statistics

Unemployment trend continues to fall

The provisional trend estimate of unemployment fell for the fifth successive month in February after increasing between June 1993 and September 1993. The trend estimate of employment continues to increase and now stands at 7 821 500, or 2.7 per cent higher than the January 1993 low point. The trend estimate of the unemployment rate was 10.5 per cent, the lowest since February 1992, while the trend participation rate was 63.0 per cent, unchanged from December 1993.

Employment

The February 1994 seasonally adjusted estimate of employed persons was 7 819 700, an increase of 14 400 since January 1994. Full-time employment rose by 39 700 to 5 960 300, primarily due to an increase of 38 700 in the number of females employed full time, which now stands at 1 947 800. Male full-time employment was relatively steady at 4 012 500. Part-time employment fell by 25 300 to 1 859 400, with falls of 9 400 and 15 900 respectively for males and females.

Unemployment

The seasonally adjusted estimate of unemployed persons in February 1994 fell slightly to 913 900, the lowest level since May 1992. The number of unemployed persons seeking full-time work rose to 761 400 with a rise of 6 300 in the number of unemployed males seeking full-time work.

LABOUR FORCE SURVEY ESTIMATES
Seasonally adjusted

January	5 920.5	1 884.7	7 805.3	917.7	10.5	62.9
February	5 960.3	1 859.4	7 819.7	913.9	10.5	62.9

Unemployment rate

In February 1994, the seasonally adjusted estimate of the unemployment rate was 10.5 per cent, unchanged from January 1994. The unemployment rate for males rose slightly to 10.9 per cent, while for females the unemployment rate fell by 0.2 percentage points to 9.9 per cent.

Participation rate

The seasonally adjusted estimate of the labour force participation rate in February 1994 was 62.9 per cent, unchanged since December 1993. The participation rate for males fell slightly to 73.7 per cent, while for females it rose by 0.2 percentage points to 52.5 per cent.

For further information order the publication *The Labour Force, Australia, Preliminary* (6202.0) or contact *Sylvia Sajler* on (06) 252 6525.

Wool receivals below last year

Although the trend estimate of taxable wool received by brokers and dealers has shown an upward trend since October 1993 (see chart at left), the total receivals in 1993-94 is below the level at the same time in 1992-93.

In original terms, brokers and dealers received 550 220 tonnes of taxable wool in the seven months to January 1994, a fall of 8.2 per cent from the same period one year earlier.

In other news from the latest *Livestock Products* monthly publication, the trend estimate for red meat production rose by 0.8 per cent in January, its second consecutive monthly rise.

Total red meat production in the seven months to January was just 0.4 per cent above the same period a year earlier, at 1.63 million tonnes carcass weight. Production of veal (up 7.4%), mutton (up 9.9%) and pigmeat (up 4.4%) all recorded rises in the seven-month comparison, while there was a 0.8 per cent fall in beef production and a 10.0 per cent fall in lamb production.

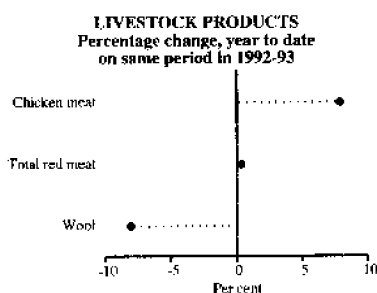

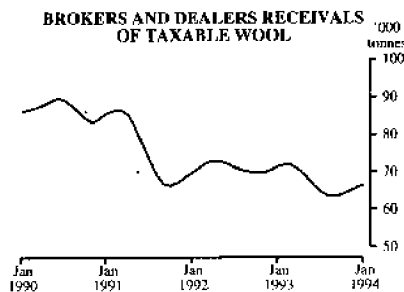

In the five months to November 1993, Australia exported 2.13 million live sheep, with a gross value of \$41.6 million. While the number of sheep was up slightly on the same five months in 1992, the value of these exports was down by about \$2.4 million.

Meanwhile chicken meat production continues a strong upward trend which has been unbroken since April 1992.

CHICKEN MEAT PRODUCED Thousand tonnes carcass weight

	NSW	Vic.	Qld	SA	WA	Aust.

Exports push wine sales up in 1993

Total sales (domestic plus exports) of Australian wine for 1993 were 444.4 million litres, 11.8 per cent higher than for 1992. Domestic sales, which accounted for 72.0 per cent of all wine sales in 1993, rose by 3.3 per cent to 319.6 million litres. Exports of Australian wine in 1993 were 124.8 million litres worth \$357.1 million, up on 1992 by 42 per cent in terms of volume and 36.5 per cent in terms of value.

