

SUMMARY OF VITAL AND POPULATION STATISTICS
JUNE QUARTER 1971

Reference No. 4.11

CONTENTS

<u>Table</u>		<u>Page</u>
..	Explanatory notes	2
1.	Summary : Vital and population statistics, Australia, 1966 to 1971	3
2.	Population : Males, Females and Persons, States and Territories, 1966 to 1971	4
3.	Mean Population : States and Territories, years ended December and June, 1966 to 1971	5
4.	Rate of population growth : Australia, 1966 to 1971	6
5.	Rate of population growth : States and Territories, 1966 to 1971	6
6.	Marriages : States and Territories, 1966 to 1971	7
7.	Births : States and Territories, 1966 to 1971	8
8.	Deaths : States and Territories, 1966 to 1971	9
9.	Infant deaths : States and Territories, 1966 to 1971	10

EXPLANATORY NOTES

1. The estimated population for Australia as a whole takes account of natural increase and net overseas migration since the latest Census.
2. The estimate for each State or Territory represents the population ascertained at the Census plus recorded natural increase and net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of State of residence under child endowment procedures or Commonwealth electoral procedures or are indicated by the results of any special count. As records of migration by State or Territory are not complete the estimated State and Territory populations so derived are approximate and are subject to revision when the population of each State is ascertained at the next Census. The preliminary results of the Census of 30 June 1971 have been taken into account in the population estimates. The estimates are subject to further revision when further results from the Census become available.
3. Since June 1961 holiday, business and other similar short-term movements between States and Territories have not been taken into account in the calculations. Such movements affect the estimates only in so far as people who were on holiday or other short-term travel interstate at the time of the Census are counted in the population of the State or Territory where they spent Census night. However, there are seasonal features in the movement of the populations of States and Territories due to movements of visitors from overseas and of Australians travelling overseas for holiday, business or other similar short-term periods.
4. Crude birth, death and marriage rates have been revised as a consequence of the revision of population estimates for dates subsequent to 30 June 1966. In addition vital statistics for 1966 have been revised to include particulars of full-blood Aborigines. Differences between the statistics now published and those formerly published, which excluded Aboriginal vital events, cannot be taken as reliable statistics of births, deaths or marriages among full-blood Aborigines, because in many areas no satisfactory administrative or other basis existed for distinguishing vital events among full-blood Aborigines from those among part-Aborigines or the rest of the population.

- NOTE.
- (i) A line drawn across a column indicates a break in continuity in the series.
 - (ii) Any discrepancies between totals and sums of components in Tables 1-3 are due to rounding.

(a) Excess of births registered over deaths registered. (b) Excess of recorded overseas arrivals over recorded overseas departures. (c) Increase consists of natural increase, net overseas migration gain, and an adjustment to make the series of increases agree with the total intercensal increase revealed by the latest census. The adjustment reflects the combined net error in the census and in the recording of births, deaths and migration during the five year period. (d) Population at Census date (preliminary figure).

NOTE. Minus sign (-) denotes excess of departures over arrivals.

NOTE. Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods. The mean population for any year has been calculated by the formula :

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where a, b, c, d and e, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g., in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration.

TABLE 4. - RATE OF POPULATION GROWTH (a) : AUSTRALIA, 1966 TO 1971
(Per cent)

Period	Recorded components of increase		Population increase (d)
	Natural increase (b)	Net overseas migration gain (c)	
Year ended 31 Dec. -			
1966	1.04	0.76	1.71
1967	1.08	0.79	1.73
1968	1.10	0.95	1.91
1969	1.18	1.06	2.11
1970	1.17	0.99	2.02
Year ended 30 June -			
1967	1.06	0.75	1.67
1968	1.08	0.79	1.73
1969	1.16	1.05	2.07
1970	1.17	0.92	1.95
1971	1.27	0.81	1.95

(a) The rates represent the increase during the period expressed as a proportion (per cent) of the population at the beginning of the period. (b) Excess of births registered over deaths registered. (c) Excess of recorded overseas arrivals over recorded overseas departures. (d) Increase consists of natural increase, net overseas migration gain, and an adjustment to make the series of increases agree with the total intercensal increase revealed by the latest census.

(a) Rates have been revised following the revision of population estimates for dates subsequent to 30 June 1966.

NOTE. Rates for quarters are calculated by multiplying the number of registrations for the quarter by 4 and dividing by the average of estimated populations at the beginning and end of the quarter (expressed as a rate per 1,000 of the average population). Quarterly rates, especially in deaths and marriages, reflect seasonal influences and all rates may be influenced by varying delay in registration. Also, a variation in rates based on small numbers of events is of less significance than the same variation in rates based on larger numbers.
