DEMOGRAPHY.

1952.

BULLETIN No. 70.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,

BY

S. R. CARVER,

ACTING COMMONWEALTH STATISTICIAN.

DEMOGRAPHY, 1952.

PREFACE.

The present issue of the Demography Bulletin, the seventieth in the series, furnishes detailed statistics relating to the year 1952. Some comparative tables are included in each section but where the comparison is on the basis of individual years the period covered is necessarily limited. The more widely used totals and rates for each State and Territory for each year from 1881 to 1952 are given in a separate Statistical Summary included as Section VII.

All statistics contained in this Bulletin are exclusive of full-blood aboriginals.

Section I., which presents population statistics up to 31st December, 1952, contains a summary of certain Census results up to and including the Census of 30th June, 1947, together with population estimates for selected dates and estimates of the mean population for selected periods. All population statistics for dates up to 30th June, 1947, and all mean populations for calendar years up to 1946 and financial years up to 1946-47, inclusive, are final, having been adjusted to accord with Census results. Population statistics for dates or years subsequent to these are subject to revision when the results of the Census of 30th June, 1954, become available.

For the period September, 1939, to March, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel and internees and enemy prisoners of war sent to Australia from overseas are excluded from the estimates of population.

Detailed statistics of oversea migration are included in Section II., in which the figures relate to oversea passenger journeys whether by sea or air. The statistics for the period September, 1939, to June, 1947, exclude movements of defence personnel and internees and enemy prisoners of war from overseas. In the tables showing migration according to countries limitation of space prevents the inclusion of the full list of countries used in original tabulations but the additional information is available in the Bureau for reference.

The order of the marriage tables in Section III. has been altered to be more in accord with that of other Sections and a new table showing the number of marriages registered in each month has been added. The divorce tables are in the same form as in the previous year.

In Section V. five new tables (Nos. 93, 94, 107, 124 and 126) have been inserted so as to bring into better sequence the information previously included in the Section "Rates and Percentages". The deaths as recorded in this Section include deaths of defence personnel which were registered with civil registrars in the period September, 1939, to December, 1941, but from January, 1942, to June, 1947, deaths of Australian and Allied defence personnel and internees and enemy prisoners of war from overseas are excluded. The figures shown in this Section for the latter period thus relate to the Australian civilian population. Death-rates for the years 1939 to 1947 are calculated on total population and must be regarded as approximate.

Commencing with 1950 the classification of causes of death has been made according to the International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth Revision, 1948, of the International List of Causes of Death) together with the international rules for selecting the underlying cause of death, as explained more fully in *Official Year Book* No. 39, Chapter XIV.—Vital Statistics. Although the classification is made in accordance with the full detailed list of three-digit categories (with some fourth-digit sub-categories) the tables presented in this Bulletin have been shortened by grouping categories which are not important as causes of death. This grouping has been arranged so as to preserve comparability with past statistics as much as possible and to permit re-grouping into the Intermediate List of 150 Causes.

No change has been made in Section VI., External Territories.

The Section "Rates and Percentages" has been discontinued and the information formerly found in this Section is now included in appropriate tables in the Sections relating to marriages, births and deaths.

For convenience in presentation and economy of space the Statistical Summary in Section VII. has been restricted to the 72 years, 1881 to 1952. Similar statistics for each year from 1860 to 1880 will be found in *Demography Bulletin* No. 67, 1950. In this Bulletin a table has been included showing the number of marriages in each year from 1891 to 1952.

The graphs have been continued and appear at the back of this Bulletin.

Thanks are expressed to the various State Statisticians, State Government Departments responsible for the registration of births, deaths and marriages and to the Department of Territories for the valuable assistance rendered by them in furnishing the data for the compilation of the vital statistics. For the work done in the preparation of this Bulletin special thanks are due to Mr. W. J. Willcocks, Supervisor of the Demography Branch, and the staff under his control.

Acting Commonwealth Statistician.

(a) For total increase recorded for each year commencing with 1881, see Section VII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For period September, 1939, to June, 1947, troop movements have been excluded and deaths of Australian defence personnel, whether in Australia or overseas, included. (e) Total increase for each year on the basis of the revised populations referred to in notes to Tables Nos. 4 and 5 is as follows:—1947, males 895, females 307, per ons 1,202; 1948, males 1,229, females 495, persons 1,724; 1949, males 1,634, females 1,167, persons 2,801; 1950, males 472, females 1,044, persons 1,516; and 1951, males 893, females 514, persons 1,407. Annual Average on the revised basis for 1941-1950, Males 619, Females 428, Persons 947.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables Nos. 9, 10 and 11 (natural increase, net migration and deaths of Australian defence personnel respectively) represent unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures. See Table No. 12 for summary.

Minus sign (-) denotes decrease.

NOTE.—The Metropolitan Divisions relate to the capital cities of the States and adjoining urban municipal areas within boundaries used for Census purposes.
 The Urban Provincial Divisions comprise the capital cities of the Territories and, in States other than Tasmania, cities and towns outside the Metropolitan Divisions which are separately incorporated. In Tasmania, where most of the towns are not separately incorporated, boundaries were determined for Census purposes.
 Rural Divisions comprise the remaining portion of each State and Territory.