Domestic sales of Australian wine by winemakers for January 1994, in seasonally adjusted terms, were 20.4 million litres, 22.2 per cent down on sales in January 1993. This is the lowest monthly seasonally adjusted estimate of domestic wine sales since January 1981. As a result of this large fall, the provisional trend estimate in domestic wine sales fell for the seventh consecutive month. The trend decline, which had shown signs of easing in the last couple of months, is now strengthening. Using original data, there were 13.5 million litres of Australian wine sold domestically in January 1994, down 63.6 per cent on the traditional high sales in December.

Export sales in December 1993 were 8.3 million litres of wine valued at \$23.0 million. This is a similar result to November 1993 but up on December 1992 by 63.0 per cent in terms of volume and 76.3 per cent in terms of value.

Small businesses hold the line on employment

Over the four year period to August 1993, the number of employed wage and salary earners in businesses with 1-19 employees has remained relatively constant, while employment in the larger business categories have fallen.

Between August 1989 and August 1993, total employment in the private sector dropped from 4 481 400 to 4 093 900, a fall of 8.6 per cent. Over this period employment in the 1-19 size range has dropped 1.6 per cent (23 600). In contrast, employment fell by 14.2 per cent (280 200) in businesses with employment of 100 or more and by 8.6 per cent (88 800) in businesses employing 20-99 persons.

On a State basis Western Australia (22.5%) has shown the greatest growth in businesses with less than 19 employees closely followed by the Australian Capital Territory (17.2%) while South Australia has shown negative growth of -12.7 per cent followed by the Northern Territory (-12.6%) and Victoria (-10.4%).

Finance in brief ...

Personal finance

The provisional trend estimate for personal finance commitments for January 1994 was \$2 358.6 million, an increase of \$118.8 million (5.3%) on December 1993 and an increase of \$693.9 million (41.7%) on January 1993.

The trend estimates for fixed loan facilities increased by \$52.9 million (3.8%) and commitments under revolving credit facilities increased by \$66.0 million (7.6%) on December 1993.

Commercial finance

The provisional trend estimate for commercial finance commitments for January 1994 was \$7 570.3 million, a decrease of \$54.5 million (0.7%) on December 1993 but an increase of \$1 266.4 million (20.1%) on January 1993.

The January 1994 trend estimate for commitments under fixed loan facilities increased by \$1.0 million (0.1%). However, the trend estimate for commitments under revolving credit facilities decreased by \$55.5 million (1.4%).

Lease finance

The provisional trend estimate for lease finance commitments for January 1994 was \$473.5 million, an increase of \$3.3 million (0.7%) on December 1993 and an increase of \$87.8 million (22.8%) on January 1993.

These series are available on subscription to a special data service. For further information, contact Mark Dennis on (06) 252 7117.

Trend strengthens in new car registrations

Final figures for January 1994 show a stronger trend is emerging for total new motor vehicle registrations, with steady monthly rises since September 1993. With the exception of a small fall in August, passenger vehicle registrations have been increasing steadily since March 1993. Other vehicles have been following this trend since October 1993, reversing the consecutive falls in the previous three months.

In seasonally adjusted terms, the 6.3 per cent rise in total registrations over December 1993 was due to an 8.7 per cent rise in passenger vehicle registrations more than offsetting a 4.8 per cent fall in other vehicle registrations.

Unadjusted total motor vehicle registrations for January 1994 fell from 48 536 in December 1993 to 36 662. All vehicle types fell from their previous month's total. Of these registrations, passenger vehicles fell from the December 1993 total of 40 746, to 30 967 (or 24.0%). Other vehicles fell from 7 790 to 5 695 (or 26.9%) and motorcycles from 1 543 to 1 481 (or 4.0%).

Of the top 5 models for January 1994, Ford Falcon/Fairmont recorded 10.8 per cent of all passenger vehicles registered and led all models with 3 337 registrations. Holden Commodore/Calais recorded 2 911 registrations (or 9.4%), Mitsubishi Magna, 2 687 (or 8.7%), Toyota Corolla 1 771 (or 5.7%) and Toyota Camry 1 333 (or 4.3%).

The top five makes of all light commercial registrations for January 1994 were Toyota with 1 592 registrations, or 34 per cent, Ford 812 (or 17.3%); Holden 730 (or 15.6%); Mitsubishi 635 (or 13.6%) and Nissan 431 (or 9.2%).
