORTALITY UNDER ONE YEAR: STATES AND TERRITORIES, 1941 TO 1966**

1965 . .	5.2	4.8	5.3	5.8	6.5	5.6	(b)	(b)	5.25

(a) Number of deaths of children aged four weeks and under one year per 1,000 live births registered. (b) Less than twenty events; rates not calculated.

Because of the smallness of the numbers of these deaths occurring in the Australian Capital Territory and the Northern Territory, the rates for these Territories (i.e. number of such deaths per thousand live births) are subject to considerable fluctuation.

**Infant deaths and death rates—Australia**

The fact that out of 598,886 male infants born from 1961 to 1965, 12,981 (21.68 per 1,000) died during the first year of life, while of 565,873 female infants only 9,639 (17.03 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Still-births for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

## INFANT DEATHS AND MORTALITY RATES, BY SEX: AUSTRALIA, 1936 TO 1965

Period	Number of deaths						Rates(a)

A graph showing infant mortality rates for each year from 1910 to 1966 will be found on the opposite page.

# INFANT MORTALITY RATES: AUSTRALIA, 1910-1966

(INFANT DEATHS PER 1,000 LIVE BIRTHS)

## Causes of death—children under one year

Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. A summary for 1965 of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

**DEATHS OF CHILDREN UNDER ONE YEAR OF AGE, BY CAUSE OF DEATH  
AUSTRALIA, 1965**

### Causes of death

The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death, and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), and 1955 (Seventh), were successively adopted for use in Australian statistics.

The Sixth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death was used in Australia for deaths registered in 1950 to 1957. The Seventh Revision has been used for deaths registered in 1958 and subsequent years. The Sixth Revision, for the first time in connection with the International Classification, laid down rules for a uniform method of selecting the main cause to be tabulated if more than one cause is stated on the death certificate. These rules were maintained in the Seventh Revision, which was concerned mainly with certain essential changes and amendment of errors and inconsistencies in the previous classification. Prior to 1950 the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform to successive revisions of the International List.

The adoption of the new method introduced with the Sixth Revision and maintained in the Seventh marked a fundamental change in Australian cause of death statistics, emphasis now being placed on the underlying cause of death as indicated by the certifying practitioner. This change in principle affects the comparability of the statistics for 1950 and subsequent years with those for earlier years. A complete detailed classification of causes of death for Australia for 1950 according to both the Fifth and Sixth Revisions was shown in *Demography*, Bulletin No. 68, 1950.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the base of the cause of death tabulations for 1965 which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Tables A and B show deaths of males and females, respectively, in age groups, and Table C shows the total numbers of males and females who died, the death rates per million of mean population, and the percentage of total deaths.

**Deaths from certain important causes**

In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Seventh Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification numbers used in tables A to C (pages 244-7) are indicated in parentheses for each cause or group of causes.

*All forms of tuberculosis (B1, B2).* In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years, consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Year Book No. 39, page 626. The following table shows the age groups of males and females who were classified as dying from tuberculosis in 1965, together with figures for 1931, 1941, 1951 and 1961.

**DEATHS FROM TUBERCULOSIS (ALL FORMS), BY AGE GROUP AND SEX  
AUSTRALIA, 1931 TO 1965**

Age group (years)	Males					Females				
	1931	1941	1951	1961	1965	1931	1941	1951	1961	1965
0-14 . . .	90	63	23	5	1	81	54	35	1	3
15-29 . . .	294	162	46	2	..	487	275	68	..	3
30-44 . . .	585	428	135	25	12	422	319	142	20	10
45-64 . . .	674	793	570	128	79	252	251	126	41	29
65 and over . . .	193	279	306	175	134	89	110	86	50	23
Not stated . . .	..	..	..	..	..	..	..	1	..	..
<b>Total . . .</b>	<b>1,836</b>	<b>1,725</b>	<b>1,080</b>	<b>335</b>	<b>226</b>	<b>1,331</b>	<b>1,009</b>	<b>458</b>	<b>112</b>	<b>68</b>

The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 49 per 100,000 of mean population in 1931 to 18 in 1951, and to 3 in 1965. The reductions in the younger age groups are much greater, as can be seen from the table above. In making these comparisons, consideration of the effect of the change in basis from the Fifth to the Sixth Revision of the International List (*see above*) is particularly important.

Of the more developed countries, those with the lowest death rates from tuberculosis per 100,000 of population are: Netherlands, 1.9; Australia, 2.6; Denmark, 3.0; Canada, 3.5; Israel, 3.5; New Zealand, 3.7; and United States of America, 4.3. Rates for selected countries in each continent are:

Africa—South Africa (white population), 6.0; United Arab Republic, 18.1.

North America—Dominican Republic, 15.5; Mexico, 25.1; Guatemala, 31.1.

South America—Argentina, 19.9; Peru, 54.1; Brazil, 82.3.

Asia—Japan, 23.6; India, 82.7; Philippines, 79.6.

Europe—England and Wales, 5.3; Scotland, 7.2; Italy, 14.7; France, 15.6; Poland, 41.1.

*Malignant neoplasms, including neoplasms of lymphatic and haematopoietic tissues (B18).* Deaths classified under this heading according to the Sixth and Seventh Revisions of the International List (used in Australia for deaths registered since 1950) are not directly comparable in total with those on the Fifth Revision basis (*see Year Book No. 39, p. 628*).

A summary regarding seat of disease for 1965 is given below.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND HAEMATOPOIETIC TISSUES, BY SEAT OF DISEASE AND SEX: AUSTRALIA, 1965**

Seat of disease	Males	Females	Persons
<b>Malignant neoplasms—</b>

<b>Grand total . . . . .</b>	<b>8,338</b>	<b>6,793</b>	<b>15,131</b>

The ages of males and females who died from malignant neoplasms in 1965 are given below, together with figures for 1931, 1941, 1951, and 1961. The increase in the number of deaths from malignant neoplasms in the years since 1931 is due principally to the increase in the number of people in the higher age groups, at which ages the risks of cancer are much greater. While the total population increased by about 75 per cent between 1931 and 1965, the number of people aged 55 years and over increased by about 118 per cent. The increase in the number of deaths in the lower age groups from 1951 is due partly to the inclusion of neoplasms of lymphatic and haematopoietic tissues, and it is probable also that part of the increased number of deaths from cancer recorded in recent years has been due to improved diagnosis and certification on the part of the medical profession.

**DEATHS FROM MALIGNANT NEOPLASMS(a), BY AGE GROUP AND SEX

(a) Includes neoplasms of lymphatic and haematopoietic tissues.

The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent they reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (*see* previous paragraph). In 1931 the rate for Australia was 101 (males, 105; females, 97); in 1941 it was 119 (males, 119; females, 120); and in 1951 it had risen to 126 (males, 130; females, 122). Figures for 1961 gave a rate of 130 (males, 139; females, 121), and for 1965 a rate of 133 (males, 146; females, 121).

Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows: Brazil, 94; Israel, 100; Japan, 108; Poland, 112; Canada, 133; Australia, 133; South Africa (white population), 134; United States of America, 151; Italy, 159; Netherlands, 182; France, 204; England and Wales, 221; Scotland, 226. The rates are for the latest available year in each case.

*Diseases of the heart (B25 to B28).* The number of deaths classified to diseases of the heart in 1965 was 37,389 (21,843 males and 15,546 females). This class is the largest among causes of death, the rate having increased from 112 per 100,000 of mean population in 1911-15 to 330 in 1965. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates from heart diseases for various years from 1931 were as follows: 1931, 159 (males, 178; females, 142); 1941, 269 (males, 306; females, 231); 1951, 314 (males, 367; females, 259); 1961, 304 (males, 356; females, 250); and 1965, 330 (males, 383; females, 276). Deaths from heart diseases in 1965 represented 37 per cent of the total deaths.

*Puerperal causes (B40).* It was shown in Year Book No. 39, page 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The Seventh Revision, introduced in 1958, did not affect comparability. The death rate from these causes has fallen rapidly during recent years and in 1965 the rate was 0.3 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 74 deaths in 1965 correspond to a death rate of 1.32 per 100,000 females. The death rate may be expressed in other terms by stating that for every 3,012 babies born alive in 1965 one woman died from puerperal causes. The death rate per 1,000 live births from puerperal causes in various countries for the latest available year is as follows: Norway, 0.2; Australia, Canada, Denmark, France, Netherlands, New Zealand, Sweden, Switzerland, United Kingdom and United States, 0.3; Finland, 0.4; Italy, 0.9; and Japan, 1.0.

*Causes of infant mortality.* *See* paragraphs devoted to causes of infant deaths on pages 242-3.

*Accidents, poisonings and violence (BE47 to BE50).* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. The low level of the rates and proportions for the years 1941-45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July 1947 deaths of defence personnel from accidents, etc. have again been included.

**ACCIDENTS, POISONINGS AND VIOLENCE: DEATH RATES<sup>(a)</sup>, BY SEX  
AUSTRALIA, 1936 TO 1965**

Period	Death rate from—												All violence, proportion per 10,000 deaths		
	Accidents(b)			Suicide			Homicide(c)			Total violence

1965	74	33	54	19	11	15	1	1	1	95	46	70	970	584	800

(a) Number of deaths per 100,000 of mean population. (b) Includes 'open verdict'. (c) Includes late effects of injuries due to operations of war.

In 1965 the total number of deaths from *accidental causes* (BE47, BE48) was 6,120 (4,243 males and 1,877 females). Over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows: Motor vehicle traffic accidents, 3,083 (50.38 per cent); motor vehicle non-traffic accidents, 80 (1.31 per cent); other road vehicle accidents, 46 (0.75 per cent); railway accidents, 92 (1.50 per cent); water transport accidents, 86 (1.41 per cent); aircraft accidents, 18 (0.29 per cent); a total of 3,405 (55.64 per cent). Other important causes were accidental falls, 1,005 (16.42 per cent); accidental drowning, 378 (6.18 per cent); and accidents caused by fire and explosion of combustible material, 226 (3.69 per cent).

Deaths from *suicide* (BE49) in 1965 numbered 1,685 (males, 1,075; females, 610). Poisoning, other than by gases, was used in 759 cases (45.04 per cent of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows: firearms and explosives, 331 (19.64 per cent); poisoning by gases, 239 (14.78 per cent); hanging or strangulation, 173 (10.27 per cent); submersion (drowning), 66 (3.92 per cent); other and unspecified modes, 117 (6.35 per cent). Of the 1,075 males who committed suicide, 304 (28.28 per cent) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 405 cases (66.39 per cent). The following table shows the age of persons who committed suicide in 1965.

**PERSONS WHO COMMITTED SUICIDE, BY AGE GROUP AND SEX  
AUSTRALIA, 1965**

Age group (years)	Males	Females	Persons	Age group (years)	Males	Females	Persons

50-54 . . .	130	64	194				
55-59 . . .	93	64	157				
				<b>Total deaths . . .</b>	<b>1,075</b>	<b>610</b>	<b>1,685</b>

Of the 170 deaths recorded in 1965 from *homicide and operations of war (BES0)* there were 162 deaths from homicide and injury purposely inflicted by other persons (not in war), of which assault by firearms and explosives caused 57, assault by cutting and piercing instruments 36, and assault by other means 69. Deaths from injury resulting from the operations of war numbered 7 but all were deaths from late effects of such injuries.

#### Age at death and average issue of deceased married males and females

*Demography*, Bulletin No. 83, contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1965. Deaths of married males in 1965 numbered 43,454, and those of married females, 35,745. The tables which follow deal, however, with only 42,903 males and 35,541 females, the information regarding issue in the remaining 755 cases being incomplete. The total number of children in the families of the 42,903 males was 123,258 and of the 35,541 females, 108,993. The average number of children is shown for various age groups in the following table.

#### AVERAGE ISSUE: DECEASED MARRIED(a) MALES AND FEMALES, BY AGE AT DEATH, AUSTRALIA, 1931 TO 1965

(a) In cases where the deceased was married more than once this represents age at first marriage.

**Vital statistics of external territories**

The following table shows, for the year 1965, the number of marriages, births and deaths registered in the external territories under the control of Australia. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 83.

**EXTERNAL TERRITORIES: VITAL STATISTICS, 1965**

Territory	Marriages	Births	Deaths
Christmas Island(a)	4	65	6
Cocos (Keeling) Islands(a)	..	..	..
Norfolk Island(a)	6	17	15
Papua(b)	97	450	31
Trust Territory of New Guinea(b)	136	561	80
Trust Territory of Nauru(a)	30	245	42

(a) Total population. (b) Non-indigenous population only.

**International vital statistics**

In the following table vital statistics rates for selected countries are shown. Crude marriage, birth, and death rates represent the number of 'events' reported for the year stated per 1,000 of the population. Infant mortality rates are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nations *Demographic Yearbook*, 1965 (see explanation of true death rates, pages 233-4).

In many instances the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1965 (see particularly Technical Notes on Statistical Tables and footnotes to the tables). The countries are arranged in the same order as in the table on pages 208-9 of the Population chapter.

(a) Crude marriage, birth and death rates, i.e. number of marriages, births and deaths per 1,000 of population. Infant mortality—number of deaths of children under one year of age per 1,000 live births. (b) Number of deaths per 1,000 males and 1,000 females respectively in stationary population (see explanation on pp. 233-4.) (c) 1963. (d) 1964. (e) Not available. (f) Estimated. (g) African population only. (h) 1954. (i) 1950. (j) Excluding Indian jungle population. (k) 1965. (l) 1957. (m) 1951-1961. (n) 1952. (o) Excludes live born infants dying before registration of birth. (p) Jewish population. (q) Includes some premature infants dying within 24 hours of birth.

## CHAPTER 10

### HOUSING AND BUILDING

On pages 257-64 of this chapter details are given of the *characteristics of dwellings as obtained from censuses*, pages 264-76 contain a *summary of building activities*, pages 276-88 outline *government activities in the field of housing*, and pages 288-95 relate to *financial arrangements associated with the erection or purchase of homes*.

Further information on dwellings obtained from censuses is available in the detailed tables of the 1961 census and earlier censuses and in the mimeographed statements of the 1966 census (see the chapter Miscellaneous of this Year Book\*).

More detailed information on building activity is contained in the annual bulletin *Building and Construction* and the *Quarterly Bulletin of Building Statistics*, and current information is obtainable also in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the mimeographed statements *Building Statistics: Number of New Houses and Flats* (quarterly), and *Building Approvals* (monthly). Details for particular States are available from publications issued regularly by the Deputy Commonwealth Statisticians.

Commonwealth Government activities relate in the main to the provision of moneys to State Governments under Commonwealth-State Housing Agreements, to the assistance of ex-service personnel in the erection and purchase of homes, to assistance to young married couples under the Home Savings Grant Act, to the operation of the Housing Loans Insurance Corporation, and to the provision of homes in the Territories. Further details of activities of the Commonwealth and State Housing Authorities are shown in the reports issued by these authorities.

#### Census dwellings

At each census of the population, in addition to the questions relating to personal particulars, there have been a number of questions relating to dwellings. A 'dwelling' is defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. All statistics in this section are exclusive of particulars of dwellings occupied solely by full-blood Aborigines.†

#### Number of dwellings

The following table shows the number of occupied and unoccupied dwellings in Australia at each census from 1911 to 1961. Occupied dwellings are classified into 'private' and 'other than private' dwellings (see page 259 for definitions of 'private' and 'other than private' dwellings). Unoccupied dwellings include dwellings whose occupants are temporarily absent, holiday homes, and other temporarily vacant dwellings (see page 264 for full explanation of the term 'unoccupied').

**DWELLINGS: AUSTRALIA, CENSUSES, 1911 TO 1961**

Census	Occupied			Unoccupied
	Private	Other than private	Total	
1911 . . .	894,389	29,070	923,459	33,473
1921 . . .	1,107,010	46,275	1,153,285	51,163
1933 . . .	1,509,671	37,705	1,547,376	68,772
1947 . . .	1,873,623	34,272	1,907,895	47,041
1954 . . .	2,343,421	36,932	2,380,353	112,594
1961 . . .	2,781,945	35,325	2,817,270	194,114

\* See also Appendix to this Year Book. † See Appendix for results of Constitution Alteration (Aboriginals) 1967 Referendum.

The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the census of 30 June 1961. (For definitions of 'urban' and 'rural' see page 195 of Year Book No. 52.)

**DWELLINGS, BY DIVISION OF STATE: AUSTRALIA, CENSUS, 30 JUNE 1961**

Division	Occupied				Unoccupied	
	Private	Other than private	Total		Number	Proportion of total
			Number	Proportion of total		
				Per cent		Per cent
Urban—						
Metropolitan . . .	1,607,392	18,304	1,625,696	57.70	59,096	30.44
Other . . . . .	706,535	9,208	715,743	25.41	58,577	30.18
Rural . . . . .	468,018	7,813	475,831	16.89	76,441	39.38
<b>Total. . . . .</b>	<b>2,781,945</b>	<b>35,325</b>	<b>2,817,270</b>	<b>100.00</b>	<b>194,114</b>	<b>100.00</b>

The total numbers of occupied and unoccupied dwellings in each State and Territory at the censuses of 1954 and 1961 were as follows.

**DWELLINGS: STATES AND TERRITORIES, CENSUSES  
1954 AND 1961**

State or Territory	Census 30 June 1954		Census 30 June 1961	
	Occupied	Un-occupied	Occupied	Un-occupied
New South Wales . . .	912,877	42,831	1,061,609	72,432
Victoria . . . . .	660,690	27,491	790,529	47,389
Queensland . . . . .	339,328	21,473	398,233	33,969

Western Australia . .	162,823	6,614	194,317	13,705
Tasmania . . . . .	78,789	5,288	91,258	8,582
Northern Territory . .	3,427	47	5,479	179
Australian Capital Territory	7,118	326	13,937	797
<b>Australia . . . . .</b>	<b>2,380,353</b>	<b>112,594</b>	<b>2,817,270</b>	<b>194,114</b>

**Class of dwelling**

The following table shows the numbers of the various classes of occupied dwellings in the metropolitan urban, other urban, and rural areas of Australia at the censuses of 1954 and 1961. The boundaries of the metropolitan urban and other divisions of State differ from census to census, and consequently accurate comparison cannot be made between figures for corresponding divisions (see page 195 of Year Book No. 52).

Private dwellings are classified into the following four categories:

*Private house*—includes houses, sheds, huts, garages, etc., used for dwelling purposes, and shared private houses for which only one householder's schedule was received;

*Share of private house*—portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received;

*Flat*—part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities;

*Other private dwelling*—includes private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

Other than private dwellings include hotels; motels; boarding houses, lodging houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; police and fire stations; clubs; staff barracks and quarters, etc.

### OCCUPIED DWELLINGS, BY CLASS OF DWELLING AND DIVISION OF STATE: AUSTRALIA, CENSUSES, 1954 AND 1961

(a) See text on page 258 regarding comparability as between censuses. (b) Includes shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) Prior to 1961 single self-contained dwellings attached to, or situated above, offices, shops, etc., were classified as private houses irrespective of the description stated in the householder's schedule. In 1961 such dwellings, if described as self-contained flats, were classified as flats. (e) Included with private dwellings. (f) Certain institutions previously classified as 'Educational' were in 1961 classified as 'Religious'.

Minus sign (-) denotes decrease.

#### Population according to class of dwelling, etc.

The following table shows the number of the various classes of occupied dwellings at the censuses of 1954 and 1961, together with the number of inmates therein.

OCCUPIED DWELLINGS AND INMATES, BY CLASS OF DWELLING: AUSTRALIA  
CENSUSES, 1954 AND 1961

<b>Total private dwellings . . . . .</b>	<b>2,056,019</b>	<b>107,216</b>	<b>127,420</b>	<b>52,766</b>	<b>2,343,421</b>	<b>2,435,166</b>	<b>79,550</b>	<b>217,586</b>	<b>49,643</b>	<b>2,781,945</b>

(a) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (b) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (c) See footnote (d) to table on page 259. (d) At the 1954 Census, figures were compiled from the answers furnished in response to the instruction on the householder's schedule 'Tenant paying rent to a Government Authority to write 'Tenant (G)'. At the 1961 Census, householders were instructed on the schedule to write 'Tenant (G)' if they paid rent to the Governmental Housing Authority in their State or Territory.

The numbers of occupied private dwellings in Australia at the census of 30 June 1961, classified according to date of building, are shown below. This information was derived from replies of occupants of dwellings at 30 June 1961. For a number of reasons, the figures shown on the first line of the table do not agree with the number of dwellings by class recorded at the census of 30 June 1954, e.g. demolitions, conversion from one class of dwelling to another and errors of memory regarding date of building. Also, the figures are not precisely comparable with 1954 data because of changes in classification of dwellings adopted at the 1961 census, as indicated in footnotes (d) and (e) to the table on page 259.

**OCCUPIED PRIVATE DWELLINGS, BY DATE OF BUILDING AND CLASS OF DWELLING AND DIVISION OF STATE: AUSTRALIA, CENSUS, 30 JUNE 1961**

(a) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (b) So stated in census schedules.

**Tenanted private dwellings—weekly rent**

Information tabulated from census results concerning rents was restricted to the actual rent paid per week by tenants for unfurnished private dwellings. Particulars of rents shown in the following tables are therefore on an *unfurnished* basis. Dwellings shown as rent 'Not stated' include those whose rents were shown on householders' schedules on a *furnished* basis, and those whose rents were not applicable (e.g. for shop and dwelling combined). In this section information on 'tenanted private dwellings' excludes particulars of dwellings occupied by 'Tenants (Governmental Housing)' in each State, i.e. those householders who at the 1954 Census furnished answers in response to the instruction on the census householder's schedule 'Tenant paying rent to a Government Authority to write 'Tenant (G)'' and those householders who at the 1961 Census furnished answers in response to the instruction on the census householder's schedule 'Tenant paying rent to the Governmental Housing Authority in their State to write 'Tenant (G)'''. For the Australian Capital Territory and the Northern Territory particulars of all tenanted private dwellings are included.

**TENANTED PRIVATE DWELLINGS, BY WEEKLY RENT (UNFURNISHED) AND CLASS OF DWELLING: AUSTRALIA, CENSUSES, 1954 AND 1961**

(a) These figures exclude dwellings occupied by 'Tenants (Governmental housing)' except those in the Northern Territory and the Australian Capital Territory. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) See footnote (d) to table on page 259. (e) Includes tenanted dwellings which were rent-free, those rented on a furnished basis, and those for which the rents were not applicable (e.g. for shop and dwelling combined).

For similar particulars to the above for metropolitan urban, other urban, and rural areas and for further detail see Year Book No. 50, pages 365-7.

### Unoccupied dwellings

The following table classifies unoccupied dwellings according to the reasons given by census collectors for the dwellings being unoccupied at the census date. Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as 'week-enders', 'holiday home', 'second home', 'seasonal workers' quarters', which were not occupied on the night of the census; dwellings normally occupied, but whose usual occupants were temporarily absent on the night of the census; newly completed dwellings whose owners or tenants had not entered into occupation on the night of the census; dwellings described as 'to be demolished', 'condemned', 'deceased estate', 'exhibition home', etc.; and buildings constructed as dwellings, but used for non-dwelling purposes on the night of the census. The total number of unoccupied dwellings shown for any area must not, therefore, be read as representing the number of vacant houses and flats available for sale or renting.

UNOCCUPIED DWELLINGS, BY REASON FOR BEING UNOCCUPIED

### Building

#### Statistics of building approved

Statistics of building approvals have been compiled from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorised by governmental authorities. *They relate only to approvals for buildings as distinct from the construction of roads, railways, bridges, earthworks, water storage, etc.* Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Additions of \$10,000 and over are included with new buildings in all States except New South Wales, where they are included in 'alterations and additions'. These statistics are available from the year 1953-54.

#### Statistics of building commenced, completed and under construction

These relate to building by private contractors, government authorities and owner-builders. The following outlines the scope of the statistics: (a) *only the erection of new buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc., is covered*; (b) major new additions to existing buildings are included as new buildings (for New South Wales, major alterations also are included as new building); (c) minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings, sheds, huts, etc., are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached); figures for flats include 'home units'; (f) imported prefabricated houses are included; (g) details obtained from government authorities and building contractors refer to all areas, whereas details for owner-builders cover only areas subject to building control by local government authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

**Private or government ownership.** A building is classified as 'private' or 'government' according to ownership at date of commencement. Thus 'government' includes buildings erected for Commonwealth and State Governments, semi-governmental and local government authorities, either by contractor or by day-labour, whether these buildings are for their own use or for rental or sale after completion. Houses erected for particular persons under government sponsored home building schemes or with government financial assistance are classified as 'private'.

**Owner-built.** An 'owner-built' house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

**Contract-built.** Includes the operations of all building contractors and government authorities which undertake the erection of new buildings.

**Commenced.** A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

**Completed.** A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

**Under construction.** A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding.

**Values.** All values shown exclude the value of land and represent the estimated value of buildings on completion.

**Values of work done.** The values of work done during the period represent the estimated value of work actually carried out on buildings during the period. For any building the sum of these values obtained during its construction equals the value of the building on completion. Data relating to the value of work done on owner-built houses are not collected. However, the figures shown for the value of work done include a component relating to owner-built houses, calculated on the basis of the figures collected for the value of owner-built houses commenced, completed and under construction.

**Type of building.** Classification is according to the function a building is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the function of the group as a whole.

**Persons working.** Figures relate to persons working on the jobs of contractors who undertake the erection of new buildings and of government authorities which erect new buildings on their own account. They include persons working on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities. Contractors are asked to give details of all persons working on their jobs on a specified day, including working principals, men working as or for sub-contractors and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for contractors and authorities to provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some estimation by persons completing returns and some degree of understatement in figures shown in tables. On the other hand, because of frequent movement between jobs of some types of tradesmen (such as electricians) who may work on several jobs on the one day, a small element of duplication may occur. The figures exclude persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

#### New houses approved, commenced, completed and under construction

The next table provides a summary for 1965-66 of the number of new houses approved, commenced, completed and under construction in each State and Territory. For a graph showing the number of new houses commenced, completed and under construction for the period 1956-57 to 1965-66, see plate 22, page 269.

**New flats**

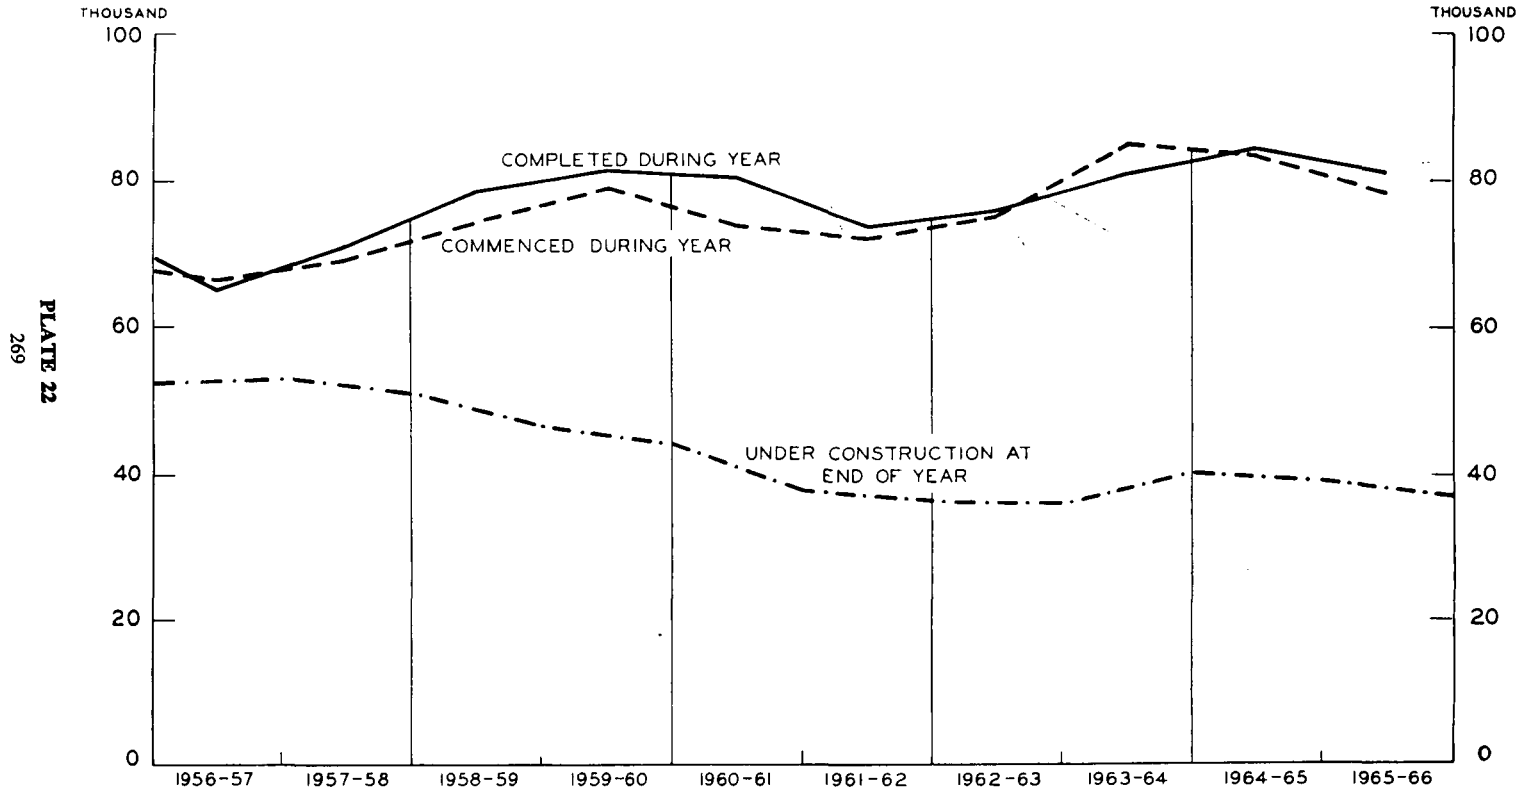

The figures in the foregoing tables do not include particulars of new flats. It should be noted: (a) that the figures following are additional to the numbers of houses shown in other tables, (b) that each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, (c) that new flats only are included, i.e. conversions of old buildings into flats are omitted, and (d) 'home units' are included as flats. For a graph showing the number of new flats commenced, completed and under construction for the period 1956-57 to 1965-66 see plate 23, page 270.

**Approved, commenced, completed and under construction**

The summary following shows the number of new flats approved, commenced, completed and under construction for the year 1965-66.

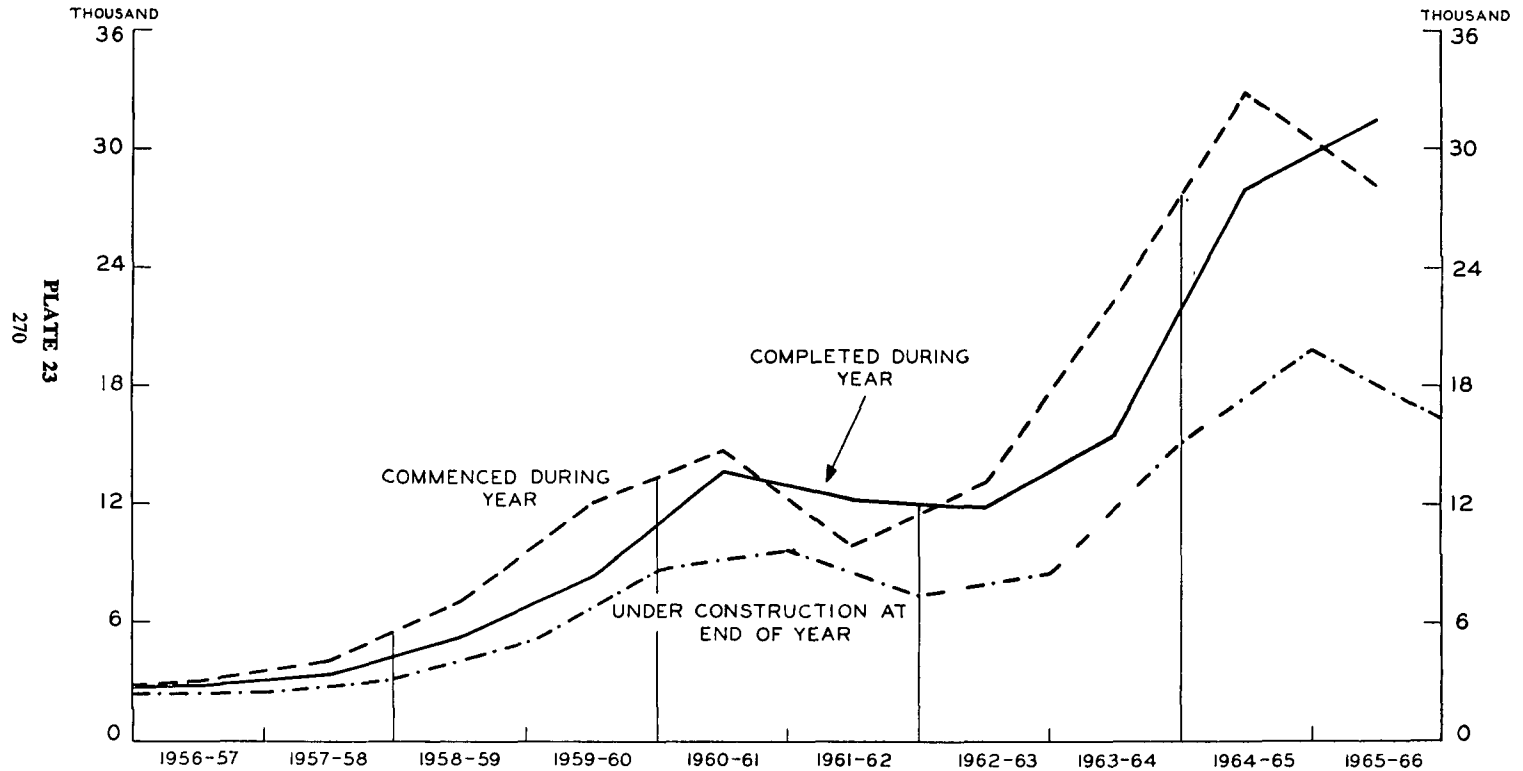

# NEW HOUSES: AUSTRALIA

1956-57 TO 1965-66

# NEW FLATS: AUSTRALIA

1956-57 TO 1965-66

## NEW FLATS: NUMBER, STATES AND TERRITORIES, 1965-66

**Government activities in the housing field****Housing Agreements between Commonwealth and State Governments**

Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial long-term loans to the States for the provision of housing.

*The 1945 Agreement.* In November 1945 the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Tasmania withdrew from the Agreement in August 1950, and South Australia did not begin to operate under it until July 1953. Between 1945-46 and 1955-56, under this Agreement, the Commonwealth Government advanced \$177,698,000 to New South Wales; \$171,562,000 to Victoria; \$48,688,000 to Queensland; \$23,400,000 to South Australia; \$54,100,000 to Western

Australia; and \$5,670,000 to Tasmania. When Tasmania withdrew from the Agreement, it repaid all advances made to it.

Initially, dwellings constructed under the 1945 Agreement were sold only to tenants provided the tenant was able to arrange payment of the full purchase price to the State immediately on sale. Under this arrangement sales to tenants were relatively few. Subsequent amendments to the 1945 Agreement in 1955 and 1961 progressively eased the conditions of sale to tenants of dwellings constructed under the Agreement and permitted sales to tenants on terms and prices decided by the States. For information on the conditions of sale, etc., under the 1945 Agreement see Year Book No. 48, page 367.

*The 1956 Agreement.* In 1956 the Commonwealth and the States entered into a new Agreement under which added emphasis was placed on the construction of dwellings for private ownership. The Commonwealth Government provided finance to the States over a period of five years ending 30 June 1961 for the erection of dwellings. The Agreement provided that for the first two years of the five-year period a minimum of twenty per cent of the money advanced to each State and for the remaining three years a minimum of thirty per cent was to be allocated to a Home Builders' Account. Funds in these accounts were then advanced to building societies and other approved institutions for lending to private home builders and purchasers. The balance of the amounts advanced to each State was used by the States for the erection of dwellings for either rental or sale. The States determined the type of dwellings to be erected, their location and the selection of tenants, and also fixed the terms of sale. The Commonwealth was entitled to specify that up to five per cent of the moneys allocated for the erection of dwellings by the State be set aside for the erection of dwellings for serving members of the defence forces nominated by the Commonwealth. The Commonwealth provided supplementary advances to the States equal to the amounts set aside by them for this purpose. For other features of the 1956 Commonwealth and State Housing Agreement see Year Book No. 48, page 368.

*The 1961 Agreement.* The period during which Commonwealth advances to the States could be made under the 1956 Agreement terminated on 30 June 1961. A new Agreement was entered into which extended for a further five years the period during which advances could be made and also amended the 1956 Agreement in certain respects. The main effects of the amendments were:

- (a) to allow the Commonwealth and a State to agree that the State would set aside funds for the erection of dwellings for rental to servicemen in excess of the previous maximum of five per cent of the allocation to the State housing authority, provided the Commonwealth made supplementary advances for the same purpose of the same amount or of such greater amount as was agreed between the Commonwealth and the State; and
- (b) to provide for a rate of interest on Commonwealth advances equal to the long-term Commonwealth bond rate at the time each advance was made, less one per cent per annum.

The interest rates under the Agreement have been: from 1 July 1961 to 6 February 1962, 4½ per cent per annum; 7 February 1962 to 22 July 1963, 4 per cent per annum; 23 July 1963 to 13 May 1964, 3½ per cent per annum; 14 May 1964 to 12 August 1964, 3½ per cent per annum; 13 August 1964 to 12 April 1965, 4 per cent per annum; and since 13 April 1965, 4½ per cent per annum.

*The 1966 Agreement.* A new Agreement was entered into which extended for a further five years the period during which advances could be made, and also amended the 1956–1961 Agreement in certain respects. The main effects of the amendments were:

- (a) the bringing up to date of the definition of 'member of the forces', for the purposes of the Agreement;
- (b) to eliminate the requirement for the Commonwealth and a State to agree to the erection by the State of blocks of flats in metropolitan areas;
- (c) to enable the States, at the request of the Commonwealth, to agree to the erection of dwellings for rental to servicemen, in accordance with the Scales and Standards of Accommodation issued under the authority of the Department of Defence; and
- (d) to permit the States to allocate portion of moneys available in the Home Builders' Account to an approved State Government lending institution for the provision by the institution of finance to home builders in rural areas.

#### Operations under the various Housing Agreements

The following tables show the operations under the various Housing Agreements during 1965–66 and to 30 June 1966. The tables do not include figures relating to the 1966 Agreement, which came into force after 30 June 1966. The earliest single year for which details are given in the tables is 1956–57; for earlier years see Year Book No. 50, pages 382–383.

(a) Includes supplementary advances for Service Housing. (b) The maximum amount is 70 per cent of the Commonwealth advances, other than supplementary advances for Service Housing. (c) The minimum amount must be 30 per cent of the Commonwealth advances other than supplementary advances for Service Housing. (d) These figures include estimates supplied by the Queensland Housing Commission. During 1958-59 and subsequent years the Queensland State Housing programme was financed from a Trust Fund which included Housing Agreement moneys, together with moneys from other sources. (e) Also included in State Housing Programme above. (f) Tasmania did not operate under the 1945 Agreement after August 1950.

(a) Estimates supplied by the Queensland Housing Commission (see footnote (d) to table on page 278).

**War service homes**

The *War Service Homes Act* 1918-1966 makes provision for assistance to be granted to persons who satisfy the eligibility conditions set out in the Act, to enable them to acquire on concessional terms a soundly constructed home that they would occupy as a residence.

Persons eligible for assistance under the Act include members of the Australian forces and nursing services enlisted or appointed for or employed on active service outside Australia or on a ship of war, during the 1914-1918 and 1939-1945 Wars and persons who served in the war-like operations in Korea or Malaya or who have served on 'special service' as defined in the *Repatriation (Special Overseas Service) Act* 1962-1966. 'Special service' includes 'special duty' in an area which by reason of war-like operations or a state of disturbance has been declared a 'special area' under the Repatriation (Special Overseas Service) Act. The areas declared as a 'special area' under the Act are:

- Vietnam (Southern Zone) from 31 July 1962;
- certain areas of Borneo, Sabah and Sarawak from 8 December 1962;
- certain areas of Malaya from 28 May 1963;
- Malaysia (the remainder) and Singapore from 7 July 1965.

The categories of eligible persons also include the widow and, in some circumstances, the widowed mother of an eligible person and persons domiciled in Australia and employed in certain sea-going service during the 1914-1918 and 1939-1945 Wars.

The Director of War Service Homes is responsible for the execution of the War Service Homes Act subject to the directions of the Minister for Housing.

**Operations under the War Service Homes Act**

The following tables give details of the operations under the War Service Homes Act in the year 1965-66 and from the inception of the scheme on 6 March 1919 to 30 June 1966. The earliest single year for which details are given in the tables is 1956-57; for earlier years see previous issues of the Year Book. The figures shown include operations in the Territories of Papua, New Guinea and Norfolk Island.

1965-66 . . .	3,812	2,799	1,350	856	727	229	4	70	9,847

(a) Includes Norfolk Island. (b) Includes Territories of Papua and New Guinea.

In addition to the homes provided under the War Service Homes Act and shown above, 2,297 homes, which had been provided originally under the Housing Agreements with the States, have been taken over in accordance with those Agreements, 51 being taken over during 1965-66.

#### Home Savings Grant Scheme

The administration of the Homes Savings Grant Act is a function of the Commonwealth Department of Housing. The purpose of the Home Savings Grant Scheme is to assist young married persons to purchase or build their own homes. A further objective is to increase the proportion of total private savings available for housing purposes by encouraging young people to save with those institutions which provide the bulk of long-term housing finance.

The scheme provides for the payment of grants from the National Welfare Fund of \$1 for every \$3 saved by young persons for the first home they own after marriage. The savings must be made over a period, and held in an approved form. The maximum grant to a married couple, or to husband or wife if only one is eligible, is \$500 on savings of \$1,500 or more. Smaller grants are, however, payable on lesser amounts saved. To be eligible for the grant, a person must be married, and must have—or must be married to a person who has—entered into a contract to buy a home or have one built, or begun to build a home as an owner-builder. The person must be under 36 years of age at the time of marriage and at the date of the contract to buy or build or the date building began, must have either been an Australian citizen or lived in Australia during the three years immediately preceding that date, and must also have saved in Australia in an approved form throughout that period. Those three years together with any earlier corresponding years during which savings are made in an approved form are known as the applicants' 'savings years'. The grant is payable in respect of existing homes and homes being built. Flats and home-units may also be eligible provided separate title can be obtained. The home, including the land, the house itself and any other improvements, must not cost more than \$14,000. Most homes are eligible, the main exception being homes purchased from State housing authorities, which have been built with money advanced by the Commonwealth under the Commonwealth-State Housing Agreement at concessional rates of interest.

The main forms of saving acceptable under the Scheme are Home Savings Accounts with savings banks, fixed deposits with trading banks designated Home Savings Accounts, and deposits with or shares in registered building or co-operative housing societies. Savings spent in connection with the purchase or construction of the home prior to the date of the contract to buy or build the home, or the date building began, are also acceptable. In addition, savings in certain other forms up to 31 December 1964 are acceptable up to 31 December 1967 if they remain in those forms. These forms are accounts with savings and trading banks other than Home Savings Accounts, and deposits with registered friendly societies and credit unions. However, all new and additional savings after 1 January 1965 must be in one or more of the forms mentioned earlier to be acceptable. The amount of savings that qualify for a grant is the sum of the amounts saved, in acceptable forms, in each savings year. However, in any savings year commencing on or after 1 January 1965 there is a limit of \$500 on the amount of savings that can qualify for a grant. In a savings year commencing before 1 January 1965 the maximum amount that can qualify may be more than \$500 but may not exceed \$1,120.

Full details of the scheme are set out in the official pamphlet *A Grant for Your Home* available from banks, building and housing societies, post offices, and offices of the Department of Housing throughout Australia. Additional statistical information is contained in the Annual Reports by the Secretary, Department of Housing, on the *Homes Savings Grant Act 1964-1966*, which are available from the Government Printer, Canberra.

#### Operations under the Home Savings Grant Scheme

Particulars of applications received and approved during 1965-66 and during the period from 20 July 1964, when the scheme commenced to operate, to 30 June 1966 are set out on pages 282-3.

#### Homes qualifying for grants

The two following tables contain particulars of homes in respect of which grants were approved during 1965-66. As grants are payable only to persons under 36 years of age and in respect of homes costing no more than \$14,000, these statistics should not be regarded as being applicable to home owners in general.

(a) Homes financed without mortgage loan. Includes homes financed from the applicants' own resources only, with personal or unsecured loans, purchased under a terms contract of sale, etc. (b) Includes homes financed with and without second mortgage loans. (c) Includes Northern Territory. (d) Includes Municipality of Queanbeyan, N.S.W.

#### **Housing Loans Insurance Scheme**

The Housing Loans Insurance Corporation was established by the *Housing Loans Insurance Act* 1965, assented to on 4 May 1965, to insure approved lenders against losses arising from the making of housing loans. The Corporation consists of a chairman (who is also managing director) and a deputy chairman, who are full-time members, and three part-time members, all of whom are appointed by the Governor-General. The main purpose of the activities of the Corporation is to assist people to borrow, as a single loan and at a reasonable rate of interest, the money they need and can afford to repay to obtain a home suited to their requirements.

To encourage the making of high-ratio loans the Corporation will insure loans up to 95 per cent of valuation for houses valued at \$12,000 or less. Where the valuation of a home exceeds \$12,000 the maximum insurable amount is 95 per cent of the first \$12,000 of valuation plus 70 per cent of the balance, or \$17,000, whichever is the lesser. A once-and-for-all premium of 2 per cent of the amount of the loan is charged by the Corporation. The premium is payable by the borrower, but lenders may agree to add it to the amount of the loan for repayment by the borrower over the duration of the loan. The maximum rate of interest that may be charged on insured loans is  $7\frac{1}{2}$  per cent (June 1966) per annum and the maximum period for repayment is thirty-five years. The maximum rate of interest is kept under continuing review and may be varied by the Corporation, with the concurrence of the Minister for Housing, whenever changes appear to be warranted by movements in interest rates generally or by other developments.

The Housing Loans Insurance Corporation insures loans that are made for a wide range of purposes in addition to the purchase or construction of a dwelling. The other purposes include alterations, extensions or improvements to a dwelling, and the provision or improvement of roads, kerbing and footpaths. An insured loan may be made only by an approved lender. Approved lenders are appointed by the Corporation from within approved classes of lenders specified by the Minister for Housing. The approved classes include banks, building societies, co-operative housing societies, friendly societies, life insurance companies, and trustee companies. The Housing Loans Insurance Corporation commenced its insurance operations in November 1965.

#### **State housing authorities**

The following paragraphs describe briefly the organisation of the various State housing authorities and their activities in the fields of home construction and provision of homes on a rental basis (see pages 288-91 for their financial advances to persons wishing to purchase or build a home). For summarised figures of total government construction of houses and flats, see pages 266-7 and 271-2.

*New South Wales—The Housing Commission of New South Wales.* The Housing Commission of New South Wales was constituted in 1942, with a full-time salaried chairman and four other members remunerated by fees. The principal function of the Commission is the provision of low-cost housing for rental or sale to persons in the lower or moderate income groups. The Commission is also empowered to make surveys of housing conditions, recommend local government building ordinances, provide assistance to private home builders, and undertake the manufacture, purchase, and supply of building materials.

Advances from the Commonwealth have provided most of the Housing Commission's capital funds. Of the \$469,822,776 total capital funds available to the Commission from its inception to 30 June 1966, \$402,501,080 (or 85.7 per cent) came from Commonwealth advances, \$11,024,049 (2.3 per cent) from Consolidated Revenue, \$14,068,354 (3.0 per cent) from General Loans Account, \$16,978,644 (3.6 per cent) from other State funds, and \$25,250,649 (5.4 per cent) from the Commission's own funds. During the year 1965-66 the Housing Commission's income and expenditure (other than capital transactions) was—total income, \$28,335,161 (consisting of rent \$18,863,708, interest \$6,751,816, other \$2,719,637); and total expenditure \$24,840,283.

Most of the permanent dwellings provided by the Commission have been erected under the Commonwealth-State Housing Agreements. In 1965, 5,651 houses and flats, valued at \$29,846,286 were completed for the Housing Commission by private builders on contract to the Commission.

Upon request by other State Departments the Housing Commission will erect houses for employees of those Departments, e.g. Education, Agriculture, Water Conservation, etc. These Departments provide the necessary land and funds needed to finance the erection of the houses. Rentals charged are fixed by the Departments in accordance with the salaries of the officers occupying the houses. In addition, the Commission erects (with State funds) dwellings for employees of industries connected with decentralisation and development. The number of rental houses erected (other than under the Housing Agreements) is 1,612. Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units are \$2 a week for elderly single persons and \$3 a week for elderly couples, and 3,050 units had been completed at 30 June 1966.

Applicants for Commission housing may, when their priority has been reached, elect either to purchase or to rent the dwelling allocated to them. Should they decide to purchase, terms of sale provide for a minimum deposit of \$100 with repayments spread over a maximum period of forty-five years, with interest currently at the rate of 5 per cent. There is no limit on the amount of outstanding indebtedness. Further, those tenants who originally elect to rent may subsequently purchase the dwellings occupied by them on similar terms. Applicants who have established eligibility for Housing Commission accommodation may apply to have a standard type of dwelling erected on their own block of land. At 30 June 1966, 383 dwellings had been completed under this scheme. During the years 1954 and 1955 the Housing Commission completed 100 houses for sale which were sold through the Rural Bank on the basis of 10 per cent deposit with repayment of the balance over a maximum period of forty years. This scheme was limited to 100 houses.

*Victoria—Housing Commission, Victoria.* A preliminary investigation into housing conditions in Victoria was begun in July 1936, when a board for the purpose was appointed by the Government. As a result of their report the *Housing Act* 1937 was passed by Parliament and provided for the appointment of a Housing Commission of four members (reduced to three in 1954) to be the central housing authority of the State. The Housing Commission of Victoria was appointed on 1 March 1938.

The objects of the Commission as now laid down are the improvement of existing housing conditions; the provision of suitable rental housing for persons displaced by slum reclamation or living under unsatisfactory conditions, and for other eligible persons; the sale of houses to eligible persons and the making of advances to such persons to enable them to own their homes; the development of land for housing and related purposes; and the responsibility of maintaining housing standards. Since the signing of the 1945 Commonwealth-State Housing Agreement the construction of dwellings has been financed by the Commonwealth Government and Commission Funds.

At 30 June 1966 the Housing Commission had completed 1,328 dwelling units under the State Housing Scheme, and 55,362 dwelling units under Commonwealth-State Agreements. An additional 2,175 units were either under construction or let to contract at this date. Specially designed dwelling units are erected by the Commission to provide dwellings for elderly persons at rentals within their means. To 30 June 1966, 2,759 units had been completed. Under the *Aborigines Act* 1958, as amended by the *Aborigines (Houses) Act* 1959, the Aborigines Welfare Board is empowered to buy houses, or land on which to erect houses, for occupation as dwellings by Aborigines. To 30 June 1966, 104 units had been completed.

State Government Authorities, such as the Public Works Department, State Electricity Commission, Victorian Railways, State Rivers and Water Supply Commission, etc., provide, from time to time, the necessary land and finance for the erection of dwellings for employees of

those departments. Rentals charged are fixed by the Government Authorities in accordance with the salaries of officers occupying the dwellings. The dwellings erected by these State Government Authorities do not come under the control of the Victorian Housing Commission.

Prior to the end of the Second World War the Commonwealth Government and various State Governments made arrangements for the settlement of discharged soldiers on the land as part of a general scheme of rehabilitation of ex-members of the Services. In 1945 the Victorian Government completed an Agreement with the Commonwealth Government, and legislation was passed constituting the Soldier Settlement Commission. On 17 March 1962 the Rural Finance and Settlement Commission came into being, constituted by an Act passed in December 1961. Activities under the *Soldier Settlement Act* 1958 and the *Land Settlement Act* 1959, previously administered by the Soldier Settlement Commission, are now carried out by the new Commission. At 30 June 1966 a total of 3,280 houses had been erected and 30 were still under construction or approved but not yet started.

*Queensland—The Queensland Housing Commission.* The Queensland Housing Commission was established in 1945 to assist in meeting the housing shortage. It took over the operations of the State Advances Corporation which was established in 1916 to make advances to home builders under 'The State Advances Act of 1916' (State housing in Queensland originally began in 1910 under the Workers' Dwelling Board). In addition, the Commission was empowered to build houses itself, either for sale or for rental.

The Housing Commission finances its operations through two Treasury Trust Funds—the Queensland Housing Commission Fund and the Commonwealth-State Housing Fund. In addition, a Home Builders' Deposit Trust Fund is available to assist eligible persons to accumulate money to acquire land and erect a Commission dwelling thereon, or to purchase a dwelling under contract of sale conditions. Total disbursements by the Commission for the year 1965–66 amounted to \$26,969,760, representing \$7,529,516 from the Queensland Housing Commission Fund and \$19,440,244 from the Commonwealth-State Housing Fund, while the Home Builders' Deposit Fund had a balance of \$2,080 at 30 June 1966.

During 1965–66 the Commission completed 1,702 house units, bringing the total completions under all schemes since the revival of housing construction in 1944–45 to 33,246. Of this number, 19,807 houses, or 59.6 per cent, were for home ownership, and 13,439 or 40.4 per cent, were for rental.

In the field of rental housing the Commission administers and acts as the constructing authority for the Commonwealth-State Housing Agreements of 1945, 1956 and 1961. These agreements have made possible large-scale home building programmes during the post-war years, the houses so built being mainly for rental, although subsequently they may be sold.

Operating under the provisions of 'The State Housing Acts, 1945 to 1966' the Commission, through its scheme of workers' dwellings, makes advances for the construction of dwellings to eligible persons who own a suitable building site. To be eligible to qualify for any of its home-ownership schemes, a person must not own, nor must his wife or her husband own, a house in Queensland or elsewhere. The number of workers' dwellings completed during 1965–66 amounted to 317, making a total of 29,773 completions since the inception of the scheme. The Commission also has power to make advances, secured by mortgage, to firms for housing of employees. Home ownership is further assisted through the Commission's power to sell houses under contract of sale conditions. It may sell houses already erected to eligible applicants, or it will erect a dwelling to the intending purchaser's own design, on Commission land, for subsequent sale to him. Tenants of rental houses may also purchase under contract of sale conditions the houses they are occupying. Contract of sale agreements were made to purchase 549 of the Commission's houses during 1965–66. The Commission is also authorised, under 'The State Housing Acts Amendment Act of 1961', to sell freehold land, or lease vacant Crown land which has been set apart for the purposes of the State Housing Acts, to an eligible person for the erection of a dwelling, subject to the condition that within eighteen months from the date of contract he will execute a building agreement for the erection of a dwelling thereon for his occupation.

*South Australia—The South Australian Housing Trust.* The South Australian Housing Trust was constituted in 1937 under the South Australian Housing Trust Act, 1936–1937 for the purpose of providing comfortable homes for workers in regular employment on the lower ranges of income and for tenants in serious financial straits. The Housing Trust builds houses for both rental and sale, and from July 1946 to 30 June 1966, 56,333 houses were erected by the Trust in both city and country areas.

Rents charged for Trust accommodation are generally based on the overall cost of construction, and vary not only according to the size of the dwelling but also according to date of erection. As at 1 January 1967 the rents of five-roomed houses (i.e. three bedrooms) ranged from \$4.25 a week for houses of an older type to \$8.00 a week for houses then being completed. Factors taken into consideration when allotting rental houses include date of application, housing need and suitability of tenant. Persons with high incomes are asked to consider purchasing their own homes. Two- and three-storey groups of flats with weekly rental ranging from \$8.25 to \$15.50

per flat have been built in the Metropolitan Area and at Elizabeth. At 30 June 1966, 1,199 of these flats had been completed in the Metropolitan Area and 220 at Elizabeth. In 1953 the Trust began building cottage or pensioner flats for elderly people. At 30 June 1966 it had built 785 cottage flats for its own scheme and an additional 463 for, and at the expense of, charitable organisations. In 1958 the State Government instituted the rental-grant scheme for the purpose of providing houses in the country towns for people who cannot afford to pay an economic rent, and to 30 June 1966, 184 houses had been built.

Houses built under the sales scheme, which was inaugurated in 1946, are of solid or timber-frame construction. More than 28,700 have been completed in both metropolitan and country areas since the scheme began. The Trust may receive cash payment for the house and land. More usually the purchaser pays a deposit (which varies according to the type of house and locality and the purchaser's ability to pay) and raises the balance by way of mortgage. In 1956 the Trust began the erection of houses, which may be of solid or timber-frame construction or a mixture of both, for individuals on their own land. Houses are built by contract under the Trust's supervision. Prices for building and supervision of the standard five-roomed houses covered by the scheme in late 1965 ranged from \$7,400 to \$11,200. During 1962-63 the Trust commenced construction of rental-purchase houses. The aim of this scheme is to provide less expensive houses for the lower-middle income group, and it is expected that such houses will, as far as possible, replace the demand for the double-unit type rental houses. By 1 October 1966 approximately 2,426 rental-purchase houses had been built.

Upon request by State Government Departments the Trust will erect houses for purchase by those Departments for the accommodation of their employees. Rents for the houses are determined by the Public Service Board. The Trust has built 177 houses in country towns for the Department of Aboriginal Affairs. The houses are owned and managed by the Department and let by it to specially selected Aboriginal families. The aim of the scheme is to provide an opportunity for those of Aboriginal blood, who are both able and disposed to do so, to take their place in the general community.

In order to assist primary producers the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting prefabricated houses to the site. At 30 June 1966 prices for three-bedroom asbestos-cement sheeted timber houses erected on a level site within 100 miles of Adelaide ranged from \$6,800 upwards.

*Western Australia—State Housing Commission of Western Australia.* The State Housing Commission was established in January 1947, under the *State Housing Act, 1946*, to replace the Workers' Homes Board. The *State Housing Act, 1946-1964* has as its objects 'the improvement of existing housing conditions' and 'the provision of adequate and suitable housing accommodation for persons of limited means and certain other persons not adequately housed'. It provides for the erection of homes for workers, the making of advances to workers for the purchase of homes, the erection of homes for letting on a weekly rental basis, the acquisition and development of land, the clearing of slums, the erection of hostels, and the planning of community facilities. The Commission, consisting of seven members, builds houses for letting or sale and lends money for home building. The houses are built by private contract on land provided by the applicant or the Commission. The administration of the Commonwealth and State Housing Agreements and the War Service Homes Act is included in the functions of the Commission. The number of houses completed under the State Housing Act up to 30 June 1966 was: freehold, 4,839; leasehold, 3,086; assistance by second mortgage, 1,578.

