COMMONWEALTH DEMOGRAPHY.

PREFACE.

The present Bulletin contains in a condensed form various tables relative to the Population and Vital Statistics of the Commonwealth and its component States. In Sections I. to IV. the particulars furnished relate to the period of nine years, 1901 to 1909, which has elapsed since the inauguration of Federation. These are furnished under the following heads:—

- I. Population.
- II. Births.
- III. Deaths.
- IV. Marriages.

In Section V. is given a summary of some of the leading Demographic Statistics of States and Commonwealth from 1860 to the end of 1909.

NOTE.—(-) signifies excess of departures over arrivals.

*Owing to the methods of estimating migration adopted prior to 1907, the distribution according to sex of "Excess of arrivals over departures" is probably erroneous for the years 1901 to 1906. For subsequent years an improved method has been employed, and the results have shown that the previous method was probably in error in indicating a persistent loss of females by migration.

*All estimates to 1900 inclusive have been corrected for errors disclosed by the various Censuses. See also note to Table No. 8 p. 9. If the actual records of births, deaths, arrivals and departures for the ten years 1891-1901 had been used to estimate the populations at 31st March, 1901, the estimated figures would have exceeded the results obtained at the Census taken on that date by the following amounts:—New South Wales, 52,477; Victoria, 66,390; Queensland, 20,688; South Australia, 24,633; Western Australia, -96; and Tasmania, 25,072—a total for the Commonwealth of 189,164, or about 5 per cent. of total population enumerated.

Note.—(-) signifies excess of Departures over Arrivals.

* Owing to the methods of estimating migration adopted prior to 1907, the distribution, according to sex, of "Excess of arrivals over departures" is probably erroneous for the years 1901-6. For subsequent years an improved method has been employed, and the results have shown that the previous method was probably in error in indicating a persistent loss of females by migration.
