OFFICIAL STATISTICS, COMMONWEALTH OF AUSTRALIA.

AUSTRALIAN DEMOGRAPHY.

BULLETIN No. 55.

SUMMARY

OF

AUSTRALIAN POPULATION AND VITAL STATISTICS
1937 AND PREVIOUS YEARS.

PREPARED UNDER INSTRUCTIONS FROM THE
HONORABLE THE TREASURER

BY

ROLAND WILSON, B.Com., D.Phil., Ph.D.,
COMMONWEALTH STATISTICIAN.

By Authority:

L. F. JOHNSTON, COMMONWEALTH GOVERNMENT PRINTER, CANBERRA
(Wholly set up and printed in Australia.)

AUSTRALIAN DEMOGRAPHY.

PREFACE.

Owing to considerations of space, the Statistical Summary, formerly Section VI., was not published for the years 1928 to 1930. An abridged Summary giving details for States and Territories for 1901 and from 1906 to 1937 is included in Section VII. of the present issue. The leading Demographic Statistics for States and Territories from 1860 to 1927 may be found in Demography Bulletin No. 45, 1927.

The present issue which is the fifty-fifth of its series, furnishes particulars for 1937 and previous years. Commencing with this issue, Migration Statistics are shown separately from the Population Section, the division of the Demography now adopted being as follows:—

I. Population; II. Migration; III. Births; IV. Deaths; V. Marriages; VI. Rates and Percentages in respect of births, deaths and marriages; VII. Statistical Summary.

In Sections III., Births, and IV., Deaths, the tabulations have been made according to the place of usual residence. The classification of occupations appearing in Sections III., IV. and V., follows the classification used in the Census of England and Wales, 1931, which was adapted to the requirements of the Australian Census of 1933. In Section IV., Deaths, the classification of causes of death is in accordance with the "International List of Causes 1929" (International Commission, Paris, 1929).

The tables have been re-numbered in the present issue of the Demography but follow the same form as in the previous year.

Population estimates and migration records have been adjusted on the basis of the results of the various censuses including that of the 30th June, 1933, and all rates have been computed on the amended mean population figures so ascertained.

To facilitate reference to the matter contained in the various sections of the Demography, a detailed alphabetical Index will be found at the end of the volume.

I take this opportunity of expressing my thanks to the various State Departments responsible for the registration of births, deaths, and marriages for the valuable assistance rendered by them in supplying the data for the compilation of the Vital Statistics, and to the Government Statistician, Sydney, for kindly furnishing data for the State of New South Wales. Special thanks are due to Mr. R. C. Gilligan, B.Com., the officer in charge of the compilation of the Vital Statistics in this Bureau, for the care and attention which he has devoted to the work involved.

ROLAND WILSON,
Commonwealth Statistician.

1937 ..	6,740	—3,224	1,171	—1,849	1,010	1,046	13	296	5,203

(a) For rates of increase by migration see Table No. 136.

NOTE.—Previous to 1937 no account was taken in the migration records of Victoria and Tasmania of the number of persons returning to King Island from Melbourne. An adjustment has now been made to the records of interstate migration by sea to allow for the inclusion of these numbers, and the figures given above for net migration for Victoria and Tasmania from 1935 onwards have been amended accordingly.

No. 10.—Population—Total Increase (a), 1923 to 1937.

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Federal Capital Territory.	Australia.

NOTE.—The reference to the different States indicates the place where immigrants left the overseas ship and where emigrants embarked upon the overseas ship. The figures do not indicate the effect of migration on the populations of the several States; for that purpose it is necessary to take into account the interstate migration.

(a) Per 1,000 of mean population.

NOTE.—The mean populations shown above for divisions in 1937 are the respective State Statisticians' estimates and are based on data obtained from various local sources. The results differ from those published prior to 1935 as in earlier years the estimates of population used in the above table were calculated for each division according to the proportions ascertained at the previous Census. Owing to the varying methods adopted in the States, it has not been possible to give separate estimates of the migratory population for 1937 in all cases. In Queensland, Western Australia and Tasmania the proportion representing migratory population is absorbed automatically in the divisional totals in the process of computation of the mean population.

No. 38.—Births Registered, 1927 to 1937.

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Federal Capital Territory.	Australia.

1937	17.63	16.02	19.36	15.25	18.95	20.69	18.30	20.30	17.43

(a) Number of births per 1,000 of mean population. (b) The birth rates for the Federal Capital Territory in the above table are based on births which occurred in the Federal Capital Territory. About 20 per cent. of births in respect of which the mother's usual residence is the Federal Capital Territory take place in Queanbeyan just over the New South Wales border; while the number of births, in respect of which the mother's usual residence is New South Wales, which take place in the Federal Capital Territory is practically negligible. Consequently the following rates, based on births in respect of which the mother's usual residence is the Federal Capital Territory, are a fairer measure of birth-rates in the Federal Capital Territory: 1923, 11.79; 1924, 17.26; 1925, 20.87; 1926, 22.41; 1927, 21.10; 1928, 23.38; 1929, 23.28; 1930, 22.07; 1931, 21.40; 1932, 20.09; 1933, 19.11; 1934, 17.93; 1935, 20.25; 1936, 18.95; 1937, 21.78.

No. 42. Ex-nuptial Births, 1923 to 1937.

(a) Number of deaths per 1,000 of Mean Population.

NOTE.—The mean populations shown above for divisions in 1937 are the respective State Statisticians' estimates and are based on data obtained from various local sources. The results differ from those published prior to 1935 as in earlier years the estimates of population used in the above table were calculated for each division according to the proportions ascertained at the previous Census. Owing to the varying methods adopted in the States, it has not been possible to give separate estimates of the migratory population for 1937 in all cases. In Queensland, Western Australia and Tasmania the proportion representing migratory population is absorbed automatically in the divisional totals in the process of computation of the mean population.

No. 63.—Deaths.—Total in Calendar Months, 1937.

(a) Number of deaths per annum per 1,000 of mean population. (b) Computed by the application to a population of standard age and sex distribution, of the death rates for age groups according to sexes. (For standard population adopted, see *Official Year Book* No. 25, page 962.) The death rates for each State and Territory and for the Commonwealth in 1937 are based on the proportion of population in each age group revealed at the Census of the 30th June, 1933, and the results are, therefore, liable to error on account of the changed age constitution of the population since that date. It has been possible to obtain, from records of migration and of births and deaths in successive years since the Census, a more accurate estimate of the age distribution for the Commonwealth as a whole and the recalculated indexes of mortality for the Commonwealth for 1937 on this basis are as follows:—Males, 9.38; females, 7.80; persons, 8.58.

No. 67.—Annual Crude Death Rates(a) corresponding to Monthly Deaths, 1937—continued.

(a) Includes No. 94 (b) prior to 1934.

NOTE.—Comparison of causes of death in the above table with years prior to 1931 should be made with caution owing to changes in classification which occurred in 1931 when the 1929 revision of the International Nomenclature of Causes of Death was adopted in Australia. The connexion between the former classification title numbers and present ones is set out in detail in a footnote in this table in No. 53 and previous issues of the Demography.

See also footnote on p. 77.

(a) The increased numbers recorded in this group for 1937 in comparison with previous years is due to the inclusion here of the occupation "mechanic" (so described), classified formerly under Class VI. (Founding, engineering, metal industries, n.e.i.). The change in classification, which has been made uniformly in respect of births, deaths and marriages in 1937, has been found necessary owing to the lack of information connecting the occupations thus stated with any particular industry.