Various forms of assistance have been granted by the Commission to encourage home ownership, including schemes for arranging purchase by means of loans secured by mortgage, advances made under contract of sale, advances for securing homes under leasehold conditions, second mortgage loans, and loans for the completion of partly built dwellings. Under the leasehold scheme a purchaser can convert from perpetual Crown lease or lease for a term of years to freehold conditions upon having a 10 per cent equity in the improvements and by agreeing to purchase the land at the valuation determined at the date of commencement of the lease.

Purchasers of Commission houses also gain relief from a Death Benefit Scheme at no extra cost to themselves. Under this scheme the surviving spouse and children are assisted upon the death of the family wage-earner. Maximum benefit is a reduction of liability by \$1,000 plus \$200 for each dependent child under sixteen years of age. The maximum benefit is payable when the wage-earner is under thirty-six years of age, decreasing until the wage-earner reaches sixty-five years when no benefit is payable unless there are dependent children under sixteen years of age.

The Commission also conducts certain other housing schemes and has completed or is currently engaged in other specific projects, details of which are given in previous Year Books. Included among current activities are the building and maintenance of houses for the Government Employees' Housing Authority which has taken over 154 homes built in country areas under the former Government Employees' Housing Scheme and 383 houses owned by various Departments; the construction of 100 houses to be built under the provisions of the *Laporte Industrial Factory Agreement Act, 1961-1965*; the building of up to 30 homes a year until

1969-70 as part of the Broken Hill Proprietary Company's Agreement with the State to establish an integrated steel industry; and the erection of 128 houses at Exmouth as part of the support town and for personnel employed on the United States Navy V.L.F. radio station. The third block of flats for the accommodation of elderly ladies was completed in May 1966 and the Commission plans to build a further block during 1966-67 in the Fremantle area. The Commission will also build during 1966-67 two blocks of flats for single working women to encourage the various organisations to undertake similar projects themselves. To further assist religious and charitable organisations eligible under the Commonwealth Aged Persons Homes Act, the full architectural services of the Commission, which include plans, specifications, arranging of contracts and the carrying out of supervision during construction, have been provided free of cost. Up to 30 June 1966, 609 units had been completed.

The Commission administers building society legislation and the *Housing Loan Guarantee Act, 1957-1965*, under which the Government guarantees lenders of funds to building societies and other approved financial organisations making advances to families interested in owning their own home on low deposits, and at an interest rate not exceeding 6½ per cent per annum reducible.

*Tasmania—The Housing Department.* The Housing Department was established in July 1953 as a separate identity, and is responsible for administering that portion of the *Homes Act 1935* which relates to the acquisition and development of land for housing purposes and the erection of homes for rental and ultimate sale, and the *Homes (Old Age Pensioners') Act 1940*. Housing Department construction utilises both day labour and private contractors to build houses on land developed by the Department. On-site construction is supported by the Department's factory, which incorporates joinery works, timber mill, plumbing and electrical workshops, material stores, and garage. Most of the dwellings constructed by the Department are three-bedroom timber dwellings. Roofing is usually corrugated iron. During 1965-66, 544 dwellings were completed. Construction since 1944 has comprised 9,566 dwelling units, of which 9,048 were single units (7,764 of timber), 200 were elderly persons' flatettes, 22 were maisonettes, and 296 were multi-unit flats. Of the total dwellings completed, 8,510 were three-bedroom, 849 two-bedroom and 207 one-bedroom.

Flats, maisonettes and elderly persons' homes are for rental only. Allottees of single unit dwellings are encouraged to acquire properties on purchase contract where this procedure is deemed to be for their benefit, and a majority take advantage of this opportunity. Some of these dwellings, however, are occupied on a rental basis. The rental of a newly erected three-bedroom timber house in the Hobart metropolitan area approximated \$12.40 in the June quarter of 1966. In certain necessitous cases rental rebates are allowed and the Department is reimbursed by the State Treasury. Rebates on rentals of elderly persons' flatettes are graduated according to the incomes of the occupiers. Under the current rental rebate formula a married couple whose only income is the age pension pay \$3.80, while a single person solely dependent on the pension pays \$2 a week.

Allotments are made on a no-deposit purchase contract basis with repayments over a maximum term of fifty-three years, but allottees are encouraged to pay a deposit if they are in a position to do so. Purchase contracts are sometimes surrendered to the Department. Net of surrenders, 6,267 purchase contracts had been entered into by June 1966. The sale price, excluding land, of a new three-bedroom house in the Hobart metropolitan area was approximately \$6,950 in the June quarter of 1966. Prices in the north and north-western areas were slightly lower. The weekly repayment instalment on a purchase contract is less than the weekly rent of a similar dwelling, as the latter includes a charge for maintenance, whereas a person on purchase contract is responsible for maintenance of the property.

#### Housing schemes in Commonwealth Territories

*Northern Territory.* In 1946 control of all government-owned residences in the Territory (excluding those belonging to the Defence Services or Commonwealth Railways, or attached to post offices) was vested in the Administration. The Administration provides houses for rental to officers and employees of the Commonwealth. The Northern Territory Housing Commission provides rental housing for persons of limited means who are not adequately housed and who are not officers of either the Commonwealth or the Northern Territory Public Service. The Commission was established in 1959 and operates under authority of the *Housing Ordinance 1959-1966*; to 30 June 1966 a total of 1,007 houses and flats had been completed; 713 of these are in Darwin (including 158 flats), 198 in Alice Springs, 45 in Katherine, and 51 in Tennant Creek. A further 209 houses and 24 flats were under construction.

*Australian Capital Territory.* The Commonwealth Government provides houses and flats for rental to persons employed in the Australian Capital Territory. At 30 June 1966 the Department of the Interior controlled 7,114 houses and 2,018 flats for rental purposes. Government rental houses may be purchased by tenants. From 1 July 1950 to 30 June 1966, 5,537 houses had been sold to tenants.

*Papua and New Guinea.* In 1960 the Administration, through the Commissioner for Housing, commenced a scheme for providing low-cost houses for rental and eventual sale where possible to indigenes, mixed race peoples and Asians. To 30 June 1966, 278 houses had been completed.

#### Summary of rental activities of government authorities

The following table shows the revenue from rental for dwellings under control of government housing authorities each year from 1961-62 to 1965-66.

#### GOVERNMENT HOUSING AUTHORITIES: REVENUE FROM RENTALS, STATES AND TERRITORIES, 1961-62 TO 1965-66 (\$'000)

Year	N.S.W.	Vic.	Qld (a)	S.A. (b)	W.A.	Tas.	N.T.	A.C.T.	Aust.

1965-66 ..	47,407	33,995	13,439	27,632	16,639	3,283	2,398	9,073	153,866

(a) Excludes tenants of 'aged units'. (b) Excludes tenanted temporary dwellings. (c) Excludes temporary and emergency dwellings. (d) Number of occupied dwellings at 30 June.

#### Advances to home purchasers

Many prospective home purchasers wish to borrow for the purpose of constructing or purchasing their own homes. Usually the loan is covered by way of mortgage of the home to be constructed or bought. Such loans are provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments. The information in this section concerns the direct loans made to home purchasers by the more important institutional lenders. Loans to institutions which in turn lend moneys to home purchasers and loans to contract builders, etc., are excluded as far as possible. The loans may be for the construction of new dwellings, the purchase of existing dwellings, for additions, renovations, etc., as first or subsequent mortgages, overdrafts and so on. While figures of all loans to home purchasers are not available, the institutions mentioned account for a significant proportion of total loans. Details of the terms and conditions of lending are given, together with available information on the number and value of loans made.

#### State authorities and agencies

##### *New South Wales*

*Rural Bank of New South Wales—Sale of Homes Agency.* A Sale of Homes Agency was established in 1954 within the Rural Bank's Government Agency Department to arrange for the sale on terms of houses erected by the Housing Commission of New South Wales. The Agency's operations began with the sale to selected purchasers of 100 houses made available by the Commission during 1954-55 and 1955-56. The sales were made on the basis of 10 per cent deposit and repayment of the balance over a maximum period of forty years, with interest at 4½ per cent per annum. Total advances under that scheme amounted to \$646,648; at 30 June 1966 the advances outstanding amounted to \$403,796 in respect of 85 houses.

Since 1956 the Sale of Homes Agency has acted as the agent of the Housing Commission in arranging the sale on terms of houses erected under the 1956 and 1961 Commonwealth-State Housing Agreements. These houses are sold, in general at the Bank's valuation, to persons who have satisfied the Commission as to their housing needs and have registered as prospective purchasers. The terms of sale provide for a minimum deposit of \$100 and repayment of the balance over a maximum period of forty-five years, with interest rates, since the inception of the scheme, ranging from 4½ to 5½ per cent per annum. The cash deposits and periodical instalments payable by purchasers are collected by the Agency as agent for the Commission. Particulars of the advances made by the Agency in connection with the sale of houses erected under the 1956 and 1961 Agreements are given in the following table.

**RURAL BANK OF NEW SOUTH WALES—SALE OF HOMES  
AGENCY: ADVANCES FOR HOMES SOLD UNDER THE 1956  
COMMONWEALTH—STATE HOUSING AGREEMENT, TO  
1965-66**

Year	Advances during year		Advances outstanding at end of year(a)	
	Number of houses	Amount	Number of houses	Amount
		\$'000		\$'000
1956-57 . . .	1,604	10,158	1,604	9,952
1957-58 . . .	3,012	19,966	4,612	29,430
1958-59 . . .	2,013	12,652	6,623	41,616
1959-60 . . .	2,227	14,400	8,831	55,384
1960-61 . . .	1,565	10,436	10,364	64,974
1961-62 . . .	1,826	13,074	12,129	77,016

1964-65 . . .	1,777	14,356	16,042	105,648
1965-66 . . .	1,486	12,197	17,126	114,154

(a) Comprises principal outstanding and loan charges due but not paid.

*Rural Bank of New South Wales—other loans.* The Rural Bank of New South Wales provides assistance to individuals for the erection or purchase of homes and for other approved purposes associated with homes. Advances are based on the bank's official valuation of the dwelling. The rate of interest on long-term loans for housing purposes is 5½ per cent per annum.

**RURAL BANK OF NEW SOUTH WALES: ADVANCES FOR  
HOMES, 1956-57 TO 1965-66**

Year	Advances during year(a)		Advances outstanding at end of year(b)	
	Number of dwellings	Amount	Number of dwellings	Amount
		\$'000		\$'000

(a) The number of advances during a year represents the number of dwellings in respect of which an advance was first made in the year, but the amount of advances includes subsequent advances made in respect of the dwellings. (b) The number of advances outstanding at the end of a year represents the number of dwellings on which a debt was still outstanding. The amounts shown comprise principal outstanding and loan charges due but not paid.

*Victoria*

*Housing Commission, Victoria.* Very few houses were sold by the Commission until 1954. The amendments to the Commonwealth-State Housing Agreement in 1955-56 have had the effect of substantially increasing the number of houses sold. Whereas between 1949 and 1954 only about 100 houses were sold, a total of 22,105 houses were sold on terms to 30 June 1966, the total value of terms sales exceeding \$172 million. Until 1964-65 houses were sold on a minimum deposit of \$200, but during that year provision was made to sell without deposit in very special circumstances. The maximum repayment term is forty-five years with interest currently at 4½ per cent.

An inducement to tenants of the Commission to purchase their homes was the introduction of a Death Benefit Scheme, to provide for the property under purchase to pass to the estate of the purchaser free of debt in the event of his death prior to completion of purchase. If application is made for admittance to the Death Benefit Scheme, the maximum period for repayment is reduced to thirty years, the rate of interest is fixed at 5½ per cent and the contract must terminate before the purchaser's seventieth birthday.

*Home Finance Trust.* In 1956 a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants. Except in special circumstances, no loan will be granted if the borrower or spouse already owns a house in Victoria at the date of the proposed mortgage.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed ninety-five per cent of the value of the security (house and land) and are not made if the value of the security exceeds \$10,600. The house must not have been erected more than two years before the date of the mortgage. Repayment of loans may be made over a maximum period of thirty years, with interest charges determined by the Trust. At 30 June 1966, 3,078 loans totalling \$18,907,726 were outstanding.

In 1963 the Trust was empowered to make housing loans on the security of second mortgages subject to conditions similar to those applying to the first mortgage loans, except that the maximum term for repayment of a loan is ten years and no restriction is placed on the percentage of loan to valuation. At 30 June 1966, 1,373 second mortgage loans were outstanding, the amount involved being \$1,310,130. The Trust was also empowered to make a loan to the trustees of a fund established to provide a home for a doctor or a dentist at a place located more than thirty miles from the City of Melbourne. There is no valuation limit or age limit of the dwelling in cases of this nature.

(See Savings Banks, page 293, for activities of the State Savings Bank of Victoria.)

*Queensland*

*Queensland Housing Commission.* The present maximum advance allowable under the Acts is \$8,000 for a timber, brick veneer, brick, or concrete building. The rate of interest charged on new advances in 1965-66 was 5½ per cent per annum. Repayment may be made at the option of the borrower over either a thirty year or a forty-five year period. A borrower or purchaser who elects to repay over a thirty year period, who is under forty years of age, and who has passed a prescribed medical examination, is entitled to free life insurance cover to an amount sufficient to liquidate his indebtedness to the Commission in the event of his death before his loan has been fully repaid, provided that the maximum benefit payable under such insurance cover does not exceed \$4,500.

*Workers' dwellings.* From 4 October 1962 the maximum advance under this scheme was increased to \$7,000 for all types of workers' dwellings. This was increased to \$8,000 from 2 June 1966. Total advances made for dwellings since operations commenced in 1910 to 30 June 1965 amounted to \$62,679,089.

*South Australia*

*South Australian Housing Trust Sales Scheme.* A minimum deposit of \$100 is required for houses under the Rental-Purchase Scheme for a loan, repayable at an interest rate of 4½ per cent per annum over a period not exceeding forty years. Prospective purchasers of Housing Trust houses (other than rental-purchase houses) can arrange or have arrangements made for a first mortgage to be granted by a lending institution of their choice. In cases where the deposit and the first mortgage so raised are insufficient, the Trust may advance the balance of the house price by way of a second mortgage, the repayment term of which is a maximum of thirty years, interest being at the rate of 6 per cent per annum. During 1965-66 the Trust commenced 952 second mortgages valued at \$1,014,000. At 30 June 1966 second mortgages totalled 8,388, and the balance outstanding at that date was \$8,900,000.

*State Bank of South Australia.* The State Bank, together with the Housing Trust, is the principal agent of the State Government for the distribution through the Home Builders' Fund of moneys received under the Commonwealth-State Housing Agreement. During 1965-66

the Bank opened 1,744 new accounts worth \$11,661,311 in the Home Builders' Fund. The balance of loans in this Fund outstanding at 30 June 1966 totalled \$55,285,620. In addition, during 1965-66, \$687,424 was advanced to the public under the Advances for Homes Act, 1928-1958 which is administered by the Bank on behalf of the State Government. Under this Act 123 new accounts were opened during 1965-66, leaving a balance outstanding at 30 June 1966 of \$26,712,650. The present maximum housing loan under either of these schemes is \$7,000, repayable over a period not exceeding fifty years at a rate of interest of 5½ to 6 per cent per annum calculated on monthly balances. Persons who have received benefit under either of these schemes are ineligible for another mortgage.

#### *Western Australia*

*State Housing Commission of Western Australia.* Under the State Housing Act and the Commonwealth-State Housing Agreement the maximum loan is \$6,000 by way of mortgage, while under contract of sale the maximum is \$5,800 on the building plus the value of the land in the Metropolitan Area, and greater amounts in rural areas, depending on the circumstances. For houses built north of the twenty-sixth parallel the Minister may approve of a larger advance.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent is required, but under contract of sale the deposit may be as low as \$200 including the ingoing fees or less when circumstances warrant. The interest rate on all advances is 5½ per cent per annum and the repayment period is forty-five years. The income eligibility figure varies according to the movement of the basic wage, and as at the basic wage adjustment on 2 May 1966 an applicant in the Metropolitan Area cannot have an income exceeding \$2,600 a year, plus \$50 for each dependent child under sixteen years of age. For the country the corresponding amount is \$3,115 per annum plus \$50 for each dependent child under sixteen years, and north of the twenty-sixth parallel the Minister may allow families with an income of up to \$4,181 to be given financial assistance. Purchases under both the State Housing Act and Commonwealth-State Housing Agreements are covered by a free Death Benefit Scheme whereby in the event of the death of the bread winner the outstanding debt is reduced by an amount of up to \$1,000 (the amount of the reduction depends on the age at date of death) plus \$200 for each dependent child under sixteen years of age. A second-mortgage scheme exists under the State Housing Act which provides that assistance be limited to those applicants who are building or purchasing new homes, the cost of which, excluding land, does not exceed \$7,000. The Commission limits the second mortgage to a maximum of \$2,000.

(See Savings Banks, page 294, for activities of the Savings Bank Division of the Rural and Industries Bank of Western Australia.)

#### *Tasmania*

*Housing Department.* The interest rate on purchase contract loans from the Housing Department signed after 1 May 1965 was 4½ per cent, immediately prior to which the rate was 4 per cent. To be eligible for a house on purchase contract terms, an applicant must be married or about to be married, or have dependants for whom it is necessary to provide a home. Number of dependants, income, and existing accommodation are considered in determining applicants' priority. The number of loans outstanding at 30 June 1966 was 5,781, and the amount outstanding \$37,452,000.

*Agricultural Bank of Tasmania.* The Agricultural Bank, as an approved institution under the Commonwealth-State Housing Agreement, receives part of those funds allocated for advances to home builders. Prior to the commencement of the agreement, the Bank borrowed from the State Loan Fund and from private institutions. To be eligible for a loan, an applicant must be married or about to be married and be over the age of twenty-one, and when, as is usual, the advance is required to build a house, the applicant must own a block of land. The maximum amount of an advance to an applicant is \$8,000 for all types of houses in certain areas, provided that the total advance does not exceed ninety per cent of the Bank's valuation of land and dwelling. Advances to borrowers are repayable by equated instalments over forty years. Advances made as from 1 July 1965 were at an interest rate of 5½ per cent, immediately prior to which the rate was 5½ per cent.

During 1965-66, 214 advances were approved, valued at \$1,480,000. Since November 1945 a total of 3,177 loans amounting to \$18,394,000 have been approved, of which 2,759 have been for erection of dwellings and 418 for the purchase of existing homes. Total advances outstanding at 30 June 1966 amounted to \$14,106,000. These figures exclude advances to building societies.

#### **Commonwealth authorities and Territories**

##### *Department of Housing*

In December 1963 the Department of Housing was created and to it were transferred the functions and staff of the War Service Homes Division and the Housing and Building Industry Branch of the Department of National Development. Further details relating to the Department of Housing may be found on page 83 of Year Book No. 50.

*War service homes*

The maximum amount of loan or advance which may be granted under the *War Service Homes Act* 1918-1966 is \$7,000. The period of repayment may be up to forty-five years. In the case of a widow or widowed mother of an Australian ex-serviceman, the period may be extended to a maximum of fifty years.

The following table gives details of advances under the War Service Homes Act in each State and Territory of Australia, and the Territories of Papua, New Guinea and Norfolk Island, for the years 1956-57 to 1965-66. (See tables on pages 280-1 for the number of homes provided.)

(a) Includes Norfolk Island. (b) Includes Territory of Papua and New Guinea. (c) Included in South Australia. (d) Included in New South Wales.

*Northern Territory*

*Loans Scheme.* This scheme was commenced in 1953 and is administered by the Home Finance Trustee under the *Housing Loans Ordinance* 1949-1966. Advances may be made for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. Loans are provided on a deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the Commissioner's valuation up to a maximum of \$7,000. The rate of interest charged is 6 per cent per annum reducible to 5 per cent per annum if instalment payments are made by the due date. The maximum period of repayment is forty-five years. Up to 30 June 1966, 1,137 loans totalling \$6,340,440 had been approved. These were for: erection, 723; purchase, 320; enlargement or completion, 43; discharge of mortgage, 51.

*Sales Scheme.* Tenants of government-owned houses under the control of the Administration may purchase the dwellings they occupy, either for cash or on terms requiring a minimum deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the purchase price with repayments over a maximum period of forty-five years including interest at  $4\frac{1}{2}$  per cent per annum.

*Housing Commission Sales Scheme.* Since the November 1963 amendment of the *Housing Ordinance* 1959–1966 the Housing Commission has been permitted to sell its houses to tenants in occupation. The terms require a minimum cash deposit of \$200 and repayment of the remainder of the loan over a period not exceeding forty-five years; there is no prescribed limit to the amount of the loan and the rate of interest is to be fixed by the Commission from time to time.

#### *Australian Capital Territory*

Loans may be granted by the Commissioner for Housing to enable persons to purchase or build a new house in the Australian Capital Territory. Where the Commissioner's valuation does not exceed \$4,000, the maximum loan may not exceed ninety-five per cent of the valuation. If the Commissioner's valuation exceeds \$4,000, the maximum loan is ninety-five per cent of the first \$4,000 and ninety per cent of the balance (but in no case can the amount lent exceed \$7,000). Repayment may be made over a maximum period of forty-five years. The current rate of interest is  $5\frac{1}{2}$  per cent per annum with a concession of 1 per cent for payments made on or before the due date. At 30 June 1966, 3,539 houses were under mortgage to the Commissioner.

Government rental houses may be purchased by tenants. The basis of the sale is a minimum deposit of 5 per cent of the purchase price fixed by the Department of the Interior with no limit to the amount which may be held on mortgage from the Department. Repayment of the amount covered by mortgage may be made over a maximum period of forty-five years. The interest rate is  $5\frac{1}{2}$  per cent per annum with a concession of 1 per cent for payments made on or before the due date. To 30 June 1966, 5,537 houses had been sold to tenants.

#### *Papua and New Guinea*

Under authority of the *Housing Loans Ordinance* 1953–1963 the Commissioner for Housing may make advances to any member of the community for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. The maximum loan is \$7,000. The maximum period of repayment is twenty-five years. Minimum cash deposit is 5 per cent of the first \$4,000 plus 10 per cent of the remainder of the Commissioner's valuation. The effective rate of interest is 5 per cent per annum. Up to 30 June 1966, 340 loans totalling \$1,770,510 had been approved.

#### *Savings banks*

All savings banks lend funds for housing to both individuals and building societies. Separate figures of loans to individuals are not available for all savings banks. The amounts outstanding on housing loans of all savings banks (including loans to building societies) were \$998 million, \$1,186 million and \$1,359 million at the end of June 1964, 1965 and 1966 respectively. Some details in respect of three savings banks are shown below.

*State Savings Bank of Victoria.* The Bank grants long-term loans to depositors to enable them to build, purchase or improve homes. These loans are granted by both the Cr dit Foncier and Savings Bank Departments.

The maximum proportion of valuation to be granted as Cr dit Foncier loan is eighty per cent and the maximum loan is \$7,000. Interest is 5 per cent and the term of the loan is ten years, subject to renewal. The maximum proportion of valuation granted as Savings Bank Department loan is seventy-five per cent and the maximum loan is \$10,000. The interest rate is  $5\frac{1}{2}$  per cent if the property is occupied by the borrower and  $6\frac{1}{2}$  per cent in other cases. The term of the loan is three years, subject to renewal. During the year 1965–66 the Bank advanced \$53,045,536 to 9,288 borrowers in addition to \$698,439 to Co-operative Housing Societies and \$200,000 to the Home Finance Trust. At 30 June 1966 the total debt of 56,795 individual borrowers was \$261,884,846 while indebtedness of Co-operative Housing Societies and the Home Finance Trust amounted to \$17,647,467 and \$8,668,074 respectively.

*Savings Bank of South Australia.* The Bank grants mortgage loans for the building or purchase of houses for personal occupation, the maximum loan available being \$8,000 for all types of homes. Normally advances are made up to 85 per cent of the Bank's valuation but, if the loan is granted under the Homes Act, 1941–1962, 95 per cent of such valuation may be advanced (maximum loan, \$6,000). The maximum loan period is thirty years at a rate of interest of  $5\frac{1}{2}$  per cent per annum: this rate is subject to review after five years. During 1965–66 the Bank advanced \$17,266,781 by way of housing loans, the number of new loans totalling 2,507. At 30 June 1966 there were 23,266 loans current with a balance outstanding of \$103,330,000.

*Rural and Industries Bank of Western Australia (Savings Bank Division).* The Rural and Industries Bank of Western Australia is authorised by the *Rural and Industries Bank Act, 1944-1958* to make loans from moneys on deposit with its Savings Bank Division to a person or body for the purchase or erection of a dwelling. It is the policy of the Bank to provide funds for housing primarily for occupancy by the borrower. There is no fixed limit on the amount of a loan. The average loan in the case of a brick or timber house is \$7,000. The rate of interest varies with the current bank rate and is usually  $\frac{1}{2}$  per cent lower. The rate at 30 June 1966 was  $5\frac{1}{2}$  per cent. The average term of housing loans is twenty-two years.

#### Trading banks

Apart from loans by certain State banks as Government agencies (see pp. 288-91) advances for housing to individuals are also provided by the trading banks. Amounts outstanding in respect of advances to individuals for housing purposes made by the major trading banks were \$230 million on the second Wednesday of July 1966 (see the chapter Private Finance for further details).

#### Life insurance companies

The life insurance companies are another source of funds for housing. Details of new loans made during 1963, 1964, 1965 and 1966 (statistics for years prior to 1963 are not available) are given in the following table.

#### LIFE INSURANCE COMPANIES: HOUSING LOANS PAID OVER, STATES AND TERRITORIES, 1963 TO 1966

State or Territory	Amount (\$'000)			
	1963	1964	1965	1966
New South Wales . . . . .	20,572	21,082	24,176	23,536
Victoria . . . . .	13,152	16,176	18,642	16,492
Queensland(a) . . . . .	3,430	4,480	5,753	5,299
South Australia(b) . . . . .	3,368	3,744	5,108	4,347

Australian Capital Territory . . . . .	340	594	869	874
<b>Total . . . . .</b>	<b>44,542</b>	<b>50,586</b>	<b>59,873</b>	<b>55,672</b>

(a) Includes loans made in Papua and New Guinea.

(b) Includes loans made in Northern Territory.

Amounts outstanding at the end of June 1964, 1965 and 1966 in respect of housing loans made by insurance companies were \$323 million, \$339 million and \$356 million respectively.

#### Registered building societies

There are 3,443 registered building societies in Australia, of which 122 are permanent societies and the remainder terminating societies. The permanent societies are in the main investment societies which make loans for housing purposes, usually on *crédit foncier* terms, and obtain their funds from share capital deposits and borrowings from banks and other lending institutions. The terminating societies are co-operative societies which make loans to members from funds obtained from lending institutions (usually government guaranteed), members' subscriptions, and, since 1956, from moneys provided under the Commonwealth-State Housing Agreements. Details of new loans granted and net advances outstanding for each of the years ended June 1960 to 1965 are given in the following table (see also the chapter Private Finance).

## REGISTERED BUILDING SOCIETIES, STATES, 1960-61 TO 1964-65

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Total
LOANS GRANTED DURING YEAR (\$'000)							
1960-61 . .	47,404	(a) 9,274	10,836	2,424	5,726	2,620	(a) 78,284
1961-62 . .	48,738	28,856	12,646	2,246	6,346	2,988	101,820
1962-63 . .	53,446	29,842	13,164	2,834	8,904	4,048	112,238
1963-64 . .	72,284	30,878	13,184	3,102	11,700	6,000	137,148
1964-65 . .	82,329	37,007	16,550	3,819	13,477	6,728	159,910

## NET ADVANCES OUTSTANDING(b) AT END OF YEAR (\$'000)

1960-61 . .	269,780	165,424	33,488	9,994	20,506	10,636	509,828
1961-62 . .	292,898	175,160	41,272	11,114	25,158	12,210	557,812
1962-63 . .	317,222	189,466	48,776	12,532	31,240	14,466	613,702
1963-64 . .	351,840	199,702	55,542	13,966	39,168	17,800	678,018
1964-65 . .	393,344	214,288	64,449	15,790	47,836	21,413	757,121

(a) Excludes Victorian co-operative housing societies.

(b) Net of borrowing members' funds.

## Other lenders

Little information is available on advances made by other lenders such as superannuation and other trust funds, private finance and investment companies, etc. In South Australia advances on first mortgage made by the South Australian Superannuation Fund are granted under the Homes Act, 1941-1962, by which the State Government guarantees up to 25 per cent of the value of the mortgage, thus raising the limit of the advance. Loans so made are limited to 95 per cent of the Superannuation Board's valuation to a maximum of \$6,000, or 85 per cent of the Board's valuation to a maximum of \$7,000. The rate of interest is 6 per cent per annum, calculated on quarterly balances, reducing to 5½ per cent when payments are made within a prescribed period of twenty-one days from the end of the quarter. The term of the mortgage may run for thirty years on a stone or brick home or twenty years on a timber-framed construction. Trustee mortgages may be granted as an alternative to the foregoing. A maximum of 70 per cent of the Board's valuation may be granted for a trustee mortgage, other conditions being those applicable to mortgages granted under the Homes Act. At 30 June 1966 there were 5,442 loans current, the principal outstanding totalling \$22,028,237. During 1965-66 the value of advances made was \$3,742,272.

## CHAPTER 11

### LABOUR, WAGES AND PRICES

For particulars of the Farm Production Price Index, see the chapter Miscellaneous. For current information on the subjects dealt with in this chapter, see the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the *Quarterly Summary of Australian Statistics*, also the mimeographed statements *Wage Rates and Earnings*, *Consumer Price Index*, *Wholesale Price (Basic Materials and Foodstuffs) Index*, *Wholesale Prices—Price Index of Electrical Installation Materials*, and *Export Price Index*. For further information on these subjects, except the Export Price Index, see the *Labour Report* issued by this Bureau.

#### RETAIL PRICES AND PRICE INDEXES

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 have been collected by the Commonwealth Statistician, and in some cases were recorded by the Statisticians of various States for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923 and comparable information was ascertained for the month of November in each year from 1914 to 1922. The range of items for which retail prices data are obtained was considerably expanded in 1948 and in later years. Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. Previous retail price indexes for Australia are briefly described below. The current retail price index, entitled the Consumer Price Index, was published for the first time in August 1960. It was compiled retrospectively to 1948–49. A description of the Consumer Price Index is given on pages 298–9.

#### Previous retail price indexes

Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) *The 'A' Series Index* (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June 1938.
- (ii) *The 'B' Series Index* (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December quarter 1953. It was the food and rent constituent of the 'C' Series Index and was designed to replace the 'A' Series Index for general statistical purposes.
- (iii) *The 'C' Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter 1960. For certain transitional purposes a 'C' Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter 1960 in proportion to movements shown by the Consumer Price Index.
- (iv) *The 'D' Series Index*, derived by combining the 'A' and 'C' Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May 1933 to May 1934 and then discontinued.
- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952–53 as base = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter 1960.

An index of retail price movements from 1901 to 1966 is shown on page 303 of this Year Book. It is derived by linking together successive indexes (the 'A' Series, the 'C' Series and the Consumer Price Index) available for that period.

In 1937 the Commonwealth Court of Conciliation and Arbitration introduced a 'Court' Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court the 'Court' Index ceased to be issued by the Industrial Registrar as at December quarter 1953. These 'Court' Index numbers were an arithmetical conversion of the 'C' Series Retail Price Index.

### Consumer Price Index

This retail price index was first compiled in 1960, retrospectively to September quarter 1948. A full description of the index is given in *Labour Report* No. 52, 1965 and 1966.

#### Origin

The list of component items and the weighting pattern of the 'C' Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936, but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this, and the circumstances which led to the present Consumer Price Index, appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948 action was taken by the Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the 'C' Series Retail Price Index in the light of the new pattern of wage-earner expenditure and consumption that appeared to be emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and in the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing 'C' Series Retail Price Index on the 1936 revision.

A Conference of Statisticians considered the matter in June 1953, and resolved (in part) as follows:

- '(a) that, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period it is undesirable to make a general revision of the list of items and weighting system of the 'C' Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes;
- '(b) that an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure.'

The 'C' Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index was introduced in 1954 and continued until March quarter 1960.

The Interim Index was a transitional index designed to measure retail price variations on the 'C' Series model in terms of post-war consumption weights as emerging in the early 1950's. It embraced a wider range of commodities and services than did the 'C' Series Retail Price Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index concurrently with their happening. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period home-owning largely replaced house-renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these (and other) changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together, they rendered nugatory the attempt to meet the situation by devising a single Interim Retail Price Index. As studies progressed and new data became available, it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

#### **Purpose, scope and composition**

The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditures of an 'average' or individual household of specified size, type, or mode of living. In this way it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Consumer (retail) price indexes are sometimes loosely called 'cost of living indexes' and are thought to measure changes in the 'cost of living'. Neither the Consumer Price Index, nor any other retail price index, measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes, but the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following five major groups:

- Food;
- Clothing and Drapery;
- Housing;
- Household Supplies and Equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

#### **Structure—a chain of linked indexes**

Substantial changes have occurred in consumer usage and patterns of expenditure since the 1939–45 War. In order to keep the weighting pattern representative of current expenditures it has been necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. For the six State capital cities five series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, from the March quarter of 1960 to the December quarter of 1963, and from the December quarter of 1963 onwards) have therefore been constructed and linked to form a continuous retail price index series known as the Consumer Price Index. (For information regarding these links for Canberra see *Labour Report* No. 52, 1965 and 1966.)

During each period between links the items and weighting remained unchanged. At times of linking the weighting pattern was altered and new items (mainly ones that had become significant in household expenditure) were introduced. Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

### Tabular statements of Retail Price Index numbers

#### Consumer Price Index

The index has been compiled for each quarter from September quarter 1948, and for each year from 1948-49. 'All Groups' index numbers and 'Group' index numbers for each of the five major groups are compiled and published regularly for the six State capital cities separately and combined, and for Canberra. The reference base for each of these indexes is: year 1952-53 = 100.0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

Index numbers for each quarter are first issued in mimeographed statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on significant price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

The following table shows Consumer Price Index Numbers (Total All Groups) for the six State capital cities separately and combined and for Canberra, for periods from the year 1949-50.

#### CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1949-50 TO 1965-66 AND QUARTERS MARCH 1964 TO DECEMBER 1966

(Base of each index: year 1952-53 = 100.0) (a)

The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

Period	State Capital Cities—separately and combined							Canberra
	Six State Capital Cities(b)	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart

1965—March .	133.1	115.8	165.3	112.5	137.3	130.9
June . .	135.9	116.3	167.2	112.9	137.3	132.1
September .	139.3	116.3	168.6	113.4	137.8	133.5
December .	139.5	116.6	171.4	113.7	142.7	135.2
1966—March .	138.4	116.9	172.4	113.7	144.7	135.4
June . .	139.8	118.0	175.3	114.5	144.8	136.5
September .	139.7	118.2	176.6	114.7	146.9	137.1
December .	140.7	119.3	178.4	115.1	148.9	138.4

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

The following table shows Consumer Price Index Group Index numbers for each State capital city and for Canberra for recent years and quarters.

**CONSUMER PRICE INDEX: GROUP INDEX NUMBERS**  
**SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1948-49 TO 1965-66**  
**AND QUARTERS MARCH TO DECEMBER 1966**

*(Base of each index: year 1952-53 = 100.0) (a)*

The index numbers hereunder are designed to measure movements in retail prices of specified groups of items for specified cities individually. They measure variations from time to time and not differences in price level as between cities.

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.  
 (b) Weighted average.

**Retail Price Index Numbers, 1901 to 1966**

The index numbers shown below are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are: from 1901 to 1914, the 'A' Series Retail Price Index; from 1914 to 1946-47, the 'C' Series Retail Price Index; from 1946-47 to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and 'C' Series Index excluding Rent; and from 1948-49 onwards, the Consumer Price Index.

**RETAIL PRICE INDEX NUMBERS, 1901 TO 1966**

(a) Consumer Price Index converted to base 1958 = 100 by Commonwealth Statistician. (b) Beginning 1963, new index—base: 1962 = 100. Before 1963, index for Paris. (c) Base. Average of March-December, 1958 = 100. (d) Index for Europeans only. (e) Beginning October 1966, new index—base: 1966 = 100.

NOTE. Symbol - on each side of an index number (e.g., -95-) indicates that two series have been linked during that period. Symbol — between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

## WHOLESALE PRICES AND PRICE INDEXES

Two indexes of wholesale prices of basic materials have been compiled by the Commonwealth Bureau of Census and Statistics. These are:

- (i) The Melbourne Wholesale Price Index;
- (ii) The Wholesale Price (Basic Materials and Foodstuffs) Index.

A special purpose index 'Wholesale Price Index of Electrical Installation Materials' is also published by the Bureau (see page 306). Work is proceeding on the preparation of new series of wholesale price index numbers.

A brief note on the Melbourne Wholesale Price Index, which is now obsolete, is given on page 306. After reviewing the list of items and weighting of the Melbourne Wholesale Price Index, the 1930 Conference of Statisticians resolved that a new index of wholesale prices of basic materials and foodstuffs should be compiled. This index, the Wholesale Price (Basic Materials and Foodstuffs) Index, is compiled monthly and extends back to 1928.

## Wholesale Price (Basic Materials and Foodstuffs) Index

### Price quotations

The prices used in the index have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of the selected items in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and in respect of imported materials as nearly as may be at the point where they first make effective impact on the local price structure. Thus the prices of imported goods are not taken at the time of import, but rather on an ex-bond (or into factory) basis. Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950-51 wool for local manufacture was subsidised, and the home-consumption price for wool was used to calculate the index numbers shown in the table on pages 305-6.

### Commodities and grouping

For purposes of this index, 'basic' materials (as opposed to certain of the foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The list of items is divided into seven main groups, each of which is sub-divided into goods which are mainly imported and goods which are mainly home-produced. The percentage of the total aggregate in 1965-66 contributed by each group was as follows: metals and coal, 16.09; oils, fats and waxes, 7.68; textiles, 3.03; chemicals, 3.56; rubber and hides, 1.66; building materials, 11.66; foodstuffs and tobacco, 56.32. Goods principally imported comprised 22.31 per cent of the total aggregate in 1965-66, and goods principally home-produced 77.69. A full list of the commodities and the quantity-multipliers (weights) is published in *Labour Report* No. 51, 1964, page 42.

### Method of construction

The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928-29 to 1934-35 inclusive. Changes in usage, changes of category as between 'imported' and 'home-produced' for some commodities, and changes in the industrial structure have affected the validity of some of the weights in the index.

### Index numbers

Index numbers for each group of commodities, and for all groups combined, for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index numbers on the base: average of three years ended June 1939 = 100 are published monthly in the mimeographed statement *Wholesale Price (Basic Materials and Foodstuffs) Index* and in the *Monthly Review of Business Statistics*. A table showing index numbers computed to the base: 1928 = 100 is published in the *Labour Report*.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS YEARS 1928-29 TO 1965-66 AND MONTHS 1966-67

(Base of each index: average of 3 years ended June 1939 = 100)

(a) Excludes potatoes and onions from 1936-37. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports.

## Melbourne Wholesale Price Index

An index of Melbourne wholesale prices was first compiled in 1912. It related chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that year. Neither the list of items nor the weighting was varied, except for some changes in the building materials group in 1949. The series has some historical significance as a measure of changes, since the year 1861, in the prices of its component items combined in the proportions in which they were in common use about the year 1910. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-5. Index numbers up to the year 1961, the last period for which the index was compiled, were published in Year Book No. 48, 1962.

## Wholesale Price Index of Electrical Installation Materials

This special purpose index was introduced in 1964 and index numbers have been published at quarterly intervals from August 1959 onwards. In addition to its use in connection with the Bureau's constant price estimates in the national accounting field, the index has a direct value as a measure of changes in aggregate cost of materials used in an important part of the building industry (other than house-building).

# WHOLESALE PRICE INDEX OF ELECTRICAL INSTALLATION MATERIALS 307

## Commodities and grouping

The items in this index have been selected as representative of materials used in electrical installation in structures such as hospitals, schools, factories and multi-storied commercial buildings and flats. These items are divided into three main groups for which separate indexes are compiled in addition to the All Groups index. The combination of materials selected is fixed as to quantity and quality. A list of the components of the index is set out below with the percentage contribution of each to the All Groups index in the reference base year 1959-60.

## Price quotations

The items are priced as at the middle of the month for which index numbers are published. The basis of pricing is the price to electrical contractors, delivered on site or into store, metropolitan area Sydney or Melbourne. The price series used relate to specific standards for each item and in some cases are combinations of prices for different makes, types, etc. The units of quantity specified as the basis for collecting prices are representative lots normally purchased by electrical contractors, inclusive of quantity discounts and packing and quantity extras, etc.

## Method of construction

The index is a fixed-weights index with the reference base: year 1959-60 = 100. In general, the weights were derived from information relating to the values of materials used in selected representative projects in Sydney and Melbourne during the three years 1960-61 to 1962-63. The projects selected for this purpose had a minimum electrical materials and labour content of \$10,000. Selected representative items carry the weights of similar items not directly priced. The index is compiled by the method known as the weighted average of price relatives. Each quarter, base period percentage value weights are applied to indexes of price movement relative to 1959-60.

## WHOLESALE PRICE INDEX OF ELECTRICAL INSTALLATION MATERIALS COMPOSITION AND WEIGHTING PATTERN AS AT REFERENCE BASE YEAR 1959-60

Component		Percentage contribution to All Groups Index
1. CONDUCTORS GROUP		40.00
Mains—		
Insulated cables	14.79	
Glands	0.70	
Bare copper strand	0.50	
Copper bus-bar	3.50	19.49
Circuits—		
Insulated cables and wire	19.08	
Bare copper strand	1.43	20.51
2. CONDUIT AND ACCESSORIES GROUP		25.00
Conduit and ducting—		
Metal conduit	10.79	
Metal and plastic ducting	9.46	20.25
Accessories—		
Metal and plastic junction boxes	2.59	
Metal and plastic accessories—other	2.16	4.75
3. SWITCH-BOARD AND SWITCH-GEAR MATERIAL GROUP		35.00
Bakelite accessories—		
Mounting blocks	0.65	
Switches	1.40	
Terminal boxes	0.10	2.15
Fluorescent components and lamps—		
Fluorescent tubes and starters	1.37	
Incandescent lamps	0.58	1.95
Iron clad accessories—		
Switch plug	1.67	
Plug top	0.64	
Other accessories	1.30	3.61
Switch-board accessories' components—		
Mild steel	3.07	
Aluminium bar	0.86	
Contactors	4.90	
Circuit breakers	11.00	
Other accessories	7.46	27.29
Total.		100.00

**Index numbers**

Index numbers for each group of items and for all groups combined for the index of wholesale prices of electrical installation materials are given in the following table. Current index numbers are published quarterly in the mimeographed statement *Wholesale Prices—Price Index of Electrical Installation Materials*.

**WHOLESALE PRICE INDEX OF ELECTRICAL INSTALLATION MATERIALS  
GROUP INDEX NUMBERS, YEARS 1959-60 TO 1965-66 AND  
MAY 1961 TO FEBRUARY 1967**

February .	122.6	106.3	110.1	114.2

(a) The figures appearing after the decimal points are inserted to avoid the distortions that would sometimes occur in rounding off the figures to the nearest whole number.

**EXPORT PRICES AND PRICE INDEXES****Previous export price indexes****1901 to 1917**

An annual index of export prices has been published by the Bureau since its inception. The first index was compiled annually for the years 1901 to 1916-17. The method of computation was to select all articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the base year). The 'total value' so obtained was divided into the total recorded value of these exports for the year concerned and the result (multiplied by 1,000) was the export price index number for that year.

**1918 to 1930**

The method was changed in 1918. Weights for all principal exports were calculated, based on the average quantities of exports for the nineteen and a half years from 1 January 1897 to 30 June 1916. To these weights were applied the 'average unit export values' of each export in successive years, and a weighted aggregative index of 'price' variations was derived. This index was published for the years 1897 to 1929-30. Particulars of this index were last published in Year Book No. 24, page 147.

**1928 to 1962**

After the 1914-18 War the relative importance of different exports changed considerably, and the pattern of exports varied considerably from year to year. For these reasons two new series of monthly export price indexes—one using fixed weights and the other using changing weights—were published in 1937, compiled back to 1928. The data on which both series were based differed from those used in the previous series of annual index numbers. The most important change was the use of actual (or calculated) export prices in place of the 'unit values' declared at the Customs. Brief notes on these two indexes are given below. A full description of both indexes was last published in Year Book No. 48, 1962, pages 500-4.

*The Fixed Weights Index.* This was a weighted aggregative index of price variations. It was compiled back to 1928, with that year taken as base. In later years it was published on the base: average of three years ended June 1939 = 100. The original weights (used for the period 1928 to 1936) were the average annual exports (production in the case of gold) during the five years 1928-29 to 1932-33. From July 1936 the weights were revised and were based on average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36. This index was published from 1937 until July 1962, after which it was replaced by the current Export Price Index described below.

*The Changing Weights Index.* This index was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. In computing these index numbers the 'quantity multipliers' were the quantities actually exported (sold, in some cases) in the months (or periods) to which the index numbers related. This index was discontinued in 1962.

## **The current Export Price Index**

The current Export Price Index was first published in October 1962, but index numbers were compiled back to July 1959. The reference base of this index is: year 1959-60 = 100. This index is a fixed-weights index, and its purpose (as was that of the previous fixed-weights index) is to provide comparisons monthly, over a limited number of years, of the level of export prices of the selected items, making no allowance for variations in quantities exported. The index numbers are thus measures of price change only. The price series used in the index relate to specified standards for each commodity and in most cases are combinations of prices for a number of representative grades, types, etc. For some commodities price movements in the predominant market, or markets, are used, while for other commodities average realisations in all export markets are used. As nearly as possible, prices used are on the basis f.o.b. at the main Australian ports of export. The index is compiled by the method known as 'weighted average of price relatives'.

**Composition and weighting**

There are twenty-nine items in the current index compared with twenty items in the previous index. These twenty-nine items have constituted approximately 83 per cent of the total value of Australian exports in recent years. The weights for the current index are based on average annual values of exports during the five years 1956-57 to 1960-61.

The following table sets out a list of the items, and groups of items, in the index, together with the percentage contribution of each item and group to the All Groups index in the reference base year 1959-60. The weights used for some of the items are adjusted to cover some related commodities which are not priced directly. The most important instances of this are wool, which includes wool exported on sheepskins, and copper, zinc, lead and silver, which include the estimated metallic content of ores and concentrates exported. In the previous index the weight for gold was derived from production instead of export figures. For the period 1956-57 to 1960-61 production and exports of gold were similar, and therefore in the current index the weight for gold (as for the other items) is based on average annual exports during the period.

**EXPORT PRICE INDEX**  
**LIST OF ITEMS AND PERCENTAGE CONTRIBUTION OF ITEMS AND GROUPS**  
**ALL GROUPS INDEX IN 1959-60**

Group and item	Percentage contribution to All Groups Index in 1959-60	Group and item	Percentage contribution to All Groups Index in 1959-60
<i>Wool</i> . . . . .	50.73	Canned—Pineapples . . .	0.20

<i>Total, cereals</i> . . . . .	12.54	<i>Gold</i> . . . . .	1.99
Dried and canned fruits—		<i>Total</i> . . . . .	100.00
Dried—Sultanas . . . . .	1.06		
Currants . . . . .	0.12		

**Index numbers**

Index numbers for each of the groups and 'All Groups' are shown in the table on page 311. The yearly index numbers are simple averages of the twelve monthly index numbers in each year.

**Link between current and previous indexes**

In order to show approximate movements in export prices over a long period, the 'All Groups' indexes of the previous and current series have been linked together at the year 1959-60, the earliest year for which the new index has been compiled. The table on page 312 shows this linked series and a long-term price index for wool, which is the most important single component in the movement of the 'All Groups' index.

## EXPORT PRICE INDEX NUMBERS

**WAGES, EARNINGS AND HOURS**

**Arbitration and Wages Boards Acts and associated legislation**

Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and other conditions of employment were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report* and in issues of the Year Book prior to No. 38. A summary of the Commonwealth legislation and brief particulars of Commonwealth and State industrial tribunals are given in the following paragraphs.

**Commonwealth industrial legislation and tribunals**

Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to 'conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State'. The Parliament has made such a law, namely the *Conciliation and Arbitration Act 1904-1966*.

This Act defines an 'industrial dispute' as:

'(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act 1920-1966* or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State.'

The Conciliation and Arbitration Act was extensively amended by an Act (No. 44 of 1956) assented to on 30 June 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act, and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the *Conciliation and Arbitration Act 1904-1966* is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and five other Judges. The jurisdiction of the Court shall be exercised by not less than two Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organisation, disputes between an organisation and its members, and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than two Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court, but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers, and for inquiries to be held concerning disputed elections in organisations; and certain powers in connection therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organisation. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the *Public Service Arbitration Act 1920-1966*, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at the end of 1966 was composed of a President, five Deputy Presidents, a Senior Commissioner, ten Commissioners and three Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and to make suggestions and to do such things as appear right and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However, subject to the approval of the President, it is the duty of the Senior Commissioner to organise and allocate the work of the Commissioners and Conciliators. When an industrial dispute occurs or is likely to occur, a Commissioner shall take steps for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement and shall do so if the parties so request. If an agreement is reached a memorandum of its terms shall be made in writing, and may be certified by the Commission. A certified memorandum shall have the same effect as an award.

Only the Commission in Presidential Session, that is, the Commission constituted by at least three presidential members nominated by the President, has the power to make awards, or to certify agreements, concerning standard hours, basic wages and long-service leave. Upon application by a party to an industrial dispute, a Commissioner shall consult with the President as to whether in the public interest any matter in dispute should be dealt with by a Commission constituted by not less than three members nominated by the President, at least one of whom shall be a presidential member and one, where practicable, the Commissioner concerned. The President may direct the Commission to hear the matter in dispute; however, after consideration, the Commission may refer the matter in dispute back for determination to the Commissioner originally dealing with the dispute.

An appeal against the decision of a Commissioner shall be heard by not less than three members nominated by the President, of whom at least two shall be presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is necessary as a matter of public interest. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of a presidential bench of the Commission, so that it may have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the Conciliation and Arbitration Act or the Public Service Arbitration Act, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connection with the maritime industries, the Snowy Mountains Area and the stevedoring industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member. The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organisation or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section three of the *Public Service Arbitration Act* 1920-1966, not being the *Commonwealth Employees' Compensation Act* 1930-1964, the *Commonwealth Employees' Furlough Act* 1943-1959, the *Superannuation Act* 1922-1966 or any other prescribed Act.

The Act provides that where a State law, or an order, award, decision or determination of a State industrial authority is inconsistent with or deals with a matter dealt with in an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

For further particulars regarding Commonwealth arbitration legislation, see the annual *Labour Report*. For information concerning the Australian Stevedoring Industry Authority and the Coal Industry Tribunal see the Transport and Communication chapter and the Mineral Industry chapter respectively of this Year Book, and for further information on the Commonwealth Public Service Arbitrator see the *Labour Report*.

#### State industrial tribunals—New South Wales

The controlling authority is the Industrial Commission of New South Wales, consisting of a President and seven other Judges. Subsidiary tribunals are the Conciliation Commissioners, the Apprenticeship Commissioner, Conciliation Committees, and Apprenticeship Councils constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as Chairman and equal numbers of representatives of employers and employees. The Apprenticeship Commissioner and the members of the Conciliation Committee for an industry constitute the Apprenticeship Council for the industry. These subsidiary tribunals may make awards binding on industries, but an appeal to the Industrial Commission may be made against any award. Special Commissioners with conciliatory powers and limited arbitration powers may be appointed. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

#### Victoria

The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

#### Queensland

Legal control was first instituted in 1968 with the passing of the Wages Boards Act. 'The Industrial Conciliation and Arbitration Act of 1961' established the Industrial Conciliation and Arbitration Commission and preserved and continued in existence the Industrial Court. The Industrial Court is constituted by the President (a Judge of the Supreme Court of Queensland) sitting alone, and the Full Industrial Court by the President and two Commissioners. The Conciliation and Arbitration Commission is constituted by a Commissioner sitting alone; and the Full Bench of the Commission by at least three Commissioners. Not more than five Commissioners shall be appointed. A Commissioner shall not be capable of being a member of the Executive Council or of the Legislative Assembly, and shall not take part in the management of any business.

#### South Australia

In South Australia, from July 1966, the system of control consists of an Industrial Commission, an Industrial Court and Conciliation Committees. The Industrial Commission is composed of a President and two Commissioners, and has power to make awards. The President of the Commission is also Judge of the Industrial Court which deals with legal matters. The two

Commissioners are chairmen of each of the Conciliation Committees consisting of an equal number of representatives of employers and employees. These committees issue awards. Where complete agreement cannot be reached in these committees the chairman sits as a Commissioner to determine the unresolved matters. Provision is made for references and appeals to the full Commission.

#### Western Australia

Legal control dates back to 1900. The present system of control comprises a four-man Western Australian Industrial Commission and an Industrial Appeal Court consisting of three Supreme Court judges who are nominated by the Chief Justice of Western Australia. A Commissioner may, in relation to any dispute or other matter, refer such matters to the Commission in Court Session. Similarly, appeals from decisions of a single Commissioner are heard by the other three Commissioners acting as the Commission in Court Session, but such hearings are restricted to the evidence and matters raised in the proceedings before the single Commissioner. Up to December 1966 the Commission in Court Session fixed and adjusted the basic wage. However, in December 1966 legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates. Appeals from the Commission to the Industrial Appeal Court are limited to matters which are erroneous in law or in excess of jurisdiction. The Court has the power to impose penalties for disobedience of orders made by the Commission.

The Western Australian Coal Industry Tribunal, established under the *Mining Act 1904-1965*, has power to determine any industrial matter in the coal mining industry. It consists of a chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal and decisions of the Tribunal may be reviewed by the Court of Arbitration on the application of a party subject to the decision.

#### Tasmania

The authority consists of Wages Boards for separate industries, comprising a Chairman (who is common to all Wages Boards) appointed by the Governor, and equal numbers of representatives of employers and employees appointed by the Minister administering the Act. The system was instituted in 1910.

### Incidence of industrial awards, determinations and agreements

In May 1963 a survey was conducted to ascertain the approximate proportions of employees affected by awards, determinations and registered industrial agreements under the jurisdiction of Commonwealth and State industrial authorities. The proportions of employees not so affected by awards, etc. (including those affected by unregistered industrial agreements) were also obtained. The scope, results, etc., of this survey were published in *Labour Report* No. 51, 1964, and in a mimeographed statement (S.B. 383 of 11 February 1964).

### Rates of wage and hours of work

This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes there are fifteen industry groups for adult males and eight industry groups for adult females. For relevant periods these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April 1914 = 1,000 for females) published in Year Books before No. 46, 1960. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc., thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on page 317, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Pastoral, agricultural, etc., group and the Domestic part of the group Amusement, hotels, personal service, etc. are excluded from the current indexes because of coverage difficulties.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each month or quarter, commencing with March 1939 for adult males and March 1951 for adult females. From January 1957 particulars for adult males have been available as at the end of each month. The index for adult males includes rates and hours for 3,415 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females, the corresponding numbers are 1,100 and 515. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industry group for each State and Australia. Weighted averages of the components of the total minimum weekly wage rate, i.e. basic wage, margin and loading, were calculated separately for employees covered by Commonwealth awards, etc., and for those covered by State awards, etc. (*see* pages 318-9).

Because the indexes are designed to measure movements in prescribed minimum rates of 'wages' as distinct from 'salaries', those awards, etc. which relate solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of wage for adult males and females in the principal occupations in the capital city of each State. Further particulars of wage rates and index numbers will be found in a mimeographed statement, *Minimum Wage Rates, March 1939 to June 1965*. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

#### Weekly wage rates—adult males

The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work, and index numbers at the dates specified.

#### WEEKLY WAGE RATES: ADULT MALES, ALL GROUPS(a), STATES DECEMBER 1950 TO 1966

(a) As prescribed in awards, determinations and agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends. (c) Includes the value of keep, where supplied. (d) Excludes rural.

*Adult males—components of total wage rate.* A dissection of weighted average minimum weekly wage rates for adult males into the three components of the total minimum wage, i.e. basic wage, margin and loading, is given in the following three tables, separate particulars being shown for employees covered by awards, etc., within Commonwealth and State jurisdictions. For the purposes of the index the Commonwealth jurisdiction embraces awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission and determinations of the Commonwealth Public Service Arbitrator. State jurisdictions embrace awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

The *basic wage rates* shown herein are weighted averages of the rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also, in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases the basic wage rate actually paid is used in the tables below. For these and other reasons the weighted average basic wage rates differ, in the majority of cases, from the metropolitan basic wage rates shown in other sections of this chapter.

*Margins* are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness and other like factors.

*Loadings* are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.

For a more detailed description of this dissection of weekly wage rates into components and for tables for each State and Australia, according to jurisdiction, extending back to 1939, see the mimeographed statement *Minimum Wage Rates, March 1939 to June 1965*.

(a) As prescribed in awards, determinations and agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

## Standard hours of work

In the fixation of weekly wage rates most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on page 323. The main features of the reduction of hours to forty-four and later to forty per week are summarised on pages 321–2. In considering such changes, it must be remembered that even within individual States the authority to alter conditions of work is divided between Commonwealth and State industrial tribunals and the various legislatures, and that the State legislation usually does not apply to employees covered by awards of the Commonwealth Conciliation and Arbitration Commission. However, it may do so in respect of matters not treated in Commonwealth awards.

## The 44-hour week

No permanent reduction to a 44-hour week was effected until 1925, although temporary reductions had been achieved earlier. In 1920 the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920 the President of the Commonwealth Court of Conciliation and Arbitration (Higgins J.), after inquiry, granted a 44-hour week to the Timber Workers' Union, and in the following year he extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and re-introduced the 48-hour week in the case of the above-mentioned two unions then working forty-four hours. During 1924 the Queensland Parliament passed legislation to operate from 1 July 1925 granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4 January 1926.

In 1927, after an exhaustive inquiry, the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated individually, the nature of the industry, the problem of production, the financial status, and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland no legislation was passed to reduce the standard hours of work, so that, for employees not covered by Commonwealth awards, the change had to be effected by decisions of the appropriate industrial tribunals. In these cases the date on which the reduction to forty-four hours was implemented depended on the decision of the tribunals in particular industries, employees in some industries receiving the benefit of the reduced hours years ahead of those in others. In these States the change to the shorter week extended over the years from 1926 to 1941.

