Bureau of  
Statistics**

CATALOGUE NO. 5301.0

EMBARGOED UNTIL 11:30 AM 30 September 1996

**BALANCE OF PAYMENTS, AUSTRALIA, AUGUST 1996**

**MAIN FEATURES**

Estimates of the main balance of payments aggregates for August 1996 and the two preceding months are shown below. These estimates are preliminary and subject to revision. Particular care should be taken in interpreting monthly movements, as indicated in the note on page 5 on *Reliability of Contemporary Trend Estimates* and in paragraph 4 of the *Explanatory Notes* on page 13. Certain items have been estimated using extrapolation techniques until source data become available.

	1996			Change on previous month(a)
	June	July	August	
	\$ million	Trend	%	
<b>Balance on current account</b>	-1,493p	-1,404p	-1,312p	7
<b>Balance on current account</b>	<i>-1,164</i>	<i>-1,209</i>	<i>-1,330</i>	<i>-10</i>
Balance on merchandise trade	163	109	195	79
Net services	110	184	7	-96
Net income	-1,559	-1,744	-1,638	6
Net unrequited transfers	122	242	106	-56
<b>Balance on current account</b>	<i>-1,011</i>	<i>-1,845</i>	<i>-1,849</i>	<i>0</i>
Balance on merchandise trade	718	-473	-232	51
Net services	-136	65	-142	..
Net income	-1,569	-1,708	-1,638	4
Net unrequited transfers	-24	271	163	-40

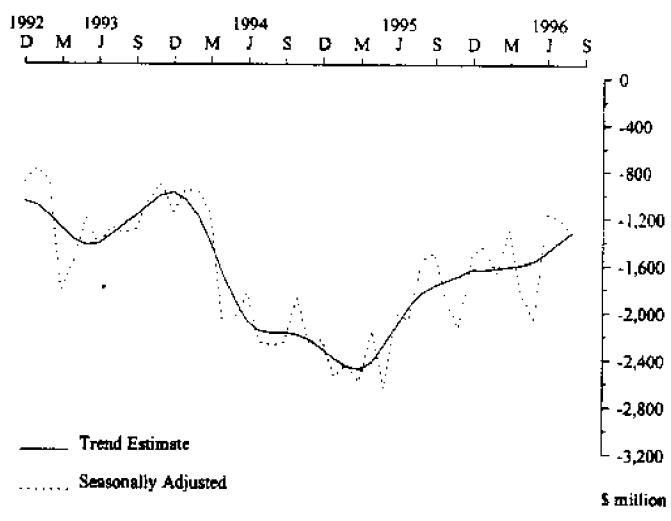

(a) For current account aggregates, a minus sign means an increase in a deficit or a decrease in a surplus; and an absence of sign means a decrease in a deficit or an increase in a surplus.

The provisional trend estimate for the August current account deficit was \$1,312 million, down \$92 million, or 7 per cent, on the provisional trend estimate for July. This trend estimate has been improving since March 1995.

The trend estimate of the balance on goods and services recorded a surplus of \$219 million, up \$76 million, or 53 per cent, on the provisional trend estimate for July. This is the third consecutive surplus in this balance. The merchandise trade balance continued to improve. Merchandise exports rose marginally, while merchandise imports fell 1 per cent.

In seasonally adjusted terms, the current account deficit for August increased \$121 million to \$1,330 million. The increase in the deficit was caused by a decrease of \$177 million in the net services surplus; and a decrease of \$136 million in the net unrequited transfers surplus. These movements were partly offset by an increase of \$86 million in the merchandise trade surplus (merchandise exports rose 2 per cent, while merchandise imports rose 1 per cent); and a decrease of \$106 million in the net income deficit.

**INQUIRIES**

- for further information about these and related unpublished statistics, contact Graeme Groves on Canberra (06) 252 5540 or Wendy Raedt on Canberra (06) 252 6689 or any ABS State office.
- for information about other ABS statistics and services please refer to the back page of this publication.

