# PREFACE.

The Annual Statement of the Oversea Trade of Australia with other countries, and of the Customs and Excise Revenue, for the year 1933-34, together with comparative figures for previous years, has been compiled from documents acquired under the Customs Act and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Trade and Customs.

The Tables of Imports and Exports have been compiled according to an extended Statistical Classification divided into 21 Classes, which came into operation on 1st July, 1922. Since that date the classification has been increased by additional items, and now comprises approximately 545 separate items of Exports and 1,740 items of Imports. An extensive Alphabetical Index of Imports and Exports is given in Table I. (page 7).

Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are stated. In the tables of Exports separate details are given of the exports of Australian Produce and Other Produce, whilst in the Imports Table the quantity or value of goods cleared for consumption and particulars concerning the rates of duty are also shown.

Imports are recorded in British Currency Values (Sterling) while Exports are primarily recorded, generally, in Australian Currency Values. The abnormal variations of exchange rates which have occurred during recent years make accurate comparisons of the yearly export figures somewhat difficult. The rate of exchange with sterling, however, has been constant since 3rd December, 1931. In Tables VI. and VII. the value of exports is shown in Sterling as well as in Australian Currency. Similar conversion values are shown in other places where it has been thought to be desirable.

My best thanks are due to the officers of the Department of Trade and Customs for the prompt supply of the data required for the preparation of this Bulletin, and for their courteous response to numerous inquiries arising from time to time in the course of compilation. I am especially indebted to Mr. W. Campbell, Supervisor of Trade Statistics in this Bureau, and to Mr. H. W. Ransom of this Section, for the care and attention which they have given to the compilation of this Bulletin and the work of seeing it through the Press, and to the staff of the Trade Section also for their cordial co-operation.

E. T. McPHEE,  
Commonwealth Statistician.

# EXPORTS

FROM

## THE COMMONWEALTH OF AUSTRALIA DURING 1932-33 AND 1933-34.

**Value of Exports.**—The value of goods exported (including cost of containers) is recorded in Australian currency, and is, generally, the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows:—

From 1st July, 1929.—*Sugar* (a) sold in Australia for export: The value, f.o.b., at which the sugar is sold to oversea buyers; (b) shipped on consignment: The f.o.b. equivalent of the ruling price of such sugar in the London markets. *Goods on which bounty or rebate is payable on export*: The value of the goods in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930.—*Wool* (a) sold in Australia for export: The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (b) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932.—*Wheat* (a) sold in Australia for export: The f.o.b. equivalent of the price at which the wheat was sold; (b) shipped on consignment: The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934.—*Butter*\* (a) sold in Australia for export: The f.o.b. equivalent of the price at which the butter was sold; (b) shipped on consignment: The f.o.b. equivalent of the current ruling price overseas.

**Exports.**—Goods exported from Australia are shown under two headings—"Australian Produce" and "Other Produce".

"Australian Produce" comprises—(i) Raw materials produced in Australia. (ii) Articles manufactured therefrom. (iii) Articles wholly or partly manufactured in Australia from imported materials.

"Other Produce" represents the re-export of articles produced elsewhere than in Australia.

**Ships' Stores.**—Since the 1st January, 1906, goods shipped as Ships' Stores in Australian Ports on board oversea ships have not been included in Exports. For Ships' Stores see Table V.

**N.E.I.**—Means "not elsewhere included".

**Exporting States.**—Goods transferred from one State of the Commonwealth to another State thereof, for shipment to oversea countries, are shown as exports from the State from which the goods were finally dispatched.

**Classification of Articles.**—An Alphabetical Index of the Articles included in the following table will be found on page 7. The items are shown according to the revised Statistical Classification of Exports which came into operation on 1st July, 1922. In all cases where an item was not exported during the year, the Classification number of the item has been omitted from the following table.