#### The 40-hour week

*Standard Hours Inquiry, 1947.* Soon after the end of the 1939-45 War applications were made to the Commonwealth Court of Conciliation and Arbitration for the introduction of a 40-hour week, and the hearing by the Court commenced in October 1945. Before the Court gave its decision the New South Wales Parliament passed legislation granting a 40-hour week, operative from 1 July 1947, to industries and trades regulated by State awards and agreements, and in Queensland similar legislation was introduced in Parliament providing for the 40-hour week to operate from 1 January 1948.

The Commonwealth Court of Conciliation and Arbitration, in its judgment of 8 September 1947, granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January 1948. The Queensland Act was passed, and was proclaimed on 10 October 1947. On 27 October 1947, the South Australian Industrial Court, after hearing applications by unions, approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia, on 6 November 1947, approved that on application provision for a 40-hour week could be incorporated in awards of the Court, commencing from 1 January 1948.

In Victoria and Tasmania the Wages Boards met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of forty hours or, in certain cases, less.

*Basic Wage and Standard Hours Inquiry, 1952-53.* In the 1952-53 Basic Wage and Standard Hours Inquiry the employers sought an increase in the standard hours of work per week, claiming that one of the chief causes of the high costs and inflation had been the loss of production due to the introduction of the 40-hour week. This claim was rejected by the Court, as it considered that the employers had not proved that the existing economic situation called for a reduction of general standards in the matter of the ordinary working week. (See also page 340.)

*Basic Wage and Standard Hours Inquiry, 1961.* The Commonwealth Conciliation and Arbitration Commission rejected an employers' claim for an increase in the number of ordinary working hours from 40 to 42 per week, with a concomitant increase in weekly wages by an amount equal to two hours' pay at ordinary rates. This was to be a temporary measure to have effect for four years, after which time hours would revert to 40 and the increased wage would remain. (See also page 341.)

#### Hourly wage rates

The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc. for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage given in the following tables relate to all industry groups except Rural, and Shipping and stevedoring. The Rural industry is not included in the index and Shipping and stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

The following table shows the weighted average minimum hourly rates of wage payable to adult male workers, and index numbers of hourly rates in each State.

(a) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

**Weighted average standard weekly hours of work**

The 40-hour week has operated in Australia generally from 1 January 1948, and in New South Wales from 1 July 1947 (see page 322.) However, as stated on page 322, the number of hours constituting a full week's work (excluding overtime) differs between occupations and/or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and agreements for a full working week, in respect of adult male workers in all industry groups, except Rural, and Shipping and stevedoring, at 31 December 1965, were: New South Wales, 39.95; Victoria, 39.97; Queensland, 39.98; South Australia, 39.96; Western Australia, 39.89; Tasmania, 39.97; Australia, 39.96. Corresponding figures for adult female workers at 31 December 1965 were: New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.56; Australia, 39.67.

**Average weekly earnings**

The figures in this section are derived from particulars of employment and of wages and salaries recorded on pay-roll tax returns, from other direct collections, and from estimates of the unrecorded balance. The figures relate to civilians only.

Particulars of wages and salaries paid are not available for males and females separately from these sources; average weekly earnings have therefore been calculated in terms of male units i.e. total male employees plus fifty per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures shown in the following table. Quarterly figures corresponding to those shown in the table are published in the monthly bulletin *Wage Rates and Earnings* and in the *Monthly Review of Business Statistics*.

Particulars of average weekly earnings per employed male unit are shown in the following table for each of the years 1956-57 to 1965-66.

**AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT(a): STATES**  
**1956-57 TO 1965-66**  
 (\$)

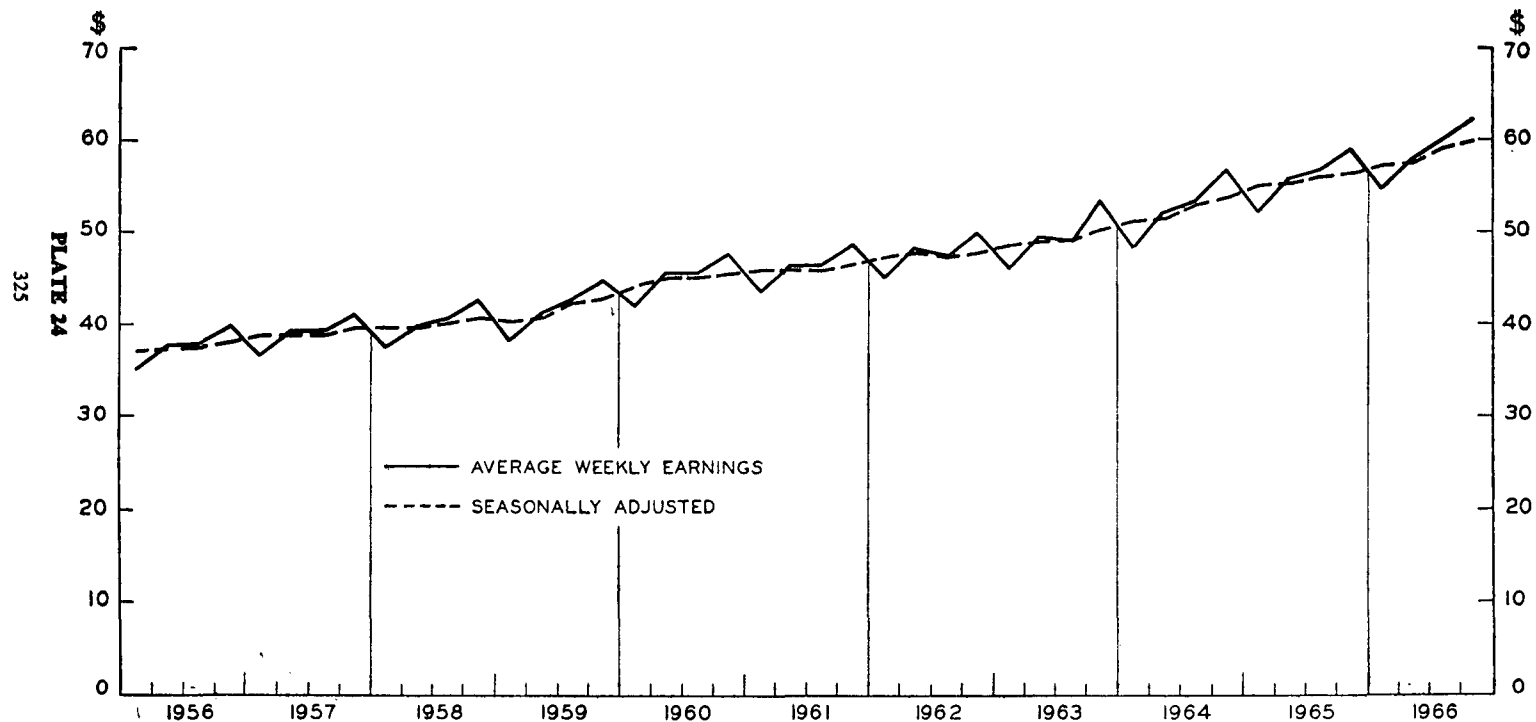

Year	N.S.W. (b)	Vic.	Qld	S.A. (c)	W.A.	Tas.	Aust.

1965-66 . .	58.60	59.20	52.50	53.80	54.10	53.80	57.00

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. See explanatory notes above. (b) Includes Australian Capital Territory. (c) Includes Northern Territory.

The following table shows, for 'All industries' and for 'Manufacturing', the movement in average weekly earnings from 1956-57 to December quarter 1966. The 'All industries' index is based on pay-roll tax returns and other data. It relates to average weekly earnings per employed male unit. The index for manufacturing industries for the years to 1965-66 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses (see the chapter Manufacturing Industry); figures for quarters subsequent to June quarter 1966 are preliminary estimates based on pay-roll tax returns.

# AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT

AUSTRALIA, 1956 TO 1966

The index numbers for 'All industries' and 'Manufacturing' show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is the year 1953-54 = 100, and both series have been seasonally adjusted.

### Surveys of wage rates, earnings and hours, 1960 to 1964

Since 1960 a number of statistical surveys of wages and hours of work in Australia have been undertaken by this Bureau. The object of these surveys has been to obtain information on wage rates, actual weekly earnings and hours of work on a more comprehensive scale than previously available in Australia. A summary of the scope and coverage of each of these surveys is shown on the following pages.

#### Survey of Wage Rates and Earnings, September 1960

This survey, relating to the last pay-period in September 1960, obtained information about marginal rates of wage and the dissection and distribution of actual weekly earnings of adult male employees (excluding part-time and casual employees). In addition to the exclusion of government and semi-government employees, and private employees in rural industry and in private domestic service, the survey did not cover the following—shipping and stevedoring industries; the motion picture industry; certain businesses such as those of accountants, consultant engineers, etc.; and trade associations, etc. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). For information on the results of the survey see Year Book No. 51, pages 439 to 442.

#### Survey of Weekly Earnings, October 1961

This survey was conducted for the last pay-period in October 1961 and provided information about the distribution of actual weekly earnings for adult male employees (excluding part-time and casual employees). The survey did not cover government or semi-government employees, private employees in rural industry and in private domestic service, or employees not liable to pay-roll tax. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). The results of the survey were published in Year Book No. 51, pages 442-4.

**Surveys of Weekly Earnings and Hours, October 1962, October 1963, and October 1964**

Sample surveys of earnings and hours in respect of most private employers subject to pay-roll tax (i.e. those paying more than \$400 a week in wages and salaries) have been conducted as at the last pay-period in October for the years 1962, 1963 and 1964. Some results of the 1962, 1963 and 1964 surveys are shown in the following table. Further particulars were published in the previous issue of the Year Book.

Figures for average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are shown for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between the points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in incidence of incentive schemes, piece-work and profit-sharing scheme payments, etc.

**Coverage of surveys**

The results of the surveys were based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service were excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from the surveys were—employees of government and semi-government authorities; employees of religious, benevolent and other similar organisations exempt from pay-roll tax; and all employees in the Northern Territory and the Australian Capital Territory. The earnings and hours of waterside workers employed on a casual basis have been excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys. Approximately 3,550 employers were included in the October 1964 survey and the sample represented 1,359,000 male and 568,200 female wage and salary earners.

The figures contained in the tables in this section are for 'Employees (other than part-time) whose hours of work were known' as defined below. Because of the heterogeneity of the data combined with high sampling variability, figures relating to other employees (part-time workers, executives, etc., and those whose hours of work were not known) are not available for publication.

**Comparability of results of surveys**

Since the survey estimates are based on a sample they are subject to sampling variability, that is, variations which might occur by chance because only samples of employers were surveyed. In addition to affecting the results of each sample such aspects also affect comparison between each year's results.

A broad comparison by States of the 1962, 1963 and 1964 surveys is shown on page 328.

**Definitions of terms used in surveys**

The following definitions refer to terms used in the surveys and in the tables in this section.

*Employees* refer to male and female employees on the pay-roll for the last pay-period in October.

*Employees whose hours of work were known* exclude (i) all managerial, executive, professional and higher supervisory staff, whether or not their hours of work were known, and (ii) any other employees whose hours of work were not known. They comprise all other employees who received pay for the last pay-period in October and whose hours of work were known (including foremen, transport supervisors, floor-walkers, other minor supervisory employees, clerical and office staff, etc.).

*Part-time employees* refer to employees who ordinarily worked less than thirty hours a week. Employees on short-time who normally worked thirty hours or more a week were classified as 'other than part-time.'

*Adults* include employees who, although under twenty-one years of age, were paid at the adult rate for their occupation.

*Juniors* are those employees under twenty-one years of age who were not paid at the adult rate for their occupation.

*Earnings* (i.e. gross earnings, before taxation and other deductions) include ordinary time and overtime earnings, payments for sick leave and holidays, commission, and all other payments such as incentive scheme, piecework and profit-sharing scheme payments, etc., and bonus payments of any kind. Annual or other periodical bonuses have been included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week has been included.

*Weekly hours paid* for include ordinary time and overtime hours, paid stand-by or reporting time, paid sick leave, and paid holidays. For employees paid other than weekly, hours have been converted to the equivalent for one week.

In the following table the average weekly earnings, average weekly hours paid for, and average hourly earnings at the last pay-period in October for the years 1962, 1963 and 1964 are shown for males and females (adult and junior), other than part-time, by State.

(a) Private employees only. Excludes managerial, executive, professional and higher supervisory staff, whether or not their hours of work were known, and all other employees whose hours of work were not known.  
(b) Last pay-period in October. For definitions and particulars of the coverage of the surveys, etc., see page 327.  
(c) Excludes Northern Territory and Australian Capital Territory.

### Survey of Weekly Earnings, October 1965

A survey of weekly earnings of male employees was conducted for the last pay-period in October 1965. The survey was conducted by means of: (i) a sample of private employers subject to pay-roll tax (that is those paying more than \$400 a week in wages and salaries); (ii) a complete coverage of Commonwealth and State government departments and semi-government authorities; and (iii) a sample of local government authorities. It related to certain specified industry groups only.

The industry groups excluded from this survey were: primary production; finance and property; public authority activities, n.e.i. (e.g. Commonwealth, State and local government administration); community and business services; amusement, hotels, cafés, personal services, etc. The survey also excluded waterside workers employed on a casual basis, and all employees in the Northern Territory and the Australian Capital Territory. The industry classification adopted is that used for the 1961 population census.

The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees in various weekly earnings groups (see pages 333-4) and a dissection of total weekly earnings paid to full-time adult males (see pages 335-8) into: (i) overtime earnings; (ii) ordinary time earnings at 'award, etc. rates'; and (iii) ordinary time earnings in excess of those at 'award, etc. rates' (divided into (a) payment by measured result and (b) other) as defined below. The survey also provided figures of average weekly earnings for full-time adult male and junior male employees (see pages 331-2). Separate details were obtained for: (i) managerial, executive, professional and higher supervisory staff, and (ii) other full-time male employees. The results of the survey are shown below in broad detail only. For further details see the mimeographed statement S.B. 391, *Survey of Weekly Earnings October 1965 or Labour Report No. 52*, 1965 and 1966.

Information of a similar type was obtained in respect of September 1960 from a sample survey of private employers only. However, the 1965 survey, as well as adopting the standard industry classification used for the 1961 population census, differs from the 1960 survey also in the range of industries included. In addition, the 1965 survey was on a more comprehensive basis than that in 1960. For these reasons, and also because of the possible effects of sampling variability, no comparison has been attempted.

#### Coverage

The 1965 survey related to private and government employees in the specified industry groups.

Private employers were surveyed by means of a stratified random sample of those employers subject to pay-roll tax. Approximately 3,000 private employers were included in the survey, and completed returns were received from over 99.9 per cent of them. The results of the survey of private employers were representative of the experience of an estimated 1,181,000 full-time adult male employees. In the government (i.e. Commonwealth, State and local) sector the survey covered 409,000 full-time male employees.

The sample of private employers had to be restricted to those subject to pay-roll tax. The industry classification of these employers was generally according to major activity. Mainly for these reasons, the survey estimates of total numbers of private and government employees do not correspond to totals of employment of all adult males in the specified industries.

#### Results of the survey

As the private employer part of the survey was based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers were surveyed.

The estimates are shown for adult males classified by industry group, by State, and by government or private employment. Therefore, reflected in these estimates will be the effects of differences in amounts paid for the various occupations; of differences in amounts paid for the same occupations; of differences in occupational structure within industries; and of differences in industry structure, both as between States and as between government and private employment.

Employers (private and government) were asked to comment on any full-time adult male employees shown as earning less than \$30, or \$30 and less than \$32 in the survey week. From these comments it was possible to omit from these two weekly earnings groups those adult males who were not paid for a full week. Those who were confirmed as full-time adult males being paid for a full week and earning less than \$32 represented a total of approximately 300. They were reported by respondents as being 'persons on the basic wage', 'adult messengers', 'elderly persons', 'persons on training rate', 'salesmen earning retainer only in the specified week', etc. Similarly it is probable that in completed returns there were a number of employees who earned \$32 and over in the specified pay-period even though they were not paid for a full week. It has not been possible to ensure that all such employees have been omitted from these estimates for 'full-time' adult males.

On the return forms the categories *managerial, executive, professional and higher supervisory staff, and all other full-time employees* were defined. However, the allocation of employees between these categories depended on the judgment of the individual employers (both private and government) completing the returns.

The tables on pages 335-8 show estimates of the average amounts and of the relative importance of the components of total weekly earnings (i.e. overtime earnings, ordinary time earnings at 'award, etc. rates', and ordinary time earnings in excess of those at 'award, etc. rates'). These details were obtained from each employer in the form of totals for each component part in respect of all his full-time adult male employees. Details were not sought of the number of employees receiving various amounts of these components, and thus no information is available about the distribution of employees about the averages. The averages shown for these components relate to the total of all employees in the survey, not just to the number of employees who received payment in these categories.

In the tables showing estimates of average earnings (or dissections of average earnings) the estimates have been rounded to the nearest 10 cents.

When using the estimates of *ordinary time earnings at award, etc. rates* it should be borne in mind that, in addition to minimum award rates specified for particular occupations, this category was defined to include all loadings, allowances, etc., prescribed in the awards, etc. In addition, for employees not covered by an award, etc., the normal (or agreed) rates of pay for normal hours of work were defined as coming within the scope of *ordinary time earnings at award, etc., rates*.

### Definitions

The following definitions refer to terms used in the survey and in the following tables.

*Adult males* include all male employees over twenty-one years of age and those males who, although under twenty-one years of age, are paid at the adult rate for their occupation.

*Junior males* include all other males under twenty-one years of age.

*Full-time male employees* were defined as those who ordinarily work thirty hours or more a week. Employees on 'short-time' or those who began or ceased work during the specified week and part-time employees were excluded from this survey. Instructions were also given that employees who were not paid for a full week's work because of absenteeism, sickness, accident, etc. were to be excluded.

*Other than managerial, etc., staff* includes minor supervisory staff, leading hands, clerical and office staff as well as ordinary wages employees. It excludes *managerial, executive, professional and higher supervisory staff* which were not further defined.

*Private employees* represents employees of private employers.

*Government employees* represents employees of Commonwealth and State government departments and semi-government authorities and of local government bodies.

*Total weekly earnings* refers to gross earnings of male employees for the last pay-period in October 1965 before taxation and other deductions. It includes payments directly attributable to work performed during the week for which payment was made (or to sick leave taken), e.g. ordinary time, overtime, shift allowances, penalty rates, commission (if paid weekly), and similar payments. For payments made other than on a weekly basis only one week's proportion is included, for example, salaries paid fortnightly or monthly; payment for those on annual leave; periodical payments under incentive, piecework, commission, profit sharing schemes, etc.; annual or other periodical bonuses, etc. Retrospective payments are excluded.

*Overtime earnings* represents that part of total weekly earnings of full-time adult male employees for the last pay-period in October 1965 for time worked in excess of award hours, or, in the case of those employees not affected by awards, etc., in excess of standard, or agreed, hours of work.

*Awards or registered agreements* refers to awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals.

*Ordinary time earnings at award, etc. rates* comprises:

- (i) where there was an appropriate award or registered agreement operating, the rates specified in the award for the hours of work paid for (up to the award hours) plus any other payments (excepting overtime), e.g. dirt money; height money; penalty rates; shift work, confined spaces, tool, leading hand, camping, etc., allowances; lead bonus and other loadings provided for in the award or registered agreement and at the rates specified in the award or registered agreement;

- (ii) where there was no appropriate award or registered agreement operating (including the case of managerial, executive, professional and higher supervisory staff not covered by awards), the rates of pay for hours of work covered by an unregistered agreement (if one existed) plus other payments (excepting overtime) similar to those specified in (i) above, if provided for in the agreement; otherwise the terms of employment as agreed for each person for wages, salaries, retainers, hours of work, etc. (excluding commission, and annual or half-yearly, etc. bonuses) relating to a normal working week were used;
- (iii) for employees under incentive, piecework, etc., schemes, only that part of their ordinary time earnings such as retainers, base rates or award minima.

*Ordinary time earnings in excess of those at award, etc. rates:*

- (i) *Based on payment by measured result* includes that part of earnings in excess of award or agreed base rate earnings, which is variable from one period to another depending on measured performance of the employees, for example, incentive payment schemes, piecework, task bonus, commission, etc.;
- (ii) *Other* includes all ordinary time earnings in excess of those at 'award, etc. rates' not described in (i) above; included were special attendance or good time-keeping bonuses, proportion of annual or other periodical bonuses, profit sharing scheme earnings and any other forms of over-award payments.

### Basic wages in Australia

**Special Note.** The material in this section refers to the position obtaining prior to the decision of the Commonwealth Conciliation and Arbitration Commission on 5 June 1967 (see Appendix for details).

The concept of a 'basic' or 'living' wage is common to rates of wage determined by industrial authorities in Australia. Initially the concept was interpreted as the 'minimum' or 'basic' wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it is now generally accepted 'that the wage should be fixed at the highest amount which the economy can sustain and that the "dominant factor" is the capacity of the community to carry the resultant wage levels'.

Under the *Commonwealth Conciliation and Arbitration Act 1904-1966* (see pages 312-4) the Commonwealth Conciliation and Arbitration Commission (previously the Commonwealth Court of Conciliation and Arbitration) may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award 'altering the basic wage (that is to say, that wage or that part of the wage, which is just and reasonable for an adult male [female], without regard to any circumstance pertaining to the work upon which, or the industry in which he [she] is employed) or the principles upon which it is computed'. In practice, the Commonwealth Conciliation and Arbitration Commission holds general basic wage inquiries from time to time, and its findings apply to industrial awards within its jurisdiction.

In New South Wales and South Australia the State industrial authorities adopt the relevant Commonwealth basic wage. In Victoria and Tasmania, where Wages Boards systems operate, no provision is included in the Industrial Acts for the declaration of a basic wage, although Wages Boards generally adopt Commonwealth basic wages. In Queensland (and Western Australia till December 1966) the determination of a basic wage is a function of the respective State Industrial or Arbitration Courts. Details of basic wage determinations in each State are set out in pages 346-50.

In addition to the basic wage, 'secondary' wage payments, including margins for skill and various kinds of loadings peculiar to the occupation or industry, are determined by these authorities. The basic wage and the 'secondary' wage, where prescribed, make up the 'minimum' wage for a particular occupation. The term 'minimum wage' as distinct from the basic wage is used currently to express the lowest rate payable for a particular occupation or industry. (See also *Adult males—components of total wage rate*, pages 318-9).

#### The Commonwealth Basic Wage—early judgments

The principle of a living or basic wage was propounded as far back as 1890, but it was not until 1907 that a wage, as such, was declared by a Court in Australia. The declaration was made by an order in terms of section 2 (d) of the *Excise Tariff 1906* in the matter of an application by H. V. McKay that the remuneration of labour employed by him at the Sunshine Harvester Works, Victoria, was 'fair and reasonable'. Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, defined the standard of a 'fair and reasonable' minimum wage for unskilled labourers as that standard appropriate to 'the normal needs of the average employee, regarded as a human being living in a civilized community'. The rate declared was 7s. (70c) a day or £2 2s. (\$4.20) a week for Melbourne, the amount considered reasonable for 'a family of about five'.

The 'Harvester' standard was adopted by the Commonwealth Court of Conciliation and Arbitration for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognisance of retail price index numbers, covering food and groceries and rent of all houses ('A' Series) for the thirty more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. At intervals thereafter as awards came before it for review the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index.

During the period of its operation the adequacy or otherwise of the 'Harvester' standard was the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. During the period of rapidly rising prices towards the end of the 1914-18 War strong criticism developed that this system did not adequately maintain the 'Harvester' equivalent. A Royal Commission was appointed in 1919 to inquire as to what it would actually cost a man, wife and three children under fourteen years of age to live in a reasonable standard of comfort, and as to how the basic wage might be automatically adjusted to maintain purchasing power. The Commission's Reports were presented in 1920 and 1921. An application by the unions to have the amounts arrived at by the inquiry declared as the basic wage was not accepted by the Court, because they were considerably in advance of existing rates, and grave doubts were expressed by members of the Court as to the ability of industry to pay such rates. Further details of the recommendations of the Commission were given in *Labour Report No. 41*, page 102.

The system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in the retail price index ('A' Series) was first introduced in 1921. The practice then adopted was to calculate the adjustments to the basic wage quarterly on the index number for the preceding quarter. The new method would have resulted in a basic wage lower than that to

which employees would have been entitled had the previous practice been continued, and in 1922 the Court added to the basic wage a general loading of 3s. (30c) (known as the 'Powers 3s.'). This loading continued until 1934. The practice of making automatic quarterly adjustments continued until September 1953 (*see below*).

For a description of the several series of retail price indexes referred to in these paragraphs, *see* pages 297-9 of this chapter.

#### Commonwealth Basic Wage Inquiries, 1930 to 1950

No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression in 1930, when applications were made to the Court for a reduction of wages. From 1 February 1931 the Court reduced all wages under its jurisdiction by 10 per cent. Subsequent applications in 1932 and 1933 for cancellation of this reduction were refused. In May 1933 the Court transferred the basis of the quarterly adjustment of the basic wage from the 'A' Series to the 'D' Series Retail Price Index. Further particulars may be found in the *Labour Report*, Nos. 22 and 23.

The 'Harvester' standard, adjusted by variations in retail price index numbers, continued to be the theoretical basis of the wage of the Commonwealth Court until the judgment of 17 April 1934, when automatic adjustment was transferred to the 'C' Series Retail Price Index. The new rate for the six capital cities, £3 5s. (\$6.50), was in effect the same as that previously paid under the 'A' Series, without the 'Powers 3s.' (30c) and without the 10 per cent reduction, which then ceased to operate. (*See Labour Report* No. 25, 1934.)

The following were the main features of the judgment of the 1937 Inquiry. (a) Amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as 'loadings' additional to the rates payable under the 1934 judgment (referred to as the 'needs' portion of the basic wage). These loadings, commonly referred to as 'Prosperity' loadings, ranged, for capital cities, from 4s. (40c) to 6s. (60c), that for the six capitals being 5s. (50c). (b) The minimum adjustment of the basic wage was fixed at 1s. (10c) a week instead of 2s. (20c). (c) The basis of the adjustment of the 'needs' portion of the wage in accordance with the variations shown by retail price index numbers was transferred from the 'C' Series to a special 'Court' Series based upon the 'C' Series. (d) Female and junior rates were left for adjustment by individual judges when dealing with specific awards. (*See Labour Report* No. 28, pages 77-87.)

In 1940, trade unions applied for increases in the basic wage. This application by unions was not finally decided until 1950, and the various judgments of the Commonwealth Court of Conciliation and Arbitration are summarised below. In February 1941 the Court refused to increase the basic wage owing mainly to the uncertainty of the economic outlook under existing war conditions. The application was stood over for further consideration. The Chief Judge suggested that the basic wage be graded according to family responsibilities by means of a system of child endowment. (Subsequently the Commonwealth *Child Endowment Act* 1941 came into operation on 1 July 1941. *See* Chapter 14, Welfare Services for details.) In 1946 the unions applied for an 'interim' basic wage declaration and in December 1946 the basic wage was increased by 7s. (70c) a week. The Basic Wage Inquiry, 1949-50 completed the case begun in 1940 and continued in 1946. In October 1950 the Court, by a majority decision, increased the adult male basic wage by £1 (\$2) per week; determined that the adult female basic wage be 75 per cent of the adult male rate; and standardised the 'Prosperity' loadings and declared them to be an adjustable part of the basic wage. These decisions operated from the beginning of the first pay-period in December 1950, and the whole of the new basic wage was subject to automatic adjustment as from the beginning of the first pay-period in February 1951. For further particulars of these judgments *see Labour Report* No. 38, page 79 and *Labour Report* No. 39, page 81.

#### Commonwealth Basic Wage Inquiries, 1952-53 to 1960

The Commonwealth Court of Conciliation and Arbitration in September 1953 announced its decision in the Basic Wage Inquiry, 1952-53. The decision of the Court was (a) the employers' applications for reduction in the basic wages and for an increase in the standard hours of work were refused; (b) the employers' applications for the deletion of provisions for the adjustment of basic wages in accordance with variations in retail price index numbers were granted; and (c) the unions' application for increases in basic wages was refused.

In May 1956 the Court delivered judgment in the Basic Wage Inquiry, 1956. The Court rejected the unions' application for the re-introduction of automatic quarterly adjustments and the abolition of the 3s. (30c) country differential. The Court increased the adult male basic wage by 10s. (\$1) a week and the adult female basic wage by 7s. 6d. (75c) a week payable from the beginning of the first pay-period in June 1956.

The Commonwealth Conciliation and Arbitration Commission on 29 April 1957 delivered judgment in the Basic Wage Inquiry, 1956-57. The basic wages for adult males were increased by 10s. (\$1) a week and the basic wages for adult females by 7s. 6d. (75c), to come into effect from the first pay-period to commence on or after 15 May 1957. The unions' claim for restoration of automatic quarterly adjustments was refused.

As a result of the Basic Wage Inquiry, 1958 the basic wage for adult males was increased by 5s. (50c) a week, to operate from the beginning of the first pay-period commencing on or after 21 May 1958. The restoration of automatic quarterly adjustments of the basic wage was refused. The claim of the South Australian Government for special treatment for the basic wage for Adelaide was refused.

In its judgment in the Basic Wage Inquiry, 1959 the Commission, by a majority decision, decided that the basic wage for adult males should be increased by 15s. (\$1.50) a week payable as from the beginning of the first pay-period commencing on or after 11 June 1959, and that the system of automatic quarterly adjustments should not be restored.

The Conciliation and Arbitration Commission, in its judgment in the Basic Wage Inquiry, 1960, decided that there would be no increase in the basic wage and no restoration of quarterly adjustments to the basic wage.

In the Differential Basic Wage Inquiries, 1960 the Commission decided that the 3s. (30c) country basic wage differentials should be eliminated from awards of the Commission, the new basic wages to be payable from the beginning of the first pay-period commencing on or after 1 January 1961. The claim by employers' associations in South Australia for special treatment for the Adelaide basic wage was refused.

For details of these inquiries see earlier issues of the Year Book and the *Labour Report*.

#### Commonwealth Basic Wage Inquiries, 1961, 1962 and 1963

In its judgment in the Basic Wage and Standard Hours Inquiry, 1961 the Commonwealth Conciliation and Arbitration Commission made the following decisions: (1) the employers' claim for an increase in the standard hours of work from forty to forty-two a week with a concomitant increase in the weekly wage equivalent to two hours' pay at ordinary rates was refused; (2) the unions' claim for restoration of automatic quarterly adjustments was refused; (3) the basic wages for adult male employees were increased by 12s. (\$1.20) a week to come into effect from the beginning of the first pay-period commencing on or after 7 July 1961; and (4) that in February 1962 the only issue to be considered in regard to the basic wage should be why the money wages fixed by this decision should not be adjusted in accordance with any change in the Consumer Price Index. To give effect to this the applications were adjourned till February 1962.

The adjourned hearing was held on 20 February 1962. The Commission, after hearing submissions, decided that there would be no alteration in the basic wage until further order; and further adjourned the application before it until February 1963.

The application again came before the Commission on 5 February 1963. In its judgment the Commission decided that there would be no alteration in the basic wage rates, and that the application was further adjourned until February 1964.

#### Commonwealth Basic Wage Inquiry, 1964 and Employers' Total Wage Case, 1964

On 25 February 1964 the Commonwealth Conciliation and Arbitration Commission began hearing an application by respondent unions for a variation in the Metal Trades Award and the Pastoral Industry Award, and an application by the employers for a variation in the Metal Trades Award. The unions sought an increase of 52s. (\$5.20) a week in the basic wage portion of the Metal Trades Award and the Pastoral Industry Award, the abolition of the disparity in respect of station hands under the Pastoral Industry Award, and the re-introduction of automatic quarterly adjustments based on the Consumer Price Index. The employers sought an alteration to the present wage structure, involving the abolition of the 'basic wage' and 'margins' components of the award and the substitution of a total wage, with increases ranging from 5s. (50c) to 8s. (80c) a week.

It was decided to hear the claim by the unions first, but to reserve the decision until the employers' Total Wage Case was heard immediately afterwards. Since the arguments used in the first case were likely to be similar to those used in the employers' hearing it was deemed expedient for Commissioner Winter, who was a member of the bench for the Total Wage Case, to attend the first hearing as an observer.

#### The Basic Wage Inquiry, 1964

For the hearing of this case the Conciliation and Arbitration Commission was constituted in Presidential Session by Kirby C.J. and Gallagher, Moore, and Nimmo JJ. Commissioner Winter was present as an observer only.

The application by the unions (see above) was opposed by private employers generally. The Commonwealth Government intervened in the public interest, but neither supported nor opposed the claim. Leave to intervene was granted to the Australian Council of Salaried and Professional Associations and thirty affiliated organisations of that Council, to nineteen organisations affiliated with the High Council of Commonwealth Public Service Organisations, and to the State of Tasmania; these parties supported the unions' claims.

At the conclusion of the Basic Wage Inquiry and the Total Wage Case the bench on 9 June 1964 handed down the following decisions.

'1. Unanimous decision that the unions' claim for the restoration of automatic quarterly adjustments be refused.

'2. Unanimous decision that the application of The Australian Workers Union for the deletion from the Pastoral Industry Award of the basic wage for station hands be granted. This means abolition of the disparity of 1s. [10c] per week in respect of station hands.

'3. Unanimous decision that the basic wages of adult male employees covered by Federal Awards be increased. The Commission is equally divided in opinion on the amount of increase, the President and Mr. Justice Moore being of the opinion that it should be 20s. [\$2] and Mr. Justice Gallagher and Mr. Justice Nimmo that it should be 10s. [\$1]. The Act (Section 68) provides that if the Commission is equally divided in opinion the question shall be decided according to the opinion of the President. The decision of the Commission is therefore that the basic wages of adult male employees covered by Federal Awards shall be increased by a uniform weekly amount of 20s. [\$2].

'4. The new rates will come into operation from the beginning of the first pay period to commence on or after 19 June 1964, subject to special cases.

'5. The basic wages which shall be increased by 20s. [\$2] per week shall be those prescribed for adult males in the Pastoral Industry Award, as varied by Decision No. 2 above, and those basic wages as at present prescribed for adult males in the Metal Trades Award and all the Awards respectively the subject of the applications and disputes which have been ordered by the Commission to be joined for hearing and decision with the applications concerning the Pastoral Industry Award and the Metal Trades Award. The awards concerned are set out in the schedule to the Judgment of the President and Mr. Justice Moore.'

Three separate judgments, one by Kirby *C.J.* and Moore *J.* and one each by Gallagher *J.* and Nimmo *J.*, were presented and a summary of these judgments was given in the previous issue of the Year Book.

#### Employers' Total Wage Case, 1964

The case was heard in Presidential Session by Kirby *C.J.*, Gallagher, Moore, and Nimmo *JJ.* and Commissioner Winter.

A claim was made by the Metal Trades Employers Association, the Victorian Chamber of Manufactures and the Metal Industries Association of South Australia for the deletion from the Metal Trades Award of the basic wage provisions and for the insertion in the award of a wage expressed as a total wage. The employers offered an immediate increase in the total wage but made it clear that they did not desire the Commission to grant their application for a total wage unless the Commission also agreed to implement their submission that movements in wages should be kept within movements in productivity. They also asked that, since the application was a vehicle by which the Commission would establish a new approach to the principle of wage fixation, the decision should not be confined to the Metal Trades industry but applied generally to the Commission's awards. The unions opposed the application, stressing the importance of the basic wage to the lower paid worker, its historical significance and the attitude of Parliament.

The Commonwealth Government, when intervening, emphasised the need for flexibility, the desirability of adherence to the capacity to pay principle, the danger of fixing wage rates solely in relation to price movements or productivity, the undesirability of assessing rates on purely economic grounds, the advantage of work value fixations, and that it was wrong to proceed on the basis that whenever a change took place in one margin all margins should change.

On 9 June 1964 the Commission announced the following decision:

'The members of the bench are unanimous in the opinion that the application of the employers for the deletion from the Commission's awards generally of the basic wage provision and for the insertion in those awards of a wage expressed as a total wage should be rejected.'

Three separate judgments, one by Kirby *C.J.*, Moore *J.* and Commissioner Winter, and one each by Gallagher *J.* and Nimmo *J.*, were handed down, and a summary of these judgments was given in the previous issue of the Year Book.

#### National Wage Cases of 1965

Hearing in these cases commenced on 2 March 1965 before Kirby *C.J.*, Gallagher, Moore, Sweeney, and Nimmo *JJ.*, of the Commonwealth Conciliation and Arbitration Commission. Claims by the employers and the trade unions were heard concurrently.

The employers' claim (Part A) was for the abolition of the concepts of the basic wage and margins, and the introduction into the Metal Trades Award of an obligation to pay a total wage made up of the sum of the amounts expressed in terms of the basic wage and a margin, plus an amount equivalent to one per cent of such sum. The employers also asked (Part B) that, in

respect of the ensuing twelve months, the level of the basic wage and the level of margins, in so far as the latter is determined upon general economic grounds, should be decided simultaneously. It was open to the Commission under Part B of these claims to decide whether there should be an increase in (a) the basic wage element alone; (b) the marginal element alone; or (c) both the basic wage and marginal elements, to whatever extent in respect of each element the Commission deemed proper.

The trade unions sought new basic wage rates incorporating increases proportionate to the rises in the Consumer Price Index. For the Six Capital Cities basic wage the increase claimed was 12s. (\$1.20) a week for adult males.

The Commission announced its decision on 29 June 1965, when three separate judgments were handed down—a joint judgment by Gallagher, Sweeney and Nimmo *JJ.*, and separate judgments by Kirby *C.J.* and by Moore *J.* In accordance with the opinion of the majority (namely, that of Gallagher, Sweeney and Nimmo *JJ.*), the order of the Commission was to the effect:

- (a) Part A of the employers' application was refused;
- (b) with regard to Part B of the employers' application—
  - (i) there would be no alteration in the basic wage,
  - (ii) with effect from the first pay-period commencing on or after 1 July 1965 each margin in Clause 4 of the Metal Trades Award was increased by an amount equal to  $1\frac{1}{2}$  per cent of the sum of the Six Capital Cities basic wage and that margin;
- (c) the application of the unions for an increase in the basic wage was refused.

The majority judgment anticipated that, subject to the question of capacity of a particular industry and the question of those margins which had already been increased on general economic grounds (since 1963), the increases awarded would be speedily reflected throughout the awards of the Commission.

#### **Basis Wage, Margins and Total Wage Cases of 1966**

On 2 March 1966 two benches of the Commonwealth Conciliation and Arbitration Commission in joint session commenced hearing claims of trade unions and employers. The trade unions' claims were: (a) for an increase in the respective basic wage rates of \$4.30 a week in both the Metal Trades and Pastoral Industry Awards; (b) the restoration of the system of automatic quarterly adjustments based upon movements in the Consumer Price Index numbers; and (c) an increase of \$5.90 a week in the marginal rate for tradesmen with proportionate increases to all other classifications of employees. The employers' alternative claims were: (Part A) that the existing basic wage rates and marginal rates be aggregated into total wage rates, to which should be added  $1\frac{1}{2}$  per cent of such total rates; or (Part B) that the existing basic wage rates should be increased by 30 cents a week, marginal rates by 1 per cent, and the resultant figure by  $\frac{1}{2}$  per cent.

The President of the Commission nominated two benches of the Commission to hear these claims. A Presidential Bench, consisting of Wright *J.* (presiding), Gallagher and Moore *JJ.*, was nominated to deal with the trade unions' basic wage claims and those portions of the employers' total wage claims seeking alteration of the basic wage. A Reference Bench, consisting of Wright *J.* (presiding), Gallagher and Moore *JJ.* and Commissioner Winter, was nominated to deal with the trade unions' margin claims and those portions of the employers' claims not seeking alteration of the basic wage. The High Court of Australia, upon application, upheld the validity of the nomination of Commissioner Winter as a member of the Reference Bench. The two benches sat in joint session until the conclusion of the hearing on 16 June 1966, when the Commission reserved its decisions.

On 8 July 1966 the Presiding Judge of the Commission (Wright *J.*) announced the following decisions.

#### **For the Presidential Bench**

(1) The Commission was of opinion that the Commission in Presidential Session was not empowered to deal with Part A of the employers' log of claims (*see above*) and its consideration had therefore been undertaken by the Reference Bench which participated in the joint session of the Commission.

(2) The Commission had decided that each of the basic wage rates prescribed for adult males in the Metal Trades Award should be increased by the sum of \$2 a week.

(3) The Commission's order would operate as from the beginning of the first pay period to commence on or after 11 July 1966 and would remain in force until 31 December 1966.

(4) By operation of the Award, and without further order, proportional increases would accrue to adult female employees, junior employees and apprentices.

(5) The union claim for restoration of automatic quarterly adjustments was refused.

(6) The basic wage in the Pastoral Industry Award should be increased by the same amount and as from the same date as in the case of the Metal Trades Award, and the order would have the same period of operation.

(7) The decisions were unanimous and disposed of the unions' basic wage claims.

*For the Reference Bench*

(1) The Bench was concerned about the state of the Metal Trades Award and had reached the conclusion that it would be unwise to award any general increases until an investigation had been made on a work value basis of the relativities of the 330 classifications listed in the award and the necessity for as many as 53 separate wage rates with refinements as low as a cent a day between classifications.

(2) The Bench therefore decided to avail itself of the procedure available under Section 34 (6) of the Act to obtain from Commissioner Winter, after such investigation as he considered necessary, a report with respect to the following specified matters:

- (a) What, if any, rearrangements or re-designations of classifications or additional classifications under Part I of the Metal Trades Award are necessary or desirable to bring them into accord with present-day requirements;
- (b) What, if any, alterations of marginal rates prescribed under Part I of the Metal Trades Award or additional marginal rates are justified upon the grounds of work value, the economic considerations which have been presented to this bench, or for any other reason.

(3) The Bench was aware that the report by Commissioner Winter could take some time to formulate. It therefore indicated that, if at some appropriate stage in the proceedings before him and with due regard to industrial justice and practicability Commissioner Winter thought fit to furnish an interim report pending completion of his whole investigation, that would be in accordance with the Commission's intentions in seeking a report.

(4) Detailed consideration had been given to the 31 classifications having the lower range of marginal rates being 90c a week at the bottom and \$3.60 at the top. The Commission decided pending Commissioner Winter's report to grant some immediate relief to low wage earners. Therefore, as an interim order in the unions' margins application, the Bench intended to insert a new provision in the award by which it would be prescribed that no adult male employee should be paid as a weekly wage for working the standard hours of work an amount less than his appropriate basic wage rate plus \$3.75 a week. The Bench emphasised that this was an interim provision only, and was not intended as an indication that when the classification structure falls for final consideration that there would be no rate lower than those specified as minima.

It was intended that the minimum rates specified should apply only to adult male employees and should be applied for all purposes of the award—for example, in the calculation of overtime and other penalty rates, piece-work, casual employment, sick leave and annual leave. But they would not affect extra rates for leading hands, for tradesmen in large power houses, or for employees engaged on ship repairs. The minimum rates prescribed would not affect the calculation of junior rates of pay.

The provision for a new minimum wage for adult male employees was designed to meet the circumstances of employees in the lowest classifications who were in receipt of award rates and no more. It was not intended to affect the wage of any employee who was already receiving the prescribed minimum through over-award payments.

The increase was awarded on the unions' application so that its implementation in awards other than the Metal Trades Award, where appropriate, might be achieved expeditiously upon union application.

(5) The Commission's Order would operate as from the beginning of the first pay-period to commence on or after 11 July 1966, and would remain in force until 31 December 1966.

(6) These decisions were unanimous.

(7) The Bench indicated in their reasons the extent to which they favoured the employers' proposal for conversion of the wage structure to the basis of a single wage, but had decided to defer the question of implementation pending further consideration of the present structure of marginal rates and further argument.

**Margins and Total Wage Cases of 1966 (Interim Margins)**

For details of this decision concerning margins *see* page 352.

**National Wage Cases of 1967.**

*See* Appendix for details.

**Basic wage rates for females**

*Labour Report* No. 51, page 130, contains an account of the fixation of minimum rates and basic wages for adult females by the Commonwealth Court of Conciliation and Arbitration. At the end of the 1949-50 Basic Wage Inquiry the Commonwealth Court of Conciliation and Arbitration, by a majority decision, fixed the basic weekly wage for adult females at 75 per cent of the corresponding male rate from the beginning of the first pay-period commencing in December 1950. This percentage has continued to be prescribed in subsequent inquiries. Commonwealth basic wage rates for capital cities are shown in the following table.

**Commonwealth basic wage rates operative**

The following table shows the movements in the Commonwealth basic wage rates for each State capital city and for the six capitals to 1966.

## COMMONWEALTH BASIC WAGE: WEEKLY RATES(a)(e), STATE CAPITAL CITIES (\$)

Date operative(b)	Sydney	Mel-bourne	Brisbane	Adelaide	Perth	Hobart	Six capitals

(a) Rates prescribed by the Commonwealth Conciliation and Arbitration Commission (before 30 June 1956 the Commonwealth Court of Conciliation and Arbitration). Rates include prosperity loadings, where applicable. (b) Rates operative from the beginning of the first pay-period commencing in the month shown or commencing on or after the date shown. (c) From December 1950 the basic wage rates for adult females have been 75 per cent of the rates for adult males. (d) Automatic adjustment discontinued (see page 340). (e) See Special Note on page 339.

A table showing Commonwealth basic wage rates from 1923 to 1964 was published in the Appendix to *Labour Report* No. 51. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

## Basic wage rates, Australian Territories

In the Northern Territory there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the 'Darwin' rate, and the other in respect of areas south of that parallel and extending down to the 26th parallel (the 'Port Augusta' rate). The basic wage rates payable as from the beginning of the first pay-period commencing on or after 11 July 1966 were: 'Darwin' rate, adult males \$34.70, adult females \$26.00; 'Port Augusta' rate, adult males \$33.40, adult females \$25.05. In addition to these rates, special loadings of \$1 to the 'Darwin' and 70c to the 'Port Augusta' adult male basic wages have been provided in a number of awards.

In the Australian Capital Territory the rates payable as from the beginning of the first pay-period commencing on or after 11 July 1966 were \$33.00 for adult males and \$24.75 for adult females.

Further details of basic wage rates in the Northern Territory and the Australian Capital Territory may be found in *Labour Report* No. 51 (pages 131-5 and in Section IX of the Appendix).

#### State basic wages—New South Wales

The first determination under the New South Wales Industrial Arbitration Act of a standard 'living' wage for adult male employees was made on 16 February 1914, when the Court of Industrial Arbitration fixed the living wage at £2 8s. (\$4.80) a week for adult males in the metropolitan area. A Board of Trade, established in 1918, with power to determine the 'living' wage for adult male and female employees in the State, made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act, 1926 transferred its powers, as from 15 April 1926, to the Industrial Commission of New South Wales.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. However, with the adoption in 1937 of the Commonwealth basic wage, the identification of a specified family unit with the basic wage disappeared.

A State scheme of supplementing wages by child endowment became operative in New South Wales from July 1927, and continued until superseded by the Commonwealth Government scheme in July 1941. A brief account of the main features of the New South Wales system was given in Year Book No. 37, pages 485-6.

From 1937 to October 1955 the State basic wage for Sydney was the same as the Commonwealth basic wage for Sydney. Beginning from the first pay-period in November 1955, by amendment to the Industrial Arbitration Act, the basic wage was automatically adjusted each quarter in accordance with movements in retail price index numbers. (Automatic adjustments to Commonwealth basic wages were discontinued in September 1953—see page 340.) In October 1964 the Act was amended to delete provision for automatic adjustment to the State basic wage, and to provide that the Commonwealth basic wage for Sydney should in future apply in State awards and industrial agreements, to operate from the beginning of the first pay-period which commenced on or after 19 June 1964.

The Industrial Arbitration (Female Rates) Amendment Act, 1958 defined the basic wage for adult females as being 75 per cent of the adult male rate. It also provided that by January 1963 for male and female employees performing work of the same or like nature and of equal value the same basic wage and secondary wage might be prescribed by the Industrial Commission or a Conciliation Committee.

A table showing State basic wage rates for Sydney for adult males and adult females from 1914 to 1964 was published in the Appendix to *Labour Report* No. 51, 1964. Current rates are published in the monthly bulletin *Wage Rates and Earnings*. The rates payable from 11 July 1966 were \$33.50 for adult males and \$25.10 for adult females. For further particulars of the history of State basic wages see earlier issues of the Year Book or *Labour Report*.

#### Victoria

There is no provision in Victorian industrial legislation for the declaration of a State basic wage. Wages Boards constituted for each industry group or calling from representatives of employers and employees, with an independent chairman, determine the minimum rate of wage to be paid in that industry or calling. In general these Boards have adopted a basic wage in determining the rate of wage to be paid.

Wages Boards in the past have generally adopted Commonwealth basic wage rates. In 1934 Wages Boards were given discretionary power to include in their determinations appropriate provisions of relevant Commonwealth Awards; in 1937 Wages Boards were compelled to adopt such provisions of Commonwealth Awards. In 1937 Wages Boards were also given power to adjust wage rates, 'with the variation from time to time of the cost of living as indicated by such retail price index numbers published by the Commonwealth Statistician as the Wages Board considers appropriate'. The Wages Boards thus adopted the basic wages declared by the Commonwealth Court of Conciliation and Arbitration and followed that Court's system of adjusting the basic wage in accordance with variations in retail price index numbers.

After the Commonwealth Court of Conciliation and Arbitration discontinued the system of automatic adjustment of the Commonwealth basic wage in September 1953, a number of Wages Boards met in November 1953, and deleted references to these adjustments. However, an amendment to the Factories and Shops Act in November 1953 required Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers.

In October 1956 an amendment to the Labour and Industry Act (which had superseded the Factories and Shops Act in 1954) deleted the automatic adjustment provision and directed Wages Boards in determining wage rates to take into consideration relevant awards of, or agreements certified by, the Commonwealth Conciliation and Arbitration Commission. The last

automatic quarterly adjustment of the basic wage was payable as from the beginning of the first pay-period in August 1956. Following the judgment of the Commonwealth Conciliation and Arbitration Commission in the 1959 Basic Wage Inquiry, Wages Boards met in June and July 1959, and varied their determinations by incorporating the new Commonwealth rates. Since then the increases in basic wage rates granted by the Commonwealth Conciliation and Arbitration Commission have been adopted by Wages Boards. The rates for Melbourne, payable from 11 July 1966, were \$32.70 a week for adult males and \$24.50 for adult females.

A table showing, for the period November 1953 to June 1964, the basic wage rates for adult males and females adopted by most Wages Boards was published in the Appendix to *Labour Report No. 51, 1964*. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

### Queensland

The first formal declaration of a basic wage by an industrial tribunal in Queensland, £4 5s. (\$8.50) for adult males, operated from 1 March 1921. Prior to this declaration the rate of £3 17s. (\$7.70) a week for adult males had been generally recognised in awards as the 'basic' or 'living' wage.

'The Industrial Conciliation and Arbitration Act of 1929' established an Industrial Court and provided that the Court could make declarations as to the basic wage and standard hours. This Act as subsequently amended was repealed by 'The Industrial Conciliation and Arbitration Act of 1961', which established, in addition to the Industrial Court, an Industrial Conciliation and Arbitration Commission. The Act provides that any basic wage declared must at least maintain an employee, his wife and family of three children in a fair and average standard of comfort.

The amendment to the Act in 1961 provided that the full bench of the Commission, consisting of not less than three Commissioners, might make declarations as to the basic wage and standard hours of work. The Act also provided that all persons interested must be given an opportunity to be heard before any general declaration as to the basic wage could be made.

Following an inquiry, the Commission, in a decision in May 1961, increased the adult male basic wage by 4s. (40c) a week, which was approximately the amount of the increase indicated by the Consumer Price Index for March quarter 1961. In November 1961 the Commission refused an application by employer organisations for a declaration of a general ruling that 'in future the basic wage for males and/or females shall not be reviewed merely by reason of any change in the Consumer Price Index at intervals of less than twelve months'.

The Commission in December 1962 rejected an application by unions for increases of £1 4s. (\$2.40) in the adult male basic wage and 18s. (\$1.80) in the adult female basic wage.

In 1963 the Commission, after an inquiry, increased the basic wage by 2s. (20c) a week for adult males and by 1s. 6d. (15c) a week for adult females from 6 May 1963. Following hearing of four applications by unions to alter the basic wage, the Commission in 1964 unanimously increased the basic wage by 14s. (\$1.40) to £15 (\$30) a week for adult males. The increase took effect on and from 13 July 1964.

In a declaration on 23 September 1964 the Commission after an inquiry refused to increase the basic wage, despite movement in the Consumer Price Index for the June quarter 1964 which would have justified an increase of 2s. (20c), on grounds that such an increase would constitute a very ineffective addition to the wages of employees.

The Commission in December 1964 granted basic wage increases which had been claimed by unions of 6s. (60c) and 4s. 6d. (45c) a week for adult males and adult females respectively. Commenting on employer associations' claims, the Commission stated that, although the Commonwealth basic wage determined the State basic wage in all States except Queensland and Western Australia, the Commission had never fixed the State basic wage only in relation to the basic wage in other States or the Commonwealth basic wage, and could therefore see no reason why a decision should be made at this time to withhold a hearing for review pending the review of the Commonwealth basic wage.

Trade unions applied in January 1965 for a further increase in the basic wage consequent upon the upward movement in the Consumer Price Index since the last declaration. Following the hearing of unions' claims, the Commission increased the adult male wage by 3s. (30c) a week and the adult female wage by 2s. 6d. (25c) a week, effective as from 29 March 1965. In its judgment the Commission stated that it had been decided as a matter of policy that in the future it did not propose to deal with an application to vary the basic wage solely because of a change in the Consumer Price Index unless such a change warranted an alteration of 4s. (40c) or more in the basic wage for adult males.

In July 1965 trade unions applied to the Commission to vary the basic wage on the grounds that recent rises in the Consumer Price Index warranted an increase of more than 4s. (40c) a week in the basic wage. In its judgment of 2 September 1965 a majority of the Commission

rejected the unions claim for 6s. (60c) per week increase, but granted an increase of 5s. (50c) a week, effective from 20 September 1965. As a matter of policy the Commission further decided not to review the basic wage again before 1 July 1966.

After hearing applications by trade unions, the Commission decided in April 1966 to review the basic wage. Consequent upon this review the Commission increased the basic wage for adult males by \$1.30 and for adult females by \$1 with effect on and from 23 May 1966.

After a further inquiry in March 1967 the Commission increased the basic wage for adult males by 50c a week and for adult females by 35c a week operative from 10 April 1967.

The rates payable in the Southern Division (Eastern District) from 10 April 1967 were \$33.20 for adult males and \$24.90 for adult females. In addition to the basic wage for the Southern Division (Eastern District) which includes Brisbane, adult males in other areas receive district allowances. As from 2 February 1959 the allowances have been: Southern Division (Western District) 10s. 6d. (\$1.05), Mackay Division 9s. (90c), Northern Division (Eastern District) 10s. 6d. (\$1.05), Northern Division (Western District) £1 12s. 6d. (\$3.25). The allowances for adult females are not less than 75 per cent of those for adult males. In the Appendix to *Labour Report* No. 51 a table was published showing adult male and adult female basic wage rates payable in the Southern Division (Eastern District) from 1 March 1921 to 20 September 1965. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

### South Australia

The Industrial Code, 1920-1966 provides that from 1 July 1966 the Industrial Commission, constituted by the President and two Commissioners, shall after public inquiry declare the 'living wages' to be paid to adult male and adult female employees. Prior to this date this power was vested in the Board of Industry. The family unit was not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage was to be declared was a man with a wife and three children. However, the concept of a family unit disappeared with the adoption of basic wage rates declared by the Commonwealth Court of Conciliation and Arbitration (*see below*). The first declaration by the Board of Industry became operative from 4 August 1921 when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. (\$7.95) a week.

Following the 'interim' increase in the 'needs' basic wage of the Commonwealth Court of Conciliation and Arbitration, announced on 13 December 1946, the South Australian Government made a provision in the *Economic Stability Act, 1946* for the declaration by the Governor of a living wage based on the Commonwealth basic wage for Adelaide.

The Industrial Code Amendment Act, 1949 made provision for the quarterly adjustment of the living wage in accordance with the variations in the Commonwealth basic wage for Adelaide. In effect, this made the State living wage and the Commonwealth basic wage for adult males equal from the beginning of the first pay-period commencing in February 1950.

Following the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry, the South Australian Industrial Code was amended to provide for declarations of the living wage by proclamations to prevent unjustifiable differences between the State and Commonwealth rates of wage. By proclamation dated 30 November 1950 the South Australian living wage in the metropolitan area was made identical with the December 1950 rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia. The female basic wage, which had been approximately 55 per cent of the male basic wage, was increased to 75 per cent of the corresponding male rate.

When the Commonwealth Court of Conciliation and Arbitration discontinued quarterly adjustments to Commonwealth basic wages in September 1953, the South Australian living wage also ceased to be varied quarterly, and since that time it has remained the same as the Commonwealth basic wage for Adelaide. Following the Commonwealth basic wage inquiries in 1956 and subsequent years, increases were made to the South Australian living wages by proclamation. The rates operative from 11 July 1966 were \$32.30 for adult males and \$24.20 for adult females.

A table showing adult male and adult female basic wage rates for the whole State (with the exception of Whyalla and nearby area) from 1921 to June 1964 will be found in Section X of the Appendix to *Labour Report* No. 51. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

### Western Australia

In December 1966, legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceed the State rates operative from 24 October 1966. Prior to 1963, the *Industrial Arbitration Act, 1912-1961* provided that the Court of Arbitration could determine and declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determinations should be made within twelve months of the previous inquiry.

The term 'basic wage' was defined in the Act as 'a wage which the Court considers to be just and reasonable for the average worker to whom it applies'. In determining what was just and reasonable, the Court had to take into account not only the 'needs of an average worker', but also the 'economic capacity of industry' and any other matters it deemed relevant. The Act provided that the Court of Arbitration (or the Commission since 1964) could make adjustments to the basic wage each quarter, if the statement supplied by the State Government Statistician showing retail price index numbers and monetary equivalents in terms of the State basic wages indicated that there has been a variation of 1s. (10c) or more a week compared with the previous quarter. These adjustments generally apply from the dates of declaration.