## ANALYSIS OF SELECTED MAJOR AGGREGATES

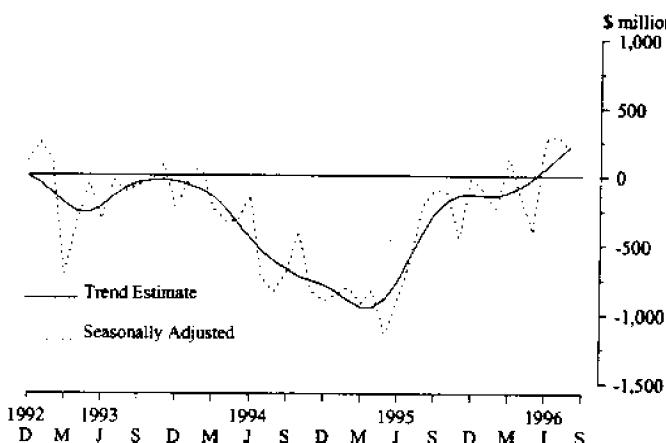

*August 1996 compared with July 1996*

### **Balance on goods and services**

The trend estimate of the *balance on goods and services* recorded a surplus of \$219 million in August, an increase of \$76 million on the surplus recorded in July.

In **seasonally adjusted terms**, this balance recorded a surplus of \$202 million, a decrease of \$91 million on the surplus recorded in July.

**GRAPH 2: BALANCE ON GOODS AND SERVICES**

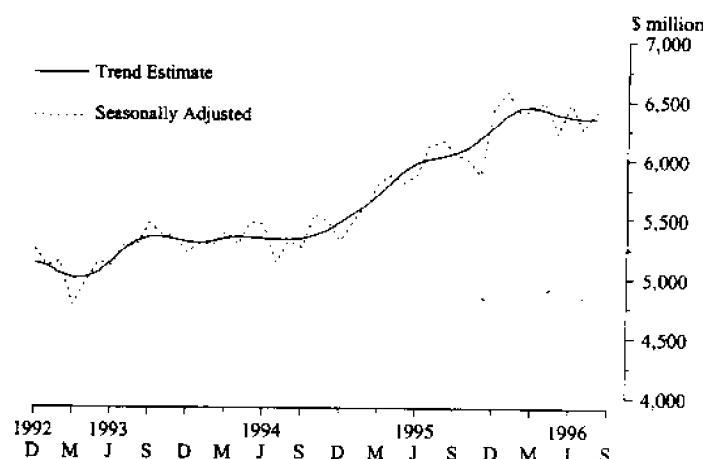

### **Merchandise exports**

The trend estimate of *merchandise exports* rose \$1 million, to \$6,351 million.

In **seasonally adjusted terms**, *exports* rose \$156 million, or 2 per cent, to \$6,410 million. *Rural exports* rose \$149 million, or 8 per cent, to \$1,927 million. *Non-rural exports* rose \$7 million, to \$4,483 million.

**GRAPH 4: MERCHANTISE - EXPORTS FOB**

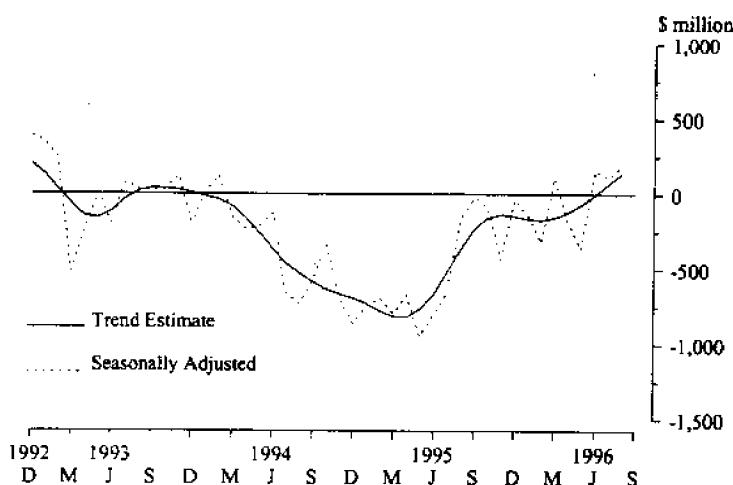

### **Balance on merchandise trade**

The trend estimate of the *balance on merchandise trade* recorded a surplus of \$138 million, an increase of \$70 million on the surplus recorded in July. While the trend estimates for exports have declined or been steady over the past few months, imports has been falling at a greater rate, resulting in the improving trend for the balance on merchandise trade.

In **seasonally adjusted terms**, this balance recorded a surplus of \$195 million, an increase of \$86 million on the surplus recorded in July.

**GRAPH 3: BALANCE ON MERCHANDISE TRADE**

In original terms, *exports* fell \$146 million, or 2 per cent, to \$6,334 million.

*Rural exports*, in original terms, fell \$15 million, or 1 per cent, to \$1,809 million. Decreases were recorded in:

- wool, down \$35 million or 14 per cent (due mainly to decreased volumes of greasy wool exports); and
- meat, down \$14 million or 6 per cent.