# IMPORTS

INTO

## THE COMMONWEALTH OF AUSTRALIA DURING 1932-33 AND 1933-34.

**Value of Imports.**—The value of goods imported from Countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the *Customs Act 1901-1930* provides that “when any duty is imposed according to value, the value for duty shall be the sum of the following :—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction ; or
- (ii) the current domestic value of the goods, whichever is the higher ;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export ; and
- (c) ten per centum of the amounts specified under paragraphs (a) and (b) of this sub-section.”

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.”

**Quantities.**—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity, or weight of the articles imported, the values only have been inserted.

**Import Duties.**—The duties charged on Imports into the Commonwealth of Australia during the year 1933-34 were collected in accordance with the Customs Tariff 1933, and subsequent Tariff Proposals submitted to Parliament up to and including Proposals dated 25th November, 1933. The rates of Duty shown against the goods cleared have been classified under the “General” and “Preferential” Tariffs. The Tariff under which the goods were cleared is denoted by the particulars shown in parenthesis immediately after the rate of Duty. The following symbols have been used to denote the Tariffs and other particulars :—(G), General ; (P), Preferential (British) ; (C), Preferential (Canada) ; (N), Preferential (New Zealand) ; (Col.), Preferential (British Colonies) ; (R.I.), Re-imported ; (C'wealth), Goods imported for use of Commonwealth Government, Consuls, &c. ; (I.P. Act), Industries Preservation Act. Goods cleared under Customs By-law Items (Nos. 174, 404, 404A, 415A1, 415A2, and 434) are shown by the letter “B” in combination with the symbols shown above, e.g. (G.B.) represents cleared under General Tariff By-laws ; (P.B.), cleared under Preferential Tariff By-laws. (N.E.I.), means “not elsewhere included”. Dumping duties on certain imports were charged under the provisions of the Customs Tariff (Industries Preservation) Act 1921-1933.

**Extra Duty.**—The amounts shown under the heading “Rate of Duty and Gross Amount Received” as “Extra Duty” are amounts which were lodged on deposit pending the ratification of higher duties, paid into Trust Funds, and brought to revenue at a later date.

**Special Duty.**—As from the 3rd April, 1930, a special duty was imposed of 50 per cent. on the amount of duty already imposed on certain items. This special duty was removed in regard to certain of the items on 23rd July, 1931, 25th February, 24th May, 1st September and 13th October, 1932, and 8th March and 5th October, 1933. At the 30th June, 1934, only six Tariff Items remained upon which special duty was levied.

**Primage Duty.**—From the 10th July, 1930, a primage duty of 2½ per cent. *ad valorem* was imposed on all goods, whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff, excepting bullion, specie, radium and certain Governmental and other special imports. The rate of primage duty was subsequently increased to 4 per cent. as from the 6th November, 1930. On the 11th July, 1931, a further amendment came into operation (a) exempting certain aids to primary production and minor imports from primage duty, (b) providing for a rate of 4 per cent. *ad valorem* on a few other items, mainly aids to production, and (c) increasing the *ad valorem* rate of primage duty to 10 per cent. on all other articles imported. Further amendments removing or reducing primage duties took effect from the following dates : 26th February, 1st September, 14th October and 14th November, 1932, and 8th March and 5th October, 1933.

**Exchange Adjustment.**—The Customs Tariff (Exchange Adjustment) Act 1933 came into operation on 5th October, 1933. The Gross Customs Duty figures shown in subsequent tables do not include amounts allowed as deductions under this act.

**Classification of Items.**—In the following table commodities of analogous character have been arranged under categories. The position of any item will be readily found by reference to the alphabetical index on page 7. The items in the table are shown according to the Statistical Classification of Imports which came into operation on 1st July, 1922, and comparative figures are given for the two years 1932-33 and 1933-34. Separate particulars relating to the imports of a large number of new items have been recorded since 1st July, 1922. In all cases where there was no import of a classified item during the year the classification number has been omitted.
