

**ESTIMATED RESIDENT POPULATION IN STATISTICAL LOCAL AREAS, VICTORIA,
30 JUNE, 1992 (PRELIMINARY) AND 1993 (PRELIMINARY)**

MAIN FEATURES

Victoria's population growth The estimated resident population (preliminary) of Victoria at 30 June 1993 was 4,462,060, an increase of 13,240 (0.3 per cent) from 30 June 1992.

MSD population growth The Melbourne Statistical Division (MSD) had an estimated resident population at 30 June 1993 of 3,187,450, an increase of 9,550 (0.3 per cent) from 30 June 1992.

INQUIRIES Inquiries concerning these statistics may be made by telephoning Information Services on Melbourne (03) 615 7000; for advice on the interpretation of these statistics ask for Paul Taylor.

Slowing down of fast growing areas

The rates of growth of the five most rapidly growing municipalities in the MSD have slowed down in the two years 1991-93 compared to the growth rates experienced from 1986-91. Note that Pakenham (S) replaces Hastings (S) as the fifth ranked growth area. The growth rates in four of the five top growth areas have further slowed down in 1992-93 compared to 1991-92.

TABLE 5 CHANGES IN STATISTICAL LOCAL AREA BOUNDARIES, 1 JULY 1991 - 30 JUNE 1993

Statistical local area	Date of effective change	Nature of change	Estimated population change as at 30 June 1993
Bannockburn (S) (Part A)(a)	18 May 1993	Lost 21.2 sq km to Corio (S) Part A	-231
Barrabool (S) (Part A)(a)	18 May 1993	Lost 39.7 sq km to South Barwon (S) Part A	-1,713
Barrabool (S) (Part B)(a)	18 May 1993	Lost 45.1 sq km to South Barwon (S) Part B	-3,447
		Lost 8 sq km to South Barwon (S) Part A	-5
Bright (S)	1 Oct. 1991	Lost 0.585 sq km to Yackandandah (S)	--
Broadford (S)	1 Apr. 1993	Lost 12 sq km to Yea (S)	-82
Brunswick (C)	21 Jan. 1993	Lost 260 sq m to Fitzroy (C)	--
Colac (S)	23 Dec. 1992	Gained 1.5 sq km from Otway (S) and Heytesbury (S)	--
Corio (S) (Part A)(a)	18 May 1993	Gained 21.2 sq km from Bannockburn (S) Part A	+231
Essendon (C)	25 Mar. 1992	Gained 0.68 sq km from Keilor (C)	+2,065
Fitzroy (C)	21 Jan. 1993	Gained 260 sq m from Brunswick (C)	--
Heytesbury (S)	23 Dec. 1992	Gained 0.8 sq km from Colac (S) and Otway (S)	--
Keilor (C)	25 Mar. 1992	Lost 0.68 sq km to Essendon (C)	-2,065
Kyabram (T)	2 Oct. 1991	Gained 5.1 sq km from Rodney (S)	--
Otway (S)	23 Dec. 1992	Lost 2.3 sq km to Colac (S) and Heytesbury (S)	--
Rodney (S)	2 Oct. 1991	Lost 5.1 sq km to Kyabram (T)	--
South Barwon (C) (Part A)(a)	18 May 1993	Gained 39.7 sq km from Barrabool (S) Part A	+1,708
		Gained 8 sq km from Barrabool (S) Part B	+5
South Barwon (C) (Part B)(a)	18 May 1993	Gained 45.1 sq km from Barrabool (S) Part B	+3,452
Wangaratta (C)	1 Apr. 1993	Gained 1.2 sq km from Wangaratta (S)	+9
Wangaratta (S)	1 Apr. 1993	Lost 1.2 sq km to Wangaratta (C)	-9
Yackandandah (S)	1 Oct. 1991	Gained 0.585 sq km from Bright (S)	--
Yea (S)	1 Apr. 1993	Gained 12 sq km from Broadford (S)	+82

(a) Interim SLA adaptation to City of Greater Geelong boundary change (18/5/93) pending final ASGC review.

EXPLANATORY NOTES

Introduction

This publication contains, for each statistical local area (SLA), statistical district, statistical division, and statistical subdivision in Victoria, the estimated resident population at 30 June 1986, 1991, preliminary estimates for 30 June 1992 and preliminary estimates for 30 June 1993, average annual growth rates from 1986 to 1991 and from 1991 to 1993, and growth rates from 1992 to 1993.

2. The population estimates for 30 June 1992 are still preliminary as the state estimates have not yet been finalised.

Methodology

3. The estimated resident population is compiled according to the place of usual residence of the population. An explanation of the conceptual basis is given in the ABS Information Paper entitled *Population Estimates: An Outline of the New Conceptual Basis of ABS Population Estimates* (3216.0).

4. The estimated resident population as at 30 June for 1986 and 1991 for each SLA has been calculated by adjusting usual residence census counts for under-enumeration and adding the number of residents temporarily overseas at Census date.

5. For intercensal years, the estimated resident population for each SLA (at 30 June) is calculated using a linear regression model. The model establishes a mathematical relationship between changes in population and changes in other variables, known as predictor variables, over the period between the two most recent censuses for which the required data are available, i.e. 1986 to 1991. This relationship is then used to estimate the change in population of each statistical local area since the date of the last census, based on the change in the predictor variables since that date. The predictor variables used are occupied dwellings, births, deaths, medicare enrolments and school enrolments. A more detailed explanation of the methodology used is given in the ABS *Information Paper: Local Government Area Population Estimates, Victoria* (3205.2).

