## MAIN FEATURES

### MEDIAN AGES

Preliminary estimates of the Australian population by sex and age as at 30 June 1995 show that the population is continuing to age. The median age, the age at which half the population is older and half is younger, was 33.7 years as at 30 June 1995, an increase of 5.6 years in the last 20 years, 2.9 years in the last 10 years and 0.3 years since 30 June 1994.

States/Territories At 30 June 1995, the Northern Territory was the only State or Territory with a median age less than 30 years (28.3 years). South Australia had the highest median age (35.1 years) followed by New South Wales (34.1 years), Tasmania (34.1 years), Victoria (33.9 years), Queensland (33.0 years), Western Australia (32.9 years) and the Australian Capital Territory (30.7 years).

#### MEDIAN AGE: STATES, TERRITORIES AND AUSTRALIA

### POPULATION GROWTH

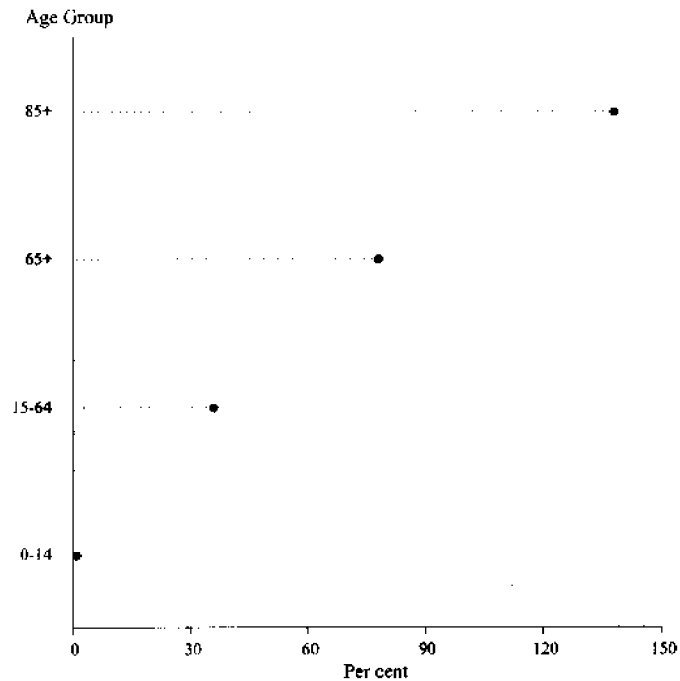

Since 30 June 1975 there has been no significant growth (1%) in the numbers of children (aged less than 15 years) in the population, whereas the number of persons aged 15 to 64 years has increased by 36% and the number of persons aged 65 years and over has increased by 78%.

### OLDER AGE GROUPS

Declining mortality and the resulting increase in life expectancy is continuing to have a major impact on the older age groups. There are now 190,000 persons aged 85 years and over in the population compared with 79,900 twenty years ago, an increase of 138%. There are more than twice as many females as males in this age group (133,300 compared with 56,700). During the year ended 30 June 1995, it is

estimated that this age group increased by 10,100 persons (6%), well above the 1.2% growth rate for the Australian population as a whole.

PERCENTAGE INCREASE IN POPULATION: SELECTED AGE GROUPS, AUSTRALIA  
30 JUNE 1975 TO 1995

The number of persons aged 65 years and over in Australia increased by 2.2% in the twelve months to 30 June 1995. The Northern Territory (6.6%), the Australian Capital Territory (3.6%), Queensland (3.3%) and Western Australia (3.1%) showed increases above the Australian average for this age group, whereas New South Wales (1.9%), Victoria (1.8%), South Australia (1.7%) and Tasmania (1.2%) recorded increases below the national average.

