- For further information about other ABS statistics and services, contact any ABS office. See inside back cover for the ABS contact numbers and addresses.

## Main Features

The total number of people counted in the Northern Ternitory on census night, 6 August 1991, was 175,891. This represents a $13.6 \%$ increase in the census count since the 1986 Census.
$63.2 \%$ of the total Northern Territory census count was comprised of people aged less than 35 years. The proportion aged 65 years and over was $4.6 \%$.

The census count for the Darwin Statistical Division increased by $8.3 \%$ from the 1986 Census to the 1991 Census. People in the age group 25 to 34 years comprised $19.7 \%$ of the total in this statistical division.

The census count for the Danwin City Statistical Subdivision increased by $6.0 \%$ and for the Palmerston-East Arm Statistical Subdivision by 33.4\%.

The census count for the Northern Territory Balance Statistical Division increased by $17.7 \%$ from the 1986 Census to the 1991 Census. People in the age group 25 to 34 years comprised $19.7 \%$ of the total in this statistical division.

Of the eight statistical subdivisions in this statistical division, the census count for all increased in the intercensal period, with four increasing by more than $20 \%$. They were Daly (46.5\%), Darwin Rural Areas (32.8\%), Alligator (24.2\%) and Lower Top End Northern Territory (23.5\%).

The number of occupied private dwellings counted by the census in the Northern Territory increased by $18.8 \%$ since the 1986 Census. The number of occupied private dwellings in Darwin Statistical Division increased by $11.7 \%$ and in Northern Territory Balance Statistical Division by 26.5\%.

The census count for the legal local government area of Katherine increased by $64.7 \%$ since the 1986 Census, from 5,691 to 9,372 people. The census count for the legal local government areas of Palmerston and Litchfield increased by $36.8 \%$ and $31.5 \%$ respectively.

The census count for the legal local government area of Tennant Creek decreased slightly, from 3,503 people in 1986 to 3,480 people in 1991.
$54.6 \%$ of the people counted by the 1991 Census in the Northern Territory were in the Urban Centres of Alice Springs, Darwin and Palmerston.

## About this publication

This publication contains final data from the 1991 Census of Population and Housing.

The census counts are provided for statistical local areas (SLAs), statistical subdivisions (SSDs) and statistical divisions (SDs); legal local government areas (LGAs); and urban centres/localities (UC/Ls). Totals at Section of State level are provided in Table 3. Some 1986 Census data are included.

The counts are on a place of enumeration basis, which provides a count of people where they were located on census night, 6 August 1991, which may not be where they usually live.

Census Counts for Small Areas is produced for each State and Territory.

## Scope and coverage

The 1991 Census of Population and Housing was held on 6 August 1991. The purpose of the census was to count every person who spent census night in Australia. This included people in private dwellings, occupied non-private dwellings, camping out, on vessels in or between Australian ports and on board overnight transport.

People were counted where they were located on census night, which may not have been where they usually live.

Visitors to Australia were counted regardless of how long ago they arrived, or how long they planned to stay. Australian residents out of the country on census night were excluded.

All private dwellings were counted, whether occupied or unoccupied. Occupied non-private dwellings, such as hospitals, gaols, etc. were also counted.

Diplomatic personnel and their families were excluded from the census, as were diplomatic residences.

## Data IImitations

The census is subject to a number of errors, although the effect of such errors on overall census results is generally insignificant.

## Underenumeration

Although the census aims to count each person, there are some people who are missed. Underenumeration in the 1991 Census is estimated to be $1.9 \%$ for Australia. The data in this publication are not adjusted for underenumeration.

## Respondent error

Because processing procedures cannot detect all errors made by people in completing the census form, some remain in final data.

## Processing error

Some processing errors may occur, although stringent quality control measures have been used to minimise them.

## Random adjustment

Random error is added to census data to ensure confidentiality. This means that small cells are randomly adjusted to avoid releasing information about particular individuals, families, households or dwellings. As a result, component cells may not add to their totals. These differences are statistically insignificant and do not impair the usefulness of the tables.

Further information on data quality will be provided in Census Update and in the 1991 Census data quality papers.

## 1986 Census data

1986 Census data have been provided in this publication. Where a legal local government area (LGA) or a statistical local area (SLA) boundary has changed, 1986 Census data have been adjusted to match the 1991 Census boundaries. 1986 data for urban centre/localities (UC/Ls) are not adjusted.

1986 Census occupied private dwelling data in this publication include occupied caravans in parks. These data have been adjusted to provide comparability with the 1991 Census data for occupied private dwellings.