6. Other indicators of resident population movement have also been used to supplement the estimates from the regression model when preparing the published estimates. These include the numbers of persons resident in prisons.

Australian Standard Geographical Classification

7. The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification (ASGC) Edition 2.1* (1216.0). Readers are urged to familiarize themselves with this publication for a full description of the boundary changes.

Changes to Statistical Boundaries

8. The boundaries of SLAs used in determining the population are those in existence at 30 June 1993. The population estimate for previous years have been adjusted where appropriate so that they reflect the population changes for each area had the June 1993 boundaries existed then.

9. A list of boundary changes in SLAs which occurred between 1 July 1991 and 30 June 1993 are shown in Table 5 on page 14.

10. The Victorian Government proclaimed a City of Greater Geelong on 18 May 1993, which amalgamated Geelong (C), Geelong West (C), Corio (S), South Barwon (C), Newtown (C) and Bellarine (RC). It is understood that amalgamated councils will eventually be abolished, and a new Greater Geelong council established. This affected 8 LGAs and 11 SLAs. Pending final ASGC adaptation to the City of Greater Geelong boundary amalgamation, the following interim SLA changes were used to accommodate LGA splitting of Barrabool (S) and Bannockburn (S):

all of Bannockburn (S) Part A to Corio (S) Part A;
all of Barrabool (S) Part A to South Barwon (C) Part A;
part of Barrabool (S) Part B to South Barwon (C) Parts A and B.

Consequently, Barrabool (S) Part B and Bannockburn (S) Part B have been renamed Barrabool (S) and Bannockburn (S) respectively while awaiting ASGC review of the new City of Greater Geelong boundaries.

Usual residence not stated

11. In the 1991 Population Census the SLA of usual residence was not stated for 70,000 persons in Victoria. For purposes of the estimated resident population for 1991, these were distributed proportionable to all SLAs in the state.

In the 1986 and previous censuses, they had been allocated to the SLA in which they spent census night.

The effect on SLAs of the new allocation method was significant in the Cities of Melbourne, St Kilda and Prahran, but was negligible or minor elsewhere.

In order to preserve comparability with 1986 data, estimates for that year have been re-worked according to the new allocation method.

Rounding of figures

12. Population estimates in this publication have been rounded to the nearest fifty persons in the Melbourne Statistical Division. For the remainder of Victoria, individual statistical local areas and subdivision totals have been rounded to the nearest

ten persons. This level of rounding has been chosen because more severe rounding could result in substantial year to year fluctuations in the estimates for some SLAs, due to the rounding process rather than an actual population change. It should not be implied that the estimates are accurate to the degree shown.

13 Where figures have been rounded, discrepancies may occur between sums of component items and totals.

Average annual growth rate

14. The average annual rates of population growth from 1986 to 1991 in this publication have been calculated by the following formula and then expressed as a percentage :

$$r = (P_{91} / P_{86})^{1/5} - 1$$

where "P₉₁" and "P₈₆" are the estimated resident population for 1991 and 1986 respectively and "r" represents a compound interest annual rate of growth throughout the period. This reflects an average rate between 1986 and 1991 and not between the individual intercedes years. A similar formula was used for calculating the annual average growth rate between 1991 and 1993.

Area Data

15. The area data given in tables 1 and 2 emanates from the ABS Digital Collection District (CD) Master File which is referenced to Census 91.

Data on floppy disk

16. The data in this publication is also available on floppy disk (catalogue no. 3209.2) priced at \$65.

Age and sex data by SLA

17. Estimated resident population classified by age and sex by statistical area for 30 June 1986, 1987, 1988, 1989, 1990 and 1991 are available on floppy disk. (Catalogue No. 3208.2) Order forms can be obtained from the Victorian Office by contacting the Bookshop on (03) 615 7000. Data for each of 1988, 1989, 1990 and 1991 are also available in a hard copy publication (catalogue no. 3207.2), for 1991 the price being \$25. Estimated resident population by age and sex for 1992 will be released within the next eight weeks.

Related publications

18. Other ABS publications which may be of interest to users of this publication are:

Australian Demographic Statistics (quarterly) (3101.0) (\$10.00)

Estimated Resident Population by Sex and Age: States and Territories of Australia (3201.0) (\$10.00)

Victoria's Statistical Geography (1103.2)(\$25)

Estimated Resident Population in Statistical Local Areas, Revised intercedes Estimates, Victoria, 1986-1991 (3202.2)(\$25)

Estimated Resident Population by Age and Sex in Statistical Local Areas Victoria 30 June 1991 (3207.2) (\$25.00)

Current publications produced by the ABS are listed in the *Catalogue of Publications* (1101.0) which is available from any ABS office.

Symbols and other usages

--	nil or negligible
p	preliminary
r	figure or series revised since previous issue
n.a.	not applicable
n.y.a.	not yet available
sq km	square kilometres
sq m	square metres

The designation of City (C), Town (T), Borough (B), Rural City (RC) or Shire (S) shown against the name of each statistical local area indicates its status at 30 June 1993.

Electronic services

DISCOVERY Key *656# for selected current economic, social and demographic statistics.

AUSSTATS Thousands of up-to-date time series are available on this ABS on-line service through PAXUS COMNET.

For further information phone the AUSSTATS help desk on (06) 252-6017.

TELESTATS This service provides foreign trade statistics tailored to user's requirements.

Further information is available on (06) 252-5408.

INTEGRATED REGIONAL DATA BASE This Windows-based product from the ABS contains 2,800 small area data items. It is easy to use and can produce tables quickly. It can export data into spreadsheets, word processors, and mapping packages. For more information call (06) 252 7363.