The largest increase was recorded in sugar, up \$23 million or 9 per cent.

*Non-rural exports*, in original terms, fell \$131 million, or 3 per cent, to \$4,525 million. The largest decreases were recorded in:

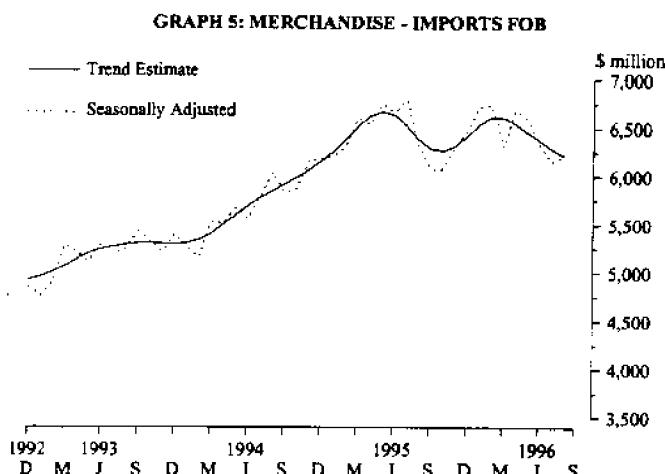

- gold, down \$215 million or 34 per cent (due mainly to decreased volumes of exports);
- "other" mineral fuels, down \$87 million or 20 per cent; and
- transport equipment, down \$27 million or 13 per cent.

The largest increases were recorded in metal ores and minerals, up \$143 million or 21 per cent (due mainly to increased exports of alumina and uranium); "other" manufactures, up \$47 million or 6 per cent; and coal, coke and briquettes, up \$38 million or 6 per cent.

### *Merchandise imports*

The trend estimate of *merchandise imports* fell \$69 million, or 1 per cent, to \$6,213 million.

In **seasonally adjusted terms**, *imports* rose \$70 million, or 1 per cent, to \$6,215 million. *Consumption goods* rose \$133 million, or 8 per cent, to \$1,813 million. *Capital goods* rose \$59 million, or 4 per cent, to \$1,445 million. *Intermediate and other goods* fell \$122 million, or 4 per cent, to \$2,957 million.

In **original terms**, *imports* fell \$387 million, or 6 per cent, to \$6,566 million.

Imports of *consumption goods*, in original terms, fell \$27 million, or 1 per cent, to \$1,910 million. The largest decreases were recorded in:

- consumption goods nes, down \$31 million or 6 per cent;
- toys, books and leisure goods, down \$20 million or 8 per cent; and
- textiles, clothing and footwear, down \$18 million or 6 per cent.

These decreases were partly offset by an increase in non-industrial transport equipment, up \$62 million or 14 per cent (due mainly to increased imports of passenger motor cars).

Imports of *capital goods*, in original terms, fell \$13 million, or 1 per cent, to \$1,556 million. The largest decreases were recorded in:

- ADP equipment, down \$71 million or 21 per cent;
- telecommunications equipment, down \$32 million or 21 per cent; and
- capital goods nes, down \$26 million or 13 per cent.

These decreases were largely offset by an increase in civil aircraft, up \$109 million (which includes the import of a Qantas aircraft valued at \$96 million).

Imports of *intermediate and other goods*, in original terms, fell \$347 million, or 10 per cent, to \$3,100 million. Decreases were recorded in 10 of the 14 groups, with the largest being:

- fuels and lubricants, down \$114 million or 27 per cent;
- parts for transport equipment, down \$73 million or 15 per cent;
- organic and inorganic chemicals, down \$64 million or 24 per cent;
- processed industrial supplies nes, down \$30 million or 4 per cent;
- "other" parts for capital goods, down \$28 million or 5 per cent; and
- parts for ADP equipment, down \$27 million or 17 per cent.

The largest increase was recorded in food and beverages, up \$15 million or 29 per cent.

### *Net services*

The **seasonally adjusted net services** surplus fell \$177 million, or 96 per cent, to \$7 million. Services credits fell \$160 million (8 per cent), while services debits rose \$17 million (1 per cent).

### *Net income*

The **seasonally adjusted net income** deficit fell \$106 million, or 6 per cent, to \$1,638 million. Income credits fell \$16 million or 2 per cent, while income debits fell \$122 million or 5 per cent. It should be noted that, in accordance with established methodology, the monthly estimates of the non-official sector for July and August 1996 are based on extrapolations of quarterly results divided by three. These extrapolations will be replaced by preliminary results from the September quarter 1996 ABS Survey of International Investment when these results become available. Preliminary results should be available in time for incorporation in the October 1996 issue of this publication, scheduled for release on 29 November 1996.