CHILDREN

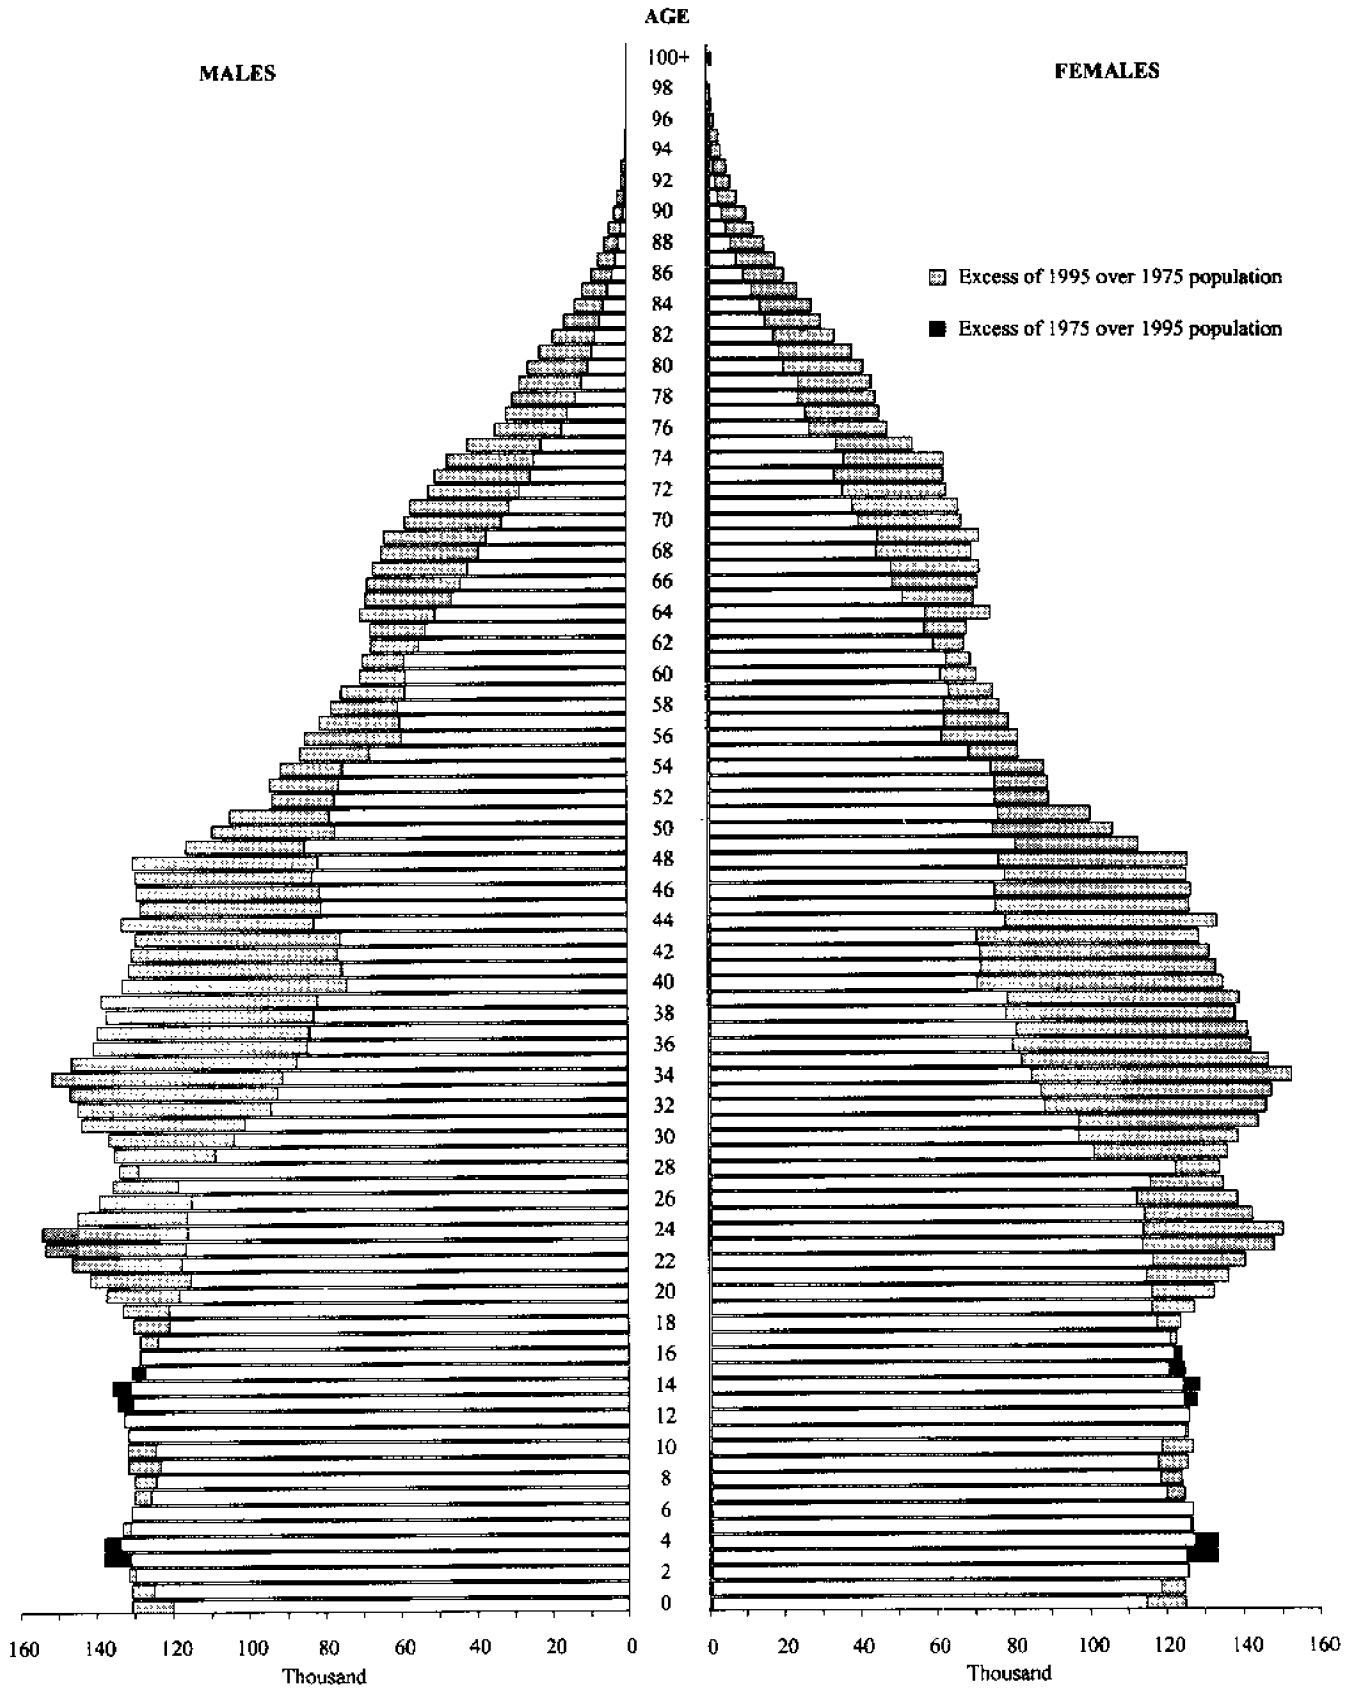

In the 12 months to 30 June 1995, the number of children (0-14 years) in Australia increased by 0.7%. However, in Queensland this age group experienced a significantly higher growth rate (1.8%), followed by the Northern Territory (1.1%) and Western Australia (0.9%). The number of children increased by 0.7% in New South Wales, 0.1% in Victoria and 0.02% in South Australia, while Tasmania and the Australian Capital Territory experienced declines of 0.5%.

15 TO 64 YEARS  
AGE GROUP

Nationally, the number of persons aged 15 to 64 years grew by 1.2% during the twelve months to 30 June 1995. In this age-group Queensland (2.7%), Western Australia (1.9%), the Northern Territory (1.6%) and the Australian Capital Territory (1.3%) all experienced growth rates above the national average, whereas New South Wales (1.1%), Victoria (0.5%), South Australia (0.1%) and Tasmania (0.1%) increased by less than the national average.

ESTIMATED RESIDENT POPULATION OF AUSTRALIA, 30 JUNE 1975 AND 1995 (PRELIMINARY)

## EXPLANATORY NOTES

### INTRODUCTION

**1** This publication contains final estimates of the resident populations by sex and age, of the States and Territories of Australia, as at 30 June 1994 and preliminary estimates as at 30 June 1995. Mean ages, median ages, sex ratios and dependency ratios for the States, Territories and Australia are also included. For all data prior to June 1994, Jervis Bay Territory is included in estimates for the Australian Capital Territory.

**2** Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and the Cocos (Keeling) Islands as part of geographic Australia, population estimates commencing with 30 September 1993 include estimates for these two territories. To reflect this change, another category of the State/Territory level has been created, known as Other Territories. Other Territories include Jervis Bay Territory as well as Christmas Island and the Cocos (Keeling) Islands. Data for Other Territories are included in the Australian totals.

