EXPLANATORY NOTES

Introduction

1. This publication contains estimated resident population by age and sex of Statistical Local Areas (SLAs) and broader Statistical Areas of Victoria at 30 June 1992. Estimates in this form were first published for 30 June 1988.

2. The estimated resident population is compiled according to the place of usual residence of the population.

Methodology

3. The total population of each SLA is based on results of the 1991 population census and calculated for intercensal years by a linear regression model. The model uses independent indicators of population change such as occupied dwellings, medicare enrolments, births, deaths and school enrolments.

4. The age and sex estimates were obtained using the demographic cohort component method. Estimates for 1992 were updated from 1991 using SLA population estimates by age and sex at 30 June 1991, recorded births and deaths during the year 1991-92 and the total population estimates at 30 June 1992. The total population growth for an SLA during 1991-92 was split into natural increase and net migration components, the latter being the difference between total growth and natural increase during 1991-92. Age-sex estimates of natural increase were obtained from vital registrations (i.e. births and deaths), and those for net migration were derived as follows:

(i) the net migration component was subdivided into internal arrivals and departures and overseas arrivals and departures, and proportionate age-sex distributions were allocated to each of these subdivisions for each SLA;

(ii) SLA specific migration profiles (the proportionate age-sex distributions) for inter-SLA arrival, inter-SLA departure and overseas arrival to each SLA were obtained from the 1986 Census data on usual residence one year prior to the census date; and

(iii) age-sex migration profiles for overseas departures were based on an average of overseas departures from the State/Territory which incorporated the SLA during the period January 1985 to December 1987 as obtained from passenger cards.

Reliability

5. Estimates for each age and sex category are shown to the nearest unit without rounding; **accuracy to this level is not claimed and should not be assumed.** Estimates in catalogue 3203.2 are published to the nearest fifty persons in the Melbourne Statistical Division, and the nearest ten persons in the rest of Victoria. Rounding is not done in this publication

however because rounding of small cells could result in substantial year to year fluctuations owing to the rounding process rather than the actual population change.

Australian Standard Geographical Classification

6. The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification (ASGC) Edition 2.1* (1216.0). Readers are urged to familiarize themselves with this publication for a full description of the boundary changes.

Changes to Statistical Boundaries

7. The boundaries of SLAs used in determining the population are those in existence at 30 June 1993. The population estimate for previous years have been adjusted where appropriate so that they reflect the population changes for each area had the June 1993 boundaries existed then.

8. A list of boundary changes in SLAs which occurred between 1 July 1991 and 30 June 1993 are shown in Table 2 on page 53.

9. The Victorian Government proclaimed a City of Greater Geelong on 18 May 1993, which amalgamated Geelong (C), Geelong West (C), Corio (S), South Barwon (C), Newtown (C) and Bellarine (RC). It is understood that amalgamated councils will eventually be abolished, and a new Greater Geelong council established. This affected 8 LGAs and 11 SLAs. Pending final ASGC adaptation to the City of Greater Geelong boundary amalgamation, the following interim SLA changes were used to accommodate LGA splitting of Barrabool (S) and Bannockburn (S):

all of Bannockburn (S) Part A to Corio (S) Part A;
all of Barrabool (S) Part A to South Barwon (C) Part A; and
part of Barrabool (S) Part B to South Barwon (C) Parts A and B.

Consequently, Barrabool (S) Part B and Bannockburn (S) Part B have been renamed Barrabool (S) and Bannockburn (S) respectively while awaiting ASGC review of the new City of Greater Geelong boundaries.

Data on Floppy Disk

10. Estimated resident population classified by age and sex for 30 June 1986, 1987, 1988, 1989, 1990, and 1991 is available on floppy disk - a separate disk for each year and priced at \$100 each. Order forms can be obtained from the Victorian Office by contacting the ABS Bookshop on (03) 615 7000 or fax (03) 615 7798.

Population Projection

11. The ABS compiles and publishes population projections for Australia, States and Territories (3222.0).

12. The ABS as part of its Statistical Consultancy Service can prepare ad hoc population projections at the SLA or higher level. The projections are based on the latest published Estimated Resident Population by age and sex. Clients can supply their own assumptions of migration, fertility and mortality or approve the use of ABS derived assumptions.

13. For further details regarding the population projections service contact the ABS Demographic Analysis Unit on (03) 615 7990.

The designation of City (C), Town (T), Borough (B), Rural City (RC) or Shire (S) shown against the name of each statistical local area indicates its status at 30 June 1993.

ELECTRONIC SERVICES

DISCOVERY The ABS intends discontinuing its statistical information service on DISCOVERY. Please contact Peter Davidson on (06) 252 6684 to discuss possible alternatives for acquiring statistics or if you wish to comment on this proposal.

AUSSTATS Thousands of up-to-date time series are available on this ABS on-line service through PAXUS COMNET.

For further information phone the AUSSTATS help desk on (06) 252 6017.

TELESTATS This service provides foreign trade statistics tailored to user's requirements.

Further information is available on (06) 252 5408.

INTEGRATED REGIONAL DATA BASE This Windows-based product from the ABS contains 2,800 small area data items. It is easy to use and can produce tables quickly. It can export data into spreadsheets, word processors, and mapping packages. For more information call (06) 252 7363.