### *Net unrequited transfers*

The **seasonally adjusted net unrequited transfers** surplus fell \$136 million, or 56 per cent, to \$106 million. Unrequited transfers credits fell \$104 million, or 23 per cent, largely reflecting a decrease in migrants' transfers. Unrequited transfers debits rose \$32 million or 16 per cent.

### *Net capital transactions*

In **original terms**, the *net capital transactions of the official sector* recorded a net inflow of \$638 million in August, a turnaround of \$6,282 million on the net outflow recorded in July.

The August estimate consisted of:

- a net outflow of \$1,640 million in general government transactions, an increase of \$768 million on the net outflow recorded in the previous month; and
- a net inflow of \$2,278 million in Reserve Bank transactions, a turnaround of \$7,050 million on the net inflow recorded in the previous month.

The increase in general government transactions was mainly the result of:

- a \$2,124 million turnaround in State government borrowing domiciled abroad, to a net outflow of \$638 million; and
- a \$19 million increase in the net outflow (net repayments) of Commonwealth government borrowing domiciled abroad.

These movements were partly offset by a \$1,405 million decrease in general government borrowing domiciled in Australia, to a net outflow of \$953 million.

Reserve Bank transactions in August reflected net sales of reserve assets of \$2,225 million, a turnaround of \$6,947 million on the net purchases recorded in the previous month. This turnaround mainly reflects a partial unwinding of the increase in reserve assets last month as part of domestic liquidity management arrangements.

#### *Exchange rates*

Using period average exchange rates, the \$A depreciated by 1.2 per cent on a trade weighted basis during August against the currencies of Australia's major trading partners. The \$A depreciated by 2.1 per cent against the Japanese yen and depreciated by 0.8 per cent against the \$US.

#### **REVISIONS**

Revisions since the last issue of this publication have reduced the current account deficits for 1993-94, 1994-95, 1995-96 and July 1996 by \$484 million, \$94 million, \$331 million and \$76 million respectively.

Revisions have been made to *other investment income* credits for the months of the June quarter 1994. ABS Survey of International Investment estimates of dividends receivable on Australian direct investment abroad have been increased by \$484m for that quarter, reflecting previously unidentified dividends accruing to Australian enterprises holding direct investment equity in enterprises abroad. This revision reduces the current account deficit for 1993-94 from \$16,654 million to \$16,170 million.

Investigations are currently underway into the survey measures of income receivable on Australian direct equity investment abroad and further revisions may be necessary to the estimates for 1993-94 and 1994-95.

The main factors contributing to the revisions for 1994-95 and subsequent periods are:

- incorporation of the latest available data on merchandise trade which has affected merchandise exports and imports by a net \$129 million in 1995-96 and \$38 million in July 1996; and
- incorporation of the latest available information from the Survey of International Trade in Services which has affected services credits and debits for 1994-95 by a net \$57 million and for 1995-96 by a net \$215 million; and "other" property income credits by a net \$22 million in 1995-96.

#### **Expected release dates for forthcoming issues**

<b>Issue</b>	<b>Date</b>
September 1996	30 October 1996
October 1996	29 November 1996
November 1996	6 January 1997

These dates can be confirmed a few days prior to release by telephoning  
Canberra (06) 252 6627.

## RELIABILITY OF CONTEMPORARY TREND ESTIMATES

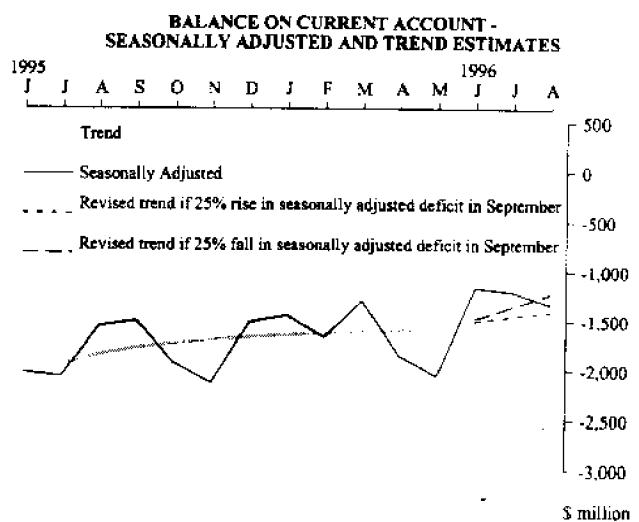

The table below presents trend estimates of the deficit on current account from June 1995 onwards, including provisional trend estimates for the latest three months (June, July and August 1996).