(a) Deaths of defence personnel which were registered in civil registers in the years 1940 and 1941 and included in the figures of civilian deaths for those years have been deducted. (b) Excludes troop movements. Interstate migration has also been excluded for the period July, 1943, to June, 1947. (c) Unrecorded movement of population disclosed by the Census of 30th June, 1947. This item is believed to represent largely unrecorded migration but, in view of the abnormal period covered and omissions in other records, the discrepancy has not been apportioned between the various elements of population increase.

(a) Based on adjusted age distribution for the Census of 30th June, 1947, and on births, recorded ages at death, and ages of migrants, from 1st July, 1947, to 30th June, 1952.

SECTION II.—MIGRATION.

NOTE.—(1) With the exception of Table No. 24, this section relates to overseas migration (i.e., arrivals from and departures to places outside Australia) by sea and air. Prior to 1st July, 1922, crew members as well as passengers were included in the statistics but since that date the figures relate to passengers only.

(2) Troop movements were excluded from overseas migration statistics for the period September, 1939, to June, 1947. Australian troops have since been included, and are shown in the temporary migration figures irrespective of the length of their stay overseas.

(3) "Permanent movement" refers to persons intending residence for one year or longer, in Australia in the case of arrivals and abroad in the case of departures, irrespective of the stated intention of the passenger as to permanency. "Temporary movement" refers to persons intending, or returning from, residence for shorter periods.

(4) "Country of last permanent residence" means the country in which the passenger was last resident for one year or longer. "Country of intended future permanent residence" means the country in which the passenger intends to reside for one year or longer.

(a) Excess of permanent arrivals over permanent departures. (b) Excess of total arrivals over total departures. (c) "Irish" nationality is included with "British" nationality for the purpose of this table. (d) Included in "Other".
 (e) Includes "Stateless" who were formerly Polish. (f) Includes "Stateless" who were formerly Russian. (g) Stateless, with former nationality stated but other than Polish or Russian.

NOTE.—(1) Minus sign (-) denotes excess of departures over arrivals. (2) The particulars shown are not comparable with those published in Bulletins prior to No. 64 under the heading of "Nationality or Race". Since 1st July, 1948, these statistics have been based on nationality as shown on the passenger's passport. Prior to that date nationality on this basis is available only for "British" and total "Alien" nationalities.

(a) Assisted migration was discontinued during the 1939-45 War and was not recommenced until 31st March, 1947. (b) Not available.

NOTE.—Under the migration schemes in operation up to 1940 it was possible to show the number of migrants according to their State or Territory of destination with reasonable accuracy. Such statistics are shown in Table No. 37a. Under the various migration schemes which came into operation in 1947 and subsequent years it is not possible to show, from information obtained at time of disembarkation, the number of migrants destined for the various States and Territories because of the practice of accommodating certain categories of migrants in Immigrant Reception and Holding Camps and subsequently allocating them to another State or Territory. Therefore these statistics for the years 1947 to 1952 have been confined to the Australian total as shown in Table No. 37b.

NOTE.—(1) In the cases of multiple births included above the following stillbirths were recorded:—Twins, Nuptial—New South Wales, 42; Victoria, 26; Queensland, 16; South Australia, 4; Western Australia, 10; Tasmania, 7; Australia, 105. Twins, Ex-nuptial—New South Wales, 4; Victoria, 1; Queensland, 1; Western Australia, 1; Australia, 7. Triplets, Nuptial—New South Wales, 4; South Australia, 2; Australia, 6.

(2) In Victoria, Queensland and Tasmania the registration of stillbirths is not compulsory and it is possible that in some cases where one child of twins is stillborn the liveborn child is registered as a single birth and that similar variations are made in the case of triplets, etc., not all liveborn. This is actually the practice in South Australia even though stillbirths are registered.

(a) Number of live births per 1,000 of mean population. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911.

NOTE.—(1) For crude birth-rates recorded for each year commencing with 1881 see Section VII.—Statistical Summary.
 (2) The birth-rates in the table above are based on live births registered in the respective States and Territories. Some years ago a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border, but with improved hospital facilities in the Territory the movement to outside hospitals rapidly diminished and has been reversed since 1939. The following rates, based on births in respect of which the mother's usual residence is the Australian Capital Territory, are a truer measure of crude birth-rates in the Australian Capital Territory:—

Average Annual Rates.		Annual Rates.	
1926-30 ..	22.45	1948 ..	25.90
1931-35 ..	19.53	1949 ..	27.28
1936-40 ..	19.29	1950 ..	29.63
1941-45 ..	23.06	1951 ..	28.82
1946-50 ..	27.10	1952 ..	30.60

The variations similarly caused in the birth-rates for the States and the Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1952:—New South Wales, 21.90; Victoria, 23.08; Queensland, 25.15; South Australia, 24.13; Western Australia, 25.64; Tasmania, 26.06; and Northern Territory, 27.82.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (c) The "net" reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based.