The first declaration of the basic wage by the Court of Arbitration, after the authority to fix one was vested in the Court in 1925, operated from 1 July 1926. The family unit was not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. The principal inquiries into the basic wage have been those of 1938, 1947, 1950, 1951, and 1964. For details of the inquiries 1937 to 1950 see earlier issues of the Year Book.

In December 1951 the basic wage for adult females became 65 per cent of the corresponding male rate. In January 1960 this proportion was increased to 75 per cent. In each case the margins for females were reduced or deleted to offset the increase in the female basic wage.

Amendments to the Industrial Arbitration Act passed in 1963 became effective on 1 February 1964. The Act provided that the fixation and adjustment of the basic wage would now be dealt with by the Commission in Court Session (three Commissioners) instead of the former Court of Arbitration. In April 1964 the Commission, in exercising its discretionary powers, unanimously increased the basic wage for adult males by 2s. 8d. (27c) a week for the metropolitan area and the rest of the South-West land division and 2s. 7d. (26c) a week for the Goldfields area and all other parts of the State.

The Commission on 22 July 1964 began a general inquiry following union submissions for an increase of £2 12s. (\$5. 20) in the basic wage for adult males. On 22 September the Commission announced its decision that the basic wage for the whole of the State would be £15 8s. (\$30. 80) for adult males, with appropriate rates for females, juniors and apprentices. This decision abolished the differential rates applying to different areas of the State which had operated since 1931. Subsequently the Commission reduced the industry allowance in the goldmining industry awards from 30s. (\$3) to 22s. 6d. (\$2.25) a week. Eight separate increases in the State basic wage were made in the period October 1964 to October 1966, following the Commission's examination of movements in the Consumer Price Index.

The rates payable in the whole of the State as from 24 October 1966 were \$33.50 for adult males and \$25.13 for adult females. A table showing the Western Australian State basic wage for the Perth Metropolitan Area from 1926 to 16 November 1965 will be found in Section X of the Appendix to *Labour Report* No. 51. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

### Tasmania

A State basic wage is not declared in Tasmania. Under the *Wages Board Act* 1920 as amended (to 1966) Wages Boards are constituted for a number of industries from representatives of employers and employees, with an independent chairman (who is common to all Wages Boards), with power to determine the minimum rates of wage payable in each industry. Until February 1956 these Boards generally adopted the basic wages of the Commonwealth Court of Conciliation and Arbitration in determining the rates of wage to be paid.

Wages Boards have power to adjust their wage rates in accordance with variations in the cost of living as indicated by retail price index numbers published by the Commonwealth Statistician. When the Commonwealth Court discontinued the system of automatic adjustments of the basic wage in September 1953, Wages Boards met to consider this matter. By early December 1953 all Wages Boards had met and deleted the automatic adjustment clause from determinations and cancelled the adjustment increases payable from November 1953.

Automatic quarterly adjustments in accordance with movements in retail price index numbers were re-introduced by Wages Boards in February 1956, and continued in May and August 1956.

The majority of Wages Boards suspended automatic quarterly adjustments after the August 1956 adjustment, and basic wage rates remained unchanged until July 1959, when Commonwealth basic wages were adopted. In January 1961 Wages Boards adopted the basic wage for Hobart as the uniform rate applicable throughout the State. Following the decision of the Commonwealth Conciliation and Arbitration Commission in July 1961 to increase the basic wage, Wages Boards met during July and incorporated the new Commonwealth rates in their determinations. During 1962 a number of Wages Boards met and varied their determinations by making provision for the automatic adjustment of the basic wage to conform to any change in the basic wage determined from time to time in awards of the Commonwealth Conciliation and Arbitration Commission.

On 11 July 1966, following the increase of \$2 in the Commonwealth basic wage for adult males, the rates became \$33.40 and \$25.05 for adult males and adult females respectively.

A table was published in the Appendix to *Labour Report* No. 51, 1964 showing Hobart basic wage rates for adult males and adult females generally adopted by Wages Boards in the period February 1956 to June 1964. Current rates are published in the monthly bulletin *Wage Rates and Earnings*.

#### State basic wage rates

The 'basic' wage rates of State industrial tribunals operative in April 1967 are summarised in the following table. State basic wage rates for adult males and adult females for a long period of years are shown in the Appendix to *Labour Report* No. 51, 1964. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

#### STATE BASIC WAGES: WEEKLY RATES OPERATIVE APRIL 1967(a)

(\$)			
State and locality	Date of operation	Males	Females
New South Wales . . . .	11.7.66	33.50	25.10
Victoria . . . . .	11.7.66	32.70	24.50
Queensland—

Tasmania . . . . .	11.7.66	33.40	25.05

(a) See Special Note on page 339.

(b) Rates apply to whole of State (see page 349).

#### Wage margins

Note. The Special Note on page 339 applies also to this section.

Wage margins have been defined as 'minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are the skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance'.

Marginal rates of wage are determined by Commonwealth and State industrial tribunals. In the Commonwealth jurisdiction prior to 1954 the Commonwealth Court of Conciliation and Arbitration had not made any general determination in respect of wage margins, but general principles of marginal rate fixation had been enunciated by the Court in the Engineers Case of 1924, the Merchant Service Guild Case in 1942 and the Printing Trades Case of 1947. Major determinations affecting margins were made in 1954, 1959, 1963, 1965, and 1966. The decisions of the Commonwealth Court and later the Commonwealth Conciliation and Arbitration Commission have generally been followed by State industrial tribunals in the determination of margins in State awards.

A summary of the judgments of the Commission in 1954, 1959, 1963, 1965, and 1966 affecting margins is given in the following paragraphs.

#### Metal Trades Case, 1954

In a judgment delivered on 5 November 1954 the Commonwealth Court of Conciliation and Arbitration made an order re-assessing the marginal structure in the Metal Trades Award by, in general, raising the current amount of the margin to two and a half times the amount of the margin that had been current in 1937. However, in cases in which the result of that calculation produced an amount less than the existing margin, the existing margin was to remain

unaltered. In effect, this decision increased the margins of a fitter from 52s. (\$5.20) a week to 75s. (\$7.50) a week, increased similarly margins of other skilled occupations, and made no increase in margins of what may generally be described as the unskilled or only slightly skilled occupations under the Metal Trades Award. The new rates operated from the beginning of the first pay-period commencing on or after 13 December 1954.

At the end of its judgment the Court stated that, while its decision in this case related immediately to one particular industry, it was expected to afford general guidance to all authorities operating under the Conciliation and Arbitration Act, or under other legislation which provided for tribunals having power to make references, or being subject to appeal, to the Court, where the wage or salary may properly be regarded as containing a margin. The Court added observations for the guidance of these and of other tribunals 'which may regard decisions of this Court as of persuasive authority'. Further details were published in *Labour Report* No. 46, 1958, pages 101-8.

### Margins Cases, 1959

On 25 August 1959 the Commonwealth Conciliation and Arbitration Commission began considering a number of applications for changes in margins referred to it from the appropriate Commissioner. Applications had been made by various employee organisations for increased margins in Parts I. and II. of the Metal Trades Award, Part II. of the Aircraft Industry Award, the Bank Officials' Award, and the Gold and Metalliferous Mining Award. An application by employers sought to reduce marginal rates in the Metal Trades Award. The Commission decided to hear all these matters together, permitting the applicant unions in respect of Part II. of the Metal Trades and Aircraft Industry Awards, and the Bank Officials' Award to ask first for an interim increase. A summary of the principal decisions of the Commission is given in the following paragraphs. Further details, including extracts from the judgment, were published in Year Book No. 47, pages 455-9.

*Metal Trades Award, Part I.* The employee organisations claimed an increase in the margin for the fitter, as set out in the Metal Trades Award, 1952 (i.e. the award as it existed prior to the Metal Trades Case, 1954—see above), from 52s. (\$5.20) to 134s. (\$13.40) a week and an increase of 157 per cent in the margins for other classifications. The employers counter-claimed for a reduction in margins of 15s. (\$1.50) a week.

The Commonwealth Government intervened, and not only submitted statistical material and an analysis of the economic situation, but also assisted the Commission with an exposition of various factors proper to be taken into account in the fixation of margins. In particular, the Commonwealth emphasised the desirability of flexibility in the workings of the arbitration system.

In its judgment, delivered on 27 November 1959, the Commission rejected the employers' application to reduce margins, and made an order re-assessing the marginal structure in the Metal Trades Award by increasing the existing margins by 28 per cent, the amount of the increase being taken to the nearest 6d. (5c). The new margins applied from the beginning of the first full pay-period commencing in December 1959. The effect of this decision was to increase the margin of the fitter from 75s. (\$7.50) to 96s. (\$9.60) a week and that for the process worker from 22s. (\$2.20) to 28s. (\$2.80).

*Other awards.* The Commission also granted margin increases to workers covered by the Gold and Metalliferous Mining Award, the Metal Trades Award, Part II., the Aircraft Industry Award, Part II., and the Bank Officials' Award. Details of these increases were published in previous issues of the Year Book. Other awards of the Commission were subsequently amended in accordance with the decision in the Metal Trades Award, Part I.

### Margins Case, 1963

Following the conclusion of the 1963 Basic Wage Case, two benches of the Commonwealth Conciliation and Arbitration Commission on 5 February 1963 commenced to hear applications by metal trades unions for increased margins and for three weeks annual leave (see page 354). The two benches sat jointly for the convenience of the parties involved and were constituted as follows: margins case—Kirby C.J. (President), Moore and Ashburner JJ and Commissioner Apsey; three weeks' annual leave case—Kirby C.J. (President), Moore J. (Deputy President) and Commissioner Apsey.

The unions' claim on margins was that the Commission restore, on an assessed basic wage, the relativities within the Metal Trades Award established in 1947 by what is known as the second Mooney formula. Taking £15 7s. (\$30.70) as the assessed basic wage (calculated as the 1947 basic wage adjusted to price changes since 1947) and applying the percentage 48.6, which the fitter's margin was of the 1947 basic wage, the union arrived at a new marginal rate of £7 9s.

(\$14.90) for a fitter, an increase of £2 13s. (\$5.30) on the current margin. This claim of £7 9s. (\$14.90) was 2.86 times the 1947 fitter's margin, and hence the unions sought to have all 1947 margins multiplied by 2.86. This claim was opposed by the employers, who asked that any consideration of marginal increases be deferred for an unspecified time.

The Commonwealth Government intervened in the public interest and made submissions as to the approach to be adopted to marginal fixation generally and to marginal fixation in the metal trades industry, as well as supplying information to the Commission about the economic situation and the Government's assessment of it. The Commonwealth Government neither opposed nor supported the claim. The South Australian Government neither opposed nor supported the claim for marginal increases, but did oppose any change in present relativities. The Queensland Government neither opposed nor supported the application for increases in margins, but submitted certain information regarding possible effects in Queensland. The Commission declined to allow submissions aimed at showing what might happen in State awards if State industrial tribunals followed their past practices with respect to the Commission's decisions.

The Commission concluded its consideration of the indicators with these words:

'... our own investigation of the economy [is] that both from a long term point of view and also from a short term point of view the prospects for the economy may be reasonably regarded with optimism. On a consideration of the whole of the indicators, we conclude that national capacity has increased and that it is likely to continue to increase in the foreseeable future. In these circumstances we are confident that the economy is able to sustain the increase of ten per cent in margins in this award which we consider is otherwise justified.'

At the request of the parties the Commission took the unusual course of making a pronouncement early in the proceedings as to the extent to which the decision in the metal trades case should be used in other industries. The Commission re-affirmed what was said in the 1959 metal trades judgment that the decision would relate to the Metal Trades Award only, although they realized that the margin of the fitter had been used as a standard for other awards. In the present case the Commission stated it was not intended that the decision should be applied automatically outside the metal trades.

The order of the Commission was that the margins for adult males in the Metal Trades Award be increased by ten per cent, the increase to be calculated to the nearest shilling (10c) and to operate from the beginning of the first pay-period to commence on and after 22 April 1963.

#### National Wage Cases of 1965

The effect on margins of the judgment of the Commission in these cases was as follows. With effect from the first pay-period commencing on or after 1 July 1965 each margin in the Metal Trades Award was increased by an amount equal to  $1\frac{1}{2}$  per cent of the sum of the six Capital Cities basic wage and that margin. For further details see pages 342-3.

#### Basic Wage, Margins and Total Wage Cases of 1966

The Commonwealth Conciliation and Arbitration Commission in its judgment of 8 July 1966 on margins deferred any general increase pending a report by Commissioner Winter on a work value investigation of classifications in the Metal Trades Award. Pending this report the Commission decided to grant some immediate relief to low wage earners by inserting a new provision in awards by which it was prescribed that no adult male employee should be paid as a weekly wage for working the standard hours of work an amount less than his appropriate basic wage rate plus \$3.75 a week. This decision operated as from the beginning of the first pay period to commence on or after 11 July 1966. For further particulars see pages 343-4.

#### Margins and Total Wage Cases of 1966 (Interim Margins)

On 5 December 1966 the Commonwealth Conciliation and Arbitration Commission (Gallagher and Moore JJ. and Commissioner Winter) began hearing claims by trade unions for an interim increase in margins pending the final decision in these cases (see judgment of Reference Bench page 344). The hearing continued until 8 December 1966 when the Commission reserved its decision.

On 22 December 1966 the Commission by majority decision (Moore J. and Commissioner Winter, with Gallagher J. dissenting) awarded an interim increase in margins in the following terms.

'We would therefore add to each margin a percentage of the sum of that margin and the Six Capital Cities basic wage. The percentage will vary as follows:

For margins less than \$5	1 per cent
For margins \$5 or more but less than \$7.50	$1\frac{1}{2}$ per cent
For margins \$7.50 or more but less than \$11.20	2 per cent
For margins \$11.20 or more	$2\frac{1}{2}$ per cent

'The increases awarded should be calculated to the nearest 10c provided that an increase of 5c should be taken to be an increase of 10c. This would result in the fitter receiving an increase of \$1.10, the process worker 40c, classification 291 [*other adult male employees with not less than three months experience in the metal trades industry*] 30c, and the duster \$1.30. As to rates such as those contained in Divisions P, Q and R [*extra rates for leading hands, for tradesmen in large power houses, and for employees engaged on ship repairs*], or similar divisions or prescriptions, it is our intention that the percentage increase shall apply to the sum of the Six Capital Cities basic wage plus the margin for the appropriate classification, plus the additional sum of money payable under Divisions P, Q, R [*see above*] or similar divisions or prescriptions. It is not our intention that the percentage increase should be applied twice in the wage of any employee. The sum of all payments above the basic wage will decide the percentage area into which an employee's rate falls. It is our intention that, consistent with past practice and the expressed attitudes of the parties, the decision should, subject to special cases, be of general application in other industries in the federal jurisdiction. We observe that the formula would not affect an increase for an employee earning only the basic wage. This, however, is a margins decision and such a decision never affects such a worker.

'In view of the time of the year and the very great practical difficulties which would arise if our decision were made to operate immediately we consider that this increase should operate from the beginning of the first pay period to commence on or after 23rd January 1967. We also consider that the form of the order should be settled by the Registrar with recourse to a member of the Commission.'

#### National Wage Cases of 1967

See Appendix for details.

### Annual leave

The judgment delivered by the Commonwealth Court of Conciliation and Arbitration in the Commercial Printing Case of 1936, granting one week's annual leave with full pay to employees in the industry, has usually been regarded as the first statement in the Commonwealth jurisdiction of the principles involved in deciding whether or not annual leave should be awarded. Over a period of time annual leave was introduced industry by industry when and if the Judge responsible for the industry considered it proper.

In 1945 the question of annual leave was before the Court, and the Court in its judgment set out what it considered to be the principles to be applied in all applications for an extension of the annual leave period to fourteen days. Alteration of particular awards was left to the discretion of the single judge who heard the application.

Further inquiries into annual leave were conducted in 1960, 1962 and 1963, and the decisions in these inquiries are set out in the following paragraphs. Annual leave for employees under the jurisdiction of State awards, etc. is subject to separate determination, and a brief summary is given on pages 354-5. At present the majority of employees in Australia receive three weeks annual leave at least.

#### Commonwealth

Since 1960, three inquiries have been held following union claims to increase paid annual leave from two to three weeks in Commonwealth Awards. A report on these cases is given on pages 353-4.

*Three Weeks Annual Leave Inquiry, 1960.* In its judgment in this inquiry the Commonwealth Conciliation and Arbitration Commission stated that it had decided to reject the unions' application for three weeks annual leave. Part of the conclusion of the Commission stated:

'We accordingly dismiss this application because of the present economic situation. In doing so we would again repeat what we have said earlier in this judgment that we do not consider that employees under Federal awards have yet achieved all the leisure which they should achieve. We have done no more than decide that the present is not an appropriate time in which to award an extra week's paid leave.'

For further particulars see Year Book No. 49, pages 511-513.

*Three Weeks Annual Leave Inquiry, 1962.* In its judgment in this inquiry the Commonwealth Conciliation and Arbitration Commission made the following announcement:

'We have given careful consideration to the submissions which have been made to us in this case. The applicant unions have asked that we consider the claim a general one, the result to be applied to Federal awards generally. This must result in greater caution on our part in deciding whether or not the application should succeed. Our present intention is that an increase to three weeks' annual leave generally in secondary industry, subject to special cases, should be granted as soon as we are satisfied that the economy is in a position

to cope with the effects of such an increase. However, there are two aspects of the economic arguments about which we are troubled and about which we consider it too early to make any firm decision. These are, firstly, whether our internal economy has sufficiently recovered from the recession of late 1961 and, if so, what is the likely rate of its recovery in the future and, secondly, the effect on Australia of success or failure of the application of the United Kingdom to enter the European Common Market. There have been developments in relation to the latter question since the hearing which both emphasise its importance and the lack of accurate information as to what is going to happen and the short and long term effect on Australia's economy.

'So that we may be able better to assess these matters we have decided to adjourn these proceedings until a date in February or March next which will be announced later when the parties and interveners will be able to make such further submissions on these two matters as they may desire.'

Further details were published in Year Book No. 50, page 496.

*Three Weeks Annual Leave Inquiry*, 1963. On 5 February 1963 the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and Commissioner Apsey, commenced hearing the application, which had been adjourned from May 1962, to vary the Metal Trades Award to provide three weeks paid annual leave, instead of two (*see above*).

The hearing was continued during March and April 1963 jointly with the Metal Trades Margins case hearing (*see pages 351-2*), and in its judgment on 18 April 1963 the Commission said it would implement its intention of granting three weeks annual leave generally in secondary industry, subject to special cases. The Commission announced that the Metal Trades Award would be varied to produce the following result: 'A period of 21 consecutive days' leave shall be allowed to employees who have completed twelve months continuous service by or after 30th November 1963.' Provision for proportionate leave for periods of employment of one month and over was made in respect of employment after 1 June 1963. The application of the new standard of annual leave for secondary industry in other Federal awards would be a matter for individual Commissioners upon proper application being made for variations.

In a decision given on 22 October 1963 the Commission, comprising Wright J. (Acting President), Moore J. (Deputy President) and Commissioner Winter, unanimously rejected an application by employers' organisations firstly for permission, at the employers' discretion, to require employees to take their annual leave in two periods of seven and fourteen days respectively, and secondly that the time after accrual within which leave must be taken should be extended to nine months when leave is taken in one period and twelve months when leave is taken in more than one period.

### New South Wales

Employees in New South Wales in private industry, other than those covered by Federal awards, were granted three weeks annual leave by an amendment to the Annual Holidays Act passed in 1958. In 1964 the State Government granted its employees four weeks annual leave effective from 1 January 1964. From 29 September 1964 annual holiday pay for employees covered by provisions of the Annual Holidays Act has been calculated on the basis of the employee's current weekly earnings instead of current award rates.

### Victoria

Following the decision of the Commonwealth Conciliation and Arbitration Commission in April 1963 (*see above*) individual Wages Boards commenced to alter provisions of their determinations to grant employees an extra week of leave. By September 1963 the majority of Boards had included three weeks annual leave in their determinations.

In December 1963 the Industrial Appeals Court upheld an appeal by employees against the determination of the Photographic Goods Board which stated that an employer may direct the workers or group of workers to take their annual leave in two periods of two consecutive weeks and one week respectively.

### Queensland

In June 1963 the Full Bench of the Industrial Conciliation and Arbitration Commission granted an extra week of annual leave to employees with twelve months continuous service on or after 30 November 1963. This move implemented a previous decision of the Commission in which it was decided, as a matter of policy, to grant increased leave to persons already enjoying two weeks leave.

The decision applied to day workers and non-continuous shift workers receiving two weeks leave; continuous shift workers receiving three weeks leave; and day workers and shift workers receiving additional leave in lieu of extra payment for working on statutory holidays. The order became effective as from 1 June 1963.

The terms of the decision of the Commonwealth Conciliation and Arbitration Commission, as handed down in April 1963 (see page 354) were to apply to awards of the Industrial Conciliation and Arbitration Commission of Queensland with the exception that, in the State awards, *pro rata* payment for leave not taken at the termination of employment was to be expressed at hours per month. The decision did not apply to employees in primary industry—apart from the sugar industry—or those in western areas. Extra leave for these employees was granted as a result of separate applications.

#### South Australia

The Full Bench of the South Australian Industrial Court in May 1963 announced an increased standard of annual leave in the State, adopting three weeks as the standard as fixed by the Commonwealth Conciliation and Arbitration Commission (see page 354).

The Court, as a general indication as to its attitude, expressed the view that annual leave should be taken at a time fixed either by agreement or, if this is not possible, at a time fixed by the employer. The leave should be allowed in two parts and one part must be of at least two weeks duration. These, however, were factors which could vary from award to award and their determination would depend on the needs of the particular industry.

#### Western Australia

Following a general inquiry concerning Annual Leave and Public Holidays the Court of Arbitration in June 1963 adopted three weeks as the new standard for the normal period of annual leave in State awards, with four weeks for seven-day shift workers. The date of operation was the same as that decided by the Commonwealth Conciliation and Arbitration Commission (see page 354). Existing awards and agreements which already provided annual leave in excess of the Court's standard were to be examined separately to ascertain whether special circumstances existed to justify leave greater than the normal standard. The standard number of public holidays was retained at ten a year.

In November 1963 the Court refused an application by employers for the right to split the annual leave into two parts since it decided to follow the decision of most other State tribunals and allow the additional leave in conformity with conditions similar to those prescribed by the Commonwealth Conciliation and Arbitration Commission. The right to split the leave would be allowed by the Court only in exceptional circumstances, unless all the parties concerned agreed to the inclusion of such a provision.

#### Tasmania

Following an amendment to the Wages Board Act in 1961, Wages Boards were permitted to grant employees up to three weeks paid recreational leave. Between June 1962 and early 1963 determinations of Wages Boards were amended to provide for three weeks annual leave for employees, to operate from 1 January 1963.

Generally, most Wages Boards adopted provisions to enable leave to be taken in one consecutive period within six months from the end of the preceding year of employment or, if the employer and employee agree, in two separate periods, the lesser of which shall be of not less than seven consecutive days.

### Long service leave

Paid long service leave, i.e. leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of industrial legislation or industrial awards, etc. in the several States and a brief summary is given in the following paragraphs. The position in regard to Commonwealth award employees is also summarised. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer.

#### Commonwealth

Until May 1964 the Commonwealth Conciliation and Arbitration Commission had not included provision for long service leave in its awards, and had refrained from determining disputes relating to this subject except in the case of the Northern Territory and the Australian Capital Territory (see page 356). Consequently, until then, the provisions of the various State Acts relating to long service leave applied to workers covered by awards of the Commonwealth. The

applicability of long service leave provisions under State law to workers under Commonwealth awards had been tested before the High Court and the Privy Council, and such provisions had been held to be valid.

The Commission's position was set out in its decision, issued on 16 September 1959, regarding disputes on the inclusion, in the *Graphic Arts (Interim) Award, 1957*, of provisions for long service leave. It stated that it should refrain until further order from determining the disputes so far as they concerned long service leave and that if in future the Commission decided that long service leave on a national basis was desirable, it was open to proceed to the making of an award on the matter.

Following the hearing of claims for long service leave provisions by employers in the graphic arts and metal trades industries in August 1963, the Full Bench of the Commonwealth Conciliation and Arbitration Commission on 11 May 1964 announced its decision that long service leave entitlement would be calculated on the basis of thirteen weeks for twenty years of unbroken employment, in respect of employment before 11 May 1964 (or, in New South Wales, 1 April 1963), and at the rate of thirteen weeks for fifteen years in respect of service after 11 May 1964 (or, in New South Wales, 1 April 1963). After further periods of ten years, employees would be entitled to an additional *pro rata* period of leave calculated on the same basis. Those employees who completed an unbroken contract of employment of ten years but less than fifteen years, and whose employment was terminated by death or by the employer for any cause other than serious and wilful misconduct, or by the employee on account of illness, incapacity or domestic or other pressing necessity, would be entitled to *pro rata* payment. The rate of payment while on leave would be current award rates which would be subject to basic wage changes and marginal adjustments which occurred during the leave period.

Following applications by employers in the metal trades and printing industries, the Full Bench of the Commission in a judgment delivered on 23 December 1964 extended the provisions of the awards to cover non-unionist employees. The decision rejected the unions' argument that the Commission had no jurisdiction to make long service leave awards binding in respect of non-unionists. The Commission, in a separate decision, varied the provisions of the awards so that an employer would not be required to grant an employee long service leave until the entitlement equalled thirteen weeks for the first period of entitlement and eight and two-thirds weeks in respect of any subsequent period of entitlement. These variations would be effective on and from 1 December 1964.

*Australian Territories.* Long service leave codes for employees covered by Northern Territory and Australian Capital Territory awards were originally prescribed on 4 December 1961 by the Commonwealth Conciliation and Arbitration Commission in Presidential Session. The Commission decided that employees should be granted three months long service leave after twenty years service with one employer, even if part of this service was outside the Territory. In addition, the Australian Capital Territory code prescribed that employees presently employed might 'go back for a period of 25 years in regard to the calculation of their present or future entitlement of long service leave'. In December 1964 the Commission amended the majority of awards covering employees in the Northern Territory and the Australian Capital Territory by granting long service leave on the basis of thirteen weeks after fifteen years service.

*Stevedoring Industry.* The *Stevedoring Industry Act 1962*, which came into force on 19 November 1962, amended the *Stevedoring Industry Act 1956-1961* by extending the eligibility and qualifying periods of the long service leave provisions of the Act. No changes were made to the entitlement for long service leave, which remained at thirteen weeks after twenty years qualifying service and six and a half weeks for each subsequent ten years qualifying service. The *Stevedoring Industry Act 1966*, which operated from 29 October 1966, reduced the qualifying period for thirteen weeks leave from twenty years to fifteen years.

### New South Wales

Long service leave was first introduced for the majority of workers by the Industrial Arbitration Act, 1951, which provided such leave for workers under State awards. This Act was replaced by the Long Service Leave Act, 1955, which extended the benefits to any worker within the State. An amendment to the Act in April 1963 provided for three months long service leave for fifteen years continuous service with the same employer and proportionate amounts on this basis after a minimum of five years service. The Long Service Leave (Metalliferous Mining Industry) Act, 1963 conferred on certain workers in the metalliferous mining industry the right to three months long service leave after ten years service. This Act operated from 1 January 1964.

### Victoria

The *Factories and Shops (Long Service Leave) Act* 1953 first provided for long service leave for workers in Victoria, the provisions of this Act being subsequently incorporated in the Labour and Industry Act. Leave provided for was thirteen weeks for twenty years continuous service with the same employer. Contributions by employers to retirement schemes were to be taken into consideration in dealing with exemptions from the Act.

An amendment to the Labour and Industry Act in December 1964 granted employees, from 1 January 1965, thirteen weeks' leave after fifteen years continuous service. Workers who terminated their employment after ten years but less than the qualifying fifteen years would be able to obtain a *pro rata* entitlement subject to the existing special conditions of the Act. Following amendment to the Public Service Act in 1964, public servants became entitled to four and a half months leave after fifteen years service instead of six months after twenty years.

### Queensland

In 1952 The Industrial Conciliation and Arbitration Acts were amended to include long service leave provisions for employees within the jurisdiction of the Industrial Court, and the Acts were amended again in 1955 to extend these provisions to any employee in respect of whose employment there was not in force an award or industrial agreement under the Act and to seasonal workers in sugar mills and meat works. Leave provided for was thirteen weeks for twenty years continuous service with the same employer.

An amendment to The Industrial Conciliation and Arbitration Acts was passed and assented to in December 1964 granting employees long service leave of thirteen weeks after fifteen years continuous service. The amendment retained *pro rata* leave entitlement after ten years service and operated on and from 11 May 1964.

### South Australia

The Long Service Leave Act, passed in 1957, exempts a large number of industrial agreements, with wide industrial coverage, from specifying long service leave for employees. For those covered by the Act leave provided for is seven days in the eighth and in each subsequent year of continuous service. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions under the Act.

On 24 December 1964 long service leave of thirteen weeks after fifteen years continuous service in respect of employment on and from 11 May 1964 was granted to shop assistants by agreement between employers and employees.

### Western Australia

The Long Service Leave Act was passed in 1958, but it did not apply to employees whose conditions of work were regulated under the Western Australian Industrial Arbitration Act. The Court of Arbitration of Western Australia in an order dated 1 April 1958 incorporated in most of the awards and agreements within its jurisdiction provisions similar to those in the Long Service Leave Act. Leave provided for was thirteen weeks for twenty years continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

In September 1964 the Industrial Commission began to amend the long service leave provisions of its awards and industrial agreements to provide for thirteen weeks leave after fifteen years service on or from 1 October 1964. *Pro rata* entitlement would accrue after ten years service. The *Long Service Leave Amendment Act (No. 2), 1964*, introduced in October 1964, was in the same terms as the amendments made by the Commission to the various awards and agreements.

### Tasmania

The Long Service Leave Act, which was passed in 1956, provided for thirteen weeks leave for twenty years continuous service with the same employer. Contributions by employers to retirement schemes could be taken into consideration in dealing with exemptions from the Act. An amendment to the Long Service Leave Act, assented to on 17 December 1964, granted thirteen weeks leave after fifteen years continuous service. The amendment operated on and from 11 May 1964.

## INDUSTRIAL DISPUTES

Detailed information regarding industrial disputes involving stoppage of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in the Appendix to *Labour Report No. 52*, 1965 and 1966.

Particulars of all disputes in progress during the year are included in the annual figures, whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of 'the number of disputes' and 'workers involved' in disputes which commenced in any year, and were still in progress during the following year, are included in the figures for both years.

The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1966, classified according to industry groups.

INDUSTRIAL DISPUTES(a): INDUSTRY GROUPS, AUSTRALIA, 1966

Industry group	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
		Directly	Indirectly (b)	Total		
Agriculture, grazing, etc.	..	..	..	..	..	..
Coal mining	212	46,687	..	46,687	67,870	660.0
Other mining and quarrying	17	7,787	630	8,417	19,558	304.9
Engineering, metals, vehicles, etc.	385	113,785	2,161	115,946	150,307	1,452.0
Textiles, clothing and footwear	9	1,494	19	1,513	2,649	23.0
Food, drink and tobacco	124	38,387	3,228	41,615	94,505	823.8
Sawmilling, furniture, etc.	..	..	..	..	..	..
Paper, printing, etc.	17	6,445	..	6,445	8,367	87.8
Other manufacturing	110	39,614	1,065	40,679	105,791	1,054.9
Building and construction	248	76,853	362	77,215	144,479	1,549.6
Railway and tramway services	14	19,027	..	19,027	42,454	417.3
Road and air transport	41	4,613	2,391	7,004	67,567	688.3
Shipping	7	2,423	..	2,423	2,479	21.9

Amusement, hotels, personal service, etc.	14	344	25	369	955	8.6
Other industries(c)	26	18,532	..	18,532	20,331	159.3
<b>Total</b>	<b>1,273</b>	<b>384,970</b>	<b>9,881</b>	<b>394,851</b>	<b>732,084</b>	<b>7,302.5</b>

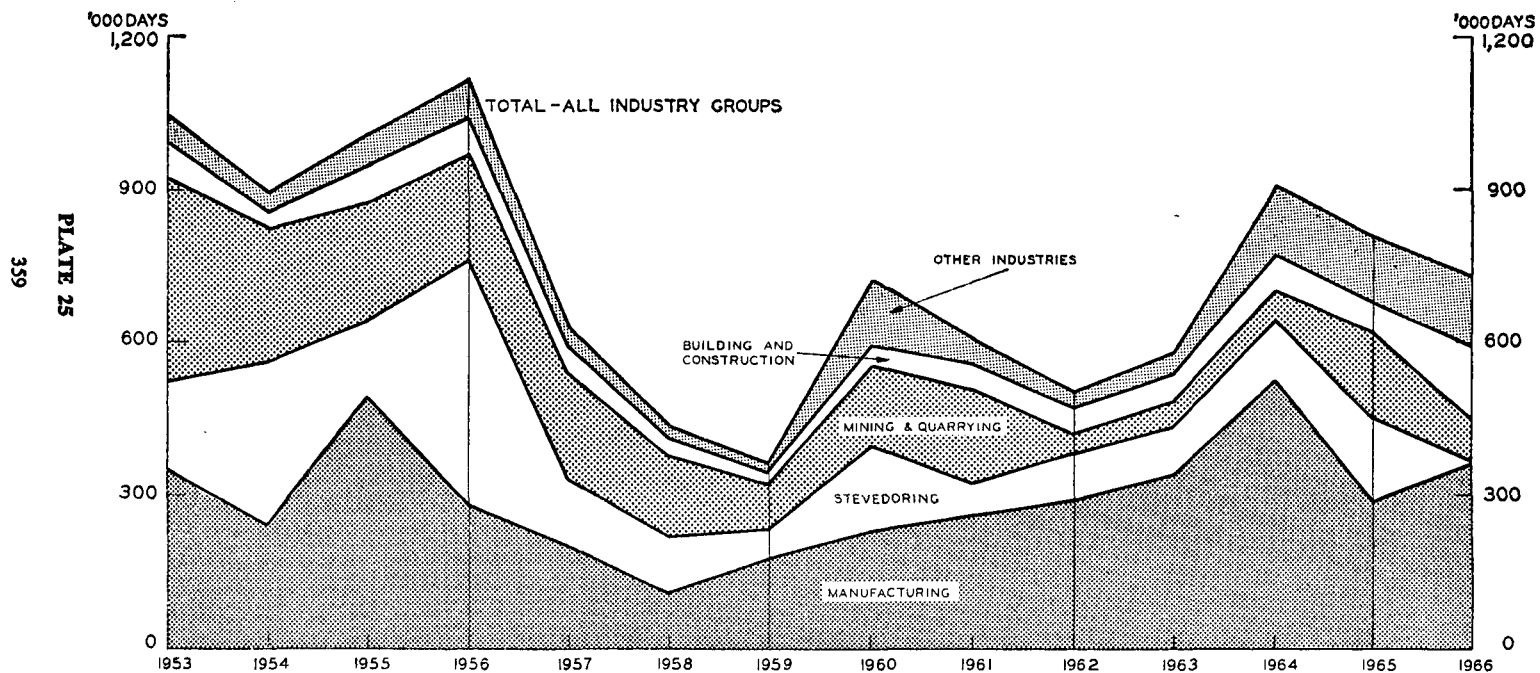

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes Communication; Finance and property; Wholesale and retail trade; Public authority (n.e.i.); and Community and business services.

A graph showing, for the years 1953 to 1966, the working days lost as a result of industrial disputes in the main industry groups is shown on plate 25 opposite.

The following table gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1962 to 1966.

# INDUSTRIAL DISPUTES, AUSTRALIA, 1953 TO 1966

## WORKING DAYS LOST—INDUSTRY GROUPS

## INDUSTRIAL DISPUTES(a): STATES AND TERRITORIES, 1962 TO 1966

State or Territory	Year	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
			Directly	Indirectly (b)	Total		
New South Wales	1962	752	195,344	13,623	208,967	303,400	2,571.7

	1966	1,273	384,970	9,881	394,851	732,084	7,302.5

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

## Duration of disputes

The duration of each industrial dispute involving a loss of work, i.e. the time between the cessation and resumption of work, has been calculated in working days, exclusive of Saturdays, Sundays and holidays, except where the establishment involved carries on a continuous process (e.g. metal smelting and cement manufacture).

The following table shows, for the year 1966, industrial disputes in coal mining, stevedoring and other industries classified according to duration.

## INDUSTRIAL DISPUTES(a): DURATION, BY INDUSTRY GROUP, AUSTRALIA, 1966

Duration (working days)	Number	Workers involved(b)		Working days lost		Estimated loss in wages (\$'000)
		Number	Proportion of total (per cent)	Number	Proportion of total (per cent)	
COAL MINING						
1 day and less . . . . .	148	23 157	49.6	15,844	23.3	155.7
2 days and more than 1 day . . . . .	37	18,900	40.5	26,914	39.7	262.5
3 days and more than 2 days . . . . .	12	1,103	2.4	2,892	4.3	34.8

20 days and less than 40 days . . . . .	2	2,828	0.7	62,454	8.5	629.4
40 days and over . . . . .	2	203	0.1	13,044	1.8	150.6
Grand total . . . . .	1,273	394,851	100.0	732,084	100.0	7,302.5

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. indirectly involved. See footnote (b) to table on page 360.

(b) Includes workers

**Causes of disputes**

Stoppages are analysed in three separate groups, 'Coal mining', 'Stevedoring', and 'Other industries'. Causes have been grouped under four main headings: (1) Wages, hours and leave; (2) Physical working conditions and managerial policy; (3) Trade unionism; (4) Other causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave; minor questions regarding the claims to pay or leave by individual employees are included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, including disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff, and disputes arising from the computation of wages, leave, etc., in individual cases. The third group includes stoppages over employment of non-unionists, inter-union and intra-union disputes, disputes over recognition of union activities, and sympathy stoppages in support of employees in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g. political matters, and cases (occurring mainly in the coal mining industry) where the cause of the stoppage is not officially made known to the management.

The following tables show particulars of industrial disputes classified according to cause, in three industry groups for 1966, and according to cause for the years 1962 to 1966.

**INDUSTRIAL DISPUTES(a): CAUSES, BY INDUSTRY GROUP, AUSTRALIA, 1966**

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Includes workers indirectly involved. See note (b) to table on page 360. (c) Differences between these figures and corresponding figures in tables on pages 358, 360-3 are due to disputes which were incomplete at the end of the year.

### WORKERS' COMPENSATION LEGISLATION

A conspectus of the principal provisions of Workers' Compensation Acts in force in Australia at 31 December 1964 is included in *Labour Report* No. 51, pages 215-23.

### LABOUR ORGANISATIONS

#### Labour organisations in Australia

The figures shown in this section are prepared from a special collection of membership of labour organisations at 31 December each year. The affairs of single unions are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information. More detailed statistics appear in the annual *Labour Report*.

#### Trade Unions

The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organisation, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organisations: (a) the local independent; (b) the State; (c) the interstate; and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organisation of interstate or federated unions vary greatly in character. In some unions the State organisations are bound together under a system of unification with centralised control,

while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. Statistics relating to interstate or federated trade unions are shown in the table on page 366.

Returns showing membership by States and Territories at 31 December each year are obtained for all trade unions and employee organisations. The following table shows the position at the end of each of the years 1964 to 1966.

### TRADE UNIONS: NUMBER AND MEMBERSHIP, STATES AND TERRITORIES, 1964 TO 1966

State or Territory	Number of separate unions			Number of members ('000)			Percentage increase in membership(a)		
	1964	1965	1966	1964	1965	1966	1964	1965	1966
New South Wales . . . . .	223	222	220	795.1	825.8	817.3	1.6	3.9	-1.0
Victoria . . . . .	157	156	154	525.8	537.8	539.4	2.1	2.3	0.3
Queensland . . . . .	141	140	140	350.6	353.3	351.6	3.3	0.8	-0.5
South Australia . . . . .	137	137	136	166.9	174.0	178.5	3.6	4.2	2.6
Western Australia . . . . .	154	155	157	135.1	139.2	146.6	4.7	3.1	5.3
Tasmania . . . . .	111	109	110	59.9	63.4	65.5	4.2	6.0	3.3
Northern Territory(b) . . . . .	30	33	38	3.4	3.5	4.1	(b)	(b)	(b)
Australian Capital Territory(b) . . . . .	59	64	66	18.0	19.1	20.7	(b)	(b)	(b)
<b>Australia . . . . .</b>	<b>(c) 340</b>	<b>(c) 334</b>	<b>(c) 330</b>	<b>2,054.8</b>	<b>2,116.2</b>	<b>2,123.5</b>	<b>2.6</b>	<b>3.0</b>	<b>0.3</b>

(a) On preceding year. (b) In some cases union members in the Territories associated with State organisations are reported under the heading of that State. The annual figures reflect, in part, progressive improvements to more accurate reporting, and the comparability of totals for the Territories is affected by this aspect. (c) Without interstate duplication. See below.

Minus sign (—) denotes decrease.

In the preceding table, under the heading 'Number of separate unions', a union reporting members in a State or Territory is counted as one union within that State or Territory. The figures do not add to the Australian total (shown in the last line) because a union represented in more than one State or Territory is included in the figure for each State or Territory in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for the years 1912 to 1964 is included in Appendix XII to *Labour Report* No. 51.

The following table shows the number of unions and members thereof in Australia at the end of each of the years 1964 to 1966 classified according to industry group. The table does not supply a precise classification of trade union members by industry because where the members of a union are employed in a number of industries they have been classified to the predominant industry for the union concerned.

### TRADE UNIONS: INDUSTRY GROUPS, AUSTRALIA, 1964 TO 1966

Industry group	1964		1965		1966	
	No. of unions (a)	No. of members	No. of unions (a)	No. of members	No. of unions (a)	No. of members
Agriculture, grazing, etc. . . . .	3	63.3	3	63.9	3	61.3
Mining and quarrying . . . . .	12	35.2	12	35.9	12	35.7
Manufacturing—						
Engineering, metals, vehicles, etc. . . . .	12	312.8	11	328.0	10	331.8
Textiles, clothing and footwear . . . . .	6	109.9	6	113.7	6	107.8
Food, drink and tobacco . . . . .	33	130.9	32	130.0	32	134.5
Sawmilling, furniture, etc. . . . .	6	39.5	6	39.5	6	38.9
Paper printing, etc. . . . .	6	53.2	6	54.7	5	54.8
Other manufacturing . . . . .	29	95.0	28	95.1	27	94.7
<b>All manufacturing groups . . . . .</b>	<b>92</b>	<b>741.3</b>	<b>89</b>	<b>761.1</b>	<b>86</b>	<b>762.4</b>
Building and construction . . . . .	24	146.9	24	150.9	24	143.5
Railway and tramway services . . . . .	24	131.2	24	132.0	24	129.3
Road and air transport . . . . .	11	68.0	11	71.7	11	72.9
Shipping and stevedoring . . . . .	14	35.1	14	35.4	13	33.9

Wholesale and retail trade . . . . .	12	86.3	12	86.2	12	86.5
Public administration(b) . . . . .	72	389.2	71	405.9	71	413.5
Amusement, hotels, personal service, etc. . . . .	22	54.8	22	56.3	22	55.8
Other industries(c) . . . . .	37	170.6	37	179.6	37	186.0
<b>Total . . . . .</b>	<b>340</b>	<b>2,054.8</b>	<b>334</b>	<b>2,116.2</b>	<b>330</b>	<b>2,123.5</b>

(a) Without interstate duplication. See above. (b) Includes communication, municipal, etc. (c) Includes community and business services.

*Number of Trade Union members and proportion of wage and salary earners.* The following table shows the estimated percentages of wage and salary earners in employment who are members of trade unions. As estimates of wage and salary earners in employment do not include employees engaged in rural industry or in private domestic service, the percentages have been calculated on figures obtained by adding to the end of year estimates the number of employees in rural industry and in private domestic service recorded at the nearest available population census. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table must be regarded as approximations.

**TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND SALARY EARNERS, AUSTRALIA, 1954 TO 1966**

Year	Number of members ('000)			Proportion of total wage and salary earners <sup>(a)</sup> (Per cent)		
	Males	Females	Persons	Males	Females	Persons
1954 . .	1,448.2	339.3	1,787.5	66	45	61
1961 . .	1,521.9	372.7	1,894.6	63	41	57
1964 . .	1,624.0	430.8	2,054.8	62	41	56
1965 . .	1,663.4	452.8	2,116.2	62	41	56
1966 . .	1,657.5	466.0	2,123.5	60	40	54

(a) See text above.

*Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated trade unions in 1966.

**INTERSTATE OR FEDERATED TRADE UNIONS<sup>(a)</sup>: AUSTRALIA, 1966**

	Unions operating in—					Total
	2 States	3 States	4 States	5 States	6 States	
Number of unions . . .	10	4	22	31	75	142
„ „ members ('000) .	20.9	21.0	243.3	402.5	1,242.0	1,929.7

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory or the Australian Capital Territory or both.

**Organisations registered under the (Commonwealth) Conciliation and Arbitration Act**

Under Part VIII. of the *Conciliation and Arbitration Act* 1904–1966 any association of employers in an industry who have, or any employer who has, employed, on an average taken per month, not less than 100 employees during the six months preceding application for registration, and any association of not less than 100 employees in any industry, may be registered. However, the Public Service Arbitration Act provides that an association of less than 100 employees may be registered as an organisation under the Conciliation and Arbitration Act if its members comprise at least three-fifths of all persons engaged in that industry in the Public Service. Such organisations are included in the figures shown below. Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. At the end of 1966 the number of employers' organisations registered under the provisions of the Act was 69. The number of unions registered at the end of 1966 was 152, with membership of 1,772,000, representing 83 per cent of the total membership of all trade unions in Australia. Lists of organisations of employees and of employers registered under this Act are contained in the *Industrial Information Bulletin*, Vol. 22, No. 1, January 1967 published by the Department of Labour and National Service.

### Central Labour Organisations

*Trades and Labour Councils.* Delegate organisations, usually known as Trades Hall Councils or Labour Councils and consisting of representatives of a number of trade unions have been established in the capital cities and in a number of other centres in each State. In the centres where these councils exist most unions or local branches operating in the district are affiliated. The district councils obtain their finance by means of a *per capita* tax on members of affiliated unions. In States other than Western Australia the district councils are generally independent bodies, although provision usually exists in the rules of the central council in the capital city for the organisation of district councils, or for their representation on the central council. In Western Australia there was until 1962 a unified system or organisation with a central council and district councils within the framework of the Australian Labor Party. In 1962 this organisation was abolished and a separate Trades and Labour Council, with provincial councils, was to be established outside the political organisation. At the end of 1963 only the central council (the Trades and Labour Council of Western Australia) was operating, but a number of provincial councils were established from 1964.

The following table shows, for each State and Territory, the number of trades and labour councils and the number of affiliated unions or branches of unions at the end of 1966. The figures for the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

**CENTRAL LABOUR ORGANISATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, STATES AND TERRITORIES, 1966**

	N.S.W	Vic.	Qld	S.A.	W.A. (a)	Tas.	N.T.	A.C.T.	Total
Number of councils . . .	11	9	13	5	4	5	..	1	48
Number of unions and branch unions affiliated .	351	275	176	150	145	140	..	20	1,257

(a) See explanation in text above.

As well as trades and labour councils there are councils organised on trade lines and composed of delegates from separate unions whose members' interests are closely connected by reason of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the metal trades, or with the building trades, are examples of such organisations.

*Australian Council of Trade Unions.* A central labour organisation, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May 1927. The A.C.T.U. consists of affiliated unions and affiliated Metropolitan and/or State Labour Councils and Provincial Councils. The Metropolitan or State Labour Council in each State is the State Branch of the A.C.T.U. and it has the right to appoint one representative to act on the executive of the Council. In addition to the representatives of the State Branches of the A.C.T.U., six delegates are elected by and from Congress, one from each of the following industry groups: Building, Food and distributive services, Manufacturing, Metal, Services, and Transport. To this executive are added the four officers, namely, President, two Vice-Presidents, and Secretary, who are elected by and from the Australian Congress of Trade Unions.

The ordinary meetings of Congress are held in alternate years. The 1965 Biennial Congress was held in September 1965, and was attended by 573 delegates from affiliated organisations, State branches of the A.C.T.U., and provincial councils. Special meetings of Congress are held whenever deemed advisable by decision of the executive, as approved by the majority of its branches, or by resolution of unions representing one-third of the total membership of the A.C.T.U.

The objectives of the A.C.T.U. are the socialisation of industry, i.e. production, distribution and exchange, and the utilisation of the resources of Australia for the benefit of the people—ensuring full employment, with rising standards of living, real security, and full cultural opportunities for all. The methods to be adopted are: the closer organisation of the workers by the transformation of the Australian trade union movement from the craft to an industrial basis, by grouping of unions in their respective industries and by the establishment of one union in each industry; the consolidation of the Australian labour movement with the object of unified control, administration, and action; the centralised control of industrial disputes; educational propaganda among unions; and political action to secure satisfactory working-class legislation.

The A.C.T.U. was the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference. All the major unions are affiliated with the A.C.T.U.

### International Labour Organisation

The International Labour Organisation (I.L.O.) was established on 11 April 1919 as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII. of the Treaty of Versailles and formed part of other treaties of peace. During the years between its establishment and the outbreak of the 1939-45 War the I.L.O., with headquarters at Geneva, played a leading role in promoting the improvement of labour conditions throughout the world.

In 1940, in order to ensure that the I.L.O. should be able to continue to function freely, a working centre was established at Montreal, Canada. In 1946 the Organisation became the first of the specialised agencies of the United Nations. Under the terms of agreement the United Nations recognises the I.L.O. as a specialised agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organisations, social security and other aspects of social policy. The Organisation has three basic parts. These are the International Labour Conference, its highest authority, which as a rule meets annually; the Governing Body, its executive council, which usually meets three times each year; and the International Labour Office, which provides the secretariat of the Organisation. The Conference is composed of delegations from the Member States of the Organisation. At the end of 1965 there were 115 Member States, each of which is entitled to be represented by four delegates—two government, one representing employers and one representing workers, together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty-four governments and twelve employers' and twelve workers' representatives. Of the twenty-four government representatives, ten are from the ten countries of major industrial importance and fourteen are elected by the remaining governments. These latter fourteen government representatives and the twelve employers' and twelve workers' titular delegates and the deputy members of the three groups are elected by their groups at the Conference every three years. Particulars are given in *Labour Report* No. 51 of the proceedings of International Labour Conferences up to the 47th Session, held in Geneva in June 1964. For details of I.L.O. conventions ratified by Australia, see *Labour Report* No. 51, pages 235-6.

## CHAPTER 12

### OVERSEAS TRANSACTIONS

This chapter includes statistics of overseas trade, balance of payments and overseas investment by private investors, but through limitations of space the statistics are, in the main, restricted to summarised form. For detailed information *see* the annual bulletins on Overseas Investment, *Overseas Trade* (preliminary and final), *Australian Exports*, and *Imports Cleared for Home Consumption* and the half-yearly bulletin *The Balance of Payments*. Preliminary information is available in summary form in the statements *Balance of Payments: Quarterly Summary*; *Overseas Investment: Preliminary Estimates* (annual); *Australian Overseas Trade: Total Recorded Overseas Trade* (monthly); and *Overseas Trade: Imports by Commodity Divisions* (monthly). Current information is included in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and in more detail in the *Monthly Bulletin of Overseas Trade Statistics*. There are also the following additional mimeographed statements: *Exports of Wool* (monthly), *Overseas Trade with Major Groups of Countries* (quarterly), and *Trade of Australia with Eastern Countries* (annually). Additional unpublished details of imports and exports can be supplied on request.

A subscription service is available from this Bureau to provide for the detailed requirements of individual users of overseas trade statistics. These special periodical returns are obtainable monthly or quarterly and show trade according to items of the Australian Export and Import Commodity Classifications or statistical key code dissections of Australian Customs Tariff items.

### OVERSEAS TRADE

#### Constitutional provisions and legislation

##### Constitutional provisions

By the Commonwealth of Australia Constitution Act, section 51 (1), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1 January 1901. Other references to trade and commerce are contained in sections 87 to 95 of the Constitution (*see pp. 17-18*).

##### Commonwealth legislation

Commonwealth legislation affecting overseas trade includes: the Customs Act, the Customs Tariff and the Customs Tariff (Dumping and Subsidies) Act. The Customs Act is the administrative Act under which the Department of Customs and Excise operates. The Customs Tariff provides the statutory authority for imposing the actual rates of duty operative from time to time, while the Customs Tariff (Dumping and Subsidies) Act provides protection for Australian industry against various forms of unfair trading.

##### The Customs Tariff

The first Commonwealth Customs Tariff was introduced by Resolution on 8 October 1901, from which date uniform duties came into effect throughout Australia. The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to certain imports from countries of the Commonwealth. Duties are imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue, but in its protective character the tariff has an important influence on the Australian economy.

The present tariff provides for general and preferential rates of duty, and its structure is based on the 'Brussels Nomenclature' which has its origins in the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, signed in Brussels on 15 December 1950. Australia has operated a 'Brussels-type' tariff since 1 July 1965.

**Preferential rates.** Preferential rates apply to goods the produce or manufacture of the United Kingdom, Ireland, Canada, New Zealand, Papua, and New Guinea, and certain goods the produce or manufacture of specified countries, provided that such goods comply with the laws in force at the time affecting the grant of preference.

The following are the rules of origin for preference purposes.

'151.—(1.) For the purposes of this Act and the *Customs Tariff* 1966 (other than section twenty of the last-mentioned Act), goods shall be treated as the produce of a country if they are unmanufactured raw products of the country.

(2.) For the purposes of this Act and the *Customs Tariff* 1966 (other than section twenty or a direction under section twenty-two of the last-mentioned Act), goods shall be treated as the manufacture of a country—

(a) if the goods were wholly manufactured in the country from materials of one or more of the following classes:—

(i) unmanufactured raw products;

(ii) materials wholly manufactured in the country or in Australia, or in the country and in Australia; and

(iii) imported materials that the Minister has, in relation to the country, determined, by notice published in the *Gazette*, to be manufactured raw materials; or

(b) if the goods were partly manufactured in the country, the process last performed in the manufacture of the goods was performed in the country and—

(i) not less than three-quarters, or, in a case where the country is New Zealand, one-half, of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia;

(ii) in a case where the goods are goods of a class or kind not commercially manufactured in Australia, not less than one-quarter of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia; or

(iii) in a case where the country is New Zealand, not less than three-quarters of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of New Zealand and the United Kingdom or of New Zealand, Australia and the United Kingdom.

'151A.—(1.) For the purposes of this Act and the *Customs Tariff* 1966 (other than section twenty or a direction under section twenty-two of the last-mentioned Act), goods shall not be treated as the produce or manufacture of the United Kingdom, Canada, New Zealand, Ireland, Malawi, Southern Rhodesia, Zambia, the Territory of Papua or the Territory of New Guinea unless they have been shipped from that country to Australia and, except where the Collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(2.) The last preceding sub-section does not apply—

(a) to goods the produce or manufacture of a country other than New Zealand that are imported into Australia from New Zealand; or

(b) to goods the produce or manufacture of a country other than the Territory of Papua or the Territory of New Guinea that are imported into Australia from the Territory of Papua or the Territory of New Guinea.

(3) For the purposes of a direction under section twenty-two of the *Customs Tariff* 1966 goods shall not be treated as the produce or manufacture of a country unless they have been shipped from that country to Australia and, except where the collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(4) For the purposes of this section—

(a) goods may be treated as having been shipped from the Territory of Papua or the Territory of New Guinea if they have been shipped from either of those territories; and

(b) goods may be treated as having been shipped from Malawi, Southern Rhodesia or Zambia if they have been shipped from any of those countries or from Lourenco Marques or Beira in Mozambique.'

**General rates.** General rates apply to goods from all countries which do not qualify for preferential rates of duty under a particular tariff classification.

**By-law provisions.** Customs By-laws and Ministerial Determinations are instruments made by the Minister for Customs and Excise under the authority of sections 271 to 273D of the *Customs Act* by which goods may be admitted free of duty or at rates of duty lower than those normally applicable. By-laws and determinations may only be made under a by-law classification, which is a tariff classification containing the words 'as prescribed by by-law'. Such a classification sets out the by-law duty rates which will apply to goods only when such goods are included in a by-law or determination made under that classification. By-law admission of goods is in general guided

by the use to which the goods are to be put, e.g. the goods must be for a use which will assist economic or industrial development. A prerequisite for by-law admission is that suitably equivalent goods be not reasonably available from Australian production. A by-law covers goods by general description with no limit on quantity, and may be used by any importer of the goods. A determination covers a specific quantity of particular goods, and may be used only by the importer mentioned in the determination.

**Primage duties.** In addition to the ordinary duties of customs imposed by the Customs Tariff, *ad valorem* primage duties at rates of five per cent or ten per cent are charged on some goods according to the types of goods and origin thereof. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos (Keeling) Islands, Christmas Island, Papua, and New Guinea are exempt from primage duty.

**Anti-dumping duties.** The Customs Tariff (*Dumping and Subsidies*) Act 1961–1965 provides protection for Australian industry against various forms of unfair trading. Under this Act dumping duty may be imposed on goods that are sold to Australian importers at a price which is less than the normal value of the goods, where this causes or threatens material injury to an Australian industry. 'Normal value' under the Act means:

- (a) fair market value in the country of export;
- (b) price in the country of export to a third country;
- (c) fair market value in a third country; or
- (d) cost of production, plus f.o.b. charges, plus selling costs and profit.

Countervailing duty may be levied on goods in respect of which any subsidy, bounty, reduction or remission of freight, or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods. The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

#### Import controls—Customs (Import Licensing) Regulations

A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the Customs (Import Licensing) Regulations. Following the gradual relaxation of the restrictions from the end of the War, import licensing was reimposed on 8 March 1952 and continued in force until 18 October 1962. From that date restrictions were removed from all commodities with the exception of some goods retained under control for reasons associated with the protection of Australian industry. Further information on import controls is contained in Year Book No. 51, page 492.

#### Export controls and incentives

**Commodity control.** Section 112 of the Customs Act provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia, and that this power may be exercised by: (a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the Customs (Prohibited Exports) Regulations.

**Exchange control—Banking Act 1959–1966.** As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III. of the Banking (Foreign Exchange) Regulations, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV. of the Banking Act to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds \$A250, or where jewellery and other articles of high intrinsic worth either exceed \$A2,000 in value or have not been the personal property of the passenger for at least twelve months.

