  - For further information about other ABS statistics and services, contact any ABS office. See inside back cover for the ABS contact numbers and addresses.
-

## About this publication

This publication contains final data from the 1991 Census of Population and Housing.

The census counts are provided for statistical local areas (SLAs), statistical subdivisions (SSDs) and statistical divisions (SDs); legal local government areas (LGAs); and urban centres/localities (UC/Ls). Totals at Section of State level are provided in Table 3. Some 1986 Census data are included.

The counts are on a place of enumeration basis, which provides a count of people where they were located on census night, 6 August 1991, which may not be where they usually live.

*Census Counts for Small Areas* is produced for each State and Territory.

## Scope and coverage

The 1991 Census of Population and Housing was held on 6 August 1991. The purpose of the census was to count every person who spent census night in Australia. This included people in private dwellings, occupied non-private dwellings, camping out, on vessels in or between Australian ports and on board overnight transport.

People were counted where they were located on census night, which may not have been where they usually live.

Visitors to Australia were counted regardless of how long ago they arrived, or how long they planned to stay. Australian residents out of the country on census night were excluded.

All private dwellings were counted, whether occupied or unoccupied. Occupied non-private dwellings, such as hospitals, gaols, etc. were also counted.

Diplomatic personnel and their families were excluded from the census, as were diplomatic residences.

## Data limitations

The census is subject to a number of errors, although the effect of such errors on overall census results is generally insignificant.

### Underenumeration

Although the census aims to count each person, there are some people who are missed. Underenumeration in the 1991 Census is estimated to be 1.9% for Australia. The data in this publication are not adjusted for underenumeration.

### Respondent error

Because processing procedures cannot detect all errors made by people in completing the census form, some remain in final data.

### **Processing error**

Some processing errors may occur, although stringent quality control measures have been used to minimise them.

### **Random adjustment**

Random error is added to census data to ensure confidentiality. This means that small cells are randomly adjusted to avoid releasing information about particular individuals, families, households or dwellings. As a result, component cells may not add to their totals. These differences are statistically insignificant and do not impair the usefulness of the tables.

Further information on data quality will be provided in *Census Update* and in the 1991 Census data quality papers.

## **1986 Census data**

1986 Census data have been provided in this publication. Where a legal local government area (LGA) or a statistical local area (SLA) boundary has changed, 1986 Census data have been estimated for the 1991 Census boundaries. 1986 data for urban centre/localities (UC/Ls) are not adjusted.

1986 Census occupied private dwelling data in this publication include occupied caravans in parks. These data have been adjusted to provide comparability with the 1991 Census data for occupied private dwellings.

The 1986 data were originally published in *Census 86 - Persons and Dwellings in Legal Local Government Areas, Statistical Local Areas and Urban Centres/(Rural) Localities, South Australia (2466.0)*.

## **Census variables in this publication**

### **Age**

Age has been collected in all Australian censuses. For the 1991 Census, age was self-coded.

### **Sex**

The census forms asks the sex of each person.

### **Dwellings**

The census collector recorded each dwelling as either private or non-private. Private dwellings are either occupied or unoccupied. Only occupied non-private dwellings were included in the census. Non-private dwellings include occupied motels, gaols, welfare institutions, hospitals, retirement villages, boarding schools etc. Occupied caravans in parks are counted as occupied private dwellings.

## The geographic areas

The codes and names of geographic areas used in this publication are defined by the Australian Standard Geographical Classification (ASGC).

The ASGC codes are included to enable users to cross-reference geographic areas in this publication with areas in other census products which use codes only, such as some maps and some electronic products.

Definitions of ASGC areas in this publication are provided below. More detailed definitions and lists of codes and names of the geographic areas are contained in the publications *1991 Census Geographic Areas* (2905.0), *1991 Census Urban Centres/Localities Code List* (2909.0) and *Australian Standard Geographical Classification (ASGC)* (1216.0), edition 2.1.

### Statistical Local Area (SLA)

Statistical local areas (SLAs) must consist of one or more whole collection districts (CDs) and cover, in aggregate, the whole of Australia without gaps or overlaps. They are the key intermediate spatial units for the dissemination of census data.

SLAs correspond in most cases to legal local government areas (LGAs). The main exceptions are:

- where the boundaries of one or more statistical subdivisions (SSDs) cut across a legal LGA, the legal LGA is split into two or more parts, each of which falls within the relevant SSD.
- where a particular legal LGA is substantially different from other equivalent legal LGAs in terms of size and economic significance, the legal LGAs can be split into sub-areas.

Where an area is **unincorporated**, that is, not part of an LGA, an SLA is created.

In the ASGC, oil rigs and other artificial platforms are formed into Off-Shore Areas. For census purposes, people on board vessels in or between Australian ports, or on board long-distance trains, buses or aircraft are classified as being migratory. The two groups are combined to form an **Off-Shore Areas and Migratory** SLA for each State and the Northern Territory for the census.

### Statistical Subdivision (SSD)

Statistical subdivisions (SSDs) are the smaller of two ASGC general purpose regional type spatial units, the other is the statistical division (SD). SSDs are defined in most States on the same basis as SDs.

SSDs consist of one or more statistical local areas (SLAs) and cover, in aggregate, the whole of Australia without gaps or overlaps.

### Statistical Division (SD)

Statistical divisions (SDs) are the larger of the two ASGC general purpose regional type spatial units, the smaller one is the statistical subdivision (SSD).

SDs consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries.

SDs are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least twenty years.

