## PREFACE.

---

Owing to considerations of space Section VI. Statistical Summary has not been republished. The leading Demographic Statistics of States and Territories from 1860 to 1927 may be found in Demography Bulletin No. 45, 1927.

The present issue, which is the forty-eighth of its series, furnishes particulars for 1930 and previous years in respect of the following matters:—

I. Population (including migration); II. Births; III. Deaths; IV. Marriages; V. Rates and Percentages in respect of births, deaths and marriages for 1930.

In Sections II., Births, and III., Deaths, the tabulations have been made according to the place of usual residence.

In Sections I. to V. details are given under each of the categories for the year 1930, and in Section III., table 48, the standardized death rates are given for each sex as well as for persons.

The population and migration figures have been adjusted on the basis of the results of the various censuses, and all rates have been computed on the amended mean population figures so ascertained.

I take this opportunity of expressing my thanks to the various State Departments responsible for the registration of births, deaths, and marriages for the courteous assistance rendered by them in supplying the data for the compilation of Vital Statistics, and to the Government Statistician, Sydney, for kindly furnishing data for the State of New South Wales. Special thanks are due to Mr. H. J. Exley, M.A., Supervisor of Census, the officer in charge of the compilation of Vital Statistics in this Bureau, for the unremitting care and attention which he has devoted to the onerous duties involved.

CHAS. H. WICKENS,  
Commonwealth Statistician and Actuary.

Commonwealth Bureau of Census and Statistics,  
Canberra, F.C.T.—3rd August, 1931

NOTE.—Ex-nuptial children, previous issue by the same father, are included, but children by former marriages are not, nor are still-born children.

(a) The total number of nuptial confinements was 121,098, viz.—110,724 single births, 1,366 cases of twins, 7 cases of triplets and one case of quadruplets. The figures in the table are exclusive of 15 mothers, in the case of whom the necessary particulars either as to date of marriage, or as to previous issue, were not stated.