**Export incentives.** The Commonwealth Government provides taxation concessions as financial incentives to export. A special income tax allowance for export market development expenditure is designed to encourage firms to incur promotion expenditure in advance of export sales and to assist exporters and potential exporters to expand sales in the existing markets and to enter new overseas markets. The allowance is in the form of a special deduction equal and additional to the ordinary deduction allowable in respect of specified expenses allowable in determining taxable income. Rebates of pay-roll tax are also granted to employers whose export sales of goods or property rights have increased above their average annual level in a base period. The rebate is available in the first place to employers who are producers for export, but a producer for export may issue an export certificate to an employer who has supplied components embodied in the final product.

#### Trade descriptions

The *Commerce (Trade Descriptions) Act 1905-1966* gives power to require the application of a proper trade description to certain prescribed goods imported into or exported from Australia. Goods which must bear a prescribed trade description upon importation into Australia are specified in the *Commerce (Imports) Regulations*. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

### Government authorities

#### Tariff Board

The *Tariff Board Act 1921-1966* provides for the appointment of a Tariff Board consisting of eight members. Of these, two must, and three may, be members of the Commonwealth Public Service at the time of their appointment (or first appointments in the case of re-appointments). Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the Government on matters relating to the protection and encouragement of Australian industry.

The Minister of State for Trade and Industry is required to refer to the Board for inquiry and report the following matters: the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Minister may refer the following matters to the Tariff Board for inquiry and report: the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters: the classification of goods in the Customs Tariff or Excise Tariff and matters in connection with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the *Customs Tariff (Dumping and Subsidies) Act 1961-1965*.

Where a matter of the necessity for new or increased duties on any goods has been referred to the Board for inquiry and report, the Board may, in its report, recommend the restriction of the importation of those goods for such period as is specified in the report.

Inquiries conducted by the Board relating to a revision of the Tariff, a proposal for a bounty, a question under the Customs Tariff (Dumping and Subsidies) Act, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods, are held in public, and evidence in such inquiries is taken in public on oath, unless the Board accepts evidence as confidential or in the form of a written statement by a witness on oath. The Board is required to make available to the public the contents of any such written statement except any matter which it accepts as confidential.

#### Special Advisory Authority

The Minister for Trade and Industry may also request a Special Advisory Authority to inquire into cases where urgent action appears necessary to protect an Australian industry against import competition pending receipt and consideration of a full report by the Tariff Board. The Special Advisory Authority's report must be submitted to the Minister within thirty days of the making of the request. Temporary protection recommended by a Special Advisory Authority may be imposed, but may only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

## Trade agreements

### Multilateral—General Agreement on Tariffs and Trade

The General Agreement on Tariffs and Trade (G.A.T.T.), which came into force on 1 January 1948, is a multilateral trade treaty designed to facilitate trading relations between participating countries by reducing tariff and other barriers to the free interchange of goods. The Agreement provides a framework within which negotiations can be held to reduce barriers to trade, and a structure for embodying the results of such negotiations in a legal instrument. Features of the Agreement are the schedules of tariff concessions participating countries have negotiated with each other, the application of most-favoured-nation treatment among the participants, the avoidance of trade discrimination, and a code of agreed commercial policy rules for international trading. Each participating country retains the right (a) to impose new duties for protective purposes, except in respect of commodities where rates of duty have been fixed in negotiations under the Agreement; (b) to impose import restrictions to protect the balance of payments; and (c) to take emergency action where any industry is endangered by reason of any obligation incurred under the Agreement.

There have been five main tariff negotiations under the provisions of the Agreement, and a number of smaller scale negotiations preceding the accession of individual countries. As a result the tariff rates for many items entering into world commerce have been reduced or bound against increase. Australia has obtained tariff concessions from individual countries on a number of her principal or potential exports to them, as a result both of direct negotiation by Australia and of negotiation by other countries. In the latter case the benefits occurred through the operation under the Agreement of the most-favoured-nation principle. A sixth series of tariff negotiations, the Kennedy Round, based on a plan for linear tariff cuts on all classes of products, including agricultural and primary products with a minimum of exceptions, and on the reduction of non-tariff barriers to trade, began in May 1964.

Increasing attention has been focussed in G.A.T.T. on specific trade and development problems of developing countries, and in February 1965 a new Part IV of G.A.T.T., aimed at helping developing countries solve these problems, came into force on a *de facto* basis. The new Part IV, which received legal recognition on 27 June 1966, gives a contractual and legal basis for commitments on individual and joint action by contracting parties, aimed at ensuring that the less-developed countries can increasingly find the means to raise standards of living and promote rapid economic development through participating in international trade and sustained growth of their export earnings.

Up to the end of January 1967 the contracting parties had held twenty-three sessions, nearly all in Geneva, to deal with matters arising from the administration of the Agreement. As a general rule the contracting parties meet once a year, although in a few instances they have met twice. In 1960 a Council of Representatives was established to undertake work, both of an urgent and of a routine character, between the regular sessions of the contracting parties. Some of the provisions of the Agreement were revised in 1954 and 1955. The revised Agreement contains tighter provisions on non-tariff barriers to trade, and allows more freedom for countries to revise individual tariff items which had been bound against an increase in tariff negotiations under the Agreement.

Since G.A.T.T. has not been accepted definitively by any country, the Agreement is at present being applied pursuant to a Protocol of Provisional Application. At the end of January 1967 seventy countries, whose foreign trade represents about eighty per cent of the total volume of world trade, were full contracting parties to the Agreement, four had acceded provisionally, eight applied the Agreement on a *de facto* basis, and two participated under special arrangements.

### Bilateral agreements

*The United Kingdom.* The original United Kingdom and Australia Trade Agreement (Ottawa Agreement) was signed on 20 August 1932. The provisions and history of the agreement were published in Year Book No. 43, page 329. A new Trade Agreement designed to replace the original agreement and correct the imbalance in benefits which had emerged in the twenty-five years of its operation came into effect on 9 November 1956. Briefly this agreement preserves security for Australian exports in the United Kingdom market, but lowers the obligatory margins of preference which Australia extends to the United Kingdom. The agreement provides for re-negotiation after the initial five-year period, but by arrangement between the two Governments this re-negotiation has been postponed. In the meantime the agreement continues subject to six months notice of termination by either country. Further details for the 1956 Agreement may be obtained from Year Book No. 51, page 495.

*Canada.* The existing agreement between Australia and Canada came into force on 30 June 1960, replacing an agreement signed on 3 August 1931. The agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. The agreement specifies that Canadian goods, with some exceptions, shall receive the benefit of the British Preferential Tariff upon importation into Australia and that Australia shall maintain

margins of preference in favour of Canada on a range of commodities. The agreement continues subject to six months notice.

*New Zealand.* The New Zealand-Australia Free Trade Agreement came into force on 1 January 1966. The agreement provides for free trade in certain scheduled goods. Provision is made for the addition of items to the schedule. The provision of the 1933 Trade Agreement between Australia and New Zealand continues in force as part of the Free Trade Agreement, except as superseded or modified by it.

*Federation of Rhodesia and Nyasaland.* A trade agreement was negotiated with the Federation in June 1955. (Australia's principal undertaking was to grant an exclusive tariff preference to the Federation on unmanufactured tobacco. The Federation accorded preferential tariff treatment on a wide range of Australian goods, including wheat and powdered and condensed milk.) The Federation was dissolved on 31 December 1963, but application of the Agreement was continued on a provisional basis between Australia and each of the three constituent territories Zambia (Northern Rhodesia), Rhodesia (Southern Rhodesia) and Malawi (Nyasaland). Zambia terminated the Trade Agreement with Australia on 30 June 1966 and following the unilateral declaration of independence by the Rhodesian Government in November 1965 tariff preferences to Rhodesia were suspended. The re-negotiation of the Trade Agreement with Malawi is at present under consideration.

*Malaysia.* A trade agreement with the then Federation of Malaya became effective in August 1958. Under the agreement Malaya undertook to protect Australian wheat and flour from dumped or subsidised competition and to extend to Australia any tariff preferences it accords. Australia guaranteed free entry for natural rubber so long as the Papua-New Guinea crop was absorbed, and assured the Federation that natural rubber would not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment. The Agreement continues to apply between Australia and that portion of Malaysia known previously as the Federation of Malaya.

*Japan.* An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6 July 1957, and formally ratified on 4 December 1957. It was provided that the Agreement would remain in force until 5 July 1960, and thereafter unless prior notice of termination should be given by either Government. The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges, and import and export licensing. Japan is not entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories. Japan also gave certain specific commitments on some important Australian export commodities.

Following a review of the agreement, a Protocol of Amendment was signed on 5 August 1963 and formally ratified on 27 May 1964. Under the Protocol Australia agreed to withdraw action against Japan under Article XXXV of the General Agreement on Tariffs and Trade, and thus a full G.A.T.T. relationship was established between the two countries.

The specific undertakings agreed in 1957 have now lapsed and the following commitments have been entered into.

Japan has:

- (a) undertaken not to accord less favourable import treatment (apart from tariff) for raw wool than for raw cotton,
- (b) stated that it has no present intention of imposing a duty on wool,
- (c) undertaken to continue imports of Australian soft wheat at a stabilised level, and to purchase Australian hard wheat when necessary requirements are met,\*
- (d) stated that it will endeavour to expand opportunities for imports into Japan of Australian sugar, canned meat, leather, motor vehicles, butter, and cheese.

Australia has:

- (a) undertaken to consult Japan on temporary protection cases affecting Japanese products (in such consultations Japan will consider whether the need for temporary protection can be obviated by measures taken in Japan),
- (b) stated that equal opportunities of fair and equal competition are accorded to Japanese products in Australian Government purchases overseas.

The new agreement will be effective for three years from the date of ratification and thereafter subject to three months' notice of termination by either Government. There is provision for consultations to take place at least annually.

*Indonesia.* This agreement came into operation on 1 July 1959. It records the desirability of expanding trade between Australia and Indonesia. It also gives special recognition to the importance of the flour trade from Australia to Indonesia. Australia recognises the importance to Indonesia of its traditional exports to Australia. The agreement is subject to review and renewal annually.

*Philippines.* A trade agreement with the Philippines was signed in Manila on 16 June 1965. The agreement provides for an exchange of non-discriminatory treatment† while recognising

\* 'Soft' wheat is fair average quality wheat; 'hard' wheat is premium grade wheat similar to that grown in North America. † An agreement, with reservations, not to discriminate against each other with tariff or non-tariff barriers.

existing preferences. The agreement is to operate for one year initially and continue thereafter unless one Government gives ninety days notice of its intention to terminate it. The Philippines is not a member of G.A.T.T.

*U.S.S.R.* A trade agreement between Australia and the U.S.S.R. was signed in Moscow on 15 October 1965. The agreement provides for the exchange of non-discriminatory treatment between the two countries while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Korea.* On 21 September 1965 a trade agreement was signed in Seoul between Australia and South Korea. Basically the agreement provides for an exchange of non-discriminatory treatment with allowances for existing preferences. The agreement, to run for one year with provision for automatic extension, also provides for non-discrimination by State trading enterprises. Both Governments undertake to use their best endeavours to increase the volume of trade between the two countries. The importance of the agreement for Australia is that our trade is now guaranteed continued non-discriminatory treatment whereas this was formerly given on a non-contractual basis. Korea is not a member of G.A.T.T.

*Poland.* A trade agreement between Australia and Poland was signed in Warsaw on 20 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

*Bulgaria.* A trade agreement between Australia and Bulgaria was signed in Sofia on 22 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

## Trade services

### Trade Commissioner Service

The stimulation of interest abroad in Australia's exports is an important government activity in which the Australian Trade Commissioner Service plays a prominent part. A brief account of the establishment and growth of the Trade Commissioner Service before the Second World War is available in Year Book No. 51, page 496. Since the War the service has increased steadily and by December 1966 there were over 100 Trade Commissioners and Assistant Trade Commissioners in forty-three posts in thirty-two countries. In 1957 Australia's official commercial representation overseas was extended by the introduction of a system of government Trade Correspondents. These correspondents, who as a rule already reside in particular centres overseas, are engaged on a part-time basis to carry out market research, arrange introductions between buyer and seller, and generally promote Australia's trade interests in the same way as Trade Commissioners. Each Trade Correspondent operates under the general direction of the nearest Trade Commissioner.

Trade Commissioners and, to a lesser extent, Trade Correspondents, are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organisations include: surveys of market prospects; advice on selling and advertising methods; arranging introductions with buyers and agents; providing reports on the standing of overseas firms; advice and assistance to business visitors; helping to organise and carry through trade missions, trade displays, newspaper supplements, and other promotion and publicity media; providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements, and other factors affecting the entry and sale of goods; helping to attract desirable investment.

In some countries Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission he is called upon to act as the Australian representative.

Trade Commissioners usually enter the Service from either private enterprise or the public service, and applications for entry into the Service are called for periodically by public advertisement. In the more important posts the Trade Commissioner is supported by an Assistant Trade Commissioner, who normally qualifies at a later stage for appointment as a Trade Commissioner.

The Trade Commissioner Service is administered by the Commonwealth Department of Trade and Industry (as distinct from the diplomatic and consular services administered by the Department of External Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (Commercial Counsellor, Commercial Secretary or Commercial Attaché).

The overseas trade representation is shown in the chapter International Relations.

### Trade Missions

Since 1954 the Australian Government has sent a number of trade missions abroad as part of the campaign to increase exports, and the experience acquired has indicated the need to vary the technique to suit particular products or markets. At present the following two trade mission techniques are in use.

*Survey mission.* This is organised to obtain precise knowledge about trade potential for specific products in an overseas market. This method is adopted for new or developing areas where commercial intelligence is not readily available or where a complex industry is involved and requires technical knowledge. Ten such missions have been organised to date.

*Specialised selling mission.* The approach is to organise a specific industry or group of industries to participate in a planned selling campaign in overseas markets with known sales potential. The group visits the market, exhibits and publicises its products and negotiates sales. Two specialised selling missions have been organised in recent years.

Surveys and selling missions have developed from the general trade missions of the past which comprised members with a wide variety of interests and objectives. In addition to the missions mentioned above, Australia since 1954 has sent overseas fifteen general trade missions and five trade ships.

Further details on trade missions are included in Year Book No. 49, page 544.

### Export Payments Insurance Corporation

The *Export Payments Insurance Corporation Act 1956* established the Corporation with the objective of protecting Australian exporters against risks of loss arising from non-payment of their overseas accounts for goods and services. The main risks of loss against which the Corporation insures are the 'commercial' risks of the insolvency or protracted default of the buyer, and 'political' risks, such as the cancellation of a valid import licence, exchange transfer difficulties, war or civil war.

The Corporation is charged to be self-supporting in its payments insurance operations, and applies principles similar to those of commercial insurers. There is, however, no overlap with normal insurance facilities, since the Corporation does not cover risks which can normally be insured with commercial insurers.

The capital of the Corporation is \$4,000,000, and the statutory maximum contingent liability which it can assume under payments insurance contracts issued to exporters is at present \$200,000,000.

In addition to its primary function as a payments insurer, the Corporation also insures, as an agent for the Commonwealth Government, Australian investments in overseas countries against 'non-commercial' risks such as expropriation, war and convertibility.

Further information on the Corporation is contained in Year Book No. 49, page 544. For particulars of its operations see chapter 19, Private Finance.

### Collection and presentation of statistics

#### Basic documents

Overseas trade statistics are derived from documents obtained under the Customs Act by the Department of Customs and Excise, and compiled by the Commonwealth Bureau of Census and Statistics. These documents are duplicate copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise. Certain items for which customs entries are not required are excluded from the statistics. Export entries show date and port of shipment, country of consignment and the description, quantity (where required) and value of the goods. Prior to July 1966 the statistical item number was inserted and verified by officers of the Department of Customs and Excise in Canberra. As from July 1966 the statistical item number has been inserted by the exporter or his agent and verified by officers of the Department of Customs and Excise in the local offices of the Collectors of Customs. Import entries show date and port of entry, country of origin, description of goods, quantity (where required), value of the goods, and amount of duty paid thereon. The tariff item number under which the goods are admitted and the statistical key code are inserted by the importer or his agent, and these are verified by statistical officers of the Department of Customs and Excise in the local offices of the Collectors of Customs.

#### Scope of the statistics

All goods moving into or out of Australia are recorded in overseas trade statistics (except those exclusions listed on page 377) and the statistics are not confined to goods which are the subject of a commercial transaction. The area to which all overseas trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania, the Northern Territory, and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries, and trade transactions between Australia and those non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e. the trade of Australia with each particular area is separately recorded and tabulated.

**Inclusions and exclusions**

- (a) Imports and exports on government account including defence equipment are treated as normal transactions and are an integral part of overseas trade statistics.
- (b) Direct transit trade, i.e. goods being transhipped or moved through Australia for purposes of transport only, is not recorded.
- (c) Outside packages (containers, crates, etc.) are included as a separate item in the tabulation of imports, but they have only been fully classified by country of origin since 1950-51. For exports, however, the value recorded for each item includes the value of the outside package.
- (d) Bunkers and stores supplied to vessels and aircraft have been excluded from statistics of exports since 1906.
- (e) Those migrants' and passengers' effects for which a customs entry is required are included in imports and exports.
- (f) Those parcel post imports and exports of small value for which customs entries are not received are excluded from overseas trade statistics.
- (g) Certain materials for intergovernmental defence projects for which customs entries are not required are excluded from imports.
- (h) The value of ores and concentrates imported and exported includes the value of the gold content and the latter is not included in imports and exports of gold.
- (i) Vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries are excluded from imports and exports.
- (j) Vessels and aircraft purchased for use on overseas routes are excluded from imports and any subsequent overseas sales of such vessels and aircraft from exports.
- (k) Fish and other sea products landed abroad directly from the high seas by Australian vessels are excluded from exports.
- (l) Exports of uranium are not recorded.

**Period covered by statistics**

**Exports.** These are recorded statistically in the month in which the export entries are passed by the Department of Customs and Excise. Normally this is within a few days of shipment although delays sometimes occur in the lodging of entries. Shipments are at times delayed by abnormal factors affecting sales, deliveries for export and the loading of ships. When such delays occur, exports during the affected period are diminished and when the delays are overtaken shipments include substantial quantities of accumulated stocks as well as current disposals. Wool shipments in any trade year may be materially affected by the time spread of wool auctions which normally end in July. The carry-over for shipments varies from year to year. New season's wheat normally becomes available for shipment from December onwards, and the quantity shipped in any trade year (ending June) depends on the size of the crop, the time spread on sales for export, and physical factors affecting the scheduling of deliveries.

**Imports.** Imports are recorded statistically in the month in which import entries are passed by the Department of Customs and Excise. Normally this is within a few days of discharge of cargoes.

Since July 1914, detailed trade statistics have been compiled for financial years (July to June). Prior to that details were compiled on a calendar year basis.

**Valuation**

Imports into Australia prior to 15 November 1947 were recorded in British currency values and full explanatory notes on the methods of recording import values before and since 15 November 1947 were included in Year Book No. 37, page 396.

All values in overseas trade statistics are determined on a 'free on board (f.o.b.) port of shipment' basis. This means that all charges, in particular the cost of freight and insurance, incurred after the goods have been exported from the port of shipment are excluded. Only transport and service charges incurred, or usually incurred, prior to export are included in the determination of trade values.

The procedure adopted to value imports and exports is as follows.

**Exports.** The recorded value of goods exported includes the cost of containers and outside packages and has been determined as from July 1937, as follows:

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price at which the goods were sold.
- (b) Goods shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

An account of the bases of valuation in operation prior to July 1937 is given on page 469 of Year Book No. 39.

**Imports.** The recorded value of goods imported is the amount on which duty is payable or would be payable if the duty were *ad valorem*. Value for duty is the f.o.b. port of shipment equivalent of either:

- (a) the actual price paid or to be paid by the Australian importer plus any special deduction (transactions value); or
- (b) 'the current domestic value' of the goods; whichever is the higher.  
'Current domestic value' is defined as, 'the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.'

The cost of containers and outside packages is excluded from the value of individual import items but is included as a separate item in the tabulation of imports.

#### Quantity data

Where quantities are shown they are generally, but not invariably expressed in terms of the normal trade unit. Where 'cental' is used, the unit is equivalent to 100 lb avoirdupois. Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities that cannot be recorded under a uniform unit of quantity).

#### Statistical concepts of trade

*Trade systems.* There are two generally accepted systems of recording overseas trade statistics, namely (a) special trade and (b) general trade. The Statistical Office of the United Nations defines the two systems as follows:

*'System of Trade.* Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

- (a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalised goods. (Nationalised goods are goods which, having been included in special imports, are then exported without transformation).
- (b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalised goods plus goods which, after importation move outward from bonded warehouse or free zone without having been transformed.

*Direct transit trade,* i.e. goods merely being transhipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.'

Statistics in this volume are compiled on the 'general trade' basis.

Australian produce (national produce) is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. Minor operations include blending, packaging, bottling, cleaning, sorting, husking, and shelling.

*Recorded trade.* This term is used to denote the value of exports or imports recorded during the period specified.

*Merchandise and non-merchandise trade.* Recorded trade is divided into merchandise and non-merchandise trade. Merchandise trade is the equivalent of recorded trade less certain items specified as non-merchandise. Prior to July 1965 non-merchandise trade consisted of imports and exports of specie and gold and silver. In July 1965 merchandise and non-merchandise trade were redefined in accordance with international standards recommended by the United Nations, and since that date non-merchandise items include commodities such as gold, legal tender, decorations, trophies, samples, passengers' personal effects, military equipment and stores for Australian Forces abroad, goods for the use of diplomatic and consular representatives, goods imported with the intention of being re-exported, goods exported with the intention of being re-imported, etc. A complete description of these commodities is contained in the Australian Export and Import Commodity Classifications published by the Bureau.

*Balance of payments basis.* Statistics of exports and imports for Balance of Payments purposes are derived by making certain adjustments, relating both to scope and valuation, to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the Balance of Payments. The adjustments include the following. Imports are

adjusted for the overall excess of recorded value for duty over the actual selling price to the importer. Exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment, and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgment of import entries in the case of certain large items of equipment (e.g. warships).

The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis.

#### Balance of payments

Estimates of the balance of trade do not, however, measure Australia's total balance of payments which includes other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas.

#### Country of consignment or origin

'Country of consignment' referred to in exports tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported 'For orders'. 'Country of origin', referred to in import tables, means the country of production. Classification of imports according to country of shipment was discontinued after the year 1920-21. A brief account of the dual system of import classification by country, operating prior to the year 1921-22, was given on page 500 of Year Book No. 51.

Throughout this chapter, where countries are listed, they are shown in alphabetical order and the separation of Commonwealth and foreign countries as in previous Year Books has been discontinued.

#### Commodity classifications

Overseas trade statistics for years up to and including 1964-65 were compiled according to the Statistical Classification of Imports and Exports. From July 1965 imports have been classified according to the new Australian Import Commodity Classification. This classification is based on the Standard International Trade Classification, Revised (S.I.T.C.), which is closely related to the Brussels Tariff Nomenclature used in the new Australian Customs Tariff introduced in July 1965. In accordance with the principles of the S.I.T.C., imports of defence equipment by the Australian Services are normally classified according to the commodity imported, e.g. warships are classified under 'ships and boats'.

Although the basis of the classification of exports remained unchanged for 1965-66, the export section of the Statistical Classification of Imports and Exports was published separately, with some minor revisions, as the Australian Export Commodity Classification. A new Australian Export Commodity Classification based on S.I.T.C. was introduced in July 1966, but the latter classification, naturally, does not apply to the statistics in this Year Book.

#### Variation in presentation

Because of the introduction in July 1965 of a new Australian Customs Tariff and a new Australian Import Commodity Classification based on the Standard International Trade Classification, the presentation of details of imports has been varied from that in previous Year Books to conform to the new classification.

#### Pre-federation records

In the years preceding federation each State recorded its trade independently and in so doing did not distinguish other Australian States from external countries. The aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, but the results obtained may be subject to error, since past records of values and the direction of imports and exports were not on uniform lines. Imports and exports for years prior to federation may be found in issues of the Year Book prior to No. 41. On the introduction of the *Customs Act* 1901 the methods of recording values were made uniform throughout the States.

### Total recorded overseas trade

The following table shows the total recorded trade of Australia with overseas countries from 1901 to 1965-66. The period 1901 to 1955-56 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in earlier issues, but figures for imports in issues prior to No. 37 were expressed in British currency.

**VALUE OF TOTAL RECORDED OVERSEAS TRADE: AUSTRALIA, 1901 TO 1965-66**

### Imports of merchandise, by economic class

The following table shows the value of imports of merchandise into Australia during the years 1963-64 to 1965-66 classified according to economic classes of (i) purpose and (ii) degree of manufacture. The classification according to economic classes for the years 1955-56 to 1965-66 is shown in graphical form on plate 30, opposite.

# IMPORTS OF MERCHANDISE, BY ECONOMIC CLASS

Elaborately transformed . . . . .	327,738	375,788	401,494	14.0	13.3	13.8
<b>Total imports—</b>						
Crude . . . . .	374,762	401,200	405,992	16.1	14.1	14.0
Simply transformed . . . . .	324,354	402,286	343,023	13.9	14.2	11.8
Elaborately transformed . . . . .	1,630,460	2,037,840	2,149,265	70.0	71.7	74.2
<b>Grand total . . . . .</b>	<b>2,329,576</b>	<b>2,841,326</b>	<b>2,898,280</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

(a) Owing to insufficient information, it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles, and all such machinery and replacement parts therefor are treated as capital equipment whether imported in an assembled or unassembled condition. (b) Excludes a percentage for piece goods to be sold by retail, and paper to be used solely for wrapping, which are recorded in Finished consumer goods. All other, and Auxiliary aids to production, respectively. (c) See footnote (a). (d) Includes a percentage for piece-goods to be sold at retail; see footnote (b). (e) Excludes crude petroleum, which is included in Producers' materials, Manufacturing—Other. (f) Includes a percentage for paper to be used solely for wrapping; see footnote (b). (g) The class Fuels and lubricants consists of goods 'simply transformed', and the classes Capital equipment and Munitions and war stores entirely of goods 'more elaborately transformed'. The class Auxiliary aids to production is about equally divided between goods 'simply transformed' and 'elaborately transformed'.

## Exports, by industrial group

The following table provides an analysis of the value of Australian exports for the years 1963-64 to 1965-66. This analysis is designed to show fluctuations in the value of exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily arbitrary in some respects.

VALUE OF EXPORTS OF AUSTRALIAN PRODUCE, BY INDUSTRIAL GROUP  
1963-64 TO 1965-66

Industrial group	Value (\$'000 f.o.b.)			Proportion of value of exports of Australian produce (excluding gold) (per cent)		
	1963-64	1964-65	1965-66	1963-64	1964-65	1965-66
Agriculture, horticulture and viticulture—

Unclassified . . . . .	34,284	42,379	50,671	1.3	1.7	1.9
Total Australian produce (excluding gold) . . . . .	2,712,625	2,563,509	2,613,679	100.0	100.0	100.0
Re-exports (excluding gold) . . . . .	55,546	69,536	82,856	..	..	..
Gold exports . . . . .	14,289	18,404	24,418	..	..	..
Total value of recorded exports . . . . .	2,782,460	2,651,449	2,720,953	..	..	..

In the year 1965-66 Australian produce (other than gold) exported amounted to approximately \$2,614 million. Of this, \$2,169 million or 83 per cent was mainly the produce of primary industries, comprising \$1,571 million of unprocessed produce and \$598 million of goods which had been processed to some degree before export. The values of the principal individual items of processed Australian primary produce exported were (\$'000): raw sugar, 92,760; flour, etc., 24,754; canned fruit, 37,763; dried fruit, 28,439; wool (scoured, tops, etc.), 85,078; canned meats, 14,588; butter, 49,989; milk (condensed, dried, etc.), 19,264; pig lead 40,333; lead bullion, 25,918; zinc bars, blocks, etc., 26,996; copper ingots, 20,357; and undressed timber, 2,704. The value of manufactures exported as classified on page 389 was \$375 million, approximately 15 per cent of Australian produce (other than gold) exported in 1965-66. The values of principal individual items here included were (\$'000): manufactures of metal, 138,899; implements and machinery, 43,098; drugs and chemicals, 34,538; and paper and stationery, 12,753. Refined petroleum oils exported are shown separately, as they consist largely of imported crude oils refined in Australia and re-exported in the refined form. The values of principal individual items shown as 'unclassified' in 1965-66 were (\$'000): individual consignments of less than \$100 in value, 13,086; and military equipment and stores and supplies for Australian projects overseas, 10,469.

The items enumerated indicate the arbitrariness of the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

### External trade of Australia and other countries

#### Essentials of comparison

Direct comparison of the external trade statistics of countries is possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in one country the value of recorded imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of recorded imports and exports in one may be based on transaction values, whereas in another they may be based on the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of recorded imports would result from the different methods of converting the moneys of foreign countries, i.e. from the application of current rates of exchange or of the mint par. Finally, the external trade statistics of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium-Luxembourg than that of other countries. France and the United Kingdom also have substantial re-exports, whereas in Canada, Australia and New Zealand re-exports account for a comparatively small proportion of the total recorded trade.

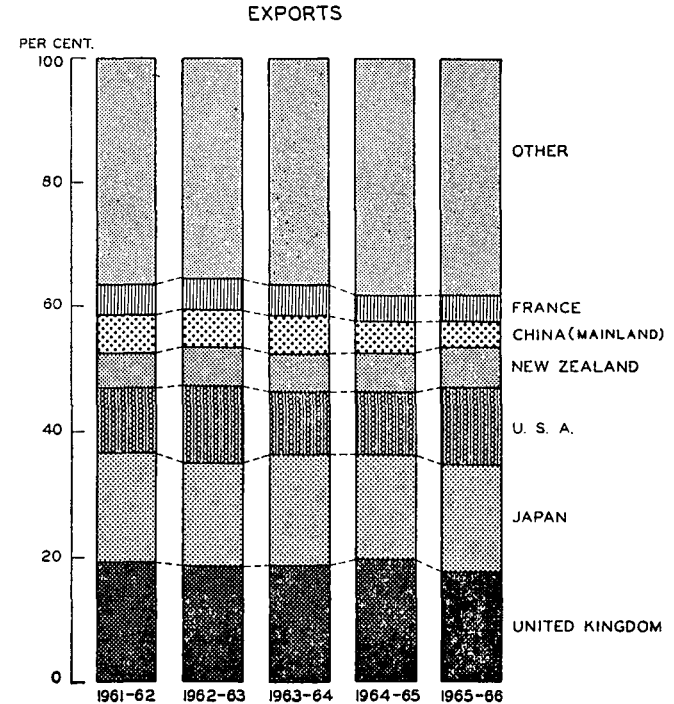

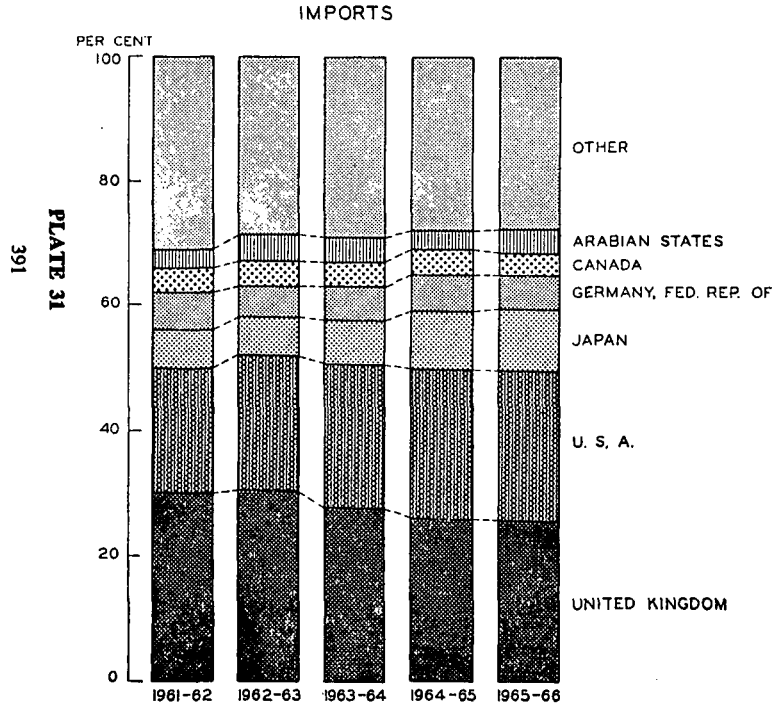

#### Direction of overseas trade

Tables on pages 392-6 give details of recorded exports to principal countries by statistical class and of recorded imports by section of the *Australian Import Commodity Classification*. Australia's trade with major groups of countries is shown in the table on pages 396-7. Particulars of Australia's balance of payments with countries in these groups are shown on pages 418-19.

The two following tables show the value of Australian recorded imports and exports during each of the years 1963-64 to 1965-66 according to principal country of origin and consignment respectively, the second table in terms of percentage. The proportions of Australian imports and exports by country of origin or consignment are shown graphically on plate 31 opposite.

Yemen  
Yugoslavia

(a) Other than United Kingdom.

### Recorded trade with the United Kingdom

Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8 August 1907 the Commonwealth Customs Tariffs have provided preferential rates of customs duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on pages 369-70 in this chapter.

The tables following show details of Australia's recorded exports to the United Kingdom by statistical class and for principal products, and recorded imports from the United Kingdom by division of the Australian Import Commodity Classification (based on the Standard International Trade Classification), for each of the years 1963-64 to 1965-66.

**VALUE OF RECORDED EXPORTS TO THE UNITED KINGDOM  
BY STATISTICAL CLASS, AUSTRALIA, 1963-64 TO 1965-66**

**Ratios of net customs revenue to value of total merchandise imports**

The following table shows the ratios of net customs revenue collected, including and excluding net primeage, to value of total merchandise imports during the years 1961-62 to 1965-66. The calculations are based on the assumption that the total value of clearances for home consumption approximated the value of total recorded imports during the same period. For particulars of customs revenue collections see the chapter Public Finance.

**RATIOS OF NET CUSTOMS REVENUE COLLECTED TO VALUE OF TOTAL MERCHANDISE IMPORTS: AUSTRALIA, 1961-62 TO 1965-66**  
(Per cent)

Ratio of—	1961-62	1962-63	1963-64	1964-65	1965-66
Net customs revenue collected (excluding net primeage) to value of total merchandise imports . . . . .	9.4	9.5	9.6	9.1	9.2
Net customs revenue collected plus net primeage to value of total merchandise imports . . . . .	9.6	9.7	9.8	9.3	9.4
Net customs revenue collected (excluding net primeage) to value of dutiable goods only . . . . .	22.4	22.5	22.3	22.9	23.6

## Imports and exports of various countries

In the following table the figures, which are expressed in Australian currency, relate as nearly as possible to imports cleared for home consumption in the various countries specified and to exports of their domestic products. These figures, however, do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The countries listed are not necessarily all the important trading countries of the world, but those important countries for which comparable statistics are available. Information for countries other than Australia has been extracted from publications of the United Nations. In making comparisons the qualifications referred to on page 390 should be borne in mind.

## VALUES OF IMPORTS CLEARED FOR HOME CONSUMPTION, AND EXPORTS OF DOMESTIC PRODUCTS (MERCHANDISE ONLY(a)): VARIOUS COUNTRIES, 1966

Country	Imports cleared c.i.f.	Exports f.o.b.	Total	Trade per head of population		
				Imports cleared	Exports	Total
	\$m	\$m	\$m	\$	\$	\$
United States of America	(b) 22,744	c d 26,799	49,543	115.54	136.15	251.69
Germany, Federal Republic of . . . . .	16,093	17,978	34,071	279.95	312.74	592.69
United Kingdom . . . . .	14,479	(d) 12,611	27,090	263.42	229.44	492.86
France . . . . .	10,603	9,730	20,333	214.46	196.81	411.27

(a) Includes silver. (b) f.o.b. (c) Includes exports of foreign aid. (d) Excludes re-exported goods. (e) Covers goods imported as distinct from goods cleared for home consumption. (f) Year ended June 1966.

## Total recorded overseas trade in calendar years

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show estimates of total Australian recorded imports and exports for each of the calendar years 1965 and 1966.

VALUE OF TOTAL RECORDED OVERSEAS TRADE IN CALENDAR YEARS  
AUSTRALIA, 1965 AND 1966  
(\$'000 f.o.b.)

Year	Merchandise		Non-merchandise		Total recorded	
	Imports	Exports	Imports	Exports	Imports	Exports
1965 . . . . .	2,959,404	2,603,723	55,789	79,513	3,015,193	2,683,236
1966 . . . . .	2,853,901	2,744,164	41,197	88,959	2,895,098	2,833,123

## Excise

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of customs and excise revenue are shown in the chapter Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1964-65 and 1965-66.

QUANTITY OF SPIRITS, BEER, TOBACCO, ETC. ON WHICH EXCISE DUTY WAS PAID: AUSTRALIA, 1964-65 AND 1965-66

Article	1964-65	1965-66	Article	1964-65	1965-66

Cigars . . . . .	141	130			

(a) As from July 1964 includes supplies to Commonwealth Government on which excise was paid. During 1965-66 refunds were made on 40,714,000 gallons. (b) Not recorded separately. (c) Operative to 12 August 1964.

## OVERSEAS INVESTMENT BY PRIVATE INVESTORS

Surveys of overseas investment have been conducted since 1947-48 to obtain particulars of certain types of private capital flows to and from Australia. The surveys, when supplemented by other information, provide statistics of overseas investment in companies in Australia and in Australian public authority securities repayable in Australian currency, as well as statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the surveys.

Certain types of private overseas investment are not included in the statistics which follow. Investment in real estate (except when made through companies) and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices—in this case they are included in the figures of investment in branches or subsidiaries.

In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital. Income payable overseas is classified on a similar basis, i.e. it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in overseas countries into line with commitments in those countries, and are included as a flow of investment between Australia and overseas. Similar considerations apply to overseas life insurance companies with branches in Australia.

The following are explanatory notes relating to some of the terms used in the tables.

**Companies.** In these statistics the term 'companies' relates to both incorporated and unincorporated businesses.

**Overseas.** For the purpose of these statistics, Papua and New Guinea and the other external Territories under the control of Australia are regarded as overseas countries.

**Portfolio investment and institutional loans.** Investment other than direct investment, including loans raised overseas from financial institutions and other companies which have no direct investment in the borrowing company.

**Subsidiaries.** For the purpose of these statistics this term is applied to all companies in which there is a 'direct' overseas holding of ordinary shares (or voting stock). A holding is treated as 'direct' when there is ownership of twenty-five per cent or more of a company's ordinary shares (or voting stock) by one company or a number of companies incorporated in one country, or ownership of fifty per cent or more of a company's ordinary shares (or voting stock) by individuals or companies in one country.

**Undistributed profits.** This term refers, in the case of Australian subsidiaries, to the equity of the overseas parent in the net earnings for taxation purposes of the Australian company, less tax (or tax provision) and less dividends declared. In the case of overseas subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

**Unremitted profits.** For these statistics this represents the net earnings of branches during the year, after tax, less remittances by the branches to their home offices during the year of net earnings and interest (irrespective of the period to which the earnings and interest relate). 'Net earnings' of Australian branches of overseas companies are, in general, based on the value of their income for taxation purposes.

The annual bulletin *Insurance and Other Private Finance* and the *Annual Bulletin of Overseas Investment: Australia* contain additional figures relating to overseas investment, including a longer range of years covered, and also a more detailed description of the figures.

**Private overseas investment in companies in Australia and investment income payable overseas by companies in Australia.**

The inflow of private overseas investment in companies in Australia since 1961-62, and a classification by country of origin, are shown in the following two tables.

**ANNUAL INFLOW OF PRIVATE OVERSEAS INVESTMENT IN COMPANIES IN AUSTRALIA, BY CATEGORY OF INVESTMENT AND TYPE OF COMPANY<sup>(a)</sup>**  
1961-62 TO 1964-65  
(\$ million)

Year	Annual inflow of direct private overseas investment in companies in Australia					Portfolio investment and institu- tional loans (b)	Total
	Australian branches		Australian subsidiaries		Total		
	Un- remitted profits	Other investment	Undis- tributed profits	Other direct investment			
1961-62 .	9	44	57	110	220	76	296
1962-63 .	16	5	90	267	379	83	462

Minus sign (-) denotes outflow.

**BALANCE OF PAYMENTS**

Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country.

Official estimates of Australia's balance of payments covering the period 1928-29 to 1930-31 were included in the Appendix to Year Book No. 24, 1931. Except for the war years (1939 to 1945), estimates have since been published annually. Detailed estimates are currently provided twice yearly in the form of a mimeographed publication *Balance of Payments*. This publication brings the estimates forward to the end of the most recent financial year or half-year and, together with a printed volume *The Australian Balance of Payments, 1928-29 to 1950-51*, provides also a description of the various items included and the sources from which the information is obtained. A summarised statement of the principal current account items and some identified capital movements is prepared and issued on a quarterly basis in the *Balance of Payments—Quarterly Summary*.

The form in which the Australian estimates are presented follows the pattern originally adopted by the International Monetary Fund. In this presentation a basic distinction is drawn between 'current account' transactions and 'capital account' transactions. Current account transactions are defined as those which involve changes in the ownership of goods or the rendering of services between residents of Australia and the rest of the world. They include such important items as exports, imports, shipping freights, dividends, profits and interest, travel and government expenditure. The current account also includes transfers in the form of personal gifts and government gifts of technical assistance, for which there is no consideration. Capital account transactions

are defined as those which involve claims to money and titles to investments between residents of one country and those of another country. Details are shown according to whether the items with which transactions are concerned are classified as assets or liabilities. For practical purposes, items are also broadly divisible into investment items (including overseas investment in companies in Australia and government loans), certain financing transactions, and monetary movements (including transactions with the International Monetary Fund and changes in the level of international reserves).

By definition the balance of payments on current account is always equivalent to the balance on capital account. The net monetary movement is used as a control figure to which the net sum of all other figures must reconcile. However, errors and omissions occur in the estimation of the amounts involved in various items included in both current and capital accounts, and in addition there are timing differences between the statistical recording of trade transactions and certain invisible items, and the relevant foreign exchange transactions. Therefore, in order to preserve the identity between the total shown in the current account and the total shown in the capital account, it is necessary to introduce a 'balancing item'. The 'balancing item' is included in the capital account, but, as mentioned above, it may include discrepancies in the current account, and it does not, as is frequently supposed, include only errors and timing differences related to investment and financing transactions.

Details of the estimates are assembled from a variety of sources of which the following are the more important: (i) statistics of exports and imports obtained from Australian trade statistics; (ii) details of the import valuation adjustment obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia; (iii) information on particular invisible current account items and capital movements obtained by regular inquiry from private organisations and government departments; (iv) details of receipts and payments of foreign exchange provided by the banking system; (v) information on dividends remitted, undistributed income and private investment in companies provided by statistics of overseas investment collected by this Bureau; (vi) information on freight on imports and other items concerned with overseas shipping obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia and a survey of shipping operations conducted by this Bureau; and (vii) information on international reserves supplied by the Reserve Bank of Australia.

#### Current account

The balance of payments on current account is arranged to show a series of credit items and a corresponding series of debit items. Primarily, entries on the credit side include all current transactions which result in receipts of foreign exchange (for goods and services, investment income or donations), and on the debit side the similar transactions which result in payments of foreign exchange. The principal exceptions to this rule are the amounts shown for undistributed income and where debts incurred for current account items, principally goods, are subsequently capitalised. In respect of these amounts no movement of foreign exchange takes place, the amounts concerned being treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in the relevant sections of the capital account. A further exception occurs in the case of transfers in kind where no foreign exchange movement takes place. The values of transfers received or provided in kind are shown as credits or debits respectively.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of visible trade. This is the most important, and usually the most variable, relationship in the balance of payments. *For balance of payments purposes, certain adjustments are made to the recorded trade statistics.* Briefly, these adjustments are made to exclude those transactions for which there is no change of ownership between residents and non-residents of Australia and to include certain transactions for which there has been a change of ownership but for which customs entries are not required. In addition, a valuation adjustment is made to the recorded import statistics in order to remove the overstatement which results from the basis of valuation for customs duty. A full description of the adjustments was provided in Appendix V. of the publication *Balance of Payments, 1960-61 to 1964-65*. A full evaluation of the overall position on current account, however, occurs only after the invisible items have been taken into account. The most important of these are the transportation items. Entries appear on both the debit and credit sides, the principal component on the debit side being freight payable overseas on imports into Australia. The principal component on the credit side is expenditure by overseas carriers, which represents mainly overseas ships' expenditure for stevedoring, port charges, etc. incurred in loading and discharging goods at Australian ports, and stores purchased in Australia. The items next in importance are those concerning income from property. Debit entries under this heading include dividends, profits, interest and royalties payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income for which, as mentioned above, no monetary payments occur. The remaining items are smaller than those mentioned above, and include travel, government transactions, transfers (including foreign aid made available by the Australian Government), and, on the credit side, the net value of Australian gold production.

**Capital account**

On the assets side of the capital account the most important item is Australia's holdings of monetary gold and foreign exchange, usually referred to as international reserves. On the liabilities side the most important items are government loans, I.M.F. transactions and private investment in Australian companies.

Transactions with international monetary and financial agencies appear on both sides of the capital account. On the assets side items 2 and 3 show increases in subscriptions to these institutions, and on the liabilities side items 10 and 11 show corresponding increases in liabilities or changes in liabilities previously incurred. Liabilities comprise, on the one hand, bank balances and special non-negotiable, non-interest bearing securities (payable in Australian currency but convertible by arrangement into foreign currency or gold) related to capital subscriptions to the various agencies and, on the other hand, drawings from the International Monetary Fund.

Changes in overseas investment in companies by Australian residents are shown on the assets side of the capital account (items 6 and 7), and changes in investment in Australian companies by overseas residents are shown on the liabilities side (items 13 (part) and 14). Figures shown for marketing authorities (item 5) represent changes in the estimated value of commodity stocks held overseas or in amounts owed by overseas debtors to the principal Australian marketing authorities.

The balancing item includes errors and omissions and timing differences, referred to on page 415.

**Tables—Balance of payments on current and capital accounts**

The following tables show, for the three years 1963-64 to 1965-66, particulars of:

- (i) the balance of payments on current account;
- (ii) the balance of payments on capital account; and
- (iii) the balance of payments on current account, by major groups of countries.

## CHAPTER 13

### TRANSPORT, COMMUNICATION AND TRAVEL

The statistics in this chapter relate in the main to the year 1965-66, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication*, *Commonwealth Finance*, and *State, Territory and Local Government Authorities' Finance and Government Securities*. Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, the *Monthly Bulletin of Motor Vehicle Registrations* and two preliminary monthly statements on *Registrations of New Motor Vehicles*, *Road Traffic Accidents involving Casualties* (quarterly), and *Overseas Arrivals and Departures* (monthly and quarterly)—see page 486. Greater detail on the latter subject is contained in the annual bulletin *Demography*.

Information additional to that contained in Bureau publications is available in the annual reports and other statements of the Department of Shipping and Transport, the various harbour boards and trusts, the several Government railways authorities, the Department of Civil Aviation, the Postmaster-General's Department, the Overseas Telecommunications Commission, the Australian Broadcasting Control Board, and the Australian Broadcasting Commission.

#### THE AUSTRALIAN TRANSPORT ADVISORY COUNCIL AND ITS STANDING COMMITTEES

##### The Australian Transport Advisory Council

The Australian Transport Advisory Council, established April 1946, comprises the Commonwealth Minister for Shipping and Transport as Chairman, the Commonwealth Ministers for the Interior and Territories, and each State Minister for Transport. The administration of the Council and the standing committees it has established is the responsibility of the Commonwealth Department of Shipping and Transport. The general practice is that the Council convenes at least once a year, the annual meetings moving successively from one capital city to another.

The Council primarily considers policy matters relating to transport operation, co-ordination and development. Its functions are:

- to initiate discussions and report to the respective Governments as necessary, on any matter raised by the Council, or any State or Commonwealth Government Authority;
- generally to exercise its purely advisory functions, and to report as necessary to the respective Governments concerned, in any matter which will tend to promote a better co-ordination of transport development, whilst at the same time encouraging the utmost modernisation and innovation possible to meet changing needs;
- to assist in maintaining continuous and comprehensive research in relation to transport development in Australia and abroad; such research to be carried out for the benefit of Australian transport authorities and agencies.

The regulation of, and the executive responsibility for, transport is shared concurrently between the Commonwealth and State Governments. The Australian Transport Advisory Council is the meeting ground of Commonwealth and States at a ministerial level and provides an effective means for inviting discussion and reaching by way of mutual consent and understanding a uniformity of approach towards transport administrative procedures and policy. It also provides a means for reviewing and discussing proposals for the national solution of pressing transport problems and the rectification of transport deficiencies generally. The Council has been active in:

- the establishment of special committees and conferences to examine and report on specific problems such as road safety, motor vehicle standards, transport economic research, highway planning, level crossing accidents, blood tests for road users, pedestrian behaviour, etc.;
- the exchange of views and formulation of common policies on a wide range of transport matters;
- achieving general agreement for adoption by Governments of uniform legislation in transport matters;
- effecting at ministerial level Commonwealth-State and interstate co-operation on such matters as construction and operation of interstate railway links, collection of fines and fees interstate, policing of regulations, etc.; and
- the publication of comprehensive surveys of Australian transport.

The following are typical of matters the Australian Transport Advisory Council has examined from time to time:

- the effect of standardisation of railways on other modes of transport;
- advanced national policies of road development and research;
- transport in relation to interstate tourist traffic;
- standardisation of traffic signs and road signs;
- standard and improved statistical data relating to transport of passengers and goods;
- uniform road traffic laws and standards for motor vehicle design and equipment;
- pipelines as a transport medium;
- containerisation and the need for uniform legislation, particularly in relation to maximum weights of road vehicles.

Some of the Council's most useful work has been accomplished through the agency of committees established by the Council from time to time. Some committees are of a semi-permanent nature. They were established to initiate discussion and action on transport problems referred by member Ministers and other authorities and to undertake specialised work. Most of these committees meet at regular intervals and report annually on their progress to the Australian Transport Advisory Council. These committees are: The Australian Motor Vehicle Standards Committee, The Australian Road Safety Council, The Australian Road Traffic Code Committee, The Committee of Transport Economic Research, The Australian Dangerous Goods Transport Committee, and The Australian Motor Vehicle Design Advisory Panel. A short description of their functions and operations follows.

#### **Australian Motor Vehicle Standards Committee**

The Committee was established in January 1947 and consists of representatives of motor vehicle administering authorities in all States and Commonwealth Territories and non-governmental organisations associated with the manufacture and operation of commercial and private motor vehicles.

The main function of the Committee is to advise on standards for motor vehicle construction, equipment and performance, particularly relating to dimensions, weights, and braking and lighting efficiencies, with a view to improving road safety and obtaining uniformity of traffic legislation.

In 1954 the Department of Shipping and Transport published *Draft Regulations Defining Vehicle Construction, Equipment and Performance Standards for Road Vehicles*, endorsed by the Australian Transport Advisory Council, and in 1964 published a revised edition. The Committee is responsible for maintaining these Draft Regulations up to date, particularly in the light of changing ideas and conditions. The Draft Regulations detail minimum standards for most aspects of vehicle construction. They are being progressively implemented in legislation by the States and Territories, and have done much towards ensuring that motor vehicles are safer, thus contributing towards road safety, while reducing the complexities caused by conflicting legal requirements in the various States and Territories.

#### **Australian Road Safety Council**

The Australian Road Safety Council was established in May 1947, originally to conduct nationwide educational and public relations campaigns, but it now examines all aspects of road accident problems. The Council consists of the Chairman, three Commonwealth representatives, eight State and Territorial representatives, four representatives of the national non-governmental organisations associated with road transport and the motor industry, and six members who are specialists in the various fields associated with accidents and road safety, such as road and traffic engineering and research, law enforcement, medical research, and statistics.

The Councils' main functions are:

- to advise the Australian Transport Advisory Council and other organisations concerned with the road users, the vehicle, and the environment, regarding all aspects of road accident problems, so that appropriate action can be taken which could lead to a reduction in the incidence of road accidents, fatalities and injuries;
- to recommend programmes of public education, aimed at improving the knowledge, skills, attitudes and practices of all road users, and assist other organisations concerned in this field;
- to investigate and report to the Australian Transport Advisory Council on specific road safety problems, and where necessary establish its own sub-committees to investigate and report on aspects not being undertaken by others, or to augment the work being done by other organisations;
- to act as a focal point for the collection, analysis, evaluation and dissemination of statistical data on road accidents—through their analysis and evaluation the Council should emphasise those areas or aspects which are susceptible to improvement and take action if possible, or bring the facts to the attention of the appropriate body; and
- to initiate or recommend research on road safety, including the evaluation in economic or other terms of possible steps to reduce road accidents.

At the present time a sub-committee is looking into the question of more comprehensive and purposeful road accident statistics.

#### **Australian Road Traffic Code Committee**

The Australian Road Traffic Code Committee, established in 1947, comprises one representative from each State and Territory and representatives from the Australian Automobile Association, the Australian Road Transport Federation, the Associated Chambers of Commerce, the Federal Chamber of Automotive Industries, and the Transport Workers' Union of Australia, with a representative of the Commonwealth Department of Shipping and Transport. The Committee is charged with responsibility for drafting recommendations for uniform road traffic laws throughout the Commonwealth, in keeping with modern traffic requirements and road safety.

Since its formation the Committee has prepared numerous recommendations, most of which are now embodied in the traffic laws and regulations of the States and Territories. In addition to traffic laws proper, the Committee has dealt with allied subjects such as driver licensing, medical fitness standards, the uniform number-plates scheme, the scheme for visiting motorists, the 1949 United Nations Convention on Road Traffic (acceded to by Australia in 1955), and uniform accident reporting.

In 1962 the Committee completed the preparation of a comprehensive code of traffic laws known as the National Road Traffic Code, which was approved by the Australian Transport Advisory Council in June 1962. This code is in conformity with the provisions of the United Nations Convention on Road Traffic in 1949, and was printed and distributed as a companion volume to the *Draft Regulations defining Vehicle Construction, Equipment and Performance Standards for Road Vehicles*.

#### **Committee of Transport Economic Research**

The Chairman of the Committee is a Commonwealth representative, one member represents the Commonwealth Department of Territories, and the other six members represent their respective States. The executive work of the Committee is undertaken by the Department of Shipping and Transport. The Committee undertakes continuous and comprehensive research into transport economics and development in Australia and abroad for the benefit of Australian transport authorities and agencies.

The Committee was originally set up in June 1955 to report on the economics and the costs of operation of road and rail transport, with particular emphasis on the influence of the costs of road construction and maintenance on vehicle operating costs. The Committee's report on these terms of reference was submitted in two parts, the first in September 1956, entitled *Road Transport Costs and Road Construction and Maintenance*, and the second in February 1958, entitled *Railway Costs and Co-ordinating Summary*.

The Committee has also prepared a report entitled *Report on Pattern and Trends of Transport in Australia, 1955-56 to 1963-64*. The purpose of the report is to provide a basic reference on trends and developments in transport for all relevant Commonwealth and State Departments, public authorities and enterprises interested in transport. It has been accepted by the Australian Transport Advisory Council and it is expected that it will be published shortly.

#### **Australian Dangerous Goods Transport Committee**

The Australian Dangerous Goods Transport Committee, established in 1960, consists of eight Commonwealth and eight State representatives, one representative from the National Health and Medical Research Council and one from the Standards Association of Australia. The Chairman is the Assistant Secretary of the Transport Branch of the Department of Shipping and Transport.

The functions of the Committee are as follows:

- to examine and report to the Australian Transport Advisory Council on various aspects of the transport of dangerous goods having an international or Australia-wide application;
- to examine and report on United Nations Committee of Experts proposals for a uniform system of classification and labelling of dangerous goods and reports by any other international agencies;
- to report on safety aspects of the transport of dangerous goods and collect and circulate information on this and other aspects of its functions.

The Committee has submitted a number of recommendations, many of which have been adopted by the United Nations Committee of Experts on the Transport of Dangerous Goods. It has also commenced the preparation of a model code relating to the classification, labelling and transport of dangerous goods within Australia.

### Australian Motor Vehicle Design Advisory Panel

The Australian Transport Advisory Council in July 1965 agreed to the formation of an Australian Motor Vehicle Design Advisory Panel, to operate in collaboration with the Australian Motor Vehicle Standards Committee. The Panel comprises the Chairman of the Australian Motor Vehicle Standards Committee and the Australian Road Safety Council or their nominees; a statistical officer nominated by the Commonwealth Statistician; a medical practitioner nominated by the National Health and Medical Research Council; a person experienced in aircraft accident investigation and with engineering experience in human engineering, nominated by the Australian Road Research Board; and three engineers, one engaged in vehicle research nominated by the Melbourne University, a traffic engineer nominated by the Conference of State Traffic Control Engineers, and one suitably qualified and experienced in the mechanical design of vehicles and currently engaged in motor vehicle design, nominated by the Federal Chamber of Automotive Industries. The Chairman of the Panel is nominated by the Minister for Shipping and Transport from either within or outside the Panel.

The terms of reference of the Panel agreed to by Council are as follows:

initiate investigations on its own behalf and accept assignments from the Australian Motor Vehicle Standards Committee for the investigation of motor vehicles and their component parts and accessories with a view to reducing road deaths and minimising the extent and severity of road accident injuries to occupants or other road users and pedestrians by the production of a safer road vehicle;

consult with and co-opt, where necessary, such persons or organisations able to assist with the 'Panel' investigations;

report to the Australian Motor Vehicle Standards Committee the conclusions arising from its investigations and recommend appropriate action.

Initial investigation has commenced on seven specific items referred to the Panel by the Australian Transport Advisory Council. When its report on these items is complete the Panel will examine other safety features required overseas to determine their applicability to Australian conditions, and features for which Australian experience indicates a requirement.

## SHIPPING

### Control of shipping

#### Commonwealth navigation and shipping legislation

By section 51 (i) of the Commonwealth Constitution the Parliament of the Commonwealth is empowered to make laws in respect of 'Trade and commerce with other countries, and among the States'. By section 98 this power is further defined as extending to navigation and shipping. Section 51 (vii) empowers the Commonwealth Parliament to legislate in respect of 'Lighthouses, lightships, beacons and buoys' and section 51 (ix) in respect of 'Quarantine'.

