OVERSEA TRADE.

1951-52.

BULLETIN No. 49.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,
BY
S. R. CARVER,
ACTING COMMONWEALTH STATISTICIAN.

PREFACE.

Source of Data.—The Annual Statement of the Oversea Trade of Australia with other countries, and of Customs and Excise Revenue, for the year ended 30th June, 1952, together with comparative figures for previous years in abridged form, has been compiled from documents obtained under the Customs Act and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Trade and Customs.

The Customs Area. to which all overseas trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including the Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

The Trade System.—There are two generally accepted systems of recording overseas trade statistics, namely, (a) special trade and (b) general trade. The United Nations Statistical Office defines the two systems as follows:—

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported).

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

Both special and general trade statistics are contained in this bulletin, greater emphasis being placed on the latter. Special exports, however, may be obtained from Table III., in which totals for statistical items and classes and the grand total are divided into Australian produce and other produce. Special imports are included in Table VI. which relates to imports cleared for home consumption.

Ships' Stores (including bunker coal and oil) are omitted from the tabulation of exports. Table VII. shows the value of these stores.

Outside Packages (containers, crates, &c.) have always been included as a separate item in the tabulation of imports, but, apart from those received from the United Kingdom, a classification according to country of origin has been available only since 1950-51. For exports, however, the value recorded for each item includes the value of the outside package.

Imports and Exports on Government Account are treated as normal transactions and are an integral part of overseas trade statistics.

Currency.—Notes and coins of base metal are included in the overseas trade statistics at their commodity value only.

Gold Content of Ores and Concentrates.—The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold. However, Table XXII. shows the quantity of gold contained in ores and concentrates exported from Australia.

Migrants' Effects are included in imports and exports.

PREFACE—*continued.*

Direct Transit Trade.—Particulars of direct transit trade through Australia are not recorded.

Classification of Imports and Exports.—The tables of imports and exports have been compiled according to a revised statistical classification divided into 21 classes, which came into operation on 1st July, 1945. The classification now comprises 2,858 items of imports and 1,495 items of exports. An extensive alphabetical index of imports and exports is given on page 11. Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are shown.

Presentation of Data.—In order to conserve space, Tables III. and V. have been reduced by limiting data for the previous year to totals for each item. In the case of Table III., separate details of exports of "Australian produce" and "Other produce" are no longer shown for countries of destination and States of final shipment. Particulars of exports of "Other produce" classified according to States of final shipment are given in Table IV. Details of goods cleared for home consumption and duty paid have been excluded from Table V. They appear separately in Table VI., classified according to importing States. For each statistical item the value of goods cleared and the gross amount of duty paid are shown. The value of each statistical item cleared under the various rates of duty has been omitted.

Countries of Destination and Origin.—The countries of destination in respect of exports and of origin in respect of imports are arranged in two divisions, namely—(a) British Countries (including protectorates, mandated territories and territories under condominium) and (b) Foreign Countries. Within each of these divisions the arrangement is alphabetical except that dependencies and possessions of a foreign country follow immediately after that country.

Where, in respect of any statistical item in Tables III. and V., the total value is less than £5,000, details of the States and countries concerned are omitted. Where country details are shown for a statistical item, only those countries with totals of £5,000 or more are shown separately. In cases where the total value of the item is £5,000 or more but the value for each country is less than £5,000, separate mention is made of the country for which the highest value is recorded.

A list of countries of trade is shown in Table I. together with the countries or territories included under each individual country of trade.

Valuation.—Prior to 15th November, 1947, imports into Australia were recorded in "British Currency Values". As from 15th November, 1947, all imports into Australia have been recorded in Australian Currency.

Import and export values throughout this bulletin are expressed in £ Australian f.o.b. port of shipment. Further information concerning the valuation of exports and imports appears on pages 29 and 203 of this issue.

Full explanatory notes on the methods of recording import values before and after 15th November, 1947, were shown immediately after the preface in Oversea Trade Bulletin No. 45, 1947-48.

Supplementary Bulletins.—Supplementary bulletins "Oversea Trade—Preliminary Bulletin, 1951-52" and "Imports Cleared for Home Consumption, 1951-52" were published in September and November, 1952, respectively. The former bulletin contains particulars of imports and exports classified according to statistical item and country of origin or destination, while the latter bulletin shows the quantity and value of goods cleared and duty paid thereon under each tariff item classified according to statistical item, which is further sub-divided according to country of origin and nature of tariff.

I am especially indebted to Mr. V. Fahey, Supervisor, Trade and Transport Branch, and to Mr. A. A. Sluce and the other officers of the Oversea Trade Section, for the care and attention bestowed on the compilation of this bulletin, and the preparation of the material for the printer. My thanks are due also to the officers of the Department of Trade and Customs.

S. R. CARVER,
Acting Commonwealth Statistician.

THE COMMONWEALTH OF AUSTRALIA DURING 1951-52.

Table III. following shows **Total Exports** for each Statistical Item classified according to (i) Country to which exported; (ii) State of Final Shipment and (iii) "Australian Produce" and "Other Produce".

"Australian Produce" comprises—(i) Raw materials produced in Australia; (ii) Articles manufactured therefrom; (iii) Articles wholly or partly manufactured in Australia from imported materials.

"Other Produce" consists of articles produced overseas, imported into Australia and subsequently re-exported. These exports are shown according to States in Table IV.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency and the f.o.b. values have been determined as from 1st July, 1937, as follows:—

- (1) Goods Sold To Overseas Buyers Before Export.—The f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods Shipped On Consignment.—The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

Classification of Articles.—An Alphabetical Index of the Articles included in the following table will be found on page II (Table II.). The items are shown according to the revised Statistical Classification of Imports and Exports which came into operation on 1st July, 1945. In all cases where an item was not exported during the past two years, the classification number of the item has been omitted from the following table. Where the number of a statistical item has been changed since 1950-51 the previous number is shown in parentheses.

Abbreviations.—N.E.I. means "not elsewhere included". N.E.S. means "not elsewhere specified".