To illustrate the possible impact of future months' observations on the provisional trend estimates for the latest three months, the table also shows the revisions to these trend estimates that would result if the seasonally adjusted estimate of the current account balance next month (September 1996) is 25 per cent higher or lower than this month and if there are no revisions to the current or previous months' estimates. The 25 per cent range has been chosen because in the last decade the average monthly percentage movement, without regard to sign, of the seasonally adjusted current account deficit has been about 25 per cent.

If the seasonally adjusted deficit were to increase in September by 25 per cent, to \$1,663 million, the provisional trend movement for that month would be -0.5 per cent. The movements in the trend estimates for June, July and August which are provisionally -4.6 per cent, -6.0 per cent and -6.6 per cent respectively, would be revised to -3.5 per cent, -3.7 per cent and -2.8 per cent, respectively. On the other hand, a 25 per cent

decline in the seasonally adjusted deficit next month, to \$998 million, would produce a movement of -8.3 per cent in the trend estimate for September, with the movements in the trend estimates for June, July and August being revised to -6.1 per cent, -8.5 per cent and -9.3 per cent, respectively.

The graph below illustrates this potential degree of revision at the current end of the trend series.

## DEFICIT ON CURRENT ACCOUNT — RELIABILITY OF TREND ESTIMATES

(a) The entries carry the opposite sign to corresponding entries in Tables 1 and 6. (b) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. (c) These exchange rates and index numbers relate to the last trading day of the reference period. (d) These exchange rates and index numbers are derived by averaging figures for each trading day.

## EXPLANATORY NOTES

### **Introduction**

1. This publication contains preliminary estimates of Australia's balance of payments for August 1996, together with revised estimates for previous months. More comprehensive quarterly estimates are available in the June quarter 1996 issue of the quarterly balance of payments publication (5302.0) which was released on 27 August 1996.

2. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0). The publication also provides item definitions; explanations of seasonal adjustment and trend estimates; and an analysis of the quality of the estimates.

### **Accuracy, reliability and volatility**

3. Care should be exercised in the use and interpretation of estimates in this publication. The sources available for the production of timely and reliable monthly estimates are limited and the initial estimates are made available very quickly. Consequently, the latest estimates in this publication, to a greater extent than estimates in quarterly and annual balance of payments publications, are preliminary and subject to revision as more complete and accurate information becomes available. Certain items are estimated using extrapolation techniques until source data become available. Further, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components. A detailed assessment of the quality of Australia's balance of payments statistics is provided in the information paper *Quality of Australian Balance of Payments Statistics, 1996* (5342.0) released on 20 February 1996.

4. Particular care should be exercised in interpreting month-to-month movements in original and seasonally adjusted series as short term movements cannot be assumed to indicate changes in trend. The monthly estimates are volatile, being subject to seasonal factors (except where adjusted in Table 2) and large irregular influences. The irregular influences may reflect both random economic events and difficulties of statistical recording. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that the month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted monthly movements with the following frequency:

Balance on current account: 9 in 10 months

Merchandise exports fob: 8 in 10 months

Merchandise imports fob: 9 in 10 months

5. The impact of the irregular influences upon the seasonally adjusted series is reduced by smoothing, as shown by the trend estimates in Table 2 and the graphs. The trend estimates are generally derived by applying a 13-term Henderson-weighted moving average to the seasonally adjusted series.

### **Seasonal adjustment**

6. The factors used in seasonally adjusting the monthly balance of payments statistics during 1996 can be obtained, for \$75.00, by contacting Melissa Marino on Canberra (06) 252 6419.

7. The seasonally adjusted statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.

### **Available longer term series**

8. Estimates for months prior to those shown in this publication are available and can be obtained by contacting Trevor Jolly on Canberra (06) 252 6820. There may be a charge for this information.

### **Related products and services**

9. More detailed merchandise exports and merchandise imports data, including dissections by commodity and country of origin, are also available on an international merchandise trade basis for August 1996 and previous months. These data can be obtained by contacting information services on Canberra (06) 252 5400.

### **Symbols and other usages**

fob	free on board
n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere specified
n.p.	not for publication
n.y.a.	not yet available

## **For more information . . .**

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

### **ABS Products and Services**

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

#### **National Dial-a-Statistic Line**

**0055 86 400**

*Steadycom P/L: premium rate 25c/21.4 secs.*

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

#### **Internet**

<http://www.statistics.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