A review of the introduction and development of the *Navigation Act 1912-1950* is given in Year Book No. 40, pp. 110-12. Amendments to the principal Act were made by the Navigation Acts of 1952, 1953, 1956, 1958, 1961, and 1965. A further amendment was made in 1966 by the *Decimal Currency Act 1966*. Other shipping Acts under the powers of the Commonwealth are the *Sea-Carriage of Goods Act 1924-1961*, the *Seamen's Compensation Act 1911-1964*, the *Seamen's War Pensions and Allowances Act 1940-1966*, the *Pollution of the Sea by Oil Act 1960-1965*, the *Australian Coastal Shipping Commission Act 1956-1966*, the *Australian Coastal Shipping Agreement Act 1956*, the *Stevedoring Industry Act 1956-1966*, the *Beaches, Fishing Grounds and Sea Routes Protection Act 1932-1966* (except Section 3), the *Submarine Cables and Pipelines Protection Act 1963-1966*, and the *Lighthouses Act 1911-1966*.

The control of shipping during, and immediately after, the 1939-45 War and the establishment of the Maritime Industry Commission (abolished in 1952), the Australian Stevedoring Industry Board (replaced in 1956 by the Australian Stevedoring Industry Authority), and the Australian Shipping Board (replaced in 1956 by the Australian Coastal Shipping Commission) are described in Year Books No. 36, pages 121-30, and No. 39, pages 147-8.

#### Australian Coastal Shipping Commission

This Commission was established in 1956 for the purpose of maintaining and operating interstate, overseas and territorial shipping services, and replaced the Australian Shipping Board. It operates the Australian National Line, a Commonwealth-owned merchant shipping service, which at 30 June 1966 comprised thirty-eight vessels totalling 228,342 gross tons. These vessels included ten with a gross tonnage of 500 to 3,000, twelve with a gross tonnage of 3,000 to 5,000, and eleven with a gross tonnage of 5,000 to 8,000; the passenger/vehicular vessel *Empress of*

*Australia*, 12,037 gross tons: the bulk ore carriers *Mount Keira*, 10,229 gross tons. *Mount Kembla*, 10,112 gross tons, *Musgrave Range*, 14,467 gross tons; and the new 49,375 tons deadweight bulk carrier *Darling River*.

At 30 June 1966 vessels on order at Australian shipyards for the Commission included two 4,000 tons deadweight vehicle deck cargo vessels and a 54,000 tons deadweight bulk carrier. These vessels are to be completed in 1968.

During 1965-66 the *Princess of Tasmania* carried 88,274 passengers, 21,270 accompanied vehicles, 8,131 commercial vehicles, and 2,955 trade cars. The *Empress of Australia* carried 22,041 passengers, 3,925 accompanied vehicles, 14,490 commercial vehicles, and 506 trade cars over the same period. These vessels operate in the mainland-Tasmania trade.

#### **Australian Shipbuilding Board**

Established in March 1941 as a wartime measure under the National Security (Shipbuilding) Regulations and constituted in 1948 under the *Supply and Development Act 1939-1948*, the Board now operates under the control of the Minister for Shipping and Transport. In November 1963 the Commonwealth Public Service Board approved its permanent establishment as a branch of the Department of Shipping and Transport. The membership of the Board consists of a Chairman, a Finance Member and three other members, one of whom is also a member of the Naval Board.

The functions of the Board are set out in detail in Regulation 22 (4) of the Supply and Development Regulations and in the exercise of those functions the Board is responsible for, briefly:

- (a) recommending to the Minister for Shipping and Transport the price at which vessels may be purchased and disposed of by him on behalf of the Commonwealth;
- (b) the design and inspection of construction of merchant ships;
- (c) research into all matters connected with or incidental to shipbuilding;
- (d) advice to the Minister on developments in the shipbuilding industry;
- (e) rendering assistance to all sections of the industry.

Up to 31 January 1967 the Board had arranged for the construction of 108 merchant vessels and a naval survey vessel, totalling approximately 680,000 deadweight tons, at a cost of about \$234,000,000, and thirty smaller vessels to which the Commonwealth shipbuilding subsidy was not applied.

Up to 31 January 1967 the Board had current orders for the construction of eighteen vessels totalling about 175,000 deadweight tons. These vessels comprise two 50,000 ton bulk carriers, three tankers, one oil drilling rig, one coral carrier, one passenger/cargo vessel, three roll-on/roll-off vessels, one hopper dredge, one floating crane, and five tugs. There are also smaller craft.

There are five major Australian shipyards building merchant vessels, two in Queensland (Evans Deakin and Co. Pty. Ltd., Brisbane, and Walkers Ltd., Maryborough), two in South Australia (Adelaide Ship Construction Pty. Ltd., Port Adelaide, and Whyalla Shipbuilding and Engineering Works, Whyalla), and one in New South Wales (State Dockyard, Newcastle), and two shipyards engaged principally in naval shipbuilding, one in New South Wales (Cockatoo Docks and Engineering Co. Pty. Ltd., Sydney) and one in Victoria (H.M. Naval Dockyard, Williamstown). There are also numerous smaller yards, situated in every State, building smaller steel and wooden working and pleasure craft.

#### **Australian Stevedoring Industry Authority**

In March 1947 legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June 1949 legislation was enacted to abolish the Stevedoring Industry Commission, on which employers and employees were represented, and establish in its place a Stevedoring Industry Board of three members, to attend to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay,

public holiday pay and annual leave under the administration of the Authority. Under amending legislation, which operated from 6 June 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorised stoppages. Further amending legislation, which operated from 8 October 1965, made the Authority solely responsible for the recruitment of waterside workers. The statutory provisions regulating the industry are now contained in the *Stevedoring Industry Act 1956-1966*, the *Stevedoring Industry Act 1963*, and Division 4 of Part III of the *Conciliation and Arbitration Act 1904-1966*.

### System of record of shipping

In the system of recording statistics of overseas shipping, Australia is considered as a unit, and therefore only one entry and one clearance are counted for each voyage, without regard to the number of States visited (*see also* pages 428-9). For the purpose of these statistics all external territories are treated as overseas countries.

On arrival at, or departure from, a port in Australia, whether from or for an overseas country or from or for another port in Australia, the master or agent must 'enter' the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month the information so obtained is forwarded to the Bureau of Census and Statistics. This information relates, in the main, to vessels engaged in the carriage of passengers and/or cargo between Australian States or between Australia and overseas countries.

The size of a vessel may be expressed in a number of ways. A vessel's gross tonnage, expressed in tons of 100 cubic feet, represents the total volume of the enclosed space, i.e. a ship of 25,000 tons has a total enclosed capacity of 2,500,000 cubic feet. Its net tonnage, expressed in tons of 100 cubic feet, represents the volume of enclosed space that can be used for cargo or passengers. Its displacement is its total weight and is expressed in tons of 2,240 lb. Its deadweight tonnage is the difference between the displacement of the vessel loaded to its summer loadline and the displacement light, i.e. it is the weight the vessel can carry, including the weight of bunkers and stores. Net tonnage is the concept generally used in the tables in this chapter, but since it can give a misleading impression of the size of ships which have a function other than carrying passengers and cargo (e.g. a tug has no net tonnage), some figures are given for deadweight tons and tons gross also.

Most cargo is recorded in terms of tons of 2,240 lb. However, some is shipped and recorded on the basis of forty cubic feet representing one ton measurement.

Except in Shipping at principal ports (pages 431-2) intra-State (coastal) movements, including those of vessels engaged solely in trade within State limits, are excluded from the statistics in the following pages.

### Overseas shipping

#### Total movement

The following table shows the number of entrances and clearances combined of overseas vessels at Australian ports, and the aggregate net tonnage, during each of the years 1961-62 to 1965-66.

OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES  
(COMBINED) OF VESSELS DIRECT, AUSTRALIA  
1961-62 TO 1965-66

	1961-62	1962-63	1963-64	1964-65	1965-66
Number of vessels	7,210	6,762	7,477	7,601	7,958
Net tonnage '000 tons	37,662	37,584	41,640	43,295	46,382

Particulars of the total overseas movement of shipping for each year from 1822 to 1920-21 were published in Year Book No. 15, page 507, and those for each year from 1921-22 to 1950-51 in Year Book No. 40, page 97.

#### Total overseas shipping, States, etc.

The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to overseas countries, and the aggregate net tonnage, during the year 1965-66.

## OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT STATES AND NORTHERN TERRITORY, 1965-66

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances	number	1,168	482	872	324	903	123	57	3,929
	'000 net tons	7,495	3,006	3,922	2,622	5,491	330	176	23,042
Clearances	number	1,067	538	1,059	260	962	101	42	4,029
	'000 net tons	7,336	4,415	4,721	1,061	5,381	296	130	23,340

## Shipping communication with various countries

A vessel arriving in Australia from overseas is recorded as coming from the country where the voyage commenced, irrespective of the number of intermediate ports of call. Similarly, a vessel leaving Australia is recorded as going to the country where the voyage is scheduled to terminate. The following table shows statistics of the net tonnage entered and cleared, with cargo and in ballast, according to the principal countries where vessels commenced or terminated their voyages to or from Australia during each of the years 1963-64 to 1966.

## OVERSEAS SHIPPING: COUNTRIES FROM WHICH ENTERED OR FOR WHICH CLEARED, AUSTRALIA, 1963-64 TO 1965-66

('000 net tons)

Country from which entered or for which cleared	With cargo or in ballast	Entered			Cleared

(a) For years prior to 1964-65 figures for Malaysia exclude Sarawak, included in Other countries.  
 (b) Included in Malaysia. (c) Included with Malaysia prior to 1 October 1966.

**Country of registration of overseas shipping**

Particulars of overseas shipping which entered Australian ports during each of the years 1963-64 to 1965-66 are given in the following table according to country of registration of vessels.

**OVERSEAS SHIPPING: ENTRANCES DIRECT, BY COUNTRY OF REGISTRATION OF VESSELS, AUSTRALIA, 1963-64 TO 1965-66**

('000 net tons)

Vessels registered at ports in—	1963-64	1964-65	1965-66	Vessels registered at ports in—	1963-64	1964-65	1965-66
Australia . . . . .	95	119	141	Panama . . . . .	605	551	423
Denmark . . . . .	680	387	262	Sweden . . . . .	867	769	686
France(a) . . . . .	289	403	540	United Kingdom . . . . .	7,535	6,936	7,109
Germany, Federal Republic of . . . . .	419	710	590	United States of America . . . . .	311	260	296
Greece . . . . .	1,410	1,264	1,384	Other countries . . . . .	496	711	409
Hong Kong . . . . .	393	373	289				
India . . . . .	43	86	244	All countries—			
Italy . . . . .	669	752	712	In cargo . . . . .	15,442	16,355	16,952
Japan . . . . .	1,216	1,850	2,628	Proportion of total . . . . .			
Liberia . . . . .	1,400	1,833	2,643	% . . . . .	74 5	75 4	73 6
Netherlands . . . . .	974	1,122	1,020	In ballast . . . . .	5,281	5,334	6,090
New Zealand . . . . .	379	378	375	Proportion of total . . . . .			
Norway . . . . .	2,942	3,185	3,291	% . . . . .	25 5	24 6	26 4
				Grand total . . . . .	20,723	21,689	23,042

(a) Includes New Caledonia (40 during 1964-65, 27 during 1965-66).

Australian registered tonnage which entered Australian ports from overseas during the year 1965-66 represented 0.6 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Islands trade.

### Interstate shipping

#### System of record

*Interstate shipping* comprises two elements: (a) vessels engaged solely in interstate trade; and (b) vessels trading between Australia and overseas countries and in the course of their voyages proceeding from one State to another. (Overseas vessels may obtain Single Voyage Permits under section 286 of the Navigation Act to perform certain tasks on the Australian coast in cases where no 'licensed' vessel is available. Examples are the numerous tankers that obtain permits to carry petroleum products between interstate ports and, since the withdrawal of most of the interstate passenger liners, the overseas vessels which are given permits to carry passengers and frozen cargoes on the interstate run. At the present time orders in Council exist exempting certain trades from the provisions of the Navigation Act and it is not necessary for 'unlicensed' vessels to obtain a permit to engage in those trades.)\* No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the overseas vessels (b), some explanation is necessary. Each State desires that its shipping statistics should show in full its shipping communications with overseas countries, but at the same time it is necessary to avoid any duplication in the statistics of Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an overseas country—say the United Kingdom—via another State, is recorded in the second State as from the United Kingdom 'Overseas via States', thus distinguishing the movement from a direct overseas entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from the United Kingdom 'Overseas via States'. On an inward voyage, the clearance from the first State to the second State is a clearance interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movements, must for the individual States be recorded as 'Overseas via States' or 'Interstate' according to the direction of the movement. The significance of the record of these movements will be seen more clearly from the following tabular presentation of the inward and outward voyages to and from Australia of an overseas vessel which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—via South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, in this case retracing its inward track.

\* *Australian Shipping and Shipbuilding Statistics* published by the Department of Shipping and Transport.

## ITINERARY OF AN OVERSEAS VESSEL ON THE AUSTRALIAN COAST

	Recorded as—		
	For the State and for Australia	For the States	
	1.	2.	3.
<b>Inward voyage—</b>			
Enters Fremantle from United Kingdom . . . . .	Overseas direct	Interstate direct	
Clears Fremantle for Adelaide . . . . .			
Enters Adelaide from United Kingdom via Fremantle . . . . .		Interstate direct	Overseas via States
Clears Adelaide for Melbourne . . . . .			
Enters Melbourne from United Kingdom via Adelaide . . . . .		Interstate direct	Overseas via States
Clears Melbourne for Sydney . . . . .			
Enters Sydney from United Kingdom via Melbourne . . . . .		Interstate direct	Overseas via States
<b>Outward voyage—</b>			
Clears Sydney for United Kingdom via Melbourne . . . . .			Overseas via States
Enters Melbourne from Sydney . . . . .		Interstate direct	
Clears Melbourne for United Kingdom via Adelaide . . . . .			Overseas via States
Enters Adelaide from Melbourne . . . . .		Interstate direct	
Clears Adelaide for United Kingdom via Fremantle . . . . .			Overseas via States
Enters Fremantle from Adelaide . . . . .		Interstate direct	
Clears Fremantle for United Kingdom . . . . .	Overseas direct		

From the method outlined above the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as 'Overseas direct' gives the overseas shipping for Australia as a whole; (b) the aggregate for all ships recorded in any State as 'Overseas direct' plus those recorded as 'Overseas via States' gives the total *overseas shipping* for that State; and (c) the aggregate for all ships recorded as 'Overseas via States' may also be used, together with those recorded as 'Interstate direct' (including those engaged solely in interstate movement) to furnish figures showing the total *interstate movement* of shipping.

**Interstate movement**

*Interstate direct.* The following table shows the number of entrances and the net tonnage of vessels recorded into each State and the Northern Territory from any other State (including overseas vessels on interstate direct voyages as in column 2 above) during each of the years 1963-64 to 1965-66.

## INTERSTATE MOVEMENT: ENTRANCES OF VESSELS INTERSTATE DIRECT STATES AND NORTHERN TERRITORY, 1963-64 TO 1965-66

State or Territory	Number			Net tons ('000)		
	1963-64	1964-65	1965-66	1963-64	1964-65	1965-66
New South Wales . . . . .	1,974	2,154	1,976	6,656	7,388	7,889
Victoria . . . . .	1,763	1,777	1,861	5,355	5,606	5,489
Queensland . . . . .	789	879	806	2,213	2,656	2,670
South Australia . . . . .	1,228	1,222	1,163	4,397	4,595	4,381
Western Australia . . . . .	667	700	735	3,176	3,413	3,827
Tasmania . . . . .	1,131	1,151	1,258	1,719	2,136	2,464
Northern Territory . . . . .	78	82	81	177	159	147
<b>Australia . . . . .</b>	<b>7,630</b>	<b>7,965</b>	<b>7,880</b>	<b>23,693</b>	<b>25,953</b>	<b>26,867</b>

*Overseas via States.* The figures in the following table show the number of entrances and clearances of vessels to and from overseas countries via other Australian States as in column 3 in the table at the top of the page, and their aggregate net tonnage.

**INTERSTATE MOVEMENT: ENTRANCES AND CLEARANCES OF VESSELS  
OVERSEAS VIA OTHER AUSTRALIAN STATES AND NORTHERN TERRITORY  
1965-66**

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances	number	862	1,075	434	522	69	264	7	3,233
	'000 net tons	4,316	6,623	1,921	2,514	276	1,092	35	16,777

	'000 net tons	4,080	4,606	1,383	2,508	289	1,252	55	14,173

*Total interstate movement.* To ascertain the aggregate movement of interstate shipping, including the interstate movement of overseas vessels, figures in the two preceding tables must be combined. The following table shows, for each State and the Northern Territory, the total number of entrances and clearances of vessels from and for other States (including the interstate movement of overseas vessels) during the year 1965-66, together with the aggregate net tonnage.

**INTERSTATE MOVEMENT: TOTAL ENTRANCES AND CLEARANCES  
STATES AND NORTHERN TERRITORY, 1965-66**

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.

**Shipping cargo**

**Overseas and interstate cargo**

The tables following show the aggregate tonnage of overseas and interstate cargo discharged and shipped at Australian ports. Most cargo is recorded in terms of tons of 2,240 lb; the remainder, mainly bulky commodities, is shipped and recorded on the basis of forty cubic feet representing one ton measurement.

**CARGO DISCHARGED AND SHIPPED: AUSTRALIA, 1961-62 TO 1965-66**  
(<sup>'000 tons</sup>)

**World shipping tonnage**

At 1 July 1966 the total steamships and motorships 100 gross tons and upwards throughout the world was 43,014, with a gross tonnage of 171,129,833. Of those totals, steamships numbered 10,407 for 75,468,776 gross tons, and motorships 32,607 for 95,661,057 gross tons. This includes 5,453 oil tankers of 100 gross tons and upwards, with a gross tonnage of 60,199,965. Australian steamships and motorships, 295 for 744,356 gross tons, constituted 0.69 per cent and 0.43 per cent respectively of the total number and tonnage. This information has been derived from *Lloyd's Register of Shipping*.

**Vessels registered in Australia**

The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30 June 1966, classified according to: (i) year of construction, 1962 to 1965 and 1961 and earlier years, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in overseas shipyards.

(a) 200 gross tons and over.

## Miscellaneous

## Shipping freight rates

The *Quarterly Summary of Australian Statistics* shows a list of the current freight rates for general merchandise in respect of both overseas and interstate shipments. The following table shows the freight rates from Australia to various countries for certain important commodities at 31 December 1966.

## OVERSEAS SHIPPING FREIGHT RATES FROM AUSTRALIA TO VARIOUS COUNTRIES, 31 DECEMBER 1966(a)

(1 ton measurement = 40 cubic feet)

Country and article	Unit for which freight rate is quoted	Freight rate quoted
CANADA—EAST COAST AND ST LAWRENCE PORTS TO MONTREAL—		<i>Rates—Canadian dollars</i>
Fruit—		
Canned . . . . .	40 cu ft	39.10
Dried . . . . .	40 cu ft	36.50
Preserved . . . . .	40 cu ft	42.20
Wine . . . . .	Weight measurement	47.60
Wool—greasy . . . . .	100 lb	5.25
General cargo . . . . .	Weight measurement	47.60
CEYLON—		<i>Rates—Sterling</i>
Flour, wheaten . . . . .	Ton weight	£8.250
Milk and cream—		
Condensed . . . . .	Ton measurement	£14.100
Frozen . . . . .	Ton measurement	£24.325
General cargo . . . . .	Ton weight or measurement	£14.100
CHINA—		<i>Rates—Australian shillings and pence</i>
Flour in bags . . . . .	2,000 lb	165 0
Wheat in bags . . . . .	Ton	165 0
Wool—		
Greasy . . . . .	lb	0 3
Scoured, etc. . . . .	lb	0 3.49
General cargo . . . . .	Ton weight or measurement	275 0
CONTINENTAL EUROPE—See UNITED KINGDOM, ETC.		
HONG KONG—		
Sugar, refined, in bags . . . . .	20 cwt	245 0
Wheat, in bags . . . . .	20 cwt (net)	165 0

(a) Rates for commodities shipped in chartered vessels and bulkships not included.

Interstate rates per ton weight or measurement for general cargo at 31 December 1966 (expressed in Australian dollars) were: Sydney-Melbourne, \$16.20; Sydney-Brisbane, \$15.20; Sydney-Adelaide, \$21.10; Sydney-Fremantle, \$26.20; Sydney-Hobart, \$16.35; Sydney-Darwin, \$25.85.

### Shipping casualties

Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1961-62 to 1965-66 are shown in the table below.

**SHIPPING CASUALTIES TO OVERSEAS AND INTERSTATE STEAM AND MOTOR  
VESSELS(a): AUSTRALIA, 1961-62 TO 1965-66**

(a) Vessels over 50 net tons.

**Lighthouses; distances by sea; depths of water and tides at main ports; ferry passenger services**

A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia were published in Year Book No. 48, page 525.

A table showing the depths of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*. For some major ports information is given in the chapter Local Government.

**GOVERNMENT RAILWAYS**

Six independent State Government railway authorities and one Commonwealth Government railway authority operate the major intrastate and interstate railway systems in Australia. Each system is managed by a Commissioner, or Commissioners, responsible to the Minister in charge of transport for the respective Governments. The various Government railway systems are as follows.

**New South Wales Railways**

An extensive 4 ft 8½ in gauge system is based on Sydney and extends throughout the State.

**Victorian Railways**

A 5 ft 3 in gauge system centred on Melbourne radiates throughout Victoria and into southern New South Wales. This is supplemented by a 4 ft 8½ in gauge line from Melbourne to the New South Wales border, and by a short length of 2 ft 6 in gauge line near Melbourne, used mainly for tourist purposes.

**Queensland Railways**

A 3 ft 6 in gauge line extends along the coast from Brisbane to Cairns, with branch lines inland from Brisbane, Rockhampton and Townsville. In addition, a 4 ft 8½ in gauge line extends from Brisbane to the New South Wales border, and a short length of 2 ft gauge line (used mainly for cane haulage) operates in the Innisfail area.

**South Australian Railways**

The main system, in the south-east of the State, is of 5 ft 3 in gauge. The railway system in Eyre Peninsula, as well as the line from Port Pirie to the New South Wales border, is of 3 ft 6 in gauge. The conversion of the latter line to 4 ft 8½ in gauge is in progress.

### Western Australian Railways

In the southwest of the State there is an extensive 3 ft 6 in gauge system which extends as far as Meekatharra in the north and Kalgoorlie and Esperance in the east. A new 4 ft 8½ in gauge line between Perth and Kalgoorlie is being constructed.

### Commonwealth Railways

This system comprises four separate railways. The Trans-Australian Railway, extending from Port Pirie to Kalgoorlie is of 4 ft 8½ in gauge as is that part of the Central Australia Railway from Port Augusta (Stirling North) to Maree. A further extension of this railway from Maree to Alice Springs is of 3 ft 6 in gauge, as is the North Australia Railway from Darwin to Birdum. The Australian Capital Territory Railway from Queanbeyan to Canberra is of 4 ft 8½ in gauge. In this chapter particulars of these four separate Commonwealth railways are grouped; however, separate particulars for each railway are shown in the annual bulletin *Transport and Communication*.

A graph showing the route-mileage and traffic of all Government railways from 1870 to 1966 appears on plate 32, opposite.

In addition to these Government railways there are a number of short but significant private railways in Australia. The majority were constructed for the haulage of coal, iron ore and other minerals to processing plants, ports or government railheads, but some handle general traffic and passengers also. The more important of the private railways operate from Whyalla to Iron Knob and Iron Baron (South Australia), from Maitland to Cessnock (New South Wales), from Broken Hill (New South Wales) to the South Australian border, and from Burnie to Zeehan (Tasmania). In the north-west of Western Australia private railways were brought into service during 1966 to haul iron ore from Mt Tom Price to King Bay, a distance of 180 miles and from Mt Goldsworthy to Finicane Island (Port Hedland), a distance of 70 miles.

### Standardisation of railway gauges\*

Government railways in Australia use a variety of track gauges ranging from 2 ft to 5 ft 3 in, but only in the case of the 3 ft 6 in, the 4 ft 8½ in and the 5 ft 3 in gauges are the route mileages extensive. The importance of the present measures to bring about railway standardisation largely derives from the many economic and political difficulties occasioned by these differences in track gauges.

Programmes for the standardisation of railways in Australia have been arranged on the basis of mutual agreement and collaboration between the Commonwealth and State Governments with the ratification of the Parliaments concerned. There is no national co-ordinating railway authority in Australia, but the Railway Commissioners discuss mutual problems and make inter-system working arrangements through the Australian and New Zealand Railways Conference.

Under various Commonwealth-State Standardisation Agreements approximately 420 route miles of standard (4 ft 8½ in) gauge track have been completed since 1956, and a further 680 route miles are expected to be completed by the end of 1968. Melbourne is now linked to Sydney and Brisbane by a standard gauge railway, and by 1968 it is expected that a direct standard gauge link will be available between Sydney and Perth. Bogie exchange facilities have been installed at Melbourne and Port Pirie (South Australia) to eliminate the physical transfer of goods between the rolling-stock of the standard gauge and that of the broad gauge systems serving Victoria and a large part of South Australia.

### Early history of standardisation in Australia

The history of standardisation of railway track gauges in Australia goes back to before the construction of the first steam railway. During the 1840's the diversity of gauges in Great Britain was causing concern to railway administrators, and in 1846 the British Secretary for State for Colonies recommended a uniform gauge of 4 ft 8½ in for railway construction in the Colonies. At that time there were no steam powered railways in any Australian Colony.

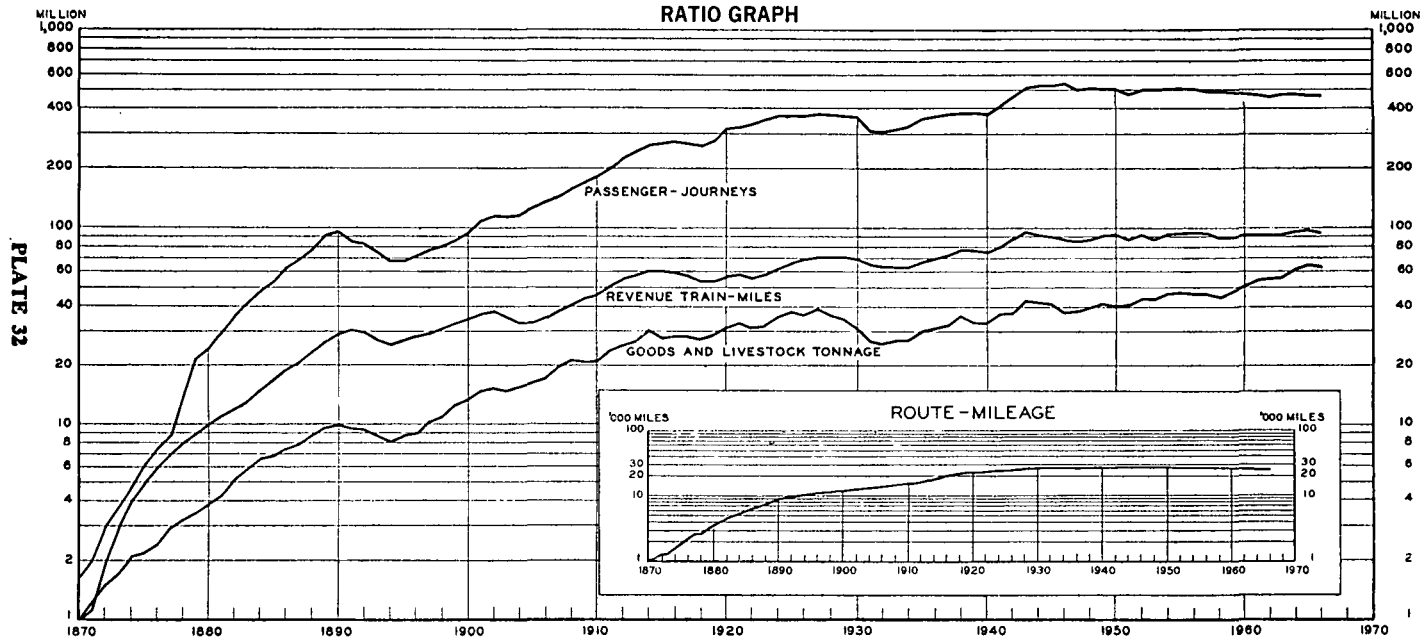

In 1850, however, a private company submitted a proposal to construct the Sydney-Parramatta railway using a track gauge of 5 ft 3 in. This proposal was approved by the Governor-General and the Colonial Secretary, and in 1853 an Act was passed making it compulsory for all railways in New South Wales to be of 5 ft 3 in track gauge. The Governors of Victoria and South Australia accepted this as the standard gauge for Australia.

The following year the Company revised the proposed gauge and succeeded in having the 1852 Act repealed and a new Act passed setting the gauge for New South Wales at 4 ft 8½ in. This step was taken without reference to either South Australia or Victoria, where private companies had

\* The following article on standardisation of railway gauges was specially prepared for this issue of the Year Book by the Commonwealth Department of Shipping and Transport.

# GOVERNMENT RAILWAYS: AUSTRALIA, 1870 TO 1966

## ROUTE MILEAGE AND TRAFFIC RATIO GRAPH

NOTE: VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE. ACTUAL NUMBERS ARE INDICATED BY SCALE.

placed large orders for 5 ft 3 in gauge rolling stock. Both these Colonies decided to adhere to the 5 ft 3 in gauge. On appeal to England it was decided that this was a local dispute and 'as the forests were so dense it was improbable that the lines would meet in any case'. This was the end of early attempts at standardisation.

The adoption of a 3 ft 6 in track gauge by Queensland, Western Australia and Tasmania, and the subsequent use of this gauge for certain lines in South Australia, appears to have been based on geographical, financial and economic factors. However, it is also likely that the possibility of links between States was still considered remote. The first interstate railway link was established in 1883 when the New South Wales and Victorian systems met at Albury. This was followed by a link between New South Wales and Queensland in 1888 and the Victorian-South Australian broad gauge link in 1889. (It was 1917 before Western Australia was linked with the railway systems of the other mainland States.)

Following the establishment of these early links the disadvantages of a break of gauge at State borders soon became evident, and in 1897 the Premiers of New South Wales, Victoria and South Australia agreed that a standard gauge was desirable. The Railway Commissioners met and recommended conversion of South Australia and Victoria to 4 ft 8½ in gauge, but no further action was taken.

The question was debated at a number of conferences between 1900 and 1920. The urgent necessity of the work was confirmed many times, but nothing was done. In 1920 the Premiers Conference considered a report and resolved that an expert committee be set up to consider the unification of gauges. This took the form of a Royal Commission. In 1921 the Royal Commission reported strongly in favour of a standard track gauge of 4 ft 8½ in and set out plans, costs and the order of conversion of two proposals; first the conversion of the main trunk lines between capital cities and secondly the conversion of all lines. Included in the plans were new standard gauge lines between Brisbane and Kyogle (New South Wales) and between Port Augusta and Lochiel (South Australia). Both lines reduced the distance between capitals and provided a lower maximum elevation on the route, which, in the case of the Sydney-Brisbane line, was reduced from 4,450 ft to 800 ft.

Commonwealth-State discussions followed the 1921 Royal Commission's report, but a general agreement was not reached. In 1924 the Commonwealth, New South Wales and Queensland Governments agreed to the extension of the Sydney-Kyogle standard gauge line to South Brisbane. This line was brought into service in 1930. In 1935 an agreement was reached between the Commonwealth and South Australian Governments whereby the Commonwealth was to extend the Trans-Australian standard gauge line, completed in 1917, from Port Augusta to Port Pirie and South Australia to provide a broad gauge line from Port Pirie to link with the broad gauge network at Red Hill. The work was completed and opened to traffic in 1937.

During the 1939-45 War considerable difficulty was experienced in Australia in the movement of military equipment and troops by rail, mainly because of the existence of break-of-gauge points, the lack of interchangeability of locomotives and rolling-stock between the major railway systems and the lack of uniformity in the technical standards of tracks. Consequently, in March 1944, the Commonwealth Government requested Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport, and formerly Chairman of Commissioners, Victorian Railways, to submit a report and recommendations regarding the standardisation of Australia's railway gauges on the basis of a 4 ft 8½ in gauge.

#### **Report of Sir Harold Clapp and subsequent investigation**

The report, which also covered the construction of certain strategic and developmental railways, was submitted in March 1945, and the projects recommended to be carried out in stages and estimated to cost \$153,502,000 overall, were as follows.

- (a) Construction of an independent standard gauge line from Fremantle-Perth to Kalgoorlie (419 miles).
- (b) Conversion to standard gauge of the entire South Australian 5 ft 3 in gauge system and the 3 ft 6 in gauge lines of the South Eastern Division (1,760 miles).
- (c) Conversion to standard gauge of the entire Victorian 5 ft 3 in gauge system, and the Upper Ferntree Gully-Emerald section of the Gembrook 2 ft 6 in gauge line (4,980 miles).
- (d) Acquisition of the Silverton Tramway Company's line (36 miles) between Cockburn (South Australia) and Broken Hill (New South Wales) and the conversion to standard gauge of this line, as well as the 3 ft 6 in gauge lines of the Peterborough Division of the South Australian Railways (366 miles) to provide a standard gauge line between Port Pirie and Broken Hill.
- (e) Provision of a standard gauge strategic and developmental railway linking Bourke (New South Wales) with Townsville and Dajarra (Queensland) by the construction of a new standard gauge line between Bourke and Longreach, via Cunnamulla, Charleville and Blackall, and the conversion of the Longreach-Hughenden, Townsville-Dajarra and tributary lines.

- (f) Construction of a standard gauge strategic and developmental railway between Dajarra (Queensland) and Birdum (Northern Territory) and the conversion to standard gauge of the Birdum-Darwin line (961 miles).

Other recommendations were that, on agreement being reached between the Commonwealth and the States concerning the carrying out of the foregoing projects, arrangements were to be made for complete surveys, plans and estimates to be prepared for the standardisation of the Queensland and Western Australian Railways not covered by the proposals mentioned. For a detailed description of the report *see* Year Book No. 37, pages 146-8.

The conversion to standard gauge of the 3 ft 6 in gauge Central Australia Railway (Port Augusta to Alice Springs) and extension beyond the existing terminal at Alice Springs was not recommended, nor was the introduction of standard gauge in Tasmania.

As a further step towards standardisation, a Committee consisting of members of the Commonwealth Parliament, was formed in March 1956 to consider the practicability and desirability of standardising the main railway trunk lines on the Australian mainland. The Committee was invited to examine whether a more limited scheme than that envisaged in the Clapp Report could be devised without incurring the costs of complete conversion and without inhibiting the efficiency of operation of the various Government systems. The Committee recommended to the Commonwealth Government that standardisation of the major inter-capital routes was warranted. It was recommended that surveys should be carried out and plans prepared without delay, and that the Commonwealth should bear the cost of this detailed work. The Committee also examined questions of the method of construction, finance and timing, and the administration of the proposals, but did not make detailed recommendations on these matters.

#### Nature and scope of railway standardisation agreements

Arising out of Commonwealth-State discussions, which followed the report by Sir Harold Clapp, a Railway Standardisation Agreement was drawn up and signed by representatives of the Commonwealth, New South Wales, Victorian, and South Australian Governments. However, this agreement was not ratified by all Governments concerned and, therefore, was never implemented.

In October 1949 the Railway Standardisation (South Australia) Agreement was assented to by the Commonwealth Parliament. This Act authorised the execution by the Commonwealth Government of an agreement between the Commonwealth and South Australian Governments whereby a major part of the broad and narrow gauge railways owned and operated by the South Australian Railways would be converted to standard gauge. The agreement did not stipulate any period of time within which the works were to be undertaken or completed. The Act provided that the Commonwealth Government should undertake the conversion of other railways owned and operated by the Commonwealth Railways in South Australia and the Northern Territory, and that the acquisition and conversion of the Silverton Tramway should be carried out. The preamble to the agreement indicated that a uniform track gauge throughout Australia was desirable to assist in the defence and development of Australia, to facilitate interstate trade and commerce, and to secure maximum efficiency and economy in railway operation.

The agreement provided that the parties to the Agreement should set standards of design and construction essential to the establishment of standard gauge railways and to the safe and efficient operation of interchange traffic, including locomotives and all classes of rolling-stock over the unified railways of Australia. It was agreed that 70 per cent of the cost of standardisation should be borne by the Commonwealth and 30 per cent by the State. The Agreement also provided that the Commonwealth should meet the initial cost of the works specified and that the State should repay the Commonwealth 30 per cent of the expenditure over a period of fifty years together with interest. The agreement included stipulations regarding the cost of betterments and replacements, annual budgets of expenditure, audit, accounts, and records. The Agreement, with modifications, has been the basis on which subsequent agreements between the Commonwealth and the States of Victoria, New South Wales and Western Australia have been formulated.

The major Agreements which have been made and implemented since 1950 include:

- (1) The Brachina to Leigh Creek North Coalfield Railways 1950;
- (2) The Stirling North to Brachina Railway 1952;
- (3) The Leigh Creek North Coalfield to Marree (Conversion to Standard Gauge) Railway 1954;
- (4) The Railway Standardisation (New South Wales and Victoria) Agreement 1958;
- (5) The Railway Agreement (Western Australia) 1961.

The first three agreements refer to the construction of the Port Augusta to Marree standard gauge railway, which was completed in 1956 at a cost of approximately \$24,000,000. The main purpose of these Agreements was to provide standard gauge access to the Leigh Creek brown coal deposits and was, therefore, in a different category to other standardisation works. This railway is operated by the Commonwealth Railways.

### **The New South Wales and Victoria Standardisation Agreement**

The New South Wales and Victoria Standardisation Agreement followed the general format of the 1949 South Australian Agreement, but differed from it in substance in several important respects:

- (a) the Commonwealth Government agreed to provide all funds to meet expenditure on the standardisation works as and when required by the States;
- (b) the Commonwealth was not obliged to meet expenditure on any of the standardisation work incurred at any time subsequent to twelve calendar months after the commencement of a regular service on the standard gauge railway;
- (c) provision was made to authorise variations of cost due to unforeseeable circumstances;
- (d) the Agreement was appended by Schedules indicating:
  - (i) the route of the standard gauge railway;
  - (ii) the estimated cost of major items in the standardisation work;
  - (iii) the standards to be adopted;
- (e) the standardisation works were limited to the construction of a standard gauge railway on the main intercapital (Melbourne-Sydney) route.

The standardisation work comprised the construction of a main line permanent way and crossing loops between Albury Railway Station and Melbourne (Spencer Street), the construction of bridges and culverts, alterations to station yards, grade separation and level crossing protection, the provision of rolling-stock maintenance and freight handling facilities at Dynon Road in Melbourne, alterations to signalling, the installation of automatic power signalling with centralised traffic control, and the construction and conversion of rolling-stock.

Under the Agreement the States of New South Wales and Victoria were responsible for the execution of the standardisation works, and, with the approval of the Commonwealth Minister for Shipping and Transport, called public tenders for the execution of the works where desirable. There was a provision that expenditure was not to be incurred without the concurrence of the Commonwealth Minister. The States prepared detailed plans, specifications and estimates of costs for all works under the Agreement in collaboration with the Commonwealth.

### **The Western Australia Railway Agreement**

The Railway Agreement (Western Australia) 1961 is an agreement ratified by the Commonwealth and Western Australian Governments to undertake certain standard gauge railway works, including the provision of rolling-stock, in Western Australia at an estimated cost of \$82.4 million. The proposal is linked with the establishment of an integrated iron and steel industry at Kwinana, south of Perth. The new railway facilities will be used to transport iron ore from the Koolyanobbing deposits some thirty-three miles beyond Southern Cross. These railway facilities will also link Kalgoorlie with East Perth and Fremantle by a standard gauge line which will be open to passenger and general freight traffic.

It has been agreed that the project has standardisation and developmental components in approximately equal parts, and initially the Commonwealth will, in effect, provide finance for all the standardisation portion of the works and 70 per cent of the developmental portion. The State will repay with interest 30 per cent of the standardisation costs over fifty years and all the advance for developmental works over twenty years. Work on the project commenced in 1962 and is planned to be completed by December 1968.

The Agreement covers decisions in cases of disputes between the parties, the completion date, the definition of the nature of the work required for standardisation purposes, the preparation of programmes, plans and estimates, the authorisation of expenditure, expenditure after the completion date, the submission of annual estimates, and collaboration between the parties concerned regarding the standards of design, construction and operation of rolling-stock (including locomotives) for the facilitation of efficient inter-system traffic and co-ordinated services. The Schedules to the Agreement may be varied with the approval of the Commonwealth Minister for Shipping and Transport. There is provision also for the review of rolling-stock for conversion to standard gauge and other factors.

The estimated cost of \$83,220,000 is based solely on the cost of materials and labour and on operational requirements prevailing at the end of 1960, and is specified in the Agreement as an indication of the extent of the works and the relative amounts to be expended on the various components and does not impose any limitation on the amount to be expended by the State Government.

### **The South Australian Standardisation Agreement**

The conversion of the South Eastern Division of the South Australian Railways from 3 ft 6 in to 5 ft 3 in track gauge, completed in 1959, was carried out under the 1949 Railways Standardisation (South Australia) Agreement as a preliminary step toward eventual standardisation. The conversion to standard gauge of the narrow gauge line between Port Pirie and Cockburn, as part of the East-West standard gauge link, is also being carried out under this agreement. The South Australian Government has submitted to the Commonwealth Government a proposal

in outline for the standardisation of the existing railway line between Port Pirie and Adelaide. The Commonwealth Government has made available \$30,000 to South Australia for the surveying of this line without committing the Commonwealth to any further action.

#### Standards adopted

The basic standard adopted for standardisation works is a track gauge of 4 ft 8½ in with appropriate minimum structure and maximum rolling-stock outlines. Both in the conversion of tracks of other gauges to 4 ft 8½ in and the construction of new standard gauge railways, it is essential to ensure the efficient and economic interchange of rolling-stock, the facilitation of inter-system traffic, the co-ordination of designs and specifications of rolling-stock, and the co-ordination of services.

The standards of tracks, including weight of rail, sleepers, ballast, dogspikes, sleeper plates, and rail anchors, have varied slightly from project to project, depending on the nature of the traffic and other factors. Australian standard 94 lb rail, welded into lengths of up to 360 feet, and hardwood sleepers have been generally used. Earthworks, bridges and culverts also have varied from project to project according to the nature of the traffic, geological and topographical conditions, and nature of existing structures.

Grading has frequently been determined by the alignment of the existing track. On the major part of the Kalgoorlie-Perth standard gauge track currently under construction the ruling gradient will be 1 in 150. For curvature, a minimum radius of not less than forty chains is standard but has been reduced to ten chains where circumstances justify such a reduction.

Signalling and communications equipment standards have been determined mainly according to the nature of traffic requirements, terminal and intermediate marshalling facilities, the density and speed of traffic, and the peak line capacity. Centralised traffic control of one form or another has been a feature on trunk routes. Signalling and communications standards and techniques have been improved particularly to achieve higher average speeds made possible by the use of diesel locomotives and bogie rolling-stock.

In general, where railway authorities have undertaken works or provided for capacity or equipment in excess of standards established under the Agreements, such betterments have been undertaken at the expense of the State concerned. Works carried out under the Agreements have generally included the acquisition of land, the purchase, construction, alteration and conversion of railway lines, bridges, buildings, structures, workshops, plant, locomotives and rolling-stock, and other factors essential for standardisation. Work regarded as being outside the scope of the standardisation agreements includes the operation and maintenance of the standard gauge railway, betterments, and any rehabilitation programme which would be necessary independently of standardisation works.

The adoption of relatively uniform technical dimensions of track and equipment for standardisation projects has had the effect of encouraging the co-operation and simplification of other features of railway operations, including inter-system tariffs, documentation, maintenance and repair practices, and accounting procedures.

### Operations of Government railways

#### Route-miles open for traffic

The following table shows the route-mileage of each Government railway system, according to gauge, at 30 June 1966.

GOVERNMENT RAILWAYS: ROUTE-MILEAGE<sup>(a)</sup> OPEN, SYSTEMS, 30 JUNE 1966  
(Miles)

System	Gauge					Total
	5 ft 3 in	4 ft 8½ in	3 ft 6 in	2 ft 6 in	2 ft 0 in	
New South Wales	..	(b) 6,055	..	..	..	6,055
Victoria	(c) 3,977	202	..	9	..	4,188
Queensland	..	69	5,686	..	30	5,785
South Australia	1,650	..	828	..	..	2,478
Western Australia	..	..	3,747	..	..	3,747
Tasmania	..	..	500	..	..	500
Commonwealth	..	(d) 1,330	(e) 922	..	..	2,252
<b>Australia</b>	<b>5,627</b>	<b>7,656</b>	<b>11,683</b>	<b>9</b>	<b>30</b>	<b>25,005</b>

(a) Mileage of railway irrespective of whether it consists of single or multiple track. Excludes sidings and crossovers. (b) Includes 234 route-miles which are electrified. (c) Excludes 202 miles of 5 ft 3 in gauge line which almost parallels the uniform gauge (4 ft 8½ in) line between Melbourne and the New South Wales border. Includes 263 route-miles which are electrified. (d) Trans-Australian Railway, Australian Capital Territory Railway and portion of Central Australia Railway. (e) North Australia Railway and portion of Central Australia Railway.

As the Commonwealth systems include mileages in South and Western Australia, and the Victorian system extends into New South Wales, the system route-mileages shown in the previous table do not represent mileages within each State and Territory. The mileages within each State and Territory at 30 June 1966 are shown in the next table.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, STATES AND TERRITORIES, 30 JUNE 1966**  
(Miles)

Gauge	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

**Summary of operations**

The following table shows a summary of the operations of the Australian Government railway systems during 1965–66.

## GOVERNMENT RAILWAYS: SUMMARY OF OPERATIONS, SYSTEMS, 1965-66

System	Revenue train-miles (a)	Passenger journeys (b)	Passenger-miles (c)	Goods and livestock	
				Tons carried(b)	Net ton-miles(d)
	'000	'000	'000	'000	million
New South Wales . . .	37,694	257,568	n.a.	26,917	4,255.2
Victoria . . .	20,145	149,125	1,273,380	12,156	1,989.5
Queensland . . .	17,640	25,979	n.a.	10,049	2,002.0
South Australia . . .	6,492	15,511	122,720	4,789	749.3
Western Australia . . .	8,043	10,168	67,826	6,384	1,020.8
Tasmania . . .	1,283	1,304	7,062	1,072	113.4
Commonwealth . . .	2,955	342	121,351	2,976	881.4
<b>Australia(b) . . .</b>	<b>94,252</b>	<b>459,997</b>	<b>n.a.</b>	<b>64,343</b>	<b>11,011.6</b>

(a) One train (i.e. a complete unit of locomotive and vehicles, electric train set, or rail motor) travelling one mile for revenue purposes. (b) Inter-system traffic is included in the total for each system (including each Commonwealth Railway) over which it passes. (c) One passenger travelling one mile. (d) One ton carried one mile.

## Gross earnings, working expenses, net earnings

*Gross earnings* are composed of earnings from (a) coaching traffic, including the carriage of passengers, mails, horses, parcels, etc., by passenger trains; (b) carriage of goods and livestock; and (c) rents and miscellaneous items. In this section particulars of State Government grants are excluded. Details of these grants made during 1965-66 are shown on page 449.

The following table shows gross earnings for the year 1965-66 classified according to the three main sources of earnings together with the percentage of the total derived from each source.

GOVERNMENT RAILWAYS: DISTRIBUTION OF GROSS EARNINGS  
SYSTEMS, 1965-66

System	Gross earnings (\$'000)			Proportion of total (per cent)		
	Coaching	Goods (including livestock)	Miscellaneous	Coaching	Goods (including livestock)	Miscellaneous
New South Wales . . .	48,147	136,921	10,268	24.65	70.09	5.26
Victoria . . .	31,554	61,442	6,524	31.71	61.74	6.55
Queensland . . .	9,052	72,535	2,590	10.75	86.17	3.08
South Australia . . .	4,349	22,218	2,380	15.02	76.76	8.22
Western Australia . . .	3,694	37,296	1,582	8.68	87.61	3.71
Tasmania . . .	366	5,419	201	6.11	90.53	3.36
Commonwealth . . .	2,773	14,070	1,248	15.33	77.77	6.90
<b>Australia . . .</b>	<b>99,935</b>	<b>349,901</b>	<b>24,793</b>	<b>21.06</b>	<b>73.72</b>	<b>5.22</b>

*Working expenses.* In comparing the working expenses of the various railway systems, allowances should be made for the variation in gauges, terrain, traffic handled, and method of operation. In addition to variations between systems there are also variations on different portions of the same system. Working expenses, wherever presented in the Railways section of this chapter,

include reserves for depreciation in the South Australian, Western Australian, Tasmanian and Commonwealth systems, but exclude interest, sinking fund, exchange and certain other payments (see page 449).

The following table shows the total working expenses for the year 1965-66 classified according to the four main expenditure headings.

**GOVERNMENT RAILWAYS: DISTRIBUTION OF WORKING EXPENSES  
SYSTEMS, 1965-66**  
(\$'000)

System	Maintenance of way and works	Motive power(a)	Traffic	Other charges	Total working expenses
New South Wales . . . . .	30,640	61,324	43,767	44,062	179,792
Victoria . . . . .	19,633	28,997	28,415	23,960	101,006
Queensland . . . . .	22,735	35,336	21,116	4,939	84,126
South Australia . . . . .	(b) 7,317	(b) 11,954	(b) 8,886	4,232	(b) 32,388
Western Australia . . . . .	(b) 8,855	(b) 16,785	9,519	4,570	(b) 39,730
Tasmania(b) . . . . .	1,936	2,637	2,034	940	7,547
Commonwealth . . . . .	5,545	4,700	2,782	(b) 4,289	17,316
<b>Australia . . . . .</b>	<b>96,661</b>	<b>161,733</b>	<b>116,519</b>	<b>86,992</b>	<b>461,905</b>

(a) Includes maintenance of rolling stock. (b) Includes provision for depreciation.

In the following table gross earnings, working expenses and net earnings are shown for the years 1961-62 to 1965-66.

**GOVERNMENT RAILWAYS: GROSS EARNINGS, WORKING EXPENSES, NET

(a) Includes provision for depreciation. (b) Excludes provision for depreciation. (c) Excess of gross earnings over working expenses as shown in this table.

Minus sign (—) denotes loss.

**Net earnings, grants to railways, interest, sinking fund, surplus or deficit**

The following table shows, for each railway system for the year 1965-66, (i) net earnings, (ii) State grants and other items credited to railways accounts, (iii) loan interest, exchange, sinking fund, etc., payments charged against the accounts, and (iv) the net surplus or deficit after these items have been taken into account. Particulars of items (ii) to (iv) are not included in the preceding tables in this section.

The figures shown in this table accord with those published in the Annual Reports of the Railways Commissioners of the several systems. Because of the differences in governmental practice concerning costs other than operative charged against railway accounts, compensation for non-paying and developmental lines, etc., and the inclusion in some railways finances of the operations of ancillary transport services, direct comparison cannot be made between the results

shown in the table. For further information on railways finance, particularly expenditure from loan and other funds, see the chapter Public Finance of this Year Book. See also the Reports of the several Railways Commissioners.

(a) Suburban and country—based on ticket sales, making allowances for periodical tickets. Tickets sold at concession rates are counted as full journeys. (b) Inter-system traffic is included in the total for each system (including each Commonwealth Railway) over which it passes. (c) Figures for New South Wales, and consequently for Australia, for the years 1961-62 to 1964-65 have been revised to include unremunerative passenger-journeys in that State, but it has not been possible to distribute the revisions between suburban and country. The figures for these components shown in the tables on pages 450 and 451 therefore do not add to these totals.

**Passenger traffic**

With the exception of the Commonwealth railway systems, which operate only country services, all systems provide both suburban and country passenger services. Traffic classed as 'suburban' moves between stations within a classified suburban area around each capital city, while traffic classified as 'country' originates or terminates at stations outside this suburban area. Suburban and country passenger traffic are shown separately in the two tables following.

*Suburban passenger traffic.* Most of the suburban services in New South Wales and Victoria are operated within electrified areas.

**GOVERNMENT RAILWAYS: SUBURBAN PASSENGER SUMMARY, SYSTEMS  
1961-62 TO 1965-66**

Year	Suburban passenger-journeys (a)	Suburban passenger-train-miles	Suburban passenger-miles	Average number of passengers per train-mile	Average mileage per passenger-journey	Suburban passenger earnings

(b) Included with operating staff.

(c) Excludes Queensland portion

## TRAMWAY, TROLLEY-BUS, OMNIBUS, AND FERRY SERVICES

## Systems in operation

**Tramway and trolley-bus.** Since 1 April 1947 all systems have been operated by government or municipal authorities. During the year 1965-66, tramway systems were in operation in the following cities: Melbourne, Bendigo, and Ballarat, Victoria; Brisbane, Queensland; and Adelaide, South Australia. Trolley-bus services operated in Brisbane, Queensland; Perth, Western Australia; and Hobart and Launceston, Tasmania. All systems were electric.

In many parts of Australia private lines used for special purposes in connection with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

**Motor omnibus.** Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Maryborough and Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Launceston and Burnie, Tasmania; Darwin, Northern Territory; and for country road services operated by the Western Australian Government Railways and the Tasmanian Transport Commission. In Sydney the Government tramway system has been replaced by omnibus services, and in Perth the Metropolitan (Perth) Passenger Transport Trust has replaced privately owned services in the metropolitan area. In Hobart the Government trolley-bus and omnibus services have replaced the Government tramway service. Particulars of motor omnibus services under the control of private operators for the States of New South Wales, Victoria, Queensland, South Australia, and Western Australia are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*.

**Ferry.** Ferry passenger services are operated in the following States: New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Mersey River at Devonport. Control is exercised by both governmental authorities and private operators. Particulars of the operations of these services are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

**Government and municipal tramway, trolley-bus and omnibus services**

Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor omnibus services, it is not possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. The two following tables present combined statistics of public tramway, trolley-bus and motor omnibus services with separate details shown for each form of transport where possible.

## MOTOR VEHICLES

The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30 June 1960 were given in Year Book No. 47, pages 553-6, and at 30 June 1963 in *Transport and Communication*, Bulletin No. 54, 1962-63.

## Motor vehicles on register; licences

Tables in this section include vehicles owned by private individuals, local government authorities, State Governments, and the Commonwealth Government (excluding those belonging to the defence services).

## Census of Motor Vehicles, 1962

A census of motor vehicles on register at 31 December 1962 was conducted by the Commonwealth Statistician in co-operation with the Deputy Commonwealth Statisticians and the motor vehicle registration authorities. The census covered items shown on the motor vehicle registration certificate such as make of vehicle, year of model, type of vehicle, horsepower, motive power, location (i.e. address on registration certificate), ownership (private, government, etc.), and for specific types of vehicles such items as unladen weight, carrying capacity, passenger capacity, and in some States gross vehicle weight. Details were published in printed bulletins for each State and Territory and for Australia, and in issue No. 54, 1962-63 of the annual bulletin *Transport and Communication*. Year Book No. 50, 1964, contains summarised particulars of the census (pages 591-4). Reference is made to the publication of results of previous enumerations of this nature in Year Book No. 51 (page 571).

The following table contains a summary for each State and Territory of the number of motor vehicles of each type on the register at 31 December 1962. The total number of each type recorded for Australia at the previous motor vehicle census (31 December 1955) is included for purposes of comparison.

CENSUS OF MOTOR VEHICLES, 31 DECEMBER 1962: TYPES OF VEHICLE

(a) Includes ambulances and hearses. (b) Excludes tractors, trailers, plant and equipment, etc.  
(c) Queensland panel vans are included with utilities.

## Motor vehicles on register, etc.

The following table shows particulars of the number of motor vehicles on register and the number per 1,000 of population at 31 December 1966.

**MOTOR VEHICLES(a) ON REGISTER: STATES AND TERRITORIES  
31 DECEMBER 1966**

State or Territory	Motor cars, station wagons, ambu- lances, hearses	Utilities, panel vans, trucks(b), omnibuses	Motor cycles	Total(c)	Per 1,000 of population
New South Wales . . . . .	1,087,490	295,448	21,026	1,403,964	329
Victoria . . . . .	877,679	220,327	11,811	1,109,817	342
Queensland . . . . .	410,583	156,838	12,637	580,058	346
South Australia . . . . .	307,630	84,989	11,808	404,427	368
Western Australia . . . . .	231,916	86,554	8,857	327,327	385
Tasmania . . . . .	99,947	31,184	1,562	132,693	355
Northern Territory . . . . .	9,722	6,023	466	16,211	421
Australian Capital Territory . . . . .	32,272	5,311	547	38,130	381
<b>Australia . . . . .</b>	<b>3,057,239</b>	<b>886,674</b>	<b>68,714</b>	<b>4,012,627</b>	<b>344</b>

(a) On a basis comparable with the Census of Motor Vehicles, 1962. All figures are subject to revision.  
(b) Includes other truck-types. (c) Excludes tractors, trailers, plant and equipment, etc.

The table following shows a summary for Australia of the number of motor vehicles on register and the number per 1,000 of population at 31 December each year 1961 to 1966.

**MOTOR VEHICLES ON REGISTER: AUSTRALIA, 1961 TO 1966**

31 December—	Motor cars, station wagons, ambulances, hearses	Utilities, panel vans, trucks(a), omnibuses	Motor cycles	Total(b)	Per 1,000 of population
1961(c) . . . . .	2,126,339	803,551	88,855	3,018,745	285
1962(d) . . . . .	2,300,134	827,344	81,859	3,209,337	297
1963(e) . . . . .	2,498,925	844,481	74,719	3,418,125	311
1964(e) . . . . .	2,707,018	862,397	69,517	3,638,932	324
1965(e) . . . . .	2,893,146	872,185	67,417	3,832,748	335
1966(e) . . . . .	3,057,239	886,674	68,714	4,012,627	344

(a) Includes other truck-types. (b) Excludes tractors, trailers, plant and equipment, etc. (c) Estimates on a basis comparable with the Censuses of 1955 and 1962. (d) Census figures. (e) Subject to revision.

The table following shows the number of motor vehicles on register per 1,000 of population in each State and Territory at 31 December for each of the years 1962 to 1966.

**MOTOR VEHICLES(a) ON REGISTER PER 1,000 OF POPULATION  
STATES AND TERRITORIES, 1962 TO 1966**

31 December—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1962(b)	281	301	287	340	331	293	373	316	297
1963(c)	294	314	303	349	343	308	392	342	311
1964(c)	309	325	322	359	352	324	405	354	324
1965(c)	320	334	336	362	366	339	408	367	335
1966(c)	329	342	346	368	385	355	421	381	344

(a) Excludes tractors, trailers, plant and equipment, etc. (b) Census figures. (c) Subject to revision.