### Legal Local Government Area (LGA)

Legal local government areas (LGAs) are spatial units which represent the whole undivided geographical area of responsibility of either:

- an incorporated local government council, or
- an incorporated **Community Government Council (CGC)** where the CGC is of sufficient size and statistical significance.

Currently only Coomalie in the Northern Territory has met the criteria in respect of CGCs.

There are 832 legal LGAs in Australia at the time of the 1991 Census which collectively cover only a part of Australia. The major areas not covered by legal LGAs (**unincorporated areas**, see SLAs) are the large northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory.

The number of LGAs and their boundaries change over time. They are the responsibility of the State/Territory governments.

### Section of State

Within a State or Territory each Section of State represents an aggregation of non-contiguous geographical areas of a particular type. They are defined for each census at the time of the census.

The Sections of State are:

- Major Urban: all urban centres with a population of 100,000 and over
- Other Urban: all urban centres with a population of 1,000 to 99,999
- Locality: all localities with a population of 200 to 999

- Rural Balance: the remainder of the State/Territory
- Migratory: Off-Shore Areas and Migratory.

### **Urban Centre/Locality (UC/L)**

Broadly an Urban Centre is a population cluster of 1,000 or more people. A Locality is a population cluster of between 200 and 999 people. People living in Urban Centres are classified as urban for statistical purposes while those in Localities are classified as rural. The criteria for delimiting UC/Ls are based on the Linge criteria.

Details of these criteria as applied for the 1991 Census, and the codes and names of the 1991 Census UC/Ls, are available in the publication *1991 Census - Urban Centres/Localities Code List (2909.0)*.

### **Changes to geographic areas between censuses**

Changes occur in the period between censuses, for example, when State governments review legal local government areas (LGAs). The ABS makes an annual review of the ASGC to incorporate these changes. Statistics from the 1991 Census relate to the areas defined by the ASGC at 1 January 1991. Details of the changes made since the 1986 Census are provided in this publication.

### **ABS population estimates**

Official ABS population estimates (estimated resident population) are based on census counts that have been adjusted to:

- include people who were in Australia on census night but were missed in the census;
- include Australian residents who were temporarily overseas on census night (these people were not within the scope of the census); and
- exclude overseas visitors counted in the census who are not usual residents of Australia.

The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

ABS population estimates are published in *Australian Demographic Statistics (3101.0)*, produced quarterly, and in *Estimated Resident Population by Sex and Age: States and Territories of Australia (3201.0)*, produced annually.

## Where to find out more about the 1991 Census

A number of 1991 Census reference products are available from the ABS. They include the *1991 Census Dictionary* (2901.0), *1991 Census Directory of Classifications* (2904.0), *1991 Census Geographic Areas* (2905.0) and *1991 Census - Urban Centres/Localities Code List* (2909.0). For detailed explanations of data, geography, census concepts, terminology, variables and classifications, please refer to these publications.

Final data from the 1991 Census will be available in a range of publications including thematic reports and Social Atlases. Products will also be available on microfiche, floppy disk, magnetic tape or cartridge. Two 1991 Census products will be available on CD-ROM, CMAP91 and CDATA91.

The publications *Census Counts for Small Areas* (2730.1-8) and *Census Characteristics* (2710.0-8) will be produced for each State and Territory. A number of publications focussing on South Australia will be produced by the South Australian office of the ABS.

*1991 Census - A Guide to Products and Services* (2910.0) provides up-to-date details on census products and services, including prices and release dates.

*Census Update*, a free quarterly newsletter, will keep you informed of developments in all census products and services. It highlights recent and forthcoming releases, and contains regular features on census data usage. Contact Census Marketing on (06) 252 7879 for details.

*Collection District Maps* (2920.0) in hardcopy and on microfiche, the *Collection District Comparability List* (2919.0) and the *Collection District Conversion List* (2918.0) are also available. 1991 Census digitised statistical boundaries are available for use with mapping software.

For more information on the wide range of data available from the 1991 Census, including data customised to suit specific requirements, contact the ABS office in your State or Territory.

(a) Where a statistical boundary has changed from the 1986 Census to the 1991 Census, 1986 data have been adjusted. (b) Includes caravans in parks. Caravans in parks have not been provided as a separate category in this table. For the 1991 Census, occupied caravans in parks are included in the occupied private dwelling category. For the 1986 Census, occupied caravans in parks were a separate dwelling category.

NOTE: Cells containing small values are randomly adjusted to avoid the release of confidential data.

(a) Where a statistical boundary has changed from the 1986 Census to the 1991 Census, 1986 data have been adjusted. (b) Includes caravans in parks. Caravans in parks have not been provided as a separate category in this table. For the 1991 Census, occupied caravans in parks are included in the occupied private dwelling category. For the 1986 Census, occupied caravans in parks were a separate dwelling category.  
NOTE: Cells containing small values are randomly adjusted to avoid the release of confidential data.

(a) The urban centre / locality may be located wholly within one SLA, or it may overflow into other SLAs. Where this occurs, the SLA provided is that with the highest population. (b) Includes caravans in parks.

\* Not previously defined as a locality, however 1986 Census data based on aggregating CDs is available.

† Previously known as Olympic Dam (L).

NOTE: Cells containing small values are randomly adjusted to avoid the release of confidential data.

## *For more information ...*

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### **Information Consultancy Service**

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

### **Electronic Data Services**

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key \*656#). The ABS PC TELESTATS service delivers major economic indicator publications ready to download into personal computers on the day of release. The PC AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

### **Bookshops and Subscriptions**

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