NOTE.—The numbers of females of child-bearing age on which the rates above are based for the years 1941 to 1946 have not been adjusted in accordance with the results of the Census of 30th June, 1947.

DEATHS.

NOTE:—Causes of death are classified and coded according to the full range of three-digit categories (detailed list) of the International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth Revision of the International List) with certain additional fourth-digit categories, but for presentation in this table and following tables some detailed categories have been grouped and some omitted. Summary groups corresponding to those of the International Classification are shown in italics.

NEW GUINEA.

(TRUST TERRITORY.)

NOTE.—Because of the outbreak of hostilities in the Pacific during the 1939-45 War civil administration in New Guinea was suspended on 11th February, 1942. Part of the Territory was returned to civil administration on 30th October, 1945, and, as circumstances permitted, civil control was extended until the whole of the Territory came under control of civil authorities on 24th June, 1946. Registration of births, deaths and marriages was resumed in 1946 and since then there have been many delayed registrations of vital events which occurred during the period of suspension; also, owing to geographic conditions there is some delay at any time. For these reasons the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

(a) For years prior to 1881 see Demography Bulletin No. 67, 1949. (b) Northern Territory figures included with South Australia prior to 1900. (c) Part of New South Wales prior to 1st January, 1911. The estimated male population on 31st December, 1910, was 969. (d) Population increased by 156 males owing to transfer of Jervis Bay area to Australian Capital Territory. (e) Revised estimates based on the results of the Census of Canberra on 14-16th September, 1951, are as follows:—1947, 9,714; 1948, 10,943; 1949, 12,577; and 1950, 13,049.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. Figures from 1939 to 1946 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas. The estimated populations from 31st December, 1947 onwards include Australian defence personnel in Australia according to their actual location and are exclusive of members of the Forces overseas.

(a) For the purposes of this table the figures for the Censuses of 1911 to 1947 have been adjusted to conform as nearly as possible to the areas embraced by the boundaries existing at 31st December, 1952. Figures adjusted for this purpose are shown in italics. (b) Population within boundaries used for Census purposes. Area was re-defined in 1929 and again for the 1947 Census at which a population of 30,470 was recorded for the area which was not embraced by the 1933 boundaries. Adjustment of figures for the Censuses of 1911 to 1933 to present boundaries is not possible. (c) Includes Fremantle and suburbs. (d) As at 30th June. (e) Launceston only. (f) Comprises municipalities of Geelong, Geelong West and Newtown and Chliff. (g) Comprises municipalities of Ballarat and Sebastopol, and for 1911 and 1921 the municipality of Ballarat East. (h) Area enlarged since 1947 Census but adjustment of figures for the Censuses of 1911 to 1933 to present boundaries is not possible. (i) Comprises the municipalities of Bendigo and Eaglehawk. (j) Not available.

(a) For years prior to 1881 see Demography Bulletin No. 67, 1949. (b) Northern Territory figures included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) See note (d) to Table No. 148c. (e) For the period September, 1939, to June, 1947, troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included. (f) The 1951 figure includes an adjustment for unrecorded net inward movement by road retrospective to 1st July, 1947. For revised total increase for each year see note (e) to Table No. 8.

NOTE.—Minus sign (-) denotes decrease of population.

Differences between the figures above and totals of figures for elements of increase shown separately in the following two tables (natural increase and net migration) represent, after taking into account deaths of defence personnel, unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the final results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy, which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures.

(a) Rate represents percentage growth for each year, based on the population at the previous 31st December. See NOTE to Table No. 148a. For years prior to 1881 see Demography Bulletin No. 67, 1949. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Population increased by 156 males and 126 females by transfer of Jervis Bay to Australian Capital Territory. (e) For the period September, 1939, to June, 1947, troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included. (f) Based on revised total increase for each year shown in note (e) to Table No. 8.

NOTE.—Minus sign (-) denotes rate of decrease.

(a) Number of deaths under one year of age per 1,000 live births registered. For years prior to 1881 see Demography Bulletin No. 67, 1949.
 (b) Northern Territory figures included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911.

SECTION VIII.—AUSTRALIAN LIFE TABLES.

A^{M47}

No. 168.—Australian Male Lives, 1946 to 1948—Elementary Values.

A^{M47}

l_x = Number Surviving at each Age out of 100,000 Born.

d_x = Number Dying in each Year of Age out of 100,000 Born.

p_x = Probability of Surviving One Year at each Age.

q_x = Probability of Dying within One Year at each Age.

μ_x = Force of Mortality at each Age.

e_x = Complete Expectation of Life at each Age.

No. 169. Australian Female Lives, 1946 to 1948 -Elementary Values.

A F47

- l_x = Number Surviving at each Age out of 100,000 Born.
- d_x = Number Dying in each Year of Age out of 100,000 Born.
- p_x = Probability of Surviving One Year at each Age.
- q_x = Probability of Dying within One Year at each Age.
- μ_x = Force of Mortality at each Age.
- e_x = Complete Expectation of Life at each Age.