**Drivers' and riders' licences**

At 30 June 1966 the numbers of licences in force to drive or ride motor vehicles were: New South Wales, 1,622,189; Victoria, 1,259,477; South Australia, 457,374; Western Australia, 345,412; Tasmania, 142,100; Australian Capital Territory, 52,038. Particulars are not available for Queensland and the Northern Territory.

**Registrations of new motor vehicles**

**REGISTRATIONS OF NEW MOTOR VEHICLES: STATES AND  
TERRITORIES, 1966**

State or Territory	Motor cars and station wagons	Utilities, panel vans, trucks and omnibuses (a)	Motor cycles	Total
New South Wales	109,675	24,053	4,079	137,807
Victoria	85,073	16,528	1,413	103,014
Queensland	41,159	12,063	1,653	54,875
South Australia	28,744	6,110	1,097	35,951
Western Australia	26,427	8,925	893	36,245
Tasmania	10,304	2,706	272	13,282
Northern Territory	1,172	850	176	2,198
Australian Capital Territory	3,925	656	122	4,703
<b>Australia</b>	<b>306,479</b>	<b>71,891</b>	<b>9,705</b>	<b>388,075</b>

(a) Includes other truck-types, ambulances and hearses.

**REGISTRATIONS OF NEW MOTOR VEHICLES  
AUSTRALIA, 1962 TO 1966**

Year	Motor cars and station wagons	Utilities, panel vans, trucks and omnibuses (a)	Motor cycles	Total
1962	266,789	56,457	5,414	328,660
1963	307,380	66,783	5,272	379,435
1964	333,063	75,492	6,482	415,037
1965	331,751	75,190	8,062	415,003
1966	306,479	71,891	9,705	388,075

(a) Includes other truck-types, ambulances and hearses.

## ROAD TRAFFIC ACCIDENTS

## Accidents reported

Accidents involving casualties, persons killed, persons injured

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): NUMBER OF ACCIDENTS, PERSONS KILLED OR INJURED STATES AND TERRITORIES, 1965

State or Territory	Accidents involving casualties	Persons killed			Persons injured		
		Number	Per 100,000 of mean population	Per 10,000 motor vehicles registered	Number	Per 100,000 of mean population	Per 10,000 motor vehicles registered

## ROADS

## Summary of roads used for general traffic

*Proclaimed or declared roads.* The table following is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30 June 1966. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points: availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; the value of the roads as connecting links between centres of population or business; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

**PROCLAIMED OR DECLARED ROADS: LENGTHS**

<i>Total other roads . . .</i>	<i>3,239</i>	<i>943</i>	<i>12,931</i>	<i>..</i>	<i>51,362</i>	<i>379</i>	<i>68,854</i>
<b>Grand total . . .</b>	<b>25,589</b>	<b>14,502</b>	<b>24,438</b>	<b>8,193</b>	<b>54,827</b>	<b>2,246</b>	<b>129,795</b>

(a) Metropolitan only. (b) Includes mining access roads, farmers' roads and tourist tracks.  
(c) Maintenance of these roads is the responsibility of the several local authorities. (d) Forest roads and by-pass roads. (e) Gazetted as controlled access roadway but not constructed. (f) Subsidised roads.

*Total roads.* The following table represents an attempt to classify all the roads open for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad surface groups. The figures in the table for the States are obtained from the Deputy Commonwealth Statistician in each State, and are derived mainly from local government sources.

'Total' figures and 'cleared only' figures for South Australia in the table show considerable reductions compared with those for previous years. This is due to the results of a recent investigation of road mileages by the Commissioner of Highways.

**ALL ROADS OPEN FOR GENERAL TRAFFIC; LENGTHS**  
**STATES AND TERRITORIES, 30 JUNE 1966**  
(Miles)

Further information on roads, including financial particulars, are included in Chapter 21, Local Government.

#### Australian Road Research Board

The Australian Road Research Board was established by the road authorities of the Commonwealth and State Governments in 1960 as a national centre for road research. The Board was incorporated in January 1965 as a public company by guarantee, memorandums and articles of association being drafted in general conformity with the constitution which had been accepted in 1960. The company members are the Commonwealth of Australia, the commissioners of the central road authorities in New South Wales, Queensland, South Australia, and Western Australia, the Department of Public Works, Tasmania, and the Country Roads Board, Victoria. The Director-General of the Commonwealth Department of Public Works and the departmental heads of the other road authorities constitute the Board, which controls all policy and activities. Finance for all activities has been provided by the company members on an agreed basis.

The objectives of A.R.R.B. include planning an adequate programme of research and development, arranging for individual projects to be carried out directly and by co-operating organisations, and providing conferences and publications to bring these and other advances to everyone interested in roads. The following list of possible subjects indicates the range of studies provided for in the original constitution: road planning, location, design, safety, materials, construction, maintenance, structures, equipment, traffic and transport, economics, administration,

financing, management, accounting, and any other matters affecting the provision, upkeep, use, protection, and development of roads. In planning a creative programme the Board continues to look for those subjects which seem to offer the highest profit to road engineers and the community.

The work on research projects is carried out either directly by the Board's own staff, in many cases acting in co-operation with the road authorities of the various Governments, or through co-operative projects established with departments of universities in Adelaide, Brisbane, Melbourne, Perth, and Sydney. The Board has endeavoured to provide or sustain the additional staff required for these external projects, but university staff members furnish willing and generous advice and co-operation in all parts of these studies.

As with most research organisations, the Board has made very full use of systematic consultation through various advisory groups. Members of these groups have been recruited from persons with the ability to contribute, who were prepared to serve as individuals and not as representatives of particular organisations. In an attempt to secure completely unfettered counsel, most of the members of the advisory groups were drawn from outside the Board and its staff. The various committees include a general Advisory Council and several particular types of specialist committees. In addition, the technical committees of the National Association of Australian State Road Authorities have, from the initiation of A.R.R.B., been a continuing and valuable source of advice and consultation. In this way, therefore, exceedingly valuable advice has been obtained from individuals drawn from the State road authorities, local authorities, C.S.I.R.O., Australian universities, several Commonwealth departments, and from private companies and consultants.

## CIVIL AVIATION

### Department of Civil Aviation

Control of civil aviation in Australia is exercised by the Department of Civil Aviation, which was established in 1939 to take over from the Civil Aviation Board the regulation of civil aviation in Australia. The Department's jurisdiction covers not only Australia but also Papua, New Guinea and areas of the Indian and Pacific Oceans. Year Book Nos. 16, 19 and 38 trace the establishment of civil aviation control in Australia and the appropriate Acts of Parliament and Regulations under which this control is exercised. The present functions of the Department are shown in Year Book No. 51, pages 578-9, and further details about its operations are given in the annual reports to the Commonwealth Parliament by the Minister for Civil Aviation.

### International activity

*International organisations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council, and the South Pacific Air Transport Council appeared in Year Book No. 37, and particulars of subsequent activity in the international field were included in No. 38. The International Civil Aviation Organization had a membership of 111 nations in June 1966. Australia has continued its position as a member of the Council, which it had held since I.C.A.O. was established in 1947. Further details will be found in Year Book No. 40 and earlier issues.

*International agreements.* Australia had air services agreements with twenty countries by 30 June 1966. They were Britain, Canada, Ceylon, France, Federal Republic of Germany, India, Iran, Ireland, Italy, Japan, Lebanon, Malaysia, Netherlands, New Zealand, Pakistan, Singapore, South Africa, Thailand, United Arab Republic, and the United States of America. Under these agreements, Australia is granted rights to operate services between Australia to and through the countries in question. These rights are exercised by Australia's international airline Qantas. The designated airline of the signatory country is also granted reciprocal rights. Australia also had air services arrangements with thirteen other countries at 30 June 1966. These were Austria, Burma, the Republic of China, Greece, Indonesia, Iraq, Laos, Mexico, the Philippines, Portugal, Saudi Arabia, Turkey, and the Republic of Vietnam. Qantas also operates services to and through most of these countries under these arrangements.

*International air services.* In November 1966 thirteen overseas international airlines were operating regular scheduled services to Australia. These included: Air-India (India), Air New Zealand (New Zealand), Alitalia (Italy), British Overseas Airways Corporation (United Kingdom), Canadian Pacific Air Lines (Canada), Deutsche Lufthansa (Federal Republic of Germany), Koninklijke Luchtvaart Maatschappij (K.L.M.) (Netherlands), Pan-American World Airways (United States of America), Philippine Air Lines (Philippines), South African Airways (South Africa), and Union de Transports Aériens (France). The Indonesian airline, P.N. Merpati Nusantara, operates services between Sukarnapura in West Irian and Lae in New Guinea, and Trans-Australia Airlines between Darwin and Portuguese Timor under charter to Transportes Aéreos de Timor. By November 1966 Qantas, Australia's international airline, was operating thirteen Boeing 707-138B jet aircraft, six larger Boeing 707-338C jet aircraft, and three Lockheed Electra aircraft. Qantas intends buying another fifteen Boeing 707-338C aircraft for delivery in

1967 through to 1969, and disposing of its thirteen smaller Boeing 707-138B's, giving it a fleet of twenty-one Boeing 707-338C's. All the shares in Qantas Empire Airways are owned by the Commonwealth Government.

*International operations.* The table following shows particulars of international airline traffic during 1965-66 moving into and out of an area which embraces the Commonwealth of Australia, Papua-New Guinea and Norfolk Island. These figures do not include traffic between Australia and Papua-New Guinea and Norfolk Island.

**CIVIL AVIATION: INTERNATIONAL AIRLINE TRAFFIC  
TO AND FROM AUSTRALIA(a), 1965-66**

Type of traffic	Aircraft move- ments	Passengers	Freight	Mail
Traffic to Australia—			short tons	short tons
Qantas Empire Airways . . . . .	2,366	136,162	4,482	1,250
Other airlines . . . . .	2,858	146,022	3,043	1,089
<i>All airlines . . . . .</i>	<i>5,224</i>	<i>282,184</i>	<i>7,525</i>	<i>2,339</i>
Traffic from Australia—				
Qantas Empire Airways . . . . .	2,385	126,894	3,062	978
Other airlines . . . . .	2,852	120,933	2,441	571
<i>All airlines . . . . .</i>	<i>5,237</i>	<i>247,827</i>	<i>5,503</i>	<i>1,549</i>

(a) Australian mainland and adjacent Territories (Papua-New Guinea and Norfolk Island).

Particulars of revenue operations of Australian regular overseas services are shown in the following table. These operations include all stages of Qantas Empire Airways flights linking Australia with external territories and overseas countries, and stages external to the Commonwealth for flights of other Australian-owned airlines, they exclude flights over stages located within Papua-New Guinea (*see* footnote (a) to table following for years prior to 1965-66).

**CIVIL AVIATION: OPERATIONS OF AUSTRALIAN REGULAR OVERSEAS SERVICES  
1961-62 TO 1965-66**

	1961-62 (a)	1962-63 (a)	1963-64 (a)	1964-65 (a)	1965-66
Hours flown . . . . . number	51,066	48,669	53,792	68,028	68,405

Mail—					
Tons uplifted . . . . . short tons	2,015	2,468	2,654	3,124	3,252
Ton-miles(b) . . . . . '000	11,622	15,191	16,057	19,891	20,914

(a) Includes, for flights between Papua-New Guinea, operations over stages located within the Commonwealth and within Papua-New Guinea. (b) In terms of short tons.

**Regular air services within Australia**

*Interstate services.* Scheduled interstate services with passenger and all-freight aircraft are provided by two airlines only, the private enterprise airline Ansett-A.N.A. (a subsidiary of Ansett Transport Industries) and the Commonwealth-owned Trans-Australia Airlines. All principal

routes are competitive, with both airlines providing equal capacities in accord with legislation passed by the Commonwealth Parliament. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act 1952-1961* and the *Airlines Equipment Act 1958*. The Airlines Equipment Act established the machinery for the achievement and maintenance of comparable, but not necessarily identical, aircraft fleets between T.A.A. and Ansett-A.N.A., and is designed to prevent the provision of excess aircraft capacity. The Airlines Agreement Act established the basis of control of the two-airline competitive system and extended this machinery to 1977.

In addition to purely interstate services, both Ansett-A.N.A. and Trans-Australia Airlines operate routes to New Guinea and non-competitive intra-state routes in Australia. The Ansett-A.N.A. non-competitive routes radiate mainly from Melbourne, while those of Trans-Australia Airlines are located mainly within Queensland and Tasmania. In addition, Trans-Australia Airlines operate services within Papua-New Guinea in competition with another Ansett subsidiary, Ansett-M.A.L., and the independent Papuan Airlines.

At 30 October 1966 the Ansett-A.N.A. fleet included four Boeing 727's, three Electras, eight Viscounts, four DC6B's, five Friendships, two Carvairs, a number of DC4's and DC3's, eight helicopters, and smaller aircraft. At the same date Trans-Australia Airlines operated a fleet of four Boeing 727's, three Electras, fourteen Viscounts, nine Friendships, a number of DC4's and DC3's, three helicopters, and smaller aircraft.

*Intra-state services.* In addition to the intra-state services operated by Ansett-A.N.A. and Trans-Australia Airlines there are a number of smaller regional airlines operating from Sydney (Airlines of New South Wales and East-West Airlines), Brisbane (Queensland Airlines), Adelaide (Airlines of South Australia), Perth (MacRobertson Miller Airlines), and Alice Springs (Connellan Airways). With the exception of Connellan Airways, which provides regular service to outback homesteads and communities, all the remainder are concerned primarily with traffic moving to and from the respective capital city. With the exception of the independently owned East-West Airlines and Connellan Airways, all regional airlines are subsidiaries of Ansett Transport Industries. The largest aircraft used by these regional airlines are DC4's, Convair Metropolitans, and Friendships, supported by DC3's. Connellan Airways uses smaller aircraft types.

*Internal operations.* Particulars of the revenue operations of all regular internal air services during each of the years 1961-62 to 1965-66 are set out in the next table. A graph showing paying passengers and freight carried appears on plate 33 over the page.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES**  
**AUSTRALIA(a), 1961-62 TO 1965-66**

	1961-62 (b)	1962-63 (b)	1963-64 (b)	1964-65 (b)	1965-66
Hours flown . . . number	207,210	217,897	244,517	256,231	261,535
Miles flown . . . '000	41,176	43,700	48,971	52,323	55,020
<b>Passengers—</b>					
Embarkations . . . number	2,666,160	2,832,934	3,256,937	3,763,936	4,157,873
Passenger-miles . . . '000	1,119,430	1,221,178	1,408,317	1,639,087	1,831,360
<b>Freight—</b>					
Tons uplifted . . . short tons	57,207	59,373	63,161	69,959	76,079

<b>Mail—</b>					
Tons uplifted . . . short tons	6,311	6,467	7,082	7,736	8,633
Ton-miles(c) . . . '000	3,198	3,324	3,741	4,074	4,587

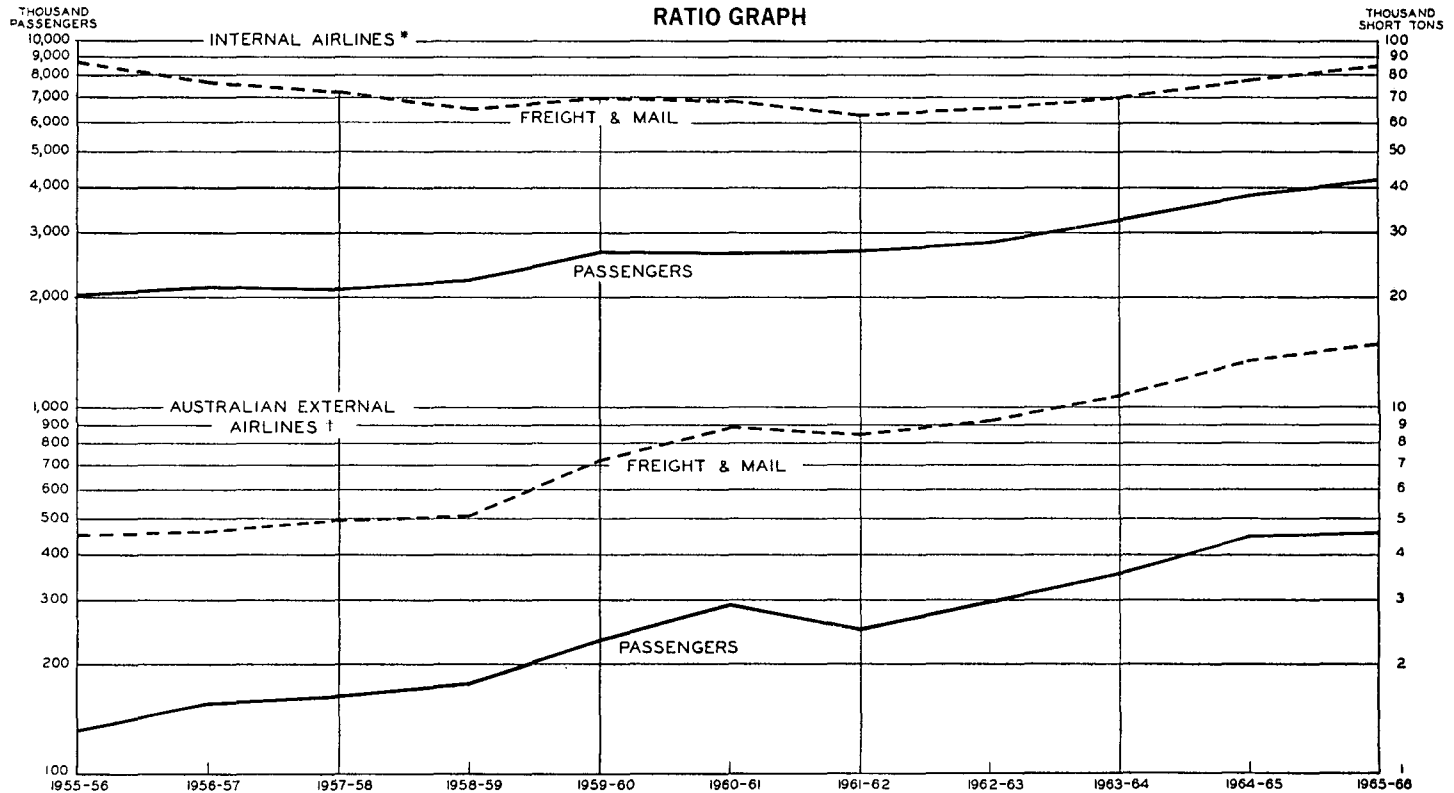

(a) Includes flights of all Australian-owned airlines with the exception of those of Qantas Empire Airways between airports located within the Commonwealth. (b) Excludes, for flights between Papua-New Guinea, operations between airports located within the Commonwealth. (c) In terms of short tons.

**General aviation**

General aviation activity, which covers all non-airline operations such as charter, aerial work and private flying, has grown rapidly throughout Australia in the post-war period so that now it is an important sector of the Australian aviation industry. In 1965, hours flown totalled 714,058 compared with 354,000 hours flown by Australian airline aircraft. At 30 June 1966, aircraft employed in general aviation numbered 2,382.

# CIVIL AVIATION: AUSTRALIA, 1955-56 TO 1965-66

## PAYING PASSENGERS AND FREIGHT CARRIED

\* INCLUDES ONLY SERVICES OPERATING WITHIN THE AUSTRALIAN MAINLAND AND TASMANIA. † AIRLINES WHOLLY OR PARTLY OWNED BY AUSTRALIAN INTERESTS.  
 NOTE: VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE: ACTUAL NUMBERS ARE INDICATED BY THE SCALES.

### **Government aid to flying training**

The Commonwealth Government has subsidised flying training in Australia since 1926. The aid is distributed through the aero clubs and, in more recent years, the commercial flying training schools. In 1966 the Government reviewed the level of its assistance to the Australian flying training movement and decided to:

- continue the highly successful Australian Flying Scholarship Scheme for another five years with a subsidy of \$100,000 a year;
- propose a partnership with commercial airlines in subsidising additional scholarships on a dollar for dollar basis up to \$75,000 a year;
- grant another \$150,000 in subsidies to the aero clubs and commercial flying schools;
- establish a special 'revolving fund' to help country aero clubs to buy new training aircraft;
- make secretariat grants of \$18,000 and \$3,000 respectively to the Aero Club Federation and the Association of Commercial Flying Organisations; and
- make an annual grant of \$15,000 to the Gliding Federation for each of the next five years.

The Australian Flying Scholarship Scheme is designed to help young Australians train as career pilots for Australia's rapidly expanding commercial aviation industry. The scholarships provide financial aid in much the same way as Commonwealth scholarships provide for students undertaking other professions. They enable scholarship winners to train as commercial pilots, instructors and agricultural pilots. Since the scheme started in 1962, 846 scholarships have been awarded.

During 1965-66 pupils of the Australian flying training organisations (aero clubs and commercial flying schools) received 439 private licences, 261 commercial licences and 82 instructor ratings. Subsidised hours flown by aero clubs and flying schools totalled 173,114 hours out of a total of 230,496 hours flown, and their subsidy earnings totalled \$270,923. A limit placed on the subsidy restricted the total payment to \$150,000. During the year clubs were also assisted with the purchase of twenty-two aircraft. The value of this assistance under the Aircraft Replacement Fund was \$20,000. The permanent secretariats of the Royal Federation of Aero Clubs and the Commercial Flying Schools also received \$16,000 and \$2,000 respectively during 1965-66 as additional financial assistance.

Forty-five clubs were affiliated with the Gliding Federation of Australia in 1965-66 and there were more than 1,600 members. During 1965-66 the Commonwealth assisted gliding clubs to the extent of \$12,000. The total of all subsidy payments and financial assistance to flying training organisations and the gliding movement during 1965-66 was \$350,000.

### **Aerodromes**

The number of aerodromes throughout Australia and its Territories at 30 June 1966 was 646. One hundred and twenty-five were owned by the Commonwealth Government and 521 by local authorities and private interests. Capital expenditure on aerodrome construction increased from \$9.10 million in 1964-65 to \$14.7 million in 1965-66 and is expected to reach an estimated \$22 million during 1966-67. Maintenance expenditure on Commonwealth-owned aerodromes during 1965-66 was \$6.5 million, and development grants to licensed aerodromes participating in the Local Ownership Plan totalled \$0.9 million. The two major projects at Melbourne and Sydney included in the current five-year airports programme, which ends in 1967-68, are proceeding satisfactorily. The work at Sydney, which involves a major runway extension and a new international terminal, is estimated to cost \$43 million. The new Melbourne airport is to cost \$40 million. The projects as a whole are expected to be completed in 1969, but progressive use will be made of the facilities as they become available. Total estimated cost of the Commonwealth's current airport expansion programme is \$120 million.

### **Airways facilities**

Concurrently with the five-year aerodrome development programme, the Commonwealth Government has approved major extensions and improvements to Australia's air navigation and communications system. New long-range radar units have been installed at Sydney, Melbourne, Brisbane, and Adelaide to assist air traffic control, and other units are being established at Perth, Canberra and in northern New South Wales. Total cost of this radar programme is approximately \$8 million.

Further progress has been made with the programme, started in 1961, of increasing the number of laterally spaced air routes in heavy traffic areas throughout Australia and improving the network of radio navigational aids defining them. A further thirteen navigational aids were put into operation during 1965-66. The number of navigational aids operating throughout the Commonwealth at 30 June 1966 totalled 297. These included 86 distance measuring equipment (DME) beacons, 32 visual aural ranges (VAR), 156 non-directional beacons (NDB), 10 VHF omni radio ranges (VOR), and 13 instrument landing systems (ILS).

## Aircraft on the Australian register

Persons seriously injured . . . . .	38	26	26	7	28

(a) Aircraft on Australian register and gliders irrespective of location of accident.

(b) Includes parachutists killed.

**POSTS: INTERNAL AND OVERSEAS TELECOMMUNICATION SERVICES  
RADIOCOMMUNICATION STATIONS**

In this division particulars for the Australian Capital Territory are included with those for New South Wales, and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated. The Central Office of the Postmaster-General's Department is located in Melbourne, Victoria.

**Postmaster-General's Department—General**

Under the provisions of the *Post and Telegraph Act* 1901-1966 the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 481-4), and, in conjunction with the Overseas Telecommunications Commission (*see* pages 479-81), with whom there is close co-operation, provides facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment and military allotments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, and the collection of land tax.

**Postal facilities**

The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30 June 1966.

1965-66 . .	2,123,338	401,578	18,327	12,886	2,556,128

For footnotes see previous table.

During 1965-66 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows: road, \$9,479,251, railway, \$3,569,734; sea, \$635,623; air—internal, \$3,567,049, overseas, \$13,891,585; grand total, \$31,143,242.

**Money orders and postal orders**

The issue of money orders and postal orders is regulated by sections 74-79 of the *Post and Telegraph Act* 1901-1966. The maximum amount for which a single money order payable within Australia may be obtained is \$80, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent by any one person to a person or persons outside Australia is \$20 a week. A postal order is not available for a sum larger than four dollars. The following table shows the number and value of money orders and postal orders issued in Australia in each of the years 1961-62 to 1965-66 and the income therefrom which has accrued to the Post Office.

**MONEY ORDERS AND POSTAL ORDERS(a): TRANSACTIONS, AUSTRALIA**  
**1961-62 TO 1965-66**

Year	Money orders(b)			Postal orders(a)		
	Issued(c)		Total commission received	Issued		Fee
	Number	Value		Number	Value	
	<sup>'000</sup>	<sup>\$'000</sup>	<sup>\$'000</sup>	<sup>'000</sup>	<sup>\$'000</sup>	<sup>\$'000</sup>
1961-62 . .	10,176	264,992	1,752	15,514	16,192	614
1962-63 . .	11,076	306,866	1,858	16,330	17,240	642
1963-64 . .	11,838	338,674	2,004	15,987	17,234	634
1964-65 . .	12,176	376,356	2,103	15,338	16,737	618
1965-66 . .	12,634	407,275	2,200	15,010	16,184	604

(a) Postal orders replaced postal notes on 1 June 1966. (b) Money orders issued for payment in Australia and Papua and New Guinea. (c) Includes official money orders used in bringing to account telephone accounts and collections on War Service Homes repayments.

Of the total money orders issued in Australia during 1965-66, 12,185,004 valued at \$404,341,291 were payable in Australia, and 449,245 valued at \$2,934,070 were payable overseas. Of the total money orders paid in Australia during 1965-66, 12,097,599 (\$404,124,469) were issued in Australia, and 192,528 (\$2,968,286) were issued overseas.

Of the total postal orders paid in Australia during 1965-66 (14,958,584 valued at \$16,481,630), 10,175,422 (\$11,678,204) were paid in the State in which issued, and 4,793,162 (\$4,803,426) were paid in States other than those in which issued.

### Internal telecommunication services

A review of the development of telegraph services in Australia up to 1921 appeared in Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. Internal telecommunication operations now comprise telephone, telegraph, and telegraph exchange (telex) services.

#### Wire and pole mileages

At 30 June 1966 there were 15,288,000 single wire miles of cable and 1,285,000 miles of aerial wire used for telecommunication purposes in Australia. The aerial wires were mounted on 119,183 miles of pole routes, and joint use is made of these poles for both power and telecommunication reticulation.

#### Telephone services in operation

The following table shows the number of services in operation in each State at 30 June 1966 classified according to type of service, type of exchange to which connected, and location. Telephone services connected to exchanges located within fifteen miles of the Sydney and Melbourne and ten miles of the Brisbane, Adelaide, Perth, and Hobart General Post Offices are defined as being within a metropolitan area.

1965-66 . . .	2,103,000	992	116,600	55	2,219,600

Subscriber trunk dialling (S.T.D.) facilities were introduced during the year 1961-62 from Canberra to the Sydney network and from Warragul (Victoria) to Melbourne. At the end of June 1966 subscriber trunk dialling was in operation at 119 exchanges, serving approximately 285,862 subscribers.

## Internal telegraphs

Telegrams can be lodged at any post office, telephone office or from any public telephone equipped for multi-coin operation. In addition, telegrams can be despatched from any subscriber's telephone or telegraph exchange (telex) equipment. The number of telegrams of various types transmitted within the Commonwealth during the years 1961-62 to 1965-66 is set out hereunder.

**Overseas telecommunication services**

The Overseas Telecommunications Commission (Australia) is the authority responsible for the establishment, maintenance, operation and development of Australia's overseas public telegraph, phototelegraph and telex services by cable and by radio, and the provision, maintenance, and development of cable and radio facilities for the conduct of Australia's overseas telephone services and of the facilities for services with ships at sea.

The Commission was established under the *Overseas Telecommunications Act 1946-1966*. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunication services of the British Commonwealth countries concerned and for the establishment of a representative advisory board, the Commonwealth Telecommunications Board, to co-ordinate their development.

The Commission provides telegraph, telex, phototelegraph, and, in conjunction with the Postmaster-General's Department, telephone services with overseas countries and Australian Territories. Leased one- and two-way circuits are also provided for large commercial users. In addition, it operates the Australian coastal radio services for communication with ships at sea in Australian waters and high frequency radio services for communication with ships in any part of the world. The Commission's coastal radio stations also provide certain services to a number of remote stations within Australia and its Territories.

Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Year Book No. 37, pages 220-4.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in current forms of telegraph cables and high frequency radio systems, the Commission, in partnership with the overseas telecommunications authorities of Britain, Canada and New Zealand, installed a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. Work was commenced in August 1960, and the cable (COMPAC) was opened in December 1963. This cable forms part of a British Commonwealth large capacity cable scheme, in which a complementary cable between Britain and Canada (CANTAT) was officially opened in December 1961. The two cable connections are linked across Canada by a microwave system. The Commonwealth cable system feeds into the United States of America network at Hawaii and into the European network at London.

The next stage of the system, the south-east Asia cable project (SEACOM), will extend the large capacity telephone cable from Sydney to Singapore and Kuala Lumpur via Cairns, Madang, Guam, Hong Kong, and Jesselton. The Singapore-Jesselton section was opened for service on 15 January 1965 and the Jesselton-Hong Kong section on 31 March 1965. The whole project is scheduled for opening early in March 1967.

Separate management committees, comprising representatives of the overseas telecommunication authorities and the partner Governments, Britain, Canada, Australia, and New Zealand, with the addition, for SEACOM, of Malaysia and Singapore, administered COMPAC and SEACOM projects up to November 1965, when these committees were amalgamated into the Commonwealth Cable Management Committee.

Two years of international discussion and negotiations were climaxed by the signing in August 1964 by a number of countries, including Australia, of agreements to establish the first global commercial communications satellite system, of which the 'space segment' is estimated to cost \$US 200 million. 'Space segment' is a broad description of the communications satellites and the tracking, control, command, and related facilities required to support operation of the satellites. An earth station, owned and operated by the Commission, has been built at Carnarvon, Western Australia, at a cost of almost \$3 million to operate into communications satellite INTELSAT II launched in January 1967 and positioned in geo-stationary orbit 22,300 miles above the equator at longitude 175°E. A contract for the erection of a second earth station to be completed by December 1967 has been let. This station which also will work into INTELSAT II is being established in Moree, New South Wales, with necessary staff residences, at a cost estimated at \$4 million.

#### International telecommunication traffic

Particulars of the volume of international telegram business, originating and terminating in Australia, transacted over the cable and radio services during 1965-66 are shown in the following table.

INTERNATIONAL TELEGRAPHIC TRAFFIC: AUSTRALIA, 1965-66(a)  
(<sup>'000 words</sup>)

(a) Year ended 31 March. (b) Excludes 68,615 paid telephone minutes and 12,485 paid telex minutes transmitted to Australian External Territories. (c) Excludes 98,770 paid telephone minutes and 4,291 paid telex minutes transmitted from Australian External Territories.

## Coast stations

The Overseas Telecommunications Commission operates fifteen coastal radio stations at points around the Australian coast, three around the Papua-New Guinea coast, and one at Norfolk Island. During the year ended 31 March 1966 the coastal radio service handled 4,601,150 paid words to ships and 2,903,583 words from ships. Ship calls over the radiotelephone service extended over 45,911 paid minutes.

## Radiocommunication stations authorised

The following table shows particulars of the different classes of radiocommunication stations authorised in Australia at 30 June 1966. Figures relate to radiocommunication (radio telegraph and radiotelephone) stations only; particulars of broadcasting stations and of broadcast listeners' licences are shown on pages 483 and 485 respectively.

(f) Includes 182 stations which cannot be classified according to State or Territory.

## BROADCASTING AND TELEVISION

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act 1942–1966* and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service, and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting Stations Licence Fees Act 1964–1966* and the *Television Stations Licence Fees Act 1964–1966* respectively.

Particulars of the composition, functions and responsibilities of the Australian Broadcasting Control Board are shown in Year Book No. 51, pages 594–5.

### Broadcasting services

#### The National Broadcasting Service

In sound broadcasting the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department.

*Technical facilities.* At 30 June 1966 the National Broadcasting Service comprised seventy-five transmitting stations, of which sixty-seven were medium frequency and eight high frequency.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles a second. The high-frequency stations, using frequencies within the band three to thirty megacycles a second, provide services to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilised to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

At 30 June 1966 fifty-five of the Australian medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

*Programme facilities.* The programmes of the Australian Broadcasting Commission cover a wide range of activities. The proportion of broadcasting time allocated to the various types of programme during 1965-66 was as follows: classical music, 25.5 per cent; light entertainment, 12.3 per cent; news, 8.4 per cent; sporting, 4.5 per cent; light music, 3.1 per cent; talks, 6.7 per cent; drama and features, 3.6 per cent; education, 3.6 per cent; Parliament, 4.3 per cent; religious, 2.9 per cent; children's programmes, 2.5 per cent; rural, 1.7 per cent; and non-departmental and special programmes, 20.9 per cent. Further particulars of the operations of the Australian Broadcasting Commission in respect of music, drama and features, youth education, talks, rural broadcasts, news, and other activities are shown in Year Book No. 51, pages 596-7.

#### The Commercial Broadcasting Service

Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is \$50 on the grant of the licence, and thereafter \$50 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Broadcasting Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

#### Overseas Broadcasting Service

There are seven high-frequency stations at Shepparton and one at Lyndhurst, Victoria, which provide the overseas service known as 'Radio Australia'. As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programmes are arranged by the A.B.C. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

#### Broadcasting stations

The following table shows the number of broadcasting stations in operation at 30 June 1966.

## BROADCASTING STATIONS: STATES AND TERRITORIES, 30 JUNE 1966

Type of station	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

Overseas (high frequency) . . .	..	8	..	..	..	..	..	..	8
Commercial (medium frequency) . . .	37	20	22	8	14	8	1	1	111
Total . . .	56	36	40	16	26	12	5	3	194

Tables showing the call sign, location, frequency, and aerial power of national and commercial broadcasting stations in operation at 30 June 1966 are shown in *Transport and Communication*, Bulletin No. 57.

## Television services

## The National Television Service

The National Television Service is provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department. The first national station (ABN Sydney) commenced regular transmissions on 5 November 1956. At 30 June 1966 thirty-four stations were operating, excluding two translator stations. Five additional national television stations had been authorised but had not commenced to operate by that date. It is planned that all services will be in operation by the end of 1967.

The television programmes provided by the Australian Broadcasting Commission cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30 June 1966 was as follows: drama, 25.9 per cent; talks, 12.1 per cent; sporting, 11.2 per cent; children's session, 8.1 per cent; news, 6.5 per cent; light entertainment, 9.5 per cent; education, 15.0 per cent; music, 2.2 per cent; religious, 2.6 per cent; rural services, 1.9 per cent; non-departmental, 5.0 per cent. Further particulars of the operation of the National Television Service in respect of talks, drama and features, music, rural services, education, news and other activities are shown in Year Book No. 51, pages 598-9. Transmission time for the year ended 30 June 1966 totalled 101,090 hours.

## The Commercial Television Service

Commercial television stations are operated under licences granted and renewed by the Postmaster-General. The first commercial station (TCN Sydney) commenced regular transmission on 16 September 1956. At 30 June 1966 thirty-nine television stations were operating.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is \$200 for the first year and thereafter \$200 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Television Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

## Television stations

During the year ended 30 June 1966 the following national television stations commenced regular transmissions: *New South Wales*—ABLN Channel 2, Broken Hill area; ABSN Channel 8, Bega-Cooma area; ABTN Channel 1, Manning River area; ABUN Channel 7, Upper Namoi area; *Victoria*—ABMV Channel 4, Mildura area; ABSV Channel 2, Murray Valley area; *Queensland*—ABWQ Channel 6, Wide Bay area; *South Australia*—ABGS Channel 1, South East area; *Western Australia*—ABAW Channel 2, Southern Agricultural area; ABCW Channel 4, Central Agricultural area. The following commercial television stations also commenced regular transmissions during the year ended 30 June 1966. *New South Wales*—CWN Channel 6, Central Western Slopes area; ECN Channel 8, Manning River area; MTN Channel 9, Murrumbidgee Irrigation area; *Victoria*—STV Channel 8, Mildura area; *Queensland*—TVQ Channel 0, Brisbane; SDQ Channel 4, Southern Downs area; *South Australia*—SAS Channel 10, Adelaide; SES Channel 8, South East area. Particulars of all television stations in operation at 31 December 1964 are shown in Year Book No. 51, pages 598-9. The following table shows the number of television stations in operation at 30 June 1966.

Tables showing the call sign, location, frequencies, polarisation, aerial power, and weekly hours of transmission of National and Commercial television stations in operation at 30 June 1966 are shown in *Transport and Communication*, Bulletin No. 57.

**Broadcast listeners' and television viewers' licences**

Broadcast listeners', television viewers', and combined receiving licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942-1966*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence or a television viewer's licence, whichever is appropriate, authorises the operation of any broadcast receiver or any television receiver, which is: (a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and is ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or a member of his family, and is ordinarily kept at that address when not in use. A person who has both broadcast and television receivers at the one address is required to take out a combined receiving licence, provision for which was introduced by legislation effective from 1 April 1965.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school, and at a concession rate to certain classes of pensioners. Receivers provided for the use of inmates of an institution (including a hospital) are covered by an appropriate licence held by the institution. Persons residing in Zone 2 may also be granted a broadcast listener's licence at a reduced rate. Zone 1 is the areas within 250 miles of specified broadcasting stations and Zone 2 is the remainder of Australia.

Each broadcast or television receiver let out on hire (except under a hire purchase agreement) must be covered by a hirer's licence held by the person or firm from whom the receiver is hired. The keeper of a lodging house (which includes a hotel, motel, boarding house, or any other premises where lodging or sleeping accommodation is provided for reward) must take out a lodging house licence for each broadcast or television receiver provided by the proprietor in any room or part of the lodging house occupied or available for occupation by lodgers.

The fees payable for the various classes of licence are as follows.

## BROADCAST LISTENERS' AND TELEVISION VIEWERS' LICENCES: RATES

Licence	Ordinary rate	Pensioner rate
	\$	\$
Broadcast listener's licence and hirer's licence for a broadcast receiver . . . . . Zone 1	5.50	1.00
Zone 2	2.80	0.70
Lodging house licence for a broadcast receiver . . . . . Zone 1	5.50	..

1960 . . . . .	832,659	606,587	344,198	249,148	171,693	78,900	2,283,185
1965(e) . . . . .	849,291	644,618	343,401	269,040	175,443	75,849	2,357,642
1966(e) . . . . .	929,119	716,594	340,687	281,747	169,709	88,095	2,525,951

(a) Includes short-term hirers' licences. (b) Includes Australian Capital Territory. (c) Includes Northern Territory. (d) Excludes licences for receivers in excess of one. These licences were introduced in July 1942 and were abolished on 31 December 1951. (e) Includes combined broadcast listeners' and television viewers' licences.

## TELEVISION VIEWERS' LICENCES IN FORCE(a): STATES, 1957 TO 1966

30 June—	N.S.W. (b)	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
1957 . . . . .	28,912	44,986	..	..	..	(c) 11	73,909
1960 . . . . .	409,334	353,091	67,337	84,967	35,604	4,662	954,995
1961 . . . . .	488,516	401,395	113,954	124,808	69,628	18,985	1,217,286
1962 . . . . .	564,707	460,558	142,422	143,794	83,951	29,003	1,424,435
1963 . . . . .	637,766	530,256	178,391	167,502	95,907	45,503	1,655,325
1964 . . . . .	721,043	581,286	214,763	194,430	115,272	55,305	1,882,099
1965(d) . . . . .	787,507	620,996	243,660	208,642	123,741	60,079	2,044,625
1966(d) . . . . .	843,103	662,595	277,182	233,726	142,881	66,187	2,225,674

(a) Includes short-term hirers' licences. (b) Includes Australian Capital Territory. (c) These licences were for television sets in the north coast area of Tasmania which were able to receive programmes from Victoria. (d) Includes combined broadcast listeners' and television viewers' licences.

The numbers of combined receiving licences included in both of the foregoing tables as at 30 June 1966 are: New South Wales, 694,910; Victoria, 574,955; Queensland, 217,924; South Australia, 188,695; Western Australia, 114,593; Tasmania, 55,778; Australia, 1,846,855.

Of 2,225,674 television viewers' including combined licences in force at 30 June 1966, 144,736 were held by short-term hirers, and could not be separated into metropolitan licences or country licences. Persons living in the metropolitan area held 1,347,497 or 65 per cent of the remainder. Short-term hirers' licences (included above) at 30 June 1966 were: New South Wales, 53,120; Victoria, 21,887; Queensland, 23,852; South Australia, 26,581; Western Australia, 15,375; and Tasmania, 3,921.

#### Revenue received from broadcast and television licence fees

The following table shows the revenue received from broadcast listeners' licence fees and television viewers' licence fees during the years 1961-62 to 1965-66. Figures for 1964-65 and 1965-66 include revenue from fees for combined licences which took effect on 1 April 1965.

#### REVENUE RECEIVED FROM BROADCAST AND TELEVISION LICENCE FEES STATES, 1961-62 TO 1965-66 (\$'000)

Year	N.S.W. (a)	Vic.	Qld	S.A. (b)	W.A.	Tas.	Aust.

(a) Includes Australian Capital Territory.  
fees.

(b) Includes Northern Territory in respect of broadcast licence

#### TRAVEL

An article outlining the history and growth of travel and the structure of tourist organisations in Australia, prepared by the Australian National Travel Association, appeared in Year Book No. 52, pages 1158-84. The following pages contain the majority of the tables of the original article which it has been possible to bring up-to-date (others appear in other parts of this chapter or Year Book) advanced to the year 1966, together with some revised descriptive matter.

#### Overseas movement

Overseas arrivals in, and departures from, Australia are classified into three categories, namely: *permanent movement* (i.e. settlers arriving and Australian residents departing permanently); *long-term movement* (i.e. Australian residents returning to Australia after a stay in a country abroad for one year or longer, or departing from Australia with the intention of staying in a country abroad for one year or more, and overseas visitors arriving with the intention of staying in Australia for a year or more or departing after a stay in Australia of a year or more); and *short-term movement* (i.e. all other movements). Statistics relating to long-term and permanent movement are included in Chapter 8, Population. The statistics which follow relate to short-term movement. Short-term movement refers basically to travellers, Australian residents and visitors from overseas, who intend to, or actually do, spend a period of less than twelve months in a country abroad or in Australia. This definition includes the movement of Australian troops, regardless of length of their stay abroad, and persons who come to Australia or go abroad for paid work or to study (as long as their intended or actual length of stay is less than one year). It excludes visitors to Australia and residents on visits abroad if their stay in Australia or in a country abroad is one year or more, all crew, and persons who arrive in and depart from Australia on the same ship's voyage or on the same flight; but includes persons who, on arrival, declare their purpose of visiting Australia to be 'in transit', as long as a change of

ship or flight takes place. Australian residents visiting abroad may be *away from Australia* for more than a year but still be included in the short-term movement as long as their *stay in any one country abroad* is not for a year or more.

#### Short-term movement—visitors and residents

The following table shows short-term visitor arrivals from, and returns to, overseas countries.

#### OVERSEAS ARRIVALS AND DEPARTURES—SHORT-TERM MOVEMENT VISITORS, AUSTRALIA, 1957 TO 1966

Year	Arriving			Departing		
	By sea	By air	Total	By sea	By air	Total
1957 . . .	20,464	38,152	58,616	23,097	36,988	60,085
1958 . . .	19,834	41,508	61,342	21,580	39,452	61,032
1959 . . .	18,907	49,213	68,120	21,792	50,238	72,030
1960 . . .	19,581	65,042	84,623	21,804	62,866	84,670
1961 . . .	19,899	79,397	99,296	25,410	77,130	102,540
1962 . . .	19,165	92,259	111,424	23,253	90,330	113,583
1963 . . .	18,066	107,311	125,377	22,358	106,973	129,331
1964 . . .	18,916	128,962	147,878	22,147	128,494	150,641
1965 . . .	20,291	153,037	173,328	24,491	154,442	178,933
1966 . . .	19,547	167,715	187,262	25,541	169,335	194,876

Over the period covered by this table departures exceeded arrivals substantially. The reason lies broadly in the difference between the period of intended stay, as stated on the arrival of the visitor, and the period actually spent in Australia, as stated on his departure, resulting in a different classification on arrival from that on departure.

The following table shows corresponding figures in respect of the short-term movement of Australian residents.

#### OVERSEAS ARRIVALS AND DEPARTURES—SHORT-TERM MOVEMENT AUSTRALIAN RESIDENTS, 1957 TO 1966

Year	Departing			Returning		
	By sea	By air	Total	By sea	By air	Total
1957 . . .	28,189	25,249	53,438	29,897	26,120	56,017
1958 . . .	28,933	29,955	58,888	28,165	30,900	59,065
1959 . . .	33,715	30,916	64,631	28,070	33,684	61,754
1960 . . .	37,160	40,601	77,761	31,945	43,222	75,167
1961 . . .	41,870	48,010	89,880	34,818	51,390	86,208
1962 . . .	39,230	56,642	95,872	34,531	61,384	95,915
1963 . . .	41,053	71,374	112,427	34,205	76,977	111,182
1964 . . .	43,785	89,463	133,248	36,430	94,924	131,354
1965 . . .	51,138	110,554	161,692	43,382	117,162	160,544
1966 . . .	54,348	128,813	183,161	46,024	135,746	181,770

Information is also available as to the country of embarkation on the ship or aircraft which brought visitors to Australia and the country of disembarkation from the ship or aircraft which took residents abroad. The shipping and flight routes available to intending passengers must be taken into account when considering these figures. They do not necessarily indicate the country of origin of visitors, nor the country of destination of residents going abroad.

**OVERSEAS ARRIVALS AND DEPARTURES—SHORT-TERM MOVEMENT

**Direct transit travellers**

As stated on page 486, all the preceding figures in this section exclude persons who arrive in and depart from Australia on the same ship's journey or on the same flight. Persons thus excluded are not all normally considered visitors to Australia. For instance, settlers or other persons going to New Zealand, Papua and New Guinea or other neighbouring countries or leaving such countries may travel through Australia on their way. On the other hand, all persons visiting Australia on cruise vessels, which may remain in Australian waters for a considerable time, are also treated as direct transit travellers and are thus excluded from the figures shown on previous pages. In 1966, 34,366 persons were reported as direct transit passengers on ships calling at Australian ports, accounting for approximately 218,000 passenger-days between arrival at first port and departure from last port in Australia.

**OVERSEAS SHIPPING PASSENGERS IN DIRECT TRANSIT(a)**

(a) Persons who arrived in and departed from Australia on the same ship's voyage.

**Interstate and other internal movement**

Information about the volume and pattern of travel within Australia is limited. Figures are available on passengers transported in Australia by sea, air and rail, but the last two do not distinguish different types of travellers, nor provide detail of their origins and destinations. The following tables show particulars of passengers carried interstate by sea and on internal air services. Statistics of rail passengers are shown on pages 449-51.

**INTERSTATE PASSENGERS BY SEA, BY STATE OR TERRITORY OF EMBARKATION  
AND OF DISEMBARKATION, 1966(a)**

(a) Excludes crew and persons carried as supernumerary crew.

The table above includes passengers on interstate journeys beginning and ending in the same State or Territory. It excludes, however, passengers on cruises from Australia to the south-western Pacific area and back except when they disembarked in a State or Territory other than the State or Territory of embarkation. It is estimated that about 18,770 travellers embarked on such cruises in 1966. All these, and about one in four of the interstate passengers included above, were carried on overseas vessels. Most of the passengers carried interstate by Australian-licensed vessels travelled between the mainland and Tasmania.

The movement figures in the following table represent total embarkations on, and disembarkations from, each airline flight at the airports specified. Movements to and from Papua and New Guinea and Norfolk Island are included.

### Tourist organisation

The *Australian Tourist Commission* was established by the Commonwealth Government under the *Australian Tourist Commission Act 1967*. Its objectives are the encouragement of visits to Australia, and travel in Australia, by people from other countries. The Commission comprises a Chairman appointed by the Commonwealth Government; a representative of each of two Commonwealth Departments; two appointees to represent private industry, selected by the Commonwealth Government from a panel of names put forward by the Australian National Travel Association; and two non-voting representatives nominated by the State Governments.

For 1967-68 the Commonwealth Government provided \$1,550,000 to the Commission, to be spent on advertising campaigns and in associated promotional activities in overseas countries, particularly in New Zealand, North America, the United Kingdom, and Western Europe. The Commission brings to Australia travel agents, writers, photographers, and other publicists to see at first hand what the country has to offer visitors. It takes no part in the detailed organisation of tourist activities in Australia. It has its Head Office in Melbourne and branch offices in London, New York, San Francisco, Auckland, and Sydney.

The *Australian National Travel Association*, which is described on pages 1161-2 of the special article Travel and Tourism in Year Book No. 52, was formerly responsible, *inter alia*, for the promotion overseas of Australia as a tourist destination.

Following the creation of the Australian Tourist Commission, it now concentrates on the encouragement of the growth and development of travel and tourism within Australia, particularly by improving the standard and variety of facilities provided by private enterprise for the use of overseas visitors. It acts as a co-ordinating body for its members, provides a clearing house for information, and conducts surveys into aspects of tourist activity. The Association is governed by a Board representative of industries and services such as transport, accommodation, travel agents, Chambers of Commerce, the Australian Automobile Association, and retail traders. An Executive Committee guides the Association's activities between Board meetings.

## CHAPTER 14

### WELFARE SERVICES

This chapter relates to welfare services other than those concerned specifically with education, health and repatriation. The latter are dealt with, in the main, in the relevant chapters of this Year Book. Apart from a summary of government expenditure on welfare services and short descriptions of certain interstate organisations providing welfare services, the chapter is devoted to a description in some detail of the services provided by the Commonwealth. For information on the many important welfare services provided by State and local governments, especially in the fields of child and Aboriginal welfare, reference should be made to the Year Books or Statistical Registers of the States and the annual reports of the State departments concerned. Information on pension and superannuation schemes provided for government and semi-government employees, mine workers, parliamentarians, and employees of private business is included in the chapter Private Finance.

In addition, there are numerous services of this nature provided by charitable and other non-government institutions and organisations. There are institutions providing shelter and/or caring for needy, aged, infirm or handicapped persons, neglected children, destitute persons, wayward boys and girls, and the like. Many organisations, too, provide aid in kind (food, clothing, etc.), auxiliary medical and nursing services, and other assistance to relieve suffering and hardship. Considerable work is also done by such organisations in the rehabilitation or establishment in the community of various types of people, such as prisoners and migrants, and in the prevention and alleviation of cruelty and maltreatment of any sort. Comprehensive information regarding the activities of such organisations is not available.

Further information on subjects dealt with in this chapter is included in the annual bulletins *Australian National Accounts*, *Commonwealth Finance*, and *State, Territory and Local Government Authorities' Finance and Government Securities*. Current and summarised information on Commonwealth social services is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

#### **Expenditure on welfare services**

This section deals with various government payments for the relief of the aged, indigent, infirm, widowed and unemployed, assistance to families, Aboriginal welfare, etc. For summary statements of cash payments to persons made by public authorities under various functional heads, see *Australian National Accounts* and the other annual bulletins mentioned above.

#### **Commonwealth expenditure on welfare services**

Information concerning the cost of administering each Commonwealth benefit separately is not compiled. However, the chapter Public Finance, and, in more detail, the annual bulletin *Commonwealth Finance*, present an analysis of Commonwealth expenditure by function and economic type, from which some estimates of administrative costs can be derived. Commonwealth expenditure on Aboriginal welfare is included on page 498 and that on grants for the construction of homes for the aged and for accommodation for disabled persons on pages 512 and 513 respectively.

#### **The National Welfare Fund**

The National Welfare Fund was established by the *National Welfare Fund Act 1943* to finance a scheme of national welfare and has operated from 1 July 1943. At its commencement it was used to finance funeral benefits and maternity allowances, but other social and health benefits were made a charge on the fund from time to time, and at present expenditure on all benefits except repatriation, telephone rental concessions, and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

(a) Payments for some health services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes payments for student children aged 16 to 21 years. (c) Includes special benefits to migrants in reception and training centres. (d) Includes payments to the Royal Flying Doctor Service and Bush Nursing Centres. (e) Mainly payments to State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (f) This item covers the cost of the Commonwealth Health Laboratory Services, subsidies to home nursing services, the cost of radio-active isotopes provided under the National Health Act, running expenses of the Blood Fractionation Plant, purchase of poliomyelitis vaccine, and hearing aids for school children. (g) Includes running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories, \$847,000, and part cost of the Commonwealth Health Laboratories, \$154,000; subsidies to home nursing services \$546,000; and purchase of poliomyelitis vaccine, \$813,000. (h) Contributions to States, under Commonwealth and State Housing Agreement 1945, for losses on rental housing. (i) Under the Home Savings Grant Act 1964.

**State expenditure on certain welfare services**

The following table shows net expenditure from State government funds on certain welfare services. The figures exclude expenditure on unemployment, bush fire, flood, etc., relief, Aboriginal welfare, and some other items which are excluded because information cannot be obtained for all States. Loan fund expenditure is excluded also. Because of differences in organisation and accounting methods, the information shown for some classes is not on exactly the same basis for all States; it may also be incomplete because particulars of some activities are not separately recorded and are therefore excluded. The expenditure shown is 'net' in the sense that receipts for services rendered have been deducted from gross expenditure.

**Aboriginal welfare**

Expenditure out of Commonwealth and State Consolidated Revenue Funds specifically on Aboriginal welfare during the years 1961-62 to 1965-66 is shown in the following table. Expenditure from Trust Funds and Loan Funds on this item is not available. As with the table in the previous paragraph, the figures hereunder may be incomplete because particulars of some activities are not available.

**Commonwealth social services**

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:

'(xxiii) Invalid and old age pensions:

'(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:'.

The latter paragraph was inserted in the Constitution after being accepted by the electors at a referendum on 28 September 1946. The enabling Act was assented to on 19 December 1946.

Before 1947, Commonwealth social service benefits were paid under various Acts. On 1 July 1947, with the passage of the *Social Services Consolidation Act 1947*, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions, and changed the title 'old-age pension' to 'age pension'. The word 'Consolidation' was dropped from the short title of the Act in 1954. The Act is at present styled the *Social Services Act 1947-1966*.

**Social service benefits provided**

The social service benefits provided by the Commonwealth Government under the *Social Services Act 1947-1966*, and the date on which each came into operation, are:

Age pension . . . . .	1 July 1909
Child endowment . . . . .	1 July 1941
Child endowment—student children . . . . .	14 January 1964
Commonwealth Rehabilitation Service . . . . .	10 December 1948
Funeral benefit . . . . .	1 July 1943
Guardians' allowances for widowers and other unmarried age and invalid pensioners with children in their care . . . . .	14 October 1965
Invalid pension . . . . .	15 December 1910
Maternity allowance . . . . .	10 October 1912
Sickness benefit . . . . .	1 July 1945
Special benefit . . . . .	1 July 1945
Supplementary assistance (age, invalid and widows' pensions) . . . . .	15 October 1958
Unemployment benefit . . . . .	1 July 1945
Widows' pensions . . . . .	30 June 1942
Widows' pensions—children's allowances . . . . .	2 October 1956
Wives' and children's allowances for pensioners who are invalids . . . . .	8 July 1943
Wives' and children's allowances for age pensioners . . . . .	14 October 1965

### Age and invalid pensions

Age pensions are payable to men, sixty-five years of age and over, and women, sixty years of age and over, who have lived in Australia continuously for at least ten years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years, but not ten years, continuous residence, and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Any periods of absence during which a person's home remains in Australia, and absences in certain other circumstances, are counted as residence, and any absence in an external Territory of the Commonwealth, while not counting as residence, does not interrupt continuity of residence in Australia. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, sixteen years of age and over, who have lived in Australia for a continuous period of five years (including certain absences) at any time, and who are permanently incapacitated for work to the extent of at least eighty-five per cent, or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a period of ten years continuous residence is necessary, but if a person has completed five years, but not ten years, continuous residence and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Residence in New Zealand or the United Kingdom may be treated as residence in Australia. Certain absences do not affect eligibility.

*Current rates of pension.* The maximum standard rate was increased to \$676 per annum (\$13 a week) from 30 September 1966. This is payable to a single, widowed, or divorced pensioner, a married man whose wife receives a wife's allowance, or a married pensioner whose spouse is not receiving an age or invalid pension, an unemployment, sickness or special benefit, a tuberculosis allowance, or a service pension. The maximum married rate was also increased from 30 September 1966, and is \$1,222 per annum (\$23.50 a week) for a married couple, both pensioners, i.e. \$611 per annum (\$11.75 a week) each. For a married person whose spouse receives an unemployment, sickness or special benefit, a tuberculosis allowance, or a service pension, the maximum rate is also \$611 per annum (\$11.75 a week).

A wife's allowance may be granted, subject to the means test, to the wife of an invalid pensioner or of an age pensioner permanently incapacitated, blind, or who has the care of a child, if she is not receiving an age or invalid pension, or a service pension under the *Repatriation Act 1920-1966* (see Chapter 5, Repatriation). The maximum annual rate of a wife's allowance is \$312 per annum (\$6 a week). A child's allowance of \$78 per annum (\$1.50 a week), free of the means test, is payable for the first child under sixteen years, and the pension may also be increased by \$78 per annum (\$1.50 a week), subject to the means test, for each other child under sixteen years. A guardian's allowance of up to \$4 a week is payable to widowers and other unmarried age or invalid pensioners who have one or more children in their care.

