## PREFACE.

---

Owing to considerations of space, Section VI. Statistical Summary was not published for the years 1928 to 1930. An abridged Summary giving details for States and Territories from 1901 to 1932, is included in the present issue. The leading Demographic Statistics for States and Territories from 1860 to 1927 may be found in Demography Bulletin No. 45, 1927.

The present issue, which is the fiftieth of its series, furnishes particulars for 1932, and previous years in respect of the following matters : -

I. Population (including migration) ; II. Births ; III. Deaths ; IV. Marriages ; V. Rates and Percentages in respect of births, deaths and marriages ; VI. Statistical Summary ; VII. Appendix.

In Sections II., Births, and III., Deaths, the tabulations have been made according to the place of usual residence. The classification of occupations appearing in Sections II., III. and IV., has been revised. It now follows the classification used in the Census of England and Wales, 1931, which was adapted to the requirements of the Australian Census of 1933. In Section III., Deaths, the classification of causes of death is in accordance with the " International List of Causes 1929 " (International Commission, Paris, 1929). The following additions have been made--Infantile Mortality under one month, Australia - - Table 77 (part) ; Infantile Death Rates, Metropolitan area and remainder of State Table 79 ; Causes of deaths of children under one month by States Tables 87 and 88.

The population and migration figures have been adjusted on the basis of the results of the various censuses except that of the 30th June, 1933, and all rates have been computed on the amended mean population figures so ascertained. A preliminary count in connexion with the Census of the 30th June, 1933, gives the population of each State and Territory as shown in the Appendix to this Bulletin on page 140.

I take this opportunity of expressing my thanks to the various State Departments responsible for the registration of births, deaths, and marriages for the valuable assistance rendered by them in supplying the data for the compilation of Vital Statistics, and to the Government Statistician, Sydney, for kindly furnishing data for the State of New South Wales. Special thanks are due to Mr. K. F. Andrews, B.A., B.Com., the officer responsible for the compilation of Vital Statistics in this Bureau, for the care and attention which he has devoted to the work involved.

E. T. McPHEE,  
Commonwealth Statistician.

NOTE.—(—) Signifies an excess of departures over arrivals.

(a) The population at intercensal periods is estimated by adding the excess of births over deaths, and the excess of arrivals over departures to the population at the last Census. When the Census has been taken it is found that the estimate for the Census date as ascertained by the above method is usually greater than the actual Census result. As there is no reason to doubt the accuracy of birth and death statistics, the greater part of the difference may be properly charged to migration, and in practice it has been found convenient to attribute the whole of the discrepancy to unrecorded departures and to apply a corrective ratio to the departures recorded during successive intercensal periods. Since the Census of 1921 the recorded departures have been increased by 1 per cent. for males and 4½ per cent. for females.

NOTE.—The reference to the different States indicates the place where immigrants left the oversea ship and where emigrants embarked upon the oversea ship. The figures do not indicate the effect of migration on the populations of the several States; for that purpose it is necessary to take into account the interstate migration.