### RESIDENT POPULATION ESTIMATES SERIES

**3** Australia's population statistics (for the period from 1971) are compiled according to the place of usual residence of the population.

**4** An explanation of the conceptual basis for population estimates is given in *Population Estimates: Concepts, Sources and Methods* (3228.0), issued on 23 June 1995.

### METHOD OF ESTIMATION

**5** The estimates by age of the population of Australia and the States and Territories at the date of the Census are derived from the Census Counts, Place of Usual Residence, by adjusting for underenumeration and adding the number of Australian residents estimated to have been temporarily overseas at the time of the census.

**6** Post-censal age distributions are obtained by advancing the estimates to the next age, subtracting deaths and adding births and net estimated interstate and overseas migration. After each census estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase at each age agrees with the difference between the estimated resident populations at the two respective census dates.

**7** Estimates of overseas migration are based on net permanent and long-term overseas movements as recorded on passenger cards completed by incoming and outgoing travellers, for the Department of Immigration and Ethnic Affairs. Short-term movements are excluded but an adjustment for the net effect of *category jumping* has been included since July 1976. This adjustment is necessary because net permanent and long-term migration figures can be affected by changes in travel intentions, as when an Australian resident departing for a short-term visit overseas (stating that he/she intends to stay abroad for less than 12 months) in fact stays 12 months or more, thereby changing his/her travel category from short-term to long-term. An ABS technical paper, *Estimates*

*of Residents Temporarily Overseas, Visitors in Australia and Category Jumping* (3104.0), was published on 10 March 1983.

**8** Information about internal migration is available from population censuses and from a sample survey of internal movements conducted annually. These sources, however, do not provide the up-to-date estimates of interstate migration required for updating post-censal population estimates. The only suitable sources for this purpose are administrative records:

- Prior to June 1986, estimates were derived from records of interstate changes of addresses advised to the Department of Social Security by Family Allowance recipients.
- Because of difficulties in obtaining adequate coverage of all movements from Family Allowance transfers, estimates of interstate migration since June 1986 have been derived from unidentified information on interstate changes of addresses advised to the Health Insurance Commission in the process of administering Medicare. Only Medicare transfers aged 0-14 are used, as most other ages suffer from under-registration of transfers of varying amounts. These are expanded using adult to child expansion ratios based on information from the latest available Census for each interstate flow. An allowance is made for underenumeration of interstate movers in the Census, and for the ageing of the population (which has resulted in increasing adult to child ratios for interstate movers between recent censuses).

#### DEFINITIONS

**9** *Sex ratio.* Male population per 100 female population.

**10** *Median age.* The age at which half the population is older and half is younger.

**11** *Mean age.* The average age of the population.

**12** *Dependency ratio.* The ratio of the dependent population (aged 0-14 and 65 and over) per 100 persons of working ages (15-64 years), as defined by the United Nations.

#### ACCURACY/RELIABILITY

**13** It should be noted that while ABS seeks to produce the most accurate estimates of the population possible, the accuracy of the estimates depends on the quality of the source data used. The major sources of potential error are considered to be the census date estimates compiled from the five yearly Census of Population and Housing and estimates of interstate migration based on medicare transfer data.

**14** Single year age estimates are not shown for persons aged 85 years or older. The reliability of age estimates decreases as older ages are reached. However, estimates for each age up to 99 have been calculated and are available on request.

#### RELATED PUBLICATIONS

**15** Four previous issues of this series containing consolidated data were issued on 23 August 1982 (containing estimates for the years 1971 to

1976); 22 July 1983 (containing estimates for the years 1977 to 1982); 8 December 1987 (containing estimates for the years 1981 to 1987); and 21 July 1993 (containing estimates for the years 1987 to 1992). Other ABS publications which may be of interest to users of this publication include:

*Australian Demographic Statistics* (3101.0)

*Projections of the Populations of Australia, States and Territories, 1993 to 2041* (3222.0)

*Births, Australia* (3301.0)

*Deaths, Australia* (3302.0)

*Overseas Arrivals and Departures, Australia* (3404.0)

*Migration, Australia* (3412.0)

*Marriages and Divorces, Australia* (3310.0)

**16** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

## **For more information . . .**

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

### **ABS Products and Services**

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

### **National Dial-a-Statistic Line**

0055 86 400

*Steadycom P/L premium rate 25c/21.4 secs.*

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

### **Internet**

<http://www.statistics.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