The 1986 data were originally published in Census 86 Persons and Dwellings in Legal Local Government Areas, Statistical Local Areas and Urban Centres/(Rural) Localities, Northern Territory (2468.0).

## Census variables In this publication

## Age

Age has been collected in all Australian censuses. For the 1991 Census, age was self-coded.

## Sex

The census forms asks the sex of each person.

## Dwellings

The census collector recorded each dwelling as either private or non-private. Private dwellings are either occupied or unoccupied. Only occupied non-private dwellings were included in the census. Non-private dwellings include occupied motels, gaols, welfare institutions, hospitals, retirement villages, boarding schools etc. Occupied caravans in parks are counted as occupied private dwellings.

The codes and names of geographic areas used in this publication are defined by the Australian Standard Geographical Classification (ASGC).

The ASGC codes are included to enable users to crossreference geographic areas in this publication with areas in other census products which use codes only, such as some maps and some electronic products.

Definitions of ASGC areas in this publication are provided below. More detailed definitions and lists of codes and names of the geographic areas are contained in the publications 1991 Census Geographic Areas (2905.0), 1991 Census Urban Centres/Localities Code List (2909.0) and Australian Standard Geographical Classification (ASGC) (1216.0), edition 2.1.

## Statistical Local Area (SLA)

Statistical local areas (SLAs) must consist of one or more whole collection districts (CDs) and cover, in aggregate, the whole of Australia without gaps or overlaps. They are the key intermediate spatial units for the dissemination of census data.

SLAs correspond in most cases to legal local government areas (LGAs). The main exceptions are:

- where the boundaries of one or more statistical subdivisions (SSDs) cut across a legal LGA, the legal LGA is split into two or more parts, each of which falls within the relevant SSD.
- where a particular legal LGA is substantially different from other equivalent legal LGAs in terms of size and economic significance, the legal LGAs can be split into sub-areas. For example, the city of Brisbane covers a large area and is split into 165 SLAs.

Where an area is unincorporated, that is, not part of an LGA, an SLA is created. For the 1991 Census, the ASGC classifies the major part of the Northern Territory as unincorporated. The incorporated part includes the areas covered by the legal LGAs of Darwin, Alice Springs, Jabiru, Tennant Creek, Katherine, Litchfield and the CGC of Coomalie.

In the ASGC, oil rigs and other artificial platforms are formed into Off-Shore Areas. For census purposes, people on board vessels in or between Australian ports, or on board longdistance trains, buses or aircraft are classified as being migratory. The two groups are combined to form an OffShore Areas and Migratory SLA for each State and the Northern Territory for the census.

## Statistical Subdivision (SSD)

Statistical subdivisions (SSDs) are the smaller of two ASGC general purpose regional type spatial units, the other is the statistical division (SD). SSDs are defined in most States on the same basis as SDs.

SSDs consist of one or more statistical local areas (SLAs) and cover, in aggregate, the whole of Australia without gaps or overlaps.

## Statistical Division (SD)

Statistical divisions (SDs) are the larger of the two ASGC general purpose regional type spatial units, the smaller one is the statistical subdivision (SSD).

SDs consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries.

SDs are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

In the Northern Territory SDs are based on Territory Government Administration Regions.

Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least twenty years.

## Legal Local Government Area (LGA)

Legal local government areas (LGAs) are spatial units which represent the whole undivided geographical area of responsibility of either:

- an incorporated local government council, or
- an incorporated Community Government Council (CGC) where the CGC is of sufficient size and statistical significance.

Currently only Coomalie in the Northern Territory has met the criteria in respect of CGCs.

There are 832 legal LGAs in Australia at the time of the 1991 Census which collectively cover only a part of Australia. The major areas not covered by legal LGAs (unicorporated areas, see SLAs) are the large northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory.

The number of LGAs and their boundaries change over time. They are the responsibility of the State/Territory governments.

## Section of State

Within a State or Territory each Section of State represents an aggregation of non-contiguous geographical areas of a particular type. They are defined for each census at the time of the census.

The Sections of State are:

- Major Urban: all urban centres with a population of 100,000 and over
- Other Urban: all urban centres with a population of 1,000 to 99,999

Locality: all localities with a population of 200 to 999

- Rural Balance: the remainder of the State/Territory
- Migratory: Off-Shore Areas and Migratory

## Urban Centre/Locality (UC/L)

Broadly an Urban Centre is a population cluster of 1,000 or more people. A Locality is a population cluster of between 200 and 999 people. People living in Urban Centres are classified as urban for statistical purposes while those in Localities are classified as rural. The criteria for delimiting UC/Ls are based on the Linge criteria.