Eligibility for a child's allowance and the additional pension for children is extended to include a child over sixteen years until he reaches twenty-one years, provided he is wholly or substantially dependent on the pensioner and is receiving full-time education at a school, college or university. Supplementary assistance of up to \$2 a week, subject to a means test, is available to pensioners receiving the maximum standard rate pension if they pay rent or pay for board and lodging or for lodging. From 1958 to October 1965 the rate was \$1 a week, and supplementary assistance was available only to maximum standard rate pensioners paying rent who were considered to depend entirely on the pension. At 30 June 1966, 546,940 age pensioners (eighty-six per cent of all age pensioners) and 99,305 invalid pensioners (ninety-three per cent of all invalid pensioners) were receiving the maximum pension.

If the pensioner is an inmate of a benevolent home, the maximum payable to him is \$4.50 a week if he is eligible for the standard rate pension, or \$4.20 a week otherwise. The rest is paid to the home for his maintenance. The balance is not paid to the home if the pensioner is in an infirmary ward, as payments under the Commonwealth Hospital Benefits Scheme are made in that case. The maximum payable to a standard rate pensioner is increased if supplementary assistance is also payable.

A table showing the maximum rates of pension operating since 1 July 1909 at dates prior to 14 October 1965 is included on page 608 of Year Book No. 51. Details of increased allowances payable from 14 October 1965 to 30 September 1966, when the current rates of pensions and allowances became operative, are included on page 505 of Year Book No. 52.

*Means test.* Age and invalid pensions (other than pensions paid to blind persons) and allowances paid to wives (but not a child's allowance of \$1.50 a week) are subject to a means test which applies to income and property. From March 1961 the means tests which previously applied separately on income and property were merged into one composite means test. The rate of

pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to \$2 for each complete \$20 of his net property above \$400. A person's *means as assessed* may consist entirely of income, entirely of the property component, or of various combinations of income and property component. From 27 April 1967 the pension payable is calculated by deducting from the applicable maximum annual rate of pension, plus, where applicable, guardian's allowance and/or additional pension for children, the amount by which *means as assessed* exceed \$442 where the pensioner is married or \$520 where the pensioner is single, widowed or divorced. Where the standard rate applies, no pension is payable where the value of property is \$12,360 or more (\$14,440 or more if qualified for a guardian's allowance) if the pensioner is single, widowed or divorced; or \$11,580 if the pensioner is married. Where the married rate applies, no pension is payable where the value of property is \$10,940 or more. The wife's allowance is affected by income and property on the same basis as the pension, i.e. it is reduced by the amount of *means as assessed* over \$442. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

Certain types of income are excepted. The main exceptions are: income from property: gifts or allowances from children, parents, brothers, or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organisations. A pensioner's income may also be reduced by up to \$156 per annum (\$3 a week) for each dependent child under sixteen years (twenty-one years if a full-time student).

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to \$1,500) of life insurance policies, the capital value of annuities or contingent interests, and the value of any reversionary interests.

For the purposes of the means test the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances.

Per cent . . . .	11	18	47	21	3	100

Persons at or above the qualifying age for age pensions when granted invalid pensions are generally those with insufficient residence to qualify for age pension.

## AGE AND INVALID PENSIONS: SUMMARY, AUSTRALIA, 1961-62 TO 1965-66

Year	Pensioners at 30 June				Total payments during year (b)	Average weekly pension as at 30 June		
	Age		Invalid	Total		Age (c)	Invalid (c)	Age and invalid combined (c)
	Number	Rate (a)						
1961-62	594,012	529	No. 97,246	No. 691,258	\$'000 360,489	\$ 10.19	\$ 10.52	\$ 10.24
1962-63	607,350	534	104,038	711,388	375,507	10.16	10.52	10.24
1963-64	615,186	533	109,725	724,911	399,880	10.71	11.26	10.79
1964-65	628,100	534	107,473	735,573	426,597	11.18	11.73	11.26
1965-66	636,984	532	106,645	743,629	442,355	11.33	12.24	11.46

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes allowances and supplementary assistance. (c) Includes supplementary assistance.

The sum paid in age and invalid pensions in 1965-66, including the amount paid to homes for the maintenance of pensioners and allowances to wives of invalid pensioners, represented an expenditure of \$38.64 per head of population, compared with \$37.92 in 1964-65.

## Child endowment

A person who is resident in Australia and has the custody, care and control of one or more children under the age of sixteen years or of a student child over sixteen but under twenty-one years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each such child. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia. Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas.

*Rates of endowment.* From 1 July 1941 the rate of endowment was 50c a week for each child under sixteen in excess of one in a family, and for each child under sixteen in an approved institution. The rate was increased to 75c a week in June 1945, and to \$1.00 a week in November 1948. From June 1950, 50c a week became payable for the first or only child in a family. From January 1964 the rate was increased to \$1.50 a week for the third and subsequent children under sixteen years in families and for each child in an institution, and that amount also became payable for full-time students between sixteen and twenty-one years. Full-time student children are those receiving full-time education at a school, college or university and who are not in employment or engaged in work on their own account.

*Number of claims and endowed children—children under sixteen years.* The number of families receiving child endowment at 30 June 1966 in respect of children under sixteen years was 1,610,490, an increase of 27,689 or 1.7 per cent during the year.

1965-66	1,610,490	132,900	488	(d) 3,762,646	(d) 182,288	(d) 176,432

(a) Claims by families with children under sixteen and student children are shown in both columns. Information on the number of families having such dual claims is not available. (b) A number of endowments are paid every twelve weeks. During two years out of every three there are four such payments but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments. (c) Year ended 30 June. (d) Includes student children and reflects higher rates for third and subsequent children under sixteen years in families. (e) Expenditure for this year includes five twelve-weekly payments.

**Commonwealth Rehabilitation Service**

The Commonwealth Rehabilitation Service was set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances, and persons aged fourteen or fifteen who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of sixteen years. During treatment, payment of pension or benefit continues. When vocational training begins the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of \$3.00 a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, the rehabilitation allowance is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connection with treatment, training or attendance for an interview or for medical examination may also be paid. Necessary artificial replacements, surgical aids and appliances may be provided, free of charge, to a person receiving treatment and training or who needs them to assist him to engage in a suitable vocation after the discontinuance of his treatment and training. He may also be provided with books, equipment and tools of trade costing up to \$80 in any period of twelve months. Where books, equipment and tools of trade provided to assist a person to engage in a suitable vocation are retained by him, he is liable to repay the cost but is not required to make repayment until after he has commenced employment. The repayment may be made by instalments. If the treatment or vocational training does not result in the trainee's being able to engage in employment, he receives the pension or benefit to which he is entitled. Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves, or they may be sponsored by government or private organisations. Rehabilitation allowances, training allowances, living-away-from-home allowances and other allowances are not payable in these cases. Books, tools, etc., are available on a repayment basis.

*Numbers dealt with by the service***COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1965-66**

Type	Referred	Accepted	Completed training	Placed in employment

(a) Includes persons who had received training prior to 1 July 1965.

Of the 1,434 persons accepted during 1965-66, seventy per cent were under forty years of age. The average number receiving rehabilitation training at the end of each month during the year was 938. Total cost of this service during 1965-66 was \$1,659,720.

**Funeral benefits**

A funeral benefit of up to \$20.00 is payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been met partly by payment from a contributory funeral benefit fund of an organisation other than a friendly society, funeral benefit is payable to the extent of the amount (not above \$20.00) by which the cost of the funeral exceeded the amount paid from the fund. The maximum amount payable is increased to \$40.00 where an age, invalid or widow pensioner is liable for the funeral expenses of a spouse, a child under sixteen years, or another age, invalid or widow pensioner.

Total cost of funeral benefits granted during 1965-66 was \$1,049,945.

**Maternity allowances**

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth health scheme. They are not subject to a means test.

Subject to certain conditions, a maternity allowance is payable to a woman who gives birth to a child, either in Australia or on board a ship proceeding to Australia or from a port in Australia or an Australian Territory to another such port, and, on the date on which she lodges her claim, is residing in Australia or is in Australia and intends to remain permanently, provided she receives no benefit similar to a maternity allowance from the country from which she came. A woman who gives birth to a child during a temporary absence from Australia may also be eligible. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia permanently.

**Rates of allowance.** The allowance is \$30.00 if the mother has no other children, \$32.00 if she has one or two children under sixteen, and \$35.00 if she has three or more other children under sixteen. The amount is increased by \$10.00 for each additional child born at a birth. An advance payment of \$20.00 may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least five and a half months.

### Unemployment, sickness and special benefits

Unemployment and sickness benefits are paid to males over sixteen and under sixty-five years of age, and females over sixteen and under sixty years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act 1920-1966*, or a tuberculosis allowance, is ineligible to receive a benefit.

To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary. To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income. A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases a married woman may qualify for unemployment benefit in her own right.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, and who, because of age, physical or mental disability or domestic circumstances, or for any other reason, is unable to earn a sufficient livelihood for himself and his dependants. Recipients of special benefits include, among others, persons caring for invalid parents, also deserted wives and persons ineligible for age, invalid or widows' pensions because of lack of residence qualifications.

Special benefits are also paid to migrants who are in reception centres awaiting their first placement in employment in Australia. During this time they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

*Rates of benefit.* The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 1 March 1962 are as follows.

	Maximum weekly rate \$	Permissible weekly income \$
Unmarried person under 18 years of age .	3.50	2.00
Unmarried person 18 to 20 years of age .	4.75	2.00
All others . . . . .	8.25	4.00

An additional benefit of \$6 a week may be paid for a dependent spouse and \$1.50 a week for each dependent child under sixteen years of age if resident in Australia. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under sixteen years of age in his care. It may be granted only if no such benefit is payable for his wife, and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the preceding table. For unemployment benefit purposes the income of the spouse is also taken into account unless the claimant and his spouse are permanently separated. For sickness benefit purposes the income from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. 'Income' does not include child endowment or other payments for children, Commonwealth hospital and pharmaceutical benefits, a tuberculosis allowance, or an amount paid in reimbursement of medical, dental or similar expenses. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable.

**Widows' pensions**

*Rates and conditions.* Widows' pensions are payable according to the following classes. The rates shown have been in operation since October 1966.

*Class 'A'.* A widow who has the custody, care and control of one or more children under the age of sixteen years—\$884 per annum (\$17 a week). This includes the standard rate pension of \$676 per annum (\$13 a week) and a mother's allowance of \$208 per annum (\$4 a week). In addition, a flat rate allowance of \$78 per annum (\$1.50 a week) for one child and, subject to the means test, extra pension of \$78 per annum (\$1.50 a week) for each other child under sixteen years are payable. Payment may be made for a child over sixteen years until he reaches twenty-one years, if he is wholly or substantially dependent on the widow and is receiving full-time education at a school, college, or university.

*Class 'B'.* A widow who has no children under sixteen years of age or eligible full-time student children in her custody, care and control, and who is not less than fifty years of age or who, after having attained the age of forty-five years, ceased to receive a Class 'A' widows' pension because she no longer had the custody, care and control of a child—\$611 per annum (\$11.75 a week).

*Class 'C'.* A widow who is under fifty years of age and has no children under the age of sixteen years, or eligible full-time student children, in her custody, care and control, but is in necessitous circumstances within the twenty-six weeks after the death of her husband—\$11.75 a week for not more than twenty-six weeks after the death of her husband. If the widow is pregnant this period may be extended until the child's birth. She may then become eligible for a Class 'A' widow's pension.

Widow pensioners may receive supplementary assistance of up to \$104 per annum (\$2 a week), subject to a means test, if they pay rent or pay for board and lodging or for lodging. From October 1958 to October 1965 the rate was \$1 a week and was payable to widows, otherwise qualified, who were considered to be entirely dependent on the pension.

For classes 'A' and 'B' the term 'widow' includes a wife who has been deserted by her husband without just cause for a period of at least six months, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for 'A', 'B' or 'C' Class pensions.

The residence qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences are ignored.

A widow's pension is not payable to a woman receiving an age or invalid pension, a tuberculosis allowance, or a war widow's pension, or to a deserted wife or divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband.

*Means test.* Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to \$2 for every complete \$20 by which the value of her property is in excess of a stipulated sum. In the case of a Class 'B' widow, \$400 of property is exempt. A Class 'A' widow has a basic exemption of \$2,000 when the value of her property exceeds \$4,500, but no property component is calculated where she has property of no more than \$4,500 in value. A Class 'A' pension is not payable where a widow has property valued at \$16,040 or more; no Class 'B' pension is payable where property is \$11,720 or more. In each case the maximum rate of pension is reduced by the amount by which the widow's *means as assessed* exceed \$520. There is no specific means test for the Class 'C' pension, which

is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

### Pensions

#### WIDOWS' PENSIONS: STATES, TERRITORIES, ETC., 1965-66

State, Territory, etc.	Number admitted— all classes (a)	Pensions current at 30 June				Average weekly pension at 30 June (b)	Amount paid in pensions (b) (c)
		Class 'A'	Class 'B'	Class 'C'	All classes		
New South Wales . . . . .	5,439	11,759	14,314	52	26,125	\$ 14.75	\$'000 18,753
Victoria . . . . .	3,437	7,961	9,273	17	17,251	14.35	12,692
Queensland . . . . .	2,138	5,300	5,489	16	10,805	14.57	7,987
South Australia . . . . .	1,373	3,042	3,517	8	6,567	14.36	4,802
Western Australia . . . . .	1,036	2,288	2,775	8	5,071	13.92	3,602
Tasmania . . . . .	446	1,211	1,110	6	2,327	14.89	1,791
Northern Territory . . . . .	48	99	103	..	202	15.09	159
Australian Capital Territory . . . . .	55	136	122	..	258	15.44	165
Abroad . . . . .	..	(d)	(d)	(d)	(d)	..	65
<b>Total . . . . .</b>	<b>13,972</b>	<b>31,796</b>	<b>36,703</b>	<b>107</b>	<b>68,606</b>	<b>14.53</b>	<b>50,017</b>

(a) Excludes transfers from one class to another. (b) Includes supplementary assistance and allowances. (c) Includes payments to benevolent homes for maintenance of pensioners. (d) Included in the figures for the State or Territory in which the pensioner is normally domiciled.

#### WIDOWS' PENSIONS: SUMMARY, AUSTRALIA, 1961-62 TO 1965-66

Year	Number admitted— all classes (a)	Pensions current at 30 June				Average weekly pension at 30 June (b)	Amount paid in pensions (b) (c)
		Class 'A'	Class 'B'	Class 'C'	All classes		
1961-62 . . . . .	12,960	24,584	32,157	95	56,836	\$ 10.44	\$'000 30,189
1962-63 . . . . .	12,537	25,261	33,112	104	58,477	10.45	31,353
1963-64 . . . . .	14,207	27,371	34,659	94	62,124	13.57	41,569
1964-65 . . . . .	14,243	29,713	35,574	111	65,398	14.09	47,044
1965-66 . . . . .	13,972	31,796	36,703	107	68,606	14.53	50,017

(a) Excludes transfers from one class to another. (b) Includes supplementary assistance and allowances. (c) Includes payments to benevolent homes for maintenance of pensioners.

### Reciprocal social services agreements with other countries

**New Zealand.** An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 3 September 1943 and was amended from 1 July 1949. The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence. Residence in one country may be treated as residence in the other country in relation to entitlement to benefits in which a residential qualification applies. Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country. Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

**Britain.** A reciprocal agreement on social services between Britain and Australia came into operation on 7 January 1954. Amendments became effective from 1 April 1958 and 1 October 1962. Under the current agreement residence in one country may be treated as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to Britain for permanent residence are treated in Britain as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits. There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

**Commonwealth assistance to aged persons homes and homes for disabled persons employed in sheltered workshops**

*The Aged Persons Homes Act 1954-1957.* This Act is designed to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under the Act an organisation must be:

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organisation, an organisation the principal objects or purposes of which are charitable or benevolent, an organisation of former members of the defence forces established in every State or a State branch of such an organisation, or an organisation approved by the Governor-General for the purposes of the Act.

An organisation conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under the Act.

The Director-General of Social Services may make a grant of money to an organisation as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of \$2 for each \$1 raised by the organisation (\$1 for each \$1 from 1954 to 1957), not counting money which the organisation receives from a governmental body or borrowed. Before a grant is made the Director-General must be satisfied that the sum of the money expended and the money at present available for expenditure by the organisation towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home.

The following table gives information regarding grants approved during 1965-66. The amounts granted include new grants approved in 1965-66 together with adjustments made during the year in respect of grants originally approved in earlier years.

**AGED PERSONS HOMES: GRANTS APPROVED, AMOUNTS GRANTED, AND BEDS PROVIDED, STATES AND TERRITORIES, 1965-66**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Total
Grants approved . no.	42	29	16	44	14	3	..	1	149
Amounts granted . \$'000	2,682	1,946	1,081	2,400	1,372	80	1	13	9,576
Beds provided . no.	774	553	318	719	414	25	..	4	2,807

The following table gives information regarding grants approved for each of the years 1961-62 to 1965-66. The amounts granted in each year include new grants approved in that year together with adjustments made during the year in respect of grants originally approved in earlier years. In previous Year Books these subsequent adjustments were included in the amount shown for the respective year in which the original grant was approved.

**AGED PERSONS HOMES: GRANTS APPROVED, AMOUNTS GRANTED, AND BEDS PROVIDED, AUSTRALIA  
1961-62 TO 1965-66**

Year	Grants approved	Amounts granted	Beds provided
	no.	\$'000	no.
1961-62 . . .	130	r6,180	2,260
1962-63 . . .	155	r8,574	2,939
1963-64 . . .	134	r7,281	2,466
1964-65 . . .	r152	r6,684	2,083
1965-66 . . .	149	9,576	2,807

Since the commencement of the Act in December 1954, 1,333 grants amounting to \$58,419,000 have been approved, and accommodation has been provided for 23,218 aged persons.

*The Disabled Persons Accommodation Act 1963.* This Act came into operation on 25 November 1963, and provides that grants may be made to eligible organisations towards the capital cost of approved buildings which will provide residential accommodation for disabled persons engaged, or likely to be engaged, in paid employment in a sheltered workshop. The Act covers both the erection of buildings to be used for accommodation and the purchase of existing premises for conversion into accommodation. In both cases the cost of the necessary land may be included. Eligibility of organisations for grants is on the same basis as for the Aged Persons Homes Act. For the purposes of the Act, a disabled person is a person who is qualified by age (sixteen years or over) and on medical grounds for an invalid pension under the Social Services Act. A sheltered workshop is a factory or workshop, or part thereof, in which all or a substantial number of employees are disabled persons who receive payment for their work.

Three grants amounting to \$83,894 were approved during 1965-66 in respect of projects in New South Wales, Western Australia and Tasmania. With the grant to an organisation in south Australia in 1963-64, the total grants approved to 30 June 1966 amounted to \$119,884.

#### Telephone rental concessions

Effective from 1 October 1964 an amendment to the Telephone Regulations of the Post and Telegraph Act provides that a telephone service for age, invalid and widow pensioners and blind people is available at an annual rental equal to two-thirds of the amount otherwise payable. The Department of Social Services re-imburses the Postmaster General's Department for the cost of the scheme including administrative costs. Expenditure during 1964-65 and 1965-66 was \$552,360 and \$1,579,065 respectively, plus \$36,062 and \$64,520 respectively for administration.

### Selected non-government organisations

#### National Safety Council of Australia

The National Safety Council of Australia was founded in Victoria in 1927. In 1959 it was reorganised, and new Articles of Association were adopted in 1961, placing it on a more truly federal basis and reflecting the expanded character of the Council in the thirty-nine years since its formation. The objects of the Council are to devise and encourage the adoption of safety measures of all kinds, to promote discussion of all matters relating to safety measures, to conduct an educational campaign among the people of Australia to stimulate the adoption and observance of safety measures, and to consider, initiate and support improvements in the laws of the Commonwealth of Australia, the States and local governing bodies, calculated to prevent accidents.

The Council is now registered in Canberra, with Divisions established in all States. It is managed by a Federal Council responsible for those objectives which are of a national character. Each State Division controls its own affairs which are of State or local character.

#### Life saving

There are two life saving organisations in Australia, the Royal Life Saving Society—Australia and the Surf Life Saving Association of Australia. The objects of these organisations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organisations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and life saving.

The Royal Life Saving Society operates at lakes, rivers, and bay and harbour beaches, and gives instruction to school pupils and members of other bodies throughout Australia except on surf beaches.

The Surf Life Saving Association of Australia controls all life saving activities on the ocean beaches throughout Australia. In all, over 230 clubs are affiliated, comprising a membership of over 24,000. Volunteer patrols operate every week-end, and in recent years over 5,000 rescues have been recorded during each surfing season. The total number of recorded rescues during the past fifty-nine years is 150,364.

#### Royal Humane Society

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal, (b) Silver Medal, (c) Bronze Medal, and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under thirteen years of age.

**The Order of St John**

The Priory in Australia of the Most Venerable Order of the Hospital of St John of Jerusalem is the governing body of the various activities of the Order, which comprises the St John Ambulance Association, the St John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

Members of the St John Ambulance Association teach first aid, home nursing, hygiene, and child welfare, and members of the St. John Ambulance Brigade provide first aid at public functions. The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem and other duties which tend to bring together all persons interested in the work of the order. The Order of St John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

## CHAPTER 15

### PUBLIC JUSTICE

Statistics of public justice are influenced by a number of factors which affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) Differences in the methods of compiling the figures (e.g. in respect of persons convicted for more than one offence);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

#### The Australian legal system

##### Development of the system

The two major factors in the development of the Australian legal system have been its British origin and the Commonwealth Constitution of 1900. When the various parts of Australia were first settled by British colonists, the common law and statutes of England were brought with them by the settlers. When local law-making bodies were established, the law so brought in was gradually modified and augmented by local legislation, but the Imperial Parliament in London also continued to legislate (to a lesser and lesser extent) in respect of Australia. The Commonwealth Constitution of 1900, which is itself an Imperial Act, limited the legislative power of State Parliaments in some respects and created a federal legislature. Since the *Statute of Westminster Adoption Act 1942*, the Imperial Parliament can legislate for Australia only at Australia's request. The sources of Australian law of today are, therefore, found in Commonwealth and State legislation, in some Imperial legislation and in the common law. Three of the States (Queensland, Western Australia and Tasmania) have Criminal Codes, and separate consolidations of the statutes of the Commonwealth and of all States except Western Australia (which has adopted a system of reprinting of individual statutes at intervals) have been brought out from time to time.

There are few constitutional or other legislative guarantees of individual rights and liberties in Australia. These rights are nevertheless protected, because a basic feature of the Australian system is the 'rule of law': no act, official or unofficial, however bona fide and apparently reasonable, which infringes the liberty or rights of an individual is justifiable unless it is authorised by law, and for any such unlawful act, by whatever authority commanded, the official or other person is personally liable in an action in the ordinary courts. In the case of subordinate legislation, and even in the case of Commonwealth or State Acts, the validity of the law itself may be challenged in the courts. The remedy for the protection of the personal liberty of the individual is the writ of habeas corpus, which requires the person named therein to be produced in the court.

Australian law adheres to the principle that judicial control must in general be exercised by ordinary courts. There is no integrated system of administrative tribunals, but there is a great variety of such tribunals of various descriptions. The ordinary courts exercise supervision over administrative tribunals either by way of statutory appeal or by the use of prerogative writs of mandamus, prohibition, or *certiorari*, by which the administrative tribunals can be enjoined to perform a duty or to abstain from excess of jurisdiction, or can have their decisions set aside.

Independence of the judiciary is an essential part of the Australian legal system. Security of tenure of superior court judges is guaranteed, mostly by the Constitutions of the Commonwealth and the States, and they can be removed from office only by resolution of both Houses of Parliament of the Commonwealth or the States, as the case may be, for proven misbehaviour or incapacity. Their independence is further secured by relatively high salaries which, in the case of High Court judges, cannot be reduced during their tenure of office, and liberal (mostly non-contributory) pensions for the judges or their widows.

Civil judgments given in the courts of any part of Australia can be enforced in any other part of Australia under the *Service and Execution of Process Act* 1901–1963. Since 1 January 1964 this applies also to fines imposed by courts of summary jurisdiction.

### State and Territory courts

*Civil jurisdiction.* Lower civil courts (i.e. Magistrates' Courts, Courts of Petty Sessions, Local Courts, Small Debts Courts, Courts of Request, and Courts of General Sessions) are usually constituted or presided over by a stipendiary or special magistrate or a commissioner. In some limited instances justices of the peace may exercise the jurisdiction of the court. Local Courts are sometimes constituted by a Judge. The powers of the magistrates in the various States and Territories are set out on pages 517–18. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction. In the higher courts (i.e. District Courts, County Courts and the Supreme Courts) actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are referred to on page 517.

*Criminal jurisdiction.* Criminal courts are of two kinds, namely, courts of summary jurisdiction and higher courts. Courts of summary jurisdiction, usually called Courts of Petty Sessions, may deal summarily with minor offences; higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions (not to be confused with the lower court of civil jurisdiction of that name) and the Supreme Court, hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace; a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case, and the judge determines the applicable law and, within the limits of the law, the punishment of the convicted person.

In the case of other than minor offences a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail. There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

### Federal courts

The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. The nature and extent of the judicial power of the Commonwealth are set out in Chapter III. (§§ 71–80) of the Commonwealth Constitution (*see* pages 15–16 of this Year Book). Particulars concerning the Federal Court of Bankruptcy are given on pages 534–6 of this chapter, and information regarding the Commonwealth Industrial Court, which was established under the *Conciliation and Arbitration Act* 1904–1966, is included in the chapter Labour, Wages and Prices (page 313).

### High Court of Australia

The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices.

The Constitution itself confers original jurisdiction on the High Court in all matters (i) arising under any treaty, (ii) affecting consuls or other representatives of other countries, (iii) in which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party, (iv) between States, or between residents of different States, or between a State and a resident of another State, (v) in which a writ of mandamus or prohibition or an injunction is sought against an officer of the Commonwealth. In addition, Parliament may, under the Constitution, confer additional original jurisdiction on the High Court in certain classes of matters, and has in fact conferred original jurisdiction on the High Court in all matters arising under the Constitution or involving its interpretation and in trials of indictable offences against the laws of the Commonwealth. In matters (i) and (v) and in suits between the Commonwealth and a State or between States the jurisdiction of the High Court is exclusive of that of the State Courts, and in matters (other than trials of indictable offences) involving any question as to the limits *inter se* of the constitutional powers of the Commonwealth and those of the States the jurisdiction of the High Court is exclusive of that of the Supreme Courts of the States.

Under the Constitution the High Court has jurisdiction, with such exceptions and subject to such regulations as the Parliament permits, to hear and determine appeals from all judgments, decrees, orders, and sentences of (i) any Justice or Justices exercising the original jurisdiction of the High Court, (ii) any other Federal Court or court exercising Federal jurisdiction and (iii) from the Supreme Court or other court of any State from which appeal lay to Privy Council at the establishment of the Commonwealth. In respect of (iii) the Parliament has prescribed that, generally, appeal can be brought only by special leave of the High Court. However, in the case of judgments affecting the status of any person under the laws relating to aliens, marriage, bankruptcy or insolvency, or in respect of any sum or matter at issue, or involving any claim, demand or question regarding any property or civil right, of the value of \$3,000, appeal may be brought as of right from final judgments, and by leave of the High Court or the Supreme Court from interlocutory judgments.

By Acts of Parliament and by subordinate legislation the High Court has also been given appellate jurisdiction in respect of the courts of the Territories under the control of the Commonwealth. Provision is also made in various enactments for appeal to the High Court on points of law from administrative determinations, such as decisions of the Commissioner of Taxation, Taxation Boards of Review, the Commissioner of Patents, or the Registrar of Trade Marks. Such proceedings, although called appeals, are in reality proceedings in the original jurisdiction of the High Court.

Transactions of the High Court are shown on page 527.

#### Appeal to the Privy Council

There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-à-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

### Lower (magistrates') courts

#### Powers of magistrates

*New South Wales.* The powers of the magistrates with regard to offences punishable summarily depend in each case on the statute which creates the offence and gives them jurisdiction. A magistrate may, with the consent of the accused, deal summarily with certain indictable offences under the Commonwealth Crimes Act and offences involving \$500 or less under the State Crimes Act; offences under the Commonwealth Act and certain offences under the State Act may be disposed of summarily without such consent if the amount involved does not exceed \$100. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated, the amount is limited to \$300 before a court constituted by a stipendiary magistrate. Where the amount claimed exceeds \$100 the Court must transfer the action to the District Court when the defendant gives notice that he objects to the action being heard and determined by a Court of Petty Sessions. Magistrates have power to entertain claims of up to \$1,000 under the Money Lenders and Infants Loans Act, 1941-1961. The amount in actions of debt or damages before one or more justices of the peace ranges up to \$60 in certain cases.

*Victoria.* The civil jurisdiction of magistrates is restricted as follows: (a) ordinary debts, to \$200; (b) any action in tort or contract, with the exception of a few torts such as breach of promise or illegal arrest (on which magistrates have no power to adjudicate), to \$600; and (c) any action in tort arising out of any accident in which a vehicle is involved, to \$1,000. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences of up to two years imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

*Queensland.* Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the Criminal Code (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed. There is provision for applying cumulative sentences.

*South Australia.* The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of \$200 fine or two years

imprisonment is fixed by the Justices Act, 1921-1965. Magistrates also have power to hear certain civil actions in which the amount claimed is less than \$2,500.

*Western Australia.* The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months. The civil jurisdiction of Local Courts is restricted in general to \$1,000. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate. Magistrates are coroners, and justices may be appointed as acting coroners. Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Session Courts. They may be appointed as Commissioners of the Supreme Court. On the goldfields the magistrate is also the warden.

*Tasmania.* Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In 1963, by an amendment to the *Justices Act* 1959, the categories of crimes triable summarily were extended to include crimes of a less serious nature. In the case of certain crimes the defendant has the option of electing summary trial or trial on indictment in the Supreme Court. However, the choice of election applies only where the property concerned exceeds the value of \$20 but does not exceed \$400. In the case of a charge of forgery or uttering, a right of election exists provided the complaint is in respect of a cheque for not more than \$400. In the case of a charge of breaking into a building, other than a dwelling house, a defendant may elect to be tried summarily under certain conditions. No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the *Contravention of Statutes Act* 1889 provides that a fine of \$100 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years. The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts up to \$1,500 or damages up to \$1,000. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed \$100.

*Northern Territory.* Stipendiary and special magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available, the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a magistrate or a justice of the peace. Certain indictable offences under the Territory law may be tried summarily by a magistrate or two justices of the peace, who may impose a fine of up to \$200 or imprisonment for up to two years. A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than \$2,000. A local court constituted by two justices of the peace (every special magistrate is also a justice of the peace) has a civil jurisdiction to hear claims up to \$100.

*Australian Capital Territory.* Stipendiary and special magistrates have general jurisdiction to try offences punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends on the law which creates the offence. In addition to jurisdiction (possessed by stipendiary and special magistrates throughout Australia) to try summarily with the consent of the defendant offences indictable under the *Crimes Act* 1914-1966 (in which case the magistrate cannot impose a fine exceeding \$200 or imprisonment exceeding one year), under Territory law certain indictable offences may also be tried summarily by a magistrate, who may impose a fine not exceeding \$100 or imprisonment for up to one year. Magistrates also hear proceedings for committal on indictable offences. In civil proceedings, magistrates try actions for amounts up to \$400. Justices of the peace have no judicial functions.

### First offenders

In all States and Territories statutes are in force for dealing with first offenders. Provisions are incorporated in the various Acts whereby courts may extend leniency to the offender by means such as: (i) dismissal of the charge without proceeding to a conviction; (ii) freeing the offender or suspending sentence with the requirement of a recognisance for good behaviour for a specified period; and (iii) by placing the offender under the supervision of a probation officer for a specified period.

**Children's courts**

Special provisions exist in all States and Territories for dealing with juvenile offenders in special courts. Particulars of the relevant legislation and the constitution and powers of these courts are given in Year Book No. 49, pages 665-6.

**Proceedings at lower (magistrates') courts**

Particulars of the differences in the jurisdiction of lower courts in the various States are given under Powers of Magistrates (pages 517-8). The proceedings of these courts are summarised in this paragraph. The statistics in the following tables are influenced by the factors affecting comparability listed at the beginning of this chapter (page 515).

*Criminal proceedings—total cases.* The total numbers of cases dealt with at magistrates' courts in each State and Territory for the years 1961 to 1965 are shown in the following table.

**CASES AT MAGISTRATES' COURTS: OFFENCES CHARGED, STATES AND TERRITORIES, 1961 TO 1965**

State or Territory	1961	1962	1963	1964	1965
New South Wales(a) . . . .	345,730	322,848	323,501	341,351	341,171
Victoria(a) . . . . .	259,268	270,275	(b)290,332	r(b)303,096	(b)323,644

Australian Capital Territory .	3,305	4,795	6,435	(a) 7,797	(a) 7,437
<b>Australia . . . . .</b>	<b>825,823</b>	<b>826,495</b>	<b>872,233</b>	<b>r906,909</b>	<b>964,878</b>

(a) Excludes minor traffic offences settled without court appearance. This practice commenced in Australian Capital Territory from 14 September 1964. (b) Excludes prosecutions by authorities other than Police Department. (c) Year ended 30 June. (d) Excludes Aborigines. (e) Excludes courts at Tennant Creek and Katherine.

Differences in the figures in the preceding table between States, and within a State over a period of time, are influenced by the large number of traffic offences and the arrangements which have been introduced at various times for dealing with them. Provision exists in the States and the Australian Capital Territory for settlement of parking and minor traffic offences by payment of fines without court appearance.

**MINOR TRAFFIC OFFENCES SETTLED WITHOUT COURT APPEARANCES  
STATES AND A.C.T., 1961 TO 1965**

State or Territory	1961	1962	1963	1964	1965
New South Wales . . . . .	370,688	443,689	389,395	381,058	400,459

(a) Excludes minor traffic offences settled without court appearance. This practice commenced in Australian Capital Territory from 14 September 1964. (b) Excludes prosecutions by authorities other than Police Department. (c) Year ended 30 June. (d) A person convicted on several counts at the one hearing is included only once. (e) Excludes Aborigines. (f) Excludes courts at Tennant Creek and Katherine.

*Criminal proceedings—cases in which convictions were made for drunkenness.* The numbers of cases in which convictions were recorded during each of the years 1961 to 1965 are given in the following table.

**DRUNKENNESS: CASES IN WHICH CONVICTIONS WERE MADE, STATES AND  
TERRITORIES, 1961 TO 1965**

State or Territory	1961	1962	1963	1964	1965
New South Wales . . .	67,809	68,546	65,630	61,537	63,143
Victoria . . .	27,212	28,529	(a) 27,606	(a) 24,048	(a) 23,790
Queensland(b) . . .	26,136	26,293	28,580	30,924	29,224
South Australia(b) . . .	5,438	6,178	7,485	6,952	7,110
Western Australia(c) . . .	5,333	5,320	4,877	4,529	4,653
Tasmania . . .	534	575	562	420	491
Northern Territory(d) . . .	1,037	1,388	1,730	3,021	3,938
Australian Capital Territory . . .	307	252	237	331	401
<b>Australia . . .</b>	<b>133,806</b>	<b>137,081</b>	<b>136,707</b>	<b>131,762</b>	<b>132,750</b>

(a) Excludes prosecutions by authorities other than Police Department. (b) Year ended 30 June.  
(c) Excludes Aborigines. (d) Excludes courts at Tennant Creek and Katherine.

*Civil proceedings.* Civil proceedings in the lower courts refer to those in the Small Debts Court in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Local Courts in the Northern Territory, and the Court of Petty Sessions in the Australian Capital Territory. Statistics of civil proceedings in the lower courts are given on page 527.

### Higher (judges') courts

Higher courts are presided over by a judge, sometimes with a jury (*see* page 516). Jurisdiction of the higher courts, which include District, County and Supreme Courts, includes appeals from the lower courts, cases of serious crime committed from lower courts, and civil cases involving common law, commercial causes, equity, etc. Under powers vested by the Commonwealth under the *Matrimonial Causes Act* 1959–1966 and the *Bankruptcy Act* 1924–1965, separate courts within the jurisdiction of the Supreme Courts of the various States and Territories deal exclusively with matrimonial cases and bankruptcy cases respectively.

Proceedings at higher courts comprise criminal, civil, divorce, and bankruptcy proceedings. Separate details of each are given on pages 526–36.

An account of the methods adopted in each jurisdiction in connection with habitual offenders is given in Year Book No. 49, pages 668–9.

### Capital punishment

There were seven executions in Australia during the period 1955 to 1966. Three took place in South Australia (in 1956, 1958 and 1964) and four in Western Australia (one in 1960 and 1961, two in 1964). In each case the offence was murder.

Under *'The Criminal Code Amendment Act of 1922'* capital punishment was abolished in Queensland, and in New South Wales the Crimes Act was amended in 1955, abolishing capital punishment for all offences except treason and piracy with violence. In the Australian Capital Territory the *Child Welfare Ordinance* 1957–1962 provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years, and sub-section (2) of section 389 of the Tasmanian *Criminal Code Act* 1924 as amended contains a similar provision.

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which would now be dealt with in a court of summary jurisdiction. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it. The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; from 1941 to 1950, 0.5; and from 1951 to 1960, 0.7.

### Serious crime

#### Selected crime reported or becoming known to police

The tables on pages 522–4 show some details of certain categories of offences reported or becoming known to police. This series, which commenced in 1964, is derived from police records and is based, as far as possible, on definitions and procedural arrangements uniformly determined for all States. The following explanations are necessary in order to interpret the figures in this series.

*Number of offences reported or becoming known.* All incidents reported or becoming known to the police which are found to constitute offences within the scope of the crimes covered are included. Offences are shown as 'reported or becoming known' in the year during which it has been established that the incident constitutes a crime, not necessarily in the period when the incident occurred. However, the incident is included when the police are satisfied that a crime has been committed, even though it may be established in subsequent proceedings that no crime or a crime of a different nature was committed. As far as possible, the offences are recorded in respect of the State in which the incident occurred, regardless of which police force undertakes investigations or prosecutions, or where an arrest is made. In the case of homicide, assault, robbery, and rape, one offence is counted in respect of each victim, regardless of the number of offenders involved. In the case of breaking and entering, and fraud, etc., one offence is counted for each act or series of directly related acts occurring at the same time and place and under the same circumstances. Each motor vehicle stolen is counted as a separate offence.

*Number of offences cleared.* An offence of the type included in this series is counted as 'cleared' when an information (charge, arrest or summons to appear) has been laid against at least one person involved. However, an offence may also be counted as 'cleared' without an information being laid. This may occur when the offender has received an official caution or has died, has committed suicide, has been committed to a mental institution, or is in another jurisdiction from which extradition is not desired or available, or is serving a sentence; or if there are other obstacles to prosecution, such as diplomatic immunity or that the complainant refuses to prosecute. A clearance is always shown against the classification under which the offence was 'reported', regardless of the nature of the charge laid or changes in the description of an offence due to later information. The entries are made in respect of the year when the offence was 'cleared', whether or not the offence was 'reported' in that or an earlier year.

*Persons involved in crimes cleared.* This is the sum of the number of persons dealt with in each of the offences shown as 'cleared'. If more than one person is involved in the one offence, each person is counted. If the same person is involved in more than one offence cleared, he is

counted separately for each offence. Persons involved are shown against the categories of offences to which an incident was originally allocated, regardless of the actual offences they are charged with. This basis of counting 'persons involved in offences cleared' was adopted to reveal trends in crime participation by persons in various age-groups. The figures in this series are not directly comparable with statistics of persons charged or convicted in court, or of cases brought before the courts; nor do these figures reveal the number of offenders in the community.

*Offences included in the statistics*

**Homicide.** Separate details are provided for murder, attempted murder (i.e. acts done with intent to murder) and manslaughter (unlawful killing other than murder), excluding manslaughter arising from motor traffic accidents.

**Serious assault.** These are assaults normally dealt with on indictment. Includes woundings, offences causing bodily harm, assaults with a weapon, etc., and attempts of this nature. Excludes sexual assault and robbery.

**Robbery.** Stealing anything, if at or immediately before or after the time of stealing, the offender uses or threatens to use violence to any person or property in order to obtain the thing stolen, or to prevent or overcome resistance to its being stolen. Includes attempts of this nature.

**Rape.** Includes attempted rape and assault with intent to rape. Excludes unlawful carnal knowledge (i.e. where consent is given, but the girl is below the legal age of consent, etc.) and indecent assault.

**Breaking and entering.** Breaking and entering a building (or entering a building and breaking out) and committing or intending to commit a crime. Includes burglaries. Separate details are shown according to the type of building involved, namely, *dwellings* (including unoccupied dwellings, tents, caravans, etc. used as dwellings, and the residential parts of hotels, schools, etc.); *shops* (including kiosks, service stations, restaurants, bars, non-residential clubs, etc.); and *offices, factories and warehouses* (including parts of buildings, but excluding dwellings and shops used for such purposes). Includes attempts.

**Motor vehicle thefts, illegal use, etc.** Includes all offences of illegal, unlawful or unauthorised use, use without consent, unlawfully assuming control, etc., no matter under which legislation these offences are prescribed. Excludes cases of 'interference', but includes attempts at illegal use.

**Fraud, forgery, false pretences.** Includes embezzlement, 'omit to account', misappropriation, fraudulent appropriation, conversion, larceny as bailee, falsification of accounts, company fraud, forgery, uttering, false pretences, passing of valueless cheques and offences by trustees. Includes attempts, but excludes imposition. As a general rule, offences are included only if there is an element of deception or trickery. Separate details are shown for *valueless cheque* offences (i.e. passing of valueless cheques, whether there is no account, insufficient funds or a false signature of the purported drawer of the cheque. However, this sub-group excludes cases where a genuine cheque is altered or the endorsement of the payee is forged. These cases are regarded as forgery and/or uttering and included in 'other').

In the following tables the figures for Victoria for June included in the totals for the six months ended June 1966 have been estimated.

**Number of offences reported or becoming known to police**

The following table shows, for Australia, the number of offences in each of the seven categories covered by this series which were reported or became known to police during the six-monthly periods ended June 1964 to June 1966 and the years 1964 and 1965.

**SELECTED CRIME REPORTED OR BECOMING KNOWN TO POLICE  
NUMBER OF OFFENCES, AUSTRALIA, SIX MONTHS ENDED JUNE 1964 TO  
JUNE 1966 AND YEARS 1964 AND 1965**

Category of crime	Six months ended—					1964	1965
	June 1964	Dec. 1964	June 1965	Dec. 1965	June 1966

The number of stolen motor vehicles recovered were: 1964, 20,957; 1965, 21,678; six months ended June 1966, 11,790.

**Convictions for serious crime at lower (magistrates') courts**

The figures given in the tables on page 520 refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at magistrates' courts for the years 1961 to 1965 for what may be regarded as the more serious offences, i.e. offences against the person, offences against property, forgery, and offences against the currency.

**CONVICTIONS FOR SERIOUS CRIME(a) AT MAGISTRATES' COURTS: STATES AND TERRITORIES, 1961 TO 1965**

State or Territory	1961	1962	1963	1964	1965
New South Wales . . . . .	31,696	32,320	32,656	31,826	34,585

**Civil cases**

The statistics in the two tables in this section are influenced by factors which affect comparability between States and between courts. The total number of plaintiffs entered and amounts awarded plaintiffs in the lower courts during 1965 are shown in the following table.

**CIVIL CASES AT LOWER COURTS: STATES AND TERRITORIES, 1965**

	N.S.W.	Vic.	Qld (a)	S.A.	W.A.	Tas.	N.T.	A.C.T.	Australia
Plaints entered number	186,620	201,095	48,469	104,297	56,141	39,102	1,566	7,464	644,754
Amounts awarded to plaintiffs \$'000	6,438	8,848	3,330	3,594	2,627	577	38	261	25,713

(a) Year ended 30 June.

The following table shows the civil judgments (excluding those for divorce and bankruptcy) in the higher courts during 1965. The particulars given below include the number and amount of judgments entered by default or confession or agreement.

**CIVIL CASES AT HIGHER COURTS: STATES AND TERRITORIES, 1965**

	N.S.W.	Vic.	Qld (a)	S.A.	W.A. (b)	Tas.	N.T.	A.C.T.	Australia
Judgments number	52,014	9,700	687	268	490	n.a.	n.a.	590	n.a.
Amount awarded \$'000	n.a.	6,651	3,254	1,689	2,227	n.a.	n.a.	1,086	n.a.

(a) Year ended 30 June. (b) Judgments signed and entered.

**Transactions of the High Court****TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA, 1965 AND 1966**

Original jurisdiction(a)	1965	1966	Appellate jurisdiction	1965	1966
Number of writs issued .	122	79	Number of appeals set down for hearing . . . .	120	93
Number of causes entered for trial . . . .	20	25	Number allowed . . .	39	31
Judgments for plaintiffs .	12	4	Number dismissed . .	61	68
Judgments for defendants .	5	3	Otherwise disposed of .	27	20
Otherwise disposed of .	23	14			
Amounts of judgments \$	114,424	9,115			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as causes.

During 1965 and 1966, respectively, the High Court dealt also with the following: appeals from assessments under the Taxation Assessment Acts, 46, 24; special cases stated for the opinion of the Full Court, 16, 7; applications for prohibition, etc., 13, 30. The fees collected amounted to \$7,056 in 1965 and \$7,975 in 1966.

### **Divorce and other matrimonial causes**

#### **Separation and maintenance orders of courts of summary jurisdiction**

In all States and Territories there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and in the Northern Territory, courts of summary jurisdiction also have power to make separation orders. A separation order is intended primarily for the protection of the person of the wife.

#### **Divorce and other matrimonial proceedings in higher courts**

A marriage may be terminated by a Supreme Court of a State or Territory, under powers vested in these courts by Commonwealth legislation, in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties. Until the Commonwealth *Matrimonial Causes Act* 1959 came into operation each State was primarily responsible for legislation relating to matrimonial causes. The law varied from State to State, for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage. In 1959, however, the Commonwealth *Matrimonial Causes Act* was passed, and it came into force on 1 February 1961. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

#### **Matrimonial Causes Act 1959-1966**

Under this Act a decree for the dissolution of marriage may be granted on one or more of fourteen grounds, which include adultery, desertion, separation for five years in certain circumstances, cruelty, drunkenness, and failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all, and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds, as, for example, where at the time of the marriage either party was a mental defective. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people and transactions concluded on the basis of the existence of that status cannot be undone or re-opened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may remarry.

The death of either husband or wife terminates any proceedings under the Act. A decree for dissolution or annulment of a voidable marriage is first a decree *nisi*. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot remarry until a decree *nisi* has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage, but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife, except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot remarry, but a divorce may be obtained on the same facts as those on which the decree of judicial separation was based.

The Act provides for financial grants to approved marriage guidance organisations and the courts are enjoined to consider at all times the possibility of reconciliation and they may take certain steps to endeavour to effect a reconciliation.

#### **Number of petitions filed**

The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State and Territory during 1966.

**PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE  
AND JUDICIAL SEPARATION: STATES AND TERRITORIES, 1966**

(a) Decrees absolute. (b) Final decrees.

The ten-year averages of the numbers of decrees (i.e. dissolutions, nullities and judicial separations) granted annually in Australia for the 80 years from 1881 to 1960 are as follows:

1881-90	1891-1900	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60
70	357	399	741	1,692	2,508	6,187	6,973

**Grounds on which decrees were granted**

The grounds on which dissolutions of marriage, nullities of marriage and judicial separations were granted in each State and Territory during 1966 are shown in the following table.

**DISSOLUTIONS OF MARRIAGE, NULLITIES OF MARRIAGE AND JUDICIAL SEPARATIONS: GROUNDS, STATES AND TERRITORIES, 1966**

(a) See footnote (a) to preceding table.

**Number of divorced persons at each census, 1911 to 1961**

The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1911 to 1961. A classification of divorced persons by ages for the censuses from 1891 to 1947 appeared in earlier issues of the Year Book (see No. 39, page 269). Prior to 1911 no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

**DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA, 1911 TO 1961**

Sex	Number						Proportion per 10,000 of males or females 15 years of age and over					
	1911	1921	1933	1947	1954	1961	1911	1921	1933	1947	1954	1961
Males	2,368	4,233	10,298	25,052	32,389	38,640	15	23	42	89	100	105
Females	2,140	4,304	10,888	27,516	36,650	43,339	15	24	46	96	115	119

**Bankruptcy**

Particulars of bankruptcy in each State to the end of 1927 were incorporated in issues of the Year Book prior to No. 23. On 1 August 1928 the Bankruptcy Act of the Commonwealth, which is now the *Bankruptcy Act 1924-1965*, came into operation.

Under the *Bankruptcy Act 1924-1965* the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia, but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may apply voluntarily for the sequestration of his estate, or his creditors may apply for a compulsory sequestration if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt, or satisfy the Court that he has a counter claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor, provided that the debt or debts amount to \$100, the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition, and the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order the property of the bankrupt vests in the official receiver named in the order, and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI of the Act, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The Act provides for an Inspector-General in Bankruptcy. It also provides for a Registrar and an Official Receiver to be appointed for each bankruptcy district. A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorised by the Court. He may examine a bankrupt, or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor, and to realise and administer the estate of the debtor. In respect of these activities the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition or assignment (Parts XI and XII of the Act) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

### Bankruptcy proceedings

The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during 1965-66.

#### BANKRUPTCY PROCEEDINGS: STATES AND TERRITORIES, 1965-66

State or Territory		Sequestration orders and orders for administration of deceased debtors' estates	Compositions and schemes under Part XI	Deeds under Part XI	Deeds of arrangement, Part XII	Total

(a) Includes the Australian Capital Territory.

#### Police

The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens, and inspectors under the fisheries and various other Acts. In metropolitan and large country areas they also regulate the street traffic. With the exception of the Commonwealth Police Force and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State Governments, but their members perform certain functions for the Commonwealth Government, such as acting as aliens registration officers and policing various Acts and Regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of persons to each police officer are shown in the following tables for the years 1962 to 1966. The figures include traffic and water police, probationers, cadets, special constables, and women police, but exclude ancillary staff, i.e. parking police, native trackers (Aborigines employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses, interpreters, and civilian staff, e.g. clerks, typists, artisans, cleaners, etc. Details of ancillary and civilian staff are provided separately. The figures of ancillary and civilian staff shown below vary from State to State because of administrative differences in the allocation to the police of certain functions such as parking control, motor registration and licensing.

#### STRENGTH OF POLICE FORCES: STATES AND TERRITORIES, 1966

1966 . . . . .	649	710	558	547	633	600	237	516	631

#### Commonwealth Police Force

The Commonwealth Police Force commenced operations on 21 April 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth. This force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organization for the suppressing of traffic in women and the suppression of obscene literature.

Under the control of the force is the Australian Police College at Manly, New South Wales, which provides training for officers of various police forces and other agencies in Australia and New Zealand. The force has its Head Office in Canberra and District Offices in each Capital City. The strength of the force at 30 June 1966 was 627 policemen and 3 policewomen. At that date there were, in addition, 60 civilian employees.

## Prisons

## Prisons and prison accommodation

The table below shows the number of prisons in each State and the Northern Territory and the accommodation therein at 30 June 1965.

**PRISONS AND PRISON ACCOMMODATION: STATES  
AND NORTHERN TERRITORY, 1965**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Australia
Prisons . . . . .	18	13	7	14	19	1	2	74
Accommodation . . . . .	3,100	2,347	1,158	1,022	1,048	404	111	9,190

There is no gaol in the Australian Capital Territory, but there is a lock-up attached to the police station at Canberra and another lock-up at Jervis Bay where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a magistrate's court. Long-term prisoners from the Australian Capital Territory normally serve their sentences in New South Wales prisons.

## Convicted prisoners

The number of convicted prisoners at 30 June of each of the years 1961 to 1965 and the proportion per 10,000 of the population are shown in the following table.

**CONVICTED PRISONERS: STATES AND TERRITORIES, 1961 TO 1965**

1964 . . . . .	7.5	6.3	6.0	6.3	8.3	6.3	15.1	6.7
1965 . . . . .	6.9	5.9	5.8	6.6	7.0	5.7	17.8	6.5

(a) Includes the Australian Capital Territory.

(b) Excludes Aborigines.

## Patents, trade marks and designs

## Patents

Patents for inventions are granted under the *Patents Act* 1952–1966, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to \$39. Renewal fees are payable as follows: \$10 before the expiration of the fourth year, and an amount progressively increasing by \$2 before the expiration of each succeeding year up to the final fee of \$32, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

**PATENTS: AUSTRALIA, 1962 TO 1966**

	1962	1963	1964	1965	1966
Applications . . . . .	13,026	13,051	14,134	15,150	16,007
Applications accompanied by provisional specifications . . . . .	3,710	3,557	3,603	3,783	3,853
Letters patent sealed . . . . .	3,866	5,361	5,456	7,277	6,140

**Trade marks and designs**

Under the *Trade Marks Act 1955-1966* the Commissioner of Patents is also Registrar of Trade Marks. Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned. A new classification of goods was adopted in 1958, and trade marks registered under repealed Acts are reclassified on renewal. Under the *Designs Act 1906-1966* the Commissioner of Patents is also Registrar of Designs.

**TRADE MARKS AND DESIGNS: AUSTRALIA, 1962 TO 1966**

	1962	1963	1964	1965	1966

Registered . . . . .	1,064	1,251	1,287	1,260	642

**Copyright**

Copyright is regulated by the Commonwealth *Copyright Act 1912-1966* wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order-in-Council which came into operation on 1 February 1923 and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

**COPYRIGHT: AUSTRALIA, 1962 TO 1966**

Applications registered . . . . .	1,224	1,146	1,275	1,277	1,113

**Cost of administration of law and order****Expenditure by the States**

The tables following show the net expenditure (i.e. gross expenditure less receipts from fees, fines, recoups for services rendered, etc.) from Consolidated Revenue in connection with the administration of justice, police and prisons. The figures exclude Loan Fund expenditure and expenditure on debt charges, pay-roll tax and superannuation payments. Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

## STATE NET EXPENDITURE ON LAW AND ORDER, 1965-66

State	Net expenditure			Per head of population		
	Justice	Police	Prisons (a)	Justice	Police	Prisons
	\$'000	\$'000	\$'000	\$	\$	\$
New South Wales . . . .	5,521	22,919	3,962	1.31	5.45	0.94
Victoria . . . . .	294	18,898	2,403	0.09	5.92	0.75

(a) Excludes expenditure on reformatories, which amounted to: N.S.W., \$2,003,853; Vic., n.a.; Qld, \$91,480; S.A., \$393,071; W.A., \$580,611; Tas., \$149,974. (b) Receipts for fines, legal fees and registrations exceed expenditure.

**STATE NET EXPENDITURE ON LAW AND ORDER**  
**AUSTRALIA, 1961-62 TO 1965-66**  
 (\$'000)

Year	Justice	Police	Prisons(a)
1961-62 . . . . .	5,253	52,977	8,153
1962-63 . . . . .	5,845	55,450	8,248
1963-64 . . . . .	5,508	60,051	8,462
1964-65 . . . . .	5,549	64,338	10,633
1965-66 . . . . .	5,636	68,132	10,282

(a) Excludes expenditure on reformatories, which amounted to: 1961-62, \$2,707,744; 1962-63, \$2,415,112; 1963-64, \$2,944,662; 1964-65, \$1,970,083; 1965-66, \$3,218,989. Expenditure on reformatories in Victoria is not included in these amounts.

**Commonwealth expenditure**

Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following tables show expenditure by the Commonwealth Government on the services it performs in relation to law and order.

**COMMONWEALTH EXPENDITURE ON LAW AND ORDER, 1965-66**

## CHAPTER 16

### PUBLIC HEALTH

#### STATE GOVERNMENT ACTIVITIES

(Includes activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

#### Public health legislation and administration

##### New South Wales

The New South Wales Ministry of Health, which is under the control of the Minister for Health, embraces the Department of Public Health, the Hospitals Commission, and a number of boards, committees and other authorities concerned with health, hospitals and associated services. The *Department of Public Health* undertakes a variety of activities concerned with the prevention of disease and the promotion of the public health of the community. Many of its activities have been decentralised to Medical Officers of Health in the eight health districts into which the State is divided. The principal activities of the Department are described below.

*The Bureau of Maternal and Child Health* has established pre-natal clinics (for expectant mothers living long distances from obstetric hospitals), baby health centres (where mothers are instructed in the care and management of babies), and paediatric clinics (for pre-school children). It controls the school medical services and conducts a number of child health centres (see page 551). Assistance with the control of staphylococcal infection and the care of premature babies is given to obstetric hospitals and medical practitioners. A free consultant service is available to medical practitioners who request specialist advice in difficult obstetric cases. A special medical committee investigates every maternal death occurring in the State.

*The Division of Occupational Health* is concerned with all health problems associated with industry. Some of the more important aspects with which the Division is concerned are the effects of toxic substances in industry and pesticides in agriculture, the suitability of protective devices, ergonomics, and radiation hazards. The Division is also concerned with the industrial and residential aspects of noise and air pollution.

*The Division of Dental Services* provides dental services for children in infant and primary school classes and for patients in Government institutions.

*Infectious diseases.* Many diseases have been proclaimed as infectious diseases, and cases of these diseases must be notified by medical practitioners to the public health authorities. *The Division of Tuberculosis* co-ordinates measures for the prevention, detection and cure of tuberculosis, regulates the admission of patients to institutions, arranges for the treatment of patients not in institutions, and assesses the medical eligibility of applicants for Commonwealth tuberculosis allowance. *The Division of Epidemiology* is responsible for the collation and dissection of the notifications of infectious diseases under the Public Health Act. It also administers the Venereal Diseases Act and conducts an examination and treatment clinic for men. The Department has directed the anti-poliomyelitis campaign in New South Wales and is responsible for the distribution of Sabin poliomyelitis vaccine.

*Psychiatric services.* The Department supervises the care, treatment, and control of persons suffering from mental disorders, and conducts fourteen psychiatric centres for the psychiatrically ill, and a diagnostic centre for mentally retarded children. An out-patient clinic service is provided at the admission centres attached to four of the psychiatric hospitals and also at a number of public hospitals. Community services and residential facilities, including an out-patient and in-patient diagnostic centre, are also provided for the prevention, diagnosis and treatment of mental retardation.

*Hospital services.* The Health Department supervises the operation of private hospitals and rest homes, which must be licensed under the Private Hospitals Act and must comply with regulations as to structure, management and inspection of premises. The Department also maintains six State hospitals and homes, which provide care and treatment for the aged and those chronically ill.
