## PREFACE.

---

Owing to considerations of space, Section VI. Statistical Summary was not published for the years 1928 to 1930. An abridged Summary giving details for States and Territories from 1901 to 1933 is included in the present issue. The leading Demographic Statistics for States and Territories from 1860 to 1927 may be found in Demography Bulletin No. 45, 1927.

The present issue, which is the fifty-first of its series, furnishes particulars for 1933 and previous years, and has been amplified to give fairly complete figures under each section for the intercensal period 1921 to 1933. The sections comprehended are as follow, viz. :—

I. Population (including migration); II. Births; III. Deaths; IV. Marriages; V. Rates and Percentages in respect of births, deaths and marriages; VI. Statistical Summary.

In Sections II., Births, and III., Deaths, the tabulations have been made according to the place of usual residence. The classification of occupations appearing in Sections II., III. and IV., follows the classification used in the Census of England and Wales, 1931, which was adapted to the requirements of the Australian Census of 1933. In Section III., Deaths, the classification of causes of death is in accordance with the "International List of Causes 1929" (International Commission, Paris, 1929).

The following additions have been made :—Population—Analysis of Aggregate Increase in each State and Territory, 31st March, 1921, to 30th June, 1933 and 31st March, 1921, to 31st March, 1931—Tables 15 and 16; Migration—Oversea Arrivals and Departures, 1921 to 1933—Tables 17*a* and 17*b*; Migration—Interstate Arrivals and Departures, 1921 to 1933—Tables 17*c* and 17*d*; Marriages—Average Age of Bridegrooms and Brides—Table 109; Statistical Summary—Estimated Mean Population of Financial Years 1900–1901 to 1932–1933—Table 113; Statistical Summary—Population of Principal Australian Cities and Towns—Table 122.

The population and migration figures have been adjusted on the basis of the results of the various censuses including that of the 30th June, 1933, and all rates have been computed on the amended mean population figures so ascertained.

I take this opportunity of expressing my thanks to the various State Departments responsible for the registration of births, deaths, and marriages for the valuable assistance rendered by them in supplying the data for the compilation of Vital Statistics, and to the Government Statistician, Sydney, for kindly furnishing data for the State of New South Wales. Special thanks are due to Mr. K. F. Andrews, B.A., B.Com., the officer responsible for the compilation of Vital Statistics in this Bureau, for the care and attention which he has devoted to the work involved.

E. T. MCPHEE,  
Commonwealth Statistician.

NOTE.—(—) Signifies an excess of departures over arrivals.

(a) The population at intercensal periods is estimated by adding the excess of births over deaths, and the excess of arrivals over departures to the population at the last Census. When a Census had been taken it was found that the estimate for the Census date as ascertained by the above method was usually greater than the actual Census result. As there was no reason to doubt the accuracy of birth and death statistics, it was thought that the greater part of the difference might be properly charged to migration, and in practice it was found convenient to attribute the whole of the discrepancy to unrecorded departures and to apply a corrective ratio to the departures recorded during successive intercensal periods. Since the Census of 1921 the recorded departures had been increased by 1 per cent. for males and 4½ per cent. for females. The results of the Census of the 30th June, 1933, showed that the improvements in the records of migration had been such that these arbitrary adjustments were no longer necessary and it is not intended to continue them. The intercensal estimates have been adjusted to conform with the Census results.

NOTE.—The reference to the different States indicates the place where immigrants left the overseas ship and where emigrants embarked upon the overseas ship. The figures do not indicate the effect of migration on the populations of the several States; for that purpose it is necessary to take into account the interstate migration.