Details of these criteria as applied for the 1991 Census, and the codes and names of the 1991 Census UC/Ls, are available in the publication 1991 Census - Urban Centres/Localities Code List (2909.0).

## Changes to geographic areas between censuses

Changes occur in the period between censuses, for example, when State governments review legal local government areas (LGAs). The ABS makes an annual review of the ASGC to incorporate these changes. Statistics from the 1991 Census relate to the areas defined by the ASGC at 1 January 1991. Details of the changes made since the 1986 Census are provided in this publication.

## ABS population estimates

Official ABS population estimates (estimated resident population) are based on census counts that have been adjusted to:

- include people who were in Australia on census night but were missed in the census;
- include Australian residents who were temporarily overseas on census night (these people were not within the scope of the census); and
- exclude overseas visitors counted in the census who are not usual residents of Australia.

The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

ABS population estimates are published in Australian
Demographic Statistics (3101.0), produced quarterly, and in Estimated Resident Population by Sex and Age: States and Territories of Australia (3201.0), produced annually.

## Where to find out more about the 1991 Census

A number of 1991 Census reference products are available from the ABS. They include the 1991 Census Dictionary (2901.0), 1991 Census Directory of Classifications (2904.0), 1991 Census Geographic Areas (2905.0) and 1991 Census Urban Centres/Localities Code List (2909.0). For detailed explanations of data, geography, census concepts, terminology, variables and classifications, please refer to these publications.

Final data from the 1991 Census will be available in a range of publications including thematic reports and Social Atlases. Products will also be available on microfiche, floppy disk, magnetic tape or cartridge. Two 1991 Census products will be available on CD-ROM, CMAP91 and CDATA91.

The publications Census Counts for Small Areas (2730.18) and Census Characteristics (2710.0-8) will be produced for each State and Territory. A number of publications focussing on the Northern Territory will be produced by the Northern Territory office of the ABS.

1991 Census - A Guide to Products and Services (2910.0) provides up-to-date details on census products and services, including prices and release dates.

Census Update, a free quarterly newsletter, will keep you informed of developments in all census products and services. It highlights recent and forthcoming releases, and contains regular features on census data usage. Contact Census Marketing on (06) 2527879 for details.

Collection District Maps (2920.0) in hardcopy and on microfiche, the Collection District Comparability List (2919.0) and the Collection District Conversion List (2918.0) are also available. 1991 Census digitised statistical boundaries will be available for use with mapping software.

For more information on the wide range of data available from the 1991 Census, including data customised to suit specific requirements, contact the ABS office in your State or Territory.

Where this occurs, the SLA provided is that with the highest population. (b) Includes caravans in parks (a) The urban centre / locality may be located wholly within one SLA, or it may overflow into ocher SLAs.

* Not previously defined as a locality, however 1986 Census data based on aggregating CDs is available.
Strict adherence to Linge criteria in 1991 means that urban centre/ locality counts are not comparable to 1986 Census counts for Darwin, Alice Springs, Katherine and Palmerston.
TABLE 6. URBAN CENTRES AND LOCALITIES, NORTHERN TERRITORY,

(a) This count is on place of enumeration basis.
NOTE : Urban centres and localities are defined for each census using the Linge criteria. See definition on page 7 of this publication.
Cells in this table have been randomly adjusted to avoid the release of confidential data.

# Changes to geographic areas, 1986 Census to 1991 Census, Northern Territory 

| Area | Nature of change | Date of <br> change |
| :--- | :--- | :--- |
| STATISTICAL DIVISION |  |  |
| Darwin | Reduced by transfer of Litchfield $(S)$ - Pt A to Northern Territory - Bal | $01-01-91$ |
| Northern Territory - Bal | Enlarged by transfer of Litchfield $(\mathrm{S})$ - Pt A from Darwin | $01-01-91$ |

STATISTICAL SUBDIVISION

| Alligator | Enlarged by transfer of Vernon Islands and <br> Cape Hotham, north-east of Adelaide <br> River, from Vernon <br> Enlarged by transfer from East Arnhem - Bal <br> in East Arnhem to West Arnhem <br> Enlarged by transfer from Gulf in Lower Top End NT <br> to West Arnhem <br> Enlarged by transier from Cox-Finniss (formerly part of Finniss) in <br> Darwin Rural Areas (formerly Vernon) to South Alligator <br> Enlarged by transfer from Elsey - Bal in Lower Top End NT to West Arnhem | 01-07-88 <br> 01-01-91 <br> 01-01-91 <br> 01-01-91 <br> 01-01-91 |
